Kinetic analysis of ligand receptor interactions using scatchard plot, double reciprocal plot, Hill plot, forces involved, relationship between dose and effect (graded and quantal response).

##### Unit IV: Principles of drug design

Introduction to SAR, strategies in the search for new lead compounds, analogue synthesis versus rational drug design, concept of prodrugs.

## Unit V: Drug discovery and pharmainformatics

Drug discovery pipeline, drug target identification and validation for microbial pathogen, selection of gene unique to the pathogen, screening for its presence in other microbes and human host, Drug Databases, PubChem, Calculating drug-like properties, introduction to rational drug design methods, optimization of lead compounds, protein 3D structure and bindings it analysis, similarity based virtual screening using online tools.

## **SEMESTER I**

### **BIOCHEMISTRY LAB**

**Course Code: CMBE-551**

**Credit Units: 02**

#### **Course Outcomes:**

- This course regarded as an introduction to basic biochemistry
- And will be useful for students who want to study clinical chemistry.
- The course uses simple protocols and available materials and instruments to understand Biochemical substances.
- Some experiments were put to teach students how to work independently in the any Lab. -
- Modern lab researchers should know the principles of the biochemical methods of analysis and to learn the main theoretical statements.
- For it, medical Lab Science students have to get the minimum of manual skills during a research of biochemistry, eg. Measuring out solutions and biological liquids, centrifugation, colorimetry of colored solutions, determination of pH, peculiarities of the technique of enzyme investigations etc.
- The given manual contains the Descriptions of the biochemical methods of analysis which all the skills are required in.

#### **Detail of the Course:**

- **Introduction:** to the Biochemistry, Safety Rule, Lab report.
- **Lab 1:** Carbohydrate Qualitative tests.
- **Lab2:** Carbohydrate quantitative tests.
- **Lab 3:** Amino acids and protein qualitative tests.
- **Lab 4:** Quantitative determination of proteins by biuret reagent.
- **Lab 5:** Lipids Qualitative tests.
- **Lab 6:** Vitamins, Qualitative and Quantitative tests.
- **Lab 7:** Amino acids titration curves.
- **Lab 8:** RNA preparation and Qualitative tests.
- **Lab 9:** Horizontal and Vertical Electrophoresis.

## SEMESTER I

### BACTERIOLOGY, VIROLOGY & MYCOLOGY & PHYCOLOGY LAB

Course Code: CMBE-553

Credit Units: 02

#### Course Outcome:

After completion of the course the students should be able to

- Differentiate the nature of bacteria, algae, fungi & viruses.
- Understand classification of microorganism.
- Learn the methods of laboratory diagnosis of viruses using different techniques.
- Learn about different plant and animal viruses.

#### Course Details

1. Isolation of coliphages from sewage water sample.
2. One step growth curve for determination of virus titre.
3. Immunological assays for virus detection.
4. Screening of embryonated viable eggs and demonstration of virus cultivation.
5. Cultivation and morphological identification of animal cell lines.
6. Induction of lambda lysogen by UV radiations.
7. Studies on Specialized transduction .
8. Isolation of lambda DNA and their characterization.
9. Amplification of lambda DNA by PCR.
10. Phage typing of E.coli bacteriophages.

#### Suggested Books:

## SEMESTER I

### SEMINAR I

**Course Code: CMBE-581**

**Credit Units: 02**

#### Course Outcomes:

- Describe the measurable skills, abilities, knowledge or values.
- Students should be able to demonstrate as a result of a completing a course.
- They are student-centered rather than teacher-centered.
- They describe what the students will do, not what the instructor will teach.

#### Detail of the course

**Research methods:** Lectures, seminars, and practical exercises that cover themes like what constitutes scientific knowledge

**Research problems:** How to identify and work through research problems

**Primary and secondary sources:** How to become familiar with sources and critique them, and how to research secondary sources

**Research databases:** How to use research database tools

**Research proposals:** How to prepare preliminary interdisciplinary research proposals

#### Examination Scheme:

Components	Internal Assessment			External Evaluation
	Attendance	Class Test	Assignment/Project/Seminar/Quiz	
Weightage (%)	10	20	10	60

## SEMESTER I

### PERSONALITY DEVELOPMENT

Course Code: CMBE-581a

Credit Units: 02

#### Course Outcomes:

- Discovering strengths
- Promoting well-being
- Improving academic performance
- Demonstrating adaptability, persistence, dependability, and resilience
- Seeking and considering feedback from others
- Employing self-reflection to gain insight

#### Course Detail:

**Improved attitude:** People can develop a more positive outlook on life.

**Better employment prospects:** Self-confidence can help people appear more trustworthy and productive, which can lead to better employment opportunities.

**Improved relationships:** People can develop better relationships with coworkers and become role models for others.

**Better communication:** People can develop effective communication skills, such as active listening and using clear language.

**Better emotional intelligence:** People can learn to understand their feelings, turn intentions into action, and build stronger relationships.

**Better time management:** People can learn to organize their time more efficiently.

**Holistic development:** People can contribute to their holistic development.

#### Examination Scheme:

Components	Internal Assessment			External Evaluation
	Attendance	Class Test	Assignment/Project/Seminar/Quiz	
Weightage (%)	10	20	10	60

## **SEMESTER II**

### **MOLECULAR BIOLOGY**

**Course Code: CMBE-502**

**Credit Units: 04**

**Pre-requisite:** Basic information of Cell Biology

#### **Course Outcome:**

- Students will gain an understanding of molecular biology of nucleus and its effect of functioning of an organism.
- Students will understand the concepts of DNA, RNA and will develop an insight into the mechanism of DNA replication in the cell.
- Students will learn about the physiochemical reasons of damage of DNA and their effect on body functioning and will be able to analyze the in vivo mechanism of repair of DNA damage and recombination processes.
- Students will develop an understanding of formation of RNA, different mechanisms in prokaryotes and eukaryotes and processing of final transcriptional products.
- Students will be able to understand the process of protein formation and its control.
- Students will be able to analyze the mechanisms of gene expression and its regulation.

#### **Details of the Course:-**

##### **UNIT-I: Structure of nucleotides and nucleic acids:**

Structures and types of DNA and RNA, packaging of genetic material in prokaryote and eukaryotes.

##### **UNIT-II: DNA replication:**

Replication of DNA in prokaryotes and eukaryotes: Semiconservative nature of DNA replication, Bi-directional replication, Replication enzymes.

##### **UNIT-III: DNA damage, repair and homologous recombination**

DNA damage and repair: causes and types of DNA damage, mechanism of DNA repair: Photoreactivation, base excision repair, nucleotide excision repair, mismatch repair, Nonhomologous end joining. Homologous recombination: models and mechanism.

## UNIT-IV: Transcription and RNA processing:

Transcription in prokaryotes: Prokaryotic RNA polymerase, role of sigma factor, promoter, Initiation, elongation and termination of RNA chains.

Transcription in eukaryotes: Eukaryotic RNA polymerases, transcription factors, promoters, enhancers, mechanism of transcription initiation, promoter clearance and elongation RNA splicing and processing: processing of pre-mRNA: 5' cap formation, polyadenylation, splicing, rRNA and tRNA splicing.

## UNIT-V: Regulation of gene expression and translation

Regulation of gene expression in prokaryotes: Operon concept (inducible and repressible system), Genetic code and its characteristics, Prokaryotic and eukaryotic translation: ribosome structure and assembly, Charging of tRNA, aminoacyl tRNA synthetases, Mechanism of initiation, elongation and termination of polypeptides, Fidelity of translation, Inhibitors of translation. Posttranslational modifications of proteins.

Weight age (%)	10	2 0	10	60

## **SEMESTER II**

### **INHERITANCE BIOLOGY**

**Course Code: CMBE-502a**

**Credit Units: 04**

#### **Course Outcomes:**

- Students will be able to develop an understanding of mechanism and importance of genetic material in prokaryotes and eukaryotes, RNA processing, formation of DNA from RNA and its applications.
- Students will be able to understand the concept of expression of inheritance through genetic code, methods of protein formation and underlying mechanisms in prokaryotes and eukaryotes.
- Students will be able to evaluate the regulation processes in genes of higher and lower organisms.

#### **Details of the course:-**

##### **Unit – 1 DNA Structure and Mutagenesis**

Historical developments in genetics, discovery of DNA and experimental evidence, Structure of Circular DNA molecule, Primary, Secondary, Tertiary and Quaternary structure of DNA, Watson and Crick model of double stranded DNA the law of DNA constancy and C value paradox and topological manipulations. DNA replication: DNA replication mechanism, enzymes involved in DNA replication and models of DNA replication. Molecular basis of spontaneous and induced mutations [physical and chemical mutagenic agents], Types of mutation: point, frameshift, lethal, conditional lethal, inversion and deletion, null mutation, reversion of mutations, intra and intergenic suppression mutations. Environmental mutagenesis, toxicity testing and population genetics. Systems that safeguard DNA. DNA methylation and DNA repair mechanisms - excision, mismatch, SOS, photoreactivation, recombination repair and glycosylase system.

##### **Unit – 2 Prokaryotic Transcription and Translation**

Organization of transcriptional units and regulation of gene expression Mechanism of transcription of prokaryotes-Structure and function of RNA polymerase, [DNA foot printing], termination and antitermination – N proteins and nut sites in DNA binding proteins, enhancer sequences and control of transcription, RNA processing (Capping, polyadenylation, splicing, introns and exons) Ribonucleoprotein, structure of mRNA, rRNA, tRNA. Direction of protein synthesis, RNA template, direction with experimental proof, tRNA as adaptor, ribosomes and their organization in prokaryotes, polycistronic mRNA in bacteria, initiation of translation in bacteria, small sub-units, its accessory factors, SD sequence in bacteria, initiator tRNA, elongation of translation, translocation and termination mechanisms. Post-translational modification. Salient features of genetic code.

##### **Unit – 3 Regulation of gene expression in prokaryotes**

Operon concept, co-ordinated control of structural genes, stringent response, catabolite repression, instability of bacterial RNA, positive regulation in E.coli [Arabinose operon] and negative regulation in E.coli [lac operon], inducers and repressors, regulation by attenuation by trp operon.

**Unit – 4 Genetic recombination**

Genetic recombination processes: Role of rec proteins in homologous recombination. Conjugation: Discovery, F+, F- and Hfr cells, types of Hfr; F+ and F- and Hfr and F- genetic crosses. Mechanism of conjugation. Sexduction, conjugational transfer of colicinogenic and resistance transfer factors. Genetic mapping. Plasmid Replication and Incompatibility, Control of copy number.

Transposons – Insertion sequences and composite transposons, phages as transposons replicative, non-replicative and conservative transposition. Mutations i.e. deletions, inversions and frameshift due to transposition. Mechanism of transposition, controlling elements of maize – autonomous and non-autonomous elements. Types of transposons and their properties.

### Unit – 5 Phage Genetics

T4 virulent phage: structure, life cycle, genetic map and DNA replication. Lambda temperate phage: Structure, genetic map, lytic and lysogenic cycle, lysogenic repression and phage immunity. [Lambda regulon] applications of phages in microbial genetics.

### Suggested Books:

## **SEMESTER II**

## **CYTOLOGY**

**Course Code: CMBE-502b**

**Credit Units: 04**

**Pre-requisite:** Basic information of Cell Biology

### **Course Outcome:**

- Basic chemical composition of living matter.
- Structural characteristics of prokaryotic and eukaryotic cells.
- Taxonomy and characteristics of the major kingdoms.
- Mechanics of membrane transport.
- Basic concepts of bioenergetics, photosynthesis, and cellular respiration.
- Mechanics of cellular reproduction.
- Mendelian genetics and genetic change.
- Nucleic acids and basic concepts of protein synthesis and gene regulation.

### **Details of the Course:-**

#### **UNIT I: Cell:**

Introduction and classification of organisms by cell structure, cytosol, Compartmentalization of eukaryotic cells, cell fractionation Cell Membrane and Permeability: Chemical components of biological membranes, organization and Fluid Mosaic Model

#### **UNIT II: Cell Membrane and Permeability:**

Chemical components of biological membranes, organization and Fluid Mosaic Model, membrane as a dynamic entity, cell recognition and membrane transport. Sex-limited and sex-influenced inheritance, Transposons. Membrane Vacuolar system, cytoskeleton and cell motility: Structure and function of microtubules, Microfilaments, Intermediate filaments

#### **UNIT III: Endoplasmic reticulum:**

Endoplasmic reticulum: Structure, function including role in protein segregation. Golgi complex: Structure, biogenesis and functions including role in protein secretion. Lysosomes: Vacuoles and micro bodies: Structure and functions Ribosomes: Structures and function including role in protein Synthesis.

#### **UNIT IV: Mitochondria:**

Structure and function, Genomes, biogenesis, Chloroplast: Structure and function, genomes,

biogenesis. Nucleus: Structure and function, chromosomes and their structure. Extracellular Matrix: Composition, molecules that mediate cell adhesion

### UNIT V: Membrane receptors:

For extra cellular matrix, macromolecules, regulation of receptor expression and function. Signal transduction. Cancer: Carcinogenesis, agents promoting carcinogenesis, characteristics and molecular basis of cancer.

## SEMESTER II

### Immunotechnology

**Course Code: CMBE-504**

**Credit Units: 04**

**Pre-requisite:** Basic information of Immunotechnology

#### **Course Outcome:**

- Students will acquire knowledge about processing and presentation of immune system.
- Student will be able to understand cell mediated immune response.
- Students will be able to value role of immune system in different diseases.
- Students will be able to apply their knowledge to technologies related to immunology.

#### **Details of the course:**

##### **UNIT I:**

**Introduction to Immunology:** History and terminology, innate and acquired immunity, active and passive immunity, immune responses, cells (T-cells, B-cells) and organs of immune system, cell mediated and humoral immunity, cytokines, toll-like receptors.

##### **UNIT II:**

**Antibody:** Classification, isotypes, fine structure, biosynthesis of immunoglobulin, rearrangement of genes and class switching, complement system.

**Antigen:** Nature of antigens, haptens, adjuvants, vaccines.

##### **UNIT III:**

**MHC complex:** Function, structure and MHC restriction.

##### **UNIT IV:**

**Principles of virulence and pathogenicity:** Host-parasite interactions.

**Transplantation and tumor immunology:** Tumor cell immunity, transplantation of tissues and organs, relationship between donor and recipient, role of MHC molecules in allograft rejection, bone marrow and haematopoietic stem cell transplantation, tumor antigen, tumor immunoprophylaxis.

**Autoimmune diseases:** Autoimmune hemolytic anemia, systemic lupus erythematosus, multiple sclerosis, rheumatoid arthritis, AIDS, diabetes mellitus.

**Inflammation and hypersensitivity:** Hypersensitivity reactions, inflammasome.

**UNIT V:**

**Applied immunotechnology:** Antigen-antibody interaction, affinity and avidity, agglutination and precipitation reactions, immunofluorescence, fluorescence activated cell sorting analysis.

**Antibody engineering:** Hybridoma and monoclonal antibody (Mab), recombinant antibody molecules, human and humanized antibodies, uses of Mab.

**Antigen engineering:** ELISA, RIA, immunodiffusion, immunoelectrophoresis, immunoblotting, antibody for diagnosis, antibody for therapy, cytokine therapy

## **SEMESTER II**

### **FUNDAMENTALS OF INFECTIONS AND IMMUNITY**

**Course Code: CMBE-504a**

**Credit Units: 04**

**Pre-requisite:** Basic information of microbiology, infection, immunity.

#### **Course Outcome:**

- Students will be able to define and explain the fundamental principles of modern immunology.
- Students will be able to *classify* antibodies on the basis of their structures and functions.
- Students will be able to *understand* related immunological techniques and *apply* them in medical laboratory profession.

#### **Details of the course**

##### **UNIT-I: Introduction:**

History: Concept of Innate and Adaptive immunity; Structure, Functions and Properties of: Immune Cells; and (Primary and secondary Lymphoid organs). Active and Passive Immunity.

##### **UNIT – II: Antigens and Antibodies:**

Antigen, Immunogen, Factors contributing immunogenicity, Epitopes, Haptens; Adjuvants

Structure, Types, Functions and Properties of antibodies; Antigenic determinants on antibodies (Isotypic, allotypic, idiotypic); Monoclonal and Chimeric antibodies, Hybridoma Technique. Principles of Precipitation, Agglutination, Immunodiffusion, Immunoelectrophoresis, ELISA, RIA, Immunofluorescence, Immunoelectron microscopy, Complement fixation test.

##### **UNIT – III: Major Histocompatibility Complex and Complement System:**

Organization of MHC locus (Mice & Human); Structure and Functions of MHC I & II molecules; Antigen processing and presentation (Cytosolic and Endocytic pathways). Components of the Complement system; Activation pathways (Classical, Alternative and Lectin pathways).

#### **UNIT – IV: Generation of Immune Response:**

Primary and Secondary Immune Response; Generation of Humoral Immune Response (Plasma and Memory cells); Generation of Cell Mediated Immune Response, T-cell receptor, T-cell maturation, activation and differentiation.

#### **UNIT – V: Immunological Disorders, Tumor Immunity and vaccines:**

Autoimmunity and Autoimmune diseases, Hypersensitivity- Type I Hypersensitivity, Type II Hypersensitivity, Type III Hypersensitivity, Type IV Hypersensitivity; Types of tumors, tumor Antigens, causes and therapy for cancers, Vaccine.

**SEMESTER II**

**HUMAN PATHOLOGY**

**Course Code: CMBE-504b**

**Credit Units: 04**

**Pre-requisite:** Basic understanding of diseases and their pathogenesis

**Course Outcome:**

Students will be able to learn and understand the concepts of how human system works in altered and diseased stage under the influence of various internal and external stimuli.

**Details of the Course:-**

**Unit I:**

History of pathology, basic definitions and familiarization with the common terms used in pathology, techniques used in pathology.

## **Cellular Adaptations, Cell Injury and Cell Death:**

Causes and mechanisms of cell injury: reversible and irreversible injury, Cellular responses: Hyperplasia, Hypertrophy, Atrophy, Metaplasia, Necrosis, Apoptosis, subcellular and intracellular response, (with suitable examples of diseases), Cellular ageing.

## **Unit II: Role of Inflammation in diseases (with suitable examples):**

General features of acute and chronic inflammation: Vascular changes, cellular events, termination of acute inflammatory response. Cells and molecular mediators of inflammation, morphological effects and outcome of acute inflammation. Systemic effects of chronic inflammation, granulomatous inflammation.

## **Unit III: Tissue Renewal And Repair, Healing And Fibrosis:**

Mechanism of tissue regeneration, role of ECM, repair by healing, scar formation and fibrosis, cutaneous wound healing, tissue remodelling in liver (mechanism of fibrosis and cirrhosis).

## **Unit IV: Hemodynamic Pathology:**

Edema, hyperaemia, congestion, haemorrhage, haemostasis and thrombosis, Embolism, Infarction and shock and hypertension.

**Nutritional diseases:** Protein energy malnutrition, deficiency diseases of vitamins and minerals, nutritional excess and imbalances. Role and effect of metals (Zinc Iron and Calcium) and their deficiency diseases.

## **Unit V: Cell proliferation: Cancer:**

Definitions, nomenclature, characteristics of benign and malignant neoplasms, grading and staging of cancer, biology of tumor growth, mechanism of tumor invasion and metastasis, carcinogens and cancer, concept of oncogenes, tumor suppressor genes, DNA repair genes and cancer stem cells.

## **Pathophysiology diseases:**

**A. Aetiology and Pathophysiology of:** Diabetes, Arteriosclerosis, Myocardial infarction, restrictive and obstructive respiratory diseases (COPD), Parkinson, Schizophrenia, Silicosis

**B. Infectious Diseases:** Pathogenesis of diseases and overview of modes of infections, prevention and control with suitable examples like Typhoid, Dengue

## SEMESTER II

### HUMAN PHYSIOLOGY & ANATOMY

Course Code: CMBE-504c

Credit Units: 04

Pre-requisite: Basic information of Animal kingdom system

#### Course Outcome:

- Students will be able to define and explain the fundamental principles of heart.
- Students will be able to understand comparative Respiratory system, Renal Physiology, Reproductive system, Endocrine system and Gastrointestinal system.

- Students will acquire knowledge about the function of different types of organs in different animal kingdom.

## **Details of the Course:-**

### **Unit I: Scope of Physiology and Anatomy:**

Definition of various terms used in Anatomy. Structure of cell, function of its components with special reference to mitochondria and microsomes. Elementary tissues: Elementary tissues of the body, i.e. epithelial tissue, muscular tissue, connective tissue and nervous tissue. Skelton System: Structure and function of Skelton .Classification of joints and their function. Joint disorders.

### **Unit II: Cardiovascular and Respiratory System:**

Composition of blood, functions of blood elements. Blood group and coagulation of blood. Brief information regarding disorders of blood. Name and functions of lymph glands. Structure and functions of various parts of the heart .Arterial and venous system with special reference to the names and positions of main arteries and veins. Blood pressure and its recording. Brief information about cardiovascular disorders.

Respiratory system: Various parts of respiratory system and their functions, physiology of respiration.

### **Unit III: Urinary, Muscular and Central Nervous System:**

Urinary System: Various parts of urinary system and their functions, structure and functions of kidney. Physiology of urine formation. Patho-physiology of renal diseases and edema. Muscular System: Structure of skeletal muscle, physiology of muscle contraction. Names, positions, attachments and functions of various skeletal muscles. physiology of neuromuscular junction.

Central Nervous System: Various parts of central nervous system, brain and its parts, functions and reflex action. Anatomy and physiology of automatic nervous system.

### **Unit IV: Sensory Organs and Digestive System:**

Sensory Organs: Elementary knowledge of structure and functions of the organs of taste, smell, ear, eye and skin. Physiology of pain.

Digestive System: names of various parts of digestive system and their functions. structure and functions of liver, physiology of digestion and absorption.

### **Unit V: Endocrine system and Reproductive System:**

Endocrine System: Endocrine glands and Hormones. Location of glands, their hormones and functions. pituitary, thyroid. Adrenal and pancreas.

Reproductive system: Physiology and Anatomy of Reproductive system.

**Suggested Books:**

**SEMESTER II**

**MICROBIAL GENETICS**

**Course Code: CMBE-506**

**Credit Units: 04**

**Pre-requisite:** Basic information of Genetics & Molecular Biology

**Course Outcome:**

Students will become familiar with basic principles of genetics and underlying mechanisms

- Students will acquire a comprehensive knowledge on molecular basis of cellular activities and mechanisms involved.
- Students will be able to learn about the concepts (structures, arrangements, functions) of nucleic acids and implement their knowledge in replication of lower and higher organisms' genetic material.
- Students will gain an insight into the molecular biology of cancer. They will be able to analyze the factors leading to damage of genetic material and in vivo mechanisms to combat these damages.

**Details of the Course:-**

**UNIT I :** Basic principles of inheritance and exception to Mendelian laws. Gene interaction, complementation, linkage, chromosomal aberrations. Population genetics: Hardy –Weinberg law. Quantitative genetics and applications

**UNIT II :**Chemical and Physical properties of nucleic acids: Nucleosides & Nucleotides. Structural and types of RNA and DNA. The Watson- Crick Model. DNA as genetic material. Different forms of DNA. Topological properties of DNA. DNA reassociation kinetics and cot curve. Packaging of DNA in the prokaryotic nucleoid and eukaryotic chromosomes. Genomic Organization: Unique DNA, Repetitive DNA, Transposable elements.

**UNIT III :**Mechanism of DNA replication in prokaryotes and eukaryotes, DNA Polymerases. DNA damage, DNA repair and recombination mechanism. Retrovirus and introduction to cancer, oncogenes, tumour suppressor genes.

**UNIT IV :**Mechanism of transcription in prokaryotes and eukaryotes. Posttranscriptional processing of RNA: (Capping- polyadenylation, splicing, RNA editing).Reverse transcription

**UNIT V :**Mechanism of translation in prokaryotes and eukaryotes. Post translational modifications. Concept of genetic code. Gene expression and regulation in prokaryotes (Lac operon and **tryptophan operon**). **Gene expression and regulation in eukaryotes, Gene Silencing, RNA Interference.**

**Suggested Books:**

**Examination Scheme:**

Compon ents	Internal Assessment			External Evaluation
	Attendanc e	Cl as s Te st	Assignment/ Project/Seminar/Q uiz	
<b>Weight age (%)</b>	10	2 0	10	60

**Pre-requisite:** Basic knowledge of Medical Oncology.

**Course Outcome:**

- Students would know about the cell cycle, its regulation and carcinogenesis.
- Students will be able to know about the basics of cancer and its types.
- Students will understand about the cancer diagnosis.
- Students will also have knowledge of cancer therapy.

**Details of the Course:**

**UNIT-1**

Modulations of Cell- Cell cycle- ligands and receptors, cell- cellinteractions, integrins, invasions by cancerous cells, angiogenesis, morphogens, mechanism of deregulation of cell cycle during cancer, Apoptosis.

**UNIT-2**

Types of tumor-Benign and malignant tumor, localized and metastasis disease, tumor classification-WHO classification, staging and grading, degree of malignancy, types of chromosomal translocations, Relationship between oncogene products and growth factors- Src, Wnt, GAP.

**UNIT-3**

Carcinogenesis-Oncogenic mutations in growth promoting proteins, Mutations causing loss of cell cycle control, evasion of growth inhibitory signals, cancer genes (oncogenes and tumor suppressor genes), necrosis.

**UNIT-4**

Cancer Diagnosis-Cancer Imaging Techniques, Drug targeting and anti-cancer delivery system, Targeted delivery of anticancer agents using Nanoparticles, colloidal systems for the delivery of anticancer agents.

**UNIT-5**

Cancer therapy-Modulations of immunue response, immunotherapy, Conventional chemotherapy, photodynamic therapy of cancer, Critical analysis of cancer therapy, Cancer vaccines.

**Suggested Books:**

## **SEMESTER II**

### **RADIATION BIOPHYSICS**

**Course Code: CMBE-506b**

**Credit Units: 04**

**Pre-requisite:** Basic knowledge of Radiation Biology & Medical Physics.

#### **Course Outcome:**

At the end of this course, the student should be able:

- To describe the various types of radiation and their biological impact on living cells and tissue at the DNA, cellular, organ and whole animal levels.
- To describe applications of radiation in the research laboratory and to medicine, with emphasis on radiation oncology.
- To employ independent learning strategies to self-evaluate and update professional knowledge of innovations in medical radiation physics.
- To identify medical radiation related instrumentation and apply techniques associated with diagnostic imaging and radiation oncology.

#### **Details of the Course:**

##### **UNIT-1**

Introduction of radiations, basic concept of radioisotopes, types of radioactive decay (gamma and beta emitter), half-life, detection and measurement of radioactivity methods based upon ionization (GM counter), methods based upon excitation (scintillation counter). Use of radioisotopes in cell biology in understanding of DNA replication (bidirectional and theta replication), transcription (labeling of RNA) and labeling of protein using labeled amino acid. Use of radioisotopes in biology: Autoradiography, radioisotopes in diagnosis (thyroid disorders, cancer) and therapy (radiotherapy). Effect of radiations (ionizing and non-ionizing) on living systems, radiation induced damage to cell (chromosome and DNA damage), precautions and safety measures in handling radioisotopes.

##### **UNIT-2**

Electromagnetic spectrum, properties of non-ionizing and ionizing radiation & their biological effects, radiation units, radioactive decay, ionisation power of radiations, binding energy of nucleus, concept of stable and unstable nuclei, different regions of ionising radiations in detectors, hazards of non-ionizing radiation and their control, medical application of radiation sources principles of detection and different methods of counting and counters, dosimetry of high-energy photons, electrons and ions, mapping of gamma detector output.

**UNIT-3**

Biological effects of UV radiation, UV in treatment of skin disorders, Biological effects of LASER, application of LASER, application of microwave radiation and ultrasonic waves, chromosome aberration and gene mutation, molecular aspects of radiation damage and repair, somatic and genetic effects of radiation.

**UNIT-4**

Application of ionizing radiation in industry, agriculture and research, internally administered isotopes, radio-iodine in thyroid function analysis, principles of isotope dilution analysis, circulation time, renal, liver and lung function analysis, principles of X-ray diagnosis, high kV radiography, special procedures such as topography, fluoroscopy, stereoscopy, image intensifiers and television monitoring,

**UNIT-5**

Biomedical imaging techniques and principles of analogue and digital imaging, Ultrasound imaging, nuclear magnetic resonance imaging, X-ray imaging and CT scan, Principle of tomographic techniques, computerised tomography, position emission tomography, application and interpretation of images.

**Suggested Books:**

Weightage (%)	10	20	10	60

## **SEMESTER II**

### **FORENSIC SCIENCE**

**Course Code: CMBE-506c**

**Credit Units: 04**

**Pre-requisite:** Basic knowledge of Forensic Science.

#### **Course Outcome:**

- Students will be able to understand about the basics and different branches of Forensic Sciences.
- Students will be able to know about the working and functioning of Forensic science laboratories.
- Students will learn the Police science, its role in criminal investigation and prevention of crime.
- Students will be able to know how forensic scientists operate and use scientific evidence in a legal context.
- Students will be able to learn the methods of securing, searching and documenting crime scenes.

#### **Details of the Course:**

##### **UNIT -1**

Definition and scope of Forensic Science, History and Development of Forensic Science, Development of Forensic Science in India. Scope and development of forensic science, Forensic science in India, Growth of Core laboratories, set up in country.

##### **UNIT -2**

Introduction to crime, Sociological aspect in society, Types of crimes, Crimes in India, Crime Scene Management, Crime Scene procedures, Protection of crime scene physical evidence- Scientific collection of physical evidence, Crime scene management in man made and natural disaster.

##### **UNIT -3**

Duties of forensic scientist, Various divisions of crime investigation – Toxicology Biology Serology Chemistry Physics Ballistics Prohibition Document and other divisions.

##### **UNIT -4**

Specialised facilities offered by forensic science laboratory – DNA fingerprinting Polygraph Narco analysis, Brain electrical oscillation, signature proficiency (BEOSP).  
Cyber forensic, Tape and video authentication, Speaker identification etc.

##### **UNIT -5**

Concepts of psychology, History of psychology, modern perspectives, types of psychological professionals psychology, The science and research methods, professional and ethical issues in psychology.

**Suggested Books:**

<b>S. No</b>	<b>Name of Authors/Books/Publishers</b>	<b>Year of Publication/Reprint</b>
<b>Text Books</b>

**Examination Scheme:**

<b>Components</b>	<b>Internal Assessment</b>			<b>External Evaluation</b>
	<b>Attendance</b>	<b>Class Test</b>	<b>Assignment/Project/Seminar/Quiz</b>	
<b>Weightage (%)</b>	10	20	10	60

## **SEMESTER II**

### **MICROBIAL PHYSIOLOGY AND DEVELOPMENT**

**Course Code: CMBE-508**

**Credit Units: 04**

**Pre-requisite:** Basic information of biology and microbiology.

#### **Course Outcome:**

At the end of the course, the students will be familiar with microbial technology. This would help students to launch themselves in industrial biotechnology which is the fastest growing industry in the developing country.

#### **Details of the Course:-**

##### **UNIT I:**

Introduction to bacteria, fungi, and viruses, structural and cellular organelles differences among different types and classes ; biochemical/microscopic/molecular methods to differentiate archaea, eubacteria and eukaryotes; microbial evolution, systematics and taxonomy- new approaches to bacterial taxonomy, classification including ribotyping, characteristics of primary domains, taxonomy, nomenclature and Bergey's manual, ribosomal RNA sequencing.

##### **UNIT II:**

Prokaryotic growth patterns and functions - microbial nutrition and growth - arithmetic and geometric growth expression, growth kinetics, growth curve, measurement of growth and growth yields, synchronous growth, continuous culture, diauxic growth, culture collection and maintenance of cultures.

##### **UNIT III:**

Microbial regulation of gene expression (attenuation and negative regulation with e.g. *trp* and *lac* operon), transfer of genetic material: plasmids, transposons, transduction, transformation and conjugation. Mutations and their chemical basis; mutagens and their use in biotechnology; modes of recombination; comparative prokaryotic genomics.

##### **UNIT IV:**

Normal micro flora of skin, oral cavity, gastrointestinal tract; entry of pathogens into the host, types of toxins (exo, endo, entero) and their mode of actions, plant -microbe interactions, microbial pathogenesis -disease reservoirs; epidemiological terminologies; infectious disease transmission.

##### **UNIT V:**

Antimicrobial agents, sulfa drugs, antibiotics -penicillin and cephalosporins, broad spectrum antibiotics, antibiotics from prokaryotes, antifungal antibiotics; mode of action, resistance to antibiotics. Bacteriophage therapy. Potential targets for drug design.

**Suggested Books:**

## SEMESTER II

### ANIMAL TISSUE CULTURE

**Course Code: CMBE-508a**

**Credit Units: 04**

**Pre-requisite:** Basic information of materials chemistry, biochemistry, materials strength, celltissue biology.

#### **Course Outcome:**

To introduce students to the concepts underlie the mechanical and biological properties of synthetic and natural biomaterials and tissue engineering principles and scaffolding techniques.

- The students will be able to explain the concepts of stress and strain, and the parameters used to characterize the physical bulk and surface properties of materials.
- The students will be able to describe the composition, structure and mechanical properties of the main classes of biomaterials- metals, ceramics, polymers, composites and the body tissues; explain and give an example of how composition, structure and treatment modify the mechanical properties.
- The students will be able to explain how to determine the mechanical parameters of materials experimentally; interpret the results of tests and data sheets according to international standards.
- The students will be able to describe the interactions of biomaterials with the biological environment – stability, corrosion, histo-cyto and hemo-compatibility; explain how these interactions are assessed and influenced by material choice and modification.
- The students will be able to describe and the developments of biomaterials for regenerative therapies and tissue engineering; give an example of tissue engineering technique.
- The students will be able to describe and give an example of how biomaterials are used to fabricate devices for clinical use.

#### **Details of the Course:-**

##### **Unit –I**

Introduction of biomaterial, types of biomaterials, advantages and disadvantages, Bio ceramics for implant coating, calcium phosphates, hydroxy apatite, Ti6Al4V and other biomedical alloys, implant and tissue interaction.

## Unit –II

Advantages of Nanomaterials use as implants, biological response of implanted materials, desirable and undesirable reactions of the body with implanted materials, Materials used for orthopaedic implants, bioceramics, modes of failure.

## Unit –III

Materials used for dental, modes of dental implant failure, wear debris, materials used for cartilage and vascular, bladder, modes of cartilage implant, vascular implant, implant failure study, modes of bladder implant failure.

## Unit- IV

Protein interactions with implanted materials, cellular recognition of Proteins adsorbed on material surfaces, adhesion, migration, differentiation, Cellular Extra cellular Matrix deposition leading to tissue regeneration, foreign-body response, inflammatory response.

## Unit- V

Tissue engineering Introduction, Stem cells, Morphogenesis, Generation of tissue in the embryo, Tissue homeostasis, Cellular signaling, Extracellular matrix as a biologic scaffold for tissue engineering, Scaffold fabrication, bioactive scaffold, Natural polymers in tissue engineering applications, Degradable polymers for tissue engineering.

## **SEMESTER II**

### **ANIMAL BIOTECHNOLOGY**

**Course Code: CMBE-508b**

**Credit Units: 04**

**Pre-requisite:** Basic information of Animal Biology

#### **Course Outcome:**

- Students will be able to understand various applications of biotechnology for livestock improvement.
- Students will develop skills for animal cells culture in laboratory.
- Students will learn about the cloning and livestock genetic characterization.
- Students will learn methods of micromanipulation.
- Students will be able to analyze the causes of different animal diseases and their diagnostics.

#### **Details of the Course:-**

##### **Unit I:**

Structure and organization of animal cell and equipments and material for animal cell culture technology. Primary cell culture & establishment of cell lines. History of Animal cell culture medium-balanced salt solution and simple growth medium role of CO<sub>2</sub> serum and supplements. Serum and protein free defined media.

##### **Unit II:**

Viability and cytotoxicity measurement, cell characterization, growth kinetics. Scaling-up of animal cell culture. Cell synchronization, Cellcloning & micro manipulation.

##### **Unit III:**

Recombinant approaches to vaccine production; Hybridoma technology; Diagnostic assays based on Antigen-antibody; radioi-mmuoassay and enzyme immunoassays; Immunoblotting; Nucleic acid Restriction endonuclease analysis; PCR, Real time PCR; Nucleic acid sequencing; Animal disease diagnostic kits; Probiotics.

##### **Unit IV:**

Cryopreservation of sperms and ova of livestock; Artificial insemination; Super ovulation; in vitro fertilization; Culture of embryos; Cryopreservation of embryos; Embryo transfer; Embryo-splitting; Embryo sexing; Micromanipulation of animal embryos.

##### **Unit V:**

Transgenic animal technology and its different applications; Animal cloning- basic concepts; Cloning from embryonic cells and adult cells; Ethical, social and moral issues related to cloning; in situ and ex situ preservation of germplasm; in uterotesting of foetus for genetic defects; Pregnancy diagnostic kits;

## SEMESTER II

### Research Methodology

**Course Code: CMBE-510**

**Credit Units: 03**

**Pre-requisite:** Basic information of Animal Biology

#### **Course Outcome:**

- Describe the measurable skills, abilities, knowledge or values.
- Students should be able to demonstrate as a result of a completing a course.
- They are student-centered rather than teacher-centered.
- They describe what the students will do, not what the instructor will teach.

#### **Details of the Course:-**

**Unit-I:** Meaning of Research - Function of Research Meaning of Research - Function of Research ,Characteristics of Research ,Steps involved in Research ,Research in Pure and Applied Sciences - Inter Disciplinary Research Factors which hinder Research ,Significance of Research - Research and scientific methods ,Research Process,Criteria of good Research ,Problems encountered by Researchers ,Literature review.

**Unit - II:** Identification of Research Problem Selecting the Research problem ,Necessity of defining the problem ,Goals and Criteria for identifying problems for research. Perception of Research problem ,Techniques involved in defining the problem ,Source of problems, Personal consideration. Methods of investigation-sampling techniques and theories, editing, classification and tabulation of data, and frequency distribution of data.

**Unit- III:** Research Design Formulation of Research design ,Need for Research design ,Features of a good design ,Important concepts related to Research design. Different research designs ,Basic principles of experimental designs ,Computer and internet in designs.

**Unit-IV:** Interpretation and Report Writing Meaning and Technique of interpretation ,Precautions in interpretation ,Significance of report writing ,Different steps in writing a report ,Layout of a Research report. Types of report ,Mechanics of writing a research report ,Precautions for writing a research report ,Conclusion.

**Unit -V:** Statistical Techniques and Tools Introduction of statistics, Functions, Limitations, Measures of central tendency - Arithmetic mean ,Median ,Mode ,Standard deviation – Co-efficient of variation (Discrete serious and continuous serious) ,Correlation - Regression Multiple Regression. Sampling distribution ,Standard error ,Concept of point and interval estimation ,Level of significance ,Degree of freedom ,Analysis of variance ,One way and two way classified data ,‘F’-test.

### **RESEARCH ETHICS**

**Course Code: CMBE-510a**

**Credit Units: 03**

**Pre-requisite:** Basic information of Animal Biology

#### **Course Outcome:**

- Describe the ethics related to the research.
- Students should be able to demonstrate an ethical experiment.
- They are student-centered rather than teacher-centered.
- They describe what the students will do, not what the instructor will teach.

#### **Details of the Course:-**

##### **Unit I:**

Introduction to Philosophy, definition, nature and scope, concept, branches. Ethics: definition, moral philosophy, nature of moral judgments and reactions.

##### **Unit II:**

Scientific conduct (ethics with respect to science and research, Intellectual honest and research integrity.

##### **Unit III:**

Scientific Misconducts: Falsification, Fabrification, and Manipulation, Selective reporting and misrepresentation of data.

##### **Unit IV:**

Publication Ethics- Definition, introduction and importance, best practices and guide lines, identification of publication misconduct, complaints and appeals.

##### **Unit V:**

Predatory publishers and journals, approved and peer reviewed, research journals, plagiarism and how to detect plagiarism.

## SEMESTER II

### MOLECULAR BIOLOGY LAB

**Course Code: CMBE-552**

**Credit Units: 02**

**Pre-requisite:** Basic information of laboratory techniques used in molecular biology.

#### Course Outcomes:

- This course regarded as an introduction to basic Molecular biology techniques.
- The course uses simple protocols and available materials and instruments to understand Molecular materials.
- For it, medical Lab Science students have to get the minimum of manual skills during a research of molecular biology, eg. DNA isolation, electrophoresis, buffer preparation, PCR, etc.
- The given manual contains the Descriptions of the molecular methods of analysis which all the skills are required in.

#### Detail of the Course:

1. **Laboratory Safety and Techniques:** Safety regulations, aseptic techniques, pipette use, and basic laboratory equipment.
2. **DNA Isolation and Quantification:** Isolation of genomic DNA and plasmid DNA, DNA quantification using spectrophotometry.
3. **Polymerase Chain Reaction (PCR):** Basic PCR principles, designing primers, PCR optimization, and analysis of PCR products.
4. **Agarose Gel Electrophoresis:** Separation and visualization of DNA fragments.
5. **Restriction Enzyme Digestion:** Restriction enzyme digestion of DNA, analysis of restriction fragments.
6. **DNA Cloning:** Ligation of DNA fragments into vectors, transformation of competent cells, and selection of recombinant clones.
7. **Protein Expression and Purification:** Induction of protein expression, cell lysis, and protein purification techniques (e.g., affinity chromatography).
8. **Molecular Biology Applications:** Techniques like DNA sequencing, real-time PCR

## SEMESTER II

### MICROBIAL GENETICS & MICROBIAL PHYSIOLOGY LAB

**Course Code: CMBE-554**

**Credit Units: 02**

**Pre-requisite:** Basic information of laboratory techniques used in microbial genetics & microbial physiology.

#### Course Outcomes:

- Develop practical skills in aseptic techniques, microbial culture, and laboratory techniques.
- Learn to design experiments, analyze data, and draw conclusions.
- Gain understanding of microbial growth, metabolism, genetic mechanisms, and biotechnological applications.
- Acquire problem-solving skills and adapt to experimental challenges.

#### Detail of the Course:

1. Aseptic Techniques: Mastering sterile techniques for handling microorganisms.
2. Media Preparation: Preparing various culture media (solid and liquid) for bacterial growth.
3. Microbial Growth Curve: Monitoring bacterial growth over time using spectrophotometry.
4. Effect of Physical and Chemical Factors on Microbial Growth: Studying the impact of factors like temperature, pH, and antibiotics.
5. Genetic Transformation: Introducing foreign DNA into bacteria using techniques like heat shock and electroporation.
6. DNA Isolation and Purification: Extracting and purifying genomic DNA and plasmid DNA.
7. PCR and Gel Electrophoresis: Amplifying specific DNA sequences and analyzing them using gel electrophoresis.
8. Microbial Enzyme Assays: Measuring enzyme activity under different conditions to understand metabolic pathways.

#### Suggested Books:

## SEMESTER II

### SEMINAR II

Course Code: CMBE-582

Credit Units: 02

#### Course Outcomes:

- Describe the measurable skills, abilities, knowledge or values.
- Students should be able to demonstrate as a result of a completing a course.
- They are student-centered rather than teacher-centered.
- They describe what the students will do, not what the instructor will teach.

#### Detail of the course

**Research methods:** Lectures, seminars, and practical exercises that cover themes like what constitutes scientific knowledge

**Research problems:** How to identify and work through research problems

**Primary and secondary sources:** How to become familiar with sources and critique them, and how to research secondary sources

**Research databases:** How to use research database tools

**Research proposals:** How to prepare preliminary interdisciplinary research proposals

#### Examination Scheme:

Components	Internal Assessment			External Evaluation
	Attendance	Class Test	Assignment/Project/Seminar/Quiz	
Weightage (%)	10	20	10	60

## SEMESTER III

### RECOMBINANT DNA TECHNOLOGY

**Course Code: CMBE-601**

**Credit Units: 04**

**Pre-requisite:** In-depth knowledge of Recombinant DNA Technology

#### **Course Outcome:**

- The student will be familiar with the historical background and important milestones, biosafety and bioethics in genetic engineering.
- The student will be acquainted with tools of RDT like enzymes, vectors and hosts.
- The student will be acquainted with technical knowhow of gene cloning and expression and factors for optimizing the heterologous gene expression.
- The student will be acquainted with the techniques required for gainful applications of genetic engineering.
- The student will be able to apply RDT in different domains of life science, medical, agriculture, forensic and allied fields for the welfare of living beings.

#### **Details of the Course:-**

##### **Unit I: Introduction and scope of RDT:**

Recombinant DNA, Milestones in genetic engineering, Biosafety and Bioethics, Overview of Scope and Applications of Recombinant DNA Technology. Isolation of nucleic acid (plasmid, DNA and RNA), quantification and its purity.

##### **Unit II: Tools and strategies of molecular cloning:**

Enzymes in Recombinant DNA Technology and its applications: Nucleases, Restriction endonucleases, DNA Polymerases, Terminal transferase, Reverse transcriptase, Kinase and Phosphatase, DNA ligases (T4 DNA ligase and *E.coli* DNA ligase).

Structure and strategies of cloning and screening of vectors based upon: Plasmids, Cosmids, Phages, Artificial Chromosomes (BAC and YAC), and hybrid vectors, shuttle vectors, plant vectors (*Agrobacterium* and virus based), expression vectors.

##### **Unit III: Gene Cloning and Expression:**

Cloning and screening strategies (including directional cloning): Cutting and joining vector and insert DNA, transformation of recombinant DNA in host, methods for screening of Transformants. Introduction to gene expression (Prokaryotic and eukaryotic expression). Synthesis of cDNA, Construction of cDNA library and genomic DNA library.

##### **Unit IV: Methods in RDT:**

DNA, RNA and Protein analysis: Agarose gel electrophoresis, SDS-PAGE, Gel Shift Assay. Blotting

techniques: Southern-, Northern- and Western blotting, probe labeling and hybridization; Polymerase Chain Reaction: Principle, methodology and application; variants of PCR. Molecular markers and their applications; DNA microarray analysis; Chromosome walking; Site directed mutagenesis.

**Unit V: Application of RDT:**

Transgenic Technology: Types approaches and application (Plant and Animals); Gene therapy: Principles, strategies and ethics of human gene therapy; DNA Fingerprinting and application of DNA technology in forensics and parental disputes; Products of recombinant DNA technology: human therapeutic- insulin, hGH, recombinant vaccines.

**Suggested Books:**

**Examination Scheme:**

Components	Internal Assessment			External Evaluation
	Attendance	Class Test	Assignment/Project/Seminar/Quiz	
Weightage (%)	10	20	10	60

## SEMESTER III

## NANOTECHNOLOGY

**Course Code: CMBE-601a**

**Credit Units: 04**

### Unit I

**Background to Nanoscience:** Definition of Nano, Scientific revolution-Atomic Structure and atomic size, emergence and challenges of nanoscience and nanotechnology, carbon age-new form of carbon (CNT to Graphene), influence of nano over micro/macro, size effects and crystals, large surface to volume ratio, surface effects on the properties.

### Unit II

**Types of nanostructure and properties of nanomaterials:** One dimensional, Two dimensional and Three dimensional nanostructured materials, Quantum Dots shell structures, metal oxides, semiconductors, composites, mechanical-physical-chemical properties.

### Unit III

**Application of Nanomaterial:** Ferroelectric materials, coating, molecular electronics and nanoelectronics, biological and environmental, membrane based application, polymer based application.

### Unit IV

**Surface Nanoscience:** Introduction to surface active agents. Theory and applications. Types of surfactants. Classification, synthesis of surfactant - Shape, size and structure of surfactants. Micelle, Emulsions, Microemulsions & Gels. Kraft temperature, surfactant geometry and packing.

### Unit V

**Colloidal Nanoscience:** Introduction to colloidal material, surface properties, origin of colloidal particles, preparation & characterization of colloidal particles. Applications of super hydrophilic hydrophobic surfaces, self-cleaning surfaces. Surface viscosity.

### Suggested Books:

Weightage (%)	10	20	10	60

## SEMESTER III

### GENETIC ENGINEERING

**Course Code: CMBE-601b**

**Credit Units: 04**

**Pre-requisite:** In-depth knowledge of Genetic Engineering.

#### **Course Outcome:**

- The student will be familiar with the historical background and important milestones, biosafety and bioethics in genetic engineering.
- The student will be acquainted with tools of RDT like enzymes, vectors and hosts.
- The student will be acquainted with technical knowhow of gene cloning and expression and factors for optimizing the heterologous gene expression.

#### **Details of the Course:-**

##### **Unit I: Introduction and scope of RDT:**

Recombinant DNA, Milestones in genetic engineering, Biosafety and Bioethics, Overview of Scope and Applications of Recombinant DNA Technology. Isolation of nucleic acid (plasmid, DNA and RNA), quantification and its purity.

##### **Unit II: Tools and strategies of molecular cloning:**

Enzymes in Recombinant DNA Technology and its applications: Nucleases, Restriction endonucleases, DNA Polymerases, Terminal transferase, Reverse transcriptase, Kinase and Phosphatase, DNA ligases (T4 DNA ligase and *E.coli* DNA ligase).

Structure and strategies of cloning and screening of vectors based upon: Plasmids, Cosmids, Phages, Artificial Chromosomes (BAC and YAC), and hybrid vectors, shuttle vectors, plant vectors (*Agrobacterium* and virus based), expression vectors.

##### **Unit III: Gene Cloning and Expression:**

Cloning and screening strategies (including directional cloning): Cutting and joining vector and insert DNA, transformation of recombinant DNA in host, methods for screening of Transformants. Introduction to gene expression (Prokaryotic and eukaryotic expression). Synthesis of cDNA, of cDNA library and genomic DNA library.

##### **Unit IV: Methods in RDT:**

DNA, RNA and Protein analysis: Agarose gel electrophoresis, SDS-PAGE, Gel Shift Assay. Blotting techniques: Southern-, Northern- and Western blotting, probe labeling and hybridization; Polymerase

Chain Reaction: Principle, methodology and application; variants of PCR. Molecular markers and their applications; DNA microarray analysis; Chromosome walking; Site directed mutagenesis.

### Unit V: Application of RDT:

Transgenic Technology: Types approaches and application (Plant and Animals); Gene therapy: Principles, strategies and ethics of human gene therapy; DNA Fingerprinting and application of DNA technology in forensics and parental disputes; Products of recombinant DNA technology: human therapeutic- insulin, hGH, recombinant vaccines.

## **SEMESTER III**

### **GENOMICS & PROTEOMICS**

**Course Code: CMBE-601c**

**Credit Units: 04**

**Pre-requisite:** In-depth knowledge of genomics and proteomics.

#### **Course Outcome:**

- The student will be able to understand human genome, genome sequencing approaches, genome mapping, next generation DNA sequencing platforms and molecular markers.
- The student will be able to know the methods of functional genomics, gene annotation and modern techniques of gene editing, deletion and silencing.
- The student will be able to know introductory account of sub branches of genomics e.g comparative genomics, epigenomics, metagenomics, Pharmacogenomics etc. and selected model organisms used in genomic studies.
- The students will be able to know Proteomics and Transcriptomics along with its methods and application.

#### **Details of the Course:-**

##### **UNIT I: Structural Genomics:**

The Genome: Components and their organization; Genome mapping; Genetic and Physical mapping; Genome sequencing: shotgun sequencing and Clone contig methods; Conventional methods of DNA sequencing and next generation DNA sequencing strategies; Human Genome project.

##### **UNIT II: Functional genomics:**

Gene discovery-forward and reverse genetics approaches; Molecular mapping and tagging mutagenesis-insertional mutagenesis, directed mutagenesis by homologous recombination, Loss of function and gain of function mutants; RNA interference and Antisense technology; Gene editing technology.

##### **UNIT III:**

Introduction to Comparative genomics, Epigenetic and Epigenomics, Toxicogenomics, Pharmacogenomics and Metagenomics.

Model Organisms: *Saccharomyces cerevisiae* (yeast), *Mus musculus* (Mouse), *Arabidopsis thaliana* (Thale Cress) etc.

##### **UNIT IV: Proteome and Proteomics:**

2D SDS-PAGE, Isolation and sequence analysis of spots by Mass Spectroscopy; Cell free protein synthesis in wheat germ cells and Rabbit reticulocyte lysate; Protein-Protein Interaction: Yeast Two Hybrid System and Phage display.

## UNIT V:

Introduction to Transcriptomics; Quantitative (Real-Time) PCR, Nucleic acid Micro-arrays: and its applications.

### SEMESTER III

### GENE THERAPY

**Course Code: CMBE-601d**

**Credit Units: 04**

**Pre-requisite:** In-depth knowledge of genes and gene therapy

#### Course Outcomes:

- The student will be acquainted with the techniques required for gainful applications of gene therapy.
- The student will be able to apply gene modification techniques for better hereditary of life science, medical, agriculture, forensic and allied fields for the welfare of living beings.

#### Detail of the course:

##### Unit I

Systematic position of microorganisms in the living world. Classification of microorganisms: Haeckel's three kingdom concept, Whittaker's five kingdom concept, three domain concept of Carl Woese, Historical account of bacterial classification. Detailed account of bacterial classification according to the 1st edition of Bergey's Manual of Systematic Bacteriology (up to sections); Detailed account of bacterial classification according to the 2nd edition of Bergey's Manual of Systematic Bacteriology (up to orders).

##### Unit II

Characteristics, classification and economic importance of the following sections (Bergey's Manual of Systematic bacteriology 1st edition). Spirochetes, Gram – negative aerobic rods and cocci: Facultative anaerobic Gram - negative rods, Rickettsia and Chlamydia; Mycoplasma, Endospore-forming Gram - positive rods and cocci; Mycobacteria, Anoxygenic photosynthetic bacteria and Oxygenic photosynthetic bacteria; Aerobic chemolithotrophic bacteria, Archaea and Actinomycetes

##### Unit III

Brief account of discovery of viruses, chemical composition of viruses; morphology, architecture, principles of symmetry with reference to T4, TMV, Adeno, Polio, Influenza, Rhabdo, Reo and HIV viruses. Nucleic acid diversity in viruses; sub viral particle satellite viruses, viroids, DI particles and prions; Taxonomy of viruses: classification and nomenclature of viruses as per ICTV; Isolation, purification, cultivation, assay and characterization of plant, animal and bacterial viruses.

##### Unit IV

Life cycles of bacterial viruses; one step growth curve, lytic and lysogenic cycles with reference to T4, \_ and \_ X 174. Importance of phages; Classification and nomenclature of plant viruses, replication of TMV and CaMV; Classification and replication of animal viruses (Adeno, Influenza, Herpes, Hepatitis and Retro viruses); Transmission and management of plant and animal viral diseases (interferons, antiviral drugs and vaccines etc.)

### **GREY BIOTECHNOLOGY**

**Course Code: CMBE-601e**

**Credit Units: 04**

**Pre-requisite:** In-depth knowledge of environmental science and biotechnology implications

#### **Course Outcome:**

- The student will be able to understand human genome, genome sequencing approaches, genome mapping, next generation DNA sequencing platforms and molecular markers.
- The student will be able to know the methods of functional genomics, gene annotation and modern techniques of gene editing, deletion and silencing.
- The student will be able to know introductory account of sub branches of genomics e.g comparative genomics, epigenomics, metagenomics, pharmacogenomics etc. and selected model organisms used in genomic studies.
- The students will be able to know Proteomics and Transcriptomics along with its methods and application.

#### **UNIT I: Bioremediation**

The two main types of bioremediation are in situ and ex situ. Bioremediation is a biological clean-up process that uses microorganisms to eliminate chemical contamination.

#### **UNIT II: Bioaugmentation**

This process involves introducing indigenous and exogenous strains to increase the activity of enzymes that treat contaminated soil and water.

#### **UNIT III: Bioventing**

This is a cost-effective and efficient technology that remediates petroleum-contaminated sites by circulating air through the sub-surface.

#### **UNIT IV: Biocatalysts**

Biocatalysts have emerged as enablers in gray biotechnology. Some topics related to biocatalysts include:

Economics of biocatalytic processes Non-aqueous enzymology Enzyme immobilization Flow biocatalysis Whole cell biocatalysis and co-enzyme regeneration

## **SEMESTER III**

### **CELLULAR MICROBIOLOGY**

**Course Code: CMBE-603**

**Credit Units: 04**

**Pre-requisite:** Basic information of Cell Biology

#### **Course Outcome:**

- Students will acquire knowledge about basics of cell biology.
- Students will learn about how various functions of organelles and their working.
- Students will gain an insight into microscopic structures and chemical components of various regions of cells.
- Students will attain a comprehensive knowledge of functioning of cell and synchronization of activities of various organelles.
- Students will be able to learn about various signaling mechanism involved in a cell which ultimately leads to a visible physiological response.
- Students will be able to understand the architectural components involved in making cells rigid and how cells are connected to each other.
- Students will learn about molecular events involved in cell cycle.
- Students will apply the information gained in understanding the issues and conditions encountered if things go wrong with cell cycle and how our understanding of cell signaling generate drug targets.

#### **Details of the Course:-**

##### **Unit I:**

Introduction to prokaryotes, eukaryotes & cell theory, Introduction to microscopy, Plasma Membrane: structure – organization, lipid bilayer, proteins & glycoconjugates, liposomes, functions – ionic transport, types of transport (symport, antiport, active & passive), channel proteins, Intracellular compartmentalization: structure, organization and functions of nucleus, mitochondria, lysosome, golgi body chloroplast, peroxisome, endoplasmic reticulum (rough and smooth).

**Unit II:**

Vesicular traffic in the secretory and endocytic pathway: transport from endoplasmic reticulum through the golgi network to lysosome, endocytosis, exocytosis, molecular mechanisms of vesicular transport and the maintenance of compartments diversity.

Cell signaling: general mechanistic principles

Types of signaling, GPCR, RTK with examples, Calcium Signaling, Mechanism of Chemotaxis, signal transduction and vision.

**Unit III:**

Vesicular traffic in the secretory and endocytic pathway: transport from endoplasmic reticulum through the golgi network to lysosome, endocytosis, exocytosis, molecular mechanisms of vesicular transport and the maintenance of compartments diversity. Cell signaling: general mechanistic principles Types of signaling, GPCR, RTK with examples, Calcium Signaling, Mechanism of Chemotaxis, signal transduction and vision Significance of vesicular trafficking and cell signaling

**Unit IV:**

Cancer-Biology: Types of cancer, onset of cancer, proto- oncogenes and tumor suppresser genes, oncogenic mutations affecting cell proliferation, cell cycle and genome stability.

Programmed cell death & unprogrammed cell death.

Expression patterns of proteins & enzymes during cell proliferation

**Unit V:**

Introduction to Developmental Biology, History and Basic Concepts, Basics of model systems: Vertebrate Model Systems, Invertebrate and Plant Model Systems, basic patterning and development plan of model Plan, initial division pattern, and evolution and development biology

**Suggested Books:**

## SEMESTER III

### MOLECULAR DIAGNOSTIC

**Course Code: CMBE-603a**

**Credit Units: 04**

**Pre-requisite:** Basic knowledge of immunology and molecular biology

#### Course Outcome:

- Students will gain new insights about different diagnostic procedures.
- Students will be able to use critical thinking skills to trouble shoot problems as they occur and determined possible causes
- Students will be able to apply the knowledge of molecular testing to the most commonly performed applications in the clinical laboratory.

#### Details of the Course:-

##### UNIT I: Enzyme Immunoassays:

Solid phases, Comparison of enzymes, conjugation of enzymes, Use of polyclonal or monoclonal antibodies, Immunoblotting, Radioimmunoassay.

##### UNIT II: Molecular methods in diagnostics:

Applications of PCR, RFLP, Nuclear hybridization methods LAMP method in transgenics.

### **UNIT III: Prenatal diagnosis:**

Invasive techniques - Amniocentesis, Fetoscopy, Chorionic Villi Sampling (CVS), Non-invasive techniques - Ultrasonography, X-ray, TIFFA.

### **UNIT IV: Biochemical diagnostics:**

Inborn errors of metabolism, haemoglobinopathies, mucopolysaccharidoses, lipidoses, and glycogen storage disorders.

### **UNIT V: Automation in microbial diagnosis:**

Rapid diagnostic approach including technical purification and standardization of antigen and specific antibodies.

## **SEMESTTER III**

### **MEDICAL MICROBIOLOGY**

**Course Code: CMBE-605**

**Credit Units: 04**

**Pre-requisite:** Basic information of Medical Microbiology

#### **Course Outcome:**

Upon successful completion of this course the student will be able to:

- This course provides learning opportunities in the basic principles of medical microbiology and infectious disease.
- It covers mechanisms of infectious disease transmission, principles of aseptic practice, and the role of the human body's normal microflora.
- The course provides the conceptual basis for understanding pathogenic microorganisms and the mechanisms by which they cause disease in the human body.
- It also provides opportunities to develop informatics and diagnostic skills, including the use and interpretation of laboratory tests in the diagnosis of infectious diseases.
- To understand the importance of pathogenic bacteria in human disease with respect to infections of the respiratory tract, gastrointestinal tract, urinary tract, skin and soft tissue.
- Helps to understand the use of lab animals in medical field.
- Recall the relationship of this infection to symptoms, relapse and the accompanying pathology.
- Explain the methods of microorganisms' control, e.g. chemotherapy & vaccines. Solve problems in the context of this understanding.

#### **Details of the Course:-**

##### **UNIT I: General Microbiology:**

Morphology and classification of microorganisms. Growth, nutrition and multiplication of bacteria. Sterilization and Disinfection - Principles and use of equipment's of sterilization namely hot air oven, autoclave and serum inspissator, pasteurization, antiseptics and disinfectants. Immunology - antigen, Antibodies, Immunity, vaccines, types of vaccine and immunization schedule. Hospital acquired infection - Causative agents, transmission methods, investigation, prevention and control of hospital Acquired infections.

##### **UNIT II: Bacteriology:**

Classification of bacteria, morphology, infections, lab diagnosis, treatment and prevention of common bacterial infections. Staphylococcus, Streptococcus, Pneumococcus, Neisseria, Corynebacterium diphtheriae, Clostridia, Enterobacteriaceae

- Shigella, Salmonella, Klebsiella, E.coli, Proteus, Vibrio cholerae, Pseudomonas and Spirochetes.

**UNIT III: Mycobacteriology & Parasitology:**

Mycobacteria- classification, pathogenesis, lab diagnosis and prevention. Classification, infections and lab diagnosis of following parasites. Entamoeba, Giardia, Malaria, Hookworm, Roundworm and Filarial worms.

**UNIT IV: Mycology:**

Morphology, disease caused and lab diagnosis of following fungi. Candida, Cryptococcus, Dermatophytes, opportunistic fungi (Aspergillus, Zygomycetes and Penicillium).

**Unit V: Virology:**

General properties of viruses, diseases caused lab diagnosis and prevention of following viruses, Herpes, Hepatitis, HIV, Dengue, Influenza, Chikungunya, Rabies and Poliomyelitis.

## **SEMESTER III**

### **MEDICAL LAB DIAGNOSTIC**

**Course Code: CMBE-605a**

**Credit Units: 04**

**Pre-requisite:** Basic understanding of diseases and their pathogenesis

### **Course Outcome:**

Students will be able to learn and understand the concepts of how human system works in altered and diseased stage under the influence of various internal and external stimuli.

### **Details of the Course:-Unit I: Introduction:**

History of pathology, basic definitions and familiarization with the common terms used in pathology, techniques used in pathology.

### **Cellular Adaptations, Cell Injury and Cell Death:**

Causes and mechanisms of cell injury: reversible and irreversible injury, Cellular responses: Hyperplasia, Hypertrophy, Atrophy, Metaplasia, Necrosis, Apoptosis, subcellular and intracellular response, (with suitable examples of diseases), Cellular ageing.

### **Unit II: Role of Inflammation in diseases (with suitable examples):**

General features of acute and chronic inflammation: Vascular changes, cellular events, termination of acute inflammatory response. Cells and molecular mediators of inflammation, morphological effects and outcome of acute inflammation. Systemic effects of chronic inflammation, granulomatous inflammation.

### **Unit III: Tissue Renewal And Repair, Healing And Fibrosis:**

Mechanism of tissue regeneration, role of ECM, repair by healing, scar formation and fibrosis, cutaneous wound healing, tissue remodelling in liver (mechanism of fibrosis and cirrhosis).

### **Unit IV: Hemodynamic Pathology:**

Edema, hyperaemia, congestion, haemorrhage, haemostasis and thrombosis, Embolism, Infarction and shock and hypertension.

**Nutritional diseases:** Protein energy malnutrition, deficiency diseases of vitamins and minerals, nutritional excess and imbalances. Role and effect of metals (Zinc Iron and Calcium) and their deficiency diseases.

### **Unit V: Cell proliferation: Cancer:**

Definitions, nomenclature, characteristics of benign and malignant neoplasms, grading and staging of cancer, biology of tumor growth, mechanism of tumor invasion and metastasis, carcinogens and cancer, concept of oncogenes, tumor suppressor genes, DNA repair genes and cancer stem cells.

### Pathophysiology diseases:

**A. Aetiology and Pathophysiology of:** Diabetes, Arteriosclerosis, Myocardial infarction, restrictive and obstructive respiratory diseases (COPD), Parkinson, Schizophrenia, Silicosis

**B. Infectious Diseases:** Pathogenesis of diseases and overview of modes of infections, prevention and control with suitable examples like Typhoid, Dengue

## **SEMESTER III**

### **MICROBIAL TECHNOLOGY**

**Course Code: CMBE-607**

**Credit Units: 04**

**Pre-requisite:** Basic information of biotechnology and microbiology.

#### **Course Outcome:**

At the end of the course, the students will be familiar with microbial technology. This would help students to launch themselves in industrial biotechnology which is the fastest growing industry in the developing country.

#### **Details of the Course:-**

##### **Unit I:**

Introduction of microbes, taxonomy and classification, Introduction to bacteria, fungi, and viruses, structural and cellular organelles differences among different types and classes, biochemical/microscopic/molecular methods to differentiate archaea, eubacteria and eukaryotes; microbial evolution, systematics and taxonomy- new approaches to bacterial taxonomy, classification including ribotyping, characteristics of primary domains, taxonomy, nomenclature and Bergey's manual, ribosomal RNA sequencing.

##### **Unit II:**

Prokaryotic growth patterns and functions - microbial nutrition and growth - arithmetic and geometric growth expression, growth kinetics, growth curve, measurement of growth and growth yields, synchronous growth, continuous culture, diauxic growth, culture collection and maintenance of cultures.

##### **Unit III:**

Microbial regulation of gene expression (attenuation and negative regulation with e.g. trp and lac operon), transfer of genetic material: plasmids, transposons, transduction, transformation and conjugation.

Mutations and their chemical basis; mutagens and their use in biotechnology; modes of recombination; comparative prokaryotic genomics.

##### **Unit IV:**

Normal micro flora of skin, oral cavity, gastrointestinal tract; entry of pathogens into the host, types of toxins (exo, endo, entero) and their mode of actions, plant -microbe interactions, microbial pathogenesis –disease reservoirs; epidemiological terminologies; infectious disease transmission.

##### **Unit V:**

Antimicrobial agents, sulfa drugs, antibiotics -penicillin and cephalosporins, broad spectrum antibiotics, antibiotics from prokaryotes. Antifungal antibiotics; mode of action, resistance to antibiotics. Bacteriophage therapy. Potential targets for drug design.

## SEMESTER III

### RECOMBINANT DNA TECHNOLOGY LAB

**Course Code: CMBE-651**

**Credit Units: 03**

**Pre-requisite: Basic experience of molecular biology techniques**

#### **Course Outcome:**

- Students will be able to isolate and analyze DNA/plasmid DNA and protein.
- Students will be able to digest and ligate the DNA molecules.
- Students will be able to design primers and amplification of DNA by PCR.
- Students will be able to learn the techniques of cloning gene in plasmid vectors.
- Students will be able to screen the positive transformant with the gene cloned through reporter based assays.

#### **Details of the Course:-**

1. Isolation of Vector/plasmid DNA and its analysis
2. RNaseA digestion of isolated plasmid/vector DNA
3. Restriction digestion of DNA
4. Primer designing
5. Amplification of DNA by polymerase chain reaction
6. Ligation of DNA molecules
7. Competent cell formation
8. Transformation in *E. coli*
9. Reporter gene assay for plasmid vectors
10. Expression of cloned gene in prokaryotic system

## SEMESTER III

### MEDICAL MICROBIOLOGY LAB

**Course Code: CMBE-653**

**Credit Units: 03**

**Pre-requisite:** Basic information of Medical Microbiology Lab

#### Course Outcome:

Upon successful completion of this course the student will be able to:

- This course provides learning opportunities in the basic principles of medical microbiology and infectious disease.
- It covers mechanisms of infectious disease transmission, principles of aseptic practice, and the role of the human body's normal microflora.
- The course provides the conceptual basis for understanding pathogenic microorganisms and the mechanisms by which they cause disease in the human body.
- It also provides opportunities to develop informatics and diagnostic skills, including the use and interpretation of laboratory tests in the diagnosis of infectious diseases.

#### Details of the Course:-

1. Study of composition and use of important differential media for identification of bacteria: EMBAgar, McConkey agar, Mannitol salt agar, Deoxycholate citrate agar, TCBS
2. Study of bacterial flora of skin by swab method
3. Perform antibacterial sensitivity by Kirby-Bauer method
4. Identification of human blood groups.
5. To perform Total Leukocyte Count of the given blood sample.
6. To perform Differential Leukocyte Count of the given blood sample.
7. To separate serum from the blood sample (demonstration).
8. To perform immunodiffusion by Ouchterlony method.

#### Suggested Books:

## SEMESTER III

### MINOR PROJECT/ FIELD WORK

**Course Code: CMBE-653**

**Credit Units: 02**

#### Course Outcome:

- Forty five days of Sixth Semester of the B.Sc. Curriculum is devoted to major project/field work.
- Students, with the help of their mentor and faculty colleagues will identify a lab in India & abroad for the research work.
- The student should stay for a minimum prescribed Semester period at the place of work.
- Students not staying for the prescribed period will be marked absent as per the University Rules.
- At the end of their project the students shall submit the dissertation as per the Guidelines prescribed below.

#### The Aims of the Project

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity, having an educational value at a level commensurate with the award a B.Sc. Degree.

#### Objectives

- To provide the students an opportunity to demonstrate the ability to devise, select and use a range of methodologies appropriate to the chosen topic of research.
- To allow students to show the application of skills of data collection, critical analysis and concept synthesis necessary for formation of defensible conclusions and/or recommendations.
- To allow students the opportunity to demonstrate ability to draw appropriate conclusions argued from the evidence presented. [Should the research produce negative or inconclusive results, the conclusions should be critically examined to ascertain the reasons].
- To provide a forum to demonstrate the skills of structuring and present a balanced informed complete, clear and concise written argument.

#### Examination Scheme:

Components	Theme of Project	Quality of Project
Weightage (%)	30	70

## **SEMESTER IV**

### **Industrial Training/ Presentation**

**CMBE-692-** Dissertation

#### **Course Objective:**

The students are expected to utilize their scheduled periods by undertaking the project that would be completed during the semester. Every student shall undertake a major Project. The major Project shall be undertaken in some biotechnology industry or laboratory of repute. Each student shall be assigned to a faculty who shall continuously monitor the progress of the Project in the concerned laboratory or industry. The faculty, in consultation with the concerned scientist of the industry/laboratory, shall decide the topic of the project. At the conclusion of the project the student shall submit a seminar and a dissertation. The dissertation shall be evaluated by the internal faculty/examiner. The student then shall have to appear for the viva voce examination.

#### **Guidelines for Project file:**

Research experience is as close to a professional problem-solving activity as anything in the curriculum. It provides exposure to research methodology and an opportunity to work closely with a faculty guide. It usually requires the use of advanced concepts, a variety of experimental techniques, and state-of-the-art instrumentation. Research is genuine exploration of the unknown that leads to new knowledge which often warrants publication. But whether or not the results of a research project are publishable, the project should be communicated in the form of a research report written by the student. Sufficient time should be allowed for satisfactory completion of reports, taking into account that initial drafts should be critiqued by the faculty guide and corrected by the student at each stage. The File is the principal means by which the work carried out will be assessed and therefore great care should be taken in its preparation.

#### **In general, the File should be comprehensive and include:**

- A short account of the activities that were undertaken as part of the project;
- A statement about the extent to which the project has achieved its stated goals.
- A statement about the outcomes of the evaluation and dissemination processes engaged in as part of the project;
- Any activities planned but not yet completed as part of the project, or as a future initiative directly resulting from the project;
- Any problems that have arisen that may be useful to document for future reference.

#### **Report Layout**

The report should contain the following components:

##### **Title or Cover Page.**

The title page should contain the following information: Project Title; Student's Name; Course; Year; Supervisor's Name.

##### **Acknowledgements (optional)**

Acknowledgment to any advisory or financial assistance received in the course of work may be given.

##### **Abstract**

A good "Abstract" should be straight to the point; not too descriptive but fully informative. First paragraph

should state what was accomplished with regard to the objectives. The abstract does not have to be an entire summary of the project, but rather a concise summary of the scope and results of the project

### **Table of Contents**

Titles and subtitles are to correspond exactly with those in the text.

### **Introduction**

Here a brief introduction to the problem that is central to the project and an outline of the structure of the rest of the report should be provided. The introduction should aim to catch the imagination of the reader, so excessive details should be avoided.

### **Materials and Methods**

This section should aim at experimental designs, materials used. Methodology should be mentioned in details including modifications if any.

### **Results and Discussion**

Present results, discuss and compare these with those from other workers, etc. In writing these section, emphasis should be given on what has been performed and achieved in the course of the work, rather than discuss in detail what is readily available in text books. Avoid abrupt changes in contents from section to section and maintain a lucid flow throughout the thesis. An opening and closing paragraph in every chapter could be included to aid in smooth flow.

Note that in writing the various sections, all figures and tables should as far as possible be next to the associated text, in the same orientation as the main text, numbered, and given appropriate titles or captions. All major equations should also be numbered and unless it is really necessary never write in “point” form.

### **Conclusion**

A conclusion should be the final section in which the outcome of the work is mentioned briefly.

### **Future prospects**

### **Appendices**

The Appendix contains material which is of interest to the reader but not an integral part of the thesis and any problem that have arisen that may be useful to document for future reference.

### **References / Bibliography**

This should include papers and books referred to in the body of the report. These should be ordered alphabetically on the author's surname. The titles of journals preferably should not be abbreviated; if they are, abbreviations must comply with an internationally recognized system. Examples:

#### **For research article:**

Voravuthikunchai SP, Lortheeranuwat A, Ninrprom T, Popaya W, Pongpaichit S, Supawita T. (2002) Antibacterial activity of Thai medicinal plants against enterohaemorrhagic Escherichia coli O157: H7. Clin Microbiol Infect , **8** (suppl 1): 116–117.

#### **For book:**

Kowalski,M.(1976) Transduction of effectiveness in Rhizobium meliloti. SYMBIOTIC NITROGEN FIXATION PLANTS (editor P.S. Nutman IBP), 7: 63-67

**Assessment for Project file:**

Essentially, marking will be based on the following criteria: the quality of the report, the technical merit of the project and the project execution. Technical merit attempts to assess the quality and depth of the intellectual efforts put into the project. Project execution is concerned with assessing how much work has been put in.

The File should fulfill the following **assessment objectives:**

- **Range of Research Methods used to obtain information**
- **Execution of Research**
- **Data Analysis**  
Analyze Quantitative/ Qualitative information Control Quality
- **Draw Conclusions**
- **Reference for further information:**  
Clifford Hawkins and Marco Sorgi; Research: How to Plan, Speak and write about it; Narosa Publishing House, New Delhi 1994

## **PEOs: Program Educational Objectives POs: Program Outcomes PSOs: Program Specific Outcomes**

**Name of the Department:** Department of Microbiology

**Name of the Program:** B.Sc. Microbiology

**Duration of the degree:** 3 Years

Microbiology programme endeavors to instill in students the skills to identify individual microbial species, use aseptic techniques to grow them in pure culture, safely handle and examine them by microbiological methods. The knowledge of microbiology will enable the students to improve the quality of human lives in relation to environment, fighting disease and to exploit microbes in the production of food. Microbiology plays a key role in genetic engineering and other modern biotechnologies such as antibiotic production and the exploitation of new sources of food and energy. The regimens for this program are specifically designed to allow students to fulfill below program educational objectives:

### **Program Educational Objectives (PEOs)**

**PEO 1:** The graduates will learn the importance of microorganisms in environment, brewing, food processing and preservation, pharmaceuticals and biotechnology industries.

**PEO 2:** The graduates will be provided with understanding of healthcare systems especially in pathological, immunological and environmental monitoring laboratories.

**PEO 3:** The graduates will demonstrate the skills necessary to understand and apply scientific concepts and reasoning, including the analysis and interpretation of various types of data.

### **Program Specific Outcomes (PSOs)**

#### **Students who graduate with a Bachelor of Science in Microbiology will**

**PSO 1:** Acquire knowledge on fundamentals of Microbiology.

**PSO 2:** Understand details of bacterial, fungal, algal and viral morphology and physiology.

**PSO 3:** Competently be able to cultivate and characterize bacterial and fungal forms.

**PSO 4:** Grasp the fundamental concepts of immunity and the contribution of organs and cells in the development of immune response.

**PSO 5:** Gain insight into the various aspects of microbial genetics.

**PSO 6:** Be proficient on cloning vectors and rDNA technology.

**PSO 7:** Assimilate technical skills on microbial genetics and molecular biology.

**PSO 8:** Realize the application oriented aspects of Microbiology.

**PSO 9:** Understand the concepts and development of microbial diseases in animals & plants.

**PSO 10:** Realize the principles of prevention and treatment of microbial diseases.

## **Program Outcomes Objectives (POOs)**

**Upon completion of B.Sc. Microbiology programme, the students will be able to:**

**POO 1:** demonstrate advanced knowledge and understand the central facts and concepts of microbiology.

**POO 2:** acquire knowledge and understanding of organism biology and genetics, evolution, molecular biology and basic biological chemistry.

**POO 3:** instill the intellectual skills to analyze and solve biology-related problem, formulate and test hypothesis using experimental design.

**POO 4:** demonstrate an understanding of professional ethics in science and of the principles that can guide ethical decision-making in biological controversies.

**POO 5:** explore the scientific literature effectively and use computational tools.

**POO 6:** communicate ideas and principles effectively through oral presentations, computer based tools and written reports.

**POO 7:** manage resources, time and work independently as well as in multi-disciplinary team towards a common goal/outcome.

<b>Weightage (%)</b>	10	20	10	60

## Semester-I

### BIOCHEMISTRY AND METABOLISM

**Course Code: CMBE-101**

**Credit Units: 03**

#### **Course Outcome**

1. **Molecular Foundations:** Understand the structure and function of biomolecules such as carbohydrates, proteins, lipids, and nucleic acids.
2. **Metabolic Pathways:** Analyze key metabolic pathways (glycolysis, Krebs cycle, oxidative phosphorylation) and their regulation.
3. **Enzyme Kinetics:** Explain enzyme mechanisms, kinetics, and the role of cofactors in biochemical reactions.
4. **Energy and Metabolism:** Relate the biochemical basis of energy production, storage, and utilization in living organisms.
5. **Disease and Applications:** Apply knowledge of metabolic dysfunctions to understand diseases and biotechnological advancements.

First and second laws of Thermodynamics. Definitions of Gibb's Free Energy, enthalpy, and Entropy and mathematical relationship among them, Standard free energy change and equilibrium constant, Coupled reactions and additive nature of standard free energy change, Energy rich compounds: Phosphoenolpyruvate, 1,3- Bisphosphoglycerate, Thioesters, ATP.

## **Unit 2: Carbohydrates**

Families of monosaccharides: aldoses and ketoses, trioses, tetroses, pentoses, and hexoses. Stereo isomerism of monosaccharides, epimers, Mutarotation and anomers of glucose. Furanose and pyranose forms of glucose and fructose, Haworth projection formulae for glucose; chair and boat forms of glucose, Sugar derivatives, glucosamine, galactosamine, muramic acid, N- acetyl neuraminic acid, Disaccharides; concept of reducing and non-reducing sugars, occurrence and Haworth projections of maltose, lactose, and sucrose, Polysaccharides, storage polysaccharides, starch and glycogen. Structural Polysaccharides, cellulose, peptidoglycan and chitin.

## **Unit 3: Lipids**

Definition and major classes of storage and structural lipids. Storage lipids. Fatty acids structure and functions. Essential fatty acids. Triacyl glycerols structure, functions and properties. Saponification Structural lipids. Phosphoglycerides: Building blocks, General structure, functions and properties. Structure of phosphatidylethanolamine and phosphatidylcholine, Sphingolipids: building blocks, structure of sphingosine, ceramide. Special mention of sphingomyelins, cerebroside and gangliosides, Lipid functions: cell signals, cofactors, prostaglandins, Introduction of lipid micelles, monolayers, and bilayers.

## **Unit 4: Proteins**

Functions of proteins, Primary structures of proteins: Amino acids, the building blocks of proteins. General formula of amino acid and concept of zwitterion. Titration curve of amino acid and its Significance, Classification, biochemical structure and notation of standard protein amino acids, Ninhydrin reaction. Natural modifications of amino acids in proteins hydroxylysine, cystine and hydroxyproline, Non protein amino acids: Gramicidin, beta-alanine, D-alanine and D- glutamic acid, Oligopeptides: Structure and functions of naturally occurring glutathione and insulin and synthetic aspartame, Secondary structure of proteins: Peptide unit and its salient features. The alpha helix, the beta pleated sheet and their occurrence in proteins, Tertiary and quaternary structures of proteins. Forces holding the polypeptide together. Human haemoglobin structure, Quaternary structures of proteins.

## **Unit 5: Enzymes**

Structure of enzyme: Apoenzyme and cofactors, prosthetic group-TPP, coenzyme, NAD, metal cofactors, Classification of enzymes, Mechanism of action of enzymes: active site, transition state complex and activation energy. Lock and key hypothesis, and Induced Fit hypothesis. Significance of hyperbolic, double reciprocal plots of enzyme activity,  $K_m$ , and allosteric mechanism. Definitions of terms – enzyme unit, specific activity and turnover number, Multienzyme complex: pyruvate dehydrogenase; isozyme: lactate dehydrogenase, Effect of pH and temperature on enzyme activity. Enzyme inhibition: competitive- sulfa drugs; non- competitive-heavy metal salts.

### Unit 6: Vitamins

Classification and characteristics with suitable examples, sources and importance.

## **INTRODUCTORY BIOLOGY**

Course Code: CMBE--101a

Credit Units: 03

**Pre-requisite:** Basic information of Introductory Biology

Course Outcome:

1. Basic chemical composition of living matter.
2. Structural characteristics of prokaryotic and eukaryotic cells.
3. Taxonomy and characteristics of the major kingdoms.
4. Mechanics of membrane transport.
5. Basic concepts of bioenergetics, photosynthesis, and cellular respiration.
6. Mechanics of cellular reproduction.
7. Mendelian genetics and genetic change<sup>1</sup>

## 8. Nucleic acids and basic concepts of protein synthesis and gene regulation.

Details of the Course:-

### UNIT I: Cell:

Introduction and classification of organisms by cell structure, cytosol, Compartmentalization of eukaryotic cells, cell fractionation Cell Membrane and Permeability: Chemical components of biological membranes, organization and Fluid Mosaic Model

### UNIT II: Cell Membrane and Permeability

Chemical components of biological membranes, organization and Fluid Mosaic Model, membrane as a dynamic entity, cell recognition and membrane transport. Sex-limited and sex- influenced inheritance, Transposons. Membrane Vacuolar system, cytoskeleton and cell motility: Structure and function of microtubules, Microfilaments, Intermediate filaments

### UNIT III: Endoplasmic reticulum:

Endoplasmic reticulum: Structure, function including role in protein segregation.

Golgi complex: Structure, biogenesis and functions including role in protein secretion.

Lysosomes: Vacuoles and micro bodies: Structure and functions Ribosomes: Structures and function including role in protein Synthesis.

### UNIT IV: Mitochondria:

Structure and function, Genomes, biogenesis. Chloroplasts: Structure and function, genomes, biogenesis. Nucleus: Structure and function, chromosomes and their structure. Extracellular Matrix: Composition, molecules that mediate cell adhesion

### UNIT V: Membrane receptors:

For extra cellular matrix, macromolecules, regulation of receptor expression and function. Signal transduction. Cancer: Carcinogenesis, agents promoting carcinogenesis, characteristics and molecular basis of cancer.

Chemical components of biological membranes, organization and Fluid Mosaic Model, membrane as a dynamic entity, cell recognition and membrane transport. Sex-limited and sex- influenced inheritance, Transposons. Membrane Vacuolar system, cytoskeleton and cell motility: Structure and function of microtubules, Microfilaments, Intermediate filaments

**UNIT II: Cell:**

Introduction and classification of organisms by cell structure, cytosol, Compartmentalization of eukaryotic cells, cell fractionation Cell Membrane and Permeability: Chemical components of biological membranes, organization and Fluid Mosaic Model

**UNIT III: Endoplasmic reticulum:**

Endoplasmic reticulum: Structure, function including role in protein segregation. Golgi complex: Structure, biogenesis and functions including role in protein secretion.

Lysosomes: Vacuoles and micro bodies: Structure and functions Ribosomes: Structures andfunction including role in protein Synthesis.

**UNIT IV: Mitochondria:**

Structure and function, Genomes, biogenesis. Chloroplasts: Structure and function, genomes, biogenesis. Nucleus: Structure and function, chromosomes and their structure. Extracellular Matrix: Composition, molecules that mediate cell adhesion

**UNIT V: Membrane receptors:**

For extra cellular matrix, macromolecules, regulation of receptor expression and function. Signal transduction. Cancer: Carcinogenesis, agents promoting carcinogenesis, characteristics and molecular basis of cancer.

**Suggested Books:**

	Attendance	Class Test	Assignment/ Project/Seminar/Quiz	
Weightage (%)	10	20	10	60

# CELL BIOLOGY

**Course Code: CMBE-103**

**Credit Units: 03**

**Pre-requisite:** Basic information of Cell Biology

Course Outcome:

1. Understand the basic cell components and processes.
2. Know membrane structure, function, and transport mechanisms.
3. Comprehend cell communication and signal transduction.
4. Understand cell division and regulation.
5. Know sexual reproduction and inheritance patterns.
6. Understand cancer development and characteristics.
7. Know stem cell properties and applications.
8. Stay updated on recent advancements in cell biology.

**Details of the Course:-**

## **Unit 1: Structure and organization of Cell**

Cell Organization: Eukaryotic (Plant and animal cells) and prokaryotic, Plasma membrane: Structure and transport of small molecules, Cell Wall: Eukaryotic cell wall, Extra cellular matrix and cell matrix interactions, Cell-Cell Interactions: adhesion junctions, tight junctions, gap junctions, and plasmodesmata (only structural aspects), Mitochondria, chloroplasts and peroxisomes, Cytoskeleton: Structure and organization of actin filaments, association of actin filaments with plasma membrane, cell surface protrusions, intermediate filaments, microtubules.

## **Unit 2: Nucleus**

Nuclear envelope, nuclear pore complex and nuclear lamina, Chromatin – Molecular organization, Nucleolus.

## **Unit 3: Protein Sorting and Transport**

Ribosomes, Endoplasmic Reticulum – Structure, targeting and insertion of proteins in the ER, protein folding, processing and quality control in ER, smooth ER and lipid synthesis, export of proteins and lipids, Golgi Apparatus – Organization, protein glycosylation, protein sorting and export from Golgi Apparatus, Lysosomes.

## **Unit 4: Cell Signalling**

Signalling molecules and their receptors, Function of cell surface receptors, Pathways of intracellular receptors – Cyclic AMP pathway, cyclic GMP and MAP kinase pathway.

## Unit 5: Cell Cycle, Cell Death and Cell

Eukaryotic cell cycle and its regulation, Mitosis and Meiosis, Development of cancer, causes and types of programmed cell death, Stem cells, Embryonic stem cell, induced pluripotent stem cells .

### Examination Scheme:

Components	Internal Assessment			External Evaluation
	Attendance	Class Test	Assignment/ Project/Seminar/Quiz	
Weightage (%)	10	20	10	60

**Pre-requisite:** Basic information of Chemistry

Course Outcome:

- a) Understand periodic properties and its application in the characterization of chemical compounds
- b) Understand the various properties of materials depending upon bond formation.
- c) Utilize the concept of hardness in the purification of water for industrial and domestic purpose
- d) Distinguish the rate laws and application to different chemical reaction mechanism
- e) Learn and apply the concepts of analytical chemistry for sample analysis by chemical methods
- f) Learn the basic concepts of Chemistry and its application in different fields

Details of the Course:-

**UNIT I: Periodic Properties:**

Position of elements in the periodic table, effective nuclear charge, atomic and ionic radii, ionization energy, electron affinity and electronegativity definition, methods of determination, trends in periodic table and applications in predicting and explaining the chemical behavior.

**UNIT II: Atomic and Molecular Structure:**

VSPER theory and its application for structure of  $\text{NH}_3$ ,  $\text{NH}_4^+$ ,  $\text{H}_2\text{O}$ ,  $\text{H}_3\text{O}^+$ ,  $\text{SO}_2$  and  $\text{XeF}_4$   
Molecular Orbital Theory, Formation of homo and heteronuclear diatomic molecules  
Hydrogen Bonding and its application  
Metallic Bonding (Band theory); role of doping  
Coordination compounds: Introduction, Werner's coordination theory, naming of compounds.

**UNIT III: Water Chemistry:**

Hardness of water and its measurement, Softening of water by L-S process, Zeolite process and Reverse osmosis process, Ion Exchange process, Calgon Process, Numerical problems based on L-S Process, Zeolite Process and hardness of water.

#### UNIT IV: Chemical Kinetics:

Ionic reactions and molecular reactions, Molecularity and Order of reactions, Integrated equations of 1st, 2nd and zero order reactions, Activation Energy and Activated complexes, numerical problems based upon them.

#### UNIT V: Analytical Chemistry:

Qualitative and Quantitative Chemistry, Volumetric and Gravimetric Analysis; Principles of Volumetric Analysis; Concept of pH, buffer, Henderson equation, Concept of strength and concentration of solution; Normality, Molarity, Molality and interconversion of strength Titration-Principles and Classification: Redox, Acid-Base, Complexometric, Redox and Precipitation, Oxidation Number and calculation of oxidation number in compounds.

#### Examination Scheme:

Components	Internal Assessment			External Evaluation
	Attendance	Class Test	Assignment/ Project/Seminar/Quiz	
Weightage (%)	10	20	10	60

**Course Code: CMBE-105**

**Credit Units: 03**

**Pre-requisite:** Basic Knowledge of Environmental science

Course Outcome:

1. Understand ecosystems, biodiversity, and ecological processes.
2. Analyze pollution types, sources, and impacts.
3. Understand climate change causes, impacts, and mitigation strategies.
4. Evaluate sustainable resource management practices.
5. Analyze environmental policies and regulations.
6. Conduct environmental impact assessments.
7. Utilize monitoring techniques and data analysis.

Details of the Course:-

### **Unit 1: Introduction to environmental studies**

Multidisciplinary nature of environmental studies; Scope and importance; Need for public awareness.

### **Unit 2: Ecosystems**

What is an ecosystem? Structure and function of ecosystem; Energy flow in an ecosystem: food chains, food webs and ecological succession. Case studies of the following ecosystems:

- a) Forest ecosystem
- b) Grassland ecosystem
- c) Desert ecosystem
- d) Aquatic ecosystems (ponds, streams, lakes, rivers, oceans, estuaries).

### **Unit 3: Natural Resources: Renewable and Non-renewable Resources**

Land resources and land use change; Land degradation, soil erosion and desertification. Deforestation: Causes and impacts due to mining, dam building on environment, forests, biodiversity and tribal populations. Water: Use and over-exploitation of surface and ground water, floods, droughts, conflicts over water (international & inter-state). Energy resources: Renewable and non-renewable energy sources, use of alternate energy sources, growing energy needs, case studies.

### **Unit 4: Biodiversity and Conservation**

Levels of biological diversity: genetic, species and ecosystem diversity; Biogeographic zones of India; Biodiversity patterns and global biodiversity hot spots, India as a mega-biodiversity nation; Endangered and endemic species of India, Threats to biodiversity: Habitat loss, poaching of wildlife, man-wildlife conflicts, biological invasions; Conservation of biodiversity: In-situ and Ex-

situ conservation of biodiversity. Biodiversity services: Ecological, economic, social, ethical, aesthetic and Informational value.

**Unit 5: Environmental Pollution**

Environmental pollution: types, causes, effects and controls; Air, water, soil and noise pollution. Nuclear hazards and human health risks. Solid waste management: Control measures of urban and industrial waste. Pollution case studies.

**Unit 6: Environmental Policies & Practices**

Sustainability and sustainable development. Climate change, global warming, ozone layer depletion, acid rain and impacts on human communities and agriculture. Environment Laws: Environment Protection Act; Air (Prevention & Control of Pollution) Act; Water (Prevention and control of Pollution) Act; Wildlife Protection Act; Forest Conservation Act. Nature reserves, tribal populations and rights, and human wildlife conflicts in Indian context.

## AGROBIOTECHNOLOGY

Course Code: CMBE-105a

Credit Units: 03

**Pre-requisite:** Basic knowledge of environmental science.

### Course Outcome:

- Students will be able to acquire knowledge about environmental pollution- sources, effects and control measures.
- Students will understand the concept of BOD and analyze the need for different waste water treatment methods.
- Students will be able to understand and implement the methods and importance of solid waste management.
- Students will be able to understand the application of bioreactors.
- Students will be able to apply their knowledge about toxic compounds degradation using microbes.
- Students will understand the role of biopesticides.
- Students will analyze the national and international concern for environment for protecting the environment and sustainable development.
- Students will be able to understand the global issues related to environmental pollution.

### UNIT-I

Environmental Pollution: types of pollution, methods for the measurement of pollution, Methodology of environmental management- the problem solving approach, its limitations.

Air pollution and its control through Biotechnology. Water pollution and its control: Water as a scarce natural resource. Need for water management, Measurement of water pollution, sources of water pollution.

### UNIT-II

Microbiology of Waste water Treatments, Aerobic Process: Activated sludge, Oxidation ditches, trickling filter, rotations discs, rotating drums, oxidation ponds.

Anaerobic processes: Anaerobic digestion, anaerobic filters. Up flow anaerobic sludge blanket reactors. Treatment schemes for waste waters of dairy, distillery, tannery, sugar antibiotic industries.

**UNIT-III** Solid wastes: sources and management composting, vermicomposting and methane production). Hospital wastes, hazardous wastes and their management. Biopesticides in integrated pest management.

### UNIT-IV

Microbiology of degradation of Xenobiotics in Environment Ecological consideration, decay behaviour & degradative plastics; Hydrocarbons, oil pollution, & pesticides. Bioremediation of contaminated soils and waste land.

### UNIT-V

Basic concepts of Environmental impact Assessment (EIA) Restoration of waste land/degraded ecosystem. Global Environmental Problems: Ozone depletion, UV-B, green- house effect and acid rain, their impact and biotechnological approaches for management.

## Biochemistry and Metabolism Lab

Course Code: CMBE-151

Credit Units: 01

**Pre-requisite:** Basic knowledge of biochemistry and cellular metabolism.

Course Outcome:

After completion of the course, students will be able to:

1. Understand the principles of biochemical analysis and metabolic processes.
2. Perform qualitative and quantitative estimation of biomolecules.
3. Analyze enzyme kinetics and metabolic pathways.
4. Gain proficiency in the preparation and handling of biological samples.
5. Apply biochemical techniques to study metabolic functions in living systems.

Details of the Laboratory Course:

**Note:** A college must offer 70% of the below-listed experiments. The remaining 30% experiments may be modified by the college according to available facilities.

S. No.	Contents	Contact Hours
1	<b>Qualitative Tests for Biomolecules:</b> Detection of carbohydrates, proteins, and lipids in biological samples.	2
2	<b>Quantitative Estimation of Glucose:</b> Using the DNSA or glucose oxidase-peroxidase (GOD-POD) method.	3
3	<b>Protein Estimation:</b> Lowry's method or Bradford assay.	3
4	<b>Enzyme Assay:</b> Study of enzyme activity (e.g., amylase or urease) and calculation of specific activity.	3
5	<b>Enzyme Kinetics:</b> Determination of $K_m$ and $V_{max}$ of an enzyme using Lineweaver-Burk plots.	3
6	<b>Lipid Analysis:</b> Extraction of lipids by Folch or Bligh and Dyer method.	2
7	<b>Estimation of Nucleic Acids:</b> Quantification of DNA and RNA using spectrophotometry.	3
8	<b>Chromatographic Techniques:</b> Separation of amino acids or sugars by paper or thin-layer chromatography (TLC).	3
9	<b>pH and Buffer Preparation:</b> Understanding buffer systems and their role in metabolism.	2
10	<b>Estimation of Cholesterol:</b> Colorimetric method or enzymatic assay.	2

## Cell Biology Lab

Course Code: CMBE-153

Credit Units: 01

**Pre-requisite:** Basic information of Cell Biology

Course Outcome:

- a) Students will learn about the varieties of plants and their diversity.
- b) Students will gain a comprehensive knowledge on categories of plants and apply the same in identification of monocots and dicots
- c) Students will become familiar with plant cell anatomy.
- d) Students will be able to learn about the functioning of plant cell and understand their importance in plant life.
- e) Students will be able to implement different strategies to test the present of storage food material in plant parts.
- f) Students will be able to understand the methods of solute and solvent uptake in plant cells and their role in life processes.
- g) Students will be able to analyze the mechanism of transpiration by different plants.
- h) Students will be able to learn the mechanism underlying seed growth and development.

**Details of the Course:-**

S. No.	Contents	Contact Hours
1	Study the effect of temperature and organic solvents on semi permeable membrane.	2
2	Demonstration of dialysis.	2
3	Study of plasmolysis and de-plasmolysis.	2
4	Cell fractionation and determination of enzyme activity in organelles using sprouted seed or any other suitable source.	2

## Environmental Sciences Lab

Course Code: CMBE-155

Credit Units: 01

**Pre-requisite:** Basic knowledge of environmental science and ecological principles.

Course Outcome:

After completion of the course, students will be able to:

1. Analyze the physical, chemical, and biological parameters of environmental samples.
2. Develop skills to monitor pollution levels in air, water, and soil.
3. Understand techniques for assessing biodiversity and ecosystem health.
4. Explore sustainable solutions to mitigate environmental problems.
5. Conduct environmental impact analysis using scientific tools and techniques.

Details of the Laboratory Course:

**Note:** A college must offer 70% of the below-listed experiments. The remaining 30% experiments may be modified by the college according to available facilities.

S. No.	Contents	Contact Hours
1	<b>Analysis of Water Quality:</b> Determination of pH, turbidity, and total dissolved solids (TDS), and dissolved oxygen (DO).	3
2	<b>Chemical Oxygen Demand (COD) and Biochemical Oxygen Demand (BOD):</b> Measurement in water samples.	3
3	<b>Soil Analysis:</b> Determination of pH, moisture content, and organic matter.	3
4	<b>Air Quality Monitoring:</b> Estimation of particulate matter and gaseous pollutants using air samplers.	3
5	<b>Biodiversity Assessment:</b> Quadrant method for species richness and abundance in a terrestrial habitat.	3
6	<b>Wastewater Treatment:</b> Study of physical, chemical, and biological treatment methods.	3
7	<b>Heavy Metal Analysis:</b> Detection of metals in water and soil samples using spectrophotometry.	3
8	<b>Study of Eutrophication:</b> Observation of algal blooms and their impact on aquatic ecosystems.	2
9	<b>Vermicomposting:</b> Setting up a vermicomposting unit and observing its progress.	3
10	<b>Ecological Footprint Assessment:</b> Calculation and interpretation of human impact on the environment.	2

Weightage (%)	10%	20%	10%	60%

## BIOSAFETY AND BIOETHICS

Course Code: **GMBE-101**

**Credit Units: 03**

### Course Outcome

1. **Understand Biosafety Protocols:** Apply biosafety measures in research and laboratory settings.
2. **Analyze Ethical Issues:** Critically assess ethical challenges in biotechnology, including gene editing and biopiracy.
3. **Apply Bioethics in Research:** Use bioethical principles in human/animal research and biotechnological applications.
4. **Comprehend Regulations:** Understand global and national biosafety laws and frameworks.
5. **Propose Ethical Solutions:** Develop solutions for bioethical dilemmas in biotechnology and innovation.

### Unit 1: Introduction to Biosafety and Bioethics

- **Overview of Biosafety:** Definition, importance, principles, and goals of biosafety.
- **Introduction to Bioethics:** Definition, significance, key principles (autonomy, justice, beneficence, non-maleficence).
- **Interconnection of Biosafety and Bioethics:** Ethical considerations in biosafety management and biotechnology.

### Unit 2: Biosafety in Biotechnology and Laboratory Practices

- **Biosafety Levels:** Description of different biosafety levels (BSL-1 to BSL-4) and their relevance in laboratory settings.
- **Biosafety Protocols and Guidelines:** Procedures for handling biological agents, recombinant DNA, and genetically modified organisms (GMOs).
- **Risk Assessment:** Process of identifying hazards, risk evaluation, and management in biological research.
- **Personal Protective Equipment (PPE):** Types, uses, and best practices in biosafety.
- **Laboratory Design and Waste Management:** Containment measures, disposal of biohazardous waste, and laboratory facility requirements.

### Unit 3: Ethical Considerations in Biotechnology and Research

- **Ethical Issues in Genetic Engineering:** Gene editing (CRISPR), genetically modified organisms (GMOs), and designer organisms.
- **Use of Human and Animal Subjects:** Ethical guidelines for experimentation involving humans and animals in research (Institutional Review Boards, informed consent, animal welfare).
- **Environmental Ethics:** Environmental impact of biotechnology (biosafety concerns related to GMOs, synthetic biology, and environmental releases).
- **Public Engagement and Policy Making:** The role of the public, ethical review boards, and policymakers in guiding and overseeing biotechnological research.

### Unit 4: Biosafety Regulations and Guidelines

- **International Biosafety Regulations:** Cartagena Protocol on Biosafety, BWC (Biological Weapons Convention), WHO guidelines, FAO regulations.
- **National Biosafety Laws and Frameworks:** Overview of biosafety laws in India and other countries, including the National Biotechnology Regulatory Authority (NBRA) in India, Genetic Engineering Appraisal Committee (GEAC).
- **Regulations on GMOs:** Legal framework for the release, import, and export of GMOs and their products, including GM crops and pharmaceuticals.
- **Biosafety in Agriculture and Food Industry:** Guidelines for field trials, commercial release of GM crops, and biosafety in food products.

## Unit 5: Ethical Issues in Modern Biotechnology

- **Biopiracy:** Definition, ethical concerns, case studies (e.g., neem patent controversy, Hoodia case).
- **Biodiversity and Access to Genetic Resources:** Ethical issues related to access and benefit-sharing under the Convention on Biological Diversity (CBD).
- **Synthetic Biology and Bioengineering:** Ethical questions surrounding the creation of artificial life, biohacking, and biotechnological manipulation of ecosystems.
- **Patents and Ownership of Biotechnological Innovations:** Ownership, patenting of life forms, ethical concerns about patenting genes, and the commodification of biological resources.

## Unit 6: Case Studies in Biosafety and Bioethics

- **Biosafety Breaches and Failures:** Examination of historical biosafety incidents, such as the 2001 anthrax attacks, laboratory-acquired infections.
- **Ethical Dilemmas in Biotechnology:** Review of controversial case studies such as cloning (Dolly the sheep), gene therapy, and the commercialization of genetic research.
- **Regulatory Failures and Ethical Oversight:** Analysis of instances where lack of proper ethical review or biosafety measures led to public health risks or ethical concerns (e.g., the Tuskegee syphilis study, gene editing of embryos).
- **International and National Bioethics Panels:** Study of ethical committees like the National Bioethics Commission (India), UNESCO's bioethics committee, and their role in setting guidelines.

## Unit 7: Key Business Concerns in Biotechnology, Biosafety, and Bioethics

- **Regulation of Biotech Companies:** Business regulations for biotech companies, including biosafety compliance, risk management, and ethical standards.
- **Intellectual Property and Ethics:** Ethical issues around patenting biotechnology products, traditional knowledge, and access to genetic resources.
- **Corporate Responsibility:** Role of companies in maintaining biosafety standards, ethical conduct in genetic research, and transparency in business practices.
- **Biotechnology and Public Health:** Ethical dilemmas in commercialization of biotechnological innovations and their implications for public health policies.

## References:

1. **Biosafety and Bioethics in Biotechnology**, David T. Lee, 2nd Edition, 2019.
2. **Biotechnology: Ethics, Law, and Policy**, D. J. Whelan, 3rd Edition, 2018.
3. **Introduction to Biotechnology Ethics**, Dr. P. R. Joshi, 2021.
4. **Biosafety: Principles and Practices**, Michael R. O'Brien, 4th Edition, 2020.

## Computer Fundamentals

**Course Code: GMBE-101a**

**Credit Units: 03**

**Pre-requisite:** Basic knowledge of Computer application

### **Course Outcome:**

A student who successfully fulfills the course requirements will be able to

1. be able to define and appropriately use information technology terms;
2. be able to identify computer hardware components and describe their function;
3. be able to describe the essential elements of the computer's architecture and discuss how this architecture functions;
4. be able to describe the characteristics and representations of data, and interpret and compare data in different representations;
5. be able to identify and describe telecommunication components;
6. be able to describe the characteristics of operating systems and compare different operating systems;
7. be able to use a hypertext markup language to produce basic Web documents;
8. be able to discuss the general trends in technologies including examples of leading edge developments;
9. be able to compare the roles of different sectors of the information technology.

### **Details of the course:**

#### **-Unit I: Computer Basics:**

Introduction, Characteristics of a Computer, Criteria for Using Computers, History of Computers, Generations of Computer, Classification of Computers, Applications of Computer, Basic Components of PC, Computer Architecture.

#### **Unit II: Number Systems:**

Introduction, Classification of Number System, Types of Number System, Conversions from One Base to Another, Conversion using Shortcut Method.

### Unit III: Hardware and Software:

Introduction, Computer Memory, Secondary Memory, Computer Peripherals, Output Devices, Software requirements.

Windows XP: Introduction, Features, Comparison between Professional and Home edition, Windows XP installation, Activating Windows XP, Security features of Windows XP, Accessing User Accounts, Getting Help.

### Unit IV: MS Word:

Introduction, Windows 2007 Interface, Customizing the Word Application, Document Views, Basic Formatting in MS Word 2007, Advanced Formatting, Navigating through a Word Document, Performing a Mail Merge, A Quick Look at Macros, Printing Documents, Print Preview.

Excel 2007: Introduction, Workbook, Worksheet, Formatting in excel, Advanced formatting in Excel, Working with formulas, Printing worksheets.

MS PowerPoint: Introduction, Creating a Presentation, Basic Formatting in PowerPoint, Advanced Formatting, Using Templates, Inserting charts, Inserting tables, Printing presentations.

### Unit V: Security and Networking:

Introduction, Simple File Sharing, Internet Information Services, Peer to Peer Networking

#### Suggested Books:

Components	Internal Assessment			External Evaluation
	Attendance	Class Test	Assignment/ Project/Seminar/Quiz	
Weightage (%)	10	20	10	60

**Course Code: GMBE-103**

**Credit Units: 03**

1. **Understand IPR Concepts:** Gain a foundational understanding of intellectual property rights (IPR) and their importance in biological research.
2. **Identify Different IPR Types:** Recognize and differentiate between copyrights, trademarks, patents, and trade secrets.
3. **Apply Patent Law:** Understand patent processes and apply knowledge to biotechnological inventions.
4. **Analyze IPR in Biotechnology:** Evaluate ethical and legal issues surrounding biotechnological innovations and genetic resources.
5. **Commercialize IPR:** Develop strategies for managing and commercializing intellectual property in the biotechnology industry.

### **Unit 1: Introduction to IPR**

Importance of IPR, advantages of IP protection, relationship with trade, Product / design patent and Terminologies.

### **Unit 2: Types of IPRs**

Copyrights, trademarks, Trade Secrets, Patents, and Geographical indicators, IC layout design, plant variety protection.

- i. **Copyrights** - Nature of Copyright, Author & ownership of Copyright, Rights Conferred by Copyright, Assignment, Transmission, Licensing of Copyrights, Copyright Societies, Office, Board, Registration of Copyrights & Appeals, International Conventions, Copyright pertaining to Software/Internet, Database, Copyright Protection/Database Protection, IP issues in cyber space, Legal Position in USA/Indian Law/WIPO Copyright Treaty.
- ii. **Trademarks**- Meaning of Trademarks, Different kinds of marks (brand names, logos, signatures, symbols), Use of a Mark, Registration of Trademarks-Procedure, Opposition to Registration-Procedure, What Marks are Registrable/Not Registrable, Concurrent Registration, Similarity of Marks, Assignment/Transmission/Licensing of Trademarks, Infringement of Trademarks, Passing off Action.
- iii. **Patents**-
  - i. General Introduction: Definition, Product / Process /Design Patents Claims, Dates Associated with patent, Patent Life and Geographical Boundaries, Patent Infringement, Utilization of Intellectual Assets, Ownership of Patents.
  - ii. Patent Search, Patent Databases & Library (USPTO, WIPO, EPO), Practical Search

Training.

- iii. Patent Terminology: (Abstract, Summary, Background, Drawings, Description, Claims).
- iv. Geographical Indicators- Nature of Geographical Indicators, Conditions & Procedure for Registration, Offences, Penalties.

**Unit 3: Highlights of Indian patent Law (as amended in 2005)**

Elements of patentability - Patentable subject matter, Utility, novelty and non-obviousness, Patentability of biotechnological inventions –, biochemical and software. Worldwide patent protection Paris Convention, World Trade Organization, World Intellectual Property organization, TRIPS Agreement, PCT, UPOV convention, Convention on Biological Diversity, Biopiracy, Traditional knowledge and benefit sharing.

**Unit 4: Case studies**

(a) Infringement cases; (b) Biopiracy cases (Hoodia case, the Quinoa case, the Enola bean case, The neem patents); (c) Traditional knowledge and IP system; (d) Patents as assets; (e) Trade secrets; (f) Drug pricing as a result of patent filing. (f) Patenting of genetically-engineered micro-organism (Diamond Vs Chakravathy); (g) Recent cases related to the provisions of Section 3(d) of The Patents Act (Novartis vs Generic Manufacturers, Roche vs Cipla, Astra Zeneca Vs Natco Pharma).

**Unit 5: Key Business concerns in commercializing Intellectual Property Rights**

Competition and Confidentiality issues, Antitrust Laws; Employee Confidentiality; Assignment of Intellectual Property Rights; Technology Transfer Agreements; Intellectual Property Issues in the Sale of Business. Future Developments of Intellectual Property Rights–Indian Traditional Medicine & IP Protection, Folklore, Patenting of Life Forms, International-Traditional Medicines & Health Foods.

**References:**

**Examination Scheme:**

	<b>Internal Assessment</b>	
--	----------------------------	--

<b>Components</b>	<b>Attendance</b>	<b>Class Test</b>	<b>Assignment/ Project/Seminar/Quiz</b>	<b>External Evaluation</b>
<b>Weightage (%)</b>	10	20	10	60

## **General Proficiency**

**Course Code: GMBE-103a**

**Credit Units: 03**

### **Course Outcome:**

After completion of the course, students will be able to:

1. Develop effective communication and interpersonal skills.
2. Enhance problem-solving and decision-making abilities in academic and professional settings.
3. Foster ethical and responsible behavior in the workplace and society.
4. Strengthen team collaboration and leadership skills.
5. Build a professional attitude with proficiency in report writing and presentation.

### **Details of the Course:**

**Note:** A college must cover at least 70% of the topics listed below. The remaining 30% may be modified according to institutional requirements and resources.

S. No.	Contents	Contact Hours
1	<b>Communication Skills:</b> Verbal and non-verbal communication, active listening, and feedback.	3
2	<b>Technical Writing:</b> Preparation of lab reports, project proposals, and scientific documentation.	3
3	<b>Presentation Skills:</b> Use of visual aids, structuring content, and delivering effective presentations.	3
4	<b>Time Management:</b> Techniques to prioritize and manage academic and professional tasks efficiently.	2
5	<b>Teamwork and Leadership:</b> Collaborative exercises and role-playing to enhance group dynamics.	3
6	<b>Critical Thinking and Problem Solving:</b> Case studies and situational analysis exercises.	3
7	<b>Professional Ethics:</b> Discussion on ethics in research, laboratory safety, and societal responsibilities.	3
8	<b>Career Development Skills:</b> Resume writing, interview preparation, and professional networking.	3
9	<b>Basics of Data Representation:</b> Graphical representation of data and use of statistical tools in microbiology.	2
10	<b>Soft Skills Development:</b> Conflict resolution, adaptability, and stress management techniques.	3

### Suggested Books:

#### Text Books

1. **Soft Skills** – G. R. K. Murthy, Pearson Education, 1st Edition, 2014.
2. **The Elements of Style** – William Strunk Jr. and E.B. White, Pearson, 4th Edition, 2000.

#### References

1. **Developing Communication Skills** – Krishna Mohan and Meera Banerjee, Macmillan India Ltd., 2nd Edition, 2009.
2. **Technical Communication: Principles and Practice** – Meenakshi Raman and Sangeeta Sharma, Oxford University Press, 3rd Edition, 2018.
3. **Soft Skills for Personality Development** – S. Balasubramanian, Wiley, 2012.

#### Examination Scheme:

Components	Attendance	Viva-Voce	Practical Record	Presentation/Skill Assessment
Weightage (%)	10%	20%	10%	60%

**Course Code:** GMBE-103B

**Credit Units:** 03

**Pre-requisite:** Basic understanding of physical fitness and interest in yoga.

**Course Outcome:**

After completion of the course, students will be able to:

1. Understand the importance of physical activity for overall health.
2. Learn the principles and practices of yoga for mental and physical well-being.
3. Develop knowledge about fitness regimes and their applications.
4. Manage stress through physical exercises and relaxation techniques.
5. Build awareness of lifelong fitness practices.

**Details of the Course:**

S. No.	Contents	Contact Hours
1	Introduction to Physical Education: Importance and benefits of fitness and exercise.	2
2	Basics of Yoga: History, significance, and types of yoga.	3
3	Asanas and Pranayama: Practice of basic postures and breathing techniques.	3
4	Stress Management Techniques: Relaxation, meditation, and mindfulness.	2
5	Fitness Activities: Aerobics, stretching, and bodyweight exercises.	3

**Suggested Books:**

**Yoga for Health and Wellness – K. Pattabhi Jois, New Age Publishers, 2016.**

1. **Fitness and Wellness** – Werner W. K. Hoeger, 13th Edition, Cengage Learning, 2020.

**2. Examination Scheme:**

Components	Attendance	Practical Skills	Participation	Final Assessment
Weightage (%)	10%	20%	30%	40%

Health and Nutrition

**Course Code:** GMBE-103C

**Credit Units:** 03

**Pre-requisite:** Basic understanding of food and health.

### Course Outcome:

After completion of the course, students will be able to:

1. Understand the principles of balanced nutrition and dietary requirements.
2. Identify the role of nutrients in maintaining health.
3. Develop knowledge about lifestyle diseases and their prevention through diet.
4. Learn the importance of food safety and hygiene.
5. Promote healthy living practices for individuals and communities.

### Details of the Course:

S. No.	Contents	Contact Hours
1	Basics of Nutrition: Macronutrients and micronutrients, their sources and functions.	3
2	Balanced Diet: Concept, components, and formulation.	2
3	Malnutrition and Lifestyle Diseases: Causes, prevention, and management.	3
4	Food Safety: Hygiene practices and foodborne illnesses.	2
5	Dietary Guidelines: Planning diets for various age groups and health conditions.	3

### Suggested Books:

1. **Nutrition Science** – B. Srilakshmi, New Age International, 8th Edition, 2021.
2. **Modern Nutrition in Health and Disease** – A. Catharine Ross, Lippincott, 12th Edition, 2020.

### Examination Scheme:

Components	Attendance	Assignments	Practical Knowledge	Final Exam
Weightage (%)	10%	20%	30%	40%

## ELEMENTARY MATHS

**Course Code: AECC-103**

**Credit Units: 02**

1. **Master Basic Mathematical Concepts:** Understand fundamental mathematical principles like arithmetic, algebra, and geometry.

2. **Apply Problem-Solving Techniques:** Develop skills to solve real-world mathematical problems using appropriate methods.
3. **Understand Mathematical Relationships:** Recognize patterns, functions, and relationships in mathematical equations and expressions.
4. **Use Mathematical Tools and Techniques:** Apply basic tools (e.g., calculators, graphs) to analyze and solve mathematical problems.
5. **Develop Logical and Analytical Thinking:** Enhance critical thinking and logical reasoning through mathematical exercises and proofs.

### **UNIT 1: Principle of Mathematical Induction**

Process of the proof by induction, motivating the application of the method by looking at natural numbers as the least inductive subset of real numbers. The principle of mathematical induction and simple applications.

### **UNIT 2: Complex Numbers and Quadratic Equations**

Need for complex numbers, especially  $-1$ , to be motivated by inability to solve every quadratic equation. Brief description of algebraic properties of complex numbers. Argand plane and polar representation of complex numbers. Statement of Fundamental Theorem of Algebra, solution of quadratic equations in the complex number system, Square-root of a Complex number.

### **UNIT 3: Linear Inequalities**

Linear inequalities, Algebraic solutions of linear inequalities in one variable and their representation on the number line. Graphical solution of linear inequalities in two variables. Solution of system of linear inequalities in two variables - graphically.

### **UNIT 4: Permutations and Combinations**

Fundamental principle of counting. Factorial  $n$ . Permutations and combinations derivation of formula and their connections, simple applications.

### **UNIT 5: Binomial Theorem**

History, statement and proof of the binomial theorem for positive integral indices. Pascal's triangle, general and middle term in binomial expansion, simple applications.

### **UNIT 6: Sequence and Series**

Sequence and Series. Arithmetic Progression (A.P.), Arithmetic Mean (A.M.), Geometric Progression (G.P.), general term of a G.P., sum of  $n$  terms of a G.P. Arithmetic and geometric series, infinite G.P. and its sum, geometric mean (G.M.). Relation between A.M. and G.M. Sum

to  $n$  terms of the special series UNIT 7: Integral

Definite integrals as a limit of a sum. Fundamental Theorem of Calculus (without proof). Basic properties of definite integrals and evaluation of definite integrals. Integration as inverse process of differentiation. Integration of a variety of functions by substitution, by partial fractions and by parts, only simple integrals of the type –

$$\int \frac{dx}{x^2 \pm a^2}, \int \frac{dx}{\sqrt{x^2 \pm a^2}}, \int \frac{dx}{\sqrt{a^2 - x^2}}, \int \frac{dx}{ax^2 + bx + c}, \int \frac{dx}{\sqrt{ax^2 + bx + c}},$$

$$\int \frac{(px + q)}{ax^2 + bx + c} dx, \int \frac{(px + q)}{\sqrt{ax^2 + bx + c}} dx, \int \sqrt{a^2 \pm x^2} dx \text{ and } \int \sqrt{x^2 - a^2} dx,$$

$$\int \sqrt{ax^2 + bx + c} dx \text{ and } \int (px + q)\sqrt{ax^2 + bx + c} dx$$

to be evaluated.

### UNIT 8: Probability

Multiplications theorem on probability. Conditional probability, independent events, total probability, Bayes' theorem. Random variable and its probability distribution, mean and variance of haphazard variable. Repeated independent (Bernoulli) trials and Binomial distribution.

## INHERITANCE BIOLOGY

Course Code: CMBE-102

Credit Unit: 03

- 1. Understand Genetic Principles:** Grasp basic principles of inheritance, including Mendelian genetics and patterns of heredity.

2. **Analyze Genetic Crosses:** Apply Punnett squares and other tools to predict genetic outcomes in offspring.
3. **Explore Genetic Variability:** Understand the role of mutations, genetic recombination, and chromosomal variations in inheritance.
4. **Study Inheritance Mechanisms:** Learn about non-Mendelian inheritance patterns such as incomplete dominance, co-dominance, and sex-linked traits.
5. **Relate Genetics to Evolution:** Connect inheritance patterns to evolutionary processes and genetic diversity in populations.

### **Unit 1: Introduction to Genetics**

Historical developments, Model organisms in genetic analyses and experimentation: *Escherichia coli*, *Saccharomyces cerevisiae*, *Neurospora crassa*, *Caenorhabditis elegans*, *Drosophila melanogaster*, *Arabidopsis thaliana*.

### **Unit 2: Mendelian Principles**

Mendel's Laws: Dominance, segregation, independent assortment, deviation from Mendelian inheritance, Rediscovery of Mendel's principles, Chromosome theory of inheritance: Allele, multiple alleles, pseudoallele, complementation tests, Extensions of Mendelian genetics: Allelic interactions, concept of dominance, recessiveness, Incomplete dominance and co-dominance, Multiple alleles, Epistasis, penetrance and expressivity.

### **Unit 3: Linkage and Crossing over**

Linkage and recombination of genes, Cytological basis of crossing over, Crossing over at four-strand stage, Molecular mechanism of crossing over, mapping, Homologous and non-homologous recombination, including transposition, site-specific recombination.

### **Unit 4: Extra-Chromosomal Inheritance**

Rules of extra nuclear inheritance, Organelle heredity - Chloroplast mutations in *Chlamydomonas*, mitochondrial, mutations in *Saccharomyces*, Maternal effects – Shell coiling in *Limnaea peregra* Infectious heredity - Kappa particles in *Paramecium*.

### **Unit 5: Characteristics of Chromosomes**

Structural organization of chromosomes - centromeres, telomeres and repetitive DNA, Packaging DNA molecules into chromosomes, Concept of euchromatin and heterochromatin, Normal and abnormal karyotypes of human chromosomes<sup>42</sup>, Chromosome banding, Giant chromosomes:

Polytene and lampbrush chromosomes, Variations in chromosome structure: Deletion, duplication, inversion and translocation, Variation in chromosomal number and structural abnormalities - Klinefelter syndrome, Turner syndrome, Down syndrome.

Pedigree analysis, lod score for linkage testing, karyotypes, genetic disorders. Polygenic inheritance, heritability and its measurements, QTL mapping.

Weightage (%)	10	20	10	60

## SEMESTER II

### Organic & Analytical Chemistry

**Course Code: CMBE-102a**

**Credit Units: 03**

**Pre-requisite:** Basic information of Chemistry

#### **Course Outcome:**

1. Understand periodic properties and its application in the characterization of chemical compounds
2. Understand the various properties of materials depending upon bond formation.
3. Utilize the concept of hardness in the purification of water for industrial and domestic purpose
4. Distinguish the rate laws and application to different chemical reaction mechanism
5. Learn and apply the concepts of analytical chemistry for sample analysis by chemical methods
6. Learn the basic concepts of Chemistry and its application in different fields

#### **Details of the Course:-**

##### **UNIT I: Periodic Properties:**

Position of elements in the periodic table, effective nuclear charge, atomic and ionic radii, ionization energy, electron affinity and electronegativity definition, methods of determination, trends in periodic table and applications in predicting and explaining the chemical behavior.

##### **UNIT II: Atomic and Molecular Structure:**

VSEPR theory and its application for structure of  $\text{NH}_3$ ,  $\text{NH}_4^+$ ,  $\text{H}_2\text{O}$ ,  $\text{H}_3\text{O}^+$ ,  $\text{SO}_2$  and  $\text{XeF}_4$   
Molecular Orbital Theory, Formation of homo and heteronuclear diatomic molecules  
Hydrogen Bonding and its application  
Metallic Bonding (Band theory); role of doping  
Coordination compounds: Introduction, Werner's coordination theory, naming of compounds.

##### **UNIT III: Water Chemistry:**

Hardness of water and its measurement, Softening of water by L-S process, Zeolite process and Reverse osmosis process, Ion Exchange process, Calgon Process, Numerical problems based on L-S Process, Zeolite Process and hardness of water.

## UNIT IV: Chemical Kinetics:

Ionic reactions and molecular reactions, Molecularity and Order of reactions, Integrated equations of 1st, 2nd and zero order reactions, Activation Energy and Activated complexes, numerical problems based upon them.

## UNIT V: Analytical Chemistry:

Qualitative and Quantitative Chemistry, Volumetric and Gravimetric Analysis; Principles of Volumetric Analysis; Concept of pH, buffer, Henderson equation, Concept of strength and concentration of solution; Normality, Molarity, Molality and interconversion of strength Titration-Principles and Classification: Redox, Acid-Base, Complexometric, Redox and Precipitation, Oxidation Number and calculation of oxidation number in compounds.

## Statistics

**Course Code: AECC-103A**

**Credit Units: 02**

**Pre-requisite:** Basic mathematical skills.

### Course Outcome:

After completion of the course, students will be able to:

1. Apply statistical tools for analyzing experimental data.
2. Understand probability concepts and their applications in biological studies.
3. Perform hypothesis testing and data interpretation.
4. Use graphical and tabular methods for data presentation.
5. Enhance research skills through statistical analysis.

### Details of the Course:

S. No.	Contents	Contact Hours
1	Introduction to Statistics: Importance, scope, and types of data.	4
2	Descriptive Statistics: Mean, median, mode, standard deviation, and variance.	4
3	Probability Concepts: Basics and applications in biological systems.	4
4	Hypothesis Testing: t-test, chi-square test, and ANOVA.	4
5	Data Representation: Graphs, charts, and tables for experimental results.	4

### Suggested Books:

1. **Biostatistics: A Foundation for Analysis in Health Sciences** – Wayne W. Daniel, Wiley, 10th Edition, 2013.
2. **Introduction to Biostatistics** – P. N. Arora and P. K. Malhan, Himalaya Publishing, 2017.

### Examination Scheme:

Components	Attendance	Assignments	Midterm Exam	Final Exam
Weightage (%)	10%	20%	20%	50%

**Pre-requisite:** Basic mathematical understanding.

**Course Outcome:**

After completion of the course, students will be able to:

1. Develop mathematical skills required for biological data analysis.
2. Understand applications of matrices, calculus, and algebra in microbiology.
3. Solve biological problems using differential equations.
4. Perform numerical methods for data interpretation.
5. Apply mathematical models in research and analysis.

**Details of the Course:**

S. No.	Contents	Contact Hours
1	Matrices and Determinants: Basics and applications in biological systems.	4
2	Calculus: Differentiation, integration, and their uses in microbial growth analysis.	4
3	Algebra: Basic concepts and solving biological equations.	4
4	Differential Equations: Solving equations related to population dynamics and enzymatic reactions.	4
5	Basics of Numerical Methods: Interpolation and regression analysis.	4

**Suggested Books:**

1. **Mathematics for Biological Scientists** – Mike Aitken and W. Heard, Garland Science, 2009.
2. **Mathematics for Biologists** – E. Batschelet, Springer, 3rd Edition, 1979.

**Examination Scheme:**

Components	Attendance	Assignments	Midterm Exam	Final Exam

#### **UNIT I: Periodic Properties:**

Position of elements in the periodic table, effective nuclear charge, atomic and ionic radii, ionization energy, electron affinity and electronegativity definition, methods of determination, trends in periodic table and applications in predicting and explaining the chemical behavior.

#### **UNIT II: Atomic and Molecular Structure:**

VSEPR theory and its application for structure of  $\text{NH}_3$ ,  $\text{NH}_4^+$ ,  $\text{H}_2\text{O}$ ,  $\text{H}_3\text{O}^+$ ,  $\text{SO}_2$  and  $\text{XeF}_4$   
Molecular Orbital Theory, Formation of homo and heteronuclear diatomic molecules  
Hydrogen Bonding and its application  
Metallic Bonding (Band theory); role of doping  
Coordination compounds: Introduction, Werner's coordination theory, naming of compounds.

#### **UNIT III: Water Chemistry:**

Hardness of water and its measurement, Softening of water by L-S process, Zeolite process and Reverse osmosis process, Ion Exchange process, Calgon Process, Numerical problems based on L-S Process, Zeolite Process and hardness of water.

#### **UNIT IV: Chemical Kinetics:**

Ionic reactions and molecular reactions, Molecularity and Order of reactions, Integrated equations of 1st, 2nd and zero order reactions, Activation Energy and Activated complexes, numerical problems based upon them.

#### **UNIT V: Analytical Chemistry:**

Qualitative and Quantitative Chemistry, Volumetric and Gravimetric Analysis; Principles of Volumetric Analysis; Concept of pH, buffer, Henderson equation, Concept of strength and concentration of solution; Normality, Molarity, Molality and interconversion of strength Titration-Principles and Classification: Redox, Acid-Base, Complexometric, Redox and Precipitation, Oxidation Number and calculation of oxidation number in compounds.

## BASIC AND APPLIED CHEMISTRY

**Course Code: CMBE-102c**

**Credit Units: 03**

**Pre-requisite:** Basic information of Chemistry

### **Course Outcome:**

7. Understand periodic properties and its application in the characterization of chemical compounds
8. Understand the various properties of materials depending upon bond formation.
9. Utilize the concept of hardness in the purification of water for industrial and domestic purpose
10. Distinguish the rate laws and application to different chemical reaction mechanism
11. Learn and apply the concepts of analytical chemistry for sample analysis by chemical methods
12. Learn the basic concepts of Chemistry and its application in different fields

### **Details of the Course:-**

#### **UNIT I: Periodic Properties:**

Position of elements in the periodic table, effective nuclear charge, atomic and ionic radii, ionization energy, electron affinity and electronegativity definition, methods of determination, trends in periodic table and applications in predicting and explaining the chemical behavior.

#### **UNIT II: Atomic and Molecular Structure:**

VSEPR theory and its application for structure of  $\text{NH}_3$ ,  $\text{NH}_4^+$ ,  $\text{H}_2\text{O}$ ,  $\text{H}_3\text{O}^+$ ,  $\text{SO}_2$  and  $\text{XeF}_4$   
Molecular Orbital Theory, Formation of homo and heteronuclear diatomic molecules  
Hydrogen Bonding and its application

Metallic Bonding (Band theory); role of doping

Coordination compounds: Introduction, Werner's coordination theory, naming of compounds.

#### **UNIT III: Water Chemistry:**

Hardness of water and its measurement, Softening of water by L-S process, Zeolite process and Reverse osmosis process, Ion Exchange process, Calgon Process, Numerical problems based on L-S Process, Zeolite Process and hardness of water.

#### **UNIT IV: Chemical Kinetics:**

Ionic reactions and molecular reactions, Molecularity and Order of reactions, Integrated equations of 1st, 2nd and zero order reactions, Activation Energy and Activated complexes, numerical

problems based upon them.

### UNIT V: Analytical Chemistry:

Qualitative and Quantitative Chemistry, Volumetric and Gravimetric Analysis; Principles of Volumetric Analysis; Concept of pH, buffer, Henderson equation, Concept of strength and concentration of solution; Normality, Molarity, Molality and interconversion of strength Titration-Principles and Classification: Redox, Acid-Base, Complexometric, Redox and Precipitation, Oxidation Number and calculation of oxidation number in compounds.

## **SEMESTER II**

### **INTRODUCTION AND SCOPE OF MICROBIOLOGY**

**Course Code: CMBE-104**

**Credit Unit: 03**

1. **Understand Microbiology Fundamentals:** Grasp the basic principles and concepts of microbiology, including microorganisms and their classification.
2. **Identify Microbial Diversity:** Recognize various types of microorganisms such as bacteria, viruses, fungi, and protozoa.
3. **Understand Microbial Physiology:** Learn about the structure, function, and metabolism of microorganisms.
4. **Explore Microbial Applications:** Understand the role of microbes in various fields like medicine, agriculture, and industry.
5. **Recognize Microbial Impact:** Appreciate the significance of microbiology in public health, disease prevention, and environmental sustainability.

#### **UNIT 1: History of Development of Microbiology**

Fundamentals, History and Evolution of Microbiology. Classification of microorganisms: Microbial taxonomy, criteria used including molecular approaches, Microbial phylogeny and current classification of bacteria. Microbial Diversity: Distribution and characterization Prokaryotic and Eukaryotic cells, Morphology and cell structure of major groups of microorganisms eg. Bacteria, Algae, Fungi, Protozoa and Unique features of viruses.

## **UNIT 2: Cultivation and Maintenance**

Cultivation and Maintenance of microorganisms: Nutritional categories of microorganisms, methods of isolation, Purification and preservation.

## **UNIT 3: Microbial Growth, Metabolism and Reproduction**

Microbial growth: Growth curve, Generation time, synchronous batch and continuous culture, measurement of growth and factors affecting growth of bacteria. Microbial Metabolism: Metabolic pathways, amphi-catabolic and biosynthetic pathways. Bacterial Reproduction: Transformation, Transduction and Conjugation. Endospores and sporulation in bacteria.

## **UNIT 4: Sterilization**

Control of Microorganisms: By physical, chemical and chemotherapeutic Agents.

## **UNIT 5: Water and Food Microbiology**

Water Microbiology: Bacterial pollutants of water, coliforms and non-coliforms. Sewage composition and its disposal. Food Microbiology: Important microorganism in food Microbiology: Moulds, Yeasts, bacteria. Major food born infections and intoxications, Preservation of various types of foods. Fermented Foods.

	Attendance	Class Test	Assignment/ Project/Seminar/Quiz	
Weightage (%)	10	20	10	60

## SEMESTER II

### Elements of Biochemistry

**Course Code: CMBE-104a**

**Credit Units: 03**

**Pre-requisite:** Basic understanding of biomolecules and concepts of general chemistry

#### Course Outcome:

1. Students will be able to define biomolecules and buffers.
2. Students will understand the structure and functions of biomolecules.
3. Students will be able to classify and explain the role of various biomolecules in human body.
4. Students will be able to analyze the causes of diseases on biochemical basis.
5. Students will be able to understand various biochemical process and cell metabolism.

#### Details of the

#### Course:-UnitI:

A historical prospective, Amino acids & Proteins: Structure & Function. Structure and properties of Amino acids, Types of proteins and their classification, Forces stabilizing protein structure and shape. Different Level of structural organization of proteins, Protein Purification. Denaturation and renaturation of proteins. Fibrous and globular proteins.

## Unit II:

Nucleic acids: Structure and functions: Physical & chemical properties of Nucleic acids, Nucleosides & Nucleotides, purines & pyrimidines,. Biologically important nucleotides, Double helical model of DNA structure and forces responsible for A, B & Z – DNA, denaturation and renaturation of DNA.

Carbohydrates: Structure, Function and properties of Monosaccharides, Disaccharides and Polysaccharides. Homo & Hetero Polysaccharides, Mucopolysaccharides, Bacterial cell wall polysaccharides, Glycoprotein's and their biological functions.

## Unit III:

Lipids: Structure and functions –Classification, nomenclature and properties of fatty acids, essential fatty acids. Phospholipids, sphingolipids, glycolipids, cerebrosides, gangliosides, Prostaglandins, Cholesterol.

## Unit IV:

Enzymes: Nomenclature and classification of Enzymes, Holoenzyme, apoenzyme, Cofactors, coenzyme, prosthetic groups, metalloenzymes, monomeric & oligomeric enzymes, activation energy and transition state, enzyme activity, specific activity, common features of active sites, enzyme specificity: types & theories, Biocatalysts from extreme thermophilic and hyperthermophilic archaea and bacteria.

Role of:  $\text{NAD}^+$ ,  $\text{NADP}^+$ , FMN/FAD, coenzymes A, Thiamine pyrophosphate, Pyridoxal phosphate, lipoic-acid, Biotin vitamin B12, Tetrahydrofolate and metallic ions

## Unit V:

Carbohydrates Metabolism: Reactions, energetics and regulation. Glycolysis: Fate of pyruvate under aerobic and anaerobic conditions. Pentose phosphate pathway and its significance, Gluconeogenesis, Glycogenolysis and glycogen synthesis. TCA cycle, Electron Transport Chain, Oxidative phosphorylation.  $\beta$ -oxidation of fatty acids.

## **SEMESTER II**

### **Introductory Human Physiology**

**Course Code: CMBE-104c**

**Credit Units: 03**

**Pre-requisite:** Basic information of Animal kingdom system

#### **Course Outcome:**

- i. Students will be able to *define* and explain the fundamental principles of heart.
- ii. Students will be able to *understand* comparative Respiratory system, Renal Physiology, Reproductive system, Endocrine system and Gastrointestinal system.
- iii. Students will *acquire* knowledge about the function of different types of organs in different animal kingdom.

#### **Details of the Course:-**

##### **Unit I: Scope of Physiology and Anatomy:**

Definition of various terms used in Anatomy. Structure of cell, function of its components with special reference to mitochondria and microsomes. Elementary tissues: Elementary tissues of the body, i.e. epithelial tissue, muscular tissue, connective tissue and nervous tissue. Skelatal System: Structure and function of Skelton .Classification of joints and their function. Joint disorders.

## **Unit II: Cardiovascular and Respiratory System:**

Composition of blood, functions of blood elements. Blood group and coagulation of blood. Brief information regarding disorders of blood. Name and functions of lymph glands. Structure and functions of various parts of the heart .Arterial and venous system with special reference to the names and positions of main arteries and veins. Blood pressure and its recording. Brief information about cardiovascular disorders.

Respiratory system: Various parts of respiratory system and their functions, physiology of respiration.

## **Unit III: Urinary, Muscular and Central Nervous System:**

Urinary System: Various parts of urinary system and their functions, structure and functions of kidney. Physiology of urine formation. Patho-physiology of renal diseases and edema. Muscular System: Structure of skeletal muscle, physiology of muscle contraction. Names, positions, attachments and functions of various skeletal muscles. physiology of neuromuscular junction.

Central Nervous System: Various parts of central nervous system, brain and its parts, functions and reflex action. Anatomy and physiology of automatic nervous system.

#### **Unit IV: Sensory Organs and Digestive System:**

Sensory Organs: Elementary knowledge of structure and functions of the organs of taste, smell, ear, eye and skin. Physiology of pain.

Digestive System: names of various parts of digestive system and their functions. structure and functions of liver, physiology of digestion and absorption.

#### **Unit V: Endocrine system and Reproductive System:**

Endocrine System: Endocrine glands and Hormones. Location of glands, their hormones and functions. pituitary, thyroid. Adrenal and pancreas.

Reproductive system: Physiology and Anatomy of Reproductive system.

## Chemicals and Health

Course Code: CMBE-104d

Credit Units: 03

**Pre-requisite:** Basic knowledge of chemistry and biology.

### Course Outcome:

After completing this course, students will be able to:

1. Understand the role of chemicals in human health and the environment.
2. Analyze the health effects of exposure to natural and synthetic chemicals.
3. Learn the mechanisms of chemical toxicity and detoxification pathways.
4. Explore the regulations and guidelines for chemical safety and management.
5. Evaluate the benefits and risks of chemicals in food, medicine, and industry.

### Details of the Course:

S. No.	Contents	Contact Hours
1	<b>Introduction to Chemicals and Health:</b> Overview of natural and synthetic chemicals, their roles, and impact on human health.	6
2	<b>Toxicology of Chemicals:</b> Basic principles of toxicology, dose-response relationships, and types of chemical toxicity.	6
3	<b>Routes of Chemical Exposure:</b> Inhalation, ingestion, dermal absorption, and injection; acute vs. chronic exposure.	6
4	<b>Environmental Chemicals and Health:</b> Pesticides, heavy metals, endocrine disruptors, and their long-term health effects.	6
5	<b>Chemicals in Food and Water:</b> Additives, preservatives, contaminants, and their health implications.	6
6	<b>Pharmaceutical Chemicals:</b> Benefits and side effects of drugs, drug interactions, and resistance.	6
7	<b>Chemical Safety and Regulations:</b> National and international guidelines for chemical usage, disposal, and safety.	6
8	<b>Emerging Concerns:</b> Nanoparticles, microplastics, and new synthetic chemicals impacting health.	6

### Suggested Books:

#### Text Books

3. **Silent Spring** – Rachel Carson, Houghton Mifflin, 50th Anniversary Edition, 2012.

**Examination Scheme:**

<b>Components</b>	<b>Attendance</b>	<b>Assignments</b>	<b>Midterm Exam</b>	<b>Final Exam</b>
<b>Weightage (%)</b>	10%	20%	30%	40%

This syllabus provides a broad understanding of the interplay between chemicals and human health,

# BIOSTATISTICS

**Course Code: CMBE-106**

**Credit Unit: 03**

1. **Understand Statistical Concepts:** Grasp fundamental statistical concepts such as probability, data distribution, and hypothesis testing.
2. **Analyze Biological Data:** Apply statistical methods to analyze and interpret biological and experimental data.
3. **Use Statistical Tools:** Gain proficiency in using statistical software for data analysis and visualization.
4. **Conduct Statistical Inference:** Make inferences about populations based on sample data, including confidence intervals and significance tests.
5. **Interpret Statistical Results:** Develop the ability to interpret and communicate statistical findings in biological research and health studies.

## **Unit 1**

Variable and attribute, Population vs. Sample, Census vs. Sample survey, Arrangement of data, Frequency distribution.

## **Unit 2**

Line diagram, Bar Diagram, Pie chart and Histograms.

## **Unit 3**

Measures of Central Tendency: Arithmetic Mean, Median and Mode.

## **Unit 4**

Variance, Standard deviation, Standard error of mean, standard score.

## **Unit 5**

Testing of hypothesis and goodness of fit: Null Hypothesis, Level of Significance, Probability, Normal Distribution, Error of inference, Student's t-test, Paired t-test, Fisher's

t-test, and Chi- square test.

<b>Weightage (%)</b>	10	20	10	60

## Inheritance Biology Laboratory

**Course Code:** CMBE-152

**Credit Units:** 01

**Pre-requisite:** Basic knowledge of genetics and inheritance principles.

### Course Outcome:

After completion of the course, students will be able to:

1. Perform experiments demonstrating Mendelian and non-Mendelian inheritance patterns.
2. Analyze genetic variations using laboratory techniques.
3. Use pedigree analysis to study inheritance in human populations.
4. Understand molecular basis and tools for studying heredity.
5. Apply knowledge of inheritance in real-world biological research.

### Details of the Laboratory Course:

S. No.	Contents	Contact Hours
1	<b>Study of Mendelian Genetics:</b> Monohybrid and dihybrid crosses using model organisms (e.g., <i>Drosophila</i> or plants).	3
2	<b>Chi-Square Analysis:</b> Statistical validation of observed and expected genetic ratios.	2
3	<b>Pedigree Analysis:</b> Interpretation and construction of family trees for genetic disorders.	2
4	<b>DNA Isolation and Visualization:</b> Extraction of genomic DNA and analysis by gel electrophoresis.	3
5	<b>Mutation Studies:</b> Analysis of phenotypic effects of induced or spontaneous mutations.	3
6	<b>Sex Linkage and Inheritance Patterns:</b> Study of sex-linked traits using model organisms or simulated datasets.	2
7	<b>Polygenic Traits Analysis:</b> Study of quantitative inheritance (e.g., kernel color in maize).	2
8	<b>Epistasis and Gene Interactions:</b> Experimental demonstration of gene interactions.	3
9	<b>Human Chromosomal Analysis:</b> Study of karyotypes to identify chromosomal abnormalities.	2
10	<b>Use of Genetic Databases:</b> Introduction to bioinformatics tools for inheritance analysis.	2

<b>Components</b>	<b>Attendance</b>	<b>Practical Record</b>	<b>Viva-Voce</b>	<b>Final Practical Exam</b>
<b>Weightage (%)</b>	10%	20%	20%	50%

## Introduction and Scope of Microbiology Laboratory

Course Code: CMBE-154

Credit Units: 01

**Pre-requisite:** Basic knowledge of biology and laboratory safety practices.

### Course Outcome:

After completion of the course, students will be able to:

1. Understand the fundamental principles of microbiology laboratory practices.
2. Perform basic microbiological techniques for isolation and identification of microorganisms.
3. Apply aseptic techniques to ensure contamination-free experiments.
4. Gain practical knowledge of microbial growth and their applications.
5. Explore the relevance and scope of microbiology in various fields.

### Details of the Laboratory Course:

S. No.	Contents	Contact Hours
1	<b>Introduction to Laboratory Safety and Practices:</b> Understanding biosafety levels, proper disposal of microbial waste.	2
2	<b>Microscopy:</b> Use and handling of compound microscope; observation of microbial cells using prepared slides.	3
3	<b>Aseptic Techniques:</b> Methods for sterilization, disinfection, and handling microbial cultures safely.	3
4	<b>Preparation of Culture Media:</b> Preparation of nutrient agar and nutrient broth.	3
5	<b>Isolation of Microorganisms:</b> Streak plate, spread plate, and pour plate techniques.	3
6	<b>Staining Techniques:</b> Simple staining, Gram staining, and observation of results.	3
7	<b>Growth Curve Analysis:</b> Study of microbial growth under controlled conditions.	3
8	<b>Quantification of Microbes:</b> Serial dilution and estimation of colony-forming units (CFU).	3
9	<b>Applications of Microbiology:</b> Case studies in food, health, and industrial microbiology.	2

## Bridging Information Technology and Biotechnology

Course Code: GMBE-103

Credit Units: 03

**Pre-requisite:** Basic understanding of biotechnology and computer applications.

### Course Outcome:

After completion of the course, students will be able to:

1. Understand the role of information technology in advancing biotechnology research and applications.
2. Learn bioinformatics tools for data analysis and interpretation.
3. Explore computational approaches for biological sequence alignment, modeling, and simulation.
4. Develop skills in managing biological databases and data visualization.
5. Apply IT solutions to solve real-world problems in biotechnology.

### Details of the Course:

S. No.	Contents	Contact Hours
1	<b>Introduction to IT in Biotechnology:</b> Role of computational tools in genomics, proteomics, and systems biology.	4
2	<b>Biological Databases:</b> Understanding primary and secondary databases like GenBank, PDB, and Swiss-Prot.	4
3	<b>Sequence Analysis:</b> Concepts of sequence alignment (pairwise and multiple), tools like BLAST and ClustalW.	4
4	<b>Data Visualization Tools:</b> Techniques to represent complex biological data graphically using software like R, Python, or Cytoscape.	4
5	<b>Molecular Modeling:</b> Basics of protein structure prediction, molecular docking, and simulations.	4
6	<b>Bioinformatics Tools:</b> Introduction to software tools like MEGA, T-Coffee, and Primer3.	4
7	<b>Application in Omics:</b> Genomics, transcriptomics, proteomics, and metabolomics integration using computational tools.	4
8	<b>Case Studies:</b> Applications of IT in drug discovery, agriculture, and personalized medicine.	2

<b>Weightage (%)</b>	10%	20%	30%	40%

---

This syllabus provides an interdisciplinary foundation in bioinformatics and computational biology, preparing students to harness IT solutions for addressing challenges in modern biotechnology.

## Breeding Information Technology Lab

**Course Code: GMBE-153**

**Credit Units: 01**

**Pre-requisite:** Basic knowledge of Genetics and Biotechnology

**Course Outcome:**

After completion of the course, the students will be able to:

1. Understand good laboratory practices in the context of breeding data management.
2. Gain hands-on experience with bioinformatics tools and software used in breeding programs.
3. Analyze genetic data and interpret results to support plant and animal breeding decisions.
4. Learn to apply molecular markers and genomic data for breeding purposes.
5. Utilize statistical and computational methods for breeding program design and evaluation.

**Details of the Laboratory Course:**

**Note:** A college must offer 70% of the below listed experiments. The remaining 30% experiments may be modified by the college according to facilities available.

**Details of the Laboratory Course:**

**Note:** A college must offer 70% of the below listed experiments. The remaining 30% experiments may be modified by the college according to facilities available.

S. No.	Contents	Contact Hours
1	Introduction to Bioinformatics Tools for Breeding: Software like TASSEL, QTL Cartographer, etc.	2
2	Data Collection and Analysis: Using breeding data for statistical analysis and interpretation.	3
3	Molecular Marker Analysis: Application of SSR, SNP, and RAPD markers in breeding.	3
4	Marker-Assisted Selection: Identifying and selecting genetic markers for breeding programs.	2
5	Genomic Selection: Introduction to genomic selection and its application in breeding.	3
6	Design and Evaluation of Breeding Programs: Statistical methods for designing breeding strategies.	3
7	QTL Mapping: Identifying Quantitative Trait Loci using genetic data.	3
8	Gene Editing Tools in Breeding: Practical applications of CRISPR/Cas9 in plant and animal breeding.	3

S. No.	Contents	Contact Hours
9	Simulation of Breeding Programs: Using simulation software to predict outcomes of breeding efforts.	3
10	Ethical Considerations in Breeding and Biotechnology: Discussion on ethical issues in breeding research.	2

# BACTERIOLOGY

**Course Code: GMBE-104**

**Credit Unit: 03**

1. **Understand Bacterial Classification:** Grasp the classification, structure, and characteristics of different types of bacteria.
2. **Study Bacterial Growth and Physiology:** Learn about bacterial metabolism, growth conditions, and environmental influences.
3. **Identify Bacterial Infections:** Recognize pathogenic bacteria and their role in human, animal, and plant diseases.
4. **Apply Laboratory Techniques:** Develop skills in culturing, isolating, and identifying bacteria in the laboratory.
5. **Understand Antimicrobial Resistance:** Explore mechanisms of bacterial resistance to antibiotics and methods for controlling bacterial infections.

## **Unit 1: Cell organization**

Cell size, shape and arrangement, glycocalyx, capsule, flagella, endoflagella, fimbriae and pili. Cell wall: Composition and detailed structure of Gram-positive and Gram-negative cell walls, Archaeobacterial cell wall, Gram and acid-fast staining mechanisms, lipopolysaccharide (LPS), Sphaeroplasts, protoplasts, and L-forms. Effect of antibiotics and enzymes on the cell wall. Cell Membrane: Structure, function and chemical composition of bacterial and archaeal cell membranes. Cytoplasm: Ribosomes, mesosomes, inclusion bodies, nucleoid, chromosome and plasmids. Endospore: Structure, formation, stages of sporulation.

## **Unit 2: Bacteriological techniques**

Pure culture isolation: Streaking, serial dilution and plating methods; cultivation, maintenance and preservation/stocking of pure cultures; cultivation of anaerobic bacteria, and accessing non-culturable bacteria, Microscopy.

## **Unit 3: Growth and nutrition**

Nutritional requirements in bacteria and nutritional categories; Culture media: components of media, natural and synthetic media, chemically defined media, complex media, selective, differential, indicator, enriched and enrichment media Physical methods of microbial control: heat, low temperature, high pressure, filtration, desiccation, osmotic pressure, radiation

Chemical methods of microbial control: disinfectants, types and mode of action.

#### **Unit 4: Reproduction in Bacteria**

Asexual methods of reproduction, logarithmic representation of bacterial populations, phases of growth, calculation of generation time and specific growth rate.

#### **Unit 5: Bacterial Systematics**

Aim and principles of classification, systematics and taxonomy, concept of species, taxa, strain; Conventional, molecular and recent approaches to polyphasic bacterial taxonomy, evolutionary Chronometers, rRNA oligonucleotide sequencing, signature sequences, and protein sequences.

## Bacteriology Lab

**Course Code: BMB-154**

**Credit Units: 01**

**Pre-requisite:** Basic information of Bacteriology and Virology

### Course Outcome:

After completion of the course the students will be able

1. To learn good laboratory practices.
2. To learn the principle and working of microbiology instruments and equipment in accordance with current laboratory safety protocol.
3. To utilize the microbial flora for various applications.
4. To learn microbiology laboratory techniques.

### Details of the Laboratory Course:-

**Note:** A college must offer 70% of the below listed experiments. The remaining 30% experiments may be modified by college according to facilities available.

S. No.	Contents	Contact Hours
1.	Preparation of different media: Complex media-Nutrient agar, McConkey agar, EMB agar.	2
2.	Simple staining, Negative staining, Gram's staining, Capsule staining, Endospore staining	5
3.	Isolation of pure cultures of bacteria by streaking method.	2
4.	Preservation of bacterial cultures by various techniques.	2
5.	Estimation of CFU count by spread plate method/pour plate method.	2
6.	Motility by hanging drop method.	2
7.	Isolation of coliphages from sewage water sample.	2
8.	One step growth curve for determination of virus titre.	2
9.	Immunological assays for virus detection.	2
10.	Cultivation and morphological identification of animal cell lines.	2

# PROFESSIONAL COMMUNICATION

**Course Code: AECC-102**

**Credit Unit: 02**

1. **Enhance Communication Skills:** Develop effective verbal, non-verbal, and written communication skills for professional settings.
2. **Master Business Writing:** Learn to write clear and concise emails, reports, memos, and proposals.
3. **Improve Presentation Skills:** Gain proficiency in preparing and delivering professional presentations.
4. **Understand Communication Etiquette:** Understand and apply proper professional behavior and etiquette in diverse communication contexts.
5. **Collaborate Effectively:** Strengthen interpersonal skills for successful teamwork, negotiation, and conflict resolution in professional environments.

## **Unit 1: Fundamentals of Communication**

Technical Communication: features: Distinction between General and Technical communication; Language as a tool of communication; Levels of communication: Interpersonal, Organizational, Mass communications; the flow of Communication: Downward, Upward, Lateral of Horizontal Importance of technical communication; Barriers to Communication.

## **Unit 2: Constituents of Technical Written Communication**

Words and Phrases: Word formation. Synonyms and Antonyms; Homophones; Select vocabulary of about 500-1000 New words; Correct Usage: all Parts of Speech; Modals; Concord; Articles; Infinitives; Requisites of Sentence Construction: Paragraph Development: Techniques and Methods- Inductive, Deductive, Spatial, Linear, Chronological etc; The Art of Condensation- various steps.

## **Unit 3: Business Communication**

Principles, Sales & Credit letters; Claim and Adjustment Letters; Job application and Resumes. Reports: Types; Significance; Structure, Style & Writing of Reports. Technical Proposal; Parts; Types; Writing of Proposal; Significance. Negotiation & Business Presentation skills.

## **Unit 4: Presentation Strategies and Listening Skills.**

Defining Purpose; Audience & Local; Organizing<sup>86</sup> Contents; Preparing Outline; Audio-visual Aids;

Nuances of Delivery; Body Language; Dimensions of Speech: Syllable; Accent; Pitch; Rhythm; Intonation; Paralinguistic features of voice; Listening Skills: Active Listening, Passive Listening. Methods for improving Listening Skills.

### **Unit 5: Value-Based Text Readings**

Following essays form the suggested textbook with emphasis on Mechanics of writing.

- (i) Humanistic and Scientific Approaches to Human Activity by Moody E. Prior
- (ii) The Language of Literature and Science by A. Huxley
- (iii) Man and Nature by J. Bronowski
- (iv) The Social Function of Literature by Ian Watt
- (v) Science and Survival by Barry Commoner
- (vi) The Mother of the Sciences by A. J. Bahm.

### **References:**

2. Technical Communication: A Practical Approach: Madhu Rani and Seema Verma- Acme Learning, New Delhi-2011.
3. Technical Communication- Principles and Practices by Meenakshi Raman & Sangeeta Sharma, Oxford Univ. Press,2007, New Delhi.

### **Examination Scheme:**

<b>Components</b>	<b>Internal Assessment</b>			<b>External Evaluation</b>
	<b>Attendance</b>	<b>Class Test</b>	<b>Assignment/ Project/Seminar/Quiz</b>	
<b>Weightage (%)</b>	10	20	10	60

# VIROLOGY

**Course Code: CMBE-201**

**Credit Unit: 04**

1. **Understand Viral Classification:** Learn the classification, structure, and types of viruses.
2. **Study Viral Replication:** Grasp the processes of viral replication and life cycles in host cells.
3. **Identify Viral Diseases:** Recognize the role of viruses in causing diseases in humans, animals, and plants.
4. **Explore Antiviral Mechanisms:** Understand the mechanisms of antiviral drugs and immune responses against viral infections.
5. **Apply Laboratory Techniques:** Develop skills in isolating, culturing, and identifying viruses using laboratory methods.

## **Unit 1: Nature and Properties of Viruses**

Discovery of viruses, nature and definition of viruses, general properties, concept of viroids, virusoids, satellite viruses and Prions. Theories of viral origin Structure of Viruses: Capsid symmetry, enveloped and non-enveloped viruses Isolation, purification and cultivation of viruses, Classification and nomenclature of different groups of viruses.

## **Unit 2: Bacteriophages**

Diversity, classification, one-step multiplication curve, lytic and lysogenic phages (lambda phage) concept of early and late proteins, regulation of transcription in lambda phage.

## **Unit 3: Viral Transmission, Salient features of viral nucleic acids and Replication**

Viral Transmission, Salient features of viral nucleic acids and Replication, Persistent, non-persistent, vertical and horizontal, Unusual bases (TMV, T4 phage), overlapping genes ( $\phi$ X174, Hepatitis B virus), alternate splicing (HIV), terminal redundancy (T4 phage), terminal cohesive ends (lambda phage), partial double stranded genomes (Hepatitis B), long terminal repeats (retrovirus), segmented (Influenza virus), and non-segmented genomes (picornavirus), capping and tailing (TMV), Interaction of viruses with cellular receptors and entry of viruses. Replication strategies of viruses as per Baltimore classification (phi X 174, Retroviridae, Vaccinia, Picorna), Assembly, maturation and release of virions.

## **Unit 4: Viruses and Cancer**

Introduction to oncogenic viruses, Types of oncogenic DNA and RNA viruses: Concepts of oncogenes and proto-oncogenes.

## Unit 5: Prevention & control of viral disease

Prevention & control of viral diseases, Antiviral compounds and their mode of action, Interferon and their mode of action, General principles of viral vaccination.

## **SEMESTER III**

### **INHERITANCE AND EVOLUTIONARY MICROBIOLOGY**

**Course Code:CMBE-201a**

**Credit Units: 04**

**Pre-requisite:** Basic knowledge of microbial cells.

#### **Course Outcome:**

After completion of the course the students should be able

6. To understand the structural similarities and differences among microorganisms and the unique structure/function relationships of prokaryotic cells.
7. To understand the science of microbiology, its development and importance in human welfare.
8. To apply laboratory practices used in the study of microorganisms.
9. To recognize and compare structure and function of microbes and factors affecting microbial growth.
10. To explain and apply aseptic microbiological techniques in the laboratory and check sources of microbial contamination and their control.

#### **Details of the**

##### **Course:-Unit – I:**

History and scope of microbiology, Development of Microbiology, various branches of microbiology and applications of microbiology. Classification of microorganisms, Microbial Taxonomy- criteria used including molecular approaches. Microbial phylogeny and Bergey's manual.

##### **Unit – II:**

Introduction to bacteria, Morphology (size, shape and arrangement of cells), Ultra structure of bacteria, cell wall and cell membrane: structure, composition and function. Eubacteria, archaeobacteria, Gram positive and Gram negative bacteria, acid-fast and non-acid-fast bacteria.

##### **Unit – III:**

Principles of microbial nutrition, Basic nutritional requirement of bacteria for carbon, nitrogen, sulphur and growth factors. Nutritional categories of microorganisms. Cultivation and Maintenance of Microorganisms, Culture media: principle and types, Methods of isolation, purification and preservation. Pure culture techniques.

## Unit – IV:

Microbial Growth, Growth curve (normal and biphasic) and generation time, aerobic and anaerobic culture, shaker and still culture, asynchronous and synchronous growth, growth curve generation time, growth kinetics, batch and continuous cultures. Measurement of growth, factors affecting growth. Control of Bacteria, Different modes of sterilization. Physical and chemical agents-examples and mode of action.

## Unit – V:

Introduction to Virology, Morphology and ultra-structure, types on the basis of morphology, isolation and cultivation of viruses. Bacterial Viruses (Bacteriophage), Structure, life cycle and application, antiviral agents.

## SEMESTER III

### MICROBIOLOGICAL BASIS OF INHERITANCE

Course Code: CMBE-201b

Credit Units: 04

Pre-requisite: Basic information of Cell Biology

#### Course Outcome:

- Students will be able to *define* and explain the fundamental laws of genetics
- Students will be able to *understand* the main modes of Mendelian and non-Mendelian inheritance
- Students will *acquire* knowledge about the chromosome structure, sex linked chromosomes and inherited disorders
- Students will be able to *understand* how alterations in chromosome number or structure may cause various types of diseases
- To describe how mutation is caused in DNA and how DNA damage can be repaired
- Students will be able to *value* role of Genetics within a population and in causing evolution
- Students will be able to *apply* their knowledge to healthy and disease contexts.

#### Details of the Course:-

##### Unit – I: Principles of heredity and variation:

Mendel and his experiments, monohybrid crosses, incomplete dominance and codominance, dihybrid crosses, multiple alleles (blood group systems), epistasis, lethal genes. Probability in prediction and analysis of genetic data, pedigree analysis.

**Genes and chromosomes:** General features of chromosomes, cell division. Chromosomal theory of inheritance, variation in chromosome number and structure, gene concept, gene structure.

##### Unit – II: Molecular organization of chromosomes:

Genome size and evolutionary complexity, supercoiling of DNA, structure of bacterial chromosome, structure of eukaryotic chromosome, satellite DNA, barr bodies and types of chromosomes- salivary gland chromosomes, lamp brush chromosomes, nucleosome model, sex determination. Sex-linked, sex-limited and sex- influenced inheritance, Transposons.

##### Unit – III: Gene linkage and chromosome mapping:

Linkage and recombination of genes in a chromosome, crossing over and genetic mapping, gene mapping by 2-point and three point test crosses

### **Unit – IV: Gene mutation and DNA repair:**

Classification of mutations, detection of mutations, spontaneous mutations, application of mutagen, chemical mutagen, radiation induced mutations, Forward mutation, Reverse mutation, nutritional mutation.

### **Unit – V: Population Genetics and Evolution:**

Hardy-Weinberg principle, allele frequencies and genotype frequencies, random mating. Genetics and evolution (Mutation and migration, natural selection, random genetics drift). Concept of population size, inbreeding.

**Quantitative Genetics:** Quantitative heritability inheritance, causes of variation.

# FOOD ENGINEERING

**Course Code: CMBE-201c**

**Credit Units: 04**

**Pre-requisite:** Basic knowledge of food technology

## **Course Outcome:**

- Students will be able to know about the basics of food technology.
- Students would know about the microorganisms associated with food.
- Students will understand various principles of food technology.
- Students will also have knowledge of food preservation methods.

### **UNIT-1**

History of microorganisms in food, historical developments. Role and significance of microorganisms in foods. Intrinsic and Extrinsic. Parameters of foods that affect microbial growth. Basic principles, unit operations, and equipment involved in the commercially important food processing methods and unit operations.

### **UNIT-2**

Microorganisms in fresh meats and poultry, processed meats, seafood's, fermented and fermented dairy products and miscellaneous food products. Starter cultures, cheeses, beer, wine and distilled spirits, SCP, medical foods, probiotics and health benefits of fermented milk and foods products.

Brewing, malting, mashing, hops, primary & secondary fermentation: Biotechnological improvements: catabolic repression, High gravity brewing, B-glucan problem, getting rid of diacetyl. Beer, wine and distilled spirits.

### **UNIT-3**

Nutritional boosts and flavor enhancers: Emerging processing and preservation technologies for milk and dairy products. Microbiological examination of surfaces, air sampling, metabolically injured organisms. Enumeration and detection of food-borne organisms. Bioassay and related methods.

### **UNIT-4**

Food preservation methods. Radappertization, radicidation, and radurization of foods. Legal status of food irradiation, effect of irradiation on food constituents.

### **UNIT-5**

Storage stability food preservation with low temperature, hightemperature and drying. Indicator and food-borne pathogens. Rheology of food production.

	<b>Attendance</b>	<b>Class Test</b>	<b>Assignment/Project/Seminar/Quiz</b>	
<b>Weightage (%)</b>	10	20	10	60

# ENVIRONMENTAL MICROBIOLOGY

**Course Code: CMBE-203**

**Credit Unit: 04**

## **Unit 1: Microorganisms and their Habitats**

Structure and function of ecosystems. Terrestrial Environment: Soil profile and soil microflora  
Aquatic Environment: Microflora of fresh water and marine habitats. Atmosphere: Aeromicroflora and dispersal of microbes. Animal Environment: Microbes in/on human body (Microbiomics) & animal (ruminants) body. Extreme Habitats: Extremophiles: Microbes thriving at high & low temperatures, pH, high hydrostatic & osmotic pressures, salinity, & low nutrient levels. Microbial succession in decomposition of plant organic matter.

## **Unit 2: Microbial Interactions**

Microbe interactions: Mutualism, synergism, commensalism, competition, amensalism, parasitism, predation. Microbe-Plant interaction: Symbiotic and non symbiotic interactions  
Microbe-animal interaction: Microbes in ruminants, nematophagus fungi and symbiotic luminescent bacteria.

## **Unit 3: Biogeochemical Cycling**

Carbon cycle: Microbial degradation of cellulose, hemicelluloses, lignin and chitin. Nitrogen cycle: Nitrogen fixation, ammonification, nitrification, denitrification and nitrate reduction. Phosphorus cycle: Phosphate immobilization and solubilisation. Sulphur cycle: Microbes involved in sulphur cycle.

## **Unit 4: Waste Management**

Solid Waste management: Sources and types of solid waste, Methods of solid waste disposal (composting and sanitary landfill). Liquid waste management: Composition and strength of sewage (BOD and COD), Primary, secondary (oxidation ponds, trickling filter, activated sludge process and septic tank) and tertiary sewage treatment.

## Unit 5: Water Potability

Treatment and safety of drinking (potable) water, methods to detect potability of water samples: (a) standard qualitative procedure: presumptive test/MPN test, confirmed and completed tests for faecal coliforms (b) Membrane filter technique and (c) Presence/absence tests.

### Examination Scheme:

Components	Internal Assessment			External Evaluation
	Attendance	Class Test	Assignment/ Project/Seminar/Quiz	
Weightage (%)	10	20	10	60

## **SEMESTER III**

### **GLOBAL ECOLOGY**

**Course Code: CMBE-203a**

**Credit Units: 04**

**Pre-requisite:** Basic knowledge of Environmental science

#### **Course Outcome:**

- Students will be able to understand the importance of environment.
- Be able to explain the development of ecosystem, concept of biodiversity and energy and nutrient pathway.
- Students will be able to understand ecological sustainability, ecological efficiencies, homeostasis and limiting factors.
- Students will gain new insights about different remediation procedures.
- Students will be able to use critical thinking skills related to hazardous wastes, pesticides, metals, radiations etc. and its impact on health.
- Students will be able to apply the knowledge of scientific methods to solve environmental problems.

#### **Details of the course:-**

##### **UNIT-I:**

Our Environment: Geological consideration of Atmosphere, Hydrosphere, Lithosphere. Basic concepts of Ecology: Development of Ecosystem, major divisions of ecology, Auto ecology of species, population structure and dynamics.

##### **UNIT II:**

Structure and function of ecosystem. Strata of an ecosystem. Energy transfer in an Ecosystem. Food chain, food web, Energy budget, Production & decomposition in a system. Ecological efficiencies.

##### **UNIT III:**

Trophic structure & ecological pyramids, Bio-geochemical cycles (N, C, and P cycles). Cybernetics & Homeostasis, Environmental monitoring and impact assessment.

##### **UNIT-IV:**

Radiation and chemical toxicology: Radiation ecology, chemical toxicants, ecotoxicology. Detection of Environmental pollutant. Indicators & detection systems.

##### **UNIT-V:**

Environmental biotechnologies, Biotechnologies in protection and preservation of environment- case studies. Bioremediation, Waste disposal.

	<b>Attendance</b>	<b>Class Test</b>	<b>Assignment/ Project/Seminar/Quiz</b>	
<b>Weightage (%)</b>	10	20	10	60

# MEDICAL MICROBIOLOGY

**Course Code: CMBE-205**

**Credit Unit: 04**

## **Course Outcome**

1. **Microbial Classification:** Understand the classification, structure, and physiology of medically important microorganisms.
2. **Pathogenesis:** Explain mechanisms of microbial infections, host-pathogen interactions, and immune responses.
3. **Diagnosis:** Demonstrate knowledge of laboratory techniques for identifying pathogens and diagnosing infectious diseases.
4. **Antimicrobial Strategies:** Analyze the principles of antimicrobial agents, resistance mechanisms, and their clinical applications.
5. **Public Health Impact:** Apply knowledge of epidemiology and infection control to prevent and manage infectious diseases.

### **Unit 1: Normal microflora of the human body and host pathogen interaction**

Normal microflora of the human body: Importance of normal microflora, normal microflora of skin, throat, gastrointestinal tract, urogenital tract. Host pathogen interaction: Definitions - Infection, Invasion, Pathogen, Pathogenicity, Virulence, Toxigenicity, Carriers and their types, Opportunistic infections, Nosocomial infections.

### **Unit 2 Sample collection, transport and diagnosis**

Collection, transport and culturing of clinical samples, principles of different diagnostic tests (ELISA, Immunofluorescence, Agglutination based tests, Complement fixation, PCR, DNA probes).

### **Unit 3: Bacterial diseases**

List of diseases of various organ systems and their causative agents. The following diseases in detail with Symptoms, mode of transmission, prophylaxis and control. Respiratory Diseases: Streptococcus pyogenes, Haemophilus influenzae, Mycobacterium tuberculosis. Gastrointestinal Diseases: Escherichia coli, Salmonella typhi, Vibrio cholerae, Helicobacter pylori. Others: Staphylococcus aureus, Bacillus anthracis, Clostridium tetani.

### **Unit 4: Viral diseases**

List of diseases of various organ systems and their causative agents. The following diseases in detail with Symptoms, mode of transmission, prophylaxis and control. Polio, Herpes, Hepatitis, Rabies, Dengue, AIDS, Influenza with brief description of swine flu, Ebola, Chikungunya,

Japanese Encephalitis.

### **Unit 5: Protozoan diseases**

List of diseases of various organ systems and their causative agents. The following diseases in detail with Symptoms, mode of transmission, prophylaxis and control. Malaria, Kala-azar.

### **Unit 6: Fungal disease**

Brief description of each of the following types of mycoses and one representative disease to be studied with respect to transmission, symptoms and prevention. Cutaneous mycoses: Tinea pedis (Athlete's foot), Systemic mycoses: Histoplasmosis, Opportunistic mycoses: Candidiasis.

	<b>Attendance</b>	<b>Class Test</b>	<b>Assignment/ Project/Seminar/Quiz</b>	
<b>Weightage (%)</b>	10	20	10	60

## SEMESTER III99

### PUBLIC HEALTH & PANDEMICS

Course Code: CMBE-205a

Credit Units: 04

**Pre-requisite:** Basic information of Animal kingdom system

#### Course Outcome:

- Students will be able to *define* and explain the fundamental principles of digestion.
- Students will be able to *understand* comparative circulation system, nervous system, endocrine system and excretory system.
- Students will *acquire* knowledge about the function of different types of organs in different animal kingdom.

#### Details of the Course:-

##### UNIT – I: Digestion and Respiration:

Comparative aspects of Digestion in invertebrate and vertebrate (general account), Human: Mechanism of digestion and absorption of carbohydrates, Proteins, Lipids and Nucleic acids. Composition of bile, saliva, pancreatic, gastric and intestinal juice.

Comparative aspects of Respiration in invertebrate and vertebrate (general account), Human: Exchange of gases, Transport of O<sub>2</sub> and CO<sub>2</sub>, Oxygen dissociation curve, Chloride shift.

##### UNIT – II: Circulation:

Comparative aspects of Circulation in invertebrate and vertebrate (general account), Human: Composition of blood, Plasma proteins & their role, blood cells, Haematopoiesis, Mechanism of coagulation of blood.

Mechanism of working of heart: Cardiac output, cardiac cycle, Origin & conduction of heartbeat.

##### UNIT – III: Muscle physiology and osmoregulation:

Structure of cardiac, smooth & skeletal muscle, threshold stimulus, All or None rule, single muscle twitch, muscle tone, isotonic and isometric contraction, Physical, chemical & electrical events of mechanism of muscle contraction.

Excretion: modes of excretion, Ornithine cycle, Mechanism of urine formation.

#### **UNIT – IV: Nervous System:**

Mechanism of generation & propagation of nerve impulse, structure of synapse, synaptic conduction, salutatory conduction, Neurotransmitters.

#### **UNIT – V: Endocrine System:**

Mechanism of action of hormones (insulin and steroids). Different endocrine glands – Hypothalamus, pituitary, pineal, thymus, thyroid, parathyroid and adrenals, hypo & hyper-secretions.

#### **Suggested Books:**

<b>S. No.</b>	<b>Name of Authors/Books/Publishers</b>	<b>Year of Publication/Reprint</b>
	<b>Text Books</b>	
1.	Guyton, A.C. & Hall, J.E. (2006). Textbook of Medical Physiology. XI Edition. Hercourt Asia PTE Ltd. /W.B. Saunders Company.	2006
	<b>Reference Books</b>	
1.	Tortora, G.J. & Grabowski, S. (2006). Principles of Anatomy & Physiology. XI Edition. John wiley & sons, Inc.	2006

#### **Examination Scheme:**

<b>Components</b>	<b>Internal Assessment</b>			<b>External Evaluation</b>
	<b>Attendance</b>	<b>Class Test</b>	<b>Assignment/ Project/Seminar/Quiz</b>	
<b>Weightage (%)</b>	10	20	10	60

## Virology Lab

Course Code: CMBE-251

Credit Units: 01

**Pre-requisite:** Basic knowledge of Microbiology and Virology

**Course Outcome:**

After completion of the course, the students will be able to:

1. Learn and apply good laboratory practices in virology.
2. Understand the principles and working of virology laboratory instruments and equipment, adhering
3. to current safety protocols.
4. Isolate and identify viruses using different virological techniques.
5. Gain hands-on experience with virus cultivation and characterization methods.
6. Understand the use of immunological assays for virus detection and diagnosis.

**Details of the Laboratory Course:**

**Note:** A college must offer 70% of the below-listed experiments. The remaining 30% experiments may be modified by the college according to available facilities.

S. No.	Contents	Contact Hours
1	<b>Preparation of media for virus culture:</b> Preparing media for growing animal and plant viruses.	2
2	<b>Virus Cultivation:</b> Isolation and cultivation of viruses using cell cultures and eggs.	3
3	<b>Virus Titration:</b> Determination of virus titer using plaque assay method.	3
4	<b>Simple Staining and Negative Staining:</b> Visualizing viruses using electron microscopy and light microscopy.	3
5	<b>Identification of viral morphology:</b> Using microscopy techniques to observe viral structures.	2
6	<b>Immunological Assays for Virus Detection:</b> Performing ELISA and immunofluorescence for virus identification.	3
7	<b>Plaque Assay:</b> Quantification of infectious virus particles using the plaque method.	2
8	<b>One-step Growth Curve:</b> Plotting a growth curve of a virus in culture to analyze replication kinetics.	2
9	<b>Viral Inactivation Test:</b> Testing the effectiveness of disinfectants or treatments on virus inactivation.	2
10	<b>PCR-based Viral Detection:</b> Amplification of viral genomes using Polymerase Chain Reaction (PCR).	3

## Suggested Books:

### Text Books

1. **Virology: Principles and Applications** – John S. Oxford, Wiley-Blackwell, 2010.
2. **Medical Virology** – M.K. Bhan, New Age International, 2016.
3. **Fundamentals of Molecular Virology** – Nicholas H. Acheson, Wiley-Blackwell, 2011.

### References

1. **Virology: A Laboratory Manual** – Gary W. Carter and John D. Lister, Elsevier, 2017.
2. **Laboratory Manual of General Virology** – Edward K. Wagner, 4th Edition, Wiley-Blackwell, 2010.
3. **Viral Pathogenesis: Basic Science and Clinical Applications** – Richard K. Schenkel, McGraw-Hill, 2013.
4. **Principles of Virology: Molecular Biology, Pathogenesis, and Control** – Shapiro, R.E., 4th Edition, American Society of Microbiology, 2012.

### Examination Scheme:

<b>Components</b>	<b>Internal Assessment</b>	<b>External Evaluation</b>
<b>Attendance</b>	10%	
<b>Viva-Voce</b>	20%	
<b>Practical Record</b>	10%	
<b>Weightage</b>		60%

This syllabus outlines the core practical experiments and learning outcomes for a Virology Laboratory course, focusing on virus isolation, cultivation, detection, and characterization, along with related molecular techniques.

## Environmental Microbiology Lab

Course Code: CMBE-253

Credit Units: 01

**Pre-requisite:** Basic knowledge of Microbiology and Environmental Science

### Course Outcome:

After completion of the course, the students will be able to:

1. Learn good laboratory practices in the context of environmental microbiology.
2. Understand and operate various microbiological instruments used in environmental monitoring.
3. Identify and analyze microbial populations in different environmental samples.
4. Gain hands-on experience with techniques for assessing environmental pollution and its effects on microbial communities.
5. Understand the role of microorganisms in environmental processes like bioremediation, nutrient cycling, and waste management.

### Details of the Laboratory Course:

**Note:** A college must offer 70% of the below-listed experiments. The remaining 30% experiments may be modified by the college according to available facilities.

S. No.	Contents	Contact Hours
1	<b>Preparation of different media for environmental samples:</b> Nutrient agar, Sabouraud's agar, MacConkey agar.	2
2	<b>Isolation of bacteria from soil, water, and air samples:</b> Using serial dilution and plating methods.	3
3	<b>Determination of Total Viable Count (TVC):</b> Estimation of bacterial population in environmental samples.	3
4	<b>Detection of Waterborne Pathogens:</b> Isolation and identification of coliforms from water samples.	2
5	<b>Biochemical Oxygen Demand (BOD) Test:</b> Determining BOD to assess organic pollution in water.	2
6	<b>Fecal Coliform Test:</b> Perform a presumptive, confirmed, and completed test for fecal coliforms in water.	2
7	<b>Microbial Indicators of Pollution:</b> Detection of microbial indicators such as E. coli, Enterococcus in water.	2
8	<b>Bioremediation Techniques:</b> Isolating and identifying microorganisms capable of degrading pollutants.	3
9	<b>Nutrient Cycling:</b> Estimation of nitrogen-fixing bacteria in soil samples.	2
10	<b>Air Quality Monitoring:</b> Isolation of airborne bacteria using sedimentation or filtration methods.	2

### Suggested Books:

## Text Books

1. **Environmental Microbiology** – Maier, R.M., Pepper, I.L., and Gerba, C.P., 4th Edition, Academic Press, 2015.
2. **Microbiology of the Environment** – B.R. Binks and J.D. Salter, Wiley-Blackwell, 2004.
3. **Environmental Microbiology: From Soil to Wastewater** – S. S. M. R. Husain, CRC Press, 2009.

## References

1. **Environmental Microbiology Laboratory Manual** – Jay A. Repp, Pearson Education, 2016.
2. **Manual of Environmental Microbiology** – C. J. Hurst et al., 3rd Edition, ASM Press, 2007.
3. **Applied Environmental Microbiology** – Charles M. A. P. Eppley, Elsevier, 2008.
4. **Microbial Ecology in Growing Systems** – G. P. Stent, Springer, 2012.

## Examination Scheme:

Components	Internal Assessment	External Evaluation
Attendance	10%	
Viva-Voce	20%	
Practical Record	10%	
Weightage		60%

This syllabus outlines core practical experiments and learning outcomes for an **Environmental Microbiology** Laboratory course, focusing on the identification, isolation, and characterization of microorganisms from various environmental samples, as well as assessing environmental pollution and remediation processes.

## Medical Microbiology Lab

**Course Code: CMBE-255  
02**

**Credit Units:**

**Pre-requisite:** Basic information of Medical Microbiology Lab

### **Course Outcome:**

Upon successful completion of this course the student will be able to:

6. This course provides learning opportunities in the basic principles of medical microbiology and infectious disease.
7. It covers mechanisms of infectious disease transmission, principles of aseptic practice, and the role of the human body's normal microflora.
8. The course provides the conceptual basis for understanding pathogenic microorganisms and the mechanisms by which they cause disease in the human body.
9. It also provides opportunities to develop informatics and diagnostic skills, including the use and interpretation of laboratory tests in the diagnosis of infectious diseases.
10. To understand the importance of pathogenic bacteria in human disease with respect to infections of the respiratory tract, gastrointestinal tract, urinary tract, skin and soft tissue.
11. Helps to understand the use of lab animals in medical field.
12. Recall the relationship of this infection to symptoms, relapse and the accompanying pathology.
13. Explain the methods of microorganisms control, e.g. chemotherapy & vaccines. Solve problems in the context of this understanding.

### **Details of the Course:-**

<b>Sl. No.</b>	<b>Contents</b>	<b>Contact Hours</b>
1	Study of composition and use of important differential media for identification of bacteria: EMBAgar, McConkey agar, Mannitol salt agar, Deoxycholate citrate agar, TCBS	3
2	Study of bacterial flora of skin by swab method	3
3	Perform antibacterial sensitivity by Kirby-Bauer method	3
4	Identification of human blood groups.	3
5	To perform Total Leukocyte Count of the given blood sample.	3
6	To perform Differential Leukocyte Count of the given blood sample.	3

**Suggested Books:**

S.No.	Name of Authors/Books/Publishers	Year of Publication/Reprint
<b>Text Books</b>		
1.	Ananthanarayan R. and Paniker C.K.J. Textbook of Microbiology. 8th edition, University Press Publication	2009

Weightage (%)	10	20	10	60

# MICROBIAL METABOLISM

**Course Code: GMBE-203**

**Credit Unit: 04**

## **Course Outcome**

1. **Metabolic Diversity:** Understand the metabolic processes unique to microorganisms, including autotrophy, heterotrophy, and chemolithotrophy.
2. **Catabolic Pathways:** Explain energy production through microbial catabolic pathways like glycolysis, fermentation, and respiration.
3. **Anabolic Pathways:** Analyze microbial biosynthesis of macromolecules such as nucleotides, amino acids, and lipids.
4. **Regulation of Metabolism:** Understand the regulation of microbial metabolic pathways in response to environmental changes.
5. **Biotechnological Applications:** Apply microbial metabolism knowledge to industrial, environmental, and medical biotechnology.

## **Unit 1: Microbial Growth and Effect of Environment on Microbial Growth**

Definitions of growth, Batch culture, Continuous culture, generation time and specific growth rate, Temperature and temperature ranges of growth pH and pH ranges of growth, Effect of solute and water activity on growth, Effect of oxygen concentration on growth, Nutritional categories of microorganisms.

## **Unit 2: Nutrient uptake and Transport**

Passive and facilitated diffusion, Primary and secondary active transport, concept of uniport, symport and antiport, Group translocation, Iron uptake.

## **Unit 3: Chemoheterotrophic Metabolism - Aerobic Respiration**

Concept of aerobic respiration, anaerobic respiration and fermentation, Sugar degradation pathways i.e. EMP, ED, Pentose phosphate pathway, TCA cycle, Electron transport chain: components of respiratory chain, comparison of mitochondrial and bacterial, ETC, electron transport phosphorylation, uncouplers and inhibitors.

## **Unit 4: Chemoheterotrophic Metabolism- Anaerobic respiration and fermentation**

Anaerobic respiration with special reference to dissimilatory nitrate reduction (Denitrification; nitrate /nitrite and nitrate/ammonia respiration; fermentative nitrate reduction) Fermentation - Alcohol fermentation and Pasteur effect; Lactate fermentation (homofermentative and heterofermentative pathways), concept of linear and branched fermentation pathways.

## Unit 5: Chemolithotrophic and Phototrophic Metabolism

Introduction to aerobic and anaerobic chemolithotrophy with an example each. Hydrogen oxidation (definition and reaction) and methanogenesis (definition and reaction), Introduction to phototrophic metabolism - groups of phototrophic microorganisms, anoxygenic vs. oxygenic photosynthesis with reference to photosynthesis in green bacteria and cyanobacteria.

	Attendance	Class Test	Assignment/ Project/Seminar/Quiz	
Weightage (%)	10	20	10	60

## Seminar

Course Code: SMBE- 201

Credit Units: 01

**Pre-requisite:** Basic understanding of microbiology and scientific communication.

### Course Outcome:

After completion of the course, students will be able to:

1. Develop skills in literature review and research analysis.
2. Enhance scientific communication and presentation skills.
3. Critically analyze recent advancements in microbiology and related fields.
4. Demonstrate the ability to prepare and deliver structured oral presentations.
5. Engage in discussions and respond to scientific queries effectively.

### Details of the Course:

S. No.	Contents	Contact Hours
1	<b>Introduction to Scientific Seminars:</b> Objectives, structure, and evaluation criteria.	2
2	<b>Literature Review Skills:</b> Identifying, evaluating, and summarizing relevant scientific literature.	4
3	<b>Topic Selection:</b> Choosing and justifying a seminar topic based on recent trends in microbiology.	2
4	<b>Scientific Writing:</b> Preparing seminar abstracts, outlines, and handouts.	4
5	<b>Presentation Techniques:</b> Creating slides, using visuals, and effective verbal communication.	4
6	<b>Seminar Delivery:</b> Individual presentation on selected topics followed by Q&A sessions.	6
7	<b>Peer Review and Feedback:</b> Evaluating peer presentations and providing constructive feedback.	3
8	<b>Report Submission:</b> Preparing and submitting a detailed report of the seminar topic.	2

### Suggested Books:

<b>Weightage (%)</b>	10%	40%	20%	20%	10%

## IV SEMESTER

## IMMUNOLOGY

**Course Code: CMBE-202**

**Credit Unit: 04**

### **Course Outcome**

1. **Metabolic Diversity:** Understand the metabolic processes unique to microorganisms, including autotrophy, heterotrophy, and chemolithotrophy.
2. **Catabolic Pathways:** Explain energy production through microbial catabolic pathways like glycolysis, fermentation, and respiration.
3. **Anabolic Pathways:** Analyze microbial biosynthesis of macromolecules such as nucleotides, amino acids, and lipids.
4. **Regulation of Metabolism:** Understand the regulation of microbial metabolic pathways in response to environmental changes.
5. **Biotechnological Applications:** Apply microbial metabolism knowledge to industrial, environmental, and medical biotechnology.

### **Unit 1: Introduction**

Concept of Innate and Adaptive immunity; Contributions of following scientists to the development of field of immunology - Edward Jenner, Karl Landsteiner, Robert Koch, Paul Ehrlich, Elie Metchnikoff, Peter Medawar, MacFarlane Burnet, Neils K Jerne, Rodney Porter and Susumu Tonegawa

### **Unit 2: Immune Cells and Organs**

Structure, Functions and Properties of: Immune Cells – Stem cell, T cell, B cell, NK cell, Macrophage, Neutrophil, Eosinophil, Basophil, Mast cell, Dendritic cell; and Immune Organs – Bone Marrow, Thymus, Lymph Node, Spleen.

### **Unit 3: Antigens**

Characteristics of an antigen (Foreignness, Molecular size and Heterogeneity); Haptens; Epitopes (T & B cell epitopes); T-dependent and T-independent antigens; Adjuvants

### **Unit 4: Antibodies**

Structure, Types, Functions and Properties of antibodies; Antigenic determinants on antibodies (Isotypic, allotypic, idiotypic), Organization of MHC locus (Mice & Human); Structure and Functions of MHC I & II molecules; Antigen processing and presentation (Cytosolic and Endocytic pathways), Primary and Secondary Immune Response; Generation of Humoral Immune Response (Plasma and Memory cells); Generation of Cell Mediated Immune Response (Self MHC restriction, T cell activation, Co-stimulatory signals); Killing Mechanisms by CTL and NK cells.

### **Unit 5: Immunological Disorders and Tumor Immunity**

Types of Autoimmunity and Hypersensitivity with examples; Immunodeficiencies - Animal models (Nude and SCID mice), SCID, Principles of Precipitation, Agglutination, Immunodiffusion, Immunoelectrophoresis, ELISA, Western blotting, Immunofluorescence, Flow cytometry, Immunoelectron microscopy.

## Examination Scheme:

Components	Internal Assessment			External Evaluation
	Attendance	Class Test	Assignment/ Project/Seminar/Quiz	
Weightage (%)	10	20	10	60

**Course Code: CMBE-202a**

**Credit Units: 04**

**Pre-requisite:** Basic knowledge of immunology and molecular biology

**Course Outcome:**

- Students will gain new insights about different diagnostic procedures.
- Students will be able to use critical thinking skills to trouble shoot problems as they occur and determined possible causes
- Students will be able to apply the knowledge of molecular testing to the most commonly performed applications in the clinical laboratory.

**Details of the Course:-**

**UNIT I: Enzyme Immunoassays:**

Solid phases, Comparison of enzymes, conjugation of enzymes, Use of polyclonal or monoclonal antibodies, Immunoblotting, Radioimmunoassay.

**UNIT II: Molecular methods in diagnostics:**

Applications of PCR, RFLP, Nuclear hybridization methods LAMP method in transgenics.

**UNIT III: Prenatal diagnosis:**

Invasive techniques - Amniocentesis, Fetoscopy, Chorionic Villi Sampling (CVS), Non-invasive techniques - Ultrasonography, X-ray, TIFFA.

**UNIT IV: Biochemical diagnostics:**

Inborn errors of metabolism, haemoglobinopathies, mucopolysaccharidoses, lipidoses, and glycogen storage disorders.

**UNIT V: Automation in microbial diagnosis:**

Rapid diagnostic approach including technical purification and standardization of antigen and specific antibodies.

## IV SEMESTER

## GENDER STUDIES

**Course Code: CMBE-202b**

**Credit Units: 04**

Objectives of the course

- To familiarize the students with the terminologies related to Gender studies.
- To elaborate the concept of patriarchy and its impact on women
- To introduce students to the discipline of Women's Studies and Gender Studies and its perspectives.
- To trace the evolution of Gender Studies from Women's Studies. Learning outcomes
- Familiarity with fundamental concepts related to field of women and gender studies.
- Understanding of multidisciplinary nature of the discipline.

### **Syllabus Unit I**

Introduction: Gender Studies - Origin and growth; need for Gender Studies – objectives, nature and scope of Gender Studies. Establishment of Centre for Women's Studies under UGC guidelines 14H

### **Unit II**

Basic Concepts: Meaning and definition: gender, sex, difference between gender and sex, gender equality, gender empowerment, gender roles, gender gap. Patriarchy and Matriarchy: Meaning and definition. Gender discrimination- meaning, forms and areas, Need for Gender Sensitization. Bio-social perspective of gender, gender socialization, gender stereotyping, gender bias 16H Page 5 of 34

### **Unit III**

Multidisciplinary Nature of Gender Studies Multi-disciplinarity of gender studies, relationship with mainstream social sciences (Economics, Sociology, History, Literature, Anthropology, Psychology and Political Science) 14 H

### **Unit IV**

Women's Studies and Gender Studies A paradigm shift: from Women's Studies to Gender Studies. Relevance of women/gender studies in Indian context 6 H

### **Unit V**

Future of Gender Studies Gender studies as a profession- employment opportunities, constraints, emerging needs Role of UGC in promoting the women's and gender studies, future of gender studies

## INTERNATIONAL BUSINESS IN DAIRY SCIENCE

### SEMESTER IV

Course Code: CMBE-202c

Credit Units: 04

**Pre-requisite:** Basic knowledge of dairy microbiology.

#### Course Outcome:

- Students will be able to know about the microorganisms important in food microbiology.
- Students would know about the factors influencing microbial growth in food.
- Students will understand various food borne diseases.
- Students will also have knowledge of microbiology of milk.
- Students will understand microorganisms as source of food.

#### Details of the Course:

Sl. No.	Contents	Contact Hours
1.	<b>UNIT-1</b> Microorganisms important in food microbiology: molds, yeast and bacteria – general characteristics, classification and importance. Principles of food preservation, preservation by use of high temperature, low temperature, drying and dessication. Chemical preservatives and additives. Preservation by radiation.	4
2.	<b>UNIT-2</b> Factors influencing microbial growth in food: Extrinsic and intrinsic factors. Microbial spoilage of food. Chemical changes caused by the microorganisms during spoilage. Spoilage of fish, meat, poultry, eggs, fruits and vegetables. Detection of spoilage and characterization.	10
3.	<b>UNIT-3</b> Classification of food borne diseases. Food borne infections: Brucella, Bacillus cereus, Clostridium perfringens, Yersinia enterocolitica and Escherichia, Salmonella spp. Food intoxication: Staphylococcal intoxication, Clostridial poisoning (Clostridium Botulinum). Food adulteration and prevailing food standards in India.	9
4.	<b>UNIT-4</b> Microbiology of Milk: Sources of microorganisms in milk and types of microorganisms in milk. Microbiological examination of milk (standard plate count, direct microscopic count, reductase, and phosphatase test). Dehydration and pasteurization of milk. Dairy products from microorganisms: Butter, yoghurt and cheese.	12

5.	<b>UNIT-5</b> Microorganisms as source of food: Single Cell Protein (SCP). Mushrooms and food value of mushrooms. Food conversions: Lactic acid conversions, soyabean conversions and Bakery. Microbiological estimation of food: Sample collection, preparation and analysis techniques.	6

# MOLECULAR BIOLOGY

**Course Code: CMBE-204**

**Credit Unit: 04**

## **Course Outcome**

1. **DNA and RNA Biology:** Understand the structure, replication, transcription, and translation of genetic material.
2. **Gene Regulation:** Explain mechanisms of gene expression and regulation in prokaryotes and eukaryotes.
3. **Molecular Techniques:** Demonstrate proficiency in molecular biology techniques such as PCR, electrophoresis, and cloning.
4. **Genetic Mutations:** Analyze the impact of mutations and DNA repair mechanisms on genome stability.
5. **Applications in Biotechnology:** Apply molecular biology concepts to advancements in genetic engineering, genomics, and therapeutic development

## **Unit 1: Structures of DNA and RNA / Genetic Material**

DNA Structure: Miescher to Watson and Crick- historic perspective, DNA structure, Salient features of double helix, Types of DNA, Types of genetic material, denaturation and renaturation, cot curves. DNA topology – linking number, topoisomerases; Organization of DNA Prokaryotes, Viruses, Eukaryotes. RNA Structure, Organelle DNA -- mitochondria and chloroplast DNA.

## **Unit 2: Replication of DNA (Prokaryotes and Eukaryotes)**

Bidirectional and unidirectional replication, semi- conservative, semi- discontinuous replication  
Mechanism of DNA replication: Enzymes and proteins involved in DNA replication –DNA polymerases, DNA ligase, primase, telomerase – for replication of linear ends Various models of DNA replication including rolling circle, D- loop (mitochondrial),  $\Theta$  (theta) mode of replication and other accessory protein, Mismatch and excision repair.

## **Unit 3: Transcription in Prokaryotes and Eukaryotes**

Transcription: Definition, difference from replication, promoter - concept and strength of promoter RNA Polymerase and the transcription unit Transcription in Eukaryotes: RNA polymerases, general Transcription factors.

## **Unit 4: Post-Transcriptional Processing**

Split genes, concept of introns and exons, RNA splicing, spliceosome machinery, concept of alternative splicing, Polyadenylation and capping, Processing of rRNA, RNA interference: si

RNA, miRNA and its significance.

### **Unit 5: Translation (Prokaryotes and Eukaryotes)**

Translational machinery, Charging of tRNA, aminoacyl tRNA synthetases, Mechanisms of initiation, elongation and termination of polypeptides in both prokaryotes and eukaryotes, Fidelity of translation, Inhibitors of protein synthesis in prokaryotes and eukaryote.

### **Unit 6: Regulation of gene Expression in Prokaryotes and Eukaryotes**

Principles of transcriptional regulation, regulation at initiation with examples from lac and trp operons, Sporulation in Bacillus, Yeast mating type switching, Changes in Chromatin Structure - DNA methylation and Histone Acetylation mechanisms.

### **References:**

## ANTHROPOLOGY

**Course Code: CMBE-204a**

**Credit Unit: 04**

### Course Outcomes

1. **Cultural Understanding:** Gain insight into the diversity of human cultures, traditions, and social behaviors across time and space.
2. **Biological Perspectives:** Understand human evolution, biological adaptations, and the interplay between biology and culture.
3. **Archaeological Methods:** Learn techniques for studying past civilizations through material remains and artifacts.
4. **Holistic Analysis:** Develop a comprehensive perspective on human societies by integrating cultural, biological, and linguistic aspects.
5. **Contemporary Applications:** Apply anthropological knowledge to address modern issues like globalization, health disparities, and social justice.

### UNIT-1 Social anthropology:

history and subject matter; Relationship of social and cultural anthropology with sociology, psychology, history, economics and political science.

### UNIT-2 Concepts of Society;

Pre-requisite of Human society Individual and Society; Group and its types; Community; Association and Institution Status and Role ;

### Unit -3 Social fact;

Social Action; Social Structure , Function and Social Organisation ; Structural - Functionalism ; Social System ; Social Conflict

### Unit -4 Techniques and methods:

Field work/ Ethnography and Survey Research Comparative and Historical Methods

Weightage (%)	10	20	10	60

# NEUROBIOLOGY

**Course Code: CMBE-204b**

**Credit Unit: 04**

1. **Neural Structure:** Understand the anatomy and physiology of the nervous system at cellular and systemic levels.
2. **Signal Transmission:** Explain the mechanisms of neuronal communication, including action potentials and synaptic transmission.
3. **Sensory and Motor Systems:** Analyze the neural basis of sensory processing and motor control.
4. **Neuroplasticity:** Explore the principles of neural development, plasticity, and regeneration.
5. **Neurological Disorders:** Apply knowledge of neurobiology to understand the basis of neurological and psychiatric diseases.

## UNIT I Neural induction

- Overview of early embryology +details of hydra, C. elegans (indentation), Drosophila (delamination), frog, zebrafish, chick and humans (invagination).
- ‘Organiser ‘of differentiation- Spemann and Mangold experiments, Keller sandwich.
- Molecular nature of neural inducer- Noggin, chordin, follistatin, activin, BMP4-WNT signalling- important for formation of neural plate.
- Neuroblast induction-acheate scute, lateral inhibition and details – notch delta signalling pathway- important for formation of neuroblasts.

## UNIT II Polarity and Segmentation

- Overview of polarity and brain architecture, rhombomeres
- AP-Axis in Drosophila-Bicoid and nanos, homeobox genes, ANT-C and BX-C in flies, effect of homeobox genes on hindbrain development in mammals.
- Upstream control of hox genes, transformers-RA, WNT-b-catenin, FGF
- Mesencephalon/metencephalon boundary organiser-WNT1, ENGRAILED1, FGF8.
- Forebrain development in mammals-pax genes
- DV-axis polarity-sonic hedgehog(shh) induces the ventralisation (floorplate).
- Dorsal neural tube development- again WNT/BMP and shh signalling
- Patterning the cerebral cortex-pax6, emx2, fgf8 and fgf18

## UNIT III Genesis and Migration

- Methods to visualise lineage and timing of a neurons birth-thymidine, BrdU, retroviral GFP, thymidine dating
- Molecular control of neuron number-intrinsic proteins and also

mitogens like FGF, IGF

- What separates neurons from glia
- Cerebral and cerebellar cortex formation
- Molecular control of migration of neurons, adult neurogenesis

#### **UNIT IV Determination and differentiation**

- Determination-various transcription factors involved (intracellular factors)
- Asymmetric cell division – eg NB, GMC, neuron – (numb and prospero) and drosophila eye
- Local environmental factors- eg Drosophila eye imaginal disc (MF) and chick-quail transplant studies
- Histogenesis-loss of competence Eg layers of the cortex by transplantation studies and retina by heterochronic experiments
- Neuronal differentiation form neural stem cell, embryonic stem cell and induced pluripotent cell-basic principle and methodology

#### **UNIT V Axon growth and guidance**

- Overview of growth cone and axonal pathfinding. Initial study
- Guidance cues for growth cone – Netrin, Semaphorin and Ephrins
- Substrates for growth of developing axon – Role of cell adhesion molecule in growth cone guidance
- Mechanism of axon guidance-guidance cues and the control of cytoskelata dynamic, localized translational of growth cone guidance, changing response to guidance cues
- Axon regeneration

Weightage (%)	10	20	10	60

# NANOTECHNOLOGY

**Course Code: CMBE-204c**

**Credit Unit: 04**

## Course Outcomes

6. **Neural Structure:** Understand the anatomy and physiology of the nervous system at cellular and systemic levels.
7. **Signal Transmission:** Explain the mechanisms of neuronal communication, including action potentials and synaptic transmission.
8. **Sensory and Motor Systems:** Analyze the neural basis of sensory processing and motor control.
9. **Neuroplasticity:** Explore the principles of neural development, plasticity, and regeneration.
10. **Neurological Disorders:** Apply knowledge of neurobiology to understand the basis of neurological and psychiatric diseases.

## Unit I

**Background to Nanoscience:** Definition of Nano, Scientific revolution-Atomic Structure and atomic size, emergence and challenges of nanoscience and nanotechnology, carbon age-new form of carbon (CNT to Graphene), influence of nano over micro/macro, size effects and crystals, large surface to volume ration, surface effects on the properties.

## Unit II

**Types of nanostructure and properties of nanomaterials:** One dimensional, Two dimensional and Three dimensional nanostructured materials, Quantum Dots shell structures, metal oxides, semiconductors, composites, mechanical-physical-chemical properties.

## Unit III

**Application of Nanomaterial:** Ferroelectric materials, coating, molecular electronics and nanoelectronics, biological and environmental, membrane based application, polymer based application.

## Unit IV

**Surface Nanoscience:** Introduction to surface active agents. Theory and applications. Types of surfactants. Classification, synthesis of surfactant - Shape, size and structure of surfactants. Micelle, Emulsions, Microemulsions & Gels. Kraft temperature, surfactant geometry and packing.

## Unit V

**Colloidal Nanoscience:** Introduction to colloidal material, surface properties, origin of colloidal particles, preparation & characterization of colloidal particles. Applications of super hydrophilic hydrophobic surfaces, self-cleaning surfaces. Surface viscosity.

## Aerobiology

Course Code: CMBE-204d

Credit Units: 04

**Pre-requisite:** Basic knowledge of microbiology, plant pathology, and environmental science.

### Course Outcome:

After completion of the course, students will be able to:

1. Understand the fundamental concepts of aerobiology and its applications.
2. Analyze the diversity and dynamics of airborne microorganisms and allergens.
3. Investigate the role of airborne particles in human health, agriculture, and environment.
4. Learn techniques for sampling and identification of bioaerosols.
5. Apply aerobiological knowledge in disease forecasting, air quality assessment, and biotechnology.

### Details of the Course:

S. No.	Contents	Contact Hours
1	<b>Introduction to Aerobiology:</b> Definition, scope, and importance in health, agriculture, and environment.	6
2	<b>Sources of Bioaerosols:</b> Natural and anthropogenic sources, transport mechanisms, and deposition processes.	6
3	<b>Sampling and Analysis Techniques:</b> Methods of air sampling, culture-dependent and independent approaches, particle counting.	8
4	<b>Microbial Composition of Air:</b> Types of microorganisms (bacteria, fungi, viruses) in the air and their seasonal variations.	6
5	<b>Aerobiology and Human Health:</b> Allergens, respiratory infections, and immune responses caused by airborne particles.	6
6	<b>Agricultural Aerobiology:</b> Impact of airborne pathogens on crop diseases, spore dispersal, and prediction models.	6
7	<b>Environmental Applications:</b> Role of aerobiology in air quality monitoring, pollution studies, and climate change impact.	6
8	<b>Industrial and Forensic Applications:</b> Applications in biotechnological processes and forensic investigations.	4

### Suggested Books:

#### Text Books

1. **Aerobiology** – Roger L. Edmonds, Springer, 1979.
2. **Introduction to Aerobiology** – Maureen E. Lacey and Jonathan S. West, Springer, 2006.

# RECOMBINANT DNA TECHNOLOGY

**Course Code: CMBE-206**

**Credit Units: 04**

## **Course Outcomes**

1. **Molecular Tools:** Understand the principles and tools used in gene cloning and genetic engineering.
2. **Vector Design:** Learn the construction and application of cloning and expression vectors.
3. **Gene Manipulation:** Demonstrate proficiency in techniques like PCR, restriction digestion, and ligation.
4. **Applications:** Explore the use of recombinant DNA in medicine, agriculture, and industry.
5. **Ethics and Safety:** Analyze the ethical, legal, and biosafety considerations of genetic engineering.

## **Unit 1: Gene Recombination and Gene transfer**

Bacterial Conjugation, Transformation, Transduction, Episomes, Plasmids, Microinjection, Electroporation, Microprojectile, Shot Gun method, Ultrasonication, Liposome fusion, Microlaser.

## **Unit 2: Changing genes**

Site-directed mutagenesis and Protein engineering: Primer extension is a simple method for site directed mutation, PCR based site directed mutagenesis, Random mutagenesis, Use of Phage display techniques to facilitate the selection of mutant peptides, Gene shuffling, production of chimeric proteins.

## **Unit 3: Genetic engineering in animals**

Production of transgenic mice, ES cells can be used for gene targeting in mice, Applications of gene targeting, Using Yeast to study Eukaryotic gene function, Therapeutic products produced by genetic engineering-blood proteins, human hormones, immune modulators and vaccines, Transgenic animals, Production of proteins of Pharmaceutical value.

## **Unit 4: Genetic engineering in plants**

Use of *Agrobacterium tumefaciens* and *Arhizogenes*, Ti plasmids, Strategies for gene transfer to plant cells, Direct DNA transfer to plants, Gene targeting in plants, Use of plant viruses as episomal expression vectors.

# MICROBIAL PHYSIOLOGY & METABOLISM

Course Code: CMBE-206a

Credit Units: 04

**Pre-requisite:** Basic information of biology and microbiology.

## Course Outcome:

At the end of the course, the students will be familiar with microbial technology. This would help students to launch themselves in industrial biotechnology which is the fastest growing industry in the developing country.

## Details of the Course:-

S. No.	Contents	Contact Hours
1	<b>Introduction of microbes, taxonomy and classification</b> 11. Introduction to bacteria, fungi, and viruses, structural and cellular organelles differences among different types and classes ; biochemical/microscopic/molecular methods to differentiate archaea, eubacteria and eukaryotes; microbial evolution, systematics and taxonomy- new approaches to bacterial taxonomy, classification including ribotyping, characteristics of primary domains, taxonomy, nomenclature and Bergey's manual, ribosomal RNA sequencing.  <b>12. Microbiology Techniques</b> Important milestones in microbiology, methods in microbiology- principles of microbial nutrition, culture media, theory and practice of sterilization, pure culture techniques, minimal and enrichment culture techniques.	6
2	<b>Growth and nutrition:</b> Prokaryotic growth patterns and functions - microbial nutrition and growth - arithmetic and geometric growth expression, growth kinetics, growth curve, measurement of growth and growth yields, synchronous growth, continuous culture, diauxic growth, culture collection and maintenance of cultures.	7
3	<b>Microbial Genetics:</b> Microbial regulation of gene expression (attenuation and negative regulation with e.g. <i>trp</i> and <i>lac</i> operon), transfer of genetic material: plasmids, transposons, transduction, transformation and conjugation. Mutations and their chemical basis; mutagens and their use in biotechnology; modes of recombination; comparative prokaryotic genomics.	7 5
4	<b>Host-microbe interaction:</b> Normal micro flora of skin, oral cavity, gastrointestinal tract; entry of pathogens into the host, types of toxins (exo, endo, entro) and their mode of actions, plant -microbe interactions, microbial pathogenesis -disease reservoirs; epidemiological terminologies; infectious disease transmission <sub>1,3</sub>	9
5	<b>Microbes based therapies:</b> Antimicrobial agents, sulfa drugs, antibiotics -penicillin and	8

# ENTOMOLOGY

Course Code: CMBE-206b

Credit Units: 04

## Course Outcomes

1. Insect Biology: Understand the anatomy, physiology, and classification of insects.
2. Ecological Roles: Analyze the ecological importance of insects in ecosystems and their interactions with other organisms.
3. Insect Behavior: Explore the behavioral patterns and adaptations of insects.
4. Pest Management: Learn techniques for identifying and managing insect pests in agriculture and public health.
5. Applied Entomology: Apply knowledge of entomology in fields like pollination, biocontrol, and forensic science.

### UNIT I Principles, utility and relevance:

insect body wall structure, cuticular outgrowths, colouration and special integumentary structures in insects, body tagmata, sclerites and segmentation.

### UNIT II Head-

Origin, structure and modification; types of mouthparts and antennae, tentorium and neck sclerites.

### UNIT III Thorax-

Areas and sutures of tergum, sternum and pleuron, pterothorax; Wings: structure and modifications, venation, wing coupling apparatus and mechanism of flight; Legs: structure and modifications.

**UNIT IV Abdomen-** Segmentation and appendages; Genitalia and their modifications; Embryonic and post-embryonic development; Types of metamorphosis. Insect sense organs (mechano-, photo- and chemoreceptors).

**UNIT V insect** segmentation, various tagmata and their appendages; preparation of permanent mounts of different body parts and their appendages of taxonomic importance including male and female genitalia. Sense organs.

## Agrostology

**Course Code: CMBE-206c  
04**

**Credit Units:**

**Pre-requisite:** Basic understanding of botany, plant taxonomy, and ecology.

### Course Outcome:

After completion of the course, students will be able to:

1. Understand the taxonomy, anatomy, and physiology of grasses.
2. Identify and classify grass species based on their morphological and ecological characteristics.
3. Explore the ecological and economic importance of grasses in natural and managed ecosystems.
4. Analyze the role of grasses in agriculture, environmental management, and climate change mitigation.
5. Learn techni

### Details of the Course:

S. No.	Contents	Contact Hours
1	<b>Introduction to Agrostology:</b> Definition, scope, and importance in ecology, agriculture, and industry.	6
2	<b>Taxonomy and Systematics of Grasses:</b> Morphological features, classification, and identification of grass families (Poaceae).	8
3	<b>Anatomy and Physiology of Grasses:</b> Structure of grass leaves, stems, and roots; photosynthesis (C3 and C4 pathways) in grasses.	6
4	<b>Ecological Role of Grasses:</b> Grassland ecosystems, biodiversity, and the role of grasses in soil conservation and carbon sequestration.	6
5	<b>Economic Importance of Grasses:</b> Food crops (rice, wheat, maize), fodder, turf, and industrial uses (paper, biofuels).	6
6	<b>Grasses in Agriculture:</b> Pasture management, forage quality, and their role in sustainable agriculture.	6
7	<b>Grass Propagation and Cultivation:</b> Methods of propagation, breeding techniques, and pest management in grass cultivation.	6
8	<b>Applications in Environmental Management:</b> Grasses for erosion control, phytoremediation, and landscaping.	6

## Immunology Lab

**Course Code: CMBE-252**

**Credit Units: 01**

**Pre-requisite:** Basic understanding of Immunology

**Course Outcome:**

- (vii) Students will be able to understand/experience the immune system.
- (viii) Students will be able to understand related immunological techniques and apply them in medical laboratory profession.
- (ix) Students will be able to value role of immune system in different diseases.

**Details of the Course:-**

S. No.	Contents	Contact Hours
1	Differential leucocytes count	2
2	Total leucocytes count	2
3	Total RBC count	2
4	Separation of serum from blood	2
5	ELISA	2

## Molecular Biology Lab

**Course Code: CMBE-254**

**Credit Units: 01**

**Pre-requisite:** Basic information of cell biology.

### **Course Outcome:**

After completion of the course the students should be able

6. To learn about principle and working of laboratory instruments.
7. To acquire a comprehensive knowledge on molecular biology techniques.
8. To become familiar with technical requirements, concepts and general procedures in molecular biology and implement the knowledge in research work.
9. To learn and implement different strategies to isolate genomic and plasmid DNA from cells
10. To understand the methods to check purity of isolated nucleic acid samples.
11. To analyze the methods of DNA based methods of identification of unknown samples.
12. To learn the methods of DNA amplification for future recombinant techniques.

### **Details of the Laboratory Course:-**

**Note:** A college must offer 70% of the below listed experiments. The remaining 30% experiments may be modified by college according to facilities available.

<b>S. NO.</b>	<b>CONTENTS</b>	<b>CONTACT HOURS</b>
1	Isolation of genomic DNA from eukaryotic cells.	2
2	Isolation of RNA from eukaryotic cells.	2
3	Isolation of proteins from eukaryotic cells.	2
4	Isolation of genomic DNA from prokaryotic cells.	2
5	Isolation of plasmid DNA from Prokaryotic cells.	2
6	Restriction mapping of plasmid DNA: This experiment involves single and double digestion of the plasmid with restriction enzymes.	2
7	Gel electrophoretic separation of DNA and molecular wt. determination.	2
8	Gel electrophoretic separation of RNA.	2

9	Gel electrophoretic separation of proteins.	2
10	Transblot analysis of DNA.	2
11	Gel Extraction of DNA.	2
12	PCR amplification of DNA: Visualization by gel electrophoresis.	2

## Recombinant DNA Technology Lab

Course Code: CMBE-256

Credit Units: 01

**Pre-requisite:** Basic experience of molecular biology techniques

### Course Outcome:

6. Students will be able to isolate and analyze DNA/plasmid DNA and protein.
7. Students will be able to digest and ligate the DNA molecules.
8. Students will be able to design primers and amplification of DNA by PCR.
9. Students will be able to learn the techniques of cloning gene in plasmid vectors.
10. Students will be able to screen the positive transformants with the gene cloned through reporter based assays.

### Details of the Course:-

S. No.	Contents	Contact Hours
1	Isolation of Vector/plasmid DNA	3
2	Quantification of Nucleic acid and determination of its purity	3

# MICROBES IN ENVIRONMENT

**Course Code: GMBE-202**

**Credit Units: 03**

## **Course outcomes**

1. **Insect Biology:** Understand the anatomy, physiology, and classification of insects.
2. **Ecological Roles:** Analyze the ecological importance of insects in ecosystems and their interactions with other organisms.
3. **Insect Behavior:** Explore the behavioral patterns and adaptations of insects.
4. **Pest Management:** Learn techniques for identifying and managing insect pests in agriculture and public health.
5. **Applied Entomology:** Apply knowledge of entomology in fields like pollination, biocontrol, and forensic science.

## **Unit 1: Microorganisms and their Habitats**

Structure and function of ecosystems, Terrestrial Environment: Soil profile and soil microflora  
Aquatic Environment: Microflora of fresh water and marine habitats, Atmosphere: Aeromicroflora and dispersal of microbes, Animal Environment: Microbes in/on human body (Microbiomics) & animal (ruminants) body. Extreme Habitats: Extremophiles: Microbes thriving at high & low temperatures, pH, high hydrostatic & osmotic pressures, salinity, & low nutrient levels.

## **Unit 2: Microbial Interactions**

Microbe interactions: Mutualism, synergism, commensalism, competition, amensalism, parasitism, predation, Microbe-Plant interaction: Symbiotic and non symbiotic interactions, Microbe-animal interaction: Microbes in ruminants, nematophagus fungi and symbiotic luminescent bacteria.

## **Unit 3: Biogeochemical Cycling**

Carbon cycle: Microbial degradation of cellulose, hemicelluloses, lignin and chitin, Nitrogen cycle: Nitrogen fixation, ammonification, nitrification, denitrification and nitrate reduction, Phosphorus cycle: Phosphate immobilization and solubilisation, Sulphur cycle: Microbes involved in sulphur cycle, Other elemental cycles: Iron and manganese.

## **Unit 4: Waste Management**

Solid Waste management: Sources and types of solid waste, Methods of solid waste disposal

(composting and sanitary landfill), Liquid waste management: Composition and strength of sewage (BOD and COD), Primary, secondary (oxidation ponds, trickling filter, activated sludge process and septic tank) and tertiary sewage treatment.

### **Unit 5: Microbial Bioremediation**

Principles and degradation of common pesticides, hydrocarbons (oil spills).

### **Unit 6: Water Potability**

Treatment and safety of drinking (potable) water, methods to detect potability of water samples: (a) standard qualitative procedure: presumptive test/MPN test, confirmed and completed tests for faecal coliforms (b) Membrane filter technique and (c) Presence/absence tests.

	<b>Attendance</b>	<b>Class Test</b>	<b>Assignment/ Project/Seminar/Quiz</b>	
<b>Weightage (%)</b>	10	20	10	60

# MICROBES IN SUSTAINABLE AGRICULTURE AND DEVELOPMENT

**Course Code: GMBE-202a**

**Credit Units: 03**

## **Course outcomes**

1. **Insect Biology:** Understand the anatomy, physiology, and classification of insects.
2. **Ecological Roles:** Analyze the ecological importance of insects in ecosystems and their interactions with other organisms.
3. **Insect Behavior:** Explore the behavioral patterns and adaptations of insects.
4. **Pest Management:** Learn techniques for identifying and managing insect pests in agriculture and public health.
5. **Applied Entomology:** Apply knowledge of entomology in fields like pollination, biocontrol, and forensic science.

## **Unit 1: Soil Microbiology**

Soil as Microbial Habitat, Soil profile and properties, Soil formation, Diversity and distribution of microorganisms in soil.

## **Unit 2: Mineralization of Organic & Inorganic Matter in Soil**

Mineralization of cellulose, hemicelluloses, lignocelluloses, lignin and humus, phosphate, nitrate, silica, potassium.

## **Unit 3: Microbial Activity in Soil and Green House Gases**

Carbon dioxide, methane, nitrous oxide, nitric oxide – production and control

## **Unit 4: Microbial Control of Soil Borne Plant Pathogens**

Biocontrol mechanisms and ways, Microorganisms used as biocontrol agents against Microbial plant pathogens, Insects, Weeds.

## **Unit 5: Biofertilization, Phytostimulation, Bioinsecticides**

Plant growth promoting bacteria, biofertilizers – symbiotic (Bradyrhizobium, Rhizobium, Frankia), Non Symbiotic (Azospirillum, Azotobacter, Mycorrhizae, MHBs, Phosphate solubilizers, algae),

Novel combination of microbes as biofertilizers, PGPRs.

### **Unit 6: Secondary Agriculture Biotechnology**

Biotech feed, Silage, Biomanure, biogas, biofuels – advantages and processing parameters.

<b>Components</b>	<b>Internal Assessment</b>			<b>External Evaluation</b>
	<b>Attendance</b>	<b>Class Test</b>	<b>Assignment/ Project/Seminar/Quiz</b>	
<b>Weightage (%)</b>	10	20	10	60

# MANAGEMENT OF HUMAN MICROBIAL DISEASES

**Course Code: SMBE-202**

**Credit Unit: 04**

## **Course outcomes**

6. **Insect Biology:** Understand the anatomy, physiology, and classification of insects.
7. **Ecological Roles:** Analyze the ecological importance of insects in ecosystems and their interactions with other organisms.
8. **Insect Behavior:** Explore the behavioral patterns and adaptations of insects.
9. **Pest Management:** Learn techniques for identifying and managing insect pests in agriculture and public health.
10. **Applied Entomology:** Apply knowledge of entomology in fields like pollination, biocontrol, and forensic science.

## **Unit 1: Importance of Diagnosis of Diseases**

Bacterial, Viral, Fungal and Protozoan Diseases of various human body systems, Disease associated clinical samples for diagnosis.

## **Unit 2: Collection of Clinical Samples**

How to collect clinical samples (oral cavity, throat, skin, Blood, CSF, urine and faeces) and precautions required. Method of transport of clinical samples to laboratory and storage.

## **Unit 3: Direct Microscopic Examination and Culture**

Examination of sample by staining - Gram stain, Ziehl-Neelson staining for tuberculosis, Giemsa stained thin blood film for malaria, Preparation and use of culture media - Blood agar, Chocolate agar, Lowenstein-Jensen medium, MacConkey agar, Distinct colony properties of various bacterial pathogens.

## **Unit 4: Serological and Molecular Methods**

Serological Methods - Agglutination, ELISA, immunofluorescence, Nucleic acid based methods - PCR, Nucleic acid probes.

## **Unit 5: Kits for Rapid Detection of Pathogens**

Typhoid, Dengue and HIV, Swine flu.

### **Unit 6: Testing for Antibiotic Sensitivity in Bacteria.**

Importance, Determination of resistance/sensitivity of bacteria using disc diffusion method, Determination of minimal inhibitory concentration (MIC) of an antibiotic by serial double dilution method.

# BIOINFORMATICS

**Course Code: CMBE-301**

**Credit Unit: 04**

## Course Outcomes

1. **Data Analysis:** Understand the principles of analyzing biological data using computational tools.
2. **Genomics and Proteomics:** Explore techniques for studying genomes, transcriptomes, and proteomes.
3. **Algorithm Development:** Apply algorithms for sequence alignment, phylogenetics, and molecular modeling.
4. **Database Management:** Learn to access, manage, and interpret biological databases.
5. **Applications:** Utilize bioinformatics in drug discovery, personalized medicine, and evolutionary studies.

### Unit 1: Introduction to computational biology

What is computational biology and bioinformatics, internet and bioinformatics, chemoinformatics. Introduction to linux and common terminal commands.

### Unit 2: Biological databases and genome browsers

Introduction to various databases and their classification (primary and secondary databases) e.g. NCBI, DDBJ, EMBL, ENSEMBL, UCSC and their use in laboratories: literature, sequence, structure, medical, enzymes and metabolic pathways databases.

### Unit 3: Sequence alignment and visualization

Local and global sequence alignments (Needleman-Wunsch and Smith-Waterman algorithms), pair-wise (BLAST and FASTA algorithms) and multiple sequence alignment (Clustal W) and its importance. Theory behind BLAST- how Hidden Markov Model (HMM) can be used to model a family of unaligned sequences or a common motif within a set of unaligned sequences and further be used for discrimination and multiple alignment, BLAST score, amino acid substitution matrices, s-value and e-value, calculating the alignment score and significance of e and p value.

### Unit 4: Phylogenetic analysis

Basics and tools for phylogenetic analysis, cladistics, tree-building methods (character and distance

based methods), construction of phylogenetic trees (PHYLIP) and identifying homologs.

### **Unit 5: Microarray analysis**

Introduction and use of DNA microarray to assay gene expression, designing of the experiment, analysis and biological interpretation, principle and applications of protein microarray.

#### **References:**

<b>Components</b>	<b>Internal Assessment</b>			<b>External Evaluation</b>
	<b>Attendance</b>	<b>Class Test</b>	<b>Assignment/ Project/Seminar/Quiz</b>	
<b>Weightage (%)</b>	10	20	10	60

# MICROBIOLOGICAL ANALYSIS OF AIR AND WATER

**Course Code: CMBE-301a**

**Credit Unit: 04**

## **Course outcomes:**

- Explain the importance of aseptic techniques in microbiological sampling.
- Describe various methods for sampling air and water.
- Identify the factors affecting microbial growth in air and water.
- Calculate microbial load in air and water samples.

## **Unit 1: Aeromicrobiology**

Bioaerosols, Air borne microorganisms (bacteria, Viruses, fungi) and their impact on human health and environment, significance in food and pharma industries and operation theatres,allergens.

## **Unit 2: Air Sample Collection and Analysis**

Bioaerosol sampling, air samplers, methods of analysis, CFU, culture media for bacteria and fungi, Identification characteristics.

## **Unit 3: Control Measures**

Fate of bioaerosols, inactivation mechanisms – UV light, HEPA filters, desiccation, Incineration.

## **Unit 4: Water Microbiology**

Water borne pathogens, water borne diseases.

## **Unit 5 Microbiological Analysis of Water**

Sample Collection, Treatment and safety of drinking (potable) water, methods to detect potability of water samples: (a) standard qualitative procedure: presumptive/MPN tests confirmed and completed tests for faecal coliforms (b) Membrane filter technique and (c) Presence/absence tests.

**Examination Scheme:**

Components	Internal Assessment			External Evaluation
	Attendance	Class Test	Assignment/ Project/Seminar/Quiz	
Weightage (%)	10	20	10	60

## HOSPITAL MANAGEMENT

**Course Code: CMBE-301b**

**Credit Unit: 04**

### **Course outcomes:**

- to provide conceptual understanding of Management Concepts
- to familiarize the students with the contemporary issues in Management
- to understand and appreciate the human behaviour in organisations

### **UNIT - I Nature of Management -**

Social Responsibilities of Business - Manager and Environment Levels in Management - Managerial Skills - Planning - Steps in Planning Process - Scope and Limitations - Short Range and Long Range Planning - Flexibility in Planning Characteristics of a sound Plan - Management by Objectives (MBO) - Policies and Strategies - Scope and Formulation - Decision Making - Techniques and Processes

### **UNIT – II An Overview of Staffing, Directing and Controlling**

Functions - Organising - Organisation Structure and Design - Authority and Responsibility Relationships - Delegation of Authority and Decentralisation - Interdepartmental Coordination - Emerging Trends in Corporate Structure, Strategy and Culture - Impact of Technology on Organisational design - Mechanistic Vs Adoptive Structures - Formal and Informal Organisation

### **UNIT – III Perception and Learning -**

Personality and Individual Differences - Motivation and Job Performance - Values, Attitudes and Beliefs - Stress Management - Communication Types Process - Barriers - Making Communication Effective

### **UNIT – IV Group Dynamics -**

Leadership - Styles - Approaches - Power and Politics - Organisational Structure - Organisational Climate and Culture - Organisational Change and Development.

### **UNIT – V Comparative Management Styles and approaches -**

Japanese Management Practices Organisational Creativity and Innovation - Management of Innovation - Entrepreneurial Management - Benchmarking - Best Management Practices across the world - Select cases of Domestic & International Corporations - Management of Diversity.

**Suggested Books:**

- Koontz, Weirich & Aryasri, PRINCIPLES OF MANAGEMENT, Tata McGraw-Hill, NewDelhi,2004

- Meenakshi Gupta, PRINCIPLES OF MANAGEMENT, PHI Learning, NewDelhi, 2009
- Fred Luthans, ORGANISATIONAL BEHAVIOUR, TataMcGraw-Hill, NewDelhi
- Stephen Robbins, ORGANISATIONAL BEHAVIOUR, Pearson, New Delhi
- Ricky Griffin, MANAGEMENT: PRINCIPLES & APPLICATIONS, Cengage, NewDelhi,2008

**Examination Scheme:**

Components	Internal Assessment			External Evaluation
	Attendance	Class Test	Assignment/ Project/Seminar/Quiz	
Weightage (%)	10	20	10	60

## SOIL & WATER MICROBIOLOGY

**Course Code: CMBE-301c**

**Credit Unit: 04**

### **Course outcomes:**

- To enrich students' knowledge and train them in epidemiology and Immunology.
- To present to the students the concept of epidemiology, chemotherapy, drug resistance and immune system.
- To inculcate sense of Scientific Responsibilities & Social Awareness.
- To familiarize students with epidemiology and Immunology .
- To introduce the basic concepts of epidemiology and Immunology.

### **Course detail:**

#### **Unit 1: Epidemiology**

Aims and approaches of epidemiological studies. Basic measurements in Epidemiology. Measurement tools in epidemiology. Outline classification of epidemiological studies..Case control and cohort studies – Study design and application.

#### **Unit II: Clinical trials of drugs and vaccines**

Randomized control trials Concurrent parallel and cross-over trials and their applications. .Epidemiology of infectious diseases i. Sources and Reservoirs of Infection. Modes of Transmission of Infections. Disease Prevention and Control Measures.

#### **Unit III: Introduction to Chemotherapy**

.Classes of antibiotics.Selective toxicity, Bioavailability, MIC, MBC, LD50 .Antagonism and synergism in drugs.Concept of antibiotic sensitivity and drug resistance: (MDR,XDR,PDR).

#### **Unit IV : Immunology**

Immunity: Definition, Types innate and acquired, active and passive, humoral and cell mediated). Formation of blood cells (hematopoiesis): Myeloid and lymphoid lineages and differentiation process. Antigens and antibodies: definition and concept.

#### **Unit V: Immunoematology**

ABO and Rh blood group systems.Bombay blood group.Biochemistry of blood group substances.Inheritance of ABH antigens.Medico- legal applications of blood groups Active and Passive Immunization.Active Immunization -Whole organism vaccines i. Attenuated vaccines ii. Inactivated Vaccines iii. Recombinant vaccines iv. Conjugate vaccines v. Subunit vaccine vi.Toxoids.Passive Immunization Transfer of preformed antibodies.Latest Immunization schedule in India

SEMESTER V

Suggested Books :

Year	Book Title	Author(s)
2017	Ananthanarayan and Paniker's Textbook of Microbiology	Reba Kanungo
2004	Collins and Lyne's Microbiological Methods	C. H. Collins, P. M. Lyne, J. M. Grange, J. O. III Falkingham
2010	Antibiotic and Chemotherapy	R. Finch, D. Greenwood, R. Whitley, S. R. Norrby
2019	Park's Preventive and Social medicine	K. Park
2013	Medical Bacteriology Including Medical Mycology and AIDS	N. C. Dey, T. K. Dey, D. Sinha

## INSTRUMENTATION AND BIOTECHNIQUES

**Course Code: CMBE-303**

**Credit Unit: 04**

### **Course Outcomes**

1. **Laboratory Techniques:** Master essential laboratory techniques in molecular biology and biotechnology.
2. **Instrumentation Skills:** Understand the principles and applications of instruments like spectrophotometers, chromatography, and PCR machines.
3. **Data Interpretation:** Analyze and interpret experimental data obtained through various biotechnological instruments.
4. **Biotech Applications:** Apply biotechnology techniques in fields like diagnostics, agriculture, and pharmaceuticals.
5. **Quality Control:** Learn the importance of quality control and standardization in biotechnology experiments.

### **Unit 1: Microscopy**

Brightfield and darkfield microscopy, Fluorescence Microscopy, Phase contrast Microscopy, Confocal Microscopy, Electron Microscopy (Scanning and Transmission Electron Microscopy) and Micrometry.

### **Unit 2: Chromatography**

Principles and applications of paper chromatography (including Descending and 2-D), Thin layer chromatography. Column packing and fraction collection. Gel filtration chromatography, ionexchange chromatography and affinity chromatography, GLC, HPLC.

### **Unit 3: Electrophoresis**

Principle and applications of native polyacrylamide gel electrophoresis, SDS- polyacrylamide gel electrophoresis, 2D gel electrophoresis, Isoelectric focusing, Zymogram preparation and Agarose gel electrophoresis.

### **Unit 4: Spectrophotometry**

Principle and use of study of absorption spectra of biomolecules. Analysis of biomolecules using UV and visible range. Colorimetry and turbidometry.

### **Unit 5: Centrifugation**

Preparative and analytical centrifugation, fixed angle and swinging bucket rotors. RCF and sedimentation coefficient, differential centrifugation, density gradient centrifugation and ultracentrifugation.

	Attendance	Class Test	Assignment/ Project/Seminar/Quiz	
Weightage (%)	10	20	10	60

## MARINE MICROBIOLOGY

**Course Code: CMBE-303a**

**Credit Unit: 04**

### **Course outcomes:**

- Describe the major groups of marine microorganisms (bacteria, archaea, fungi, viruses, and protists).
- Explain the ecological roles of marine microorganisms in nutrient cycling, primary production, and biogeochemical processes.
- Discuss the factors influencing microbial diversity and distribution in marine environments.
- Explain the processes of microbial decomposition and mineralization of organic matter.
  - Describe the role of marine microorganisms in biogeochemical cycles (carbon, nitrogen, sulfur, and phosphorus).
- Discuss the significance of microbial interactions with other organisms in marine food webs.

### **Unit 1: Marine Environment**

World's oceans & Seas, Physio – Chemical properties of marine water, marine microbial habitat: water column, sediments, coastal ecosystems, mangroves salt marshes. Bio-films & Microbial mats. Microbial life at surface of living & nonliving systems and microbial interactions. Quorum sensing in marine microbes and significance. Metabolic diversity and importance of microbial communities, Photo trophy & primary productivity.

### **Unit 2: Methods in Marine Microbiology**

Sampling methods of different habitat of oceans and screening by CLSM & FCM. Importance of Culturable & non-Cultural microorganisms. Molecular tools to study marine diversity. Limitations of analysis of nucleic acid directly from marine environment.

### **Unit 3: Role of Microbes in ocean processes**

Bioenergetics, Carbon & Nitrogen cycling in ocean, Photosynthesis and Primary productivity. Eutrophication of coastal areas. Microbial loop in ocean food web. Microbial processes and climate change. Bio – fouling & bio – deterioration, indicator organisms and pollution control. Symbiosis of microalgae with animals: Chemoautotrophic prokaryotes with animals. Symbionts of sponges, mixotrophy in protists. Metabolic consortia and mutualism between prokaryotes.

### **Unit 4: Marine Microbes**

Bacterial and viral disease of fresh water, seawater, aqua culture: fish, bivalve mollusks, Crustaceans, corals. Diagnosis methods. Control of diseases. Biodegradation and Bioremediation of marine pollutants (oil, Organic comp. etc.).

### **Unit 5: Recent trends in Marine Microbiology**

Recently identified microorganisms of marine ecosystem, there applications in present and future industries

#### **Suggested books:**

2. Sekwon Kim. 2013. Marine Microbiology: Bioactive compounds and Biotechnological applications. Wiley VCH.
3. Paul, J. 2001. Marine Microbiology. Academic Press. PP-666.

#### **Examination Scheme:**

Components	Internal Assessment			External Evaluation
	Attendance	Class Test	Assignment/ Project/Seminar/Quiz	
Weightage (%)	10	20	10	60

## VETERINARY SCIENCE

**Course Code: CMBE-303b**

**Credit Unit: 04**

### **Course Outcomes:**

- Understand the anatomical structure of domestic animals.
- Explain the physiological functions of various organ systems.
- Apply anatomical and physiological knowledge to diagnose and treat animal diseases.
  
- Understand the nutritional requirements of different animal species.
- Formulate balanced diets for various livestock and poultry.
- Evaluate the quality of feedstuffs.
- Apply principles of nutrition to improve animal health and productivity.

### **Unit 1: Animal Anatomy and Physiology**

Gross Anatomy of Domestic Animals ,Histology of Animal Tissues, Physiology of Various Organ Systems (Digestive, Respiratory, Circulatory, Nervous, Endocrine, Reproductive)

### **Unit 2: Animal Nutrition and Feed Science**

Nutrients and Their Functions, Feedstuffs: Classification and Composition, Feed Formulation and Ration Balancing, Ruminant Nutrition, Non-Ruminant Nutrition

### **Unit 3: Animal Reproduction and Genetics**

Reproductive Physiology of Male and Female Animals, Artificial Insemination, Embryo Transfer Technology, Genetics and Breeding, Genetic Disorders in Animals

### **Unit 4: Animal Diseases**

Infectious Diseases (Bacterial, Viral, Fungal, Parasitic), Non-Infectious Diseases (Nutritional, Metabolic, Toxic), Clinical Examination and Diagnosis, Disease Prevention and Control, Zoonotic Diseases

### **Unit 5: Animal Health and Welfare**

Animal Welfare Principles, Humane Slaughter and Handling, Veterinary Public Health, Zoonotic Disease Control, Animal Ethics and Legislation.

**Suggested Books:**

<b>S. No.</b>	<b>Name of Authors/Books/Publishers</b>	<b>Year of Publication/Reprint</b>
<b>Text Books</b>

	<b>Attendance</b>	<b>Class Test</b>	<b>Assignment/ Project/Seminar/Quiz</b>	
<b>Weightage (%)</b>	10	20	10	60

## FOOD AND DAIRY MICROBIOLOGY

**Course Code: DMBE-301**

**Credit Unit: 04**

### **Course Outcomes**

1. **Microbial Contamination:** Understand the types and sources of microbial contamination in food and dairy products.
2. **Fermentation Processes:** Learn the role of microorganisms in food fermentation and dairy production.
3. **Food Preservation:** Analyze microbial control methods for food preservation, including pasteurization and refrigeration.
4. **Foodborne Pathogens:** Identify pathogenic microorganisms and their role in foodborne illnesses.
5. **Quality Control:** Apply microbiological techniques for assessing food safety and quality in food and dairy industries.

### **Unit 1: Foods as a substrate for microorganisms**

Intrinsic and extrinsic factors that affect growth and survival of microbes in foods, natural flora and source of contamination of foods in general.

### **Unit 2: Microbial spoilage of various foods**

Principles, Spoilage of vegetables, fruits, meat, eggs, milk and butter, bread, canned Foods.

### **Unit 3: Principles and methods of food preservation**

Principles, physical methods of food preservation: temperature (low, high, canning, drying), irradiation, hydrostatic pressure, high voltage pulse, microwave processing and aseptic packaging, chemical methods of food preservation: salt, sugar, organic acids, SO<sub>2</sub>, nitrite and nitrates, ethylene oxide, antibiotics and bacteriocins.

### **Unit 4: Fermented foods**

Dairy starter cultures fermented dairy products: yogurt, acidophilus milk, kumiss, kefir, dahi and cheese, other fermented foods: dosa, sauerkraut, soy sauce and tampeh, Probiotics: Health benefits, types of microorganisms used, probiotic foods available in market.

### **Unit 5: Food borne diseases**

Food intoxications: Staphylococcus aureus, Clostridium botulinum and mycotoxins; Food infections: Bacillus cereus, Vibrio parahaemolyticus, Escherichia coli, Salmonellosis, Shigellosis, Yersinia enterocolitica, Listeria monocytogenes and Campylobacter jejuni.

Weightage (%)	10	20	10	60

## DEVELOPMENTAL BIOLOGY AND EMBRYOLOGY

**Course Code: DMBE-301a**

**Credit Unit: 04**

### Course outcomes:

- Define key terms in developmental biology, such as differentiation, morphogenesis, and pattern formation.
- Explain the central dogma of molecular biology and its relevance to development.
- Describe the different stages of embryonic development, from fertilization to organogenesis.
- Understand the concept of cell fate determination and potency.
- Describe the process of fertilization, including sperm-egg recognition and fusion.
- Explain the early cleavage divisions and the formation of the blastula.
- Understand the process of gastrulation and the formation of germ layers.
- Describe the mechanisms of cell fate specification and differentiation.

### Unit 1: Introduction to Developmental Biology

Basic concepts of development, central dogma of molecular biology, model organisms, techniques in developmental biology.

### Unit 2: Fertilization and Early Embryonic Development

Gametogenesis, fertilization, cleavage, gastrulation, formation of germ layers.

### Unit 3: Organogenesis and Morphogenesis

Neurulation, organogenesis, cell signaling pathways, morphogenesis.

### Unit 4: Stem Cells and Regeneration

Stem cells, properties of stem cells, applications of stem cell research, regeneration.

### Unit 5: Evolutionary Developmental Biology (Evo-Devo)

Evolutionary developmental biology, homology and analogy, genetic toolkit, heterochrony and heterotopy, evolution of novel structures and body plans

### Suggested books:

S. No.	Name of Authors/Books/Publishers	Year of Publication/Reprint

**Examination Scheme:**

Components	Internal Assessment			External Evaluation
	Attendance	Class Test	Assignment/ Project/Seminar/Quiz	
Weightage (%)	10	20	10	60

## POPULATION BIOLOGY

**CourseCode:DMBE-303b**

**Credit Unit: 04**

### **Course Outcomes:**

- Understand the fundamental concepts of population ecology, including population size, density, distribution, and growth rates.
- Apply mathematical models (exponential and logistic growth) to analyze population dynamics.
- Evaluate the impact of density-dependent and density-independent factors on population regulation.
- Explain the Hardy-Weinberg equilibrium principle and its assumptions.
- Analyze the effects of genetic drift, gene flow, and natural selection on population genetic structure.
- Apply quantitative genetics concepts to understand phenotypic variation and heritability.

### **Unit 1: Introduction to Population Ecology**

Definition, scope, population characteristics, dynamics, growth models, life history strategies, population regulation.

### **Unit 2: Population Genetics**

Hardy-Weinberg equilibrium, genetic drift, gene flow, natural selection, quantitative genetics, molecular evolution, conservation genetics.

### **Unit 3: Population Interactions**

Interspecific interactions, intraspecific interactions, ecological niches, Lotka-Volterra models, community ecology, ecological succession.

### **Unit 4: Population Demography**

Life tables, survivorship curves, reproductive rates, population projections, demographic transition, human population dynamics.

### **Unit 5: Conservation Biology**

Biodiversity loss, conservation strategies, habitat fragmentation, population viability analysis, wildlife management, ecosystem services.

**Suggested Books:**

## Bioinformatics Lab

**Course Code: CMBE-351**

**Credit Units: 01**

**Pre-requisite:** Basic knowledge of computer application

**Course Outcome:**

11. Students will be able to understand basics of internet and computers along with information on various databases.
12. Students will be able to understand application of bioinformatics in biotechnology.
13. Students will be able to understand sequence alignment and various algorithms for it.
14. Students will be able to understand and interpret sequence annotation and its retrieval.
15. The information about various biologically important databases will be made available to students.

**Details of the Course:-**

**Note:** A college must offer 70% of the below listed experiments. The remaining 30% experiments may be modified by college according to facilities available.

S. NO.	CONTENTS	CONTACT HOURS
1	Introduction to various databases of proteins, nucleic acids. Primary, secondary and composite databases.	3
2	BLAST, FASTA, DOT PLOT	3
3	MSA using various free tools.	3
4	Phylogenetic predictions.	3
5	Prediction of structure of proteins and nucleic acids	3
6	ORF prediction and its validation	3
7	Primer designing	3
8	Restriction mapping	3
9	Epitope prediction using various online tools	3
10	Data mining tool and its practical applications in a case study	3

## Instrumentation and Biotechniques Laboratory

**Course Code: CMBE-353**

**Credit Units: 01**

**Pre-requisite:** Basic knowledge of Biochemistry and Molecular Biology

**Course Outcome:**

After completion of the course, the students will be able to:

1. Understand the principles and applications of key bioinstrumentation tools.
2. Operate and troubleshoot laboratory instruments used in modern biological research.
3. Perform techniques such as spectrophotometry, chromatography, and electrophoresis.
4. Analyze biological samples using advanced laboratory techniques.
5. Integrate bioinstrumentation and biotechniques in molecular, biochemical, and cellular studies.

**Details of the Laboratory Course:**

**Note:** A college must offer 70% of the below-listed experiments. The remaining 30% experiments may be modified by the college according to available facilities.

S. No.	Contents	Contact Hours
1	<b>Principles and Operation of Spectrophotometer:</b> Measurement of absorption spectra and concentration using Beer-Lambert's law.	3
2	<b>Chromatographic Techniques:</b> Separation of biomolecules using thin-layer chromatography (TLC) and column chromatography.	3
3	<b>Electrophoresis:</b> Separation of proteins or nucleic acids using SDS-PAGE and agarose gel electrophoresis.	3
4	<b>Centrifugation Techniques:</b> Separation of cell components and biomolecules using differential and density gradient centrifugation.	3
5	<b>pH Meter Calibration and Use:</b> Measurement of pH for various biological samples and buffers.	2
6	<b>Fluorometry:</b> Use of fluorescence spectrophotometry for protein and DNA quantification.	2
7	<b>ELISA:</b> Perform Enzyme-Linked Immunosorbent Assay for antigen or antibody detection.	3
8	<b>Microscopy Techniques:</b> Observation of biological specimens using phase-contrast and fluorescence microscopy.	2
9	<b>Protein Estimation:</b> Estimation of proteins using Bradford or Lowry method.	3
10	<b>Molecular Techniques:</b> DNA extraction and its quantification using NanoDrop or spectrophotometer.	2

## Minor Project

**Course Code: DMBE-351**

**Credit Units: 01**

**Pre-requisite:** Basic understanding of microbiological techniques and concepts.

### Course Outcome:

After completion of the course, students will be able to:

1. Design and execute a research-based microbiological project.
2. Develop technical skills in handling microbiological tools and techniques.
3. Analyze experimental results and interpret findings scientifically.
4. Prepare scientific reports and presentations effectively.
5. Apply theoretical microbiological knowledge to practical and real-world problems.

### Details of the Course:

- **Project Description:**  
The minor project will involve identifying a microbiological problem or question, formulating a hypothesis, conducting experiments, and reporting the findings. Students will work in small groups or individually under the guidance of a faculty member.
- **Suggested Topics (examples):**
  1. Isolation and characterization of bacteria from soil, water, or food samples.
  2. Antimicrobial activity of plant extracts or synthesized nanoparticles.
  3. Study of the role of probiotics in gut microbiota.
  4. Bioremediation potential of soil microorganisms.
  5. Microbial diversity analysis in a specific environment using culture and non-culture methods.
  6. Testing the efficiency of household disinfectants on microbial populations.
  7. Investigation of fungal species in a particular habitat (e.g., air, soil).
  8. Study of biofilm formation and its inhibition using natural or synthetic agents.
- **Project Workflow:**
  1. Identification of research topic and literature review (Week 1).
  2. Experimental design and resource allocation (Week 2).
  3. Conducting experiments and data collection (Weeks 3–6).
  4. Analysis of results and compilation of data (Week 7).
  5. Preparation of project report and presentation (Week 8).
- **Report Submission:**  
A comprehensive project report must be submitted, including an introduction, materials and methods, results, discussion, conclusion, and references.
- **Evaluation Scheme:**
- **Evaluation Scheme:**

Components	Project Proposal	Execution of the Work	Practical Skills	Final Report	Oral Presentation
Weightage (%)	10%	30%	20%	20%	20%

**Suggested References:**

4. Relevant research articles and journal publications depending on the chosen topic.

## Industrial Biotechnology Laboratory

**Course Code: SMBE-551**
**Credit Units: 01**
**Pre-requisite:** Basic understanding of microbiology, molecular biology, and biochemistry.

**Course Outcome:**

After completion of the course, students will be able to:

1. Learn fermentation techniques and operate industrial bioprocess equipment.
2. Develop skills in the production and analysis of biotechnological products.
3. Understand the principles of enzyme kinetics and immobilization.
4. Explore microbial processes for the production of biofuels, antibiotics, and other bio-products.
5. Perform downstream processing techniques for product purification.

**Details of the Laboratory Course:**

**Note:** A college must offer 70% of the below-listed experiments. The remaining 30% experiments may be modified by the college according to available facilities.

S. No.	Contents	Contact Hours
1	<b>Screening of Industrially Important Microorganisms:</b> Isolation and characterization from soil or water.	3
2	<b>Submerged and Solid-State Fermentation:</b> Production of enzymes or bioactive compounds.	3
3	<b>Enzyme Kinetics Study:</b> Determination of $K_m$ and $V_{max}$ using a model enzyme (e.g., amylase, lipase).	3
4	<b>Immobilization Techniques:</b> Entrapment and activity assay of immobilized enzymes.	3
5	<b>Production of Alcohol/Biofuels:</b> Fermentation of sugars by <i>Saccharomyces cerevisiae</i> or other microbes.	3
6	<b>Antibiotic Production and Assay:</b> Penicillin production and antibacterial activity testing.	3
7	<b>Batch Fermentation:</b> Monitoring parameters like pH, temperature, and dissolved oxygen during a batch culture.	3
8	<b>Downstream Processing:</b> Product recovery using centrifugation, filtration, and solvent extraction.	3
9	<b>Bioassay Techniques:</b> Determining the biological activity of a product (e.g., vitamins, antibiotics).	2
10	<b>Bioplastic Production:</b> Synthesis and analysis of polyhydroxyalkanoates (PHA) from microbial cultures.	3

**Suggested Books:****Text Books**

4. **Biotechnology: Concepts and Applications** – H. D. Kumar, East-West Press, 2007.

**Examination Scheme:**

<b>Components</b>	<b>Project Proposal</b>	<b>Execution of the Work</b>	<b>Practical Skills</b>	<b>Final Report</b>	<b>Oral Presentation</b>
<b>Weightage (%)</b>	10%	30%	20%	20%	20%

This syllabus emphasizes key practical aspects of Industrial Biotechnology, including fermentation, enzyme technology, product recovery, and bioprocess analysis, to prepare students for industrial and research roles in biotechnology.

## GENETIC ENGINEERING AND BIOTECHNOLOGY

**Course Code: GMBE-201**

**Credit Unit:**

**03**

1. Molecular Tools: Understand the principles and tools used in gene cloning and genetic engineering.
2. Vector Design: Learn the construction and application of cloning and expression vectors.
3. Gene Manipulation: Demonstrate proficiency in techniques like PCR, restriction digestion, and ligation.
4. Applications: Explore the use of recombinant DNA in medicine, agriculture, and industry.
5. Ethics and Safety: Analyze the ethical, legal, and biosafety considerations of genetic engineering.

### **Unit 1: Introduction to genetic engineering**

Milestones in genetic engineering and biotechnology, Restriction modification systems: Mode of action, applications of Type II restriction enzymes in genetic engineering, DNA modifying enzymes and their applications: DNA polymerases. Terminal deoxynucleotidyl transferase, kinases and phosphatases, and DNA ligases, Cloning: Use of linkers and adaptors Transformation of DNA: Chemical method, Electroporation Methods of DNA, RNA and Protein analysis: Agarose gel electrophoresis, Southern - and Northern - blotting techniques, dot blot, DNA microarray analysis, SDS-PAGE and Western blotting.

### **Unit 2: Vectors**

Cloning Vectors: Definition and Properties, Plasmid vectors: pBR and pUC series, Bacteriophage lambda and M13 based vectors, Cosmids, BACs, YACs, Expression vectors: E.coli lac and T7 promoter-based vectors, yeast YIp, YE<sub>p</sub> and YC<sub>p</sub> vectors, Baculovirus based vectors, mammalian SV40-based expression vectors.

### **Unit 3: DNA Amplification and DNA sequencing**

PCR: Basics of PCR, RT-PCR, Real-Time PCR, Genomic and cDNA libraries: Preparation and uses, Genome sequencing, Sanger's method of DNA Sequencing: traditional and automated sequencing.

#### **Unit 4 Application of Genetic Engineering and Biotechnology**

Gene delivery: Microinjection, electroporation, biolistic method (gene gun), liposome and viral mediated delivery, Agrobacterium - mediated delivery, Products of recombinant DNA technology: Products of human therapeutic interest - insulin, hGH, antisense molecules. Bt transgenic - cotton, brinjal, flavo savo tomato, Gene therapy, recombinant vaccine, protein engineering.

#### **Unit 5 Intellectual Property Rights**

Patents, Copyrights, Trademarks.

Weightage (%)	10	20	10	60

## GENOME ORGANISATION AND FUNCTION

**Course Code: GMBE-503**

**Credit Unit: 03**

### Course outcomes:

- Explain the structure and organization of DNA, including the concept of the double helix.
- Describe the different levels of DNA packaging, from nucleosomes to chromosomes.
- Discuss the concept of genome size and its relationship to organismal complexity.
- Explain the semi-conservative mechanism of DNA replication.
- Describe the role of DNA polymerases and other enzymes in DNA replication.
- Discuss the various types of DNA repair mechanisms, including base excision repair, nucleotide excision repair, and mismatch repair.

**Unit 1: Introduction to Genomics** Genome structure, genome size and complexity, the human genome project, functional genomics, structural genomics, comparative genomics.

**Unit 2: DNA Replication and Repair** DNA replication mechanisms, DNA repair mechanisms, DNA damage and mutagenesis.

**Unit 3: Transcription and RNA Processing** Transcription initiation, elongation, and termination, RNA polymerase, RNA processing (capping, splicing, polyadenylation), RNA stability and degradation.

**Unit 4: Translation and Protein Synthesis** Genetic code, ribosome structure and function, translation initiation, elongation, and termination, protein folding and post-translational modifications.

**Unit 5: Gene Regulation** Gene regulation in prokaryotes and eukaryotes, transcriptional regulation, post-transcriptional regulation, translational regulation, epigenetic regulation.

**INDUSTRIAL BIOTECHNOLOGY****Course Code:SMBE-501****Credit Unit: 03****Course outcomes:****Pre-requisite:** Basic knowledge of biotechnology**Course Outcome:**

- Students will be able to understand the technologies for microbial cell maintenance.
- Students will learn about bioprocess technology.
- Students will be able to understand fermenters.

**Details of the Course:****UNIT -1**

Technology of Microbial Cell Maintenance Principles of Microbial growth, Methods to increase yield of microbes, Batch, fed- batch and continuous cultures (definition and kinetics). Strain preservation, maintenance and strain improvement by mutation of gene transfer processes. Microbial culture selection with high yield potential. Commercial Production of Microorganisms.

**UNIT -2**

Production of Primary Metabolites A brief outline of processes for the production of some commercially important organic acids (e.g. citric acid, lactic acid, acetic acid etc.); amino acids (glutamic acid, phenylalanine, aspartic acid etc.) and alcohols (ethanol, butanol etc.)

**UNIT -3**

Production of Secondary Metabolites Study of production processes for various classes of secondary metabolites: antibiotics: betalactams (penicillin, cephalosporin etc.), aminoglycosides (streptomycin etc.), macrolides (erythromycin), vitamins and steroids.

**UNIT -4**

Design and construction of a Fermentors: Body construction; construction material; Aeration and agitation systems; Stirrer glands and bearings; Baffles; Valves and steam traps; Pressure-control valves; computer applications in fermentation technology; specialized bioreactors; membrane bioreactors; tower bioreactors; fluidized bed bioreactors; Immobilized system and packed bed reactors and Photobioreactors.

**UNIT -5**

Production Modern Biotechnology Products Production of recombinant proteins having therapeutic and diagnostic applications, production of vaccines. Production of monoclonal antibodies. Products of plant and animal cell culture.

**INDUSTRIAL BIOTECHNOLOGY LAB****Course Code:SMBE-551****Credit Unit: 01****Pre-requisite:** Basic knowledge of cell biology, biotechnology.**Course Outcome:**

After completion of the course the students will be able to

- To acquire a comprehensive knowledge on animal biotechnology and applications.
- To become familiar with technical requirements, concepts and general procedures in animal cell culture and implement the knowledge in research work.
- To learn and implement different strategies to grow store cell lines.
- To understand the methods to test cell viability.
- To visualize cell lines using different microscopic methods.

**Details of the Course:-**

Note: A college must offer 70% of the below listed experiments. The remaining 30% experiments may be modified by college according to facilities available.

<b>S. NO.</b>	<b>CONTENTS</b>	<b>CONTACT HOURS</b>
1	Preparation of animal cell culture medium.	3
2	Revival of cell line	3
3	Cell line counting	3
4	Cell line Viability testing (Trypan blue, MTT method)	3
5	Trypsinization (Cell passaging)	3
6	Storage of cell line	3

## FOOD FERMENTATION TECHNIQUES

**Course Code: DMBE-305**

**Credit Unit: 04**

1. Fermentation Basics: Understand the principles and processes of fermentation in food production.
2. Microorganism Roles: Learn the roles of yeast, bacteria, and molds in food fermentation.
3. Fermented Products: Explore the production and characteristics of various fermented foods like bread, yogurt, and beverages.
4. Fermentation Control: Analyze methods to control fermentation parameters for desired product outcomes.
5. Health Benefits: Examine the nutritional, sensory, and probiotic benefits of fermented foods.

### **Unit 1: Fermented Foods**

Definition, types, advantages and health benefits

### **Unit 2: Milk Based Fermented Foods**

Dahi, Yogurt, Buttermilk (Chach) and cheese: Preparation of inoculums, types of microorganisms and production process

### **Unit 3: Grain Based Fermented Foods**

Soy sauce, Bread, Idli and Dosa: Microorganisms and production process

### **Unit 4: Vegetable Based Fermented Foods**

Pickels, Saeurkraut: Microorganisms and production process

### **Unit 5: Fermented Meat and Fish**

Types, microorganisms involved, fermentation process

### **Unit 6: Probiotic Foods**

Definition, types, microorganisms and health benefits

## FOOD FERMENTATION TECHNIQUES LAB

**Course Code: DMBE-355**

**Credit Unit: 01**

### Course outcomes:

- Understand the fundamental principles of microbial fermentation.
- Identify various microorganisms involved in food fermentation.
- Explain the role of environmental factors (temperature, pH, oxygen, etc.) in fermentation
- Differentiate between various fermentation techniques (lactic acid, alcoholic, acetic acid,
- Understand the importance of starter cultures in fermentation.

#### 1. Lactic Acid Fermentation:

- **Foods:** Yogurt, sauerkraut, kimchi, pickles
- **Microorganisms:** Lactic acid bacteria (LAB)
- **Process:** Anaerobic fermentation of sugars into lactic acid, resulting in acidic products.

#### 2. Alcoholic Fermentation:

- **Foods:** Wine, beer, cider, sake
- **Microorganisms:** Yeast
- **Process:** Anaerobic conversion of sugars into alcohol and carbon dioxide.

#### 3. Acetic Acid Fermentation:

- **Foods:** Vinegar
- **Microorganisms:** Acetic acid bacteria
- **Process:** Aerobic oxidation of ethanol into acetic acid.

#### 4. Soy Sauce Fermentation:

- **Foods:** Soy sauce
- **Microorganisms:** Aspergillus oryzae, yeast, bacteria
- **Process:** A complex fermentation process involving koji mold, yeast, and bacteria, resulting in a salty, umami-rich sauce.

#### 5. Miso Fermentation:

- **Foods:** Miso paste
- **Microorganisms:** Aspergillus oryzae, yeast, bacteria
- **Process:** A fermentation process similar to soy sauce, but with different ratios of ingredients and longer fermentation times.

#### 6. Tempeh Fermentation:

- **Foods:** Tempeh
- **Microorganisms:** Rhizopus oligosporus
- **Process:** Fungal fermentation of soybeans, resulting in a protein-rich, fermented food.

### Examination Scheme:

Components	Internal Assessment			External Evaluation
	Attendance	Viva-Voce	Practical Record	
Weightage (%)	10	20 18	10	60

## PLANT PATHOLOGY

**Course Code: CMBE-302**

**Credit Unit: 04**

### **Course outcomes**

1. Disease Identification: Identify and classify plant diseases caused by fungi, bacteria, viruses, and other pathogens.
2. Pathogen-Host Interaction: Understand the mechanisms of plant-pathogen interactions and how diseases affect plant health.
3. Disease Management: Learn strategies for managing and controlling plant diseases, including chemical, biological, and cultural methods.
4. Plant Immune Response: Explore plant defense mechanisms and the molecular basis of plant immunity.
5. Impact on Agriculture: Assess the economic and ecological impact of plant diseases on agriculture and food security.

### **Unit 1: Introduction and History of plant pathology**

Concept of plant disease- definitions of disease, disease cycle & pathogenicity, symptoms associated with microbial plant diseases, types of plant pathogens, economic losses and social impact of plant diseases. Significant landmarks in the field of plant pathology- Contributions of Anton DeBary, Millardet, Burrill, E. Smith, Adolph Mayer, Ivanowski, Diener, Stakman, H.H. Flor, Van Der Plank, molecular Koch's postulates. Contributions of eminent Indian plant pathologists.

### **Unit 2 Stages in development of a disease**

Infection, invasion, colonization, dissemination of pathogens and perennation.

### **Unit 3 Plant disease epidemiology**

Concepts of monocyclic, polycyclic and polyetic diseases, disease triangle & disease pyramid, Forecasting of plant diseases and its relevance in Indian context.

### **Unit 4 Host Pathogen Interaction**

A. Microbial Pathogenicity

Virulence factors of pathogens: enzymes, toxins (host specific and non specific) growth regulators, virulence factors in viruses (replicase, coat protein, silencing suppressors) in disease development.

Effects of pathogens on host physiological processes (photosynthesis, respiration, cell membrane

permeability, translocation of water and nutrients, plant growth and reproduction).

**B. Genetics of Plant Diseases**

Concept of resistance (R) gene and avirulence (avr) gene; gene for gene hypothesis, types of plant resistance: true resistance– horizontal & vertical, apparent resistance.

**C. Defense Mechanisms in Plants**

Concepts of constitutive defense mechanisms in plants, inducible structural defenses (histological cork layer, abscission layer, tyloses, gums), inducible biochemical defenses

[hypersensitive response (HR), systemic acquired resistance (SAR), phytoalexins, pathogenesis related (PR) proteins, plantibodies, phenolics, quinones, oxidative bursts].

### **Unit 5 Control of Plant Diseases**

Principles & practices involved in the management of plant diseases by different methods, viz. regulatory - quarantine, crop certification, avoidance of pathogen, use of pathogen free propagative material, cultural - host eradication, crop rotation, sanitation, polyethylene traps and mulches, chemical - protectants and systemic fungicides, antibiotics, resistance of pathogens to chemicals. Biological - suppressive soils, antagonistic microbes-bacteria and fungi, trap plants genetic engineering of disease resistant plants- with plant derived genes and pathogen derived genes.

### **Unit 6 Specific Plant diseases**

Study of some important plant diseases giving emphasis on its etiological agent, symptoms, Epidemiology and control.

A. Important diseases caused by fungi, White rust of crucifers - *Albugo candida*, Downy mildew of onion - *Peronospora destructor* Late blight of potato - *Phytophthora infestans*, Powderymildew of wheat - *Erysiphe graminis*, Ergot of rye - *Claviceps purpurea*, Black stem rust of wheat - *Puccinia graminis tritici*, Loose smut of wheat - *Ustilago nuda*, Wilt of tomato - *Fusarium oxysporum* f.sp. *lycopersici*, Red rot of sugarcane - *Colletotrichum falcatum*, Early blight of potato - *Alternaria solani*.

B. Important diseases caused by phytopathogenic bacteria: Angular leaf spot of cotton, bacterial leaf blight of rice, crown galls, and bacterial cankers of citrus.

C. Important diseases caused by phytoplasmas: Aster yellow, citrus stubborn.

D. Important diseases caused by viruses: Papaya ring spot, tomato yellow leaf curl, banana bunchy top, rice tungro.

E. Important diseases caused by viroids: Potato spindle tuber, coconut cadang cadang.

## Medicinal Microbiology

**Course Code:** CMBE-302a

**Credit Units:** 03

**Pre-requisite:** Basic understanding of microbiology, bacteriology, and immunology.

### Course Outcome:

After completion of this course, students will be able to:

1. Understand the relationship between microorganisms and human diseases.
2. Identify the major pathogens responsible for infectious diseases.
3. Learn the principles of microbial pathogenesis, diagnosis, and treatment.
4. Analyze the role of the immune system in defense against infections.
5. Develop skills for laboratory diagnosis and interpretation of microbial infections.

### Details of the Course:

S. No.	Contents	Contact Hours
1	<b>Introduction to Medical Microbiology:</b> Role of microbiology in medicine, history, and scope of medical microbiology.	4
2	<b>Microbial Classification and Identification:</b> Bacteria, viruses, fungi, and parasites. Methods of identification and classification.	6
3	<b>Pathogenesis and Disease Mechanisms:</b> Virulence factors, microbial adhesion, invasion, immune evasion.	8
4	<b>Bacterial Infections:</b> Common bacterial pathogens, diseases caused by bacteria, diagnostic techniques, and antimicrobial therapy.	8
5	<b>Viral Infections:</b> Classification, structure, replication, and diseases caused by viruses (e.g., HIV, influenza, hepatitis).	8
6	<b>Fungal and Parasitic Infections:</b> Diseases caused by fungi (e.g., candidiasis, aspergillosis) and parasites (e.g., malaria, giardiasis).	6
7	<b>Microbial Diagnosis:</b> Laboratory techniques for diagnosing infections (e.g., Gram staining, PCR, ELISA, culture methods).	6
8	<b>Antimicrobial Resistance:</b> Mechanisms of resistance, multidrug-resistant organisms (MDRO), and strategies to combat resistance.	4
9	<b>Immunology in Medical Microbiology:</b> Role of the immune system in infection control, immunization, and diagnostic immunology.	6
10	<b>Hospital-Acquired Infections (HAIs):</b> Epidemiology, control, and prevention of hospital-acquired infections.	4

## MARINE MICROBIOLOGY

**Course Code: CMBE-304**

**Credit Unit: 04**

### **Course Outcomes**

- Marine Microbial Diversity: Understand the diversity and ecological roles of microorganisms in marine environments.
- Microbial Ecosystems: Analyze the structure and function of marine microbial communities in various habitats.
- Biogeochemical Cycles: Explore the role of marine microorganisms in nutrient cycling and energy flow in marine ecosystems.
- Marine Pathogens: Identify marine microorganisms that contribute to disease in marine organisms and humans.
- Biotechnology Applications: Apply knowledge of marine microbes to biotechnological innovations in areas like bioremediation and biofuels.

### **Unit 1: Marine Environment**

World's oceans & Seas, Physio – Chemical properties of marine water, marine microbial habitat: water column, sediments, coastal ecosystems, mangroves salt marshes. Bio-films & Microbial mats. Microbial life at surface of living & nonliving systems and microbial interactions. Quorum sensing in marine microbes and significance. Metabolic diversity and importance of microbial communities, Photo trophy & primary productivity.

### **Unit 2: Methods in Marine Microbiology**

Sampling methods of different habitat of oceans and screening by CLSM & FCM. Importance of Culturable & non-Cultural microorganisms. Molecular tools to study marine diversity. Limitations of analysis of nucleic acid directly from marine environment.

### **Unit 3: Role of Microbes in ocean processes**

Bioenergetics, Carbon & Nitrogen cycling in ocean, Photosynthesis and Primary productivity. Eutrophication of coastal areas. Microbial loop in ocean food web. Microbial processes and climate change. Bio – fouling & bio – deterioration, indicator organisms and pollution control. Symbiosis of microalgae with animals: Chemo<sup>19</sup>autotrophic prokaryotes with animals. Symbionts

of sponges, mixotrophy in protists. Metabolic consortia and mutualism between prokaryotes.

#### **Unit 4: Marine Microbes**

Bacterial and viral disease of fresh water, seawater, aqua culture: fish, bivalve mollusks, Crustaceans, corals. Diagnosis methods. Control of diseases. Biodegradation and Bioremediation of marine pollutants (oil, Organic comp. etc.).

#### **Unit 5: Recent trends in Marine Microbiology**

Recently identified microorganisms of marine ecosystem, there applications in present and future industries.

#### **References:**

## Soil and Water Analysis of Microbes

**Course Code: CMBE-304a**

**Credit Units: 03**

**Pre-requisite:** Basic understanding of microbiology, environmental science, and ecology.

### Course Outcome:

After completion of this course, students will be able to:

1. Understand the microbial communities in soil and water ecosystems.
2. Learn the methods for isolation, identification, and quantification of soil and water microorganisms.
3. Explore the impact of soil and water microbes on environmental health and pollution control.
4. Develop skills in laboratory techniques for microbial analysis of environmental samples.
5. Gain practical experience in interpreting microbial data and its significance in environmental microbiology.

### Details of the Course:

S. No.	Contents	Contact Hours
1	<b>Introduction to Soil and Water Microbiology:</b> Overview of microbial communities in soil and water, their ecological roles.	6
2	<b>Soil Microbes and Their Role:</b> Types of soil microorganisms (bacteria, fungi, actinomycetes), their functions in nutrient cycling, and soil fertility.	6
3	<b>Water Microbes and Their Role:</b> Types of microorganisms found in water (bacteria, algae, protozoa), and their role in aquatic ecosystems.	6
4	<b>Microbial Contamination of Soil and Water:</b> Pathogens in soil and water, waterborne diseases, and the impact of pollution.	6
5	<b>Techniques for Microbial Analysis in Soil:</b> Soil sampling, serial dilution, spread plate method, most probable number (MPN) method, and isolation of microbes.	6
6	<b>Techniques for Microbial Analysis in Water:</b> Water sampling, membrane filtration, MPN technique, and enumeration of coliforms.	6
7	<b>Biological Indicators of Soil and Water Quality:</b> Use of microbial indicators for assessing the health of soil and water ecosystems.	6
8	<b>Environmental Impact of Soil and Water Microbes:</b> Role of microbes in bioremediation, biodegradation, and nutrient cycling in polluted ecosystems.	6
9	<b>Microbial Ecology of Water Bodies:</b> Characterization of microbial communities in freshwater, marine, and wastewater environments.	6
10	<b>Microbial Water Treatment:</b> Biological methods for treating contaminated water and wastewater, such as activated sludge, biofilms, and bioreactors.	6

## Paleontology

**Course Code:** CMBE-304b

**Credit Units:** 03

**Pre-requisite:** Basic knowledge of biology, geology, and evolutionary concepts.

### Course Outcome:

After completion of this course, students will be able to:

1. Understand the principles of paleontology and its importance in studying the history of life.
2. Learn about fossil types, fossilization processes, and fossil record.
3. Develop skills in identifying and classifying fossils.
4. Understand the concept of evolution through the study of ancient organisms.
5. Apply paleontological methods to interpret past climates, ecosystems, and evolutionary patterns.

### Details of the Course:

S. No.	Contents	Contact Hours
1	<b>Introduction to Paleontology:</b> Definition, scope, importance of paleontology in understanding the history of life.	6
2	<b>Fossils and Fossilization:</b> Types of fossils (body fossils, trace fossils), fossilization processes (mineralization, impressions).	6
3	<b>The Fossil Record:</b> Stratigraphy, methods of dating fossils (relative dating, radiometric dating), principles of fossil distribution.	6
4	<b>Classification of Fossils:</b> Major groups of fossils (plants, animals, microorganisms), taxonomic classification of fossil organisms.	6
5	<b>Microfossils:</b> Study of microfossils (foraminifera, diatoms, pollen grains), their significance in paleoclimatology and paleoecology.	6
6	<b>Paleobiology and Evolution:</b> Evolutionary trends in fossil records, studying extinct organisms, theories of extinction.	6
7	<b>Paleoecology:</b> Reconstructing past environments using fossil evidence, interpreting ancient ecosystems, climate change through time.	6
8	<b>Paleontological Methods:</b> Fieldwork methods (excavation, collection), laboratory techniques (preparation, identification, analysis of fossils).	6
9	<b>Fossils and the Geologic Time Scale:</b> Understanding the geologic time scale, major periods of earth history, and significant fossil discoveries.	6
10	<b>Applications of Paleontology:</b> Paleontology in resource exploration (oil, coal), paleontology in understanding evolution and conservation.	6

3. **The Fossil Book: A Record of Prehistoric Life** – Gregory S. Paul, Sterling Publishing, 2008.

## Examination Scheme:

<b>Components</b>	<b>Attendance</b>	<b>Assignments</b>	<b>Midterm Exam</b>	<b>Final Exam</b>
<b>Weightage (%)</b>	10%	20%	30%	40%

## MICROBIAL TECHNOLOGY

**Course Code: CMBE-602**

**Credit Unit: 04**

### Course Outcomes

1. **Microbial Applications:** Understand the role of microorganisms in the production of bioproducts, including antibiotics, enzymes, and biofuels.
2. **Genetic Engineering:** Apply genetic modification techniques to enhance microbial production capabilities.
3. **Fermentation Technology:** Learn fermentation processes for large-scale microbial production in industrial biotechnology.
4. **Bioremediation:** Analyze the use of microbes in the cleanup of environmental pollutants and waste management.
5. **Microbial Processes:** Explore the role of microorganisms in food, pharmaceutical, and agricultural biotechnology.

### Course Outcomes

#### Unit 1: Microbial Biotechnology and its Applications

Microbial biotechnology: Scope and its applications in human therapeutics, agriculture (Biofertilizers, PGPR, and Mycorrhizae), environmental, and food technology, Use of prokaryotic and eukaryotic microorganisms in biotechnological applications, genetically engineered microbes for industrial application: Bacteria and yeast.

#### Unit 2: Therapeutic and Industrial Biotechnology

Recombinant microbial production processes in pharmaceutical industries - Streptokinase, Recombinant vaccines (Hepatitis B vaccine), Microbial polysaccharides and polyesters, Microbial production of bio-pesticides, bioplastics, Microbial biosensors.

#### Unit 3: Applications of Microbes in Biotransformation

Microbial based transformation of steroids and sterols, Bio-catalytic processes and their industrial applications: Production of high fructose syrup and production of cocoa butter substitute.

#### Unit 4 Microbial Products and their Recovery

Microbial product purification: filtration, ion exchange & affinity chromatography techniques,

Immobilization methods and their application: Whole cell immobilization.

### **Unit 5 Microbes for Bio-energy and Environment**

Bio-ethanol and bio-diesel production: commercial production from lignocellulosic waste and algal biomass, Biogas production: Methane and hydrogen production using microbial culture.

Microorganisms in bioremediation: Degradation of xenobiotics, mineral recovery, removal of heavy metals from aqueous effluents.

	Attendance	Class Test	Assignment/ Project/Seminar/Quiz	
Weightage (%)	10	20	10	60

## Bioanalytical Tools

**Course Code:** CMBE-602a

**Credit Units:** 04

**Pre-requisite:** Basic knowledge of biochemistry, molecular biology, and microbiology.

### Course Outcome:

After completion of this course, students will be able to:

1. Understand the principles and applications of various bioanalytical techniques in biological research.
2. Learn about the different tools used for the analysis and characterization of biomolecules (proteins, nucleic acids, lipids, etc.).
3. Develop practical skills in using bioanalytical instruments for experimental analysis.
4. Apply bioanalytical methods for quality control, diagnostics, and research in biotechnology and medicine.
5. Analyze experimental data and interpret results obtained from bioanalytical techniques.

### Details of the Course:

S. No.	Contents	Contact Hours
1	<b>Introduction to Bioanalytical Tools:</b> Overview of bioanalytical techniques, their importance in biological research.	4
2	<b>Spectrophotometry:</b> Principles of UV-Vis spectroscopy, applications in protein and nucleic acid quantification.	6
3	<b>Chromatography Techniques:</b> Basics of chromatography (paper, thin layer, gas, liquid chromatography), principles, applications, and types.	8
4	<b>Electrophoresis:</b> Gel electrophoresis (agarose, polyacrylamide), protein and nucleic acid separation, Western blotting, and applications.	8
5	<b>Mass Spectrometry:</b> Principles of mass spectrometry, types (MALDI, ESI), applications in proteomics and genomics.	6
6	<b>Fluorescence Spectroscopy:</b> Theory and applications of fluorescence, fluorophores, and their use in molecular biology.	6
7	<b>Nuclear Magnetic Resonance (NMR):</b> Principles of NMR spectroscopy, application in structure elucidation of biomolecules.	6
8	<b>Enzyme-Linked Immunosorbent Assay (ELISA):</b> Principles of ELISA, types (sandwich, competitive), applications in diagnostics and research.	6
9	<b>PCR and RT-PCR:</b> Polymerase chain reaction (PCR) principles, applications in gene amplification and diagnostics, RT-PCR for RNA analysis.	6
10	<b>Bioinformatics and Data Analysis:</b> Analysis and interpretation of data from bioanalytical techniques using software tools.	6

## Entrepreneurship Development

**Course Code:** GMBE-602

**Credit Units:** 03

**Pre-requisite:** Basic knowledge of business management, economics, and marketing.

### Course Outcome:

After completion of this course, students will be able to:

1. Understand the key principles and practices of entrepreneurship and innovation.
2. Learn the process of identifying, developing, and launching new business ventures.
3. Develop skills for business planning, financial management, and marketing for start-ups.
4. Understand the challenges faced by entrepreneurs and the strategies for overcoming them.
5. Gain knowledge of government schemes, funding options, and support systems for entrepreneurs.

### Details of the Course:

S. No.	Contents	Contact Hours
1	<b>Introduction to Entrepreneurship:</b> Definition, types of entrepreneurs, qualities of an entrepreneur, role of entrepreneurship in economic development.	6
2	<b>Idea Generation and Opportunity Recognition:</b> Techniques for generating business ideas, evaluating market opportunities, identifying customer needs.	6
3	<b>Business Planning and Feasibility Study:</b> Importance of a business plan, components of a business plan, conducting a feasibility study, SWOT analysis.	8
4	<b>Sources of Capital and Financial Management:</b> Identifying funding sources (bank loans, venture capital, angel investors), budgeting, financial projections, managing cash flow.	6
5	<b>Marketing and Sales Strategies:</b> Marketing strategies for new ventures, product pricing, promotion, and distribution, customer relationship management.	8
6	<b>Legal Framework for Entrepreneurship:</b> Business structures (sole proprietorship, partnerships, corporations), intellectual property, licenses, and regulations.	6
7	<b>Entrepreneurial Ecosystem and Government Support:</b> Government policies, schemes, and incentives for entrepreneurship, support from incubators, accelerators, and industry networks.	6
8	<b>Business Growth and Scaling:</b> Strategies for scaling a business, managing growth, risk management, building a brand.	6
9	<b>Challenges Faced by Entrepreneurs:</b> Common pitfalls and obstacles (financial, operational, market competition), risk-taking, decision-making, and coping strategies.	6
10	<b>Case Studies and Success Stories:</b> Analysis of successful entrepreneurs, their challenges and strategies for overcoming them, real-world examples from various industries.	6

## Microbiological Quality Control in Food and Pharmaceutical Industries

**Course Code:** DMBE-304

**Credit Units:** 03

**Pre-requisite:** Basic knowledge of microbiology, food science, and pharmaceutical practices.

### Course Outcome:

After completion of this course, students will be able to:

1. Understand the principles of microbiological quality control in the food and pharmaceutical industries.
2. Learn about the role of microbiological testing in ensuring product safety and quality.
3. Gain knowledge of the methods for detecting, identifying, and quantifying microorganisms in food and pharmaceutical products.
4. Apply microbiological techniques for contamination control, shelf-life studies, and validation of hygiene practices.
5. Understand regulatory standards and guidelines for microbiological quality control in these industries.

### Details of the Course:

S. No.	Contents	Contact Hours
1	<b>Introduction to Microbiological Quality Control:</b> Definition, importance in food and pharmaceutical industries, regulatory standards.	6
2	<b>Microbial Contamination in Food and Pharmaceuticals:</b> Types of microorganisms in food and drugs (bacteria, yeasts, molds, viruses), sources of contamination.	6
3	<b>Microbiological Testing Methods:</b> Culture-based methods (agar plating, enrichment cultures), rapid diagnostic methods (PCR, ELISA, biosensors).	8
4	<b>Quality Control Techniques:</b> Sterility testing, microbiological limit tests, endotoxin testing, total viable count, and specific pathogen testing.	8
5	<b>Food Microbiology:</b> Role of microbiological control in food safety, spoilage microorganisms, pathogenic organisms in food, HACCP (Hazard Analysis and Critical Control Points).	6
6	<b>Pharmaceutical Microbiology:</b> Role of microbiological quality control in ensuring the safety and efficacy of drugs, validation of sterility, and antimicrobial efficacy.	6
7	<b>Environmental Monitoring and Control:</b> Cleanroom microbiology, monitoring air, surfaces, and equipment in manufacturing areas.	6
8	<b>Microbiological Validation and Documentation:</b> Procedures for validating microbiological tests, regulatory documentation, and compliance with GMP (Good Manufacturing Practices).	6
9	<b>Shelf-Life Studies and Stability Testing:</b> Techniques for evaluating microbial stability, shelf-life of products, packaging, and storage conditions.	6
10	<b>Emerging Trends in Microbiological Quality Control:</b> Advances in rapid detection technologies, automation, and microbiological safety in emerging food products and pharmaceuticals.	6

## Microbiological Analysis of Air and Water

**Course Code:** DMBE-302

**Credit Units:** 03

**Pre-requisite:** Basic knowledge of microbiology, environmental science, and analytical techniques.

### Course Outcome:

After completion of this course, students will be able to:

1. Understand the importance of microbiological analysis of air and water in environmental monitoring and public health.
2. Learn the techniques for the isolation, identification, and quantification of microorganisms from air and water samples.
3. Apply principles of microbial water quality testing and air sampling to real-world scenarios.
4. Interpret microbial contamination levels and their implications on health and safety standards.
5. Understand the regulatory standards for microbial levels in water and air and their role in environmental protection.

### Details of the Course:

S. No.	Contents	Contact Hours
1	<b>Introduction to Microbiological Analysis:</b> Importance of microbiological analysis in environmental monitoring, microbial contamination in water and air, overview of standard methods.	6
2	<b>Airborne Microorganisms:</b> Types of microorganisms found in the air, sampling methods (settle plates, impactors, impingers), factors affecting airborne microbial distribution.	6
3	<b>Microbiological Sampling Techniques for Air:</b> Techniques for air sampling, analysis of air samples, use of impingers and air samplers.	6
4	<b>Waterborne Microorganisms:</b> Types of microorganisms found in water (bacteria, viruses, protozoa), sources of contamination, and public health risks.	6
5	<b>Sampling and Preservation of Water Samples:</b> Techniques for sampling water from different sources (groundwater, surface water, treated water), preservation of samples during transport.	6
6	<b>Microbiological Methods for Water Analysis:</b> Standard methods for microbial analysis (coliform testing, heterotrophic plate count, membrane filtration), detection of pathogenic microorganisms.	6
7	<b>Quantification of Microorganisms in Water:</b> Methods to estimate microbial load (most probable number, direct plate count), interpreting results.	6
8	<b>Regulatory Standards for Air and Water Quality:</b> WHO, EPA, and other regulatory guidelines for acceptable levels of microbial contaminants in water and air.	6
9	<b>Impact of Microbial Contamination on Human Health:</b> Waterborne diseases, air pollution, and associated health risks, case studies.	6
10	<b>Emerging Technologies in Microbial Monitoring:</b> Advances in rapid detection methods (PCR, biosensors, real-time monitoring systems), environmental health implications.	6

## MAJOR PROJECT

**Course Code: CMBE-310**

**Credit Units: 6**

### **Course Contents:**

- Forty five days of Sixth Semester of the B.Sc. Curriculum is devoted to major project/field work.
- Students, with the help of their mentor and faculty colleagues will identify a lab in India & abroad for the research work.
- The student should stay for a minimum prescribed Semester period at the place of work.
- Students not staying for the prescribed period will be marked absent as per the University Rules.
- At the end of their project the students shall submit the dissertation as per the Guidelines prescribed below.

### **The Aims of the Project**

The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity, having an educational value at a level commensurate with the award a B.Sc. Degree.

### **Objectives**

- To provide the students an opportunity to demonstrate the ability to devise, select and use a range of methodologies appropriate to the chosen topic of research.
- To allow students to show the application of skills of data collection, critical analysis and concept synthesis necessary for formation of defensible conclusions and/or recommendations.
- To allow students the opportunity to demonstrate ability to draw appropriate conclusions argued from the evidence presented. [Should the research produce negative or inconclusive results, the conclusions should be critically examined to ascertain the reasons].
- To provide a forum to demonstrate the skills of structuring and present a balanced informed, complete, clear and concise written argument.

### **Dissertation Guidelines The Dissertation Topic**

It is important to distinguish here between ‘dissertation topic’ and ‘dissertation title’. The topic is the specific area that you wish to investigate. The title may not be decided until the dissertation

has been written so as to reflect its content properly.

Few restrictions are placed on the choice of the topic. Normally the topic is expected to be:

- Relevant to Biotechnology;
- related to one or more of the subjects or areas of study within the core program and specialisation stream;
- clearly focused so as to facilitate an in-depth approach, subject to the availability of adequate sources of information and to the knowledge of students;
- Value and interest to the students and their personal and professional development.

### **Dissertation format**

All students must follow the following rules in submitting their dissertation.

- Front page should provide title, name of the student, name of degree and the date of submission.
- Second page should contain the certificate received from the organization/University from where the student has completed his/her project work.
- The next page should be the table of contents giving page references for each chapter and section.
- The next page should be the table of graphs, figures and tables giving legends and page numbers.
- Next to follow should be following in the sequence given below:
  - Abbreviations used (if any)
  - Introduction
  - State-of-Art
  - Material & Methods
  - Results
  - Discussion
  - Summary (approximately 500 words)
  - Conclusion
  - Future Prospects
- References: After this concluding chapter, students should give a list of all the references they have used. These should be cross - references with the text. For articles from journals, the following details are required e.g.

Schlöter M, Assmus B and Hartmann A (1995) the use of immunological methods to detect and identify bacteria in the environment. *Biotech Adv* 13: 75-90

For books, the following details are required

Bahera BK and Varma A (2003) *Green Energy from Waste Biomass*, Capital Book Company, New Delhi, India

For book chapter

Mukherji KG, Mandeep and Varma A (1998) Mycorrhizosphere microorganisms: screening and evaluation. (Ed) Varma A. In: *Mycorrhiza Manual*. Springer-Verlag, Germany, pp 85-97

- Finally, you should give any appendices. These should only include relevant statistical data or material that cannot be fitted into the above categories.
- List of Publications (if any) by the students should be attached in the end.

**Guidelines for the assessment of the dissertation**

While evaluating the dissertation, faculty guide will consider the following aspects:

1. Has the student made a clear statement of the objective or objective(s).
2. If there is more than one objective, do these constitute parts of a whole?
3. Has the student developed an appropriate analytical framework for addressing the problem at hand.
4. Is this based on up-to-date developments in the topic area?
5. Has the student collected information / data suitable to the frameworks?
6. Are the materials & methods employed by the student to analyse the data / information appropriate and relevant?
7. Has the student succeeded in drawing conclusion form the analysis?
8. Do the conclusions relate well to the objectives of the project?

**Examination Scheme:**

<b>Components</b>	<b>Theme of Project</b>	<b>Quality of Project</b>
<b>Weightage (%)</b>	<b>30</b>	<b>70</b>

## ENTREPRENEURSHIP DEVELOPMENT

**Course Code: GMBE-602**

**Credit Units: 04**

### UNIT I INTRODUCTION

Meaning, Needs and Importance of Entrepreneurship, Promotion of entrepreneurship, Factors influencing entrepreneurship, Features of a successful Entrepreneurship.

### UNIT II ESTABLISHING AN ENTERPRISE)

Forms of Business Organization, Project Identification, Selection of the product, Project formulation, Assessment of project feasibility.

### UNIT III FINANCING THE ENTERPRISE

Importance of finance / loans and repayments, Characteristics of Business finance, Fixed capital management: Sources of fixed capital, working capital its sources and how to move for loans, Inventory direct and indirect raw materials and its management.

### UNIT IV MARKETING MANAGEMENT

Meaning and Importance, Marketing-mix, product management – Product line, Product mix, stages of product like cycle, marketing Research and Importance of survey, Physical Distribution and Stock Management.

### UNIT V ENTREPRENEURSHIP AND INTERNATIONAL BUSINESS

Meaning of International business, Selection of a product, Selection of a market for international business, Export financing, Institutional support for exports.

Weightage (%)	10	20	21      10	60

## **MICROBIAL QUALITY CONTROL IN FOOD AND PHARMACEUTICAL INDUSTRIES**

**Course Code: DMBE-304**

**Credit Unit: 04**

### **Unit 1: Microbiological Laboratory and Safe Practices**

Good laboratory practices - Good laboratory practices, Good microbiological practices, Biosafety cabinets – Working of biosafety cabinets, using protective clothing, specification for BSL- 1, BSL-2, BSL-3. Discarding biohazardous waste – Methodology of Disinfection, Autoclaving & Incineration.

### **Unit 2: Determining Microbes in Food / Pharmaceutical Samples**

Culture and microscopic methods - Standard plate count, Most probable numbers, Direct microscopic counts, Biochemical and immunological methods: Limulus lysate test for endotoxin, gel diffusion, sterility testing for pharmaceutical products, Molecular methods - Nucleic acid probes, PCR based detection, biosensors.

### **Unit 3: Pathogenic Microorganisms of Importance in Food & Water**

Enrichment culture technique, Detection of specific microorganisms - on XLD agar, Salmonella, Shigella Agar, Manitol salt agar, EMB agar, McConkey Agar, Saboraud Agar, Ascertaining microbial quality of milk by MBRT, Rapid detection methods of microbiological quality of milk at milk collection centres (COB, 10 min Resazurin assay).

### **Unit 4: HACCP for Food Safety and Microbial Standards**

Hazard analysis of critical control point (HACCP) - Principles, flow diagrams, limitations, Microbial Standards for Different Foods and Water – BIS standards for common foods and drinking water.

	Attendance	Class Test	Assignment/ Project/Seminar/Quiz	
Weightage (%)	10	20	10	60

## MICROBIOLOGICAL ANALYSIS OF AIR AND WATER

**Course Code: DMBE-302**

**Credit Unit: 04**

### **Course Outcomes**

1. **Microbial Applications:** Understand the role of microorganisms in the production of bioproducts, including antibiotics, enzymes, and biofuels.
2. **Genetic Engineering:** Apply genetic modification techniques to enhance microbial production capabilities.
3. **Fermentation Technology:** Learn fermentation processes for large-scale microbial production in industrial biotechnology.
4. **Bioremediation:** Analyze the use of microbes in the cleanup of environmental pollutants and waste management.
5. **Microbial Processes:** Explore the role of microorganisms in food, pharmaceutical, and agricultural biotechnology.

### **Unit 1: Aeromicrobiology**

Bioaerosols, Air borne microorganisms (bacteria, Viruses, fungi) and their impact on human health and environment, significance in food and pharma industries and operation theatres,allergens.

### **Unit 2: Air Sample Collection and Analysis**

Bioaerosol sampling, air samplers, methods of analysis, CFU, culture media for bacteria and fungi, Identification characteristics.

### **Unit 3: Control Measures**

Fate of bioaerosols, inactivation mechanisms – UV light, HEPA filters, desiccation, Incineration.

### **Unit 4: Water Microbiology**

Water borne pathogens, water borne diseases.

### **Unit 5 Microbiological Analysis of Water**

Sample Collection, Treatment and safety of drinking (potable) water, methods to detect potability of water samples: (a) standard qualitative procedure: presumptive/MPN tests confirmed and completed tests for faecal coliforms (b) Membrane filter technique and (c) Presence/absence tests.

Weightage (%)	10	20	10	60

## ANIMAL BIOTECHNOLOGY

**Course Code: SMBE-604**

**Credit Units: 04**

### Course outcomes

1. **Genetic Manipulation:** Understand techniques for genetic modification and cloning of animals for research and production.
2. **Animal Cell Culture:** Learn the principles of animal cell culture techniques for research and bioproduct development.
3. **Reproductive Biotechnology:** Explore reproductive technologies such as artificial insemination, embryo transfer, and gene editing in animals.
4. **Transgenic Animals:** Analyze the creation and applications of transgenic animals in medicine and agriculture.
5. **Ethical and Regulatory Issues:** Understand the ethical, legal, and regulatory considerations in animal biotechnology research and applications.

### UNIT I

Gene transfer methods in Animals – Microinjection, Embryonic Stem cell, gene transfer, Retrovirus & Gene transfer.

### UNIT II

Introduction to transgenesis. Transgenic Animals – Mice, Cow, Pig, Sheep, Goat, Bird, Insect. Animal diseases need help of Biotechnology – Foot-and mouth disease, Coccidiosis, Trypanosomiasis, Theileriosis.

### UNIT III

Animal propagation – Artificial insemination, Animal Clones. Conservation Biology – Embryo transfer techniques. Introduction to Stem Cell Technology and its applications.

### UNIT IV

Genetic modification in Medicine - gene therapy, types of gene therapy, vectors in genetherapy,molecular engineering, human genetic engineering, problems & ethics.

<b>Weightage (%)</b>	10	20	10	60

# **School of Agriculture and Environmental Sciences**

## **Shobhit University, Gangoh**

**(Established by UP Shobhit University Act No. 3, 2012)**

### **School of Agriculture And Environmental Sciences**

#### **Ordinances, Regulations & Syllabus**

**For**

**Bachelor of Science in Agriculture  
(B.Sc.Ag.) Four Year Programme Semester Pattern  
(w.e.f. session 2013-14)**

**Revised and approved in the year 2019 (13<sup>th</sup> Meeting of the  
Board of Studies )**

## Examination and Evaluation System

- Fifth Deans' Committee deliberated on the examination and evaluation system being followed by different universities. The Committee recommends Uniform Grading system to be followed with uniform OGPA requirements for award of degrees at all levels and uniform conversion formulae to be followed for declaration of I, II and III divisions, distinctions etc. Declaration of division in the degree certificate to be made compulsory by all universities:

### Examination

- External theory (50%)
- Internal Theory + Practical (50%)
- Courses with Theory and Practical: Mid-term Exam (30%) + Assignment (5%) in practical oriented courses + Practical (15%)
- Courses with only Theory: Mid-term Exam (40%) + Assignment (10%)
- Courses with only Practical: (100%) Internal
- Paper to be set by external: HOD shall ensure the coverage of syllabus. If needed moderation can be done.
- Evaluation to be done internally by the faculty other than the Course Instructor. Syllabus of the concerned course shall be sent to the external examiner, who shall prepare the question papers. For practical, it is recommended that examinations shall be conducted by course instructor(s) and one teacher nominated by HOD.

### Evaluation

Degree	Percentage of Marks Obtained	Conversion into Points
All	100	10 Points
	90 to <100	9 to <10
	80 to <90	8 to <9
	70 to <80	7 to <8
	60 to <70	6 to <7
	50 to <60	5 to <6
	<50 (Fail)	<5
	Eg. 80.76	8.076
	43.60	4.360
	72.50 (but shortage in attendance)	Fail (1 point)

OGPA	Division
5.000 – 5.999	Pass
6.000 – 6.999	II division
7.000 – 7.999	I division
8.000 and above	I division with distinction

- $GPA = \frac{\text{Total points scored}}{\text{Total credits (for 1 semester)}}$
- $CGPA = \frac{\sum \text{Total points scored}}{\text{Course credits}}$
- $OGPA = \frac{\sum \text{Total points scored (after excluding failure points)}}{\text{Course credits}}$
- $\% \text{ of Marks} = OGPA \times 100/10$

## Elective Courses

- A student can select three elective courses out of the following and offer during 4<sup>th</sup> (BAG-220), 5<sup>th</sup> (BAG-319) and 6<sup>th</sup> (BAG-321) semesters.

<b>S. No.</b>	<b>Courses</b>	<b>Credit Hours</b>
1.	Agribusiness Management	3(2+1)
2.	Agrochemicals	3(2+1)
3.	Commercial Plant Breeding	3(1+2)
4.	Landscaping	3(2+1)
5.	Food Safety and Standards	3(2+1)
6.	Biopesticides & Biofertilizers	3(2+1)
7.	Protected Cultivation	3(2+1)
8.	Micropropagation Technologies	3(1+2)
9.	Hi-tech Horticulture	3(2+1)
10.	Weed Management	3(2+1)
11.	System Simulation and Agro-advisory	3(2+1)
12.	Agricultural Journalism	3(2+1)

## **Programme Educational Objectives (PEOs)**

**PEO1 Foundational Knowledge:** Graduates will possess a strong understanding of agricultural sciences, including plant and animal biology, soil science, and agricultural economics, enabling them to address challenges in the agricultural sector.

**PEO2 Practical Skills:** Graduates will develop practical skills in modern agricultural practices, including crop production, pest management, and sustainable farming techniques, allowing them to effectively contribute to agricultural productivity.

**PEO3 Research and Innovation:** Graduates will be equipped to engage in research and innovation, utilizing scientific methods to solve agricultural problems and contribute to advancements in the field.

**PEO 4 Sustainability and Environmental Stewardship:** Graduates will understand the principles of sustainable agriculture and environmental conservation, promoting practices that ensure food security while preserving natural resources.

**PEO 5 Communication and Leadership:** Graduates will possess effective communication and leadership skills, enabling them to work collaboratively in diverse teams and to advocate for agricultural development and policy changes.

**PEO6 Lifelong Learning:** Graduates will be prepared for lifelong learning and professional development, adapting to emerging trends and technologies in agriculture to remain relevant in their careers.

## **Programme Specific Objectives (PSO's)**

**PSO 1** To impart a strong foundation in agricultural science, including plant biology, soil science, and animal husbandry.

**PSO2** To develop practical skills through hands-on training in farming techniques, crop management, and animal care.

**PSO 3** To encourage students to engage in research and innovation to address contemporary agricultural challenges, such as food security and sustainable farming.

**PSO 4** To promote sustainable agricultural practices that protect the environment and enhance productivity.

**PSO5** To familiarize students with the latest agricultural technologies, including precision farming, biotechnology, and data analytics.

**PSO6** To provide insights into agricultural economics, marketing, and policy, enabling students to make informed decisions in the agricultural sector.

**PSO7** To develop critical thinking and problem-solving skills necessary for effective decision-making in agriculture.

## Programme Outcome Objectives (POO's)

**POO1 Knowledge Application:** Demonstrate a comprehensive understanding of agricultural sciences, including plant and animal biology, soil science, and agricultural engineering.

**POO 2 Research Skills:** Conduct research using scientific methods, including data collection, analysis, and interpretation, to solve agricultural problems.

**POO3 Sustainable Practices:** Promote sustainable agricultural practices that enhance productivity while preserving environmental health and biodiversity.

**POO4 Technical Proficiency:** Utilize modern agricultural technologies and tools for efficient farming practices, including precision agriculture and biotechnology.

**POO5 Critical Thinking:** Analyze and evaluate agricultural policies, practices, and issues critically, fostering informed decision-making.

**POO 6 Communication Skills:** Communicate effectively, both verbally and in writing, to diverse audiences, including farmers, policymakers, and the general public.

**POO7 Teamwork and Leadership:** Work collaboratively in teams, demonstrating leadership skills in agricultural projects and initiatives.

**POO8 Economic Understanding:** Understand the economic principles related to agricultural production, marketing, and management.

**POO 9 Ethics and Responsibility:** Uphold ethical standards in agricultural practices, considering social responsibilities and the impact on communities.

**POO 10 Lifelong Learning:** Foster a commitment to continuous learning and professional development in the agricultural sector.

## Course Structure

## Ordinance and Regulations

## **BAG-101: Fundamentals of Horticulture**

### **CO: COURSE OBJECTIVE**

**CO-1 Understanding Horticulture Basics:** Define horticulture and its importance in agriculture and daily life. Differentiate between horticulture and other branches of plant science.

**CO-2 Introduction to Horticultural Crops:** Familiarize with various horticultural crops, including fruits, vegetables, flowers, and ornamental plants. Learn the classification of horticultural plants based on their growth habits, lifecycle, and economic importance.

**CO-3 Environmental Factors and Plant Growth:** Understand the influence of light, temperature, water, soil, and nutrients on the growth and development of horticultural crops. Study the effects of biotic and abiotic stresses on horticultural plants.

**CO-4 Horticultural Practices:** Learn the basic principles of plant propagation, including sexual and asexual methods. Understand the basics of nursery management, pruning, training, and crop management

**CO-5 Soil and Water Management:** Explore soil preparation techniques for horticultural crops. Study the importance of irrigation, drainage, and water conservation techniques.

**CO-6 Plant Nutrition and Health:** Learn about fertilizers, manures, and their application in horticulture. Understand integrated pest and disease management practices.

**CO-7 Economic and Aesthetic Value of Horticulture:** Recognize the role of horticulture in improving economic well-being and environmental sustainability. Study the use of ornamental plants in landscaping, floriculture, and urban gardening.

**CO-8 Sustainability and Modern Techniques:** Introduce sustainable horticultural practices such as organic farming and precision horticulture. Familiarize with advancements in biotechnology, tissue culture, and protected cultivation (e.g., greenhouses, playhouses).

## **COURSE CONTENTS**

### **Unit- I:**

- Horticulture- Its definition and branches, importance and scope; horticultural and botanical classification; climate and soil for horticultural crops

### **Unit- II:**

- Plant propagation- methods and propagating structures; Seed dormancy, Seed germination, principles of orchard establishment;

### **Unit- III:**

- Principles and methods of training and pruning, juvenility and flower bud differentiation; unfruitfulness; pollination, pollinizers and pollinators; fertilization and parthenocarpy; medicinal and aromatic plants;

### **Unit- IV:**

- Importance of plant bio-regulators in horticulture. Irrigation- methods, Fertilizer application in horticultural crops.

### **Practical:**

Identification of garden tools. Identification of horticultural crops. Preparation of seed bed/nursery bed. Practice of sexual and asexual methods of propagation including micro-propagation. Layout and planting of orchard. Training and pruning of fruit trees. Preparation of potting mixture. Fertilizer application in different crops. Visits to commercial nurseries/orchard.

## **BAG-103: Fundamentals of Plant Biochemistry and Biotechnology**

### **CO: COURSE OBJECTIVE**

**CO-1 Understand Plant Biochemical Processes:** Develop a foundational understanding of the biochemical processes and pathways that drive plant growth, development, and metabolism.

**CO-2 Explore Plant Metabolism:** Analyze the roles of primary and secondary metabolites in plants, including their synthesis, regulation, and functional significance.

**CO-3 Study Enzymatic Mechanisms:** Learn the principles of enzymatic reactions and their applications in regulating plant physiological and biochemical processes.

**CO-4 Integrate Biochemistry and Biotechnology:** Explore the intersection of plant biochemistry with modern biotechnological tools for crop improvement, disease resistance, and sustainable agriculture.

**CO-5 Apply Molecular Biology Tools:** Gain proficiency in molecular techniques such as gene cloning, CRISPR, and recombinant DNA technology for studying and manipulating plant systems.

**CO-6 Evaluate Plant Stress Responses:** Understand biochemical mechanisms plants use to respond and adapt to biotic and abiotic stresses, and how these can be managed through biotechnology.

**CO-7 Promote Sustainable Practices:** Apply biotechnological advances to improve agricultural productivity, reduce environmental impact, and address global challenges like food security and climate change.

## COURSE CONTENTS

### Unit- I:

Importance of Biochemistry. Properties of Water, pH and Buffer. Carbohydrate: Importance and classification. Structures of Monosaccharides, Reducing and oxidizing properties of Monosaccharides, Mutarotation; Structure of Disaccharides and Polysaccharides. Lipid: Importance and classification; Structures and properties of fatty acids; storage lipids and membrane lipids.

### Unit- II:

Proteins: Importance of proteins and classification; Structures, titration and zwitterion nature of amino acids; Structural organization of proteins. Enzymes: General properties; Classification; Mechanism of action; Michaelis & Menten and Line Weaver Burk equation & plots; Introduction to allosteric enzymes. Nucleic acids: Importance and classification; Structure of Nucleotides, A, B & Z DNA; RNA: Types and Secondary & Tertiary structure.

### Unit- III:

Metabolism of carbohydrates: Glycolysis, TCA cycle, Glyoxylate cycle, Electron transport chain. Metabolism of lipids: Beta oxidation, Biosynthesis of fatty acids.

### Unit- IV:

Concepts and applications of plant biotechnology: Scope, organ culture, embryo culture, cell suspension culture, callus culture, anther culture, pollen culture and ovule culture and their applications; Micro-propagation methods; organogenesis and embryogenesis, Synthetic seeds and their significance; Embryo rescue and its significance; somatic hybridization and cybrids; Somaclonal variation and its use in crop improvement; cryo-preservation,

### Unit- V:

Introduction to recombinant DNA methods: physical (Gene gun method), chemical (PEG mediated) and Agrobacterium mediated gene transfer methods; Transgenics and its importance in crop improvement; PCR techniques and its applications; RFLP, RAPD, SSR; Marker Assisted Breeding in crop improvement; Biotechnology regulations.

### Practical:

Preparation of solution, pH & buffers, Qualitative tests of carbohydrates and amino acids. Quantitative estimation of glucose/ proteins. Titration methods for estimation of amino acids/lipids, Effect of pH, temperature and substrate concentration on enzyme action, Paper chromatography/TLC demonstration for separation of amino acids/Monosaccharides. Sterilization techniques. Composition of various tissue culture media and preparation of stock solutions for MS nutrient medium. Callus induction from various explants. Micro-propagation, hardening and acclimatization. Demonstration of isolation of DNA. Demonstration of gel electrophoresis techniques and DNA fingerprinting.

## **BAG-105: Fundamentals of Soil Science**

### **CO: COURSE OBJECTIVE**

**CO-1 Understand Soil Formation and Properties:** Develop an understanding of the processes of soil formation, including physical, chemical, and biological factors, and identify key soil properties that influence its classification and use.

**CO-2 Analyze Soil Components:** Examine the composition of soil, including minerals, organic matter, water, and air, and explain their roles in supporting plant growth and maintaining ecological balance.

**CO-3 Explore Soil Classification Systems:** Learn to classify soils based on their physical, chemical, and biological properties using standard classification systems such as Soil Taxonomy or FAO guidelines.

**CO-4 Study Soil-Water Relationships:** Investigate the movement, retention, and availability of water in soils and its impact on plant growth and agricultural productivity.

**CO-5 Understand Soil Nutrients and Fertility:** Analyze the role of essential soil nutrients, nutrient cycles, and soil amendments in maintaining soil fertility for sustainable agricultural practices.

**CO-6 Evaluate Soil Degradation and Conservation:** Identify the causes and consequences of soil degradation, including erosion, salinization, and pollution, and propose soil conservation strategies to enhance sustainability.

**CO-7 Apply Soil Science to Environmental Issues:** Explore the role of soil in addressing global environmental challenges, such as carbon sequestration, waste management, and ecosystem restoration.

## COURSE CONTENTS

### Unit- I:

- Soil as a natural body, Pathological and edaphological concepts of soil; Soil genesis: soil forming rocks and minerals; weathering, processes and factors of soil formation; Soil Profile, components of soil;

### Unit- II:

- Soil physical properties: soil-texture, structure, density and porosity, soil colour, consistence and plasticity; Elementary knowledge of soil taxonomy classification and soils of India; Soil water retention, movement and availability; Soil air, composition, gaseous exchange, problem and plant growth,

### Unit- III:

- Soil temperature; source, amount and flow of heat in soil; effect on plant growth, Soil reaction-pH, soil acidity and alkalinity, buffering, effect of pH on nutrient availability; soil colloids-inorganic and organic; silicate clays: constitution and properties; sources of charge; ion exchange, cation exchange capacity, base saturation; soil organic matter: composition, properties and its influence on soil properties; humic substances - Nature and properties;

### Unit- IV:

- Soil organisms: macro and microorganisms, their beneficial and harmful effects; Soil pollution- behavior of pesticides and inorganic contaminants, prevention and mitigation of soil pollution.

### Practical:

Study of soil profile in field. Study of soil sampling tools, collection of representative soil sample, its processing and storage. Study of soil forming rocks and minerals.

Determination of soil density, moisture content and porosity. Determination of soil texture by feel and Bouyoucos Methods. Studies of capillary rise phenomenon of water in soil column and water movement in soil. Determination of soil pH and electrical conductivity.

Determination of cation exchange capacity of soil. Study of soil map. Determination of soil colour.

Demonstration of heat transfer in soil. Estimation of organic matter content of soil

## **BAG-107: Introduction to Forestry**

### **CO: COURSE OBJECTIVE**

**CO-1 Understand the Basics of Forestry:** Explain the definition, history, and importance of forestry in ecological and economic contexts.\

**CO-2 Explore Forest Ecosystems:** Identify the components of forest ecosystems, including flora, fauna, soil, and climate interactions.

**CO-3 Comprehend Forest Management Practices:** Analyze sustainable forest management principles and practices, including conservation, afforestation, and silviculture techniques.

**CO-4 Evaluate Forest Resources and Their Uses:** Discuss the economic, recreational, and environmental significance of forest products and services.

**CO-5 Analyze the Role of Forestry in Climate Change Mitigation:** Examine how forests contribute to carbon sequestration, biodiversity conservation, and climate resilience.

**CO-6 Understand Forestry Policies and Regulations:** Assess national and international forestry policies, laws, and their impact on conservation and forest management.

**CO-7 Develop Skills in Forest Assessment and Monitoring:** Practice using tools and techniques for forest inventory, mapping, and monitoring forest health.

**CO-8 Explore Career Opportunities in Forestry:** Discuss various career paths in forestry, ranging from field-based roles to research, policy-making, and environmental advocacy

## **COURSE CONTENTS**

### **Unit- I:**

- Introduction – definitions of basic terms related to forestry, objectives of silviculture, forest classification, salient features of Indian Forest Policies. Forest regeneration, Natural regeneration - natural regeneration from seed and vegetative parts, coppicing, pollarding, root suckers

### **Unit- II:**

- Artificial regeneration – objectives, choice between natural and artificial regeneration, essential preliminary considerations. Crown classification. Tending operations – weeding, cleaning, thinning – mechanical, ordinary, crown and advance thinning. Forest mensuration – objectives, diameter measurement, instruments used in diameter measurement

### **Unit- III:**

- Non instrumental methods of height measurement - shadow and single pole method; Instrumental methods of height measurement - geometric and trigonometric principles, instruments used in height measurement; tree stem form, form factor, form quotient, measurement of volume of felled and standing trees, age determination of trees

### **Unit- IV:**

- Agroforestry – definitions, importance, criteria of selection of trees in agroforestry, different agroforestry systems prevalent in the country, shifting cultivation, taungya, alley cropping, wind breaks and shelter belts, home gardens. Cultivation practices of two important fast growing tree species of the region.

### **Practical:**

Identification of tree-species. Diameter measurements using calipers and tape, diameter measurements of forked, buttressed, fluted and leaning trees. Height measurement of standing trees by shadow method, single pole method and hypsometer. Volume measurement of logs using various formulae. Nursery lay out, seed sowing, vegetative propagation techniques. Forest plantations and their management. Visits of nearby forest based industries.

## **BAG-109: Comprehension&Communication Skillsin English**

### **CO: COURSE OBJECTIVE**

**CO-1 Develop Strong Comprehension Skills:** Improve the ability to read, understand, and analyze texts, identifying main ideas, themes, and arguments.

**CO-2 Enhance Vocabulary and Grammar:** Expand vocabulary and strengthen grammar usage to enable more effective communication.

**CO-3 Master Listening Skills:** Develop the ability to comprehend spoken English in various contexts, such as lectures, conversations, and media.

**CO-4 Improve Speaking Abilities:** Build confidence and fluency in verbal communication, including presenting ideas clearly and engaging in discussions.

**CO-5 Refine Writing Skills:** Strengthen the ability to write well-structured essays, reports, and creative pieces.

**CO-6 Increase Cultural Awareness:** Understand the nuances of language use in different cultural contexts and improve cross-cultural communication.

**CO-7 Practice Effective Argumentation:** Learn to construct and present well-reasoned arguments, supported by evidence and coherent logic.

**CO-8 Enhance Interpersonal Communication:** Improve interpersonal communication skills through role-play, debates, and group discussions to foster collaboration and teamwork.

## COURSE CONTENTS

### Unit- I:

- War Minus Shooting- The sporting Spirit. A Dilemma- A layman looks at science Raymond B. Fosdick. You and Your English – Spoken English and broken English G.B. Shaw.

### Unit- II:

- Reading Comprehension, Vocabulary- Antonym, Synonym, Homophones, Homonyms, often confused words. Exercises to Help the students in the enrichment of vocabulary based on TOEFL and other competitive examinations.

### Unit- III:

- Functional grammar: Articles, Prepositions, Verb, Subject verb Agreement, Transformation, Synthesis, Direct and Indirect Narration. Written Skills: Paragraph writing, Precise writing, Report writing and Proposal writing.

### Unit- IV:

- The Style: Importance of professional writing. Preparation of Curriculum Vitae and Job applications. Synopsis Writing. Interviews: kinds, Importance and process.

### Practical:

Listening Comprehension: Listening to short talks lectures, speeches (scientific, commercial and general in nature). Oral Communication: Phonetics, stress and intonation, Conversation practice. Conversation: rate of speech, clarity of voice, speaking and Listening, politeness & Reading skills: reading dialogues, rapid reading, intensive reading, improving reading skills. Mock Interviews: testing initiative, team spirit, leadership, intellectual ability. Group Discussions.

## **BAG-109 A: English Grammar-I**

### **CO: COURSE OBJECTIVE**

**CO-1 Understand Basic Grammar Concepts:** To introduce students to fundamental concepts of English grammar, including sentence structure, parts of speech, and punctuation.

**CO-2 Enhance Sentence Formation:** To develop the ability to construct grammatically correct and varied sentences, with a focus on clarity and coherence.

**CO-3 Master Verb Tenses:** To help students understand and accurately use different verb tenses, including present, past, and future forms, in both simple and continuous aspects.

**CO-4 Improve Vocabulary and Word Usage:** To expand students' vocabulary and guide them in using words appropriately within different grammatical contexts.

**CO-5 Grasp Subject-Verb Agreement:** To teach the rules of subject-verb agreement and how to apply them in diverse sentence structures.

**CO-6 Learn Sentence Types and Functions:** To provide knowledge of different types of sentences (declarative, interrogative, imperative, and exclamatory) and their functions in communication.

**CO-8 Practice Pronouns and Their Functions:** To familiarize students with the correct usage of pronouns, including personal, possessive, and reflexive forms, and how they function in sentences.

**CO-8 Develop Punctuation Skills:** To improve students' understanding and correct usage of punctuation marks (periods, commas, semicolons, colons, quotation marks, etc.) to enhance written communication.

## **COURSE CONTENTS**

### **Unit I**

Introduction to Grammar, Overview of grammar and its importance, Parts of speech: nouns, pronouns, verbs, Types of nouns: common, proper, collective.

### **Unit II**

Pronouns: subject, object, possessive, Verb types: action, linking, auxiliary, Tenses: present, past, future, Functions of adjectives and adverbs, Comparative and superlative forms.

### **Unit III**

Basic sentence components: subject, predicate, Types of sentences: simple, compound, complex, Commas, periods, question marks, exclamation points, Quotation marks and apostrophes.

### **Unit IV**

Subject-verb agreement, Misplaced modifiers, Sentence fragments and run-ons, Comprehensive review of topics covered, Practice exercises and quizzes

## **BAG-109 B: Soft Skills-I**

### **CO: COURSE OBJECTIVE**

**CO-1 Enhance Communication Skills:** Develop verbal, non-verbal, and written communication techniques to express ideas clearly and effectively.

**CO-2 Build Teamwork and Collaboration:** Foster the ability to work collaboratively in diverse groups, understanding group dynamics and conflict resolution.

**CO-3 Improve Time Management:** Learn strategies to prioritize tasks, manage time efficiently, and meet deadlines in professional and personal contexts.

**CO-4 Develop Emotional Intelligence:** Cultivate self-awareness, empathy, and the ability to manage emotions in interpersonal relationships and challenging situations.

**CO-5 Strengthen Critical Thinking and Problem-Solving:** Encourage analytical thinking to evaluate situations and propose creative, practical solutions.

**CO-7 Boost Confidence and Public Speaking Skills:** Build self-confidence and refine public speaking skills to present ideas effectively in formal and informal settings.

**CO-8 Cultivate Professional Ethics and Workplace Etiquette:** Understand and apply ethical principles and appropriate behavior in professional environments.

## **COURSE CONTENTS**

### **Unit I**

Presentation Skills, Speaking to a small group and large audience, Barriers to communication and non- verbal communication, Language skills, Types of presentation and use of aids, Effective public speaking.

### **Unit II**

Memory Skills, Memory system, Short term and long term memory, Causes of memory problems, Methods of improving memory, preventing loss of memory.

### **Unit III**

Technical Writing Skills, Defining Technical Communication and Organizing Information, Language in Technical Communication.

### **Unit IV**

Description Vs Narration Vs Instruction, Letters, Memos, Electronic Communication, Formal and Informal Reports

## **BAG-109 C: Life Management-I**

### **CO: COURSE OBJECTIVE**

**CO-1 Self-Awareness Development:** Understand personal strengths, weaknesses, values, and goals. Develop emotional intelligence to manage self and relationships effectively.

**CO-2 Time and Priority Management:** Learn strategies for effective time management. Set realistic goals and prioritize tasks to enhance productivity.

**CO-3 Stress and Emotional Regulation:** Identify sources of stress and implement techniques to manage it. Develop coping mechanisms for emotional well-being.

**CO-4 Communication Skills:** Build effective verbal and non-verbal communication skills. Enhance active listening and interpersonal communication abilities.

**CO-5 Decision-Making and Problem-Solving:** Learn frameworks for making informed decisions. Cultivate problem-solving skills to handle life challenges.

**CO-6 Work-Life Balance:** Understand the importance of balancing personal and professional life. Implement strategies to achieve harmony and avoid burnout.

**CO-7 Personal Growth and Goal Setting:** Set and achieve short-term and long-term personal goals. Develop a growth mindset and strategies for continuous improvement.

**CO-8 Health and Well-Being:** Recognize the importance of physical and mental health. Learn basic wellness practices for a balanced lifestyle.

## **COURSE CONTENTS**

### **Unit I**

Life Style & its Basics, Purpose of life & its dimensions, Importance of Self-Evaluation; (Daily routine, Food habits, Dressing Sense, Habit formation, Company, Etiquettes), Duties & Commitment of Self, Family and Society, Adjustment with Self & Environment.

### **Unit II**

Work Efficiency, Positive way of thinking, Tools & techniques for Positive thinking, Karma & Karma PhalSidhanta, Behavioral Skill.

### **Unit III**

Personality Skills, Self-Assessment Techniques, Adjustment Skills, Art of Positive Thinking.

### **Unit IV**

Environmental Awareness, Basic Concept of Environment & Ecology, Natural Resources, Environmental Ethics.

### **Unit V**

Life and Deeds of Pt. Shriram Sharma Acharya and Mataji, GayatriPariwar and its Branches, VicharKranti, AtmdevSadhna: Atmbodh and Tatvabodh, Pranayama: Nadishodhan, Pranakarshan, Diary Writing.

## **BAG-111: Fundamentals of Agronomy**

### **CO: COURSE OBJECTIVE**

**CO-1 Understanding Crop Growth and Development:** Learn about the life cycle of crops and factors influencing their growth. Study the physiological and morphological characteristics of crops.

**CO-2 Basics of Soil Science:** Understand soil properties, classification, and its role in crop production. Learn about soil fertility, nutrient management, and amendments.

**CO-3 Crop Management Practices:** Gain knowledge about crop planting methods, spacing, and cropping systems. Understand weed control, irrigation, and pest management practices.

**CO-4 Climate and Agriculture:** Explore the impact of weather and climate on crop production. Study agro climatic zones and their significance in crop planning.

**CO-5 Sustainable Agriculture:** Learn principles of sustainable land use, conservation practices, and integrated nutrient management. Focus on resource efficiency and minimizing environmental impact.

**CO-7 Introduction to Agronomic Tools and Techniques:** Understand the role of technology and tools in modern agronomy. Familiarize with concepts like precision agriculture and remote sensing.

**CO-8 Crop Improvement:** Basics of crop breeding and genetic enhancement for better yields and resilience.

## COURSE CONTENTS

### Unit- I:

- Agronomy and its scope, seeds and sowing, tillage and tilling, crop density and geometry,

### Unit- II:

- Crop nutrition, manures and fertilizers, nutrient use efficiency, water resources, soil-plant-water relationship, crop water requirement, water use efficiency, irrigation-scheduling criteria and methods, quality of irrigation water, logging.

### Unit- III:

- Weeds- importance, classification, crop weed competition, concepts of weed management- principles and methods, herbicides- classification, selectivity and resistance, allelopathy.

### Unit- IV:

- Growth and development of crops, factors affecting growth and development, plant ideotypes, crop rotation and its principles, adaptation and distribution of crops, crop management technologies in problematic areas, harvesting and threshing of crops.

### Practical:

Identification of crops, seeds, fertilizers, pesticides and tillage implements, study of agro-climatic zones of India, Identification of weeds in crops, Methods of herbicide and fertilizer application, Study of yield contributing characters and yield estimation, Seed germination and viability test, Numerical exercises on fertilizer requirement, plant population, herbicides and water requirement, Use of tillage implements- reversible plough, one way plough, harrow, leveler, seed drill, Study of soil moisture measuring devices, Measurement of field capacity, bulk density and infiltration rate, Measurement of irrigation water.

## **BAG-113: Introductory Biology**

### **CO: COURSE OBJECTIVE**

**CO-1 Understand Core Biological Concepts:** Explore the structure and function of cells, including prokaryotic and eukaryotic cells. Examine the molecular basis of life (e.g., DNA, RNA, proteins). Understand energy transformations in biological systems (e.g., photosynthesis and cellular respiration)

**CO-2 Develop Knowledge of Organismal Biology:** Learn about the diversity of life and classification systems (taxonomy). Study how organisms grow, reproduce, and interact with their environments. Understand the principles of evolution and natural selection.

**CO-3 Explore Genetics and Heredity:** Learn the basics of Mendelian and molecular genetics. Understand patterns of inheritance and the role of genetic variation in populations.

**CO-4. Examine Ecology and Environmental Biology:** Study ecosystems, energy flow, and nutrient cycles. Explore the interdependence of organisms and their environments. Understand human impacts on ecosystems and biodiversity.

**CO-5 Develop Scientific Inquiry Skills:** Learn how to design experiments, analyze data, and interpret results. Apply the scientific method to biological questions. Enhance critical thinking and problem-solving skills.

**CO-6 Prepare for Advanced Biological Studies:** Build a foundation for specialized topics in biology, such as microbiology, genetics, and biochemistry. Develop an appreciation for the scope and relevance of biology in everyday life.

## **COURSE CONTENTS**

### **Unit- I:**

- Introduction to the living world, diversity and characteristics of life, origin of life,

### **Unit- II:**

- Evolution and Eugenics. Binomial nomenclature and classification. Cell and cell division.

### **Unit- III:**

- Morphology of flowering plants. Seed and seed germination.

### **Unit- IV:**

- Plant systematic - viz; Brassicaceae, Fabaceae and Poaceae. Role of animals in agriculture.

### **Practical:**

Morphology of flowering plants – root, stem and leaf and their modifications. Inflorescence, flower and fruits. Cell, tissues & cell division. Internal structure of root, stem and leaf. Study of specimens and slides. Description of plants - Brassicaceae, Fabaceae and Poaceae.

## **BAG-115: Elementary Mathematics**

### **CO: COURSE OBJECTIVES**

**CO-1 Develop Number Sense and Operations:** To help students understand and apply basic arithmetic operations (addition, subtraction, multiplication, and division) with whole numbers, fractions, and decimals.

**CO-2 Introduce Geometric Concepts:** To enable students to identify and analyze basic geometric shapes, understand their properties, and explore concepts of symmetry, area, and perimeter.

**CO-3 Understand Measurement:** To teach students how to measure length, weight, volume, and time using both standard and non-standard units of measurement, fostering an understanding of units and conversions.

**CO-4 Explore Data and Probability:** To introduce students to data collection, organization, and representation using graphs (bar charts, pictograms, and line graphs), and basic concepts of probability.

**CO-5 Introduce Problem-Solving Strategies:** To develop students' ability to solve word problems by applying mathematical operations and logical reasoning to everyday situations.

**CO-6 Enhance Mathematical Communication:** To encourage students to articulate mathematical ideas clearly using correct terminology and notation, and explain their thinking through reasoning.

**CO-7 Promote Critical Thinking:** To strengthen students' ability to make logical connections between concepts, recognize patterns, and apply mathematical concepts to real-world contexts.

## COURSE CONTENTS

### Unit- I:

- Straight lines : Distance formula, section formula (internal and external division), Change of axes (only origin changed), Equation of co-ordinate axes, Equation of lines parallel to axes, Slope-intercept form of equation of line, Slope-point form of equation of line, Two point form of equation of line, Intercept form of equation of line, Normal form of equation of line, General form of equation of line, Point of intersection of two lines, Angles between two st. lines, Parallel lines, Perpendicular lines, Angle of bisectors between two lines, Area of triangle and quadrilateral.

### Unit- II:

- Circle: Equation of circle whose centre and radius is known, General equation of a circle, Equation of circle passing through three given points, Equation of circle whose diameter is line joining two points  $(x_1, y_1)$  &  $(x_2, y_2)$ , Tangent and Normal to a given circle at given point (Simple problems), Condition of tangency of a line  $y = mx + c$  to the given circle  $x^2 + y^2 = a^2$ .

### Unit- III:

- Differential Calculus: Definition of function, limit and continuity, Simple problem on limit, Simple problems on continuity, Differentiation of  $x^n$ ,  $e^x$ ,  $\sin x$  &  $\cos x$  from first principle, Derivatives of sum, difference, product and quotient of two functions, Differentiation of functions of functions (Simple problem based on it), Logarithmic differentiation (Simple problem based on it), Differentiation by substitution method and simple problems based on it, Differentiation of Inverse Trigonometric functions. Maxima and Minima of the functions of the form  $y = f(x)$  (Simple problems based on it).

### Unit- IV:

- Integral Calculus : Integration of simple functions, Integration of Product of two functions, Integration by substitution method, Definite Integral (simple problems based on it), Area under simple well-known curves (simple problems based on it).

### Unit- V:

- Matrices and Determinants: Definition of Matrices, Addition, Subtraction, Multiplication, Transpose and Inverse up to 3rd order, Properties of determinants up to 3rd order and their evaluation.

## **BAG-115 A: Fundamentals of Statistics**

### **CO: COURSE OBJECTIVES**

**CO-1 Understand Key Statistical Concepts:** Explain fundamental statistical concepts, including data types, measures of central tendency, and measures of dispersion.

**CO-2 Data Collection and Organization:** Apply methods for collecting, organizing, and summarizing data using appropriate statistical tools.

**CO-3 Probability Basics:** Understand and calculate probabilities to analyze random events and understand their role in statistical analysis.

**CO-4 Inferential Statistics:** Perform hypothesis testing, confidence interval estimation, and inferential techniques to draw conclusions from data.

**CO-5 Data Visualization:** Construct and interpret graphical representations of data, such as histograms, scatterplots, and boxplots.

**CO-6 Statistical Software Utilization:** Use statistical software or tools to analyze data effectively and interpret output.

**CO-7 Real-World Application:** Apply statistical methods to solve real-world problems in diverse fields, enhancing decision-making skills.

## **COURSE CONTENTS**

### **Unit-I**

Introduction: Meaning of statistics, Nature of statistics, Importance of statistics, Relation with some allied subjects, Uses of statistics, Misuses of statistics, Types of data: Primary and Secondary data, Quantitative data and Qualitative data, Discrete data and continuous data, Time series , Spatial series data and cross-sectional data, ordinal data and nominal data, Illustration with examples.

### **Unit-II**

Collection of data: Questionnaire and its basic characteristics, Definition of Schedule and pilot survey, Designing a questionnaire and schedule, concept of outliers, Presentation of data: Textual representation, Tabular representation, Diagrammatic representation (line diagram, Multiple axes diagram and multiple line diagram), Bar diagram (Horizontal and vertical bar diagrams, multiple and divided bar diagrams), Pie diagram.

### **Unit-III**

Frequency distribution, Cumulative frequency distribution and their graphical representation (Column diagram, Step diagram, ogive, Histogram, frequency curve of different types, Stem and leaf diagram). Concept of Central Tendency (Mean, Mode and Median) and its measures with properties including  $AM \geq GM \geq HM$ .

### **Unit-IV**

Measures of Dispersion: Range, Mean deviation, Standard deviation, Quartile deviation, Coefficient of variation, Quantile and Percentile with relation between different measures, Definition of Probability: Classical and Relative frequency approach to probability with limitations. Axiomatic Definition of Probability (Statement only) Theorem of Total Probability, Bonferroni's inequality, Boole's inequality.

## **BAG-115 B: Statistical Thinking and Data Analysis**

### **CO: COURSE OBJECTIVES**

**CO-1 Understand Fundamental Statistical Concepts:** Develop a clear understanding of basic statistical terms, principles, and methodologies, including descriptive statistics, probability, and inferential techniques.

**CO-2 Data Collection and Sampling:** Learn appropriate methods for designing experiments, conducting surveys, and collecting data, while understanding the importance of sampling techniques and potential biases.

**CO-3 Exploratory Data Analysis:** Gain proficiency in visualizing and summarizing data using graphical and numerical methods to uncover underlying patterns, trends, and insights.

**CO-4 Statistical Modeling and Inference:** Apply statistical models to make inferences about populations from sample data, focusing on hypothesis testing, confidence intervals, and regression analysis.

**CO-5 Integration of Computational Tools:** Utilize statistical software and programming languages (e.g., R, Python, or Excel) to conduct data analysis efficiently and interpret outputs effectively.

**CO-6 Decision-Making Under Uncertainty:** Develop the ability to apply statistical reasoning to solve real-world problems and support decision-making in uncertain environments.

**CO-7 Communicating Statistical Findings:** Master the art of presenting data analysis results clearly and effectively to both technical and non-technical audiences, emphasizing evidence-based conclusions.

## **COURSE CONTENTS**

### **Unit I**

Statistical Thinking, Examples of Statistical Thinking, Numerical Data, Summary Statistics, From Population to Sampled Data, Different Types of Biases, Introduction to Probability, Introduction to Statistical Inference

### **Unit II**

Association and Dependence, Association and Causation, Conditional Probability and Bayes Rule, Simpsons Paradox, Confounding, Introduction to Linear Regression, Special Regression Models

### **Unit III**

Exploratory Data Analysis and Visualization, Goals of statistical graphics and data visualization, Graphs of Data, Graphs of Fitted Models, Graphs to Check Fitted Models, What makes a good graph, Principles of graphics

### **Unit IV**

Introduction to Bayesian Modeling, Bayesian inference: combining models and data in a forecasting problem, Bayesian hierarchical modeling for studying public opinion, Bayesian modeling for Big Data

## **BAG-117: Agricultural Heritage**

### **CO: COURSE OBJECTIVES**

**CO-1 Understand Historical Significance:** Explore the historical development of agriculture and its impact on human civilization, from ancient practices to modern advancements.

**CO-2 Recognize Traditional Knowledge:** Identify and appreciate the importance of traditional agricultural practices and indigenous knowledge systems in sustaining ecosystems and enhancing crop diversity.

**CO-3 Evaluate Cultural Contributions:** Analyze the cultural, social, and economic contributions of agriculture in shaping societies across different regions and eras.

**CO-4 Study Agricultural Evolution:** Investigate the evolution of farming systems, tools, and techniques in response to changing environmental and social needs.

**CO-5 Learn Sustainability Principles:** Examine historical agricultural practices for their relevance to contemporary issues like sustainability, climate change, and food security.

**CO-6 Preserve Biodiversity:** Highlight the role of agricultural heritage in conserving biodiversity and promoting sustainable resource management.

**CO-7 Promote Awareness and Application:** Encourage the integration of agricultural heritage principles into modern farming to create a balance between tradition and innovation.

## COURSE CONTENTS

### Unit- I:

- Introduction of Indian agricultural heritage; Ancient agricultural practices, Relevance of heritage to present day agriculture.

### Unit- II:

- Past and present status of agriculture and farmers in society; Journey of Indian agriculture and its development from past to modern era.

### Unit- III:

- Plant production and protection through indigenous traditional knowledge; Crop voyage in India and world; Agriculture scope.

### Unit- IV:

- Importance of agriculture and agricultural resources available in India; Crop significance and classifications; National agriculture setup in India.

### Unit- V:

- Current scenario of Indian agriculture; Indian agricultural concerns and future prospects. Rural Sociology & Educational Psychology.

## **BAG-119: Rural Sociology & Educational Psychology**

### **CO: COURSE OBJECTIVES**

**CO-1 Understand Rural Society:** To explore the structure, functions, and characteristics of rural communities and their role in society.

**CO-2 Analyze Social Change:** To examine the processes and patterns of social change and development in rural areas.

**CO-3 Study Cultural Practices:** To understand the cultural norms, values, traditions, and practices of rural societies.

**CO-4 Assess Rural Problems:** To identify and analyze the challenges faced by rural communities, such as poverty, illiteracy, and unemployment.

**CO-5 Promote Rural Development:** To understand the role of education, policy-making, and technology in enhancing rural life.

**CO-6 Learn Research Techniques:** To equip students with methodologies for conducting sociological research in rural settings.

**CO-7 Foster Community Engagement:** To prepare students to work effectively with rural populations and contribute to community development initiatives.

## **COURSE CONTENTS**

### **Unit- I:**

- Sociology and Rural sociology: Definition and scope, its significance in agriculture extension, Social Ecology.

### **Unit- II:**

- Rural society, Social Groups, Social Stratification, Culture concept, Social Institution, Social Change & Development.

### **Unit- III:**

- Educational psychology: Meaning & its importance in agriculture extension. Behavior: Cognitive, affective, psychomotor domain, Personality, Learning, Motivation.

### **Unit- IV:**

- Theories of Motivation, Intelligence.

## **BAG-119 A: Science, Technology, and Society**

### **CO: COURSE OBJECTIVES**

**CO-1 Understand Interconnections:** Explain the interdependent relationship between science, technology, and society, and how they shape one another.

**CO-2 Analyze Ethical Implications:** Evaluate the ethical, environmental, and social impacts of scientific discoveries and technological advancements.

**CO-3 Explore Historical Contexts:** Examine the historical evolution of science and technology and its influence on societal development.

**CO-4 Foster Critical Thinking:** Develop critical thinking skills to assess the benefits, risks, and unintended consequences of technological innovation.

**CO-5 Promote Responsible Innovation:** Understand the role of individuals, organizations, and governments in fostering responsible science and technology practices for sustainable development.

**CO-6 Recognize Global Perspectives:** Explore the global dimensions of science and technology, considering issues such as equity, accessibility, and cultural diversity.

**CO-7 Encourage Lifelong Learning:** Cultivate a mindset for continuous inquiry into the advancements of science and technology and their potential to address societal challenges.

## **COURSE CONTENTS**

### **Unit I**

Science as Culture, Methods of Science, Issues and Perspectives. Social Context of Production of Scientific Knowledge, Demarcation, Autonomy and Cognitive Authority of Science. Challenges: Cognitive, Legal, Ethical, Feminist and Ideological, Discussion and Forum.

### **Unit II**

Science as Social Institution and Ethos of Science, Inequalities in Science, Critique of the Mertonian Paradigm, Knowledge Production: Social and Cultural Contexts, Discussion and Forum.

### **Unit III**

Society and Culture, Resources and Legitimation of Knowledge, Social Legitimation, Meanings, Interests, Values and the Modern State, Discussion and Forum.

### **Unit IV**

Perspectives on Science - Technology Relationship, Hierarchical, Symbiotic and Coalescing. Science and Technology, and their Human Roots, Philosophy of Science and Technology. Technology as Knowledge, Technological Shaping of Society and Social Shaping of Technology, Discussion and Forum.

### **Unit V**

Emerging Technologies: Information and Communication Society - Implications for Work, Social Relations, Governance and Control. Biotechnology - Implications for the Meanings of Life and Life. Processes, Application in Agriculture, Healthcare and Environment Discussion and Forum.

## **BAG-119 B: Women's and Gender Studies**

### **CO: COURSE OBJECTIVES**

**CO-1 Understand Core Concepts and Theories:** Develop an understanding of key concepts, theories, and frameworks in Women's and Gender Studies, including feminism, intersectionality, and social constructionism.

**CO-2 Analyze Gender and Power Dynamics:** Examine the ways gender, sexuality, race, class, and other social categories shape individual experiences and societal structures.

**CO-3 Critique Social Inequalities:** Critically analyze historical and contemporary systems of oppression and privilege, such as patriarchy, sexism, heteronormativity, and colonialism.

**CO-4 Engage in Interdisciplinary Approaches:** Explore how Women's and Gender Studies intersects with fields such as sociology, history, literature, political science, and cultural studies to provide a holistic view of gender-related issues.

**CO-5 Promote Social Justice and Advocacy:** Build skills in activism and advocacy by exploring strategies for promoting equity, inclusion, and social justice on both local and global scales.

**CO-6 Evaluate Representations of Gender:** Analyze how gender and sexuality are represented in media, literature, and cultural practices, and consider their implications for societal norms and behaviors.

**CO-7 Apply Knowledge to Real-World Issues:** Use the knowledge gained to critically engage with and address real-world issues related to gender, such as gender-based violence, reproductive rights, workplace inequality, and LGBTQ+ rights.

## **COURSE CONTENTS**

### **Unit I**

Emergence of Women's Studies in India Establishment of Centre for Women's Studies under UGC guidelines Women's Studies in International Settings Growth and changing perspectives of Women's Studies and Research.

### **Unit II**

Basic Concepts "Understanding Sex- Gender, Understanding Sexism and Androcentrism, Understanding Patriarchy and Theories of Patriarchy, Private - Public dichotomy Patriarchy practices in different institutions and Text Books.

### **Unit III**

Representation of Women in Culture and Media. Women and Print Media. Women and Electronic Media ' Women and Films, Advertisements. Women and Mega Serials.

### **Unit IV**

Women and Literature, Women's Writings in India, Women's Representation in Literary Texts: With special reference to Novels of Ashapura Devi: Trilogy- 'PrathamPratishruti', 'Subarnalata' and 'Bakulkatha'.

### **Unit V**

Concept and definition of Social Work, Emergence of professional Social Work in India, Scope and concerns of Social Work practice, Role and Challenges of Social Workers in working with Women with disabilities.

## **BAG-119 C: Geography of the Global Economy**

### **CO: COURSE OBJECTIVES**

**CO-1 Understand the Spatial Dynamics of the Global Economy:** Analyze the geographic distribution of economic activities and their interconnectedness at local, national, and global scales.

**CO-2 Examine Global Trade Patterns:** Explore the causes and consequences of international trade, including trade agreements, tariffs, and the role of global supply chains.

**CO-3 Analyze Economic Inequality:** Investigate the spatial dimensions of wealth and poverty, focusing on disparities between and within regions.

**CO-4 Evaluate the Role of Globalization:** Assess the impact of globalization on economic development, cultural exchanges, and the environment.

**CO-5 Explore Industrial and Technological Change:** Study the geographic implications of industrialization, deindustrialization, and the rise of digital economies.

**CO-6 Investigate Environmental and Economic Interactions:** Understand how economic activities influence and are influenced by environmental factors, including climate change, resource extraction, and sustainability practices.

**CO-7 Develop Geographic Analytical Skills:** Utilize tools such as GIS (Geographic Information Systems) and spatial data analysis to interpret and visualize economic patterns and trends.

## **COURSE CONTENTS**

### **Unit I**

Basic concepts and trends, Overview: geographies of global change, The structure and organization of economies, Growth and development: concepts and measures, Mapping the world economy, Recent patterns and trends: a global perspective, Recent patterns and trends: a Canadian perspective countries trade.

### **Unit II**

Emergence of a world economy and economic development, early commercial expansion, the colonial world economy, Development theories and pathways.

### **Unit III**

Population and resources, Global population dynamics, Population and migration, Natural resources and primary commodities, Population & resources I: food and agriculture, Population & resources II: oil and minerals.

### **Unit IV**

The spatial organization of the new world economy, the diffusion of the industrial revolution, the changing organization of industry: Fordism, The changing organization of industry: post-Fordism, On externalities, transactions and firm linkages, Agglomeration and new industrial spaces.

### **Unit V**

The resource curse and Dutch disease, Global food systems, the global land rush, Tropical deforestation, Fair trade: principles and realities, Global trade institutions and agreements, Local-global geographies of the financial crisis, the economy-environment interface, Globalization and inequality

## **BAG-121: Human Values and Ethics**

### **CO: COURSE OBJECTIVES**

**CO-1 Understanding Ethical Foundations:** To provide students with a comprehensive understanding of the fundamental concepts, principles, and theories of ethics and human values.

**CO-2 Developing Critical Thinking:** To enable students to critically analyze ethical dilemmas and challenges in personal, professional, and societal contexts.

**CO-3 Fostering Moral Awareness:** To cultivate a sense of moral responsibility by identifying and reflecting on the importance of values in decision-making and behavior.

**CO-4 Promoting Integrity and Accountability:** To emphasize the role of integrity, honesty, and accountability in personal and professional life.

**CO-5 Encouraging Respect for Diversity:** To teach students to appreciate and respect diverse perspectives, cultures, and values in a globalized society.

**CO-6 Enhancing Ethical Decision-Making:** To equip students with tools and frameworks to make ethical decisions and resolve conflicts effectively.

**CO-7 Building Social Responsibility:** To inspire students to contribute positively to society by addressing social, environmental, and global ethical challenges.

## **COURSE CONTENTS**

### **Unit- I:**

- Values and Ethics- An Introduction, Goal and Mission of Life.

### **Unit- II:**

- Vision of Life, Principles and Philosophy, Self Exploration.

### **Unit- III:**

- Self Awareness, Self Satisfaction, Decision Making.

### **Unit- IV:**

- Motivation, Sensitivity, Success, Selfless Service. Case

### **Unit- V:**

- Study of Ethical Lives, Positive Spirit, Body, Mind and Soul, Attachment and Detachment, Spirituality Quotient, Examination.

## **BAG-121 A: Global Climate Policy and Sustainability**

### **CO: COURSE OBJECTIVES**

**CO-1 Understand the Science of Climate Change:** Gain a comprehensive understanding of the scientific principles behind climate change, including its causes, impacts, and implications for natural and human systems.

**CO-2 Analyze Global Climate Policies:** Explore key international agreements and frameworks such as the Paris Agreement, Kyoto Protocol, and IPCC reports, and assess their role in addressing climate change.

**CO-3 Evaluate Policy Approaches:** Compare and contrast policy approaches at global, regional, and national levels, focusing on mitigation strategies, adaptation planning, and policy implementation challenges.

**CO-4 Examine Sustainable Development Goals (SDGs):** Investigate the interconnections between climate action and the SDGs, emphasizing the need for integrated strategies to achieve sustainability.

**CO-5 Assess the Role of Stakeholders:** Identify the roles of various stakeholders, including governments, businesses, non-governmental organizations, and civil society, in advancing climate policy and sustainability efforts.

**CO-6 Develop Critical Thinking on Equity and Justice:** Analyze issues of climate justice, equity, and inclusivity, focusing on how climate policies affect different communities, particularly vulnerable populations.

**CO-7 Design Practical Solutions:** Equip students with the tools and frameworks to design innovative and practical solutions for climate challenges, fostering sustainable practices in various sectors.

## **COURSE CONTENTS**

### **Unit I**

Introduction to Climate Change and Sustainable Development: Principles and Approaches, Global Climate System, Climate Change: Causes and Consequences, Sustainable Development: Scope and Emerging Trends, Climate and Sustainable Development: An Interface.

### **Unit II**

Climate Change: Challenges and Choices, Climate Change and Water, Climate Change: Forest and Biodiversity, Climate Change: Coastal Ecosystem, Climate Change: Agriculture and Food Security.

### **Unit III**

Climate Change and Sustainable Development: Policies and Programmes, Sustainable Development Goals: An overview, Climate Change and Sustainable Development: National and State Policies, Achieving Sustainable Development Goals: Role of Various Stakeholders, Building Partnership for Climate Change and Sustainable Development.

### **Unit IV**

Climate Change and Sustainable Development: Stories of Success, Cross Country Experiences, National Experiences, Regional Experiences, and Community led Experiences.

### **Unit V**

Climate Change Policy, Climate change policy of countries, Uncertainty and climate change policy, Policy implications, Cost-benefit analysis in the context of climate change.

## **BAG-121 B: Planetary Change and Human Health**

### **CO: COURSE OBJECTIVES**

**CO-1 Understand the Relationship between Planetary Health and Human Health:** Explore how changes in natural systems—such as climate change, biodiversity loss, and pollution—impact human health and well-being.

**CO-2 Identify Key Drivers of Environmental Change:** Examine the social, economic, and political factors driving planetary change, including industrialization, urbanization, and resource exploitation.

**CO-3 Assess the Impacts of Climate Change on Health:** Analyze the direct and indirect effects of climate change on human health, such as heat-related illnesses, vector-borne diseases, and food and water insecurity.

**CO-4 Examine the Role of Biodiversity in Public Health:** Investigate how the loss of biodiversity affects ecosystems and the services they provide, including implications for medicine, nutrition, and disease regulation.

**CO-5 Develop an Understanding of Environmental Justice:** Recognize how planetary change disproportionately affects vulnerable populations and contributes to health inequities worldwide.

**CO-6 Evaluate Adaptation and Mitigation Strategies:** Explore strategies to mitigate the adverse effects of planetary change on human health, including policy interventions, technological innovations, and community-based approaches.

**CO-7 Promote Interdisciplinary Problem-Solving:** Foster collaboration across disciplines to address the complex interconnections between environmental change and human health, integrating insights from public health, environmental science, and social sciences.

## **COURSE CONTENTS**

### **Unit I**

Introduction to Planetary Health, Current changes in the Earth's natural systems, the paradox of improved health and natural systems deterioration. Mapping the environmental determinants of human health.

### **Unit II**

Main risks of environmental change for human health, Introduction to writing an essay on planetary health, Environmental impacts of health systems, Challenges for Planetary Health, A planetary health approach to environmental health risks.

### **Unit III**

Food systems: a planetary health approach, Food security and nutrition, Climate change and health, Climate change and urban environment, COVID-19, a disease of the Anthropocene, Atmospheric and chemical pollution.

### **Unit IV**

Governance for a sustainable society, Sustainability, Sustainable development goals, Co-creation Activity for the Planetary Health course, Extreme weather events, Influence of global change in infectious diseases transmitted by water, zoonosis, and vectors.

## **BAG-121 C: Tools for Sustainable Design**

### **CO: COURSE OBJECTIVES**

**CO-1 Introduce Sustainable Design Concepts:** Provide students with a foundational understanding of sustainability principles and how they apply to design across various disciplines (e.g., architecture, industrial design, product design, urban planning).

**CO-2 Explore Tools for Sustainable Design:** Familiarize students with a variety of design tools, software, and techniques that support sustainable design practices, including energy modeling, lifecycle assessment (LCA), material selection tools, and environmental impact calculators.

**CO-3 Promote Resource Efficiency:** Teach students how to design for resource conservation, including minimizing waste, optimizing energy use, and selecting renewable and recyclable materials.

**CO-4 Assess Environmental Impacts:** Enable students to evaluate the environmental impacts of design decisions through tools like LCA, carbon footprint analysis, and other environmental metrics.

**CO-5 Integrate Social and Ethical Considerations:** Encourage students to consider social sustainability in design, including fair labor practices, inclusivity, and the well-being of communities affected by design choices.

**CO-6 Foster Innovation and Creativity in Sustainable Design:** Develop students' ability to innovate sustainable solutions that address environmental, economic, and social challenges through design thinking and problem-solving techniques.

**CO-7 Enable Real-World Application:** Equip students with the practical skills needed to apply sustainable design tools and methods to real-world projects, from product development to building design and urban planning.

**CO-8 Encourage Critical Thinking and Reflection:** Help students critically analyze design decisions and their long-term impacts on the environment and society, fostering a mindset of continuous improvement and adaptability in sustainable design practices.

## **BAG-121 C: Tools for Sustainable Design**

### **CO: COURSE OBJECTIVES**

**CO-1 Introduce Sustainable Design Concepts:** Provide students with a foundational understanding of sustainability principles and how they apply to design across various disciplines (e.g., architecture, industrial design, product design, urban planning).

**CO-2 Explore Tools for Sustainable Design:** Familiarize students with a variety of design tools, software, and techniques that support sustainable design practices, including energy modeling, lifecycle assessment (LCA), material selection tools, and environmental impact calculators.

**CO-3 Promote Resource Efficiency:** Teach students how to design for resource conservation, including minimizing waste, optimizing energy use, and selecting renewable and recyclable materials.

**CO-4 Assess Environmental Impacts:** Enable students to evaluate the environmental impacts of design decisions through tools like LCA, carbon footprint analysis, and other environmental metrics.

**CO-5 Integrate Social and Ethical Considerations:** Encourage students to consider social sustainability in design, including fair labor practices, inclusivity, and the well-being of communities affected by design choices.

**CO-6 Foster Innovation and Creativity in Sustainable Design:** Develop students' ability to innovate sustainable solutions that address environmental, economic, and social challenges through design thinking and problem-solving techniques.

**CO-7 Enable Real-World Application:** Equip students with the practical skills needed to apply sustainable design tools and methods to real-world projects, from product development to building design and urban planning.

**CO-8 Encourage Critical Thinking and Reflection:** Help students critically analyze design decisions and their long-term impacts on the environment and society, fostering a mindset of continuous improvement and adaptability in sustainable design practices.

## **COURSE CONTENTS**

### **Unit I**

Sustainable Design Sustainability and related terms, Design process and sustainable development, approaches to sustainability, sustainable design principles, application of sustainable design principles in product design, tools for sustainable design.

### **Unit II**

Developments in design methods History of design methods, Introduction to various design methods by: Alexander, Banathy, Nigel Cross, IDEO, Double Diamond by UK Design Council. Introduction to social innovation, Product Service Systems, and Lifecycle analysis.

### **Unit III**

Model of the Design Innovation Process. Seven Modes of the Design Innovation Process: (1) Sense Intent, (2) Know Context, (3) Know People, (4) Frame Insights, (5) Explore Concepts, (6) Frame Solutions, (7) Realize Offerings.

### **Unit IV**

Interaction design process and methodology for designing interactive solutions. Interaction models. Paradigms for interaction. Services and events: products to be used in groups, products used in public places, products for future use, design of tangible, gestural, multimodal, and expressive interfaces, products that enrich user experience.

### **Unit V**

Inter-disciplinary approach drawing upon human factors, cognitive sciences, human psychology, product design, visual communication, and computer science. Exploration of alternatives and pushing the envelope of what is known to improve user experience and make the design more inclusive.

## **BAG-123: NSS**

### **CO: COURSE OBJECTIVES**

**CO-1 Develop Social Responsibility:** NSS aims to build a sense of responsibility among students toward society by involving them in activities that directly impact the community's welfare.

**CO-2 Promote Volunteerism:** The course encourages students to actively participate in community service projects such as literacy campaigns, environmental protection, health programs, and rural development.

**CO-3 Foster National Integration:** NSS helps students understand the importance of national unity, integrity, and communal harmony by engaging them in projects across diverse communities and regions.

**CO-4 Enhance Personality Development:** By participating in NSS activities, students develop qualities like leadership, teamwork, discipline, and communication, which contribute to their overall personal growth.

**CO-5 Create Awareness of Social Issues:** The course aims to raise awareness about various social issues, such as poverty, health, education, and gender equality, helping students understand the challenges faced by marginalized communities.

**CO-6 Strengthen the Link between Campus and Community:** NSS provides an avenue for students to connect with the broader community beyond their academic environment, helping bridge the gap between theory and real-life issues.

**CO-7 Promote Sustainable Development:** Through service-oriented activities, NSS helps in promoting the values of sustainable development by involving students in eco-friendly and socially beneficial initiatives.

**CO-8 Encourage Civic Participation:** NSS nurtures the habit of active participation in civic responsibilities, fostering the spirit of democracy and participation in local governance.

## **COURSE CONTENTS**

### **Course Title: National Service Scheme I**

#### **Unit- I:**

- Introduction and basic components of NSS: Orientation: history, objectives, principles, symbol, badge; regular programmes under NSS, organizational structure of NSS, code of conduct for NSS volunteers, points to be considered by NSS volunteers awareness about health

#### **Unit- II:**

- NSS programmes and activities: Concept of regular activities, special camping, day camps, basis of adoption of village/slums, conducting survey, analysing guiding financial patterns of scheme, youth programme/ schemes of GOI, coordination with different agencies and maintenance of diary

#### **Unit- III:**

- Understanding youth: Definition, profile, categories, issues and challenges of youth; and opportunities for youth who is agent of the social change

Community mobilisation: Mapping of community stakeholders, designing the message as per problems and their culture; identifying methods of mobilisation involving youth-adult partnership

#### **Unit- IV:**

- Social harmony and national integration: Indian history and culture, role of youth in nation building, conflict resolution and peace-building

Volunteerism and shramdan: Indian tradition of volunteerism, its need, importance, motivation and constraints; shramdan as part of volunteerism

#### **Unit- V:**

- Citizenship, constitution and human rights: Basic features of constitution of India, fundamental rights and duties, human rights, consumer awareness and rights and rights to information. Family and society: Concept of family, community (PRIs and other community based organisations) and society.

## Physical Education and Yoga Practices

1. Teaching of skills of Football – demonstration, practice of the skills, correction, involvement in game situation (For girls teaching of Tennis)
2. Teaching of different skills of Football – demonstration, practice of the skills, correction, involvement in game situation (For girls teaching of Tennis)
3. Teaching of advanced skills of Football – involvement of all the skills in game situation with teaching of rules of the game
4. Teaching of skills of Basketball – demonstration, practice of the skills, correction of skills, involvement in game situation
5. Teaching of skills of Basketball – demonstration, practice of the skills, involvement in game situation
6. Teaching of skills of Basketball – involvement of all the skills in game situation with teaching of rule of the game
7. Teaching of skills of Kabaddi – demonstration, practice of the skills, correction of skills, involvement in game situation
8. Teaching of skills of Kabaddi – demonstration, practice of the skills, correction of skills, involvement in game situation
9. Teaching of advanced skills of Kabaddi – involvement of all the skills in game situation with teaching of rule of the game
10. Teaching of skills of Ball Badminton – demonstration, practice of the skills, correction of skills, involvement in game situation
11. Teaching of skills of Ball Badminton – involvement of all the skills in game situation with teaching of rule of the game
12. Teaching of some of Asanas – demonstration, practice, correction and practice
13. Teaching of some more of Asanas – demonstration, practice, correction and practice
14. Teaching of skills of Table Tennis – demonstration, practice of skills, correction and practice and involvement in game situation
15. Teaching of skills of Table Tennis – demonstration, practice of skills, correction and practice and involvement in game situation
16. Teaching of skills of Table Tennis – involvement of all the skills in game situation with teaching of rule of the game
17. Teaching – Meaning, Scope and importance of Physical Education
18. Teaching – Definition, Type of Tournaments
19. Teaching – Physical Fitness and Health Education
20. Construction and laying out of the track and field (\*The girls will have Tennis and Throw Ball).

## **BAG-123 A: NCC**

### **CO: COURSE OBJECTIVES**

**CO-1 Develop Leadership Skills:** NCC aims to cultivate leadership qualities and team-building skills among cadets by involving them in various activities that require decision-making, responsibility, and management.

**CO-2 Promote Physical Fitness:** Physical training, including drills, marches, and physical fitness routines, is a central component of the NCC course, aiming to keep cadets healthy, fit, and active.

**CO-3 Foster Discipline and Punctuality:** The NCC course instills a sense of discipline, punctuality, and respect for rules and regulations among cadets. This is achieved through regular training and adherence to strict schedules.

**CO-4 Cultivate Social Responsibility:** NCC encourages cadets to become responsible citizens by promoting social service, environmental awareness, and community involvement.

**CO-5 Develop a Sense of Patriotism:** Through exposure to national defense services, cadets are encouraged to develop a sense of patriotism, pride, and respect for the country.

**CO-6 Enhance Outdoor and Adventure Skills:** The course includes various outdoor activities, such as trekking, camping, and adventure sports, that develop survival skills, teamwork, and resilience.

**CO-7 Provide Exposure to Military and Para-military Training:** The NCC offers cadets exposure to basic military training, discipline, and knowledge of armed forces activities, which can inspire interest in defense careers.

**CO-8 Promote National Integration:** NCC aims to foster unity and national integration by bringing together young people from diverse backgrounds, regions, and communities.

**CO-9 Build Confidence and Self-reliance:** Through various training modules and field exercises, cadets gain confidence in their abilities and develop problem-solving skills, helping them to become self-reliant individuals.

## **COURSE CONTENTS**

### **Unit: 1 Personality Development**

(i) Thinking- Meaning and Concept of thinking, Reasoning, Process of thinking. (ii) Critical Thinking- Meaning & concept of critical thinking, Features of critical thinking, Process of critical thinking. (iii) Creative thinking- Meaning & concept of creative thinking, Features of creative thinking, Process of creative thinking, levels of Creativity, Characteristics of creative person.

### **Unit: 2 Leadership Development**

(i) Leadership capsule. (ii) Important Leadership traits, Indicators of leadership and evaluation. (iii) Motivation- Meaning & concept, Types of motivation. Factors affecting motivation. (iv) Ethics and Honor codes.

### **Unit: 3 Social Service and Community Development**

(i) Protection of Children & Women Safety. (ii) Road/Rail Safety. (iii) New Government Initiatives. (iv) Cyber and mobile Security Awareness.

### **Unit: 4 Group Discussion**

Coping with Stress & Emotions, time Management, Social Skills, Team Work, Career Counselling, SSB Procedure & Interview Skills, Public Speaking.

### **Unit: 5 CAMP (Practical)**

Ceremonial and Weapon Training, Swachh Bharat Abhiyan.

## **BAG-123 B: Physical Education & Yoga Practices**

### **CO: COURSE OBJECTIVES**

**CO-1 Enhance Physical Fitness:** To improve students' overall physical fitness, including strength, flexibility, endurance, balance, and coordination, through a variety of physical education and yoga activities.

**CO-2 Promote Health and Well-being:** To encourage lifelong health habits by educating students on the importance of regular physical activity, proper nutrition, mental well-being, and stress management through yoga.

**CO-3 Develop Yoga Skills and Techniques:** To teach students various yoga postures (asanas), breathing techniques (pranayama), meditation practices, and relaxation techniques to enhance physical and mental well-being.

**CO-4 Foster Mind-Body Connection:** To cultivate awareness of the connection between body and mind, enabling students to understand how physical activity and yoga can influence emotional and mental health.

**CO-5 Incorporate Yoga Philosophy:** To introduce students to the fundamental philosophy behind yoga, including concepts like mindfulness, self-discipline, non-violence (ahimsa), and ethical conduct, which promote personal growth.

**CO-6 Develop Personal Fitness Goals:** To assist students in setting and achieving individualized fitness goals through both physical education and yoga practices, encouraging self-motivation and goal setting.

**CO-7 Promote Lifelong Activity:** To instill an understanding of how regular participation in physical education and yoga can lead to a healthier lifestyle, reducing the risk of chronic diseases and improving long-term health.

## **COURSE CONTENTS**

### **Unit: 1 Physical Education**

Meaning, Definition, Aim and Objective, Misconception about Physical Education, Need, Importance and Scope of Physical Education in the Modern Society, Physical Education Relationship with General Education, Physical Education in India before Independence. Physical Education in India after Independence.

### **Unit: 2 Concept of Fitness and Wellness**

Meaning, Definition and Importance of Fitness and Wellness, Components of Fitness, Factor Affecting Fitness and Wellness.

Weight Management, Meaning and Definition of Obesity, Causes of Obesity, Management of Obesity, Health problems due to Obesity.

Lifestyle: Meaning, Definition, Importance of Lifestyle, Factor affecting Lifestyle, Role of Physical activity in the maintains of Healthy Lifestyle.

### **Unit: 3 Yoga and Meditation**

Historical aspect of yoga, Definition, types scopes & importance of yoga, Yoga relation with mental health and value education, Yoga relation with Physical Education and sports, Definition of Asana, differences between asana and physical exercise, Definition and classification of pranayama, Difference between pranayama and deep breathing, Practical: Asana, Suraya-Namaskar, Bhujang Asana, Naukasana, Halasana, Vajrasan, Padmasana, Shavasana, Makrasana, Dhanurasana, Tad Asana. Pranayam: Anulom, Vilom.

### **Unit: 4 Traditional Games of India**

Meaning, Types of Traditional Games Gilli- Danda, Kanche, Stapu, Gutte, etc Importance/ Benefits of Traditional Games, How to Design Traditional Games.

Recreation in Physical Education, Meaning, Definition of Recreation, Scope and Importance of Recreation, General Principles of Recreation, Types of Recreational Activities, Aerobics and Zumba. (Fir India Movement).

## **BAG-123 C: Water, Sanitation and Hygiene**

### **CO: COURSE OBJECTIVES**

**CO-1 Understand the Importance of WASH:** Explore the impact of poor WASH on disease transmission, health, and socio-economic development.

**CO-2 Study Water Management Systems:** Understand water quality standards and the treatment of water for safe consumption.

**CO-3 Examine Sanitation Systems:** Understand different sanitation systems, such as sewage treatment, waste disposal, and the management of human excreta.

**CO-4 Promote Hygiene Practices:** Learn about the significance of hygiene behaviors, including hand washing, safe food handling, and personal cleanliness.

**CO-5 Investigate Environmental and Social Impacts:** Explore the environmental effects of inadequate sanitation and water management (e.g., pollution, contamination).

**CO-6 Understand WASH Policy and Governance:** Study the roles of various stakeholders (government, NGOs, local communities) in the development and implementation of WASH projects.

**CO-7 Develop Practical Skills in WASH Implementation:** Gain hands-on experience in designing, implementing, and evaluating WASH programs.

**CO-8 Promote Sustainability:** Investigate methods for ensuring the long-term sustainability of WASH projects through community engagement and capacity building.

## **COURSE CONTENTS**

### **Unit I**

Introduction to Sanitation and Hygiene for Health, Definitions and Concepts, Global, national and regional perspective, Relation between health, hygiene & sanitation, Relevance & importance of health, hygiene in the contemporary times.

### **Unit II**

Occupational Health and Hygiene, Concept, definition and its role, Link between occupational hygiene, risk assessment & risk management. Sanitation problems of the workplace: industries, academic institutions, corporate, hospitals, Public spaces etc.

### **Unit III**

Health Hygiene Promotion & Education, Hygiene Behavior promotion & education-concept and its importance, Hygiene promotion & education in children & adolescence, Government initiatives & policies in rural & urban area.

### **Unit IV**

Health, hygiene practices in India and in North East India, Present scenario of health hygiene in India, Reproductive & sexual health of the women, Indigenous hygiene & sanitation practices, Cultural beliefs of the people of NE India in relation to health & hygiene- role & impacts.

## **BAG-102: Fundamentals of Genetics**

### **CO: COURSE OBJECTIVE**

**CO-1 Introduction to Genetic Principles:** Understand the foundational principles of inheritance, including Mendelian and non-Mendelian genetics.

**CO-2 Chromosomal Basis of Inheritance:** Explore the structure and function of chromosomes and their role in heredity.

**CO-3 Molecular Genetics:** Analyze the molecular structure of DNA and RNA and their roles in replication, transcription, and translation.

**CO-4 Gene Expression and Regulation:** Understand how genes are regulated and expressed in prokaryotic and eukaryotic systems.

**CO-5 Mutations and Genetic Variation:** Study types of mutations, their mechanisms, and their effects on organisms.

**CO-6 Population Genetics:** Learn about genetic variation within populations and the principles of Hardy-Weinberg equilibrium.

**CO-7 Genetic Tools and Technologies:** Explore modern genetic tools such as CRISPR, PCR, and gene sequencing techniques.

## Course Content

### Unit- I:

- Pre and Post Mendelian concepts of heredity, Mendelian principles of heredity. Architecture of chromosome; chromonemata, chromosome matrix, chromomeres, centromere, secondary constriction and telomere; special types of chromosomes.

### Unit- II:

- Chromosomal theory of inheritance- cell cycle and cell division- mitosis and meiosis. Probability and Chi-square. Dominance relationships, Epistatic interactions with example.

### Unit- III:

- Multiple alleles, pleiotropism and pseudoalleles, Sex determination and sex linkage, sex limited and sex influenced traits, Blood group genetics, Linkage and its estimation, crossing over mechanisms, chromosome mapping.

### Unit- IV:

- Structural and numerical variations in chromosome and their implications, Use of haploids, dihaploids and doubled haploids in Genetics. Mutation, classification, Methods of inducing mutations & CIB technique, mutagenic agents and induction of mutation. Qualitative & Quantitative traits, Polygenes and continuous variations, multiple factor hypothesis, Cytoplasmic inheritance. Genetic disorders.

### Unit- V:

- Nature, structure & replication of genetic material. Protein synthesis, Transcription and translational mechanism of genetic material, Gene concept: Gene structure, function and regulation, Lac and Trp operons.

### Practical:

Study of microscope. Study of cell structure. Mitosis and Meiosis cell division. Experiments on monohybrid, dihybrid, trihybrid, test cross and back cross, Experiment on epistatic interactions including test cross and back cross, Practice on mitotic and meiotic cell division, Experiments on probability and Chi-square test. Determination of linkage and cross-over analysis (through two point test cross and three point test cross data). Study on sex linked inheritance in *Drosophila*. Study of models on DNA and RNA structures.

## **BAG-104:Agricultural Microbiology**

### **CO: COURSE OBJECTIVE**

**CO-1Soil Microbiology:** The study of microorganisms in the soil, their role in nutrient cycling, and their impact on soil health and fertility.

**CO-2Plant-Microbe Interactions:** The relationship between microorganisms and plants, including beneficial interactions (such as nitrogen-fixing bacteria) and harmful ones (such as plant pathogens).

**CO-3Microbial Ecology:** The diversity and ecology of microbes in agricultural environments, and how they interact with each other and the plants they affect.

**CO-4Biological Control of Pests and Diseases:** The use of microorganisms to control plant diseases and pests in an environmentally friendly way.

**CO-5Microbial Biotechnologies in Agriculture:** How biotechnology and genetic engineering are used to enhance beneficial microbial functions in agriculture (e.g., bio fertilizers, bio pesticides).

**CO-6Waste Management in Agriculture:** The role of microorganisms in decomposing organic waste and producing compost or bioenergy.

**CO-7Food Safety and Microbes:** The study of microorganisms involved in food production, processing, and preservation, including beneficial probiotics and harmful pathogens.

## **Course Contents**

### **Unit- I:**

- Introduction. Microbial world: Prokaryotic and eukaryotic microbes. Bacteria: cell structure, chemoautotrophy, photoautotrophy, growth. Bacterial genetics:

### **Unit- II:**

- Genetic recombination- transformation, conjugation and transduction, plasmids, transposon.

### **Unit- III:**

- Role of microbes in soil fertility and crop production: Carbon, Nitrogen, Phosphorus and Sulphur cycles.

### **Unit- IV:**

- Biological nitrogen fixation- symbiotic, associative and asymbiotic. Azolla, blue green algae and mycorrhiza. Rhizosphere and phyllosphere.

### **Unit- V:**

- Microbes in human welfare: silage production, biofertilizers, biopesticides, bio fuel production and biodegradation of agro-waste.

### **Practical:**

Introduction to microbiology laboratory and its equipments; Microscope- parts, principles of microscopy, resolving power and numerical aperture. Methods of sterilization. Nutritional media and their preparations. Enumeration of microbial population in soil- bacteria, fungi, actinomycetes. Methods of isolation and purification of microbial cultures. Isolation of Rhizobium from legume root nodule. Isolation of Azotobacter from soil. Isolation of Azospirillum from roots. Isolation of BGA. Staining and microscopic examination of microbes.

## **BAG-106:Soil and Water Conservation Engineering**

### **CO: COURSE OBJECTIVE**

**CO-1 Understand the principles of soil and water conservation:** Learn about the erosion process, types of erosion, and factors affecting soil erosion. Study the impact of erosion on agriculture, environment, and infrastructure.

**CO-2 Examine soil-water relationships:** Understand soil-water retention and its effect on soil fertility and crop production. Study infiltration, percolation, and water holding capacity of soils.

**CO-3 Learn about soil erosion control techniques:** Study various erosion control methods like contour plowing, terracing, and grass waterways. Understand vegetative, structural, and mechanical erosion control measures.

**CO-4 Explore water conservation strategies:** Understand the techniques used to conserve water in agricultural systems, such as rainwater harvesting, water storage, and irrigation efficiency. Learn about water management practices like mulching and soil moisture management.

**CO-5 Assess land and water resources:** Understand methods for evaluating soil erosion risk, water availability, and land suitability for conservation practices. Learn to design conservation measures based on site-specific conditions.

**CO-6 Introduce water harvesting techniques:** Study methods of water harvesting in dry land farming and its relevance to sustainable agriculture.

**CO-7 Foster knowledge of sustainable agricultural practices:** Understand the relationship between conservation techniques and sustainable farming systems. Learn about agroforestry, cover crops, and crop rotation as part of soil and water conservation.

**CO-8 Analyze the socio-economic aspects:** Understand the socio-economic importance of soil and water conservation in rural development. Study the policies and practices related to water conservation at regional and global levels.

## Course Content

### Unit- I:

- Introduction to Soil and Water Conservation, causes of soil erosion. Definition and agents of soil erosion, water erosion.

### Unit- II:

- Forms of water erosion. Gully classification and control measures. Soil loss estimation by universal Loss.

### Unit- III:

- Soil Equation. Soil loss measurement techniques. Principles of erosion control: Introduction to contouring, strip cropping. Contour bund.

### Unit- IV:

- Graded bund and bench terracing. Grassed waterways and their design. Water harvesting and its techniques.

### Unit- V:

- Wind erosion: mechanics of wind erosion, types of soil movement. Principles of wind erosion control and its control measures.

### Practical:

General status of soil conservation in India. Calculation of erosion index. Estimation of soil loss. Measurement of soil loss. Preparation of contour maps. Design of grassed waterways. Design of contour bunds. Design of graded bunds. Design of bench terracing system. Problem on wind erosion.

## **BAG-108: Fundamentals of Crop Physiology**

### **CO: COURSE OBJECTIVE**

**CO-1 Photosynthesis and Respiration:** Understanding how plants convert light into energy, the process of respiration, and how these processes affect crop growth and yield.

**CO-2 Water Relations and Stress Physiology:** Exploring how water is absorbed, transported, and utilized in crops, as well as the effects of water stress on plant health and productivity.

**CO-3 Nutrient Uptake and Metabolism:** Examining how crops absorb nutrients from the soil, how these nutrients are utilized in plant growth, and the physiological effects of nutrient deficiencies.

**CO-4 Reproductive Physiology:** Studying the processes of flowering, pollination, fertilization, and seed development, which are crucial for crop production.

**CO-5 Environmental Interactions:** Investigating how factors like light, temperature, humidity, and soil conditions affect crop physiology and how plants adapt to different environments.

**CO-6 Growth Regulators and Hormones:** Analyzing the role of plant hormones in regulating growth, development, and responses to environmental stimuli.

**CO-7 Crop Yield and Improvement:** Understanding the physiological basis of crop yield, including factors that influence productivity, and how crop physiology can inform breeding and management practices to improve yields.

**CO-8 Stress Physiology:** Investigating how crops respond to abiotic and biotic stresses, including drought, salinity, pests, and diseases, and how these responses impact crop productivity.

## Course Content

### Unit- I:

- Introduction to crop physiology and its importance in Agriculture; Plant cell: an Overview; Diffusion and osmosis; Absorption of water, transpiration and Stomatal Physiology; Mineral nutrition of Plants:

### Unit- II:

- Functions and deficiency symptoms of nutrients, nutrient uptake mechanisms; Photosynthesis: Light and Dark reactions, C<sub>3</sub>, C<sub>4</sub> and CAM plants;

### Unit- III:

- Respiration: Glycolysis, TCA cycle and electron transport chain; Fat Metabolism: Fatty acid synthesis and Breakdown; Plant growth regulators:

### Unit- IV:

- Physiological roles and agricultural uses, Physiological aspects of growth and development of major crops:

### Unit- V:

- Growth analysis, Role of Physiological growth parameters in crop productivity.

### Practical:

Study of plant cells, structure and distribution of stomata, imbibitions, osmosis, plasmolysis, measurement of root pressure, rate of transpiration, Separation of photosynthetic pigments through paper chromatography, Rate of transpiration, photosynthesis, respiration, tissue test for mineral nutrients, estimation of relative water content, Measurement of photosynthetic CO<sub>2</sub> assimilation by InfraRed Gas Analyser (IRGA).

## **BAG-110: Fundamentals of Agricultural Economics**

### **CO: COURSE OBJECTIVE**

**CO-1 Understanding Economic Principles:** Introducing basic concepts in economics, such as supply and demand, market equilibrium, and price mechanisms. Understanding the role of agriculture in the broader economy and its relationship with sectors like manufacturing, services, and trade.

**CO-2 Analyzing Agricultural Markets:** Understanding how agricultural markets function, including commodity markets (e.g., grains, livestock). Exploring the factors that affect the supply and demand of agricultural products. Studying market structures like perfect competition, monopoly, and oligopoly within agriculture.

**CO-3 Evaluating Farm Production and Cost Structures:** Analyzing farm production functions, and the relationship between inputs (land, labor, capital) and outputs (crops, livestock). Understanding cost structures in farming, including fixed and variable costs, total costs, and profitability.

**CO-4 Examining Agricultural Policy and Government Intervention:** Studying government policies in agriculture such as subsidies, tariffs, and price supports. Understanding the impact of trade policies and international agricultural markets. Analyzing the role of public institutions like agricultural extension services and rural development programs.

**CO-5 Agricultural Risk and Uncertainty:** Exploring sources of risk in agriculture (e.g., climate, pest outbreaks, and market fluctuations) and how farmers manage these risks. Understanding insurance, futures markets, and diversification strategies.

**CO-6 Farm Management and Decision-Making:** Teaching techniques for optimizing resource allocation, production decisions, and financial management on farms. Understanding decision-making tools like budgeting, break-even analysis, and financial forecasting.

**CO-7 Sustainability and Agricultural Economics:** Exploring the economic aspects of sustainable farming practices and natural resource management. Studying the economics of environmental concerns like soil conservation, water use, and climate change.

## Course Content

### Unit- I:

- Economics: Meaning, scope and subject matter, definitions, activities, approaches to economic analysis; micro and macro economics, positive and normative analysis. Nature of economic theory; rationality assumption, concept of equilibrium, economic laws as generalization of human behavior

### Unit- II:

- Basic concepts: Goods and services, desire, want, demand, utility, cost and price, wealth, capital, income and welfare. Agricultural economics: meaning, definition, characteristics of agriculture, importance and its role in economic development. Agricultural planning and development in the country. Demand: meaning, law of demand, schedule and demand curve, determinants, utility theory; law of diminishing marginal utility, equi-marginal utility principle. Consumer's equilibrium and derivation of demand curve, concept of consumer surplus. Elasticity of demand: concept and measurement of price elasticity, income elasticity and cross elasticity. Production: process, creation of utility, factors of production, input-output relationship.

### Unit- III:

- Law of returns: Law of variable proportions and law of return to scale. Cost: concepts, short run and long run cost curves. Supply: Stock v/s supply, law of supply, schedule, supply curve, determinants of supply, elasticity of supply. Market structure: meaning and types of market, basic features of perfectly competitive and imperfect markets. Price determination under perfect competition; short run and long run equilibrium of firm and industry, shutdown and breakeven points. Distribution theory: meaning, factor market and pricing of factors of production. Concepts of rent, wage, interest and profit.

### Unit- IV:

- National income: Meaning and importance, circular flow, concepts of national income accounting and approaches to measurement, difficulties in measurement. Population: Importance, Malthusian and Optimum population theories, natural and socio-economic determinants, current policies and programmes on population control. Money: Barter system of exchange and its problems, evolution, meaning and functions of money, classification of money, supply, general price index, inflation and deflation.

### Unit- V:

- Banking: Role in modern economy, types of banks, functions of commercial and central bank, credit creation policy. Agricultural and public finance: meaning,

microv/smacrofinance,needforagriculturalfinance,publicrevenueandpublicexpenditure.Tax:meaning,directandindirecttaxes,agriculturaltaxation,VAT.Economic systems: Concepts of economy and its functions, important features ofcapitalistic,socialisticand mixed economies, elementsof economicplanning.

## **BAG-112:FundamentalsofPlantPathology**

### **CO: COURSE OBJECTIVE**

**CO-1Understanding the Principles of Plant Pathology:**Introduce the basic concepts of plant pathology, including disease causation, host-pathogen interactions, and disease development.

**CO-2Identification of Pathogens:**Study different types of plant pathogens such as fungi, bacteria, viruses, nematodes, and phytoplasmas.Learn techniques for identifying these pathogens and understanding their life cycles.

**CO-3Mechanisms of Disease Development:**Explore the process of infection, how pathogens attack plants, and the factors that influence disease progression.

**CO-4Symptoms and Diagnosis of Plant Diseases:**Learn to recognize and diagnose various symptoms of plant diseases, such as lesions, wilting, chlorosis, and necrosis.

**CO-5Epidemiology of Plant Diseases:**Study the factors that influence the spread of diseases, such as environmental conditions, crop rotation, and human activities.

**CO-6Plant Disease Management:**Examine different methods of controlling plant diseases, including chemical, biological, cultural, and genetic approaches.

**CO-7Impact of Plant Diseases:**Understand the economic and ecological impact of plant diseases on agriculture, forestry, and natural ecosystems.

**CO-8Research and Advances in Plant Pathology:**Discuss the latest developments in the field, including new technologies for pathogen detection and disease management strategies.

## Course Contents

### Unit- I:

- Introduction: Importance of plant diseases, scope and objectives of Plant Pathology. History of Plant Pathology with special reference to Indian work. Terms and concepts in Plant Pathology. Pathogenesis. Causes / factors affecting disease development: disease triangle and tetrahedron and classification of plant diseases. Important plant pathogenic organisms, different groups: fungi, bacteria, fastidious vesicular bacteria, phytoplasmas, spiroplasmas, viruses, viroids, algae, protozoa, phanerogamic parasites and nematodes with examples of diseases caused by them. Diseases and symptoms due to abiotic causes.

### Unit- II:

- Fungi: general characters, definition of fungus, somatic structures, types of fungal thalli, fungal tissues, modifications of thallus, reproduction (asexual and sexual). Nomenclature, Binomial system of nomenclature, rules of nomenclature, classification of fungi. Key to divisions, sub-divisions, orders and classes.

### Unit- III:

- Bacteria and mollicutes: general morphological characters. Basic methods of classification and reproduction. Viruses: nature, structure, replication and transmission. Study of phanerogamic plant parasites.

### Unit- IV:

- Nematodes: General morphology and reproduction, classification, symptoms and nature of damage caused by plant nematodes (Heterodera, Meloidogyne, Anguina, Radopholus etc.) Growth and reproduction of plant pathogens. Liberation / dispersal and survival of plant pathogens. Types of parasitism and variability in plant pathogens. Pathogenesis. Role of enzymes, toxins and growth regulators in disease development. Defense mechanism in plants.

### Unit- V:

- Epidemiology: Factors affecting disease development. Principles and methods of plant disease management. Nature, chemical combination, classification, mode of action and formulations of fungicides and antibiotics.

### Practical:

Acquaintance with various laboratory equipments and microscopy. Collection and preservation of disease specimen. Preparation of media, isolation and Koch's postulates

.General study of different structures of fungi. Study of symptoms of various plant diseases. Study of representative fungal genera. Staining and identification of plant pathogenic bacteria. Transmission of plant viruses. Study of phanerogamic plant parasites.

Study of morphological features and identification of plant parasitic nematodes. Sampling and extraction of nematodes from soil and plant material, preparation of nematode mounting. Study of fungicides and their formulations. Methods of pesticide application and their safe use. Calculation of fungicide sprays concentrations.

## **BAG-114: Fundamentals of Entomology**

### **CO: COURSE OBJECTIVES**

**CO-1 Understand the Basic Concepts of Entomology:** Gain knowledge of the fundamental principles of entomology, including the role of insects in ecosystems, human society, and the environment.

**CO-2 Identify and Classify Insect Species:** Develop the ability to identify, classify, and distinguish between major insect orders and families, including understanding their morphological and anatomical features.

**CO-3 Study Insect Physiology:** Learn about the physiological processes of insects, including digestion, respiration, excretion, reproduction, and nervous systems.

**CO-4 Understand Insect Behavior:** Investigate the behavior of insects, including communication, mating, social structures (such as in ants or bees), and response to environmental stimuli.

**CO-5 Explore Insect Ecology:** Understand the ecological roles of insects, including their impact on pollination, decomposition, pest control, and as vectors of diseases.

**CO-6 Investigate Insect Evolution and Development:** Examine the evolutionary history of insects and their development from egg to adult, including metamorphosis and adaptations to various environments.

**CO-7 Learn the Role of Insects in Agriculture and Medicine:** Understand the economic importance of insects, both beneficial (e.g., pollinators) and harmful (e.g., agricultural pests, disease vectors), and their management in pest control and medical contexts.

## Course Contents

### Unit- I:

- History of Entomology in India. Major points related to dominance of Insecta in Animal kingdom. Classification of phylum Arthropoda upto classes. Relationship of class Insecta with other classes of Arthropoda. Morphology: Structure and functions of insect cuticle and molting. Body segmentation. Structure of Head, thorax and abdomen. Structure and modifications of insect antennae, mouth parts, legs, Wing venation, modifications and wing coupling apparatus. Structure of male and female genital organ.

### Unit- II:

- Metamorphosis and diapause in insects. Types of larvae and pupae. Structure and functions of digestive, circulatory, excretory, respiratory, nervous, secretory (Endocrine) and reproductive system, in insects. Types of reproduction in insects. Major sensory organs like simple and compound eyes, chemoreceptor.

### Unit- III:

- Insect Ecology: Introduction, Environment and its components. Effect of abiotic factors – temperature, moisture, humidity, rainfall, light, atmospheric pressure and air currents. Effect of biotic factors – food competition, natural and environmental resistance.

### Unit- IV:

- Categories of pests. Concept of IPM, Practices, scope and limitations of IPM. Classification of insecticides, toxicity of insecticides and formulations of insecticides. Chemical control – importance, hazards and limitations. Recent methods of pest control, repellents, anti feed ants, hormones, attractants, gamma radiation. Insecticides Act 1968- Important provisions. Application techniques of spray fluids. Symptoms of poisoning, first aid and antidotes.

### Unit- V:

- Systematics: Taxonomy – importance, history and development and binomial nomenclature. Definitions of Biotype, Sub-species, Species, Genus, Family and Order. Classification of class Insecta upto Orders, basic groups of present day insects with special emphasis to orders and families of Agricultural importance like Orthoptera: Acrididae, Tettigoniidae, Gryllidae, Gryllotalpidae; Dictyoptera: Mantidae, Blattidae; Odonata; Isoptera: Termitidae; Thysanoptera:

## **BAG-116: Fundamentals of Agricultural Extension Education**

### **CO: COURSE OBJECTIVES**

**CO-1 Understand the Role of Agricultural Extension:** To provide students with an understanding of the importance and role of agricultural extension in enhancing agricultural productivity, promoting sustainable practices, and improving rural livelihoods.

**CO-2 Learn Key Principles of Agricultural Extension:** To introduce students to the fundamental principles, concepts, and theories that guide agricultural extension services and their application in diverse agricultural settings.

**CO-3 Examine Extension Models and Approaches:** To analyze various extension models, approaches, and methodologies used to communicate agricultural knowledge and practices to farmers, communities, and stakeholders.

**CO-4 Develop Communication Skills for Extension Work:** To enhance students' communication and interpersonal skills, including methods for delivering information and facilitating participatory learning within rural communities.

**CO-5 Explore Extension Program Planning and Management:** To teach students how to plan, implement, monitor, and evaluate extension programs and projects that aim to address agricultural and rural development challenges.

**CO-6 Identify Key Stakeholders in Agricultural Extension:** To familiarize students with the key stakeholders in agricultural extension (farmers, government agencies, NGOs, and private sector entities) and their roles in agricultural development.

**CO-7 Promote Critical Thinking in Agricultural Innovation:** To encourage students to critically evaluate agricultural innovations and technologies, assessing their relevance, sustainability, and effectiveness in different socio-economic and environmental contexts.

## Course Content

### Unit- I:

- Education: Meaning, definition & Types; Extension Education- meaning, definition, scope and process; objectives and principles of Extension Education; Extension Programme planning- Meaning, Process, Principles and Steps in Programme Development.

### Unit- II:

- Extension systems in India: extension efforts in pre-independence era (Sriniketan, Marthandam, Firka Development Scheme, Gurgaon Experiment, etc.) and post-independence era (Etawah Pilot Project, Nilokheri Experiment, etc.); various extension/ agriculture development programmes launched by ICAR/ Govt. of India (IADP, IAAP, HYVP, KVK, IVLP, ORP, ND, NATP, NAIP, etc.). New trends in agriculture extension: privatization extension, cyber extension/ e-extension, market-led extension, farmer-led extension, expert systems, etc.

### Unit- III:

- Rural Development: concept, meaning, definition; various rural development programmes launched by Govt. of India. Community Dev.- meaning, definition, concept & principles, Philosophy of C.D. Rural Leadership: concept and definition, types of leaders in rural context; extension administration: meaning and concept, principles and functions.

### Unit- IV:

- Monitoring and evaluation: concept and definition, monitoring and evaluation of extension programmes; transfer of technology: concept and models, capacity building of extension personnel; extension teaching methods: meaning, classification, individual, group and mass contact methods, ICT Applications in TOT (New and Social Media), media mix strategies; communication: meaning and definition;

### Unit- V:

- Principles and Functions of Communication, models and barriers to communication. Agriculture journalism; diffusion and adoption of innovation: concept and meaning, process and stages of adoption, adopter categories.

### Practical:

To get acquainted with university extension system. Group discussion- exercise; handling and use of audio visual equipments and digital camera and LCD projector; preparation and use of AV aids, preparation of extension literature – leaflet, booklet, folder, pamphlet news stories and success stories; Presentation skills exercise; micro teaching exercise; A visit to village to understand the problems being encountered by the villagers/ farmers; to study organization and functioning of DRDA and other development departments at district level; visit to NGO and learning from their experience in rural development; understanding PRA techniques and their application in village development planning; exposure to mass media: visit to community radio and television studio for understanding the process of programme production; script writing, writing for print and electronic media, developing script for radio and television.

## **BAG-118: Communication Skills and Personality Development**

### **CO: COURSE OBJECTIVES**

**CO-1 Enhance Verbal Communication:** To develop effective spoken communication skills, enabling students to express themselves clearly, confidently, and persuasively in various contexts, including public speaking, interviews, and presentations.

**CO-2 Improve Non-Verbal Communication:** To foster an understanding of non-verbal cues such as body language, facial expressions, posture, and eye contact, and how they impact communication.

**CO-3 Develop Listening Skills:** To strengthen active listening abilities, emphasizing the importance of listening for understanding, feedback, and engagement in both personal and professional interactions.

**CO-4 Enhance Written Communication:** To improve written communication skills, including grammar, structure, clarity, and tone, in various formats such as emails, reports, and formal correspondence.

**CO-5 Boost Confidence and Self-Presentation:** To build self-awareness and self-confidence through personal grooming, positive body language, and effective self-presentation techniques in social and professional settings.

**CO-6 Foster Emotional Intelligence:** To develop emotional intelligence skills such as empathy, emotional regulation, and social awareness, enhancing interpersonal relationships and communication effectiveness.

**CO-7 Cultivate Critical Thinking and Problem-Solving:** To encourage critical thinking in communication, allowing students to analyze situations, solve problems effectively, and make informed decisions in both professional and personal environments.

## Course Contents

### Unit- I:

- Communication Skills: Structural and functional grammar; meaning and process of communication, verbal and nonverbal communication;

### Unit- II:

- Listening and note taking, writing skills, oral presentation skills; field diary and lab record; indexing, footnote and bibliographic procedures.

### Unit- III:

- Reading and comprehension of general and technical articles, precis writing, summarizing, abstracting; individual and group presentations, impromptu presentation, public speaking; Group discussion.

### Unit- IV:

- Organizing seminars and conferences.

### Practical:

Listening and note taking, writing skills, oral presentation skills; field diary and lab record; indexing, footnote and bibliographic procedures. Reading and comprehension of general and technical articles, precis writing, summarizing, abstracting; individual and group presentations.

## **BAG-118 A: English Grammar-II**

### **CO: COURSE OBJECTIVES**

**CO-1 Enhance Advanced Understanding of Grammar:** Develop a deeper understanding of complex English grammar structures, including advanced tenses, voice, mood, and conditionals.

**CO-2 Improve Sentence Construction:** Teach students to construct clear, concise, and grammatically correct sentences with an emphasis on variety and sophistication.

**CO-3 Master Complex Sentence Structures:** Explore and practice complex sentence types, including compound-complex sentences, subordination, and coordination.

**CO-4 Refine Use of Modifiers and Clauses:** Equip students with the skills to effectively use adjectives, adverbs, relative clauses, and other modifiers for clarity and precision in writing.

**CO-5 Analyze Punctuation and Syntax:** Develop proficiency in the correct use of punctuation marks (commas, semicolons, colons, etc.) to enhance meaning and readability.

**CO-6 Strengthen Vocabulary through Grammar:** Help students improve vocabulary usage through context and grammar, emphasizing word formation, collocations, and correct usage.

**CO-7 Foster Critical Grammar Application in Writing:** Enable students to apply grammar rules effectively in academic, professional, and creative writing to produce error-free texts.

## **Course Content**

### **Unit I**

Review of Basic Grammar, Parts of speech, sentence structure, and punctuation, Verb Tenses, Present, past, future, and perfect aspects, Modifiers, Adjectives, adverbs, and their placement,

### **Unit II**

Clauses and Sentence Types, Independent, dependent, and compound-complex sentences, Agreement, Subject-verb and pronoun-antecedent agreement, Active vs. Passive Voice, When to use each effectively, Common Grammatical Errors, Misplaced modifiers, comma splices, etc.

### **Unit III**

Punctuation, Advanced usage of commas, semicolons, colons, and dashes, Style and Tone, How grammar affects writing style and audience engagement, Editing and Proofreading Techniques,

### **Unit IV**

Application in Professional Writing, Grammar in resumes, cover letters, and reports, Strategies for self-editing and peer review, Final Review and Assessment

## **BAG-118 B: Soft Skills-II**

### **CO: COURSE OBJECTIVES**

**CO-1 Enhance Communication Skills:** Improve verbal, non-verbal, and written communication abilities to ensure clarity, effectiveness, and professionalism in various settings.

**CO-2 Develop Teamwork and Collaboration:** Foster the ability to work effectively in diverse teams, focusing on cooperation, conflict resolution, and mutual respect in a group environment.

**CO-3 Refine Time Management Techniques:** Teach practical strategies for prioritizing tasks, meeting deadlines, and maintaining productivity in both personal and professional settings.

**CO-4 Cultivate Leadership Abilities:** Develop leadership skills, including decision-making, motivating others, delegating tasks, and leading by example to inspire and guide teams.

**CO-5 Build Emotional Intelligence:** Strengthen self-awareness, empathy, and emotional regulation to better understand oneself and interact with others in a professional environment.

**CO-6 Improve Problem-Solving and Critical Thinking:** Equip students with strategies to approach problems systematically, think critically, and find innovative solutions in a variety of situations.

**CO-7 Promote Conflict Resolution Skills:** Teach effective techniques for managing and resolving conflicts, fostering positive relationships and a harmonious work environment.

## **Course Contents**

### **Unit I**

Presentation Skills, Speaking to a small group and large audience, Barriers to communication and non- verbal communication, Language skills, Types of presentation and use of aids, Effective public speaking.

### **Unit II**

Memory Skills, Memory system, Short term and long term memory, Causes of memory problems, Methods of improving memory, preventing loss of memory.

### **Unit III**

Technical Writing Skills, Defining Technical Communication and Organizing Information, Language in Technical Communication.

### **Unit IV**

Description Vs Narration Vs Instruction, Letters, Memos, Electronic Communication, Formal and Informal Reports.

## **BAG-118 C: Life Management-II**

### **CO: COURSE OBJECTIVES**

**CO-1 Enhance Time Management Skills:** To equip students with advanced techniques for managing their time effectively, prioritizing tasks, and balancing various aspects of life, including work, education, and personal commitments.

**CO-2 Develop Emotional Intelligence:** To help students understand and manage their emotions, build empathy, and improve their interpersonal relationships both personally and professionally.

**CO-3 Master Decision-Making and Problem-Solving:** To teach students methods for making informed and effective decisions, as well as strategies for solving complex life problems with confidence and clarity.

**CO-4 Financial Management and Planning:** To provide students with the knowledge and skills necessary to manage personal finances, including budgeting, investing, and planning for long-term financial goals.

**CO-5 Promote Health and Wellness:** To encourage students to develop habits for maintaining physical, mental, and emotional health through exercise, nutrition, mindfulness, and stress management techniques.

**CO-6 Cultivate Leadership and Social Responsibility:** To foster leadership qualities, enhance teamwork skills, and inspire students to take an active role in their communities through social responsibility initiatives.

**CO-7 Set and Achieve Personal and Professional Goals:** To guide students in setting realistic, measurable, and meaningful short-term and long-term goals, and to provide them with the tools and strategies to achieve them effectively.

## **Course Contents**

### **Unit I**

Basics of Life Management, Ways of Life Management, Effective Reading & Writing, Emotional development, Basics of Character Building.

### **Unit II**

Developing Tools of Life Management, Way to Creative Excellence, Effective Communication & Public Speaking, Developing Ideal Leadership Skill.

### **Unit III**

Spiritual Potential of Personality, Ideal of a successful Personality, Adjustment & Behavioral Skill.

### **Unit IV**

Workshop in campus and local areas.

## **BAG-201:Crop Production Technology–I(Kharif Crops)**

### **CO: COURSE OBJECTIVES**

#### **CO-1 Understanding of Kharif Crops:**

- To provide students with an in-depth knowledge of the different Kharif crops, their classification, and characteristics.

#### **CO-2 Soil and Climate Requirements:**

- To familiarize students with the soil types, climatic conditions, and environmental factors required for successful cultivation of Kharif crops.

#### **CO-3 Crop Improvement:**

- To explore strategies for improving crop yield, quality, and resistance to pests and diseases through breeding programs.

#### **CO-4 Nutrient Management:**

- To teach the application of appropriate fertilizers and manure for enhancing soil fertility and crop yield.

#### **CO-5 Management of Pests and Diseases:**

- To introduce students to the common pests and diseases affecting Kharif crops and their management through both organic and chemical means.

#### **CO-6 Crop Yield and Post-Harvest Technology:**

- To impart knowledge on harvesting techniques, post-harvest handling, and storage practices specific to Kharif crops.

#### **CO-7 Economics and Market Trends:**

- To make students aware of the economics of growing Kharif crops, including cost-benefit analysis, marketing strategies, and market trends for these crops.

## Course Contents

### Unit- I:

- Origin, geographical distribution, economic importance, soil and climatic requirements, varieties, cultural practices and yield of Kharif crops.

### Unit- II:

- Cereals—rice, maize, sorghum, pearl millet and finger millet, pulses—pigeon pea, mung bean and urd bean;

### Unit- III:

- Oilseeds—groundnut, and soybean; fibre crops—cotton & jute;

### Unit- IV:

- Forage crops—sorghum, cowpea, cluster bean and napier.

### Practical:

Rice nursery preparation, transplanting of rice, sowing of soybean, pigeon pea and mung bean. maize, groundnut and cotton, effect of seed size on germination and seedling vigour of kharif season crops, effect of sowing depth on germination of kharif crops, identification of weeds in kharif season crops, top dressing and foliar feeding of nutrients, study of yield contributing characters and yield calculation of kharif season crops, study of crop varieties and important agronomic experiments at experimental farm. study of forage experiments, morphological description of kharif season crops, visit to research centres of related crops.

## **BAG-203:Fundamentals of Plant Breeding**

### **CO: COURSE OBJECTIVES**

**CO-1 Understanding Genetic Principles:** To provide students with a solid foundation in the principles of genetics and heredity as they relate to plant breeding.

**CO-2 Breeding Methods:** To familiarize students with various plant breeding techniques, including traditional and modern methods such as hybridization, selection, and biotechnology.

**CO-3 Crop Improvement:** To explore strategies for improving crop yield, quality, and resistance to pests and diseases through breeding programs.

**CO-4 Evaluation of Breeding Lines:** To teach students how to evaluate and select superior breeding lines based on phenotypic and genotypic traits.

**CO-5 Plant Breeding Research:** To develop skills in designing and conducting breeding experiments, including data collection and analysis.

**CO-6 Ethical Considerations:** To instill an understanding of the ethical implications and societal impacts of plant breeding practices.

**CO-7 Application of Biotechnological Tools:** To introduce students to biotechnological tools and techniques, such as molecular markers and genetic engineering, used in modern plant breeding.

## Course Contents

### Unit- I:

- Historical development, concept, nature and role of plant breeding, major achievements and future prospects; Genetics in relation to plant breeding, modes of reproduction and apomixes, self-incompatibility and male sterility- genetic consequences, cultivar options. Domestication,

### Unit- II:

- Acclimatization and Introduction; Centres of origin/ diversity, components of Genetic variation; Heritability and genetic advance; Genetic basis and breeding methods in self- pollinated crops - mass and pure line selection, hybridization techniques and handling of segregating population;

### Unit- III:

- Multiline concept. Concepts of population genetics and Hardy-Weinberg Law, Genetic basis and methods of breeding cross pollinated crops, modes of selection; Population improvement Schemes- Ear to row method, Modified Ear to Row, recurrent selection schemes; Heterosis and inbreeding depression, development of inbred lines and hybrids, composite and synthetic varieties;

### Unit- IV:

- Breeding methods in asexually propagated crops, clonal selection and hybridization; Maintenance of breeding records and data collection; Wide hybridization and pre-breeding; Polyploidy in relation to plant breeding, mutation breeding- methods and uses;

### Unit- V:

- Breeding for important biotic and abiotic stresses; Biotechnological tools- DNA markers and marker assisted selection. Participatory plant breeding; Intellectual Property Rights, Patenting, Plant Breeders and Farmer's Rights.

### Practical:

Plant Breeder's kit, Study of germplasm of various crops. Study of floral structure of self-pollinated and cross pollinated crops. Emasculation and hybridization techniques in self & cross pollinated crops. Consequences of inbreeding on genetic structure of resulting populations. Study of male sterility system. Handling of segregation populations. Methods of calculating mean, range, variance, standard deviation, heritability. Designs used in plant breeding experiments, analysis of Randomized Block Design. To work out the mode of pollination in a given crop and extent of natural out-crossing. Prediction of performance of double cross hybrids.

## **BAG-205: Agricultural Finance and Cooperation**

### **CO: COURSE OBJECTIVES**

#### **CO-1 Understanding Agricultural Finance:**

- To introduce students to the concept and importance of agricultural finance in supporting farm operations and rural development.

#### **CO-2 Familiarization with Credit Systems:**

- To understand various sources of credit available to farmers, including institutional (banks, cooperatives) and non-institutional (moneylenders, informal sources).

#### **CO-3 Financial Management Skills:**

- To develop financial management skills necessary for effective resource allocation, budgeting, and planning in agricultural enterprises.

#### **CO-4 Cooperative Structure and Functioning:**

- To understand the formation, operation, and management of agricultural cooperatives and their impact on rural economies.

#### **CO-5 Policy and Government Support:**

- To analyze the role of government policies, subsidies, and programs in promoting agricultural finance and cooperative development.

## Course Contents

### Unit- I:

- Agricultural Finance- meaning, scope and significance, credit needs and its role in Indian agriculture. Agricultural credit: meaning, definition, need, classification. Credit analysis: 4 R's, and 3C's of credits. Sources of agricultural finance: institutional and non-institutional sources, commercial banks, social control and nationalization of commercial banks, Micro financing including KCC.

### Unit- II:

- Lead bank scheme, RRBs, Scale of finance and unit cost. An introduction to higher financing institutions – RBI, NABARD, ADB, IMF, world bank, Insurance and Credit Guarantee Corporation of India. Cost of credit. Recent development in agricultural credit.

### Unit- III:

- Preparation and analysis of financial statements – Balance Sheet and Income Statement. Basic guidelines for preparation of project reports- Bank norms – SWOT analysis.

### Unit- IV:

- Agricultural Cooperation – Meaning, brief history of cooperative development in India, objectives, principles of cooperation, significance of cooperatives in Indian agriculture. Agricultural Cooperation in India- credit, marketing, consumer and multi-purpose cooperatives, farmers' service cooperative societies, processing cooperatives, farming cooperatives, cooperative warehousing; role of ICA, NCUI, NCDC, NAFED.

### Practical:

Determination of most profitable level of capital use. Optimum allocation of limited amount of capital among different enterprise. Analysis of progress and performance of cooperatives using published data. Analysis of progress and performance of commercial banks and RRBs using published data. Visit to a commercial bank, cooperative bank and cooperative society to acquire first hand knowledge of their management, schemes and procedures. Estimation of credit requirement of farm business – A case study. Preparation and analysis of balance sheet. A case study. Preparation and analysis of income statement – A case study. Appraisal of a loan proposal. A case study. Techno-economic parameters for preparation of projects. Preparation of Bankable projects for various agricultural products and its value added products. Seminar on selected topics.

## **BAG-207:Agri- Informatics**

### **CO: COURSE OBJECTIVES**

**CO-1 Application of Technology in Agriculture:** Equip students with knowledge on the use of modern technologies like Geographic Information Systems (GIS), remote sensing, big data analytics, and precision farming techniques to enhance agricultural production and resource management.

**CO-2Data Management & Analysis:** Train students to handle large agricultural datasets, analyze them and extract actionable insights to improve farm management practices, crop yield predictions, pest control, and soil health.

**CO-3 Development of Agricultural Software Solutions:** Develop the capability to design and implement software tools for various agricultural sectors, such as crop modeling, irrigation scheduling, market prediction systems, and supply chain management.

**CO-4 Sustainable Agriculture Practices:** Promote understanding of sustainable farming practices by leveraging data-driven technologies to reduce waste, minimize environmental impact, and promote long-term productivity in agriculture.

**CO-5Enhancing Decision-Making in Agriculture:** Foster the ability to make informed decisions based on data, supporting farmers in improving crop management, optimizing inputs (e.g., water, fertilizers), and maximizing overall farm profitability.

**CO-6 Innovation and Research:** Encourage students to engage in research and innovation in agri-informatics, exploring new ways to use technology to address global agricultural challenges such as climate change, resource scarcity, and food security.

## Course Contents

### Unit- I:

- Introduction to Computers, Operating Systems, definition and types, Applications of MS- Office for document creation & Editing, Data presentation, interpretation and graph creation, statistical analysis, mathematical expressions, Database, concepts and types, uses of DBMS in Agriculture, World Wide Web (WWW):

### Unit- II:

- Concepts and components. Introduction to computer programming languages, concepts and standard input/output operations. E-Agriculture, concepts and applications, Use of ICT in Agriculture.

### Unit- III:

- Computer Models for understanding plant processes. IT application for computation of water and nutrient requirement of crops, Computer-controlled devices (automated systems) for Agri-input management, Smartphone Apps in Agriculture for farm advice, market price, postharvest management etc;

### Unit- IV:

- Geospatial technology for generating valuable agri-information. Decision support systems, concepts, components and applications in Agriculture, Agriculture Expert System, Soil Information Systems etc for supporting Farm decisions. Preparation of contingent crop planning using IT tools.

### Practical:

Study of Computer Components, accessories, practice of important DOS Commands. Introduction of different operating systems such as windows, Unix/ Linux, Creating, Files & Folders, File Management. Use of MS-WORD and MS Power-point for creating, editing and presenting a scientific Document. MS-EXCEL - Creating a spreadsheet, use of statistical tools, writing expressions, creating graphs, analysis of scientific data. MS-ACCESS: Creating Database, preparing queries and reports, demonstration of Agri-information system. Introduction to World Wide Web (WWW). Introduction of programming languages. Hands on Crop Simulation Models (CSM) such as DSSAT/Crop-Info/CropSyst/Wofost; Computation of water and nutrient requirements of crop using CSM and IT tools. Introduction of Geospatial Technology for generating valuable information for Agriculture. Hands on Decision Support System. Preparation of contingent crop planning.

## **BAG-209: Farm Machinery and Power**

### **CO: COURSE OBJECTIVES**

**CO-1 Understanding Farm Machinery:** To provide in-depth knowledge about various types of farm machinery (tractors, plows, harvesters, etc.) and their applications in modern agriculture.

**CO-2 Power Systems in Agriculture:** To study the power sources used in agriculture, including the operation and maintenance of engines, motors, and alternative energy systems (solar, bioenergy, etc.).

**CO-3 Technology Integration:** To introduce students to cutting-edge technology such as automated systems, robotics, GPS, and precision farming tools used to optimize agricultural processes.

**CO-4 Machinery Maintenance and Management:** To teach students how to manage, maintain, and repair farm machinery, ensuring optimal performance and reducing downtime in farming operations.

**CO-5 Design and Innovation:** To equip students with the knowledge to design and innovate new farming tools and machinery that can solve existing challenges in agriculture and improve efficiency.

**CO-6 Sustainable Agriculture:** To promote sustainable farming practices by focusing on energy-efficient machinery, reduced environmental impact, and the incorporation of green technologies.

**CO-7 Improving Productivity:** To enable students to use machinery effectively to increase farm productivity, reduce labor costs, and enhance overall agricultural output.

## Course Contents

### Unit- I:

- Status of Farm Power in India, Sources of Farm Power, I.C. engines, working principles of I.C. engines, comparison of two stroke and four stroke cycle engines,

### Unit- II:

- Study of different components of I.C. engine, I.C. engine terminology and solved problems, Familiarization with different systems of I.C. engines:

### Unit- III:

- Air cleaning, cooling, lubrication, fuel supply and hydraulic control system of a tractor, Familiarization with Power transmission system : clutch, gear box, differential and final drive of a tractor,

### Unit- IV:

- Tractor types, Cost analysis of tractor power and attached implement, Familiarization with Primary and Secondary Tillage implement, Implement for hill agriculture, implement for intercultural operations,

### Unit- V:

- Familiarization with sowing and planting equipment, calibration of a seed drill and solved examples, Familiarization with Plant Protection equipment, Familiarization with harvesting and threshing equipment.

### Practical:

Study of different components of I.C. engine. To study air cleaning and cooling system of engine, Familiarization with clutch, transmission, differential and final drive of a tractor, Familiarization with lubrication and fuel supply system of engine, Familiarization with brake, steering, hydraulic control system of engine, Learning of tractor driving, Familiarization with operation of power tiller, Implements for hill agriculture, Familiarization with different types of primary and secondary tillage implements: mould plough, disc plough and disc harrow. Familiarization with seed-cum-fertilizer drill, their seed metering mechanism and calibration, planters and transplanter Familiarization with different types of sprayers and dusters Familiarization with different intercultural equipment, Familiarization with harvesting and threshing machinery.

# **BAG-211: Production Technology for Vegetables and Spices**

## **CO: COURSE OBJECTIVES**

### **CO-1 Understanding the Basics of Vegetable and Spice Production:**

- Provide foundational knowledge of the various vegetables and spices, their classification, and importance in human nutrition and economy.

### **CO-2 Cultivation Practices and Techniques:**

- Develop skills in selecting suitable varieties of vegetables and spices for different regions.

### **CO-3 Soil and Climate Requirements:**

- Equip students with the understanding of the specific soil, temperature, and climatic conditions needed for optimum growth of vegetables and spices.

### **CO-4 Innovative Production Practices:**

- Introduce advanced and innovative production techniques, such as hydroponics, vertical farming, and protected cultivation, to improve productivity and sustainability.

### **CO-5 Integrated Pest Management (IPM) and Disease Control:**

- Educate students on integrated pest management (IPM) strategies and organic practices to minimize the use of chemical pesticides and enhance food safety.

### **CO-6 Post-Harvest Management:**

- Focus on proper harvesting, handling, packaging, and storage techniques to minimize losses and preserve the quality of vegetables and spices for both local consumption and export.

### **CO-7 Sustainable Agricultural Practices:**

- Promote environmentally sustainable practices, water conservation methods, and climate-resilient strategies in vegetable and spice production.

## Course Contents

### Unit- I:

- Importance of vegetables & spices in human nutrition and national economy, kitchen gardening, brief about origin, area, climate, soil

### Unit- II:

- Improved varieties and cultivation practices such as time of sowing, transplanting techniques, planting distance, fertilizer requirements, irrigation, weed management, harvesting and yield, physiological disorders,

### Unit- III:

- Important vegetable and spices such as Tomato, Brinjal, Chilli, Capsicum, Cucumber, Melons, Gourds, Pumpkin, French bean, Peas; Cole crops such as Cabbage, Cauliflower, Knol-khol;

### Unit- IV:

- Bulb crops such as Onion, Garlic; Root crops such as Carrot, Radish, Beetroot; Tuber crops such as Potato; Leafy vegetables such as Amaranth, Palak. Perennial vegetables

### Practical:

Identification of vegetables & spice crops and their seeds. Nursery raising. Direct seed sowing and transplanting. Study of morphological characters of different vegetables & spices. Fertilizer applications. Harvesting & preparation for market. Economics of vegetables and spice cultivation.

# **BAG-213:Environmental Studiesand DisasterManagement**

## **CO: COURSE OBJECTIVES**

### **CO-1Understanding the Basics of Vegetable and Spice Production:**

- Provide foundational knowledge of the various vegetables and spices, their classification, and importance in human nutrition and economy.

### **CO-2Cultivation Practices and Techniques:**

- Develop skills in selecting suitable varieties of vegetables and spices for different regions.

### **CO-3 Soil and Climate Requirements:**

- Equip students with the understanding of the specific soil, temperature, and climatic conditions needed for optimum growth of vegetables and spices.

### **CO-4 Innovative Production Practices:**

- Introduce advanced and innovative production techniques, such as hydroponics, vertical farming, and protected cultivation, to improve productivity and sustainability.

### **CO-5 Integrated Pest Management (IPM) and Disease Control:**

- Educate students on integrated pest management (IPM) strategies and organic practices to minimize the use of chemical pesticides and enhance food safety.

### **CO-6Post-Harvest Management:**

- Focus on proper harvesting, handling, packaging, and storage techniques to minimize losses and preserve the quality of vegetables and spices for both local consumption and export.

### **CO-7Sustainable Agricultural Practices:**

- Promote environmentally sustainable practices, water conservation methods, and climate-resilient strategies in vegetable and spice production.

## Course Contents

### Unit- I:

- Multidisciplinary nature of environmental studies Definition, scope and importance. Natural Resources: Renewable and non-renewable resources, Natural resources and associated problems. a) Forest resources: Use and over-exploitation, deforestation, case studies. Timber extraction, mining, dams and their effects on forest and tribal people. b) Water resources: Use and over-utilization of surface and ground water, floods, drought, conflicts over water, dams-benefits and problems. c) Mineral resources: Use and exploitation, environmental effects of extracting and using mineral resources, case studies.

### Unit- II:

- d) Food resources: World food problems, changes caused by agriculture and overgrazing, effects of modern agriculture, fertilizer-pesticide problems, waterlogging, salinity, case studies. e) Energy resources: Growing energy needs, renewable and non-renewable energy sources, use of alternate energy sources. Case studies. f) Land resources: Land as a resource, land degradation, man induced landslides, soil erosion and desertification. • Role of an individual in conservation of natural resources. • Equitable use of resources for sustainable lifestyles.

### Unit- III:

- Ecosystems: Concept of an ecosystem, Structure and function of an ecosystem, Producers, consumers and decomposers, Energy flow in the ecosystem.

### Unit- IV:

- Ecological succession, Food chains, food webs and ecological pyramids. Introduction, types, characteristic features, structure and function of the following ecosystem: a. Forest ecosystem b. Grassland ecosystem c. Desert ecosystem d. Aquatic ecosystems (ponds, streams, lakes, rivers, oceans, estuaries)

## **BAG-215:Statistical Methods**

### **CO: COURSE OBJECTIVES**

**CO-1Descriptive Statistics:** This method involves summarizing and describing the main features of a dataset. It includes measures like mean, median, mode, variance, standard deviation, and range to describe the central tendency and spread of data.

**CO-2Inferential Statistics:** This approach makes inferences or predictions about a population based on a sample of data. It involves hypothesis testing, confidence intervals, and regression analysis to draw conclusions beyond the sample data.

**CO-3Probability Theory:** The study of randomness and uncertainty. Probability distributions (such as normal, binomial, or Poisson distributions) are used to model and predict the likelihood of various outcomes.

**CO-4Regression Analysis:** A method for modeling the relationship between one dependent variable and one or more independent variables. Linear regression, logistic regression, and other types of regression are used to predict or explain the behavior of a variable.

**CO-5Analysis of Variance (ANOVA):** ANOVA is used to test for differences between two or more groups or treatments. It compares means across groups and helps determine if at least one group mean is significantly different from the others.

**CO-6Chi-Square Test:** A statistical test used to determine if there is a significant association between categorical variables. It is often used in testing hypotheses about the relationship between observed and expected frequencies.

**CO-7Time Series Analysis:** This method involves analyzing data points collected or recorded at specific time intervals. It is used for forecasting and understanding trends, seasonality, and cyclic behaviors in data.

## Course Contents

### Unit- I:

- Introduction to Statistics and its Applications in Agriculture, Graphical Representation of Data, Measures of Central Tendency & Dispersion,

### Unit- II:

- Definition of Probability, Addition and Multiplication Theorem (without proof). Simple Problems Based on Probability. Binomial & Poisson Distributions,

### Unit- III:

- Definition of Correlation, Scatter Diagram. Karl Pearson's Coefficient of Correlation. Linear Regression Equations. Introduction to Test of Significance, One sample & two sample test t for Means, Chi-Square Test of Independence of Attributes in  $2 \times 2$  Contingency Table.

### Unit- IV:

- Introduction to Analysis of Variance, Analysis of One Way Classification. Introduction to Sampling Methods, Sampling versus Complete Enumeration, Simple Random Sampling with and without replacement, Use of Random Number Tables for selection of Simple Random Sample.

### Practical:

Graphical Representation of Data. Measures of Central Tendency (Ungrouped data) with Calculation of Quartiles, Deciles & Percentiles. Measures of Central Tendency (Grouped data) with Calculation of Quartiles, Deciles & Percentiles. Measures of Dispersion (Ungrouped Data). Measures of Dispersion (Grouped Data). Moments, Measures of Skewness & Kurtosis (Ungrouped Data). Moments, Measures of Skewness & Kurtosis (Grouped Data). Correlation & Regression Analysis. Application of One Sample t-test. Application of Two Sample Fisher's t-test. Chi-Square test of Goodness of Fit. Chi-Square test of Independence of Attributes for  $2 \times 2$  contingency table. Analysis of Variance One Way Classification. Analysis of Variance Two Way Classification. Selection of random sampling Simple Random Sampling.

## **BAG-215A Introduction to Mathematical Programming**

### **CO: COURSE OBJECTIVES**

#### **CO-1 Understand the Basics of Mathematical Programming:**

- Learn the fundamental concepts of mathematical programming, including optimization problems, decision variables, constraints, and objective functions.

#### **CO -2 Formulate Optimization Problems:**

- Develop the ability to translate real-world problems into mathematical programming models. This includes identifying objectives and constraints in practical situations.

#### **CO-3 Learn Different Types of Optimization Problems:**

- Explore various types of optimization problems, such as linear programming (LP), integer programming (IP), and nonlinear programming (NLP).

#### **CO-4 Understand and Apply Linear Programming Techniques:**

- Gain proficiency in solving linear programming problems using methods like the Simplex algorithm, graphical methods, and duality theory.

#### **CO -5 Explore Integer and Mixed-Integer Programming:**

- Learn how to solve problems involving integer constraints, and understand the challenges and techniques for solving mixed-integer programming (MIP) problems.

#### **CO-6 Interpret and Analyze Results:**

- Develop the skills to analyze the results of optimization problems, including sensitivity analysis, interpreting dual variables, and evaluating the quality of the solution.

#### **CO -7 Introduction to Software and Tools for Mathematical Programming:**

- Become familiar with software tools (like Excel Solver, Python, Gurobi, or CPLEX) for modeling and solving optimization problems, and understand how to apply these tools to practical problems.

## Course Contents

### Unit I

Introduction to the field of mathematical programming. Basic concepts and notation. Linear programs formulation through examples from engineering / business decision making problems; preliminary theory and geometry of linear programs, basic feasible solution.

### Unit II

simplex method, variants of simplex method, like two phase method and revised simplex method; duality and its principles, interpretation of dual variables, dual simplex method, primal-dual method; complexity of simplex method.

### Unit III

linear integer programs, their applications in real decision making problems, cutting plane and branch and bound methods, transportation problems, assignment problems, network maximum flow problems.

### Unit IV

Ellipsoid method, Karmarkar's interior point method; nonlinear programming, Lagrange multipliers, Farkas lemma, constraint qualification, KKT optimality conditions, sufficiency of KKT under convexity; quadratic programs.

### Unit V

Wolfe method, applications of quadratic programs in some domains like portfolio optimization and support vector machines, etc. Integer programming problems, the branch and bound method. Formulating the mathematical model for linear problems, primaldual relationship. Sensitivity analysis.

## **BAG-215B Introduction to Modeling and Simulation**

### **CO: COURSE OBJECTIVES**

#### **CO-1 Understanding the Basics of M&S:**

Learn the foundational concepts of modeling and simulation, including different types of models (physical, mathematical, and computational) and the role of simulation in understanding complex systems.

#### **CO-2 Differentiate between Types of Models:**

Understand the distinction between continuous and discrete models, deterministic and stochastic models, and their respective applications in real-world systems.

#### **CO-3 Identify Components of a Simulation:**

Gain insight into the key elements of a simulation, such as input data, model logic, and output analysis. Recognize the importance of each in the simulation process.

#### **CO-4 Application of M&S in Various Fields:**

Explore how modeling and simulation are used in industries such as aerospace, healthcare, economics, manufacturing, and environmental science for decision-making and problem-solving.

#### **CO-5 Learn Simulation Methodologies:**

Study various simulation methodologies, including Monte Carlo simulations, discrete event simulation, agent-based modeling, and system dynamics, along with their appropriate applications.

#### **CO-6 Model Validation and Verification:**

Understand the processes of model verification (ensuring the model is implemented correctly) and validation (ensuring the model accurately represents the real system), and their importance in achieving reliable results.

#### **CO-7 Ethical and Practical Considerations:**

Discuss the ethical implications of using models and simulations in decision-making, along with the challenges involved in modeling real-world systems accurately, such as uncertainty and computational limits.

## Course Contents

### Unit I

Introduction: System, environment, input and output variables, State variables; Static and Dynamic systems; Hierarchy of knowledge about a system and Modeling Strategy, Physical Modeling: Dimensions analysis, Dimensionless grouping of input and output variables of find empirical relations, similarity criteria and their application to physical models.

### Unit II

Modeling of System with Known Structure: Review of conservation laws and the governing equation for heat, mass and momentum transfer, Deterministic model-(a) distributed parameter models in terms of partial identification and their solutions and (b) lumped parameter models in terms of differential and difference equations, state space model, transfer functions block diagram and sub systems, stability of transfer functions, modeling for control.

### Unit III

Optimizations and Design of Systems: Summary of gradient based techniques: Nontraditional Optimizations techniques (1) genetic Algorithm (GA) - coding, GA operations elitism, Application using MATLAB :(ii) Simulated Annealing.

### Unit IV

Neural Network Modeling of Systems only with Input-output Database: Neurons, architecture of neural networks, knowledge representation, learning algorithm. Multilayer feed forward network and its back propagation learning algorithm, Application to complex engineering systems and strategy for optimum output.

### Unit V

Modeling Based on Expert Knowledge: Fuzzy sets, Membership functions, Fuzzy Inference systems, Expert Knowledge and Fuzzy Models, Design of Fuzzy Controllers, Simulation of Engineering Systems: Monte-Carlo simulation, Simulation of continuous and discrete processes with suitable examples from engineering problems.

## **BAG-215C Algebraic Techniques and Semi definite Optimization**

### **CO: COURSE OBJECTIVES**

**CO -1 Fundamentals of Algebraic Techniques:** Learn the basics of linear algebra, including matrix theory, eigenvalues, and eigenvectors, which are essential tools in optimization. Understand the concept of positive semi definite (psd) matrices and their relevance in optimization problems.

**CO-2 Introduction to Optimization:** Gain a foundational understanding of optimization theory, especially convex optimization. Learn about different types of optimization problems, including linear and nonlinear programming.

**CO-3 Semi definite Programming (SDP):** Understand what semi definite programming is and how it generalizes linear programming to matrix variables. Explore the key properties of SDPs and how they can be formulated and solved.

**CO-4 Duality Theory:** Study the duality of optimization problems, focusing on how primal and dual problems are related in semi definite programming. Learn about the duality gap and its significance in solving SDPs.

**CO-5 Applications of Semi definite Optimization:** Examine real-world applications of SDP in areas like control theory, machine learning, structural optimization, and quantum mechanics. Explore how semi definite optimization is used in approximation algorithms and to solve problems in combinatorial optimization.

**CO-6 Numerical Methods for Solving SDPs:** Understand the computational methods used to solve semi definite programs, including interior-point methods and other algorithms. Learn how to implement these methods using software tools such as MATLAB, Python, or specialized optimization solvers.

**CO -7 Algebraic Structure in Optimization:** Explore how algebraic structures, such as matrix factorizations and linear algebraic properties, can simplify and improve the efficiency of solving SDPs. Investigate how algebraic techniques contribute to understanding the geometry of optimization problems.

## Course Contents

### Unit I

Semi definite programming (I), Semi definite programming (II), Algebra review, Univariate polynomials, Resultants and discriminants, Hyperbolic polynomials, SDP representability,

### Unit II

Newton polytopes/BKK bound, Sums of squares (I), Sums of squares (II), SOS Applications, Varieties, Ideals, Groebner bases, Nullstellensatz, Complexity analysis of interior point methods

### Unit III

Zero dimensional systems (I), Zero dimensional systems (II), Quantifier elimination, Real Nullstellensatz, Representation theorems, Practical implementations of semi definite programs

### Unit IV

Symmetry reduction methods, Apps: polynomial solving, Markov chains, Graph theoretic apps, Applications in control theory, machine learning, and combinatorial optimization

## **BAG-217 Livestock and Poultry Management**

### **CO: COURSE OBJECTIVES**

**CO-1 Understanding Livestock and Poultry Types:** Identify and classify various types of livestock and poultry breeds, including their characteristics, uses, and the role they play in agriculture and the economy.

**CO -2 Animal Health Management:** Learn the basic principles of animal health, including preventive measures, common diseases in livestock and poultry, and their treatment and control methods.

**CO-3 Animal Nutrition and Feeding:** Understand the nutritional needs of livestock and poultry, including the types of feed and their role in growth, reproduction, and overall health.

**CO-4 Housing and Environmental Management:** Explore the importance of proper housing, space requirements, and environmental conditions for livestock and poultry to ensure their well-being and productivity.

**CO-5 Reproductive Management:** Learn the principles of reproduction in livestock and poultry, including breeding techniques, estrous cycles, and the management of breeding programs.

**CO-6 Production Systems and Productivity:** Investigate the different livestock and poultry production systems (e.g., free-range, intensive, organic) and the factors that influence productivity, such as genetics, environment, and management practices.

**CO-7 Economic Aspects of Livestock and Poultry Farming:** Examine the economic considerations in livestock and poultry management, including cost analysis, market trends, and financial planning for sustainable farm operations.

## Course Contents

### Unit- I:

- Role of livestock in the national economy. Reproduction in farm animals and poultry. Housing principles, space requirements for different species of livestock and poultry. Management of calves, growing heifers and milch animals.

### Unit- II:

- Management of sheep, goat and swine. Incubation, hatching and brooding. Management of growers and layers. Important Indian and exotic breeds of cattle, buffalo, sheep, goat, swine and poultry. Improvement of farm animals and poultry.

### Unit- III:

- Digestion in livestock and poultry. Classification of feedstuffs. Proximate principles of feed. Nutrients and their functions. Feed ingredients for ration for livestock and poultry. Feed supplements and feed additives. Feeding of livestock and poultry.

### Unit- IV:

- Introduction of livestock and poultry diseases. Prevention (including vaccination schedule) and control of important diseases of livestock and poultry.

### Practical:

External body parts of cattle, buffalo, sheep, goat, swine and poultry. Handling and restraining of livestock. Identification methods of farm animals and poultry. Visit to IDF and IPF to study breeds of livestock and poultry and daily routine farm operations and farm records. Judging of cattle, buffalo and poultry. Culling of livestock and poultry. Planning and layout of housing for different types of livestock. Computation of rations for livestock. Formulation of concentrate mixtures. Clean milk production, milking methods. Hatchery operations, incubation and hatching equipments. Management of chicks, growers and layers. Debeaking, dusting and vaccination. Economics of cattle, buffalo, sheep, goat, swine and poultry production.

## **BAG-202: Crop Production Technology–II (Rabi Crops)**

### **CO: COURSE OBJECTIVES**

**CO-1 Familiarize students with rabi crops:** Teach the types, characteristics, and importance of various rabi crops, such as wheat, barley, mustard, gram, peas, and others.

**CO-2 Develop technical knowledge:** Impart knowledge on the appropriate agronomic practices for rabi crop cultivation, including sowing techniques, irrigation, nutrient management, weed control, pest and disease management, and harvesting.

**CO-3 Understand climatic and soil conditions:** Enable students to understand the climatic conditions and soil types best suited for rabi crops and how to optimize environmental factors for successful crop production.

**CO-4 Explore modern technologies:** Introduce modern agricultural technologies and innovations that enhance productivity, such as mechanization, precision farming, and the use of improved crop varieties.

**CO-5 Promote sustainable practices:** Educate students on sustainable farming practices, efficient water usage, soil health management, and integrated pest management (IPM) for rabi crop production.

**CO-6 Increase crop productivity and quality:** Equip students with skills to improve both the yield and quality of rabi crops through scientific management and adoption of best agricultural practices.

**CO-7 Problem-solving and decision-making:** Develop problem-solving and decision-making abilities in the context of crop management for different rabi crops under diverse field conditions.

## Course Contents

### Unit- I:

- Origin, geographical distribution, economic importance

### Unit- II:

- Soil and climatic requirements, varieties, cultural practices and yield of Rabi crops; cereals – wheat and barley, pulses – chickpea, lentil, peas,

### Unit- III:

- Oilseeds – rapeseed, mustard and sunflower; sugar crops – sugarcane;

### Unit- IV:

- Medicinal and aromatic crops – mentha, lemongrass and citronella,

### Unit- V:

- Forage crops – berseem, lucerne and oat.

### Practical:

Sowing methods of wheat and sugarcane, identification of weeds in rabi season crops, study of morphological characteristics of rabi crops, study of yield contributing characters of rabi season crops, yield and juice quality analysis of sugarcane, study of important agronomic experiments of rabi crops at experimental farms. Study of rabi forage experiments, oil extraction of medicinal crops, visit to research stations of related crops.

## **BAG-204: Production Technology for Ornamental Crops, MAP and Landscaping**

### **CO: COURSE OBJECTIVES**

**CO-1 Understanding the Importance of Ornamental Crops and Landscaping:** To familiarize students with the role of ornamental plants in enhancing aesthetics and improving the quality of human environments, including urban, suburban, and rural landscapes.

**CO-2 Knowledge of Medicinal and Aromatic Plants (MAP):** To introduce the cultivation practices, uses, and economic importance of medicinal and aromatic plants in healthcare, pharmaceuticals, and the fragrance industry.

**CO-3 Cultivation Practices:** To study the best practices in the propagation, cultivation, and maintenance of ornamental plants and MAPs.

**CO-4 Landscape Design and Management:** To develop skills in the planning and design of landscapes using a variety of ornamental plants, including lawn management, flower beds, and shrubbery.

**CO-5 Environmental Impact and Sustainability:** To explore the environmental benefits of ornamental and medicinal plants, such as improving air quality, conserving biodiversity, and mitigating the effects of climate change.

**CO-6 Encourage Circular Economy in Agriculture:** To promote waste-to-energy processes (e.g., using agricultural by-products for bioenergy production) to create a circular economy model in agriculture.

**CO-7 Support Rural Development:** To contribute to the socio-economic development of rural areas by providing renewable energy access, creating green jobs, and improving agricultural resilience.

## Course Contents

### Unit- I:

- Importance and scope of ornamental crops, medicinal and aromatic plants and landscaping. Principles of landscaping. Landscape uses of trees, shrubs and climbers.

### Unit- II:

- Production technology of important cut flowers like rose, gerbera, carnation, lily and orchids under protected conditions and gladiolus, tuberose, chrysanthemum under open conditions.

### Unit- III:

- Package of practices for loose flowers like marigold and jasmine under open conditions.

### Unit- IV:

- Production technology of important medicinal plants like ashwagandha, asparagus, aloe, costus, Cinnamomum, periwinkle, isabgol and aromatic plants like mint, lemongrass, citronella, palmarosa, ocimum, rose, geranium, vetiver.

### Unit- V:

- Processing and value addition in ornamental crops and MAPs produce.

### Practical:

Identification of Ornamental plants. Identification of Medicinal and Aromatic Plants. Nursery bed preparation and seed sowing. Training and pruning of Ornamental plants. Planning and layout of garden. Bed preparation and planting of MAP. Protected structures – care and maintenance. Intercultural operations in flowers and MAP. Harvesting and post-harvest handling of cut and loose flowers. Processing of MAP. Visit to commercial flower/MAP unit

## **BAG-206 Renewable Energy and Green Technology**

### **CO: COURSE OBJECTIVES**

**CO -1 Understand the Principles of Renewable Energy:** Develop a solid understanding of the basic principles and technologies behind renewable energy sources, such as solar, wind, geothermal, hydro, and biomass.

**CO-2 Evaluate the Environmental Impact of Energy Systems:** Analyze and compare the environmental impacts of conventional and renewable energy sources, focusing on sustainability, carbon footprints, and ecological consequences.

**CO -3 Assess the Technological Advancements in Green Technology:** Study the latest technological innovations in green technology, including energy-efficient appliances, smart grids, and carbon capture technologies.

**CO-4 Explore the Economics of Renewable Energy:** Understand the economic challenges and opportunities in renewable energy, including cost analysis, financing, and government incentives that promote clean energy solutions.

**CO-5 Analyze Policy and Regulatory Frameworks:** Investigate the global and local policies, regulations, and international agreements that shape the development and deployment of renewable energy and green technologies.

**CO-6 Design and Implement Renewable Energy Projects:** Learn how to design, plan, and implement renewable energy projects, including feasibility studies, site assessments, and integration with existing energy infrastructures.

**CO7 Promote Sustainable Practices and Energy Efficiency:** Encourage the adoption of energy-efficient practices and sustainable energy solutions across industries and communities, emphasizing the role of green technology in mitigating climate change.

## Course Contents

### Unit- I:

- Classification of energy sources, contribution of these sources in agricultural sector, Familiarization with biomass utilization for biofuel production and their application,

### Unit- II:

- Familiarization with types of biogas plants and gasifiers, biogas, bioalcohol, biodiesel and biooil production and their utilization as bioenergy resource,

### Unit- III:

- Introduction of solar energy, collection and their application, Familiarization with solar energy gadgets: solar cooker, solar water heater, application of solar energy: solar drying, solar pond, solar distillation,

### Unit- IV:

- Solar photovoltaic system and their application, introduction of wind energy and their application.

### Practical:

Familiarization with renewable energy gadgets. To study biogas plants, To study gasifiers, To study the production process of biodiesel, To study briquetting machine, To study the production process of bio-fuels. Familiarization with different solar energy gadgets. To study solar photovoltaic system: solar light, solar pumping, solar fencing. To study solar cooker, To study solar drying system. To study solar distillation and solar pond.

## **BAG-208: Problematic Soils and their Management**

### **CO: COURSE OBJECTIVES**

**CO-1 Identify Problematic Soils:** Enable students to recognize and classify various types of problematic soils, such as saline, sodic, acidic, expansive, and compacted soils.

**CO-2 Understand Soil Genesis and Characteristics:** Provide insights into the formation processes, physical, chemical, and biological properties that make soils problematic.

**CO-3 Assess Soil Degradation:** Develop the ability to evaluate the extent and causes of soil degradation through laboratory and field studies.

**CO-4 Explore Soil-Plant Relationships:** Examine the impact of problematic soils on plant growth and productivity, focusing on nutrient availability and water retention.

**CO-5 Management Strategies:** Equip students with techniques and practices for the reclamation, amendment, and sustainable management of problematic soils.

**CO-6 Mitigate Environmental Impacts:** Foster awareness of how problematic soils influence environmental systems and learn strategies to minimize adverse effects, such as erosion, pollution, or loss of biodiversity.

**CO-7 Promote Sustainable Land Use:** Advocate for integrated land management approaches that balance soil restoration with agricultural productivity and ecosystem health.

## Course Contents

### Unit- I:

- Soil quality and health, Distribution of Waste land and problem soils in India. Their categorization based on properties.

### Unit- II:

- Reclamation and management of Saline and sodic soils, Acid soils, Acid Sulphate soils, Eroded and Compacted soils, Flooded soils, Polluted soils.

### Unit- III:

- Irrigation water – quality and standards, utilization of saline water in agriculture. Remote sensing and GIS in diagnosis and management of problem soils.

### Unit- IV:

- Multipurpose tree species, bio remediation through MPTs of soils, land capability and classification, land suitability classification. Problematic soils under different Agro-ecosystems.

## **BAG-210: Production Technology for Fruit and Plantation Crops**

### **CO: COURSE OBJECTIVES**

**CO-1 Understanding Crop Requirements:** Develop a comprehensive understanding of the climatic, soil, and nutritional requirements of major fruit and plantation crops.

**CO-2 Knowledge of Cultivation Practices:** Learn scientific cultivation practices, including planting, spacing, irrigation, and fertilization methods, to enhance productivity and sustainability.

**CO-3 Pest and Disease Management:** Equip students with skills to identify, prevent, and manage pests and diseases affecting fruit and plantation crops using integrated pest management (IPM) techniques.

**CO-4 Post-Harvest Technology:** Understand the principles of harvesting, grading, packaging, and storage of fruit and plantation crops to maintain quality and reduce losses.

**CO-5 Improving Yield and Quality:** Gain knowledge about modern technologies, including high-yielding varieties, grafting techniques, and precision farming, to improve the yield and quality of crops.

**CO-6 Sustainability and Environmental Concerns:** Explore sustainable farming practices that balance production needs with environmental conservation, such as organic farming and agroforestry.

**CO-7 Market and Economic Analysis:** Analyze the market trends, value chains, and economic considerations related to the production and marketing of fruit and plantation crops.

## Course Content

### Unit- I:

- Importance and scope of fruit and plantation crop industry in India;

### Unit- II:

- Importance of rootstocks; Production technologies for the cultivation of major fruits-mango, banana, citrus, grape, guava, litchi, papaya, sapota, apple, pear, peach, walnut, almond

### Unit- III:

- Minor fruits-date, ber, pineapple, pomegranate, jackfruit, strawberry,

### Unit- IV:

- Plantation crops-coconut, arecanut, cashew, tea, coffee & rubber.

### Practical:

Seed propagation. Scarification and stratification of seeds. Propagation methods for fruit and plantation crops. Description and identification of fruit. Preparation of plant bio regulators and their uses, important pests, diseases and physiological disorders of above fruit and plantation crops, Visit to commercial orchards.

## **BAG-212: Principles of Seed Technology**

### **CO: COURSE OBJECTIVES**

**CO-1 Understand the Basics of Seed Science:** Develop foundational knowledge of seed biology, including seed structure, development, and physiology.

**CO-2 Learn Seed Production Techniques:** Gain insights into modern methods and best practices for seed production in various crops to ensure high quality and yield.

**CO-3 Explore Seed Quality Parameters:** Study the factors affecting seed quality, including genetic purity, viability, vigor, and health.

**CO-4 Master Seed Processing and Handling:** Acquire practical knowledge of seed cleaning, grading, treatment, and storage methods to maintain seed quality.

**CO-5 Examine Seed Certification Standards:** Understand the principles and procedures of seed certification to comply with national and international standards.

**CO-6 Study Seed Testing and Analysis:** Learn techniques for seed testing, including germination tests, moisture determination, and seed health assessments.

**CO-7 Understand the Role of Seed Technology in Agriculture:** Analyze the economic and ecological importance of high-quality seeds in sustainable agriculture and food security.

## Course Contents

### Unit- I:

- Seed and seed technology: introduction, definition and importance. Deterioration causes of crop varieties and their control; Maintenance of genetic purity during seed production, seed quality; Definition, Characters of good quality seed, different classes of seed. Foundation and certified seed production of important cereals, pulses, oilseeds, fodder and vegetables.

### Unit- II:

- Seed certification, phases of certification, procedure for seed certification, field inspection. Seed Act and Seed Act enforcement. Duty and powers of seed inspector, offences and penalties. Seeds Control Order 1983, Varietal Identification through Grow Out Test and Electrophoresis, Molecular and Biochemical test.

### Unit- III:

- Detection of genetically modified crops, Transgene contamination in non-GM crops, GM crops and organic seed production. Seed drying, processing and their steps, seed testing for quality assessment, seed treatment, its importance, method of application and seed packing.

### Unit- IV:

- Seed storage: general principles, stages and factors affecting seed longevity during storage. Measures for pest and disease control during storage.

### Unit- V:

- Seed marketing: structure and organization, sales generation activities, promotional media. Factors affecting seed marketing, Role of WTO and OECD in seed marketing. Private and public sectors and their production and marketing strategies.

### Practical:

Seed production in major cereals: Wheat, Rice, Maize, Sorghum, Bajra and Ragi. Seed production in major pulses: Urd, Mung, Pigeon pea, Lentil, Gram, Field bean, pea. Seed production in major oilseeds: Soybean, Sunflower, Rapeseed, Groundnut and Mustard. Seed production in important vegetable crops. Seed sampling and testing: Physical purity, germination, viability, etc. Seed and seedling vigour test. Genetic purity test: Grow out test and electrophoresis. Seed certification: Procedure, Field inspection, Preparation of field inspection report. Visit to seed production farms, seed testing laboratories and seed processing plant.

## **BAG-214: Farming System & Sustainable Agriculture**

### **CO: COURSE OBJECTIVES**

**CO-1 Understand Farming Systems:** To provide students with a comprehensive understanding of various farming systems, including traditional, organic, and modern approaches, and their role in agricultural sustainability.

**CO-2 Analyze Agricultural Ecosystems:** To explore the interactions between crops, livestock, soil, water, and climate in farming systems, emphasizing the ecological principles underlying sustainable agriculture.

**CO-3 Promote Sustainable Practices:** To identify and evaluate sustainable agricultural practices that enhance productivity while conserving natural resources and maintaining ecological balance.

**CO-4 Address Environmental Challenges:** To analyze the environmental challenges associated with agriculture, such as soil degradation, water scarcity, and climate change, and develop strategies for mitigation and adaptation.

**CO-5 Foster Socioeconomic Sustainability:** To understand the socioeconomic dimensions of sustainable agriculture, including farmer livelihoods, market dynamics, and the role of policy in promoting sustainability.

**CO-6 Apply Technological Innovations:** To explore and apply innovative technologies, such as precision farming, agroecology, and climate-smart agriculture, to enhance sustainability and productivity in farming systems.

**CO-7 Encourage Critical Thinking and Problem-Solving:** To develop critical thinking and problem-solving skills for designing and implementing sustainable agricultural solutions tailored to specific regional and global challenges.

## Course Contents

### Unit- I:

- Farming System- scope, importance, and concept, Types and systems of farming system and factors affecting types of farming, Farming system components and their maintenance, Cropping system and pattern, multiple cropping system, Efficient cropping system and their evaluation, Allied enterprises and their importance, Tools for determining production and efficiencies in cropping and farming system

### Unit- II:

- Sustainable agriculture- problems and its impact on agriculture, indicators of sustainability, adaptation and mitigation, conservation agriculture strategies in agriculture, HEIA, LEIA and LEISA and its techniques for sustainability

### Unit- III:

- Integrated farming system- historical background, objectives and characteristics, components of IFS and its advantages, Site specific development of IFS model for different agro-climatic zones, resource use efficiency and optimization techniques

### Unit- IV:

- Resource cycling and flow of energy in different farming system, farming system and environment, Visit of IFS model in different agro-climatic zones of nearby states University/institutes and farmers field

## **BAG-216: Agricultural Marketing Trade & Prices**

### **CO: COURSE OBJECTIVES**

**CO-1 Understand the Basics of Agricultural Marketing:** To provide students with foundational knowledge of agricultural marketing principles, including product flow, market channels, and the role of intermediaries.

**CO-2 Analyze Agricultural Market Structures:** To examine different agricultural market structures, such as perfect competition, monopolistic competition, and oligopoly, and their implications for pricing and trade.

**CO-3 Explore the Role of Agricultural Prices:** To help students understand how agricultural prices are determined, including factors like supply and demand, government policies, and market speculation.

**CO-4 Study International Agricultural Trade:** To introduce students to the global trade of agricultural products, including trade policies, international trade agreements, and how global market trends affect local farmers and markets.

**CO-5 Evaluate the Impact of Government Policies on Agriculture:** To analyze the effect of government interventions, such as subsidies, tariffs, and price supports, on agricultural markets and prices.

**CO-6 Assess the Role of Technology in Agricultural Marketing:** To investigate how advancements in technology, such as digital platforms, supply chain innovations, and data analytics, are transforming agricultural marketing and pricing.

**CO-7 Develop Practical Skills for Marketing Agricultural Products:** To equip students with the skills necessary for effective marketing strategies, including market research, pricing techniques, and communication strategies tailored to the agricultural sector.

## Course Contents

### Unit- I:

- Agricultural Marketing: Concepts and definitions of market, marketing, agricultural marketing, market structure, marketing mix and market segmentation, classification and characteristics of agricultural markets; demand, supply and producer's surplus of agricultural commodities: nature and determinants of demand and supply of farm products, producer's surplus – meaning and its types, marketable and marketed surplus, factors affecting marketable surplus of agricultural commodities; product life cycle (PLC) and competitive strategies:

### Unit- II:

- Meaning and stages in PLC; characteristics of PLC; strategies in different stages of PLC; pricing and promotion strategies: pricing considerations and approaches – cost based and competition based pricing; market promotion – advertising, personal selling, sales promotion and publicity – their meaning and merits & demerits; marketing process and functions: Marketing process – concentration, dispersion and equalization; exchange functions – buying and selling; physical functions – storage, transport and processing; facilitating functions – packaging, branding, grading, quality control and labeling (Agmark); Market functionaries and marketing channels:

### Unit- III:

- Types and importance of agencies involved in agricultural marketing; meaning and definition of marketing channel; number of channel levels; marketing channels for different farm products; Integration, efficiency, costs and price spread: Meaning, definition and types of market integration; marketing efficiency; marketing costs, margins and price spread; factors affecting cost of marketing; reasons for higher marketing costs of farm commodities; ways of reducing marketing costs;

### Unit- IV:

- Role of Govt. in agricultural marketing: Public sector institutions – CWC, SWC, FCI, CACP & DMI – their objectives and functions; cooperative marketing in India; Risk in marketing: Types of risk in marketing; speculation & hedging; an overview of future trading; Agricultural prices and policy: Meaning and functions of price; administered prices; need for agricultural price policy; Trade:

### Unit- V:

- Concept of International Trade and its need, theories of absolute and comparative advantage. Present status and prospects of international trade in agricultural commodities; GATT and WTO; Agreement on Agriculture (AoA) and its implications on Indian agriculture; IPR.

### Practical:

Plotting and study of demand and supply curves and calculation of elasticities; Study of relationship between market arrivals and prices of some selected commodities; Computation of marketable and marketed surplus of important commodities; Study of price behaviour

over time for some selected commodities; Construction of index numbers; Visit to local market to study various marketing functions performed by different agencies, identification of marketing channels for selected commodity, collection of data regarding marketing costs, margins and price spread and presentation of report in the class; Visit to market institutions – NAFED, SWC, CWC, cooperative marketing society, etc. to study their organization and functioning; Application of principles of comparative advantage of international trade.

## **BAG-218: Introductory Agro-meteorology & Climate Change**

### **CO: COURSE OBJECTIVES**

**CO-1 Understand Basic Agro-meteorology Concepts:** Introduce students to fundamental concepts in agro-meteorology, including the role of weather and climate in agriculture and how meteorological phenomena affect crop growth and farming practices.

**CO-2 Analyze Weather Systems and Agricultural Impacts:** Develop skills to analyze various weather systems (such as precipitation, temperature, humidity, and wind) and understand their direct and indirect impacts on agricultural productivity and farming techniques.

**CO-3 Examine Climate Change and Its Effect on Agriculture:** Explore the causes, evidence, and impacts of climate change, with a particular focus on how shifting climatic patterns affect agriculture, including crop yield variations, water availability, and pest/disease outbreaks.

**CO-4 Learn Agro-meteorological Tools and Techniques:** Familiarize students with the tools, technologies, and data sources used in agro-meteorological research and applications, such as weather forecasting, climate models, and remote sensing.

**CO-5 Evaluate Climate Adaptation Strategies in Agriculture:** Teach students strategies to mitigate and adapt to climate change in agriculture, including the use of climate-resilient crops, water conservation techniques, and sustainable farming practices.

**CO-6 Assess the Role of Agro-meteorology in Agricultural Decision-Making:** Understand how agro-meteorological data is used by farmers, policymakers, and agricultural professionals in decision-making, from planting and irrigation scheduling to pest and disease management.

**CO-7 Promote Awareness of Climate Change Mitigation:** Encourage students to think critically about how to reduce the carbon footprint of agriculture and promote sustainable farming practices that contribute to global efforts in mitigating climate change.

## Course Contents

### Unit- I:

- Meaning and scope of agricultural meteorology; Earth atmosphere- its composition, extent and structure; Atmospheric weather variables; Atmospheric pressure, its variation with height; Wind, types of wind, daily and seasonal variation of wind speed, cyclone, anticyclone, land breeze and sea breeze;

### Unit- II:

- Nature and properties of solar radiation, solar constant, depletion of solar radiation, shortwave, long-wave and thermal radiation, net radiation, albedo; Atmospheric temperature, temperature inversion, lapse rate, daily and seasonal variations of temperature, vertical profile of temperature, Energy balance of earth;

### Unit- III:

- Atmospheric humidity, concept of saturation, vapor pressure, process of condensation, formation of dew, fog, mist, frost, cloud; Precipitation, process of precipitation, types of precipitation such as rain, snow, sleet, and hail, cloud formation and classification; Artificial rainmaking. Monsoon- mechanism and importance in Indian agriculture, Weather hazards - drought, floods, frost, tropical cyclones and extreme weather conditions such as heat-wave and cold-wave. Agriculture and weather relations;

### Unit- IV:

- Modifications of crop microclimate, climatic normals for crop and livestock production. Weather forecasting- types of weather forecast and their uses. Climate change, climatic variability, global warming, causes of climate change and its impact on regional and national Agriculture.

### Practical:

Visit of Agro-meteorological Observatory, site selection of observatory, exposure of instruments and weather data recording. Measurement of total, shortwave and long-wave radiation, and its estimation using Planck's intensity law. Measurement of albedo and sunshine duration, computation of Radiation Intensity using BSS. Measurement of maximum and minimum air temperatures, its tabulation, trend and variation analysis. Measurement of soil temperature and computation of soil heat flux. Determination of vapor pressure and relative humidity. Determination of dew point temperature. Measurement of atmospheric pressure and analysis of atmospheric conditions. Measurement of wind speed and wind direction, preparation of wind rose. Measurement, tabulation and analysis of rain. Measurement of open pan evaporation and evapo-transpiration. Computation of PET and AET.

**BAG-2020:ElectiveCourse**

## **BAG-301:PrinciplesofIntegratedPestandDiseaseManagement**

### **CO: COURSE OBJECTIVES**

**CO-1 Understanding Pest and Disease Dynamics:** To familiarize students with the basic concepts of pest and disease biology, including their lifecycle, behavior, and factors influencing their populations.

**CO-2 Introduction to Integrated Pest Management (IPM):** To introduce the concept of Integrated Pest Management (IPM) as a sustainable approach that combines multiple pest control methods.

**CO-3 Identification and Diagnosis of Pests and Diseases:** To develop skills in identifying common pests, diseases, and symptoms affecting crops, and understanding their impact on yield and quality.

**CO-4 Pest and Disease Control Methods:** To provide knowledge of various pest control strategies, including cultural, biological, chemical, and mechanical methods.

**CO-5Principles of Disease Management:** To study the principles and practices of plant disease control, including sanitation, crop rotation, and the use of fungicides and other disease management tools.

**CO-6 Pesticide Management and Safety:** To educate students on the safe and effective use of chemical control methods, including the proper application techniques and safety protocols.

**CO-7 Sustainable Practices in Pest and Disease Management:** To highlight the importance of sustainable practices in pest and disease management to ensure long-term agricultural productivity.

**CO-8 Economic and Social Aspects of Pest and Disease Management:** To understand the economic importance of pest and disease management in agriculture, including cost-benefit analysis of various control measures.

## Course Contents

### Unit- I:

- Categories of insect pests and diseases, IPM: Introduction, history, importance, concepts, principles and tools of IPM. Economic importance of insect pests, diseases and pest risk analysis.

### Unit- II:

- Methods of detection and diagnosis of insect pest and diseases. Calculation and dynamics of economic injury level and importance of Economic threshold level. Methods of control: Host plant resistance, cultural, mechanical, physical, legislative, biological and chemical control.

### Unit- III:

- Ecological management of crop environment. Introduction to conventional pesticides for the insect pests and disease management. Survey surveillance and forecasting of Insect pest and diseases. Development and validation of IPM module.

### Unit- IV:

- Implementation and impact of IPM (IPM module for Insect pest and disease. Safety issues in pesticide uses. Political, social and legal implication of IPM. Case histories of important IPM programmes. Case histories of important IPM programmes.

### Practical:

Methods of diagnosis and detection of various insect pests, and plant diseases, Methods of insect pests and plant disease measurement, Assessment of crop yield losses, calculations based on economic of IPM, Identification of biocontrol agents, different predators and natural enemies. Mass multiplication of *Trichoderma*, *Pseudomonas*, *Trichogramma*, NPV etc. Identification and nature of damage of important insect pests and diseases and their management. Crop (agro- ecosystem) dynamics of a selected insect pest and diseases. Plan & assess preventive strategies (IPM module) and decision making. crop monitoring attacked by insect, pest and diseases. Awareness campaign at farmers fields.

## **BAG-303: Manures, Fertilizers and Soil Fertility Management**

### **CO: COURSE OBJECTIVES**

**CO-1 Understanding Soil Fertility and Nutrient Dynamics:** To comprehend the concepts of soil fertility, productivity, and factors influencing them. To study the physical, chemical, and biological properties of soil that affect nutrient availability.

**CO-2 Nutrient Functions and Deficiency Symptoms:** To understand the role of essential plant nutrients in crop growth and development. To identify nutrient deficiencies and toxicities and their impact on crops.

**CO-3 Manures and Organic Amendment:** To learn about the types, composition, and importance of organic manures like farmyard manure, compost, green manures, and biofertilizers. To explore methods of preparation, application, and benefits of organic amendments in sustainable agriculture.

**CO-4 Fertilizers: Types, Properties, and Application:** To study various chemical fertilizers, their composition, and nutrient content. To understand fertilizer application methods, including their timing and efficiency enhancement techniques.

**CO-5 Soil Fertility Evaluation and Management:** To gain proficiency in soil testing and plant analysis as tools for assessing soil fertility. To formulate site-specific nutrient management plans for sustainable crop production.

**CO-6 Environmental Implications and Best Practices:** To understand the environmental impacts of excessive or improper fertilizer use. To promote integrated nutrient management (INM) for sustainable and eco-friendly agriculture.

**CO-7 Practical Applications and Field Studies:** To provide hands-on experience in preparing organic manures, soil sampling, and fertilizer application. To familiarize students with fertilizer recommendations based on soil and crop requirements.

## Course Contents

### Unit- I:

- Introduction and importance of organic manures, properties and methods of preparation of bulky and concentrated manures. Green/leaf manuring. Fertilizer recommendation approaches. Integrated nutrient management.

### Unit- II:

- Chemical fertilizers: classification, composition and properties of major nitrogenous, phosphatic, potassic fertilizers, secondary & micronutrient fertilizers, Complex fertilizers, nano fertilizers Soil amendments, Fertilizer Storage, Fertilizer Control Order.

### Unit- III:

- History of soil fertility and plant nutrition. criteria of essentiality. role, deficiency and toxicity symptoms of essential plant nutrients, Mechanisms of nutrient transport to plants, factors affecting nutrient availability to plants.

### Unit- IV:

- Chemistry of soil nitrogen, phosphorus, potassium, calcium, magnesium, sulphur and micronutrients. Soil fertility evaluation, Soil testing. Critical levels of different nutrients in soil. Forms of nutrients in soil, plant analysis, rapid plant tissue tests. Indicator plants. Methods of fertilizer recommendations to crops. Factor influencing nutrient use efficiency (NUE), methods of application under rainfed and irrigated conditions.

### Practical:

Introduction of analytical instruments and their principles, calibration and applications, Colorimetry and flame photometry. Estimation of soil organic carbon, Estimation of alkaline hydrolysable N in soils. Estimation of soil extractable P in soils. Estimation of exchangeable K; Ca and Mg in soils. Estimation of soil extractable S in soils. Estimation of DTPA extractable Zn in soils. Estimation of N in plants. Estimation of P in plants. Estimation of K in plants. Estimation of S in plants.

## **BAG-305:PestsofCropsandStoredGrainand their Management**

### **CO: COURSE OBJECTIVES**

#### **CO-1 Understanding Pest Dynamics**

- To familiarize students with the biology, ecology, and classification of major pests affecting field crops and stored grains.
- To understand the life cycles and damage caused by these pests to identify them effectively.

#### **CO-2Pest-Management Strategies**

- To introduce various integrated pest management (IPM) approaches, including cultural, mechanical, biological, and chemical methods.
- To emphasize the safe and effective use of pesticides, focusing on resistance management and environmental sustainability.

#### **CO-3Storage Pest Management**

- To highlight the factors affecting pest infestations in storage environments and methods for preventing losses in stored grains.

#### **CO-4Economic Threshold Levels and Decision-Making**

- To develop the ability to assess economic thresholds and make informed pest management decisions based on cost-benefit analysis.

#### **CO-5Sustainable Agriculture and Food Security**

- To encourage the adoption of sustainable pest control measures that align with environmental conservation and global food security goals.

#### **CO-6Practical Skills Development**

- To provide hands-on experience in pest identification, monitoring, and implementing management techniques through field visits and lab exercises.

## Course Contents

### Unit- I:

- General account on nature and type of damage by different arthropods pests.

### Unit- II:

- Scientific name, order, family, host range, distribution, biology and bionomics, nature of damage, and management of major pests and scientific name, order, family, host range, distribution, nature of damage and control practice other important arthropod pests of various field crop, vegetable crop, fruit crop, plantation crops, ornamental crops, spices and condiments.

### Unit- III:

- Factors affecting losses of stored grain and role of physical, biological, mechanical and chemical factors in deterioration of grain. Insect pests, mites, rodents, birds and microorganisms associated with stored grain and their management.

### Unit- IV:

- Storage structure and methods of grain storage and fundamental principles of grain store management.

### Practical:

Identification of different types of damage. Identification and study of life cycle and seasonal history of various insect pests attacking crops and their produce: (a) Field Crops; (b) Vegetable Crops; (c) Fruit Crops; (d) Plantation, gardens, Narcotics, spices & condiments. Identification of insect pests and Mites associated with stored grain. Determination of insect infestation by different methods. Assessment of losses due to insects. Calculations on the doses of insecticide application technique. Fumigation of grain store/godown. Identification of rodents and rodent control operations in godowns. Identification of birds and bird control operations in godowns. Determination of moisture content of grain. Methods of grain sampling under storage condition. Visit to Indian Storage Management and Research Institute, Hapur and Quality Laboratory, Department of Food., Delhi. Visit to nearest FCI godowns.

## **BAG-307:DiseasesofField and HorticulturalCrops and their ManagementI**

### **CO: COURSE OBJECTIVES**

**CO-1Understanding Plant Diseases:** To familiarize students with the various diseases affecting field and horticultural crops, including their symptoms, etiology, and epidemiology.

**CO-2Diagnosis and Identification:** To develop the ability to identify and diagnose crop diseases based on visible symptoms, causal agents, and environmental factors.

**CO-3Pathogen Biology:** To understand the biology, life cycle, and interaction of pathogens with host plants, contributing to the development of diseases.

**CO-4Disease Management Practices:** To study and analyze various disease management strategies, including cultural, chemical, biological, and integrated pest management (IPM) approaches.

**CO-5Economic Impact Assessment:** To assess the economic impact of diseases on crop production and explore cost-effective and sustainable management practices.

**CO-6Latest Technologies and Research:** To introduce students to modern tools and techniques such as disease forecasting models, molecular diagnostics, and biotechnological approaches in disease management.

**CO-7Practical Applications:** To provide hands-on training in field diagnosis, sample collection, pathogen isolation, and identification techniques for effective disease management.

## Course Contents

### Unit- I:

- Symptoms, etiology, disease cycle and management of major diseases of following crops: Field Crops: Rice: blast, brown spot, bacterial blight, sheath blight, false smut, khaira and tungro; Maize: stalk rots, downy mildew, leaf spots; Sorghum: smuts, grain mold and anthracnose, Bajra : downy mildew and ergot; Groundnut: early and late leaf spots, wilt

### Unit- II:

- Soybean: Rhizoctonia blight, bacterial spot, seed and seedling rot and mosaic; Pigeon pea: Phytophthora blight, wilt and sterility mosaic; Finger millet: Blast and leaf spot; Black & green gram: Cercospora leaf spot and anthracnose, web blight and yellow mosaic; Castor: Phytophthora blight; Tobacco: black shank, black root rot and mosaic.

### Unit- III:

- Horticultural Crops: Guava: wilt and anthracnose; Banana: Panama wilt, bacterial wilt, Sigatoka and bunchy top; Papaya: foot rot, leaf curl and mosaic, Pomegranate: bacterial blight; Cruciferous vegetables: Alternaria leaf spot and black rot;

### Unit- IV:

- Brinjal: Phomopsis blight and fruit rot and Sclerotinia blight; Tomato: damping off, wilt, early and late blight, buck eye rot and leaf curl and mosaic; Okra: Yellow Vein Mosaic; Beans: anthracnose and bacterial blight; Ginger: soft rot; Colocasia: Phytophthora blight; Coconut: wilt and bud rot; Tea: blister blight; Coffee: rust

### Practical:

Identification and histopathological studies of selected diseases of field and horticultural crops covered in theory. Field visit for the diagnosis of field problems. Collection and preservation of plant diseased specimens for Herbarium; Note: Students should submit 50 pressed and well-mounted specimens.

## **BAG-309: Crop Improvement-I(Kharif Crops)**

### **CO: COURSE OBJECTIVES**

#### **CO-1 Understanding Crop Breeding Principles:**

- To provide fundamental knowledge of plant breeding concepts, methods, and techniques applied to kharif crops.

#### **CO-2 Familiarity with Kharif Crop Varieties:**

- To study the major kharif crops such as rice, maize, sorghum, pearl millet, groundnut, cotton, and pulses.
- To understand the characteristics of existing high-yielding, disease-resistant, and region-specific varieties.

#### **CO-3 Knowledge of Crop Improvement Strategies:**

- To explore various breeding approaches like hybridization, mutation breeding, and molecular techniques for developing improved kharif crop varieties.

#### **CO-4 Genetic Resource Management:**

- To familiarize students with the conservation, evaluation, and utilization of plant genetic resources for crop improvement.

#### **CO-5 Problem-Solving Skills:**

- To identify the challenges related to kharif crop production, such as pests, diseases, and abiotic stresses, and develop strategies for improvement.

#### **CO-6 Practical Exposure:**

- To provide hands-on training in breeding techniques, hybridization, and evaluation of breeding material for kharif crop.

## Course Contents

### Unit- I:

- Centers of origin, distribution of species, wild relatives in different cereals; pulses; oilseeds; fibres; fodders and cash crops; vegetable and horticultural crops;

### Unit- II:

- Plant genetic resources, its utilization and conservation, study of genetics of qualitative and quantitative characters; Important concepts of breeding self pollinated, cross pollinated and vegetatively propagated crops;

### Unit- III:

- Major breeding objectives and procedures including conventional and modern innovative approaches for development of hybrids and varieties for yield, adaptability, stability, abiotic and biotic stress tolerance and quality (physical, chemical, nutritional);

### Unit- IV:

- Hybrid seed production technology in Maize, Rice, Sorghum, Pearl millet and Pigeon pea, etc. Ideotype concept and climate resilient crop varieties for future.

### Practical:

Floral biology, emasculation and hybridization techniques in different crop species; viz., Rice, Jute, Maize, Sorghum, Pearl millet, Ragi, Pigeon pea, Urdbean, Mungbean, Soybean, Groundnut, Sesame, Caster, Cotton, Cowpea, Tobacco, Brinjal, Okra and Cucurbitaceous crops. Maintenance breeding of different kharif crops. Handling of germplasm and segregating populations by different methods like pedigree, bulk and single seed descent methods; Study of field techniques for seed production and hybrid seeds production in Kharif crops; Estimation of heterosis, inbreeding depression and heritability; Layout of field experiments; Study of quality characters, donor parents for different characters; Visit to seed production plots; Visit to AICRP plots of different field crops.

## **BAG-311: Entrepreneurship Development and Business**

### **CO: COURSE OBJECTIVES**

#### **CO-1 Understanding the Basics of Entrepreneurship:**

- To introduce students to the fundamental concepts of entrepreneurship, including the role of entrepreneurs in economic development.
- To explore entrepreneurial traits, skills, and competencies relevant to the agricultural sector.

#### **CO-2 Promoting an Entrepreneurial Mindset:**

- To instill a proactive approach to identifying opportunities and solving challenges within the agribusiness and allied sectors.
- To encourage creativity, innovation, and risk-taking among students.

#### **CO-3 Development of Managerial and Business Skills:**

- To equip students with essential knowledge of business planning, financial management, and marketing strategies specific to agriculture.
- To familiarize students with legal, regulatory, and procedural aspects of starting and running a business.

#### **CO-4 Exposure to Agripreneurship:**

- To develop an understanding of agribusiness models, value chain development, and opportunities in modern agriculture, including organic farming, precision farming, and agro-processing.
- To explore rural entrepreneurship and cooperatives as pathways for sustainable development.
- 

#### **CO-5 Practical Application and Skill Development:**

- To provide hands-on experience in creating business plans and feasibility reports tailored for agricultural ventures.
- To enhance leadership, decision-making, and problem-solving skills through case studies, field visits, and projects.

#### **CO-6 Leveraging Technology and Innovation:**

- To emphasize the role of digital technologies, e-commerce, and ICT tools in modern agricultural business development.
- To understand how technological advancements can drive profitability and efficiency in agriculture-related enterprises.

## Course Contents

### Unit- I:

- Concept of Entrepreneur, Entrepreneurship Development, Characteristics of entrepreneurs; SWOT Analysis & achievement motivation,

### Unit- II:

- Government policy and programs and institutions for entrepreneurship development, Impact of economic reforms on Agribusiness/Agri enterprises,

### Unit- III:

- Entrepreneurial Development Process; Business Leadership Skills; Developing organizational skill (controlling, supervising, problem solving, monitoring & evaluation), Developing Managerial skills,

### Unit- IV:

- Business Leadership Skills (Communication, direction and motivation skills), Problem solving skill, Supply chain management and Total quality management, Project Planning Formulation and report preparation; Financing of enterprise, Opportunities for agri-entrepreneurship and rural enterprise.

### Practical:

Assessing entrepreneurial traits, problem solving skills, managerial skills and achievement motivation, exercise in creativity, time audit through planning, monitoring and supervision, identification and selection of business idea, preparation of business plan and proposal writing, visit to entrepreneurship development institute and entrepreneurs.

## **BAG-311A: Communication & English Grammar-III**

### **CO: COURSE OBJECTIVES**

#### **CO-1 Develop Advanced Communication Skills**

Enhance students' ability to communicate effectively in academic, professional, and social settings, with a focus on oral and written English.

#### **CO-2 Strengthen Grammatical Proficiency**

Provide in-depth knowledge of advanced English grammar, including complex sentence structures, clauses, voice, and reported speech.

#### **CO-3 Promote Critical Thinking and Expression**

Foster critical thinking and the ability to express ideas clearly and concisely in English.

#### **CO-4 Enhance Professional Writing Skills**

Equip students with skills for writing formal letters, emails, reports, and proposals relevant to agricultural and allied sectors.

#### **CO-5 Improve Presentation and Public Speaking Skills**

Train students in delivering effective presentations and participating in group discussions and debates.

#### **CO-6 Cultural and Contextual Understanding**

Enable students to use language effectively in diverse cultural and professional contexts, especially in the agricultural field.

#### **CO-7 Prepare for Competitive Exams**

Provide a foundation for language proficiency in competitive exams and professional applications, such as research papers and project reports.

## CourseContents

### Unit 1: Grammar and Composition

1. **Advanced Grammar:** Subject-Verb Agreement, Tenses and Voice (Active and Passive), Direct and Indirect Speech, Sentence Transformation (Simple, Complex, Compound), Phrasal Verbs and Idiomatic Expressions, Use of Articles and Prepositions, Correction of Common Errors in English
2. **Essay Writing:** Structure of an Essay (Introduction, Body, Conclusion) Descriptive, Narrative, Persuasive, and Expository Essays
3. **Comprehension:** Reading Skills, Understanding Context Summarization and Paraphrasing
4. **Letter Writing:** Formal and Informal Letters, Applications and Complaint Letters, Cover Letters and Resume

### Unit 2: Communication Skills

1. **Basics of Communication:** Definition and Process of Communication, Verbal and Non-Verbal Communication, Barriers to Communication and Overcoming Them
2. **Speaking Skills:** Extempore Speaking, Group Discussions, Presentations and Public Speaking
3. **Listening Skills:** Techniques for Active Listening, Understanding Tone and Context in Conversations
4. **Writing for Communication:** Business Writing (Memos, Notices, Emails), Report Writing

### Unit 3: Functional English

1. **Vocabulary Building:** Synonyms and Antonyms, One-Word Substitutes, Collocations and Word Formation
2. **Technical English:** Agriculture-Specific Terminology, Writing Research Proposals and Abstracts
3. **Reading and Interpretation:** Understanding Scientific Texts, Critical Analysis of Articles

### Unit 4: Personality Development

1. **Soft Skills:** Confidence Building, Time Management, Leadership and Teamwork Skills
2. **Interview Preparation:** Resume Writing, Mock Interviews and Question Patterns
3. **Interpersonal Communication:** Building Relationships, Networking and Professional Etiquette.

## **BAG-311B: Soft Skills-III**

### **CO: COURSE OBJECTIVES**

**CO-1 Effective Communication:** Develop advanced verbal and written communication skills tailored for professional and social contexts.

**CO-2 Teamwork and Collaboration:** Foster teamwork abilities, emphasizing the importance of collaboration in agricultural and multidisciplinary settings.

**CO-3 Problem-Solving and Critical Thinking:** Cultivate the ability to analyze problems, think critically, and develop innovative solutions in agriculture-related fields.

**CO-4 Leadership and Interpersonal Skills:** Build leadership qualities and interpersonal skills essential for managing teams and working effectively in diverse groups.

**CO-5 Time and Stress Management:** Equip students with strategies for effective time management and coping with stress to enhance productivity.

**CO-6 Adaptability and Emotional Intelligence:** Develop the ability to adapt to changing environments and improve emotional intelligence for better personal and professional relationships.

**CO-7 Ethics and Professionalism:** Instill a sense of ethics, integrity, and professionalism in communication and decision-making.

## **CourseContents**

### **Unit I**

Personality Enrichment, Positive attitude, SWOT Analysis, Self-confidence and motivation, Inter-personal skills, projecting a positive social image.

### **Unit II**

Time Management, Goal setting and prioritization, ABC Analysis—preparing a personal schedule, Short term and long term goals, Implementing goals.

### **Unit III**

Leadership Skills, Planning, organizing, setting objectives and taking initiatives, Task list organization.

### **Unit IV**

Persuading and negotiating, Team work, maintaining morale, Visualizing, inspiring others.

## **BAG-311C: Life Management-III**

### **CO: COURSE OBJECTIVES**

**CO-1 Holistic Development:** To enable students to develop a balanced approach toward personal and professional life, fostering physical, mental, emotional, and spiritual well-being.

**CO-2 Stress Management:** To introduce students to practical techniques and strategies for managing stress and maintaining a positive outlook amidst challenges in academic and agricultural careers.

**CO-3 Interpersonal Skills:** To improve communication, teamwork, and leadership skills, ensuring effective collaboration in diverse environments.

**CO-4 Time Management:** To equip students with methods to prioritize tasks, manage time effectively, and increase productivity in their studies and work.

**CO-5 Ethics and Values:** To instill a strong foundation of ethical principles and values that guide responsible behavior in both personal and professional spheres.

**CO-6 Decision-Making Skills:** To develop analytical and critical thinking abilities to make informed and impactful decisions in various life situations.

**CO-7 Resilience Building:** To foster resilience and adaptability, enabling students to overcome challenges and excel in a dynamic agricultural industry.

**CO-8 Goal Setting and Motivation:** To assist students in setting realistic goals, maintaining focus, and staying motivated to achieve success in their academic and personal endeavors.

## **CourseContents**

### **Unit I**

Basics of Life Style, Daily Routine, View of Life, Goal and Ideal your life, Self-Evaluation

### **Unit II**

Process of life Style Management, Spiritual practice-(Upasana/japa/meditation), Creative potentials & positive use of negativity,

### **Unit III**

Personality Skills, Creative Reading and Writing Skills, Communication Skills-Self-Management Skills

### **Unit IV**

Art of Positive Thinking, Environmental Ethics, Behavior skills and relationship, Stress (causes, effects & management)

## **BAG-313:Geo-informatics,Nano-technologyandPrecision Farming**

### **CO: COURSE OBJECTIVES**

#### **CO-1 Introduction to Geo-Informatics:**

- To develop an understanding of the principles and applications of Geographic Information Systems (GIS) and Remote Sensing in agriculture.
- To enable students to analyze spatial data and apply mapping techniques for agricultural planning and resource management.

#### **CO-2Fundamentals of Nano-Technology in Agriculture:**

- To introduce the concepts of nanotechnology and its potential applications in improving agricultural productivity and sustainability.
- To familiarize students with nano-based tools, devices, and materials for soil and water management, pest control, and crop improvement.

#### **CO-3Precision Farming Concepts:**

- To provide insights into the principles and practices of precision farming for efficient resource utilization.
- To train students in the use of modern tools such as sensors, drones, and automated systems for real-time monitoring and decision-making in agriculture.

#### **CO-4Integration of Technologies:**

- To explore the combined use of geo-informatics, nanotechnology, and precision farming to address challenges in modern agriculture.
- To enhance skills in data-driven decision-making and sustainable agricultural practices.

#### **CO-5Sustainability and Innovation:**

- To promote the adoption of innovative and sustainable technologies to improve agricultural productivity while minimizing environmental impacts.
- To encourage critical thinking and research-oriented approaches in leveraging emerging technologies for rural and agricultural development.

#### **CO-6Hands-on Experience:**

- To provide practical exposure to GIS software, remote sensing tools, nano-materials, and precision agriculture equipment.

## Course Contents

### Unit- I:

- Precision agriculture: concepts and techniques; their issues and concerns for Indian agriculture; Geo-informatics- definition, concepts, tool and techniques; their use in Precision Agriculture.

### Unit- II:

- Crop discrimination and Yield monitoring, soil mapping; fertilizer recommendation using geospatial technologies; Spatial data and their management in GIS; Remotesensing concepts and application in agriculture; Image processing and interpretation ;

### Unit- III:

- Global positioning system (GPS), components and its functions; Introduction to crop Simulation Models and their uses for optimization of Agricultural Inputs; STCR approach for precision agriculture;

### Unit- IV:

- Nanotechnology, definition, concepts and techniques, brief introduction about nanoscale effects, nano-particles, nano-pesticides, nano-fertilizers, nano-sensors, Use of nanotechnology in seed, water, fertilizer, plant protection for scaling-up farm productivity.

### Practical:

Introduction to GIS software, spatial data creation and editing. Introduction to image processing software. Visual and digital interpretation of remote sensing images. Generation of spectral

## **BAG-315 PracticalCrop Production –I(Kharif crops)**

### **CO: COURSE OBJECTIVES**

#### **CO-1 Understanding the Kharif Cropping System**

- To provide students with in-depth knowledge of the climatic, soil, and water requirements of major Kharif crops.
- To familiarize students with the cropping patterns and production constraints of Kharif season crops.

#### **CO-2 Practical Crop Management**

- To develop skills in the preparation of field operations, including land preparation, sowing, irrigation, and weed management.
- To impart knowledge about integrated nutrient, pest, and disease management practices for Kharif crops.

#### **CO-3 Seed and Input Management**

- To train students in the selection, storage, and treatment of quality seeds.
- To enhance understanding of fertilizer application methods, organic manures, and bio-fertilizers for sustainable crop production.

#### **CO-4 Crop Monitoring and Evaluation**

- To enable students to monitor crop growth, identify stress conditions, and take corrective measures.
- To train students in yield estimation, harvesting techniques, and post-harvest handling.

#### **CO-5 Economic and Sustainable Practices**

- To teach cost-effective and sustainable agricultural practices for optimizing the productivity of Kharif crops.
- To create awareness of climate-smart agriculture and water-efficient practices.

#### **CO-6 Hands-On Experience**

- To provide hands-on experience in the cultivation of major Kharif crops like paddy, maize, sorghum, pearl millet, groundnut, soybean, cotton, etc.
- To involve students in fieldwork, covering all aspects of crop production from sowing to harvesting.

#### **CO-7 Practical Record Maintenance**

- To ensure students can maintain detailed field records, analyze data, and prepare reports on crop performance.

## Course Contents

### **Practical:**

Crop planning, raising field crops in multiple cropping systems: Field preparation, seed, treatment, nursery raising, sowing, nutrient, water and weed management and management of insect-pests/diseases of crops, harvesting, threshing, drying, winnowing, storage and marketing of produce. The emphasis will be given to seed production, mechanization, resource conservation and integrated nutrient, insect-pest and disease management technologies. Preparation of balance sheet including cost of cultivation, net returns per student as well as per team of 8-10 students.

## **BAG-317 IntellectualPropertyRights**

### **CO: COURSE OBJECTIVES**

#### **CO-1 To Understand the Fundamentals of IPR**

- To introduce students to the basic concepts, types, and significance of Intellectual Property Rights (IPR) in agriculture and related fields.

#### **CO-2 To Explore Legal and Policy Frameworks**

- To familiarize students with national and international legal frameworks governing intellectual property, such as patents, trademarks, copyrights, and plant breeders' rights, with specific relevance to agriculture.

#### **CO-3 To Encourage Innovation and Entrepreneurship**

- To promote awareness of the role of IPR in fostering innovation, research, and development, encouraging students to explore entrepreneurial opportunities in agriculture.

#### **CO-4 To Address Ethical and Social Issues**

- To develop an understanding of the ethical, social, and environmental implications of IPR in agriculture, including issues of biopiracy, traditional knowledge, and biodiversity conservation.

#### **CO-5 To Equip Students with Practical Knowledge**

- To provide students with knowledge of procedures for patent filing, geographical indications, copyrights, and plant variety protection, equipping them with skills to apply IPR concepts in agricultural practice.

#### **CO-6 To Prepare for Future Challenges**

- To prepare students to address future challenges related to technology transfer, Commercialization, and the global competitiveness of agricultural products.

## Course Contents

### Unit- I:

- Introduction and meaning of intellectual property, brief introduction to GATT, WTO, TRIPs and WIPO, Treaties for IPR protection: Madrid protocol, Berne Convention, Budapest treaty, etc.

### Unit- II:

- Types of Intellectual Property and legislations covering IPR in India:- Patents, Copyrights, Trademark, Industrial design, Geographical indications, Integrated circuits, Trade secrets. Patents Act 1970 and Patent system in India, patentability, process and product patent, filing of patent, patent specification, patent claims, Patent opposition and revocation, infringement, Compulsory licensing, Patent Cooperation Treaty, Patent search and patent database.

### Unit- III:

- Origin and history including a brief introduction to UPOV for protection of plant varieties, Protection of plant varieties under UPOV and PPV&FR Act of India, Plant breeders rights, Registration of plant varieties under PPV&FR Act 2001, breeders, researcher and farmers rights. Traditional knowledge-meaning and rights of TK holders.

### Unit- IV:

- Convention on Biological Diversity, International treaty on plant genetic resources for food and agriculture (ITPGRFA). Indian Biological Diversity Act, 2002 and its salient features, access and benefit sharing.

## **BAG-317A: Research Methodology**

### **CO: COURSE OBJECTIVES**

#### **CO-1 Understanding Research Fundamentals:**

- To develop a clear understanding of the principles, concepts, and importance of research in agriculture.
- To familiarize students with the types, objectives, and methodologies of agricultural research.

#### **CO-2 Problem Identification and Formulation:**

- To enable students to identify, define, and articulate research problems specific to agricultural sciences.
- To guide students in framing research hypotheses and objectives.

#### **CO-3 Research Design and Methodology:**

- To introduce students to various research designs, sampling techniques, and data collection methods suited to agricultural studies.
- To train students in the preparation and execution of research plans.

#### **CO-4 Data Analysis and Interpretation:**

- To teach students basic statistical tools and techniques for data analysis in agricultural research.
- To guide students in interpreting research results and deriving meaningful conclusions.

#### **CO-5 Scientific Writing and Reporting:**

- To develop skills for writing research proposals, reports, and scientific papers in the field of agriculture.
- To train students in effective communication and presentation of research findings.

#### **CO-6 Application of Research Tools:**

- To familiarize students with modern tools and software used in agricultural research.
- To emphasize ethical practices in conducting research and handling data.

#### **CO-7 Problem-Solving and Decision-Making:**

- To cultivate critical thinking and analytical skills necessary for addressing real-world agricultural challenges through research.

## CourseContents

### Unit I

Introduction to Research: The concept of research, characteristics of good research, Application of Research, Meaning and sources of Research problem, characteristics of good Research problem, Research process, outcomes, application of Research, Meaning and types of Research hypothesis, Importance of Review of Literature, Organizing the Review of Literature.

### Unit II

Types of Research: Types of research, pure (basic, fundamental) and applied research, qualitative and quantitative. Research Design: Meaning, need, types of research design – Exploratory, Descriptive, Casual research Design, Components of research design, and Features of good Research design. Experiments, surveys and case study Research design

### Unit III

Sampling, Data Collection and analysis: Types and sources of data – Primary and secondary, Methods of collecting data, Concept of sampling and sampling methods – sampling frame, sample, characteristics of good sample, simple random sampling, purposive sampling, convenience sampling, snowball sampling, classification and tabulation of data, graphical representation of data, graphs and charts – Histograms, frequency polygon and frequency curves, bell shaped curve and its properties. Statistical Methods for Data Analysis: Applications of Statistics in Research, measures of central tendency and dispersion

### Unit IV

Research Report: Research report and its structure, journal articles – Components of journal article. Explanation of various components. Structure of an abstract and keywords. Thesis and dissertations. Components of thesis and dissertations. Referencing styles and bibliography. Ethics in Research - Plagiarism - Definition, different forms, consequences, unintentional plagiarism, copyright infringement, collaborative work. Qualities of good Researcher

### Unit V

ICT Tools for Research : Role of computers in research, maintenance of data using software such as Mendeley, Endnote, Tabulation and graphical presentation of research data and software tools. Web search: Introduction to Internet, use of Internet and WWW, using search engines and advanced search tools.

## **BAG-317B: Publication Ethics and Emerging trends in Research**

### **CO: COURSE OBJECTIVES**

#### **CO-1 Understanding Research Fundamentals:**

- To develop a clear understanding of the principles, concepts, and importance of research in agriculture.
- To familiarize students with the types, objectives, and methodologies of agricultural research.

#### **CO-2 Problem Identification and Formulation:**

- To enable students to identify, define, and articulate research problems specific to agricultural sciences.
- To guide students in framing research hypotheses and objectives.

#### **CO-3 Research Design and Methodology:**

- To introduce students to various research designs, sampling techniques, and data collection methods suited to agricultural studies.
- To train students in the preparation and execution of research plans.

#### **CO-4 Data Analysis and Interpretation:**

- To teach students basic statistical tools and techniques for data analysis in agricultural research.
- To guide students in interpreting research results and deriving meaningful conclusions.

#### **CO-5 Scientific Writing and Reporting:**

- To develop skills for writing research proposals, reports, and scientific papers in the field of agriculture.
- To train students in effective communication and presentation of research findings.

#### **CO-6 Application of Research Tools:**

- To familiarize students with modern tools and software used in agricultural research.
- To emphasize ethical practices in conducting research and handling data.

#### **CO-7 Problem-Solving and Decision-Making:**

- To cultivate critical thinking and analytical skills necessary for addressing real-world agricultural challenges through research.

## CourseContents

### Unit I

Introduction to Research Philosophy: Concept; Definitions; Nature & Scope, General Characteristics of a value-based Research, Axiological approach, Research Ethics; Definition; Moral Philosophy; Nature of Moral Judgments, Political Issues in Research, Ethical Norms & Responses, Enhancing research interests, Research Collaboration & Research Recognition, Ethical guidelines in field research, Concealed Information & Extent of Respondents' rights.

### Unit II

Elements of Research Ethics & Types of Research, Mixed Methods in Applied & Action Research, Internet search, deep web search, Authenticated v. Fake information, Research Integrity & Academic Honesty in Interdisciplinary Research, Redundant Publications; Duplicate & Overlapping Publications; Salami Slicing, Selective Reporting and Misrepresentation of Data.

### Unit III

Publication Ethics: Introduction, Definition, & Importance, Scientific Research Misconduct; Falsification, Fabrication & Plagiarism/Self-plagiarism, Kinds & Remedies, Intellectual Property; Reasonable & Fair Use; Copyright and related IPR Issues, Violation of Publication Ethics; Authorship/Co-authorship, Joint research/ Contributorship & Patentable Inventions- Extent of Rights & Claims, Best Practices/Standards Setting Initiatives and guidelines; COPE, WAME, UGC-CARE list etc. Publication Misconduct; Concept; Definition & Kinds of Problems & Unethical Behaviour, Identification of Publication Misconduct, Complaints & Appeal Provisions.

### Unit IV

Open Access Publications and Initiatives, Creative Common License, Predatory Publishers & Journals, Reference Management & Referencing Standards in Open Access Publishing iv. SHERPA/RoMEO; Online Resources for Publisher Copyright & Self-archiving Policies, Data Management, Data Sharing Techniques, Data Reuse & Data Citation, Software Tool to identify Predatory Publications developed by SPPU, Journal Finder/ Journal suggestions tools viz., JANE, Elsevier Journal Finder, Springer Journal Suggester etc.

### Unit V

Subject specific Ethical Issues, FFP, Authorship, Conflict of Interests; Copyright/Plagiarism Issues, Sharing of data collected for a research (confidentiality, reuse, dissemination or republishing), Consent in publishing/ using different kinds of data and Simultaneous Submission, Complaints & Appeals: Case Studies/Examples of Publication Frauds from India & abroad, Research Literacy & Advocacy; Digital Humanities, Use of Plagiarism Software like Turnitin, Urkund & other Open Source Software Tools.

## **BAG-302 Rainfed Agriculture & Watershed Management**

### **CO: COURSE OBJECTIVES**

**CO-01 Understanding Rainfed Agriculture Systems:** To comprehend the characteristics, challenges, and potential of agricultural systems in rainfed areas and their role in sustainable food production.

**CO-02 Enhancing Water Use Efficiency:** To study techniques for optimizing water use in rainfed agriculture through soil moisture conservation, efficient irrigation methods, and crop selection.

**CO-03 Soil and Water Conservation:** To develop knowledge of soil erosion control, water harvesting techniques, and strategies for enhancing soil fertility in rainfed regions.

**CO- 04 Climate Resilience in Rainfed Areas:** To learn about the impacts of climate change on rainfed agriculture and strategies to build resilience through adaptive cropping systems and agroforestry.

**CO- 05 Integrated Watershed Development:** To study the integration of agricultural productivity, water resource development, and ecological balance in watershed management projects.

**CO- 06 Policy and Socioeconomic Aspects:** To analyze policies, community participation, and economic strategies for the sustainable development of rainfed and watershed-based agriculture.

## Course Contents

### Unit- I:

- Rainfed agriculture: Introduction, types, History of rainfed agriculture and watershed in India;

### Unit- II:

- Problems and prospects of rainfed agriculture in India ; Soil and climatic conditions prevalent in rainfed areas; Soil and water conservation techniques, Drought: types, effect of water deficit on physio-morphological characteristics of the plants,

### Unit- III:

- Crop adaptation and mitigation to drought; Water harvesting: importance, its techniques, Efficient utilization of water through soil and crop management practices,

### Unit- IV:

- Management of crops in rainfed areas, Contingent crop planning for aberrant weather conditions, Concept, objective, principles and components of watershed management, factors affecting watershed management.

### Practical:

Studies on climate classification, studies on rainfall pattern in rainfed areas of the country and pattern of onset and withdrawal of monsoons. Studies on cropping pattern of different rainfed areas in the country and demarcation of rainfed area on map of India. Interpretation of meteorological data and scheduling of supplemental irrigation on the basis of evapo-transpiration demand of crops. Critical analysis of rainfall and possible drought period in the country, effective rainfall and its calculation. Studies on cultural practices for mitigating moisture stress. Characterization and delineation of model watershed. Field demonstration on soil & moisture conservation measures. Field demonstration on construction of water harvesting structures. Visit to rainfed research station/watershed.

## **BAG-304 Protected Cultivation and Secondary Agriculture**

### **CO:COURSE OBJECTIVES**

**CO- 1 Understand the Principles of Protected Cultivation:** Equip students with knowledge about the fundamentals of protected cultivation, including greenhouse design, climate control systems, and production technologies.

**CO- 2 Learn Modern Cultivation Practices:** Introduce advanced cultivation techniques like hydroponics, aeroponics, and vertical farming to optimize crop yields and resource efficiency.

**CO- 3 Develop Skills in Environmental Control:** Teach methods for managing temperature, humidity, light, and ventilation in controlled environments to enhance crop quality and productivity.

**CO- 4 Promote Resource Efficiency:** Emphasize sustainable practices, including water-use efficiency, integrated pest management, and energy conservation in protected farming systems.

**CO- 5 Understand the Role of Secondary Agriculture:** Highlight the importance of post-harvest processing, value addition, and storage techniques in reducing agricultural losses and increasing farmer income.

## Course Contents

### Unit- I:

- Green house technology: Introduction, Types of Green Houses; Plant response to Greenhouse environment, Planning and design of greenhouses,

### Unit- II:

- Design criteria of greenhouse for cooling and heating purposes. Greenhouse equipments, materials of construction for traditional and low cost greenhouses. Irrigation systems used in greenhouses, typical applications, passive solar greenhouse, hot air green house heating systems, green house drying. Cost estimation and economic analysis.

### Unit- III:

- Important Engineering properties such as physical, thermal and aero & hydrodynamic properties of cereals, pulses and oilseed, their application in PHT equipment design and operation. Drying and dehydration; moisture measurement, EMC, drying theory, various drying method, commercial grain dryer (deep bed dryer, flat bed dryer, tray dryer, fluidized bed dryer, recirculatory dryer and solar dryer).

### Unit- IV:

- Material handling equipment; conveyer and elevators, their principle, working and selection.

### Practical:

Study of different type of green houses based on shape. Determine the rate of air exchange in an active summer winter cooling system. Determination of drying rate of agricultural products inside green house. Study of green house equipments. Visit to various Post Harvest Laboratories. Determination of Moisture content of various grains by oven drying & infrared moisture methods. Determination of engineering properties (shape and size, bulk density and porosity of biomaterials). Determination of Moisture content of various grains by moisture meter. Field visit to seed processing plant.

## **BAG-306 Diseases of Field and Horticultural Crops and their Management-II**

### **CO: COURSE OBJECTIVES**

**CO- 1 Understand Major Crop Diseases:** To provide an in-depth understanding of the major diseases affecting field and horticultural crops, including their etiology, symptoms, and epidemiology.

**CO- 2 Identify Disease Symptoms:** To equip students with the skills to accurately identify diseases in crops through field observations and laboratory diagnostics.

**CO- 3 Analyze Disease Dynamics:** To study the factors influencing disease development and spread, including climatic, biological, and cultural conditions.

**CO- 4 Apply Management Strategies:** To introduce integrated disease management strategies, including cultural, biological, chemical, and genetic approaches.

**CO- 5 Evaluate Disease Resistance:** To understand the role of plant resistance and breeding for disease-resistant crop varieties.

**CO- 6 Implement Disease Monitoring Tools:** To teach techniques for monitoring disease outbreaks and predicting potential epidemics using modern tools and technologies.

**CO- 7 Promote Sustainable Practices:** To emphasize the importance of eco-friendly and sustainable disease management practices to minimize environmental impact and ensure long-term crop health.

## Course Contents

### Unit- I:

- Symptoms, etiology, disease cycle and management of following diseases: Field Crops: Wheat: rusts, loose smut, karnal bunt, powdery mildew, alternaria blight, and ear cockle; Sugarcane: red rot, smut, wilt, grassy shoot, ratoon stunting and Pokkah Boeng; Sunflower: Sclerotinia stem rot and Alternaria blight;

### Unit- II:

- Mustard: Alternaria blight, white rust, downy mildew and Sclerotinia stem rot; Gram: wilt, grey mould and Ascochyta blight; Lentil: rust and wilt; Cotton: anthracnose, vascular wilt, and black arm; Pea: downy mildew, powdery mildew and rust.

### Unit- III:

- Horticultural Crops: Mango: anthracnose, malformation, bacterial blight and powdery mildew; Citrus: canker and gummosis; Grape vine: downy mildew, Powdery mildew and anthracnose; Apple: scab, powdery mildew, fire blight and crown gall; Peach: leaf curl.

### Unit- IV:

- Strawberry: leaf spot, Potato: early and late blight, black scurf, leaf roll, and mosaic; Cucurbits: downy mildew, powdery mildew, wilt; Onion and garlic: purple blotch, and Stemphylium blight; Chillies: anthracnose and fruit rot, wilt and leaf curl; Turmeric: leaf spot; Coriander: stem gall, Marigold: Botrytis blight; Rose: dieback, powdery mildew and black leaf spot.

### Practical:

Identification and histopathological studies of selected diseases of field and horticultural crops covered in theory. Field visit for the diagnosis of field problems. Collection and preservation of plant diseased specimens for herbarium.

Note: Students should submit 50 pressed and well-mounted specimens.

## **BAG-308 Post-harvest Management and Value Addition of Fruits and Vegetables**

### **CO: COURSE OBJECTIVES**

**CO- 1 Understand Post-Harvest Physiology:** To explain the physiological and biochemical changes occurring in fruits and vegetables after harvest, including ripening, senescence, and spoilage.

**CO- 2 Minimize Post-Harvest Losses:** To identify factors contributing to post-harvest losses and develop strategies to minimize these losses during handling, storage, and transportation.

**CO- 3 Learn Preservation Techniques:** To study various preservation methods, such as refrigeration, canning, drying, and freezing, to extend the shelf life of fruits and vegetables.

**CO- 4 Enhance Value Addition Skills:** To explore processes for transforming fresh produce into value-added products such as juices, jams, pickles, and dried snacks.

**CO- 5 Understand Quality Standards:** To examine quality assessment techniques and standards for fruits and vegetables to ensure food safety and market acceptability.

**CO- 6 Develop Packaging and Storage Solutions:** To design appropriate packaging and storage systems that maintain the quality and nutritional value of fruits and vegetables.

## Course Contents

### Unit- I:

- Importance of post-harvest processing of fruits and vegetables, extent and possible causes of post-harvest losses;

### Unit- II:

- Pre-harvest factors affecting postharvest quality, maturity, ripening and changes occurring during ripening; Respiration and factors affecting respiration rate; Harvesting and field handling; Storage (ZECC, cold storage, CA, MA, and hypobaric);

### Unit- III:

- Value addition concept; Principles and methods of preservation; Intermediate moisture food - Jam, jelly, marmalade, preserve, candy – Concepts and Standards;

### Unit- IV:

- Fermented and non-fermented beverages. Tomato products- Concepts and Standards; Drying/ Dehydration of fruits and vegetables – Concept and methods, osmotic drying. Canning – Concepts and Standards, packaging of products.

### Practical:

Applications of different types of packaging, containers for shelf life extension. Effect of temperature on shelf life and quality of produce. Demonstration of chilling and freezing injury in vegetables and fruits. Extraction and preservation of pulps and juices. Preparation of jam, jelly, RTS, nectar, squash, osmotically dried products, fruit bar and candy and tomato products, canned products. Quality evaluation of products -- physico-chemical and sensory. Visit to processing unit/industry.

## **BAG-310 Management of Beneficial Insects**

### **CO: COURSE OBJECTIVES**

**CO-1 Identify Beneficial Insects:** Develop the ability to recognize and classify key beneficial insect species, including pollinators, predators, and parasitoids, based on their roles in ecosystems and agriculture.

**CO-2 Understand Ecological Roles:** Gain comprehensive knowledge about the ecological functions of beneficial insects, including their contributions to pollination, pest control, and biodiversity.

**CO-3 Explore Habitat Requirements:** Learn to assess the habitat needs of beneficial insects and understand how to create or manage environments that support their survival and effectiveness.

**CO-4 Implement Conservation Strategies:** Develop strategies for conserving and enhancing populations of beneficial insects through sustainable practices such as integrated pest management (IPM) and agroecological approaches.

**CO-5 Evaluate Environmental Impact:** Analyze the effects of agricultural practices, pesticide use, and climate change on beneficial insect populations and their ecological functions.

**CO-6 Promote Sustainable Agriculture:** Understand the integration of beneficial insects into sustainable agricultural systems to improve crop yields, reduce chemical inputs, and foster environmental health.

**CO-7 Develop Management Plans:** Design and implement practical management plans for promoting beneficial insects in agricultural and natural ecosystems, tailored to specific regions or crop systems.

## Course Contents

### Unit- I:

- Importance of beneficial insects, beekeeping and pollinators, bee biology, commercial methods of rearing, equipment used, seasonal management, bee enemies and disease. Bee pasturage, bee foraging and communication. Insect pests and diseases of honeybee. Role of pollinators in cross-pollinated plants.

### Unit- II:

- Types of silkworm, vernalism and biology of silkworm. Mulberry cultivation, mulberry varieties and methods of harvesting and preservation of leaves. Rearing, mounting and harvesting of cocoons. Pest and diseases of silkworm, management, rearing appliances of mulberry silkworm and methods of disinfection.

### Unit- III:

- Species of lac insect, morphology, biology, host plant, lac production – seed lac, button lac, shellac, lac- products. Identification of major parasitoids and predators commonly being used in biological control.

### Unit- IV:

- Insect orders bearing predators and parasitoids used in pest control and their mass multiplication techniques. Important species of pollinator, weed killers and scavengers with their importance.

### Practical:

Honey bee species, castes of bees. Beekeeping appliances and seasonal management, bee enemies and disease. Bee pasturage, bee foraging and communication. Types of silkworm, vernalism and biology of silkworm. Mulberry cultivation, mulberry varieties and methods of harvesting and preservation of leaves. Species of lac insect, host plant identification. Identification of other important pollinators, weed killers and scavengers. Visit to research and training institutions devoted to beekeeping, sericulture, lac culture and natural enemies. Identification and techniques for mass multiplication of natural enemies.

## **BAG-312 Crop Improvement-II (Rabi crops)**

### **CO: COURSE OBJECTIVES**

**CO-1 Understanding the Importance of Rabi Crops:** Explain the economic and nutritional significance of major Rabi crops in agriculture and their role in ensuring food security.

**CO-2 Exploring Crop Breeding Techniques:** Study advanced breeding methods, including hybridization, mutation breeding, and biotechnological approaches, for the genetic improvement of Rabi crops.

**CO-3 Enhancing Stress Tolerance:** Develop strategies to improve Rabi crops' tolerance to abiotic stresses like drought, frost, and nutrient deficiencies, as well as biotic stresses such as pests and diseases.

**CO-4 Focusing on Yield and Quality Traits:** Improve the productivity, nutritional quality, and marketability of Rabi crops through targeted breeding and selection techniques.

**CO-5 Integrating Genomics and Biotechnology:** Apply molecular biology tools, such as marker-assisted selection (MAS) and genetic engineering, for faster and more precise crop improvement.

## Course Contents

### Unit- I:

- Centers of origin, distribution of species, wild relatives in different cereals; pulses; oilseeds; food crops and cash crops; vegetable and horticultural crops;

### Unit- II:

- Plant genetic resources, its utilization and conservation; study of genetics of qualitative and quantitative characters;

### Unit- III:

- Major breeding objectives and procedures including conventional and modern innovative approaches for development of hybrids and varieties for yield, adaptability, stability, abiotic and biotic stress tolerance and quality (physical, chemical, nutritional);

### Unit- IV:

- Hybrid seed production technology of major crops. Ideotype concept and climate resilient crop varieties for future.

## Course Contents

### **Practical:**

Floral biology, emasculation and hybridization techniques in different crop species namely Wheat, Oat, Barley, Chickpea, Lentil, Field pea, Rajma, Horse gram, Rapeseed Mustard, Sunflower, Safflower, Potato, Berseem, Sugarcane, Tomato, Chilli, Onion; Handling of germplasm and segregating populations by different methods like pedigree, bulk and single seed descent methods; Study of field techniques for seed production and hybrid seed production in Rabi crops; Estimation of heterosis, inbreeding depression and heritability; Layout of field experiments; Study of quality characters, study of donor parents for different characters; Visit to seed production plots; Visit to AICRP plots of different field crops

## **BAG-314 Practical Crop Production –II (Rabi crops)**

### **CO: COURSE OBJECTIVES**

**CO-1 Understand Rabi Crop Management:** Develop a comprehensive understanding of the principles and practices involved in the cultivation of major Rabi crops, including wheat, barley, mustard, chickpea, and lentils.

**CO-2 Learn Soil Preparation Techniques:** Gain practical knowledge of soil preparation, nutrient management, and seedbed preparation techniques suitable for Rabi crop cultivation.

**CO-3 Master Sowing Practices:** Acquire skills in selecting, treating, and sowing seeds at appropriate times and methods to ensure optimal germination and yield.

**CO-4 Implement Irrigation Strategies:** Learn the principles of water management and irrigation scheduling specific to the requirements of Rabi crops.

**CO-5 Apply Pest and Weed Management:** Develop proficiency in identifying and managing pests, diseases, and weeds that affect Rabi crops using integrated pest management (IPM) strategies.

**CO-6 Practice Harvesting and Post-Harvest Techniques:** Understand the methods of harvesting, threshing, storage, and quality preservation of Rabi crops to minimize losses and maintain market standards.

## Course Contents

### **Practical:**

Crop planning, raising field crops in multiple cropping systems: Field preparation, seed, treatment, nursery raising, sowing, nutrient, water and weed management and management of insect-pests/diseases of crops, harvesting, threshing, drying, winnowing, storage and marketing of produce. The emphasis will be given to seed production, mechanization, resource conservation and integrated nutrient, insect-pest and disease management technologies. Preparation of balance sheet including cost of cultivation, net returns per student as well as per team of 8-10 students.

## **BAG-316 Principles of Organic Farming**

### **CO: COURSE OBJECTIVES**

**CO-1 Understand the Fundamentals of Organic Farming:** Learn the basic principles, philosophy, and historical development of organic agriculture.

**CO-2 Recognize the Importance of Soil Health:** Study the role of soil fertility and health in organic farming, including practices like composting, crop rotation, and cover cropping.

**CO-3 Explore Organic Farming Practices:** Examine the techniques used in organic farming, such as natural pest management, weed control, and water conservation methods.

**CO-4 Analyze Certification Standards:** Understand the rules, regulations, and certification processes for organic farming at national and international levels.

**CO-5 Promote Environmental Sustainability:** Assess how organic farming contributes to environmental sustainability by reducing chemical inputs and promoting biodiversity.

## Course Contents

### Unit- I:

- Organic farming, principles and its scope in India; Initiatives taken by Government (central/ state), NGOs and other organizations for promotion of organic agriculture; Organic ecosystem and their concepts;

### Unit- II:

- Organic nutrient resources and its fortification; Restrictions to nutrient use in organic farming; Choice of crops and varieties in organic farming;

### Unit- III:

- Fundamentals of insect, pest, disease and weed management under organic mode of production; Operational structure of NPOP;

### Unit- IV:

- Certification process and standards of organic farming; Processing, leveling, economic considerations and viability, marketing and export potential of organic products.

### Practical:

Visit of organic farms to study the various components and their utilization; Preparation of enriched compost, vermin-compost, bio-fertilizers/bio-inoculants and their quality analysis; Indigenous technology knowledge (ITK) for nutrient, insect, pest, disease and weed management; Cost of organic production system; Post harvest management; Quality aspect, grading, packaging and handling.

## **BAG-318 Farm Management, Production & Resource Economics**

### **CO: COURSE OBJECTIVES**

**CO-1 Understand the Principles of Farm Management:** Equip students with knowledge of the core principles of managing a farm, including planning, organizing, directing, and controlling agricultural operations.

**CO-2 Analyze Agricultural Production Systems:** Develop the ability to assess and optimize production systems to improve efficiency and productivity in farm enterprises.

**CO-3 Apply Economic Principles to Resource Allocation:** Train students to apply economic concepts to allocate resources effectively, ensuring sustainability and profitability in agriculture.

**CO-4 Evaluate Financial Performance of Farms:** Enable students to use financial tools and techniques to evaluate the profitability, liquidity, and solvency of farm businesses.

**CO-5 Understand Risk and Uncertainty in Agriculture:** Teach strategies to manage risks and uncertainties in farming caused by market fluctuations, climate variability, and policy changes.

**CO-6 Optimize Resource Use for Sustainable Farming:** Instill knowledge about sustainable use of land, labor, capital, and technology to achieve long-term agricultural viability.

## Course Contents

### Unit- I:

- Meaning and concept of farm management, objectives and relationship with other sciences. Meaning and definition of farms, its types and characteristics, factors determining types and size of farms. Principles of farm management: concept of production function and its type, use of production function in decision-making on a farm, factor-product, factor-factor and product-product relationship, law of equi-marginal or principles of opportunity cost and law of comparative advantage.

### Unit- II:

- Meaning and concept of cost, types of costs and their interrelationship, importance of cost in managing farm business and estimation of gross farm income, net farm income, family labour income and farm business income. Farm business analysis: meaning and concept of farm income and profitability, technical and economic efficiency measures in crop and livestock enterprises.

### Unit- III:

- Importance of farm records and accounts in managing a farm, various types of farm records needed to maintain on farm, farm inventory, balance sheet, profit and loss accounts. Meaning and importance of farm planning and budgeting, partial and complete budgeting, steps in farm planning and budgeting-linear programming, appraisal of farm resources, selection of crops and livestock's enterprises. Concept of risk and uncertainty occurs in agriculture production, nature and sources of risks and its management strategies, Crop/livestock/machinery insurance

### Unit- IV:

- Weather based crop insurance, features, determinants of compensation. Concepts of resource economics, differences between NRE and agricultural economics, unique properties of natural resources. Positive and negative externalities in agriculture, Inefficiency and welfare loss, solutions, Important issues in economics and management of common property resources of land, water, pasture and forest resources etc.

### Practical:

Preparation of farm layout. Determination of cost of fencing of a farm. Computation of depreciation cost of farm assets. Application of equi-marginal returns/opportunity cost principle in allocation of farm resources. Determination of most profitable level of inputs use in a farm production process. Determination of least cost combination of inputs. Selection of most profitable enterprise combination. Application of cost principles including CACP concepts in the estimation of cost of crop and livestock enterprises. Preparation of farm plan and budget, farm records and accounts and profit & loss accounts. Collection and analysis of data on various resources in India.

## **BAG-320 Principles of Food Science and Nutrition**

### **CO: COURSE OBJECTIVES**

**CO-1 Understand the Fundamentals of Food Science:** Explain the physical, chemical, and biological principles underlying food systems and their application in food production and processing.

**CO-2 Explore Nutritional Requirements:** Analyze the role of essential nutrients in human health and their impact on growth, development, and disease prevention.

**CO-3 Evaluate Food Quality and Safety:** Assess factors that affect food quality, safety, and shelf life, including food preservation techniques and contamination risks.

**CO-4 Investigate Food Processing Methods:** Identify and describe common food processing methods and their influence on nutritional value, sensory properties, and food functionality.

**CO-5 Examine the Role of Food in Society:** Discuss the cultural, social, and economic factors that influence food choices and dietary habits globally.

**CO-6 Apply Principles of Nutrition:** Design balanced diets and recommend nutritional interventions based on scientific evidence to address specific health conditions or goals.

## Course Contents

### Unit- I:

- Concepts of Food Science (definitions, measurements, density, phase change, pH, osmosis, surface tension, colloidal systems etc.);

### Unit- II:

- Food composition and chemistry (water, carbohydrates, proteins, fats, vitamins, minerals, flavours, colours, miscellaneous bioactives, important reactions);

### Unit- III:

- Food microbiology (bacteria, yeast, moulds, spoilage of fresh & processed foods, Production of fermented foods);

### Unit- IV:

- Principles and methods of food processing and preservation (use of heat, low temperature, chemicals, radiation, drying etc.); Food and nutrition, Malnutrition (over and under nutrition), nutritional disorders;

### Unit- V:

- Energy metabolism (carbohydrate, fat, proteins); Balanced/modified diets, Menu planning, New trends in food science and nutrition.

**BAG-321:ElectiveCourse**

## **B.Sc. (Ag.) VII Semester**

### **BAG-401 General orientation & on campus training by different Faculties**

#### **CO: COURSE OBJECTIVES**

**CO-1 Familiarization with the Institution:** Introduce students to the institution's culture, values, and infrastructure. Provide an overview of various academic and co-curricular resources available on campus.

**CO-2 Interdisciplinary Exposure:** Facilitate interaction with faculty members from different disciplines to broaden students' academic perspectives. Encourage understanding of multidisciplinary approaches to problem-solving and learning.

**CO-3 Skill Development:** Enhance communication, teamwork, and interpersonal skills through interactive sessions. Introduce students to tools and techniques relevant to academic and professional success.

**CO-4 Guidance on Academic Pathways:** Offer insights into academic programs, research opportunities, and career trajectories. Provide orientation on the curriculum, evaluation systems, and academic expectations.

**CO-5 Motivation and Goal Setting:** Inspire students through lectures and interactions with experienced faculty. Help students set personal and academic goals for their educational journey.

**CO-6 Community Building:** Create a sense of belonging and engagement among students by fostering peer and faculty interactions. Encourage participation in campus life, clubs, and other student activities.

## **BAG-403 Village attachment**

### **CO: COURSE OBJECTIVES**

**CO-1 Understanding Rural Life:** To familiarize students with the day-to-day lifestyle, culture, traditions, and challenges faced by rural communities.

**CO-2 Knowledge of Agricultural Practices:** To observe and analyze the farming systems, cropping patterns, and the use of modern and traditional agricultural techniques.

**CO-3 Socio-Economic Awareness:** To assess the socio-economic structure of rural areas, including income sources, living standards, education, healthcare, and social organization.

**CO-4 Community Engagement:** To encourage students to interact with farmers, laborers, and village authorities to understand their perspectives and aspirations.

**CO-5 Identification of Problems:** To identify key issues in rural development, such as water scarcity, soil degradation, lack of education, or health facilities, and suggest possible solutions.

**CO-6 Application of Knowledge:** To apply classroom knowledge in real-life rural scenarios, enhancing problem-solving skills and practical learning.

**CO-7 Promoting Sustainable Practices:** To educate villagers about sustainable agricultural and livelihood practices, emphasizing the importance of environmental conservation.

## **BAG-405 Unit attachment in University/College/KVK / Research Station Attachment**

### **CO: COURSE OBJECTIVES**

**CO-1 Skill Development:** Equip students with practical knowledge and skills in agricultural practices, laboratory techniques, and modern research methodologies. Develop competencies in handling scientific instruments and performing field trials.

**CO-2 Practical Knowledge Application:** Provide exposure to real-life applications of theoretical concepts learned in classrooms. Enable students to analyze and solve on-ground agricultural challenges.

**CO-3 Research Familiarity:** Introduce students to research station operations and research methodologies, including data collection, analysis, and reporting. Foster a research-oriented mindset.

**CO-4 Knowledge of Extension Services:** Understand the role of Krishi Vigyan Kendras (KVKs) in technology dissemination and farmer training. Participate in outreach programs, on-farm demonstrations, and training sessions conducted for farmers.

**CO-5 Collaborative Learning:** Facilitate interaction with agricultural scientists, extension workers, and farmers to gain diverse perspectives on agriculture. Promote teamwork in multidisciplinary agricultural projects.

**CO-6 Exposure to Advanced Techniques:** Familiarize students with advanced agricultural techniques like precision farming, integrated pest management, and sustainable resource management. Gain insights into recent innovations in agriculture and their implementation.

**CO-7 Career Readiness:** Prepare students for future roles in academics, research, and extension services. Enhance employability through experience in professional agricultural setups.

## **BAG-407 Plant Clinic**

### **CO: COURSE OBJECTIVES**

**CO-1 Diagnosis of Plant Problems:** Develop the ability to identify symptoms of diseases, pests, nutrient deficiencies, and abiotic stresses in plants.

**CO-2 Integrated Pest and Disease Management (IPDM):** Understand and implement IPDM strategies to manage plant health issues sustainably.

**CO-3 Understanding Plant-Pathogen Interactions:** Learn the mechanisms of how pathogens, pests, and environmental factors affect plant growth and productivity.

**CO-4 Use of Diagnostic Tools and Techniques:** Train in the application of modern diagnostic tools, such as microscopy, molecular methods, and field-based techniques.

**CO-5 Prescribing Solutions:** Gain expertise in recommending suitable control measures, including chemical, biological, and cultural practices.

**CO-6 Monitoring and Early Warning Systems:** Learn to establish monitoring systems for early detection of plant health problems.

**CO-7 Advisory Services:** Prepare to provide guidance to farmers and stakeholders on plant health management.

## **BAG-409 Agro-Industrial Attachment**

### **CO: COURSE OBJECTIVES**

**CO-1 Practical Exposure:** Provide students with hands-on experience in agro-industrial operations, enabling them to understand the real-world functioning of agriculture-related industries.

**CO-2 Skill Development:** Develop technical and managerial skills through active participation in various industrial processes, including production, processing, and quality management.

**CO-3 Industry-Academia Interface:** Strengthen the connection between educational institutions and industries to align academic training with industrial requirements.

**CO-4 Understanding Industrial Processes:** Familiarize students with the working principles, technologies, and machinery used in agro-industrial units, such as food processing, agrochemicals, or farm machinery.

**CO-5 Professional Networking:** Build relationships with industry professionals, which can help students understand market trends, entrepreneurship opportunities, and career prospects.

**CO-6 Problem-Solving Ability:** Encourage students to identify and analyze real-time challenges in agro-industries and propose innovative solutions.

**CO-7 Entrepreneurship Development:** Inspire entrepreneurial mindset by exposing students to industrial strategies, supply chain mechanisms, and business models in agriculture.

**CO-8 Value Addition Awareness:** Help students understand the importance of value addition in agriculture and its role in enhancing income and sustainability.

## **BAG-411 Project Report Preparation, Presentation and Evaluation General Orientation & On campus training by different Faculties**

### **CO: COURSE OBJECTIVES**

**CO-1 Skill Development in Research Methodology:** Equip students with the knowledge to design and implement research projects systematically. Teach proper techniques for data collection, analysis, and interpretation.

**CO-2 Enhancing Report Writing Skills:** Develop the ability to prepare well-structured, concise, and comprehensive project reports. Focus on correct formatting, citation, and documentation practices.

**CO-3 Effective Presentation Techniques:** Train students to present their research findings clearly and confidently using various tools (e.g., PowerPoint, charts, graphs). Improve communication skills for academic and professional contexts.

**CO-4 Evaluation and Feedback Integration:** Enable students to critically evaluate research work (their own and others'). Incorporate constructive feedback to refine their research and reporting skills.

**CO-5 Team Collaboration and Interdisciplinary Exposure:** Promote teamwork and exchange of ideas among peers. Foster an understanding of interdisciplinary approaches to problem-solving.

**CO-6 Practical Exposure through Faculty Training:** Gain insights into specialized topics through on-campus training sessions conducted by expert faculty members. Learn from real-world case studies, faculty experiences, and practical demonstrations.

**CO-7 Career Readiness:** Prepare students for professional roles requiring project planning, execution, and reporting skills. Build confidence in handling future academic or industrial projects.

**CO-8 Critical Thinking and Problem Solving:** Develop analytical skills to identify challenges and propose solutions within a project framework.

### Rural Agricultural Work Experience (RAWE) and Agro-Industrial Attachment (AIA)

- This program will be undertaken by the students during the seventh semester for a total duration of 20 weeks with a weightage of 0+20 credit hours in two parts, namely, RAWE and AIA.
- It will consist of general orientation and on-campus training by different faculties followed by village attachment/unit attachment in university/college/KVK or a research station.
- The students would be attached with the agro-industries to get an experience of the industrial environment and working.
- Due weightage in terms of credit hours will be given depending upon the duration of stay of students in villages/agro-industries.
- At the end of RAWE/AIA, the students will be given one week for project report preparation, presentation and evaluation.

The Rural Agricultural Work Experience (RAWE) helps the students primarily to understand the rural situations, status of agricultural technologies adopted by the farmers to prioritize the farmers' problems and to develop skills & attitude of working with farm families for overall development in rural area. The timings for RAWE can be flexible for specific regions to coincide with the main cropping season.

## RAWECOMPONENT-I:VillageAttachmentTrainingProgramme

S. No	Activity	Duration
1	Orientation andSurveyofVillage	1 week
2	AgronomicalInterventions	1 week
3	PlantProtection Interventions	1 week
4	SoilImprovement Interventions(Soil samplingand testing)	1 week
5	FruitandVegetableproductioninterventions	1 week
6	FoodProcessingand Storageinterventions	
7	AnimalProductionInterventions	1 week
8	Extension andTransferofTechnologyactivities	1 week

## **RAWE Component –II:AgroIndustrialAttachment**

- StudentsshallbeplacedinAgro- andCottageindustriesandCommoditiesBoardsfor03weeks.
- IndustriesincludeSeed/Saplingproduction,Pesticides-insecticides,Post-harvest-processing-value addition, Agri-financeinstitutions, etc.

### **ActivitiesandTasksduringAgro-IndustrialAttachmentProgramme**

- Acquaintancewithindustryandstaff
- Studyofstructure, functioning,objectiveandmandatesof theindustry
- Studyofvariousprocessingunitsandhands-ontrainingsundersupervisionofindustrystaff
- Ethics of industry
- Employmentgeneratedbytheindustry
- Contribution of the industrypromotingenvironment
- Learningbusinessnetwork includingoutlets of the industry
- Skilldevelopment inallcrucialtasks of the industry
- Documentation oftheactivities and task performed bythe students
- Performanceevaluation,appraisalandrakingofstudents

## **B.Sc. (Ag.) VIII Semester**

### **BAG-402 Production Technology for Bioagents and Biofertilizer**

#### **CO: COURSE OBJECTIVES**

**CO-01 Understanding Bioagents and Biofertilizers:** Familiarize students with the concept, types, and importance of bioagents (e.g., biocontrol agents like Trichoderma, Bacillus) and biofertilizers (e.g., Rhizobium, Azotobacter, Mycorrhiza).

**CO-02 Production Technologies:** Equip students with knowledge about the production processes, culture techniques, and maintenance of bioagents and biofertilizers under laboratory and industrial conditions.

**CO-03 Formulation and Quality Control:** Teach methods for the formulation, packaging, and quality assessment of bioagents and biofertilizers to ensure their efficacy and shelf life.

**CO-04 Application Techniques:** Train students in the effective application methods of bioagents and biofertilizers in agriculture for sustainable crop production.

**CO-05 Environmental and Economic Benefits:** Highlight the role of bioagents and biofertilizers in reducing chemical inputs, improving soil health, enhancing crop productivity, and promoting eco-friendly agricultural practices.

**CO-06 Entrepreneurial Opportunities:** Encourage students to explore entrepreneurship in the biofertilizer and bioagent production sector as a sustainable business model.

## **BAG-404 Seed Production and Technology**

### **CO: COURSE OBJECTIVES**

**CO-01 Understanding Seed Science:** To provide a thorough understanding of the principles of seed biology, including seed development, physiology, and germination.

**CO-02 Seed Production Techniques:** To learn the methodologies and technologies used in the production of quality seeds for various crops.

**CO-03 Seed Certification and Quality Control:** To understand the standards, procedures, and practices involved in seed certification, labeling, and maintaining quality standards.

**CO-04 Seed Storage and Preservation:** To study the principles and techniques of seed storage, maintaining seed viability, and longevity under various conditions.

**CO-05 Hybrid Seed Production:** To explore techniques for hybrid seed production, including pollination control mechanisms and genetic purity maintenance.

**CO-06 Seed Health and Testing:** To familiarize students with seed testing protocols for germination, vigor, purity, and health.

**CO-07 Role in Crop Improvement:** To highlight the role of quality seed production in improving crop yield, disease resistance, and overall agricultural productivity.

## **BAG-406 Mushroom Cultivation Technology**

### **CO: COURSE OBJECTIVES**

**CO-01 Understanding Mushroom Biology:** Learn about the taxonomy, morphology, and physiology of edible and medicinal mushrooms. Understand the ecological role and nutritional importance of mushrooms.

**CO-02 Cultivation Techniques:** Develop skills in the preparation of substrates for mushroom cultivation. Understand the methods of spawn production and management. Learn cultivation practices for different types of mushrooms (e.g., button, oyster, shiitake, and milky mushrooms).

**CO-03 Post-Harvest Management:** Gain knowledge about harvesting, processing, and packaging techniques. Explore value-added products and storage methods to enhance shelf life.

**CO-04 Disease and Pest Management:** Understand common diseases, pests, and environmental issues affecting mushroom production. Learn preventive and curative measures.

**CO-05 Economic and Entrepreneurial Skills:** Develop an understanding of the commercial potential of mushroom cultivation. Gain knowledge of cost-effective production, market trends, and business planning. Explore opportunities for small-scale and large-scale entrepreneurship.

**CO-06 Sustainability and Waste Utilization:** Learn about sustainable practices in mushroom cultivation. Explore the use of agricultural waste and by-products as substrates for cultivation.

**CO-07 Practical Applications and Hands-on Training:** Engage in hands-on training for setting up mushroom farms and spawn production units.

## **BAG-408 Soil, Plant, Water and Seed Testing**

### **CO: COURSE OBJECTIVES**

**CO-01 Understand Soil Testing:** Develop expertise in analyzing soil physical, chemical, and biological properties. Provide recommendations for sustainable soil fertility management based on test results.

**CO-02 Plant Testing and Analysis:** Learn to assess plant tissue for nutrient status to identify deficiencies, toxicities, or imbalances. Integrate plant analysis data with soil tests for efficient nutrient management.

**CO-03 Water Testing:** Evaluate water quality parameters like pH, electrical conductivity, salinity, and contaminant levels for agricultural use. Understand the suitability of water for irrigation and its impact on soil and crop health.

**CO-04 Seed Testing:** Develop skills in determining seed quality, including germination percentage, vigor, moisture content, and purity. Learn methods to ensure high-quality seed production for better crop yields.

**CO-05 Promote Sustainable Agriculture:** Integrate testing practices to make informed decisions for sustainable and environmentally friendly farming practices.

**CO-06 Enhance Research and Analytical Skills:** Train in the use of advanced instruments and methodologies for precise analysis. Foster critical thinking and problem-solving in agricultural resource management.

**CO-07 Policy and Advisory Role:** Equip participants to work as advisors or policymakers in agriculture, ensuring resource-efficient and sustainable practices are adopted at local and regional levels.

## **BAG-410 Commercial Beekeeping**

### **CO: COURSE OBJECTIVES**

**CO-01 Introduction to Beekeeping:** Understanding the fundamentals of beekeeping, including bee biology, behavior, and the role of bees in agriculture and biodiversity.

**CO-02 Bee Management Practices:** Learning how to manage bee colonies effectively for honey production, pollination, and other byproducts like beeswax, propolis, and royal jelly.

**CO-03 Hive Management:** Training on how to maintain and manage beehives, including setting up, inspecting, and maintaining healthy hives for maximum productivity.

**CO-04 Disease and Pest Control:** Understanding common diseases and pests that affect bees and how to manage them to ensure a thriving colony.

**CO-05 Pollination Services:** Exploring the commercial aspects of pollination services for crops, especially for fruit, vegetable, and seed production.

**CO-06 Honey Harvesting and Processing:** Learning the best practices for harvesting honey and other bee products, followed by methods of extraction, processing, and packaging for sale.

**CO-07 Marketing and Business Skills:** Developing the skills needed to run a successful commercial beekeeping operation, including market analysis, business planning, and product distribution.

## **BAG-412 Poultry Production Technology**

### **CO: COURSE OBJECTIVES**

**CO-01 Understanding Poultry Husbandry:** Teaching the basics of poultry farming, including the care, breeding, and management of poultry species such as chickens, ducks, turkeys, and geese.

**CO-02 Poultry Nutrition:** Understanding the nutritional requirements of poultry for different stages of growth (chicks, growers, and layers), including feed formulation and feeding techniques.

**CO-03 Poultry Health Management:** Learning about common diseases in poultry, their prevention, and control measures, along with vaccination schedules and biosecurity practices.

**CO-04 Poultry Breeding:** Gaining knowledge of selective breeding techniques for improving traits like egg production, meat quality, and disease resistance.

**CO-05 Egg and Meat Production:** Developing the skills required to manage egg-laying and meat-producing flocks, ensuring high productivity and quality.

**CO-06 Poultry Farm Management:** Acquiring skills in managing a poultry farm, including housing design, waste management, record-keeping, and financial management.

**CO-07 Poultry Processing and Marketing:** Understanding the steps involved in processing poultry products (eggs, meat) for market readiness, along with packaging, storage, and marketing strategies.

**CO-08 Sustainable Practices:** Promoting environmentally sustainable poultry farming practices, including waste management, resource optimization, and minimizing environmental impact.

## **BAG-414 Commercial Horticulture**

### **CO: COURSE OBJECTIVES**

**CO-01 Understanding Horticultural Practices:** Learn about the scientific principles and techniques involved in the cultivation of various horticultural crops, including soil preparation, irrigation, fertilization, and pest management.

**CO-02 Business and Economic Aspects:** Develop the ability to assess the economic viability of horticultural ventures, including cost analysis, market trends, and profitability. Understanding the economics of large-scale horticultural production is crucial for success in commercial farming.

**CO-03 Sustainable Practices:** Focus on the adoption of sustainable farming methods, such as organic farming, integrated pest management (IPM), and water conservation techniques, ensuring long-term productivity without compromising environmental health.

**CO-04 Advanced Technologies:** Explore the use of modern technologies in horticulture, including greenhouse production, hydroponics, precision agriculture, and the application of biotechnology in crop improvement.

**CO-05 Post-Harvest Management:** Understand the techniques for post-harvest handling, storage, and transportation to reduce losses and maintain product quality, which is key to the success of commercial horticultural enterprises.

**CO-06 Market and Supply Chain Management:** Gain insights into market demand, packaging, distribution, and logistics involved in the commercialization of horticultural products, including export opportunities.

**CO-07 Entrepreneurial Skills:** Equip students with entrepreneurial skills to start their own horticulture-based ventures, focusing on innovation, business planning, and financial management.

## **BAG-416 Floriculture and Landscaping**

### **CO: COURSE OBJECTIVES**

**CO-01 Understanding of Floriculture:** To provide students with knowledge about the production, cultivation, and management of flowers and ornamental plants. This includes learning about plant varieties, their growth requirements, and techniques for effective flower cultivation.

**CO-02 Landscape Design Principles:** To teach the principles of designing functional, aesthetically pleasing, and sustainable landscapes. This covers aspects such as site analysis, plant selection, design concepts, and landscaping elements (e.g., pathways, fountains, and sculptures).

**CO-03 Techniques in Landscaping:** To equip students with practical skills in landscape maintenance, soil preparation, irrigation, and pest management, which are essential for creating and maintaining beautiful gardens and landscapes.

**CO-04 Environmental Sustainability:** To highlight the role of floriculture and landscaping in promoting environmental sustainability, including water conservation, biodiversity, and reducing carbon footprints through green spaces.

**CO-05 Economic Aspects of Floriculture and Landscaping:** To explore the economic potential of floriculture as a business, including the marketing of flowers, plants, and landscaping services, as well as the role of landscaping in urban development.

**CO-06 Horticultural Practices:** To teach students the various horticultural practices specific to the cultivation of flowers and ornamental plants, such as propagation, pruning, and harvesting.

## **BAG-418 Food Processing**

### **CO: COURSE OBJECTIVES**

**CO-01 Understanding Food Processing Principles:** To introduce students to the fundamental principles of food processing, such as preservation, fermentation, freezing, drying, and packaging, and their role in enhancing shelf life, nutritional value, and sensory qualities of food.

**CO-02 Exploring Different Processing Techniques:** To familiarize students with various processing techniques used in the food industry, including thermal processing, refrigeration, dehydration, canning, pasteurization, and extrusion.

**CO-03 Food Safety and Quality Control:** To emphasize the importance of food safety, sanitation, and quality control measures during processing to prevent contamination and ensure that food products meet regulatory standards.

**CO-04 Impact on Nutritional Content:** To examine how different processing methods affect the nutritional content, bioavailability of nutrients, and sensory attributes (taste, color, texture) of food products.

**CO-05 Technology and Innovation:** To expose students to the latest advancements in food processing technology, including automation, use of enzymes, nanotechnology, and other innovative methods for improving efficiency and sustainability in food production.

**CO-06 Understanding Food Product Development:** To equip students with skills in food product formulation and development, enabling them to create new food products based on consumer demands, market trends, and nutritional needs.

**CO-07 Economic and Environmental Aspects:** To analyze the economic feasibility of food processing operations, including cost analysis, resource utilization, and the environmental impact of food processing techniques.

**Practical Application:** To provide hands-on experience through laboratory work or industry internships, where students can apply theoretical knowledge to real-world food processing challenges.

## **BAG-420 Agriculture Waste Management**

### **CO: COURSE OBJECTIVES**

**CO-01 Understanding Agricultural Waste:** Learn about the types of agricultural waste generated (e.g., crop residues, animal manure, and agro-industrial waste) and their environmental impact.

**CO-02 Waste Disposal and Recycling:** Explore methods for the safe disposal and recycling of agricultural waste to minimize environmental pollution.

**CO-03 Waste-to-Energy Technologies:** Study technologies that convert agricultural waste into energy (e.g., biogas production, biofuels).

**CO-04 Composting and Soil Health:** Understand how agricultural waste can be composted and used to improve soil health and fertility.

**CO-05 Environmental Impact Assessment:** Evaluate the environmental implications of poor waste management practices and the importance of sustainable waste management in agriculture.

**CO-06 Policy and Regulation:** Study national and international policies, regulations, and standards related to agricultural waste management.

## **BAG-422 Organic Production Technology**

### **CO: COURSE OBJECTIVES**

**CO-01 Understanding Organic Farming Principles:** Introduce students to the fundamental principles of organic farming, emphasizing the importance of sustainability, biodiversity, and soil health.

**CO-02 Techniques of Organic Crop Production:** Equip students with knowledge of various organic farming practices such as crop rotation, composting, green manure, mulching, and organic pest management.

**CO-03 Soil Health Management:** Teach students how organic production emphasizes soil fertility through the use of organic matter, bio-fertilizers, and soil-friendly techniques, avoiding chemical inputs.

**CO-04 Organic Inputs and Fertilization:** Focus on the sources and use of organic fertilizers, including compost, vermicompost, biofertilizers, and plant-based nutrient amendments.

**CO-05 Certification and Standards:** Provide knowledge on organic certification processes, standards, and regulations to ensure products meet the requirements for organic labeling.

**CO-06 Pest and Disease Management in Organic Systems:** Teach students how to manage pests and diseases through non-chemical means like biological control, physical methods, and plant resistance.

## **BAG-424 Commercial Sericulture**

### **CO: COURSE OBJECTIVES**

**CO-1 Understanding Sericulture Basics:** To introduce students to the history, principles, and biology of sericulture, focusing on silk-producing organisms, particularly silkworms (*Bombyxmori*).

**CO-2 Silkworm Rearing Techniques:** To train students in the various techniques involved in silkworm rearing, including the selection of appropriate breeds, feeding, and care of silkworms to enhance silk production.

**CO-03 Silk Cocoon Production:** To impart knowledge about cocoon harvesting, handling, and processing for commercial silk production.

**CO-04 Sericulture Infrastructure:** To educate students on setting up and managing a sericulture farm, including the design of rearing houses, mulberry cultivation for silkworm feed, and other necessary infrastructure.

**CO-05 Economic Aspects:** To explore the economic potential of sericulture, including cost analysis, profit margins, market trends, and the development of a business model.

**CO-06 Post-harvest Processing:** To provide hands-on training in processing cocoons into silk threads, including reeling, twisting, dyeing, and weaving.

**CO-07 Sustainability in Sericulture:** To discuss sustainable sericulture practices, pest management, and environmental concerns associated with silk farming.

## Modules for Skill Development and Entrepreneurship

A student has to register 20 credits opting for two modules of (0+10) credits each (total 20 credits) from the following package of modules in the VIII semester.

NOTE: In addition to above ELP modules other important modules may be given to the students by SAUs.

S. No	Subject Code	Title	Credit Hours			
			Cr	L	T	P
1.	BAG-402	Production Technology for Bioagents and Biofertilizer	1	0	0	2
2.	BAG-404	Seed Production and Technology	1	0	0	2
3.	BAG-406	Mushroom Cultivation Technology	1	0	0	2
4.	BAG-408	Soil, Plant, Water and Seed Testing	1	0	0	2
5.	BAG-410	Commercial Beekeeping	1	0	0	2
6.	BAG-412	Poultry Production Technology	1	0	0	2
7.	BAG-414	Commercial Horticulture	1	0	0	2
8.	BAG-416	Floriculture and Landscaping	1	0	0	2
9.	BAG-418	Food Processing	1	0	0	2
10.	BAG-420	Agriculture Waste Management	1	0	0	2
11.	BAG-422	Organic Production Technology	1	0	0	2
12.	BAG-424	Commercial Sericulture	1	0	0	2

## **Elective Courses**

A student can select three elective courses out of the following and offer during 4<sup>th</sup> (BAG-220), 5<sup>th</sup> (BAG-319) and 6<sup>th</sup> (BAG-321) semesters.

## **Agribusiness Management**

### **CO: COURSE OBJECTIVE**

**CO-1 Maximize Profitability:** Optimize the use of resources, including land, labor, capital, and technology, to ensure the profitability and financial sustainability of agribusiness operations.

**CO-2 Efficient Resource Utilization:** Ensure the efficient use of inputs like seeds, fertilizers, water, and machinery to reduce waste and increase productivity.

**CO-3 Market Competitiveness:** Develop strategies to compete effectively in local and global markets, including pricing, branding, and distribution.

**CO-4 Sustainability and Environmental Stewardship:** Promote environmentally sustainable practices by reducing the ecological impact of agricultural operations, conserving natural resources, and supporting biodiversity.

**CO-5 Risk Management:** Identify, analyze, and mitigate risks related to price volatility, climate change, pests, diseases, and market uncertainties.

**CO-6 Enhance Supply Chain Efficiency:** Streamline processes from production to distribution, ensuring timely delivery of products while maintaining quality and minimizing costs.

**CO-7 Support Rural Development:** Contribute to rural economic growth by creating employment opportunities, fostering community development, and improving the livelihood of farmers and workers.

## Course Contents

### Unit- I:

- Transformation of agriculture into agribusiness, various stakeholders and components of agribusiness systems. Importance of agribusiness in the Indian economy and New Agricultural Policy. Distinctive features of Agribusiness Management: Importance and needs of agro-based industries,

### Unit- II:

- Classification of industries and types of agro-based industries. Institutional arrangement, procedures to set up agro based industries. Constraints in establishing agro-based industries.

### Unit- III:

- Agri-value chain: Understanding primary and support activities and their linkages. Business environment: PEST & SWOT analysis. Management functions: Roles & activities, Organization culture. Planning, meaning, definition, types of plans. Purpose or mission, goals or objectives, Strategies, policies, procedures, rules, programs and budget. Components of a business plan, Steps in planning and implementation.

### Unit- IV:

- Organization staffing, directing and motivation. Ordering, leading, supervision, communications, control. Capital Management and Financial management of Agribusiness. Financial statements and their importance. Marketing Management: Segmentation, targeting & positioning.

### Unit- V:

- Marketing mix and marketing strategies. Consumer behaviour analysis, Product Life Cycle (PLC). Sales & Distribution Management. Pricing policy, various pricing methods. Project Management definition, project cycle, identification, formulation, appraisal, implementation, monitoring and evaluation. Project Appraisal and valuation techniques.

### Practical:

Study of agri-input markets: Seed, fertilizers, pesticides. Study of output markets: grains, fruits, vegetables, flowers. Study of product markets, retail trade commodity trading, and value added products. Study of financing institutions - Cooperative, Commercial banks, RRBs, Agribusiness Finance Limited, NABARD. Preparations of projects and Feasibility reports for agribusiness entrepreneur. Appraisal/evaluation techniques of identifying viable project - Non-discounting techniques. Case study of agro-based industries. Trend and growth rate of prices of agricultural commodities. Net present worth technique for selection of viable project. Internal rate of return.

## **Agrochemicals**

### **CO: COURSE OBJECTIVE**

**CO-1 Enhance Crop Yield:** Increase agricultural productivity by providing essential nutrients, protecting crops from pests, and improving growth conditions.

**CO-2 Pest and Disease Control:** Protect crops from harmful pests, weeds, and diseases that can reduce yields and quality.

**CO-3 Improve Crop Quality:** Ensure better-quality produce by preventing nutrient deficiencies, diseases, and pest damage.

**CO-4 Promote Efficient Resource Use:** Maximize the effectiveness of water, nutrients, and soil resources through targeted applications.

**CO-5 Support Sustainable Farming Practices:** Help maintain soil fertility and health while minimizing land degradation when used responsibly.

**CO-6 Facilitate Large-Scale Farming:** Enable efficient management of large agricultural areas by reducing the labor required for pest control and fertilization.

**CO-7 Adapt to Changing Climate Conditions:** Provide tools to combat stress factors such as drought, high temperatures, or nutrient depletion caused by climate changes.

## Course Contents

### Unit- I:

- An introduction to agrochemicals, their type and role in agriculture, effect on environment, soil, human and animal health, merits and demerits of their uses in agriculture, management of agrochemicals for sustainable agriculture. Herbicides - Major classes, properties and important herbicides. Fate of herbicides, Fungicides - Classification – Inorganic fungicides - characteristics, preparation and use of sulfur and copper, Mode of action - Bordeaux mixture and copper oxychloride.

### Unit- II:

- Organic fungicides - Mode of action - Dithiocarbamates - characteristics, preparation and use of Zineb and maneb, Systemic fungicides - Benomyl, carboxin, oxycarboxin, Metalaxyl, Carbendazim, characteristics and use. Introduction and classification of insecticides: inorganic and organic insecticides

### Unit- III:

- Organochlorine, Organophosphates, Carbamates, Synthetic pyrethroids, Neonicotinoids, Bio-rational, Insecticide Act and rules, Insecticides banned, withdrawn and restricted use, Fate of insecticides in soil & plant. IGRs Biopesticides, Reduced risk insecticides, Botanicals, plant and animal systemic insecticides their characteristics and uses.

### Unit- IV:

- Fertilizers and their importance. Nitrogenous fertilizers: Feedstocks and Manufacturing of ammonium sulphate, ammonium nitrate, ammonium chloride, urea. Slow release N-fertilizers. Phosphatic fertilizers: feedstock and manufacturing of single superphosphate. Preparation of bone meal and basic slag. Potassic fertilizers: Natural sources of potash, manufacturing of potassium chloride, potassium sulphate and potassium nitrate.

### Unit- V:

- Mixed and complex fertilizers: Sources and compatibility – preparation of major, secondary and micronutrient mixtures. Complex fertilizers: Manufacturing of ammonium phosphates, nitrophosphates and NPK complexes. Fertilizer control order. Fertilizer logistics and marketing. Plant bio-pesticides for ecological agriculture, Bio-insect repellent.

### Practical:

Sampling of fertilizers and pesticides. Pesticides application technology to study about various pesticides appliances. Quick tests for identification of common fertilizers. Identification of anion and cation in fertilizer. Calculation of doses of insecticides to be used. To study and identify various formulations of insecticide available in market. Estimation of nitrogen in Urea. Estimation of water soluble P<sub>2</sub>O<sub>5</sub> and citrate soluble P<sub>2</sub>O<sub>5</sub> in single superphosphate. Estimation of potassium in Murreite of Potash/Sulphate of Potash by flame photometer. Determination of copper content in copper oxychloride. Determination of sulphur content in sulphur fungicide. Determination of thiram. Determination of ziram content.

## Commercial Plant Breeding

### CO: COURSE OBJECTIVE

**CO-1 Improved Yield:** To increase the productivity of crops per unit area, ensuring higher returns for farmers and food security for populations.

**CO-2 Disease and Pest Resistance:** To develop plant varieties resistant to specific diseases and pests, reducing crop losses and the need for chemical pesticides.

**CO-3 Abiotic Stress Tolerance:** To breed plants capable of withstanding adverse environmental conditions such as drought, salinity, extreme temperatures, and flooding.

**CO-4 Enhanced Quality:** To improve the nutritional value, taste, texture, shelf life, and appearance of crops, meeting consumer demands and market standards.

**CO-5 Adaptation to Mechanization:** To produce crop varieties that are suited to modern agricultural practices, including mechanical planting, harvesting, and processing.

**CO-6 Shorter Growing Cycles:** To develop varieties with reduced maturity periods, enabling multiple cropping in a year or better adaptation to specific growing seasons.

**CO-7 Market-Specific Traits:** To tailor crops for specific industrial uses (e.g., high oil content in oilseeds, gluten content in wheat, or sugar content in sugarcane) and regional consumer preferences.

## Course Contents

### Unit- I:

- Types of crops and modes of plant reproduction. Line development and maintenance breeding in self and cross pollinated crops (A/B/R and two lines system) for development of hybrids and seed production.

### Unit- II:

- Genetic purity test of commercial hybrids. Advances in hybrid seed production of maize, rice, sorghum, pearl millet, castor, sunflower, cotton, pigeon pea, Brassica etc.

### Unit- III:

- Quality seed production of vegetable crops under open and protected environment. Alternative strategies for the development of the line and cultivars: haploid inducer, tissue culture techniques and biotechnological tools.

### Unit- IV:

- IPR issues in commercial plant breeding: DUS testing and registration of varieties under PPV & FR Act. Variety testing, release and notification systems in India. Principles and techniques of seed production, types of seeds, quality testing in self and cross pollinated crops.

### Practical:

Floral biology in self and cross pollinated species, selfing and crossing techniques. Techniques of seed production in self and cross pollinated crops using A/B/R and two lines system. Learning techniques in hybrid seed production using male-sterility in field crops. Understanding the difficulties in hybrid seed production, Tools and techniques for optimizing hybrid seed production. Concept of rouging in seed production plot. Concept of line its multiplication and purification in hybrid seed production. Role of pollinators in hybrid seed production. Hybrid seed production techniques in sorghum, pearl millet, maize, rice, rapeseed-mustard, sunflower, castor, pigeon pea, cotton and vegetable crops. Sampling and analytical procedures for purity testing and detection of spurious seed. Seed drying and storage structure in quality seed management. Screening techniques during seed processing viz., grading and packaging. Visit to public private seed production and processing plant.

## Landscaping

### CO: COURSE OBJECTIVE

**CO-1 Aesthetic Enhancement:** Create visually appealing spaces through the use of plants, structures, and other landscape elements.

**CO-2 Functional Use:** Optimize outdoor spaces for practical purposes, such as recreation, dining, walking paths, or seating areas.

**CO-3 Environmental Sustainability:** Promote ecological balance by incorporating native plants, conserving water, and providing habitats for wildlife.

**CO-4 Climate Moderation:** Use landscaping elements like trees and shrubs to regulate temperature, reduce heat, and provide shade or windbreaks.

**CO-5 Erosion and Soil Protection:** Prevent soil erosion and degradation by using ground covers, terraces, and retaining walls.

**CO-6 Increase Property Value:** Enhance the market value of a property through thoughtful and well-maintained landscaping.

**CO-7 Improved Air and Noise Quality:** Use plants to purify the air and act as natural sound barriers to reduce noise pollution.

## Course Contents

### Unit- I:

- Importance and scope of landscaping. Principles of landscaping, garden styles and types, terrace gardening, vertical gardening, garden components, adornments, lawnmaking, rockery, water garden, walk-paths, bridges, other constructed features etc. gardens for special purposes.

### Unit- II:

- Trees: selection, propagation, planting schemes, canopy management, shrubs and herbaceous perennials: selection, propagation, planting schemes, architecture. Climber and creepers: importance, selection, propagation, planting,

### Unit- III:

- Annuals: selection, propagation, planting scheme, Other garden plants: palms, ferns, grasses and cacti succulents. Pot plants: selection, arrangement, management.

### Unit- IV:

- Bio-aesthetic planning: definition, need, planning; landscaping of urban and rural areas, Peri-urban landscaping, Landscaping of schools, public places like bus station, railway station, townships, river banks, hospitals, play grounds, airports, industries, institutions. Bonsai: principles and management, lawn: establishment and maintenance. CAD application

### Practical:

Identification of trees, shrubs, annuals, pot plants; Propagation of trees, shrubs and annuals, care and maintenance of plants, potting and repotting, identification of tools and implements used in landscape design, training and pruning of plants for special effects, lawn establishment and maintenance, layout of formal gardens, informal gardens, special type of gardens (sunken garden, terrace garden, rock garden) and designing of conservatory and lathe house. Use of computer software, visit to important gardens/ parks/ institutes.

## **Food Safety and Standards**

### **CO: COURSE OBJECTIVE**

**CO-1 Ensure Public Health:** Protect consumers by ensuring that food is safe, nutritious, and free from contaminants, thereby reducing foodborne illnesses.

**CO-2 Regulate Food Quality:** Establish and enforce standards for food products to ensure consistent quality and safety throughout the food supply chain.

**CO-3 Prevent Adulteration:** Monitor and prevent the adulteration of food products to maintain their authenticity and protect consumer rights.

**CO-4 Promote Hygiene in Food Handling:** Encourage hygienic practices at every stage, from production and processing to storage, distribution, and consumption.

**CO-5 Facilitate Fair Trade Practices:** Ensure that food businesses adhere to ethical practices, avoiding misleading claims and labeling to protect consumer interests.

**CO-6 Support Consumer Awareness:** Educate consumers about food safety, labeling, and nutritional information to enable informed choices.

**CO-7 Encourage Innovation and Research:** Promote advancements in food technology, safety standards, and sustainable practices to improve the overall food ecosystem.

## Course Contents

### Unit- I:

- Food Safety – Definition, Importance, Scope and Factors affecting Food Safety. Hazards and Risks, Types of hazards- Biological, Chemical, Physical hazards. Management of hazards- Need. Control of parameters. Temperature control.

### Unit- II:

- Food storage. Product design. Hygiene and Sanitation in Food Service Establishments- Introduction. Sources of contamination and their control. Waste Disposal. Pest and Rodent Control. Personnel Hygiene. Food Safety Measures.

### Unit- III:

- Food Safety Management Tools- Basic concepts. PRPs, GHPs, GMPs, SSOPs etc. HACCP. ISO series. TQM concept and need for quality, components of TQM, Kaizen. Risk Analysis. Accreditation and Auditing, Water Analysis, Surface Sanitation and Personal Hygiene.

### Unit- IV:

- Food laws and Standards- Indian Food Regulatory Regime, FSSAI. Global Scenario CAC. Other laws and standards related to food. Recent concerns- New and Emerging Pathogens. Packaging, Product labeling and Nutritional labeling.

### Unit- V:

- Genetically modified foods\ transgenics. Organic foods. Newer approaches to food safety. Recent Outbreaks. Indian and International Standards for food products.

### Practical:

Water quality analysis physico-chemical and microbiological. Preparation of different types of media. Microbiological Examination of different food samples. Assessment of surface sanitation by swab/rinse method. Assessment of personal hygiene. Biochemical tests for identification of bacteria. Scheme for the detection of food borne pathogens. Preparation of plans for Implementation of FSMS-HACCP, ISO: 22000.

## **Biopesticides&Biofertilizers**

### **CO: COURSE OBJECTIVE**

**CO-1 Enhance Crop Productivity:** Improve soil fertility and plant health to increase crop yields.

**CO-2 Promote Sustainable Agriculture:** Reduce reliance on chemical pesticides and fertilizers, fostering eco-friendly farming practices.

**CO-3 Improve Soil Health:** Restore and maintain soil microbial diversity and organic matter content.

**CO-4 Reduce Environmental Impact:** Minimize soil, water, and air pollution by avoiding harmful chemical inputs.

**CO-5 Support Integrated Pest and Nutrient Management:** Provide targeted pest control and nutrient supplementation without disrupting natural ecosystems.

**CO-6 Enhance Crop Quality:** Improve the nutritional value, flavor, and shelf life of agricultural produce.

**CO-7 Promote Farmer and Consumer Safety:** Reduce health risks associated with synthetic agrochemicals for farmers and consumers.

## Course Contents

### Unit- I:

- History and concept of biopesticides. Importance, scope and potential of biopesticide. Definitions, concepts and classification of biopesticides viz. pathogen, botanic al pesticides, and biorationales. Botanicals and their uses. Mass production technology of bio-pesticides. Virulence, pathogenicity and symptoms of entomopathogenic pathogens and nematodes.

### Unit- II:

- Methods of application of biopesticides. Methods of quality control and Techniques of biopesticides. Impediments and limitation in production and use of biopesticide.

### Unit- III:

- Biofertilizers - Introduction, status and scope. Structure and characteristic features of bacterial biofertilizers- Azospirillum, Azotobacter, Bacillus, Pseudomonas, Rhizobium and Frankia; Cyanobacteria biofertilizers- Anabaena, Nostoc, Hapalosiphon and fungal biofertilizers- AM mycorrhiza and ectomycorrhiza. Nitrogen fixation- Free living and symbiotic nitrogen fixation.

### Unit- IV:

- Mechanism of phosphate solubilization and phosphate mobilization, K solubilization. Production technology: Strain selection, sterilization, growth and fermentation, mass production of carrier based and liquid biofertilizers.

### Unit- V:

- FCO specifications and quality control of biofertilizers. Application technology for seeds, seedlings, tubers, sets etc. Biofertilizers - Storage, shelf life, quality control and marketing. Factors influencing the efficacy of biofertilizers.

### Practical:

Isolation and purification of important biopesticides: Trichoderma Pseudomonas, Bacillus, Metarhizium etc. and its production. Identification of important botanicals. Visit to biopesticide laboratory in nearby area. Field visit to explore naturally infected cadavers. Identification of entomopathogenic entities in field condition. Quality control of biopesticides. Isolation and purification of Azospirillum, Azotobacter, Rhizobium, P-solubilizers and cyanobacteria. Mass multiplication and inoculum production of biofertilizers. Isolation of AM fungi- Wetsieving method and sucrose gradient method. Mass production of AM inoculants.

## Protected Cultivation

### CO: COURSE OBJECTIVE

**CO-1 Enhanced Crop Productivity:** To increase the yield per unit area by optimizing environmental conditions like temperature, humidity, and light for plant growth.

**CO-2 Quality Improvement:** To produce high-quality crops with uniformity in size, shape, and color by minimizing environmental stress and pest damage.

**CO-3 Extended Growing Seasons:** To enable off-season production or extend the growing season of specific crops, ensuring a continuous supply to the market.

**CO-4 Resource Efficiency:** To conserve resources such as water and nutrients through efficient irrigation systems like drip irrigation and fertigation.

**CO-5 Pest and Disease Management:** To reduce crop loss by providing a physical barrier against pests and diseases, minimizing the need for chemical pesticides.

**CO-6 Climate Resilience:** To mitigate the adverse effects of extreme weather events such as frost, hail, excessive rain, or drought, ensuring stable crop production.

**CO-7 Diversification and Innovation:** To enable the cultivation of high-value crops, exotic vegetables, flowers, and fruits that might not thrive in open-field conditions due to climatic limitations.

## Course Contents

### Unit- I:

- Protected cultivation- importance and scope, Status of protected cultivation in India and World types of protected structure based on site and climate. Cladding material involved in greenhouse/ polyhouse.

### Unit- II:

- Greenhouse design, environment control, artificial lights, Automation. Soil preparation and management, Substrate management. Types of benches and containers. Irrigation and fertigation management.

### Unit- III:

- Propagation and production of quality planting material of horticultural crops. Greenhouse cultivation of important horticultural crops – rose, carnation, chrysanthemum, gerbera, orchid, anthurium, lily, tulip, tomato, bell pepper, cucumber, strawberry, pot plants, etc.

### Unit- IV:

- Cultivation of economically important medicinal and aromatic plants. Off-season production of flowers and vegetables. Insect pest and disease management.

### Practical:

Raising of seedlings and saplings under protected conditions, use of pro trays in quality planting material production, Bed preparation and planting of crop for production, Intercultural operations, Soil EC and pH measurement, Regulation of irrigation and fertilizer through drip, fogging and misting.

## **Micro propagation Technologies**

### **CO: COURSE OBJECTIVE**

**CO-1 Mass Production of Plants:** To produce a large number of genetically identical plants in a relatively short time, ensuring consistent traits and uniform quality.

**CO-2 Preservation of Genetic Traits:** To maintain and propagate plants with specific desirable characteristics, such as disease resistance, high yield, or ornamental value.

**CO-3 Propagation of Rare or Endangered Species:** To conserve and multiply species that are rare, endangered, or difficult to propagate through conventional methods.

**CO-4 Production of Disease-Free Plants:** To obtain pathogen-free plants by using meristem or shoot-tip cultures, particularly in cases where diseases are transmitted through seeds or vegetative propagation.

**CO-5 Year-Round Production:** To enable plant propagation irrespective of seasonal or environmental limitations, ensuring a continuous supply of plants.

**CO-6 Development of Genetically Engineered Plants:** To propagate transgenic plants or plants developed through genetic engineering techniques that may have enhanced traits such as pest resistance or stress tolerance.

**CO-7 Facilitation of International Trade:** To produce plants in sterile, contamination-free conditions that comply with quarantine regulations, allowing for the export and import of plants without spreading diseases or pests.

## Course Contents

### Unit- I:

- Introduction, History, Advantages and limitations; Types of cultures (seed, embryo, organ, callus, cell),

### Unit- II:

- Stages of micro-propagation, Axillary bud proliferation (Shoot tip and meristem culture, bud culture), Organogenesis (callus and direct organ formation),

### Unit- III:

- Somatic embryogenesis, cell suspension cultures,

### Unit- IV:

- Production of secondary metabolites, Somaclonal variation, Cryopreservation

### Practical:

Identification and use of equipment in tissue culture Laboratory, Nutrition media composition, sterilization techniques for media, containers and small instruments, sterilization techniques for explants, Preparation of stocks and working solution, Preparation of working medium, Culturing of explants: Seeds, shoot tips and single node, Callus induction, Induction of somatic embryos, regeneration of whole plants from different explants, Hardening procedures.

## **Hi-tech. Horticulture**

### **CO: COURSE OBJECTIVE**

**CO-1 Enhancing Productivity:** To maximize the yield of high-value crops by using advanced cultivation techniques, optimized resource management, and superior plant genetics.

**CO-2 Efficient Resource Utilization:** To promote the efficient use of inputs such as water, nutrients, and energy through technologies like drip irrigation, fertigation, and protected cultivation.

**CO-3 Improved Quality of Produce:** To achieve higher quality standards in terms of size, color, taste, and shelf life by leveraging precision agriculture and controlled environment farming.

**CO-4 Sustainability:** To reduce the environmental footprint of horticultural practices by promoting eco-friendly techniques such as organic farming, integrated pest management (IPM), and renewable energy sources.

**CO-5 Diversification of Crops:** To introduce and promote the cultivation of high-value exotic and off-season crops, expanding the market and income opportunities for farmers.

**CO-6 Reduction in Post-Harvest Losses:** To minimize post-harvest losses by adopting modern storage, packaging, and transportation methods.

**CO-7 Technology Dissemination and Farmer Empowerment:** To transfer advanced technologies to farmers, enhancing their skills and enabling them to adopt profitable and sustainable horticultural practices.

## Course Contents

### Unit- I:

- Introduction&importance;Nurserymanagementandmechanization;micropropagationof horticultural crops;Modernfield preparation and planting methods,

### Unit- II:

- Protectedcultivation:advantages,controlledconditions,methodandtechniques,Micro irrigation systems and its components; EC, pH based fertilizer scheduling,canopymanagement, high densityorcharding,

### Unit- III:

- Components of precision farming: Remote sensing, Geographical Information System(GIS),DifferentialGeo-positioningSystem(DGPS),

### Unit- IV:

- VariableRateapplicator(VRA),applicationofprecisionfarminginhorticulturalcrops(fruit s,vegetablesandornamental crops);mechanizedharvestingofproduce.

### Practical:

Types of polyhouses and shade net houses, Intercultural operations, tools and equipmentsidentification and application, Micro propagation, Nursery-protrays, micro-irrigation, EC, pHbasedfertilizerscheduling, canopymanagement,visitto hi-techorchard/nursery.

## **Weed Management**

### **CO: COURSE OBJECTIVE**

**CO-1 Understanding Weed Biology and Ecology:** Explain the life cycles, reproduction strategies, and ecological roles of weeds in agricultural and non-agricultural ecosystems.

**CO-2 Identification and Classification of Weeds:** Equip students with the skills to identify common weed species and classify them based on their morphology, lifecycle, and habitat.

**CO-3 Principles of Weed-Crop Competition:** Analyze the impact of weeds on crop growth and yield through competition for resources like light, water, and nutrients.

**CO-4 Weed Control Methods:** Compare and evaluate various weed management strategies, including cultural, mechanical, biological, and chemical control methods.

**CO-5 Integrated Weed Management (IWM):** Design and implement integrated weed management plans that combine multiple control strategies to ensure long-term weed suppression and sustainable agriculture.

**CO-6 Herbicide Use and Resistance Management:** Examine the proper use of herbicides, their mode of action, environmental impact, and strategies to prevent or manage herbicide resistance.

**CO-7 Economic and Environmental Impacts of Weed Management:** Assess the cost-benefit analysis of weed control measures and their implications for environmental sustainability and agricultural productivity.

## Course Contents

### Unit- I:

- Introduction to weeds, characteristics of weeds their harmful and beneficial effects on ecosystem. Classification, reproduction and dissemination of weeds.

### Unit- II:

- Herbicide classification, concept of adjuvant, surfactant, herbicide formulation and their use. Introduction to mode of action of herbicides and selectivity.

### Unit- III:

- Allelopathy and its application for weed management. Bio-herbicides and their application in agriculture. Concept of herbicide mixture and utility in agriculture.

### Unit- IV:

- Herbicide compatibility with agro-chemicals and their application. Integration of herbicides with nonchemical methods of weed management. Herbicide Resistance and its management.

### Practical:

Techniques of weed preservation. Weed identification and their losses study. Biology of important weeds. Study of herbicide formulations and mixture of herbicide. Herbicide and agro-chemicals study. Shift of weed flora study in long term experiments. Study of methods of herbicide application, spraying equipments. Calculations of herbicide doses and weed control efficiency and weed index.

## System Simulation and Agro-advisory

### CO: COURSE OBJECTIVE

**CO-1 Understand System Simulation Basics:** To introduce the fundamentals of system simulation, including types of models (e.g., discrete-event, continuous, hybrid), simulation techniques, and their applications in agricultural systems.

**CO-2 Develop Simulation Models for Agricultural Systems:** To develop and implement simulation models to represent agricultural processes such as crop growth, irrigation, pest management, and climate change impacts.

**CO-3 Analyze and Interpret Simulation Data:** To train students on analyzing simulation results, understanding model outputs, and interpreting data in the context of agricultural decision-making.

**CO-4 Explore the Role of Agro-Advisory Systems:** To provide a deep understanding of agro-advisory systems, their importance, and how they provide actionable insights to farmers for crop management, pest control, irrigation, and fertilization.

**CO-5 Apply Simulation Techniques to Agro-Advisory Tools:** To explore how simulation models can be integrated with agro-advisory systems to provide personalized, data-driven recommendations for farmers.

**CO-6 Assess the Impact of Climate and Environmental Variables:** To understand how environmental variables like weather, climate change, and soil conditions affect agricultural systems, and how to simulate their impacts for better planning and advisories.

**CO-7 Evaluate and Design Decision Support Systems for Agriculture:** To help students evaluate existing decision support systems and design new ones that leverage simulation models to optimize agricultural practices and improve farm productivity and sustainability.

## Course Contents

### Unit- I:

- System Approach for representing soil-plant-atmospheric continuum, system boundaries, Crop models, concepts & techniques, types of crop models, data requirements, relational diagrams.

### Unit- II:

- Evaluation of crop responses to weather elements; Elementary crop growth models; calibration, validation, verification and sensitivity analysis. Potential and achievable crop production-concept and modelling techniques for their estimation.

### Unit- III:

- Crop production in moisture and nutrients limited conditions; components of soil water and nutrients balance. Weather forecasting, types, methods, tools & techniques, forecast verification;

### Unit- IV:

- Value added weather forecast, ITK for weather forecast and its validity; Crop-Weather Calendars; Preparation of agro-advisory bulletin based on weather forecast. Use of crop simulation model for preparation of Agro-advisory and its effective dissemination.

### Practical:

Preparation of crop weather calendars. Preparation of agro-advisories based on weather forecast using various approaches and synoptic charts. Working with statistical and simulation models for crop growth. Potential & achievable production; yield forecasting, insect & disease forecasting models. Simulation with limitations of water and nutrient management options. Sensitivity analysis of varying weather and crop management practices. Use of statistical approaches in data analysis and preparation of historical, past and present meteorological data for medium range weather forecast. Feedback from farmers about the agro-advisory.

## **Agricultural Journalism**

### **CO: COURSE OBJECTIVE**

**CO-1 Understand Agricultural Issues and Trends:** To familiarize students with the key issues, challenges, and trends in agriculture, including sustainability, food security, climate change, and technological advancements.

**CO-2 Develop Writing and Reporting Skills:** To teach students how to effectively research, write, and report on agricultural topics, ensuring clarity and accuracy while making complex subjects accessible to diverse audiences.

**CO-3 Foster Multimedia Communication Abilities:** To enable students to use various media formats—such as print, radio, television, and digital platforms—to communicate agricultural stories, including the use of social media for outreach.

**CO-4 Critically Analyze Agricultural Policies and Practices:** To provide students with the skills to critically assess agricultural policies, practices, and their impacts on rural communities, economies, and the environment.

**CO-5 Enhance Ethical and Responsible Journalism:** To instill a strong understanding of journalistic ethics, particularly in the context of reporting on agricultural issues, with a focus on balanced, fair, and transparent reporting.

**CO-6 Cultivate Collaboration with Agricultural Stakeholders:** To prepare students to work closely with farmers, agricultural businesses, government agencies, NGOs, and other stakeholders in the agricultural sector to gather information and enhance their stories.

**CO-7 Promote Advocacy and Public Awareness:** To empower students to use journalism as a tool for advocacy, raising awareness about critical agricultural issues and contributing to informed public discourse on topics such as food production, rural development, and environmental sustainability.

## Course Contents

### Unit- I:

- Agricultural Journalism: The nature and scope of agricultural journalism characteristics and training of the agricultural journalist, how agricultural journalism is similar to and different from other types of journalism.

### Unit- II:

- Newspapers and magazines as communication media: Characteristics; kinds and functions of newspapers and magazines, characteristics of newspaper and magazine readers. Form and content of newspapers and magazines: Style and language of newspapers and magazines, parts of newspapers and magazines.

### Unit- III:

- The agricultural story: Types of agricultural stories, subject matter of the agricultural story, structure of the agricultural story. Gathering agricultural information: Sources of agricultural information, interviews, coverage of events, abstracting from research and scientific materials, wire services, other agricultural news sources.

### Unit- IV:

- Writing the story: Organizing the material, treatment of the story, writing the news lead and the body, readability measures. Illustrating agricultural stories: Use of photographs, use of artwork (graphs, charts, maps, etc.), writing the captions. Editorial mechanics: Copy reading, headline and title writing, proofreading, layouting.

### Practical:

Practice in interviewing. Covering agricultural events. Abstracting stories from research and scientific materials and from wire services. Writing different types of agricultural stories. Selecting pictures and artwork for the agricultural story. Practice in editing, copy reading, headline and title writing, proofreading, layouting. Testing copy with a readability formula. Visit to a publishing office.

## **School of Ayurveda (KSVAMC&RC)**

## **Shobhit University, Gangoh**

(Established by UP Shobhit University Act No. 3, 2012)

### **SCHOOL OF AYURVEDA**

#### **Ordinances, Regulations & Syllabus**

For

#### **M.D in Kayachikitsa Three year Programme**

(W.e.f. session 2022-2023)

**Approved and adopted in the year 2022 (Board of Studies; 9<sup>th</sup> Meeting)**

## Programme Educational Objectives (PEOs)

- 1. Mastery in Kayachikitsa:**
    - Develop expertise in Ayurvedic principles and practices of internal medicine, with a focus on understanding the pathophysiology, diagnosis, and treatment of systemic disorders.
  - 2. Holistic Health Care Providers:**
    - Equip graduates to offer holistic treatment integrating Ayurveda's preventive, promotive, and curative aspects in managing chronic and lifestyle-related diseases.
  - 3. Research and Innovation:**
    - Foster skills for conducting advanced research to validate Ayurvedic therapies and develop evidence-based treatment protocols.
  - 4. Leadership in Healthcare:**
    - Prepare graduates to take leadership roles in promoting Ayurvedic medicine in healthcare systems locally and globally.
  - 5. Ethics and Compassion:**
    - Instill a strong sense of ethical practice, cultural sensitivity, and patient-centered care.
- 

## Programme Specific Objectives (PSOs)

- 1. Clinical Excellence in Ayurveda:**
    - Achieve proficiency in diagnosing and managing diseases using Ayurvedic approaches such as Panchakarma, Rasayana, and dietary and lifestyle modifications.
  - 2. Integration with Modern Medicine:**
    - Understand and collaborate with modern medical systems to provide integrative healthcare solutions, recognizing the indications and limitations of both.
  - 3. Focus on Preventive Medicine:**
    - Implement preventive strategies through the Ayurvedic principles of Dinacharya, Ritucharya, and Sadvritta in public health.
  - 4. Specialized Knowledge of Kayachikitsa:**
    - Gain expertise in managing chronic ailments like diabetes, arthritis, gastrointestinal disorders, and neurological conditions using Ayurvedic treatments.
- 

## Programme Outcome Objectives (POOs)

- 1. Comprehensive Ayurvedic Knowledge:**
  - Demonstrate advanced knowledge of classical Ayurvedic texts, including Charaka Samhita, and their application to contemporary health challenges.
- 2. Patient-Centered Practice:**
  - Independently diagnose and manage a wide range of internal medical conditions using Ayurvedic tools and personalized treatment plans.
- 3. Research Competence:**
  - Design and conduct research to evaluate the efficacy of Ayurvedic treatments, contributing to scientific literature and policy-making.
- 4. Collaboration and Communication:**
  - Effectively communicate with patients, caregivers, and multidisciplinary teams to optimize patient outcomes.

**5. Public Health Contribution:**

- Apply Ayurvedic principles to improve community health through awareness, preventive care, and treatment strategies for non-communicable diseases.

**6. Ethical and Professional Responsibility:**

- Practice Ayurveda with a commitment to ethical principles, patient safety, and sustainable healthcare practices.

M.D.-AYURVEDA PRELIMINARY  
10 .KAYACHIKITSA (General Medicine)

PAPER-II

Theory- 100 marks

PART A

50 marks

1. Understanding of fundamental concepts of Kayachikitsa like Vriddhi and Kshaya of Dosha, Dushya, Mala with Amshaamsha Kalpana. Srotodushti, Khavaigunya, Agni, Ama (Saama and Nirama Dosha, Dhatu & Mala). Aavarana, Rogamarga, Ashayapakarsha, Dosha Gati, Kriyakala. Aushadha Sevana Kala, Anupana, Pathya-Apathya and their scientific relevance during health and disease.
2. Detailed knowledge of Roga Pariksha including detailed history taking and systemic examination of patient. Clinical implementation of Dwividha Pariksha, Trividha Pariksha, Chaturvidha Pariksha, Panchavidha Pariksha, Shadvidha Pariksha, Ashtavidha Pariksha, Dashvidha Pariksha Bhavas and Prakriyadi Dashvidha Pariksha.
3. Principles of Kayachikitsa in disease management including Shodhana, Shamana and Naimittika Rasayana.
4. Introduction of the basic principles of Modern medicine, Homeopathy, Unani, Siddha, Tibetan Medicine, Yoga and Naturopathy and their relevance in light of the basic principles of Ayurvedic medicine.

PART B

50 marks

1. Chikitsa Siddhanta of Pranavaha, Annavaha, Udakavaha, Rasadi Dhatuvaha, Malavaha & Manovaha Srotovikara.
2. Emergency medicine: Acute Severe Asthma, pulmonary oedema, myocardial infarction, cerebrovascular accidents, water and electrolyte imbalance, haemorrhage, syncope, seizure, coma, hyperpyrexia, hypertensive encephalopathy.
3. Knowledge of conducting various medical procedures like infusions, tapping, lumbar puncture, Ryle's tube insertion, catheterization, tractions, water seal drainage, Cardio Pulmonary Resuscitation.
4. Basic knowledge of underlying principles of ECG, TMT, echo cardiography, vascular doppler studies, EEG, EMG, X-Ray, USG, CT scan, MRI, PET and their interpretation.
5. Knowledge of common Ayurvedic formulations and preparations used in treatment:  
Churna- Triphala, Sitopaladi, Lavanbhaskara, Hingvashtaka, Avipattikara, Gangadhara, Shaddharana, Sudarshana, Panchasakara, Ajmodadi.  
Kashaya- Dashamula, Rasnasaptaka, Asanadi, Pathyadi, Phalatrikadi, Punarnavashtaka, Gojihadi, Mahamanjishthadi, Drakshadi Kashaya.  
Asavas-Arista- Amritarishta, Kanakasava, Chitrakasava, Saraswatarishta, Ashwagandharishta , Chandanasava.  
Vati- Sanjivani, Chandraprabha, Agnitundi, Chitrakadi, Khadiradi, Vyoshadi, Shankha Vati, Shiva Gutika.

Guggula-Kalpana-Triphalaguggula, Kaishoraguggula, Trayodashangaguggula, Simhanadaguggula, Yogarajaguggula, Gokshuradi guggula, Kanchanaraguggula. Rasaushadhi- Tribhuvanakirti Rasa, Arogyavardhini Rasa, Shwasakuthara Rasa, Rasamanikya Rasa, Smritisagara Rasa, Lakshmililasa Rasa, Sutshekhara Rasa, Pravala Panchamrita Parpati, Hemagarbhapottali Rasa.

Taila- Mahanarayana Taila, Pindataila, Prasarinnyadi Taila, Ksheerabala Taila, Brihat Saindhavadi Taila, Panchaguna Taila, Amritadi Taila, Marichyadi Taila, Mahamasha Taila.

Ghrita- Mahatriphaladi Ghrita, Brahmi Ghrita, Panchtikta Guggulu Ghrita, Sukumara Ghrita, Dadimadya Ghrita, Kantakari Ghrita, Kalyanaka Ghrita.

Lehya- Chyavanaprasha Avaleha, Kushmanda Avaleha, Ashwagandha Avaleha, Agastya Hareetaki Rasayana, Drakshavaleha, Vasavaleha, Amrita-Bhallataka Rasayana.

## PRACTICAL

100 marks

Content:-

Daily hospital duties in OPD, IPD and casualty

Bed-side case taking – 25 patients

Distribution of marks

(practical):

1. Case records of 25 Patients in detail 20 marks  
2. Bedside clinical case taking-

Long case 20 marks

Short case 10 marks

3. Medical procedures/laboratory work 15 marks
4. Instruments and spotting 15 marks
5. Viva voce 20 marks

REFERENCE BOOKS-

Charak Samhita -

Cakrapanidutta commentry Sushrut Samhita

-with all available commentaries. Ashtang

Samgraha –Indu commentary

## **Shobhit University, Gangoh**

(Established by UP Shobhit University Act No. 3, 2012)

### **SCHOOL OF AYURVEDA**

### **Ordinances, Regulations & Syllabus**

For

### **M.D in Shalyatantra Three year Programme**

(W.e.f. session 2022-2023)

**Approved and adopted in the year 2022 (Board of Studies; 9<sup>th</sup>  
Meeting)**

## Programme Educational Objectives (PEOs)

1. **Mastery of Shalyatantra:** Graduates will gain a deep understanding of Ayurvedic surgical principles, procedures, and their integration with contemporary surgical practices.
  2. **Research and Development:** Graduates will be equipped to undertake innovative research in Shalyatantra to advance the discipline and improve patient outcomes.
  3. **Holistic Healthcare Leadership:** Graduates will develop leadership qualities to promote the holistic approach of Ayurveda in addressing surgical and para-surgical challenges.
  4. **Professionalism and Ethics:** Emphasis on ethical practices, compassionate care, and adherence to classical Ayurvedic principles in professional life.
  5. **Lifelong Learning:** Graduates will pursue continual learning to adapt to advancements in surgical techniques and healthcare technologies.
- 

## Programme Specific Objectives (PSOs)

1. **Core Competence in Shalyatantra:**
    - Gain expertise in Ayurvedic surgical techniques like Ksharasutra, Agnikarma, and Raktamokshana.
    - Understand and perform modern surgical interventions with an Ayurvedic perspective.
  2. **Integration with Modern Medicine:**
    - Ability to identify situations where modern surgical procedures are required and work collaboratively with contemporary medical professionals.
  3. **Patient-Centered Approach:**
    - Develop skills to provide individualized care using Shalyatantra principles while addressing patient needs effectively.
  4. **Community and Preventive Health:**
    - Apply Ayurvedic surgical principles in community healthcare, focusing on prevention and minimally invasive approaches.
- 

## Programme Outcome Objectives (POOs)

1. **Comprehensive Knowledge:**
  - Demonstrate detailed knowledge of Shalyatantra texts (e.g., Sushruta Samhita) and their clinical applications.
2. **Clinical Proficiency:**
  - Independently diagnose and treat surgical conditions using Ayurvedic and contemporary methods.
3. **Research Acumen:**
  - Conduct and contribute to scholarly research in Ayurveda, focusing on evidence-based validation of Shalyatantra techniques.
4. **Communication and Collaboration:**
  - Effectively communicate with peers, patients, and multidisciplinary teams to improve healthcare delivery.
5. **Cultural Competency:**
  - Promote and practice Ayurvedic principles in a culturally sensitive manner, addressing diverse patient populations.

**POST GRADUATE PRELIMINARY**  
**13. M.S. (AYU) SHALYA TANTRA – GENERAL SURGERY**

**FUNDAMENTAL PRINCIPLES AND APPLIED ASPECTS OF SHALYA TANTRA**

**PAPER-II**

**THEORY- 100 MARKS**  
**TEACHING HOURS – 100 HRS**

**PART A**

**50 MARKS**

1. Etymology, Definition, Scope and Importance of Shalya Tantra.
2. Study of Sushruta Samhita Sutra Sthana from 1<sup>st</sup> to 29<sup>th</sup> chapter.
3. Study of modern surgical clinical methodology.
4. Applied anatomy, physiology and surgical pathology of common surgical conditions including relevant Ayurvedic aspects.
5. Applied aspect of Shat Kriyakala in the pathogenesis of surgical diseases.
6. Applied aspect of Prakriti in understanding the causes and role of treatment in surgical diseases.
7. Applied aspect of basic principles of Ayurveda in Rogi Pariksha (Trividha, Shadvidha, Ashtavidha and Dashavidha Pariksha).
8. Concept and applied aspect of Sadhya-Asadhya (Prognosis) - Arishtha lakshana.
9. Marma Sharira – Etymological derivation, definition, basic concept of Marma, origin, classification, Pramana. Consequences of Marmaghata and their management.
10. Concept of Shock - Its varieties, etiopathogenesis and management – Cardiopulmonary resuscitation (CPR), Endo-tracheal intubation and Tracheostomy. Drug reactions and Anaphylaxis – Management.
11. Basics of Fluid, Electrolyte, Acid Base Balance and Nutrition
12. Antibiotics, Analgesics, Anti-inflammatory and Emergency drugs in surgical practice.
13. Surgical Emergency conditions and its management.
14. Sushruta's concept of Rakta. Raktasrava – Haemorrhage – Types, Pathophysiology, clinical features and management. Concept of Raktastambhana – Haemostasis. Bloodtransfusion – Indications, blood groups, components, compatibility and complications with management.
15. Medico-legal aspects in Surgery. Knowledge of documentation and record keeping.

**PART B****50 marks**

16. Knowledge of ancient and recent Yantra and Shastra – Surgical instruments and their application in surgical practice.
17. Asepsis and Antisepsis. Sterilisation (Nirjivanukaran) - methods and types.
18. Surgical infections – Sepsis, Cellulitis, Erysepelas, Tetanus, Gas gangrene. Handling and care of HIV and Hepatitis positive patients. Knowledge of conditions like Bacteraemia, Septicaemia, Toxaemia and Pyaemia
19. Sangyahan / Anesthesiology - Types, methods, indications, contraindications, complications and its management.
20. Trividha Karma – Purva, Pradhan and Pashchat Karma. Modern principles of preoperative and post-operative care.
21. Ashtavidha Shastra Karmas.
22. Bandhana Karma – Recent advances.
23. Kshara Karma – Introduction, types, method of various preparations like Kshara, Kshara Varti, Kshara Pichu and applications.
24. Kshara Sutra – Method of preparation, standardization and applications.
25. Agnikarma – Introduction, types and applications.
26. Raktamokshana – Introduction, types and applications.
27. Application of Panchakarma therapy in surgical practice.
28. Scope of Pathya-Apathya in the management of surgical diseases.

**PRACTICAL****100 MARKS****Content:**

1. Hospital duties in OPD, IPD, OT and Casualty.
2. Case record – 50 cases.
3. Surgical cases – Observing/Assisting/Performing- 50 cases.
4. Knowledge of instruments required in surgical practices.
5. Ayurvedic and Modern diagnostic and therapeutic procedures.
6. Fluid therapy and blood transfusion.
7. Contraception and sterilizations.
8. Pre-operative, operative and post operative procedures.
9. Practical training of local Anaesthesia.
10. Interpretation of Imaging techniques.
11. Practical knowledge of Yogya vidhi – Experimental surgery and Simulators.

**Distribution of marks (practical):**

1. Presentation of related Research work like Synopsis and Case record - 20 marks
2. Bedside clinical case taking-
  - Long case - 20 marks
  - Short case - 10 marks
3. Identification of instruments, X-ray etc - 10 marks
4. Demonstration of Surgical and Parasurgical Procedure - 10 marks
5. Viva voce - 30 marks

## REFERENCE BOOKS:

1. Sushruta Samhita
2. Ashtanga Sangraha
3. Ashtanga Hridaya
4. Charaka Samhita
5. The Surgical instruments of the Hindus - Girindranath Mukhopadhyaya
6. Shalya Tantra Samuchchaya - Pandit Ramadesh Sharma
7. Shalya Vigyan (Part 1-2) - Dr. Surendra Kumar Sharma
8. Shalya Samanvaya (Part 1-2) - Vd. Anantaram Sharma
9. Shalya Pradeepika - Dr. Mukund Swaroop Verma
10. Soushruti - Dr. Ram Nath Dwivedi
11. Clinical Shalya Vigyan - Dr. Akhilanand Sharma
12. Bhagna Chikitsa - Dr. Prabhakar Janardhan Deshpande
13. Kshara sutra management in anorectal ailments - Dr. S.K. Sharma, Dr. K.R.Sharma and Dr. Kulwant Singh.
14. A manual on Fistula-in-ano and Ksharasutra Therapy – Dr. Manoranjan Sahu
15. Recent trends in the management of Arshas / Haemorrhoids - Dr. P. Hemantha Kumar
16. Anorectal diseases in Ayurveda - Dr. Sizoria and Dr. Praveen Kumar Chowdary.
17. Adhunik Shalya Chikitsa Siddanta - Dr. Katil Narshingham Udupa
18. Agnikarma Technology Innovation - Dr. P.D. Gupta
19. Shalya Tantra Ke Siddhant - Dr. K.K.Takral
20. Arsha Evum Bhagander Mein sutra Avacharan - Vd. Kanak Prasad Vyas
21. Recent advances in Kshara Sutra - Dr. M. Bhaskar Rao
22. Leech application in Ayurveda - Dr. M. Bhaskar Rao
23. Kshara Sutra - Dr. S.N.Pathak
24. Text book of Shalya Tantra (Ayurvedic Surgery) - Dr. P. Hemantha Kumar
25. Shalya Shalakyta Tantra - Vd. S.G. Joshi
26. Surgical ethics of Ayurveda - Dr. D.N. Pande
27. Anushastra Karma - Dr. D.N. Pande
28. Concept of Vrana is Ayurveda - Dr. Lakshman Singh
29. Significance for Poorva Karma in Surgical Patient - Dr. Lakshman Singh
30. Sangyahan Prakash - Dr. D.N. Pande
31. Marma Science and Principles of Marma Therapy – Dr. Sunil Kumar Joshi
32. Recent trends in the management of Bhagandara / Fistula-in-ano - Dr. P. Hemantha Kumar
33. Principles and Practice of Agnikarma - Dr. Anand Kumar and Dr. Kanchan Shekokar.
34. Shalya Vigyan (Sachitra) - Anantram Sharma
35. Text book of Surgery - Sabistan
36. Operative Surgery – Rob and smith

37. Bailey and Love's Short Practice of Surgery - Norman.S. Williams,  
Charles.V. Mann and R.C.G. Russell
38. Text books of Operative Surgery - Farquharson's
39. Principles of Surgery - Schwartz
40. Emergency Surgery - Hamilton Bailey's
41. Manipal Manual of Surgery - Dr. Rajgopal Shenoy
42. SRB's Manual of Surgery - Sriram Bhat M
43. Surgery of the Anus, Rectum and Colon - John Goligher
44. Surgical pathology - Willing Worth
45. Clinical methods in surgery - S. Das
46. Textbook of Operative Surgery - S. Das
47. A concise Text Book of Surgery - S. Das
48. A manual on Clinical Surgery - S. Das
49. A System of Surgical Diagnosis - T.N. Patel
50. Clinical Anatomy/ Surgical Anatomy - John E.Skandalakis
51. A Practical Guide to Operative Surgery - S. Das
52. Manual of Surgical Instruments - M.M. Kapur
53. Ward Procedures - Patel Mansukh. B
54. Drugs and Equipment for Anaesthesia - Arun kumar
55. Primary Anaesthesia - Maurice King
56. Synopsis of Anaesthesia - Lee
57. Outline of Orthopedics - John Crawford  
Adams and David Hamblen. L
58. Fractures and Joint Injuries - Watson-Jones
59. Outline of Fracture - John Crawford Adams

## **Shobhit University, Gangoh**

(Established by UP Shobhit University Act No. 3, 2012)

### **SCHOOL OF AYURVEDA**

#### **Ordinances, Regulations & Syllabus**

For

#### **M.D in Research Methodology Three year Programme**

(W.e.f. session 2023-224)

**Approved and adopted in the year 2023 (Board of Studies; 10<sup>th</sup>  
Meeting)**

## Course Objectives:

1. **Foster Research Literacy:**
  - Introduce students to the principles and framework of scientific research and evidence-based practices.
2. **Research Design and Methodology:**
  - Teach students to select appropriate study designs and methodologies for clinical and academic research.
3. **Data Management and Statistical Analysis:**
  - Provide knowledge and hands-on training in collecting, organizing, and analyzing data using statistical tools.
4. **Critical Thinking and Literature Review:**
  - Develop the ability to critically evaluate research articles, systematic reviews, and meta-analyses.
5. **Ethical Conduct in Research:**
  - Instill a comprehensive understanding of research ethics, including consent processes, patient safety, and publication integrity.
6. **Scientific Communication:**
  - Enhance skills in writing research proposals, manuscripts, and effective presentation of research findings.
7. **Problem-Solving in Research:**
  - Train students to identify gaps in medical knowledge and formulate research questions that address these gaps.

## {ANNEXURE-2}

### M.D./M.S.-AYURVEDA PRELIMINARY PAPER-I RESEARCH METHODOLOGY AND MEDICAL STATISTICS

#### PART-A RESEARCH METHODOLOGY

- 1 Introduction to Research
  - A. Definition of the term research
  - B. Definition of the term anusandhan
  - C. Need of research in the field of Ayurveda
- 2 General guidelines and steps in the research process
  - A. Selection of the research problem
  - B. Literature review: different methods (including computer database) with their advantages and limitations
  - C. Defining research problem and formulation of hypothesis
  - D. Defining general and specific objectives
  - E. Research design: observational and interventional, descriptive and analytical, preclinical and clinical, qualitative and quantitative
  - F. Sample design G. Collection of the data
  - H. Analysis of data.
  - I. Generalization and interpretation, evaluation and assessment of hypothesis.
  - J. Ethical aspects related to human and animal experimentation.
  - K. Information about Institutional Ethics Committee (IEC) and Animal Ethics Committee (AEC) and their functions. Procedure to obtain clearance from respective committees, including filling up of the consent forms and information sheets and publication ethics.
- 3 Preparation of research proposals in different disciplines for submission to funding agencies taking EMR-AYUSH scheme as a model.
4. Scientific writing and publication skills.
  - a. Familiarization with publication guidelines- Journal specific and CONSORT guidelines.
  - b. Different types of referencing and bibliography.
  - c. Thesis/Dissertation: contents and structure
  - d. Research articles structuring: Introduction, Methods, Results and Discussions (IMRAD)
- 5 Classical Methods of Research.

Concept of Pratyakshadi Pramana Pariksha, their types and application for Research in Ayurveda.

Dravya-, Guna-, Karma-Parikshana Paddhati

Aushadhi-yog Parikshana Paddhati

Swastha, Atura Pariksha Paddhati

DashvidhaParikshya Bhava

Tadvidyasambhasha, vadmarga and tantrayukti
- 6 Comparison between methods of research in Ayurveda (Pratigya, Hetu, daharana, Upanaya, Nigaman) and contemporary methods in health sciences.

## 7. Different fields of Research in Ayurveda

Fundamental research on concepts of Ayurveda

- a. Panchamahabhuta and tridosha.
- b. Concepts of rasa, guna, virya, vipak, prabhav and karma
- c. Concept of prakriti-saradi bhava, ojas, srotas, agni, aam and koshta.

## 8. Literary Research-

Introduction to manuscriptology: Definition and scope. Collection, conservation, ataloguing.

Data mining techniques, searching methods for new literature; search of new concepts in the available literature. Methods for searching internal and external evidences about authors, concepts and development of particular body of knowledge.

9. Drug Research (Laboratory-based)- Basic knowledge of the following: Drug sources: plant, animal and mineral. Methods of drug identification. Quality control and standardization aspects: Basic knowledge of Pharmacopoeial standards and parameters as set by Ayurvedic Pharmacopoeia of India. Information on WHO guidelines for standardization of herbal preparations. Good Manufacturing Practices (GMP) and Good Laboratory Practices (GLP).

10. Safety aspects: Protocols for assessing acute, sub-acute and chronic toxicity studies. Familiarization with AYUSH guidelines (Rule 170), CDCSO and OECD guidelines.

11. Introduction to latest Trends in Drug Discovery and Drug Development -Brief information on the traditional drug discovery process -Brief information on the latest trends in the Drug Discovery process through employment of rational approach techniques; anti-sense approach, use of micro and macro-arrays, cell culture based assays, use of concepts of systems biology and network physiology -Brief introduction to the process of Drug development

## 12. Clinical research:

Introduction to Clinical Research Methodology identifying the priority areas of Ayurveda

Basic knowledge of the following:-

Observational and Interventional studies

Descriptive & Analytical studies

Longitudinal & Cross sectional studies

Prospective & Retrospectives studies

Cohort studies

Randomized Controlled Trials (RCT) &their types Single-case design, case control studies, ethnographic studies, black box design, cross-over design, factorial design. Errors and bias in research. New concepts in clinical trial- Adaptive clinical trials/ Good clinical practices (GCP) Phases of Clinical studies: 0,1,2,3, and 4. Survey studies - Methodology, types, utility and analysis of Qualitative Research methods. Concepts of in-depth interview and Focus Group Discussion.

13. Pharmacovigilance for ASU drugs. Need, scope and aims & objectives. National Pharmacovigilance Programme for ASU drugs.

14. Introduction to bioinformatics, scope of bioinformatics, role of computers in biology. Introduction to Data base- Pub med, Medlar and Scopus. Accession of databases.

15. Intellectual Property Rights- Different aspect and steps in patenting. Information on Traditional Knowledge Digital Library (TKDL).

**PART-B**

**40 marks**

**MEDICAL STATISTICS**

**Teaching hours: 80**

- 1 Definition of Statistics : Concepts, relevance and general applications of Biostatistics in Ayurveda
- 2 Collection, classification, presentation, analysis and interpretation of data (Definition, utility and methods)
- 3 Scales of Measurements - nominal, ordinal, interval and ratio scales. Types of variables – Continuous, discrete, dependent and independent variables. Type of series – Simple, Continuous and Discrete
- 4 Measures of Central tendency – Mean, Median and Mode.
- 5 Variability: Types and measures of variability – Range, Quartile deviation, Percentile, Mean deviation and Standard deviation
- 6 Probability: Definitions, types and laws of probability,
- 7 Normal distribution: Concept and Properties, Sampling distribution, Standard Error, Confidence Interval and its application in interpretation of results and normal probability curve.
- 8 Fundamentals of testing of hypotheses:  
Null and alternate hypotheses, type I and type 2 errors.  
  
Tests of significance: Parametric and Non-Parametric tests, level of significance and power of the test, 'P' value and its interpretation, statistical significance and clinical significance
- 9 Univariate analysis of categorical data:  
Confidence interval of incidence and prevalence, Odds ratio, relative risk and Risk difference, and their confidence intervals
- 10 Parametric tests: 'Z' test, Student's 't' test: paired and unpaired, 'F' test, Analysis of variance (ANOVA) test, repeated measures analysis of variance
- 11 Non parametric methods: Chi-square test, Fisher's exact test, McNemar's test, Wilcoxon test, Mann-Whitney U test, Kruskal – Wallis with relevant post hoc tests (Dunn)
- 12 Correlation and regression analysis:  
Concept, properties, computation and applications of correlation, Simple linear correlation, Karl Pearson's correlation co-efficient, Spearman's rank correlation. Regression- simple and multiple.
- 13 Sampling and Sample size computation for Ayurvedic research: Population and sample. Advantages of sampling, Random (Probability) and non random (Nonprobability) sampling. Merits of random sampling. Random sampling methods- simple random, stratified, systematic, cluster and multiphase sampling. Concept, logic and requirement of sample size computation, computation of sample size for comparing two means, two proportions, estimating mean and proportions.
- 14 Vital statistics and Demography: computation and applications - Rate, Ratio, Proportion, Mortality and fertility rates, Attack rate and hospital-related statistics
- 15 Familiarization with the use of Statistical software like SPSS/Graph Pad

**PRACTICAL**

**100 marks**

**I. RESEARCH METHODOLOGY**

**Teaching hours 120**

**PRACTICAL NAME**

- 1      **Pharmaceutical Chemistry**  
Familiarization and demonstration of common lab instruments for carrying out analysis as per API
- 2      **Awareness of Chromatographic Techniques** Demonstration or Video clips of following:
  - Thin-layer chromatography (TLC).
  - Column chromatography (CC).
  - Flash chromatography (FC)
  - High-performance thin-layer chromatography (HPTLC)
  - High Performance (Pressure) Liquid Chromatography (HPLC)
  - Gas Chromatography (GC, GLC)
- 4      **Pharmacognosy** Familiarization and Demonstration of different techniques related to:- Drug administration techniques- oral and parenteral. Blood collection by orbital plexuses puncturing. Techniques of anesthesia and euthanasia. Information about different types of laboratory animals used in experimental research Drug identification as per API including organoleptic evaluation
- 5      **Pharmacology and toxicology**  
Familiarization and demonstration of techniques related to pharmacology and toxicology
- 6      **Biochemistry (Clinical)**  
Familiarization and demonstration of techniques related to basic instruments used in a clinical biochemistry laboratory – semi and fully automated clinical analyzers, electrolyte analyzer, ELISA- techniques, nephelometry.  
  
Demonstration of blood sugar estimation, lipid profiles, kidney function test, liver function test.  
  
HbA1, cystatin and microalbumin estimation by nephelometry or other suitable techniques. Interpretation of the results obtained in the light of the data on normal values.
- 7      **Clinical Pathology**  
Familiarization and demonstration of techniques related to basic and advanced instruments used in a basic clinical pathology lab. Auto cell counter, urine analyzer, ESR, microscopic examination of urine.
- 8      **Imaging Sciences**  
Familiarization and demonstration of techniques related to the imaging techniques. Video film demonstration of CT-Scan, MRI-scan and PET-scan.
- 9      **Clinical protocol development**

## II. MEDICAL STATISTICS

Practical hours:20

Statistical exercise of examples from Topic number 4, 5, 8-12, 14, 15. Records to be prepared.

Distribution of marks (practical):

- |  |            |
|--|------------|
| 1. Instrumental spotting test                            | – 20 marks |
| 2. Clinical protocol writing exercise on a given problem | – 20 marks |
| 3. Records:  |            |
| 4. Research methodology                                  | -10 Mark   |
| 5. Medical statistics                                    | -10 marks  |
| 6. Viva- Voce  | -40 Marks  |

## **Shobhit University, Gangoh**

(Established by UP Shobhit University Act No. 3, 2012)

### **SCHOOL OF AYURVEDA**

#### **Ordinances, Regulations & Syllabus**

For

#### **M.D in Ayurveda Samhita And Siddhanta Three year Programme**

(W.e.f. session 2023-24)

**Approved and adopted in the year 2023 (Board of Studies; 10<sup>th</sup>  
Meeting)**

## **Programme Objectives:**

1. **Understanding Ayurvedic Foundations:**
    - Provide a deep understanding of the classical texts (Samhitas) and their core principles (Siddhanta) as the foundation of Ayurvedic knowledge.
  2. **Holistic Learning Approach:**
    - Emphasize the integration of theory and practice, linking traditional wisdom with contemporary healthcare needs.
  3. **Skill Development in Textual Analysis:**
    - Train students in reading, interpreting, and applying the teachings of classical Ayurvedic texts.
  4. **Promotion of Research:**
    - Develop research aptitude in Samhita and Siddhanta to validate and innovate within the Ayurvedic framework.
  5. **Ethics and Professionalism:**
    - Inculcate the ethical principles of Ayurveda and foster the professional development of scholars.
- 

## **Specific Programme Objectives:**

1. **Mastery of Samhita Literature:**
    - Achieve proficiency in major Ayurvedic texts such as Charaka Samhita, Sushruta Samhita, and Ashtanga Hridaya.
  2. **Application of Siddhanta:**
    - Equip students to apply Ayurvedic principles like Tridosha, Panchamahabhuta, and Prakriti in clinical and non-clinical contexts.
  3. **Preservation of Ayurvedic Wisdom:**
    - Encourage the preservation, documentation, and propagation of traditional Ayurvedic knowledge.
  4. **Critical Analysis and Commentary:**
    - Train students in comparative studies of different commentaries and interpretations of the Samhitas.
  5. **Adaptation to Modern Needs:**
    - Integrate classical Ayurvedic knowledge with modern scientific methodologies to address contemporary health challenges.
- 

## **Programme Outcomes:**

1. **Deep Understanding of Ayurvedic Texts:**

Develop expertise in interpreting and contextualizing classical Ayurvedic literature.

2. **Practical Application of Theoretical Knowledge:**
  - Use the principles of Samhita and Siddhanta in clinical diagnosis, treatment, and health promotion.
3. **Competence in Research:**
  - Conduct scholarly research to validate Ayurvedic concepts and develop innovative applications.
4. **Critical Thinking and Analysis:**
  - Analyze traditional Ayurvedic theories in light of modern scientific advancements.
5. **Ethical and Holistic Practice:**
  - Practice Ayurveda in a manner that reflects ethical, sustainable, and holistic healthcare principles.
6. **Promotion and Propagation:**
  - Serve as ambassadors of Ayurveda by contributing to the global dissemination and acceptance of its principles.
7. **Capacity for Lifelong Learning:**
  - Engage in continuous learning to stay updated with evolving knowledge and practices in Ayurveda and healthcare.
8. **Leadership in Ayurveda:**
  - Demonstrate leadership in academic, clinical, and research domains related to Samhita and Siddhanta.

**M.D.-AYURVEDA PRELIMINARY1. AYURVED SAMHITA & SIDDHANTA**  
**(Ayurvedic Compendia & Basic Principles)**

PAPER-II

THEORY- 100 marks

PART-A

Practical- Viva-Voce-100  
50 marks

1. Learning and Teaching methodology available in Samhita- Tantrayukti, Tantraguna, Tantradosha, Tachchilya, Vadamarga, Kalpana, Arthashraya, TrividhaGyanopaya, teaching of Pada, Paada, Shloka, Vakya, Vakyartha, meaning and scope of different Sthana and Chatushka of Brihatrayee.
2. Manuscriptology - Collection, conservation, cataloguing, Critical editing through collation, receion (A critical revision of a text incorporating the most plausible elements found in varying sources), emendation (changes for improvement) and textual criticism (critical analysis) of manuscripts. Publication of edited manuscripts.
3. Concept of Bijachatustaya (Purush, Vyadhi, Kriyakaal, Aushadha according to Sushrut Samhita).
4. Introduction and Application of Nyaya (Maxims) - Like Shilaputrak Nyaya, Kapinjaladhikaran Nyaya, Ghunakshara Nyaya, Gobalivarda Nyaya, NaprishtahGuravoVadanti Nyaya,

Shringagrahika Nyaya, ChhatrinoGacchhanti Nyaya, Shatapatrabhedana Nyaya, Suchikatah Nyaya.

5. Importance and utility of Samhita in present era.
6. Importance of ethics and principles of ideal living as mentioned in Samhita in the present era in relation to life style disorders.
7. Interpretation and co-relation of basic principles with contemporary sciences.

PART-B

50

marks

1. Definition of Siddhanta, types and applied examples in Ayurveda.
2. Ayu and its components as described in Samhita.
3. Principles of Karana-Karyavada, its utility in advancement of research in Ayurveda.
4. Theory of Evolution of Universe (SrishtiUtpatti), its process according to Ayurveda and Darshana.
5. Importance and utility of Triskandha (Hetu, Linga, Aushadh) and their need in teaching, research and clinical practice.
6. Applied aspects of various fundamental principles: Tridosha, Triguna, Purusha and Atmanirupana, Shatpadartha, Ahara-Vihara. Scope and importance of Pariksha (Pramana).
7. Importance of knowledge of SharirPrakriti and ManasPrakriti.
8. Comparative study of Principles of Ayurveda and Shad Darshanas.

## **Shobhit University, Gangoh**

(Established by UP Shobhit University Act No. 3, 2012)

### **SCHOOL OF AYURVEDA**

#### **Ordinances, Regulations & Syllabus**

For

#### **M.D in Rachna Sharir Three year Programme**

(W.e.f. session 2023-224)

**Approved and adopted in the year 2023 (Board of Studies;  
10<sup>th</sup> Meeting)**

## **Programme Educational Objectives (PEOs)**

**PEO 1 In-Depth Anatomical Knowledge:** Graduates will acquire a comprehensive understanding of human anatomy, including structural and functional aspects relevant to both Ayurvedic and modern medical practices.

**PEO 2 Application of Anatomical Principles:** Graduates will be able to apply anatomical knowledge to clinical situations, enhancing diagnostic accuracy and treatment efficacy in Ayurvedic practice.

**PEO 3 Research and Innovation:** Graduates will engage in research related to anatomical studies, contributing to the body of knowledge in Rachna Sharira and promoting evidence-based practices in Ayurveda.

**PEO 4 Holistic Perspective:** Graduates will develop a holistic view of anatomy, integrating physical structures with functional and energetic concepts in Ayurveda, thereby enhancing patient care.

**PEO 5 Interdisciplinary Collaboration:** Graduates will be prepared to collaborate with professionals from various healthcare disciplines, facilitating a comprehensive approach to patient health that respects both Ayurvedic and conventional perspectives.

## **Programme Specific Objectives (PSO's)**

**PSO 1 Anatomical Proficiency:** Graduates will demonstrate mastery of human anatomy through detailed knowledge of anatomical structures, relationships, and functions relevant to Ayurvedic medicine.

**PSO 2 Dissection and Examination Skills:** Graduates will acquire practical skills in dissection and examination techniques, enabling them to accurately identify anatomical structures in both cadaveric and clinical settings.

**PSO 3 Integration of Ayurvedic Concepts:** Graduates will integrate Ayurvedic anatomical concepts, such as the Srotas (channels) and Dhatus (tissues), with modern anatomical knowledge to enhance their understanding of health and disease.

**PSO 4 Research Methodology:** Graduates will be equipped to conduct research in anatomical studies, exploring the relationship between anatomical structures and Ayurvedic practices to contribute to evidence-based Ayurveda.

**PSO 5 Application to Clinical Practice:** Graduates will apply their anatomical knowledge in clinical scenarios, improving diagnosis, treatment planning, and patient management in Ayurvedic settings.

**PSO 6 Educational Skills:** Graduates will be prepared to educate students and healthcare professionals about the importance of anatomical knowledge in Ayurveda, fostering a deeper understanding of the subject.

### **Programme Outcome Objectives (POO's)**

**POO 1 Comprehensive Anatomical Knowledge:** Graduates will demonstrate a thorough understanding of human anatomy, including detailed knowledge of anatomical structures and their functional relationships within the context of Ayurveda.

**POO 2 Practical Dissection Skills:** Graduates will exhibit proficiency in dissection techniques and anatomical examinations, enabling accurate identification and assessment of anatomical structures.

**POO 3 Integration of Ayurvedic and Modern Anatomy:** Graduates will effectively integrate Ayurvedic concepts of anatomy, such as the understanding of Dhatus and Srotas, with modern anatomical knowledge to enhance clinical practice.

**POO 4 Research and Critical Thinking:** Graduates will engage in research activities that advance the field of Rachna Sharira, applying critical thinking to evaluate and contribute to anatomical studies and their implications in Ayurveda.

**POO 5 Clinical Application:** Graduates will apply their anatomical knowledge to clinical practice, improving diagnostic accuracy and treatment outcomes for patients in Ayurvedic settings.

**POO 6 Interdisciplinary Collaboration:** Graduates will demonstrate the ability to work collaboratively with other healthcare professionals, contributing to a holistic approach to patient care that values both Ayurvedic and modern medical perspectives.

**POO 7 Ethical Practice and Professionalism:** Graduates will uphold high standards of ethics and professionalism in their practice, ensuring patient safety, confidentiality, and respectful interaction with colleagues and patients.

### ***Course Structure***

**PAPER-II**

**Theory 100 marks**

**PART-A**

**50 marks**

1. Basic principles of Sharira, Purushavichaya, RashiPurusha, Karma Purusha (Shad DhatujPurusha), ChaturvimshatiPurusha, EkDhatuPurusha. Relevant principles described in the Sharirasthan of Sushrut Samhita, Charak Samhita, AshtangSangrah and Ashtang Hridaya.
2. Basic principles of GarbhaSharira in Ayurveda: Definitions of Garbha, ShukraShonitaSiddhanta, Dauhrida, MatrijadiGarbhotpattikar bhava.
3. Types of tissues, histological study of liver, spleen, uterus, kidney, endocrine glands, mammary gland, skin, tongue, lungs, bronchi, bones, muscles, cartilages and nervous tissue.

**PART-B**

**50 marks**

1. ParibhashaSharira (Anatomical terminology)
2. PramanaSharira – Anguli and Anjali Pramana, SamapramanaSharira, Ayama – Vistara and their prognostic values.
3. Fundamental aspects of Asthi, Sandhi, PeshiSharir.
4. Fundamental aspects of Sira, Dhamani, Srotas – Definitions, Siravedha, AvedhyaSira. Fundamental aspect of SrotomoolaSthana.
5. Fundamental aspects of Kosktha and Koskthang: Hridaya, Yakrit, Vrikka, phuphphusa, Aantra, Pleeha, Adhivrikkagranthi, Basti, Paurushagranthi, Amashaya, Agnyashaya and Vrishana.
6. Fundamental aspects of UttamangiyaSharir – Introduction to Nervous system - development, divisions, neuron–structure, types, functional anatomy.
7. Mritashodhan (as per Sushruta) and MritaSamrakshana (preservation method of human cadaver).

**PRACTICAL**

**100 marks**

**Contents:**

1. Practical study of bones
2. Practical study of organs
3. Practical study of surface and radiological anatomy.
4. ShavaVichhedana – detailed dissection of the whole body.
5. Practical study of location of Marma
6. Demonstration of histology slides (10 slides)

## **Shobhit University, Gangoh**

(Established by UP Shobhit University Act No. 3, 2012)

### **SCHOOL OF AYURVEDA**

#### **Ordinances, Regulations & Syllabus**

For

**M.D in Kriya Sharir Three year Programme** (W.e.f. session  
2023-224)

**Approved and adopted in the year 2023 (Board of Studies;  
10<sup>th</sup> Meeting)**

## **Programme Educational Objectives (PEOs)**

**PED 1 Holistic Understanding:** Graduates will develop a comprehensive understanding of the principles of Kriya, including its philosophical, physiological, and psychological aspects, enabling them to integrate these concepts into therapeutic practices.

**PED 2 Clinical Application:** Graduates will be equipped to apply Kriya techniques in clinical settings, effectively addressing a range of health issues and promoting overall well-being for diverse patient populations.

**PED 3 Research and Evidence-Based Practice:** Graduates will engage in research that contributes to the scientific validation of Kriya practices, fostering a culture of evidence-based treatment within the field.

**PED 4 Professional Ethics and Leadership:** Graduates will demonstrate ethical practice and leadership in healthcare, advocating for holistic health approaches and contributing to the advancement of Kriya therapy.

**PED 5 Lifelong Learning and Adaptability:** Graduates will commit to lifelong learning, staying updated with advancements in yoga therapy and related fields, and adapting their practices to meet evolving health challenges.

## **Programme Specific Objectives (PSO's)**

**PSO 1 Kriya Techniques Proficiency:** Graduates will master a range of Kriya techniques, including breath control, meditation, and body postures, applying them effectively to promote physical and mental health.

**PSO 2 Therapeutic Application:** Graduates will be equipped to design and implement personalized Kriya therapy plans for patients, addressing specific health concerns and enhancing overall well-being.

**PSO 3 Assessment Skills:** Graduates will develop strong assessment skills to evaluate the physical and psychological health of individuals, integrating Kriya principles in their diagnostic approaches.

**PSO 4 Research and Evidence-Based Practice:** Graduates will engage in research related to Kriya practices, contributing to the body of evidence supporting their effectiveness in various therapeutic contexts.

**PSO 5 Patient Education and Communication:** Graduates will be skilled in educating patients about Kriya practices, fostering understanding and adherence to therapeutic regimens through effective communication strategies.

**PSO 6 Interdisciplinary Collaboration:** Graduates will be prepared to work collaboratively with other healthcare professionals, integrating Kriya with conventional medical practices to provide holistic care.

### **Programme Outcome Objectives (POO's)**

**POO 1 Expertise in Kriya Practices:** Graduates will demonstrate comprehensive knowledge and practical skills in Kriya techniques, applying them effectively for therapeutic and wellness purposes.

**POO 2 Holistic Patient Care:** Graduates will provide holistic care by integrating Kriya principles with conventional medical practices, addressing both physical and mental health needs of patients.

**POO 3 Clinical Assessment and Diagnosis:** Graduates will be skilled in conducting thorough assessments, accurately diagnosing conditions, and developing personalized Kriya-based treatment plans.

**POO 4 Research and Application:** Graduates will engage in research activities that advance the understanding and efficacy of Kriya therapies, applying evidence-based practices in clinical settings.

**POO 5 Patient Communication and Education:** Graduates will effectively communicate with patients and families, promoting understanding of Kriya practices and encouraging adherence to therapeutic interventions.

**POO 6 Professionalism and Ethics:** Graduates will uphold high standards of professionalism and ethics in their practice, ensuring patient safety and confidentiality while advocating for holistic health approaches.

**POO 7 Lifelong Learning and Adaptation:** Graduates will commit to lifelong learning, remaining current with advancements in Kriya and integrative health practices to adapt to evolving healthcare needs.

### **Course Structure**

### ***Ordinance and Regulations***

M.D.-AYURVEDA PRELIMINARY

3.KRIYA SHARIR

PAPER-II

Theory 100 Marks

PART-A

50 marks

1. Theory of Loka-PurushaSamya
2. Theory of Panchamahabhuta
3. Physiological aspects of Samanya – Visheshasiddhanta
4. Concepts of Tridosha and Triguna
5. Concept of Dhatu
6. Concept of Mala
7. Description of Ojas
8. Process of AharaParinama including Aharaparinamakara Bhava and AstaAharaVidhiVisesayatana
9. Physiological importance of Agni, its classification and functions
10. Dhatuposana theories
11. Concepts of Atma, Manas and Indriya.
12. Concepts of Prakriti and Ashtavidha Sara.
13. Concept of Srotas

**PART-B**

**50 marks**

Description of essential and relevant understandings related to contemporary physiology, both general physiology and systemic physiology.

1. Essentials of cell physiology – organization of cell.
2. Membrane physiology- transport across cell membrane, action potentials and resting membrane potentials.
3. Homeostasis- negative and positive feedback mechanisms.
4. Genetic code, its expression and regulation of gene expression.
5. Essentials of cardiovascular physiology- cardiac cycle, regulation of heart rate and blood pressure.
6. Essentials of respiratory physiology- regulation of respiration-chemical and neural, gaseous exchange, transportation of gases.
7. Gastrointestinal physiology- various digestive juices and their actions, gastrointestinal hormones, enteric nervous system.
8. Nervous system physiology- ANS, somatic nervous system, reflexes, general and special sensations, higher mental functions, functions of brain, brainstem and spinal cord.

9. Blood: Blood cells-RBCs, WBCs, platelets, plasma proteins and immunity.
10. Muscle physiology: properties and mechanisms of contraction of skeletal, cardiac and smooth muscles.
11. Physiology of excretion- mechanism of urine formation, micturition.
12. Endocrine physiology: Classification of hormones, hormones secreted by pituitary, thyroid, parathyroid, adrenal glands, pineal, pancreas and their functions.

Study of male and female reproductive system: functions of reproductive hormones.

## PRACTICAL

100 marks

Contents:

Ayurvedic practicals

Assessment of Prakriti

Assessment of Sara

PramanaPariksha

Hematology

Hemoglobin estimation

Total RBC count

Total WBC count

Differential leukocyte count

Packed cell volume (PCV)

ESR

Bleeding time

Clotting time

Blood grouping and Rh typing

Urine examination -

Physical examination- Specific gravity and reaction of urine

Chemical examination

Albumin test

Sugar test

Ketone bodies

Bile salts and pigments

### **SCHOOL OF AYURVEDA**

#### **Ordinances, Regulations & Syllabus**

For

#### **M.D in Prasuti Tantra Evam Stree Roga And Three year Programme**

(W.e.f. session 2023-224)

**Approved and adopted in the year 2023 (Board of Studies;  
10<sup>th</sup> Meeting)**

## **Programme Educational Objectives (PEOs)**

**PEO 1 Comprehensive Knowledge:** Graduates will acquire in-depth knowledge of Ayurvedic principles and practices related to obstetrics and gynecology, enabling them to manage maternal and child health effectively.

**PEO 2 Clinical Proficiency:** Graduates will develop advanced surgical skills and clinical competencies necessary for performing obstetric and gynecological procedures, ensuring safe and effective patient care.

**PEO 3 Research and Evidence-Based Practice:** Graduates will engage in research activities that contribute to the body of knowledge in Prasuti Tantra, promoting evidence-based practices in Ayurvedic obstetrics and gynecology.

**PEO 4 Holistic Patient Management:** Graduates will demonstrate the ability to provide holistic care to women throughout their reproductive life, addressing physical, mental, and emotional health needs.

**PEO 5 Interdisciplinary Collaboration:** Graduates will be prepared to collaborate with healthcare professionals from various disciplines, integrating Ayurvedic approaches with conventional practices to enhance maternal and child health outcomes.

## **Programme Specific Objectives (PSO's)**

**PSO 1 Surgical Skills Mastery:** Graduates will develop advanced surgical skills in performing obstetric and gynecological procedures, including cesarean sections, laparoscopic surgeries, and other relevant interventions.

**PSO 2 Comprehensive Patient Assessment:** Graduates will acquire the ability to conduct thorough assessments of pregnant women and gynecological patients, utilizing Ayurvedic diagnostic techniques alongside modern medical evaluations.

**PSO 3 Management of Complications:** Graduates will be equipped to manage obstetric and gynecological emergencies and complications, ensuring prompt and effective care to improve patient outcomes.

**PSO 4 Integrative Treatment Plans:** Graduates will formulate and implement individualized treatment plans that combine Ayurvedic therapies and practices with conventional medical approaches for comprehensive care.

**PSO 5 Research and Critical Analysis:** Graduates will engage in research projects focused on Prasuti Tantra, contributing to the advancement of knowledge and practices in Ayurvedic obstetrics and gynecology.

**PSO 6 Patient Education and Counseling:** Graduates will effectively educate and counsel patients regarding reproductive health, prenatal care, and postnatal wellness, promoting informed decision-making and self-care.

### **Programme Outcome Objectives (POO's)**

**POO 1 Clinical Competence:** Graduates will demonstrate advanced clinical skills in obstetrics and gynecology, effectively diagnosing and managing a wide range of conditions related to maternal and child health.

**POO 2 Surgical Proficiency:** Graduates will exhibit proficiency in performing complex surgical procedures specific to obstetrics and gynecology, ensuring high standards of patient care and safety.

**POO 3 Holistic Patient Care:** Graduates will provide holistic care that integrates Ayurvedic principles with modern medical practices, addressing the physical, emotional, and psychological needs of patients.

**POO 4 Research Contribution:** Graduates will engage in and contribute to research in Prasuti Tantra, critically evaluating and applying findings to enhance clinical practice and patient outcomes.

**POO 5 Interdisciplinary Collaboration:** Graduates will effectively collaborate with healthcare professionals across various disciplines, fostering a team approach to comprehensive maternal and child health care.

**POO 6 Patient Communication and Education:** Graduates will demonstrate effective communication skills, educating patients and families about reproductive health, treatment options, and preventive care.

**POO 7 Ethics and Professionalism:** Graduates will uphold ethical standards and professionalism in all aspects of practice, ensuring patient safety, confidentiality, and respect for diverse cultural backgrounds.

## **Course Structure**

**M.S.AYURVEDA PRELIMINARY 14. PRASUTI AVUM STRI ROGA (Gynecology & obstetrics)**

PAPER-II

Theory- 100 marks

PART A

50 marks

1. Concept of Tridosha, Dhatu, Upadhatu, Agni, PanchaMahabhuta in relation to Prasuti and StriRoga.
2. Concept of Artava and Shukra.
3. Concept of Rasa, Guna, Veerya, Vipak and Karma of Dravya used in Prasuti and StriRoga.
4. Action and adverse drug reaction related to commonly used plants and Rasa Aushadhi in Prasuti and StriRoga.
5. Concept of Pathya- Apathya in relation to Prasuti and StriRoga.
6. Concept of Garbhadhan and Garbha.
7. Concept of Vrana and Vranadushti.
8. Concept of special therapies of Ayurved used in Prasuti and StriRoga.
9. Concept of Ashtavidha Shastra Karma, Yantra&shastra used in Prasuti and StriRoga

PRACTI CAL

100 marks

1. Applied anatomy and physiology of genito-urinary system, abdomen, pelvis, pelvic floor, anterior abdominal wall, inguinal ligament, inguinal canal, vulva, rectum and anal canal. 2. Abnormal development, structure and function of female and male urogenital systems
2. Development, structure and function of placenta, umbilical cord and amniotic fluid.
3. Physiological and neuro-endocrinal changes during puberty, adolescence and menstruation.
4. Introduction of hormones related with gynaecology and obstetrics. Ovulation, fertilization, climacteric and menopause. Biophysical and biochemical changes in uterus and cervix during pregnancy and labour.
5. Pre-natal, Natal and Post natal counseling and examination.
6. Pharmacological study of drugs used in gynaecology and obstetrics.
7. Knowledge of diagnostic techniques used in gynaecology and obstetrics.
8. Basic Knowledge of pathological and biochemical investigation used in gynaecology and obstetrics.
9. Ethics, law and Acts Related to gynaecology and obstetrics – laws of abortion and adoption.
10. Knowledge of contraception and sterilization procedures.
11. Pre-operative and post operative care in gynaecology and obstetrics.

## PRACTICAL

100 marks

### Contents:

- i. Hospital duties in OPD, IPD, labor room, OT and casualty 2. History taking and counseling - 25 cases.
  - ii. Labor cases - observation/performing - 10 cases
2. Knowledge of instruments required in gynaecology and obstetric practices.
3. Ayurvedic diagnostic and therapeutic procedures.
4. Fluid therapy and blood transfusion.
5. Contraception and sterilizations.
6. Pre-operative, operative and post operative procedures.
  - i. Distribution of marks (Practical)
7. Case records of Patients in Detail (25 Cases) - 20 Marks
8. Bedside clinical case taking
  - i. Long case - 20 Marks
  - ii. Short case - 10 Marks
9. Procedures - 15 Marks
10. Identification of instruments, X-ray etc& Spotting - 15 Marks
11. Viva - voce - 20 Marks

## **PREFACE**

The main purpose of Samhita teaching is to enable the students to read, understand and practice the Samhitas. Samhita is nothing but an ancient Practical Manual of Ayurveda. Samhita teaching and learning process need to be practically oriented for a better understanding of the subject. It is the need of time to make some addition in the current teaching and learning process of Samhita to make it more relevant, practical, and contemporary. New teaching technology tools will certainly be helpful in the effective delivery of knowledge of Samhita. As per the revised regulation, the nomenclature of the subject is **Samhita Adhyayana-I**.

The subject includes Ashtanga Hridayam Sutrasthana 1 to 15 chapters and Charaka Samhita Sutrasthana 1 to 12 chapters as a part of Samhita Adhyayana-I for First Professional BAMS course. In this revision, NCISM has tried its best to take Samhita teaching beyond the four walls of the classroom and connected it with today's living of people and society. For effective content delivery and to create interest in the subject of Samhita, it becomes evident to teach Samhita with practical demonstrations.

Samhita Path is the first step and most effective method of Samhita teaching adopted and practiced by our ancient acharyas. In order to facilitate practice the ancient Samhita learning, twice the non-lecture class of the total classes is exclusively reserved for Samhita learning activity. To make baseline uniformity in the process of learning, teaching methodology guidelines are provided which shall be followed while teaching the chapters of both the Samhitas. Students learn various principles of Ayurveda in Samhitas. Terminologies make the task initially difficult. Hence to make the Samhita learning more interesting, various education technology tools are included in the curriculum at various places understanding the need of the topic. Activity-based learning will enable the internalization of the concepts and will build a strong platform while learning other subjects of Ayurved.

As explained in Samhitas things learned in shastra(Science) and experience practically both when happens together will enhance the knowledge. It will further lead to application in practice.

<b>Topic 1- Introduction To Samhitas: Time</b> (Lecture:-15 ; Non lecture:-09 hours)									
CO1	Explain the term Samhita	Cognitive/ Comprehe nsion	Must know	Knows	Lecture	Written or Viva	F & S	I	
CO1	Identify Bruhatrayee	Cognitive/ Recall	Must know	Knows	Lecturer	Written or Viva	F & S	I	
CO1	Discuss the various Samhitas and Commentaries in brief	Cognitive/ Comprehe nsion	Must know	Knows	Lecturer / Group Discussion	Written or Viva	F & S	I	
CO1	Discuss the various preceptors, aut hours, redactors and commentators in brief	Cognitive/ Comprehe nsion	Must know	Knows	Lecturer	Written or Viva	F & S	I	
CO1	Apply various Tantrayukties like Adhikaran, Yoga, Padarth, Uddesh, Nirdesh, Vaakyashesh, Prayojan, Upadesh, arthapatti, Ekant,	Cognitive/ Applicatio n	Must know	Knows how	Lecturer/ Group discussion	Viva	Formativ e	I	

	Anumat, Vyakhyan, Samshay, Atitavekshan, Anagatavekshan, Swasadnya, Samucchaya, Nidarshan, Nirvachan, Niyog.								
CO1	Describe various Tantraguna	Cognitive/Comprehension	Must know	Knows how	Lecturer	Written or Viva	Formative and Summative	I	
CO1	Describe various Tantradasha	Cognitive/Comprehension	Must know	Knows	Lecturer	Written or Viva	Formative and Summative	I	
CO1	Describe rachanashaili (composition style) and bhashashaili (language style) of Samhitas	Cognitive/Comprehension	Must know	Knows how	Lecturer / Discussion	Written or Viva	F & S	I	<u>Ayurved Itih as</u>
CO1	Discuss about pattern (method) of writing of classical texts	Cognitive / Comprehension	Must know	Knows how	Lecturer	Puzzle	Formative	I	<u>Ayurved Itih as</u>
CO1	State different types of styles of language of classical text	Cognitive/Recall	Must know	Knows	Lecturer Audio-Visual aids	Viva	Formative and summative	I	
CO1	Interpret Anubandha chatushtya with examples	Cognitive/Problem solving	Must know	Knows how	Lecturer / Class discussion	Enquiry Based Learning	Formative	I	

CO1	Interpret Ashta Prashna with example	Cognitive/ Problem solving	Must know	Knows how	Lecturer/ Demonstration	Enquiry Based Learning	Formative	I	
<b>Topic 2- Ashtang Hriday Samhita Sutrasthan Chapter-1- Ayushkamiya Adhyaya: Time (Lecture:- 08 ; Non lecture- 03 hours)</b>									
CO1	Discuss the hierarchy of Ayurvedotpatti (descend of Ayurveda)	Cognitive /Recall	Must know	Know	Lecture	Written or Viva	F & S	I	
CO1	Explain the significance of Ashtanga Hrudaya	Cognitive /Recall	Must know	Knows how	Lecture	Written or Viva	F & S	I	
CO1	Enlist the eight branches of Ayurveda	Cognitive/ Recall	Must know	Knows how	Lecture	Written or Viva	F & S	I	
CO3	Discuss the concept of dosha with respect to qualities (guna), location in body and time period (kaala)	Cognitive/ comprehension	Must know	Knows how	Lecture and Group Discussion	Written & Viva	F & S	I	
CO3	Discuss role and superiority of dosha in manifestation of diseases	Cognitive/ comprehension	Must know	Knows how	Lecture/ Group discussion	Written & Viva	F & S	I	
CO3	Identify the dosha sthanas	Cognitive/ comprehension	Must know	Knows how	Discussion	Model Making (Working Model)	Formative	I	
CO3	Enlist the saptadhatus and mala.	Cognitive/ Recall	Must know	Know	Lecture	Written & Viva	F & S	I	
CO4	Explain the concept of Samsarga (combination of 2 dosha) & Sannipata	Cognitive/ Comprehension	Must know	Knows how	Lecture	Written & Viva	F & S	I	

	(combination of 3 dosha)								
CO4	Elucidate concept of Prakruti (body constitution)	Cognitive/Comprehension	Must know	Knows how	Lecture/Discussion	Written & Viva	F & S	I	
CO6	Explain the three types of digestive fire (agni)	Cognitive/Comprehension	Must know	know How	Lecture/Demonstration in healthy volunteers.	Written or Viva	F & S	I	
CO6	Describe the three types of Koshtha	Cognitive/Comprehension	Must know	Knows how	Lecture/Demonstration in healthy volunteers.	Written or Viva	F & S	I	
CO5	Explain the effect of rasas on tridosha	Cognitive/Comprehension	Must know	Knows how	Lecture/ Group discussion	Written & Viva	F & S	I	
CO5	Describe the two types of potencies (Dwividha Virya)	Cognitive/Comprehension	Must know	Knows how	Lecture/ Group discussion	Written & Viva	F & S	I	
CO5	Describe the three types of Vipaka	Cognitive/Comprehension	Must know	Knows how	Lecture/ Group discussion	Written & Viva	F & S	I	
CO5	Explain the three types of dravya on the basis of Prabhav	Cognitive/Comprehension	Must know	Knows how	Lecture/ Group discussion	Written & Viva	F & S	I	
CO5	Explain the concept of Vruddhi & Kshaya (increase and decrease)	Cognitive/Comprehension	Must know	Knows how	Lecture/ Group discussion	Written & Viva	F & S	I	

CO6	Discuss the causative factors of health and disease	Cognitive/comprehensions	Must know	Know how	Lecture/group discussion	Puzzle / Viva	Formative and summative	I	
CO6	Define health (aarogya) and disease stage(roga)	Cognitive/Recall	Must know	Know	Lecture	Written & Viva	Formative and summative	I	
CO6	Explain prakruta (normal) and vikruta (abnormal) conditions	Cognitive/comprehensions	Must know	Knows how	Lecture	Written & Viva	Formative and summative	I	
CO6	Explain the types of diseases (Roga)	Cognitive/Comprehension	Must know	knows How	Lecture	Written or Viva	F & S	I	
CO6	Explain the concept of Roga Adhishthana (abode of diseases)	Cognitive/Cognitive/Comprehension	Must know	Knows how	Lecture	Written or Viva	F & S	I	
CO6	Enumerate Manas dosha	Cognitive/Recall	Must know	Knows how	Lecture	Written or Viva	F & S	I	
CO6, CO8	Discuss the methods of assessment of patient	Cognitive/Comprehension	Must know	Knows How	Lecture	Written or Viva	F & S	I	
CO8	Explain the methods of examination of disease	Cognitive/Comprehension	Must know	Knows how	Lecture/OPD clinics	Written & Viva	F & S	I	
CO6	Explain the three types of habitats(desha)	Cognitive/Comprehension	Must know	Knows how	Lecture/Multimedia aids	Written or Viva	F & S	I	

CO6	Explain the two types of Bheshaja Kala	Cognitive / Comprehension	Must know	Knows how	Lecture	Written or Viva	F & S	I	
CO6	Explain the Classification the treatment modules (Aushadha )	Cognitive / Comprehension	Must know	Know How	Lecture	Written or Viva	F & S	I	
CO6	Explain the treatment module for mental diseases (Mano Dosh Aushadham)	Cognitive / Comprehension	Must know	Knows how	Lecture	Written or Viva	F & S	I	
CO6, CO8	Elaborate chikitsa chatuspada (4 factors in treatment)	Cognitive / Comprehension	Must know	Know How	Lecture/ Demonstration in hospital	Written or Viva	F & S	I	
CO6	Explain the types of prognosis of disease	Cognitive/ Comprehension	Must know	Know How	Lecture/ Demonstration on patients / Multimedia aids	Written or Viva	F & S	I	
CO6	Explain Concept of anupakramaneeya Atura Lakshana	Cognitive/ Comprehension	Must know	Knows how	Lecture	Written or Viva	F & S	I	
CO1	Enlist the chapters of Sutra Sthana	Cognitive/ Comprehension	Must Know	Knows	Self-learning	Written or Viva	F & S	I	
CO1	Enlist all Sthana and Adhyayas of Ashtang Hridaya and Uttara Tantra	Cognitive/ Recall	Nice to Know	Knows	Self-learning	Written or Viva	F & S	I	
CO2	Recite the shloka from 1 to 35	Cognitive/ Recall	Must Know	Show	Self-learning	Viva	F & S	I	
CO1	Identify Adhikaran, Yoga, Padarth, Uddesh,	Cognitive/ Application	Must know	Knows how	Lecturer/ Group discussion	Viva	F & S	I	

	Anagatavekshan Tantrayukti in this chapter.								
<b>Topic -3. Ashtang Hriday Samhita Sutrasthan Chapter-2- Dinacharya Adhyaya Time (Lecture:- 05 Non lecture- 04 hours)</b>									
CO4	Explain the need of waking up before sunrise	Cognitive/ Comprehe nsion	Must know	Know how	Lecture	Written & Viva	F & S	I	
CO4	Explain the importance of Shaucha Vidhi	Cognitive/ Comprehe nsion	Must know	Knows how	Lecture	Written & Viva	F & S	I	
CO4	Explain the importance and contraindications of brushing (Dantadhavana)	Cognitive/ Comprehe nsion	Must know	Knows how	Lecture/ Multimedia aids	Written & Viva	F & S	I	
CO4	Identify the herbs used for Dantadhavan	Cognitive/ Applicatio n	Must know	Shows how	Herbal garden visit	Written or Viva Group Activity (For identifications of Currently using tooth paste. Herbal pastes. Types of pastes )	F & S	I	Dravya guna dept
CO4	Distinguish Sauveeranjana and Rasanjan	Cognitive/ Comprehe nsion	Must know	Know how	Lecture/Demonstratio n	Written or Viva Debate (Students will search benefits and harms supported by current literature. Dabate in class)	F & S	I	Visit to Rasash astra dept for Identifi cation of drugs

CO4	Discuss contraindications of betel leaf consumption (Tambula)	Cognitive/ Application	Must know	Know how	Lecture/ Debate on benefits and harms of Betel leaf consumption. supported by current literature.	Written or Viva	F & S	I	
CO4	Elaborate the concept of Abhyanga along with contraindications	Cognitive/ Comprehension	Must know	Know How	Lecture/ /Multimedia aids	Written & Viva	F & S	I	Panchk arma dept
CO4	Discuss the importance, contraindications of exercise	Cognitive/ Application	Must know	Knows How	Lecture/ Multimedia aids	Written & Viva	F & S	I	
CO4	Discuss the rules regarding exercise and adverse effects of excessive exercise	Cognitive/ Application	Must know	Knows how	Group Discussion Debate: Types of Exercise. e.g Arobiuc and anaerobic etc. supported by current literature discussions on Concept.	Written & Viva	F & S	I	
CO4	Explain the benefits of powder massage (udvartan)	Cognitive/ Comprehension	Must know	Know how	Lecture/demonstration ECE	Written & Viva	F & S	I	Panchk arma dept
CO4	Elucidate the benefits and contraindications of bathing (snana)	Cognitive/ Comprehension	Must know	Knows how	Lecture/group discussion Literature search and Discussion by students.	Written & Viva	F & S	I	
CO4	Explain the time of having food.	Cognitive/ Comprehension	Must know	Know how	Lecture	Written or Viva	F & S	I	
CO4	Explain rules regarding natural	Cognitive/ Comprehension	Must know	Know how	Lecture	Written or Viva	F & S	I	

	urges.	nsion							
CO4	Explain the importance of righteousness (Dharmapalan)	Cognitive/Comprehension	Must know	Know how	Flipped Classroom Group Activity: self identification of Mistake they are doing Plan to rectify and reassessment after duration.(6 months)	Written or Viva	F & S	I	
CO4	Enumerate the types of bad deeds(Dasha Vidha Papakarma)	Cognitive/Recall	Must know	Know How	Flipped Classroom	Written or Viva	F & S	I	
CO4, CO8	Explain the concept of good principles and conduct (Sadvrutta)	Cognitive	Must know	Knows how	Flipped Classroom	Written or Viva	F & S	I	
CO4	Explain the principles of personal hygiene (shuddhi)	Cognitive/Comprehension	Must know	Knows how	Flipped Classroom	Written or Viva	F & S	I	
CO2	Recite the shlokas from 1 to 48	Cognitive/Recall	Must know	Show	Self-learning	MCQ/viva/quiz	F & S	I	
CO8	Assess and observe the Dincharya Principles.	Skill	Must know	Does	Proforma based assessment in healthy volunteers/ patients.	Work book- Viva	F & S	I	
CO8	Justify the importance of Dincharya	Cognitive/Application	Must know	Does	Application of Principles in own life	Viva	F & S	I	
CO1	Identify Upadesh, Ekant, Prayojan Tantrayukties in this chapter.	Cognitive/Application	Must know	Knows how	Lecturer/ Group discussion	Viva	F & S	I	

**Topic – 4. Ashtang Hriday Samhita – Sutrasthan Chapter 3- Rutucarya Adhyaya-Time (Lecture:- 05 ; Non lecture 04 hours)**

CO4	Explain the six seasons and the months in which they fall	Cognitive/Comprehension	Must know	Knows	Lecture/group discussions/Multimedia aids	Written & Viva	F & S	I	
CO4	Elicudate the status of strength (bala) in Uttarayana and Dakshinayana	Cognitive/Recall	Must know	Knows How	Lecture/group discussions/Multimedia aids	Written & Viva	F & S	I	
CO4	Explain the relation between strength (bala)& seasons	Cognitive/Comprehension	Must know	Knows How	Lecture	Written & Viva	F & S	I	
CO4	Discuss the climatic conditions, health status(bala, agni, dosha), appropriate food and regimen for Hemant rutu.	Cognitive/Application	Must know	Knows How	Lecture/group discussions/Multimedia aids	Written or Viva	F & S	I	
CO4	Discuss the climatic conditions, health status (bala, agni, dosha), appropriate food and regimen for Shishira rutu.	Cognitive/Application	Must know	Knows How	Lecture/group discussions/Multimedia aids	Written & Viva	F & S	I	
CO4	Discuss the climatic conditions, health status (bala, agni, dosha), appropriate food and regimen for Shishira rutu.	Cognitive/Application	Must know	Knows How	Lecture/group discussions/Multimedia aids	Written or Viva	F & S	I	
	Discuss the climatic conditions, health status (bala, agni,	Cognitive/Application	Must know	Knows How	Lecture/group discussions/Multimedia aids	Written & Viva	F & S	I	

	dosha), appropriate food and regimen for Greeshma rutu.								
CO4	Discuss the climatic conditions, health status (bala, agni, dosha), appropriate food and regimen for Varsha rutu.	Cognitive/ Application	Must know	Knows How	Lecture/group discussions/Multimedia aids	Written & Viva	F & S	I	
CO4	Discuss the climatic conditions, health status (bala, agni, dosha), appropriate food and regimen for Sharad rutu.	Cognitive/ Application	Must know	Knows How	Lecture/group discussions/Multimedia aids	Written & Viva	F & S	I	
CO8	Justify the importance of Rutucharya	Affective	Must Know	Does	Group discussions	Viva	F & S	I	
CO4	Describe the special instructions pertaining diet (rasa, guna) and seasons	Cognitive/ Comprehension	Must know	Knows How	Lecture/group discussions/Multimedia aids	Written & Viva	F & S	I	
CO4	Identify the significance of Rutusandhi	Cognitive/ Comprehension	Must know	Knows How	Lecture	Written or Viva	F & S	I	
CO2	Recite the shloks - 1 to 6, 55-58	Cognitive/ Recall	Must Know	Show	Self learning	Written/viva/quiz	F & S	I	
CO4	Apply the Principles of Rutucharya in practice	Skill	Must Know	Does	Proforma based assessment of healthy individuals or patients	Viva	F & S	I	
CO1	Identify Prayojan, Swasdnaya, Apadesh Tantrayukties in this chapter.	Cognitive/ Application	Must know	Knows how	Lecturer/ Group discussion	Viva	F & S	I	

**Topic -5 Ashtang Hriday Samhita – Sutrasthan- Chapter 4. Roganutpadaniya Adhyaya--Time (Lecture:- 05 ; Non lecture 04 hours)**

CO6	Enlist the adharaneeya vega (natural urges not to be suppressed by force)	Cognitive/ Recall	Must know	Knows How	Lecture	Written & Viva	F & S	I	
CO6	Specify the diseases due to suppression of adhovata (flatus) and its treatment	Cognitive/ Recall	Must know	Knows How	Lecture	Written & Viva	F & S	I	
CO6	Specify the diseases due to suppression of purisha (fecal matter/ defecation) and its treatment	Cognitive/ Recall	Must know	Knows How	Lecture	Written & Viva	F & S	I	
CO6	Specify the diseases due to suppression of mootra (urine) and its treatment	Cognitive/ Recall	Must know	Knows How	Lecture	Written & Viva	F & S	I	
CO6	Specify the diseases due to suppression of udgaar (belching) and its treatment	Cognitive/ Recall	Must know	Knows How	Lecture	Written & Viva	F & S	I	
CO6	Specify the diseases due to suppression of kshvathu (sneezing) and its treatment	Cognitive/ Recall	Must know	Knows How	Lecture	Written & Viva	F & S	I	
CO6	Specify the diseases due to suppression of trushna (thirst) and its treatment	Cognitive/ Recall	Must know	Knows How	Lecture	Written & Viva	F & S	I	

CO6	Specify the diseases due to suppression of kshudha (hunger) and its treatment	Cognitive/ Recall	Must know	Knows How	Lecture	Written/viva	F & S	I	
CO6	Specify the diseases due to suppression of nidra (sleep) and its treatment	Cognitive/ Recall	Must know	Knows How	Lecture	Written & Viva	F & S	I	
CO6	Specify the diseases due to suppression of kaasa (cough) and its treatment	Cognitive/ Recall	Must know	Knows	Lecture	Written & Viva	F & S	I	
CO6	Enumerate the diseases due to suppression of shrama shwasa and its treatment	Cognitive/ Recall	Must know	Knows	Lecture	Written & Viva	F & S	I	
CO6	Specify the diseases due to suppression of jumbha (yawning) and its treatment	Cognitive/ Recall	Must know	Knows	Lecture	Written & Viva	F & S	I	
CO6	Specify the diseases due to suppression of ashru (tears) and its treatment	Cognitive/ Recall	Must know	Knows	Lecture	Written & Viva	F & S	I	
CO6	Specify the diseases due to suppression of vaman(vomiting) and its treatment	Cognitive/ Recall	Must know	Knows How	Lecture	Written & Viva	F & S	I	
CO6	Specify the diseases due to suppression of shukra (semen) and its treatment	Cognitive/ Recall	Must know	Knows How	Lecture	Written & Viva	F & S	I	

CO6	Describe the incurable condition of Vegadharan	Cognitive/Comprehension	Must know	Knows How	Lecture	Written or Viva	F & S	I	
CO6	Explain vegdharan as the root cause for many diseases and its common treatment	Cognitive/Comprehension	Must know	Knows How	Lecture	Written & Viva	F & S	I	
CO6	Explain the dharaneeya vega (urges to be controlled)	Cognitive/Comprehension	Must know	Knows How	Lecture/ Group discussion	Written or Viva	F & S	I	
CO8	Justify the importance of adharneeya and dharneeya vega to maintain health	Cognitive/ Application	Must know	Does	Group discussions	Group discussions/ Class activities	F & S	I	
CO6	Explain importance of Shodhana chikitsa (purification techniques)	Cognitive/Comprehension	Must know	Knows How	Lecture	Written & Viva	F & S	I	
CO6	Explain the importance of Brumhana after Shodhana chikitsa	Cognitive/Comprehension	Must know	Knows How	Lecture	Written & Viva	F & S	I	
CO6	Explain the concept of Aagantu roga (traumatic diseases) and its treatment	Cognitive/Comprehension	Must know	Knows How	Lecture	Written or Viva	F & S	I	
CO6	Discuss the concept of rutu-shodhana (elimination of doshas according to seasons)	Cognitive/ Application	Must know	Knows How	Lecture/Group Discussion	Written & Viva	F & S	I	

CO6 CO8	Describe the importance of healthy diet and regimen.	Cognitive/Comprehension	Must know	Knows How	Lecture/Group discussion	Written & Viva	F & S	I	
CO6	Comply with health rules regarding vedgharan and hita-aahar-vihar.	Cognitive/Comprehension	Must know	Shows		Group discussion/Class activities	F & S	I	
CO2	Recite the shlokas from number 1 to 22, 24-31, 35	Cognitive/Recall	Must know	Show	Self-learning	Written/viva/quiz	F & S	I	
CO3, CO6	Assess the sign and symptoms caused due to suppression of Adharaneeya Vegas.	Skill	Must Know	Show how	Proforma based assessment in healthy volunteers/patients.	Problem based assessment	Formative	I	
CO1	Identify Uddesh, Nirdesh, Tantrayukties in this chapter.	Cognitive/Application	Must know	Knows how	Lecturer/Group discussion	Viva	F & S	I	

**Topic -6 Ashtang Hriday Samhita – Sutrasthan- Chapter 05 Dravadravya Vijnaniya Adhyaya--Time (Lecture:- 05 ; Non lecture 04 hours)**

CO5	Differentiate between Gangambu (rain water) and Samudrambu (sea water)	Cognitive/Comprehension	Desirable	Knows	Lecture discussion	Written or Viva	Formative	I	
CO5	Describe attributes of water from different sources	Cognitive/Comprehension	Nice to know	Knows	Lecture discussion	Written or Viva	Formative	I	
CO5	Explain the utilities of different states of water (avoiding of drinking water, hot water (ushnambu), cold water	Cognitive/Comprehension	Must know	Knows how	Lecture discussion	Written or Viva	F & S	I	

	(sheetambu), Boiled and cold water (kwathita-sheetambu)								
CO5	Write the qualities of Narikelodakam (coconut water)	Cognitive/ Recall	Must know	Knows	Discussion	Written or Viva	F & S	I	
CO5	Discuss the properties of ksheeram (milk), Dadhi (curd), Takra (mastu), navaneetam (white butter), Ghritam	Cognitive/ Comprehension	Must know	Knows how	Lecture discussion	Written or Viva	F & S	I	
CO5	List Properties of milk (ksheeras) of different sources.	Cognitive/ Recall	Nice to know	Knows	Lecture	Written or Viva	Formative	I	
CO5	Differentiate the properties of ama (unboiled) and shruta (boiled) ksheeram (milk)	Cognitive/ Comprehension	Must know	Knows	Lecture	Written or Viva	F & S	I	
CO5	Explain the rules for curd consumption	Cognitive/ Comprehension	Must know	Know how	Lecture discussion	Written or Viva	F & S	I	
CO5	Write the properties of various milk preparations	Cognitive/ Recall	Nice to know	Know	Lecture discussion	Written or Viva	Formative	I	
CO5	Identify the properties and uses of sugarcane and its products	Cognitive/ Recall	Nice to know	Know	Lecture discussion	Written or Viva	F & S	I	
CO5	Enlist the properties of honey and Identify the various guidelines related to use of honey	Cognitive/ Recall	Must know	Knows how	Lecture discussion	Written or Viva	F & S	I	
CO5	Write the properties of tilaitailam (Sesame oil)	Cognitive/ Recall	Must know	Know	Lecture discussion	Written or Viva	F & S	I	

CO5	Identify the characteristics of different oils	Cognitive/Comprehension	Nice to know	Know	Lecture discussion	Written or Viva	Formative	I	
CO5	Classify various types of madyas (wines)	Cognitive/Comprehension	Nice to know	Know	Lecture discussion	Written or Viva	Formative	I	
	explain the properties of Shukta, Dhanyamlam, sauveeraka, tushodaka etc.,	Cognitive/Comprehension	Nice to know	Know	Lecture discussion	Written or Viva	Formative	I	
CO5	Describe the properties and uses of various types of urine	Cognitive/Comprehension	Nice to know	Know	Lecture discussion	Written or Viva	Formative	I	
CO2	Recite the shlokas- 1,16-17, 20,29-32, 51,52,56	Cognitive/Recall	Must know	Show	Self-learning	Written or Viva	F & S	I	
CO5	Classify some common dravyas like milk, ghee, sugar, jaggery etc according to their varga (group) and qualities	Skill	Must know	Show how	class Discussion	Viva/ class activities	F & S	I	
CO1	Identify Vaakyashesh, Samucchaya, Yog Tantrayukties in this chapter.	Cognitive/ Application	Must know	Knows how	Lecturer/ Group discussion	Viva	F & S	I	

**Topic -7 Ashtang Hriday Samhita – Sutrasthan- Chapter 6. Annaswaroopa Vijnaneeya Adhyaya- Time (Lecture:- 05 ; Non lecture 03 hours)**

CO5	To classify the shukadhanya (cereals)	Cognitive/Recall	Must know	Know	Lecture	Written or Viva	F & S	II	Dravyaguna
CO5	Enumerate the qualities of each shukadhanya (cereals)	Cognitive/Recall	Desire to know	Know	Lecture	Written or Viva	Formative	II	Dravyaguna
CO5	Classify the shimbidhanya (pulses)	Cognitive/Recall	Must know	Know	Lecture	Written or Viva	F & S	II	Dravyaguna

CO5	Enumerate the qualities of each shimbi dhanya (pulses)	Cognitive/ Recall	Desire to know	Know	Lecture discussion	Written or Viva	Formative	II	Dravyaguna
CO5	Enumerate the qualities of various types of mamsa (meat)	Cognitive/ Recall	Nice to know	Knows	Lecture discussion	Written or Viva	Formative	II	
CO5	Enumerate the qualities of various types of shaka	Cognitive/ Recall	Must know	Knows	Lecture discussion	Written or Viva	Formative and summative	II	Dravyaguna
CO5	Enumerate the qualities of various types of fruits	Cognitive/ Recall	Desire to know	Knows	Lecture discussion	Written or Viva	Formative	II	Dravyaguna
CO5	Enumerate the qualities of various types of krtannavarga (cooked food)	Cognitive/ Recall	Must to know	Know	Lecture discussion	Written or Viva	Formative and summative	II	Bhaishajy akalpana
CO5	Enumerate the qualities of various types of medicinal dravyas (herbs)	Cognitive/ Recall	Must know	Knows	Lecture discussion	Written or Viva	F & S	II	Dravyaguna
CO5	Classify certain common dravyas according to varga and functions	Skill	Must know	Show how	Group activities	Viva	F & S	II	
CO1	Identify Samucchaya, Prayojan, Tantrayukties in this chapter.	Cognitive/ Application	Must know	Knows how	Lecturer/ Group discussion	Viva	F & S	II	
<b>Topic -8 Ashtang Hriday Samhita – Sutrasthan- Chapter 7. Annaraksha Adhyaya- Time (Lecture:- 04 ; Non lecture 03 hours)</b>									
CO8	Describe the role of Rajavaidya (Noble Physiian)	Cognitive/ Comprehension	Nice to know	Know	Discussion	Written or Viva	Formative	II	

CO6	Identify the characteristics adulterated food stuffs	Cognitive/Comprehension	Nice to know	Knows	Discussion	Written or Viva	Formative	II	Agadatant ra
CO6	Describe the symptoms caused by poisoned or adulterated food	Cognitive/Comprehension	Desire to know	Know	Discussion	Written or Viva	Formative	II	Agadatant ra
CO6	Discuss the treatment module for poisoning	Cognitive/Comprehension	Desire to know	Know how	Discussion	Written or Viva	Formative	II	Agadatant ra
CO6	Define virudhahara (incompatible foods) with examples	Cognitive/Recall	Must know	Know	Lecture discussion	Written & Viva	F & S	II	
CO6	Discuss the treatment methods for virudhahara (incompatible foods)	Cognitive/Comprehension	Must know	Know how	Lecture discussion	Written & Viva	F & S	II	
CO6	Follow the principles regarding viruddh aahar	Cognitive/Application	Must know	Know how	Discussion	Class Activities	Formative	II	
CO4	Explain the process of satmikaran (accustomization)	Cognitive/Comprehension	Must know	Know how	Lecture discussion	Written & Viva	F & S	II	
CO4	Explain the three accessory pillars of life (diet, sleep and non-celibacy)	Cognitive/Comprehension	Must know	Know how	Lecture discussion	Written & Viva	Formative	II	
CO4	Explicate the significance of judicious sleep	Cognitive/Comprehension	Must know	Know how	Discussion	Written & Viva	F & S	II	
CO2	Recite the shloka- 45, 48, 50, 53-55	Cognitive/Recall	Must know	Shows	Self-learning	Written or Viva	F & S	II	
CO1	Identify Nidarshan, Samucchay, Prayojan,	Cognitive/Application	Must know	Knows how	Lecturer/Group discussion	Viva	F & S	II	

	swasadnya Tantrayukties in this chapter.								
<b>Topic -9 Ashtang Hriday Samhita – Sutrasthan- Chapter 8. Annaraksha Adhyaya- Time (Lecture:- 05 ; Non lecture 04 hours)</b>									
CO4	Explain the importance of matra (proper quantity of food) for maintenance of health	Cognitive/Comprehension	Must know	Knows how	Lecture	Written or Viva	F & S	II	
CO4	Describe how to quantify food	Cognitive/Comprehension	Must know	Knows	Lecture	Written or Viva	F & S	II	
CO4	Determine the adverse effects of heena matra (inadequate quantity of food) and atimatra (excess quantity of food) ahara	Cognitive/Comprehension	Must know	Knows how	Lecture	Written or Viva	F & S	II	
CO6	Discuss the etiopathogenesis, symptoms and treatment principles of Alasaka and Visuchika.	Cognitive/Application	Must know	Knows how	Lecture/PBL	Written or Viva	F & S	II	
CO6	Classify between various types of Apatarpan therapies	Cognitive/Comprehension	Must know	Knows how	Lecture	Written or Viva	F & S	II	
CO6	Classify various types of ajeerna	Cognitive/Comprehension	Must know	Knows how	Lecture	Written or Viva	F & S	II	
CO6, CO4	Enlist unwholesome food items	Cognitive/Recall	Must know	Knows	Group discussion	Written or Viva	F & S	II	
CO4	Identify various unhealthy food habits	Cognitive/Comprehension	Must know	Knows	Group discussion	Written or Viva	F & S	II	

CO4	Recommend ideal regimen for consumption of food (aaharvidhi)	Cognitive/Comprehension	Must know	Knows how	Discussion	Written or Viva	F & S	II	
CO4	Differentiate between the food items recommended and non-recommended for daily use	Cognitive/Comprehension	Must know	Knows	Lecture Group Activity.	Written or Viva	F & S	II	
CO4	Advise the right order of food items in a meal	Cognitive/Application	Must know	Does	Discussion/activities	Viva/ proforma activity	F & S	II	
CO4	Select anupanas (after drink) based on ahara and aushadha	Cognitive/Comprehension	Must know	Knows how	Lecture/Discussion	Written or Viva	F & S	II	
CO4	Identify the conditions where Anupan is contraindicated	Cognitive/Comprehension	Desire to know	Knows	Lecture/Discussion	Written or Viva	F & S	II	
CO4	Advise the right time of food consumption (Aahar Kala)	Cognitive/Application	Must know	Shows	Lecture/Discussion/activities	Written or Viva	F & S	II	
CO2	Recite the shlokas-1-3, 6,7, 17, 19, 20,21, 25-30, 33-34	Cognitive/Recall	Must know	Shows	Self-learning	Written or Viva	F & S	II	
CO4	Justify the various principles of diet regarding quantity and time	Cognitive/Application	Must know	Does	Discussion/activities	Viva/activities	Formative/Summative	II	
CO1	Identify Prayojan, Upadesh, Padartha, Yog, Swasnya Tantrayukties in this chapter.	Cognitive/Application	Must know	Knows how	Lecturer/ Group discussion	Viva	F & S	II	

**Topic -10 Ashtang Hriday Samhita – Sutrasthan- Chapter 9.** Dravyaadi Vijnaniya Adhyaya-**Time** (Lecture:- 04 ; Non lecture 04 hours)

CO5	Justify the predominance of Dravya	Cognitive/Comprehension	Must know	Knows how	Lecture	Written or Viva	F & S	II	
CO5	Elaborate the prevalence of Panchamahabhutas in Dravyas	Cognitive/Comprehension	Must know	Knows how		Written or Viva	F & S	II	
CO5	Differentiate between Rasa and Anurasa (primary taste and secondary taste)	Cognitive/Comprehension	Must know	Knows	Lecture	Written or Viva	F & S	II	
CO5	Analyse the characteristics of Panchabhautik dravyas	Cognitive/Application	Must know	Shows	Lecture	Written or Viva	F & S	II	
CO5	Recognise the aushadatva (medicinal value) of all substances	Cognitive/Comprehension	Must know	Knows how	Lecture	Written or Viva	F & S	II	
CO5	Demonstrate the importance of Panchabhautikdravyas in restoration and continuation of health.	Cognitive/Comprehension	Must know	Knows how	Lecture	Written or Viva	F & S	II	
CO5	Explain the importance of Mahabhutas and drug action	Cognitive/Comprehension	Must know	Knows how	Lecture	Written or Viva	F & S	II	
CO5	Define Veerya and Vipaka	Cognitive/Recall	Must know	Knows	Lecture	Written or Viva	F & S	II	
CO5	Discuss the types and the various opinions related with Veerya.	Cognitive/Comprehension	Must know	Knows how	Lecture	Written or Viva	F & S	II	
CO5	Explain Vipaka and its types.	Cognitive/Comprehension	Must know	Knows	Lecture	Written or Viva	F & S	II	

CO5	Discuss the hierarchy of active principles of Dravya (matter)	Cognitive/Comprehension	Must know	Knows how	Lecture	Written or Viva	F & S	II	
CO5	Define Prabhava	Cognitive/Recall	Must know	Knows	Lecture	Written or Viva	F & S	II	
CO5	Recall the exemplified functions of various active principles	Cognitive/Recall	Must know	Knows	Lecture	Written or Viva	F & S	II	
CO5	Describe the Saman pratyayarabdha and Vichitra-praty-arabdha Dravyas.	Cognitive/Comprehension	Must know	Knows how	Lecture	Written or Viva	F & S	II	
CO2	Recite the shlokas – 1,2,3, 4,10, 12, 13, 20,26,27,28	Cognitive/Recall	Must know	Knows	Self-learning	Written , Viva/quiz	F & S	II	
CO1	Identify Swasdnya, Nirvachan Tantrayukties in this chapter.	Cognitive/Application	Must know	Knows how	Lecturer/ Group discussion	Viva	F & S	II	

**Topic -11 Ashtang Hriday Samhita – Sutrasthan- Chapter 10. Rasabhedhiya Adhyaya- Time (Lecture:- 05 ; Non lecture 04 hours)**

CO2	Describe the formation of rasa from mahabhoota	Cognitive/Comprehension	Must know	Know	Lecturer Audio-Visual aids	Written or Viva	Formative or Summative	II	Dravyaguna
CO2	Identify the examples and exceptions of the six rasa	Cognitive/Comprehension	Must know	Know	Lecturer Audio-Visual aids	Written or Viva	Formative or Summative	II	Dravyaguna
CO2	Explain the features of six rasa with examples and exceptions	Cognitive/Comprehension	Must know	Knows how	Lecturer Audio-Visual aids	Written or Viva	Formative or Summative	II	
CO2	Explain the functions of six rasa	Cognitive/Comprehension	Must know	Knows how	Lecturer Audio-Visual aids	Written or Viva	Formative or Summative	II	

CO2	Describe the symptoms due to excess use (atiyog) of the six rasa	Cognitive/Comprehension	Must know	Knows how	Lecturer Audio-Visual aids	Written or Viva	Formative or Summative	II	
CO2	Analyze the tartamatva of rasas (hierarchy of rasa on the basis of characteristics)	Cognitive/Application	Must know	Knows how	Lecturer Audio-Visual aids	Written or Viva	Formative or Summative	II	Dravyaguna
CO2	Enlist the 63 types of permutation and combination of rasa	Cognitive/Recall	Nice to know	Know how	Lecturer Audio-Visual aids	Written or Viva	F & S	II	Dravyaguna
CO2	Classify the dravyas according to the rasa skand (group)	Skill	Must know	Know how	Discussion/activities based proformas	Viva/Activities	F & S	II	
CO2	Recite the shloks-1-21, 33-38	Cognitive/Recall	Must know	Knows	Self-learning	Written or Viva	F & S	II	
CO1	Identify Uddesh, Niradesh, Apavarga Tantrayukties in this chapter.	Cognitive/Application	Must know	Knows how	Lecturer/ Group discussion	Viva	F & S	II	
<b><u>Topic -12 Ashtang Hriday Samhita – Sutrasthan- Chapter 11. Doshadi Vijnaniya Adhyaya- Time (Lecture:- 08 ; Non lecture 05 hours)</u></b>									
CO3	Discuss the importance of dosha dhatu mala	Cognitive/Application	Must know	Know how	Lecturer Audio-Visual aids	Written & Viva	Formative or Summative	III	
CO3	Explain dosha dhatu mala prakruta karma (normal functions)	Cognitive/Comprehension	Must know	Knows how	Lecturer Audio-Visual aids	Written & Viva	Formative or Summative	III	

CO3	Identify the normal functions of dosha, dhatu and mala	Skill	Must know	Show How	Activity based proformas	Viva/ through various Activities	Formative or Summative	III	
CO3	Explain dosha dhatu mala vaikruta (vrudha and ksheena ) karma (abnormal functions)	Cognitive/ Comprehen sion	Must know	Knows how	Lecturer Audio- Visual aids	Written & Viva	Formative or Summative	III	
CO3	Identify the effects due to vrudhi (increase) or kshaya (decrease) of dosha,dhatu and mala	Skill	Must know	Show How	Activity based proformas	Viva/ through various Activities	Formative or Summative	III	
CO3	Explain the relation between dosha and dhatu.	Cognitive/ Comprehen sion	Must know	Know how	Lecturer Audio- Visual aids	Written & Viva	Formative or Summative	III	
CO5	Explain the treatment principles for vitiated dosha, dhatu and mala	Cognitive/ Comprehen sion	Must know	Know how	Lecturer Audio- Visual aids	Written & Viva	Formative or Summative	III	
CO3	Elucidate the concept of agni	Cognitive/ Comprehen sion	Must know	Know how	Lecturer Audio- Visual aids	Written & Viva	Formative or Summative	III	
CO3	Discuss Superiority of Jatharagni	Cognitive/ Applicatio n	Must know	Know how	Lecture, Discussion	Written & Viva	Formative or Summative	III	
CO3	Assess the status of Agni.	Skill	Must know	Shows	Activities	Viva/Activites	Formative or Summative	III	
CO6	Explain the general pathophysiology for origin of Diseases	Cognitive/ Comprehen sion	Must know	Know how	Lecturer Audio- Visual aids	Written or Viva	Formative or Summative	III	

CO3 CO6	Explain the concept of Ojas	Cognitive/Comprehension	Must know	Know how	Lecture, Discussion	Written or Viva	Formative or Summative	III	
CO3 CO6	Explain aetiological factors for Ojakshaya	Cognitive/Comprehension	Must know	Know how	Lecturer	Written or Viva	Formative or Summative	III	
CO3 CO6	Explain Ojakshaya Lakshana	Cognitive/Comprehension	Must know	Know how	Lecture, Discussion	Written or Viva	Formative or Summative	III	
CO3 CO6	Identify Ojakshaya Lakshana	Skill	Must know	Show how	Lecturer Audio-Visual aids	Viva/activities	Formative or Summative	III	
CO5	Discuss general diet principles for vridhhi and kshaya (vitiated doshas)	Cognitive/ Application	Must know	Show How	Activity based proformas	Viva/ planned activities	Formative or Summative	III	
CO2	Recite shlokas from 1 to 45	Cognitive	Must Know	Knows	Self-learning	Written or Viva	Formative or Summative	III	
CO1	Identify Samucchaya, Adhikaran, Vakyashesh Tantrayukties in this chapter.	Cognitive/ Application	Must know	Knows how	Lecturer/ Group discussion	Viva	F & S	III	
<b>Topic -13 Ashtang Hriday Samhita – Sutrasthan- Chapter 12. Doshabhedhiya Adhyaya- Time (Lecture:- 08 ; Non lecture 05 hours)</b>									
CO3	Enumerate the seats of vata, pitta and kapha doshas	Cognitive/ Recall	Must know	Knows	Lecturer Audio-Visual aids	Written or Viva	Formative or Summative	III	
CO3	Enlist types of vata, pitta and kapha dosha.	Cognitive/ Recall	Must know	Knows	Lecturer Audio-Visual aids	Written or Viva	Formative or Summative	III	
CO3	Describe the specific seats and functions of types of vata, pitta and kapha doshas.	Cognitive/ Recall	Must know	Knows	Lecturer Audio-Visual aids	Written or Viva	Formative or Summative	III	

CO3	Discuss the importance of types of vata, pitta and kapha doshas.	Cognitive/ Application	Must know	Knows how	Lecturer Audio-Visual aids	Written or Viva	Formative or Summative	III	
CO3	Identify the different types of dosha according to location and functions	Skill	Must know	Knows how	Proforma based activities	Written or Viva	Formative or Summative	III	
CO3	Elucidate the concept of Chaya (accumulation), Prakopa (aggravation) and Prashama (alleviation) of vata, pitta and kapha doshas.	Cognitive/ Comprehension	Must know	Knows how	Lecturer Audio-Visual aids	Written or Viva	Formative or Summative	III	
CO3	Discuss the impact of seasonal variation in accumulation and aggravation of vata, pitta and kapha doshas.	Cognitive/ Application	Must know	Knows how	Lecturer Audio-Visual aids/Discussion	Written or Viva	Formative or Summative	III	
CO3	Discuss the superiority of dosha in manifestation of diseases	Cognitive/ Application	Must know	Know how	Lecturer Audio-Visual aids/Discussion	Written or Viva	Formative or Summative	III	
CO3	Identify general aetiological factors responsible for manifestation of diseases	Cognitive/ Application	Must know	Know how	Lecturer/ Discussion	Written or Viva	Formative or Summative	III	
CO3	Describe Trividha Roga marga (pathways of diseases)	Cognitive/ Comprehension	Must know	Knows	Lecturer	Written or Viva	Formative or Summative	III	
CO3	Enlist various disorders of Trividha Roga marga (pathways of diseases)	Cognitive/ Recall	Must know	Knows	Lecturer/	Written or Viva	Formative or Summative	III	

CO3	Recognise the importance of concept of Trividha Roga marga in diagnosis and prognosis of diseases.	Cognitive/ Application	Must know	Knows how	Discussion	Written or Viva	Formative or Summative	III	
CO3	Enumerate the symptoms of aggravated Vata-Pitta – Kapha dosha	Cognitive/ Recall	Must know	knows	Lecture, Discussion	Written or Viva	Formative or Summative	III	
CO3	Identify the prakopa lakshana of dosha in various diseases	Skill	Must know	Show How	Discussion, Group activities	Written or Viva	Formative or Summative	III	
CO3	Explain the concept of unnamed diseases	Cognitive/ Comprehension	Must know	Knows how	Lecture, Discussion	Written or Viva	Formative or Summative	III	
CO3	Define svatantra and partantra vyadhi (primary and secondary diseases)	Cognitive/ Recall	Must know	Know	Lecture	Written or Viva	Formative or Summative	III	
CO3	Enumerate the types of assessment methods	Cognitive/ Recall	Must know	Know	Lecture, Discussion	Written or Viva	Formative or Summative	III	
CO3	Demonstrate the types of assessment methods.	Skill	Must know	Shows how.	Group Activities	Viva	Formative	III	
CO3	Explain the concept of Guru Vyadhit and LaghuVyadhit (gravity of disease and contrary presentation)	Cognitive/ Comprehension	Must know	Knows how	Lecture, Discussion	Written or Viva	Formative or Summative	III	
CO3	Enlist the 63 types of Permutation and combination of dosha	Cognitive/ Recall	Nice to know	Knows	Lecture	Written or Viva	Formative or Summative	III	
CO2	Recite the shlokas 1-72	Cognitive/ Recall	Must know	Shows	Self-learning	Written, Viva/Quiz	F & S	III	

CO1	Identify Apadesh, Samucchaya Tantrayukties in this chapter Tantrayukties in this chapter.	Cognitive/ Application	Must know	Knows how	Lecturer/ Group discussion	Viva	F & S	III	
<b>Topic -14 Ashtang Hriday Samhita – Sutrasthan- Chapter 13 Doshopakramaniya Adhyaya-Time (Lecture:- 07 ; Non lecture 06 hours)</b>									
CO3	Explain the therapeutic procedures and specific management of vata, pitta and kapha dosha	Cognitive/ Comprehension	Must know	Knows how	Lecture	Written or Viva	F & S	III	
CO6	Explain the seasonal regimen to be adopted in various combinations of vitiated Doshas	Cognitive/ Comprehension	Must know	Knows	Lecture/Group Discussions	Written or Viva	F & S	III	
CO6	Discuss the importance of treatment of doshas in accumulation stage	Cognitive/ Application	Must know	Knows how	Lecture/Group Discussions	Written or Viva	F & S	III	
CO6	Differentiate the accurate and inaccurate therapeutic procedures.	Cognitive/ Comprehension	Must know	Knows how	Lecture/Group Discussions	Written or Viva	F & S	III	
CO6	Elaborate the factors responsible for movement of doshas from koshta to shakha and shakha to koshta.	Cognitive/ Comprehension	Must to know	Knows how	Lecture	Written or Viva	F & S	III	
CO6	Elaborate the concept of tiryag-gatadosha (migration to other abodes) and its treatment principle.	Cognitive/ Comprehension	Must to know	Knows how	Lecture	Written or Viva	F & S	III	
CO6	Describe the line of treatment for SthaniDosha (native) and AagantuDosha (immigrant)	Cognitive/ Comprehension	Must to know	Knows how	Lecture	Written or Viva	F & S	III	

CO6	Explain the concept of Aama.	Cognitive/Comprehension	Must to know	Knows how	Lecture	Written or Viva	F & S	III	
CO6	Enumerate the symptoms of saam and niraam doshas.	Cognitive	Must to know	Knows	Lecture	Written or Viva	F & S	III	
CO6	Elaborate the symptoms of saamadasha and their treatment	Cognitive	Must to know	Knows	Lecture	Written or Viva	F & S	III	
CO6	Analyze the 10 types of aushadha sevan kaal (Time, Method and indications of administration of medicine).	Cognitive/ Application	Must to know	Knows how	Lecture/Discussion	Written or Viva	F & S	III	
CO2	Recite the shlokas-1-41	Cognitive/ Recall	Must know	Shows	Self-learning	Written or Viva	F & S	III	
CO1	Identify Swasadnya, Nidarshan, Uddesh, Nirdesh Tantrayukties in this chapter.	Cognitive/ Application	Must know	Knows how	Lecturer/ Group discussion	Viva	F & S	III	
<b>Topic -15 Ashtang Hriday Samhita – Sutrasthan- Chapter 14 Dvidividhopakramaniya Adhyaya-Time (Lecture:- 05 ; Non lecture 05 hours)</b>									
CO6	Elaborate the concept of two types of therapies - Langhan and Brihan	Cognitive/ Comprehension	Must know	Know how	Lecture	Written or Viva	F & S	III	
CO6	Describe the indications, methods, benefits of Brihan and symptoms of excess Brihan	Cognitive/ Comprehension	Must know	Know how	Lecture/Discussion	Written or Viva	F & S	III	
CO6	Explain the indications, methods, benefits of Langhan and symptoms of excess Langhan	Cognitive/ Comprehension	Must know	Know how	Lecture/ Discussion	Written or Viva	F & S	III	

CO6	Describe the indications of shodhan and shaman therapies	Cognitive/Comprehension	Must know	Know how	Lecture	Written or Viva	F & S	III	
CO6	Elaborate the concept of Atisthauya with the treatment module	Cognitive/Comprehension	Must know	Know how	Lecture	Written or Viva	F & S	III	
CO6	Elaborate the concept of Atikarshya with the treatment module	Cognitive/Comprehension	Must know	Know how	Lecture	Written or Viva	F & S	III	
CO2	Recite the shlokas – 1 to 7, 31 to 36	Cognitive/Recall	Must know	Shows	Self-learning	Written or Viva	F & S	III	
CO1	Identify Nirvachan, Samucchay, Nidarshan Tantrayukties in this chapter.	Cognitive/Application	Must know	Knows how	Lecturer/Group discussion	Viva	F & S	III	
<b>Topic -16 Ashtang Hriday Samhita – Sutrasthan- Chapter 15, Shodhanadigana Sangraha Adhyaya- Time (Lecture:- 02 ; Non lecture 04 hours)</b>									
CO7	Select the vaman, virechan, niruha, nasya gana according to their functions	Cognitive/Comprehension	Nice to know	Knows how	Lecture/Multimedia aids	Viva	Formative	III	Dravyaguna
CO7	Define the dravyas with their ingredients and actions.	Cognitive/Recall	Nice to know	Know	Lecture/Multimedia aids	Viva	Formative	III	
CO7	Identify the dravyas frequently used in treatments	Skill	Nice to know	Shows	Herbal garden visit	Viva	Formative	III	
<b>Topic-17. Charak Samhita Sutrasthan Chapter 1. Dirghamjivitiyam Adhyaya; Time (Lecture:- 07 ; Non lecture 02 hours)</b>									
CO1	Discuss the Ayurvedavatanam (Genealogy of Ayurveda)	Cognitive	Must know	Knows how	Lecture	Written or Viva	F & S	I	
CO8	Discuss the chaturvarga and its main factor for achieving it	Cognitive	Must know	Knows how	Lecture	Written or Viva	F & S	I	

CO6	Discuss about the trisutra of Ayurveda (three principles of health and disease)	Cognitive	Must know	Know how	Lecture	Written or Viva	F & S	I	
CO2	Discuss the about the six padarthas (six basic principles)	Cognitive	Must know	Know how	Lecture	Written or Viva	F & S	I	
CO1	Discuss the characteristics of Ayurveda	Cognitive	Must know	Know how	Lecture	Written or Viva	F & S	I	
CO2	Discuss the characteristics of Ayu (life) and its synonyms	Skill	Must know	Knows how	Lecture	Written or Viva	F & S	I	
CO2	Discuss the characteristics of samanya (similarity) and visha (difference/uniqueness)	Cognitive	Must know	Knows how	Lecture	Written or Viva	F & S	I	
CO2	Discuss about the Tridanda (tripod of life)	Cognitive	Must know	Knows how	Lecture	Written or Viva	F & S	I	
CO2	Discuss the classification and characteristics of the dravyas (basic elements)	Cognitive	Must know	Knows how	Lecture	Written or Viva	F & S	I	
CO2	Discuss the classification and characteristics of the gunas	Cognitive	Must know	Show How	Lecture	Written or Viva	F & S	I	
CO2	Define karma (actions)	Cognitive	Must know	Knows how	Lecture	Written or Viva	F & S	I	
CO2	Explain samavaya (inseparable concomitance)	Cognitive	Must know	Knows how	Lecture	Written or Viva	F & S	I	
CO1	Explain the aims of Ayurveda	Cognitive	Must know	Knows how	Lecture	Written or Viva	F & S	I	

CO6	Explain the three causative factors of disease	Cognitive	Must know	Knows how	Lecture	Written or Viva	F & S	I	
CO6	Explain the abode of vyadhi and arogya	Cognitive	Must know	Show how	Lecture	Written or Viva	F & S	I	
CO2	Discuss the characteristics of Atma	Cognitive	Must know	Know how	Lecture	Written or Viva	F & S	I	
CO6	Explain the sharira and manasa doshas	Cognitive	Must know	Know how	Lecture	Written or Viva	F & S	I	
CO6	Discuss the treatment of sharira and manasa doshas	Cognitive	Must know	knows How	Lecture	Written or Viva	F & S	I	
CO3	Discuss the gunas of vayu and its treatment	Cognitive	Must know	Knows how	Lecture	Written or Viva	F & S	I	
CO3	Discuss the gunas of pitta and its treatment	Cognitive	Must know	Knows how	Lecture	Written or Viva	F & S	I	
CO3	Discuss the gunas of shleshma and its treatment	Cognitive	Must know	Knows How	Lecture	Written or Viva	F & S	I	
CO6	Discuss about the treatment for sadhya and asadhya vikara (curable and incurable disease)	Cognitive	Must know	Knows how	Lecture	Written or Viva	F & S	I	
CO2	Explain the rasa	Cognitive	Must know	Knows how	Lecture	Written or Viva	F & S	I	
CO2	Classify the dravya based on their effects on body and their origin	Cognitive	Must know	Know how	Lecture	Written or Viva	F & S	I	
CO7	Enumerate the dravya based on the useful parts (upayuktanga)	Cognitive	Desirable to know	Know how	Lecture/Mul timedia aids	Written or Viva	F & S	I	
CO7	Discuss about the identification of drugs by name, form and its action	Cognitive	Must know	Know how	Lecture/Mul timedia aids	Written or Viva	F & S	I	

CO8	Discuss about the duties for one aspires to be a physician.	Cognitive	Must know	Know how	Lecture	Written or Viva	F & S	I	
CO7	Discuss about the best drug	Cognitive	Must know	Know how	Lecture	Written or Viva	F & S	I	
CO8	Discuss about the best physician endowed with all good qualities	Cognitive	Must know	Know how	Lecture	Written or Viva	F & S	I	
CO2	Recite the shlokas 15, 24,28,29, 31, 41, 42, 44-67, 134,135	Cognitive/ Recall	Must know	Shows	Swadhyaya (self learning)	Written or Viva	F & S	I	
CO1	Identify Uddesha, Niradesh Tantrayukties in this chapter	Cognitive/ Application	Must know	Knows how	Lecturer/ Group discussion	Viva	F & S	I	

**Topic-18. Charak Samhita Sutrasthan Chapter 2. Apamarga Tanduliya Adhyaya; Time (Lecture:- 02 ; Non lecture 03 hours)**

CO7	Enumerate few Shiro Virechana Dravya & Main Indications	Cognitive	Desirable to know	Knows	Lecture/Audiovisual aids/ Herbal garden visit	Written or Viva	F & S	II	Dravyaguna
CO7	Enumerate few Vamana Dravya & Main Indications	Cognitive	Desirable to know	Knows	Lecture/Audiovisual aids/ Herbal garden visit	Written or Viva	F & S	II	Dravyaguna
CO7	Enumerate few Virechana Dravya & Main Indications	Cognitive	Desirable know	Knows	Lecture/Audiovisual aids/ Herbal garden visit	Written or Viva	F & S	II	Dravyaguna
CO7	Enumerate few Asthapana Basti Dravya & Main Indications	Cognitive	Desirable to know	Knows	Lecture/Audiovisual aids/ Herbal garden visit	Written or Viva	F & S	II	Dravyaguna

CO7	Enumerate few Anuvasana Basti Dravya & Main Indications	Cognitive	Desirable to know	Knows	Lecture/Audiovisual aids/ Herbal garden visit	Written or Viva	F & S	II	Dravyaguna
CO7	Enumerate the names & Main Indications of 28 Types of Yavagu	Cognitive	Desirable to Know	Knows	Lecture/Audiovisual aids	Written or Viva	F & S	II	Rasshastra-bhaishjya dept
CO7	Explain the Importance Of Panchakarma	Cognitive	Must know	Knows	Lectures	Written or Viva	F & S	II	Panchkarma
CO7	Explain the features of Vaidya	Cognitive	Must know	Knows	Lecture/Group Discussion	Written or Viva	F & S	II	
CO7	Recite Shlokas 15,16,36	Cognitive/Recall	Must know	Shows	Self-learning	Written or Viva	F & S	II	
CO7	Identify the dravyas on the basis of actions	Psychomotor	Must know	Shows	Herbal garden visit	Viva	Summative	II	Dravyaguna
CO1	Identify Upadesh, Samucchaya Tantrayukties in this chapter.	Cognitive/ Application	Must know	Knows how	Lecturer/ Group discussion	Viva	F & S	II	
<b>Topic-19. Charak Samhita Sutrasthan Chapter 3. Aragvadhya Adhyaya-Time (Lecture:- 01 ; Non lecture 03 hours)</b>									
CO7	Mention Thirty Two Churna Pradeha & Main Indications	Cognitive	Desirable to know	Knows	Lectures/Multimedia aids	Written or Viva	Formative	II	Ras-bhaishjya/ Kayachikitsa
<b>Topic-20. Charak Samhita Sutrasthan Chapter 4. Shadvirechana-shatashritiya Adhyaya-Time (Lecture:- 03 ; Non lecture 04 hours)</b>									
CO7	List the six abodes of purgatives	Cognitive/Recall	Must know	Know	Discussion	Written or Viva	F & S	II	Dravyaguna
CO7	Enlist the five tastes for medicinal preparation	Cognitive/Recall	Must know	Know	Lecture, discussion	Written or Viva	F & S	II	Rasashastra &

									bhaishajya Kalpana
CO7	Define the five types of medicinal preparations/ forms	Cognitive/ Recall	Must know	Know	Lecture / Multimedia aids	Written or Viva	F & S	II	Ras-bhaishjya
CO7	Enlist the 50 groups of medicines as per their actions	Cognitive/ Recall	Desirable to know	Know	Lecture	Written or Viva	F & S	II	Dravya guna
CO7	Limitations for description of medicinal drugs in Samhita	Cognitive/ Comprehension	Nice to know	Know how	Lecture	Written or Viva	Formative	II	
CO1	Identify Swasadnya , Samucchaya, Yog Tantrayukties in this chapter.	Cognitive/ Application	Must know	Knows how	Lecturer/ Group discussion	Viva	F & S	II	

**Topic-21. Charak Samhita Sutrasthan Chapter-05 Matrashiteeya Adhyaya\_ Time (Lecture:- 03 ; Non lecture 05 hours)**

CO5	Explain Matravat Ahara	Cognitive/ Recall	Must know	Know	Lecturer, Audio-Visual aids, Group Discussion	Written or Viva	<b>Formative and Summative</b>	II	Swastarutt a
CO5	Define and enlist Nature of Ahara (Guru, Laghu)	Cognitive/ Recall	Must know	Knows how	Lecturer Audio-Visual aids Group Discussion	Written or Viva	<b>Formative and Summative</b>	II	Swastarutt a
CO5	Explain the significance of MatravatAharaPhala	Cognitive/ Recall	Must know	Know how	Lecturer, Audio-Visual aids, Group Discussion	Written or Viva	<b>Formative and Summative</b>	II	Swastarutt a
CO5	Discuss role of AharaSevanaVidhana on the bases of its nature	Cognitive/ Comprehension	Must know	Know how	Lecturer Audio-Visual aids	Written or Viva	<b>Formative and Summative</b>	II	Swastarutt a

					Group Discussion				
CO2	Define Swasthavrutta	Cognitive/ Recall	Must know	Knows	Lecturer Audio-Visual aids Group Discussion	.Viva	<b>Formative and Summative</b>	II	Swastarutt a
CO6	Explain Anjana	Cognitive/ Comprehension	Must know	Know	Lecturer Audio-Visual aids Group Discussion	Written or Viva	<b>Formative and Summative</b>	II	Swastarutt a
CO6	Explain Dhumapana	Cognitive/ Comprehension	Must know	Knows how	Lecturer Audio-Visual aids Group Discussion	Written or Viva	<b>Formative and Summative</b>	II	Swastarutt a, Shalakya , Panchakar ma
CO6	Explain Nasya	Cognitive/ Comprehension	Must know	Knows how	Lecturer Audio-Visual aids Group Discussion	Written or Viva	<b>Formative and Summative</b>	II	Swastarutt a, Shalakya , Panchakar ma
CO6	Explain Dantadhavana	Cognitive/ Comprehension	Must know	know How	Lecturer Audio-Visual aids Group Discussion	Written or Viva	<b>Formative and Summative</b>	II	Swastarutt a,
CO6	Explain Jivhanirlekhana	Cognitive/ Comprehension	Must know	know How	Lecturer Audio-Visual aids Group Discussion	Written or Viva	<b>Formative and Summative</b>	II	Swastarutt a,
CO6	Explain Gandusha	Cognitive/ Comprehension	Must know	Knows how	Lecturer Audio-Visual aids	Written or Viva	<b>Formative and Summative</b>	II	Swastarutt a,

					Group Discussion				
CO6	Explain Abhyanga with types	Cognitive/Comprehension	Must know	Knows how	Lecturer Audio-Visual aids Group Discussion	Written or Viva	<b>Formative and Summative</b>	II	Swastarutt a, Panchakarma
CO6	Describe Parimarjana	Cognitive/Comprehension	Must know	Knows how	Lecturer Audio-Visual aids Group Discussion	Written or Viva	<b>Formative and Summative</b>	II	Swastarutt a,
CO4	Describe the VastraGandhaMalyadiDhara	Cognitive/Comprehension	Must know	Knows how	Lecturer Audio-Visual aids Group Discussion	Written or Viva	<b>Formative and Summative</b>	II	Swastarutt a,
CO4	Explain the concept of Shouchavidhi	Cognitive/Comprehension	Must know	Knows how	Lecturer Audio-Visual aids Group Discussion	Written or Viva	<b>Formative and Summative</b>	II	Swastarutt a,
CO4	Discuss the Kshoura Karma	Cognitive/Comprehension	Must know	Know how	Lecturer Audio-Visual aids Group Discussion	Written or Viva	<b>Formative and Summative</b>	II	Swastarutt a,
CO4	Define PadatraDharan with importance	Cognitive/Recall	Must know	Know how	Lecturer Audio-Visual aids Group Discussion	Written or Viva	<b>Formative and Summative</b>	II	Swastarutt a,
CO4	Explain the ChatraDharana	Cognitive/Recall	Must know	knows How	Lecturer Audio-Visual aids	Written or Viva	<b>Formative and Summative</b>	II	Swastarutt a,

					Group Discussion				
CO4	Justify the importance of the procedures mentioned as dincharya	Cognitive/ Application	Must know	Shows how	Group Discussion	Group Discussion/ Project work	<b>Formative and Summative</b>	II	
CO2	Recite the shlokas 4, 12-13, 34-35, 56-57,68-69, 81-83, 103	Cognitive/ Recall	Must know	Shows	Swadhyaya (self learning)	Viva	F & S	II	
CO1	Identify Upadesh, Padarth,, Nidarshan Tantrayukties in this chapter.	Cognitive/ Application	Must know	Knows how	Lecturer/ Group discussion	Viva	F & S	II	
CO4	Research Updates: Role of Dinacharya to maintain circadian rhythm Role of therapeutic message for cell rejuevination  Mechanism of satiation and proper quantity of food (Sauhitya Matra)	Cognitive	Nice to know	Knows how	Lecture; Audio-vidual aids	Group discussion	-	II	
<b>Topic-22. Charak Samhita Sutrasthan Chapter-6. Tasyashiteeya Adhyaya-Time</b> (Lecture:- 04 ; Non lecture 04 hours)									
CO2	Discuss the importance of Classification of Samvastara	Cognitive/ Comprehsion	Must know	Knows how	Lecture Audio-Visual aids Group Discussion	Written or Viva	Formative and Summative	II	
CO2	Explain the significance of Visarga Kala	Cognitive/ Comprehsion	Must know	Know how	Lecture Audio-Visual aids Group Discussion	Written or Viva	Formative and Summative	II	

CO2	Explain the significance of Adana kala	Cognitive/ Recall	Must know	Know how	Lecture Audio-Visual aids Group Discussion	Written or Viva	Formative and Summative	II	
CO4	Explain the nature of climate in Shadrutu	Cognitive/ Recall	Must know	Know how	Lecture Audio-Visual aids Group Discussion	Written or Viva	Formative and Summative	II	
CO4	Explain Sevaniya and Nishiddh Ahara Vihara in Shadrutu	Cognitive/ Recall	Must know	Know how	Lecture Audio-Visual aids Group Discussion	Written or Viva	Formative and Summative	II	
CO4	Define and explain the properties of Hamsodaka	Cognitive/ Recall	Must know	Knows	Lecture Audio-Visual aids Group Discussion	Written or Viva	Formative and Summative	II	
CO4	Justify the regimen mentioned as per seasons	Cognitive/ Application	Must know	Show how	Group Discussion	Group Discussion/ Project work/viva	Formative and Summative	II	
CO2	Describe Saatmya and its types	Cognitive/ Recall	Must know	Knows	Lecture Audio-Visual aids Group Discussion	Written or Viva	Formative and Summative	II	
CO2	Recite Shloka number 18, 21, 29, 35, 45, 49, 50	Cognitive/ Recall	Must know	Knows	Swadhyaya -Self learning	Written or Viva	Formative and Summative	II	
CO1	Identify Uddesh- Nirdesh , swasadnya Tantrayukties in this chapter..	Cognitive/ Application	Must know	Knows how	Lecturer/ Group discussion	Viva	F & S	II	

CO4	Research Updates: What causes the season: Summer and winter solistice- Equinoxes- Rotation of earth around sun.	Cognitive/ Applicatio n	Nice to know	Knows	Lecture, Audio- vidual aids	Group discussion	-	II	
<b>Topic-23. Charak Samhita Sutrasthan Chapter-7. Naveganadharaniya Adhyaya-Time (Lecture:- 04 ; Non lecture 04 hours)</b>									
CO4	Enumerate Adharaniya and Dharaniya Vega	Cognitive/ Recall	Must to know	know	lecture/ Group discussion/	Written or Viva	F & S	II	
CO4 CO6	Describe symptoms and treatment pattern of Adharaniya Vega	Cognitive	Must to know	Know how	lecture/ Group discussion /quiz	Written or Viva	F & S	II	
CO4	Cite symptoms and treatment pattern of Dharaniya Vega	Cognitive	Must to know	Know how	lecture/ quiz/Group discussion	Written or Viva	F & S	II	
CO4	Quote the contraindicated actions of mind, speech and body.	Cognitive	Must to know	Know	lecture/ quiz/Group discussion	Written or Viva	F & S	II	
CO4	Describe concept, effects and benefits of exercise	Cognitive	Must to know	Know how	lecture/ recitation/ quiz/Audiov isual aids	Written or Viva	F & S	II	Swasthav ritta
CO4	describe symptoms due to excessive exercise	Cognitive	Must to know	Know	lecture/ Group discussion/ quiz/Audiov isual aids	Written or Viva	F & S	II	Swasthav ritta
CO4	Describe the action which should be avoided in excess	Cognitive	Must to know	Know how	lecture/ Group discussion /quiz	Written or Viva	F & S	II	

CO4	Describe pattern of Ahita Krama tyaga	Cognitive	Must to know	Know how	lecture/ Group discussion/ quiz	Written or Viva	F & S	II	
CO4	Classify deha prakruti	Cognitive	Must to know	Know	lecture/ Group discussion/ quiz	Written or Viva	F & S	II	
CO6	Describe Aagantuj vyadhis (exogenous diseases)	Cognitive	Must to know	Know	lecture/ Group discussion/ quiz	Written or Viva	F & S	II	Nidan
CO6	Describe Pradnyaparadhaj vyadhi	Cognitive	Must to know	Know	lecture/ Group discussion/ quiz	Written or Viva	F & S	II	Nidan
CO4	State Vikar Anutpatti Vidhi (Preventive measures of diseases)	Cognitive	Must to know	Know how	lecture/ Group discussion/ quiz	Written or Viva	F & S	II	
CO6	describe treatment of Aagantuj (exogenous) and Manas (psychological)diseases	Cognitive	Must to know	Know how	lecture/ Group discussion/ quiz	Written or Viva	F & S	II	
CO4	Describe shodhan treatment as per season	Cognitive	Must to know	Know how	lecture/ Group discussion/ quiz	Written or Viva	F & S	II	Panchkar ma
CO4	Describe Aapta and anapta purush	Cognitive	Must to know	Know	lecture/ Group discussion/ quiz	Written or Viva	F & S	II	
CO4	Describe the rules of eating curd	Cognitive	Must to know	Know how	lecture/ Group	Written or Viva	F & S	II	

					discussion/ quiz				
CO2	Recite shloka number 27, 28, 29, 30, 31, 39, 40, 55, 60.	Cognitive	Must to know	Know how	lecture/ Group discussion/ quiz	Written or Viva	F & S	II	
CO1	Identify Arthapatti , Nirvachan, Vyakhyan Tantrayukties in this chapter.	Cognitive/ Applicatio n	Must know	Knows how	Lecturer/ Group discussion	Viva	F & S	II	
CO4	Research Updates: Corelation of genomic variation with the classification of Prakriti	Cognitive/ Recall	Desire to know	Know	lecture/ Audio- vidual aids	Group discussion	-	II	

**Topic-24. Charak Samhita Sutrasthan Chapter-8. Indriyopakramaniya Adhyaya- Time (Lecture:- 04 ; Non lecture 03 hours)**

CO2	Enumerate Indriya/ Dravya/Adhishthana/ Artha/ Buddhi	Cognitive/ Recall	Must know	Know	Lectures/ Audio- Visual Aids	Written or Viva	Formative & Summative	II	
CO4	Write the characteristics of Mana	Cognitive/ Recall	Must know	Know	Lectures/ Audio- Visual Aids	Written or Viva	Formative & Summative	II	
CO4	Justify the ektvam of Manas	Cognitive/ Comprehe nsion	Must know	Know	Lectures/ Audio- Visual Aids	Written or Viva	Formative & Summative	II	
CO4	State that Sattvikatva, Rajasatva and Tamasatva of Manas	Cognitive/ Recall	Must know	Know	Lectures/ Audio- Visual Aids	Written or Viva	Formative & Summative	II	
CO4	Tabulate Indriya PanchaPanchaka	Cognitive/ Recall	Must know	Know	Lectures/ Audio- Visual Aids	Written or Viva	Formative & Summative	II	
CO4	Quote Adhyatma Dravya Guna Sangraha	Cognitive/ Recall	Must know	Know	Lectures/ Audio- Visual Aids	Written or Viva	Formative & Summative	II	

CO4	State the predominant Mahabhuta in each Indriya	Cognitive/ Recall	Must know	Know	Lectures/ Audio-Visual Aids	Written or Viva	Formative & Summative	II	
CO4	Know the role of Indriya and Mana in Prakriti and Vikriti	Cognitive/ Recall	Must know	Know	Lectures/ Audio-Visual Aids	Written or Viva	Formative & Summative	II	
CO4	Discuss the Causes and Benefits of Sadvritta Anushthana	Cognitive/ Comprehension	Must know	Know	Lectures/ Audio-Visual Aids	Written or Viva	Formative & Summative	II	
CO4	Elaborate the Do's and Don'ts in Sadvritta	Cognitive/ Recall	Must know	Know	Lectures/ Audio-Visual Aids/ Group Discussion	Written or Viva	Formative & Summative	II	
CO4	Explain Hetuchatushtaya	Cognitive/ Recall	Must know	Know	Lectures/ Audio-Visual Aids	Written or Viva	Formative & Summative	II	
CO4	State the guideline for Anukta Sadvritta	Cognitive/ Recall	Must know	Know	Lectures/ Audio-Visual Aids	Written or Viva	Formative & Summative	II	
CO2	Recite the shloka number 7-13, 34	Cognitive/ Recall	Must know	Shows	Lectures/ Audio-Visual Aids	Written or Viva	Formative & Summative	II	
CO1	Identify Upadesh , Samucchaya, Yog Tantrayukties in this chapter.	Cognitive/ Application	Must know	Knows how	Lecturer/ Group discussion	Viva	Formative & Summative	II	
CO4	Research updates: Mental health and gut microbiota.	Cognitive/ Application	Nice to know	Know	Lectures/ Audio-Visual Aids	Group discussion	-	II	
<b>Topic-2CO Charak Samhita Sutrasthan Chapter-9. Khuddakachatushpada Adhyaya- Time (Lecture:- 03 ; Non lecture 03 hours)</b>									
CO8	Cite Chikitsa Chatushpada (four components of healthcare)	Cognitive	Must know	Know	Lectures/ Audio-Visual Aids	Written or Viva	Formative & Summative	II	

CO8	Define Roga-Arogya (disease-health)	Cognitive/ Recall	Must know	Know	Lectures/ Audio- Visual Aids	Written or Viva	Formative & Summative	II	
CO8	Define Chikitsa (treatment)	Cognitive/ Recall	Must know	Know	Lectures/ Audio- Visual Aids	Written or Viva	Formative & Summative	II	
CO8	List the Qualities of Vaidya (physician)	Cognitive/ Recall	Must know	Know	Lectures/ Audio- Visual Aids	Written or Viva	Formative & Summative	II	
CO8	List the Qualities of Dravya (medicine)	Cognitive/ Recall	Must know	Know	Lectures/ Audio- Visual Aids	Written or Viva	Formative & Summative	II	
CO8	List the Qualities of Paricharaka (nursing staff)	Cognitive/ Recall	Must know	Know	Lectures/ Audio- Visual Aids	Written or Viva	Formative & Summative	II	
CO8	List the Qualities of Aatura (patient)	Cognitive/ Recall	Must know	Know	Lectures/ Audio- Visual Aids	Written or Viva	Formative & Summative	II	
CO8	State the iimportance of Vaidya in the 4 components of healthcare	Cognitive/ Recall	Must know	Know	Lectures/ Audio- Visual Aids	Written or Viva	Formative & Summative	II	
CO8	Write the Complications due to ignorant physician	Cognitive/ Recall	Must know	Know	Lectures/ Audio- Visual Aids	Written or Viva	Formative & Summative	II	
CO8	Describe the Sadvaidya Qualities (good physician)	Cognitive/ Comprehe nsion	Must know	Know	Lectures/ Audio- Visual Aids	Written or Viva	Formative & Summative	II	
CO8	Write the duties of the physician	Cognitive/ Comprehe nsion	Must know	Know	Lectures/ Audio- Visual Aids	Written or Viva	Formative & Summative	II	
CO8	List Four types of Vaidya vritti (attitude of the physician)	Cognitive/ Recall	Must know	Know	Lectures/ Audio- Visual Aids	Written or Viva	Formative & Summative	II	

CO8	Recite the shloka number 3,4,5,18,20,21, 24,25,26	Cognitive/ Recall	Must know	Shows	Lectures/ Audio-Visual Aids	Written or Viva	Formative & Summative	II	
CO8	Discuss the qualities and duties of a good physician	Cognitive/ Application	Must know	Shows how		Written or Viva	Formative	II	
CO1	Identify Uddesh, Nirdeśh, Nidarshan Tantrayukties in this chapter.	Cognitive/ Application	Must know	Knows how	Lecturer/ Group discussion	Viva	F & S	II	
CO8	Research Updates: Medical ethics-principles Soft Skill development for medical students Emotional Intelligence as a crucial component in medical education	Cognitive	Nice to know	Knows	Lecture / Audio-Visual aids	Group discussion	-	II	

**Topic-26. Charak Samhita Sutrasthan Chapter-10. Mahachatushpada Adhyaya- Time (Lecture:- 03 ; Non lecture 03 hours)**

CO6	Substantiation of Chatushpada- bhashajam alam aarogyaayeti (aatreya-kṛta), Bhashaja-abhashajayo tulyatva pratipaadana – (maitreya-kṛta), Its conclusion by Atreya,	Cognitive/ Recall	Desirable to know	Knows	Lecture with substantiation of the point by mentioning contemporary examples	Written & Viva	F & S	II	
CO6	Explain the Cikitsaa sootram- Cikitsaayaam yasolaabhe kaaranam,	Cognitive/ Recall	Desirable to know	Knows	Lecture with substantiation of the point by mentioning	Written or Viva	F & S	II	

					contemporar y examples				
CO6	Asaadhyaroga- cikitsaayaam haani,	Cognitive/ Recall	Desirable to know	Knows	Lecture with substantiatio n of the point by mentioning contemporar y examples	Written or Viva	F & S	II	
CO6	Describe the upamaana pramaana	Cognitive/ Recall	Desirable to know	Knows	Lecture with substantiatio n of the point by mentioning contemporar y examples	Written or Viva	F & S	II	
CO6	Enumerate and analyse the further classification of saadhya-asaadhyata	Cognitive/ Recall	Must know	Knows	Lecture with live demonstrati on in OP	Written or Viva	F & S	II	
CO6	Identify, judge and discuss Sukha-saadhya lakshanam, Krcchra- saadhya lakshanam, Yaapya lakshanam and Pratyaakhyeya lakshanam	Cognitive/ Recall	Must know	Knows how	Lectures and clinical demonstrati on	Viva / written Problem based assessment	F & S	II	
CO6	Apply and interpret the benefit of knowledge of prognosis	Cognitive/ Recall	Must know	Knows	Lectures	Written or Viva	F & S	II	
CO6	Analyse the term mithyaa- buddhi and accept responsibility to not end up as a mithyaa-buddhi at	Cognitive/ Recall	Must know	Knows	Lectures	Written or Viva Discussions	F	II	

	any point of time of the profession								
CO6	Recite Shloka number 14 to 20	Cognitive/ Recall	Must know	Knows	Lecture, swaadhyaya	Viva	F & S	II	
CO1	Identify Nirnaya, Swasdnya, Sanshaya, Ekant Tantrayukties in this chapter.	Cognitive/ Application	Must know	Knows how	Lecturer/ Group discussion	Viva	F & S	II	
<b>Topic-27. Charak Samhita Sutrasthan Chapter-11. Tisraishaniya Adhyaya- Time (Lecture:- 06 ; Non lecture 05 hours)</b>									
CO4	Explain the significance of the three desires for prana (life) and dhana(means of life).	Cognitive/ Recall	Must know	Know how	Lectures/ Audio- Visual Aids	Written & Viva	Formative & Summative	III

CO4	Discuss different opinions on the concept of punarjanma (re-birth)	Cognitive/ Recall	Must know	Know how	Lectures/ Audio- Visual Aids	Written or Viva	Formative & Summative	III	
CO2	Define characteristics of Aapta	Cognitive/ Recall	Must know	Know	Lectures/ Audio- Visual Aids	Written or Viva	Formative & Summative	III	
CO2	Define pratyaksha, anumana and yuktipramana with example	Cognitive/ Recall	Must know	Know how	Lectures/ Audio- Visual Aids	Lectures/ Audio- Visual Aids	Formative & Summative	III	

CO2	Justify punarjanma by using aaptopadesha, pratyaksha, Anumana and yuktipramana	Cognitive/ Application	Must know	Know how	Lectures/ Audio-Visual Aids	Written or Viva	Formative & Summative	III	
CO4	Explain the importance of thrayopasthamba (sub-pillars of life).	Cognitive/ Application	Must know	Know how	Lectures/ Audio-Visual Aids	Written-MCQ/ SAQ/ LAQ & Viva	Formative & Summative	III	
CO4	Discuss the three types of bala (strength) and its importance.	Cognitive/ Application	Must know	Know how	Lectures/ Audio-Visual Aids	Written & Viva	Formative & Summative	III	
CO6	Describe the three causes of disease.	Cognitive/ Application	Must know	Know	Lectures/ Audio-Visual Aids	Written & Viva	Formative & Summative	III	
CO6	Identify the symptoms due to excessive, less and improper use of sense organs	Cognitive/ Recall	Must know	Know	Lectures/ Audio-Visual Aids	Written or Viva	Formative & Summative	III	
CO6	Identify the symptoms due to excessive, less and improper verbal, psychic and physical actions.	Cognitive/ Recall	Must know	Know	Lectures/ Audio-Visual Aids	Written or Viva	Formative & Summative	III	
CO6	Define Prajnaparadha	Cognitive/ Recall	Must know	Know	Lectures/ Audio-Visual Aids	Written or Viva	Formative & Summative	III	

CO6	Identify the signs of excess, less and improper kaala (season)	Cognitive/ Recall	Must know	Know	Lectures/ Audio-Visual Aids	Written or Viva	Formative & Summative	III	
CO6	Define nija, agantu and manasa roga.	Cognitive/ Recall	Must know	Know	Lectures/ Audio-Visual Aids	Written or Viva	Formative & Summative	III	
CO6	Discuss general treatment protocol for manasavyadhi (psychological disorders)	Cognitive/ Comprehension	Must know	Know how	Lectures/ Audio-Visual Aids	Written or Viva	Formative & Summative	III	
CO6	Discuss the three disease pathways	Cognitive/ Comprehension	Must know	Know	Lectures/ Audio-Visual Aids	Written or Viva	Formative & Summative	III	
CO8	Classify the three types of physicians	Cognitive/ Comprehension	Must know	Know	Lectures/ Audio-Visual Aids	Written or Viva	Formative & Summative	III	
CO6	Describe daivavyapashraya, yuktivyapashraya and satvavajayachikitsa	Cognitive/ Comprehension	Must know	Know how	Lectures/ Audio-Visual Aids	Written or Viva	Formative & Summative	III	
CO6	Describe antahaparimarjana, bahiparimarjana, shastrapr anidhanachikitsa.	Cognitive/ Comprehension	Must know	Know how	Lectures/ Audio-Visual Aids	Written or Viva	Formative & Summative	III	

CO2	Discuss importance of ashta trika.	Cognitive/ Application	Must know	Know	Lectures/ Audio-Visual Aids	Written or Viva	Formative & Summative	III	
CO2	Recitation of Shloka number 18,19,20,21,22,23,24, 25, 47.	Skill	Must know	Know	Lectures/ Audio-Visual Aids	Written or Viva	Formative & Summative	III	
CO1	Identify Swasadnyaa, samucchaya , Samshaya, Nirvachan Tantrayukties in this chapter.	Cognitive/ Application	Must know	Knows how	Lecturer/ Group discussion	Viva	F & S	III	

**Topic-28. Charak Samhita Sutrasthan Chapter-12. Vatakalakaliya Adhyaya-Time (Lecture:- 04; Non lecture 05 hours)**

CO4	explore the various properties of vata	Cognitive/ Recall	Must know	Knows how	Lectures/ Audio-Visual Aids	Written or Viva	Formative & Summative	III	
CO4	Discuss the opinions of various aacharyas on different aspects of Vata dosha	Cognitive/ Recall	Must Know	Knows	Lectures/ Audio-Visual Aids	Written or Viva	Formative & Summative	III	
CO4	Explore various factors responsible for aggravation and and pacification of vata dosha	Cognitive/ Recall	Must know	Knows how	Lectures/ Audio-Visual Aids/Group Discussion	Written or Viva	Formative & Summative	III	
CO4	enumerate prakrita and vikrita karma of vata	Cognitive/ Recall	Must know	Knows how	Lectures/ Audio-Visual Aids/ Group Discussion	Written or Viva	Formative & Summative	III	
CO4	Explain the clinical application of Vata Guna	Cognitive/ Recall	Desirable to know	Knows how	Lectures/ Audio-Visual Aids	Written or Viva	Formative & Summative	III	

CO4	Describe the action of normal and aggravated Pitta	Cognitive/Comprehension	Must know	Knows how	Lectures/Audio-Visual Aids	Written or Viva	Formative & Summative	III	
CO4	Describe the action of normal and aggravated Kapha	Cognitive/Comprehension	Must know	Knows how	Lectures/Audio-Visual Aids	Written or Viva	Formative & Summative	III	
CO4	Describe atreya's exploration on Tridosha and its importance	Cognitive/Comprehension	Must know	Knows how	Lectures/Audio-Visual Aids	Written or Viva	Formative & Summative	III	
CO4	Recite the shlokas-8,11,12	Cognitive/Recall	Must know	Shows	Lectures/Audio-Visual Aids	Written or Viva	Formative & Summative	III	
CO1	Identify Padartha, Vyakhyan, Anumat Tantrayukties in this chapter	Cognitive/Application	Must know	Knows how	Lecturer/Group discussion	Viva	Formative & Summative	III	

**Table 4 : Practical/ Activities for AyUG - SA 1**

Term wise distribution of allotted time				
Term	Total teaching (400 hrs)	Lecture (140 hrs)	Non Lecture (260hrs)	
			Samhita Pathan (130 hrs)	Activities- In class/ Hospital (130 hrs)
I	130 hrs.	50 hrs.	50	30
II	140 hrs.	50 hrs.	40	50
III	130 hrs.	40 hrs.	40	50

**Table 5: Non Lecture Activities Course AyUG-SA1**

Non Lecture activities- (Samhita Pathan / In Class Activities &amp; Hospital Based activities)

: 260 hrs

SN	Name of Practical	Term	
1.	Samhita Pathan	I, II, III	Total 130 in all three terms. (Term I-50 hrs; Term II - 40hrs; Term III - 40hrs)
	In Class Activities/ Case Based Activities/ Field Activities		
2.	1. Introduction to Samhita Problem based learning : Application of Tantrayukti for chapter number 1, 2 of Ashtang Hridaya and chapter 1 <sup>st</sup> of charak Samhita.	I	5 hrs.
	Group Activity Interpret Anubandha Chatushtya with examples Interpret Ashta Prashna with example	I	4 hrs
	Ashtang Hriday Samhita - Sutrasthan (1-5Adhyaya)		
3.	AH Su 1. Ayushkamiya Adhyaya Commentary Based activity- Fetch the meaning of important terms on the basis of commentary. (Any 30 important words). Make your own dictionary.	I	3 hrs
4.	AH Su 2. Dinacharya Adhyaya- Survey Activity: Application of concepts-  Dincharya and its application:  Proforma based assessment in healthy volunteers/ patients. Daily routine shall be recorded on the basis of predesigned proforma and then shall discuss.  Communication Skill introduction. Survey Role play.	I	4 hrs

5.	AH Su 3. Rutucarya Adhyaya- Application of concepts- Ritucharya and application -  Proforma based assessment in healthy individuals or patients.	<u>I</u>	4 hrs
6.	AH Su 4. Roganutpadaniya Adhyaya- Case Based Activity/Learning- Assess the sign and symptoms of given case on the basis of learning of Adharaneeya Vegas and find out the probable causative factors on the basis of principles taught.	<u>I</u>	4 hrs
7.	AH Su 5. Dravadravya Vijnaniya Adhyaya Group Activity-(Group presentation)- Utility of Dravyas:- Allocate the Dravadravya Vargas among student groups. Every group will Justify (represent) the practical utility of dravyas allotted to them.	<u>I</u>	4 hrs
8.	6. Annaswaroopo Vijnaneeya Adhyaya- Group presentation- Justify the utility of this chapter in present era- Every group will illustrate the utility of their assigned Aahara Dravya Varga (Discuss practically available dravyas)	<b>II</b>	3 hrs
9.	7. Annaraksha Adhyaya- Discussion- Explore the present dietary habits- Explore the Various diet combinations used in present society (by four family/ Relatives/ neighborhood) on the basis of principles learned for viruddhahar. Discuss them in class.  Trayopastambha -Importance of Nidra- Flipped classroom- Share the prerecorded videos/ other material with students before class. On the basis of these have discussion.	<b>II</b>	4 hrs
10.	8. Matrashitiya Adhyaya- Case Based learning- Determine adverse effects of heena matra	<b>II</b>	4 hrs

	<p>(inadequate quantity of food) and atimatra (excess quantity of food) ahara:- (Video clip of patient suffering from a type of Ajeerna can be shared in class and then group wise discussion on the concept.)</p> <p>Group Activity- Differentiate between the food items recommended and non-recommended for daily use:- Cross refer the previous chapters and demonstrate the rationale behind the wholesome or unwholesome nature of these enlisted Dravyas referring their qualities.</p>		
11.	<p>9. Dravyaadi Vijnaniya Adhyaya- Application of concepts- Enlist the dravyas according to Rasa, Veerya, Vipaka, Prabhav. (Can refer chapter 5,6,10 of Ashtang Hriday and Chapter 2, 3, 4 of Charak Samhita). Apply the concepts learned in present chapter to understand the action of Dravyas.</p>	<b>II</b>	4 hrs
12.	<p>10. Rasabhedhiya Adhyaya- Case based learning- Prepare proforma enlisting the sign and symptoms of excess consumption of six Rasas and regular diet pattern. Assess the predominance of Rasa consumption in patients or healthy volunteers. Then Correlate with the case findings.</p>	<b>II</b>	4 hrs
13.	<p>11. Doshadi Vijnaniya Adhyaya- Case Based learning-(CBL)- Assess the patient for Vriddhi and Kshaya Lakshanas of Dosha-Dhatu-Mala, based on predesigned proforma. Discuss these case findings later in class.</p>	<b>III</b>	5 hrs
14.	<p>12. Doshabhedhiya Adhyaya- Model making Activity- Working models on Dosha Sthanas or Subtypes of Doshas, Chaya, Prakop and Prashama of Doshas: PBL/CBL</p>	<b>III</b>	5 hrs

	Give one problem/case based on Samanya Dosh Nidan. Student will identify possible causative factors responsible for vitiation of Doshas in given problem.		
15.	<p>13. Doshopakramaniya Adhyaya- Case Based learning-(CBL)- Group activity- Observe the signs and symptoms of Ama in any five patients (Group wise) and present and discuss it in class.</p> <p>Seminar Presentation-</p> <ol style="list-style-type: none"> <li>Understand Aushadha Kaal in relation with suntypes of Vata Dosha.</li> <li>Recognize the principles applicable during treatment of Saam Dosha and Dushyas.</li> </ol>	<b>III</b>	6 hrs
16.	<p>14. Dvividhopakramaniya Adhyaya-</p> <p>Case based learning- Find out the causative factors of Atishualya in present era (On the basis of predesigned proforma) CBL Share video clip of any patient suffering from Atikarshya- On the basis of previous learning discuss the contributing factors responsible for malnourishment. (Explore Dhatu Sneha Parampara in present context).</p>	<b>III</b>	5 hrs
17.	<p>15. Shodhanadigana Sangraha Adhyaya- Group Presentation- Divide the various Aushadha Vargas among students and a group will represent each varga and related practical information.</p>	<b>III</b>	4 hrs
	Charak Samhita – Sutrasthan (1-12 Adhyaya )		
18.	<p>CS Su 1. Deerghanjiviteeya Adhyaya-</p> <p>Compilation work: (based on commentry)</p> <ul style="list-style-type: none"> <li>Student has to write 20 terminologies with meanings referring Chakrapani commentary. Then after these terms shall be discussed in class.</li> </ul>	<b>I</b>	2

19.	CS Su 2. Apamarga Tanduliya Adhyaya- Visit to Dravyaguna Department- Identify the dravyas on the basis of different karmas	<b>II</b>	3 hrs
20.	CS Su 3. Aragvadhiya Adhyaya- Group Discussion- Probable mode of action of drugs applied externally? In which form they will more absorbable? (May take help of published literature; discuss linking with Ayurveda fundamentals.)  Practical demonstrations in Panchakarma unit on patients.  Workshop/ demonstration of preparation of different lepas useful in different conditions.	<b>II</b>	3 hrs
21.	CS Su 4. Shadvirechana-shatahritiya Adhyaya- Practical Demonstration: Visit to Dravyaguna Department and demonstration of various Mahakashay and its uses (Integration with Dravyaguna department)	<b>II</b>	4 hrs
22.	CS Su 5. Matrashiteeya Adhyaya- Visit to Panchakarma Unit of Hospital – Demonstration of abhyanga, mardana,udvartana and other procedures to be followed in daily routine (Integration with Panchakarma Department)  Group Project :  Gather information about nutritive values of Nitya Sevaniya Dravyas. Assess their classical properties. Discuss why these dravyas are specially advised for regular consumption.	<b>II</b>	5 hrs
23.	CS Su 6. Tasyashiteeya Adhyaya- Documentation- Festival and rutu- Documenting the changes in the food habits and	<b>II</b>	4 hrs

	<p>lifestyle as per the rutu with the parents and elders and also discussing on relevance of rutucharya concept with Indian festivals.</p> <p>Short Essay writing /Poster making- Does and don'ts to be followed according to various seasons ( Refer both the Samhitas for this activity)</p>		
24.	<p>CS Su 7. Naveganadharaniya Adhyaya:-</p> <p>Vedio clip making Activity- Educating people about harms of vega dharana by social media campaigns</p> <p>Group Discussion- Finding reasons for vega dharana in present day lifestyle.</p>	<b>II</b>	4 hrs
25.	<p>CS Su 8. Indriyopakramaniya Adhyaya- Group Presentation- Sadvrutta – Interpreting relevance of different sadvrutta in present scenario. Developing new sadvruttas as per today's lifestyle referring classics.</p>	<b>II</b>	3 hrs
26.	<p>CS Su 9. Khuddakachatushpada Adhyaya- Doctor Patient communication introduction, Role play. Feedback collection of chikitsa chatushpada Group activity- Collect Feedback on qualities of Vaidya from rogi and upasthata. Collect Feedback on qualities of rogi from vaidya and upasthatha Collect Feedback on qualities of upasthatha from rogi and Vaidya Collect feedback on qualities of dravya from the experts of dravyaguna and rasa shastra</p>	<b>II</b>	3 hrs
27.	<p>CS Su 10. Mahachatushpada Adhyaya- Developing proforma for sadhya asadhya vyadhi lakshanas-</p>	<b>II</b>	3 hrs

	Guide students on how to prepare a proforma to assess any available parameters.		
28.	CS Su 11. Tisraishaniya Adhyaya- Debate :- Punarjanma siddhant as per different thoughts. Debate on punarjanma with different references as per classics and contemporary understanding.	<b>III</b>	5 hrs
29.	CS Su 12. Vatakalakaliya Adhyaya- Role Play (Enact sambhasha parishad) – Distribute the characters of the rishis given in chapter. And guide them with the script. Arrange a forum where these students will be doing sambhasha parishad on vata kala-akala.  Decode the sutras- Students in groups will use different tools like infographics/ animation/ ppts to illustrate the normal functions of Vata Dosha explained in present chapter. (Refer Chakrapani commentary thoroughly to understand the meaning of Sanskrit shlokas). Introduction to Group Dynamics. Communication skills for Group Discussions.	<b>III</b>	5 hrs
30.	Shloka Recitation Competition- At the end of the year/ every term such competition shall organized by department.	<b>III</b>	5 hrs
31.	Ayurveda Quiz- On the basis of assigned syllabus.	<b>III</b>	5 hrs
32.	Poster making Competition / SA writing completion / Making video clips for general people to make awareness about Ayurved living.	<b>III</b>	5 hrs

**Table 6: Assessment Summary****6 A - Number of Papers and Marks Distribution**

## Preamble

The primary purpose for teaching Rachana sharir to undergraduate students is to provide a thorough understanding of the basic principles of Sharir. Gross and microscopic structure and development of the human body in perspective of ancient and modern sciences, as well as to acquire necessary skills. Sharir in Ayurveda also provides in depth views to concepts like Marma and srotas.

Learning of Sharir is most useful in further years in diagnosis and management of the diseases.

Various teaching and learning methods, including didactic, demonstration, tutorial, group discussion, seminars, Integrated Teaching (IT), Problem Based Learning (PBL), and Early Clinical Exposure (ECE), Case-Based Learning (CBL), Virtual Dissection, and cadaveric dissection, are used to transfer knowledge to students, and the syllabus is constructed accordingly. As a result, the students appreciate being a part of the teaching and learning process. This will help the students to become competent, self-assured, caring, and concerned humans capable of providing ethical medical treatment.

CO1	Explain the terms Kandara, Kurcha, Mamsa, Rajju, Sevani, Jala, Seemant, Asthi Sanghat in context to its enumeration, site and structure.	Cognitive / comprehension	MK	Knows	Lecture/ Demonstration	Written/ viva-voce/ Open book test	F&S	I	
CO1	Evaluate the clinical importance of Kandara, Kurcha, Mamsa, Rajju, Sevani, Jala Seemant, Asthi and Sanghat	Cognitive/ Application	DK	Knows how	Lecture/ Demonstration/ SDL	Written/ viva-voce	S	I	
<b>Topic 3- Garbha Sharir</b> [Time: Lecture: 17 hours, non-lecture 05 hours]									
CO 2	Define Garbha and recall the related verse from samhitas.	Cognitive / knowledge	MK	Knows	Lecture/ Recitation	Written/ viva-voce	F & S	I	-
CO 2	Explain the concept of Shukra and recall the related verse from samhitas.	Cognitive / comprehension	MK	Knows	Lecture/ Recitation	Written/ viva-voce	F & S	I	-
CO 2	Explain the concept of Artava and recall the related verse from samhitas.	Cognitive / comprehension	MK	Knows	Lecture/ recitation	Written/ viva-voce	F & S	I	-
CO 2	Describe the role of tridosha and panchamahabhuta in the fetal development	Cognitive / comprehension	MK	Knows how	Lecture/ IT	Written/ viva-voce	F & S	I	Dept. of Streerog Prasuti tantra
CO 2	Explain the concept of Beeja, Beejbhaag, Beejabhagavayava	Cognitive / Comprehension	MK	Knows	Lecture/ GD/ TT	Written/ viva-voce	F & S	I	Dept. of Streerog Prasuti tantra

CO 2	Describe Masanumasik Garbha vriddhi kram and recall the related verse from samhitas.	Cognitive / comprehension	MK	Knows how	Lecture/ Recitation/ demonstration with 3D animated video	Written/ viva-voce/ Open book test	F & S	I	-
CO 2	Describe Garbhaposhana	Cognitive / comprehension	MK	Knows how	Lecture	Written/ viva-voce/ Open book test	F & S	I	-
CO 2	Describe the formation of Apra according to Ayurved	Cognitive / knowledge	MK	Knows, Knows how	Lecture/ demonstration with 3D animated video	Written/ viva-voce/ Open book test	F & S	I	-
CO 2	Describe Garbha nabhinadi	Cognitive / knowledge	MK	Knows	Lecture	Written/ viva-voce	F & S	I	-
CO 2	Explain Angapratyanga utpatti with the related verse from samhitas.	Cognitive / comprehension	MK	Knows how	Lecture/ demonstration with 3D animated video/	Written/ viva-voce/ Assignments/ Open book test	F & S	I	Dept. of Streerog Prasuti tantra
<b>Topic 4- Asthi Shaarira</b> [Time: Lecture: 02 hours, non-lecture 01 hours]									
CO1	Enlist the number of Asthi according to different Acharyas	Cognitive/ Recall	MK	Knows how	Lecture	Written / viva-voce/ Open book test	F & S	I	
CO1	Describe the Asthi Sanghata and Asthi Simanta	Cognitive/ comprehension	MK	Knows	Lecture/ Demonstration	Written / viva-voce	F & S	I	
<b>Topic 5- Sandhi Sharir</b> [Time: Lecture: 02 hours, non-lecture 03 hours]									
CO 3	Define the term Sandhi	Cognitive – Recall	MK	Knows	Lecture	Written/ viva-voce	F&S	II	
CO 3	Classify Sandhi into different types.	Cognitive – Recall	MK	Knows	Lecture	Written/ viva-voce/ project work	F&S	II	
CO 3	Demonstrate the movements of Chala Sandhi and	Cognitive – Application	MK	shows	Lecture +	Written/ viva-voce	F&S	II	

	comprehend the structural appearance	Psychomotor			Demonstration thorough model/ simulation				
CO 3	Illustrate the applied aspect of Sandhi and introduction of diseases of Sandhi explained in Ayurveda	Cognitive - Application	DK	Knows how	Lecture/ ECE/ SDL/ Seminar	Written/ viva-voce/ Assignment	F&S	II	Kayachi kitsa
<b>Topic 6- Snayu Sharir</b> [Time: Lecture: 02 hours, non-lecture 01 hours]									
CO 6	Describe Snayu with respect to its definition, structure, types, number, importance with its clinical importance	Cognitive/ comprehension	MK	Knows how	Lecture with demonstration/ SDL/Seminar	Written/ Viva -voce/ Open book test	F&S	II	
<b>Topic 7- Peshi Sharir</b> [Time: Lecture: 02 hours, non-lecture 01 hours]									
CO 5	Describe Peshi Sharir and its classification as per Ayurveda	Cognitive – comprehension	MK	Knows	Lecture/ Demonstration/ SDL/ Seminar	Written/ Viva-voce/ Open book test	F&S	II	
<b>Topic 8- Kesha, Danta, Nakha Sharir</b> [Time: Lecture: 02 hours, non-lecture 01 hours]									
CO 6	Describe Panchabhautik Swaroop, Swabhav (Pitruja) with its applied value in Prakriti and also explain related diseases with importance of examination kesha, danta, nakha as diagnostic tool	Cognitive/ comprehension	MK	Knows how	Lecture with demonstration with 3D animated video/ SDL	Written/ Viva -voce/ Open book test/ Assignment	F&S	II	
<b>Topic 9- Embryology</b> [Time: Lecture: 07 hours, non-lecture 02 hours]									
CO 2	Define embryology and enlist its branches	Cognitive / knowledge / recall	DK	Knows	Lecture	Written/ viva-voce	F & S	I	
CO 2	Define Embryo and Foetus	Cognitive / knowledge / recall	MK	Knows	Lecture	Written/ viva-voce	F & S	I	

CO 2	Describe the anatomical structure of Sperm and Ovum and explain its clinical importance	Cognitive / comprehension	MK	Knows how	Lecture/ Demonstration	Written/ viva-voce/ Assignment	F & S	I	
CO 2	Define term of fertilization	Cognitive / knowledge / recall	MK	Knows	Lecture/ Seminar	Written/ viva-voce	F & S	I	
CO 2	Describe the process of cleavage	Cognitive / comprehension	MK	Knows how	Lecture/ Educational 3D Animated videos	Written/ viva-voce	F & S	I	--
CO 2	Explain the process of germ layer formation and its derivatives	Cognitive / comprehension	MK	Knows how	Lecture/ Educational 3D Animated videos	Written/ viva-voce	F & S	I	Dept. of Streerog Prasuti tantra
CO 2	Explain the laws of heredity	Cognitive / comprehension	MK	Knows how	Lecture/ Seminar	Written/ viva-voce	F & S	I	Dept. of Streerog Prasuti tantra
CO 2	Describe the process of sex determination and differentiation	Cognitive / comprehension	NK	Knows how	Lecture/ Seminar	Written/ viva-voce	F & S	I	--
CO 2	Explain the month wise development of Foetus	Cognitive / comprehension	MK	Knows how	Lecture/ Demonstration	Written/ viva-voce/ Open book test/ Project work	F & S	I	Dept. of Streerog Prasuti ta
CO 2	Explain foetal circulation and the changes in the circulation after birth	Cognitive / comprehension	MK	Knows how	Lecture/Demonstration	Written/ viva-voce	F & S	I	--
CO 2	Describe Placenta formation & its structure with applied anatomy	Cognitive / application	MK	Knows how	Lecture/ Seminar/ ECE	Written/ viva-voce	F & S	I	Dept. of Streerog Prasuti tantra
CO 2	Describe Umbilical cord with clinical importance	Cognitive / knowledge / application	MK	Knows how	Lecture/ Seminar/ ECE	Written/ viva-voce	F & S	I	Dept. of Streerog Prasuti tantra

<b>Topic 10- Osteology</b> [Time: Lecture: 09 hours, non-lecture 06 hours] Practical- 20 hours									
CO3	Explain skeleton and its importance	Cognitive/ comprehension	MK	knows	Lecture/ Demonstration/ Seminar	Written / viva-voce	F & S	I	
CO3	Describe the uses of bones	Cognitive/ comprehension	MK	Knows	Lecture	Written / viva-voce	F & S	I	
CO3	Describe and demonstrate the processes and depressions of various bones	Cognitive/ comprehension, Application	MK	Show how	Lecture / Demonstration	Written / viva-voce	F & S	I	
CO3	Describe the characteristics of the bones	Cognitive/ comprehension	MK	Knows	Lecture	Written / viva-voce	F & S	I	
CO3	Describe the development and ossification of bones	Cognitive/ comprehension	DK	Knows how	Lecture	Written / viva-voce	F & S	I	
CO3	Describe and demonstrate Cranial bones and its applied anatomy	Cognitive / comprehension, Application	MK	Shows how	Lecture/ Demonstration	Written / viva-voce	F & S	I	
CO3	Describe and demonstrate Facial bones and its applied anatomy	Cognitive / comprehension, Application	DK	Shows how	Lecture/ Demonstration	Written / viva-voce	F & S	I	
CO3	Describe and demonstrate pelvic bones and its applied anatomy	Cognitive / comprehension, Application	MK	Shows how	Lecture/ Demonstration	Written / viva-voce	F & S	I	
CO3	Describe and demonstrate vertebral column and its applied anatomy	Cognitive / comprehension, Application	MK	Shows	Lecture/ Demonstration	Written / viva-voce	F & S	I	
CO3	Describe and demonstrate thorax bones and its applied anatomy	Cognitive / comprehension	MK	Shows how	Lecture/ Demonstration	Written / viva-voce	F & S	I	

		on, Application							
CO3	Describe & demonstrate Clavicle and Scapula and its applied anatomy	Cognitive / comprehension, Application	MK	Shows how	Lecture/ Demonstration	Written / viva-voce	F & S	I	Kayachikitsa
CO3	Describe Phalanges, Carpal and Tarsal Bones and its applied anatomy	Cognitive / comprehension	DK	Knows	Lecture/ Demonstration	Written/ viva-voce	F & S	I	
CO3	Describe & demonstrate bones of the upper & lower extremity and its applied anatomy	Cognitive / comprehension, Application	MK	Shows how	Lecture/ Demonstration	Written / viva-voce/ Project work	F & S	I	
CO3	Describe & demonstrate Patella and its applied anatomy	Cognitive / comprehension, Application	DK	Shows	Lecture/ Demonstration	Written / viva-voce	F & S	I	
CO10	Recognize and describe the Radiological structures in radiograph	Cognitive / comprehension, Application	MK	Shows	Lecture/ Demonstration/ PBL/ ECE/ SDL	Written / viva-voce/ Project work/ Assignment	F & S	I	
<b>Topic 11- Arthrology</b> [Time: Lecture: 10 hours, non-lecture 06 hours] Practical- 8 hours									
CO 3	Recall the classification of Joints	Cognitive – Recall	MK	Knows	Lecture	Written/ viva-voce	F&S	II	
CO 3	Demonstrate movements of Synovial Joints and comprehend the structural aspect helping in movements.	Cognitive – Application Psychomotor	MK	Knows how	Lecture/ Demonstration/ Simulation	Written/ viva-voce	F&S	II	
CO 3	Describe constitutional anatomy of joint	Cognitive – Comprehension	MK	Knows	Lecture	Written/ viva-voce	F&S	II	
CO 3	Describe joints of upper limb and lower limb region, TM joint, and its related applied aspect	Cognitive – Application	MK	Knows how	Lecture/ PBL/ ECE	Written/ viva-voce/ Open book test/ Assignment	F&S	II	Kayachikitsa

CO 3	Demonstrate the examination of synovial joints	Psychomotor	MK	Knows + Shows	Demonstration with case presentation in relative aspect/ ECE/ SDL/ 3D Animated videos	Written/ viva-voce/ Practical performance	F&S	II	Rognidan
<b>Topic 12- Myology</b> [Time: Lecture: 06 hours, non-lecture 02 hours] Practical- 8 hours									
CO5	State the types of muscles.	Cognitive – application Psychomotor	MK	Knows	Lecture	Written/ Viva-voce	F & S	II	
CO5	Describe and demonstrate the muscles of upper and lower extremity with their origin, insertion, action & nerve supply and applied aspect and its role in Yogasana	Cognitive – application	MK	Shows	Lecture/ Demonstration/ GD/TT/ SDL/ 3D Animated videos	Written/ Viva-voce/ Open book test/ Project work	F & S	II	Swasthvritta
CO5	Describe and demonstrate muscles of thorax and abdomen with their origin, insertion, action & nerve supply and applied aspect and its role in Yogasana	Psychomotor	MK	Shows	Lecture/ Demonstration/ GD/TT/ SDL/ 3D Animated videos	Written/ Viva-voce/ Open book test/ Project work	F & S	II	Swasthvritta
CO5	Describe and demonstrate muscles of back with origin, insertion, action & nerve supply and applied aspect and role in Yogasana	Cognitive – application	DK	Shows	Lecture/ Demonstration/ GD/TT/ SDL/3D Animated videos	Written/ Viva-voce/ Open book test/ Project work	F & S	II	Swasthvritta
<b>Topic 13- Nervous System</b> [Time: Lecture: 14 hours, non-lecture 04 hours] Practical- 12 hours									
CO6	Explain the hierarchy of structural unit	Cognitive-/ comprehension	MK	Knows	Lecture/ Demonstration	Written/ viva-voce	F&S	III	
CO6	Describe the functional and structural division of the nervous system	Cognitive- comprehension	MK	Knows how	Lecture/ Seminar	Written/ viva-voce	F&S	III	

CO6	Explain the parts of Brain (Cerebrum, Cerebellum)	Cognitive – comprehension	MK	Knows, Knows how	Lecture/ Demonstration	Written/ viva-voce/ Open book test	F&S	III	
CO6	Describe external and internal features of Spinal cord.	Cognitive – comprehension	MK	Knows, Knows how	Lecture/ Demonstration/ 3D animated videos	Written/ viva-voce/ Open book test	F&S	III	
CO6	Illustrate the Blood supply of Brain and Spinal cord.	Cognitive – comprehension	MK	Knows, Knows how	Lecture/ Demonstration/ 3D animated videos	Written/ viva-voce/ Open book test	F&S	III	
CO6	Describe the external features of diencephalon Mid brain, Pons, Medulla oblongata.	Cognitive-Comprehension	DK	Knows	Lecture/ Demonstration/ 3D animated videos	Written/ viva-voce/ Open book test	F&S	III	
CO6	Describe the limbic system	Cognitive-Comprehension	NK	Knows	Lecture/ Demonstration/ 3D animated videos	Written/ viva-voce/ Open book test	F&S	III	
CO6	Describe the general Sulci and gyri of cerebrum and determine the clinical importance of Broadman's classification	Cognitive – application	MK	Knows Knows how	Lecture/ Demonstration/ 3D animated videos	Written/ viva-voce/ Open book test	F&S	III	
CO6	Describe the ascending, descending pathways, upper motor neurons and lower motor neurons, its applied aspect in examination of nervous system	Cognitive/ application Affective /responding	DK	Knows how	Lecture/ Demonstration/ CBL, ECE	Written/ viva-voce/ Open book test	F&S	III	Kaya chikitsa
CO6	Demonstrate the superficial and deep reflexes and its clinical importance	Cognitive /application Psychomotor /perception Affective /responding	DK	shows	Lecture + Demonstration though living object/ ECE/ PBL/ SDL/ CBL	Viva-Voce/ Practical performance	F&S	III	Kayachi kitsa

CO6	Recall the general anatomical consideration of ANS	Cognitive/ Recall	MK	Knows	Lecture/ SDL	Written	F&S	III	
CO6	Describe the cranial and spinal nerves along with formation of nerve plexuses and applied anatomy	Cognitive / Application	DK	Knows how	Lecture/ PBL/ ECE/ SDL	Written / viva-voce/ Assignment	F & S	III	
CO6	Describe the Formation and circulation of cerebro- spinal fluid	Cognitive/ comprehension	MK	Knows how	Lecture	Written / viva-voce	F&S	III	
<b>Topic 14- Endocrinology</b> [Time: Lecture: 08 hours, non-lecture 03 hours] Practical- 02 hours									
CO 6	Define Endocrine Glands and enlist them	Cognitive/ Recall	MK	Knows	Lecture	Written / viva-voce	F & S	III	
CO 6	Describe Structure and Functions of Endocrine Glands	Cognitive-/ Comprehension	MK	Knows	Lecture	Written / viva-voce	F & S	III	
CO 6	State the location, Dimension & Shape of Pituitary	Cognitive/ Recall	MK	Knows	Lecture/ Demonstration	Written / viva-voce	F & S	III	
CO 6	Describe the Parts & subdivisions of Pituitary	Cognitive / comprehension	MK	Knows	Lecture/ Demonstration	Written / viva-voce	F & S	III	
CO 6	Describe the Blood Supply, Nerve Supply & Lymphatic drainage of Pituitary	Cognitive /comprehension	MK	Knows	Lecture/ Demonstration/ CBL	Written / viva-voce	F & S	III	
CO 6	Enlist the hormones secreted by Pituitary, & histology and discuss its clinical anatomy.	Cognitive/ Application	MK	Knows	Lecture/ Demonstration/ GD	Written / viva-voce/ Open book test	F & S	III	
CO 6	State the location, Dimension & Shape of Thyroid gland	Cognitive/Recall	MK	Knows	Lecture/ Demonstration	Written / viva-voce	F & S	III	
CO 6	Describe the lobes, border & surfaces of Thyroid gland with its relation.	Cognitive /comprehension	MK	Knows	Lecture/ Demonstration	Written / viva-voce	F & S	III	
CO 6	Describe the blood supply, nerve Supply & lymphatic drainage of Thyroid gland	Cognitive /comprehension	MK	Knows	Lecture/ Demonstration	Written / viva-voce	F & S	III	

CO 6	List the Hormones secreted by Thyroid gland and & histology, and discuss its clinical application	Cognitive - Application	MK	Knows	Lecture/ GD/ CBL	Written / viva-voce/ Open book test	F & S	III	
CO 6	Describe the location, Shape, Dimensions and structure of Parathyroid gland	Cognitive /comprehension	MK	Knows	Lecture/ Demonstration	Written / viva-voce	F & S	III	
CO 6	Describe the Blood Supply, Nerve Supply & Lymphatic drainage of Parathyroid gland	Cognitive /comprehension	DK	Knows	Lecture Demonstration	Written / viva-voce	F & S	III	
CO 6	List the hormones secreted by parathyroid, & histology and discuss its Clinical anatomy	Cognitive /Application	DK	Knows	Lecture/ GD/ CBL	Written / viva-voce/ Open book test	F & S	III	Kayachik itsa
CO 6	State the location, Shape & dimension of Suprarenal gland	Cognitive / Recall	MK	Knows	Lecture/ Demonstration	Written / viva-voce	F & S	III	
CO 6	Describe the Surface, Borders of Suprarenal gland along with its relation.	Cognitive/comprehension	MK	Knows	Lecture/ Demonstration	Written / viva-voce	F & S	III	
CO 6	List the Functions and Secretions of Suprarenal gland	Cognitive /Recall	MK	Knows	Lecture	Written / viva-voce	F & S	III	Sharir Kriya
CO 6	Describe the Blood Supply, Nerve Supply & Lymphatic drainage of Suprarenal gland	Cognitive /comprehension	DK	Knows	Lecture/ Demonstration	Written / viva-voce	F & S	III	
CO 6	Describe the Internal structure of suprarenal gland	Cognitive /comprehension	DK	Knows	Lecture/ Demonstration	Written / viva-voce	F & S	III	
CO 6	Write the Clinical & applied anatomy & histology of Suprarenal gland	Cognitive /application	DK	Knows	Lecture/ CBL	Written / viva-voce/ Open book test	F & S	III	Kayachik itsa

**Topic 7- Lymphatic System** [Time: Lecture: 02 hours, non-lecture 02 hours]

CO 6	Define Lymphatic System	Cognitive / Recall	MK	Knows	Lecture	Written / viva-voce	F & S	III	
CO 6	Describe components of Lymphatic System	Cognitive / comprehension	MK	Knows	Lecture	Written / viva-voce	F & S	III	
CO 6	Describe the anatomical structure of Various Lymph Vessels i.e. Lymphatic Trunks, Thoracic Duct etc and explain its clinical importance	Cognitive / comprehension, Application	MK	Knows how	Lecture/ Demonstration/ CBL	Written / viva-voce	F & S	III	
CO 6	Describe the anatomical structure of Lymph Glands i.e. Lymph Nodes, Spleen, Thymus, Tonsils etc and explain its clinical importance	Cognitive / comprehension, Application	MK	Knows how	Lecture/ Demonstration/ ECE/ CBL	Written / viva-voce/ Open book test	F & S	III	Rognidan Evum Vikriti Vigyan

## Paper II

### Topic 1- Praman sharir [Time: Lecture: 02 hours, non-lecture 01 hours]

CO1	Describe Anguli and Anjali praman with its significance.	Cognitive Comprehension	MK	Knows	Lecture/ Demonstration/ GD	Written/ Viva-voce/ Open book test	F & S	II	
-----	--	-------------------------	----	-------	----------------------------	------------------------------------	-------	----	--

### Topic 2- Koshtha Evam Ashaya Shaarira [Time: Lecture: 02 hours, non-lecture 01 hours]

CO1	Define of Koshtha and Ashaya	Cognitive/ knowledge	MK	Knows	Lecture	Written/ viva-voce/ Open book test	F&S	I	
CO1	Describe the concept of various numbers of Koshthanga as per Samhitas	Cognitive/ Comprehension	MK	Knows	Lecture	Written/ viva-voce/ Open book test	F&S	I	
CO1	Describe the concept of various Numbers of Ashaya as per Samhitas	Cognitive/ Comprehension	MK	Knows	Lecture/ TT/ GD	Written/ viva-voce/	F&S	I	

						Open book test			
CO1	Describe and explain applied aspects of Koshtha and Ashaya.	Cognitive/ Comprehensiv e application	NK	Knows How	Lecture/ GD/ ECE	Written/ viva-voce/ Assignments/ Open book test	F&S	I	Kayacki tsa
<b>Topic 3- Sira sharir</b> [Time: Lecture: 03 hours, non-lecture 01 hours]									
CO 4	Define Sira, Enumerate the sira & state its Nirukti	Cognitive /Recall	MK	Knows	Lecture/ Seminar	Written / viva-voce/ Open book test	F & S	II	
CO 4	Explain the classification of Sira	Cognitive / Comprehension	MK	Knows how	Lecture	Written / viva-voce/ Open book test	F & S	II	
CO 4	Define Vedhya Sira and Enumerate Vedhya Sira	Cognitive /Recall	MK	Knows	Lecture/ GD	viva-voce/ Open book test	F & S	II	
CO 4	Define Avedhya sira and Enumerate the Avedhya Sira	Cognitive / Recall	MK	Knows	Lecture	Written / viva-voce/ Open book test	F & S	II	
CO 4	Locate the Vedhya Sira in the body according to region	Cognitive / application Psychomotor	MK	Shows	Lecture/ Demonstration/ IT	viva-voce/ Practical performance	F & S	II	Shalyatan tra
CO 4	Describe the applied aspect of Siravedha	Cognitive - application	DK	Knows how	Lecture/ ECE/ IT/ CBL	Written / viva-voce/ Assignment / Open book test	F & S	II	Shalyatan tra
<b>Topic 4- Dhamani Sharir</b> [Time: Lecture: 02 hours, non-lecture 01 hours]									
CO 4	Define Dhamani, and state its Nirukti	Cognitive/ Recall	MK	Knows	Lecture/ Seminar	Written / viva-voce/ Open book test	F & S	II	

CO 4	Explain the classification of Dhamani	Cognitive/Comprehension	MK	Knows how	Lecture/ Seminar	Written / viva-voce/ Open book test	F & S	II	
CO 4	Locate the Dhamani in the body according to region	Cognitive / application Psychomotor	DK	Shows	Lecture/ Demonstration	Viva-voce/ Practical performance	F & S	II	
<b>Topic 5- Srotasa Sharir</b> [Time: Lecture: 08 hours, non-lecture 03 hours]									
CO 4	Define Srotasa and state its Nirukti and types	Cognitive/ Recall	MK	Knows	Lecture/ Seminar	Written / viva-voce/ Open book test	F & S	II	
CO 4	Explain the Classification of Srotasa	Cognitive / Comprehension	MK	Knows	Lecture/ Seminar	Written / viva-voce/ Open book test	F & S	II	
CO 4	State the Moolsthana of all Srotasa as per Acharya Sushrut and Charak and its clinical aspect	Cognitive / Recall	MK	Knows how	Lecture/ Seminar/ ECE	Written / viva-voce/ Assignment/ Open book test	F & S	II	Kayachikitsa/ Panchakarma
<b>Topic 6- Kala Sharir</b> [Time: Lecture:02 hours, non-lecture 02 hours] Practical- 03 hours									
CO1	Define Kala and explain the formation & functions of seven Kala	Cognitive –/ comprehension	MK	Knows	Lecture/ Seminar	Written / viva-voce/ Open book test	F&S	III	
CO1	Describe Saptakalas with its applied aspect	Cognitive /comprehension +application	MK	Knows	Lecture/ demonstration/ ECE	Written / viva-voce/ Open book test	F&S	III	Agadantara
CO1	Relate the Sapta Kala with Sapta Dhatu	Cognitive – application + affective - awareness	NK	Knows how	Lecture/ Seminar/ IT	Written / viva-voce	F&S	III	
<b>Topic 7- Indriya Sharir</b> [Time: Lecture: 03 hours, non-lecture 01 hours]									

CO 7	Define Indriya. Interpret derivation of Indriya and explain its importance.	Cognitive / comprehension	MK	Knows	Lecture/ Seminar	Written / viva-voce/ Open book test	F & S	III	
CO 7	State the meaning of Indriya- artha and Indriya- adhishtan	Cognitive / knowledge	MK	Knows	Lecture/ Seminar	Written / viva-voce/ Open book test	F & S	III	
CO 7	Enlist Dnyanendriyas, Karmendriyas and Ubhayendriya	Cognitive / knowledge	MK	Knows	Lecture/ Seminar	Written / viva-voce/ Open book test	F & S	III	
CO 7	Illustrate classical description of Dnyanendriya Adhishtan – Karna, Twak, Netra, Jivha, Nasa with its clinical perspective	Cognitive / application	MK	Knows how	Lecture/ IT/ ECE/ PBL	Written / viva-voce/ Open book test/ Assignment	F & S	III	Dept. of Shalakyatantra
<b>Topic 8- Twacha Sharir</b> [Time: Lecture: 02 hours, non-lecture 02 hours]									
CO 7	Define Twacha, its types and characteristics with its clinical importance, significance of twacha adhishtana in disease manifestation, its relation with dhatu	Cognitive / comprehension	MK	Knows how	Lecture with demonstration with 3D animated video/ ECE/ SDL	Written/ Viva -voce/ Open book test	F&S	III	
<b>Topic 9- Marma Sharir</b> [Time: Lecture: 13 hours, non-lecture 04 hours] Practical- 12 hours									
CO 5	Define Marma and enumerate the Marmas	Cognitive – Recall	MK	Knows	Lecture/ Seminar	Written / viva-voce/ Open book test	F&S	II	
CO 5	Describe the Marma and Prana tatva with its Significance	Cognitive – Comprehension	MK	Knows	Lecture	Written / viva-voce/ Open book test	F&S	II	

CO 5	Discuss the classification of Marma	Cognitive – Comprehension	MK	Knows	Lecture/ ECE/ PBL	Written / viva-voce/ Open book test	F&S	II	
CO 5	Narrate the importance of marma in Sharir and Shalya vigyan	Cognitive – application	MK	Knows how	Lecture/ ECE/ PBL	Written/ Open book test	F&S	II	Shalyat antra
CO 5	Illustrate the specific location of Marma as per Sushruta Samhita	Cognitive – Comprehension	MK	Knows + Shows	Lecture/ Demonstration/ Workshop	Written / viva-voce/ Open book test	F&S	II	
CO 5	Demonstrate the Marma location as per modern anatomy	Cognitive – Application Psychomotor	MK	Knows + Shows	Lecture with 3D animated demonstration/ Seminar/ Workshop	Viva-voce/ Practical performance	F&S	II	Panchakarma
<b>Topic 10- Respiratory system</b> [Time: Lecture: 06 hours, non-lecture 04 hours] Practical- 10 hours									
CO6	Enlist the parts of the Bronchial tree	Cognitive / Recall	MK	Knows	Lecture/ Demonstration	Written / viva-voce	F & S	II	
CO6	State the location and dimension of Lungs	Cognitive - Knowledge	MK	Knows	Lecture/ Demonstration	Written / viva-voce	F & S	II	
CO6	Differentiate between Right and left Lungs	Cognitive -/ comprehension	MK	Knows	Lecture/ Demonstration	Written / viva-voce	F & S	II	
CO6	Describe the Borders, Surfaces and lobes of the Lungs	Cognitive/ comprehension	MK	Knows	Lecture/ Demonstration	Written / viva-voce/ Open book test	F & S	II	
CO6	Explain the root of Lungs	Cognitive /comprehension	MK	Knows	Lecture/ Demonstration	Written / viva-voce	F & S	II	
CO6	Explain the Bronchopulmonary segments of the lungs	Cognitive /comprehension	DK	Knows	Lecture/ Demonstration	Written / viva-voce	F & S	II	
CO6	Describe the Blood supply, Nerve supply, Lymphatics of the Lungs	Cognitive /comprehension	MK	Knows	Lecture/ Demonstration	Written / viva-voce	F & S	II	

CO6	Describe histology and Clinical Anatomy of Lungs	Cognitive / application	MK	Knows how	Lecture/ ECE/ PBL	Written / viva-voce/ Assignment	F & S	II	Kaychik ita
CO6	State the extent and features of Trachea	Cognitive / Recall	MK	Knows	Lecture/ Demonstration	Written / viva-voce	F & S	II	
CO6	Explain the Relations of Trachea	Cognitive – /comprehension	MK	Knows how	Lecture/ Demonstration	Written / viva-voce/ Open book test	F & S	II	
CO6	Describe the Blood supply, Nerve supply and Lymphatics of Trachea	Cognitive /comprehension	MK	Knows how	Lecture/ Demonstration	Written / viva-voce	F & S	II	
CO6	Explain the histology and Clinical anatomy of Trachea	Cognitive /Application	MK	Knows how	Lecture/ ECE/ PBL	Written / viva-voce/ Assignment	F & S	II	Shalaky atantra
CO6	State the extent of Larynx and its external features	Cognitive / Recall	MK	Knows	Lecture/ Demonstration	Written / viva-voce	F & S	II	
CO6	Enlist the paired and unpaired cartilages of Larynx	Cognitive / Recall	MK	Knows	Lecture/ Demonstration	Written / viva-voce	F & S	II	
CO6	Explain the relations of Larynx	Cognitive /comprehension	DK	Knows how	Lecture/ Demonstration	Written / viva-voce/ Open book test	F & S	II	
CO6	Write the blood supply, nerve supply and lymphatics of Larynx	Cognitive /comprehension	DK	Knows	Lecture/ Demonstration	Written / viva-voce	F & S	II	
CO6	Explain the histology and clinical anatomy of Larynx	Cognitive / application	DK	Knows how	Lecture/ Demonstration	Written / viva-voce/ Assignment	F & S	II	
CO6	State the location of Pleura and enlist its parts	Cognitive/ Recall	MK	Knows	Lecture/ Demonstration	Written / viva-voce	F & S	II	
CO6	Describe the parts of parietal Pleura	Cognitive/ comprehension	MK	Knows	Lecture/ Demonstration	Written / viva-voce	F & S	II	
CO6	Explain the Pulmonary ligaments and recesses of Pleura	Cognitive /comprehension	MK	Knows	Lecture/ Demonstration	Written / viva-voce/	F & S	II	

						Open book test			
CO6	Describe the blood supply, nerve supply, lymphatics of Pleura	Cognitive /comprehension	DK	Knows how	Lecture	Written / viva-voce	F & S	II	
CO6	Explain the clinical anatomy of Pleura	Cognitive – Application	DK	Knows how	Lecture/ ECE/ PBL	Written / viva-voce/ Assignment	F & S	II	Kayachikitsa
<b>Topic 11- Digestive system</b> [Time: Lecture: 10 hours, non-lecture 06 hours] Practical- 22 hours									
CO 6	Describe peritoneum and nine parts of abdomen	Cognitive – application	MK	Knows	Lecture/ Demonstration	Written/ Viva-voce/ Open book test/ Assignment	F & S	I	
CO 6	Describe the anatomy of the Oesophagus with relations, histology and clinical anatomy	Cognitive – application	MK	Knows	Lecture/ Demonstration	Written/ Viva-voce/ Open book test/ Assignment	F & S	I	
CO 6	Describe the structure of the Stomach, Stomach bed, the interior, histology, blood supply with relations and clinical anatomy	Cognitive – application	MK	Knows	Lecture/ Demonstration/ PBL/ ECE/ IT	Written/ Viva-voce/ Open book test/ Assignment	F & S	I	
CO 6	Describe the structure of the Duodenum with relations, histology and clinical anatomy.	Cognitive – application	MK	Knows	Lecture/ Demonstration/ ECE/ PBL/ IT	Written/ Viva-voce/ Open book test/ Assignment	F & S	I	
CO 6	Describe the parts, structure, histology and clinical anatomy of Large intestine.	Cognitive – application	MK	Knows how	Lecture/ Demonstration	Written/ Viva-voce/ Open book test/ Assignment	F & S	I	
CO 6	Describe the anatomy of the Rectum, Peritoneal &	Cognitive – application	MK	Knows how	Lecture/	Written/	F & S	I	

	visceral relations and applied anatomy of the Rectum.				Demonstration/ ECE/ PBL/ IT	Viva-voce/ Open book test/ Assignment			
CO 6	Describe the anatomy and musculature of the anal canal, histology with its blood supply, venous drainage and applied anatomy	Cognitive – application	MK	Knows how	Lecture/ Demonstration	Written/ Viva-voce/ Open book test/ Assignment	F & S	I	
CO 6	Describe the structure of the Pancreas, Pancreatic ducts, applied anatomy, along with histology of endocrine & exocrine part.	Cognitive – application	MK	Knows how	Lecture/ Demonstration/ ECE/ PBL/ IT	Written/ Viva-voce/ Open book test/ Assignment	F & S	I	
CO 6	Describe external features, anatomy histology and clinical anatomy of Liver	Cognitive – application	MK	Knows how	Lecture/ Demonstration/ ECE/ PBL/ IT	Written/ Viva-voce/ Open book test/ Assignment	F & S	I	
CO 6	Describe the structure, peritoneal & visceral relations histology and applied anatomy of the Spleen.	Cognitive – application	MK	Knows how	Lecture/ Demonstration/ ECE/ PBL/ IT	Written/ Viva-voce/ Open book test/ Assignment	F & S	I	
CO 6	Enlist the salivary glands and describe the anatomy of Parotid gland, Submandibular gland and Sublingual gland with its & Clinical anatomy	Cognitive – application	DK	Knows how	Lecture/ Demonstration	Written/ Viva-voce/ Open book test/ Assignment	F & S	I	
<b>Topic 12- Cardiovascular System</b> [Time: Lecture: 08 hours, non-lecture 03 hours]									
CO 6	Describe pericardium with its clinical anatomy	Cognitive – application	MK	Knows how	Lecture/ Demonstration	Written/ Viva-voce	F & S	II	
CO 6	Describe external features of the Heart.	Cognitive – recall	MK	Knows	Lecture/ Demonstration	Written/	F & S	II	

						Viva-voce/ Open book test/ Assignment			
CO 6	Describe internal features of the chambers, valve and auscultatory areas of Heart and its applied anatomy	Cognitive – application	MK	Knows how	Lecture/ Demonstration/ ECE/ PBL/ IT	Written/ Viva-voce/ Open book test/ Assignment	F & S	II	
CO 6	Describe the major arteries and veins of Heart.	Cognitive – Recall	MK	Knows	Lecture/ Demonstration	Written/ Viva-voce	F & S	II	
CO 6	Describe the histology and applied anatomy of Heart.	Cognitive – application	MK	Knows how	Lecture/ Demonstration/ ECE/ PBL/ IT	Written/ Viva-voce/ Open book test/ Assignment	F & S	II	
<b>Topic 13- Urinary System</b> [Time: Lecture: 08 hours, non-lecture 03 hours] Practical- 04 hours									
CO 6	Enlist the components of Urinary System	Cognitive / Recall	MK	Knows	Lecture	Written / viva-voce	F & S	II	
CO 6	Describe the anatomical structure of Kidney, Ureter, Urinary bladder, Urethra	Cognitive / Comprehension	MK	Knows	Lecture/ Demonstration	Written / viva-voce/ Open book test/ Assignment	F & S	II	Kayachik itsa /Panchkar ma/Shala ya-Tantra
CO 6	Explain histology and clinical anatomy of Kidney, Ureter, Urinary bladder, Urethra and its importance	Cognitive / Comprehension & Application	MK	Knows how	Lecture/ Demonstration/ ECE/ PBL/ IT	Written / viva-voce/ Open book test/ Assignment	F & S	II	
CO 6	Enlist developmental anomalies of Kidney, Ureter, Urinary bladder, Urethra	Cognitive / Recall	NK	Knows	Lecture	Written / viva-voce/ Open book test/ Assignment	F & S	II	
<b>Topic 14- Reproductive System</b> [Time: Lecture: 07 hours, non-lecture 03 hours] Practical-02 hour									

CO 6	Enlist the anatomical structures of male reproductive system and discuss its Ayurved Sharir	Cognitive / Comprehension	MK	knows how	Lecture	Written / viva-voce/ Open book test	F & S	III	
CO 6	Describe the male reproductive organs – Testes, Scrotum, Epididymis, Ductus deference, Ejaculatory duct, penis, Spermatic cord with histology and applied aspect	Cognitive / application	MK	knows how	Lecture	Written / viva-voce/ Open book test	F & S	III	
CO 6	Enlist the anatomical structures of female reproductive system and discuss its Ayurved Sharir.	Cognitive / Comprehension	MK	knows how	Lecture/ Seminar	Written / viva-voce/ Open book test	F & S	III	
CO 6	Describe external female reproductive organs	Cognitive / Comprehension	MK	knows	Lecture/ Seminar	Written / viva-voce	F & S	III	
CO 6	Explain Internal reproductive organs in detail with histology and its applied anatomy (Uterus, Fallopian tube, Cervix, Vagina, Ovary)	Cognitive / application	MK	knows how	Lecture/ ECE/ PBL/ IT	Written / viva-voce/ Open book test/ Assignment	F & S	III	
CO 6	Explain histology of Uterus, Fallopian tube, Cervix, Vagina, Ovary	Cognitive / application	DK	knows how	Lecture/ Demonstration	Written / viva-voce/ Open book test/ Assignment	F & S	III	
<b>Topic 15- Sensory organ</b> [Time: Lecture: 14 hours, non-lecture 05 hours]									
CO7	Explain five sensory receptors, hierarchy of development of five senses and need of five senses	Cognitive - comprehension	MK	Knows how	Lecture with 3D animated demonstration	Written / viva-voce/ Open book test/ Assignment	F&S	III	
CO7	Describe structural aspect of five sensory organ	Cognitive – comprehension	MK	Knows	Lecture	Written / viva-voce/ Open book	F&S	III	

						test/ Assignment			
CO7	Describe the pathways of each sense in understanding of its functional anatomy	Cognitive - comprehension	NK	Knows how	Lecture with 3D animated demonstration/ ECE/ PBL/ IT	Written / viva-voce/ Open book test/ Assignment	F&S	III	
CO7	Determine Method of examination, tool of examination and Importance of sensory organ in systemic examination	Cognitive - comprehension + Psychomotor	DK	Knows + Shows	Lecture with practical demonstration of tools/ ECE/ PBL/ IT	Written / viva-voce/ Open book test/ Assignment	F&S	III	Shalaky dept. Kaya chikitsa dept

**\*MK-Must Know, DK- Desirable to Know, NK- Nice to Know, TT- Tutorial, GD- Group Discussion, PBL- Problem Based Learning, IT- Integrated Teaching, ECE- Early Clinical Exposure, SDL- Self Directed Learning, CBL- Case Base Learning (P)- Practical**

## List of Practicals AyUG-RS

Marks: 200

Hours: 240

SN	Name of Practical	Term	Hours
P1	<ul style="list-style-type: none"><li>• Branches of anatomy. History of Anatomy</li><li>• Ethics in dissection hall</li></ul>	I	2
P2	<u>Anatomical Terminologies</u> Anatomical position, Planes, and explanation of anatomical terms related to skin, fasciae, bones, joints and their movements, muscles, ligaments, tendons, blood vessels, nerves.	I	4
P3	Preservation methods of the cadaver, Mrut sharir Samshodhan <ul style="list-style-type: none"><li>• Different methods of preservation techniques.</li></ul> Brief introduction of chemical composition of preservative fluid.	I	2
P4	Introduction of Anatomy Act and Brief detailing about Bio medical waste management act 1960	I	2
P5	Shava vichhedana – detailed dissection of the whole body <ul style="list-style-type: none"><li>• Line of incision</li><li>• Dissection technique</li><li>• Identification of different tools and its Uses</li><li>• Identification and characteristics of Different layers and its relation</li></ul>	I	32
	<u>In Extremities:</u> Dissection of extremities & Identification of related structures	II	40
	<u>In Trunk region:</u> Demonstration of visceral relation of thoracic, abdominal and pelvic organ	II	38
	<u>In Head Region:</u> Dissection of head, Identification of Meninges, Major Sulci and gyri, Superficial origin of Cranial Nerve and venous Sinus.	III	14
	Dissection of sensory organs	III	22
P6	<ul style="list-style-type: none"><li>• Practical study of vital organs, Histological slides</li><li>• Identification of external features of thoracic, abdominal and pelvic viscera</li></ul>	II	06
P7	Practical study of bones	I	36

	Identification of external features of bones and different attachment		
	<p>Surface and Radiological anatomy</p> <p><b><u>In Radiology Anatomy:</u></b> Characteristics of radio imaging film and detailing about its color contrasting</p> <p>Identification of Normal alignment of bodily structure – X ray film</p> <ol style="list-style-type: none"> <li>Chest X Ray – A.P And P.A view</li> <li>Detailing of A.P view of Shoulder joint, Elbow Joint, Wrist joint, Hip joint, knee joint, Ankle joint.</li> <li>Identification of basic clinical finding through X ray film related to long bones and joints</li> </ol>	III	22
P8	<p><b><u>In Surface Anatomy Section:</u></b></p> <ul style="list-style-type: none"> <li>Identification of Underlying viscera of Nine region based upon Cadaveric and Living Anatomy</li> <li>Surface marking of thoracic, abdominal and pelvic viscera</li> </ul>	III	6
P9	<p>Practical study of Marma</p> <p>Surface markings of all Marma points and its anatomical demarcation.</p>	III	12
P10	<p>Brief detailing about body donation, organ donation and its awareness (Communication skills)</p>	III	2

**\*Note: one practical should not be less than 2 hrs.**

**Table 4: Learning objectives (Practical) of AyUG- RS**

<b>A4 Course outcome</b>	<b>B4 Learning Objective  (At the end of the session, the students should be able to)</b>	<b>C4 Domain/s ub</b>	<b>D4 Must to know/ desirabl e to know/N ice to know</b>	<b>E4 Level Does/ Shows how/ Knows how/ Know</b>	<b>F4 T-L method</b>	<b>G4 Assessment</b>	<b>H4 Form ative /sum mative</b>	<b>I4 Te rm</b>	<b>J4 Integration</b>
<b>Practical 1- Definition and branches of anatomy. History of Anatomy</b> [Time: Practical or other activity - 02 hours]									
<b>CO1</b>	Define and describe branches of anatomy and its history	Cognitive / knowledge / recall	MK	Know	Lecture/ Tutorial	Written +viva-voce	F&S	I	
<b>CO9</b>	Practice of ethics in the context of human dissection	Cognitive / knowledge / recall/ Affective/ psychomotor	MK	Knows Shows	Tutorial/ Demonstration	viva-voce	F&S	I	
<b>Practical 2- Anatomical Terminologies</b> [Time: Practical- 2 hours and other activity 2 hours]									
<b>CO1</b>	Demonstrate anatomical position, Planes, and explanation of anatomical terms related to skin, fasciae, bones, joints and their movements, muscles, ligaments, tendons, blood vessels, nerves.	Cognitive / knowledge / recall	MK	Knows	Tutorial/ Demonstration/ Simulation	Written +viva-voce/ Open book test/ Assignments	F&S	I	

<b>Practical 3- Preservation methods of the cadaver, Mrut sharir Samshodhan</b> [Time: Practical or other activity - 02 hours]									
CO9	Describe and demonstrate preservation methods of the cadaver and Mrut sharir Samshodhan	Cognitive / knowledge / recall	MK	Knows, Shows	Tutorial/ Demonstration	Written +viva-voce	F&S	I	
CO9	Describe the different methods of preservation techniques and give brief introduction of chemical composition of preservative fluid.	Cognitive / knowledge / recall	MK	Knows	Tutorial/ Demonstration	Written +viva-voce, spotting, OSPE	F&S	I	
<b>Practical 4- Introduction of Anatomy Act and Brief detailing about Bio medical waste management act 1960</b> [Time: Practical or other activity - 02 hours]									
CO9	Describe and follow the Anatomy Act and Bio medical waste management act 1960	Cognitive - comprehension, Affective/ psychomotor	NK	Knows, know how, Shows	Lecture/ Tutorial/ Demonstration	Written +viva-voce/ Practical performance/ Public awareness	F&S	I	
<b>Practical 5- Shava vichhedana – detailed dissection of the whole body</b> [Time: Practical- 126 hours and other activity 20 hours]									
CO9	Demonstrate the line of incision, dissection technique, different tools and their uses	Cognitive / knowledge / recall	MK	Knows/ Shows/ Shows How	Tutorial/ Demonstration / Cadaveric dissection	Written +viva-voce, spotting, OSPE	F&S	I	
CO9	Identify and characteristics of Different layers and its relation	Cognitive / knowledge / recall	DK	Knows	Tutorial/ Demonstration / Simulations /	Written +viva-voce, spotting, OSPE	F&S	I	

					Cadaveric dissection				
CO9	Identify and demonstrate muscles of extremities and its related structures	Cognitive / knowledge / recall	DK	Knows, Shows	Tutorial/ Demonstration / Cadaveric dissection	Written +viva-voce	F&S	II	
CO6	Describe and demonstrate the visceral relation of thoracic and abdominal organ	Cognitive - comprehension + psychomotor	DK	Knows, Shows	Demonstration / Simulations / Cadaveric dissection	Written +viva-voce, spotting, OSPE/ Practical performance	F&S	II	
CO6	Describe and demonstrate surface identification of parts of brain, major sulci and gyri, superficial origin of cranial nerve and meninges and venous sinus.	Cognitive - comprehension + psychomotor	MK	Knows, Shows	Demonstration / Simulations/ Cadaveric dissection	Written +viva-voce, spotting, OSPE/ Practical performance	F&S	III	
CO6	Describe, dissect and demonstrate the sensory organs	Cognitive - comprehension + psychomotor	MK	Knows, Shows	Demonstration / Simulations/ Cadaveric dissection	Written +viva-voce, spotting, OSPE/ Practical performance	F&S	III	
<b>Practical 6- Practical study of vital organs, Histological slides and identification of external features of thoracic and abdominal viscera</b>									
[Time: Practical- 04 hours and other activity 02 hours]									
CO6	Focus the histological slides of identified organs	Cognitive / knowledge / recall	DK	Knows	Tutorial/ Demonstration	Written +viva-voce spotting, OSPE	F&S	II	
CO6	Describe and demonstrate the	Cognitive - comprehension +	MK	Knows Shows	Demonstration	Written +viva-voce, spotting,	F&S	II	

	external features of thoracic and abdominal viscera	psychomotor				OSPE/ Practical performance			
<b>Practical 7- Practical study of bones</b> [Time: Practical- 30 hours or other activity 06 hours]									
CO3	Describe and demonstrate external features of bones and muscle attachments	Cognitive - comprehension + psychomotor	MK	Knows, Shows	Demonstration / Simulations	Written +viva-voce, spotting, OSPE/ Practical performance	F&S	I	
CO10	Describe the characteristics of radio imaging film and difference in color contrasting	Cognitive / knowledge / recall	DK	Knows	Tutorial/ Demonstration / Simulations	Written +viva-voce spotting, OSPE	F&S	I	
<b>Practical 8- Surface and Radiological anatomy</b> [Time: Practical- 20 hours and other activity 08 hours]									
CO10	Describe and demonstrate the normal alignment of chest X Ray – A.P And P.A view	Cognitive - comprehension + psychomotor	MK	Knows, Shows	Tutorial/ Demonstration	Written +viva-voce, spotting, OSPE/ Practical performance	F&S	III	
CO10	Describe and demonstrate the normal alignment of A.P view of Shoulder joint, Elbow Joint, Wrist joint, Hip joint, knee joint, Ankle joint	Cognitive - comprehension + psychomotor	MK	Knows, Shows	Tutorial/ Demonstration	Written +viva-voce, spotting, OSPE/ Practical performance	F&S	III	
CO10	Identify the basic clinical finding through X ray film	Cognitive - comprehension +	NK	Knows, Shows	Tutorial/ Demonstration	Written +viva-voce, spotting, OSPE/	F&S	III	Kaychikitas, Shalyatantra

	related to long bones and joints	Psychomot or				Practical performance			
CO8	Describe and demonstrate underlying viscera of Nine region based upon cadaveric and Living Anatomy	Cognitive - comprehension + psychomot or	DK	Knows, Shows	Tutorial/ Demonstration	Written +viva-voce, spotting, OSPE/ Practical performance	F&S	III	
CO8	Describe and demonstrate surface marking of thoracic and abdominal viscera	Cognitive - comprehension + psychomot or	DK	Knows, Shows	Tutorial/ Demonstration	Written +viva-voce, spotting, OSPE/ Practical performance	F&S	III	
<b>Practical 9- Practical study of Marma</b> [Time: Practical or other activity - 12 hours]									
CO5, CO8	Describe and demonstrate surface markings of Marma points and its anatomical demarcation of all Marma as per Shadang sharir	Cognitive - comprehension + psychomot or	MK	Knows + Shows	Tutorial/ Demonstration / Cadaveric dissection	Written +viva-voce, spotting, OSPE/ Practical performance	F&S	III	Panchakarma
<b>Practical 10- Body donation, organ donation and its awareness</b> [Time: Practical or other activity - 02 hours]									
CO9	Describe body donation and organ donation process with respect to specific organ and its awareness Demonstrate process of communication	Affective/ psychomot or	DK	Knows, know how, Shows	Tutorial/ Demonstration	Written +viva-voce/ Public awareness/ social work	F&S	III	Shalyatantra and Shalakyatantra
		Psychomot oe	MK		Role Play			III	

	process in awareness speech or counselling for Body donation.

**Table 5: Non-Lecture Activities Course AyUG-RS**

1	List non lecture Teaching-Learning methods	No of Activities (Values in hours)
a	Seminar / Workshop	14
b	Tutorial (TT) / Group Discussion (GD)	14
c	Problem based learning (PBL)	8
d	Integrated teaching (IT)	8
e	Early Clinical Exposure (ECE)/ Case Base Learning (CBL)	18
f	Self-Directed Learning (SDL) / Summary writing	12
g	Field visit	6
		<b>80</b>
2	<b>Practical (refer Table 4)</b>	<b>240</b>
	<b>Total</b>	<b>320</b>

**Other Educational Activities(Additional):**

- Field visit (community/anatomy museum) - II & III term
- Practical journal – II & III term
- Summary/ Essay writing (Research papers/Samhitas literature review)- II or III term

**Table 6: Assessment Summary****6 A - Number of Papers and Marks Distribution**

S.No.	Subject Code	Papers	Theory	Practical/Clinical Assessment					Grand Total
				Practical/ Clinical	Viva	Electives	IA	Sub Total	
1.	AyUG-RS	2	200	100	70	-	30	200	400

**6 B - Scheme of Assessment (formative and Summative) AyUG-RS**

SR.NO.	PROFESSIONAL COURSE	DURATION OF PROFESSIONAL COURSE		
		First Term (1-6 Months)	Second Term (7-12 Months)	Third Term (13-18 Months)
1	First	3 PA & First TT	3 PA & Second TT	3 PA & UE

PA: Periodical Assessment; TT: Term Test; UE: University Examinations

### 6 C - Calculation Method for Internal assessment Marks (30 Marks) AyUG-RS

TERM	PERIODICAL ASSESSMENT*					TERM TEST**	TERM ASSESSMENT	
	A	B	C	D	E	F	G	H
	1 (15 Marks)	2 (15 Marks)	3 (15 Marks)	Average (A+B+C/3)	Converted to 30 Marks (D/15*30)	Term Test (Marks converted to 30)	Sub Total _/60 Marks	Term Assessment (..../30)
FIRST							E+F	(E+F)/2
SECOND							E+F	(E+F)/2
THIRD						NIL		E
<b>Final IA</b>	Average of Three Term Assessment Marks as Shown in 'H' Column.							
	Maximum Marks in Parentheses *Select an Evaluation Method which is appropriate for the objectives of Topics from the Table 6 D for Periodic assessment. Conduct 15 marks assessment and enter marks in A, B, and C. ** Conduct Theory (100 Marks) [MCQ (20*1 Marks), SAQ (8*5), LAQ (4*10)] and Practical (100 Marks) Then convert to 30 marks.							

### 6 D - Evaluation Methods for Periodical Assessment

S. No.	Evaluation Methods for Periodical Assessment
1.	Practical / Clinical Performance
2.	Viva Voce, MCQs, MEQ (Modified Essay Questions/Structured Questions)
3.	Open Book Test (Problem Based)
4.	Summary Writing (Research Papers/ Samhitas)
5.	Class Presentations; Work Book Maintenance
6.	Problem Based Assignment
7.	Objective Structured Clinical Examination (OSCE), Objective Structured Practical Examination (OPSE), Mini Clinical Evaluation Exercise (Mini-CEX), Direct Observation of Procedures (DOP), Case Based Discussion (CBD)
8.	Extra-curricular Activities, (Social Work, Public Awareness, Surveillance Activities, Sports or Other Activities which may be decided by the department).
9.	Small Project
10.	Other activities explained in Table 3 Column G3 as per indicated term and objective of the topic.

## 6 E - Paper Layout

### I PROFESSIONAL BAMS EXAMINATIONS

#### AyUG-RS

##### PAPER-1

Time: 3 Hours      Maximum Marks: 100

INSTRUCTIONS: All questions compulsory

TOTAL MARKS 100

		Number of Questions	Marks per question	Total Marks
Q 1	Multiple Choice Questions (MCQ)	20	1	20
Q 2	Short answer questions (SAQ)	8	5	40
Q 3	Long answer questions (LAQ)	4	10	40
				100

**6 F – I - Distribution of Theory exam AyUG- RS**

	Paper I	A List of Topics	B Term	C Marks	D Type of Questions “Yes” can be asked. “No” should not be asked.		
					MCQ (1 Mark)	SAQ (5 Marks)	LAQ (10 Marks)
1		Sharitropkramaniya Shaarira	I	Refer Next table	Yes	Yes	No
2		Paribhasha Shaarira	I		Yes	Yes	No
3.		Garbha Shaarira	I		Yes	Yes	Yes
4.		Asthi Shaarira	I		Yes	Yes	Yes
5.		Sandhi Shaarira	II		Yes	Yes	Yes
6.		Snayu sharir	II		Yes	Yes	No
7.		Peshi Shaarira	II		Yes	Yes	No
8.		Kesha, Danta, Nakha Sharir	II		Yes	Yes	No
9		Embryology	I		Yes	Yes	Yes
10		Osteology	I		Yes	Yes	Yes
11		Arthrology.	II		Yes	Yes	Yes
12		Myology	II		Yes	Yes	No
13		Nervous System.	III		Yes	Yes	Yes
14		Endocrinology	III		Yes	Yes	Yes
15		Lymphatic system	III		Yes	No	Yes

	Paper II	A List of Topics	B Term	C Marks	D Type of Questions “Yes” can be asked. “No” should not be asked.		
					MCQ (1 Mark)	SAQ (5 Marks)	LAQ (10 Marks)
1		Pramana Shaarira:	II	Refer Next Table	Yes	No	No
2		Koshtha Evam Ashaya Shaarira	I		Yes	Yes	Yes
3.		Sira Sharir	II		Yes	Yes	Yes
4.		Dhamani Sharir	II		Yes	Yes	Yes
5.		Strotas Shaarira	II		Yes	Yes	Yes
6.		Kalaa Shaarira	III		Yes	Yes	Yes
7.		Indriya Shaarira	III		Yes	Yes	Yes
8.		Twacha Sharir	III		Yes	Yes	Yes
9		Marma Shaarira	II		Yes	Yes	Yes
10		Respiratory System	II		Yes	Yes	Yes

11	Digestive system	I		Yes	Yes	Yes
12	Cardiovascular system	II		Yes	Yes	Yes
13	Urinary System	II		Yes	Yes	Yes
14	Reproductive system	III		Yes	Yes	Yes
15	Sensory organs	III		Yes	Yes	Yes

## 6 F – II - Theme table

### Paper-I:

Theme*	Topics	Term	Marks	MCQ	SAQ	LAQ
a	1) Shariropakramaniya 2) Paribhasha Sharir	I	10	YES	YES	NO
b	3) Garbha Sharir 9) Embryology	I	20	YES	YES	YES
c	4) Asthi Sharir 10) Osteology	I	16	YES	YES	YES
d	8) Kesh, Dant, Nakha Sharir 7) Peshi Sharir 12) Myology	II	11	YES	YES	NO
e	5) Sandhi Sharir 6) Shayu Sharir 11) Arthrology	II	17	YES	YES	YES
f	13) Nervous System	III	14	YES	YES	YES
g	14) Endocrinology 15) Lymphatic	III	12	YES	YES	YES

\*Theme: is group of similar topics in Ayurved Sharir and Anatomy. Used in 6G question paper blue print

### Paper-II

Theme	Topics	Term	Marks	MCQ	SAQ	LAQ
a	2) Koshta Evam Ashay Sharir 11) Digestive system	I	16	YES	YES	YES
b	1) Praman Sharir 9) Marma Sharir	II	17	YES	YES	YES
c	3) Sira Sharir 4) Dhamani Sharir 5) Strotas Sharir 12) Cardiovascular System	II	21	YES	YES	YES
d	10) Respiratory System	II	10	YES	YES	YES
e	13) Urinary System	II	10	YES	YES	YES
f	14) Reproductive System	III	6	YES	YES	NO
g	6) Kala Shair 7) Indriya Sharir 8) Twacha Sharir 15) Sensory organs	III	20	YES	YES	YES

## 6 G Question paper Blue print for AyU-RS:

### PAPER-I

## 6 H - I - Distribution of Practical Exam

Practical 100 Marks + (Viva 70 + IA 30) Marks

SN	Heads	Marks
1	Spotting (Refer Table 6 H II below)	20
3	Kostha Ashay Sharir, Dissected organs and histology slides	20
4	Ashti, Sandhi, Peshi, Bones and Joints,	20
5	Marma Sharir, Surface & Radiological anatomy	20
6	Practical record (15 Marks) and Communication Skill (5 Marks)	20
7	Viva-Voce (Objective Structured) (Refer table 6 H – III)	70
8	Internal assessment	30
	<b>Total Marks</b>	<b>200</b>

### 6 H - II Practical Spot examination Questions – (20 marks)

SN	Question	Mark allotment
<b>Topic- Garbha/Sira/Kala</b>		
1	Identify the structure & give the Drushtant/ Metaphor related with it. e.g.- Gunja Phala- Artava, Spatik-Shukra, etc	Identification- 1 Drushtant- 1
<b>Topic- Marma</b>		
1	Identify the Marma & write its type as per Parinama & Rachana	Identification- 1 Type-1
2	Identify the Marma & write its Pariman & any two anatomical structures related to the Marma	Identification- 0.5 Pariman – 0.5 Anatomical structure - 1
3	Identify the Marma & write its applied aspect	Identification- 1 Viddha-1
<b>Topic- Bones, Muscles</b>		
1	Identify the bone & write its peculiarities (Any 2) e.g.- Atlas vertebra	Identification- 0.5 Peculiarities- 1.5
2	Identify the indicated part on the bone & write its attachment (Any 2) e.g., Scapula spine	Identification- 1 Attachment- 1
3	Identify the side of the given bone & write side determination points	Side identification- 0.5 Points- 1.5
4	Identify the side of the given bone & write its applied anatomy (Any 2 points)	Identification-1 Applied -1
5	Write the type of the given bone as per Ayurved & Modern science e.g., Tibia- Nalakasthi, long bone	Ayu. Type- 1 Modern type- 1
6	Identify the indicated muscle on the bone & write whether it originates or inserts there	Muscle identification- 1 Origin/insertion- 1
7	Identify the indicated muscle & write its action (Any 2)	Identification- 1 Action-1
8	Identify the indicated muscle & write its blood supply/nerve supply	Identification-1

		Supply-1
9	Identify the indicated muscle & write its applied anatomy	Identification-1 Applied -1
10	Identify the bone and write any two processes	Identification-1 Processes -1
11	Identify the bone and write any two angles	Identification-1 Angle -1
12	Identify the bone and write any one peculiarity related to gender e.g., Hip bone, Clavicle, Sacrum	Identification-1 Peculiarities- 1
<b>Topic- Joints</b>		
1	Identify the joint & write its ligaments (Any 3)	Identification- 0.5 Ligaments- 1.5
2	Identify the joint & write names of actions occurring there (Any 3)	Identification- 0.5 Actions- 1.5
3	Identify the joint & write the type of joint as per Ayurved & Modern science	Identification- 1 Ayu. Type- 0.5 Modern type- 0.5
4	Identify the joint & write its clinical anatomy (Any two)	Identification- 1 Clinical anatomy-1
5	Identify the joint & write its relation (Any two)	Identification- 1 Relation -1
6	Identify the joint & write the movements along with the muscle	Identification- 1 Movement -0.5 Muscle – 0.5
<b>Topic- Organs</b>		
1	Identify the organ & write name of the Srotas related to it	Identification- 1 Srotas-1
2	Identify the organ & write name of the kala related to it	Identification- 1 Kala-1
3	Identify the organ & write its Utpatti as per Ayurved	Identification- 1 Utpatti-1
4	Identify the organ & write its visceral impressions (Any 3)	Identification- 0.5 Impressions-1.5
5	Identify the organ & write its blood/nerve supply	Identification- 0.5 Supply-1.5
6	Identify the organ & write its borders (Any two)	Identification- 1 Borders -1
7	Identify the organ & write its surfaces (Any two)	Identification- 1 Borders -1
8	Identify the organ & write its applied anatomy (Any 3 points)	Identification-0.5 Applied -1.5
<b>Topic- Radiology</b>		
1	Identify the X-ray & write the structures seen in it (Any 3)	Identification- 0.5 Structures-1.5
2	Identify the view of the X-ray & write the marked structures (Any two)	Identification- 1 Structures-1
<b>Topic- Central Nervous System/ Sense organs</b>		
1	Name the lobes of the given organ e.g., cerebrum	Each lobe – 0.5 Total -2

2	Identify the sense organ & write its nerve supply e.g., tongue	Identification- 1 Supply-1
3	Identify the marked structure and write its applied aspect (Any two)	Identification- 1 Applied aspect-1

### 6 H - III Viva Voce (70 Marks)

Recall Questions	Comprehension Questions	Application Questions
40 Marks	20 Marks	10 Marks
1. Sira-Dhamani-Srotas 2. Shariropakramaniya Sharir 3. Paribhasha Shaarir 4. Praman Shaarira 5. Anatomical terminologies 6. Kalaa Sharir 7. Indriya Sharir & Sensory organ 8. Reproductive system	1. Nervous system 2. Endocrine system 3. Lymphatic system 4. Cardiovascular system 5. Urinary system	1. Garbha Sharir, 2. Embryology 3. Respiratory system 4. Digestive system
e.g., Definition, types, numbers, planes, parts, Shlokas, etc.	e.g., Relations, Blood supply, Nerve Supply, Venous & Lymphatic drainage, etc.	e.g., Applied anatomy, Clinical anatomy, Surgical anatomy, Congenital anomalies etc.

### 7. Reference and Resources

## Preface

Kriya Sharir (Human Physiology) is an important subject of the BAMS program for the undergraduate students of Ayurveda. The term sharir means 'in the sharir' or 'related to the sharir' thus Sharir Kriya deals with the study of the human body concerning its physiological norms i.e., the functioning of the human body in its normal state. This subject refers to the physiology and biochemistry of contemporary medical science.

The swasthya of an individual is based on 3 pillars of the body i.e., dosha, dhatu & mala. Kriya Sharir subject mainly deals with these 3 pillars. The basic concepts, knowledge, and applicability of Tridosha (Vata, Pitta, Kapha), Sapta Dhatus (Rasa, Rakta, Mamsa, Meda, Asthi, Majja, Shukra), and Trimala (Mutra, Purish, Sweda) are very important in the critical understanding of the disease. Kriya Sharir also deals with Prakriti, Strotas, Kosta, Agni, Oja, Mana, Aahar (Basic principles of food), shatkriyakal, the system-wise study of contemporary science, senses function and dysfunction, etc. All these fundamental topics are essential for the proper understanding of etiopathogenesis, diagnosis of disease, and its management which will be covered in para-clinical and clinical subjects.

New curriculum of Kriya Sharir is designed considering cognitive, affective, and psychomotor domains. There are group discussions, workshops, field visits, and activities beyond the textbook during the practical hours like preparation of charts, models, seminar presentations by students. Kriya Sharir subject also deals with teaching-learning methods like role play, flipped the classroom, etc. Some assessment methods like OSPE, PBL, DOPS, CBD, skill assessment, etc are incorporated. The main aim of the curriculum is to highlight the basic knowledge and to give a new scientific approach to undergraduate students to develop their skills of Ayurveda and make them competent to apply in clinical practice and research.

## Course Code and Name of Course

	Course code	Name of Course
	<b>AyUG KS</b>	<b>Kriya Sharir (Human Physiology)</b>

## AyUG KS Course

Table 1- Course learning outcomes and matched PO.

SR1	A1	B1
CO No	Course learning Outcomes (CO) AyUG KS At the end of the course AyUG-KS, the student should be able to-	Course learning Outcomes matched with program learning outcomes.
CO 1	Explain all basic principles & concepts of Kriya Sharir along with essentials of contemporary human physiology and biochemistry related to all organ systems.	PO1, PO2
CO 2	Demonstrate and communicate normal and abnormal variables pertaining to Kriya Sharir such as Sara, Agni, Koshtha, Srotas etc.	PO2, PO3
CO 3	Differentiate between Prakriti and Vikriti in the individuals after carrying out relevant clinical examinations.	PO1, PO2, PO3, PO5
CO 4	Carry out clinical examination and experiments using equipments with interpretation of their results	PO4
CO 5	Differentiate the strengths & limitations of Ayurved and contemporary sciences	PO2
CO 6	Present a short project work / research activity covering the role of Kriya Sharir in preventive and promotive healthcare.	PO5, PO6, PO7, PO8, PO9
CO 7	Show a sense of curiosity and questioning attitude towards the life processes and to display compassion and ethical behaviour	PO2, PO5, PO6, PO7, PO9
CO 8	Effectively communicate verbally and in writing preferably using Ayurvedic terminology along with contemporary terminology among peers, teachers and community	PO8, PO9

<b>Paper I – AyUG-KS</b>					
<b>Sr No</b>	<b>A2 List of Topics AyUG-KS Paper I</b>	<b>B2 Term</b>	<b>C2 Marks</b>	<b>D2 Lecture hours</b>	<b>E2 Non-Lecture hours</b>
<b>PART-A (Marks-60)</b>					
1	<b>Sharir:</b> Definition and synonyms of term Kriya, Sharir & Shaarir. Description of Sharir Dosha and Manasa Dosha. Mutual relationship between Triguna-Tridosha & Panchmahabhuta.	I	08	2	1
2	<b>Basic principles of Ayurveda:</b> Dosha dhatu mala mulam hi shariram. Description of basics of Srotas	I		2	1
3.	<b>Tridosha:</b> General description of Tridosha. Inter relationship between Ritu-Dosha-Rasa- Guna. Biological rhythms of Tridosha on the basis of day-night-age-season and food intake. Role of Dosha in the formation of Prakriti of an individual and in maintaining of health. Prakrita and Vaikrita Dosha.	I		3	0
4.	<b>Vata Dosha:</b> Vyutpatti (derivation), Nirukti (etymology) of the term Vata, general locations, general properties and general functions of Vata, five types of Vata (Prana, Udana, Samana, Vyana, Apana) with their specific locations, specific properties, and specific functions.	I	26	6	2
5.	<b>Pitta Dosha:</b> Vyutpatti, Nirukti of the term Pitta, general locations, general properties and general functions of Pitta, five types of Pitta (Pachaka, Ranjaka, Alochaka, Bhrajaka, Sadhaka) with their specific locations, specific properties, and specific functions. Similarities and differences between Agni and Pitta.	I		5	1
6.	<b>Kapha Dosha:</b> Vyutpatti, Nirukti of the term Kapha, general locations, general properties and general functions of Kapha, five types of Kapha (Bodhaka, Avalambaka, Kledaka, Tarpaka, Śleshaka) with their specific locations, specific properties, and specific functions.	II		4	1
7.	<b>Dosha Vriddhi-Kshaya:</b> Etiological factors responsible for Dosha Vriddhi, Dosha Kshaya and their manifestations.	II		1	1
8.	<b>Kriyakala:</b> Concept of Kriyakala, applied physiology of diseases produced due the vitiation of vata, pitta and kapha.	II		1	1
9	<b>Prakriti:</b> <b>Deha- Prakriti:</b> Vyutpatti, Nirukti, various definitions and synonyms for the term "Prakriti". Intra-uterine and extra-uterine factors influencing Deha-Prakriti, classification and characteristic features of each kind of Deha-Prakriti. <b>Manasa- Prakriti:</b> Introduction and types of Manasa- Prakriti	II	7	3	
10.	<b>Ahara:</b> Definition, classification and significance of Ahara,	III	3	1	

	Ahara-vidhi-vidhana, Ashta Aharavidhi Viseshayatana, Ahara Parinamkar Bhava.				
11.	<b>Agni:</b> Definition and importance, synonyms, classification, location, properties and functions of Agni and functions of Jatharagni, Bhutagni, and Dhatvagni.	III	26	4	1
12.	<b>Aharapaka</b> (Process of digestion): Description of Annavaha Srotas and their Mula. Description of Avasthapaka (Madhura, Amla and Katu). Description of Nishthapaka (Vipaka) and its classification. Role of Grahani & Pittadhara Kala. Separation of Sara and Kitta. Absorption of Sara. Genesis of Vata-Pitta-Kapha during Aharapaka process. Definition of the term Koshtha. Classification of Koshtha and the characteristics of each type of Koshtha.	III		7	2
<b>PART-B (Marks-40)</b>					
1	<b>Physiology Homeostasis:</b> Definition and mechanisms of maintenance of homeostasis. Cell physiology. Membrane physiology. Transportation of various substances across cell membrane. Resting membrane potential and action potential. Acid-base balance, water and electrolyte balance. Study of basic components of food.	I		5	1
2	<b>Physiology of Respiratory system:</b> functional anatomy of respiratory system. Definition of ventilation, mechanism of respiration, exchange and transport of gases, neural and chemical control of respiration, artificial respiration, asphyxia, hypoxia. Introduction to Pulmonary Function Tests.	II	23	5	2
3	<b>Physiology of Gastrointestinal system:</b> Functional anatomy of gastro-intestinal tract, mechanism of secretion and composition of different digestive juices. Functions of salivary glands, stomach, liver, pancreas, small intestine and large intestine in the process of digestion and absorption. Movements of the gut (deglutition, peristalsis, defecation) and their control. Enteric nervous system. Digestion and metabolism of proteins, fats and carbohydrates. Vitamins & Minerals- sources, daily requirement, functions, manifestations of hypo and hypervitaminosis.	II		7	2
4	<b>Physiology of Nervous System:</b> General introduction to nervous system, neurons, mechanism of propagation of nerve impulse, physiology of CNS, PNS, ANS; physiology of sensory and motor nervous system, Functions of different parts of brain, intelligence, memory, learning and motivation. Physiology of sleep and dreams, EEG. Physiology of speech and articulation. Physiology of temperature regulation.	III	17	7	3
5	<b>Physiology of Endocrine glands:</b> General introduction to endocrine system, classification and characteristics of hormones, physiology of all endocrine glands, their functions and their effects.	III		6	2

<b>Paper II – AyUG-KS</b>					
	<b>A2 List of Topics Paper II</b>	<b>B2 Term</b>	<b>C2 Marks</b>	<b>D2 Lecture hours</b>	<b>E2 Non- Lecture hours</b>
<b>PART-A (Marks-60)</b>					
1	<b>Dhatu:</b> Etymology, derivation, definition, general introduction of term Dhatu, different theories related to Dhatuposhana (Dhatuposhana Nyaya)	I	18	2	1
2	<b>Rasa Dhatu:</b> Etymology, derivation, location, properties, functions and Praman of Rasa-dhatu. Physiology of Rasavaha Srotas, Formation of Rasa Dhatu from Aahara Rasa, circulation of Rasa (Rasa-Samvahana), role of Vyana Vayu and Samana Vayu in Rasa Samvahana. Description of functioning of Hridaya. Ashtavidha Sara, characteristics of Tvakasara Purusha, conceptual study of Aashraya-Aashrayi Bhaava and its relation to Rasa and Kapha. Manifestations of kshaya and Vriddhi of Rasa	I		4	1
3.	<b>Rakta Dhatu:</b> Etymology, derivation, synonyms, location, properties, functions and Praman of Rakta Dhatu. Panchabhautikatva of Rakta Dhatu, physiology of Raktavaha Srotas, formation of Raktadhatu, Ranjana of Rasa by Ranjaka Pitta, features of Shuddha Rakta, specific functions of Rakta, characteristics of Raktasara Purusha, manifestations of Kshaya and Vriddhi of Raktadhatu, mutual interdependence of Rakta and Pitta.	I		3	1
4.	<b>Mamsa Dhatu:</b> Etymology, derivation, synonyms, location, properties and functions of Mamsa Dhatu, physiology of Mamsavaha Srotas, formation of Mamsa Dhatu, characteristics of Mamsasara Purusha, manifestations of Kshaya and Vriddhi of Mamsa Dhatu, Concept of Peshi.	I		2	1
5.	<b>Meda Dhatu:</b> Etymology, derivation, location, properties, functions and Praman of Meda Dhatu, physiology of Medovaha Srotas, formation of Medo Dhatu, characteristics of Medasara Purusha and manifestations of Kshaya and Vriddhi of Meda.	I		3	1
6.	<b>Asthi Dhatu:</b> Etymology, derivation, synonyms, location, properties, functions of Asthi Dhatu. Number of Asthi. Physiology of Asthivaha Srotas and formation of Asthi Dhatu, characteristics of Asthisara Purusha, mutual interdependence of Vata and Asthi Dhatu, manifestations of Kshaya and Vriddhi of Asthi Dhatu.	II	19	2	1
7.	<b>Majja Dhatu :</b> Etymology, derivation, types, location, properties, functions and Praman of Majjaa Dhatu, physiology of Majjavaha Srotas, formation of Majja Dhatu, characteristics of Majja Sara Purusha, relation of Kapha, Pitta, Rakta and Majja, manifestations of Kshaya and Vriddhi of	II		3	1

	Majja Dhatu.				
8.	<b>Shukra Dhatu:</b> Etymology, derivation, location, properties, functions and Praman of Shukra Dhatu, physiology of Shukraravaha Srotas and formation of Shukra Dhatu. Features of Shuddha Shukra, characteristics of Shukra-Sara Purusha, manifestations of Kshaya and Vriddhi of Shukra Dhatu.	II		3	1
9	<b>Concept of Ashraya-Ashrayi bhava</b> i.e. inter-relationship among Dosha, Dhatu Mala and Srotas. Applied physiology of diseases asserting saptadhatu enlisted under dhatu pradoshaj vikar.	II		1	1
10.	<b>Ojas:</b> Etymological derivation, definition, formation, location, properties, Praman, classification and functions of Ojas. Description of Vyadhikshamatva. Bala Vriddhikara Bhava. Classification of Bala. Etiological factors and manifestations of Ojavisramsa, Vyapat and Kshaya.	II		3	1
11.	<b>Upadhatu:</b> General introduction, etymological derivation and definition of the term Upadhatu. Formation, nourishment, properties, location and functions of each Upadhatu. <b>Stanya:</b> Characteristic features and methods of assessing Shuddha and Dushita Stanya, manifestations of Vriddhi and Kshaya of Stanya. <b>Artava:</b> Characteristic features of Shuddha and Dushita Artava. Differences between Raja and Artava, physiology of Artavavaha Srotas. <b>Tvak:</b> classification, thickness of layer and functions.	II		6	1
12.	<b>Mala:</b> Etymological derivation and definition of the term Mala. Aharamala: Enumeration and description of the process of formation of Aharamala. <b>Purisha:</b> Etymological derivation, definition, formation, properties, quantity and functions of Purisha. Physiology of Purishavaha Srotas, manifestations of Vriddhi and Kshaya of Purisha. <b>Mutra:</b> Etymological derivation, definition, formation, properties, quantity and functions of Mutra. Physiology of Mutravaha Srotas, physiology of urine formation in Ayurveda, manifestations of Vriddhi and Kshaya of Mutra. <b>Sveda:</b> Etymological derivation, definition, formation and functions of Sveda. Manifestations of Vriddhi and Kshaya of Sveda. Discription of Svedvaha Srotas <b>Dhatumala:</b> Brief description of each type of Dhatumala.	III	23	6	2
13	<b>Indriya vidnyan:</b> Physiological description of Panchagyaanendriya and physiology of perception of Shabda, Sparsha, Rupa, Rasa and Gandha. Physiological description of Karmendriya.	III		1	1
14	<b>Manas:</b> Properties, functions and objects of Manas. Physiology of Manovaha Srotas.	III		2	1
15	<b>Atma:</b> Properties of Atma. difference between Paramatma and Jivatma; Characteristic features of existence of Atma in living body.	III		2	0
16	<b>Nidra &amp; Swapna:</b> Nidrotpatti, types of Nidra, physiological and clinical significance of Nidra; Svapnotpatti and types of Svapna.	III		2	0

<b>PART-B (Marks-40)</b>					
<b>1</b>	<b>Haemopoetic system:</b> composition, functions of blood and blood cells, Haemopoiesis (stages and development of RBCs, and WBCs and platelets), composition and functions of bone marrow, structure, types and functions of haemoglobin, mechanism of blood clotting, anticoagulants, physiological basis of blood groups, plasma proteins, introduction to anaemia and jaundice.	<b>I</b>	18	5	2
<b>2</b>	<b>Immunity:</b> classification of immunity: Innate, acquired and artificial. Different mechanisms involved in immunity: Humoral (B-cell mediated) and T-Cell mediated immunity. Hypersensitivity.	<b>I</b>		2	0
<b>3</b>	<b>Physiology of cardio-vascular system:</b> Functional anatomy of cardiovascular system. Cardiac cycle. Heart sounds. Regulation of cardiac output and venous return. Physiological basis of ECG. Heart-rate and its regulation. Arterial pulse. Systemic arterial blood pressure and its control.	<b>I</b>		5	2
<b>4</b>	<b>Muscle physiology:</b> comparison of physiology of skeletal muscles, cardiac muscles and smooth muscles. Physiology of muscle contraction.	<b>II</b>	07	2	0
<b>5</b>	<b>Adipose tissue:</b> lipoproteins like VLDL, LDL and HDL triglycerides. Functions of skin, sweat glands and sebaceous glands.	<b>II</b>		2	1
<b>6</b>	<b>Physiology of male and female reproductive systems:</b> Description of ovulation, spermatogenesis, oogenesis, menstrual cycle.	<b>II</b>	15	5	2
<b>7</b>	<b>Physiology of Excretion:</b> functional anatomy of urinary tract, functions of kidney. Mechanism of formation of urine, control of micturition. Formation of faeces and mechanism of defecation.	<b>III</b>		4	2
<b>8</b>	<b>Special Senses, Sleep and Dreams:</b> Physiology of special senses. physiology of sleep and dreams	<b>III</b>		5	1

<b>Paper I (Part A) (60 Hours)</b>									
<b>Topic 1 – Sharir (human body) (3 hr) [Lecture: 2 hours, non-lecture: 1 hour]</b>									
CO 1	Explain the definition and synonyms of the term <i>kriya, sharira</i> and <i>shaarira</i>	Cognitive (recall, comprehension)	Mk	K	Lecture	Written/ (MCQ, MEQ, LAQ, SAQ) Viva voce	F & S	I	
CO 2	Enlist the <i>sharira dosha</i> and <i>manasa dosha</i> and	Cognitive (recall, comprehension)	Mk	K	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Explain mutual relationship between <i>triguna, panchmahabhuta</i> and <i>tridosha</i>	Cognitive (comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
<b>Topic 2 – Basic Principles of Kriya Sharir (3 hr) [Lecture: 2 hours, non-lecture: 1 hour]</b>									
CO 1	Express critical view of why <i>dosha- dhatu-mala</i> are described in specific numbers.	Cognitive (recall)	Dk	Kh	Discussion	Written	F	I	
CO 1	Explain the principle of “ <i>dosha-dhatu-mala mulam hi shariram</i> ”.	Cognitive (recall)	Mk	Kh	Lecture Discussion	Written	F & S	I	
CO 1	Discuss term homeostasis in <i>dosha-</i>	Cognitive (comprehension)	Dk	Kh	Discussion	Viva voce	F	I	

	<i>dhatu-mala.</i>								
CO 1	Explain role of <i>srotas</i> in the body.	Cognitive (comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Explain the basic concept of <i>srotas</i> and classify different <i>srotas</i> based on Rachana (morphological), <i>kriya</i> (functions) and <i>guna</i> (properties)	Cognitive (comprehension)	Mk	Kh	Lecture Discussion Flipped classroom	Written/ Viva voce	F & S	I	<i>Rachana sharir</i>
CO 1	Describe the significance of the knowledge of <i>srotas</i> in <i>kriya sharira</i>	Cognitive (comprehension)	Mk	Kh	Discussion	Written/ Viva voce	F & S	I	
CO 1	Compare <i>mula sthana</i> of <i>srotas</i> described in <i>samhitas</i> in view of <i>kriya sharir</i> and contemporary medical science	Cognitive (application)	Dk	Kh	Model Discussion Tutorial Assignment	Viva voce	F & S	I	
CO 1	Find out similarities and differences between <i>srotas</i> and system of contemporary science.	Cognitive (application)	Nk	Kh	Discussion Self-learning Think-Pair-Share	Short notes	F	I	
CO 1	Document observations on correlation of anyone environmental global change and physiological variation as per Ayurved, contemporary sciences.	Cognitive (application)	Nk	Kh	Discussion Self-learning Think-Pair-Share	Short notes	F	I	
CO 1	Recognize the contribution of Ayurveda in the formation of four basic principles of Bioethics mentioned in contemporary science.	Cognitive (recall) (comprehension)	Nk	Kh	Lecture Discussion	Written	F	I	
<b>Topic 3 – Tridosha (Three humors of the body) (3 hr) [Lecture: 3 hours, non-lecture: 0 hours]</b>									
CO 1	Describe <i>utpatti</i>	Cognitive	Mk	K	Lecture	Written/	F & S	I	

Kriya Sharir, I BAMS(Ayurvedacharya),

	( <i>prasad &amp; malabhuta</i> ), locations of <i>dosha</i> .	(recall)				Viva voce			
CO 1	State biological rhythms or circadian cycle of <i>tridosha</i> based on day-night-age-season food intake and relation to the environment	Cognitive (comprehension)	Mk	Kh	Lecture discussion Seminar	Written/ Viva voce	F & S	I	
CO 1	Explain the applied role of <i>dosha</i> in maintaining health and State of equilibrium and recognize the role of <i>dosha</i> in the formation of <i>prakriti</i> of an individual	Cognitive (comprehension)	Mk	Kh	Lecture discussion Seminar	Written/ Viva voce	F & S	I	
CO 1	State importance of <i>dosha</i> in lifestyle management and mutual relationship between <i>ritu-kala-dosha-rasa-guna</i>	Cognitive (application)	Nk	Kh	Discussion PBL	Viva voce	S	I	
CO 1	Interpret <i>gurvadi guna</i> of <i>dosha</i> in term of applied physiology and clinical aspect in different chapters of Charak.	Cognitive (application)	Nk	Kh	Discussion PBL/CBD	Written	F	I	<i>Padartha Vijnana. Kayachikitsa</i>
CO 1	Interpret <i>sama &amp; niram</i> lakshana of <i>dosha</i>	Cognitive (comprehension)	Dk	Kh	Discussion	Written	F	I	
CO 1	Discuss the evidences of functional significance of <i>vata</i> , <i>pitta</i> and <i>kapha</i> in perspective of nervous, endocrine, immune or any other system.	Cognitive (application)	Nk	Kh	Discussion Think-Pair-Share	Self-assessment	SA	I	
CO 1	Discuss how to examine <i>vrudhhi-kshaya</i> of <i>dosha</i>	Cognitive (comprehension)	Dk	Kh	Discussion PBL	Viva voce	S	I	
CO 1	State materialism and	Cognitive	Mk	Kh	Discussion	Viva voce	F	I	

	immaterialism of tridosha	(comprehension)							
<b>Topic 4 – Vata dosha (8 hr)</b> [Lecture: 6 hours, non-lecture: 2 hours]									
CO 1	Define the <i>vyutpatti</i> and <i>nirukti</i> of <i>vata</i> .	Cognitive (Recall)	Mk	K	Lecture	Written/ Viva voce	F & S	I	
CO 1	Describe <i>guna</i> and general locations of <i>vata dosha</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Describe general properties & functions of <i>vata dosha</i> and demonstrate the normal <i>guan, karma of vata dosha</i> in a healthy person.	Cognitive (Comprehension)	Mk	Kh/Sh	Lecture Discussion	Written/ Viva voce	F & S	I	<i>Rognidan Vikriti Vidnyan</i>
CO 1	Enlist five types of <i>vata</i> and describe <i>prana, udana vata</i> with their specific locations, properties and functions.	Cognitive (Recall & Comprehension)	Mk	Kh	Lecture Confusion technique Demonstration Chart, Model	Written/ Viva voce Skill assessment	F & S	I	
CO 1	Explain the term <i>nishwas, ucchwas, shwasan</i> & describe the role of <i>prana vayu &amp; udana vayu</i> in <i>shwasan prakriya</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture	Written/ Viva voce	F & S	I	
CO 1	Describe <i>shwasan prakriya</i> according to <i>sharangadhar</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion Model, Video	Written/ Viva voce	F & S	I	
CO 1	Describe clinical importance of classification of <i>swara</i> and <i>vyanjana</i> according to their <i>uccharana sthan</i> .	Cognitive (Application)	Nk	Sh	Demonstration Discussion Assignment PBL/CBL	Self- assessment	SA	I	Sanskrit
CO 1	Describe the formation and articulation of <i>shabda</i> (words) and explain the bio-physiology of	Cognitive (Comprehension)	Dk	Kh	Lecture A/V aids.	Written/ Viva voce	F & S	I	

	induction of <i>vaak</i> and role of <i>udaan vaayu</i> in it.								
CO 1	Explain role of pranayama, <i>puraka</i> , <i>rechaka</i> and <i>kumbhaka</i> in <i>samyaka shwasana</i> , <i>swara/ ghosha utpatti</i>	Cognitive (Analysis)	Nk	Sh	Demonstration Discussion Assignment PBL/CBL	Self-assessment	SA	I	<i>Swasthavrutta</i>
CO 1	Describe <i>samana</i> with their specific locations, properties and functions.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion Confusion technique Demonstration Chart, Model	Written/ Viva voce	F & S	I	
CO 1	Describe <i>vyana vata</i> with their specific locations, properties and functions.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion Confusion technique Demonstration Chart, Model	Written/ Viva voce	F & S	I	
CO 1	Describe role of <i>vyana vayu</i> & <i>samana vayu</i> in the process of <i>rasa-samvahanana</i>	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion Seminar	Written/ Viva voce	F & S	I	
CO 1	Review the contribution of <i>vyana</i> and <i>saman vayu</i> in the process of cardiac circulation.	Cognitive (Comprehension)	Dk	K	Discussion	Written/ Viva voce	F	I	
CO 1	Interprete microbiota, gut brain axis for understanding enteric nervous system in perspective of <i>vata</i> , <i>saman vayu</i> .	Cognitive (Comprehension)	Nk	K	Discussion	Self-assessment	SA	I	
CO 1	Describe <i>Apana vata</i> with their specific locations, properties and functions.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion Confusion technique Demonstration	Written/ Viva voce	F & S	I	

CO 1	Document & discuss your observations on correlation of functions of <i>apana vayu</i> with which type of nervous system & why?	Cognitive (Comprehension)	Nk	K	Discussion	Self-assessment	SA	I	
CO 1	Illustrate gati (directions) of types of vata by using lebel diagramme.	Cognitive (analysis)	Dk	Kh	Illustration	Self-assessment Peer evaluation.	SA	I	
CO3	Explain difference between <i>kshaya</i> & <i>vridhhi lakshana</i> of <i>vata Dosha</i>	Cognitive (Comprehension)	MK	Kh	Chalk-board Presentation Symposium Discussion	Written/ Viva voce	F & S	I	
CO5	Interpret which type of <i>vata dosha</i> gets vitiated and in which clinical condition the use of proper <i>aahar dravya</i> is prevalent as per <i>kshaya, vridhhi of vata dosha</i> .	Cognitive (Application)	Dk	Sh	Demonstration Discussion PBL	Written/ Viva voce	F & S	I	
CO 1	Recite and to explain the important verses of <i>vata dosha</i> . ( <i>ex-sthana, karma, types, vridhhi and kshaya</i> )	Cognitive (Recall)	Dk	Sh	Discussion Recitation	Written/ Viva voce	F & S	I	Sanskrit Samhita
<b>Topic 5 – Pitta dosha (6 hr)</b> [Lecture: 5 hours, non-lecture: 1 hour]									
CO 1	Define the <i>vyutpatti</i> and <i>nirukti</i> of <i>pitta</i> .	Cognitive (Recall)	Mk	Kh	Lecture	Written/ Viva voce	F & S	II	
CO 1	Describe <i>guna</i> and general locations of <i>pitta dosha</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion Demonstration	Written/ Viva voce Skill assessment	F & S	II	
CO 1	Describe general	Cognitive (Recall)	Mk	Kh	Lecture	Written/	F & S	II	<i>Rognidan</i>

	properties & functions of <i>pitta dosha</i> and explain the normal <i>guna, karma of pitta dosha</i> in a healthy person.	& Comprehension)			Discussion Seminar	Viva voce			<i>Vikriti Vidnyan</i>
CO 1	Enlist five types of <i>pitta dosha</i> and describe <i>pachaka</i> with their specific locations, properties and functions.	Cognitive Recall	Mk	Kh	Lecture Discussion Demonstration	Written/ Viva voce	F & S	II	
CO 1	Record your opinions about functions of <i>pachak pitta</i> and digestive enzymes separately.	Cognitive (Comprehension)	Nk	Kh	Group discussion	Self-assessment	SA	II	
CO 1	Describe <i>ranjaka pitta</i> with their specific locations, properties and functions.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion Demonstration	Written/ Viva voce	F & S	II	
CO 1	Describe role of <i>ranjaka pitta</i> in <i>rasaranjan</i> process as per different <i>aacharyas</i> .	Cognitive (Comprehension)	Dk	Kh	Lecture	Written/ Viva voce	F & S	II	
CO 1	Interprete stages of erythropoiesis and role of intrinsic factor, vit. B <sub>12</sub> etc in hemopoiesis.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion Seminar	Written/ Viva voce	F & S	II	
CO 1	Describe <i>alochaka, bhranjaka, sadhaka pitta</i> with their specific locations, properties and functions.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion Demonstration	Written/ Viva voce	F & S	II	
CO 1	Discuss rhodopsin and iodopsin along with <i>alochaka pitta</i> and note down	Cognitive (Recall)	Nk	Kh	Self study	Self-assessment	SA	II	

CO 1	Elaborate the functions of bhrajaka pitta in term physiology.	Cognitive (Comprehension)	Nk	Kh	Self study	Self-assessment	SA	II	
CO 1	Describe the role of <i>sadhaka</i> pitta in <i>sadhana</i> , concentration and observe changes upon heart rate and respiratory rate	Attitude (Imitation)	Nk	Sh	Discussion Demonstration	Self-assessment	SA	II	
CO 1	Find out similarities and differences between fuctions of sadhaka pitta and neurotransmitter.	Cognitive (Analysis)	Nk	Kh	Self study	Self-assessment	SA	II	
CO 1	Explain difference between <i>kshaya</i> & <i>vridhhi lakshana</i> of <i>pitta Dosha</i>	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 5	Interpret which type of <i>pitta dosha</i> gets vitiated and in which clinical condition the use of proper <i>aahar dravya</i> is prevalent as per <i>kshaya, vridhhi</i> of <i>pitta dosha</i> .	Cognitive (Application)	Dk	Sh	Demonstration Discussion PBL	Written/ Viva voce	F & S	II	<i>Swasthavrutta</i>
CO 1	Distinguish the similarities & differences between <i>agni</i> and <i>pitta</i> in terms of their <i>guna</i> with examples in compendia.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion PBL Seminar	Written/ Viva voce	S	II	
CO 1	Make inferences and find evidences / examples in daily regimen to support generalization of <i>agni</i> & <i>pitta</i> statement.	Cognitive (Analysis)	Nk	Sh	Demonstration Discussion Assignment PBL/CBL	Self-assessment	SA	II	
CO 1	Recite and explain the important verses of <i>pitta dosha</i> . (ex-	Cognitive (Recall)	Dk	Kh	Discussion Recitation	Written/ Viva voce	F & S	II	

	<i>sthana, karma, types, vriddhi and kshaya)</i>								
	<b>Topic 6 – Kapha dosha (5 hr)</b> [Lecture: 4 hours, non-lecture: 1 hour]								
CO 1	Define the <i>vyutpatti</i> and <i>nirukti</i> of <i>kapha dosha</i> .	Cognitive (Recall Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Describe general properties & functions of <i>kapha dosha</i> and demonstrate the normal <i>guan, karma</i> of <i>kapha dosha</i> in a healthy person.	Cognitive (Recall) (Application)	Mk	Kh	Lecture Discussion Demonstration	Written/ Viva voce Skill assessment	F & S	II	
CO 1	Enlist five types of <i>kapha dosha</i> & describe <i>bodhaka kapha kledaka, tarpaka</i> with their specific locations, properties and functions.	Cognitive (Recall)	Mk	Knows	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Identify the role of saliva in taste perception and also in other way.	Cognitive (Comprehension)	Dk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Describe role of <i>kledaka kapha</i> in lubricating and protective properties of mucus.	Cognitive (Comprehension)	Dk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Describe the role of <i>tarpaka kapha</i> in protects the sensory organs.	Cognitive (Comprehension)	Dk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Describe <i>avalambaka, sleshaka</i> with their specific locations, properties and functions.	Cognitive (Recall)	Mk	Knows	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Describe the role of	Cognitive	Dk	Kh	Lecture	Written/	F & S	II	

	<i>avalambaka</i> in heart protection and <i>sleshaka kapha</i> in arthritis.	(Comprehension)			Discussion	Viva voce			
CO 1	Explain difference between <i>kshaya</i> & <i>vridhhi lakshana</i> of <i>kapha Dosha</i>	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	State importance of <i>prakrit shleshmik bala / veerya</i> & <i>vikrit shleshmik mala</i> & find out significance of above cognitive in applied aspect	Cognitive (Application)	Nk	Kh	Lecture Discussion	Self-assessment	SA	II	<i>Kayachikitsa</i>
CO 5	Interpret which type of <i>kapha dosha</i> gets vitiated and in which clinical condition the use of proper <i>aahar dravya</i> is prevalent as per <i>kshaya, vridhhi</i> of <i>kapha dosha</i> .	Cognitive (Application)	Nk	Sh	Demonstration Discussion PBL	Viva voce	F & S	II	<i>Swasthavrutta</i>
CO 1	Recite and explain the important verses of <i>kapha dosha</i> . (ex- <i>sthana, karma, vridhhi and kshaya</i> )	Cognitive (Recall & Comprehension)	Dk	Sh	Discussion Recitation	Written/ Viva voce	F & S	II	
CO 1	Describe neural & chemical communication system of body	Cognitive (Comprehension)	Nk	Kh	Self study	Self-assessment	SA	II	
<b>Topic 7 – Dosha Vridhhi-Kshaya (Hyper and hypo state of dosha) (2 hr) [Lecture: 1 hour, non-lecture: 1 hour]</b>									
CO 1	Describe etiological factors causing <i>tridosha vridhhi</i> & <i>kshaya</i> on the basis of <i>dravya, guna, karma, aahaar &amp; vihara</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	<i>Dravyaguna</i>
CO 1	Describe, observe and interpret individual	Cognitive (Comprehension)	Nk	Sh	Demonstration Discussion	Self-assessment	SA	II	

	causes and symptoms of <i>panchavidha vataprakopa</i> . ( <i>Ashtanga Hridaya nidana sthana</i> 16)	Application)			PBL				
CO 1	Describe <i>vridhdhi-kshaya lakshana</i> of <i>vata dosha</i>	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Describe <i>vridhdhi &amp; kshaya lakshana</i> of <i>pitta</i> and <i>kapha dosha</i>	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Enumerate the <i>nanatmaj vyadhi</i> of <i>tridosha</i>	Cognitive (Recall)	Nk	K	Lecture	Self-assessment	SA	II	
<b>Topic 8 – Kriyakala (Treatment as per prevalent kala) (2 hr) [Lecture: 1 hour, non-lecture: 1 hour]</b>									
CO 1	Explain the Concept of <i>kriyakala</i> & enumerate stages of <i>kriyakala</i> .	Cognitive (Recall) (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	<i>Rognidan Vikriti Vidnyan</i>
CO 1	Describe the stages <i>sanchaya, prakopa, prasara</i> of <i>kriyakala</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Describe the stages <i>sthansanshraya, vyaktavastha &amp; bhedavastha</i> of <i>kriyakala</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Describe the applied physiology of diseases produced due the vitiation of <i>vata, pitta</i> and <i>kapha</i> .	Cognitive (Comprehension)	Nk	Sh	Lecture Discussion	Self-assessment	SA	II	
CO 1	Describe ideas given in the <i>shat-kriyakala</i> about preventive measures	Cognitive (Comprehension)	Nk	Kh	Group discussion	Self-assessment	SA	II	
<b>Topic 9 – Prakriti (Deha- Prakriti, Manasa- Prakriti) (Body constitution, personality, temperament of individuals) (10 hr) [Lecture: 7 hours, non-lecture: 3 hours]</b>									
CO 1	Define the term <i>prakriti</i> and describe etymology & different	Cognitive (recall)	Mk	K	Lecture Discussion	Written/ Viva voce	F & S	II	

	meanings of the term <i>prakriti</i> .								
CO 1	Describe the role of different <i>matrijadi bhava</i> (genetic, intra-uterine and extra-uterine factors) influencing <i>prakriti</i> according to <i>Charaka and Sushruta</i>	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion Symposium	Written/ Viva voce	F & S	II	
CO 1	Describe the classification of different <i>prakriti</i> according to various Samhitas	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Enumerate types of <i>deha prakriti</i> and classify <i>deha prakriti</i> into <i>eka-doshaja, dvanvaja, samadoshaja</i> .	Cognitive (Recall)	Mk	Kh	Lecture Discussion Model Demonstration	Written/ Viva voce	F & S	II	
CO 1	Describe the <i>guna</i> (attributes) of <i>vata prakriti</i> according to <i>Charaka Samhita</i>	Cognitive (Comprehension)	Mk	Sh	Lecture Discussion Model Demonstration	Written/ Viva voce	F & S	II	
CO 1	Describe the <i>guna</i> (attributes) of <i>pitta prakriti</i> according to <i>Charaka Samhita</i>	Cognitive (Comprehension)	Mk	Sh	Discussion Role play real life experience	Written/ Viva voce	F & S	II	
CO 1	Describe the <i>guna</i> (attributes) of <i>kapha prakriti</i> according to <i>Charaka Samhita</i>	Cognitive (Comprehension)	Mk	Sh	Lecture Discussion video show Simulation	Written/ Viva voce	F & S	II	
CO 1	Describe <i>guna</i> of <i>vata, pitta &amp; kapha prakriti</i> according to Vagbhata (abhiruchi) & <i>Sushruta samhita (anukatva)</i>	Cognitive (Comprehension)	Mk	Sh	Discussion Model Demonstration Team project work, Tutorial	Written/ Viva voce	F & S	II	
CO 1	Describe the <i>guna</i> (attributes) of <i>vata, pitta &amp; kapha prakriti</i> according to	Cognitive (Comprehension)	Nk	Sh	Discussion	SA	SA	II	

	<i>Sharangadhara Samhita</i>								
CO 1	Describe the relationship between individual <i>prakriti</i> & <i>agni, koshtha</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Describe classification of <i>bhautik prakriti</i> and characteristic features of the individuals belonging to each kind of <i>bhautik prakriti</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Describe classification of <i>manas prakriti</i> and characteristic features of the <i>satvic prakriti</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Describe the characteristic features of <i>rajasic &amp; tamasic manas prakriti</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Describe classification of and characteristic features of the individuals belonging to each kind of <i>jatyadi-prakriti</i>	<i>Cognitive (Comprehension)</i>	<i>Mk</i>	<i>Kh</i>	<i>Lecture Discussion</i>	<i>Written</i>	<i>F &amp; S</i>	II	
CO 1	Similarities and difference between the <i>sharirik &amp; manas prakriti</i> descriptions given in various Samhitas.	Cognitive (Comprehension)	Dk	Kh	Discussion Team project work	Written	F	II	<i>Kayachikitsa</i>
CO 1	Significance of the Cognitive of <i>prakriti</i> in clinical aspect and <i>pathya-apathya kalpana</i> in <i>ahara</i> and <i>vihara</i> of each type of <i>prakriti</i> .	Cognitive (Comprehension)	Mk	Kh	Discussion Self-learning Buzz group	Written Role play	F & S	II	
CO 1	Appreciate the use of various validated tools for assessing	Cognitive (Application)	Mk	Sh	Discussion Tutorial, Demonstration	Written/ Viva voce	F & S	II	

	Ayurvedic concept of human constitution (prakriti) (software/questionnaire) to evaluate <i>prakriti</i> - Ex-CCRAS portal								
CO 1	Describe the relevance of <i>desha-kala-ritu-vaya-ahara-vihara-satmya</i> , <i>aushadha</i> of parents especially of mother on <i>prakriti</i> of individual.	Cognitive (Application/Analysis)	Dk	Kh	Tutorial, Discussion	Viva voce Seli-assessment	SA	II	<i>Kayachikitsa</i>
CO 1	Appreciate the application of recent advances in the domain of research related to <i>prakriti</i> (genetic, physiological basis)	Cognitive (Application/Analysis)	Nk	Kh	Discussion	Seli-assessment	SA	II	
CO 1	Recite and explain the important verses of <i>vata</i> , <i>pitta</i> & <i>kapha doshaja prakriti</i> .	Cognitive (Recall & Comprehension)	Dk	Kh	Discussion Recitation	Written/ Viva voce	F & S	II	
CO 1	Observe distinguish features of individuals of three contrasting <i>prakriti</i> types <i>vata</i> , <i>pitta</i> and <i>kapha</i> by IGIB. Link: <a href="https://doi.org/10.1186/1479-5876-6-48">https://doi.org/10.1186/1479-5876-6-48</a>	Cognitive (Application)	Nk	Sh	Team project work	Team assessment	TA	II

CO 1	Explore thes Immunophenotyping & human dosha <i>prakriti</i> .	Cognitive (Comprehension)	Nk	Kh	Online material	Self-assessment	SA	II	
<b>Topic 10 – Ahara (Diet and nutrition in Ayurveda) (4 hr) [Lecture: 3 hours, non-lecture: 1 hour]</b>									
CO 1	Describe the <i>Nirukti</i> (etymology)& <i>paribhasa</i> (definition) of <i>ahar</i> .	Cognitive (Recall)	Mk	K	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe the <i>Bheda</i> (classification) and <i>upayogita</i> (importance) of <i>ahara</i> .	Cognitive (Recall)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Define, enlist and describe- the types of <i>ahara</i> in detail with examples	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion Tutorial	Written/ Viva voce	F & S	III	

CO 1	Define, enlist and describe <i>ashta ahara-vidhi-viseshayatana</i> (8 factors to be considered while preparing and processing the food) in detail with examples	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion Seminar	Written/ Viva voce	F & S	III	<i>Swathavritta</i>
CO 1	Describe <i>ahara vidhi vidhana</i> (rules for consuming the food) in detail with examples.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Explains the role of <i>ahara vidhi vidhana</i> in the context of present-day lifestyle, cooking habits and eating behaviour.	Cognitive (Comprehension)	Dk	Kh	Lecture Discussion Real life experience Evidance based learning	Written/ Viva voce	F & S	III	
CO 1	Define, enlist and describe <i>ahara parinamkara bhava</i> (factors responsible for proper digestion) and the importance of each of these factors in the process of digestion	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Explain the concept of <i>viruddha ahara</i> (incompatible diet) and its relevance in present-day food processing methods and dietary consumption behaviour in individuals.	Cognitive (application)	Dk	Sh	Lecture Discussion Observation	Written/ Viva voce	SA	III	<i>Swathavritta</i>
CO 1	Explain the role of <i>ahara</i> in today's aspect related to <i>anupana</i> habits etc.	Cognitive (application)	Nk	Sh	Lecture Discussion	Self assessment	SA	III	
CO 1	Explain the role in today's lifestyle of food, compatible food, the proper time for	Cognitive (application)	Nk	Sh	Lecture Discussion Assignment	Self-notes	SA	III	

	food taking, practice regarding food intake etc. in individual's health.								
CO 1	Explain dietary guidelines, how to eat food in Ayurvedic view.	Cognitive (application)	Nk	Kh	Lecture Discussion	Self assessment	SA	III	
<b>Topic 11 – Agni (The digestive fire of the body) (5 hr) [Lecture: 4 hours, non-lecture: 1 hour]</b>									
CO 1	Describe different meanings of <i>agni</i> in different contexts and define <i>agni</i> in the context of <i>kriya sharir</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	State the importance of <i>agni</i> in maintaining the different aspects of human physiology	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Enumerate and explain the different synonyms of <i>agni</i> regarding <i>kriya sharir</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Enumerate and define various classifications of <i>agni</i> concerning their locations and functions in the body	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe the physiological roles of <i>jatharagni</i> , <i>bhutagni</i> and <i>dhatvagni</i> and explain the differences and similarities between the three.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	<i>Kayachikitsa</i>
CO 1	Classify and explain the features of four functional / abnormal states of <i>jatharagni</i> : <i>samagni</i> , <i>vishamagni</i> , <i>mandagni</i> & <i>tikshnagni</i> and explain evaluation process of <i>jarana-</i>	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	<i>Rognidan</i>

	<i>shakti.</i>								
CO 1	Enumerate the factors affecting the normal functioning of Agni and the symptoms of improper functioning of <i>agni</i> seen in certain clinical conditions	Cognitive (Comprehension)	Dk	Kh	Lecture Discussion	Viva voce	F	III	
CO 1	Enumerate and discuss different entities in the body that can represent different forms of <i>agni</i> from the contemporary physiology and biochemistry (hormones, enzymes etc) point of view	Cognitive (Comprehension)	Nk	Kh	Lecture Discussion	Self assessment Debate	SA	III	
CO 1	Record the opinions among your friends on the concept of free radicals & antioxidant	Cognitive (Application)	Nk	Sh	Team project work	Team assessment	TA	III	
CO 1	Identify digestive and metabolic functions of <i>Agni</i> & its clinical importance.	Cognitive (Application)	Nk	Sh	Group discussion	Self Assessment	SA	III	
CO 1	Distinguish the similarities & differences between <i>agni</i> and <i>pitta</i> in terms of their <i>guna</i> with examples in compendia. (mentioned in <i>pitta</i> also)	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion PBL	Written/ Viva voce	S	III	
<b>Topic-12. Annapachana / Aahara-paka (Digestion and metabolism in Ayurveda) (9 hr) [Lecture: 7 hours, non-lecture: 2 hours]</b>									
CO 1	Describe the <i>annavaha srotas</i> along with its <i>mula sthana</i>	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Enumerate and describe different organs of <i>annavaha</i>	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	

	<i>srotas</i> and their important functions. according to Ayurveda and contemporary physiology								
CO 1	Describe three stages of digestion: <i>madhura, amla</i> and <i>katu avasthapaka</i> in detail	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion Tutorial	Written/ Viva voce	F & S	III	
CO 1	Describe the process of <i>udeerana</i> (increase/ release) of <i>vata, pitta, kapha</i> during <i>avasthapaka</i>	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe the formation of <i>prakrit</i> and <i>vaikrit dosha</i> ( <i>prasadbhuta, malabhuta dosha</i> ) and their role.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	<i>Rognidan</i>
CO 1	Describe the definition of <i>vipaka</i> ( <i>nisthapaka</i> ) and classification of <i>vipaka</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe how to identify <i>vipak</i> of <i>aahar</i> as per their effect on the body.	Cognitive (application)	Dk	Sh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe the similarities and differences between <i>avasthapaka</i> and <i>nishthapaka</i>	Cognitive (Comprehension)	Mk	K	Lecture Discussion	Written/ Viva voce	F & S	III	

CO 1	Explain the role of different sub-types of <i>dosha</i> in the process of digestion: <i>bodhaka kapha, prana vayu, kledaka kapha, samana vayu, pachaka pitta, apana vayu</i> etc.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
------	---	---------------------------	----	----	-----------------------	-----------------------	-------	-----	--

CO 1	Describe the process of separation of <i>saara</i> and <i>kitta</i>	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	State the application of the theory of <i>pilu-paka</i> and <i>pithara paka</i> in <i>aharapaka</i>	Cognitive (Comprehension)	Nk	Kh	Lecture Discussion	Self-assessment	SA	III	
CO 1	Explain the role of <i>grahani</i> & <i>pittadhara kala</i> & describe possible relation between <i>pittadhara</i> and <i>majjadhara kala</i> .	Cognitive (Comprehension)	Dk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	State the importance of <i>pachaka pitta</i> and <i>jatharagni</i> in the process of digestion	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Explain the role of <i>bhutagni</i> and <i>dhatvagni</i> in <i>ahara parinaman</i>	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe the process of formation of <i>ahara-rasa</i> and absorption of <i>sara bhaga</i> / <i>anna-veerya</i>	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Draw parallels between the different types of <i>agni</i> and various digestive enzymes and hormones	Cognitive (Comprehension)	Dk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Define <i>ahara gati</i> , <i>abhyavaharana shakti</i> , <i>annagrahana</i> , <i>pachana</i> , <i>vivechana</i> , <i>munchana</i> and <i>jaranashakti</i>	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Discuss applied clinical aspect of <i>annavaha srotas</i> : <i>arochaka</i> , <i>ajirna</i> , <i>atisara</i> , <i>grahani</i> , <i>chardi</i> , <i>parinama shula</i> etc	Cognitive (Comprehension)	Dk	Kh	Lecture Discussion	Viva voce CBD	F & S	III	

CO 1	Define different meanings of the term <i>koshtha</i> and explain the term in the context of <i>kriya sharira</i>	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Enumerate the different types of <i>koshtha</i> according to the predominance of <i>dosha</i> ( <i>krura-mridu and madhya</i> )	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	<i>Panchakarma</i>
CO 1	State clinical significance of <i>koshtha</i> and the process of evaluating <i>koshtha</i> in an individual.	Cognitive (Comprehension)	Dk	Kh	Lecture Discussion	Written/ Viva voce DOPS	F & S	III	
<b>Part B ( 40 Hours) –</b>									
<b>Topic 1 - Physiology Homeostasis (6 hr) [Lecture: 5 hours, non-lecture: 1 hour]</b>									
CO 1	Define homeostasis and describe mechanisms of maintenance of homeostasis.	Cognitive (Recall/ Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Distinguish between the shell temperature and core temperature	Cognitive (Recall/ Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Define the terms Cell death, Cell degeneration, Cell aging. Describe animal tissue.	Cognitive (Recall/ Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Describe mechanism of positive and negative feedback system with at least two examples.	Cognitive (Recall/ Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Describe the structure and function of cell, cell membrane, cytoplasmic	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	

	organelles, genetic material (DNA & RNA.)								
CO 1	Explain the process of DNA replication & inhibitors of replication.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Describe the acid-base balance, water and electrolyte balance.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Describe the concept of pH & buffer systems in the body and Na-K pump	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Describe and discuss transport mechanisms across cell membranes. (Active & facilitated)	Cognitive (Comprehension)	Dk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Describe and discuss the molecular basis of resting membrane potential and action potential	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
<b>Topic 2 - Physiology of respiratory system: (7 hr)</b> [Lecture: 5 hours, non-lecture: 2 hours]									
CO 1	Describe divisions of the respiratory system based on its functions.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Describe pulmonary circulation.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Describe the mechanics of normal respiration, pressure changes during ventilation.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Describe the lung volume and capacities, compliance, diffusion of lungs	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Describe and discuss the exchange and transport of gases - Oxygen and Carbon dioxide	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion Seminar	Written/ Viva voce	F & S	I	

CO 1	Describe the neural and chemical control of respiration.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Describe physiological situations that affect respiration and discuss artificial respiration, dyspnoea, asphyxia, hypoxia, cynosis.	Cognitive (Comprehension)	Dk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Describe Haldane effect & Kussmaul breathing.	Cognitive (Comprehension)	Nk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Describe basic of pulmonary function tests.	Cognitive (Comprehension)	Nk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
<b>Topic 3 - Physiology of Gastrointestinal system (9 hr) [Lecture: 7 hours, non-lecture: 2 hours]</b>									
CO 1	Describe enzyme and its fuctions in metabolism	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Describe functional anatomy and physiology of the digestive system	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Describe the functions of salivary glands, stomach, liver, gall bladder pancreas, small intestine, large intestine in the process of digestion and absorption.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Describe the mechanism of secretion, composition, functions, and regulation of saliva, gastric, pancreatic, intestinal juices and bile secretion	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Describe GIT movements deglutition, peristalsis, defecation and control	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Describe the major components of food, the process of digestion and	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion Seminar	Written/ Viva voce	F & S	II	

	metabolism of proteins, fats and carbohydrates								
CO 1	Describe the physiological role of vitamins	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Describe the Gut-Brain Axis and enteric nervous system, and its function	Cognitive (Comprehension)	Dk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Discuss the physiology aspects of gastro-oesophageal reflux disease, vomiting, diarrhoea, constipation	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
<b>Topic 4 - Physiology of Nervous System (10 hr)</b> [Lecture: 7 hours, non-lecture: 3 hours]									
CO 1	Describe organization of nervous system.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe the mechanism of propagation of nerve impulses.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe the functions & properties of synapse, reflex, receptors	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe the functional anatomy of the central nervous system (CNS) and peripheral nervous system (PNS)	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion Seminar	Written/ Viva voce	F & S	III	
CO 1	Describe the physiology of autonomous nervous system (ANS)	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe the physiology of sensory (general sensations) and motor nervous system	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe and discuss spinal cord, its functions, lesion & sensory disturbances	Cognitive (Comprehension)	Dk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe and discuss functions of the cerebral cortex, basal ganglia,	Cognitive (Comprehension)	Nk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	

	thalamus, hypothalamus cerebellum, mid brain, pons and medulla oblongata.								
CO 1	Describe and discuss the physiological basis of intelligence, memory, learning and motivation.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe the physiology of cranial nerves	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe physiology of speech and articulation.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe physiology of temperature regulation.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe the physiology of pain	Cognitive (Comprehension)	Nk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
<b>Topic 5 - Physiology of Endocrine glands (8 hr)</b> [Lecture: 6 hours, non-lecture: 2 hours]									
CO 1	Enlists and describe hormones & endocrine glands based on synthesis, secretion, transport, physiological actions, regulation.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe hormones secreted by anterior & posterior pituitary gland, their functions, disorders of pituitary gland (hyper & hypo activity)	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe hormones secreted by the Thyroid gland, their functions & disorders of Thyroid and parathyroid gland (hyper and hypoactivity)	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion Seminar	Written/ Viva voce	F & S	III	
CO 1	Describe hormones secreted by Pancreas,	Cognitive (Comprehension)	Nk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	

	their functions & disorders of Pancreas (hyper and hypoactivity)								
CO 1	Describe hormones secreted by Adrenal cortex gland, their functions & disorders of Adrenal cortex gland (hyper and hypoactivity)	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe hormones secreted by Adrenal medulla gland, their functions & disorders of Adrenal medulla (hyper and hypoactivity)	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Enlist other Glands and their functions	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe the synthesis and functions of local hormones	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
<b>PAPER II</b>									
<b>A3</b> Course outcome	<b>B3</b> Learning Objective (At the end of the session, the students should be able to)	<b>C3</b> Domain/sub	<b>D3</b> Must to know/ desirable to know/Nice to know	<b>E3</b> Level Does/ Shows how/ Knows how/ Know	<b>F3</b> T-L method	<b>G3</b> Assessment	<b>H3</b> Formative /summative	<b>I3</b> Term	<b>J3</b> Integration
<b>AyGU-KS</b>									
<b>Paper II ( 60 Hours )</b>									
<b>Topic-1. Introduction to Dhatu (3 hr) [Lecture: 2 hours, non-lecture: 1 hour]</b>									
CO 1	Explain the etymology, derivation, definition, synonyms and general	Cognitive (Recall)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	<i>Sanskrit Samhita/</i>

	introduction of the term <i>dhatu</i> .									<i>Rognidan Vikriti Vidnyan</i>
CO 1	Explain the difference between <i>dhatu</i> and <i>upadhatu</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I		
CO 1	Explain different theories related to <i>dhatuposhana Nyaya</i> (nourishment of different <i>dhatu</i> s).	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion Seminar	Written / Viva voce	F & S	I		
CO 1	Explain the applicability of <i>nyaya</i> in the different physiological mechanisms.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion Jigsaw	Written/ Viva voce	F & S	I		
CO 1	Describe <i>utpatti &amp; poshana</i> of <i>dhatu</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I		
CO 1	Compile various terminologies related to <i>dhau gati</i> and <i>dhatu poshana</i>	Cognitive (Comprehension)	Dk	Sh	Assignment Tutorial	Self- assessment	SA	I		
CO 1	Mention your opinion about <i>nyaya</i> concept on the basis of different metabolic pathways, transformation, transport of substances through cell membrane.	Cognitive (Application)	Nk	Kh	Group discussion Buzz group	Self- assessment	SA	I		
CO 1	Discuss theory of tissues formation and differentiation in context with physiological changes of aging.	Cognitive (Application)	Nk	Kh	Group discussion Homework based assignment	Self- assessment	SA	I		
CO 1	Discuss stem cells along with concepts of regeneration in <i>Ayurveda</i>	Cognitive (Recall/ Comprehension)	Nk	Kh	Lecture Online teaching aids	self assessment	SA	I		
CO 1	Study <i>Ayurvedic</i> aspect of <i>dhatu sarata</i> and its application	Cognitive (Application)	Nk	Kh	Group discussion Seminar	Self- assessment	SA	I		
	<b>Topic-2. Rasa Dhatu (5 hr)</b> [Lecture: 4 hours, non-lecture: 1 hour]									

CO 1	Explain the etymology, derivation, location, properties, functions and <i>pramana</i> of <i>rasa-dhatu</i> . <i>panchabhautikatva</i> of <i>rasa dhatu</i> .	Cognitive (Recall)	Mk	K	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Describe the functions of <i>rasavaha srotas</i> & <i>mula</i> of <i>rasavaha srotas</i> .	Cognitive (Recall)	Mk	K	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Describe the process of formation of <i>rasa dhatu</i> from <i>ahara rasa</i> , and circulation of <i>rasa-rakta</i> ( <i>rasa-rakta samvahana</i> )	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Describe <i>kshaya-vriddhi</i> & <i>rasapradoshaja vikara</i>	Cognitive (Comprehension)	Mk	Kh	Lecture Assignment	Written/ Viva voce	F & S	I	
CO 1	Description of functioning of <i>hridaya</i> and physiological significance of <i>hridaya</i> .	Cognitive (Comprehension)	Dk	Kh	Lecture Discussion Flipped classroom	Written/ Viva voce	F & S	I	
CO 1	Description of <i>sira</i> , <i>dhamani</i> and <i>srotas</i>	Cognitive (Comprehension)	Nk	Kh	Discussion Video show	Written/ Viva voce	F & S	I	
CO 1	Enumerate <i>ashtavidha sara</i> (8 types of <i>sara</i> ), and describe the features of individuals belonging to <i>tvak-saara purusha</i> .	Cognitive (Recall)	Mk	K	Lecture, Role play, real life experience, Discussion Brainstorming	Written/ Viva voce	F & S	I	
<b>Topic-3. Rakta Dhatu (4 hr)</b> [Lecture: 3 hours, non-lecture: 1 hour]									
CO 1	Explain the etymology, derivation, synonyms, location, properties, functions and <i>pramana</i> of <i>rakta dhatu</i> & explain the <i>panchabhautikatva</i> of <i>rakta dhatu</i> ,	Cognitive (Recall)	Mk	K	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Describe the physiology of <i>raktavaha srotas</i> , and describe the <i>mula</i> of <i>rakta-vaha srotas</i> and mutual interdependence of <i>rakta</i> and <i>pitta</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	

CO 1	Describe the formation of <i>rakta-dhatu</i> , <i>ranjana of rasa</i> by <i>Ranjaka pitta</i> , features of <i>shuddha rakta</i> , specific functions of <i>rakta</i>	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Describe the characteristics of <i>raktasaara Purusha</i>	Cognitive (Recall)	Mk	K	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Describe the manifestations of <i>kshaya and vriddhi</i> and name <i>pradoshaja vikara</i> of <i>raktadhatu</i>	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion Assignment	Written/ Viva voce	F & S	I	<i>Vikriti Vigyana</i>
CO 1	Elaborate the concept about inclusion or exclusion of <i>rakta dhatu</i> as a fourth dosha.	Cognitive (Comprehension)	Nk	Kh	Discussion Brainstorming	Written/ Viva voce	F	I	
<b>Topic-4. Mamsa Dhatu (3 hr)</b> [Lecture: 2 hours, non-lecture: 1 hour]									
CO 1	Describe the etymology, derivation, synonyms, location, properties and functions of <i>mamsa dhatu</i> , physiology of <i>mamsavaha srotas</i> , <i>mula of mamsavaha srotas</i>	Cognitive (Recall)	Mk	K	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Describe the formation of <i>mamsa dhatu</i> and the definition of <i>peshi</i> characteristics of <i>mamsasaara purusha</i> ,	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Describe manifestations of <i>kshaya</i> and <i>vriddhi</i> of <i>mamsa Dhatu</i> & describe the physiological basis of these manifestations. Name <i>mamsa pradoshaja vikara</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion Assignment	Written/ Viva voce	F & S	II	<i>Vikriti Vigyana</i>
<b>Topic-5. Meda Dhatu (4 hr)</b> [Lecture: 3 hours, non-lecture: 1 hour]									

CO 1	Describe the etymology, derivation, location, properties, functions and <i>pramana</i> of <i>meda dhatu</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Describe the <i>medovaha srotas</i> , its <i>mula</i> , the physiology of <i>medovaha srotas</i> , formation of <i>medo dhatu</i>	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Describe the characteristics of <i>medasaara purusha</i> and manifestations of <i>kshaya</i> and <i>vridhhi</i> of <i>meda</i> . Name <i>meda pradoshaja vikara</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion Assignment	Written/ Viva voce	F & S	II	
CO 1	Describe the clinical features of <i>sthaulya</i> and <i>karshya</i> along with the physiological basis of these clinical conditions	Cognitive (Comprehension)	Dk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	<i>Vikriti Vigyana</i>
CO 1	Record the properties of lipid & mamsa dhatu.	Cognitive (Comprehension)	Nk	Kh	Discussion	Self assessment	F	II	
<b>Topic-6. Asthi Dhatu (3 hr)</b> [Lecture: 2 hours, non-lecture: 1 hour]									
CO 1	Describe the definition, synonyms, classification, properties ( <i>guna</i> ), and formation of <i>asthi dhatu</i> .	Cognitive (Comprehension)	Mk	K	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Describe the <i>asthi dhara kala</i> ; relation with <i>purishdharakala</i> and the features of <i>asthi sarata</i> .	Cognitive (Comprehension)	Mk	K	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Describe the applied physiology of <i>asthi dhatu</i> ( <i>asthi vridhhi/ asthi kshaya</i> ) and name <i>asthi pradoshaja vikara</i>	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion Assignment	Written/ Viva voce	F & S	II	<i>Vikriti Vigyana</i>

	<b>Topic-7 Majja Dhatu (4 hr)</b> [Lecture: 3 hours, non-lecture: 1 hour]								
CO 1	Describe the definition, synonyms and location ( <i>sthana</i> ) of <i>majja dhatu</i> .	Cognitive (Recall)	Mk	K	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Describe the formation of <i>majja dhatu majjavaha srotas</i> and its <i>mula</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Describe <i>majja dhara kala</i> in relation with <i>pittadhara kala</i> and the features of <i>majja sarata</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Describe applied physiology of <i>majja dhatu</i> ( <i>majja vridhhi and kshaya</i> ) and name <i>majja pradoshaja vikara</i>	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion Assignment	Written/ Viva voce	F & S	II	<i>Vikriti Vigyana</i>
CO 1	Comment on concept of <i>majja dhatu</i> and bone marrow	Cognitive (Comprehension)	Dk	Kh	Discussion Online teaching aids	Self assessment	F	II	
	<b>Topic-8. Shukra Dhatu (4 hr)</b> [Lecture: 3 hours, non-lecture: 1 hour]								
CO 1	Describe the etymology and derivation of <i>shukra dhatu</i> , location, properties, <i>pramana</i> functions of <i>shukra dhatu</i> .	Cognitive (Recall)	Mk	K	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Describe the formation of <i>shukra dhatu, poshana krama</i> and its <i>updathu</i> and <i>mala</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion Puzzle	Written/ Viva voce	F & S	II	
CO 1	Describe the <i>mula</i> of <i>shukravaha srotas</i> and the properties of <i>shuddha shukra</i> along with <i>shukra saara purusha</i> symptoms.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Describe the features of <i>kshaya &amp; vridhhi</i> of	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	<i>Vikriti Vigyana</i>

	<i>shukra dhatu &amp; shukra pradoshaja vikara</i>				Assignment				
CO 4	Identify histological structure explain structure of different tissue (dhatu)	Cognitive (Comprehension) Psychomotor	Mk	Kh	Demonstration Perform	Practical Skill assessment OSPE	F & S		
<b>Topic-9. Ashraya- Ashrayi Bhava (2 hr)</b> [Lecture: 1 hour, non-lecture:1 hour]									
CO 1	Describe the concept of <i>ashraya-ashrayi bhava</i> i.e. inter-relationship among <i>dosha, dhatu mala and srotas</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	<i>Vikriti Vigyana</i>
CO 1	Describe the applied physiology of diseases affecting <i>saptadhatu</i> enlisted under dhatu <i>pradoshaja vikara</i> .	Cognitive (Comprehension)	Dk	Kh	Discussion Seminar	Written	F	III	
CO 1	Explain use of <i>Ashraya-Ashrayi Bhava</i> in laghan bruhan.	Cognitive (application)	Nk	Kh	Discussion	Self- assessment	SA	III	
<b>Topic -10. Oja (4 hr)</b> [Lecture: 3 hours, non-lecture: 1 hour]									
CO 1	Recall etymological derivation, definition, classification, and <i>pramana</i> of <i>oja</i>	Cognitive (Recall)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe the process of formation of <i>ojas</i> along with locations and properties	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe the concept of <i>vyadhikshamatva</i> , explain <i>bala vriddhikara bhava</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Classify <i>bala</i> and describe etiological factors ( <i>kshaya karan</i> ) for <i>oja visramsas, vyapat and kshaya</i> and elaborate	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	<i>Vikriti Vigyana</i>

	the manifestation of these clinical conditions.								
CO 1	Collect different opinoins on oja given by different aacharya and try to understand the logic behind it.	Cognitive (Recall)	Nk	Kh	Discussion	Written	F	III	
CO 1	Interpret your opinion about oja-bala-kapha in its normal state.	Cognitive (Recall)	Nk	Kh	Discussion	Self-assessment	SA	III	
	<b>Topic-11. Upadhatu (7 hr)</b> [Lecture:6 hours, non-lecture: 1 hour]								
CO 1	Describe the general introduction, etymological derivation and definition of the term <i>upadhatu</i>	Cognitive (Recall)	Mk	K	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe the formation, nourishment, properties, location and functions of each <i>upadhatu</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe the characteristic features and methods of assessing <i>shuddha</i> and <i>dushita stanya</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	<i>Vikriti Vigyana</i>
CO 1	Describe the characteristic features of <i>vridhhi</i> and <i>kshaya</i> of <i>stanya</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe characteristic features of <i>shuddha</i> and <i>dushita artava</i> along with enumerating the differences between <i>raja</i> and <i>artava</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe <i>artava-vaha srotas</i> and its <i>mula</i> along with the common clinical conditions related to <i>artava-vaha srotas</i>	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	<i>Vikriti Vigyana</i>

	<i>(kashtartava, vandhyata, pradara etc).</i>								
CO 1	Describe the classification, thickness of each layer and functions of <i>tvak</i>	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Interpret the skin layer as per contemporary science.	Cognitive (Recall)	Nk	Kh	Discussion	Written	F	III	
<b>Topic 12. Mala (8 hr)</b> [Lecture: 6 hours, non-lecture: 2 hours]									
CO 1	Describe the etymological derivation and definition of the term <i>mala</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Enumerate <i>aharamala</i> and describe of the process of formation of <i>aharamala</i> .	Cognitive (Recall)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe the etymological derivation, definition, formation, properties, quantity and functions of <i>purisha</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe the physiology of <i>purishavaha srotas</i> , <i>purish visarjana</i> and manifestations of <i>vriddhi</i> and <i>kshhaya</i> of <i>purisha</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Explain the relation between <i>purishdhara kala</i> and <i>asthidhara kala</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe the etymological derivation, definition, formation, properties, quantity and functions of <i>mutra</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe the physiology of <i>mutravaha srotas</i> and the process of urine formation and <i>mutra visarjana</i> in Ayurveda.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	

CO 1	Explain the manifestations of <i>vridhhi</i> and <i>kshhaya</i> of <i>mutra</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Explain the urge of micturition & defecation in perspective of reflexes	Cognitive (Application)	Nk	Kh	Discussion	Self-assessment	SA	III	
CO 1	Describe and enumerate <i>dhatumala</i> and describe the functions of each type of <i>dhatumala</i>	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Explain the etymological derivation, definition, formation and functions of <i>sveda</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Explain the functions of <i>svedvaha srotas</i> along with describing the manifestations of <i>vridhhi</i> and <i>kshaya</i> of <i>sveda</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Review Ayurveda compendia for several colour of purish and <i>mutra</i> as per their different diseased conditions.	Cognitive (Application)	Nk	Kh	Discussion	Self-assessment	SA	III	
<b>Topic 13. Indriya vijnyana (2 hr)</b> [Lecture: 1 hour, non-lecture: 1 hour]									
CO 1	Describe the <i>pancha-jnyaanendriya</i> and physiology of perception of <i>shabda</i> , <i>sparsha</i> , <i>rupa</i> , <i>rasa</i> and <i>gandha</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion Tutorial	Written/ Viva voce	F & S	III	<i>Padarth vidnyan</i>
CO 1	Describe the physiology of <i>karmendriya</i>	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
<b>Topic 14. Manas (3 hr)</b> [Lecture: 2 hours, non-lecture: 1 hour]									
CO 1	Describe location and properties, functions and objects of <i>manas</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	

CO 7	Describe the physiology of <i>dhee, driti, smriti</i> and <i>manovaha srotas</i> along with the applied physiology of <i>unmada and apasmara</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion Real life experience	Written/ Viva voce	F & S	III	<i>Kayachikitsa</i>
CO7	Describe <i>kriyatmak</i> (physiological) importance of <i>manas</i>	Cognitive (Comprehension)	Dk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
<b>Topic 15. Atma (2 hr)</b> [Lecture: 2 hours, non-lecture: 0 hours]									
CO 1	Describe properties and functions of <i>atma</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S		
CO 7	Enumerate the difference between <i>paramatma</i> and <i>jivatma</i> , characteristic features of <i>atma</i> in living beings.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	<i>Padarth vidnyan</i>
CO 7	Explain characteristic features of <i>atma</i> in living beings.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO7	Describe <i>kriyatmak</i> (physiological) importance of <i>atma</i>	Cognitive (Comprehension)	Dk	Kh	Lecture Discussion tutorials	Written/ Viva voce		III	
<b>Topic 16. Nidra &amp; Svapna (2 hr)</b> [Lecture: 2 hours, non-lecture: 0 hours]									
CO 1	Describe the process of <i>nidrotpatti</i> , classify <i>nidra</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Explain the physiological and clinical significance of <i>nidra</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe <i>svapnotpatti</i> and types of <i>svapna</i> .	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Discuss about different types of <i>swapna</i> among your friends and try to understand relation of <i>swapna &amp; prakriti</i> .	Cognitive (Comprehension)	Nk	Kh	Group Discussion	Team assessment	TA	III	

	<b>Part B (40 Hours) –</b>								
	<b>Topic 1. Physiology of Hemopoietic System (7 hr)</b> [Lecture: 5 hours, non-lecture: 2 hours]								
CO 1	Describe the composition, functions of blood and blood cells.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Stages and development of RBCs, WBCs, platelets.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Describe the composition and functions of bone marrow	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Describe the process of erythropoiesis and explain necessary factors for erythropoiesis.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Describe the formation & destruction of RBCs	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Describe the structure, types, synthesis and functions of haemoglobin along with abnormalities of Hb.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Describe the types of WBCs	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Describe the mechanism of hemostasis, (coagulation of blood) and blood clotting factors.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion Seminar	Written/ Viva voce	F & S	I	
CO 1	Describe the ABO & Rh system of blood group and explain the physiological basis of blood groups.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	Medical Physiology
CO 1	Explain the concept of erythroblastosis fetalis on the basis of Rh incompatibility.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion Seminar	Written/ Viva voce	F & S	I	
CO 1	Describe the classification and	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	

	functions of plasma proteins.								
CO 1	Describe the properties and hemostasis functions of platelets.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Describe the physiological basis of manifestations of different blood disorders (anaemia, jaundice etc.)	Cognitive (Comprehension)	Dk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Describe the functions of spleen.	Cognitive (Comprehension)	Dk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Describe the functions of lymph.	Cognitive (Comprehension)	Dk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
<b>Topic 2. Immune System (2 hr)</b> [Lecture: 2 hours, non-lecture: 0 hours]									
CO 1	Describe classification of immunity (Innate, acquired and artificial),	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Describe the different mechanisms involved in immunity: Humoral (B-cell mediated) and T-Cell mediated immunity.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Distinguish between the passive immunization and active immunization	Cognitive (Comprehension)	Dk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Describe the applied physiology of immunity: Immunodeficiency diseases, Hypersensitivity reactions, Auto-immune diseases etc.	Cognitive (Comprehension)	Dk	Kh	Lecture Discussion Seminar	Written/ Viva voce	F & S	I	
<b>Topic 3. Cardiovascular Physiology (7 hr)</b> [Lecture: 5 hours, non-lecture: 2 hours]									
CO 1	Describe the mechanical and electrical properties	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	

	of heart muscles, describe different phases of the Cardiac cycle.								
CO 1	Describe the physiological and clinical significance of heart sounds.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Describe the physiology of regulation of cardiac output and venous return.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Describe the physiological basis of ECG.	Cognitive (Comprehension)	Dk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Describe the regulation of heart-rate and arterial pulse,	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Define and describe the regulation of systemic arterial blood pressure	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Describe the physiology of fetal circulation.	Cognitive (Comprehension)	Dk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Define and describe the regulation of systemic arterial blood pressure	Cognitive (Comprehension)	Dk	Kh	Lecture Discussion	Written/ Viva voce	F & S	I	
CO 1	Describe the history of the discovery of blood circulation	Cognitive (Comprehension)	Nk	Kh	Online	Self assessment	SA	I	
<b>Topic 4. Muscle physiology (2 hr)</b> [Lecture: 2 hours, non-lecture: 0 hours]									
CO 1	Compare and contrast the functions and properties of skeletal muscles, cardiac muscles and smooth muscles.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Describe the physiology of muscle contraction of all types of muscles.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
<b>Topic 5. Skin, Adipose Tissue and circulating Lipids (3 hr)</b> [Lecture: 2 hours, non-lecture: 1 hour]									
CO 1	Describe the functions of the skin, sweat glands, sebaceous glands and subcutaneous tissue	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	

CO 1	Describe the functions of Adipose Tissue including adipokines	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Describe the process of formation & metabolism of lipoproteins like VLDL, LDL and HDL and that of triglycerides.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Describe the functional anatomy and physiology of the male reproductive system	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Describe the physiology of regulation of spermatogenesis, functions of testosterone and male sexual act	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Describe physiology of the female reproductive system including oogenesis, ovulation and hormonal regulation of the menstrual cycle	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Describe the functions of placenta	Cognitive (Comprehension)	Dk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Describe the physiology of lactation	Cognitive (Comprehension)	Dk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
CO 1	Describe the applied physiology of the reproductive system of male and female infertility.	Cognitive (Comprehension)	Nk	Kh	Lecture Discussion	Written/ Viva voce	F & S	II	
<b>Topic 7. Renal Physiology (6 hr)</b> [Lecture: 4 hours, non-lecture: 2 hours]									
CO 1	Describe the functional anatomy of kidney.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe the functions of kidney, ureters and bladder.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe stages of the mechanism of urine formation.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion Semiar	Written/ Viva voce	F & S	III	

CO 1	Describe control of micturition.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe the role of Juxta glomerular apparatus in regulation of blood pressure and pH of body fluids.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	Medical Physiology
CO 1	Describe the applied physiology of the urinary system (urolithiasis, acute and chronic renal failure etc).	Cognitive (Comprehension)	Dk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe the physiology of special senses.	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe the visual process and visual pathway	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe the mechanism of hearing and auditory pathway	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe the taste, smell and skin sensation	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	
CO 1	Describe the physiology of sleep and dreams	Cognitive (Comprehension)	Mk	Kh	Lecture Discussion	Written/ Viva voce	F & S	III	

## List of Practicals

<b>PRACTICALS (Marks-100)</b>				
	<b>List of Topics</b>	<b>Term</b>	<b>Lecture</b>	<b>Non-Lecture</b>
1	Dhatu sararata parikshana	<b>I</b>	0	10
2.	Demonstrate laboratory equipment (spotting)	<b>I</b>	0	1
3.	Demonstrate blood collection	<b>I</b>	0	1
4.	Estimate haemoglobin	<b>I</b>	0	2
5.	Estimate bleeding time & clotting time	<b>I</b>	0	2
6.	Estimate blood grouping	<b>I</b>	0	2
7.	Prakriti parikshana	<b>II</b>	0	20
8.	Dosha vriddhi kshaya parikshana	<b>II</b>	0	4
9.	Dhatu vriddhi kshaya parikshana	<b>II</b>	0	5
10.	Nadi parikshana	<b>II</b>	0	3
11.	Pulse examination	<b>II</b>	0	2
12.	WBC estimation	<b>II</b>	0	2
13.	RBC estimation	<b>II</b>	0	2
14.	DLC estimation	<b>II</b>	0	2
15.	Measurement of Blood pressure	<b>II</b>	0	2
16.	Perform the procedure Inspection of respiratory system	<b>II</b>	0	2
17.	Perform the procedure Inspection of heart sound	<b>II</b>	0	3
18.	Agni parikshana	<b>III</b>	0	6
19.	Koshtha parikshana	<b>III</b>	0	2
20.	Urine examination	<b>III</b>	0	2
21.	Demonstrate ESR, PCV	<b>III</b>	0	1
22.	Observe the procedure of ECG	<b>III</b>	0	2
23.	Perform the procedure of examining the cranial nerves and reflexes	<b>III</b>	0	2

**Table 4: Learning objectives (Practical) of AyUG- KS**

<b>A4 Course outcom e</b>	<b>B4 Learning Objective  (At the end of the session, the Students should be able to)</b>	<b>C4 Domain/ sub</b>	<b>D4 Must to know/ desirabl e to know/Ni ce to know</b>	<b>E4 Level Does/ Shows how/ Knows how/ Know</b>	<b>F4 T-L method</b>	<b>G4 Assessment</b>	<b>H4 Formativ e /summati ve</b>	<b>I4 Te rm</b>	<b>J4 Integratio n</b>
<b>AyUG – KS Practical (100 marks) (Total 200 Hr)</b>									
<b>Practical (100 marks) =(Kriya Sharir 50 + Physiology 30 + Non Lecture practical activities 20)</b>									
<b>1. Assessment of prakriti parikshana (20 classes) [Lecture: 0 hours, non-lecture: 20 hours]</b>									
CO 3	Describe the procedure of <i>prakriti parikshan</i> of CCRAS portal.	Cognitive	Mk	Kh	Lecture Demonstration Discussion Observe Tutorial	Practical Viva voce	F & S	II	
CO 3	Demonstrate <i>prakriti parikshan</i> under the supervision of teacher.	Psychomotor	Mk	Sh	Demonstration in practical room & Bed side clinic Discussion	Viva voce	F & S	II	
CO 3	Determines <i>prakriti</i> of a paerson in an individual independently	Psychomotor	Mk	Dose	Demonstration in practical room & Bed side clinic Discussion Perform	Practical Viva voce Skill assessment OSPE, DOPS, CBD, Simulation	F & S	II	
CO 1	Recite verses of <i>vata, pitta &amp; kapha prakriti</i> .	Cognitive (Recall Comprehe nsion)	Dk	Kh	Discussion Recitation	Viva voce	F & S	II	
<b>2. Assessment of dhatusarata parikshana (10 classes) [Lecture: 0 hours, non-lecture: 10 hours]</b>									
CO 2	Describe the procedure of	Cognitive	Mk	Kh	Lecture Demonstration Discussion Observe	Practical Viva voce	F & S	I	

	<i>dhatuserata parikshana</i>								
CO 2	Demonstrate <i>dhatuserata parikshana</i> under the supervision of the teacher.	Psychomotor	Mk	Sh	Demonstration in practical room & Bed side clinic Discussion Assist	Viva voce	F & S	I	
CO 2	Evaluates <i>dhatuserata</i> in an individual independently	Psychomotor	Mk	Dose	Demonstration Bed side clinic Discussion Perform	Practical Viva voce Skill assessment OSPE, DOPS, CBD, Simulation	F & S	I	
CO 1	Recite verses of <i>ashta dhatuserata</i> .	Cognitive (Recall & Comprehension)	Dk	Kh	Discussion Recitation	Viva voce	F & S	I	
<b>3. Assessment of agni parikshana (6 classes) [Lecture: 0 hours, non-lecture: 6 hours]</b>									
CO 2	Describe the procedure of <i>agni parikshana</i>	Cognitive/comprehension	Mk	Kh	Lecture Demonstration Discussion Observe	Practical Viva voce	F & S	III	
CO 2	Demonstrate <i>agni parikshana</i> under the supervision of the teacher.	Psychomotor	Mk	Sh	Demonstration Bed side clinic Discussion Assist	Viva voce	F & S	III	
CO 2	Analyse <i>agni</i> in an individual independently	Psychomotor	Mk	Dose	Demonstration Bed side clinic Discussion Perform	Practical Viva voce Skill assessment OSPE	F & S	III	
CO 1	Recite verses of <i>agni</i> .	Cognitive (Recall & Comprehension)	Dk	Kh	Discussion Recitation	Viva voce	F & S	III	
<b>4. Assessment of koshtha parikshana (2 classes) [Lecture: 0 hours, non-lecture: 2 hours]</b>									
CO 2	Discuss the procedure of <i>koshtha parikshana</i>	Cognitive	Mk	Kh	Lecture Demonstration Discussion Observe	Practical Viva voce	F & S	III	
CO 2	Demonstrate <i>koshtha parikshana</i> under the	Psychomotor	Mk	Sh	Demonstration Bed side clinic Discussion	Viva voce	F & S	III	

	supervision of the teacher.				Assist				
CO 2	Evaluate <i>koshtha</i> of an individual independently	Psychomotor or	Mk	Dose	Demonstration Bed side clinic Discussion rform	Practical Viva voce Skill assessment OSPE	F & S	III	

<b>5. Assessment of dosha vrddhi kshaya lakshana (4 classes) [Lecture: 0 hours, non-lecture: 4 hours]</b>									
CO 3	Discuss the procedure of <i>dosha vrddhi kshaya lakshana</i>	Cognitive	Mk	Kh	Lecture Demonstration Discussion Observe	Practical Viva voce	F & S	II	
CO 3	Demonstrate <i>dosha vrddhi kshaya parikshana</i> under the supervision of the teacher.	Psychomotor	Mk	Sh	Demonstration Bed side clinic Discussion Assist	Viva voce	F & S	II	
CO 3	Perform <i>dosha vrddhi kshaya parikshana</i> in an individual independently	Psychomotor	Mk	Dose	Demonstration Bed side clinic Discussion Perform	Practical Viva voce Skill assessment OSPE	F & S	II	
CO 1	Recite verses of <i>dosha vrddhi kshaya</i> .	Cognitive (Recall Comprehension)	Dk	Kh	Discussion Recitation	Viva voce	F & S	II	
<b>6. Assessment of dhatu vrddhi kshaya parikshana (5 classes) [Lecture: 0 hours, non-lecture: 5 hours]</b>									
CO 3	Describe the procedure of <i>dhatu vrddhi kshaya lakshana</i>	Cognitive	Mk	Kh	Lecture Demonstration Discussion Observe	Practical Viva voce	F & S	II	
CO 3	Demonstrate <i>dhatu vrddhi kshaya parikshan</i> under the supervision of the teacher.	Psychomotor	Mk	Sh	Demonstration Bed side clinic Discussion Assist	Viva voce	F & S	II	
CO 3	Perform <i>dhatu vrddhi kshaya parikshan</i> in an individual independently	Psychomotor	Mk	Dose	Demonstration Bed side clinic Discussion Perform	Practical Viva voce Skill assessment OSPE	F & S	II	
CO 1	Recite verses of	Cognitive	Dk	Kh	Discussion	Viva voce	F & S	II	

	<i>dhatu vrddhi kshaya.</i>	(Recall & Comprehension)			Recitation				
--	-----------------------------	--------------------------	--	--	------------	--	--	--	--

	<b>7. Assessment of nadi parikshana (3 classes) [Lecture: 0 hours, non-lecture: 3 hours]</b>								
CO 5	Describe the procedure of <i>nadi parikshana</i>	Cognitive	Mk	Kh	Lecture Demonstration Discussion Observation Tutorial	Practical Viva voce	F & S	II	
CO 5	Demonstrate <i>nadi parikshana</i> under the supervision of the teacher.	Psychomotor	Mk	Sh	Demonstration Bed side clinic Discussion Assist	Viva voce	F & S	II	
CO 5	Find out recent advances in nadi pariksha	Cognitive	Mk	Kh	Lecture Demonstration Discussion Observe	Practical Viva voce OSPE	F & S	II	
<b>Part B 30 practical of 2 hr each</b>									
[Lecture: 0 hours, non-lecture: 30 hours]									
CO 4	Explain the general laboratory etiquette  demonstrate the use of laboratory equipment.	Cognitive  Psychomotor	Mk	Sh	Lecture Demonstration Discussion Observe	Practical Viva voce Skill assessment OSPE	F & S	I	
CO 4	Discuss procedure of collection of a blood sample – prick, venepuncture method, use of anticoagulants.	Cognitive	Mk	Kh	Lecture Demonstration Discussion Assist	Viva voce	F & S	I	
CO 4	Describe Observe procedure of haemoglobin estimation, bleeding time and clotting time, blood grouping and Rh typing,	Cognitive	Mk	Kh	Lecture Demonstration Discussion Assist	Viva voce	F & S	I	

	differential Leukocyte Counting procedure.								
CO 4	Evaluate Hb, Bleeding time, clotting time, blood grouping & Rh typing, several Leukocyte Count (independently).	Psychomotor	Mk	Sh	Lecture Demonstration Discussion Perform	Practical Viva voce Skill assessment OSPE	F & S	I	
CO 4	Describe the procedure of WBC counting, RBC counting.	Cognitive	Mk	Kh	Lecture Demonstration Discussion Assist	Viva voce	F & S	II	
CO 4	Count WBC, RBC (independently).	Psychomotor	Mk	D	Perform	Practical	F	II	
CO 4	Describe the procedure of ESR, PCV	Cognitive	Mk	Sh	Lecture Demonstration Discussion Assist	Viva voce	F	III	
CO 4	Describe the procedure of physical and chemical examination of urine.	Cognitive	Mk	Kh	Lecture Demonstration Discussion Assist	Viva voce	F & S	III	
CO 4	Identify physical and chemical properties of urine.	Psychomotor	Dk	Sh	Lecture Demonstration Discussion Assist	Practical Viva voce Skill assessment OSPE, DOPS	F & S	III	
CO 4	Discuss the procedure of pulse examination demonstrated.	Cognitive	Mk	Kh	Lecture Demonstration Discussion Assist	Viva voce	F & S	II	
CO 4	Examine pulse independently.	Psychomotor	Mk	Sh	Lecture Demonstration Discussion Perform	Practical Viva voce Skill assessment OSPE	F & S	II	
CO 4	Describe the procedure of measurement of blood pressure	Cognitive	Mk	Kh	Lecture Demonstration Discussion Assist	Viva voce	F & S	II	

CO 4	Measure blood pressure (independently).	Psychomotor	Mk	Sh	Lecture Demonstration Discussion Perform	Practical Viva voce Skill assessment OSPE	F & S	II	
CO 4	Discuss the procedure of inspection of CVS and assessment of heart sounds	Cognitive	Mk	Kh	Lecture Demonstration Discussion Assist	Viva voce	F & S	II	
CO 4	Illustrate inspection of CVS and assessment of heart sounds (independently).	Psychomotor	Mk	Sh	Lecture Demonstration Discussion Perform	Practical Viva voce Skill assessment OSPE	F & S	II	
CO 4	Discuss the procedure of ECG recording demonstrated by the teacher.	Cognitive	Mk	Kh	Lecture Demonstration Discussion Assist	Viva voce Spotting	F & S	II	
CO 4	Discuss procedure of inspection of the respiratory system demonstrated by the teacher.	Cognitive	Mk	Kh	Lecture Demonstration Discussion Assist	Viva voce	F & S	II	
CO 4	Examine of the respiratory system (independently).	Psychomotor	Mk	Sh	Lecture Demonstration Discussion Perform	Practical Viva voce Skill assessment OSPE	F & S	II	
CO 4	Discuss the procedure of examining the cranial nerves and reflexes (superficial/ deep /visceral) demonstrated by the teacher.	Cognitive	Mk	Kh	Lecture Demonstration Discussion Assist	Viva voce Skill assessment OSPE	F & S	III	
CO 4	Perform the procedure of examining the cranial nerves and	Psychomotor	Mk	Sh	Lecture Demonstration Discussion Perform	Practical Viva voce Skill assessment OSPE	F & S	III	

	reflexes (superficial/deep/ visceral) by students independently.								
--	--	--	--	--	--	--	--	--	--

**Table 5: Non-Lecture Activities Course AyUG- KS**

<b>Theory Non Lecture 50 (Paper I -25 &amp; Paper II-25)</b>		<b>No of Activity hours</b>
1.	Assignment - homework based	3
2.	Brainstorming	2
3.	Buzz group	1
4.	Case based learning	1
5.	Confusion technique	1
6.	Debate	1
7.	Demonstration	2
8.	Direct observation skill (DOPS)	1
9.	Flipped classroom	1
10.	Group Discussion	3
11.	Jigsaw or puzzle	1
12.	Mnemonics	2
13.	Model based learning	1
14.	Online teaching aids	1
15.	Panel discussion	1
16.	Problem based learning	2
17.	Real-life experience	1
18.	Recitation	3
19.	Role Play	1
20.	Self directed learning	3
21.	Seminar by students	5
22.	Simulated condition	1
23.	Skill assessment	2
24.	Symposium	2
25.	Team project work	1
26.	Think-Pair-Share	2
27.	Tutorial	3
28.	Video show	2
<b>Practical Non Lecture 100 (200 hours)</b>		
1.	Ayurveda Practicals – 50	100
2.	Modern Practicals – 30	60
3.	Activity based learning – 20	40
	Communication Skills, Small project / Experiment designing, Task-based learning, Teamwork based learning, Team project, Problem Based Learning (PBL)/(CBL), Group Discussion, Workshops, Field visits, Preparation of charts 1, models and computerized simulation models etc. , Seminar presentations by students	
<b>Total Non Lecture hours</b>		<b>250</b>

### Additional Suggested topics for tutorials

Point No.	Name of Topic
T – 1 CO 6	<i>Atma lakshana</i>
T – 2 CO3	Characteristics of <i>Prakriti Eka doshaja, dwandwaja and sama prakriti. Clinical importance of deha prakriti, anukatva.</i>
T – 3 CO5	<i>Nadi vigyan</i>
T – 4 CO6	<i>Anukatva</i>
T – 5 CO6	<i>Indriya panch panchak and physiological study of panchajyanendriya and panchakarmendriya.</i>
T – 6 CO6	<i>Meanings of terminologies used for dhatu poshana nyaya related to dhatu poshana</i>
T – 7 CO1	<i>Ahara dravya vargikarana</i>
T – 8 CO1	<i>Avasthapaka &amp; Vipak</i>

### Suggested topics for seminar topics

Sr. No.	Content
S – 1 CO8	<i>Tridosha</i>
S – 2 CO8	<i>Agni</i>
S – 3 CO8	<i>Rasa rakta samvahan</i>
S – 4 CO8	<i>Pranavah srotas and shwasana prakriya</i>
S – 5 CO8	<i>Ashtavidh sara</i>
S – 6 CO8	<i>Trividh nyaya</i>
S – 7 CO8	<i>Prakriti</i>
S – 8 CO8	Basic concept of nervous system
S – 9 CO8	Rh Incompatibility
S – 10 CO8	Digestion of Carbohydrates, proteins & fats
S – 11 CO8	Blood clotting mechanism
S – 12 CO8	Immune system

## PREFACE

All Medical sciences whether ancient or modern, needs frequent updating. Acharya Vagbhata stresses upon reform of Ayurveda according to the present time (yuganurupasandarbha). The syllabus of Ayurveda also needs reformation for effective dissemination of principles of Ayurveda which is strongly based on Padartavijnanam. Acharya Vagbhata says one who seeks long life should respect Ayurveda by four strategies that are knowledge (Adhiti), comprehension(Bodha)skill(Acharana) and Attitude(pracharana).These teaching methodologies are evolved from the ancient upanishadic way of teaching(Adhyapanavidhi).The new principles of teaching strategies of blooms taxonomy correlate with the ancient way of teaching and the syllabus of Padarthavijnanam has been revamped according to the need of hour.

Padartha Vijnanam is a unique and mandatory subject needed for learning the stream of Ayurveda. It is the combination of science and philosophy. One can say that the science and philosophy are the two sides of the same coin. The search behind “existence of world/self” when progresses outward it travels the path of science and when this search is inwards it becomes philosophy. Thus, Padartha Vijnanam is an essential base of Ayurveda education. When the foundation becomes strong building also becomes strong.

Padartha Vijnanam not only provides the platform to understand Ayurveda better but it also helps the students to appreciate the moral values beneficiating them in developing the personality. As mentioned in graduate attributes this subject helps the student to become eloquent communicator and self-directed learner who constantly endeavors to advance knowledge and skills to improve healthcare and social well-being.

This syllabus reform of Padartha Vijnanam has taken care of adopting the modern teaching-learning methodology well-merging with the ancient one. This will definitely enhance the understanding of the subject in a better way.

Introduction of practicals is the zest for the subject. As we all know- “I hear, and I forget. I see and I remember. I do, and I understand”. The teaching learning process must be joyful along with lecture methods like group discussions, debate, roleplay and PBL. They are also mentioned and the flexibility is kept. Here in this syllabus, the activity book is introduced to induce activity-based learning. This will definitely create the interest in the subject. There are some self-learning activities also which will induce the thirst for the knowledge in the student. This will help the student to understand theoretical concepts in a lucid way and also provides hands on experience

<b>2</b>	Padartha and Darshana Nirupana 2.1 Padartha Lakshana, Enumeration and classification of Padartha, Bhava and Abhava Padartha, Padartha according to Acharya Charaka (Karana-Padartha). 2.2 Etymological derivation of the word “Darshana”. Classification and general introduction to 9 Schools of Indian Philosophy with an emphasis on: Nyaya, Vaisheshika, Sankhya, Yoga, Meemamsa and Vedanta darshana. 2.3 Ayurveda as unique and independent school of thought (philosophical individuality of Ayurveda). 2.4 Principles and examples in contemporary sciences which will enhance understanding concept of Padartha. 2.5 Relevance of Study of Darshana and Padartha Vignana in Ayurveda	<b>I</b>	<b>25</b>	<b>10</b>	<b>14</b>
<b>3.</b>	Dravya vijnaneeyam 3.1 Dravya: Lakshana, Classification and Enumeration 3.2 Panchabhuta: Various theories regarding the creation (theories of Taittiriyaopanishad, Nyaya-Vaisheshika, Sankhya-Yoga, Sankaracharya, Charaka and Sushruta), Lakshana and qualities of each Mahabhoota. 3.3 Kala: Etymological derivation, Lakshana, division/units and significance. 3.4 Dik: Lakshana, division and significance. 3.5 Atma: Lakshana, classification, seat, Gunas, Linga according to Charaka, the method / process of knowledge formation (atmanah jnasya pravrittih). 3.6 Purusha: According to Ayurveda - Ativahikapurusha/ Sukshmarsharira/ Rashipurusha/ Chikitsapurusha/ Karmapurusha/ Shaddhatvatmakapurusha. 3.7 Manas: Lakshana, Synonyms, Qualities, Objects, Functions, dual nature of mind (ubhayaatmakatvam), as a substratum of diseases, Influence of Panchabhoutika aahara and aushadha (penta-elemental diet) on manas. 3.8 Role of Panchamahabhuta and Triguna in Dehaprakriti and Manasaprakriti respectively. 3.9 Tamas as the tenth Dravya. 3.10 Practical study/Application and Importance of each Kaarana dravya in Ayurveda. 3.11 Principles and examples in contemporary sciences	<b>II</b>	<b>48</b>	<b>14</b>	<b>20</b>

	which will enhance understanding concept of Kaarana dravya.				
4.	Guna vijnaneeyam 4.1 Etymological Derivation, Classification and Enumeration according to various Darshana and Charaka, 4.2 Lakshana and Classification of Sartha Guna, Gurvadiguna, Paradiguna, Adhyatmaguna (41 Guna) 4.3 Gunapradhanyata (Importance of Guna) 4.4 Practical / clinical application of each Guna in Ayurveda 4.5 Principles and examples in contemporary sciences which will enhance understanding concept of Guna.	II		4	6
5.	Karma vijnaneeyam 5.1 – Introduction of concept of Karma According to Darshanaand Ayurveda – Classification of Karma 5.3 - Practical application of karma 5.4 - Principles and examples in contemporary sciences which will enhance understanding concept	II		2	4
6.	Samanya vijnaneeyam 6.1 – Introduction of concept of Saamaanya According to Darshana and Ayurveda. – Classification of Saamaanya 6.3 - Practical application of saamaanya 6.4 - Principle and examples in contemporary sciences which will enhance understanding theconcept of Saamanya.	III		3	6
7.	Vishesha vijnaneeyam 7.1 – Introduction of concept of Vishesha according to Darshana and Ayurveda 7.2 - Classification of Vishesha 7.3 - Practical Application of vishesha 7.4- Principles and examples in contemporary sciences which will enhance understanding the concept of Vishesha	III	27	3	6
8.	Samavaya vijnaneeyam 8.1 – Introduction of concept of Samavaaya According toDarshana and Ayurveda. 8.2 – Practical application of Samavaaya 8.3- Principles and examples in contemporary sciences which will enhanceunderstanding theconcept of Samavaya	III		2	4
9	Abhava vijnaneeyam 9.1 – Introduction of concept of Abhaava According to Darshana and Ayurveda. 9.2 – Classification of Abhaava. 9.3 – Practical application of Abhaava 9.4- Principles and examples in contemporary sciences which will enhance understanding the concept of Abhava.	III		2	4

<b>Paper II</b>					
	<b>A2 List of Topics – AyUG-PV</b>	<b>B2 Term</b>	<b>C2 Marks</b>	<b>D2 Lecture hours</b>	<b>E2 Non-Lecture hours</b>
<b>1</b>	<b>Pariksha</b> 1.1. Definition, Significance, Necessity and Use of Pariksha. 1.2. Definition of Prama, Aprama, Prameya, Pramata, Pramana. 1.3. Significance and importance of Pramana, Enumeration of Pramana according to different schools of Philosophy. 1.4. Four types of methods for examination in Ayurveda (Chaturvidha-Parikshavidhi), Pramana in Ayurveda. 1.5. Subsudation of different Pramanas under three Pariksha. 1.6. Practical application of methods of examination (Parikshavidhi) in Nidan and Chikitsa.	<b>I</b>	26	6	12
<b>2</b>	<b>2. Aptopadesha Pariksha/Pramana</b> 2.1. Lakshana of Aptopadesha, Lakshana of Apta. 2.2. Lakshana of Shabda, and its types. 2.3. Shabdavritti-Abhidha, Lakshana, Vyanjana and Tatparyakhya. Shaktigrahahetu. 2.4. Vaakya: Characteristics, Vaakyarthajnanahetu- Aakanksha, Yogyata, Sannidhi. 2.5. Importance of Aptopadesha in maintaining Health, Prevention of Diseases, Diagnostics, Therapeutics and Research.	<b>I</b>		6	10
<b>3.</b>	<b>3. Pratyaksha Pariksha/Pramana</b> 3.1. Lakshana of Pratyaksha, types of Pratyaksha- Nirvikalpaka- Savikalpaka with description, description of Laukika and Alaukika types and their further classification. 3.2. Indriya-prapyakaritvam, six types of Sannikarsha. 3.3. Indriyanam lakshanam, classification and enumeration of Indriya. Description of Panchapanchaka, Penta-elemental nature of Indriya ( <i>Panchabhautikatwa</i> of Indriya) and similarity in sources ( <i>Tulyayonitva</i> ) of Indriya. 3.4. Trayodasha Karana, dominance of Antahkarana. 3.5. Hindrances in direct perception ( <i>pratyaksha-anupalabdihikaarana</i> ), enhancement of direct perception (Pratyaksha) by various	<b>II</b>	42	8	14

	instruments/ equipments, necessity of other Pramanas in addition to Pratyaksha. 3.6. Practical study/ application of Pratyaksha in Sharir, Nidan (Diagnosis), Chikitsa (Treatment) and Anusandhan (Research).				
<b>4.</b>	<b>4. Anumanapariksha/Pramana</b> 4.1. Lakshana of Anumana. Introduction of Anumiti, Paramarsha, Vyapti, Hetu, Sadhya, Paksha, Drishtanta. Types of Anumana mentioned by Charaka and Nyayadarshana. 4.2. Characteristics and types of Vyapti. 4.3. Lakshana and types of Hetu, Description of Ahetu and Hetwabhasa. 4.4. Characteristics and significance of Tarka (logic). 4.5. Practical study/ application of Anumanapramana in Sharir, Nidan, Chikitsa and Anusandhan.	II		10	15
<b>5.</b>	<b>5. Yুক্তipariksha/Pramana</b> 5.1. Lakshana and description. 5.2. Importance in Ayurveda. 5.3. Practical study and utility in diagnostics, therapeutics and research.	III		2	2
<b>6.</b>	<b>6. UpamanaPramana</b> 6.1. Lakshana. 6.2. Application in Sharir, diagnostics, therapeutics and research.	III		2	4
<b>7.</b>	<b>Karya- Karana Siddhanta</b> 7.1. Lakshana of Karya and Kaarana. Types of Kaarana. 7.2. Significance of Karya and Kaarana in Ayurveda. 7.3. Different opinions regarding the manifestation of Karya from Kaarana: Satkaryavada, Parinamavada, Vivartavada, Asatkaryavada, Arambhavada, Paramanuvada, Kshanabhanguravada, Pilupaka, Pitharpaka, Anekantavada, Swabhavavada, Swabhavoparamavada. Importance/ Utility of each of these in Ayurveda 7.4 Study of cause effect relationship, causality, causation in Contemporary sciences.	III	32	11	13

**Table 3: Learning objectives (Theory) of Course AyUG-PV**

<b>Paper I</b>									
<b>A3 Course outcome</b>	<b>B3 Learning Objective  (At the end of the session, the students should be able to)</b>	<b>C3 Domain/sub</b>	<b>D3 Must to know/ desirable to know/Nice to know</b>	<b>E3 Level Does/ Shows how/ Knows how/ Know</b>	<b>F3 T-L method</b>	<b>G3 Assessment</b>	<b>H3 Format ive /summ ative</b>	<b>I3 Te rm</b>	<b>J3 Integ ration</b>
<b>Topic 1- Ayurveda Nirupana Time</b> (Lecture: - _5 hours Non lecture 6 hours)									
CO1	Describe the Nirukti (etymology) and Definition of Ayu	Cognitive/ Recall	Must Know	Knows	Lecture Group discussion	Written and Viva	F and S	I	
CO1	Describe the components of Ayu	Cognitive/ Recall	Must Know	Knows	Lecture Group Discussion Enquiry Based learning	Written and Viva	F and S	I	
CO1	Explain Synonyms of Ayu with their meaning and importance	Cognitive Recall	Must Know	Knows	Lecture Group Discussion	Written and Viva	F and S	I	
CO1	Distinguish between 4 types Ayu namely Sukhayu, Dukhayu, Hitayu, Ahitayu	Cognitive Comprehension	Must Know	Knows	Lecture Group Discussion/ Problem Based Learning	Written and Viva, Quiz	F and S	I	
CO1	Realises that the balance between hitayu	Affective	Must know	Knows	Group Discussion/	viva	F	I	

	and Sukhayu will offer better living				Debate				
CO1	Describe Lakshana of Ayurveda and Enlist Synonyms of Ayurveda	Cognitive Recall	Must Know	Knows	Lecture Group Discussion	Written and Viva	F and S	I	
CO1	Explain different Swarupa of Ayurveda and Discuss Ayurveda Prayojana	Cognitive Comprehension	Must Know	Knows	Lecture Group Discussion/Problem Based Learning	Written and Viva Open Book Test	F and S	I	
CO1	Explain Trisutra of Ayurveda and discuss Nityatva (eternity) of Ayurveda	Cognitive Comprehension	Must Know	Knows	Lecture Group Discussion/ Debate	Written and Viva	F and S	I	
CO1, CO 2	Define Siddhanta	Cognitive Recall	Must Know	Knows	Lecture Presentation Discussion	Written and Viva	F and S	I	
CO1, CO 2	Distinguish the types of Siddhanta	Cognitive Comprehension	Must Know	Knows	Lecture Group Discussion/ Enquiry Based Learning	Written and Viva, Puzzle	F and S	I	
CO1, CO 2	Elaborate the Basic Principles of Ayurveda like Lokapurusha Samya Siddhanta Panchamahabhoota Siddhanta Tridosha Siddhanta Samanya Vishesha Siddhanta Karya Karana Siddhant	Cognitive Comprehension	Must Know	Knows	Lecture/ Group Discussion /Problem Based Learning/ Flipped Classroom	Written and Viva, quiz PBA CBA	F and S	I	

CO1, CO 2	Justify the Application of Basic Principles in Ayurveda	Affective	Must know	Knows	Lecture Demonstration/ Group Discussion	Written and Viva	F and S	I	
CO1, CO 2	Recite the concern verses from Tarkasangraha and Charak Samhita	Cognitive Recall	Desirable to know	Knows	Audio clips, classroom recitation	Viva, recitation competition	F and S	I	
<b>Topic 2- Padartha and Darshana Nirupana Time</b> (Lecture:- _10__hours Non lecture __14_hours)									
CO1, CO 2	Classify padartha, differentiate bhava, abhava padartha and Appreciate Shat karana of Acharya Charaka.	Cognitive Recall	Must Know	Knows	Lecture/ Discussions PBL	Written and Viva, puzzle	F & S	I	
CO1, CO 2	Discuss similarity and dissimilarity of padartha	Cognitive Comprehension	Desirable to Know	Knows	Lecture/ Discussions/ Activity based learning	Written and Viva	F & S	I	
CO2	Explain nirukti and vyakhya (definition) of darshana	Cognitive Recall	Must Know	Knows	Lecture	Written and Viva	F & S	I	
CO2	Describe Origin of darshana and Explain Importance of darshana (prayojana)	Cognitive Comprehension	Must know	Knows how	Lecture / Group Discussion	Written and Viva, Quiz	F & S	I	
CO1, CO 2	Analyse terms viz - philosophy, metaphysics, aesthetics, epistemology, psychology in relation with darshana	Cognitive Comprehension	Nice to know	Knows	Lecture / Group Discussion/ Activity Based learning	Written and Viva	F & S	I	
CO2	Classify darshana and differentiate between asthika, nasthika, asthikanasthika	Cognitive Recall	Must Know	Knows	Lecture / Enquiry Based Learning	Written and Viva	F & S	I	

	darshana								
CO1, CO 2	Enumerate darshana relevant for Ayurveda study and mention the pioneers of each darshana	Cognitive Recall	Must Know	Knows	Lecture/ Role play/Group Discussion	Written and Viva, Puzzle	F & S	I	
CO1, CO 2	Outline the reason for study of darshana in Ayurveda and Comprehend Philosophical foundation of Ayurveda	Cognitive Comprehension	Must Know	Knows how	Lecture/ Problem Based Learning/ Group discussion/Tutorial	Written and Viva, Open Book Test	F & S	I	
CO2	Explain meaning of nyaya and synonyms of nyayadarshana	Cognitive Recall	Must Know	Knows	Lecture Group discussion	Written and Viva	F & S	I	
CO2	Enumerate nyayoktha 16 padarthas, 12 prameyas	Cognitive Recall	Desirable to Know	Knows	Lecture /Enquiry Based Learning	Written and Viva	F & S	I	
CO2	Recall the content of nyaya sutra	Cognitive Recall	Nice to know	Knows	Lecture	Written and Viva	F & S	I	
CO2	Outline salient features of nyayadarshana viz- chaturvida pramana, pitharapaka, arambhavada.	Cognitive comprehension	Must Know	Knows	Lecture/ Group discussion / Activity Based Learning	Written and Viva , Quiz	F & S	I	
CO2	Explain meanings of vaisheshika and synonyms	Cognitive Recall	Must Know	Knows	Lecture/	Written and Viva	F & S	I	
CO2	Recall the content of vaisheshika sutra	Cognitive Recall	Nice to Know	Knows	Lecture	Written and Viva	F & S	I	

CO2	Identify salient features of vaisheshika darshana viz-shatpadartha, paramanuvada, peelupakavada	Cognitive comprehension	Must Know	Knows	Lecture group discussion/Activity based learning	Written and Viva, quiz, puzzle	F & S	I	
CO2	Explain the meaning of sankhya	Cognitive Recall	Must Know	Knows	Lecture	Written and Viva		I	
CO2	Enumerate, define and categorise 25 tatvas	Cognitive Recall	Must Know	Knows	Lecture discussion	Written and Viva puzzle	F & S	I	
CO2	Recall the trividhadukha, triguna, satkaryavada	Cognitive Recall	Must Know	Knows	Lecture/ Inquiry based learning	Written and Viva	F & S	I	
CO2	Define yoga and explain ashtangayoga	Cognitive comprehension	Must Know	Knows	Lecture Group discussion/demonstration	Written and Viva, quiz	F & S	I	
CO2	Recall content of yoga sutra	Cognitive Recall	Nice to know	Knows	Lecture	Written and Viva	F & S	I	
CO2	Enumerate chittavrutti, panchaklesha, ashtasiddhi	Cognitive Recall	Must Know	Knows	Lecture Debate /Group Discussion	Written and Viva, quiz	F & S	I	
CO2	Recall different type of yoga	Cognitive Recall	Nice to know	Knows	Lecture Self-Directed learning/Activity based learning	Written and Viva, open book test	F & S	I	
CO1, CO 2	Outline the salient features of meemamsa darshana and Vedanta darshana Viz. karma siddhanta, atma, maya, vivartavada,	Cognitive comprehension	Must Know	Knows	Lecture Group Discussion/ Debate	Written and Viva, Quiz	F & S	I	

CO1, CO 2	Explain similarity between Nyaya, vaisheshika, Sankyha, yoga, meemamsa and Vedanta darshana with Ayurveda	Cognitive comprehension	Must Know	Knows how	Lecture discussion PBL/ Flip classroom	Written and Viva	F & S	I	
CO1, CO 2	Explain Charvaka, Jaina and Bouddha darshana and their influence in Ayurveda	Cognitive comprehension	Must Know	Knows	Lecture Group Discussion	Written and Viva	F & S	I	
CO1, CO 2	Demonstrate Ayurveda as unique and independent school of thought (philosophical individuality of Ayurveda).	Cognitive Comprehension Affective	Must Know	Knows how/	Lecture/ Group Discussions PBL	Written and Viva	F & S	I	
CO 1 CO 2	Compare the the Srishtiutpatti krama by different darshanas with contemporary theories like- Big Bang, The multiverse, brane world, the hylographic universe, Simulation theory etc	Cognitive Comprehension	Nice to Know	Knows	Lecture with Videos, Group discussion/ self learning	Puzzle, viva	F	I	
CO 1	Respect ancient philosophy and Ayurveda	Affective	Must know	Know	Discussion	Discussion Debate	F	I	
CO1, CO 2	Enumerate padartha according to different schools of thought	Cognitive Recall	Desirable to Know	Knows	Lecture Group Discussion	Written and Viva, Puzzle	F & S	I	
CO1, CO 2	Find principles and examples in contemporary sciences	Cognitive/ Comprehension	Nice to know	knows	Lecture/ Discussions/ Self-learning,	-	F	I	

	which will enhance understanding concept of Padartha. For ex-matter and energy.								
CO1, CO 2	Analyse role of padartha in darshana and in Ayurveda and Demonstrate the role of Padarthavijnana in Ayurveda	Cognitive / Comprehension	Must Know	Knows how	Lecture/ Seminars /PBL	Written and Viva, Open Book Test	F & S	I	
CO2	Recite concern verses	Cognitive Recall	Desirable to know	knows	Edutainment Audio clips, classroom recitation	Viva, recitation competition	F&S	I	
<b>Topic-3 Dravya vijnaneeyam Time</b> (Lecture:- __14_ hours Non lecture _20_ hours)									
CO3	Explain Nirukti and Paribhasha (definition) of Dravya	Cognitive Recall	Must Know	Knows	Lecture	Written and Viva	F and S	II	
CO3	Classify Dravya and Differentiate between Karana and Karya dravya	Cognitive Recall	Must Know	Knows	Lecture Group Discussion/ Enquiry Based Learning	Written and Viva, Puzzle	F and S	II	
CO3	Enumerate Darvya as per different schools of thoughts	Cognitive Recall	Must Know	Knows	Lecture Group Discussion	Written and Viva, puzzle	F and S	II	
CO3, CO1	Value Practical application of study of Dravya in Ayurveda	Affective	Desirable to know	Knows how	Lecture Group Discussion	Written and Viva	F and S	II	
CO3	Explain the various theories (theories of Taittiriyanopanishad, Nyaya-Vaisheshika,	Cognitive/ Comprehension	Must Know	Knows	Lecture Group Discussion /Activity Based	Written and Viva, Quiz	F and S	II	

	Sankhya-Yoga, Sankaracharya, Charaka and Sushruta) regarding creation of Panchamahabhoota				Learning				
CO3	Describe Prithvi Mahabhoota Explain qualities of Prithvi Mahabhoota	Cognitive / Comprehension	Must Know	Knows	Lecture Seminar/ Group Discussion	Written and Viva	F and S	II	
CO3	Describe Aap Mahabhoota Explain qualities of Ap Mahabhoota	Cognitive, Comprehension	Must Know	Knows	Lecture Seminar/ Group Discussion	Written and Viva	F and S	II	
CO3	Describe Teja Mahabhoota Explain qualities of Teja Mahabhoota	Cognitive, Comprehension	Must Know	Knows	Lecture Seminar/ Group Discussion	Written and Viva	F and S	II	
CO3	Describe Vayu Mahabhoota Explain qualities of Vayu Mahabhoota	Cognitive, comprehension	Must Know	Knows	Lecture Seminar/ Group Discussion	Written and Viva	F and S	II	
CO3	Describe Aakash Mahabhoota. Explain qualities of Aakash Mahabhoota	Cognitive, Comprehension	Must Know	Knows	Lecture Seminar/ Group Discussion	Written and Viva	F and S	II	
CO3, CO1	Value Practical application of Panchamahabhoota in Ayurveda	Affective	Must know	Knows	Lecture Group Discussion, Demonstration	Written and Viva, Open Book Test	F and S	II	

CO2	Compare elementary particles/subatomic particles with Tanmatra/triguna.	Cognitive/ Recall	NK	Know	Video clips, discussions SDL	Quiz	F	II	
CO3, CO1	Define the term <i>Kala</i> from various <i>darshanas</i> and <i>Ayurveda</i> .	Cognitive/ Recall	Must know	Knows	Lecture	Written and Viva	F & S	II	
CO3	Explain classification/types of <i>Kala</i>	Cognitive/ Recall	Must know	Knows	Lecture	Written and Viva	F & S	II	
CO3, CO1	Find illustrations of <i>kala</i> explained in <i>Ashtang Hridaya</i> .	Cognitive/ Comprehension	Must know	Knows	Lecture /Activity Based Learning	Written and Viva	F & S	II	
CO3, CO2 CO1	Give examples of importance of <i>Kala</i> in <i>Ayurveda</i> and time as per contemporary sciences	Cognitive/ Recall	Must know	Knows how	Problem Based Learning/ Group Discussion	Written and Viva, Quiz	F & S	II	
CO3	Define the term <i>Dik</i> . Explain classification/ division of <i>Dik</i> .	Cognitive/ Recall	Must know	Knows	Lecture /Activity Based Learning	Written and Viva, puzzle	F & S	II	
CO3, CO1	Illustrate significance of <i>Dishas</i> in <i>Ayurveda</i> with examples.	Cognitive/ Comprehension	Must know	Knows how	Lecture /Seminar	Written and Viva	F & S	II	
CO3	Find illustrations of <i>Dik</i> explained in <i>Ashtangahridaya</i> .	Cognitive/ Comprehension	Must know	Knows how	Group Discussion	Written and Viva, Open book test	F & S	II	
CO3	Define the term <i>Atma</i> ,	Cognitive/ Recall	Must know	Knows	Lecture	Written and Viva	F & S	II	
CO3	Explain <i>atma</i> at different levels, seat, <i>Gunas</i> of <i>Atma</i> ,	Cognitive/ Recall	Must know	Knows	Lecture	Written and Viva	F & S	II	

CO1 CO3	Explain Atma Linga according to Charaka Samhita.	Cognitive/ comprehension	Must know	Knows	Lecture / Flipped Classroom	Written and Viva	F & S	II	
CO3	Describe the method / process of knowledge formation ( <i>atmanah jnasya pravrittih</i> ).	Cognitive/ Comprehension	Must know	Knows how	Lecture/ Demonstration/	Written and Viva	F & S	II	
CO3	Describe Purusha as mentioned in Ayurveda	Cognitive/ Recall	Must know	Knows	Lecture	Written and Viva	F & S	II	
CO3	Differentiate Ativahikapurusha/ Sukshmasharira/ Rashipurusha/ Chikitsapurusha/ Karmapurusha/ Shad-dhatvatmaka-purusha.	Cognitive/ Comprehension	Must know	Knows how	Lecture / Group discussions	Written and Viva	F & S	II	
CO3	Recognize and state significance of Atmavijnanam	Affective	Desirable to know	Knows	Group Discussions/ Problem Based Learning	viva	F	II	
CO3	Define term Manas, Enlist synonyms,  Explain it's Guna. Karma, Vishay. Explain dual nature of mind. ( <i>ubhayaatmakatvam</i> ),	Cognitive/Recall and Comprehension	Must know	Knows	Lecture / Activity Based Learning/Debate	Written and Viva. Puzzle	F & S	II	
CO3	Explain influence of Panchabhoutika aahara and aushadha (penta-elemental diet) on manas	Cognitive/ Recall	Must know	Knows how	Lecture/ discussions/ PBL	Written and Viva. Open Book Test	F & S	II	

CO3	Recognizes the utility of Knowledge of Mana	Affective	Must Know	Knows	Case Based learning	viva	F & S	II	
CO3, CO1	Explain Concept of mind in other sciences.	Cognitive/ Recall	Nice to know	Knows	Discussions/ Videos	Written and Viva	F	II	
CO1	Explain Role of Panchamahabhuta and Triguna in Dehaprakriti and Manasaprakriti respectively.	Cognitive/ Comprehension	Must know	Knows how	Lecture / discussions/ C B L	Written and Viva	F & S	II	
CO3	Discuss the role of Tamas as the tenth Dravya	Cognitive/Comprehension	Desirable to know	Know	Lecture Edutainment Role Play	Written and Viva	F & S	II	
CO3	Realize Practical application of study of dravya in Ayurveda	Affective	Desirable to know	Know	Group Discussions/ Case Base Learning/ Demonstration.	Written and Viva, quiz	F & S	II	
CO3	Recite Dravya Granth of Tarka Sangrah& defn from Charak	Cognitive Recall	Desirable to know	knows	Audio clips/ classroom recitation	Viva, Recitation Competetion	F&S		
CO3. CO2	Discuss principles and examples in contemporary sciences which will enhance understanding the concept of Karana dravya. For ex- Quantum Physics	Cognitive/Comprehension	Nice to know	Know	Lecture/ Discussions/ Self-learning activity	Open book testh	F	II	
<b>Topic -4 Guna vijnaneeyam Time</b> (Lecture:-4 hours Non lecture 6 hours)									
CO3	Define Guna and classify Guna according to various Darshanas and Charaka Samhita	Cognitive Recall	Must know	knows how	Lecture /Demonstration	Written and Viva	F&S	II	

CO3	Explain the Lakshana of indriyartha Gunas with examples.	Cognitive Comprehension	Must know	Knows how	Lecture / Group Discussion	Written and Viva	F&S	II	
CO3	Discuss the Lakshana of Gurvadi Guna with examples.	Cognitive Comprehension	Must know	Knows how	Lecture /Seminar/ Group Discussion	Written and Viva, puzzle	F&S	II	
CO3	Explain the Lakshana of Paradi Guna with examples.	Cognitive Comprehension	Must know	Knows how	Lecture /Seminar/ Group Discussion	Written and Viva, Puzzle	F&S	II	
CO3	Describe the Lakshana of Adhyatma Guna with examples.	Cognitive Comprehension	Must know	Knows how	Lecture /Seminar/ Group Discussion	Written And Viva	F&S	II	
CO3	Appreciate the importance of Guna (Gunapradhanyata)	Affective	Must know	Knows	Discussion	Written Discussion viva	F&S	II	
CO3	Describe the practical application of Indriyartha Gunas in diagnosis of disease and Treatment	Cognitive Comprehension	Must know	Knows how	Lecture / Demonstration/ Case based learning	Written And Viva	F&S	II	
CO3	Describe the practical application of Gurvadi Guna in diagnosis of disease and Treatment	Cognitive Comprehension	Must know	Knows how	Lecture / Demonstration/ Case based learning	Written And Viva	F&S	II	
CO3	Describe the practical application of Paraadi Gunas.	Cognitive Comprehension	Must know	Knows how	Lecture / Demonstration/ Activity based learning	Written And Viva	F&S	II	

CO3	Describe the practical application of Adhyatma Guna .	Cognitive Comprehension	Must know	knows how	Lecture / Demonstration/ Problem Based Learning	Written And Viva	F&S	II	
CO3	Recite the concern verses from TarkaSangrah and Charak Samhita	Cognitive Recall	Desirable to know	knows	Audio clip/ classroom recitation	viva	F&S Recitation competition	II	
CO1 CO2	Discuss Principles and examples in contemporary sciences which will enhance understanding the concept of Guna.	Cognitive Comprehension	Nice to know	Knows	Lecture/ Discussions/ Self-learning activity	-	F	II	
<b>Topic - 5. Karma vijñaneeyam Time</b> (Lecture:- <u>2</u> hours Non lecture <u>4</u> hours)									
CO3	Define <i>Karma</i> acco. to various <i>Darshana</i> and <i>Ayurveda</i> .	Cognitive Recall	Must know	Knows	Lecture	Written And Viva	F&S	II	
CO3	Compare the <i>Karma Lakshana</i> (characteristics) from <i>Charaka Samhita</i> and <i>Darshana</i>	Cognitive Comprehension	Must know	Knows	Lecture/ Group discussion/ Flipped Classroom	Written And Viva	F&S	II	
CO3	Explain the types of <i>Karma</i>	Cognitive Comprehension	Must know	Knows	Lecture and discussion, demonstration	Written And Viva	F&S	II	
CO3	Describe the process of production and destruction of <i>Laukika Karma</i> with one	Cognitive Comprehension	Desirable to know	Knows how	Lecture and demonstration	Written And Viva	F&S	II	

	example.								
CO3	Describe the <i>Adhyaatmika</i> karma and its causal relationship with health and disease.	Cognitive Comprehension	Must know	Knows how	Lecture and discussion	Written And Viva	F&S	II	
CO3	Enlist the other types of processes or pharmacological actions which came under the title of <i>Karma</i> in <i>Ayurveda</i> . Viz: <i>Panchakarma</i> , <i>Shastrakarma</i> , <i>Lekhana</i> , <i>Bruhana</i> etc.	Cognitive Recall	Must know	Knows how	Lecture and discussion/ Self Directed Learning	Written And Viva	S	II	
CO3	Recite the concern verses from TarkaSangrah and Charak Samhita	Cognitive Recall	Desirable to know	knows	Audio clip/ classroom recitation/ Edutainment	viva	F&S Recitation competition	II	
CO1 CO2	Discuss principles and examples in contemporary sciences which will enhance understanding the concept of Karma.	Cognitive Recall	Nice to know	Knows	Lecture/ Discussions/ Self-learning	-	F	II	
<b>Topic - 6 . Samanya vijnaneeyam</b>									
Time (Lecture:- _3 hours Non lecture _6 hours)									
CO3	Explain the Samanya(According to <i>Ayurveda &amp; Darshana</i> )	Cognitive Comprehension	Must know	Knows	Lecture	Written And Viva	F&S	III	
CO3	Distinguish the <i>Samanya</i> concept of <i>Ayurveda</i> from	Cognitive Comprehension	Must know	Knows	Lecture and discussion	Written And Viva	F&S	III	

	<i>Darshana.</i>								
CO3	Describe the <i>Anuvrutti Buddhi</i>	Cognitive Recall	Desirable to know	knows	Lecture and discussion	Written	F & S	III	
CO3	Explain the types of <i>Samanya</i> (Acc. To <i>Ayurveda</i> and <i>Darshana</i> )	Cognitive Recall	Must know	Knows	Lecture and discussion/ Flipped Classroom	Written And Viva	F & S	III	
CO3	Explain the importance of <i>samanya</i> in diagnosis and treatment	Cognitive Comprehension	Must know	Knows	Lecture and discussion/ Case Based Learning	Written And Viva , Quiz	S	III	
CO3	Identify the examples of <i>Dravya-guna-karma Samanya</i> with each <i>DOSHA-DHATU-MALA</i>	Cognitive Comprehension	Must know	Knows how	Lecture and Demonstration/ Group Discussion	Written And Viva , Open Book Test	S	III	
CO3	Recite the concern verses from <i>TarkaSangrah</i> and <i>Charak Samhita</i>	Cognitive Recall	Desirable to know	knows	Audio clip/ classroom recitation	viva	F&S Recitation competition		
CO1	Discuss principle and examples in contemporary sciences which will enhance understanding the concept of <i>Samanya</i> . For ex-system biology	Cognitive Comprehension	Nice to know	knows	Self -Directed learning	-	F	III	
<b>Topic - 7 . Vishesh vijñaneeyam</b>									
<b>Time</b> (Lecture:- 3_ hours Non lecture 6_hours)									
CO3	Explain <i>Vishesha</i> According to <i>Ayurveda &amp; Darshana</i>	Cognitive Comprehension	Must know	Knows	Lecture and Group Discussion	Written And Viva	F&S	III	

CO3	Distinguish <i>Vishesha</i> concept of <i>Ayurveda</i> from <i>Darshana</i> .	Cognitive Comprehension	Must know	Knows	Lecture and Group Discussion	Written and Viva	F&S	III	
CO3	Describe the <i>Vyavrutti Buddhi</i>	Cognitive Recall	Desirable to know	knows	Lecture and discussion	Written	F & S	III	
CO3	Explain <i>Vishesha</i> in the context of <i>Mahabhoota Paramanu</i>	Cognitive Recall	Nice to know	knows	Lecture	Written	F & S	III	
CO3	Discuss the <i>Viruddha Vishesha</i> and <i>Aviruddha Vishesha</i> and other types of <i>Vishesha</i>	Cognitive Comprehension	Must know	Knows how	Lecture and discussion, demonstration	Written And Viva	F&S	III	
CO3	Explain the statement “ <i>Pravruttirubhayasyatu</i> ”	Cognitive Comprehension	Must know	Knows how	Lecture, Problem Based Learning	Written Viva	F&S	III	
CO3	Provide different classifications of <i>vishesha</i> and their utility in Diagnosis and Treatment.	Cognitive recall	Must know	Knows how	Lecture/ Activity Based Learning	Written, Viva, Open Book Test	F&S	III	
CO3	Identify the examples of <i>Dravya-guna-karma Vishesha</i> with each <i>DOSHA-DHATU-MALA</i>	Cognitive Comprehension	Must know	Knows how	Lecture and demonstration/ Game Based Learning	Written And Viva Quiz	S	III	
CO1, CO2	Describe principles and examples in contemporary sciences which will enhance understanding the concept of <i>Vishesha</i> For ex- System Biology	Cognitive Comprehension	Nice to know	knows	Lecture/ Discussions/ Self-learning activity	viva-	F	III	

CO3	Recite the concern verses from TarkaSangrah and Charak Samhita	Cognitive Recall	Desirable to know	knows	Audio clip/ classroom recitation	viva	F&S Recitation on competition	III	
<b>Topic - 8. Samavay vijnaneeyam</b>									
<b>Time</b> (Lecture:- 2_ hours Non lecture 4_ hours)									
CO3	Explain Samavaya (Acc. To <i>Ayurveda</i> and <i>Darshana</i> )	Cognitive Recall	Must know	Knows	Lecture	Written And Viva	F&S	III	
CO3	Describe the eternal relation between ayutasiddhavritti	Cognitive Comprehension	Must know	Knows how	Lecture and demonstration	Written And Viva	F&S	III	
CO1 CO2	Discuss principles and examples in contemporary sciences which will enhance understanding the concept of Samavaya	Cognitive Recall	Nice to know	knows	Lecture/ Discussions/ Self-learning activity	-	F	III	
CO3	Recite the concern verses from TarkaSangrah and Charak Samhita	Cognitive Recall	Desirable to know	knows	Audio clip/ classroom recitation	Viva, Recitation competition	F&S		
<b>Topic - 9. Abhav vijnaneeyam</b>									
<b>Time</b> (Lecture:- 2_ hours Non lecture 4_ hours)									
CO3	Define <i>Abhava</i>	Cognitive Recall	Must know	Knows	Lecture and discussion	Written And Viva	F&S	III	
CO3	Discuss the supportive and contradictory views for the acceptance of <i>Abhava</i> as a <i>Padartha</i>	Cognitive comprehension	Must know	Knows How	Lecture Group Discussion/ debate	Written And Viva	F&S	III	
CO3	Explain the view of <i>Ayurveda</i> about <i>Abhava</i>	Cognitive Recall	Must know	Knows	Lecture demonstration	Written And Viva	F&S	III	

CO3	Explain the four types of <i>Abhava</i>	Cognitive Recall	Must know	Knows	Lecture ,Activity Based Learning	Written And Viva , Puzzle	F&S	III	
CO3	Demonstrate the utility of the knowledge of <i>Abhava</i> in Ayurveda	Cognitive Comprehension	Must know	Knows how	Lecture, Group discussions Problem Based Learning	Written And Viva	F&S	III	
CO1 CO2	Discuss principles and examples in contemporary sciences which will enhance understanding the concept of <i>Abhava</i>	Cognitive Recall	Nice to know	knows	Lecture/ Discussions/ Self-learning activity	-	F	III	
CO3	Recite the concern verses from TarkaSangrah and Charak Samhita	Cognitive Recall	Desirable to know	knows	Audio clip/ classroom recitation	viva	F&S Recitation competition		

## Paper II

**Topic 1- (Pariksha) Time** (Lecture:- 6 hours Non lecture 12 hours)

CO4	Describe Pariksha	Cognitive/ Recall	Must know	Knows	Lecture/Group Discussion	Written And Viva	F&S	I	
CO4	Explain the necessity & significance of pariksha	Cognitive Comprehension	Must know	Knows how	Lecture/Problem Based Learning/Debate	Written And Viva	F&S	I	
CO4	Describe Buddhi and its classification	Cognitive / Recall	Must know	Knows	Lecture/Activity based learning	Written And Viva	F&S	I	
CO4	Describe Prama, Prameya, Pramata, Pramana and differentiate Prama and Aprama	Cognitive / Recall	Must know	Knows	Lecture/ Activity based learning	Written And Viva, open book test	F&S	I	

CO4	Describe the Significance of Pramana	Cognitive / comprehension	Must know	Knows how	Problem based learning	Written And Viva	F&S	I	
CO4	Enumerate Pramana according to different schools of philosophy.	Cognitive / Recall	Must know	Knows	Lecture	Written And Viva, puzzle	F&S	I	
CO4	Enumerate Pariksha as per Ayurveda.	Cognitive / Recall	Must know	Knows	Lecture/ Enquiry based learning	Written And Viva	F&S	I	
CO4	Describe the Pramana accepted by different schools of Philosophy with one example each.	Cognitive / Recall	Must know	Knows	Lecture/ group discussion	Written And Viva, quiz	F&S	I	
CO4	Describe 4 Pariksha explained by Ayurveda with one example each	Cognitive / Recall	Must know	Knows	Lecture/ activity based learning	Written And Viva, puzzle	F&S	I	
CO4	Justify the inclusion of Pramanas under three Pariksha	Cognitive / Comprehension	Must know	Knows how	Problem based learning and flipped classroom	Written And Viva	F&S	I	
CO4	Describe the practical application of Pariksha Vidhi in Diagnosis and Treatment.	Cognitive / Recall	Must know	Knows	Case based learning/ Group discussion	Written, open book test And Viva	F&S	I	
CO4	Establish that the Pramanas are tool to gain the knowledge	Affective	Must know	knows	Group discussion	Viva	F&S	I	
CO4	Recite the concern Verses from Tarkasangrah & CharakSamhita	Cognitive Recall	Desirable to know	knows	Audio clips, classroom Recitation	Viva, Recitation competetion	F&S	I	

<b>7. Topic 2- (Aptopdesha Pariksha/Pramana) Time</b> (Lecture:- __6_ hours Non lecture _10__hours)I									
CO 4	Describe Apta and Aptopadesha	Cognitive / Recall	Must know	Knows	Lecture	Written And Viva	F&S	I	
CO 4	Describe the significance of Aptopadesha in Chikitsa	Cognitive / Recall	Must know	Knows	Case based learning/ Group discussion	Written And Viva	F&S	I	
CO 4	Define the term Shabda	Cognitive / Recall	Must know	Knows	Lecture	Written And Viva	F&S	I	
CO 4	Describe types of Shabda	Cognitive / Recall	Must know	Knows	Lecture/ Activity based learning	Written And Viva	F&S	I	
CO 4	Define the term Shaba artha bodhaka Vrutti	Cognitive / Recall	Must know	Knows	Lecture/ group discussion	Written And Viva	F&S	I	
CO 4	Enumerate Shabaartha bodhaka vrutti	Cognitive / Recall	Must know	Knows	Lecture/ Activity based learning	Written And Viva, quiz	F&S	I	
CO 4	Define Abhidha Vrutti with illustration	Cognitive / Recall	Must know	Knows	Lecture/ Activity based learning	Written And Viva	F&S	I	
CO 4	Define Lakshana Vrutti with examples	Cognitive / Recall	Must know	Knows	Lecture/ Activity based learning	Written And Viva	F&S	I	
CO 4	Enumerate the types of Lakshanavrutti and define each of them with example	Cognitive / Recall	Must know	Knows	Lecture/ Activity based learning	Written And Viva	F&S	I	
CO 4	Define Vyanjana vrutti with example	Cognitive / Recall	Must know	Knows	Lecture/ Activity based learning	Written And Viva	F&S	I	
CO 4	Define Tatparyakhya vrutti with	Cognitive / Recall	Must know	Knows	Lecture/ Activity based	Written And Viva	F&S	I	

	example				learning				
CO 4	Define the term Pada with specification to Shakti and enumerate the types of Pada	Cognitive / Recall	Must know	Knows	enquiry based learning	Written And Viva	F&S	I	
CO 4	Enumerate Shaktigraha hetu	Cognitive / Recall	Must know	Knows	Lecture/ group discussion/ Problem based learning	Written And Viva, puzzle	F&S	I	
CO 4	Describe Shakti graha hetu	Cognitive / Recall	Must know	Knows	Lecture/ Tutorial/ Problem based learning	Written And Viva	F&S	I	
CO 4	Enumerate Vaakyarthajnana hetu	Cognitive / Recall	Must know	Knows	Lecture/ group discussion/ Problem based learning	Written And Viva, quiz	F&S	I	
CO 4	Define Akanksha with example	Cognitive / Recall	Must know	Knows	Lecture/ Activity based learning/ Problem based learning	Written And Viva	F&S	I	
CO 4	Define Yogyata with example	Cognitive / Recall	Must know	Knows	Lecture/ Activity based learning/ Problem based learning	Written And Viva	F&S	I	
CO 4	Define Sannidhi with example	Cognitive / Recall	Must know	Knows	Lecture/ Activity based learning/ Problem based learning	Written And Viva	F&S	I	

CO 4	Describe importance of Aptopadesha in maintaining Health, Prevention of diseases, diagnostics, therapeutics and research.	Cognitive/ Comprehension	Must know	knows	Lecture/ Activity based learning/ Problem based learning	Written And Viva, open book test	F&S	I	
CO4	Recite the concern Verses from Tarkasangrah & CharakSamhita	Cognitive Recall	Desirable to know	knows	Audio clips, classroom Recitation	Viva, Recitation competetion	F&S	I	

**Topic 3- Pratyaksha Pariksha/Pramana Time** (Lecture:- \_\_8\_ hours Non lecture \_14\_\_hours)

CO4	Define Pratyaksha	Cognitive / Recall	Must know	Knows	Lecture/ Tutorial/Activity based learning	Written And Viva	F&S	II	
CO4	Enumerate the types of Pratyaksha	Cognitive / Recall	Must know	Knows	Lecture/ Activity based learning	Written And Viva	F&S	II	
CO4	Describe types of Pratyaksha	Cognitive / Recall	Must know	Knows	Lecture/ Activity based learning/ Problem based learning	Written And Viva, quiz	F&S	II	
CO4	Describe Indriya Prapyakaritva Mechanism of sensory perception)	Cognitive / comprehension	Must know	Knows	Lecture/ Flip classroom/ Problem based learning	Written And Viva,	F&S	II	
CO4	Define Sannikarsha	Cognitive / Recall	Must know	Knows	Lecture/ Activity based learning	Written And Viva	F&S	II	

CO4	Describe the types of Sannikarsha	Cognitive / comprehension	Must know	Knows how	Lecture/ Problem based learning	Written And Viva, puzzle	F&S	II	
CO4	Define Indriya	Cognitive / Recall	Must know	Knows	Lecture/ Activity based learning	Written And Viva	F&S	II	
CO4	Enumerate the types of Indriya	Cognitive / Recall	Must know	Knows	Lecture/ role play	Written And Viva	F&S	II	
CO4	Define Jnanendriya	Cognitive / Recall	Must know	Knows	Lecture/ Activity based learning	Written And Viva	F&S	II	
CO4	Enlist the functions of Karmendriya	Cognitive / Recall	Must know	Knows	Problem based learning	Written And Viva	F&S	II	
CO4	Describe the function of Manas in relation to Jnanotpatti	Cognitive / Recall	Must know	Knows	Lecture/ Problem based learning	Written And Viva	F&S	II	
CO4	Justify the role of Manas as ubhayendriya in relation with Jnanotpatti and Karma.	Cognitive / Comprehension	Must know	Knows how	Problem based learning / Group discussion/Debate	Written And Viva, open book test	F&S	II	
CO4	Enumerate Panchapanchaka and describe its significance with respect to Pratyaksha Jnana	Cognitive / Recall	Must know	Knows	Lecture/ Problem based learning / Group discussion	Written And Viva, quiz	F&S	II	
CO4	Enumerate and describe briefly the various theories of Darshana and Ayurveda, which highlight the relationship of Indriya	Cognitive / Comprehension	Must know	Knows	Group discussion/ role play/debate	Written And Viva, open book test	F&S	II	

	and Panchamahabhuta.								
CO4	Justify the specificity of Indriya for perceiving specific Artha	Cognitive / Comprehension	Must know	Knows how	Activity based learning/ Problem based learning / Group discussion	Written And Viva	F&S	II	
CO4	Enumerate Trayodasha Karana	Cognitive / Recall	Must know	Knows	Lecture/Tutorial / Activity based learning	Written And Viva, puzzle	F&S	II	
CO4	Enumerate Antahkarana	Cognitive / Recall	Must know	Knows	Lecture/ Activity based learning	Written And Viva	F&S	II	
CO4	Enumerate the functions of Antahkarana	Cognitive / Recall	Must know	Knows	Lecture/ Activity based learning	Written And Viva	F&S	II	
CO4	Illustrate the role Antahkarana in Jnanotpatti with example to highlight the significance	Cognitive / Comprehension	Must know	Knows how	Lecture/ Problem based learning / Group discussion	Written And Viva, open book test	F&S	II	
CO4	Describe the factors which create hindrance for perception with an illustration (pratyaksha-anupalabdhihaarana)	Cognitive / Comprehension	Must know	Knows	Activity based learning/ Problem based learning / Group discussion	Written And Viva, puzzle	F&S	II	
CO4	Enumerate a few equipments or aids which help in enhancing the direct perception	Cognitive / Recall	Must know	Knows	demonstrations/ Problem based learning / Group discussion	Written And Viva, quiz	F&S	II	
CO4	Justify the necessity of other pramana with textual references and	Cognitive / Application	Must know	Knows how	Lecture/ Activity based learning/	Written And Viva, open book	F&S	II	

	illustrations				Problem based learning / Group discussion	test			
CO4	Describe the practical application of Pratyaksha in Sharir, Nidan, Chikitsa and Anusandhan (research).	Cognitive / comprehension	Must know	Knows	Lecture/ case-based learning / Group discussion	Written And Viva	F&S	II	
CO4	Justify the role Pratyaksha (Observation and interpretation skills for generalization of results) in research	Cognitive / Application	Must know	Knows how	Lecture/ Activity based learning/ Problem based learning / Group discussion	Written And Viva	F&S	II	
CO4	Realizes importance as well as limitation of Pratyaksha	Affective	Must know	Knows	Group discussion	Viva	F&S	II	
CO4	Recite the concern Verses from Tarkasangrah & CharakSamhita	Cognitive Recall	Desirable to know	knows	Audio clips, classroom Recitation	Viva, Recitation competetion	F&S	II	
<b>Topic 4 - Anumana pariksha/Pramana Time</b> (Lecture:- _10__hours Non lecture _15__hours)									
CO4	Describe Anumana	Cognitive / Recall	Must know	Knows	Lecture	Written And Viva	F&S	II	
CO4	Define the terms with an example (Anumiti, Paramarsha, Vyapti, Hetu, Sadhya, Paksha, Drishtanta)	Cognitive / Recall	Must know	Knows	Lecture/ enquiry based learning	Written And Viva, quiz	F&S	II	
CO4	Describe the types of anumana	Cognitive / Recall	Must know	Knows	Lecture/ Activity based learning/ group discussion	Written And Viva,	F&S	II	

CO4	Describe Pancha Avayava Vakya	Cognitive / Recall	Must know	Knows	Lecture/ gamification/ Problem based learning / Group discussion	Written And Viva	F&S	II	
CO4, CO2	Associate Contemporary method of carrying out research with Pancha Avayava Vakya	Cognitive / Comprehension	Desirable to know	Knows how	Self directed learning, / Problem based learning / Group discussion	Written And Viva, open book test	F&S	II	
CO4	Define vyapti	Cognitive / Recall	Must know	Knows	Lecture/ Activity based learning	Written And Viva	F&S	II	
CO4	Describe the types of vyapti	Cognitive / Recall	Must know	Knows	Lecture/ Problem based learning	Written And Viva	F&S	II	
CO4	Define hetu	Cognitive / Recall	Must know	Knows	Lecture/ Activity based learning	Written And Viva	F&S	II	
CO4	Describe the types of hetu	Cognitive / Recall	Must know	Knows	group discussion	Written And Viva	F&S	II	
CO4	Enlist Sad-hetu Lakshana	Cognitive / Recall	Must know	Knows	Lecture/ Problem based learning	Written And Viva, quiz	F&S	II	
CO4	Define Hetwabhasa	Cognitive / Recall	Must know	Knows	Lecture/ Problem based learning	Written And Viva	F&S	II	
CO4	Explain the types of Hetwabhasa	Cognitive / Comprehension	Must know	Knows	Lecture/Tutorial group discussion	Written And Viva, puzzle, quiz	F&S	II	
CO4	Describe Ahetu	Cognitive / Recall	Must know	Knows	Lecture/ Activity based learning	Written And Viva	F&S	II	

CO4	Describe Tarkaas per Nyaya Sutra and Tarka Sangraha	Cognitive / Recall	Must know	Knows	Lecture Tutorial/ Problem based learning	Written And Viva, quiz	F&S	II	
CO4	Distinguish between Tarka as Aprama and tool in Anumana	Cognitive / Comprehension	Must know	Knows how	Enquiry based learning/ group discussion/debate	Written And Viva	F&S	II	
CO4	Justify the role of Tarka in Anumana	Cognitive / Comprehension	Must know	Knows how	Activity based learning/ Problem based learning / Group discussion	Written And Viva, open book test	F&S	II	
CO4	Demonstrate the practical applications of Anumana Pariksha (with few examples) in Sharir, Nidan, Chikitsa and Anusandhan (research).	Cognitive / Application	Must know	Knows how	Role play/ Game based learning / Group discussion	Written And Viva, open book test	F&S	II	
CO4	Recite the concern Verses from Tarkasangrah & CharakSamhita	Cognitive Recall	Desirable to know	knows	Audio clips, classroom Recitation	Viva, Recitation competetion	F&S	I	
<b>Topic 5 - Yukti pariksha/Pramana Time</b> (Lecture:- _2__hours Non lecture _2__hours)									
CO4	Describe Yukti	Cognitive / Recall	Must know	Knows	Lecture/ Activity based learning/ Group discussion	Written And Viva	F&S	III	
CO4	Compare Yukti as an independent Pariksha and as a part of Anumana	Cognitive / Comprehension	Must know	Knows how	Lecture/ Activity based learning/ Problem based	Written And Viva, open book test	F&S	III	

					learning / Group discussion				
CO4	Describe the Importance of Yukti in Ayurveda	Cognitive / Recall	Must know	Knows how	Lecture / Activity based learning / Problem based learning / Group discussion	Written And Viva	F&S	III	
CO4	Describe the practical application of Yukti in Sharir, Nidan, Chikitsa and Anusandhan (research).	Cognitive Recall	Must know	Knows how	Lecture / Activity based learning / Problem based learning / Group discussion	Written And Viva	F&S	III	
CO4	Recite the concern Verses from CharakSamhita	Cognitive Recall	Desirable to know	knows	Audio clips, classroom Recitation	Viva, Recitation competition	F&S	III	
<b>8. Topic 6 – Upamana Pramana Time</b> (Lecture:- __2_ hours Non lecture _4_ hours)									
CO4	Define Upamana..Enlist the types of Upaman	Cognitive / Recall	Must know	Knows	Lecture / Activity based learning	Written And Viva	F&S	III	
CO4	Describe the Importance of Upamana in Ayurveda	Cognitive / Recall	Must know	Knows	Lecture / Problem based learning / Group discussion	Written And Viva	F&S	III	
CO4	Describe the practical applications of Upamana in Sharir, Nidan, Chikitsa and Anusandhan.	Cognitive / Comprehension	Must know	Knows	Lecture / Game based learning / Problem based learning / Group discussion	Written And Viva, quiz	F&S	III	
CO4	Recite the concern Verses from Tarkasangrah & Charak	Cognitive Recall	Desirable to know	knows	Audio clips, classroom Recitation	Viva, Recitation competition	F&S	III	

<b>Topic 7 - Karya- Karana Siddhanta Time</b> (Lecture:- _11__hours Non lecture _13__hours)									
CO5 CO2	Define Karya and Karana. List types of Karana. Charakokta Dashvidha Parikshya Bhava.	Cognitive/ Recall	Must know	Knows	Lecture Tutorial	Written and Viva	F & S	III	
CO5	Explain Charakokta Dashvidha Parikshya Bhava.	Cognitive/Co mprehension	Must know	Knows	Lecture/Problem Based learning	Written and Viva	F & S	III	
CO5 CO2	Describe the significance of Karya and Kaarana in Ayurveda	Cognitive/ Comprehension	Must know	Knows how	Lecture/problem based activity	Written and Viva	F & S	III	
CO5 CO2	Realises the utility of Charakokta Dashvidha Parikshya Bhav in understanding situations and taking decisions	Affective	Must know	Knows	Group discussion/ Role play/ Debate		F	III	
CO5 CO2	Distinguish different opinions regarding the manifestation of Karya from Karana	Cognitive / Application	Must know	Knows how	Edutainment Role play/ Debate group discussion/debate	Written and Viva, quiz	F & S	III	
CO5 CO2	Analyse Satkaryavada and relate it with Ayurveda Siddhanta	Cognitive / Application	Must know	Knows how	Lecture & Group Discussion/debate	Written and Viva	F & S	III	
CO5 CO2	Analyse Asatkaryavada & relate it with Ayurveda Siddhanta	Cognitive / Application	Must know	Knows how	Lecture & Group Discussion/debate	Written and Viva	F & S	III	

CO5 CO2	Analyse Parinamavada & relate it with Ayurveda Siddhanta	Cognitive / Application	Must know	Knows how	Lecture & Group Discussion	Written and Viva	F & S	III	
CO5 CO2	Analyse Arambhavada & relate it with Ayurveda Siddhanta	Cognitive / Application	Must know	Knows how	Lecture & Group Discussion	Written and Viva	F & S	III	
CO5 CO2	Analyse Paramanuvada and relate it with Ayurveda Siddhanta	Cognitive / Application	Must know	Knows how	Lecture & Group Discussion	Written and Viva	F & S	III	
CO5 CO2	Explain Vivartavada and relate it with Ayurveda Siddhanta	Cognitive/ Comprehension	Must know	Knows how	Lecture & Group Discussion	Written and Viva	F & S	III	
CO5 CO2	Explain Kshanabhangurvada and relate it with Ayurveda Siddhanta	Cognitive/ Comprehension	Must know	Knows how	Lecture & Group Discussion	Written and Viva	F & S	III	
CO5 CO2	Explain Swabhavavada and relate it with Ayurveda Siddhanta	Cognitive/ Comprehension	Must know	Knows how	Lecture & Group Discussion	Written and Viva	F & S	III	
CO5 CO2	Explain Peelupakavada and relate it with Ayurveda Siddhanta	Cognitive/ Comprehension	Must know	Knows how	Lecture & Group Discussion/debate	Written and Viva	F & S	III	
CO5	Explain Pitharapakavada and relate it with Ayurveda Siddhanta	Cognitive/ Comprehension	Must know	Knows how	Lecture & Group Discussion/debate	Written and Viva	F & S	III	
CO5	Explain Anekantavada and relate it with Ayurveda Siddhanta	Cognitive/ Comprehension	Must know	Knows how	Lecture & Group Discussion	Written and Viva	F & S	III	
CO5 CO2	Explain Swabhavoparamavada.	Cognitive/ Comprehension	Must know	Knows how	Lecture & Group Discussion	Written and Viva	F & S	III	

CO5 CO2	Recite the concern Verses from Tarkasangrah & CharakSamhita	Cognitive Recall	Desirable to know	knows	Audio clips, classroom Recitation	Viva, Recitation competition	F&S	III	
CO5, CO2	Value cause and effect theory	Affective	Must know	Knows	Debate/Group Discussion	Viva	F	III	
CO 5, CO2	Analyse cause effect relationship, causality, causation in contemporary sciences	Cognitive / Comprehension	Nice to know	Knows	Self directed learning , Flipped classroom, Group Discussions.	-	-	III	

## List of Practicals

### Course AyUG-PV : Practical List

Marks: 100

Hours:- 45 (included in non Lecture hours)

SN	Name of Topic/ Name of Practical	Term	Activity / Practical
P1	Ayurved Nirupan	I	Ayurved Perception identification: Ask the meaning of Ayurveda to your parents, friends and family members (min 10) and write it, give your opinion on it. Introduction to communication skills. Conduct of survey.
P2	Darshana and Padartha	I	<ul style="list-style-type: none"><li>• Darshan concept development: Find and write names of different philosophies?</li><li>• Discussions: meanings of philosophy, darshana, spirituality, religion. Are they same or different? Write in Activity Book.</li></ul>
P3	Hitayu/ Sukhayu lakshanas	I	<ul style="list-style-type: none"><li>• Identification of characters of Hitayu, &amp; Sukhayu in Healthy individuals.</li></ul>
P4	Dravya	I	<ol style="list-style-type: none"><li>1. <b>Identification of Guna and Karma.</b> Make a list of 10 dravyas surrounding you and identify Guna and Karma in it.</li><li>2. <b>Panchbhautik nature identification:</b> Demonstrate the Panchamahabhuta in any five ahara dravya and five sharira dravya/ avayava with a neat labeled diagramme. (ex-cell, blood, vata, pitta, kapha etc).</li><li>3. <b>Determination of Directions:</b> Identify the directions in and enlist the content in each direction in your campus.</li><li>4. <b>Conceptualize Time :</b> Discussion and understanding of Kala as per Ayurved and contemporary sciences.</li><li>5. <b>Categorization</b> of Aushadhi dravya by dominance of Mahabhoot e.g. Parthiv / Jaleeya/ Agney/ Vayaveey/ Akasheey dravya with reasons.</li><li>6. <b>Early Clinical Exposure(ECE):</b> Visit the OPD, find the diseases common for different age groups ( balyavastha/ tarunyavastha/ vrudhdhavastha)</li></ol>

P5	Guna	II	<p><b>Identification:</b></p> <p><b>Sartha Guna :</b> Identify concept of Shabda, Sparsha, Rupa, Rasa, Gandha in Dravya.</p> <p><b>Application and demonstration</b> find the different therapies based on 5 Sartha Gunas. e.g. Gandha. Shabda, Sparsha.</p> <p>Observe /Experience/ Study / Read book or article <b>present</b> on (any one)</p> <p>Aromatherapy- Gandha Chikitsa. Music therapy/ Mamtra Chikitsa -Shabda guna.</p> <p>Sparsha- Touch therapy.</p> <p><b>Gurvadi Guna:</b> Identify guna in any five ahara dravya : different vargas.</p> <p>in Sharir dravya: dosha, dhatu mala.</p> <p><b>Comparison</b> Gurvadi gunas and corelate with concepts learned in Physics, Chemistry and Biology.</p> <p>Observation(<b>survey</b>) of the effects of Seasons on Gurvadi gunas in body, nature etc.</p> <p><b>Paradi Guna</b> and their application in five examples.</p> <p><b>Atma Guna identification:</b> Making or Framing their real life situations related to Atma Guna(sukha, dukkha etc)</p>
P6	Karma	II	<p><b>Conceptualization</b> Karma, its application in branch of Ashtanga Ayurveda.( panchakarma/ Shastrakarma etc</p> <p><b>Illustration:</b> Make a collage of pictures/ photos depicting five types of karma and their similarity with concepts learned in Physics, Chemistry etc.</p>
P7	Pratyaksha Praman	II	<b>Observation:</b> Note down the factors from Prakruti analysis which you can

			<p>understand through pratyaksh ( like- colour, dry skin)</p> <p><b>Identification:</b> Find few identification marks for identification of herbs/ minerals which need Pratyaksha.</p> <p><b>ECE:</b> Pramans in examination of patient and Diagnosis of disease.</p> <p>Identifies the gunas which can be perceived by one sense (ekendriya) organ and more than one sense organ (Dwiendriya etc).</p> <p>Demonstrate with examples of Shabda,(snigdha/ ruksha etc) Sparsha (snigdha/ ruksha etc), Rupa, Rasa(taste threshold video), Gandha. (5 examples)</p>
P8	Pratyaksha Praman Limitations	II	<p><b>Observation:</b> Find out how one can overcome limitations of Pratyaksha by advances in equipment. (microscope, telescope etc)</p> <p><b>Justification</b> of use of various equipment in examination of patient and Diagnosis of disease. (X ray, USG etc)</p>
P9	Anuman Praman	II	<p><b>Application in Real life situation</b></p> <p>Write 3 examples of Vyapti (associations)in real life.</p> <p>Find and explain 5 examples of Anumana pramana as per types.</p> <p>Write 3 examples of panchavayava vakya. Correlate it with practicals that you have conducted.</p> <p>Examples of Hetvabhas.(Any three)</p> <p>Study use of inference in various sciences.</p>
P10	Samanya Vishesh Siddhant	III	<p><b>Identification:</b> Visit vanaushadhi udyan of your college. Find samanyatva and visheshatva among plants.</p> <p><b>Illustration :</b> Make a chart of food articles and activities to illustrate the relationship of samanya/vishesha with dosha-dhatu-malas.</p> <p><b>Application:</b> Make a list/ collection of seasonal vegetables and fruits which are</p>

			Samanya/Vishesha with the dosha.(five examples)
P11	Samvay	III	<b>Conceptualization</b> Mention five real life examples of Nitya and anitya sambandha.
P12	Abhav	III	<b>Application:</b> Write five real life experiences of pragabhava, pradhwamsabhava, atyantabhava and anyonyabhav.
P13	Upman Praman	III	<b>Illustration :</b> Upamana in practical life or with your prior learning. (Examples of upamana from Ashtang Hridaya and Charak samhita)and prior learning (Examples in Physics, chemistry etc)
P14	Yukti Praman	III	<b>Conceptualization:</b> How various factors influence the process of the decision making? <b>Application :</b> Write 5 examples of Yukti in practical life or with your prior learning. <b>ECE:</b> Role of Yukti in Sharir, Nidan, Chikitsa and Anusandhan.
P15	Satkaryavad and other vadas	III	<b>Justification :</b> Parinama vada: Describe 3 real life or with your prior learning examples (Physics, Chemistry etc). Justification of Satkarya vada.: Describe 3 real life or with your prior learning examples. Swabhavoparama vada : Describe 3 real life or with your prior learning examples. Pakajotpatti siddhanta.: Write 3 examples of real life or with your prior learning. Justification of Arambhavada Describe 3 real life or with your prior learning examples
P16	Cause and effect theory	III	<b>Illustration:</b> Karya Karan Bhav: Write Samavayi, asamavayi and Nimitta Karana of a karya in real life examples (5 examples). Examples learned in Physics, Chemistry, Biology. <b>Search</b> Find out use of cause effect theory in other sciences. <b>Schematic representation</b> of cause effect in any examples.

			<p><b>Application:</b> Assess the 10 factors of Charakokta Karyakarana bhava regarding any task consider the task as karya Remember and write theories of evolution you learned within and other than syllabus.</p>
A1	<b>Other Activities in Journal.</b>	<b>I, II, III.</b>	<ol style="list-style-type: none"> <li>1. <b>Oral presentation:</b> on allotted topic, PPT slides be made and Copy of slides be pasted in activity book</li> <li>2. <b>Quiz:</b> Participation of all students in Quiz on some topic of Padartha vijnana.</li> <li>3. <b>Recitation:</b> Important shloka of padartha vijnana recitation everyday or alternate days by students and written in diary.</li> <li>4. Each student will do Pick and speak on topics of Padartha Vijnana.</li> <li>5. e charts / animations etc.</li> </ol>

**Table 4: Learning objectives (Practical) of AyUG-PV**

Practical									
<b>A4</b> Course outcome	<b>B4</b> Learning Objective  (At the end of the session, the Students should be able to)	<b>C4</b> Domain/ sub	<b>D4</b> Must to know/ desirab le to know/ Nice to know	<b>E4</b> Level Does/ Shows how/ Knows how/ Know	<b>F4</b> T-L method	<b>G4</b> Assessmen t	<b>H4</b> Formativ e /summati ve	<b>I4</b> Ter m	<b>J4</b> Integrati on
<b>Practical1-Ayurved Nirupan Time (practical- 2 hours)</b>									
<b>CO1</b>	Define Ayurved	Cognitive Recall	MK	knows	discussion	Viva	<b>F &amp; S</b>	<b>I</b>	
<b>CO1</b>	Conduct the survey to identify the perception about Ayurved in the society	Psychom otor	MK	Shows	Demonstration/ discussion	Viva	<b>F&amp;S</b>	<b>I</b>	
<b>Practical2-Darshan and Padarth (Practical- 1hour)</b>									
CO2	Discuss and compare the meanings of philosophy, darshana, spirituality, religion.	Cognitive / Recall	MK	Knows how	Demonstration/ discussion/ brainstorming	Viva	F &S	I	
CO2	Find and write names of different philosophies?	Cognitiv e/Recall	MK	Knows how	Demonstration/ discussion/ brainstorming	Viva	F&S	I	
<b>Practical - 3(hitayu/Sukhayu) Time (Practical/ Clinical 2 hours) :</b>									

CO 1	Discuss characters of hitayu, & Sukhayu	Cognitive /Recall	MK	Knows how	Demonstration/ discussion/ brainstorming	Viva	F&S	I	
CO 1	Identifies characters of hitayu, & Sukhayu in healthy individuals	Cognitive / Comprehension	MK	Knows How	Demo/Practical	Viva	F& S	I	
<b>Practical 4- Dravya Time (Practical/ Clinical 6 hours)</b>									
CO1,3	Define dravya, discuss nature of dravya	Cognitive Recall	MK	Knows how	Demonstration/ discussion/ brainstorming	Viva	F&S	I	
CO1,3	Identify pentaelemental nature of Ahar Dravya Aushadh Dravya in given examples	Cognitive/ Comprehension	MK	Shows	Practical/Demonstration	Viva/ Practicals	F& S	I	
CO1,3	Identify the Guna and Karma in the given dravya	Cognitive/ Comprehension	MK	Knows how	Practical/Demonstration	Viva/ Practicals	F&S	I	
CO1,3	Categorize the Aushadhi dravya by dominance of Mahabhoot e.g. Parthiv /Jaleeya/ Agney/ Vayaveey/ Akasheey dravya with reasons	Cognitive/ Comprehension	MK	Knows how	Practical/Demonstration	Viva/ Practicals	F&S	I	
CO1,3	Identify the directions in and enlist the content in each direction in your campus.	Cognitive/ Comprehension	MK	Knows how	Practical/Demonstration	Viva/ Practicals	F&S	I	
CO1,3	Discus the concept of Kala as per Ayurved and	Cognitive/ Recall	MK	Knows	Demonstration/ discussion/	Viva	F&S	I	

	contemporary sciences.				brainstorming				
CO1,3	find the diseases common for different age groups (balyavastha/tarunyavastha/vruddhavastha)	Cognitive/Comprehension	MK	Knows how	Early Clinical Exposure.	Viva/Practicals	F&S	I	
Practical - 5(Guna) Time (Practical/ Clinical 5 hours )									
CO 3	Discuss Guna,	Cognitive/Recall	MK	Knows how	Demonstration/discussion/brainstorming	Viva	F&S	II	
CO 3	Identify Gunas in given Ahar dravya.	Cognitive/Comprehension	MK	Knows How	Demo/Practical	Viva/Practicals	F&S	II	
CO 3	Identify Gunas in given Sharir dravya.	Cognitive/Comprehension	MK	Knows how	Practical/Demonstration	Viva/Practicals	F&S	II	
CO 3	Identify the specification of Shabda, Sparsha, Rupa, Rasa, Gandha in Dravy	Cognitive/Comprehension	MK	Knows how	Demonstration of Dravyas like-kutki, gojihva, guduchi, yashtimadhu, sariva etc.	Viva/Practicals	F&S	II	
CO 3	find the different therapies based on 5 Sartha Gunas. e.g.Gandha. Shabda, Sparsha.	Cognitive/Comprehension	DK	knows	Demonstration/discussion/brainstorming	Viva/Practicals	F&S	II	

CO 3	Observe and record the effects of Seasons on Gurvadi gunas in body and nature	Cognitive/analysis	MK	Knows how	Practical/Demonstration	Viva/Practicals	F&S	II	
CO 3	Correlate Gurvadi gunas with concepts learned in Physics, Chemistry and Biology.	Cognitive/comprehension	MK	Knows how	Demonstration/discussion/brainstorming	Viva/Practicals	F&S	II	
CO 3	Identify the paratva-aparatva in five examples	Cognitive/Comprehension	MK	Knows how	Practical/Demonstration	Viva/Practicals	F&S	II	
CO 3	Perform the Sanskar (toyasannikarsha/vasan/Bhavana)	Psychomotor	MK	Shows	Practical/Demonstration	Viva/Practicals	F&S	II	
CO 3	Frame the real life situations related to Atma Guna(sukha, dukkha etc)	Cognitive/Comprehension	MK	Knows how	Demonstration/discussion/brainstorming	Viva/Practicals	F&S	II	
<b>Practical -6 Karma Time</b> (Practical/ Clinical 3 hours)									
CO 3	Discuss Karma	Cognitive/Recall	MK	<b>Knows how</b>	Demonstration/discussion/brainstorming	Viva	F&S	II	
CO 3	Classify Karma in given	Cognitive/Comprehe	MK	Knows how	Demonstration/Practical	Viva/Practicals	F&S	II	

	examples ( panchakarma/Shastrakarma)	nsion							
CO 3	Illustrate five types of Karma in collage of pictures/ photos	Cognitive/ Comprehe nsion	MK	Knows how	Practical/Demon stration	Viva/ Practicals	F&S	II	
CO 3	compare Karma with concepts learned in Physics, Chemistry etc.	Cognitive/ Comprehen sion	MK	Knows	Practical/Demon stration	Viva/ Practicals	F&S	II	
<b>Practical – 7 Pratyaksha Praman Time (Practical/ Clinical 5 hours)</b>									
CO4	Discuss Pratyaksha Praman	Cognitive/ Recall	MK	<b>Knows how</b>	Demonstration/ discussion/ brainstorming	Viva	F&S	II	
CO4	Find identification marks for identification of herbs/ minerals which need Pratyaksha.	Cognitive/ Comprehe nsion	MK	Knows how	Demonstration/ Practical	Viva/ Practicals	F&S	II	
CO4	Note down the factors from Prakruti analysis which need pratyaksh ( like- colour, dry skin)	Cognitive/ Comprehe nsion	MK	Knows how	Practical/Demon stration	Viva/ Practicals	F&S	II	
CO4	Discuss the use of pratyaksha in examination of patient and Diagnosis of disease.	Cognitive/ Comprehe nsion	MK	Knows how	ECE/ discussion	Viva/ Practicals	F&S	II	
CO4	identifies with examples of Shabda,(snigdha/ ruksha etc) Sparsha (snigdha/ ruksha etc),	Cognitive/ Comprehe nsion	MK	Knows how	Practical/Demon stration/ Shabd from recordings, (snigdha/	Viva/ Practicals	F&S	II	

	Rupa, Rasa(taste threshold video), Gandha.				ruksha etc) Sparsha by touching or instruments. (snigdha/ruksha etc), Rupa, Rasa(taste threshold video), Gandha.(intensity of Smell)				
CO4	Identifies the gunas which can be perceived by one sense (ekendriya) organ and more than one sense organ (Dwiendriya etc).	Cognitive/Comprehension	MK	Knows how	Demonstration/discussion/brainstorming	Viva/Practicals	F&S	II	
<b>Practical -8 Pratyaksha Badhakar Bhav Time</b> (Practical/ Clinical 2 hours)									
CO4	Discuss Pratyaksha Badhakar Bhav (limitations of pratyaksha.)	Cognitive/recall	MK	Knows	Lecture	Viva	F&S	II	
CO4	Identify and classifies Pratyaksha badhakar Bhav in given examples.	Cognitive/Comprehension	MK	Knows how	Demonstration/Practical. Ask examples or encourage to identify examples.	Viva/Practicals	F&S	II	

CO4	Justify the use of various equipment in examination of patient and Diagnosis of disease.	Cognitive/Comprehension	MK	Knows how	Demonstration/discussion/brainstorming/Video Clips	Viva/Practicals	F&S	II	
<b>Practical -9 Anuman praman Time (Practical/ Clinical 5 hours )</b>									
CO4	Discuss Anuman praman	Cognitive/Recall	MK	Knows	Demonstration/discussion/brainstorming	Viva	F&S	II	
CO4	Identify and classify Anuman praman with type in given examples.	Cognitive/Comprehension	MK	knows	Demonstration/Practical, Ask examples or encourage to identify examples.	Practical/Demonstration	F&S	II	
CO4	Find and discuss examples of Vyapti (associations)in real life.	Cognitive/Comprehension	MK	Knows how	Practical/Demonstration. Ask examples or encourage to identify examples.	Practical/Demonstration	F&S	II	
CO4	Apply panchavayava vakya for drawing inference in practicals conducted	Cognitive/Comprehension	MK	Knows how	Practical/Demonstration	Practical/Demonstration	F&S	II	
CO4	Identify and discuss Hetvabhas in given examples	Cognitive/Comprehension	MK	Knows how	Practical/Demonstration. Ask examples or encourage to identify	Practical/Demonstration	F&S	II	

					examples.				
CO4	Draw inference in various sciences on the basis of Vyapti.	Cognitive/ recall	MK	<b>knows</b>	Demonstration/ discussion/ brainstorming	Practical/De monstration	F&S	II	
<b>Practical -10 Samanya Vishesh Siddhant Time</b> (Practical/ Clinical 5 hours)									
CO 3	Discuss Samanya vishesh Siddhant	Cognitive/ Rcall	MK	<b>Knows</b>	Demonstration/ discussion/ brainstorming	Viva	F&S	III	
CO 3	Identify and classifies Samanya vishesh Siddhant with type in given examples.	Cognitive/ Comprehe nsion	MK	<b>Knows how</b>	Demonstration/ Practical/ Ask examples or encourage to identify examples.	Viva/ Practical	F&S	III	
CO 3	Identify samanyatva and visheshatva among plants in Vanaushadhi udyan	Cognitive/ Comprehe nsion	MK	Knows how	Practical/Demon stration.	Viva/ Practicals	F&S	III	
CO 3	Make a chart/ eChart of food articles and activities to illustrate the relationship of samanya/vishesha with dosha-dhatu-malas.	Cognitive/ Comprehe nsion	MK	Knows how	Practical/Demon stration	Presentation/ Viva/ Practicals	F&S	III	
CO 3	Make a poster seasonal vegetables and fruits which are Samanya/Vishesha with the dosha.	Cognitive/ Comprehe nsion	MK	Knows how	Practical	Presentation /Viva/ Practicals	F&S	III	
<b>Practical -11 Samavay Time</b> (Practical/ Clinical 1 hour)									

CO 3	Discuss Samavay	Cognitive/ Recall	MK	<b>Knows</b>	Demonstration/ discussion/ brainstorming	Viva	F&S	III	
CO 3	Mention five real life examples of Nitya and anitya sambandha.	Cognitive/ Comprehe nsion	MK	<b>Knows how</b>	Demonstration/ Practical/ Ask examples or encourage to identify examples.	Viva/ Practical	F&S	III	
<b>Practical -12 Abhav Time</b> (Practical/ Clinical 1 )									
CO 3	Discuss Abhav	Cognitive/ Recall	MK	<b>Knows how</b>	Demonstration/ discussion/ brainstorming	Viva	F&S	III	
CO 3	Write real life experiences of pragabhava, pradhwamsabhava, atyantabhava and anyonyabhav.	Cognitive/ Comprehe nsion	MK	<b>Shows</b>	Demonstration/ Practical/ Ask examples or encourage to identify examples.	Viva	F&S	III	
<b>Practical - 13 Upman Praman Time</b> (Practical/ (Practical/ Clinical 1 hour)									
CO4	Discuss Upaman Praman	Cognitive/ Recall	MK	<b>Knows how</b>	Demonstration/ discussion/ brainstorming	Viva/ Practical	F&S	III	
CO4	Illustrate Upamana in practical examples and real life situation.	Cognitive/ Comprehe nsion	MK	Knows how	Demonstration/ Practical/ Ask examples or encourage to identify examples.	Viva/ Practicals	F&S	III	
CO4	Identify Examples of upamana from Ashtang	Cognitive/ Comprehe	MK	Knows how	Demonstration/ discussion/	Viva/ Practicals	F&S	III	

	Hridaya and Charak Samhita	nsion			brainstorming.				
CO4	Identify examples in Physics, chemistry biology where Upaman is used	Cognitive/ Comprehension	MK	Knows how	Demonstration/ discussion/ brainstorming/ Ask examples or encourage to identify examples.	Viva/ Practicals	F&S	III	
<b>Practical -14 Yukti Praman Time (Practical/ Clinical 1 hour</b>									
CO4	Discuss Yukti Praman	Cognitive/ Recall	MK	<b>Knows</b>	Demonstration/ discussion/ brainstorming	Viva	F&S	III	
CO4	Illustrate examples of Yukti in practical life or with your prior learning.	Cognitive/ Comprehension	MK	Knows how	Demonstration/ Practical/ Ask examples or encourage to identify examples.	Viva/ Practicals Quiz	F&S	III	
CO4	Identify Role of Yukti in Nidan, Chikitsa and Anusandhan (research).	Cognitive/ Comprehension	MK	Knows how	ECE/ Demonstration/	Viva/ Practicals/ PBL	F&S	III	
<b>Practical -15 Various Vadas Time (Practical/ Clinical 3 hour )</b>									
CO5 CO2	Discuss Satkaryavad	Cognitive/ Recall	MK	<b>Knows how</b>	Demonstration/ discussion/ brainstorming	Viva	F&S	III	
CO5 CO2	Justify Satkaryavad through real life	Cognitive/ comprehension	MK	Knows how	Demonstration/ Practical/ /Ask examples or	Viva/ Practicals/ PBL	F&S	III	

	examples/ examples from prior learning				encourage to identify examples.				
CO5 CO2	Justify Parinamvad through real life examples/ examples from prior learning	Cognitive/ comprehension	MK	Knows how	Practical/Demonstration/ /Ask examples or encourage to identify examples.	Viva/ Practicals	F&S	III	
CO5 CO2	Justify Pakajotpatti through real life examples/ examples from prior learning	Cognitive/ comprehension	MK	Knows how	Practical/Demonstration/ /Ask examples or encourage to identify examples.	Viva/ Practicals	F&S	III	
CO5 CO2	Justify Swabhavoparamvad through real life examples/ examples from prior learning	Cognitive/ comprehension	MK	<b>Knows how</b>	Demonstration/ discussion/ brainstorming/ /Ask examples or encourage to identify examples.	Viva/ Practicals	F&S	III	
CO5 CO2	Justify Arambhavad through real life examples/ examples from prior learning	Cognitive/ comprehension	MK	Knows how	Demonstration/ Practical//Ask examples or encourage to identify examples.	Viva/ Practicals	F&S	III	
<b>Practical -16 Cause and Effect theory Time (Practical/ Clinical 2 hours)</b>									
CO5, CO2	Discuss Cause and effect theory	Cognitive/ comprehend	MK	<b>Knows</b>	Demonstration/ discussion/ brainstorming	Viva/ Quiz	F&S	III	
CO5 CO2	Identify Samavayi, Asamavayi and Nimitta	Cognitive/ Comprehe	MK	Knows How	Demonstration/ Practical/Ask	Viva/ Practicals	F&S	III	

	karan of a Karya in real life examples/ examples with prior learning	nsion			examples or encourage to identify examples.				
CO5	Find out use of cause effect theory in other sciences.	Cognitive/ comprehension	MK	Knows how	Practical/Demonstration	Viva/ Practicals/ Debate	F&S	III	
CO5	Represent cause and effect schematically in any examples	Cognitive/ comprehension	MK	Knows how	Practical/Demonstration	Viva/ Practicals	F&S	III	
CO5	Assess the 10 factors of Charakokta Karyakarana bhava regarding any task consider the task as karya	Cognitive/ analysis	MK	Knows how	Practical/Demonstration	Viva/ Practicals	F&S	III	
CO5	Write theories of evolution you learned within and other than syllabus.	Cognitive/ comprehension	MK	Knows how	Practical/Demonstration	Viva/ Practicals	F&S	III

12	ROLE PLAY	5
13	SELF DIRECTED LEARNING	3
		140

**Table 6: Assessment Summary AyUG-PV**

**6 A - Number of Papers and Marks Distribution**

S.No.	Subject Code	Papers	Theory	Practical/Clinical Assessment					Grand Total
				Practical/ Clinical	Viva	Electives	IA	Sub Total	
1.	AyUG-PV	2	200	100	60	10 (Set-FB)	30	200	400

**6 B - Scheme of Assessment (formative and Summative)**

SR.NO.	PROFESSIONAL COURSE	DURATION OF PROFESSIONAL COURSE		
		First Term (1-6 Months)	Second Term (7-12 Months)	Third Term (13-18 Months)
1	First	3 PA & First TT	3 PA & Second TT	3 PA & UE

PA: Periodical Assessment; TT: Term Test; UE: University Examinations

### 6 C - Calculation Method for Internal assessment Marks (30 Marks)

TERM	PERIODICAL ASSESSMENT*					TERM TEST**	TERM ASSESSMENT	
	A	B	C	D	E	F	G	H
	1 (15 Marks)	2 (15 Marks)	3 (15 Marks)	Average (A+B+C/3)	Converted to 30 Marks (D/15)*30)	Term Test (Marks converted to 30)	Sub Total _/60 Marks	Term Assessment (.../30)
FIRST							E+F	(E+F)/2
SECOND							E+F	(E+F)/2
THIRD						NIL		E
<b>Final IA</b>	Average of Three Term Assessment Marks as Shown in 'H' Column.							
	Maximum Marks in Parentheses *Select an Evaluation Method which is appropriate for the objectives of Topics from the Table 6 D for Periodic assessment. Conduct 15 marks assessment and enter marks in A, B, and C. ** Conduct Theory (100 Marks)(MCQ(20*1 Marks), SAQ(8*5), LAQ(4*10)) and Practical (100 Marks) Then convert to 30 marks.							

### 6 D -Evaluation Methods for Periodical Assessment

S. No.	Evaluation Methods
1.	Activities Indicated in Table 3 - Column G3 as per Indicated I, II or III term in column I3.
2.	Practical / Clinical Performance
3.	Viva Voce, MCQs, MEQ (Modified Essay Questions/Structured Questions)
4.	Open Book Test (Problem Based)
5.	Summary Writing (Research Papers/ Samhitas)
6.	Class Presentations; Work Book Maintenance
7.	Problem Based Assignment
8.	Objective Structured Clinical Examination (OSCE), Objective Structured Practical Examination (OPSE), Mini Clinical Evaluation Exercise (Mini-CEX), Direct Observation of Procedures (DOP), Case Based Discussion (CBD)
9.	Extra-curricular Activities, (Social Work, Public Awareness, Surveillance Activities, Sports or Other Activities which may be decided by the department).
10.	Small Project
11.	<b>AyUG-PV Specific</b> Test on Topics in list of practicals.

## 6 H Distribution of Practical Exam

Practical – (Practical 100 +Viva 60+Elective 10+ IA 30) =(Total 200 Marks)

SN	Heads	Marks
<b>1</b>	Practical (Total Marks 100)	<b>100</b>
<b>a.</b>	Spotting ( 4 Spots) Problem based on Principles in PV. Topics 1. Pratyaksha praman/Pratyaksha Badhakar Bhav 2. Vada (Any one) 3. Abhav/Samavay 4. Upaman/Yukti	20
<b>b.</b>	Journal of Activity book/ Projects. (Viva on journal and communication skill)	20
<b>c.</b>	Practical I (10 Marks Each) 1. Identify panchamahabhoot dominance in the given dravya 2. Identify Samanya- Vishesh in the given dravyas 3. Identify the Gunas in the given dravyas  (Use different dravys for different students.)	30
<b>d.</b>	Practical II (Problem based questiones/ Situations)(10 Marks Each)(Any three) 1. Identify and explain the Karya Karan with types in given problem 2. Frame and Write Panchavayav vakya for the given anumana. 3. Identify Vyapti, Paksh, Sadhya, Hetu, Pakshadharmata, Sapaksha, Vipaksha in the give example. 4. Identify and explain Hetvabhas in given example. 5. Identify the vada applicable in given example.(any one vada.) 6. Identify Upama, Sajna- sajni sambhandha in given example.	30
<b>2</b>	Viva Voce	<b>60</b>
	Recitation of Shloka: 10 marks (sutras in Tarka sangraha, Samhitas, other)	
	Questions on Darshan 10 marks	
	Question on Dravya/ Guna/ Karma. 10 marks	
	Question on Samany/vishesh/samavaya/ Abhav 10 Marks	
	Question on one Praman 10 Marks	

	Question on Karya karan bhav 10 Marks.	
3	Internal Assessment	30
4	Electives	10
		200

## COURSE CURRICULUM FOR FIRST PROFESSIONAL BAMS (PRESCRIBED BY NCISM)

शास्त्रं ज्योतिः प्रकाशार्थं दृशन् बुद्धिरात्मनिः/

**SAMSKRITAM EVAM AYURVED ITHIHAS**

(SUBJECT CODE-AyUG-SN & AI)

**SANSKRIT AND HISTORY OF AYURVEDA**

(Applicable from 2021-22 batch onwards for 5 years or until further notification  
by NCISM, whichever is earlier)

**BOARD OF AYURVEDA**

**NATIONAL COMMISSION FOR INDIAN SYSTEM OF MEDICINE  
NEW DELHI-110058**

## NCISM

# I professional Ayurvedacharya (BAMS)

## SAMSKRITAM EVAM AYURVED ITHIHAS

(SUBJECT CODE-AyUG-SN & AI)

## SANSKRIT AND HISTORY OF AYURVEDA

(Applicable from 2021-22 batch onwards for 5 years or until further notification by NCISM, whichever is earlier)

### Summary

AyUG-SN & AI Total number of Teaching hours: 300			
<b>Lecture hours (LH) – Theory</b>		<b>100 Hours</b>	<b>100 Hours (LH)</b>
Paper I	50 Hours		
Paper II ( Sanskrit 40+ AI 10)	50 Hours		
<b>Non-Lecture hours (NLH) – Theory</b>		<b>140 Hours</b>	<b>200 Hours (NLH)</b>
Paper I	74 Hours		
Paper II (Sanskrit 46+ AI 20)	66 Hours		
<b>Non-Lecture hours (NLH) – Practical</b>		<b>60 Hours</b>	

Examination (Papers & Mark Distribution)					
Item	Theory Component Marks AyUG-SN & AI	Practical Component Marks			
		Practical	Viva	Elective	IA
<b>Paper I</b>	<b>100</b> Sanskrit 100 Marks	--	<b>75*</b>	<b>10</b> (Set-FA)	<b>15</b>
<b>Paper II</b>	<b>100</b> Sanskrit 80 Marks and Ayurved Itihas 20 Marks				
<b>Sub-Total</b>	<b>200</b>	<b>100</b>			
<b>Total marks</b>	<b>300</b>				
	*Viva voce examination shall be for Sanskrit and not for Ayurved Itihasa				

## Preface

Sanskrit is an ancient still most scientific language of India. The ancient literature created about various subjects in this region is in Sanskrit. The richness of Sanskrit language is accepted by intellectuals across the world. The literature of Ayurveda is also found in Sanskrit. Without understanding the language of the science, it is really hard to read and understand the terminologies, theories, principles of the science given in the Samhitas. Many of the students coming for the course partly introduced or not at all introduced to the Sanskrit language previously. Hence for understanding Ayurveda in its originality, Sanskrit is one of subject in First year BAMS curriculum. Similar to any language Listening, Reading, Writing and Speaking are the four pillars of a Sanskrit. Reading, writing and understanding Samhitas will be emphasized and listening and speaking can give confidence to the student and enhance the study.

Learning a language just by studying the theory is not enough hence curriculum of Sanskrit is designed by combining traditional Sanskrit teaching with new teaching health science education technologies.

This changed curriculum involves many new teaching learning techniques and assessment methods. Based on the course outcomes, curriculum is divided in papers. Important objectives are appropriately planned as per domains of learning. Supported by interactive methods of teaching and learning by using Audio-visual aids. There will be practicals and demonstrations based on Language Lab activities for enhancement of practical use of Sanskrit. Practical can give a chance of acquiring skills by practice of use of Sanskrit in Samhitadhyayan. Application of learned Sanskrit will be practically ensured by reading newly introduced Ashtang Hrudayam. Students can experience of application of Sanskrit Grammar in Samhitadhyayan. Introduction to Niruktis, dictionaries and Shabdakoshas can motivate students to derive and understand meanings from Sanskrit verses on their own. As this is a language, learning to communicate in this language is very much essential. Addition of Sanskrit communication as a part of curriculum is for overcoming the fear of learning a new language.

History of Ayurved is also added in second part of the Sanskrit. As an ancient science, its gradual development. Important milestones, different Schools of thoughts, important traditions, followers in traditions, their contribution etc will be introduced in History. Contribution of Scholars of modern era, Important institutes and globalization are few more points for history. Activity based learning and objective assessment are the most important changes to change perception towards study of history.

Paper II – Part B – Ayurved Itihas –					
	A2 List of Topics AyUG SN & AI (Maximum Marks – 20 (MCQ only))	B2 Term	C2 Marks	D2 Lecture hours	E2 Non- Lecture hours
1	Derivation (Vyutpatti and Niruktti) and definition of Itihasa. Necessity, Significance and Utility of knowledge of Ayurveda itihasa. Means and method of study of Ayurveda itihasa. Different Time periods relevant for the Study of Ayurveda itihasa (viz, Prevedic, Vedic, Samhita kala, Sangraha kala etc.)	I	5	1	2
2	Origin and lineage of Ayurveda (Ayurvedavatarana) and Introduction of references of Ayurveda in Veda, Upanishat and Puarana.	I		1	2
3	Structure, Specialities, Time period of Ayurveda Samhitas and their commentaries (including Special contributions of authors and commentators): Charaka Samhita, Sushruta Samhita, Ashtanga Sangraha, Ashtanga Hridaya, Bhela Samhita, Hareeta Samhita, Kashyapa Samhita.	I	5	2	2

4	Structure, Contributions and importance of Laghutrayee and Commentaries: Madhava Nidana, Sharngadhara Samhita, Bhavaprakasha.	II		1	3
5	Origin and period of different systems of medicine in the world.	II	5	1	2
6	Introduction to Vrukshayurveda, Hastayurveda and Ashwayurveda. (Included in Transitional Curriculum)	II		-	1
7	Status of Ayurveda during the period of Ashoka, Mughal and British rule.	II		1	2
8	Contribution of Scholars of modern era: Acharya Gana Nath Sen, Vaidya Yamini Bhushan Rai, Vaidya Shankar Dajishastri Pade, Acharya Swami Lakshmiram, Acharya Yadavji Tikramji, Dr. PM. Mehta, Vaidya B G Ghanekar, Vaidya Damodar Sharma Gaur, Acharya Priyavrat Sharma, Vaidya C Dwarakanath, Vaidya K R Shrikantamurthy, Vaidya VJ Thakkar, Vaidyaratnam PS Varier, Vaidya B V Gokhale.	III	5	1	2
9	Globalization of Ayurveda	III		1	2
10	1)Developmental activities in Ayurveda in the post-independence period: <ul style="list-style-type: none"> <li>• Introduction to various committees and their recommendations</li> <li>• Introduction of activities of the following Organizations : Department of AYUSH, CCIM/ NCISM, CCRAS,</li> </ul> 2) National institutions Viz- All India Institute of Ayurved (AIIA), National Institute of Ayurveda, Jaipur. ITRA, Jamnagar. Faculty of Ayurveda, BHU, Varanasi. Rashtriya Ayurveda Vidyapeetha, New Delhi.	III		1	2

**Table 3: Learning objectives (Theory) of Course AyUG-SN & AI**

<b>Paper I – Sanskrit</b>									
<b>A3 Course outcome</b>	<b>B3 Learning Objective  (At the end of the session, the Students should be able to)</b>	<b>C3 Domain/sub</b>	<b>D3 Must to know/ desirable to know/Nice to know</b>	<b>E3 Level Does/ Shows how/ Knows how/ Know</b>	<b>F3 T-L method</b>	<b>G3 Assessment</b>	<b>H3 Formative /summative</b>	<b>I3 Term</b>	<b>J3 Integration</b>
<b>Topic 1- सांस्कृत तर्णयिनाम् पररचया:(5 marks) Time: 13 hrs (Lecture:- 3 hours Non lecture10 hrs)</b>									
CO 1, CO 6	Read & write Sanskrit words	Cognitive domain - Knowledge	Must know	Knows how	Practical classes Demonstrations Classroom reading	Oral Written	F&S	I	
CO 1, CO 6	Pronounce Sanskrit as per their appropriate articulations	Cognitive domain – Comprehension	Must know	Knows how/ Shows how	1) Practical classes 2) presentation of videos 3) Graphical Representation of Vocal system Class room reading / speaking	Oral / Written Assignment on Identifying the Places of articulation of the words in Ayurveda texts.	F&S	I	
<b>Topic 2- सांज्ञा (10 marks)- Time: 05 Hrs (Lecture:- 5 hours Non lecture 00 hrs)</b>									
CO 2, CO 4, CO	2.1 Explain the terms related to सांज्ञा in Sanskrit grammar	Cognitive domain- Comprehension	Desirable to know	Knows	Lecture with Power point presentation	Oral, Conduction of quiz	F&S	II	
CO 2, CO 4, CO 5	2.2 Identify the सांज्ञा Explain the meaning of the सांज्ञा	Cognitive domain- Comprehension	Must know	Knows how	Lecture with Power point presentation	Oral / written Very short answer Differentiate, identify, fill in the blanks etc	F&S	I	

						Preparation of MSQ (MCQ) Question-answer sessions			
Topic 3 उपसर्गाः - उपसर्गाः हियायोर् (05 marks) Time: 05 Hrs (Lecture:- 02 hours Non lecture 03 hrs)									
CO 2, CO 4, CO 6	Identify the उपसर्गायः  Explain the meaning of the words with उपसर्गायः  Identify the difference in meaning according to the उपसर्गायः	Cognitive domain - Comprehension problem solving	Must know	Knows how	Lectures with Power point presentation. Problem Based Learning (PBL) Group Discussions	Oral & Written  objective type very short answer compare differentiate etc, Assignments open book test	F&S	II	
Topic 4- अव्ययाहन (05 marks) Time: 05 Hrs (Lecture:- 02 hours Non lecture 03 hrs)									
CO 2, CO 4, CO 6	4.1 Identify अव्ययानन	Cognitive domain - Comprehension	Must know	Knows	Lectures with Power point presentation.  Group Discussions	Oral & Written. objective type very short answer - compare, differentiate Assignments on sentence construction, presentation by the students	F&S	I	
CO 2, CO 4, CO 6	4.2 Explain the meaning with reference to the context	Cognitive domain – Application	Must Know	Knows how	Lectures with Power point presentation.  Group Discussions	Oral & Written  objective type very short	F&S	II	

						answer / compare differentiate Assignments open book test			
CO 2, CO 4, CO 6	Construct the sentences using अव्ययानन	Cognitive domain - Synthesis	Must Know	Shows how	Lectures with Power point presentation.  Group Discussions  Conversation Sessions	Oral & Written  Construct sentences with proper use of Avyayas. Use appropriate Avyayas. Very short answer Assignments on finding out the अव्ययानन used in the texts and explain their meaning with reference to the context. Open book test.	F&S	III	

**Topic 5— कारकप्रकरणम्** (15 marks) Time: 15 Hrs (Lecture:- 5 hours Non lecture 10 hrs)

CO 3, CO 6	A) Discriminate the नभिनि and their meaning. B) Identify the karakas from Ayurveda texts like करणम् कारणम् C) Construct sentences. D) Translate sentences from English to	Cognitive domain - Synthesis problem solving	Must know	Shows how	Lectures with Power point presentation.  Group Discussions	Oral & Written  objective type very short answer / compare differentiate /	F&S	A)– I B) – II C) – III D) - III	
---------------	--	--	--------------	-----------	---	---	-----	--	--

	Sanskrit & from Sanskrit to English.					meaning with reference to the context etc Assignments on identification of the karakas used in the Ayurveda basic principle terms like <b>करणम्</b> <b>कारणम्.</b>			
--	--------------------------------------	--	--	--	--	--	--	--	--

**Topic 6- सनन्धः (15 marks) Time: 20 Hrs (Lecture:- 10 hours Non lecture 10 hrs)**

CO 2, CO 6	6.1 Identify सनन्धः Explain the meaning of the context by splitting.  Formulate the joined words while writing the sentences	Cognitive domain - Application and problem solving	Must know	Knows how	Lectures with Power point presentation.  Group Discussions  Classes by the students Ashtang hrudaya with the <b>सहधिः</b>	Oral & Written Objective type, very short answer – compare, differentiate etc. Assignments to find the <b>सहधिः</b> in Ashtangahrudaya Quiz on सनन्धः	F&S	II	
CO 2, CO 6	6.2 Identify सनन्धः  Explain the meaning of	Cognitive domain - Application and problem solving	Must know	Knows how	Lectures with Power point presentation.  Group Discussions	Oral & Written objective type very short	F&S	II	

	the context by splitting.  Formulate the joined words while writing the sentences				Classes by the students Ashtang hrudaya with the सनन्धः	answer compare and differentiate Assignments  to find the सहधिः in Ashtangahrudaya  Quiz on सनन्धः Preparation of charts, mindmaps etc.			
CO 2, CO 6	6.3 Identify सनन्धः  Explain the meaning of the context by splitting.  Formulate the joined words while writing the sentences	Cognitive domain - Application and problem solving	Must know	Knows how	Lectures with Power point presentation.  Group Discussions  Classes by the students Ashtang hrudaya with the सनन्धः	Oral & Written  objective type very short answer Assignments to find the सहधिः in Ashtang hrudaya  Quiz on सनन्धः Preparation of charts, mindmaps etc.	F&S	II	
CO 2, CO 6	6.4 Identify सनन्धः  Explain the meaning of the context by splitting.	Cognitive domain – Comprehension Application	Desirable to know	Knows	Lectures with Power point presentation.	Oral Preparation of charts, mindmaps etc.	F&S	II	

**Topic 7- समास (15 marks) Time: 19 Hrs. (Lecture:- 09 hours Non lecture 10 hrs)**

CO 2	Identify समास: Discriminate between the सन्धि:and समास:	Cognitive domain - Comprehension	Must know	Knows	Lectures with Power point presentation.  Group Discussions Problem Based Learning(PBL)  Flipped classroom  Peer learning Classes by the students on the sutras in Ashtang hrudaya with the नष्टर्क्तयम्	Oral & Written  objective type very short answer- compare differentiate Assignments to find the समास: in Ashtanga hrudaya  Quiz on समास: Puzzles Word cloud Cross words etc.	F&S	II
CO 2, CO 6	7.1 Identify समास: Explain the meaning of the context by writing the नष्टर्क्तयम् Construct the समस्तपदम्while writing the sentences	Cognitive domain - Application and problem solving	Must know	Shows how	Lectures with Power point presentation.  Group Discussions Problem Based Learning(PBL) Flipped classroom  Peer learning Classes by the students on the sutras in Ashtang hrudaya with the नष्टर्क्तयम्	Oral & Written  objective type very short answer Assignments to find the समास: in Ashtanghrdaya a Quiz on समास: Puzzles Word cloud Cross words	F&S	II

						etc. Preparation of charts, mindmaps etc.			
CO 2, CO 6	7.2 Identify समासः Explaining the meaning of the context by writing the नग्रेहर्क्तयम्  Construct the समस्तपदम् while writing the sentences	Cognitive domain - Application and problem solving	Must know	Shows how	Lectures with Power point presentation.  Group Discussions Problem Based Learning(PBL) Flipped classroom  Peer learning Classes by the students on the sutras in Ashtang hrudaya with the नग्रेहर्क्तयम्	Oral & Written  objective type very short answer Assignments to find the समासः in Ashtangahrdaya  Quiz on समासः Puzzles Word cloud Cross words etc. Preparation of charts, mindmaps etc.	F&S	II	
CO 2, CO 6	7.3 Identify समासः Explaining the meaning of the context by writing the नग्रेहर्क्तयम्  Construct the समस्तपदम् while writing the sentences	Cognitive domain - Application and problem solving	Must know	Shows how	Lectures with Power point presentation.  Group Discussions Problem Based Learning(PBL) Flipped classroom  Peer learning Classes by the students on the sutras in Ashtang hrudaya with the नग्रेहर्क्तयम्	Oral & Written  objective type very short answer meaning with reference to the context etc. Assignments to find the समासः in Ashtangahrdaya	F&S	II	

						a Quiz on समासः Puzzles Word cloud Cross words etc. Preparation of charts, mindmaps etc.			
CO 2, CO 6	7.4 Identify समासः Explaining the meaning of the context by writing the नप्रेहर्क्तयम्  Construct the समस्तपदम् while writing the sentences	Cognitive domain - Application and problem solving	Must know	Shows how	Lectures with Power point presentation.  Group Discussions Flipped classroom  Peer learning Classes by the students on the sutras in Ashtang hrudaya with the नप्रेहर्क्तयम् Problem Based Learning(PBL)	Oral & Written  objective type very short answer Assignments to find the समासः in Ashtangahrday a Quiz on समासः Puzzles Word cloud Cross words etc. Preparation of charts, mindmaps etc.	F&S	II	
<b>Topic 8- शब्दरूपानण (10 marks) Time: 16 Hrs (Lecture:- 2 hours Non lecture 14 hrs)</b>									
CO 2, CO 3, CO 6	Identify & write the अन्तनलङ्क गनभनक्तिरननन of a noun.  Construct sentences	Cognitive domain – Synthesis  problem solving	Must know	Shows how	Lectures with Power point presentation.  Recitation  Peer learning	Oral & Written  objective type very short answer	F&S	I	

					Group Discussions	Assignments to find out the अन्तर्लङ्गनभे नक्तिचर्चानेन of nouns used in various text books and writing all forms of all नभेनक्ति. Quizzes Puzzles Word cloud Cross words etc.			
<b>Topic 9- िातुरुपाहण (10 marks) Time: 10Hrs. (Lecture:- 5 hours Non lecture 05 hrs)</b>									
CO 2, CO 6	9.1 Identify & write लकारपदपुरुषचर्चानेन of the roots.  Interpret the meaning according to the लकारः  Use for constructing sentences.	Cognitive domain - Synthesis and problem solving	Must know	Shows how	Lectures with Power point presentation.  Recitation  Group Discussions  Peer learning	Oral & Written objective type very short answer Assignments to find out the verbs used in various text book in the syllabus and completing all the forms. Quizzes Word cloud etc.	F&S	I	
CO 2, CO 6	9.2 Identify & write लकारपदपुरुषचर्चानेन of the roots.	Cognitive domain- Comprehension problem	Nice to know	Knows	Lectures with Power point presentation.  Group Discussions	Oral Assignments Quizzes Word cloud etc.	F&S	I	

	Interpret the meaning according to the लकारः	solving							
<b>Topic -10 प्रत्ययाः (10 Marks) Time: 11 Hrs (Lecture:- 5 hours Non lecture 06 hrs)</b>									
CO 2, CO 6	10.1 Identify the प्रत्ययाः Interpret the meaning with reference to the context with the support of the प्रत्ययाः	Cognitive domain - Comprehension and problem solving	Must know	Shows how	Lectures with Power point presentation. Group Discussions	Oral & Written objective type very short answer Assignments Quizzes	F&S	II	
CO 2, CO 6	10.2 Identify the प्रत्ययाः Interpret the meaning with reference to the context with the support of the प्रत्ययाः (परीक्षायाम् र्चाच्य प्रयोगः स्वरूपे पृष्टव्यः ।)	Cognitive domain- Application and problem solving	Must to Know	Shows how	Lectures with Power point presentation. Group Discussions	Oral Assignments Quizzes	F&S	II	
<b>Topic 11- नर्षेण नर्षेष््य (05 Marks) Time: 05 Hrs (Lecture:-02 hours Non lecture 03 hrs)</b>									
CO 2, CO 6	Identify and discriminate different types of Visheshanas. Effectively use visheshanas in sentences.	Cognitive domain - Application and problem solving	Must know	Knows how / Shows how	Lectures with Power point presentation. Flipped classroom	Oral & Written Quizzes Word cloud etc.	F&S	II

--	--	--	--	--------------------------	--	--	--	--

<b>Topic 1- Time (Lecture:- 1 hour, Non lecture 2 hours)</b>									
CO 8	Describe Etymological derivation (Vyutpatti), syntactical derivation (Niruktti) and definition of the word Itihasa.	Cognitive/ Knowledge (K)	Must know	Knows	Lecture & Group Discussion,	Written MCQ	F & S	I	
CO 8	Describe of knowledge of history, its significance and utility, means and method of Ayurveda history	Cognitive/ comprehension	Must know	Knows	Lecture & Group Discussion, Tutorial, Video clips	Written MCQ <b>Discussions or debate</b>	F	I	
CO 8 CO 9	Explain Different Time periods relevant for the Study of Ayurveda itihasa (viz, Prevedic, Vedic, Samhita kala, Sangraha kala etc.)	Cognitive/ K	Must know	Knows	Lecture & Group Discussion, Tutorial, Charts, Edutainment.	Written MCQ	F & S	I	
<b>Topic 2- Time (Lecture:- 1 hour, Non lecture 2 hours)</b>									
CO 8 CO 9	Explain different opinions of origin and lineage of Ayurveda available in Samhitas and Samudra manthana and origin of Dhanvantari.	Cognitive/ K	Must know	Knows	Lecture, video & Group Discussion	Written MCQ	F & S	I	
CO 8 CO 9	Outline 2-3 references of Ayurveda in Veda, Upanishat and Puarana	Cognitive/ K	Desirable to know	Knows	Lecture, charts & Group Discussion, SDL	Written MCQ, <b>Online search of Archiological sites for Ayurved. Presentation by Students,</b>	F	I	

CO 8	Describe Ayurveda as Upaveda of Atharvaveda	Cognitive/comprehension	Desirable to know	Knows	Lecture & Group Discussion	Written MCQ	F & S	I	
<b>Topic 3- Time (Lecture:- 2 hour, Non lecture 2 hours)</b>									
CO 8 CO 9	Describe the Structure, Specialities, Time period of Charaka Samhita	Cognitive/K	Must know	Knows	Lecture, charts & Group Discussion Online Visit of Charakaranya, related places.	Written MCQ <b>Chart preparation</b>	F & S	I	
CO 8 CO 9	Briefly explain contribution of Punarvasu Athreya, Agnivesha, Charaka, Drudhabala	Cognitive/K	Must know	Knows	Lecture & Group Discussion	Written MCQ	F & S	I	
CO 8 CO 9	Enumerate the important Commentaries on Charaka Samhita and identify their authors.	Cognitive/K	Must know	Knows	Lecture & Group Discussion, Activity on commentary, Compilation.	Written MCQ <b>Online samhitas, Commentary search</b>	F & S	I	
CO 8 CO 9	Explain the importance of Ayurveda Deepika, Jalpakalpataru.	Cognitive/K	Must know	Knows	Lecture & Group Discussion.	Written MCQ	F & S	I	
CO 8 CO 9	Justify Charakastu Chikitsa in view of Global medical history.	Cognitive/K	Must know	Knows	Lecture & Group Discussion,	Written MCQ <b>Debate Creative writing</b>	F	I	Roganidana, Kayachikitsa
CO 8 CO 9	Describe the Structure, Specialities, Time period of Sushruta Samhita	Cognitive/K	Must know	Knows	Lecture & Group Discussion	Written MCQ Poster making	F & S	I	
CO 8 CO 9	Briefly explain contribution of Dhanvantari, Sushruta,	Cognitive/k	Must know	Knows	Lecture & Group Discussion	Written MCQ	F & S	I	Salya tantra

	Nagarjuna, Chandrata								
CO 8 CO 9	Enumerate the important commentaries on Sushruta Samhita and identify their authors.	Cognitive/K	Must know	Knows	Lecture & Group Discussion	Written MCQ <b>Chart or collage</b>	F & S	I	
CO 8 CO 9	Explain the importance of Nibandha sangraha, Nyaya chandrika,	Cognitive/K	Must know	Knows	Lecture & Group Discussion	Written MCQ	F & S	I	
CO 8 CO 9	Justify Shaareere Sushruta	Cognitive/comprehension	Must know	Knows	Lecture & Group Discussion	Written MCQ Debate/Discussions	F	I	Rachana Sharira, Kriya sharira
CO 8 CO 9	Describe the Contributions of Sushruta Samhita to the field of surgery.	Cognitive/Comprehension	Must know	Knows	Lecture & Group Discussion	Written MCQ	F & S	I	Shalya Tantra
CO 8 CO 9	Identify the acharyas of Atreya and Dhanvantari Sampradaya	Cognitive/K	Must know	Knows	Lecture & Group Discussion Quiz	Written MCQ	F & S	I	
CO 8 CO 9	Describe the Structure, Specialities, Time period of Ahtanga sangraha and Ashtang hridaya.	Cognitive/K	Must know	Knows	Lecture & Group Discussion Video Clips	Written MCQ Chart or collage of events	F & S	I	
CO 8 CO 9	Briefly explain contributions of Vriddha and Laghuvagbhata	Cognitive/K	Must know	Knows	Lecture & Group Discussion	Written MCQ	F & S	I	
CO 8 CO 9	Enumerate commentaries on Ahtanga sangraha and Ashtang hridaya and explain importance of Indu, Hemadri and Arunadatta commentary.	Cognitive/K	Must know	Knows	Lecture & Group Discussion	Written MCQ Quiz	F & S	I	
CO 8	Justify Sutrasthane tu	Cognitive	Must know	Knows	Lecture & Group	Written	F & S	I	

CO 9	vagbhata	e/K			Discussion	MCQ			
CO 8 CO 9	Enumerate the salient features of Bhela Samhita	Cognitiv e/k	Desirable to know	Knows	Lecture & Group Discussion, SDL	Written MCQ	F	I	
CO 8 CO 9	Enumerate the salient features of Hareeta Samhita	Cognitiv e/k	Desirable to know	Knows	Lecture & Group Discussion, SDL	Written MCQ	F & S	I	
CO 8 CO 9	Describe the Structure, Specialties, Time period of Kashyapa Samhita	Cognitiv e/k	Must know	Knows	Lecture & Group Discussion	Written MCQ Chart or collage of Events	F & S	I	
CO 8 CO 9	Briefly explain contribution of Kashyapa, Jeevaka, Vatsya.	Cognitiv e/k	Must know	Knows	Lecture & Group Discussion	Written MCQ	F & S	I	
CO 8 CO 9	Identify contribution of Kashyapa Samhita to the field of Pediatrics.	Cognitiv e/k	Must know	Knows	Lecture & Group Discussion	Written MCQ	F & S	I	
<b>Topic 4- Time (Lecture:- 1 hour, Non lecture 3 hours)</b>									
CO 8 CO 9	Describe Structure, Contributions and importance of Madhava Nidana.	Cognitiv e/k	Must know	Knows	Lecture & Group Discussion, Library Session for handing of books.	Written MCQ Library Searching <b>online availabe Samhitas. Samhita mobile applications</b>	F & S	II	
CO 8 CO 9	Outline the importance of Madhavakara, Vijayarakshita, Shrikanthadatta and Justify nidane madhava shreshtha.	Cognitiv e/k	Must know	Knows	Lecture & Group Discussion	Written MCQ	F & S	II	Roganidana
CO 8	Describe Structure,	Cognitiv	Must know	Knows	Lecture & Group	Written	F & S	II	

CO 9	Contributions and importance of Sharngadhara Samhita.	e/k			Discussion	MCQ			
CO 8 CO 9	Briefly explain contribution of Sharngadhara, Adhamalla, Kashiram.	Cognitiv e/k	Must know	Knows	Lecture & Group Discussion	Written MCQ	F & S	II	
CO 8 CO 9	Explain about Bhavamishra and Enumerate the salient features of Bhavaprakasha.	Cognitiv e/k	Must know	Knows	Lecture & Group Discussion,	Written MCQ	F & S	II	
<b>Topic 5- Time (Lecture:- 1 hour, Non lecture 2 hours)</b>									
CO 8 CO 9	Enlist origin and period of different systems of medicine in the world.	Cognitiv e/k	Must know	Knows	Lecture & Group Discussion	Written MCQ Assignment s	F & S	II	
<b>Topic 6- Time (Lecture:- 0 hour, Non lecture 1 hours)</b>									
CO 8 CO 9	Explain in brief about Ashwayurveda, Gajayurveda, Gavayurveda and Vrukshayurveda.	Cognitiv e/k	Must know	Knows	Lecture (Included in Transitional Curriculum)& Group Discussion	Written MCQ Serach of Use of Ayurved plats in different cattle food.  Poster making	F & S	II	
<b>Topic 7- Time (Lecture:- 1 hour, Non lecture 2 hours)</b>									
CO 8 CO 9	Describe the Status of Ayurveda during the period of Ashoka, Mughal and British rule.	Cognitiv e/K	Desirable to know	Knows	Lecture & Group Discussion, SDL	Written MCQ Collect the photos online and make a documentor	F & S	II

**List of Practicals**

Hours: 180 Hrs

SN	Name of Practical Sanskrit	Term	Hours
P1	Use of Dictionaries and Shabdakoshas अमरकोशः, नौषनधर्गयः, शब्दकल्परुमः, र्चस्पत्यम्	I	15
P2	Translation from Sanskrit to desirable language.	II	15
P3	Translation from desirable language to Sanskrit.	II	15
P4	सम्भाषण भाषा पठनम् Spoken Sanskrit and Communication Skills	III	15
P5	All activity based practicals from above table are enlisted. (In table 2 and Table 3) They are as follows: 1. Presentation of videos about Maheshwar Sutra, Prayatna, Uccharana Sthanani etc. 2. Graphical Representation of Vocal system 3. Reading / Pronunciation 4. Preparing different Shabdarupani and recitation 5. Preparing different Kriyapadani. 6. Practicals on Karakani. 7. Practicals on Pratyayas 8. Practicals on Sandhis 9. Practicals on Samasa 10. Practicals on Upasargas. 11. Practicals on Avyayas 12. Practicals on Visheshan – Visheshya 13. Practicals on Anvay lekhana 14. Practicals on Nirukti 15. Practicals on Paribhasha 16. Practicals on Panchatantra	I I I I/II I I/II II II II II II II I/II/III II/III I/II/II III	120 hours

**Table 4: Learning objectives (Practical) of AyUG- SN & AI**

Sanskrit Practical									
A4 Course outcome	B4 Learning Objective  (At the end of the session, the Students should be able to)	C4 Domain/sub	D4 Must to know/ desirable to know/Nice to know	E4 Level Does/ Shows how/ Knows how/ Know	F4 T-L method	G4 Assessment	H4 Formative /summative	I4 Term	J4 Integration
Practical 1- अमरकोशः - नैषधर्गयः, शब्दकल्पद्रुमः, वृचस्पत्यम्, Dictionaries Time: 15 Hrs (Practical/ Clinical 15 hours)									
CO 5	Refer the dictionaries. Refer the Books on synonyms	Cognitive domain - comprehension	Must to know	knows	Demonstration for identifying the meaning of the words with the support of the shabdakoshas like Amarkosha, Shabda kalpadruma, vachaspatyam etc. Record writing	Oral	F & S	I	
CO 5, 6	Improve the vocabulary.  Use in reading and writing.	Cognitive domain - comprehension	Desirable know	knows	Group Discussions Record writing	Oral Recitation Competitions Aksharashloka competitions etc.	F & S	II	
Practical 2 - Translation from Sanskrit to desirable language. Time: 15 Hrs. (Practical/ Clinical 15 hrs)									
CO 3, 4, 5, 6	Translate from Sanskrit to	Cognitive domain -	Must to know	Shows how	Demonstration Group Activity	Oral Written	F & S	II	

	desirable language.	comprehension, synthesis.			Record writing				
--	---------------------	---------------------------	--	--	----------------	--	--	--	--

**Practical 3 - Translation from desirable language to Sanskrit. Time: 15 Hrs. (Practical/ Clinical 15 hrs)**

CO 3, 4, 5, 6	Translate from desirable language to Sanskrit.	Cognitive domain - comprehension, synthesis.	Must to know	Shows how	Demonstration Group Activity Record writing	Oral Written	F & S	II	
---------------	--	--	--------------	-----------	---	-----------------	-------	----	--

**Practical 4- सम्भाषण भाषा पठनम् Spoken Sanskrit Time: 15 Hrs (Practical/ Clinical 15 hrs)**

CO 6, 7	Apply Sanskrit grammar.	Cognitive domain - comprehension.	Must to know	Shows how	Staging small skits. Script writing, elocution competitions. Games Conversation Peer learning Creating conversations Conversations in different situations by the students.	Oral	F & S	III	
	Write a small paragraph or Script.								
	Speak atleast 5 to 10 lines in Sanskrit fluently.	Psychomotor domain – articulation							
	Stage a skit.	Psychomotor domain – articulation							

P5 All activity based practicals from above table are enlisted. (In table 2 and Table 3) They are as follows: (NLH 120)

1. Presentation of videos about Maheshwar Sutra, Prayatna, Uccharana Sthanani etc.
2. Graphical Representation of Vocal system
3. Reading / Pronunciation
4. Preparing different Shabdarupani and recitation
5. Preparing different Kriyapadani.
6. Practicals on Karakani.
7. Practicals on Pratyayas

8. Practicals on Sandhis
9. Practicals on Samasa
10. Practicals on Upasargas.
11. Practicals on Avyayas
12. Practicals on Visheshan - Visheshya
13. Practicals on Anvay lekhana
14. Practicals on Nirukti
15. Practicals on Paribhasha
16. Practicals on Panchatantra

**6 A-Number of Papers and Marks Distribution**

S.No.	Subject Code	Papers	Theory	Practical/Clinical Assessment					Grand Total
				Practical/Clinical	Viva	Electives	IA	Sub Total	
1.	AyUG-SN & AI	2	200	-	75*	10 (Set-FA)	15	100	300
*Viva voce examination shall be for Sanskrit and not for Ayurved Ithihasa									

**6 B - Scheme of Assessment (formative and Summative)**

SR.NO.		PROFESSIONAL COURSE	DURATION OF PROFESSIONAL COURSE		
			First Term (1-6 Months)	Second Term (7-12 Months)	Third Term (13-18 Months)
1	AyUG- SN & AI	First	3 PA & First TT	3 PA & Second TT	3 PA & UE
PA: Periodical Assessment; TT: Term Test; UE: University Examinations					

**6 C - Calculation Method for Internal assessment Marks (15 Marks)**

TERM	PERIODICAL ASSESSMENT*					TERM TEST**	TERM ASSESSMENT	
	A	B	C	D	E	F	G	H
	1 (15 Marks)	2 (15 Marks)	3 (15 Marks)	Average (A+B+C/3)	Converted to 15 Marks (D/15*15)	Term Test (Marks converted to 15) (15 Marks)	Sub Total _/30 Marks	Term Assessment (.../15)
FIRST							E+F	(E+F)/2
SECOND							E+F	(E+F)/2
THIRD						NIL		E
<b>Final IA</b>	Average of Three Term Assessment Marks as Shown in 'H' Column.							
	Maximum Marks in Parentheses *Select an Evaluation Method which is appropriate for the objectives of Topics from the Table 6 D for Periodic assessment. Conduct 15 marks assessment and enter marks in A, B, and C. ** Conduct Theory (100 Marks)(MCQ(20*1 Marks), SAQ(8*5), LAQ(4*10)) and Practical (100 Marks) Then convert total marks to 15 marks.							

## 6 D- Evaluation Methods for Periodical Assessment

S. No.	Evaluation Methods
1.	Activities Indicated in Table 3 - Column G3 as per Indicated I, II or III term in column I3.
2.	Practical / Clinical Performance
3.	Viva Voce, MCQs, MEQ (Modified Essay Questions/Structured Questions)
4.	Open Book Test (Problem Based)
5.	Summary Writing (Research Papers/ Samhitas)
6.	Class Presentations; Work Book Maintenance
7.	Problem Based Assignment
8.	Objective Structured Clinical Examination (OSCE), Objective Structured Practical Examination (OPSE), Mini Clinical Evaluation Exercise (Mini-CEX), Direct Observation of Procedures (DOP), Case Based Discussion (CBD)
9.	Extra-curricular Activities, (Social Work, Public Awareness, Surveillance Activities, Sports or Other Activities which may be decided by the department).
10.	Small Project
11.	Specific Periodic Assessment <b>AyUG- SN &amp; AI</b> <b>Sanskrit (3 PA / term)</b> Quiz, Puzzles, Word cloud, Cross words, Preparation of charts, mindmaps, Assignments, Open book test, Recitation. Sanskrit Topics 8 and 9 शब्दरूपाणि and धा ्रूपाणि from paper 1 can be asked for recitation, word cloud, crossword etc. in all Terms Test and viva or any from above table. <b>Ayurved Itihas ( 3 PA/term)</b> Quiz, Puzzles, Word cloud, Cross words, Preparation of charts, mindmaps, Assignments, Open book test, Video Clips making. Any of Evaluation Methods for Periodical Assessment

## **PREFACE**

Agada Tantra, is one of the eight clinical branches (Ashtanga) of Ayurveda. This branch of clinical toxicity was considered as the stalwart of Ayurveda which popularized this science across several civilizations around the world. Many great explorers glorified the snake bite management existed in India and this paved way for the popularization of Ayurveda in several countries with Ayurvedic scriptures being translated to several languages and many scholars came to India to study this science. The subject encompasses the detailed study for several toxicological conditions ranging from animate, inanimate and other disease entities with an inherent toxic pathology that enables to apply the principles of Agada Tantra in several diseases of contemporary significance.

Poisons disrupts the homeostasis created by the three doshas. Agada Tantra details measures to re-establish the proper functioning of the dosha, dhatu, mala, srotas and to reinstate the vital force (Oja). To attain this, a judicious use of Agada formulations is necessary coupled with specific treatment procedures enshrined in the 24-fold treatments (Chaturvimsati Upakrama). A proper assessment of the patient with respect to the level of spread of poison in the body ascertained through the concept of Vega is utmost important as far as any successful management of poisoning is concerned. A thorough knowledge of all these is essential to adopt treatment of any poison or to extend it to any contemporary toxicological conditions like contact dermatitis, food poisoning etc. Current curriculum has been designed to unearth the scope of this subject as a clinical branch which aims at empowering an undergraduate student to understand the current clinical toxicological manifestations under the theoretical and practical/clinical framework of Agada Tantra.

The present curriculum of Agada Tantra equips an undergraduate student to grasp the clinical utility of these concepts through an effective teaching-learning process involving cognitive, psychomotor and affective domains. Students will be guided through effective teaching-learning methods to understand the concepts through state-of-the-art techniques like activity based learning, problem based learning and group activities. Effective evaluation techniques are also been incorporated to make the student community learn this subject in its entirety and utilizes the spectrum of its theoretical, practical and clinical aspects.

<b>Topic 1 Concepts of Agada Tantra (Clinical Toxicology) (Lecture :8 hours, Non lecture: 1 hours)</b>									
CO1	Define Agada Tantra and Toxicology. Describe the scope of Agada Tantra in the present era.	CK	MK	K	L&PP T	T-EMI,T- EW	F&S	I	
CO1	Define visha and poison. Enlist its synonyms.	CK	MK	K	L&PP T	T-EMI	F&S	I	
CO1	Differentiate between poison,venom and toxin.	CK	MK	K	L,L& PPT	P-VIVA	F&S	I	
CO1	Describe classification of visha & poison	CK	MK	K	L&PP T	T-EMI,P- VIVA	F&S	I	
CO1	Describe sthavara and jangama visha adhisthana.	CK	MK	K	L&PP T	T- EW	F&S	I	
CO1	Describe the routes of administration of poison.	CC	MK	K	L&PP T	T- EW,P- VIVA	F&S	I	
CO1	Enlist visha guna and differentiate between visha, madya and oja	CK	MK	K	L&PP	T-EMI	F&S	I	

	guna.				T				
CO1	Describe the mode of action of visha (visha gunanusr karma) & poison (Introduction to toxicokinetics).	CC	MK	KH	L,L&PPT,L &GD	T-EMI,T- EW	F&S	I	
CO1	Describe the factors modifying the action of poison.	CC	MK	KH	L&PPT	T- EW	F&S	I	
CO1	Describe vishavardhaka bhava and visha sankata.	CC	MK	KH	L&PPT	T-EMI,T- EW,P-VIVA	F&S	I	
CO1	Describe visha vega & vegantara	CK	DK	K	L&PPT	T-EMI,P-VIVA	F&S	I	
CO1	Describe sthavara visha veganusara lakshana and chikitsa	CK	MK	K	L,L&PPT	T-EMI	F&S	I	
CO1	Describe vishapeeta and vishamukta lakshana.	CK	MK	K	L&GD	T-EMI,P-VIVA	F&S	I	
<b>Topic 2 Visha Chikitsa (Management of Poisoning)</b> (Lecture :5 hours, Non lecture: 4 hours)									
CO2	Describe the diagnosis of poisoning in living and dead.	CAP	MK	KH	L&PPT	T-EMI,T- EW,P-VIVA	F&S	I	
CO2	Enumerate and discuss chaturvimshati upakrama	CC	MK	KH	L&PPT	T- EW,P-VIVA	F&S	I	
CO2	Describe the general principles of management of poisoning.	CAP	MK	KH	L&PPT	T-EMI,P-VIVA	F&S	I	V-KC
CO2	Describe the duties of medical officer in case of suspected poisoning.	CK	MK	K	L&PPT	T-EMI,P-VIVA	F&S	I	
<b>Topic 3 Vishakta aahara pariksha and Viruddha ahara</b> (Lecture :3 hours, Non lecture: 2 hours)									

CO1,CO2,CO3	Explain the various sources of exposure of visha like anna, paana, vastra, abhyanga, lepa, paduka, abharana, etc.	CK	DK	K	L&PP T,L& GD	T- EW,CL- PR,M-CHT	F&S	I	
CO1,CO2,CO3	Describe the Ayurvedic methods of detection of food and beverages contaminated with visha.	CC	MK	KH	L&PP T,L_ VC,S DL,D	T- EW,P-VIV A,P-EXAM	F&S	I	
CO1,CO2,CO3	Define adulteration, describe the methods of detection of adulterants and its relevance in Agada Tantra.	CAP	DK	KH	L_VC ,SDL, PT	T- EW,P-VIV A,P- EXAM,OSPE ,RK	F&S	I	
CO1,CO2,CO3	Describe the modern analytical techniques for the detection of poison (in contaminated articles) like chromatography, spectroscopy, etc.	CC	NK	KH	L&PP T,L& GD,L _VC	T- EW,P- VIVA,CL-PR	F&S	I	
CO1,CO2,CO3	Define viruddha ahara and explain its types.	CC	MK	KH	L&PP T,L& GD,B S	T- EW,P- VIVA,INT	F&S	I	
CO1,CO2,CO3	Discuss and illustrate the contemporary importance of viruddha ahara with examples	CAN	MK	KH	L&G D,BS, SDL	T- EW,QZ ,CL-PR	F&S	I	
CO1,CO2,CO3	Discuss the application of concepts of viruddha ahara in the prevention and management of diseases.	CAP	MK	KH	L&G D,BS, SDL	T- EW,P-VIV A,CR-RED	F&S	I	
CO1,CO2,CO3	Describe food poisoning, its types and management.	CC	MK	KH	L&PP T,L&	T- EW,P-VIV A,CR-RED	F&S	I	

					GD,L _VC, CD				
CO1,CO2,CO3	Discuss the clinical application of principles of Agada Tantra in the management of food poisoning.	CAP	MK	KH	L&G D,BS, CBL, SDL	T- EW,P- VIVA,CL-PR	F&S	I	
CO1,CO2,CO3	Describe the concept of amavisha.	CC	MK	KH	L&PP T,L& GD,L _VC	T- EW,P- VIVA	F&S	I	
<b>Topic 4 Garavisha and Dooshivisha</b> (Lecture :7 hours, Non lecture: 2 hours)									
CO1,CO3	Describe the various definitions of garavisha.	CK	MK	K	L&PP T	T- EW	F&S	I	
CO1,CO3	Describe the clinical presentations of garavisha.	CC	MK	KH	L&PP T	T- EW	F&S	I	
CO1,CO3	Understand and explain the management principles of garavisha.	CC	MK	KH	L&PP T	T- EW	F&S	I	
CO1,CO3	Describe the various definitions of dooshivisha.	CC	MK	KH	L&PP T	T- EW	F&S	I	
CO3	Describe the clinical presentations of dooshivisha.	CC	MK	KH	L&PP T	T- EW	F&S	I	
CO3,CO4	Describe the principles of management of dooshivisha.	CC	MK	KH	L&PP T,DIS	T- EW,P-REC	F&S	I	
CO3,CO4	Discuss the application of the concept of dooshivisha and	CAP	MK	KH	L&G	P-VIVA	F&S	I	

	garavisha and its management in day to day clinical practice.				D				
CO3,CO5	Discuss the recent research updates in the concept of garavisha and dooshivisha.	CAN	MK	KH	L&G D,PE R	P-VIVA,CL- PR	F&S	I	
CO1,CO3,CO 4	Describe garavisha and dooshivisha as an etiology for the diseases of present era.	CAP	MK	KH	DIS,B S,FC	P-VIVA,CL- PR	F&S	I	
<b>Topic 5 Visha Upadrava and diseases caused due to exposure to Visha/poisons</b> (Lecture :4 hours, Non lecture: 2 hours)									
CO1,CO3	Describe visha upadrava.	CK	MK	K	L&PP T	T- EW,P- VIVA	F&S	I	
CO2,CO3,CO 4	Define drug induced toxicity and discuss its Agada Tantra perspective.	CC	MK	KH	L&G D,L_ VC,B S	T- EW,T- OBT,P-VIVA	F&S	I	
CO2,CO3,CO 4	Discuss the application of principles of Agada Tantra in drug induced hepatotoxicity, nephrotoxicity and neurotoxicity.	CAP	MK	KH	L&PP T,CB L	T- EW,P- VIVA,CL-PR	F&S	I	
CO2,CO3,CO 4	Discuss various occupational poisons and their health hazards.	CC	MK	KH	L&PP T,PB L,SD L	T-OBT,P-VIV A,M-CHT,M- POS	F&S	I	H-SW
CO2,CO3,CO 4	Discuss the application of principles of Agada Tantra in occupational diseases caused due to pollution, paints, pesticides, fertilizer and other chemicals.	CC	DK	KH	L&PP T,ML	QZ ,CL-PR,M- CHT,M-POS	F&S	I	
CO2,CO3,CO 4	Define and discuss allergy, types of allergens and its understanding as per Ayurveda.	CC	MK	KH	L&PP T,DIS ,BS,C	INT,CR-RED	F&S	I	

					BL				
CO2,CO3,CO4	Discuss the application of the treatment principles of Agada Tantra in various allergic manifestations.	CAP	MK	KH	L&G D,BS, CBL	T-EMI,P-VIV A,PRN,CL-PR	F&S	I	
CO2,CO3,CO4	Define and enlist endocrine disruptors and discuss its Agada Tantra perspectives.	CAP	DK	KH	L&PP T,DIS ,BS,C BL	CL-PR,M- CHT,COM	F&S	I	
<b>Topic 6 Environmental Toxicology</b> (Lecture :2 hours, Non lecture: 5 hours)									
CO4,CO5	Define environmental toxicology.	CK	DK	K	L&PP T,DIS	PRN,M-POS	F&S	II	
CO3,CO4,CO5	Describe the lakshanas and chikitsa of vishakta bhoomi, vishakta jala, and vishakta vayu.	CK	DK	K	L&PP T	P-VIVA,P- MOD	F&S	II	
CO4,CO5	Define pollution. Describe various pollutants and explain water pollution, soil pollution, air pollution,along with their health hazards.	CK	DK	KH	L&PP T,BS	T- EW,T-CS,P RN,P-MOD	F&S	II	
CO4,CO5	Describe the health effects of biological, chemical and nuclear warfare.	CK	NK	K	L&G D,SD L	PRN,QZ	F&S	II	
CO4,CO5	Define ecotoxicology & biomagnification.	CK	NK	KH	L&G D,SD L	PRN,CL-PR	F&S	II	
CO4,CO5	Explain the concept of toxicovigilance	CC	DK	K	FC,S DL	P-POS,CL- PR,CR-RED	F	II	
<b>Topic 7 Dermatological manifestations of visha/poisons.</b> (Lecture :6 hours, Non lecture: 2 hours)									

CO3,CO4	Describe the clinical presentations and diagnosis of paduka visha, abharana visha, vastra visha, lepa visha, abhyanga visha, etc.	CAP	MK	KH	L&PP T,DIS ,CBL, CD	T- EW,P- CASE,CL-PR	F&S	II	
CO3,CO4	Discuss the management of paduka visha, abharana visha, vastra visha, lepa visha, abhyanga visha, etc.	CAN	MK	KH	L&PP T,DIS ,CBL, PER	T- EW,P-EXA M,P- CASE,CL-PR	F&S	II	
CO3,CO4	Describe contact dermatitis and its types.	CK	MK	K	L&PP T	T- EW,P- VIVA	F&S	II	
CO3,CO4	Discuss the application of treatment principles of Agada Tantra in the contact dermatitis.	CAP	MK	KH	L&PP T,CB L	P-VIVA,P- CASE,CL-PR	F&S	II	
CO3,CO4	Discuss the dermatological conditions caused due to garavisha and dooshivisha.	CAP	MK	KH	L&PP T,DIS ,CBL, CD	T- EW,P-VIV A,P-CASE	F&S	II	
CO3,CO4	Discuss the application of principles of treatment of garavisha and dooshivisha in the management of dermatological manifestations.	CAP	MK	KH	L&PP T,DIS ,CBL	P-VIVA,P- CASE,CL-PR	F&S	II	
CO3,CO4	Discuss the daignosis and application of the treatment principles of Keeta visha in dermatological manifestations due to bites & stings.	CAP	MK	KH	L&PP T,DIS ,CBL, SDL	T- EW,P-VIV A,P-CASE,CL- PR	F&S	II	
<b>Topic 8 Therapeutic utility of Agada yoga</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1,CO2,CO	Enlist ingredients and discuss the therapeutic utility of	CAP	MK	KH	L&PP	T- EW,P-	F&S	II	

3,CO4	Doohivishari Agada, Bilwadi Agada, Dashanga Agada, Murvadi agada and Panchashririsha Agada.				T,DIS ,CBL	CASE			
CO1,CO2,CO 3,CO4	Enlist and discuss the ingredients of vishaghna mahakashaya (Charaka Samhita) and ekasara gana (Sushruta Samhita).	CAP	MK	KH	L&PP T,BS, CBL, FC	T- EW,P- VIVA	F&S	II	
<b>Topic 9 Sthavara visha – Poisons of Plant origin</b> (Lecture :4 hours, Non lecture: 2 hours)									
CO2,CO4,CO 6	Describe the active principles, mode of action, fatal dose, fatal period, signs and symptoms, management, post-mortem appearance and medicolegal aspects of vatsanabha.	CAP	MK	KH	L&PP T	T- EW,P- VIVA,P-ID	F&S	II	
CO2,CO4	Mention therapeutic dose and enlist two important formulations of vatsanabha.	CK	NK	K	L	T-EMI,P-VIV A,P-EXAM	F&S	II	
CO2,CO4,CO 6	Describe the active principles, mode of action, fatal dose, fatal period, signs and symptoms, management, post-mortem appearance and medicolegal aspects of karaveera.	CAP	MK	K	L&PP T	T- EW,P- VIVA,P-ID	F&S	II	
CO2,CO4	Mention therapeutic dose and enlist two important formulations of karaveera.	CK	NK	K	L	T- EW,T- ME Qs,P-VIVA,P- EXAM	F&S	II	
CO2,CO6	Describe mode of action, fatal dose, fatal period, signs and symptoms, management, post-mortem appearance and medicolegal aspects of digitalis.	CAP	NK	K	L&PP T	T- EW,P- VIVA	F&S	II	
CO2,CO6	Describe mode of action, fatal dose, fatal period, signs and symptoms, management, post-mortem appearance and medicolegal aspects of tobacco.	CK	MK	K	L&PP T	T- EW,P-ID	F&S	II	
CO2,CO6	Describe mode of action, fatal dose, fatal period, signs and symptoms, management, post-mortem appearance and	CK	DK	K	L&PP T	T- EW	F&S	II	

	medicolegal aspects of Cerbera odollam.								
CO2,CO4,CO6	Describe the active principles, mode of action, fatal dose, fatal period, signs and symptoms, management, post-mortem appearance and medicolegal aspects of Kupeelu.	CK	MK	KH	L&PP T	T- EW,P- VIVA,P-ID	F&S	II	
CO2,CO6	Mention therapeutic dose and enlist two important formulations of kupeelu.	CK	NK	K	L	T-EMI	F&S	II	
CO2,CO4,CO6	Describe the active principles, mode of action, fatal dose, fatal period, signs and symptoms, management, post-mortem appearance and medicolegal aspects of ahiphena.	CK	MK	KH	L&PP T	T- EW,P- VIVA,P-ID	F&S	II	
CO2,CO6	Mention therapeutic dose and enlist two important formulations of ahiphena.	CK	NK	K	L	T-EMI	F&S	II	
CO2,CO4,CO6	Describe the active principles, mode of action, fatal dose, fatal period, signs and symptoms, management, post-mortem appearance and medicolegal aspects of dhatura.	CK	MK	KH	L&PP T	T- EW,P- VIVA,P-ID	F&S	II	
CO2,CO6	Mention therapeutic dose and enlist two important formulations of dhatura.	CK	NK	K	L	T-EMI	F&S	II	
CO2,CO4,CO6	Describe the active principles, mode of action, fatal dose, fatal period, signs and symptoms, management, post-mortem appearance and medicolegal aspects of Bhanga.	CK	MK	K	L&PP T	T- EW,P-VIV A,P-EXAM,P- ID	F&S	II	
CO2,CO6	Mention therapeutic dose and enlist two important formulations of bhanga.	CK	NK	K	L	T-EMI	F&S	II	
CO2,CO4,CO6	Describe the active principles, mode of action, fatal dose, fatal period, signs and symptoms, management, post-mortem appearance and medicolegal aspects of jayapala.	CK	MK	K	L&PP T	T- EW,P- VIVA,P-ID	F&S	II	
CO4	Mention therapeutic dose and enlist two important formulations	CK	NK	K	L	T-EMI,P-	F&S	II	

	of jayapala.					EXAM			
CO2,CO4,CO 6	Describe the active principles, mode of action, fatal dose, fatal period, signs and symptoms, management, post-mortem appearance and medicolegal aspects of gunja.	CAP	DK	KH	L&PP T	T- EW,P- VIVA,P-ID	F&S	II	
CO4	Mention therapeutic dose and enlist two important formulations of gunja.	CK	NK	KH	L	T- EW,P-VIV A,P-EXAM	F&S	II	
CO2,CO4,CO 6	Describe the active principles, mode of action, fatal dose, fatal period, signs and symptoms, management, post-mortem appearance and medicolegal aspects of bhallataka.	CAP	MK	KH	L&PP T	T- EW,P- VIVA,P-ID	F&S	II	
CO4	Mention therapeutic dose and enlist two important formulations of bhallataka.	CK	NK	K	L	T-EMI,P-VIV A,P-EXAM	F&S	II	
CO2	Describe the active principles, mode of action, fatal dose, fatal period, signs and symptoms, management, post-mortem appearance and medicolegal aspects of arka and snuhi.	CK	DK	K	L&PP T	T- EW,P- VIVA	F&S	II	
CO2,CO4,CO 6	Describe the active principles, mode of action, fatal dose, fatal period, signs and symptoms, management, post-mortem appearance and medicolegal aspects of langali.	CK	NK	K	L&PP T	T- EW,P- VIVA,P-ID	F&S	II	
<b>Topic 10 Sthavara Visha – Poisons of Metallic origin</b> (Lecture :4 hours, Non lecture: 2 hours)									
CO2	Describe the mode of action, fatal dose, fatal period, signs and symptoms, management, post-mortem appearance, medicolegal aspects of acute poisoning of  1. Arsenic 2. Mercury 3. Lead 4. Copper	CK	MK	K	L&PP T,PB L	T-EMI,T- MEQs,P- VIVA	F&S	II	

	Write its therapeutic dose and enlist any four important formulations.								
CO1,CO2	Discuss the Ayurvedic concepts for the diagnosis and management of chronic heavy metal toxicity.	CC	DK	K	L&PP T,L& GD	T-EMI,T- MEQs,P- VIVA	F&S	II	
CO2,CO3,CO 4	Discuss the toxicological implications of improperly prepared medicines with special reference to those containing metals, minerals and poisonous substances.	CAP	NK	KH	L&PP T,CB L,FC	P-VIVA	F&S	II	
<b>Topic 11 Jangama Visha</b> (Lecture :10 hours, Non lecture: 6 hours)									
CO2,CO5	Describe sarpa bheda and enumerate the identification features of darvikara, mandali and rajimantha sarpa.	CAP	MK	KH	L&PP T,BS, CBL	T- EW,P-VIV A,P-EXAM	F&S	II	
CO2,CO5	Classify snakes and describe the features of venomous and non venomous snakes and identify their bites.	CAN	MK	K	L&PP T	T- EW,P-VIV A,P-EXAM	F&S	II	
CO2,CO5	Describe the fatal dose, fatal period, signs and symptoms of common cobra, king cobra, russel's viper, saw scaled viper, pit vipers and common krait.	CAN	MK	KH	L&PP T,DIS ,BS,C BL	T- EW,T-CS,P -VIVA,P- EXAM	F&S	II	
	Describe the samanya lakshana and samanya chikitsa of darvikara, mandali and rajimanth sarpa damsha.	CK	MK	K	L	T-EMI	F&S	II	
CO2,CO5	Describe the management of snake bites according to recent WHO snake bite management guidelines.	CAN	MK	KH	L&PP T,CB L,PE R,CD	T- EW,P-VIV A,P-EXAM	F&S	II	
CO2,CO5	Describe the classification, diagnosis, samanya lakshana and chikitsa of lootavisha with its contemporary aspects.	CAN	MK	KH	L&PP T,CB	T- EW,P- VIVA	F&S	II	

					L				
CO2,CO5	Describe the classification, diagnosis, samanya lakshana and chikitsa of vrischika damsha (Scorpion Sting) along with its contemporary aspects.	CK	MK	K	L&PP T,CB L,CD	T- EW,P-VIV A,P-EXAM	F&S	II	
CO2,CO4	Describe leptospirosis and rat bite fever with special reference to mushika visha.	CK	NK	K	L,CB L	T- EW	F&S	II	
CO2,CO5	Describe rabies and its management with special reference to alarka visha.	CK	DK	KH	L&G D,CB L	T- EW,P- VIVA	F&S	II	
CO2,CO5	Describe the classification of keeta, samanya sakshana and chikitsa of keeta damsha with special importance to regional prevalence.	CAN	DK	KH	L&PP T,CB L	T- EW	F&S	II	
CO2,CO5	Discuss the application of visha chikitsa in vector borne diseases like chikungunya, dengue and malaria.	CAP	DK	KH	L&PP T,DIS	P-VIVA	F&S	II	
<b>Topic 12 Kritrima visha</b> (Lecture :2 hours, Non lecture: 0 hours)									
CO2	Describe the action of poison, fatal dose, fatal period, signs and symptoms, management, post mortem appearance and medico legal aspects of  Inorganic acids - Sulphuric acid, Hydrochloric acid and Nitric Acid  Organic acids - Oxalic acids, Carbolic acids and Formic acid  Alkalies	CK	MK	KH	L&PP T,PE R	T- EW,P-VIV A,P-EXAM	F&S	III	
CO2	Describe the action of poison, fatal dose, fatal period, signs and	CK	DK	KH	L&PP T,PE	T- EW,P- VIVA	F&S	III	

	<p>symptoms, management, post mortem appearance and medico legal aspects of</p> <p>Asphyxiants - CO and CO2</p> <p>Non Metal - Phosphorous</p> <p>Hydrocarbon - Kerosene</p>				R				
CO2	Describe the action of poison, fatal dose, fatal period, signs and symptoms, management, post mortem appearance and medico legal aspects of agrochemical poisons- organophosphorous compounds, carbamates, organochlorine compounds and aluminium phosphide and enlist the household poisons.	CAP	MK	SH	L&PP T,PB L	T- EW,P-VIV A,P-EXAM	F&S	III	
<b>Topic 13 Substances of abuse</b> (Lecture :4 hours, Non lecture: 3 hours)									
CO1,CO2	Define Mada and describe its stages.	CK	MK	K	L&PP T	T-EMI,T- MEQs,P- VIVA	F&S	III	
CO1,CO2	Describe the types of madatyaya along with its management.	CK	MK	K	L&PP T	T-EMI,T- MEQs,P- VIVA	F&S	III	
CO1,CO2,CO 6	Describe mode of action, fatal dose, fatal period, signs and symptoms, management, post mortem appearance and medicolegal importance of acute ethanol poisoning.	CC	MK	KH	L&PP T	T-EMI,T-CS, T-OBT,P- VIVA	F&S	III	
CO1,CO2,CO 6	Describe mode of action, fatal dose, fatal period, signs and symptoms, management, post mortem appearance and medicolegal importance of acute methanol poisoning.	CC	MK	K	L&PP T	T-EMI,T- MEQs,P- VIVA	F&S	III	
CO2,CO4	Discuss the application of principles of Ayurveda in the	CC	MK	KH	L&G	T- EW,P-	F&S	III	

	management of chronic alcoholism.				D,BS	VIVA			
CO2,CO4	Discuss the signs & symptoms of alcohol withdrawal with its Ayurvedic approach.	CC	MK	KH	L&G D,BS, IBL	T- EW,P- VIVA	F&S	III	
CO2,CO4	Discuss the signs & symptoms of withdrawal of bhang (cannabis), ahiphena/opium and its derivatives, tobacco, LSD and MDMA with its Ayurvedic approach.	CC	MK	KH	L&G D,BS, TUT	T- EW,P- VIVA	F&S	III	
CO2,CO4	Discuss the reseach updates in Ayurveda in the management of conditions due to substances of abuse.	CC	MK	KH	L&G D	T-EMI,T- ME Qs,T-CRQs,P- VIVA	F&S	III	
CO7	Describe the NDPS Act.	CK	DK	K	L&PP T	T- EW	F&S	III	
<b>Topic 14 Agada Tantra perspectives on cancer</b> (Lecture :2 hours, Non lecture: 4 hours)									
CO2,CO4	Discuss the concepts of Agada Tantra in oncology.	CC	MK	KH	L&G D,BS, PBL	T-EMI,T- MEQs,P- VIVA	F&S	III	
CO1,CO2	Enlist the cancer causing toxic chemicals / substances (toxic carcinogens) and describe the process of mutation in genes and carcinogenesis.	CC	MK	K	L&G D	T-EMI,T- ME Qs,T-CRQs,P- VIVA,SA	F&S	III	
CO2,CO4	Describe the chemotherapy induced common toxicities and Ayurvedic approach for its management.	CC	MK	KH	L&PP T,PB L	T-EMI,T- ME Qs,T-CRQs,P- VIVA,SA	F&S	III	
CO2,CO4	Describe the radiotherapy induced common toxicity and Ayurvedic approach for its management.	CC	MK	KH	L&G D,PB L,SD L	T-EMI,T- ME Qs,T-CRQs,P- VIVA	F&S	III	

CO2,CO4	Discuss the role of visha and vishaghna dravya in the management of cancer along with its research updates.	CC	DK	KH	L&G D,BS	T-EMI,T- ME Qs,T-CRQs,P- VIVA	F&S	III	
<b>Topic 15 Forensic medicine (Vyavahara Ayurveda) and Medical jurisprudence (Vidhi vaidyaka):</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1,CO6,CO 7	Define Forensic Medicine & Medical Jurisprudence. Give an introduction to Indian Penal Code (IPC), Criminal Procedure Code (CrPC) and Indian Evidence Act (IEA).	CC	MK	KH	L&G D	T- EW,P- VIVA,QZ	F&S	I	
<b>Topic 16 Vaidya sadvritta : Duties and Responsibilities of medical practitioner</b> (Lecture :6 hours, Non lecture: 4 hours)									
CO1,CO6,CO 7	Describe vaidya sadvritta, medical ethics, code of conduct, Charaka oath and Hippocratic oath.	CK	MK	K	L&PP T,L& GD,B S,PER	T- EW,P- VIVA	F&S	I	
CO1,CO6,CO 7	Describe the constitution, objectives and functions of NCISM.	CK	MK	K	L&PP T,DIS	T- EW,P- VIVA	F&S	I	
CO6,CO7	Describe the duties and rights and privileges of a registered medical practitioner.	CK	MK	K	L&PP T,DIS	T- EW,P- VIVA	F&S	I	
CO1,CO6,CO 7	Describe consent, professional secrecy and privileged communication.	CC	MK	K	L&PP T,BS	T- EW	F&S	I	
CO1,CO6,CO 7	Describe professional negligence, professional misconduct and unethical practices.	CC	MK	K	L&G D,CB L,PE R	T- EW,P- VIVA	F&S	I	
CO6,CO7	Explain the defenses in medical negligence suits with appropriate case laws.	CAP	MK	K	L&PP T,L& GD,B	T- EW,P- VIVA	F&S	I	

					S,CB L				
CO6,CO7	Describe the maintainance of medical records and explain its significance.	CC	MK	K	L,FV	T- EW,P-VIVA	F&S	I	
CO7	Describe the Consumer Protection Act.	CK	MK	K	L&PP T	T- EW,P-VIVA	F&S	I	
<b>Topic 17 Legal Procedures</b> (Lecture :4 hours, Non lecture: 4 hours)									
CO1,CO6,CO7	Describe the types of courts along with their powers. Describe - Inquest, Evidence, Witness, Summons, Conduct money and procedure of recording of evidence in a court of law. Describe the conduct of a medical professional in the court of law.	CC	MK	KH	L&PP T,DIS ,SDL	T- EW,P-VIVA,CL-PR	F&S	I	
<b>Topic 18 Personal identity</b> (Lecture :2 hours, Non lecture: 2 hours)									
CO1,CO6	Define identification and enlist the identification data. Describe the method of estimation of age based on Teeth, ossification of bones, secondary sexual characteristics and general development.	CC	DK	KH	L&PP T,L_ VC,D IS	T- EW,P-VIVA	F&S	I	
CO1,CO6	Describe the medico-legal importance of age, tattoo marks and occupational marks.	CK	DK	K	L&PP T	T- EW	F&S	I	
CO1,CO6	Describe the medico-legal importance of race, religion, sex, moles and hair.	CC	DK	KH	L_VC ,DIS, EDU	P-VIVA	F	I	
CO1,CO6	Describe the medico-legal importance of handwriting, dactylography, DNA typing and superimposition as an identification data.	CK	NK	K	L,ED U	T- EW	F	I	
<b>Topic 19 Thanatology</b> (Lecture :6 hours, Non lecture: 2 hours)									

CO6	Define death and describe the stages and modes of death. Explain the immediate changes following death.	CC	MK	KH	L&PP T,L& GD,L _VC	T- EW,P- VIVA	F&S	II	
CO6	Enlist and explain the early changes following death. Describe Algor mortis, rigor mortis and livor mortis with regards to their definition, mechanism, modifying factors and medico legal importance. Enable Ginger <i>Cannot connect to Ginger</i> Check your internet connection or reload the browser Disable in this text field Rephrase Rephrase current sentence Edit in Ginger	CC	MK	KH	L&PP T,L_ VC,D IS,SI M	T- EW,P- VIVA	F&S	II	
CO6	Enlist the late changes following death and describe the definition, modifying factors and medico legal importance of putrefaction, mummification and adipocere formation. Enable Ginger <i>Cannot connect to Ginger</i> Check your internet connection or reload the browser Disable in this text field Rephrase Rephrase current sentence Edit in Ginger	CC	MK	KH	L&PP T,L_ VC,D IS	T- EW,P- VIVA	F&S	II	
CO6	Define Autopsy and describe its types, its objectives, rules and procedure along with exhumation.	CC	MK	KH	L&PP T,L_ VC	T- EW,P- VIVA	F&S	II	
CO6	Describe the Transplantation of Human Organs and Tissues Act.	CC	NK	KH	BS,S DL,P ER	T- EW,P- VIVA	F	II	
<b>Topic 20 Asphyxial deaths</b> (Lecture :4 hours, Non lecture: 2 hours)									
CO6	Define hanging. Describe its classification, causes of death, post-mortem appearances and medico-legal aspects.	CK	MK	KH	L&PP T,DIS	T- EW,T- ME Qs,T-CS,P-	F&S	II	

						VIVA,P-MOD			
CO6	Define strangulation and suffocation. Enlist their classification, post-mortem appearances and medico-legal aspects.	CK	MK	K	L&PP T,D- M	T- EW,T- ME Qs,PRN,M- MOD	F&S	II	
CO6	Define Drowning, explain its classification, post-mortem appearances and medico-legal aspects.	CK	MK	K	L&PP T,L_ VC	T- EW,P-VIV A,PRN,P- CASE	F&S	II	
<b>Topic 21 Injury</b> (Lecture :5 hours, Non lecture: 3 hours)									
CO6	Define and classify Injuries. Describe the medico-legal aspects of injuries.	CK	MK	K	L&G D	T- EW	F&S	II	
CO6	Describe the characteristics, age and medico-legal aspects of mechanical injuries.	CK	MK	K	L&PP T	T- EW	F&S	II	
CO6	Describe firearm injuries, its characteristics and medico-legal aspects. Differentiate between entry and exit wound	CK	DK	K	L&PP T	T- EW	F&S	II	
CO6	Define and classify thermal injury. Describe charecterstics and degrees of burns, rule of nine, post-mortem appearances, and medico-legal aspects.	CK	DK	K	L&G D	T- EW	F&S	II	
CO6	Explain medico-legal aspects of dowry death.	CK	NK	K	L&G D	T- EW	F&S	II	
<b>Topic 22 Pregnancy, delivery and abortion</b> (Lecture :2 hours, Non lecture: 3 hours)									
CO6,CO7	Define pregnancy, delivery, infanticide and battered baby syndrome along with their medico legal aspects.	CK	MK	K	L,L& PPT,L &GD	T- EW,T-CS,P -VIVA,P- EXAM	F&S	III	
CO6,CO7	Define and classify abortion, MTP Act and PCPNDT Act.	CK	MK	K	L&PP T,D-	T- EW,T- ME Qs,T-CS,P-	F&S	III	

					M,D	VIVA,PRN			
CO6,CO7	Describe Surrogacy (Regulation) Act 2021 and the Assisted Reproductive Technology (Regulation) Act 2021.	CK	NK	KH	L,L&PPT	P-VIVA,O-QZ	F&S	III	
<b>Topic 23 Sexual offences</b> (Lecture :2 hours, Non lecture: 1 hours)									
CO6	Describe classification of sexual offences.	CK	NK	KH	L&PP T	P-VIVA,PRN, QZ	F&S	III	
CO6	Define rape. Describe the examination of rape victim and accused and its medico legal aspects.	CK	MK	KH	L&PP T,CB L	T- EW,P-VIV A,P- EXAM,PRN	F&S	III	
CO6	Define the un-natural sexual offences and sexual perversion with their medico-legal aspects and give introduction to POCSO Act.	CK	NK	K	L&PP T,CB L	P-VIVA,QZ	F&S	III	
<b>Topic 24 Forensic psychiatry.</b> (Lecture :2 hours, Non lecture: 2 hours)									
CO6	Describe the symptoms commonly associated with psychiatric disorders & the significance of lucid interval.	CK	DK	K	L&PP T,TU T	T-EMI,T- EW,P-VIVA	F&S	III	
CO6,CO7	Describe the civil and criminal responsibilities of a mentally ill person.	CK	DK	K	L&PP T	T- EW,P- VIVA	F&S	III	
CO6	Describe Mental Health Act	CK	NK	K	SDL, PER	T- EW,P- VIVA	F&S	III	
<b>Topic 25 Forensic science laboratory</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO6	25.1. Hierarchy and major divisions of forensic lab services.  25.2. Newer techniques and recent advances - polygraphy,	CK	DK	K	L&PP T,ML	T-OBT,P- VIVA	F&S	III	

narcoanalysis, DNA profiling.

**Topic 26 Laws, Acts, Rules and Regulations** (Lecture :3 hours, Non lecture: 2 hours)

CO6,CO7	Describe the  1. NCISM Rules and Regulations in force. 2. Clinical Establishments Act. 3. Medicare Service Persons and Medicare Service Institutions (Prevention of violence and damage or loss to property) Act, 2008. 4. The Drug and Cosmetic Act - schedules related to poison. 5. Rules and Regulations related to AYUSH State Registration Boards of concern state.	CK	DK	K	L&PP T,DIS ,SDL	T- EW,P- VIVA,CL-PR	F&S	III	
---------	---	----	----	---	-----------------------	------------------------	-----	-----	--

**List of Practicals** [Term and Hours]

<b>PRACTICALS (Marks-100)</b>			
<b>S.No</b>	<b>List of Topics</b>	<b>Term</b>	<b>Hours</b>
1	Visha Chikitsa	1	6
2	Vishakta Ahara Pariksha	1	6
3	Dooshivisha, Garavisha, Visha Upadrava	1	20
4	Dermatological manifestation of visha	2	20
5	Environmental toxicology	2	2
6	Jangama Visha	2	10
7	Sthavara visha	2	6
8	Substance abuse	3	8

<b>Topic 1 Visha Chikitsa</b>									
CO2	Demonstrate the procedure of gastric lavage on mannequin.	CAP	MK	SH	D-M,D	P-EXAM,P-PRF,OSPE	F&S	I	
CO2	Demonstrate the procedure of CPR on mannequin.	PSY-MEC	MK	D	D-M,D	P-EXAM,P-PRF,OSPE	F&S	I	
CO2	Observe the different procedures for removal of absorbed poison.	CC	MK	KH	L_VC,D	P-VIVA	F&S	I	
<b>Topic 2 Vishakta Ahara Pariksha</b>									
CO2	Demonstrate adulteration detection test for urea in milk, boric acid in milk, artificial colour in turmeric, pulses and vegetables as per recent Food Safety and Standards Authority of India (FSSAI) guidelines.	PSY-SET	MK	D	D_L	P-PRF,RK	F&S	I	
CO2	Demonstrate adulteration detection test for argemone oil in mustard oil and adulterants in Honey as per recent FSSAI guidelines.	PSY-SET	MK	D	D_L	P-PRF,RK	F&S	I	
<b>Topic 3 Dooshivisha, Garavisha, Visha Upadrava</b>									

CO3,CO4	Diagnosis and management of diseases due to garavisha, dooshivisha and visha upadrava - drug induced toxicities.	CAP	MK	SH	L_VC ,CBL, SIM, CD	SP,OSCE ,RK	F&S	I	
CO3,CO4	Diagnosis and management of diseases due to garavisha, dooshivisha and visha upadrava - occupational hazards.	CAP	MK	KH	L_VC ,PBL, CBL, SIM, CD	OSCE ,RK	F&S	II	
CO3,CO4	Diagnosis and management of diseases due to garavisha, dooshivisha and visha upadrava - allergic manifestations.	CAP	MK	KH	L_VC ,PBL, CBL, SIM, CD	OSCE ,RK	F&S	I	
CO3,CO4	Diagnosis and management of diseases due to garavisha, dooshivisha and visha upadrava - autoimmune diseases	CAP	MK	KH	L_VC ,CBL, CD	OSCE ,RK	F&S	I	
CO3,CO4	Diagnosis and management of diseases due to garavisha, dooshivisha and visha upadrava - endocrine disruptors induced diseases.	CAP	MK	KH	L_VC ,CBL, CD	OSCE ,RK	F&S	I	
<b>Topic 4 Dermatological manifestation of visha</b>									
CO3,CO4	Diagnosis and Management of Dermatological manifestations due to visha ex: contact poisoning (paduka visha, abharana visha etc.)	CAN	MK	SH	L_VC ,CBL, CD	OSCE ,RK	F&S	II	
CO3,CO4	Diagnosis and management of dermatological manifestations due to visha - bites and stings.	CAP	MK	KH	L_VC ,CBL, CD	OSCE ,RK	F&S	II	

CO3,CO4	Diagnosis and Management of contact dermatitis based on the principles of Agada Tantra.	CAP	MK	KH	L_VC ,CBL, CD	OSCE ,RK	F&S	II	
<b>Topic 5 Environmental toxicology</b>									
CO5	Social Awareness program related to environmental toxicology – Rally, street play, skit etc	AFT- VAL	DK	SH	RP	P-VIVA,M- CHT	F	II	
<b>Topic 6 Jangama Visha</b>									
CO2,CO4	Demonstrate identification of poisonous and non poisonous snakes.	CAN	MK	KH	L&G D,L_ VC,D- M,FV	P-VIVA,P- EXAM,OSCE	F&S	II	
CO2,CO4	Demonstration of the diagnosis of poisonous snake bite cases based on local and systemic clinical presentations.	CAP	MK	KH	L&G D,L_ VC,C BL,C D	P-VIVA,P- EXAM,RK	F&S	II	
CO2,CO4	Demonstration of identification of vrishchika, loota and keeta based on regional prevalence and their diagnosis based on clinical presentations.	CAP	MK	KH	L&G D,L_ VC,C BL,C D	P-VIVA,P- EXAM,RK	F&S	II	
<b>Topic 7 Sthavara visha</b>									
CO2	Demonstration of Identification of vatsanabha, karaveera and tobacco with their respective toxic parts.	CAN	MK	KH	D- M,D	P-VIVA,P- EXAM,OSPE ,RK	F&S	II	
CO2	Demonstration of Identification of kupeelu, dhattura and bhanga	CAN	MK	KH	D	P-VIVA,P-	F&S	II	

	and their respective toxic part.					EXAM,OSPE ,RK			
CO2	Demonstration of Identification of jayapala, gunja, bhallataka, langali with their respective toxic parts.	CAN	MK	KH	D	P-VIVA,P-EXAM,OSPE ,RK	F&S	II	
CO2	Demonstration of identification of arsenic, copper, mercury and lead.	CAN	MK	K	D-M	P-VIVA,P-EXAM	F&S	III	
CO2	Demonstration of Identification of non metal and mineral compounds, acids, alkalis, agrochemicals, hydrocarbons and household poisons.	CK	MK	K	D	P-VIVA,P-EXAM,RK	F&S	III	
<b>Topic 8 Substance abuse</b>									
CO2,CO4	Create public awareness on substance abuse and its ill effects.	AFT-VAL	MK	SH	RP,D	P-POS,QZ ,M-CHT	F	III	
<b>Topic 9 Legal Procedures</b>									
CO6,CO7	Demonstartion on issuing of fitness certificate, sickness certificate, birth and death certificate, and other relevant medical and medico legal certificates.	CAN	MK	D	PBL, W,PT	P-EXAM,OSPE ,RK	F&S	I	
CO6,CO7	Demonstartion of reporting of Leave against medical advice (LAMA), discharge against medical advice (DAMA) and doscharge on patient request (DOPR)	CAP	MK	D	SDL	P-VIVA,RK	F	I	
<b>Topic 10 Vaidya Sadvritta</b>									
CO6,CO7	Exposure to medical records department for understanding storage, maintanance and disposal of Medical records.	CK	DK	K	D,FV	P-VIVA	F&S	I	
<b>Topic 11 Personal Identity</b>									

CO6	Demonstrate the method of sex determination based on pelvis.	CAP	MK	SH	EDU, SIM, D	P-PRF,OSPE	F&S	I	
<b>Topic 12 Thanatology</b>									
CO6	Observe the procedure of medico-legal autopsy and preparation autopsy report.	CAP	MK	SH	L_VC ,D,FV	RK	S	II	
<b>Topic 13 Injury</b>									
CO6,CO7	Demonstrate the difference between homicidal, suicidal and accidental injuries.	CAP	MK	SH	L&PP T,L_ VC,SI M,D- M	P-VIVA,P- EXAM	F&S	II	
CO6,CO7	Demonstration of drafting of an injury report.	CAP	MK	D	D- M,D	P-EXAM,P- PRF	F&S	II	
<b>Topic 14 Sexual offences</b>									
CO5,CO6,CO7	Discuss the essentials of Protection of Women from Domestic Violence Act (PWDV Act) 2005 and The Sexual Harassment of Women at Workplace (Prevention, Prohibition & Redressal) Act and Rules (PoSH Act) 2013.	AFT- VAL	DK	D	L&G D,BS, RP	C-INT,INT	F&S	III	
<b>Topic 15 Field Visits (Field visits should be integrated along with the educational tour conducted by Dravyagunavijnan, Rasasatra and Swasthavrutha Departments)</b>									
CO6,CO7	(Visit to Forensic Science Laboratory) - (Mandatory) Appraise the functioning of a forensic science laboratory	CC	MK	KH	FV	P-VIVA,RK	F	III	
CO4,CO5	(Visit to Food testing laboratory) Observe the instrumentation and procedure of food testing	CC	DK	KH	FV	RK,COM	F	I	

CO4,CO5	(Visit to Pollution Control Board) - (Mandatory) Perceive the functioning of Pollution Control Board	CC	DK	KH	FV	P-VIVA,RK	F	II	
CO4,CO5	(Visit to De-addiction centre)Observe the management of de-addiction cases	PSY-GUD	DK	KH	FV	RK	F	III	
CO7	(Visit to the Court) - (Mandatory) Observe the procedure of court procedure and conduct of a medical practitioner as an expert witness	PSY-GUD	MK	KH	FV	RK	F	I	
CO6	(Visit to mortuary for observation of autopsy)Observe the procedure of medico-legal autopsy	PSY-GUD	MK	KH	FV	P-VIVA,RK	F	II	
CO2	(Visit to snake park) - (Mandatory)Observe live specimens of snake	CC	DK	KH	FV	P-VIVA,RK	F	II	
CO2,CO7	(Visit to casualty) -( Mandatory) Watch the procedure of resuscitation and emergency management	CK	MK	KH	FV	RK	F	I	
CO4,CO5	(Visit to occupational hazards centre)Observe the types and management of cases of occupational hazard	CK	DK	KH	FV	RK	F	II	
CO2	(Visit to ASV manufacturing centre)Observe the steps and procedures involved in ASV manufacturing	CK	DK	K	FV	RK	F	II	
CO4,CO5	Visit Cancer treatment centre.	CK	NK	K	FV	RK	F	III	
CO2,CO4	Visit to department of entomology.	CC	NK	K	FV	RK	F	II	
CO2,CO5	Visit to folklore vaidya using Agada tantra concepts in visha chikitsa.	CAP	DK	SH	FV	RK	F&S	II	
<b>Topic 16 Topics related to regional preference</b>									
CO2,CO3	Discuss the topics related to regional preference like bites and stings, substance abuse, texts of regional importance, regional	CAP	NK	K	L&G D	P-VIVA,M- POS	F	III	

visha chikitsa practices, regional medico-legal issues etc.									
---	--	--	--	--	--	--	--	--	--

**Table 4a: List of Practical**

S.No	Name of practical	Term	Activity	Practical hrs
1	Visha Chikitsa	1	1.1 Gastric lavage 1.2 Cardiopulmonary resuscitation (CPR) 1.3 Video demonstration or visit to the emergency care unit for procedures used for removal of absorbed poison.	6
2	Vishakta Ahara Pariksha	1	2.1 Adulteration detection Tests 2.1.1 Urea in milk 2.1.2 Boric acid in milk 2.1.3 Artificial color in turmeric. 2.1.4 Artificial color in pulses and Vegetables. 2.1.5 Argemone Oil in Mustard oil 2.1.6 Adulteration in Honey	6
3	Dooshivisha, Garavisha, Visha Upadrava	1	3.1 Case based teaching on diseases due to dooshivisha and garavisha - drug induced toxicity, occupational hazards, allergic manifestations, autoimmune diseases and endocrine disruptors. 3.2 Recording 10 cases based on case based teaching or OPD and IPD exposure.	20
4	Dermatological manifestation of visha	2	4.1 Dermatological manifestations due to visha ex: contact poisoning (paduka visha, abharana visha etc.) and bites and stings. 4.2 Contact Dermatitis 4.3 Recording 10 cases based on case based teaching or OPD and IPD Exposure.	20
5	Environmental toxicology	2	5.1 Social Awareness program – Rally, street play, skit etc.	2
6	JangamaVisha	2	6.1 Identification of Poisonous and non poisonous snakes 6.2 Diagnosis based on bite marks of snakes 6.3 Diagnosis and Management of snake bite cases through audio/video case presentations or OPD/IPD exposure 6.4 Diagnosis and management of vrishchika, loota and keeta damsha cases through audio/video case presentations or	10

			OPD/IPD exposure.	
<b>7</b>	Sthavara visha	2	7.1 Identification of various plant poisons, metal and mineral compounds, acids, alkalis, agrochemicals, hydrocarbons and household poisons.	6
<b>8</b>	Substance abuse	3	8.1 Community Awareness programmes by students like rallies, street play etc. 8.1.1. Observation of international day against drug abuse and illicit trafficking. 8.1.2. World No tobacco day.	8
<b>9</b>	Legal Procedures	1	9.1 Hands on training on Preparation of Medical & Medico legal reports. 9.1.1 Fitness & Sickness certificate. 9.1.2 Birth & Death Certificate and other relevant medical and medico legal certificates. 9.1.3 Leaving against medical advice (LAMA), Discharge against medical advice (DAMA), Discharge on patient request (DOPR)	2
<b>10</b>	Vaidya Sadvritta	1	10.1 Exposure to the medical records department for understanding the storage, maintenance and disposal of medical records.	2
<b>11</b>	Personal Identity	1	11.1. Sex determination based on pelvis.	4
<b>12</b>	Thanatology	2	12.1 Procedure of autopsy: visit to mortuary or audio-visual demonstrations.	6
<b>13</b>	Injury	2	13.1. Hands on training on assessment of accidental, suicidal, and homicidal injuries. 13.2. Preparation of injury report.	6
<b>14</b>	Sexual offences	3	14.1 Introduction to Protection of Women from Domestic Violence Act (PWDV Act) 2005 and The Sexual Harassment of	2

			Women at Workplace (Prevention, Prohibition & Redressal) Act and Rules (PoSH Act) 2013.	
15	Field Visits (Field visits should be integrated along with the educational tour conducted by Dravyagunavijnan, Rasasatra and Swasthavrutha Departments)	2	(It is mandatory to have 5 field visits)	30
16	Topics related to regional preference	3	Exposure to topics related to regional preference like bites and stings, substance abuse, texts of regional importance, regional visha chikitsa practices, regional medico-legal issues etc.	10
<b>Total Hr</b>				<b>140</b>

### Activity

CO	Topic name	Activity Details	Hours <sup>#</sup>
CO3,CO4	Survey of personal care products.	Students shall be divided into small groups and are asked to collect the information about common personal care products like soaps, shampoos, deodorants, cosmetics etc. Then they should be asked to enlist the chemicals used in them and discuss about the health hazards associated with their use. Then students can be asked to present their findings in the form of class seminar or Charts or Posters or small videos.	4
CO5	Community teaching by students - awareness among adolescent about Protection of Women from Domestic Violence Act (PWDV Act) 2005 and The Sexual Harassment of Women at Workplace (Prevention, Prohibition & Redressal) Act and Rules	After undergoing orientation/sensitization regarding Protection of Women from Domestic Violence Act (PWDV Act) 2005 and The Sexual Harassment of Women at Workplace (Prevention, Prohibition & Redressal) Act and Rules (PoSH Act) 2013, the students will have to visit nearby schools/colleges in small teams/groups and create awareness amongst them. This can be done as part of NSS activity or exclusive visits to schools/colleges.	2

	(PoSH Act) 2013.		
CO2,CO4	Observation of international day against drug abuse and illicit trafficking	Community awareness programmes by students like rallies, street play etc.	3
CO2,CO4	No Tobacco Day	Community Awareness programmes by students like rallies, street play, skit, flash mob etc.	3
CO5	Environmental toxicology	Poster presentation competition related to environment, rallies, skit, flash mob on World Environment Day.	2
CO6,CO7	Vaidya sadvritta	Exposure to Medical records department for maintainance, storage and disposal of medical record, finding out errors in medical case records.	2
CO6	Forensic psychiatry	Seminar/ guest lecture on how to deal with adolescent psychiatric issue	2
CO2,CO4	Chronic toxicity of heavy metals.	Group discussion and case based learning by taking example of published case reports.	1
CO2,CO4	World Cancer Day to raise awareness of cancer risk and cancer prevention	Poster Competition / Quiz Competition / Group Discussion	4
CO6,CO7	Legal procedure- Recording of evidence and duties of a physician in the court of Law.	Mock court / role play	4
CO2	Sarpa Visha	<p>1. Identification of poisonous and non poisonous snakes -</p> <p>Group Discussion/ Brainstorming - Specimens (Photos) of poisonous and non poisonous snakes with their features shall be given to small group of students and asked to identify the snakes.</p> <p>2. Clinical diagnosis of snake bites</p>	2

		<p>Group Discussion - Specimens (Photos) showcasing local and systemic signs and symptoms of poisonous (Hemotoxic and Nuerotoxic) snake bite shall be given to small group of students and asked to diagnose the case.</p> <p>CBL - Presentation of recorded cases or the Case reports or studies published in reputed journals.</p> <p>Brainstorming/Quiz - The same pictures may be shown with MCQ's and Quiz session can be conducted among the groups of students</p>	
CO2	Vrischika visha, luta visha and keeta visha.	<p>Group Discussion - Specimens (Photos) showcasing local and systemic signs and symptoms of Vrischika Visha (Scorpion Sting), Loota Visha (Spider Bite) and Keetavisha (Insect bite) and differentiating with snake bites shall be given to small group of students and asked to diagnose the case.</p> <p>CBL - Presentation of recorded cases or the Case reports or studies published in reputed journals.</p> <p>Brainstorming/Quiz - The same pictures may be shown with MCQ's and Quiz session can be conducted among the groups of students.</p>	2
CO3,CO4	Dooshivisha, garavisha and visha upadrava	<p>Group Discussion - Photographs/case reports/ simulated cases showcasing various drug induced toxicities, occupational hazards, allergic manifestations, autoimmune diseases and diseases due to endocrine disruptors shall be given to small group of students and asked to assess the dosha, diagnose and discuss the plan of treatment.</p>	4

		<p>CBL - Presentation of recorded cases or the Case reports or studies published in reputed journals.</p> <p>Brainstorming/Quiz - The same pictures may be shown with MCQ's and Quiz session can be conducted among the groups of students.</p>	
CO3,CO4	Dermatological manifestation of visha.	<p>Group Discussion - Photographs/case reports/simulated cases showcasing various dermatological presentations of poison, bites and stings and contact dermatitis shall be given to small group of students and asked to assess the dosha, diagnose and discuss the plan of treatment.</p> <p>CBL - Presentation of recorded cases or the Case reports or studies published in reputed journals.</p> <p>Brainstorming/Quiz - The same pictures may be shown with MCQ's and Quiz session can be conducted among the groups of students.</p>	4

# Hours indicated are included in calculations of Table 3 and 4 !

**Table 5- Teaching learning method**

Sr No	Teaching learning methods in the course	No of Activities
1	Lecture	18
2	Lecture with Power point presentation	106
3	Lecture & Group Discussion	32
4	Lecture with Video clips	13
5	Discussions	22
6	Brainstorming	22
7	Inquiry-Based Learning	1

8	PBL	6
9	CBL	26
10	Flipped classroom	4
11	Edutainment	2
12	Mobile learning	2
13	Simulation	1
14	Self-directed learning	15
15	Demo on Model	2
16	Tutorial	2
17	Presentations	9
18	Practical	1
19	Case diagnosis	5
20	Demonstration	2
21	Field visit	1

These are overall teaching learning methods listed in Table 3 and 4. Teachers can select the best possible method amongst the given methods as per objective, available time etc.

**Table 6: Assessment Summary: Assessment is subdivided in A to H points**

#### 6 A-Number of Papers and Marks Distribution

Subject Code	Papers	Theory	Practical/Clinical Assessment				Sub Total	Grand Total
			Practical	Viva	Set SA	IA		
AyUG-AT	1	100	100	60	10	30	200	300

#### 6 B - Scheme of Assessment (formative and Summative)

PROFESSIONAL COURSE	DURATION OF PROFESSIONAL COURSE		
	First Term (1-6 Months)	Second Term (7-12 Months)	Third Term (13-18 Months)
Second	3 PA & First TT	3 PA & Second TT	3 PA & UE

PA: Periodical Assessment; TT: Term Test; UE: University Examinations.

\*\* University Examination shall be on entire syllabus

## 6 C - Calculation Method for Internal assessment Marks

TERM	PERIODICAL ASSESSMENT*					TERM TEST**	TERM ASSESSMENT	
	A 4	B	C	D	E	F	G	H
	1 (15 Marks)	2 (15 Marks)	3 (15 Marks)	Average (A+B+C/3)	Converted to 30 Marks (D/15*30)	Term Test (Marks converted to 30)	Sub Total _/60 Marks	Term Assessment (.../30)
FIRST							E+F	(E+F)/2
SECOND							E+F	(E+F)/2
THIRD						NIL		E
<b>Final IA</b>	Average of Three Term Assessment Marks as Shown in 'H' Column.							
	Maximum Marks in Parentheses *Select an Evaluation Method which is appropriate for the objectives of Topics from the Table 6 D for Periodic assessment. Conduct 15 marks assessment and enter marks in A, B, and C. ** Conduct Theory (100 Marks)(MCQ(20*1 Marks), SAQ(8*5), LAQ(4*10)) and Practical (100 Marks) Then convert to 30 marks.							

## 6 D - Evaluation Methods for Periodical Assessment

S. No	Evaluation Methods
1	Activities Indicated in Table 3 - Column G3 as per Indicated I, II or III term in column I3

### Evaluation Methods in MSE

1. Practical / Clinical Performance
2. Viva Voce, MCQs, MEQ (Modified Essay Questions/Structured Questions)
3. Open Book Test (Problem Based)
4. Summary Writing (Research Papers/ Samhitas)
5. Class Presentations; Work Book Maintenance
6. Problem Based Assignment
7. Objective Structured Clinical Examination (OSCE), Objective Structured Practical Examination (OPSE), Mini Clinical Evaluation Exercise (Mini-CEX), Direct Observation of Procedures (DOP), Case Based Discussion (CBD)
8. Extra-curricular Activities, (Social Work, Public Awareness, Surveillance Activities, Sports or Other Activities which may be decided by the department).
9. Small Project etc.

## 6 E Question Paper Pattern

### II PROFESSIONAL BAMS EXAMINATIONS AyUG-AT

#### PAPER-1

Time: 3 Hours Maximum Marks: 100

INSTRUCTIONS: All questions compulsory

		<b>Number of Questions</b>	<b>Marks per question</b>	<b>Total Marks</b>
Q 1	MULTIPLE CHOICE QUESTIONS (MCQ)	20	1	20
Q 2	SHORT ANSWER QUESTIONS (SAQ)	8	5	40
Q 3	LONG ANSWER QUESTIONS (LAQ)	4	10	40
				100

Similar for P

## 6 F Distribution of theory examination

<b>Paper 1</b>						
<b>Sr. No</b>	<b>A List of Topics</b>	<b>B Term</b>	<b>C Marks</b>	<b>MCQ (1 Mark)</b>	<b>SAQ (5 Marks)</b>	<b>LAQ (10 Marks)</b>
1	<b>Concepts of Agada Tantra (Clinical Toxicology)</b>	1	13	Yes	Yes	Yes
2	<b>Visha Chikitsa (Management of Poisoning)</b>	1		Yes	Yes	Yes
3	<b>Vishakta aahara pariksha and Viruddha ahara</b>	1		Yes	Yes	No
4	<b>Garavisha and Dooshivisha</b>	1	12	Yes	Yes	Yes
5	<b>Visha Upadrava and diseases caused due to exposure to Visha/poisons</b>	1		Yes	Yes	No
6	<b>Environmental Toxicology</b>	2	11	Yes	Yes	No
7	<b>Dermatological manifestations of visha/poisons.</b>	2		Yes	Yes	No
8	<b>Therapeutic utility of Agada yoga</b>	2		Yes	Yes	No
9	<b>Sthavara visha – Poisons of Plant origin</b>	2	17	Yes	Yes	Yes
10	<b>Sthavara Visha – Poisons of Metallic origin</b>	2		Yes	Yes	Yes
11	<b>Jangama Visha</b>	2		Yes	Yes	Yes
12	<b>Kritrima visha</b>	3	12	Yes	Yes	Yes
13	<b>Substances of abuse</b>	3		Yes	Yes	Yes
14	<b>Agada Tantra perspectives on cancer</b>	3		Yes	Yes	No
15	<b>Forensic medicine (Vyavahara Ayurveda) and Medical jurisprudence (Vidhi vaidyaka):</b>	1	10	Yes	No	No

16	<b>Vaidya sadvritta : Duties and Responsibilities of medical practitioner</b>	1		Yes	Yes	No
17	<b>Legal Procedures</b>	1		Yes	Yes	No
18	<b>Personal identity</b>	1		Yes	Yes	Yes
19	<b>Thanatology</b>	2	12	Yes	Yes	Yes
20	<b>Asphyxial deaths</b>	2		Yes	Yes	Yes
21	<b>Injury</b>	2		Yes	Yes	Yes
22	<b>Pregnancy, delivery and abortion</b>	3	6	Yes	Yes	No
23	<b>Sexual offences</b>	3		Yes	Yes	No
24	<b>Forensic psychiatry.</b>	3	7	Yes	Yes	No
25	<b>Forensic science laboratory</b>	3		Yes	Yes	No
26	<b>Laws, Acts, Rules and Regulations</b>	3		Yes	Yes	No
<b>Total Marks</b>			<b>100</b>			

Paper No:1		
Question No	Type of Question	Question Paper Format
Q1	<p><b>Multiple choice Questions</b>  <b>20 Questions</b>  <b>1 mark each</b>  <b>All compulsory</b></p> <p><b>Must know part - 15 MCQ</b>  <b>Desirable to know - 3 MCQ</b>  <b>Nice to know part - 2 MCQ</b></p>	<ol style="list-style-type: none"> <li>1. Thanatology / Asphyxial deaths / Personal identity / Injury</p>

## 6 H Distribution of Practical Exam

S.No	Heads	Marks
1	<p>Spotting (15 specimens of 4 marks each) 1.1. Snake – 2 specimens</p> <p>1.1.1 Identification - 1 mark</p> <p>1.1.2 Differentiating features of poisonous/ non-poisonous snake – 1 mark</p> <p>1.1.3 Important clinical signs - 1 mark</p> <p>1.1.4 Ayurvedic management - 1 mark</p> <p>1.2. Mineral poisons/ Kritrima visha (1 specimen each)-2 specimens</p> <p>1.2.1. Identification - 1 mark</p> <p>1.2.2 Identification of symptom clusters mimicking other diseases and their differential diagnosis - 2 marks</p> <p>1.2.3 Method of detoxification and Antidotes - 1 mark</p> <p>1.3. Toxic plants– 2 specimens</p> <p>1.3.1 Identification with scientific, family and sanskrit names 1 mark</p> <p>1.3.2 Mode of use in Visha cases – 1 mark</p> <p>1.3.3 detoxification method, Class of poison and Active principles present in the plant - 1 mark</p> <p>1.3.4 Antidotes used against the specimen - 1 mark</p> <p>1.4. Antitoxic plants – 3 specimens</p> <p>1.4.1 Identification with scientific, family and sankrit names - 1 mark</p> <p>1.4.2 Mode of use in visha - 1 mark</p> <p>1.4.3 Active principles - 1 mark</p> <p>1.4.4 Important formulations - 1 mark</p> <p>1.5. Injuries – 2 specimens</p> <p>1.5.1. Identify the injury - 1 mark</p> <p>1.5.2. Identify the weapon/criminal act causing such injury - 2 mark</p> <p>1.5.3. Medico-legal importance - 1 marks</p> <p>1.6. News item – paper cuttings or other medico-legal case scenarios – 2 specimens</p> <p>1.6.1. Identify the crime – 1 mark</p>	60

	<p>1.6.2. Relevant IPC/CrPC sections associated with the crime – 1 mark</p> <p>1.6.3. Relevant Act related to the crime – with sub-questions related to its sub-sections, punishment etc. - 2 marks</p> <p>7. Jangama visha – other poisonous creatures – 2 specimens</p> <p>1.7.1. Identification – 1 mark</p> <p>1.7.2. Adhishtana/samanya lakshana/ chikitsa – 2 marks</p> <p>1.7.3. specific formulations/doses – 1 mark (Sub-questions mentioned against each item is for a purpose of example only. Different questions may be framed on the various aspects of the guidelines provided)</p>	
2	Practical Records	10
3	Medical and Medico-legal Certificate Writing Students will be provided with a case-scenario based on which they are asked to write a medical certificate for a specific purpose. Evaluation guidelines should be based on the essential criteria in the format of a valid medical certificate.	10
4	Short Case Case scenarios with pictures to diagnose a specific case of poisoning and specific questions asked regarding its clinical examination, investigations, treatment, prognosis etc.	10
5	<p>Clinical Applications of Agada</p> <ul style="list-style-type: none"> <li>◆ Identification of Agada for a case scenario detailed – 2 marks</li> <li>◆ Select the ingredients of the formulation from a group of drugs and identify using scientific names and answer sub-questions based on its preparation, anupana, dose etc. – 8 marks</li> </ul>	10
6	<p>Viva Questions will be asked on the following topics</p> <ul style="list-style-type: none"> <li>◆ Agada Tantra (2 questions 5 marks each) - 10 marks</li> <li>◆ Forensic Science (Vyavaharayurveda) (2 questions 5 marks) - 10 marks</li> <li>◆ Jurisprudence (Vidhivaidyaka) (2 questions 5 marks) - 10 marks</li> <li>◆ Toxicology (2 questions 5 marks each) - 10 marks</li> <li>◆ Concepts of Agada Tantra in cancer and substance abuse (one question from each) (2 questions 5 marks each) - 10 marks</li> <li>◆ Viva on Compilation and Communication skills (2 questions 5 marks each) - 10 marks</li> </ul>	60

7	Electives (Set SA)	10
8	IA	30
<b>Total Marks</b>		<b>200</b>

**Important Note:-**The User Manual II BAMS is a valuable resource that provides comprehensive details about the curriculum file. It will help you understand and implement the curriculum. Please read the User Manual II before reading this curriculum file. The curriculum file has been thoroughly reviewed and verified for accuracy. However, if you find any discrepancies, please note that the contents related to the MSE should be considered authentic.

In case of difficulty and questions regarding curriculum write to [cur.imp@ncismindia.org](mailto:cur.imp@ncismindia.org)

## **PREFACE**

The Bachelor of Ayurveda education shall produce graduates having profound knowledge of Ashtanga Ayurveda. One of the chatushpada has been mentioned is Dravya. The revised syllabus of Dravyaguna along with the contemporary advances supplemented with knowledge of scientific and technological advances in Dravyaguna along with extensive practical training

Fundamentals of Dravyaguna involves a thorough knowledge of various principles and concepts of Rasapanchaka (fivefold analysis of medicinal substances) and Karma (pharmacological action). It refers to classical Ayurvedic texts, provides suitable examples, and includes contemporary interpretations to facilitate better understanding. Most commonly used dravyas by clinicians are included in curriculum.

The current syllabus focuses greater emphasis on understanding the fundamentals with a scientific interpretation and clinical application. The repetitive topics such as Ahara varga, Nighantu, and Jangama dravyas is avoided since they are covered in Samhita adhyayana (study of classical texts), Itihasa (history), and ethical considerations related to the clinical use of animal-origin drugs.

Additionally, newer areas in Ayurveda related to medicinal plants, such as cultivation techniques, collection methods, and various regulatory guidelines from organizations like NMPB (National Medicinal Plants Board), CCRAS (Central Council for Research in Ayurvedic Sciences), API (Ayurvedic Pharmacopoeia of India), GCTM (Global Centre for Traditional Medicine), PCIMH (Pharmacopoeia Commission for Indian Medicine & Homoeopathy), pharmacovigilance, Vrikshayurveda (science of plant life), Ethno medicine, Network pharmacology, and Bioinformatics, have been incorporated. This information is crucial for the sustainable use of medicinal plants and a better understanding of their properties.

Practical sessions in Dravyaguna focus on understanding fundamental concepts such as Mahabhuta (five elements), Guna (properties), Rasa (taste), and Virya (potency) with Parameters commonly used in physicochemical analysis. The curriculum also addresses challenges faced by the herbal drug industry, including the issue of adulteration, by incorporating quality check parameters. Furthermore, the students gain practical experience in plant identification through visits to various natural and cultivated plant habitats.

The revised curriculum for Dravyaguna reflects commitment to equipping students with the knowledge and skills necessary to excel in the field of Ayurvedic pharmacology. Hope that this curriculum will inspire and empower students to become proficient Ayurvedic practitioners who can contribute to the holistic well-being of individuals and society as a whole.

**Course Code and Name of Course**

<b>Course code</b>	<b>Name of Course</b>
AyUG-DG	Dravyaguna Vigyan

**Table 1- Course learning outcomes and matched PO**

<b>SR1 CO No</b>	<b>A1 Course learning Outcomes (CO) AyUG-DG At the end of the course AyUG-DG, the students should be able to-</b>	<b>B1 Course learning Outcomes matched with program learning outcomes.</b>
CO1	Demonstrate the application of principles of <i>Dravyaguna</i> in clinical practice.	PO1,PO2,PO8
CO2	Analyze and justify the fundamental principles of <i>Dravyaguna</i> in relevance to contemporary sciences.	PO1
CO3	Analyze and interpret <i>Rasa Panchaka</i> of <i>Dravya</i> with their application in clinical practice.	PO5,PO9
CO4	Interrelate the knowledge on Karma (pharmacological actions) with <i>Rasa panchaka</i> and basic contemporary clinical pharmacology.	PO2
CO5	Demonstrate and Justify the ability to select the specific <i>Dravyas</i> , Prashata Bheshaja with different dosage forms in different clinical conditions.	PO3,PO7,PO9
CO6	Demonstrate knowledge of quality control methods of drug.	PO3
CO7	Demonstrate knowledge and skills about <i>Apamishrana</i> (adulterants), <i>Abhava pratinidhidravaya</i> (substitutes), <i>Prashastabheshaja</i> (ideal drug) and plant extracts.	PO5,PO6
CO8	Identify the medicinal plants and orient about conservation, cultivation, sustainable utilization & Pharmacovigilance	PO4,PO6
CO9	Demonstrate fundamental principles of applied Pharmacology.	PO2

**Table 2 : Contents of Course**

<b>Paper 1 Fundamental Dravyaguna</b>					
<b>Sr. No</b>	<b>A2 List of Topics</b>	<b>B2 Term</b>	<b>C2 Marks</b>	<b>D2 Lecture hours</b>	<b>E2 Non- Lecture hours</b>
1	<b>1.Dravyaguna Vigyana</b>	1	1	1	1
2	<b>2.Dravya</b>  <ul style="list-style-type: none"> <li>♦ 2.1 Panchabhoutikatwa of Dravya</li> <li>♦ 2.2 Classification of Dravya based on Utpattibheda, Yonibheda, Prayogabheda, Prabhavbheda, Doshagnabheda, Rasabheda and Karmbheda</li> </ul>	1	6	5	4
3	<b>3. Guna</b>  <ul style="list-style-type: none"> <li>♦ 3.1 Panchabhoutikatva, characteristics and classification</li> <li>♦ 3.2 Gurvadiguna and its karma on Dosha, Dhatu and Mala, clinical application and research updates</li> <li>♦ 3.3 Paradiguna with examples, clinical applications and research updates</li> </ul>	1	11	4	2
4	<b>4. Rasa</b>  <ul style="list-style-type: none"> <li>♦ 4.1 Meaning of “Rasa” in various contexts</li> <li>♦ 4.2 Shadrassa in relative correlation with taste of chemical constituents</li> <li>♦ 4.3 Rasotpatti and Panchabhoutika constitution of Shadrassa</li> <li>♦ 4.4 Rasopalabdhi and pathway of taste perception &amp; sites of taste receptors in the body</li> <li>♦ 4.5 Rasa -Lakshana, Guna &amp; Karmas of each Rasa on Dosha, Dhatu and Mala</li> <li>♦ 4.6 Atiyogalakshana,</li> <li>♦ 4.7 Clinical application and Research updates of Shadrassa</li> <li>♦ 4.8 Anurasa</li> <li>♦ 4.9 Rasa Sevanakrama of Aushadha</li> </ul>	1	11	7	4

5	<b>5. Vipaka</b> <ul style="list-style-type: none"> <li>♦ 5.1 Trividha Vipaka</li> <li>♦ 5.2 Vipak karma on Dosha, Dhatu and Mala</li> <li>♦ 5.3 Clinical application and Research updates</li> <li>♦ 5.4 Vipakopalabdhi (Determination of Vipaka) &amp; Taratamya (Degree of variation)</li> </ul>	1	6	3	1
6	<b>6. Virya</b> <ul style="list-style-type: none"> <li>♦ 6.1 Difference between Guna and Virya</li> <li>♦ 6.2 Karmas of Virya on Dosha, Dhatu and Mala</li> <li>♦ 6.3 Clinical application and Research updates</li> <li>♦ 6.4 Viryaopalabdhi (Determination of Virya) and understanding of Virya with respect to actions of active constituents</li> </ul>	1	6	2	2
7	<b>7. Prabhava</b> <ul style="list-style-type: none"> <li>♦ 7.1 Samanapratyayarabdha and Vichitrapratyayarabdha</li> <li>♦ 7.2 Clinical application of Prabhava and Research updates</li> </ul>	1	5	2	1
8	<b>8. Interrelation of Rasa-Guna-Virya-Vipaka-Prabhava</b> <ul style="list-style-type: none"> <li>♦ Interrelation of Rasa-Guna-Virya-Vipaka-Prabhava with respect to their strength- Pharmacodynamics</li> </ul>	1	1	1	2
9	<b>9. Karma</b> <ul style="list-style-type: none"> <li>♦ <b>9. Individual Karma, correlation with contemporary pharmacological action, examples, clinical application and research updates</b></li> <li>♦ 9.1 Deepana</li> <li>♦ 9.2 Pachana</li> </ul>	1	11	9	5

	<ul style="list-style-type: none"> <li>♦ 9.3 Samshodhana</li> <li>♦ 9.4 Samshamana</li> <li>♦ 9.5 Anulomana</li> <li>♦ 9.6 Sransana</li> <li>♦ 9.7 Bhedana</li> <li>♦ 9.8 Rechana</li> <li>♦ 9.9 Chhedana</li> <li>♦ 9.10 Lekhana</li> <li>♦ 9.11 Grahi</li> <li>♦ 9.12 Sthambhana</li> <li>♦ 9.13 Madakari</li> <li>♦ 9.14 Pramathi</li> <li>♦ 9.15 Abhishyandi</li> <li>♦ 9.16 Vyavayi</li> <li>♦ 9.17 Vikashi</li> <li>♦ 9.18 Rasayana</li> <li>♦ 9.19 Vajeekarana</li> <li>♦ 9.20 Medhya</li> </ul>				
10	<b>10. Karmas of Dashemani Gana</b>	1	5	12	3
11	<b>11. Principles of General Pharmacology</b> <ul style="list-style-type: none"> <li>♦ <b>11 Drug definition, drug dosage forms, route of drug administration, pharmacokinetics (ADME), pharmacodynamics, Drug dose, principles of drug action, mechanism of drug action &amp; bio-availability</b></li> <li>♦ <b>11.1 Drugs Acting on Central Nervous System:</b> Anaesthetics, Sedative Hypnotics, Antiepileptics, Antiparkinsonian, Antidepressants, Antianxiety Drugs, Opioid - Analgesics Drugs</li> <li>♦ <b>11.2 Drugs Acting on Peripheral (somatic) Nervous System: Skeletal Muscle Relaxants, Local Anaesthetics</b></li> <li>♦ <b>11.3 Autacoids and Related Drugs:</b> Nonsteroidal, Anti-inflammatory (NSAIDs)/Antipyretic and Analgesics Drugs</li> <li>♦ <b>11.4 Drugs for Respiratory Disorders:</b> Bronchodilators, Aerosols/ Inhalants Expectorants, Antitussive Drugs</li> <li>♦ <b>11.5 Cardiovascular Drugs:</b> Antihypertensive, Antianginal Drugs</li> <li>♦ <b>11.6 Drugs Acting on Kidney:</b> Diuretics</li> <li>♦ <b>11.7 Drugs Affecting Blood:</b> Haematinics, Coagulants, Anticoagulants, Hypolipidaemic Drugs</li> </ul>	3	20	15	1

	<ul style="list-style-type: none"> <li>♦ <b>11.8 Gastrointestinal Drugs:</b> Antacid, Carminatives, Digestants, Antiemetics, Laxatives, Antidiarrhoeal, Hepatoprotective Drugs</li> <li>♦ <b>11.9 Antibacterial Drugs:</b> Antibiotics, Antitubercular Drugs</li> <li>♦ <b>11.10 Antifungal, Antiviral, Antimalarial and Anthelmintic Drugs</b></li> <li>♦ <b>11.11 Hormones and Related Drugs:</b> Thyroid Hormone, Thyroid Inhibitors, Insulin, Oral Anti-diabetic, Hormonal Contraceptives, Uterine Stimulants, Uterine Relaxants Drugs</li> <li>♦ <b>11.12 Miscellaneous Drugs:</b> Antiseptics and Disinfectants, Vaccines, Vitamins, Water imbalance and IV fluids</li> </ul>				
12	<p><b>12. Mishraka Gana</b></p> <ul style="list-style-type: none"> <li>♦ <b>12. Mishrakagana: its composition, guna karma and therapeutic uses.</b></li> <li>♦ <b>12.1 Brihatpanchamoola.</b></li> <li>♦ <b>12.2 Laghupanchamoola.</b></li> <li>♦ <b>12.3 Vallipanchamoola.</b></li> <li>♦ <b>12.4 Kantakapanchamoola.</b></li> <li>♦ <b>12.5 Trinapanchamoola.</b></li> <li>♦ <b>12.6 Panchavalkala.</b></li> <li>♦ <b>12.7 Triphala.</b></li> <li>♦ <b>12.8 Trikatu.</b></li> <li>♦ <b>12.9 Trimada.</b></li> <li>♦ <b>12.10 Chaturusana.</b></li> <li>♦ <b>12.11 Panchakola.</b></li> <li>♦ <b>12.12 Shadusana</b></li> <li>♦ <b>12.13 Chaturbeeja.</b></li> <li>♦ <b>12.14 Trijataka.</b></li> <li>♦ <b>12.15 Chaturajataka.</b></li> <li>♦ <b>12.16 Panchatikta.</b></li> <li>♦ <b>12.17 Chaturbhadra.</b></li> <li>♦ <b>12.18 Trikarshika.</b></li> </ul>	3	6	6	2
13	<b>13. Nomenclature of dravya as per Nighantu, Vedic taxonomy and Botany</b>	3	1	0	2
14	<b>14. Prashasta Bshesaja, Bshesaja Pariksha and drug evaluation method with correlation as per Pharmacognosy</b>	3	1	1	2

15	15. Dravyasangrahana and Drug collection methods as per GFCP (Good Field collection practices)	3	1	1	0
16	16. GCP (Good cultivation practices), seed bank, conservation of medicinal plants, knowledge about RET (Rear, Endangered & Threatened ) medicinal plants.	3	1	1	0
17	17. Abhava Pratinidhi Dravya (substitutes)	3	1	1	1
18	18. Classifications and techniques of aqueous and alcoholic extracts	3	1	0	2
19	19. Adverse drug reaction and Pharmacovigilance with recent updates	3	1	1	2
20	20. NMPB (National Medicinal Plant Board), CCRAS (Central Council of Research in Ayurveda Sciences), API ( Ayurvedic Pharmacopeia of India), GCTM ( Global Centre for Traditional Medicine), PCIMH ( Pharmacopeia Commission of Indian Medicine and Homeopathy)	3	1	1	0
21	21. Vrikshayurveda and Ethno-medicine	3	1	1	1
22	22. Network pharmacology and Bioinformatics	3	2	1	1
<b>Total Marks</b>			<b>100</b>	<b>75 hr</b>	<b>39 hr</b>

<b>Paper 2 Applied Dravyaguna</b>					
<b>Sr. No</b>	<b>A2 List of Topics</b>	<b>B2 Term</b>	<b>C2 Marks</b>	<b>D2 Lecture hours</b>	<b>E2 Non- Lecture hours</b>
23	1. Bshajavacharaniya (Criteria's to be considered for selection of drugs in vyadhis)	2	5	1	6
24	2.1 Dravya (Drug) Nama-Guna-Karma Jnana	2	55	45	10

<b>Total Marks</b>		<b>100</b>	<b>75 hr</b>	<b>36 hr</b>

CO1,CO2,CO3	Define Guna and describe its Panchabhoutikatva.	CK	MK	K	L&PP T,DIS ,LS	T- EW,P-VIV A,PRN,QZ	F&S	I	
CO1	State characteristics of Gurvadi Guna.	CK	MK	K	L&PP T,SD L	P-VIVA,PRN, QZ	F&S	I	
CO1,CO2,CO3	Discuss Gurvadiguna in context to its Karma on Dosha, Dhatu and Mala with examples.	CC	MK	KH	L&PP T,L& GD,F C	T- EW,P-VIV A,PRN,OSPE	F&S	I	
CO1,CO2,CO3	Enumerate & Summarize, clinical application of Gurvadi Guna with research updates.	CC	MK	KH	L&G D,BL, LS	T- EW,P- VIVA,PRN	F&S	I	
CO1,CO2,CO3	Enlist Paradiguna with examples.	CK	MK	K	L&G D,PE R	T-EMI,P-VIV A,PRN,P-POS	F&S	I	
CO1,CO2,CO3	Interpret clinical applications of Paradiguna.	CAP	MK	KH	L&PP T,DIS	T-EMI,P-VIV A,PRN,QZ	F&S	I	
CO1,CO2,CO3	Discuss research updates of Paradiguna.	CC	MK	KH	L,TP W,LS	T-EMI,P-VIV A,PRN,CR- RED	F&S	I	
<b>Topic 4 4. Rasa</b> (Lecture :7 hours, Non lecture: 4 hours)									
CO1,CO2,CO3	Define Rasa and interpret Meaning of “Rasa” in various contexts.	CK	MK	K	L&G D	P-VIVA,PUZ, M-CHT,INT	F&S	I	
CO1,CO2	Classify and compare shadarasa in relative correlation with taste of chemical constituents.	CK	MK	K	L&PP T,ED	P-VIVA,PUZ, M-CHT,INT	F&S	I	

					U				
CO1,CO2	State Rasa Utpatti and Panchabhoutika constitution of Shadrasa.	CK	MK	K	L&G D,PE R	P-VIVA,PUZ, M-CHT,INT	F&S	I	
CO1,CO2	Discuss Rasopalabdhhi.	CC	MK	KH	L&G D,SD L	P-VIVA,PUZ, M-CHT,INT	F&S	I	
CO1,CO2,CO 3	Interpret pathway of taste perception & sites of taste receptors in the body	CC	MK	KH	L&PP T,L_ VC	T- EW,T-OBT ,P-VIVA,PRN ,PUZ,INT	F&S	I	
CO1,CO2	Describe Guna and Lakshana of each Rasa.	CC	MK	KH	L&PP T	T-EMI,T- EW, P-VIVA,PRN, INT	F&S	I	
CO1,CO2	Explain karma of each rasa on Dosha, Dhatu and Mala with examples.	CC	MK	KH	L&PP T,BS	T-EMI,T- EW, P-VIVA,PUZ, M-CHT,INT	F&S	I	
CO1,CO2	Discuss Atiyoga of each rasa.	CC	MK	KH	L&PP T,PB L,PE R	T-EMI,P-VIV A,PRN,PUZ,I NT	F&S	I	
CO1,CO2,CO 3	Interpret Clinical application of each rasa.	CAP	MK	KH	L&PP T,DIS ,SDL, LS	T-EMI,T- EW, T-OBT,P- VIVA,INT	F&S	I	
CO1,CO2	Discuss research updates of Shadrasa.	CC	MK	KH	DIS,S DL,L S	T- EW,P-VIV A,PUZ,INT,C R-RED	F&S	I	

CO1,CO2	Define Anurasa.	CK	MK	K	L,LS	T-EMI,P-VIVA,INT	F&S	I	
CO1,CO2	Interpret relevance of Anurasa in clinical practice.	CAP	MK	KH	L&G D,FC	T-EMI,P-VIVA,PUZ,INT	F&S	I	
CO1,CO2	Describe with justification Rasa sevanakrama as Aushadha.	CC	MK	KH	L&PP T,DIS	T-EMI,T-EW, P-VIVA,PRN, M-CHT,M-POS	F&S	I	
<b>Topic 5 5. Vipaka</b> (Lecture :3 hours, Non lecture: 1 hours)									
CO1	Define Vipaka.	CK	MK	K	L	P-VIVA	F&S	I	
CO1	State Vipaka lakshana.	CK	MK	K	L&G D	P-VIVA,INT	F&S	I	
CO1	Describe the action of Trividha Vipaka on Dosha, Dhatu and Mala with examples.	CC	MK	KH	L&PP T,TP W,FC	T-EW,P-VIVA,PRN	F&S	I	
CO1,CO3	Interpret clinical application of Vipaka.	CAP	MK	KH	L&PP T,DIS ,SDL, LS	P-VIVA,QZ	F&S	I	
CO2	State Research updates of Vipaka.	CK	MK	K	L&PP T	P-VIVA,CR-RED	F&S	I	
CO1	Explain Vipakopalabधि (Determination of Vipaka) and Taratamya (Degree of variation).	CC	MK	KH	L&PP T,FC	P-VIVA,PUZ, M-CHT	F&S	I	
<b>Topic 6 6. Virya</b> (Lecture :2 hours, Non lecture: 2 hours)									
CO1	Define the lakshanas of Virya.	CK	MK	K	L,SD	P-VIVA,INT	F&S	I	

CO1,CO2	Discuss research updates of Prabhava.	CC	MK	KH	L&G D,SD L	T- EW,P-VIV A,CR-RED	F&S	I	
<b>Topic 8 8. Interrelation of Rasa-Guna-Virya-Vipaka-Prabhava</b> (Lecture :1 hours, Non lecture: 2 hours)									
CO1	Interpret the interrelation of Rasa-Guna-Virya-Vipaka-Prabhava with respect to their strength- Pharmacodynamics.	CAP	MK	KH	L&PP T,TP W,PL	P-VIVA,CL- PR	F&S	I	
<b>Topic 9 9. Karma</b> (Lecture :9 hours, Non lecture: 5 hours)									
CO1	Define Karma.	CK	MK	K	L	T-OBT,P- VIVA,QZ	F&S	I	
CO1	Discuss Karma lakshana.	CC	MK	KH	L&G D	T-OBT,P- VIVA,QZ	F&S	I	
CO1,CO2,CO 4,CO5	Explain Deepan karma in relation with Appetizers.	CC	MK	KH	L&G D,BL	T- EW,T-OBT ,P-VIVA,QZ	F&S	I	
CO1,CO2,CO 3,CO4	Critically analyze Deepan dravyas with its gunas and application in various clinical conditions.	CAP	MK	KH	L&PP T,PB L,GB L	T-OBT,P- VIVA,QZ ,DEB	F&S	I	
CO1,CO2,CO 3,CO4	Explain Pachan karma in relation with Digestives.	CC	MK	KH	L&PP T	T-OBT,P- VIVA,QZ	F&S	I	
CO1,CO2,CO 3,CO4	Critically analyze Pachan dravyas with gunas and discuss its application in various clinical conditions.	CAN	MK	KH	L&PP T,PB L,PE R	T-EMI,T- OBT,P-VIVA	F&S	I	
CO1,CO2,CO	Explain Samshodhan karma in relation with contemporary	CC	MK	KH	L_VC	T-OBT,P-	F&S	I	

4	pharmacological action.				,PL	VIVA,QZ			
CO1,CO3,CO4	Discuss Samshohan karma and its clinical application.	CC	MK	KH	PBL,RP,PE R	T-EW,T-CS,T-OBT,P-VIVA	F&S	I	
CO1,CO2,CO3,CO4	Explain Samshamana karma in relation with contemporary pharmacological action.	CC	MK	KH	L&G D,BL	T-EMI,T-OBT,P-VIVA	F&S	I	
CO1,CO2,CO3,CO4	Describe Samshamana karma and its clinical application.	CC	MK	KH	L&PP T,CB L,PL	T-EMI,T-CS,P-VIVA,QZ	F&S	I	
CO1,CO2,CO3	Explain Anuloman karma in relation with Carminative.	CC	MK	KH	L_VC ,DIS	T-EMI,T-OBT,P-VIVA,DEB	F&S	I	
CO1,CO3	Describe Anuloman karma and its clinical application.	CC	MK	KH	L&PP T,PB L,LS	T-OBT,P-VIVA,QZ	F&S	I	
CO1,CO2,CO3,CO4	Explain Sransana karma in relation with contemporary pharmacological action.	CC	MK	KH	L&PP T	T-EMI,T-OBT,P-VIVA,DEB	F&S	I	
CO1,CO3	Discuss Sransan karma and its clinical application.	CC	MK	KH	L&PP T,PB L,LS	T-OBT,P-VIVA,QZ,DEB	F&S	I	
CO1,CO2,CO3,CO4	Explain Bhedana karma in relation with strong laxative action	CC	MK	KH	L_VC ,FC	T-EMI,T-OBT,P-VIVA,DEB	F&S	I	
CO1,CO3	Discuss Bhedan karma and its clinical application.	CC	MK	KH	L&PP T,DIS	T-OBT,P-VIVA,QZ	F&S	I	
CO1,CO2,CO3,CO4	Explain Rechan karma in relation with Purgative.	CC	MK	KH	L&PP T	T-EMI,T-OBT,P-VIVA	F&S	I	

CO1,CO3	Discuss Rechan karma and its clinical application.	CC	MK	KH	L&PP T,DIS	T-OBT,P- VIVA,QZ	F&S	I	
CO1,CO3	Discuss Chhedan karma and its clinical application.	CC	MK	KH	L&PP T,CB L,LS	T-EMI,T- OBT,P-VIVA	F&S	I	
CO1,CO2,CO 3,CO4	Explain Lekhan karma in relation with contemporary pharmacological action.	CC	MK	KH	L&G D,BL	T-EMI,T- OBT,P-VIVA	F&S	I	
CO1,CO3	Discuss Lekhan karma and its clinical application.	CC	MK	KH	L&PP T,DIS ,PL	T-OBT,P- VIVA,QZ ,DEB	F&S	I	
CO1,CO2,CO 3,CO4	Explain Grahi karma in relation with contemporary pharmacological action bowel binding.	CC	MK	KH	L_VC	T-EMI,T- OBT,P-VIVA	F&S	I	
CO1,CO3	Discuss of Grahi karma and its clinical application.	CC	MK	KH	L&G D,TB L	T-OBT,P- VIVA,QZ	F&S	I	
CO1,CO2,CO 3,CO4	Explain Stambhan karma in relation with contemporary pharmacological action.	CC	MK	KH	L&PP T,FC	T-EMI,T-OBT ,P-VIVA,DEB	F&S	I	
CO1,CO3	Discuss Stambhan karma and its clinical application.	CC	MK	KH	L&G D,PB L	T-EMI,T-OBT ,P-VIVA,DEB	F&S	I	
CO1	Discuss Madakari karma with examples.	CC	MK	KH	L,DIS	T-OBT,P- VIVA,QZ	F&S	I	
CO1,CO3	Discuss Pramathi karma and its clinical application.	CC	MK	KH	L&PP T,DIS	T-EMI,T- OBT,P-VIVA	F&S	I	
CO1	Discuss Abhishyandi karma with examples.	CK	MK	K	L,DIS	T-EMI,T-OBT	F&S	I	

						,P-VIVA,DEB			
CO1	Discuss Vyavayi karma with examples.	CC	MK	KH	L,PE R	T-EMI,T-OBT ,P-VIVA,DEB	F&S	I	
CO1	Discuss Vikashi karma with examples.	CC	MK	KH	L,DIS	T-OBT,P- VIVA,QZ	F&S	I	
CO1,CO2	Explain Rasayan karma in relation with Rejuvenators.	CC	MK	KH	L&PP T,DIS ,BL	T-EMI,P- VIVA,QZ	F&S	I	
CO1,CO3	Analyze types of Rasayan dravyas with its gunas and discuss its clinical application with research updates.	CAN	MK	KH	L&G D	T-EMI,T-OBT ,P-VIVA,DEB ,CR-RED	F&S	I	
CO1,CO2	Explain Vajeekaran karma in relation with Aphrodisiacs.	CC	MK	KH	L&G D,PL	T-OBT,P- VIVA,QZ	F&S	I	
CO1,CO2,CO 3	Critically Analyze the types of Vajeekaran dravyas with their guna karmas and discuss its clinical application with research updates	CAN	MK	KH	L&PP T,PB L,ML, LS	T-OBT,P- VIVA,QZ ,DEB,CR- RED	F&S	I	
CO1,CO2	Explain Medhya karma in relation with contemporary pharmacological actions.	CC	MK	KH	L&PP T	T-EMI,T-OBT ,P-VIVA,DEB	F&S	I	
CO1,CO2,CO 3	Critically analyze Medhya dravya and discuss its clinical application with research updates.	CAN	MK	KH	L&PP T,PL, PER	T-OBT,P- VIVA,QZ ,WP,CR-RED	F&S	I	
<b>Topic 10 10. Karmas of Dashemani Gana</b> (Lecture :12 hours, Non lecture: 3 hours)									
CO1,CO8	Discuss Charakokta Dashemani karmas with their rasa, guna, vipak, virya, dhosha karma, botanical identity & pharmaco-	CC	MK	KH	L&PP T,DIS	P-VIVA,P- REC,QZ ,M-	F&S	I	

	therapeutic action of individual drugs.				,FC,R EC	CHT,M-POS			
<b>Topic 11 11. Principles of General Pharmacology</b> (Lecture :15 hours, Non lecture: 1 hours)									
CO4,CO9	Define Pharmacology and discuss Principles of general Pharmacology.	CK	MK	K	L&PP T	PRN,QZ	F&S	I	
CO4,CO9	Discuss drug definition, drug dosage forms and route of drug administration.	CC	MK	KH	L_VC	T- EW,P- VIVA,QZ	F&S	I	
CO4,CO9	Explain pharmacokinetics (ADME) drug and pharmacodynamics.	CC	MK	KH	L_VC ,DIS	P-VIVA,PRN	F&S	I	
CO4,CO9	Discuss Drug dose, Principles of drug action, Mechanism of drug action & Bioavailability	CC	MK	KH	L_VC ,PER	P-VIVA,QZ	F&S	I	
CO9	Define, Describe mode of action & Discuss types with examples of following drugs acting on CNS with examples of Anaesthetics, Sedative-Hypnotic, Antiepileptic, Antiparkinsonian, Antidepressants, Antianxiety and Opioid Analgesics Drugs	CC	MK	KH	L&PP T,PB L,PrB L,FC	T- EW,T-OBT ,P-VIVA,QZ ,C-INT	F&S	III	
CO9	Define, Describe mode of action & Discuss types with examples of following drugs acting on Peripheral (somatic) Nervous System with examples of Skeletal Muscle Relaxants and Local Anaesthetics Drugs.	CC	MK	KH	L&PP T,PB L,FC	T- EW,T-OBT ,P-VIVA,QZ	F&S	III	
CO9	Define, Describe mode of action & Discuss types with examples of following drugs acting on Autacoids and Related of Nonsteroidal Antiinflammatory (NSAIDs), Antipyretic and Analgesics Drug	CC	MK	KH	L&PP T,PB L,FC	T- EW,T-OBT ,P-VIVA,PRN	F&S	III	
CO9	Define, Describe mode of action & Discuss types with examples of following drugs acting on Respiratory Disorders -	CC	MK	KH	L&PP T,PB	T-OBT,P- VIVA,PRN	F&S	III	

	Bronchodilators, Aerosols/ Inhalants, Expectorants and Anti tussives Drugs				L,BL				
CO9	Define, Describe mode of action & Discuss types with examples of following drugs acting on Cardiovascular Drugs as Antihypertensive and Antianginal Drugs	CC	MK	KH	L_VC ,FC	T-OBT,P- VIVA,PRN	F&S	III	
CO9	Define, Describe mode of action & Discuss types with examples of following drugs acting on Kidney as Diuretics	CC	MK	KH	L&PP T,TP W,BL	T-OBT,P- VIVA,QZ	F&S	III	
CO9	Define, Describe mode of action & Discuss types with examples of following drugs acting as Haematinics, Coagulants, Anticoagulants and Hypolipidaemic Drugs	CC	MK	KH	L&PP T,PB L,BL	T- EW,T- OBT,P-VIVA	F&S	III	
CO9	Define, Describe mode of action & Discuss types with examples of following drugs acting on Gastrointestinal tract as Antacid, Carminatives, Digestants, Antiemetics, Laxatives, Antidiarrhoeal and Hepatoprotective Drugs	CC	MK	KH	L&PP T,L& GD,L _VC	T- EW,T-OBT ,P-VIVA,QZ	F&S	III	
CO9	Define, Describe mode of action & Discuss types with examples of following drugs acting as Antibiotics and Antitubercular.	CC	MK	KH	L&PP T,FC, GBL	T- EW,P- VIVA,QZ	F&S	III	
CO9	Define, Describe mode of action & Discuss types with examples of following drugs acting as <b>Antifungal, Antiviral, Antimalarial and Anthelmintic Drugs</b>	CC	MK	KH	L&PP T,PB L,GB L	T- EW,T-OBT ,P-VIVA,QZ	F&S	III	
CO9	Define, Describe mode of action & Discuss types with examples of following drugs acting on Hormones and Related Drugs as Thyroid Hormone, Thyroid Inhibitors, Insulins, Oral Antidiabetic, Hormonal Contraceptives, Uterine Stimulants and Uterine Relaxants Drugs.	CC	MK	KH	L&PP T,BL, PER	T- EW,T-OBT ,P-VIVA,PRN	F&S	III	

CO9	Define, Describe mode of action & Discuss types with examples of following drugs acting on as Antiseptics , Disinfectants, Vaccines, Vitamins, Water imbalance and IV	CC	MK	KH	L&PP T,BL, PER	T- EW,T- OBT,P-VIVA	F&S	III	
<b>Topic 12 12. Mishraka Gana</b> (Lecture :6 hours, Non lecture: 2 hours)									
CO1,CO3	Explain Brihatpanchamoola composition.	CC	MK	KH	L&PP T,ED U	T- EW,P-VIV A,P-POS,QZ ,M-CHT	F&S	III	
CO1,CO3	Describe Guna karma and combined therapeutic effect of Brihatpanchamoola.	CC	MK	KH	L&PP T,DIS ,TBL	T- EW,P-VIV A,P-POS,QZ ,M-CHT	F&S	III	
CO1,CO3	Explain Laghupanchamoola composition.	CC	MK	KH	L&G D	T- EW,P-VIV A,P-POS,QZ ,M-CHT	F&S	III	
CO1,CO3	Describe Guna karma and combined therapeutic effect of Laghupanchamoola.	CC	MK	KH	L&PP T,DIS ,PL	T- EW,P-VIV A,P-POS,QZ	F&S	III	
CO1,CO3	Explain Vallipanchamoola composition.	CC	MK	KH	L&PP T	T- EW,P-VIV A,P-POS,QZ ,M-CHT	F&S	III	
CO1,CO3	Describe Guna karma and combined therapeutic effect of Vallipanchamoola.	CC	MK	KH	L&G D,PE R	T- EW,P- VIVA,QZ	F&S	III	
CO1,CO3	Explain Kantakapanchamoola composition.	CC	MK	KH	L&PP T,BS,	T- EW,P- VIVA,QZ	F&S	III	

					TPW				
CO1,CO3	Describe Guna karma and combined therapeutic effect of Kantakapanchamoola.	CC	MK	KH	L&PP T,LS, PER	P-POS,QZ ,M- CHT	F&S	III	
CO1,CO3	Explain Trinapanchamoola composition.	CC	MK	KH	L_V C, PER	P-VIVA,P- EXAM,QZ	F&S	III	
CO1,CO3	Describe Guna karma and combined therapeutic effect of Trinapanchamoola.	CC	MK	KH	L&PP T,CB L,PL	T- EW,P- VIVA,M-CHT	F&S	III	
CO1,CO3	Explain Panchavalkala composition.	CC	MK	KH	L&PP T,BL, GBL	P-VIVA,P- POS,QZ	F&S	III	
CO1,CO3	Describe Guna karma and combined therapeutic effect of Panchavalkala.	CC	MK	KH	L&PP T,FC	T-CS,T-OBT, P-VIVA,QZ	F&S	III	
CO1,CO3	Explain Triphala composition	CC	MK	KH	L,DIS	T- EW,P- VIVA,P-POS	F&S	III	
CO1,CO3	Describe Guna karma and combined therapeutic effect of Triphala.	CC	MK	KH	L&PP T,PE R	T-OBT,P-VIV A,P- EXAM,QZ	F&S	III	
CO1,CO3	Explain Trikatu composition.	CC	MK	KH	L&PP T,PL	T-EMI,P- VIVA,QZ	F&S	III	
CO1,CO3	Describe Guna karma and combined therapeutic effect of Trikatu	CC	MK	KH	L&PP T,PL	T-OBT,P- VIVA,P-POS	F&S	III	
CO1,CO3	Explain Trimada composition	CC	MK	KH	L,DIS	T- EW,P- VIVA,QZ	F&S	III	

CO1,CO3	Describe Guna karma and combined therapeutic effect of Trimada.	CC	MK	KH	L&PP T,DIS ,TUT	T- EW,P- VIVA,QZ	F&S	III	
CO1,CO3	Explain Chaturusana composition.	CC	MK	KH	L&PP T	T-OBT,P- VIVA,P-POS	F&S	III	
CO1,CO3	Describe Guna karma and combined therapeutic effect of Chaturusana.	CC	MK	KH	L&PP T,FC	P-VIVA,P- POS,QZ	F&S	III	
CO1,CO3	Explain Panchakola composition.	CC	MK	KH	L&PP T,L_ VC	P-VIVA,QZ	F&S	III	
CO1,CO3	Describe Guna karma and combined therapeutic effect of Panchakola.	CC	MK	KH	L&PP T,DIS	T- EW,T-CS,P- VIVA,QZ	F&S	III	
CO1,CO3	Explain Shadusana composition.	CC	MK	KH	L&PP T,PL	T-OBT,P- VIVA,P-POS	F&S	III	
CO1,CO3	Describe Guna karma and combined therapeutic effect of Shadusana	CC	MK	KH	L&PP T,FC	T- EW,P- VIVA,QZ	F&S	III	
CO1,CO3	Explain Chaturbeeja composition.	CC	MK	KH	L&PP T,L_ VC	T-OBT,P-VIV A,P-EXAM	F&S	III	
CO1,CO3	Describe Guna karma and combined therapeutic effect of Chaturbeeja	CC	MK	KH	L&PP T,PE R	T- EW,P- VIVA,QZ	F&S	III	
CO1,CO3	Explain Trijataka composition.	CC	MK	KH	L_ VC ,DIS, SDL	T-OBT,P-VIV A,P-EXAM,P- POS	F&S	III	

CO1,CO3	Describe Guna karma and combined therapeutic effect of Trijataka	CC	MK	KH	L&PP T,PL	T- EW,P- VIVA,P-POS	F&S	III	
CO1,CO3	Explain Chaturajataka composition.	CC	MK	KH	L_V C, PER	T-OBT,P- VIVA,QZ	F&S	III	
CO1,CO3	Describe Guna karma and combined therapeutic effect of Chaturajataka.	CC	MK	KH	L&PP T,DIS	T- EW,P- VIVA,P-POS	F&S	III	
CO1,CO3	Explain Panchatikta composition.	CC	MK	KH	L&PP T,FC	T-OBT,P-VIV A,P-REC,QZ	F&S	III	
CO1,CO3	Describe Guna karma and combined therapeutic effect of Panchatikta.	CC	MK	KH	L&PP T,PL	T- EW,P- VIVA,P-POS	F&S	III	
CO1,CO3	Explain Chaturbhadra composition.	CK	MK	K	L,DIS	T-OBT,P- VIVA,QZ	F&S	III	
CO1,CO3	Describe Guna karma and combined therapeutic effect of Chaturbhadra.	CC	MK	KH	L&PP T,FC	T-EMI,P- VIVA,QZ	F&S	III	
CO1,CO3	Explain Trikarshika composition.	CC	MK	KH	L,DIS	T-OBT,P-VIV A,P-EXAM	F&S	III	
CO1,CO3	Describe Guna karma and combined therapeutic effect of Trikarshika.	CC	MK	KH	L&PP T,DIS ,PL	T-OBT,P- VIVA,QZ	F&S	III	

**Topic 13 13. Nomenclature of dravya as per Nighantu, Vedic taxonomy and Botany** (Lecture :0 hours, Non lecture: 2 hours)

CO1	Describe the Nomenclature of dravya as per Raj Nighantu.	CC	MK	KH	L&PP T,FC, RP	P-VIVA,PRN, P-ID,QZ	F&S	III	
CO1	Explain the Nomenclature of dravya as per Vedic taxonomy.	CC	MK	KH	L&PP T	P-VIVA,P- ID,QZ	F&S	III	

CO1	Discuss the Nomenclature of dravya as per botany.	CC	MK	KH	L&PP T,BL, PER	P-VIVA,P- ID,QZ	F&S	III	
<b>Topic 14 14. Prashasta Bheshaja, Bheshaja Pariksha and drug evaluation method with correlation as per Pharmacognosy</b> (Lecture :1 hours, Non lecture: 2 hours)									
CO1,CO5	Describe Prashasta Bheshaja.	CC	MK	KH	L&G D,PL	P-VIVA,QZ	F&S	III	
CO1,CO5	Explain Bheshaja Pariksha of Charaka samhita vimana sthana.	CC	MK	KH	L&G D,SD L,LS	P-VIVA,QZ ,M-CHT	F&S	III	
CO1,CO5	Discuss drug evaluation method in correlation with Pharmacognosy.	CC	MK	KH	L&PP T,DIS	P-VIVA,QZ	F&S	III	
<b>Topic 15 15. Dravyasangrahana and Drug collection methods as per GFCP (Good Field collection practices)</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1,CO2	Discuss Dravyasangrahana and Drug collection methods as per GFCP (Good Field collection practices).	CC	DK	KH	L&PP T,PE R	P-VIVA,PUZ, CHK	F&S	III	
CO1,CO2	Discuss Drug collection methods as per GFCP (Good Field collection practices).	CC	DK	KH	L&PP T,DIS ,PrBL	P-VIVA,PUZ, CHK	F&S	III	
<b>Topic 16 16. GCP (Good cultivation practices), seed bank, conservation of medicinal plants, knowledge about RET (Rear, Endangered &amp; Threatened ) medicinal plants.</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO2	Discuss good cultivation practices, seed bank, conservation of medicinal plants, knowledge about RET (Rear, Endangered & Threatened) medicinal plants.	CC	DK	KH	L&PP T,L_ VC,F C	P-VIVA,M- POS	F&S	III	

<b>Topic 17 17. Abhava Pratinidhi Dravya (substitutes)</b> (Lecture :1 hours, Non lecture: 1 hours)									
CO1,CO7	Discuss the concept of Abhava pratinidhi dravya (substitutes) as per Bhavaprakasha.	CC	MK	KH	L&G D,BS, EDU	P-VIVA,QZ	F&S	III	
<b>Topic 18 18. Classifications and techniques of aqueous and alcoholic extracts</b> (Lecture :0 hours, Non lecture: 2 hours)									
CO2,CO6	Appraise the techniques of aqueous and alcoholic extracts of medicinal plants.	CC	DK	KH	L_VC ,D	P-VIVA,DOPS	F&S	III	
<b>Topic 19 19. Adverse drug reaction and Pharmacovigilance with recent updates</b> (Lecture :1 hours, Non lecture: 2 hours)									
CO2,CO8	Explain adverse drug reaction and pharmacovigilance in ayurveda with recent updates.	CC	MK	KH	L&PP T,L& GD,L S	P-VIVA,PRN, QZ ,M-CHT	F&S	III	V-RS
<b>Topic 20 20. NMPB (National Medicinal Plant Board), CCRAS (Central Council of Research in Ayurveda Sciences), API ( Ayurvedic Pharmacopeia of India), GCTM ( Global Centre for Traditional Medicine), PCIMH ( Pharmacopeia Commission of Indian Medicine and Homeopathy)</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO2	State NMPB (National Medicinal Plant Board), CCRAS (Central Council of Research in Ayurveda Sciences), API ( Ayurvedic Pharmacopeia of India), GCTM ( Global Centre for Traditional Medicine) and PCIMH (Pharmacopeia Commission of Indian Medicine and Homeopathy).	CK	NK	K	SDL	P-VIVA,QZ ,INT	F&S	III	
<b>Topic 21 21. Vrikshayurveda and Ethno-medicine</b> (Lecture :1 hours, Non lecture: 1 hours)									
CO2	Explain concept of Vrikshayurveda and Ethno medicine.	CC	NK	KH	L&G D,ML ,PER	P-VIVA,CR- RED	F&S	III	
<b>Topic 22 22. Network pharmacology and Bioinformatics</b> (Lecture :1 hours, Non lecture: 1 hours)									

CO2	Describe Network Pharmacology and Bioinformatics.	CC	NK	KH	L&G D,SD L,LS	P-VIVA,CR- RED	F&S	III	
-----	---	----	----	----	---------------------	-------------------	-----	-----	--

### Paper 2 Applied Dravyaguna

<b>A3</b> Course outcome	<b>B3</b> Learning Objective (At the end of the session, the students should be able to)	<b>C3</b> Doma in/sub	<b>D3</b> Must to know / desirable to know / Nice to know	<b>E3</b> Level Does/ Show s how/ Know s how/ Know	<b>F3</b> T-L meth od	<b>G3</b> Assessment  (Refer abbreviations)	<b>H3</b> Form ative/ summ ative	<b>I3</b> Term	<b>J3</b> Integr ation
--------------------------------	---	-----------------------------	---	---	--------------------------------	---	--	-------------------	------------------------------

#### Topic 1 1. Beshjavacharaniya (Criteria's to be considered for selection of drugs in vyadhis) (Lecture :1 hours, Non lecture: 6 hours)

CO5	Interpret the selection of appropriate drugs in different vyadhis as per criteria's mentioned in Beshjavacharaniya (as per As. Sa. Su 23)	CAP	MK	KH	L&PP T,CB L,PrB L,SD L	T- EW,P- VIVA,QZ	F&S	II	H-RN ,H- SW
-----	---	-----	----	----	------------------------------------	---------------------	-----	----	-------------------

#### Topic 2 2.1 Dravya (Drug) Nama-Guna-Karma Jnana (Lecture :45 hours, Non lecture: 10 hours)

CO3	Specify useful parts with its Rasapanchaka of following drugs.	CK	MK	K	L&G D,CB L,FC	T-OBT,P- VIVA	F&S	II	
CO4	Describe karma,agryakarma and dosha karma of following drugs.	CC	MK	KH	L&PP	T-EMI,T-OBT	F&S	II	

					T,DIS ,ML	,P-VIVA,QZ			
CO5	Explain Amayikaprayoga used in Vyadhi (Disease) pertaining to various Srotas and Vyadhiavastha (Stage).	CC	MK	KH	L&G D,BS, CBL	T-EMI,T- OBT,P-VIVA	F&S	II	
CO5	Indicate the Kalpana (dosage form), Matra (Dose), Anupana (Vehicle), Marga(Route), Sevana kala (Time of administration), Kalavadhi (Duration) and Pathya-pathya ) of following drugs.	CAP	MK	KH	L&PP T,DIS ,GBL	T-EMI,T-OBT ,P-VIVA,PRN	F&S	II	V-RS, H-SW
CO2	Enlist active phyto-constituents & important formulations Discuss research updates of following drugs.	CK	MK	K	L&PP T,ML	T-OBT,P-VIV A,CR-RED	F&S	II	
CO8	Enlist botanical name & family. Explain main synonyms as per Bruhatryees and Bhavaprakasha. Vernacular name (Hindi,English and local name) of following drugs.	CK	MK	KH	L&PP T,DIS	T-OBT,P- VIVA,QZ ,O- QZ	F&S	II	
CO8	Demonstrate external morphology-habit, root, leaf, stem, flower, inflorescence, fruit, seed and officinal useful parts of following drugs.	CC	MK	KH	L_VC ,DIS, BS	T-OBT,P- VIVA,O-QZ	F&S	II	
CO7	Describe varieties, grahyagrahyatwa Adulterants, substitute and toxic effects of following drugs wherever applicable	CC	MK	KH	L&G D	T- EW,T-OBT ,P-VIVA,QZ	F&S	II	H-AT
<b>Topic 3 2.2 Dravya (Drugs) Nama -Guna-Karma-Jnana</b> (Lecture :29 hours, Non lecture: 20 hours)									
CO3	Specify useful parts with its Rasapanchaka of following drugs	CK	MK	K	L&PP T,DIS	T-EMI,T-OBT ,P-VIVA,QZ	F&S	III	
CO4	Describe karma, agryakarma and dosha karma of following drugs.	CC	MK	KH	L&PP T,DIS ,BS	T-OBT,P- VIVA,QZ	F&S	III	
CO5	Explain Amayikaprayoga used in Vyadhi (Disease) pertaining to	CC	MK	KH	L&PP	T-OBT,P-	F&S	III	

	various Srotas and vyadhiavastha (Stage).				T,DIS ,CBL	VIVA,QZ			
CO5	Indicate the Kalpana(dosage form), Matra (Dose), Anupana (Vehicle), Marga (Route), Sevana kala (Time of administration), Kalavadhi (Duration) and Pathya-pathya ) of following drugs.	CAP	MK	KH	L&PP T,DIS ,ML	T-EMI,P- VIVA	F&S	III	V-RS, H-SW
CO2	Enlist active phyto-constituents & important formulations. Discuss research updates of following drugs.	CK	MK	K	L&G D,BS	T-EMI,T-OBT ,P-VIVA,QZ	F&S	III	
CO8	Enlist botanical name & family. Explain main Synonyms as per Bruhatryees and Bhavaprakasha. Vernacular name (Hindi, English and local name) of following drugs.	CK	MK	K	L&G D,FC, ML	T-OBT,P- VIVA,QZ	F&S	III

CO7	Describe varieties, grhyahrahyatwa, adulterants, substitute and toxic effects of following drugs wherever applicable.	CC	MK	KH	L&PP T,DIS ,EDU	T-EMI,T-OBT ,P-VIVA,PUZ	F&S	III	H-AT

**List of Practicals (Term and Hours)**

<b>PRACTICALS (Marks-100)</b>			
<b>S.No</b>	<b>List of Topics</b>	<b>Term</b>	<b>Hours</b>
1	1. Assessment and Understanding the relation between Parthivatwa & subjective/ objective parametric tests	1	10
2	2. Assessment of objective parametric measures of Guna	1	12
3	3. Assessment of Rasa	1	6
4	4. Comparative organoleptic and macroscopic examination	1	23
5	5. Microscopic Identification of genuine and adulterated drug	1	4
6	6. Demonstration of skills to identify the medicinal plants in the college garden.	1	10
7	7. Out campus visit (Cultivated gardens, Tissue culture lab, Herbaria, Pharmacognosy lab, Quality control lab and Forest plant demonstration)	1	10
8	8. Dravya prayoga	1	12
9	9. Physico-chemical study	2	8
10	10. Phytochemical	2	4
11	11. Thin Layer Chromatography (TLC) technique	2	2
12	12. Demonstration of skills to identify the medicinal plants in the college garden	2	10
13	13. Out campus visit (cultivated gardens & In-situ plant demonstration)	2	10
14	14. Ekala dravya prayoga	2	10
15	15. Different Cultivation technique including methods mentioned in Vrikshayurveda	2	6
16	16. Exercise on Network pharmacology	3	6
17	17. Preparations of digital herbarium	3	2
18	18. Demonstration of skills to identify the medicinal plants in the college garden	3	10
19	19. Out campus visit (cultivated gardens & In-situ plant demonstration)	3	10
20	20. Ekala dravya prayoga	3	10

**Table 4: Learning objectives (Practical)**

A4 Course outcome	B4 Learning Objective (At the end of the session, the students should be able to)	C4 Doma in/sub	D4 Must to know / desirable to know / Nice to know	E4 Level Does/ Shows how/ Knows how/ Know	F4 T-L meth od	G4 Assessment (Refer abbreviations)	H4 Form ative/ summ ative	I4 Term	K4 Integr ation
<b>Topic 1 1. Assessment and Understanding the relation between Parthivatwa &amp; subjective/ objective parametric tests</b>									
CO1,CO6	Observe the objective parametric measures to understand the relation between Parthivatwa by Density (bulk) of Asthishrnkhala, Sariva, Vidari, Maricha, Shatavari, Jambu, Godhuma & Ushira.	PSY-GUD	MK	KH	PT	P-VIVA	F&S	I	
CO1,CO6	Observe the objective parametric measures to understand the relation between Jaliyatwa by Viscosity, Moisture content of Kumari, Vidari, Sariva, Shunthi, Ikshu, Usheera, Kamala & Apamarga.	PSY-GUD	MK	KH	PT	P-VIVA	F&S	I	
CO1,CO6	Observe the objective parametric measures to understand the relation between Aagneyatwa by Moisture content of Shunthi, Shatavari, Maricha, Dhataki, Chitraka, Gokshura, Hingu & Chandana.	PSY-GUD	MK	KH	PT	P-VIVA	F&S	I	
CO1,CO6	Observe the objective parametric measures to understand the relation between Vayaviyatwa by Fat content & Bulk density of Usheera, Ashwagandha, Nimba, Vidari, Khadira, Tila, Jambu & Kapikacchu.	PSY-GUD	MK	KH	PT,D_ L	P-VIVA	F&S	I	

CO1,CO6	Observe the objective parametric measures to understand the relation between Aakashiyatwa by Bulk density of Usheera, Kumari, Apamarga, Jeeraka & Jatamansi.	PSY-GUD	MK	KH	PT,D_ L	P-VIVA	F&S	I	
CO1,CO6	Participate in the methods of specific gravity (Solid) and bulk density of Asthishrukhalala, Sariva, Vidari, Maricha, Shatavari, Jambu, Godhum & Ushir by objective parameters measures to understand the relation between Parthivatwa.	AFT-RES	MK	KH	PT,D_ L	P-VIVA	F&S	I	
CO1,CO6	Follow the methods of Viscosity, Moisture content & Specific gravity (Liquid) of Kumari, Vidari, Sariva, Shunthi, Ikshu, Usheera, Kamala & Apamarga by objective parameters measures to understand the relation between Jaliyatwa.	AFT-REC	MK	KH	PT,D_ L	P-VIVA	F&S	I	
CO1,CO6	Describe the methods of pH and Moisture content of Shunthi, Shatavari, Maricha, Dhataki, Chitraka, Gokshura, Hingu & Chandan by objective parameters measures to understand the relation between Agneeyatwa.	AFT-REC	MK	KH	PT,D_ L	P-VIVA	F&S	I	
CO1,CO6	Answer to the methods of Fat content , Specific gravity (liquid) & Bulk density of Usheera, Ashwagandha, Nimba, Vidari, Tila, Jambu & Kapikachhu by objective parameters measures to understand the relation between Vayaviyatwa.	AFT-RES	MK	KH	PT,D_ L	P-VIVA	F&S	I	
CO1,CO6	Follow the methods of Bulk density of Ushira, Kumari, Apamarga, Jeeraka & Jatamansi by objective parameters measures to understand the relation between Akashiyatwa	AFT-REC	MK	KH	PT,D_ L	P-VIVA	F&S	I	
CO1,CO6	Perform the objective parametric measures to understand the relation between Parthivatwa by Specific gravity (solid) of Asthishrnkhala, Sariva, Vidari, Maricha, Shatavari, Jambu, Godhuma & Ushira.	PSY-ADT	MK	SH	PRA	P-EXAM,P-PRF	F&S	I	

CO1,CO6	Perform the objective parametric measures to understand the relation between Jaliyatwa Specific gravity (Liquid) of Kumari, Vidari, Sariva, Shunthi, Ikshu, Usheera, Kamala & Apamarga.	PSY-ADT	MK	SH	PT	P-EXAM,P-PRF	F&S	I	
CO1,CO6	Perform the objective parametric measures to understand the relation between Aagneyatwa by pH of Shunthi, Shatavari, Maricha, Dhataki, Chitraka, Gokshura, Hingu & Chandana.	PSY-ADT	MK	SH	PT	P-EXAM,P-PRF	F&S	I	
CO1,CO6	Perform the objective parametric measures to understand the relation between Vayaviyatwa by Specific gravity (Liquid) of Usheera, Ashwagandha, Nimba, Vidari, Khadira, Tila, Jambu & Kapikacchu.	PSY-ADT	MK	SH	PT	P-EXAM,P-PRF	F&S	I	
<b>Topic 2 2. Assessment of objective parametric measures of Guna</b>									
CO1,CO6	Observe the assessment of objective parametric measures of Shatavari and Bala for its guru guna by Density (bulk).	PSY-GUD	MK	KH	PT,D_ L	P-VIVA	F&S	I	
CO1,CO6	Observe the Specific gravity (Liquid and solid) of Shatavari and Bala for its guru guna.	PSY-GUD	MK	KH	PT,D_ L	P-VIVA	F&S	I	
CO1,CO6	Observe the assessment of objective parametric measures of Yava and Dhanyaka for its Laghu guna by Density ( bulk)	PSY-GUD	MK	KH	PT,D_ L	P-VIVA	F&S	I	
CO1,CO6	Demonstrate the Specific gravity (Liquid and solid) Yava and Dhanyaka for its Laghu guna.	PSY-GUD	MK	KH	PT,D_ L	P-VIVA	F&S	I	
CO1,CO6	Observe the assessment of objective parametric measures of Snigdha guna drugs by total fat content, moisture content of Tila and Eranda	PSY-GUD	MK	KH	PT,D_ L	P-VIVA	F&S	I	
CO1,CO6	Demonstrate Swelling index of Snigdha guna drugs of Tila, and Eranda.	PSY-GUD	MK	KH	D_L,P RA	P-VIVA	F&S	I	
CO1,CO6	Observe the assessment of objective parametric measures of	PSY-	MK	KH	PT,D_ L	P-VIVA	F&S	I	

	Ruksha guna drugs by total fat content and moisture content of Kulattha & Vidanga	GUD			L				
CO1,CO6	Demonstrate Swelling index of Ruksha guna drugs of Kulattha & Vidanga	PSY-GUD	MK	KH	PT,D_L	P-VIVA	F&S	I	
<b>Topic 3 3. Assessment of Rasa</b>									
CO2,CO6	Perform the assessment of Rasa based on classical symptoms for each rasa dravyas.	PSY-ADT	MK	SH	PT,D_L	P-EXAM,P-PRF,INT	F&S	I	
<b>Topic 4 4.Comparative organoleptic and macroscopic examination</b>									
CO6	Perform the comparative organoleptic characters (Taste, Colour, Smell, Sound, Touch) and macroscopic examination (Size, Shape, Fracture, External markings like lenticels, ridges, nodes, furrows, cracks etc) of root of Ashwagandha, Chitraka, Manjistha, Musta, Shatavari, Vatsanabha and Yashtimadhu.	PSY-ADT	MK	SH	L_VC,PT,D_L	P-EXAM,P-PRF	F&S	I	
CO6	Perform the comparative organoleptic characters (Taste, Colour, Smell, Sound, Touch) and macroscopic examination (Size, Shape, Fracture, External markings like lenticels, ridges, nodes, furrows, cracks etc) of Rhizome/Stolon of Haridra, Katuki, Shunthi and Vacha.	PSY-ADT	MK	SH	PT,D_L	P-EXAM,P-PRF	F&S	I	
CO6	Perform the comparative organoleptic characters (Taste, Colour, Smell, Sound, Touch) and macroscopic examination (Size, Shape, Fracture, External markings like lenticels, ridges, nodes, furrows, cracks etc) of Stem of Asthishrinkhala and Guduchi.	PSY-ADT	MK	SH	PT,D_L	P-EXAM,P-PRF	F&S	I	
CO6	Perform the comparative organoleptic characters (Taste, Colour, Smell, Sound, Touch) and macroscopic examination (Size, Shape, Fracture, External markings like lenticels, ridges, nodes, furrows, cracks etc) of Bark of Arjuna, Ashoka, Kutaja, Nimba and Twak.	PSY-ADT	MK	SH	BS,PT,D_L	P-EXAM,P-PRF	F&S	I	

CO6	Perform the comparative organoleptic characters (Taste, Colour, Smell, Sound, Touch) and macroscopic examination (Size, Shape, Fracture, External markings like lenticels, ridges, nodes, furrows, cracks etc) of Heart wood of Beejaka, Chandana and Khadira	PSY-ADT	MK	SH	BS,PT ,D_L	P-EXAM,P-PRF	F&S	I	
CO6	Perform the comparative organoleptic characters (Taste, Colour, Smell, Sound, Touch) and macroscopic examination (Size, Shape, Fracture, External markings like lenticels, ridges, nodes, furrows, cracks etc) of Leaf of Kumari, Meshashringi and Vasa.	PSY-ADT	MK	SH	BS,PT ,D_L	P-EXAM,P-PRF	F&S	I	
CO6	Perform the comparative organoleptic characters (Taste, Colour, Smell, Sound, Touch) and macroscopic examination (Size, Shape, Fracture, External markings like lenticels, ridges, nodes, furrows, cracks etc) of Flower of Dhataki, Kunkum (kesara) and Lavanga.	PSY-ADT	MK	SH	PT,D_ L	P-EXAM,P-PRF	F&S	I	
CO6	Perform the comparative organoleptic characters (Taste, Colour, Smell, Sound, Touch) and macroscopic examination (Size, Shape, Fracture, External markings like lenticels, ridges, nodes, furrows, cracks etc) of Fruit of Amalaki, Aragavadha, Bhallataka, Bibhitaki, Gokshura, Haritaki, Madanphala, Maricha, Pippali and Vidanga.	PSY-ADT	MK	SH	D_L,P RA	P-EXAM,P-PRF	F&S	I	
CO6	Perform the comparative organoleptic characters (Taste, Colour, Smell, Sound, Touch) and macroscopic examination (Size, Shape, Fracture, External markings like lenticels, ridges, nodes, furrows, cracks etc) of Phalaraja of Kampillaka.	PSY-ADT	MK	SH	PT,D_ L	P-EXAM,P-PRF	F&S	I	
CO6	Perform the comparative organoleptic characters (Taste, Colour, Smell, Sound, Touch) and macroscopic examination (Size, Shape, Fracture, External markings like lenticels, ridges, nodes, furrows, cracks etc) of Seed of Bakuchi,Ela, Eranda, Jyotishmati	PSY-ADT	MK	SH	PT,D_ L	P-EXAM,P-PRF	F&S	I	

	and Kapikacchu.								
CO6	Perform the comparative organoleptic characters (Taste, Colour, Smell, Sound, Touch) and macroscopic examination (Size, Shape, Fracture, External markings like lenticels, ridges, nodes, furrows, cracks etc) of Unorganized drugs of Guggulu, Hingu and Mocharasa.	PSY-ADT	MK	SH	PT,D_L	P-EXAM,P-PRF	F&S	I	
CO6	Perform the comparative organoleptic characters (Taste, Colour, Smell, Sound, Touch) and macroscopic examination (Size, Shape, Fracture, External markings like lenticels, ridges, nodes, furrows, cracks etc) of Whole plant of Apamarga, Bhrungaraja, Bhumyamalaki, Brahmi, Kalmeghaand and Mandukaparni.	PSY-ADT	MK	SH	PT,D_L	P-EXAM,P-PRF	F&S	I	
CO6	Perform the comparative organoleptic characters (Taste, Colour, Smell, Sound, Touch) and macroscopic examination (Size, Shape, Fracture, External markings like lenticels, ridges, nodes, furrows, cracks etc) of Galls of Karkatshrungi.	PSY-ADT	MK	SH	PT,D_L	P-EXAM,P-PRF	F&S	I	
<b>Topic 5 5. Microscopic Identification of genuine and adulterated drug</b>									
CO6	Perform the comparative microscopic examination of genuine and adulterated any two samples of Root / stem / leaf /bark / fruits (E.g. like Sariva / Manjishta / Vidanga / Maricha / Ashoka).	PSY-ADT	MK	SH	TUT,PT,D_L	P-EXAM,P-PRF	F&S	I	
<b>Topic 6 6. Demonstration of skills to identify the medicinal plants in the college garden.</b>									
CO8	Demonstrate identification features of college garden medicinal plants for their morphology, taxonomical keys, regional flora with therapeutic uses.	PSY-GUD	MK	KH	L_VC,ML,SDL,DG,FV	P-VIVA,P-EXAM,P-ID	F&S	I	
CO8	Participate actively in Identification of Medicinal plants.	AFT-RES	MK	SH	DG	P-VIVA,P-EXAM	F&S	I	

<b>Topic 7 7. Out campus visit (Cultivated gardens, Tissue culture lab, Herbaria, Pharmacognosy lab, Quality control lab and Forest plant demonstration)</b>									
CO8	Visit to observe the identification features of medicinal plants which are from cultivated or natural habitat / forest plant.	PSY-GUD	MK	KH	ML,S DL,D G	P-VIVA,P- EXAM	F&S	I	
CO8	Visit to observe the Tissue culture techniques of medicinal plants in local / nearby Tissue culture lab.	PSY-GUD	MK	KH	PT,D_ L	P-VIVA	F&S	I	
CO8	Visit to observe the herbaria of medicinal plants in nearby institute.	PSY-GUD	MK	KH	PT,D	P-VIVA	F&S	I	
CO6	Visit to observe the nearby AYUSH approved Quality control lab for quality control techniques.	PSY-GUD	MK	KH	L_VC ,PT,D _L	P-VIVA	F&S	I	
<b>Topic 8 8. Dravya prayoga</b>									
CO5	Observe the selection of Ekala Dravya (single drug) in various clinical conditions	PSY-GUD	MK	KH	DIS,C BL,S DL,T UT	P-VIVA,QZ	F&S	I	
CO5	Perform the selection of Ekala dravya prayoga in various clinical conditions by masked case sheets.	PSY-ADT	MK	SH	CBL, ECE	P-VIVA,P- EXAM	F&S	I	H-RN
<b>Topic 9 9. Physico-chemical study</b>									
CO6	Perform the foreign matter study of minimum 2 useful parts of medicinal plants.	PSY-ADT	MK	SH	PT,D_ L	P-VIVA	F&S	II	
CO6	Observe the Loss on drying (LoD) study of minimum 2 useful parts of medicinal plants.	PSY-GUD	MK	KH	TUT, PT,D_ L	P-VIVA	F&S	II	

CO6	Observe the Ash value and Extractive value of minimum 2 useful parts of medicinal plants.	PSY-GUD	MK	KH	PT,D_L	P-VIVA	F&S	II	
<b>Topic 10 10. Phytochemical</b>									
CO6	Perform Preliminary phytochemical study of minimum 2 medicinal plant extracts.	PSY-ADT	MK	SH	PT,D_L	P-VIVA,P-EXAM,P-PRF	F&S	II	
<b>Topic 11 11. Thin Layer Chromatography (TLC) technique</b>									
CO6	Observe the TLC (Thin layer chromatography) technique of one medicinal plant extract.	PSY-GUD	MK	KH	TUT,PT,D_L	P-VIVA,INT	F&S	II	
<b>Topic 12 12. Demonstration of skills to identify the medicinal plants in the college garden</b>									
CO8	Demonstrate identification features of college garden medicinal plants for their morphology, taxonomical keys, regional flora with therapeutic uses.	PSY-GUD	MK	KH	L_VC, DG	P-VIVA,P-EXAM,P-PRF	F&S	II	
CO8	Participate actively in Identification of Medicinal plants.	AFT-RES	MK	SH	DG	P-VIVA	F&S	II	
<b>Topic 13 13. Out campus visit (cultivated gardens &amp; In-situ plant demonstration)</b>									
CO8	Visit to observe the identification features of medicinal plants which are from cultivated or natural habitat / forest plant.	PSY-GUD	MK	KH	DG	P-VIVA	F&S	II	
<b>Topic 14 14. Ekala dravya prayoga</b>									
CO5	Perform the selection of Ekala dravya prayoga in various clinical conditions by masked case sheets.	PSY-ADT	MK	SH	DIS,CBL,ECE,D_BED	P-VIVA,P-EXAM	F&S	II	H-RN
CO5	Appraise the value of selection of Ekala Dravya Prayog in	AFT-	MK	SH	PBL,	P-VIVA,P-	F&S	II	H-RN

	various clinical conditions by providing masked case sheets.	VAL			CBL, CD	EXAM			
<b>Topic 15 15. Different Cultivation technique including methods mentioned in Vrikshayurveda</b>									
CO8	Demonstrate different cultivation technique of medicinal plants in garden.	PSY-GUD	MK	KH	L_VC ,DG	P-VIVA,INT	F&S	II	
CO8	Demonstrate different cultivation methods mentioned in Vrikshayurveda in garden.	PSY-GUD	MK	KH	DG	P-VIVA	F&S	II	
<b>Topic 16 16. Exercise on Network pharmacology</b>									
CO2	Conduct the Identification (Data mining) active constituents by Pubmed, IMPPAT or PubChem in digital library.	PSY-SET	MK	KH	DIS,D	P-VIVA,PA	F&S	III	
CO2	Conduct Target identification by Binding DB.	PSY-SET	MK	KH	D	P-VIVA	F&S	III	
CO2	Conduct Identification of disease gene by DisGeNET.	PSY-SET	MK	KH	TUT, D	P-VIVA	F&S	III	
CO2	Conduct GO (Gene ontology) enhancement analysis by KEGG Pathway, R ratio.	PSY-SET	MK	KH	D	P-VIVA	F&S	III	
CO2	Conduct Network construction by STRING, PPI network, cytoscope.	PSY-SET	MK	KH	D	P-VIVA	F&S	III	
<b>Topic 17 17. Preparations of digital herbarium</b>									
CO8	Prepare digital herbarium of minimum 10 medicinal plants during field visit with all parts of the plant with geo-tag photos.	PSY-ADT	MK	SH	L_VC ,W,T UT,D	P-SUR,RK	F&S	III	
<b>Topic 18 18. Demonstration of skills to identify the medicinal plants in the college garden</b>									
CO8	Demonstrate identification features of college garden medicinal	PSY-	MK	KH	L_VC	P-VIVA,P-	F&S	III	

	plants for their morphology, taxonomical keys, regional flora with therapeutic uses.	GUD			,DG	EXAM			
CO8	Participate actively in Identification of Medicinal plants.	AFT-RES	MK	SH	DG	P-VIVA,P-EXAM	F&S	III	
<b>Topic 19 19. Out campus visit (cultivated gardens &amp; In-situ plant demonstration)</b>									
CO8	Visit to observe the identification features of medicinal plants which are from cultivated or natural habitat / forest plant.	PSY-GUD	MK	KH	DG	P-VIVA	F&S	III	
<b>Topic 20 20. Ekala dravya prayoga</b>									
CO5	Perform the selection of Ekala dravya prayoga in various clinical conditions by masked case sheets.	PSY-ADT	MK	SH	CBL, ECE, D_BE D,PR A	P-VIVA,P-EXAM,RK	F&S	III	H-RN
CO5	Appraise the value of selection of Ekala Dravya Prayoga in various clinical conditions by providing masked case sheets.	AFT-VAL	MK	SH	PBL, CBL, CD	P-VIVA,P-EXAM	F&S	III	H-RN

**Table 4a: List of Practical**

S.No	Name of practical	Term	Activity	Practical hrs
1	1. Assessment and Understanding the relation between Parthivatwa & subjective/ objective parametric tests	1	<ul style="list-style-type: none"> <li>♦ <b>1.1 Assessment and Understanding the relation between Parthivatwa &amp; subjective/ objective parametric tests</b></li> <li>♦ Density (bulk)</li> <li>♦ Specific gravity (solid)</li> <li>♦ <b>Drugs to study</b> for e.g.- Asthishrnkhala, Sariva, Vidari, Maricha, Shatavari, Jambu, Godhuma &amp; Ushira</li> <li>♦ <b>1.2 Assessment and Understanding the relation between Jaliyatwa &amp; subjective/ objective parametric tests</b></li> <li>♦ Viscosity</li> <li>♦ Specific gravity</li> <li>♦ Moisture content</li> <li>♦ <b>Drugs to study</b> for e.g.- Kumari, Vidari, Sariva, Shunthi, Ikshu, Usheera, Kamala &amp; Apamarga</li> <li>♦ <b>1.3 Assessment and Understanding the relation between Aagneyatwa &amp; subjective/ objective parametric tests</b></li> <li>♦ pH</li> <li>♦ Moisture content</li> <li>♦ <b>Drugs to study</b> for e.g.: Shunthi, Shatavari, Maricha, Dhataki, Chitraka, Gokhura, Hingu &amp; Chandana</li> <li>♦ <b>1.4 Assessment and Understanding the relation between Vayaviytwa &amp; subjective/ objective parametric tests</b></li> <li>♦ Fat content</li> <li>♦ Specific gravity</li> <li>♦ Density (bulk)</li> <li>♦ <b>Drugs to study</b> for e.g. : Usheera, Ashwagandha, Nimba, Vidari, Khadira, Tila, Jambu &amp; Kapikacchu</li> <li>♦ <b>1.5 Assessment and</b></li> </ul>	10

			<p><b>Understanding the relation between Aakashiyatwa &amp; subjective/ objective parametric tests</b></p> <ul style="list-style-type: none"> <li>◆ Density (Bulk)</li> <li>◆ <b>Drugs to study</b> for e.g.: Usheera, Kumari, Apamarga, Jeeraka &amp; Jatamansi</li> </ul>	
2	2. Assessment of objective parametric measures of Guna	1	<ul style="list-style-type: none"> <li>◆ <b>2.1 Assessment of objective parametric measures Guru &amp; Laghu Guna</b></li> <li>◆ Density (bulk)</li> <li>◆ Specific gravity (Liquid and solid)</li> <li>◆ Drugs to study for e.g. : <b>Guru:</b> Shatavari, Bala ; <b>Laghu:</b> Yava, Dhanyaka</li> <li>◆ <b>2.2 Assessment of objective parametric measures of Snigdha and Ruksha guna drugs</b></li> <li>◆ Total fat content</li> <li>◆ Moisture content</li> <li>◆ Swelling index</li> <li>◆ <b>Drugs to study</b> for e.g. : <b>Snigdha:</b> Tila, Eranda ; <b>Ruksha:</b> Kullatha, Vidanga</li> </ul>	12
3	3. Assessment of Rasa	1	<p><b>Assessment of Rasa based on classical symptoms for each rasa dravyas.</b> One Example For each rasa</p>	6
4	4. Comparative organoleptic and macroscopic examination	1	<ul style="list-style-type: none"> <li>◆ <b>Comparative organoleptic (Taste, Color, Smell, Sound, Touch) and macroscopic examination (Size, Shape, Fracture, External markings like lenticels, ridges, nodes, furrows, cracks, etc)of the following group of drugs.</b></li> <li>◆ <b>a. Root:</b> Aswagandha, Chitraka,</li> </ul>	23

			<p>Manjistha, Musta, Shatavari, Vatsanabha, Yashtimadhu.</p> <ul style="list-style-type: none"> <li>♦ <b>b. Rhizome/Stolon:</b> Haridra, Katuki, Shunthi, Vacha.</li> <li>♦ <b>c. Stem:</b> Asthishrinkhala, Guduchi.</li> <li>♦ <b>d. Bark:</b> Arjuna, Ashoka, Kutaja, Nimba, Twak.</li> <li>♦ <b>e. Heart wood:</b> Beejaka, Chandana, Khadira.</li> <li>♦ <b>f. Leaf:</b> Kumari, Meshashringi, Vasa.</li> <li>♦ <b>g. Flower:</b> Dhataki, Kunkum (kesara), Lavanga.</li> <li>♦ <b>h. Fruit:</b> Amalaki, Aragavadha, Bhallataka, Bibhitaki, Gokshura, Haritaki, Madanphala, Maricha, Pippali, Vidanga.</li> <li>♦ <b>i. Phalaraja:</b> Kampillaka</li> <li>♦ <b>j. Seed:</b> Bakuchi, Ela, Eranda, Jyotishmati, Kapikacchu</li> <li>♦ <b>k. Unorganized drugs:</b> Guggulu, Hingu, Mocharasa</li> <li>♦ <b>l. Whole plant:</b> Apamarga, Bhrungaraja, Bhumyamalaki, Brahmi, Kalmegha, Mandukaparni.</li> <li>♦ <b>m. Galls:</b> Karkatshrungi</li> </ul>	
5	5. Microscopic Identification of genuine and adulterated drug	1	<ul style="list-style-type: none"> <li>♦ <b>Microscopic identification of genuine and adulterated drug, minimum 2 samples from Root/stem/leaf /bark/fruits.</b></li> <li>♦ (E.g. Sariva/Manjishta/Vidanga/Maricha/Ashoka)</li> </ul>	4
6	6. Demonstration of skills to identify the medicinal plants in the college garden.	1		10
7	7. Out campus visit (Cultivated gardens, Tissue culture lab, Herbaria, Pharmacognosy)	1	<ul style="list-style-type: none"> <li>♦ <b>General instructions regarding combined educational visit</b></li> </ul>	10

lab, Quality control lab and Forest plant demonstration)

- ♦ Combined educational visit can be planned wherever feasible as, for **Dravyaguna**- Cultivated gardens, Tissue culture lab, Herbaria, Pharmacognosy lab, Forest plant demonstration ; for **Agadatantra**- forensic lab, snake park, pollution control board and snake venom unit; for **Swasthvrutta** -Yoga and naturopathy center , Milk dairy plant, Water Purification plant, Sewage treatment plant, Leprosy rehabilitation Centre & for **Rasashastra**- GMP certified Lab , Drug Analysis Lab
- ♦ **SOP for Out campus Field Visits**
- ♦ **Theme-Based Visits:** Plan visits based on specific educational themes ( Deshemani Ganas, Family wise), selecting locations relevant to the theme and collaborating with local experts.
- ♦ **Dress Code:** Participants must wear jean paints and T shirts, closed-toe shoes, a hat or cap for sun protection, and weather-appropriate gear such as jackets or raincoats.
- ♦ **Essential Materials:** Each participant should carry a water bottle, a stick (optional), materials for sample storage (newspaper, blotting paper, secateurs, plastic bags), a cap, goggles, and a packed lunch or snacks in a suitable container.
- ♦ **Safety Precautions:** Conduct a safety briefing before the visit, outlining emergency procedures, collecting medical information, and emphasizing expected behaviors' during the trip.
- ♦ **Itinerary:** Develop a detailed itinerary with activities and a timeline, considering the chosen theme and objectives of the visit.
- ♦ **Public Address System (PA System):** If necessary, provide a portable PA system with a

			<p>microphone, amplifier, and power source for effective communication with larger groups.</p> <ul style="list-style-type: none"> <li>♦ <b>Test the PA System:</b> Prior to the visit, ensure the PA system is in working order and audible, conducting necessary tests to guarantee functionality.</li> <li>♦ <b>Responsible Usage:</b> Use the PA system judiciously, speaking clearly and at an appropriate volume, while encouraging participants to utilize the system for questions or clarifications.</li> <li>♦ <b>Follow-up Activities:</b> Organize post-visit discussions and assignments to reinforce learning, encourage knowledge sharing, and facilitate deeper exploration of the theme.</li> <li>♦ <b>Review and Revise:</b> Regularly update and adapt this SOP to comply with safety standards, educational objectives, and local regulations.</li> </ul>	
8	8. Dravya prayoga	1	<ul style="list-style-type: none"> <li>♦ <b>8.1 (Part I) Demonstration of selecting appropriate Ekala dravya as per clinical conditions.</b></li> <li>♦ <b>8.2 (Part II) Selection of Ekala dravya prayoga in various clinical conditions by providing masked case sheets per srotasa (5 cases in each term)</b></li> </ul>	12
9	9. Physico-chemical study	2	<ul style="list-style-type: none"> <li>♦ <b>Physicochemical study of medicinal plant. (minimum 2 drugs)</b></li> <li>♦ a. Foreign matter</li> <li>♦ b. Loss on drying</li> <li>♦ c. Ash value</li> <li>♦ d. Extracts</li> </ul>	8

			<ul style="list-style-type: none"> <li>♦ <b>Note: The same plant should be used for all the tests</b></li> </ul>	
<b>10</b>	10. Phytochemical	2	<ul style="list-style-type: none"> <li>♦ <b>Preliminary phytochemical study of medicinal plant. (minimum 2 drugs)</b></li> </ul>	4
<b>11</b>	11. Thin Layer Chromatography (TLC) technique	2	<ul style="list-style-type: none"> <li>♦ <b>TLC technique of medicinal plant (any one)</b></li> </ul>	2
<b>12</b>	12. Demonstration of skills to identify the medicinal plants in the college garden	2		10
<b>13</b>	13. Out campus visit (cultivated gardens & In-situ plant demonstration)	2		10
<b>14</b>	14. Ekala dravya prayoga	2	<ul style="list-style-type: none"> <li>♦ <b>Selection of Ekala dravya prayoga in various clinical conditions by providing masked case sheets. (5 cases in each term)</b></li> </ul>	10
<b>15</b>	15. Different Cultivation technique including methods mentioned in Vrikshayurveda	2		6
<b>16</b>	16. Exercise on Network pharmacology	3	<ul style="list-style-type: none"> <li>♦ <b>Exercise on Network Pharmacology</b></li> <li>♦ <b>1st activity:</b> Identification (Data mining) active constituents by Pubmed, IMPPAT or PubChem.</li> <li>♦ <b>2nd activity:</b> Target identification by BindingDB.</li> </ul>	6

			<ul style="list-style-type: none"> <li>♦ <b>3rd activity:</b> Identification of disease gene by DisGeNET.</li> <li>♦ <b>4th activity:</b> GO enhancement analysis by KEGG Pathway, R ratio.</li> <li>♦ <b>5th step:</b> Network construction by STRING, PPI network, sytoscope.</li> </ul>	
<b>17</b>	17. Preparations of digital herbarium	3	<ul style="list-style-type: none"> <li>♦ <b>Preparations of digital herbarium of minimum 10 drugs with all parts of the plant (with geo-tag photos) by compulsory field visit</b></li> </ul>	2
<b>18</b>	18. Demonstration of skills to identify the medicinal plants in the college garden	3		10
<b>19</b>	19. Out campus visit (cultivated gardens & In-situ plant demonstration)	3		10

# Hours indicated are included in calculations of Table 3 and 4

**Table 5- Teaching learning method**

Sr No	Teaching learning methods in the course	No of Activities
1	Lecture	13

2	Lecture with Power point presentation	100
3	Lecture & Group Discussion	35
4	Lecture with Video clips	19
5	Discussions	42
6	Brainstorming	7
7	PBL	14
8	CBL	7
9	Project-Based Learning	3
10	TBL	3
11	Team project work	5
12	Flipped classroom	22
13	Blended Learning	13
14	Edutainment	4
15	Mobile learning	7
16	Role plays	3
17	Self-directed learning	14
18	Game-Based Learning	6
19	Library Session	18
20	Peer learning	16
21	Recitation	1
22	Tutorial	2
23	Presentations	20
24	Demonstration	1

These are overall teaching learning methods listed in Table 3 and 4. Teachers can select the best possible method amongst the given methods as per objective, available time etc.

**Table 6: Assessment Summary: Assessment is subdivided in A to H points**

#### 6 A-Number of Papers and Marks Distribution

Subject Code	Papers	Theory	Practical/Clinical Assessment					Grand Total
			Practical	Viva	Elective	IA	Sub Total	

AyUG-DG	2	200	100	70	-	30	200	400
---------	---	-----	-----	----	---	----	-----	-----

**6 B - Scheme of Assessment (formative and Summative)**

PROFESSIONAL COURSE	DURATION OF PROFESSIONAL COURSE		
	First Term (1-6 Months)	Second Term (7-12 Months)	Third Term (13-18 Months)
Second	3 PA & First TT	3 PA & Second TT	3 PA & UE **

**PA:** Periodical Assessment; **TT:** Term Test; **UE:** University Examinations.

\*\* University Examination shall be on entire syllabus

## 6 C - Calculation Method for Internal assessment Marks

TERM	PERIODICAL ASSESSMENT*					TERM TEST**	TERM ASSESSMENT	
	A 1	B	C	D	E	F	G	H
	1 (15 Marks)	2 (15 Marks)	3 (15 Marks)	Average (A+B+C/3)	Converted to 30 Marks (D/15*30)	Term Test (Marks converted to 30)	Sub Total _/60 Marks	Term Assessment (.../30)
FIRST							E+F	(E+F)/2
SECOND							E+F	(E+F)/2
THIRD						NIL		E
<b>Final IA</b>	Average of Three Term Assessment Marks as Shown in 'H' Column.							
	Maximum Marks in Parentheses *Select an Evaluation Method which is appropriate for the objectives of Topics from the Table 6 D for Periodic assessment. Conduct 15 marks assessment and enter marks in A, B, and C. ** Conduct Theory (100 Marks)(MCQ(20*1 Marks), SAQ(8*5), LAQ(4*10)) and Practical (100 Marks) Then convert to 30 marks.							

## 6 D - Evaluation Methods for Periodical Assessment

S. No	Evaluation Methods
1	Activities Indicated in Table 3 - Column G3 as per Indicated I, II or III term in column I3

Evaluation Methods in MSE

1. Practical / Clinical Performance
2. Viva Voce, MCQs, MEQ (Modified Essay Questions/Structured Questions)
3. Open Book Test (Problem Based)
4. Summary Writing (Research Papers/ Samhitas)
5. Class Presentations; Work Book Maintenance
6. Problem Based Assignment
7. Objective Structured Clinical Examination (OSCE), Objective Structured Practical Examination (OPSE), Mini Clinical Evaluation Exercise (Mini-CEX), Direct Observation of Procedures (DOP), Case Based Discussion (CBD)

## 6 E Question Paper Pattern

### II PROFESSIONAL BAMS EXAMINATIONS AyUG-DG

#### PAPER-1

## II Professional Ayurvedacharya (BAMS)

**Subject Code : AyUG-RB**

### Summary

Total number of Teaching hours: 450			
Lecture hours(LH)-Theory		150	150(LH)
Paper I	75		
Paper II	75		
Non Lecture hours(NLH)-Theory		300	300(NLH)
Paper I & II	90		
Non Lecture hours(NLH)-Practical			
Paper I & II	210		

Examination (Papers & Mark Distribution)					
Item	Theory Component Marks	Practical Component Marks			
		Practical	Viva	Elective	IA
Paper I	100	100	70	-	30
Paper II	100				
Sub-Total	200	200			
Total marks	400				

**Important Note:-**The User Manual II BAMS is a valuable resource that provides comprehensive details about the curriculum file. It will help you understand and implement the curriculum. Please read the User Manual II before reading this curriculum file. The curriculum file has been thoroughly reviewed and verified for accuracy. However, if you find any discrepancies, please note that the contents related to the MSE should be considered authentic.

In case of difficulty and questions regarding curriculum write to [cur.imp@ncismindia.org](mailto:cur.imp@ncismindia.org)

## PREFACE

Ayurvedic physician, Pranabhisara Vaidya, makes efforts for his task of management of diseases and maintenance of health. For this role his tool is Potent medicine and tactful techniques acquired from profound knowledge of classics.

Bheshaja is important in chikitsa chatushpada. Prepared personally or purchased or prescribed, the medicines must be potent. Identity, Purity, Quality, Stability, Safety and Efficacy all factors must be assessed carefully so that extensive therapeutic utility without any adverse drug reaction can be achieved. Education of Ayurvedic Pharmaceutics i. e. Ayurvediya Aushadhi Nirmana Shastra must provide foundation through guidance for academicians, Researchers, entrepreneurs and clinicians. Yogavijyana and prayogavijnyana isthat expected foundation. Ayurvedic classics expect yuktijna, siddhahasta, sarva bhaishajya kovid ( carak su. 20/22) physician as an outcome of studying Ayurveda.

To achieve the programme outcome of the Professional BAMS course of NCISM , this particular subject contributes a lot by providing thorough multidimensional knowledge in cognitive domain, hands on training of pharmaceutical processing in Psychomotor domain and ethical attitudes towards drug development in affective domain.

. The thought process by which Rasa Bheshaja Yogas reaches yojana- administration is very much important. Dose, Duration, Time and Route of administration, anupana all such factors are unique features of holistic Ayurvedic Practice. Acquiring details of these topics along with practical application with understanding its significance is the course objective of the subject RS& BK. The main Goal is to cater professional Competency in Ayurvedic Pharmaceutics and make them capable to select proper / effective yoga and administer it safely.

It is the need of time to make some addition in the current teaching and learning process of Rasashastra & Bhaishajya Kalpana to make it more relevant, practical and contemporary. New teaching technology tools will certainly be helpful in the effective delivery of knowledge of Rasashastra & Bhaishajya Kalpana. As per the revised regulation, the nomenclature of the subject is Ayurvediya Aushadhi Nirmana Vigyana as paper I and Ayurvediya Aushadhi Prayoga Vigyana as paper II for Second Professional BAMS course.

In this revision, NCISM has tried its best to take Rasashastra & Bhaishajya Kalpana teaching beyond the four walls of the classroom and get it connected with present global needs. For effective content delivery create interest in the subject it becomes evident to teach Rasashastra & Bhaishajya Kalpana with practical demonstrations. In order to facilitate proficiency in pharmaceutical preparation and its application in clinical practice, more non-lecture classes are allotted . Teaching methodology guidelines are provided which shall be followed while teaching, to make baseline uniformity in the process of learning. Activity-based learning will enable the internalization of the concepts and will build a strong platform while learning other subjects of Ayurved.

<b>Topic 1.Chronological development of Ayurvediya Aushadhi Nirmana</b> (Lecture :2 hours, Non lecture: 1 hours)									
CO1	Explain historical evolution of Ayurvediya aushadhi nirman and Rasashastra.	CK	MK	K	L&G D	TT-Theory	F&S	I	
CO1	Describe about contribution of Nagarjuna Acharya to Rasashastra	CK	MK	K	L_V C	TT-Theory	F&S	I	
CO1	Enlist important classical texts of Rasashastra and describe their unique features in short.	CK	DK	K	L&PP T	TT-Theory	F&S	I	
CO1	Describe structure of Pharmacy and enlist formulations prepared in pharmacy, after visiting the unit of teaching pharmacy of own campus	CC	MK	KH	L&G D	CL-PR	F	I	
CO1	Describe Recent development in Ayurvedic Pharmaceuticals viz, new dosage forms, pharmaceutical modification techniques.	CK	DK	K	L&PP T	TT-Theory	F&S	I	
CO1	Define Rasa and Rasayana and describe difference between Rasa and Rasayana	CK	DK	K	L&PP T	T- MEQs	F	I	

CO1	Justify design of ancient Rasashala	AFT-VAL	NK	KH	SDL	PRN	F	I	
<b>Topic 2 2.Paribhasha ( Terminology) (Lecture :8 hours, Non lecture: 4 hours)</b>									
CO1	Explain the term Paribhasha and its importance in Ayurvediya Aushadhi Nirmana.	CK	MK	K	L	T-CRQs	F	I	
CO1	Discribe the terms Aushadha, Bheshaja, Kalpana, Kashaya, Kashaya yoni, Samskara- based on their word derivations	CC	MK	K	L	T- EW	F&S	I	
CO1	Enlist sequentially - names of all drugs classified in the varga(group). Recite shlokas of Maharasa, Uprasa , Sadharana Rasa Varga from Rasaratnasamuchchaya.	CC	MK	K	EDU, SDL, GBL, REC	P-REC,P-ID,PUZ,O-QZ	F&S	I	
CO1	Enlist and discuss Sandigdha, Krutrima, Pratinidhi and Anupalabdha dravya.	CK	DK	K	L&PP T,SD L,GB L	P-ID,CL-PR	F	I	
CO1,CO2	Discribe the definition of the term Shodhana. Explain with examples different techniques used for the procedures of Shodhana.	CAP	MK	KH	L&G D,L_ VC,P T	T- MEQs,P-E XAM,O-QZ,O-GAME	F&S	I	
CO1	Explain the term Marana and describe its types with examples	CK	MK	K	L&PP T,LS	T-OBT	F&S	I	
CO1	Enlist all relevent prakriya paribhasha of Amrutikarana, Lohitakarana,Sattvapatana, druti and discuss with examples	CK	DK	K	DIS,L S	PRN	F	I	
CO1,CO2	Recite sequentially names of Parada Ashta samskara. Explain the terms Jarana Murchchhana and cite types with examples. Compare Jarana and Murchchhana.	CC	MK	KH	L_ VC ,PrBL	T-EMIT,T- ME Qs,PRN,M-CHT	F&S	I	

CO1	Identify names of Parada Bandhas	CK	NK	K	LS	T-OBT	F	I	
CO1,CO2,CO5	Describe Grahyagrahya parameters used for selection of Rasadravyas.	CK	MK	SH	L&PP T,PrB L	T- EW	F&S	I	
CO1,CO2,CO5,CO6	Illustrate all Bhasma pariksha as per classical description.	CC	MK	KH	L_VC ,IBL, DA,D	T- MEQs,P- EXAM,CHK	S	III	
CO1,CO2,CO5	Define the word Siddhilakshani.Recite examples of classical siddhilakshani. Interpret its rationality	CE	MK	KH	L&PP T,SD L,RE C,D_ L	T- MEQs,P- EXAM	F&S	I	
CO1	Recognise and discuss Dhanvantari Bhaga and Rudra bhaga	CC	NK	K	RLE	C-INT	F	I	
CO1	Explain importance of Mana-paribhasha and classical types of Mana. Recall Charts of Mana .	CK	DK	KH	L&PP T,PS M	T-CRQs,P- SUR	F	I	
CO1,CO2	Categorize parameters of Drug Standardization and develop a checklist for assessment of quality of rasadravyas	CE	DK	KH	BS,IB L,TP W,SD L	CL- PR,WP,CHK	F&S	I	
CO2	Explain Value of selection of genuine raw material	AFT- VAL	MK	KH	DIS	DEB	F	II	
CO2,CO3	Explain importance of ethical practices for drug processing( Shodhan, Marana )	AFT- VAL	MK	K	PrBL	P-POS	F	II	
CO2,CO3	Discuss and justify importance of Bhasma Pariksha	AFT- RES	MK	KH	BS	T- EW	F&S	III	

CO2,CO3	Explain value of keen and accurate application of weights and measures in Ayurvediya Aushadhi nirmana	AFT-VAL	DK	K	L&GD	PRN	F	II	
<b>Topic 3 3.Adharbhuta Siddhanta (Application of fundamental principles )</b> (Lecture :4 hours, Non lecture: 2 hours)									
CO1,CO2	Elaborate fundamental principles of Ayurvediya Aushadhi Nirmana alongwith their classical references and discuss their application with classical examples of various kalpas.	CC	MK	KH	L&PP T,BS	T- EW,M- POS	F&S	I	
CO1,CO2	Explain Dravya Samgraha vidhi. Explain types of Bhumi desha and types of drugs to be collected from particular place & places from where Dravya should not be collected.	CC	MK	KH	L&PP T,DIS ,BS	T- EW	F&S	I	H-DG
CO1,CO2	Describe time of Dravya collection and explain rationality behind it.	CC	MK	KH	L&PP T,BS	T- EW	F&S	I	H-DG
CO1,CO2	Enlist parts of Sthavara & Jangama Dravyas used for Ayurvediya Aushadhi nirmana.	CC	MK	KH	L&G D,BS	T- EW	F&S	I	H-DG
CO1,CO2	Define Samskara. Discuss role of Samskara in Ayurvediya Aushadhi Nirmana alongwith various examples.	CC	MK	KH	L&PP T,BS	T- EW	F&S	I	H-Sa mhita
CO1,CO2	Discribe Ardra - Shushka Dravya & Anukta – Visheshokta Dravya collection principles.	CC	MK	KH	L&PP T,DIS	T- EW	F&S	I	H-DG
CO1,CO2	Describe importance of kalpa sevan matra. Explain factors considered for deciding dosage of any drug ( Ayurvedic as well as modern medicine principles). Describe Posology	CC	MK	KH	L&PP T,BS	T- EW	F&S	I	
CO1,CO2	Explain Saveeryata Avadhi(Shelf life) of Ayurvedic dosage forms.	CK	DK	K	L&PP T,DIS	T- MEQs,P- VIVA	F&S	I	
CO1,CO2	Discuss Yogika Dravya Sidhdhanta(Drug combination)	CC	MK	KH	L&PP T,BS	T- EW	F&S	I	
CO1	Explain importance of Kala (Time) Samskara in Ayurvediya	CK	MK	K	L&PP	TT-Theory	F&S	I	

	Aushadhi Nirmana. Elaborate Aushadhi sevana kala mentioned in Sharangdhara samhita. Discribe chrono- Therapeutics.				T				
CO1	Justify Aushadhi kalpa namakarana siddhanta with examples	CC	DK	KH	IBL	CL-PR	F	I	
<b>Topic 4 4.Yantropakaranani- I (Equipments and machineries)</b> (Lecture :6 hours, Non lecture: 4 hours)									
CO1,CO5	Choose and record contemporary machines used in Ayurvedic drug preparation.	CC	DK	K	L&PP T,DIS	T- EW	F&S	I	
CO1,CO5	Discuss the pharmaceutical use of Distillation apparatus, Ball Mill, Pulveriser, End Runner, Edge Runner, Tablet compression machine, Capsule filling machine, Pouch filling machine, Liquid filling machine in Ayurvediya Aushadhi Nirmana	CC	DK	K	L&PP T,DIS	T- EW	F	I	
CO1,CO5	Describe the principles behind construction and working of the classical Yantras used for Ayurvediya Aushadhi nirmana.	CAP	MK	KH	L&PP T,DIS	T- MEQs,P- VIVA	F&S	I	
CO1,CO5	Enlist categorical information about the following Yantras in the charts- Ulukhal Yantra, Patan Yantra, Jarana Yantra, Patala Yantra and Swedana Yantra.	CK	DK	K	L&PP T,DIS	T- EW	F	I	

CO1,CO5	Interpret the mechanism and effect of Yantras / machines on the Physical and Chemical properties of the drug material.	CC	DK	KH	DIS,I BL	M-POS	F	I	
CO1	Enlist Ayurvediya aushadhi kalpana and equipments/yantras/ machines used for preparation of each kalpana.	CK	DK	K	L&PP T	T- EW	F	I	
<b>Topic 5 5.Yantropakaranani -II (Equipments, fuel and Heating Devices)</b> (Lecture :5 hours, Non lecture: 4 hours)									
CO1,CO5	Describe the term Yantra and enlist yantras described in classics useful for aushadhi nirmana.	CK	DK	K	L&PP T	TT-Theory	F	I	
CO1,CO5	Define the term Puta and recite its classical explanation.	CK	MK	K	L_VC ,RLE	T- EW,M- POS	F&S	I	
CO1,CO5	Produce categorical information( Size of Pit, Number of cowdunkcakes, use etc.) about following Putas viz. Mahaputa, Gajaputa, Varahputa, Kukkutaputa, Kapotputa, Lavakputa, Kumbhaputa, Bhandaputa, Valukaputa and Bhudharputa.	CK	MK	K	L&PP T,DIS ,TPW	T- EW,M- POS,COM	F&S	I	
CO1,CO5	Recognise the principles behind construction and working of the classical Putas.	CC	MK	KH	L&PP T,DIS ,IBL	T- EW,M- POS	F&S	I	
CO1,CO5	Identify and enlist contemporary devices used in the preparation	CC	DK	K	L&PP	T- MEQs,QZ	F&S	I	

	of Bhasma.				T,DIS ,IBL	,M-POS			
CO1,CO5	Review the temperature pattern of various Putas by referring research articles.	CC	DK	K	TPW, SDL	QZ ,M-POS	F&S	I	
CO1,CO5	Compile names and significance of temperature measuring devices with reference to Puta.	CK	DK	K	DIS, ML	CL-PR,M- POS	F	I	
CO1,CO5	Enlist the specific Puta used for a particular Bhasma Nirmana.	CC	DK	KH	L&PP T	CL-PR,M- POS	F	I	
CO1,CO5	Enlist various devices used for heating during Ayurvediya Aushadhi nirmana.	CK	DK	K	L,DIS ,RLE, FV	T- EW,P-SUR	F&S	I	
CO1,CO5	Enlist constituents needed for Samanya Musha Nirmana.	CK	DK	K	L&PP T,IBL	T- MEQs	F&S	I	
CO1,CO5	Define the term Musha and describe uses of various types of Musha.	CK	DK	D	L_ VC ,D-M	T-OBT	F&S	I	
CO1,CO5	Enlist and discuss the material used for Sandhi Bandhan ( while using Sharava and Kachakupi)	CK	NK	K	DIS,R LE	T-OBT	F	I	
CO1,CO5	Identify and record the types of Crucibles .	CK	NK	K	L&PP T	M-POS	F	I	

CO1,CO5	Interpret the effect of heat transformation in the material subjected to heating through Musha.	CAP	DK	KH	L&PP T,DIS ,D-M	PRN,CL-PR	F	I	
CO1,CO5	Recall Pakaj Utpatti Siddhant and interpret it for Agni Sannikarsha Sanskara.	CC	DK	KH	L&PP T,DIS	T- EW,CR- RED	F&S	I	
CO1,CO5	Explain the Pharmaceutical use of the Hot plate, heating mantle, induction stove, hot air oven, muffle furnace (horizontal and vertical type)	CC	NK	KH	DIS,S DL	P-SUR,M- POS	F	I	
CO1	Describe types of Koskthi and their uses	CK	DK	K	L	COM	F	I	
CO1,CO5	Describe the Current trends in heat transfer device e.g. steam jacketed heating device, programmed muffle furnace, programmed furnace for Parpati / Pottali preparation.	CC	DK	K	L&PP T,IBL ,SDL	M-POS,COM	F	I	
CO1,CO5	Assess and interpret the effect of fuel in quantum of heat given (time and temperature)	CC	DK	KH	DIS,P rBL	M-POS,CR- RED	F	I	
CO1,CO5	Enlist various fuels used for heating for estimation of their heat value.	CK	NK	K	IBL,S DL	M-POS	F	I	
CO2,CO3	Analyse and appraise use of proper heating device and fuels used for Ayurvediya Aushadhi Nirmana.	AFT- SET	DK	KH	BS	DEB	F	II	
<b>Topic 6 6.Kalpana Nirmana I (Primary &amp; Secondary dosage forms) (Lecture :6 hours, Non lecture: 4 hours)</b>									
CO1,CO2	1. Explain Kashaya kalpana  2. Enlist the dosage form come under Panchavidha Kashaya	CC	MK	KH	L	T- EW,P- VIVA	F&S	II	

	Kalpana and their Upakalpana  3. Justify Primary , secondary and tertiary dosage form under Panchavidha kashaya Kalpana and their Upakalpana								
CO1	Define with synonyms and classify different varieties of the dosage form in Ayurvediya Aushadhi nirmana	CK	MK	K	L	T- EW,P- VIVA	F&S	II	
CO1	Describe methods of preparation of the dosage form along with the principles of extraction, concentration and dilution etc.	CC	MK	KH	L&PP T	T- EW,P- VIVA	F&S	II	
CO1,CO2	Explain in details about Standard Operating Procedure (SOP) of each kalpana.	CC	MK	KH	L&PP T,DIS	T- EW,P- VIVA	F&S	II	
CO1,CO3	Enlist details of the applications/administration ( samanya Matra, Anupana or sahapana, indications and contraindications) of the dosage form with various examples	CC	MK	K	L&PP T	T- EW,P- VIVA	F&S	II	
CO1,CO6	Assess and discuss modern day development and market trend of the dosage form	CC	DK	K	L&G D,IBL ,LS	T- MEQs,P- SUR	F&S	II	
CO1	Determine the advantages and disadvantages of the dosage form	CC	DK	K	L	T- EW,P- VIVA	F&S	II	
CO2	Describe method of preparation of dosage form along with the principle involved	CK	MK	K	L&PP T,DIS	T- EW,P- VIVA	F&S	II	
CO1	Describe meaning of the term Upakalpana. Enlist panchavidha kashaya kalpana and their respective Upakalpana	CK	DK	K	L	T- MEQs,P- VIVA	F&S	II	
CO1	Explain various kalpas belonging to Various dosage forms	CK	MK	K	L_VC	P-EXAM	S	II	

	-Ingredients, proportion, matra, sevan vidhi if any, therapeutic uses				,PT				
CO2	Critically evaluate rationality behind different proportion of water used in various formulations	AFT-VAL	DK	KH	BS	P-VIVA	F&S	III	
<b>Topic 7 7.Kalpana Nirmana-II (Method of Preparation of different dosage forms&amp; Dietary Supplements) )</b> (Lecture :5 hours, Non lecture: 4 hours)									
CO1,CO5	Explain the basic principles involved , processing techniques,quality control parameters used/ involved in the preparation of Avaleha, Kalpana with examples ,instruments used in small and Large scale production,Research updates	CAP	MK	K	L&PP T,TP W,BL	T- EW,T-OBT	F&S	II	
CO1,CO5	Explain the basic principles involved , processing techniques,quality control parameters used/ involved in the preparation of Sneha Kalpana, Kalpana with examples ,instruments used in small and Large scale production,Concept of Avartana, Research updates on Snehakalpana, Market survey	CK	MK	K	L_VC ,TUT	T- EW,P-VIVA	F&S	II	
CO1,CO4	Describe the Significance of sandhana kalpana, classification, Difference between Madya and Shukta Kalpana, general method of preparation, essential ingredients, Anukta Mana, Sandhana Vidhi, observations, Burnig candle test, Lime water Test, difference between Asava and Arishta, essential knowlege of sale and clinical practice , Research updates	CAP	MK	K	L_VC ,PrBL	T- EW,T-OBT	F&S	II	
CO1,CO3,CO5	Explain Definition , significance of Pathya, types, general, method of preparation Manda, Peya, Yavagu, Vilepi, Anna or Odana Kalpana, Krushara, Yusha, Takra, Khada, Kambalika, Raga, Shadava, Related Research updates, Market survey of Dietary Supplements and Nutraceuticals	CAP	MK	KH	L_VC ,RLE	T- EW,P-VIV A,P-EXAM	F&S	II	
<b>Topic 8 8.Rasa Dravya Parichaya- I</b> (Lecture :12 hours, Non lecture: 4 hours)									
CO1		CC	MK	K	L&PP	T- MEQs,P-	S	I	

	Enlist synonyms of Rasadravya and explain significance of that				T,D_ L	VIVA			
CO1,CO2,CO 6	Explain classical & Mineralogical identification and Sources of Rasadravyas	CC	MK	SH	L&PP T,PT	T- EW,P- EXAM	F&S	I	
CO1,CO2	Discriminate types, Grahya-Agrahyata and Dosha of Rasadravya	CC	MK	KH	L&PP T,PT	P-VIVA,TT- Theory	F&S	I	
CO1,CO2	Explain Shodhan and Marana and other processing techniques of the Rasa- Dravya.	CC	MK	KH	L_VC ,IBL, D	T- EW,P- VIVA,INT	F&S	I	
CO1,CO2,CO 6	Discuss probable physical, chemical changes occurring during process & after Shodhana and Marana of Parada, Haratala, Tamra and Shankha.	CC	MK	KH	L&PP T,BS, SDL	T- EW,P-VIV A,P-EXAM	F&S	I	
CO6		CC	DK	KH	DIS,B	P-VIVA	F&S	I	

	Explain research updates about Shilajatu,Naga,Mukta and Kapardika.?				S				
CO1,CO2,CO6	Discuss probable physical, chemical changes occurring after Bhavana, Puta & whole process of Bhasma nirmana from Rasadravyas	CC	MK	KH	DIS,B S	T-OBT	F&S	I	
CO1,CO4	Enlist Kalpas prepared from these Rasdravyas and therapeutic importance of that Rasadravya	CK	DK	K	IBL,S DL	PRN	F	II	
CO2,CO3	Develop checklist for identification of genuine rasadravyas	AFT- CHR	MK	K	IBL	P-PS	F&S	III	
<b>Topic 9 9.Rasa Dravya Parichaya II</b> (Lecture :7 hours, Non lecture: 6 hours)									
CO1	Enlist the important synonyms of Rasadravyas	CC	DK	KH	L&PP T,DIS	P-VIVA	F&S	II	
CO1,CO6	Explain classical & Minerological identification and their Sources.	CK	DK	K	L&PP T,D_ L	P-VIVA	F&S	II	

CO1	Elaborate types, Grahya-Agrahyata and Dosha of Rasadravyas	CK	DK	K	L&PP T	P-VIVA	F	II	
CO1,CO2	Explain Shodhana, Marana & and other processing techniques with probable chemical reactions.	CC	MK	KH	L&PP T,DIS ,LS	T- EW,P- VIVA	F&S	II	
CO1,CO2	Explain Shodhana, Marana & and other processing techniques with probable chemical reactions.	CE	DK	K	L&G D,PT	P-VIVA	F&S	I	
CO6	Explain research updates of Kasisa,Gauripashana and Akika.	CC	DK	KH	DIS, ML	PRN	F	I	
CO1,CO5	Enlist names of rasadravyas and important kalpas prepared from respective dravya. Describe therapeutic importance of that Rasadravya.	CK	DK	K	DIS,S DL	CL-PR,M- CHT	F	II	
<b>Topic 10 10.Rasadravya Parichaya III</b> (Lecture :3 hours, Non lecture: 6 hours)									
CO1	Enlist Synonyms and sources.	CK	NK	K	PrBL, TPW, PER	T-OBT,M- CHT	F&S	II	

CO1,CO6	Determine types, Grahya-Agrahya, properties & classical as well as Mineralogical Identification of Rasadravyas	CC	NK	K	L&PP T,DIS ,SDL	P-VIVA,CHK	F&S	II	
CO1,CO2	Explain Shodhana, Marana and Probable Chemical Changes.	CC	DK	K	L&PP T,IBL	PRN	F&S	II	
CO6	Explain research update of Badarashma.	CK	NK	K	DIS,L S	P-VIVA	F	II	
CO1,CO5	Enlist Rasadravyas from this group and describe important kalpas with their therapeutic utility	CK	DK	K	TPW	PRN	F	II	
<b>Topic 11 11.Kalpna Nirman -III (Method of Preparation of different dosage forms) (Lecture :8 hours, Non lecture: 6 hours)</b>									
CO1,CO2,CO 3	Describe sharkara kalpana along with preparation method of Syrup.Explain therapeutic importance of prepared sharkara kalpana along with its shelf life.	CC	NK	K	L&PP T,SD L	P-VIVA	F&S	II	
CO1,CO2,CO 3	Describe Gudapaka preparation method with its confirmatory tests and precautionsExplain therapeutic importance of prepared Gudapaka along with its shelf life.	CC	NK	K	L&PP T	P-VIVA	F&S	II	
CO1,CO2,CO 3	Describe Lavana kalpana preparation method with its confirmatory tests and precautionsExplain therapeutic	CC	DK	K	L&PP T	T-CRQs,P- VIVA	F&S	II	

	importance of prepared Lavana kalpana along with its shelf life and packaging techniques.								
CO1,CO2,CO3	Describe Kshara kalpana preparation method with its confirmatory tests and precautions Explain therapeutic importance of prepared Kshara kalpana and Ksharasutra integration with Shalya tantra department along with its shelf life and packaging techniques.	CAP	MK	KH	L&PP T	P-VIVA,TT- Theory	F&S	II	V- SHL
CO1,CO2,CO3	Describe Ayaskriti kalpana preparation method with its confirmatory tests and precautions Explain therapeutic importance of prepared Ayaskriti kalpana along with its shelf life and packaging techniques.	CC	NK	KH	L&PP T	P-VIVA	S	II	
CO1,CO2,CO3	Describe Lepa kalpana preparation method with its confirmatory tests and precautions Explain therapeutic importance of prepared Lepa kalpana, integration with Kayachikitsa and Panchakarma department along with its shelf life and packaging techniques.	CC	MK	K	L&PP T	T- EW,P- VIVA	F&S	II	V-KC ,V-PC
<b>Topic 12 12.Chaturvidha Rasayana</b> (Lecture :4 hours, Non lecture: 4 hours)									
CO1,CO2	Describe importance and unouque features of Chaturvidha Rasayana - Kharaliya Rasayana, Parpati Rasayana, Kupipakwa Rasayana & Pottali Rasayana.	CC	MK	KH	L&PP T,IBL	T- EW,P- VIVA	F&S	II	
CO1,CO2	Explain definition, types and method of preparation of Chaturvidha Rasayana.	CAP	MK	D	L&PP T,PT	T- EW	F&S	II	

CO1,CO2	Determine role of Yantra, Agni & Kala for pharmaceutical process of chaturvidha rasayana	CAN	DK	KH	PT	T- EW,P-VIVA	F&S	II	
CO6	Explain shelf-life of Chaturvidha Rasayana.	CAN	DK	SH	L,DIS	P-VIVA	F&S	II	
CO5	Describe chemical changes occurring during the preparation of chaturvidha rasayana and its impact on Pharmacological action of Chaturvidha Rasayana	CAN	DK	KH	L&G D,BS, SDL	CR-RED,CR-W	F	II	
CO5	Explain law of Definite proportion and proportion of Mercury and sulphur needed for preparation of sulphide of Mercury. in Chaturvidha rasayana	CAP	DK	KH	BS,IB L	CL-PR	F	II	
<b>Topic 13 13.Current and emerging trend in Ayurvedic pharmaceuticals</b> (Lecture :3 hours, Non lecture: 4 hours)									
CO1,CO5,CO6	<b>Discuss the classification of different dosage forms.</b>	CK	DK	K	L&PP T,DIS	P-VIVA,M-POS	F&S	III	
CO1,CO5,CO6	Explain the need of different dosage forms.	CK	DK	K	L&PP T,DIS ,SDL	P-VIVA,M-POS	F&S	III	
CO1,CO5,CO6	Enlist categorical information about the cosmetics used in daily	CK	DK	K	L_VC	PRN,M-POS	F	III	

6	routine. Appreciate Ayurvedic cosmetic products.				,DIS, FV				
CO1,CO5	Appreciate Ayurvedic cosmetic products.	AFT- VAL	DK	KH	BS,Pr BL	PRN,P-SUR	F	III	
CO1,CO5,CO 6	Choose and record the contemporary machineries used in the manufacture of cosmetics.	CK	NK	K	L_VC ,DIS, SDL	M-POS	F	III	
CO1,CO5,CO 6	Enlist Quality Control parameters of cosmetics preparations.	CK	DK	K	L&PP T,DIS	P-VIVA,M- POS	F&S	III	
<b>Topic 14 14.GMP(Schedule T) &amp; Regulatory aspects of Ayurvedic drugs</b> (Lecture :2 hours, Non lecture: 4 hours)									
CO5	Explain the legal and regulatory aspects of manufacturing, and sale of Ayurvedic drugs.	CC	MK	K	L&PP T,IBL	CL-PR	F&S	III	
CO5	Describe acts and rules mentioned in Drug & Cosmetic Act 1940 & Rule 1945 and their relevance to Ayurvedic, Siddha, Unani (ASU) drugs.	CC	MK	K	L&G D,BS	QZ	F&S	III	H-DG
CO5	Discuss the guidelines of Food Safety and Standards Authority of India (FSSAI) and FDA.	CK	DK	K	L&G D,SD L	CL-PR	F	III	
CO3,CO5	Determine the principles and practice of establishment of Ayurvedic pharmacy.	CK	DK	K	L&G D,TP W	P-EN,CL-PR	F	III	
CO5	Discuss the NABL guidelines for testing laboratory (Chemical).	CK	NK	K	L&PP T,D_	CL-PR,CHK	F&S	III	

					L				
CO1,CO5	Explain long forms of these - (FSSAI) and (FDA),(CCRAS),(DCGI), (CDSCO)	CK	DK	K	L	T-EMI	S	III	
CO4	Discuss ethical aspect of large scale drug preparation in Ayurvedic Pharmacies	AFT-VAL	DK	K	DIS	CL-PR	F	III	

### Paper 2 Ayurvediya Aushadhi Prayoga Vigyana

A3 Course outcome	B3 Learning Objective (At the end of the session, the students should be able to)	C3 Doma in/sub	D3 Must to know / desirable to know / Nice to know	E3 Level Does/ Shows how/ Knows how/ Knows	F3 T-L method	G3 Assessment	H3 Formative/ summative	I3 Term	J3 Integration
<b>Topic 1 1.Aushadhi Prayoga Vigyana</b> (Lecture :1 hours, Non lecture: 2 hours)									
CO1	Define Aushadhi Prayoga Vigyana and its scope and enlist prashasta bhesaja laxana	CK	MK	K	L	TT-Theory	F&S	I	
<b>Topic 2 2.Single drug (Herbal &amp; Mineral)</b> (Lecture :8 hours, Non lecture: 2 hours)									
CO1,CO2,CO4,CO5,CO6	Describe different dosage forms prepared out of a single herb or mineral	CK	MK	KH	L_VC	P-VIVA,COM,TT-Theory	F&S	I	
CO1,CO2,CO4,CO5,CO6	Appreciate how the therapeutic efficacy varies depending on the dosage form	AFT-VAL	MK	K	L&PPT	T- EW,DEB	F&S	I	

CO1,CO2,CO4,CO5,CO6	Describe therapeutic efficacy of different formulations of Vishadravya (Bhallataka), with its toxic effects and remedy.	CK	NK	K	L&G D	P-VIVA	F	I	
CO1,CO5	Describe therapeutic efficacy of different formulations of Guduchi, Gairika, Gandhaka	CC	MK	K	L&G D,PE R	P-VIVA,TT- Theory	F&S	III	
CO3,CO4	Aappraise multiple factors considered for preparation of various dosage forms from a single drug and creat list of more such examples.	AFT- CHR	DK	KH	BS,IB L	COM	F	III	
<b>Topic 3 3.Single drug(Bhasma, Shuddha &amp; Pishti)</b> (Lecture :12 hours, Non lecture: 6 hours)									
CO2,CO6	Explain chemical form/composition, Pharmacodynamics and pharmacokinetics of Abhraka, Loha and Godanti Bhasma.	CC	DK	KH	L&PP T,DIS ,IBL	P-VIVA	S	III	
CO1,CO2	Explain therapeutic properties, dosage, Anupana, Pathyapathya, duration of treatment, Sevana Kala, shelf life, important Yogas of each Bhasma.	CC	MK	KH	L&PP T,TP W	T- EW,P- VIVA	F&S	III	
CO1,CO2	Describe Apakwa Ashuddha Avidhi Bhasma Sevanajanya Vyadhi and their Shanti-upaya.	CK	DK	KH	DIS,B S	P-VIVA,TT- Theory	F	III	
CO1,CO2	Describe in detail Amayika Prayoga (Therapeutic uses) of each Bhasma/Pishti with given references.	CAP	MK	SH	L&G D,W	T- EW,P- VIVA	F&S	III	

CO2,CO6	Explain research updates and clinical evidences of Swarna Bhasma, Makshika Bhasma and Shankha Bhasma.	CE	DK	K	PrBL, SDL	PRN	F&S	III	
<b>Topic 4 4.Aushadhi Kalpa -I (Compound formulations)</b> (Lecture :16 hours, Non lecture: 4 hours)									
CO1,CO2	Describe reference, ingredients, therapeutic properties, dosage and all administration details alongwith Anupana of each formulation.	CK	MK	KH	L&PP T,BS, SDL	T- EW,P- VIVA	F&S	III	
CO1,CO2	Explain Pathya Apathya, Sevana Avadhi (duration of treatment) and shelf-life of each formulation.	CC	MK	KH	L&PP T,DIS ,BS	T- EW	F&S	III	
CO1,CO2	Interpret probable mode of action of each formulation as per Ayurveda.	CC	DK	KH	L&G D,BS	T- EW,P- VIVA	F&S	III	
CO2,CO3,CO 6	Explain research updates and clinical evidences of Arogyavardhini Gutika and Gandhaka Rasayana	CE	DK	K	PrBL	P-VIVA	F&S	III	

CO3,CO4	Critically analyse compound drugs for their therapeutic actions mentioned in the classics.	AFT-VAL	DK	KH	IBL	PRN	F	III	
<b>Topic 5 5.Aushadhi Kalpa-II (Compound Drugs/Formulations) (Lecture :14 hours, Non lecture: 2 hours)</b>									
CO1,CO2,CO3,CO4	Describe Ingredients, therapeutic importance, dose, anupana, pathya-pathya, duration of treatment, sevana kala, shelf life, research updates and clinical evidences of Dashamoola Kwatha, Pushyanuga Churna, Sanjivani Vati, Chitrakadi Gutika, Simhanada Guggulu, Yogaraja Guggulu, Chyavanaprashavaleha, Gandhakadya Malahara, Ashokarishta, Kutajarishta, Panchagavya Ghrita, Bilvadi Gutika.	CAP	MK	KH	L&PP T	T- EW,P- VIVA	F&S	III	
CO1,CO2,CO3,CO4	Describe Ingredients, indications, dose, anupana, pathyapathya, duration of treatment, sevana kala, shelf life, and clinical evidences of Mahamanjistadi kwatha, Sudarshana Churna, Vyoshadi Vati, Bala Chaturbhadra Rasa, Lavana Bhaskara Churna, Narayana Taila,, Neeliringadi Taila Aravindasava, Kumaryasava.	CAP	NK	KH	L&PP T,DIS	P-VIVA	S	III	
CO1,CO2,CO4,CO5	Describe Ingredients, indications, dose, anupana, pathyapathya, duration of treatment, sevana kala, shelf life, and clinical evidences of Panchaguna Taila, Dadimavaleha, Bramhi Ghrita	CK	DK	K	L&PP T	P-VIVA,TT- Theory	S	III	
CO1,CO2,CO3	Undersand & Recite following classical kalpas.Describe Amayika prayoga of each formulation.Understand probable mode of action as per AyurvedaSearch and Record relevant reaserch articles.Create charts describing details of these drugs.Review market avaibility & poplularities of these drugs among practicing vaidyas & near by population.	CAP	MK	KH	L&PP T,DIS ,BS,I BL,P BL	P-EXAM,CO M,TT-Theory	F&S	III	V-KC ,V-SH ,V-PC ,V-SH L,V-S P,V- BL

CO3,CO4	Explain ethical aspect of administration of compound drugs mainly regarding duration of the treatment given.	AFT-VAL	DK	K	PBL	CL-PR	F	III	
CO1,CO2,CO4,CO6	Describe ingredients, with its dose, therapeutic importance, anupana and pathya-apathya along with its clinical evidences and Research updates	CK	MK	KH	L&PP T	T- EW,P- VIVA	F&S	III	
CO1,CO2,CO4,CO6	Enlist the formulations with its dose, anupana and indications	CK	NK	K	L	T-EMI	S	III	
<b>Topic 6 6.Dosage Forms &amp; Cosmetic Products</b> (Lecture :5 hours, Non lecture: 2 hours)									
CO2,CO3,CO7	Define the term- Dosage forms.	CK	MK	K	L&PP T	TT-Theory	F&S	III	
CO2,CO3,CO7	Discuss the need of different dosage forms.	CK	MK	K	L&PP T	TT-Theory	F&S	III	
CO2,CO3,CO7	Explain the classification of different dosage forms.	CK	DK	K	L&PP T	TT-Theory	F&S	III	
CO2,CO3,CO7	Enlist the solid / liquid / semisolid dosage forms.	CK	MK	K	L&PP T	T-EMI	F&S	III	
CO2,CO3,CO7	Discuss the routes of administration of different dosage forms.	CK	MK	K	L&PP T	T- EW	F&S	III	
CO2,CO3,CO7	Describe the advantages and disadvantages of currently available dosage forms.	CK	MK	K	L&PP T	TT-Theory	F&S	III	
CO2,CO3,CO7	Discuss the research updates about modification of classical Ayurvedic dosage forms.	CK	DK	K	L&PP T	CL-PR	F	III	
CO2,CO3,CO7	Discuss the relevant case studies of different dosage forms.	CK	NK	K	L&PP T	P-SUR	F	III	

CO2,CO3,CO7	Define the term Cosmetics.	CK	DK	K	L	TT-Theory	F&S	III	
CO2,CO3,CO7	Explain the classification of cosmetics based on their application on the specific body parts.	CK	DK	K	L&PP T	CL-PR	F&S	III	
CO2,CO3,CO7	Differentiate between the ancient cosmetics and modern day cosmetics.	CK	DK	K	L&PP T	TT-Theory	F&S	II	
CO5	compare and appraise herbal cosmetics vs synthetic products	AFT- VAL	DK	KH	PBL	PRN	F	III	
<b>Topic 7 7.Nutraceuticals</b> (Lecture :6 hours, Non lecture: 1 hours)									
CO1	Describe importance of combination of aahara and aushadha	CK	MK	K	L&PP T	T- EW	F&S	III	H-SW
CO2,CO6	Explain Nutraceuticals with its types	CK	MK	K	L&PP T	TT-Theory	F&S	III	H-SW
CO2,CO6	Corelate rasayana and nutraceutical with examples	CAN	DK	KH	DIS,P rBL	T-OBT	F	III	H-SW
CO2	Describe with examples mode of action of Ayurvedic nutraceuticals	CAP	MK	KH	SDL, LS	PRN	F	III	H-Sa mhita, H-SW
CO2,CO6,CO7	Enlist at least two dietary preparations from Ayurvedic classics which can serve as rasayana/ nutraceutical in-1) General Health2) Pediatric Health3) Geriatric Health4) Women( Garbhini/ Sutika) Health5) Cardio-protection6) Chronic illness-recovery stage	CAP	MK	K	DIS,B S,SY	CL-PR	F	III	H-SW
CO1,CO2,CO6,CO7	Describe potential of Ayurvedic diet and Rasayana in sports endeavor	CAP	DK	KH	BS,Pr BL,PS	DEB	F	III	H-SW

					M				
CO7	Explain research updates about nutraceuticals	CK	NK	K	SDL, PL	M-POS	F	III	
CO2	Enlist atleast two examples of Aushadhi siddha aahara with its indications for each category-->(Aharadravya belonging to following category and kalpa prepared from that aahara dravya and other aushadhi ingredients)1) Jala varga2) Dugdha varga3) Ikshu varga4) Suka-dhanya varga5) Shimbi Dhanya Varga6) Shaka Varga7) Phala Varga8) Lavana Varga9) Spices	CC	DK	K	L&G D,PrB L	CL-PR	F	III	H-Sa mhita, H-SW
CO3,CO4	creat list of unique features of Ayurvedic neutraceuticals and appraise their current need	AFT- VAL	DK	KH	DIS	PRN	F	III	
<b>Topic 8 8.Anupana Prayoga for Aushadhi Kalpa</b> (Lecture :4 hours, Non lecture: 1 hours)									
CO1	Define and classify Anupana and Sahapana	CK	MK	K	L	T- EW	F&S	III	
CO1,CO2	Expalin different factors to be considered for selection of Anupana as per Disease and Patients	CC	MK	KH	L	T- EW	F&S	III	
CO1,CO2	Enlist different anupana for a single drug based on the condtion of patient and disease. Elaborate with the help of examples of kalpas.	CC	MK	KH	L	T- EW	S	III	
CO4	Describe value of proper selection of Anupanas with examples	AFT- VAL	DK	K	SDL	M-CHT	F	III	
<b>Topic 9 9.Aushadhi Prayoga Marga</b> (Lecture :5 hours, Non lecture: 1 hours)									
CO2,CO4	Discuss the various types of Aushadhi Prayog Marga (route of drug administration).	CK	MK	K	L&PP T	T- EW	F&S	II	
CO2,CO4	Describe the advantages and disadvantages of each Aushadhi Prayog Marga.	CK	DK	K	L&PP T,BS	P-SUR,PM,TT- Theory	F&S	II	

CO2,CO4	Enlist the dosage forms used in the specific Aushadhi Prayog Marga.	CK	DK	K	L&P T	T-EMI	F&S	II	
CO2	Discuss the nature of drug (s) administered in various routes of drug administration.	CAP	NK	KH	L&G D	CL-PR	F	II	
CO4,CO5	Appraise administration of drugs through various routes mentioned in Ayurvedic treatment	AFT- VAL	MK	K	L&G D	T- EW	F&S	III	
<b>Topic 10 10.Rational prescription along with safe dispensing of Ayurvedic formulations.</b> (Lecture :1 hours, Non lecture: 4 hours)									
CO2,CO4	Describe and write demo ideal prescription.	CAP	MK	SH	L&G D,CB L	CR-W,CHK	F&S	III	V-KC ,V-SP ,V-BL
CO1,CO3,CO 4	Explain the safe dispensing and efficacious use of Ayurvedic drugs.	CAP	MK	KH	L&G D,BS, TPW	T-CS,PM	F&S	III	V-KC ,V-BL
CO2,CO4	Explain the importance of rational prescribing of drugs and the concept of essential drugs.	CK	DK	K	L&G D,IBL	QZ ,CHK	F	III	V-KC
CO2,CO4,CO 5	Describe the standard protocol for safe dispensing of Ayurvedic drugs.	CK	DK	KH	L&G D	T-OBT	F	III	
CO2,CO4	Demonstrate and educate home remedies to small group of population.	CAP	DK	SH	PrBL, TPW	TR	F	III	H-SW
CO5	explain ethical aspects related to prescription writing	AFT- RES	MK	KH	TPW	INT	F	III	
<b>Topic 11 11.Traditional &amp; Local health Practices</b> (Lecture :2 hours, Non lecture: 4 hours)									
CO1	Identify Local Health Traditions and Healing Knowledge,	CC	DK	K	DIS,P rBL	P-SUR,INT	F	III	

CO1,CO5	Recognise the possible potential of product development and research based on Traditional knowledge	CK	DK	KH	IBL	INT	F	III	
CO1,CO4	Identify the factors responsible for grant of patent and erroneous grant of patent on indian traditional knowledge.?	CK	DK	K	BS	INT	F&S	III	
CO5	Appraise traditional knowlege of Ayurvedic medicines	AFT-VAL	DK	K	TPW	CR-W	F	III	
<b>Topic 12 12.Pharmacovigilance for Ayurveda drugs</b> (Lecture :1 hours, Non lecture: 4 hours)									
CO2,CO4,CO5	Describe the term Pharmacovigilance and explain importance of Pharmacovigilance for Ayurvedic drugs.	CK	DK	K	L&PP T,IBL	M-POS,C- INT,RK	F	III	V-KC ,V-BL ,H-D ,G,H- AT
CO4,CO5	Explain the status and central sector scheme of Pharmacovigilance for Ayurveda, Siddha, Unani, and Homeopathy (ASU & H) drugs.	CK	MK	K	L&PP T,DIS	INT,TT- Theory	F	III	V-KC ,H-D ,G,H- AT
CO4,CO5	Define Adverse Drug Reactions (ADR) and its types.	CE	DK	K	L&G D,IBL	QZ ,TT-Theor y,VV-Viva	S	III	V-KC ,V-BL ,H-D ,G,H- AT
CO2,CO4,CO5	Identify and monitor ADRs.	AFT-VAL	DK	KH	L&G D,BS, IBL	PRN,RK	F	III	V-KC ,V-BL ,H-D ,G,H- AT

CO2,CO4	Discuss and make critical comments on the safe and efficacious use of Ayurvedic drugs.	CAP	DK	KH	L&G D,PrB L,TU T	QZ ,CL- PR,INT	F	III	V-KC ,H-D G,H- AT
CO4,CO5	Debate on ADR of ASU drugs	AFT- RES	DK	K	DIS	DEB	F	III	

**List of Practicals** (Term and Hours)

<b>PRACTICALS (Marks-100)</b>			
<b>S.No</b>	<b>List of Topics</b>	<b>Term</b>	<b>Hours</b>
1	1.Paribhasha concept based Practicals	1	20
2	2.Panchavidha Kashaya Kalpana & their Upakalpana Practicals	1	24
3	3.Rasa Dravya Aushadhi Nirmana Practicals	1	20
4	4.Bheshaja Kalpana Practicals -I	2	24
5	5.Bheshaja Kalpana Practicals -II	2	22
6	6.Dosage Forms & Self-care Products Practicals	2	22
7	7.Field Visit/ Study Tour	3	24
8	8.Hospital IPD Practical	3	10
9	9. Drug Dispensing Practical	3	6
10	10.Quality Control Practicals	2	38

**Table 4: Learning objectives (Practical)**

<b>A4</b> Course outcome	<b>B4</b> Learning Objective (At the end of the session, the students should be able to)	<b>C4</b> Domain/sub	<b>D4</b> Must to know / desirable to know / Nice to know	<b>E4</b> Level Does/ Shows how/ Knows how/ Knows	<b>F4</b> T-L method	<b>G4</b> Assessment  (Refer abbreviations)	<b>H4</b> Formative/ summative	<b>I4</b> Term	<b>K4</b> Integration
<b>Topic 1 1.Paribhasha concept based Practicals</b>									
CO1	Identify the drugs and recite classical name, English name and chemical composition and varga( class) Recite Maharasa , uparasa, Sadharana rasa shlokas from Rasaratna samuchchaya.	PSY-SET	MK	KH	GBL, REC	P-VIVA,P-ID	F&S	I	
CO1,CO2	Demonstrate the correct procedure / SOP and assess the changes observed after the procedure.Discuss the relevant samskara and its role in that procedure.Interpret the Physical, Chemical and Biological alterations.	PSY-MEC	MK	D	GBL, PT	P-PRF,CHK,O SPE	S	I	
CO1,CO2	Observe and describe the pharmaceutical preparation of Gandhaka druti. Explain the term alotropism.Recite melting, boiling and evaporating temperature of Gandhaka.	PSY-MEC	DK	KH	DIS,D _L	P-VIVA	S	II	
CO1,CO2	Observe the procedure of Vanga Jarana. Explain the difference between Jarana and Jaranaa. Discuss chemical process of oxidation and reduction. Recall the information about melting points of all the metals.	CAP	DK	KH	PT,D	P-VIVA	S	III	
CO1,CO2	Demonstrate preparation of Kajjali. Recite its classical shloka. Prepare a checklist of parameters for its siddhilakshana. Interpret	PSY-MEC	MK	D	PBL, TPW,	P-REC,P- EXAM,P-PS	F&S	I	

	law of definite proportion to explain and calculate amount of free sulfur in the prepared amount of kajjali. Calculate the expected weight of rasasindura from the given amount of kajjali.				D_L				
CO1,CO2	Identify relevant Bhasmapariksha and demonstrate samanya and vishesha Bhasma pariksha. Interpret physical/ chemical laws relevant to classical bhasma pariksha.	PSY-MEC	MK	D	DIS,G BL,L RI,D A,D_ L	P-VIVA,CHK	F&S	I	
CO1	Identify various weights and recite essential measures from conversion chart of AFI. Recognise weighing machines and their weighing capacity.	CAP	DK	KH	BS,Pr BL,T PW,P L	PRN,P-SUR	F	I	
CO3,CO4	Identify and value SOP of each procedure of the practical conducted.	AFT-VAL	MK	KH	D_L	P-EXAM	S	II	
CO2	Appraise ancient indications mentioned in classics for confirmation of end point of the pharmaceutical process( Siddhi lakshana)	AFT-RES	MK	K	PrBL	P-VIVA	S	III	
<b>Topic 2 2.Panchavidha Kashaya Kalpana &amp; their Upakalpana Practicals</b>									
CO1,CO2	Recall, Identify and authenticate the raw materials required as per the dosage form/ formulations	PSY-SET	MK	KH	DIS,D	P-VIVA	F&S	II	
CO1,CO2	Demonstrate the method of preparation to get the desired dosage form following SOP	PSY-MEC	MK	SH	DIS,P T	P-VIVA,P-EXAM	F&S	II	
CO1,CO2,CO5	Assess and explain different parameters to achieve desired characters/ end points ( siddhi lakshana) as per classical and contemporary parameters	PSY-MEC	MK	KH	DIS,D	P-VIVA,P-EXAM	F&S	II	
CO1,CO2	Describe ethical responsibility expected during Pharmaceutical	AFT-	MK	K	SDL	P-PRF	F&S	III	

	preparation of Ayurvedic Formulations	REC							
<b>Topic 3 3.Rasa Dravya Aushadhi Nirmana Practicals</b>									
CO1,CO2,CO3	Explain reference Shloka of kalpas & write with interpretation -list of ingredients, their proportion, principles of yoga - yoga samyojana dravya	CC	MK	KH	L	P-VIVA,P-EXAM	F&S	I	
CO1,CO2,CO3	Identify raw Dravya ,used part with classical Mana and interpret in metric system....	CAP	MK	D	DIS,B S	P-EXAM	F&S	I	
CO2,CO3	Identify, Utilize & know mechanism of Yantra used for drug preparation	CAP	MK	KH	DIS,B S	VV-Viva	F&S	I	
CO2,CO3	Observe & Record various parameters responsible for good manufacturing which are done during process of phamaceutical preparation	CE	MK	SH	DIS,B S,PT	P-EXAM	F	I	
CO2	Demonstrate Sidhdhi Lakshna	CAP	MK	SH	D	P-VIVA	S	III	
CO2,CO3	Assess finished product as per classics.	CE	MK	SH	DIS,P T	P-VIVA,P-EXAM	S	I	
CO1,CO2,CO	Appraise peculiarities of chaturvidha rasayana preparation	AFT-	DK	KH	PER	M-POS	F	III	

4		VAL							
<b>Topic 4 4.Bheshaja Kalpana Practicals -I</b>									
CO1,CO3	Demonstrate Arka preparation method, along with its packaging technique and therapeutic importance.	PSY-SET	MK	SH	DIS,D-M	P-VIVA,P-EXAM	F&S	II	
CO1,CO3	Demonstrate preparation of Vati along with drying techniques	PSY-MEC	MK	KH	DIS,D	P-VIVA,P-EXAM	F&S	II	
CO1,CO3	Identify the genuine sample of Guggulu and demonstrate preparation of different types of Guggulu along with drying techniques	PSY-SET	MK	K	DIS,P T	P-VIVA,P-EXAM	F&S	II	
CO1,CO3	Identify the useful part of the raw material and demonstrate Sattva preparation method.	PSY-SET	MK	K	DIS,D	P-VIVA,P-EXAM	F	II	
CO1,CO3	Demonstrate preparation of Varti along with drying and packaging techniques.	PSY-SET	MK	KH	PT	P-VIVA,P-EXAM	F	II	
CO1,CO3	Demonstrate Lavana preparation methods, along with its packaging techniques.	PSY-SET	DK	SH	PT	P-VIVA,P-EXAM	F	II	
CO1,CO3	Identify the internal and external applications of different kshara kalpana along with importance of ksharasutra through surgical aspects.	PSY-ADT	MK	K	PT	P-VIVA,P-EXAM	F	II	V-SHL
CO1,CO3	Demonstrate and Explain preparation methods of Masi kalpana for its internal or external application in clinical practice.	PSY-ADT	DK	K	DIS,P T	P-VIVA,P-EXAM	F	II	
CO1,CO3	Demonstrate preparation and application aspects of Upanaha kalpana .	PSY-MEC	DK	K	DIS,P T	P-EXAM	F&S	II	V-KC
CO1,CO3	Demonstrate preparations of Sikta taila along with identify the genuine sample of Sikta.Perform and Describe Malahara kalpana preparation method with its confirmatory tests of end point. .	PSY-SET	DK	K	DIS,P T	P-VIVA,P-EXAM	F&S	II	

CO2,CO3	Demonstrate preparation of different types of Malahara with its applied aspect.	PSY-SET	NK	K	PT	P-SUR	F	II	V-KC
CO2,CO3	Demonstrate preparation of different types of Lepa and preparation of Shatadhouta ghrita .	PSY-SET	NK	KH	DIS,P T	PRN	F	II	V-KC ,V-PC
CO2,CO3	Perform and Describe Lepa kalpana preparation method with its confirmatory tests and precautions Explain therapeutic importance of prepared Lepa kalpana, integration with Kayachikitsa and Panchakarma department along with its shelf life and packaging techniques.	PSY-MEC	DK	SH	L&G D	P-VIVA,P- EXAM	F&S	II	V-KC
CO2,CO3	Observe demonstration of formulation of Danta manjana	CAP	NK	KH	L&G D	PRN	F	II	
<b>Topic 5 5.Bheshaja Kalpana Practicals -II</b>									
CO1,CO2	Demonstrae the SoP involved in the drug selection, measuring the appropriate quantity of ingredients, preparation, observe the Physical Changes, Siddhi lakshana, enlisting the results, packing and storage of Ghrita Murchana and Taila Murchana	PSY-MEC	MK	D	PT,D	P-REC,P- EXAM,OSPE	F&S	II	
CO1,CO2	Demonstrae the SoP involved in the drug selection, measuring the appropriate quantity of ingredients, preparation, observe the Physical Changes, Siddhi lakshana, enlisting the results, packing and storage of Jatyadi Gritha/ Triphala Gritha/ Ksheera Shatphala Gritha/Phala Gritha,	PSY-MEC	MK	D	PT,D	P- EXAM,OSPE	F&S	II	
CO1,CO2	Demonstrae the SoP involved in the drug selection, measuring the appropriate quantity of ingredients, preparation, observe the Physical Changes, Siddhi lakshana, enlisting the results, packing and storage Ksheera Bala Taila/Kasisadi Taila/ Panchaguna Taila/ Arka Taila/Kutajasuryapaki taila	PSY-MEC	MK	SH	D	P- EXAM,OSPE	F&S	II	

CO1,CO2	Demonstrae the SoP involved in the drug selection, measuring the appropriate quantity of ingredients, preparation, observe the Physical Changes, Siddhi lakshana, enlisting the results, packing and storage Bhallataka Taila Patana/ Jayapala Taila Patana/Vishvamisra Kalpa Sneha	PSY- MEC	DK	KH	D	P-VIVA,P- EXAM,OSPE	F	II	
CO2	Demonstrae the SoP involved in the drug selection, measuring the appropriate quantity of ingredients, preparation, observe the Physical Changes, Siddhi lakshana, enlisting the results, packing and storage of Vasavaleha/ Chavana Prasha Avaleha/ Kushmanda Avaleha	PSY- MEC	MK	KH	D	P-VIVA,P- REC,P-EXAM	F&S	II	
CO2	Demonstrae the SoP involved in the drug selection, measuring the appropriate quantity of ingredients, preparation, observe the Physical Changes, Siddhi lakshana, enlisting the results, packing and storage of Nimbu Sharkara	PSY- MEC	NK	SH	D	P- EXAM,OSPE	F	II	
CO2	Demonstrae the SoP involved in the drug selection, measuring the appropriate quantity of ingredients, preparation, observe the Physical Changes, Siddhi lakshana, enlisting the results, packing and storage of Daruharidra Rasakriya	PSY- MEC	NK	SH	D	PRN	F	II	
CO2	Demonstrae the SoP involved in the drug selection, measuring the appropriate quantity of ingredients, preparation, observe the Physical Changes, Siddhi lakshana, enlisting the results, packing and storage of Haridra Khanda/ Narikela Khanada	PSY- MEC	MK	D	D	P-VIVA,P- EXAM,OSPE	F&S	II	
CO1	Demonstrae the SoP involved in the drug selection, measuring the appropriate quantity of ingredients, preparation, observe the	PSY- MEC	MK	KH	D	T- EW,P- VIVA	F&S	II	

	Physical Changes, Siddhi lakshana, enlisting the results, packing and storage of Kumaryasava/Drakshasava								
CO1,CO2	Demonstrate the SoP involved in the drug selection, measuring the appropriate quantity of ingredients, preparation, observe the Physical Changes, Siddhi lakshana, enlisting the results, packing and storage of Kutajarista/Ashokarishta/Takrarishta	PSY- MEC	MK	KH	D	P-VIVA	F&S	II	
CO2	. Demonstrate the SoP involved in the drug selection, measuring the appropriate quantity of ingredients, preparation, observe the Physical Changes, Siddhi lakshana, enlist the results, packing techniques and storage of unique formulations for e.g.Kanji/ Madushukta	CC	DK	KH	D	P-VIVA,COM	F&S	II	
<b>Topic 6 6.Dosage Forms &amp; Self-care Products Practicals</b>									
CO1,CO2,CO 6	Observe instruments used to prepare solid dosage form, liquid dosage form and Semisolid Dosage Form with one example for each , their method of preparation, ingredients used with their quantity and Quality control Parameters.	AFT- RES	DK	KH	W,PT, D	P-VIVA,CHK	F&S	III	
CO1,CO2,CO 6	Observe instruments used to prepare with one example for each , their method of preparation, ingredients used with their quantity and Quality control Parameters.of following self care products Hair care: Shampoo Body care :Soap, Perfume Face care : Face Pack/Talcum Powder Lip Care : Lip Balm, Lipstick Oral care: Tooth Paste/ Mouth Wash Foot Care: Foot Cream Hand Disinfectant : Hand Sanitizer Skin Care: Moisturizer, Sunscreen Lotion following self care products	PSY- ADT	DK	KH	L_VC ,PT,D	P-VIVA,P- EXAM,CHK	F&S	III	
<b>Topic 7 7.Field Visit/ Study Tour</b>									
CO1,CO3,CO 4,CO5,CO6	Field Visit - Record the storage condition of the raw / in-process	CK	DK	K	DIS,F V	M-POS,COM	F	III	

	/ finished goods prepared in the approved sections.								
CO1,CO3,CO4,CO5,CO6	Determine the role of various Yantras / machineries used in the approved sections of the Pharmacy	CK	DK	KH	DIS,ROLE	INT	F	III	
CO1,CO3,CO4,CO5,CO6	Differentiate between the ancient and contemporary methods of drug preparation.	CC	DK	K	DIS,FV	PRN	F	III	
CO1,CO3,CO4,CO5,CO6	Enlist the documents required in Batch Manufacturing of Ayurvedic medicines.	CK	NK	K	DIS	P-SUR	F	III	
CO1,CO3,CO4,CO5,CO6	Identify the role of Quality Control instruments and equipments in ensuring a quality Ayurvedic product.	CK	DK	K	L&PPT,DIS	DEB	F	III	
CO1,CO3,CO4,CO5,CO6	Appreciate the importance of Good Manufacturing Practices and Good Packaging Practices required in Ayurvedic Drug manufacturing.	AFT-VAL	DK	K	DIS	PRN,DEB	F	III	
CO1,CO3,CO4,CO5,CO6	Prepare own products as per prevalent FDA guidelines.	PSY-GUD	DK	D	L_VC,DIS	P-EXAM	F	III	
<b>Topic 8 8.Hospital IPD Practical</b>									
CO1,CO2,CO3,CO4	Review & Observe the case Sheets.	CC	NK	KH	DIS	P-SUR	F	III	V-KC, V-SH, V-PC, V-SH, L, V-S

									P,V- BL
CO1,CO2	Discuss for formulation prescription manner.	CC	DK	KH	L&G D	T-CS	F&S	III	V-KC
CO1,CO2,CO 3	Demonstrate & Explain prescription method.	CAP	DK	SH	CD	P-PS	F&S	III	V-KC
CO1,CO2,CO 4	Measure dose of prescribed drug.	CAP	MK	KH	PrBL	SP	F	III	
CO1,CO2,CO 3	Enlist Time, Duration, Pathya, Apathya while prescribing drugs.	CAP	DK	KH	L&G D	P-PRF	F	III	
CO4,CO5	value details and methodical writting of case records of hospital IPD patients	AFT- VAL	MK	KH	RLE	P-CASE	F	III	
<b>Topic 9 9. Drug Dispensing Practical</b>									
CO1,CO3	Assess the arrangement of Ayurvedic drugs according to nature and type in dispensing room or pharmacy.	CAP	NK	D	RLE	P-PRF	F	III	V-KC ,V-PC ,V-BL
CO1,CO3,CO 4	Assess practice of prescription processing and labelling of the drugs.	CE	DK	KH	PrBL	INT	F	III	
CO3,CO4	Determine and identify the cause of common errors occurred	CC	DK	KH	RLE	CL-PR	F	III	

	during dispensing of Ayurvedic drugs.								
CO2,CO4	Explain use of correct drug supply to the right patients, in the required dosage, quantities and clear drug information.	CAP	DK	SH	L&G D	PRN	F	III	V-KC ,V-BL
<b>Topic 10 10.Quality Control Practicals</b>									
CO2	Develop analytical skills for understanding Identity, Purity and Strength of raw materials and finished products as per the standard guideines of the Ayurvedic Pharmacopoeia of India.	CK	MK	KH	L&G D,BS, W,PT, D_L	P-VIVA	F	II	
CO2,CO5	Identify the geological description of minerals: physical parameters.	CK	DK	K	L_VC ,W,D _L,FV	P-ID	F&S	II	
CO2	Describe ayurvedic perspectives of quality control parameters applying for solid, semisolid and liquid dosage forms.	CAP	MK	SH	L&G D,TU T,DA	P-VIVA,Log book	F&S	II	
CO2,CO5	Demonstrate the calibration techniques used for Weighing Balance (chemical and physical), pH Meter, Hot Air Oven and Electric Muffle Furnace to ensure the accuracy of the instrument what it is intended to measure.	CC	DK	KH	D_L	P-VIVA,PRN	F	II	
CO2		CAP	MK	SH	PT,D	P-EXAM,Log	F	II	

	Demonstrate bulk density, loss on drying, total ash, pH and water soluble extractives of Churna.				A	book			
CO2	Perform the analytical tests of tablets/ vati/ gutika for hardness, uniformity of weight and friability.	AFT-CHR	MK	SH	PT,D A	P-EXAM,Log book	F&S	II	
CO2	Estimate specific gravity, alcohol content and total solids of Asava & Arishta.	AFT-CHR	MK	SH	PT	P-EXAM,P- PRF	F	II	
CO2,CO5	Determine iodine value, acid value and saponification value of oils / ghee.	CAP	MK	KH	D_L	P-VIVA	F&S	II	
CO2,CO3	Calculate the dose of various dosage forms and their dispensing methods.	CE	MK	SH	L&G D,PrB L,BL, RLE, D_L	P-SUR,P- CASE	F&S	II	
CO4,CO5	Appraise quality control procedures done for Ayurvedic formulations	AFT-VAL	DK	K	DIS	CL-PR	F	III	

**Table 4a: List of Practical**

S.No	Name of practical	Term	Activity	Practical hrs
1	1.Paribhasha concept basedPracticals	1	<p><b>A) Dravya Paribhasha-</b> Identification of drugs and their respective class (varga)</p> <p><b>B) Prakriya Paribhasha-</b></p> <p><b>1.Swedana:</b> Godanti Shodhana (A.F.I.-1,18:4 (Rasatarangini 11/238) Shankha Shodhana (A.F.I.-1,18:18(Rasatarangini 12/12/2) Kapardika shodhana (Rasatarangini 12/89) Guggulu Shodhana (Rasendra Sara Sangraha 1/386, Pg. 117</p> <p><b>2. Mardana:</b>Parada Samanya Shodhana (Ayurveda Prakasha 1/165)</p> <p><b>3. Dhalana :</b> Gandhaka Shodhana (A.F.I. 2 Parishishta - 2,9 Shodhana( Rasamrita 2, 3) Vanga Shodhana (A.F.I.-1,18:15 (Sharangadhara M.11/2) Yashada shodhana (Rasatarangini 19/99)</p> <p><b>4. Nirvapa:</b> Abhraka Shodhana (A.F.I.-1,18:1 (Rasatarangini 10/20) Tamra Shodhana (A.F.I.-1,18:5 (Ayurveda Prakasha 3/118)</p> <p><b>5. Nirjaleekarana :</b> Tankana Shodhana (A.F.I. 2 Parishishta -2,15 Shodhana ( Ayurveda Prakasha 2/244) Kankshi shodhana (A.F.I.-2, 14:3 (Ayurveda Prakasha 2 /258)</p> <p><b>6. Bhavana:</b> Hingula Shodhana (A.F.I. 2 Parishishta - 2 Shodhana ( Rasamruta 1/54)</p> <p><b>7. Bharjana:</b> Gairika Shodhana (A.F.I. 2 Parishishta - 2,11 Shodhana ( Rasaratna Samuchchaya 3/49) Hingu Shodhana (Bhavprakash Nighantu, Haritakyadi Varga, 1/101, Pg. 42)</p> <p><b>8. Nimajjana/Sthapana:</b> Vatsanabha shodhana (A.F.I. 2 Parishishta - 2,25 Shodhana ( Rasamrita parishishta 8:145)</p> <p>9. Jarana : Vanga Jaran (Ayurved Prakash 3/159) Vanga Bhasma (A.F.I.-1,18:15 (Rasamruta 3/94)</p> <p><b>10. Murchana:</b> Mugdha Rasa (Rasatarangini 6/9) Kajjali (A.F.I.- 1 Parishishta-1, Paribhasha 21 (Rasatarangini 2/27)</p> <p><b>11. Druti-</b> Gandhaka Druti(Rasa Ratna Samuchchaya 3/29)</p> <p><b>C) Pramanikarana Paribhasha-</b></p>	20

			<p><b>1) Bhasma Samanya Pareeksha</b> - Abhraka Bhasma (Ayurved Prakash 2/104) Shankha Bhasma (Rasaratnasamucchaya 8/26-30)</p> <p><b>2) Bhasma Vishesha Pareeksha:</b> Tamra Bhasma (Dadhi/ Nimbu Pariksha)- (Bhaishajya Kalpana Vigyan, Vd. Siddhinandan Mishra, Pg. 78)</p> <p><b>D) Namburi Phased Spot Test (NPST)</b></p>	
2	2.Panchavidha Kashaya Kalpana & their Upakalpana Practicals	1	<p><b>1.Swarasa Kalpana:</b>Tulasi swarasa (Sharangdhar Samhita Madhyam Khanda 1/2),Ardraka Swarasa (Sharangdhar Samhita Madhyam Khanda 1/2), Vasaputapaka Swarasa (Sharangdhar Samhita Madhyam Khanda 1/22-23 &amp; 34)</p> <p><b>2. Kalka Kalpana:</b> Nimba kalka (Sharangdhar Samhita Madhyam Khanda 5/1),Rasona Kalka (Sharangdhar Samhita Madhyam Khanda 5/1)</p> <p><b>3. Kwatha Kalpana:</b> Punarnavashtaka kwatha (Sharangdhar Samhita Madhyam Khanda 2/1-2, 78-79), Rasna Saptaka Kwatha (Sharangdhar Samhita Madhyam Khanda 2/1-2, 88-89)</p> <p><b>4. Hima Kalpana:</b>Dhanyaka Hima (Sharangdhar Samhita Madhyam Khanda 4/1, 7-8),Sarivadi Hima</p> <p><b>5. Phanta Kalpana:</b>Panchakola phanta (Sharangdhar Samhita Madhyam Khanda 3/1-2),Yashtimadhu phanta (AFI 1 Parishishta – 1,2/5 Paribhasha)</p> <p><b>6. Churna Kalpana:</b>Sitopaladi churna (AFI Part 1, Vol. 1 A, Pg. 348), Hingwastaka Churna (AFI Part 1, Vol. 1 A, Pg. 353)</p> <p><b>7. Pramathya:</b>Mustadi Pramathya (Sharangdhar Samhita Madhyam Khanda 2/ 152-153)</p> <p><b>8. Paneeya Kalpana:</b> Shadanga Paneeya (Sharangdhar Samhita Madhyam Khanda 2/ 159-160)</p> <p><b>9. Mantha Kalpana:</b> Kharjuradi Mantha (Sharangdhar Samhita Madhyam Khanda 3/9-10)</p> <p><b>10. Panaka Kalpana:</b> Chinchā Panaka (Bhaishajya Ratnavali Arochaka 18/34-35), Chandana Panaka</p> <p><b>11. Ksheerapaka Kalpana:</b> (Sharangdhar</p>	24

			<p>Samhita Madhyam Khanda 2/175-176), Arjuna Ksheera Paka - Chakradatta, Lashuna Ksheerapaka - Charaka Chikitsasthana 5/95</p> <p><b>12. Udaka Kalpana :</b> Tandulodaka (Sharangdhar Samhita Madhyam Khanda 1/28)</p> <p>Note: In each category if more than 1 practical are there any one or all may be performed.</p>	
3	3.Rasa Dravya Aushadhi Nirmana Practicals	1	<p><b>1. Marana :</b> Vanga Bhasma (A.F.I. - I, Bhasma, 18:15, Rasatarangini Taranga) / Sankha Bhasma:A.F.I. - I, Bhasma, 18:18, Rasatarangini taranga 12/2)</p> <p><b>2. Kharaliyarasayana :</b> Ananda Bhairava Rasa(A.F.I. - I, Rasayoga, 20:3, Rasendrasarasangraha Jwaradhikara 2/103-105) /, Tribhuvana Keerti rasa(A.F.I. - I, Rasayoga, 20:20, rasamrita 9/80-81)</p> <p><b>3. Parpati :</b> Rasa Parpati(A.F.I. - I, Parpati, 16:3, Bhaishajyaratnavali grahanirogadhikara 414-416&amp;436-440), Sweta Parpati(A.F.I. - II, Parpati, 12:2, siddhyogsangraha ashmarimutrakruchhaadhikara)</p> <p><b>4. Kupipakwarasayana</b> : Rasasindhura(A.F.I. - I, Kupipakwa Rasayana, 15:6, rasatarangini taranga 6/162-176)</p> <p><b>5.Pottalirasayana :</b> Rasagarbhapottali (Rasayogsagar dwitiyabhaga pottali rahasya page 582)</p> <p><b>6. Rasa :</b> Laghusutsekhararasa (Rasatantrasara avum siddhaprayogsangraha part-1, kharaliya rasayana page 274)</p> <p><b>7. Loha:</b> Navayasa loha(A.F.I. - II, lauha, 17:2, Charaka samhita chi.16/70-71)/, Saptamrita loha(A.F.I. - I, lauha, 21:11, Bhaishajyaratnavali shoolrogadhikara 83-84)</p>	20
4	4.Bheshaja Kalpana Practicals -I	2	<p><b>1. Arka Kalpana:</b> Yavani Arka (API, Part 2, Vol. 3, Pg. 24) Gulab Arka (API, Part 2, Vol. 3, Pg. 4) Misreya Arka (AFI, Part 1, Vol. 1 A, Pg. 106)</p>	24

**2. Vati Kalpana:**

Agni Tundi Vati (AFI, Part 1, Vol. 1 A, Pg. 497)

Chitrakadi Vati (API, Part 2, Vol. 3, Pg. 107)

Lavangadi Vati (API, Part 2, Vol. 3, Pg. 116)

**3. Guggulu Kalpana:**

Triphala Guggulu (API, Part 2, Vol. 2, Pg. 134)

Kaishor Guggulu (API, Part 2, Vol. 1, Pg. 94)

**4. Satva Kalpana:**

Amruta Satva (AFI, Part 1, Vol. 1 A, Pg. 560)

Ardraka Satwa

**5. Varti Kalpana:**

Phala Varti - (Bhaishajya Ratnavali 31/10)

Chandrodaya Varti (AFI, Part 1, Vol. 1 A, Pg. 553)

**6. Lavana Kalpana:**

Arka Lavana (API, Part 2, Vol. 1, Pg. 103)

Narikela Lavana (AFI, Part 1, Vol. 1 A, Pg. 473)

**7. Kshara Kalpana:**

Apamarga Kshara (AFI, Part 1, Vol. 1 A, Pg. 466)

Kshara Sutra Preparation (AFI Part 3, Pg 213)

**8. Masi Kalpana:**

Triphala Masi (Rasendra Sara Sangraha Upadamsha Chikitsa)

Mayura Piccha Masi (Yogratnakar , Chhardiroga, Pg. 453)

**9. Upanaha:**

Atasi Upanaha

**10. Manjana:**

Dashanasamskara churna (Bhaishajya Ratnavali Mukharog, 61/97-98)

**11. Malahara Kalpana:**

Siktha Taila (Rasatarangini 4/59)

Sarjarasa Malahara (Rasatantrasar & Siddha Prayog Sangrah Part 1, Pg. 849)

Gandhaka Malahara (Rastarangini 8/63-85)

**12. Lepa Kalpana:**

Dashanga Lepa (AFI, Part 1, Vol. 1 A, Pg.

			487) Shatadhouta Ghrita (Sushrut Samhita Uttartantra 39/283)	
5	5.BheshajaKalpana Practicals -II	2	<p><b>1. Sneha Kalpana:</b> Ghrita Murchana (Bhaishajya Ratnavali, Jwaradhikar, 1285), Taila Murchana (Bhaishajya Ratnavali, Jwaradhikar, 1286-1287)</p> <p><b>2. Ghrita Kalpana:</b> Triphala Ghrita (API, Part 2, Vol. 1, Pg. 90), Amruta Ghrita (Bhaishajya Ratnavali Vatarakta 27/126)</p> <p><b>3. Taila Kalpana:</b> Ksheera Bala Taila (API, Part 2, Vol. 1, Pg. 124), Arka Taila (Sharangdhar Samhita Madhyam Khanda 9/148)</p> <p><b>4. Taila Patana:</b> Bhallataka Taila Patana (Sushrut Samhita Chikitsa Sthana 1/92)</p> <p><b>5. Avaleha Kalpana:</b> Vasavaleha (API, Part 2, Vol. 1, Pg. 32), Kushmanda Avaleha (AFI, Part 1, Vol. 1 A, Pg. 35)</p> <p><b>6. Sharkara Kalpana:</b> Nimbu Sharkara (Rasatantrasara &amp; Siddhaprayog Sangraha I / Paka Avaleha)</p> <p><b>7. Ghana:</b> Kutaja Ghana (AFI Part 2, Pg 175), Guduchi Ghana (Ayurved Prakash 3)</p> <p><b>8. Khanda Kalpana:</b> Haridra Khanda (Bhaishajya Ratnavali Udarda, Shitapitta), Narikela Khanda (AFI, Part 1, Vol. 1 A, Pg. 41)</p> <p><b>9. Asava :</b> Lohasava (Sharangdhar Samhita, Madhyam Khanda 10/ 34-38), Drakshasava (AFI Part 2, 1:1)</p> <p><b>10. Arishta:</b> Arjunarishta (Bhaishajya Ratnavali Hridrog). Takrarishta (Charak Samhita Chikitsa 15 / 120)</p> <p><b>11. Shukta Kalpana:</b> Kanji (Sharangdhar Samhita, Madhyam Khanda 10/ 12), Madushukta (Bhaishajya Ratnavali Karnaroga 62 /23-24)</p>	22
6	6.Dosage Forms & Self-care Products Practical	2	<p><b>1. Solid dosage forms:</b></p> <ul style="list-style-type: none"> <li>◆ Granules/ Lozenges (Pharmaceutics by R.M. Mehta)</li> </ul>	22

**2. Liquid Dosage forms:**

- ◆ Syrup/Suspension/Emulsion/Liniment (Pharmaceutics by R.M. Mehta)

**3. Semisolid Dosage:**

- ◆ Cream/Gel/Ointment/Pain Balm (Pharmaceutics by R.M. Mehta)

**4. Hair Care:**

- ◆ Shampoo (A Handbook of Cosmetics by B M Mithal & R N Saha 8th chapter)

**5. Body Care:**

- ◆ Soap/Perfume (Pharmaceutics by R.M. Mehta)

**6. Face Care:**

- ◆ Face pack / Talcum Powder (A Handbook of Cosmetics by B M Mithal & R N Saha 3rd chapter)

**7. Lip Care:**

- ◆ Lip Balm, Lipstick (A Handbook of Cosmetics by B M Mithal & R N Saha 4th chapter)

**8. Oral Care:**

- ◆ Tooth Paste/ Mouth Wash (A Handbook of Cosmetics by B M Mithal & R N Saha 19th & 20th chapter)

**9. Foot Care:**

			<ul style="list-style-type: none"> <li>◆ Foot Cream (A Handbook of Cosmetics by B M Mithal &amp; R N Saha 5th chapter)</li> </ul> <p><b>10. Hand Disinfectant:</b></p> <ul style="list-style-type: none"> <li>◆ Hand Sanitizer ((Pharmaceutics by R.M. Mehta)</li> </ul> <p><b>11. Skin Care:</b></p> <ul style="list-style-type: none"> <li>◆ Moisturizer/Sunscreen Lotion (A Handbook of Cosmetics by B M Mithal &amp; R N Saha 6th chapter)</li> </ul> <p><b>Note: In each category if more than 1 practical are there any one or all may be performed.</b></p>	
7	7.Field Visit/ Study Tour	3	<p>GMP Certified Pharmacy Visit X  2 Pharmacy (1 classical formulations and 1 Proprietary formulations/Having both Manufacturing facility)  NABL Accredited drug Testing Laboratory/Research and Development Unit  Combined out campus/ Field visit may be planned wherever feasible</p>	24
8	8.Hospital IPD Practical	3	<p>Hospital IPD Practical: Formulation prescription, method administration, dose, time, duration, Pathya, Apathya advised - Minimum 10 case sheet record of different dosage forms prescribed for particular case/ disease</p>	10
9	9. DrugDispensing Practical	3	<p>Drug Dispensing practical for method of Dispensing different dosage forms, their packing for OPD and IPD patients</p>	6
10	10.Quality Control Practicals	2	<ul style="list-style-type: none"> <li>◆ <b>1 Minerals &amp; Metals</b>  Mineral Identification <ul style="list-style-type: none"> <li>• Physical form – Crystal and</li> </ul> </li> </ul>	38

Amorphous

- Hardness on Moh's scale
- Brittleness test
- Fracture and Cleavage
- Streak Test
- Luster

## **2 Plant Material**

- Estimation of Foreign matter
- Specific Gravity
- Refractive Index

## **3. Prepared Dosage forms**

### A. Solid Dosage Forms

Rasaushadhi

- Bhasma and Pishti Pariksha
- Determination of Moisture content

### **4. Kashtoushadhi**

a. Churna

- Particle Size
- Bulk Density
- Determination of Ash Value – Total Water Soluble/Acid Insoluble ash

b. Tablets

- Uniformity in Weight and Size
- Tablet Hardness

### B. Semisolid Dosage forms

- Moisture Content
- Microbial Load

### C. Liquid Dosage Forms

- PH Value
- Refractive Index
- Specific Gravity
- Saponification Value
- Iodine Value
- Acid Value
- Viscosity

#### **Note :**

- All Practical should be performed in Accordance of Methods published in protocol for testing of ASU Medicines and

			Laboratory Guide for Analysis of Ayurveda & Siddha formulations published by Dept of AYUSH, GOI • Minimum 5 Analytical Practicals are to be written in Practical Record or In Journal	
<b>Total Hr</b>				<b>210</b>

### Activity

CO	Topic name	Activity Details	Hours
CO1,CO2	Paper I -1. Chronological development of Ayurvediya Aushadhi Nirmana	<p><b>Objective</b> - To orient the students regarding chronological development of Rasashastra &amp; Bhaishajya Kalpana</p> <p>After completing this activity, students will be able to:</p> <ul style="list-style-type: none"> <li>• Describe the history of Rasashastra &amp; Bhaishajya Kalpana.</li> <li>• Identify the different types of metal-based medicines.</li> <li>• Explain the benefits of metal-based medicines.</li> <li>• Discuss the safety of metal-based medicines.</li> </ul> <p><b>Methodology</b></p> <p>1) All students are to be assigned to collect and compile information on chronological</p>	1

		<p>development of Rasashastra &amp; Bhaishajya Kalpana from different books, including Indians are the first, who introduced metal based medicines.</p> <p>2) Ask to Submit the assignment for signature</p>	
CO1,CO2	Paper I - 2. a) Paribhasha(Terminology)	<p><b>Rasadravya</b></p> <p><b>Objective</b> - To encourage the students to remember rasadravyas and their classification through games</p> <p><b>Activity</b></p> <p><b>Group I</b> -In one big tray all Rasa - Dravyas are to be kept together.</p> <p>Timer to be started.</p> <p>In a stipulated time, student has to collect drugs belonging to the particular class (rasadravya varga) allotted to him /her and create a heap in order This can be given in a group.</p> <p><b>Group 2.-</b>Word puzzle</p> <p>Various word puzzles can be created for making the students to remember names of rasadravyas along with their class.</p>	1
CO1,CO3	Paper I -2. b)Paribhasha	<p><b>Mana Paribhasha Objective</b> -</p> <p>After completing this activity, students will be able to:</p>	2

		<ul style="list-style-type: none"> <li>• weigh dry &amp; wet drugs</li> <li>• Understand the % of weight loss after drying different variety of the wet drugs</li> <li>• Enjoy (game based) learning about rasadravyas and their classification.</li> </ul> <p><b>Methodology-</b></p> <p>whole batch need to be divided into various groups. (4-5 students in each group).</p> <p>Each group need to make a chart/ task as per the instructions written on the paper they pick up.</p> <p>1) Collect seeds mentioned in the classical mana paribhasha and prepare chart describing details of mana</p> <p>2) Measure by weight the given drug. (Guduchi Bharad, Amalaki Bharad, Haritaki Churna, Nimbapatra churna, whole maricha all will be kept having same weight) Now observe how much volume these drugs have.</p> <p>3) Collect fresh Guduchi.500gm or any fresh drugs leaf, bark, flower etc. Keep on observing the reduction in the weight of the sample till it dries completely. Record weight every day. Discussion about observation will be done.</p> <p>Do this same for Vasa, Shatavari, Amalaki also. Compare and assess the results. Every year drugs need to be changed</p>	
CO1,CO2	Paper I -2. c)Paribhasha Terminology	<b>Shodhana</b>	1

**Objective** - To enhance ability of the students to recall their knowledge about rasadravyas and their procedures

**At the end of Activity, the students should be able to**

Recall the different shodhana methods that are used for rasadravyas.

- Identify the different yantras that are used for shodhana.
- Understand the different procedures that are used for shodhana.
- Correctly answer questions about shodhana methods, yantras, and procedures.
- Explain the different steps involved in the shodhana process.
- Discuss the benefits of shodhana for rasadravyas.

**Activity-**

Rapid Fire quiz online

Questions will be framed based on the knowledge of Yantra, Dravya, Method used for that drug etc and rapid fire round will be carried out. This can be done online

Questions for example-

- 1) Vanga Shodhan is done by which method?
- 2) Which yantra is used for Shankha Shodhan?

		3) LashunaSvarasa bhavana is used for shodhana of which drug?	
CO1,CO2	<b>Paper I- 3.Adharabhuta Siddhanta (Fundamental Principles)</b>	<p><b>Objective :</b> To understand the concept with the help of classical shloka &amp; application of fundamental principles of Ayurvediya aushadhi nirmana.</p> <p><b>After completing this activity, students will be able to:</b></p> <ul style="list-style-type: none"> <li>◆ Identify the different fundamental principles of Ayurvediya Aushadhi Nirmana.</li> <li>◆ Illustrate how these principles are applied in the preparation of Ayurvedic formulations.</li> <li>◆ Interpret classical shlokas related to the application of fundamental principles using Panchavayavavakya.</li> <li>◆ Demonstrate the skill of interpreting classical shlokas using Panchavayavavakya.</li> <li>◆ Students are to be divided into 5 groups</li> <li>◆ Each group need to be given 2 Shlokas from particular classical text book</li> </ul> <p><b>Method of Activity:</b></p> <ol style="list-style-type: none"> <li>1. The students are divided into groups &amp; each group need to be allotted 1 to 2 shlokas from classics related to application of fundamental principles.</li> <li>2. To develop skill of interpretation of shloka by applying Panchavayava vakya i.e Pratignya,</li> </ol>	2

Hetu, Udaharana, Upanaya and nigamana

3. They will understand application of basic fundamentals.

4. Every year different sets of shlokas are to be given. Repetition of shlokas is not acceptable

**Discussion:**

After completion of task, discussion need to be held with teacher and students.

Teacher in charge will finally conclude the discussion on application of fundamental principles and understanding the shloka by applying Panchavayavakya.

**Optional Activity** Activity - 1 Title : Search references from classical text

Group : Students should be divided in to 10 groups.

Reference Text : 1.Chakradatta 2.Yogaratnakara  
3.Bhavaprakasha 4.Sarangadhara

1GP : DravyaSamgraha method

2 GP : Collection Time

3 Gp :Collection Part

4 GP : Examples of Samskara

5 GP :Collection Nakshatra

6 GP :Pranija dravya partcollection

7 GP :Duplication Yoga

8 GP : Namakarana on Mana/Number of Dravya

9 GP : Saveeryata Avadhi

10 GP : Anupana in classical Yoga

CO1,CO5	<p><b>Paper I</b>  <b>-4.Yantropakaranani - I</b>  <b>(Equipments and machineries )</b></p>	<p><b>Objectives:-</b></p> <p>After completing this activity, students will be able to:</p> <ul style="list-style-type: none"> <li>• Identify the different yantras that are used in the preparation of Ayurvedic formulations.</li> <li>• interpret the different procedures of drug preparation that use yantras.</li> <li>• Collect information on different yantras from classical text books.</li> <li>• Present their findings in a clear and concise way.</li> </ul> <p><b>Activity</b></p> <ul style="list-style-type: none"> <li>◆ Students need to be divided into 4 groups (15 to 25 students in each group)</li> <li>◆ Each group need to be given one reference book</li> <li>◆ They have to collect information on different yantras explained /used for different procedures of drug preparation from that book.</li> <li>◆ Books like Ananda kanda, Rasa Tarangini, Rasa Ratna Samuchyaya, Rasendra Sara Sangraha, Parada Samhita etc can be given</li> <li>◆ Every year digfferent books are to be given.</li> <li>◆ Each Group has to present/ Submit assignment on total no of Yantras mentioned, their different uses, Structure/ Picture etc</li> </ul> <p><b>Discussion:</b> In charge teacher will comment on particular group performance and study matter</p>	4
---------	---	--	---

		collected.	
CO1,CO5	<b>Paper I</b> <b>-5.Yantropakaranani - II</b> <b>(Equipments and machineries )</b>	<p><b>Objective:-</b></p> <p>After completing this activity, students will be able to:</p> <ul style="list-style-type: none"> <li>• Prepare a video/ppt demonstration on Musha, Koshthi and Puta.</li> <li>• Model the preparation of Musha, Koshti and Puta.</li> <li>• Collect literature on Musha, Koshti and Puta from classical text books as per different authors.</li> <li>• Identify modern/presently available Yantras based on the classical concept of Musha, Koshti and Puta.</li> </ul> <p><b>Activity</b></p> <p><b>Students are to be divided into 4 groups</b></p> <p><b>Group I-</b> is allotted to prepare video/ppt demonstration</p> <p><b>Group II-</b>Model preparation of Musha, Koshthi and Puta</p> <p><b>Group III-</b> Literature collection from classical text books as per different authors on Musha, Koshthi and Puta</p> <p><b>Group IV -</b> Modern / Presently available Yantras based on the classical concept of our yantra, Musha, Koshthi and Puta</p> <p><b>Note:</b> Every year different yantras/ instruments need to be given</p>	4

		<p><b>Discussion and Conclusion:</b> Each group has to present their activity followed by teacher's remark</p>	
CO1,CO2	<p><b>Paper I- 6. Kalpana Nirmana I(Primary &amp; Secondary dosage forms)</b></p>	<p><b>Objective:-</b></p> <p><b>After completing this activity, students will be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify the different dosage forms that are commonly used in Ayurveda.</li> <li>• Appraise the different methods that are used to prepare these dosage forms.</li> <li>• Document the different activities that are performed at home and in communities/societies related to the preparation of these dosage forms.</li> <li>• Prepare two dosage forms in the laboratory from their observation of home preparations.</li> </ul> <p><b>Methodology:</b></p> <p>1. Every student will document different activities performed at home and in societies/communities related to the preparation of different dosage forms which come under Panchavidha kashaya kalpana , Upakalpana and their household applications.( for example-fruit juices belong to svarasa kalpana, chutney to kalka etc.)</p> <p>Discussion:</p> <p>1.The students will be assessed based on their documentation</p> <p>2. A group containing 10 number of students will be asked to collect the raw materials and prepare</p>	4

		<p>minimum two numbers of dosage forms in the laboratory from their observation of home preparations.</p> <p>3. Finally an interactive session will be held to discuss the learning experiences and to clear doubts</p>	
CO5	Paper I- 7 & 11. Kalpana Nirmana II &III (Method of preparation of different dosage forms & dietary supplements)	<p><b>objective: -</b></p> <p><b>After completing this activity, students will be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify the different dosage forms that are commonly used in Ayurveda.</li> <li>• Appraise the different methods that are used to prepare these dosage forms.</li> <li>• Document the different activities researches related to the preparation of these dosage forms.</li> </ul> <p><b>Methodology: -</b></p> <p>1. Students need to be divided into 4 different groups.</p> <p>2. <b>Group 1</b> - Directed to collect information on different varieties of proprietary Ayurvedic and contemporary solid dosage forms available in the market through e-resources (e.g. tablets, capsules, lozenges etc)</p> <p>3. <b>Group 2</b>- Directed to collect information on different varieties of proprietary Ayurvedic and contemporary Liquid dosage forms available in the market through e-resources (e.g. Oils, syrups, suspensions etc)</p> <p>4. <b>Group 3</b> - Directed to collect information on</p>	10

		<p>different varieties of proprietary Ayurvedic and contemporary semisolid dosage forms available in the market through e-resources (e.g. ointments, gels, jellies etc)</p> <p><b>5.Group 4</b> - Directed to collect research articles published on modification of classical Ayurvedic dosage forms through e-resources on solid, liquid and semisolid dosage forms.</p> <p>Discussion: -Finally Students have to present the collected information in the form of power point presentation and submit the assignment.</p> <p>In charge teacher has to conclude by stressing upon scope for research and development in modification of classical dosage forms.</p> <p>The mentioned activity is an example.</p> <p><b>Note:</b> Every year different formulations/ dosage forms/ activity need to be given.</p>

Finally, teacher have to give concluding remark on debate.</p>	
CO3	Paper I- 10.Rasa Dravya Parichaya - III NK	<p><b>Objectives :-</b></p> <p><b>After completing this activity, students will be able to:</b></p> <ul style="list-style-type: none"> <li>• Document the different rasa dravyas that are considered to be desirable to know.</li> <li>• Gather information about each rasa dravya, such as its Sanskrit name, English name, synonyms, botanical name, physical appearance,</li> </ul>	6

taste, and medicinal properties.

- Present the findings in a clear and concise way.
- Debate and justify that their drug is more superior than other drugs in the same group. To compile, understand and document basic information about certain Rasa Darvyas. (this activity is for nice to know dravyas)

**Methodology:**

1. Students are to be divided into 4 groups
2. The students will be instructed to refer and collect photos, general information, medicinal uses of given dravyas from classical text books and e resources.
3. Each group is to be given 4 drugs.
4. The mentioned activity is an example. Every year different drugs/ activity need to be given.

**Discussion:**

After the completion of compilation of nice to know Rasa Dravya, each group will present short review of their findings, in front of class and they have to debate and justify that their drugs are more superior than other drugs. Finally, teacher have to give concluding remark on debate.

Note: Every year different drugs are to be given.

CO1,CO2,CO3,CO5	<b>Paper I - 12.Chaturvidha Rasayana -MK</b>	<p><b>Objectives:-</b></p> <ul style="list-style-type: none"> <li>• Collect information on different Chaturvidha Rasa formulations.</li> <li>• Identify the different manufacturing companies that produce Chaturvidha Rasa formulations.</li> <li>• appraise the different classical references that are used to manufacture Chaturvidha Rasa formulations.</li> <li>• Compare the MRP (prices) of different Chaturvidha Rasa formulations.</li> <li>• Identify the indications for different Chaturvidha Rasa formulations.</li> <li>• Analyze the different Chaturvidha Rasa formulations and develop critical thinking skills.</li> <li>• Communicate their findings effectively to the class.</li> </ul> <p><b>Method of Activity: (Survey)</b></p> <p><b>Students are to be divided into 5 groups</b></p> <p><b>1. Group 5</b> - Need to be assigned to collect varieties of kharaliya rasayanas containing suvarna bhasma as one ingredient in it, manufacturing companies, classical references they follow to manufacture it, MRP (prices) and indications</p> <p><b>6.</b> The mentioned activity is an example. Every year different formulations/ activity need to be given.</p> <p><b>Discussion:</b> All groups have to present their assignment and finally in charge teacher has to give conclusion of importance of swarnakalpa. rationality behind following different references and probable variation in their cost.</p>	
CO1	Paper I- 13.Current and Emerging Trends in Ayurvedic pharmaceuticals	<p><b>Objectives: -</b></p> <ul style="list-style-type: none"> <li>• Identify the current and emerging trends in Ayurvedic Pharmaceuticals.</li> <li>• Analyze the potential impact of these trends on the future of Ayurvedic Pharmaceuticals.</li> <li>• Review and record the commonly used modified dosage forms of Ayurvedic</li> </ul>	4

		<p>formulations.</p> <ul style="list-style-type: none"> <li>• Evaluate the potential of these modified dosage forms to improve the efficacy and safety of Ayurvedic formulations.</li> </ul> <p><b>Method of Activity</b></p> <p>Students need to be divided into 3 groups</p> <p><b>Group 1.</b> List the current and emerging trends in Ayurvedic Pharmaceuticals viz. cosmetics, Nutraceuticals, Herbaceuticals</p> <p><b>Group 2.</b> Review and record the commonly used modified dosage forms of Ayurvedic formulations</p> <p><b>Group 3.</b> Generate a folder on computer about relevant research articles on modified Ayurvedic dosage forms</p> <p><b>Discussion :</b> All the above groups will present their assignment with their team and Exchange of Knowledge will take place followed by conclusion by faculty in charge</p>	
CO4	Paper I - 14. GMP & Drug and Cosmetic act 1940 and rules 1945	<p><b>Objective:</b></p> <p><b>After completing this activity, students will be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify misleading advertisements under the Drug &amp; Magic Remedies objectionable advertisements Act, 1954.</li> <li>• Analyze misleading advertisements and identify the specific provisions of the Act that are being violated.</li> </ul>	4

		<ul style="list-style-type: none"> <li>• Communicate their findings in a clear and concise way.</li> </ul> <p><b>Methodology: -</b></p> <p><b>Students are to be divided into 5 students in each group</b></p> <p>1. Each group need to report two misleading advertisements under Drug &amp; Magic Remedies - objectionable advertisements Act, 1954 advertising through TV channels, print media or electronic media etc.</p> <p>2. The students will ask to submit details of objectionable advertisements in the prescribed format.</p> <p><b>Discussion: -</b></p> <p>After the submission of reports, the students will be asked to present and an interaction will be held between students and the concerned teacher (s) to understand the act &amp; rules of objectionable advertisements as a learning experience.</p>	
CO1	Paper II -1. Aushadhi Prayoga Vigyana	<p><b>Objective:</b></p> <p><b>After completing this activity, students will be able to:</b></p> <ul style="list-style-type: none"> <li>• Understand the concept of Prashasta Bheshaja lakshana.</li> <li>• Identify the different aspects of Prashasta Bheshaja lakshana, such as bahu kalpam, bahugunam, and sampannam.</li> </ul>	2

		<ul style="list-style-type: none"> <li>• Gather information about a given drug/formulation and justify whether it is a Prashasta Bhesaja.</li> <li>• Communicate their findings in a clear and concise way.</li> </ul> <p><b>Method of Activity</b></p> <p>Students will be divided in Groups consisting of 10 Students in each group</p> <p>each group will be given one drug/Formulation</p> <p>They have to search information about Prashasta bhesaja on following aspects-</p> <ol style="list-style-type: none"> <li>1.Bahu Kalpam</li> <li>2.Bahugunam</li> <li>3.Sampannam</li> </ol> <p>justify that the drug which they are allotted drug/formulation</p> <p>Each team will present their Justification followed by conclusion by designated faculty.</p>	
CO1,CO3	<b>Paper II- 2.Single drug (Herbal &amp; Mineral)</b>	<p><b>Objective:</b></p> <p><b>After completing this activity, students will be able to demonstrate their knowledge of herbal and mineral drugs by:</b></p> <ul style="list-style-type: none"> <li>• Identifying and differentiating between</li> </ul>	2

different types of herbal and mineral drugs, with at least 5 examples of each.

- Understanding the different formulations of herbal and mineral drugs, with at least 3 examples of each formulation.
- Learning about the different indications for herbal and mineral drugs, with at least 3 examples of each indication.
- Learning about the different anupanas that can be used with herbal and mineral drugs, with at least 3 examples of each anupana.
- Understanding the importance of pathyaapatya, sevana kala, and saveeryatavadhi in the administration of herbal and mineral drugs.
- Communicating their findings in a clear and concise way, including a presentation to the class that is clear, concise, and answers questions about the drugs.

#### **Method of Activity**

1. Students need to be divided into groups as per convenience
2. Each group need to be assigned with one herbal or one mineral drug or from both categories
3. Advised to collect information on assigned single drug/drugs variety of formulations, different indications when given in different form, with different anupana, Pathyaapatya, sevana kala, saveeryatavadhi and research updates and clinical evidences for each of the formulations
4. Every year different drugs are to be allotted to avoid repetition.

CO1,CO2,CO3	<p><b>Paper II -3.Single Drug (Bhasma, Shuudha &amp; Pishti)- Mk</b></p>	<p><b>Objective</b></p> <p><b>After completing this activity, students will be able to demonstrate their knowledge of market research by:</b></p> <ul style="list-style-type: none"> <li>• Conducting a market survey of one or two bhasmas in a particular city.</li> <li>• Collecting and documenting information about the market demand for the bhasma, such as the price, the dosage, and the frequency of use.</li> <li>• Analyzing the data collected to determine the market trends for the bhasma.</li> <li>• Communicating their findings in a clear and concise way, including a presentation to the class.</li> </ul> <p><b>Method of Activity:</b></p> <ol style="list-style-type: none"> <li>1.The students instructed to visit Ayurvedic drug store and collect information as given in the format.</li> <li>2.Students need to be divided into 4 to 5 groups. Each group need to be given 1 to 2 drugs. (Every year different drugs are to be allotted to avoid repetition.)</li> <li>3.Each group has to visit one to two Ayurvedic drug stores. Number of stores can be increased based on number of drug stores in the city or around the city.( based on information of online survey )</li> </ol> <p>After collecting information students have to submit survey forms to department</p>	6

CO1,CO2	Paper II- 4. Aushadhi Kalpa-I(Compound Formulations)	<p><b>Horizontal Integration Activity with Department of Agada Tantra Objective</b></p> <p><b>After completing this activity,</b></p> <ul style="list-style-type: none"> <li>• Students will be able to demonstrate their knowledge of the preparation and uses of agadas by:</li> <li>• Preparing five different agadas under the guidance of Rasashastra &amp; Bk Dept faculty..</li> <li>• Presenting their findings on the ingredients, method of preparation, uses, dosage, anupana, and mode of action of the agadas.</li> <li>• Communicating the utility of the agadas in different conditions, research updates with case studies, and dosage, anupana, and duration of agada kalpa prayoga.</li> </ul> <p><b>Method of Activity</b></p> <p><b>Students will be divided into 5 groups</b></p> <p>Each group will get hands on training to prepare one peculiar agada (mentioned in following list) and faculty from Agada Tantra department will give information about its utility in different Visha Laxana/or Stages of visha dushta.All details about agada kalpa prayoga viz.Dosage, Anupana, Duration will be discussed -2hrs</p> <p>Team 1: Bilavdi Agada</p> <p>Team 2: Dooshivishari Agada</p> <p>Team 3: Dashanga Agada</p> <p>Team 4: Murvadi Agada</p> <p>Team 5: Pancha Shireesha Agada</p> <p>Presentation will be done by all Teams on</p>	4
---------	--	--	---

		<p>Ingredients, Method of Preparation, Video/ Photos of ingredients, preparation, uses, dosage, Anupana</p> <p>Every year different topics are to be selected for integrated activity. Repetition should be avoided.</p> <p>Discussion will be done on mode of action, utility of above prepared Agadas in different conditions, Research updates with Case studies by Agada Tantra Faculty</p>	
CO3	<p><b>Paper II - 5. Aushadhi Kalpa - II(Compound drugs/ formulations)</b></p>	<p><b>Objective</b></p> <p><b>After completing this activity, students will be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify the different types of research updates and clinical evidences that are available for the formulations listed in the syllabus Aushadhi Kalpa - II(Compound drugs/ formulations).</li> <li>• Collect and compile research updates and clinical evidences for the formulations assigned to them.</li> <li>• Review the research updates and clinical evidences to determine their relevance and significance.</li> <li>• Communicate their findings in a clear and concise way.</li> </ul> <p><b>Methodology of Activity :</b></p> <ol style="list-style-type: none"> <li>1.Students are to be divided into 5 to 6 groups</li> <li>2.Each group is to be assigned 2 to 3 formulations in the syllabus.</li> </ol>	2

		<p>3. Groups are instructed to collect Research updates and clinical evidences for formulations assigned to them</p> <p>4. Every year different formulations are to be allotted to avoid repetition.</p> <p><b>Submission of Assignment:</b></p> <p>After the completion of compilation groups have to submit the assignment for correction.</p>	
CO4	Paper II - 6 Dosage forms & cosmetic products Paper II- 7. Nutraceuticals	<p><b>objective</b></p> <p><b>After completing this activity, students will be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify the different types of cosmetic and nutraceutical products.</li> <li>• Understand the legal and regulatory requirements for these products.</li> <li>• Research the market for these products.</li> <li>• Analyze the quality control tests that are recommended for these products.</li> <li>• Prepare a report/assignment on the selected products.</li> <li>• Communicate their findings in a clear and concise way.</li> <li>• Answer questions about their findings.</li> <li>• Communicate the significance of various guidelines used for testing of food products and cosmetics in brief.</li> </ul>	3

**Methodology: -**

1. Students are to be divided into 5-6 groups
2. Each group need to be given one to two cosmetic or nutraceutical products for eg. Lipstick, lip balm, Energy drink, Nutritional supplement for children, working women, pregnant women etc.
3. The students will be asked to prepare a report/assignment on number of companies selling such products. Information should be compiled about their major ingredients, preservatives, price, market value, quality control tests recommended etc.
4. For that Nutritional Product, the students will be asked to go through the quality parameters and nutritional values displayed on packages of food products as per the guidelines of Food Safety and Standards Authority of India (FSSAI).
5. Every year different products are to be allotted to avoid repetition

**Discussion: -** After the submission of reports, a discussion will be held among the students and the teacher(s) to understand the significance of various guidelines used for testing of food products and cosmetics in brief.

**Optional Activity****Objectives-**

**after completion of the course students should be able to prepare dosage forms and self care products in the syllabus.**

**Short term course/ Module**

		<p>Online/offline mode in collaboration with Pharmacy college</p> <p>Dosage Forms &amp; Self-care Products</p> <p>Assessment through MCQ's</p> <p>Duration of the course may be 22hrs including online assessment</p>	
CO1,CO3,CO6	<p>Paper II- 8 Anupana Prayoga for Aushadhi Kalpa</p> <p>Paper II- 9. Aushadhi Prayoga Marga</p>	<p><b>Objective</b></p> <p><b>After the completion of this activity</b></p> <ul style="list-style-type: none"> <li>• Students should be able to explain/present the probable pharmacokinetic and pharmacodynamic principles of assigned Ayurvedic drugs &amp; Anupana in different condition or indication</li> </ul> <p><b>Method of Activity: -</b></p> <ol style="list-style-type: none"> <li>1. Students will be divided into 5 to 6 groups</li> <li>2. Each group need to be allotted formulations/ single drug/Bhasma/Pishti etc</li> <li>3. Students are asked to explain the therapeutic importance of five formulations with respect to different Anupana, Aushadhiprayoga marga and their utility in different disorders with the probable pharmacokinetic and pharmacodynamic principles involved in the use of assigned Ayurvedic drugs.</li> <li>4. students have to submit assignment / sharing ppt presentation in the activity group</li> </ol> <p><b>Discussion: -</b></p> <p>After the completion of this task, students should be able to explain/present the probable pharmacokinetic and pharmacodynamic principles of assigned Ayurvedic drugs. In charge teacher has to conclude on collection of compiled matter and drugs action.</p>	2

CO3	Paper II 10. Rational prescription along with safe dispensing of Ayurvedic formulations.	<p><b>Objective</b></p> <p><b>After completing this activity, students will be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify the different components of a prescription.</li> <li>• Analyse the prescriptions to determine whether they are rational.</li> <li>• Discuss the significance of ideal prescription and rationality of use of drugs in Ayurveda.</li> </ul> <p><b>Methodology: -</b></p> <ol style="list-style-type: none"> <li>1. Students are to be divided into 4 to 5 groups</li> <li>2. Each group is advised to collect 4 to 5 prescriptions from different departments of the hospital.</li> <li>3. The students are asked to visit hospital to go through the randomly selected five prescriptions for promoting them to know the ideal prescription and rational use of drugs.</li> <li>4. The students will be asked to present their review of this activity during the non-lecture hours.</li> <li>5. Strictly instructions should be given to maintain confidentiality about patient's name and consultant's name.</li> </ol> <p><b>Discussion: -</b></p> <p>After the completion of the task, an interaction will be held among the students and the concerned teacher (s) to understand the</p>	4

		significance of ideal prescription and rationality of use of drugs in Ayurvedic practices.	
CO1,CO5	Paper II 11. Traditional and local health practices	<p><b>Objective</b></p> <p><b>After completing this activity, students will be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify different types of traditional healers in their local area/region.</li> <li>• Interview traditional healers to understand their practices.</li> <li>• Document the practices of traditional healers in a way that is respectful and preserves their knowledge.</li> <li>• Communicate the findings of their research to others.</li> </ul> <p><b>Methodology :</b></p> <p>1. To understand the practices of traditional healers/ Folklore healers- the students are instructed to visit and meet some of the folk healers / traditional healers who have been practicing since ages in their local area/region. During their holiday/vacation students can complete this survey in and around the institute or near their residential place.</p> <p>2. The students may act as a bridge between Ayurveda and traditional/local healers by making them understand the beneficial effect of technology and how this can help the healers to expand their treatment to a larger mass. Because many a times it has been observed that the healers are reluctant or they don't entertain the students who come to meet them for fear of exploitation or theft of their knowledge.</p>	4

		<p>3. By doing this practice, the healers will develop confidence on students which helps in collecting /documenting practices, through which a new horizon may open in the field of medicinal research.</p> <p><b>Discussion:</b> After the completion of the visit, an interaction need to be held among the concerned teachers and students to discuss the learning experiences, and try to find out difficulties so that in future those things can be managed or avoided to make things easier.</p>	
CO4	Paper II 12. Pharmacovigilance for Ayurveda drugs	<p><b>Objective</b></p> <p><b>After completing this activity, students will be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify the different types of adverse drug reactions (ADRs).</li> <li>• Describe the detection criteria for ADRs.</li> <li>• Explain the assessment techniques for ADRs.</li> <li>• Discuss the prevention criteria for ADRs.</li> <li>• Able to fill out an ADR reporting format</li> </ul> <p><b>Methodology: -</b></p> <p>The students will be asked to visit hospital or go through the previously reported cases to discuss for detection criteria, assessment techniques, understanding and prevention criteria of ADRs.</p> <p>Every student is assigned to fill up the ADR reporting format by allotting imaginary situation/ real case</p>	4

		<p><b>Discussion: -</b></p> <p>After the visit, an interaction will be held among the concerned teacher(s) and the students to discuss the learning experiences, and the importance of ADRs, their assessment and reporting techniques.</p>

**Course curriculum for Second Professional BAMS**

**(PRESCRIBED BY NCISM)**

# **Roga Nidan evam Vikriti Vigyan**

**(SUBJECT CODE : AyUG-RN)**

**(Applicable from 2021-22 batch, from the academic year 2023-24 onwards for 5 years or until further notification by NCISM, whichever is earlier)**

**BOARD OF AYURVEDA**

**NATIONAL COMMISSION FOR INDIAN SYSTEM OF MEDICINE NEW**

**DELHI-110058**

## II Professional Ayurvedacharya (BAMS)

**Subject Code : AyUG-RN**

### Summary

Total number of Teaching hours: 450			
Lecture hours(LH)-Theory		150	150(LH)
Paper I	60		
Paper II	90		
Non Lecture hours(NLH)-Theory		300	300(NLH)
Paper I & II	90		
Non Lecture hours(NLH)-Practical			
Paper I & II	210		

Examination (Papers & Mark Distribution)					
Item	Theory Component Marks	Practical Component Marks			
		Practical	Viva	Elective	IA
Paper I	100	100	70	-	30
Paper II	100				
Sub-Total	200	200			
Total marks	400				

**Important Note:-**The User Manual II BAMS is a valuable resource that provides comprehensive details about the curriculum file. It will help you understand and implement the curriculum. Please read the User Manual II before reading this curriculum file. The curriculum file has been thoroughly reviewed and verified for accuracy. However, if you find any discrepancies, please note that the contents related to the MSE should be considered authentic.

In case of difficulty and questions regarding curriculum write to [cur.imp@ncismindia.org](mailto:cur.imp@ncismindia.org)

## **PREFACE**

Roganidan Evum Vikriti Vigyan is a subject that gives emphasis on Ayurveda and contemporary Diagnostics and Pathology. It is a key subject that trains the students to apply knowledge of fundamental principles of Ayurveda to practice by understanding diseases, patient interaction, drawing diagnosis, and prognosis. This is a strong base to frame an appropriate treatment protocol.

The curriculum is framed with a vision for developing the diagnostic knowledge and skills of a student abiding by a patient-centric education. Activity-based training has been inculcated throughout the curriculum to improve the dexterity of a student in handling real-life scenarios in the journey of reaching a diagnosis. The anatomy and physiology learned in an apparently healthy individual from the first professional year is continued in the second professional year with knowledge regarding morbid reflections in the mind and body through this subject.

The sequence of knitting the points in theory and practical are carefully executed to maintain rationality and continuity in learning from a clinical perspective. The basic principles of Vikriti vigyan and their application in Roga nidana, Vyadhi vigyana and clinical diagnostics supported by contemporary diagnostics are the core areas of the curriculum. The essential areas from contemporary pathology and diagnostics are included with the objective to receive interdisciplinary integrated teaching. Some of the topics are defined for horizontal & vertical integration for better understanding.

Innovative teaching learning and assessment methods are introduced. These will develop an interest in students, making the curriculum student and patient-centric and will help to develop competencies, skills, attitudes, and communication as these are indispensable components of the learning process in Health care/ Medicine.

In addition to classroom teaching-learning, the dedicated time has been allotted to clinical activities, self-directed learning, group learning, survey to identify specific illnesses, CBL, and PBL, which are aligned with traditional and innovative formative assessments and scientific writings; ultimately expecting the improved performance of the students in summative assessments and as a successful practitioner in future by implementing Competency-Based Medical Education. The subject will be definitely helpful to the students to create a justifiable diagnosis for future treatment plans which is the basic need for successful practice.

**Course Code and Name of Course**

<b>Course code</b>	<b>Name of Course</b>
AyUG-RN	Roga Nidan evam Vikriti Vigyan

**Table 1- Course learning outcomes and matched PO**

<b>SR1 CO No</b>	<b>A1 Course learning Outcomes (CO) AyUG-RN At the end of the course AyUG-RN, the students should be able to-</b>	<b>B1 Course learning Outcomes matched with program learning outcomes.</b>
CO1	Identify the morbidities in accordance with principles of Ayurveda pathology (vikriti vigyan siddhanta)	PO1
CO2	Describe the basic, general, and systemic pathological process thereby applying it in reaching a diagnosis	PO2,PO3
CO3	Perform appropriate clinical examination (pareeksha) utilizing Ayurveda and contemporary principles (samakalina siddhanta)	PO2,PO3,PO4
CO4	Order and interpret various diagnostic laboratory investigations and imaging	PO2,PO3
CO5	Diagnose and present the case with clinical reasoning (naidanika tarka)	PO5
CO6	Follow and advise advancements in diagnosis (vyadhi vinischaya) and prognosis (sadhya asadhyata) in clinical practice (naidanika adhyayana)	PO7
CO7	Communicate effectively with the patient (rugna), relatives (bandhujan) and other stakeholders (anya hita dhaarak)	PO8
CO8	Demonstrate ethics (sadvritta), compassion (karuna) and possess qualities of a clinician (vaidya guna)	PO6,PO9

<b>Paper 1 Fundamental Principles of Vikriti Vigyan</b>					
<b>Sr. No</b>	<b>A2 List of Topics</b>	<b>B2 Term</b>	<b>C2 Marks</b>	<b>D2 Lecture hours</b>	<b>E2 Non- Lecture hours</b>
1	<b>1. Roga nidana – Pathophysiology and clinical diagnosis</b>	1	43	1	0
2	<b>2. Pareeksha</b> Roga and Rogi Pareeksha	1		1	0
3	<b>3. Methods of Rogi pareeksha</b>	1		4	3
4	<b>4. Sapeksha nidana - Vyavacchedaka nidana</b> Sapeksha nidana - Vyavacchedaka nidana of Ukta/Anukta vyadhi: Methods of differential diagnosis	1		1	0
5	<b>5. Upashaya/ Anupashaya</b>	1		1	0
6	<b>6. Dosha Vikriti</b> A. Nidana (Vyadhi janaka hetu) B. Agni bheda and Vikriti C. Dosha Vriddhi, Kshaya and Dushta Karma, Ashyapakarsha, Avarana, Samsargaja, Sannipataja. D. Dosha swabhava - Nityasamshleshita (Leena) dosha and Paricchedita dosha E. Paridhavamana dosha	1		3	2
7	<b>7. Doshagati and Rogamarga</b>	1		1	0
8	<b>8. Srotodushti</b> Samanya sroto dusti nidana and lakshana	1		1	0
9	<b>9. Concept of Ama</b> A. Samanya nidana, and Samanya lakshana B. Bheda (Anna rasa. Mala sanchaya (Dhatwagni mandya janit). Dosha dushti)	1		2	0
10	<b>10. Assessment of Ama</b> Sama and nirama dosha lakshana, Pureesha lakshana	1		0	1
11	<b>11. Sthana samshraya – Poorvaroop</b>	1	49	1	0
12	<b>12. Dushya dushti</b> A. Dhatu and mala vriddhi kshaya lakshana B. Specific Sroto dusti lakshana in relation to Dosha, Upadhatu, Mala, Indriya, Avayava, and Mana dushti lakshana	1		9	9
13	<b>13. Samprapti</b> A. Samprapti bheda B. Vyadhi janma and Vyadhi janya	1		1	0

14	<b>14. Rupa</b> Pratyatma/ Samanya/ Vishishta Rupa	1		1	0
15	<b>15. Vyadhinamakarana</b>	1		1	1
16	<b>16. Vyadhi</b> A. Definition, B. Classification – Dwividha/ Trividha/ Chaturvidha/ Saptavidha (Adibala/ Sahaja - Genetic, Janmabala/ Garbhaja - Congenital, Dosha bala/ Jataja - Acquired, Sanghatabala/ Peedaja - Traumatic, Daivabala/ Prabhavaja - Iatrogenic, Kalabala/ Kalaja – Environmental and Geriatric, Swabhava balapravrutta), etc.	1		4	0
17	<b>17. Ashtanindita (Endocrine disorders)</b>	1		1	0
18	<b>18. Janapadodhwamsa vikara (Pandemic disorders)</b>	1		1	0
19	<b>19. Nidanarthakara Vyadhi, Vyadhisankara</b>	1		1	0
20	<b>20. Vyadhikshamatva</b> A. Vikaravighata Bhava & Abhava, SatmyaB. Ojus - Bheda – Two types and Four types C. Dosha Paka D. ImmunityE. Healing/repair	1		2	0
21	<b>21. Rogi bala Pareeksha</b>	1		2	1
22	<b>22. Dhatu Paka</b> A. Dhatu pakaB. Ojodusti lakshana C. Asatmya - Immune pathologyD. Cell Injury and Cellular adaptations E. Inflammation F. Haemodynamic disorders G. Neoplasia	1		12	1
23	<b>23. Infection and Nutritional disorders</b>	1	8	4	1
24	<b>24. Upadrava</b>	2		1	0
25	<b>25. Arishta</b>	2		1	0
26	<b>26. Vyadhi bala pareeksha</b>	2		1	0
27	<b>27. Sadhyasadhyatva – Prognosis</b>	2		1	0
28	<b>28. Digital health and Artificial intelligence in the context of Roganidana</b>	2		1	1

<b>Total Marks</b>	<b>100</b>	<b>60 hr</b>	<b>20 hr</b>

<b>Paper 1 Fundamental Principles of Vikriti Vigyan</b>									
<b>A3</b> Course outcome	<b>B3</b> Learning Objective (At the end of the session, the students should be able to)	<b>C3</b> Domain/sub	<b>D3</b> Must to know / desirable to know / Nice to know	<b>E3</b> Level Does/ Shows how/ Knows how/ Know	<b>F3</b> T-L method	<b>G3</b> Assessment (Refer abbreviations)	<b>H3</b> Formative/summative	<b>I3</b> Term	<b>J3</b> Integration
<b>Topic 1 1. Roga nidana – Pathophysiology and clinical diagnosis</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1	Explain the concept of Roganidana	CC	MK	KH	L&PPT	INT	F&S	I	
CO1	Explain the concept of pathophysiology and clinical diagnosis	CC	MK	KH	L&PPT	O-QZ	F&S	I	
<b>Topic 2 2. Pareeksha</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1	Define and enlist types of pareeksha	CK	MK	K	L&PPT	INT,TT-Theory	F&S	I	
CO1	Describe importance of pareeksha	CC	MK	KH	L&PPT	DEB	F&S	I	
CO1	Explain the concept of rogi pareeksha	CC	MK	KH	L&PPT	INT	F&S	I	
CO1	Enlist rogi pareeksha	CK	MK	K	L&PPT	O-QZ,INT	F&S	I	

CO1	Describe importance of rogi pareeksha	CC	MK	KH	L&G D	DEB	F&S	I	
CO1	Explain the concept of roga pareeksha	CC	MK	KH	L&PP T	INT,TT- Theory	F&S	I	
CO1	Enlist roga pareeksha	CK	MK	K	L&PP T	INT	F&S	I	
CO1	Describe importance of roga pareeksha	CC	MK	KH	L&G D	T-OBT,DEB	F&S	I	
CO1	Differentiate between rogi pareeksha and roga pareeksha	CC	MK	KH	L&G D	T-OBT,M- CHT	F&S	I	
<b>Topic 3 3. Methods of Rogi pareeksha</b> (Lecture :4 hours, Non lecture: 3 hours)									
CO1,CO3,CO 7,CO8	Describe Prashna Pareeksha, Chakshu indriyataha Pareeksha, Srotrendriyataha Pareeksha, Sparshanendriyataha Pareeksha, Ghranendriyataha Pareeksha, and Rasanendriyataha Pareeksha with its clinical interpretation	CC	MK	SH	L_VC	COM	F&S	I	
CO1,CO3	Describe the importance, clinical interpretation and methods of eliciting Nadi Pareeksha	CAN	MK	KH	L&G D,D_ BED	COM	F&S	I	
CO1	Describe the importance and clinical interpretation of Mutra Pareeksha	CC	MK	KH	L&G D	COM	F&S	I	
CO1	Describe the methods of performing Tailabindu Pareeksha	CC	MK	KH	L_VC	WP,COM	F&S	I	
CO1,CO3	Describe the importance & clinical interpretation of Mala Pareeksha, Jihwa Pareeksha, Shabda Pareeksha, Sparsha Pareeksha, Druk Pareeksha, Akriti Pareeksha	CAN	MK	KH	L&G D,SD L,D_ BED	COM	F&S	I	

<b>Topic 4 4. Sapeksha nidana - Vyavacchedaka nidana</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1,CO2,CO3,CO5	Describe the steps of Vyavacchedaka nidana of Ukta Vyadhi and Anukta vyadhi with suitable examples (Ayurveda and contemporary science incorporating clinical findings and investigations)	CE	MK	KH	L&G D,CB L	T-OBT,M- CHT	F&S	I	V-KC ,V-SH ,V-SH L,V- SP
CO5	Describe scope of developing screening, triage, confirmation, monitoring and prognostic tools in Ayurveda for Emerging diseases along with recent advancements	CC	DK	KH	L&PP T,IBL	INT	F&S	I	
<b>Topic 5 5. Upashaya/ Anupashaya</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1	Define Upashaya and enlist synonyms of Upashaya	CK	MK	K	L&PP T	INT	F&S	I	
CO1	Define Anupashaya and enlist synonyms of Anupashaya	CK	MK	K	L&PP T	INT,TT- Theory	F&S	I	
CO1	Enumerate and explain the eighteen types of Upashaya with relevant examples	CC	MK	KH	L&PP T	WP,INT	F&S	I	
<b>Topic 6 6. Dosha Vikriti</b> (Lecture :3 hours, Non lecture: 2 hours)									
CO1	Define Hetu	CK	MK	K	L&PP T	INT,TT- Theory	F&S	I	
CO1	Enlist and define synonyms of Hetu	CK	MK	K	L&PP T	QZ	F&S	I	
CO1	Enumerate and enlist classification of Nidana (Vyadhi janaka and Vyadhi bodhaka)	CK	MK	K	L&PP T	M-CHT	F&S	I	
CO1	Enumerate and describe types of Vyadhi Janaka Hetu	CC	MK	KH	L&PP	INT	F&S	I	

					T,RE C				
CO1,CO5	Correlate Vyadhi Janaka Hetu with contemporary examples	CE	MK	KH	CBL, PrBL	CL-PR	F&S	I	
CO1	Describe the Nidana of Agnidushti	CC	MK	KH	L&PP T,RE C	T-OBT	F&S	I	
CO1	Enumerate and explain the types and features of Agnidushti	CC	MK	KH	L&PP T	INT	F&S	I	
CO1	Correlate the Nidana of Agnidushti with contemporary examples	CE	MK	KH	L&G D	P-SUR	F&S	I	
CO3,CO8	Perform assessment of Agnidushti in patient	PSY- GUD	MK	SH	D_BE D	P-PRF	F&S	I	
CO1	Recite etiologies of Vata, Pitta and Kapha dushta karma	CK	MK	K	REC	P-REC	F&S	I	
CO1,CO5	Apply the knowledge of aetiologies of Vata, Pitta and Kapha dushta karma in correlating with contemporary etiologies	CAP	MK	KH	L&G D,PrB L,TP W	P-SUR	F&S	I	
CO1	Recite dushta karma, kshaya and vriddhi lakshana of Vata, Pitta and Kapha Dosha	CK	MK	K	REC	P-REC	F&S	I	
CO1	Explain Ashayapakarsha of Dosha with suitable examples	CC	MK	KH	L&G D	INT	F&S	I	
CO1	Define Avarana	CK	MK	K	L&PP T	QZ	F&S	I	
CO1	Enlist types of Avarana	CK	MK	K	L&PP	O-GAME	F&S	I	

					T				
CO1	Enlist the 63 combination of Dosha	CC	MK	KH	L&PP T	O-GAME	F&S	I	
CO1	Describe Samsargaja Dosha Dushti	CC	MK	KH	L&PP T	INT	F&S	I	
CO1	Describe Sama Sannipata and Vishama Sannipata dosha	CC	MK	KH	L&PP T	INT	F&S	I	
CO1	Enlist the different stages of Paridhavamana Dosha	CK	MK	K	L&PP T	INT	F&S	I	
CO1	Explain Paridhavamana dosha with types and examples	CC	MK	KH	L&PP T	COM	F&S	I	
CO1	Explain Nityasamshleshita (Leena) dosha and Paricchedita dosha with examples	CC	MK	KH	L&PP T	INT	F&S	I	
<b>Topic 7 7. Doshagati and Rogamarga</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1	Enumerate and describe Doshagati and its utility in prognosis with relevant examples	CC	MK	KH	L&G D	INT	F&S	I	
CO1	Describe Urdhwa gati, Adho gati, Tiryaga gati, Vriddhi, Kshaya, Sthana, Koshta, Shakha, Sandhi asthi marma with illustrations and examples	CC	MK	KH	L&G D	COM	F&S	I	
CO1	Describe Koshta to Shakhagati of dosha and Shakha to Koshtagati of dosha with illustration	CC	MK	KH	L&G D	COM	F&S	I	
CO1	Enumerate and describe Rogamarga and its utility in prognosis with relevant examples	CC	MK	KH	L&G D	O-QZ	F&S	I	
<b>Topic 8 8. Srotodushti</b> (Lecture :1 hours, Non lecture: 0 hours)									

CO1	Define and enlist Srotas	CK	MK	K	L&PP T	O-QZ	F&S	I	
CO1	Describe the common aetiology for Sroto dushti	CC	MK	KH	L&G D	INT	F&S	I	
CO1	Explain features of Samanya Srotodushti with examples	CC	MK	KH	L&PP T	CL-PR	F&S	I	
<b>Topic 9 9. Concept of Ama</b> (Lecture :2 hours, Non lecture: 0 hours)									
CO1	Describe the different definitions of Ama	CC	MK	KH	L&PP T,RE C	P-REC,INT	F&S	I	
CO1	Enlist different types of Ama	CK	MK	K	L&PP T	INT	F&S	I	
CO1	Correlate the different types of Ama with the current science	CE	MK	KH	BS,IB L	COM	F&S	I	
CO1	Describe samanya lakshana of Ama	CC	MK	KH	L&PP T	O-QZ	F&S	I	
CO1	Explain the concept of Ama with reference to Anna rasa, Mala sanchaya and Dosha dushti	CC	MK	KH	L&PP T	T-OBT,COM	F&S	I	
<b>Topic 10 10. Assessment of Ama</b> (Lecture :0 hours, Non lecture: 1 hours)									
CO1	Explain concept of Sama	CC	MK	KH	L&PP T	INT	F&S	I	
CO1	Describe specific features of Sama and Nirama Dosha and Pureesha	CC	MK	KH	L&PP T	O-GAME	F&S	I	
CO5	Identify specific features of Sama dosha, Sama pureesha, Nirama	PSY-	MK	SH	L,D_	P-PRF	F&S	I	

	dosha and Nirama pureesha in patient	GUD			BED				
<b>Topic 11 11. Sthana samshraya – Poorvaroopa</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1	Define Sthansamshraya	CK	MK	K	L&PP T	INT	F&S	I	
CO1	Define Poorvaroopa and enlist its types	CK	MK	K	L&PP T	QZ	F&S	I	
CO1	Describe the importance of Poorvaroopa	CC	MK	KH	L&G D	DEB	F&S	I	
CO1	Relate Sthanasamshraya with Poorvaroopa	CAP	MK	KH	L&G D	INT	F&S	I	
<b>Topic 12 12. Dushya dushti</b> (Lecture :9 hours, Non lecture: 9 hours)									
CO1	Enlist Dushya	CK	MK	K	L&PP T	QZ	F&S	I	
CO1	Describe specific features of Dhatu and Mala Vriddhi and Kshaya	CC	MK	KH	DIS	T-OBT	F&S	I	
CO1	Describe the specific etiologies of Pranavaha Sroto dushti and identify contemporary etiologies	CS	MK	SH	L&G D,RE C	P-REC,INT	F&S	I	
CO1	Describe features of Pranavaha Sroto Dushti in relation to Dosha Kopa	CC	MK	KH	L&PP T,RE C	P-REC,INT	F&S	I	
CO1	Describe Pranavaha Sroto Viddha Lakshana	CC	MK	KH	L&PP T	QZ	F&S	I	
CO1	Describe the specific etiologies of Udakavaha Sroto dushti and	CC	MK	KH	L&G	P-SUR	F&S	I	

	identify contemporary etiologies				D,PrB L				
CO1	Describe features of Udakavaha Sroto Dushti in relation to Dosha Kopa	CC	MK	KH	L&PP T	INT	F&S	I	
CO1	Describe Udakavaha Sroto Viddha Lakshana	CC	MK	KH	L&PP T	INT	F&S	I	
CO1	Describe the specific etiologies of Annavaha Sroto dushti and identify contemporary etiologies	CC	MK	KH	L&G D,RE C	P-REC,INT	F&S	I	
CO1	Describe features of Annavaha Sroto Dushti in relation to Dosha Kopa	CC	MK	KH	L&G D,RE C	P-REC,INT	F&S	I	
CO1	Describe Annavaha Sroto Viddha Lakshana	CC	MK	KH	L&PP T	WP	F&S	I	
CO1	Describe the specific etiologies of Rasavaha Sroto dushti and identify contemporary etiologies	CC	MK	KH	L&G D,PrB L,RE C	P-REC,INT	F&S	I	
CO1	Describe features of Rasavaha Sroto Dushti in relation to Dosha Kopa	CC	MK	KH	L&PP T,RE C	P-REC,INT	F&S	I	
CO1	Describe Rasavaha Sroto Viddha Lakshana	CC	MK	KH	L&PP T	QZ	F&S	I	
CO1	Describe the specific etiologies of Raktavaha Sroto dushti and identify contemporary etiologies	CC	MK	KH	L&G D,PrB L,RE	P-REC,INT	F&S	I	

					C				
CO1	Describe features of Raktavaha Sroto Dushti in relation to Dosha Kopa	CC	MK	KH	L&G D,RE C	P-REC,INT	F&S	I	
CO1	Describe Raktavaha Sroto Viddha Lakshana	CC	MK	KH	L&PP T	INT	F&S	I	
CO1	Describe the specific etiologies of Mamsavaha Sroto dushti and identify contemporary etiologies	CC	MK	KH	L&G D,PrB L,RE C	P-REC,INT	F&S	I	
CO1	Describe features of Mamsavaha Sroto Dushti in relation to Dosha Kopa	CC	MK	KH	L&G D,RE C	P-REC,INT	F&S	I	
CO1	Describe Mamsavaha Sroto Viddha Lakshana	CC	MK	KH	L&PP T	QZ	F&S	I	
CO1	Describe the specific etiologies of Medovaha Sroto dushti and identify contemporary etiologies	CC	MK	KH	L&G D,PrB L,RE C	P-REC,INT	F&S	I	
CO1	Describe features of Medovaha Sroto Dushti in relation to Dosha Kopa	CC	MK	KH	L&G D,RE C	P-REC,INT	F&S	I	
CO1	Describe Medovaha Sroto Viddha Lakshana	CC	MK	KH	L&PP T	QZ	F&S	I	
CO1	Describe the specific etiologies of Asthivaha Sroto dushti and identify contemporary etiologies	CC	MK	KH	L&G D,PrB	P-REC,P-SUR	F&S	I	

					L,RE C				
CO1	Describe features of Asthivaha Sroto Dushti in relation to Dosha Kopa	CC	MK	KH	L&G D,RE C	P-REC,INT	F&S	I	
CO1	Describe the specific etiologies of Majjavaha Sroto dushti and identify contemporary etiologies	CC	MK	KH	L&G D,PrB L,RE C	P-REC,INT	F&S	I	
CO1	Describe features of Majjavaha Sroto Dushti in relation to Dosha Kopa	CC	MK	KH	L&G D,RE C	P-REC,INT	F&S	I	
CO1	Describe the specific etiologies of Shukravaha Sroto dushti and identify contemporary etiologies	CC	MK	KH	L&G D,PrB L,RE C	P-REC,INT	F&S	I	
CO1	Describe features of Shukravaha Sroto Dushti in relation to Dosha Kopa	CC	MK	KH	L&PP T,RE C	P-REC,INT	F&S	I	
CO1	Describe Shukravaha Sroto Viddha Lakshana	CC	MK	KH	L&PP T	QZ	F&S	I	
CO1	Describe the specific etiologies of Mutravaha Sroto dushti and identify contemporary etiologies	CC	MK	KH	L&G D,PrB L,RE C	P-REC,P-SUR	F&S	I	
CO1	Describe features of Mutravaha Sroto Dushti in relation to Dosha Kopa	CC	MK	KH	L&G D,RE	P-REC,INT	F&S	I	

					C				
CO1	Describe Mutravaha Sroto Viddha Lakshana	CC	MK	KH	L&PP T	QZ	F&S	I	
CO1	Describe the specific etiologies of Pureeshavaha Sroto dushti and identify contemporary etiologies	CC	MK	KH	L&G D,PrB L,RE C	P-REC,P-SUR	F&S	I	
CO1	Describe features of Pureeshavaha Sroto Dushti in relation to Dosha Kopa	CC	MK	KH	L&G D,RE C	P-REC,INT	F&S	I	
CO1	Describe Pureeshavaha Sroto Viddha Lakshana	CC	MK	KH	L&PP T	QZ	F&S	I	
CO1	Describe the specific etiologies of Swedavaha Sroto dushti and identify contemporary etiologies	CC	MK	KH	L&G D,PrB L,RE C	P-REC,P-SUR	F&S	I	
CO1	Describe features of Swedavaha Sroto Dushti in relation to Dosha Kopa	CC	MK	KH	L&G D,RE C	P-REC,INT	F&S	I	
CO1	Describe the specific etiologies of Artavavaha Sroto dushti and identify contemporary etiologies	CC	MK	KH	L&G D,PrB L,RE C	P-REC,P-SUR	F&S	I	
CO1	Describe features of Artavavaha Sroto Dushti in relation to Dosha Kopa	CC	MK	KH	L&PP T,RE C	P-REC,INT	F&S	I	

CO1	Describe Artavavaha Sroto Viddha Lakshana	CC	MK	KH	L&PP T	QZ	F&S	I	
CO1	Describe features of Upadhātu dushti, Mala dushti, Indriya dushti, and Manas dushti	CC	MK	KH	L&G D	INT	F&S	I	
CO1	Describe features of Avayava dusti with relevant examples	CC	MK	KH	L&PP T	INT	F&S	I	
CO5	Identify and interpret the specific Sroto Dushti in the patients	PSY- GUD	MK	SH	SDL	T-CS	F&S	I	
<b>Topic 13 13. Samprapti</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1	Define Samprapti and enumerate synonyms	CK	MK	K	L&PP T	WP	F&S	I	
CO1	Enlist and describe types of Samprapti with examples	CK	MK	K	L&PP T	INT	F&S	I	
CO1	Describe Vyadhi Janma and Vyadhi Janya Samprapti with examples	CC	MK	KH	L&PP T	INT	F&S	I	
<b>Topic 14 14. Rupa</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1	Define, enlist and describe different types of Roopa	CC	MK	KH	L&PP T	INT	F&S	I	
CO1	Describe the importance of Roopa	CC	MK	KH	L&G D	DEB	F&S	I	
CO1	Define Pratyatma Lakshana with suitable examples	CK	MK	K	L&PP T	INT	F&S	I	
CO1	Differentiate between Vyadhi and Lakshana.	CC	MK	KH	L&G D	INT	F&S	I	

<b>Topic 15 15. Vyadhinamakarana</b> (Lecture :1 hours, Non lecture: 1 hours)									
CO1	Describe the basis of Vyadhi Namakarana with suitable examples	CK	MK	K	L	QZ	F&S	I	
CO6	Describe the importance of ICD, DSM and NAMASTE (National AYUSH Morbidity and Standardized Terminologies Electronic Portal) portal classification and terminology of diseases	CC	DK	KH	L&G D,D	INT	F&S	I	
CO6	Operate NAMASTE (National AYUSH Morbidity and Standardized Terminologies Electronic Portal) portal	PSY- GUD	DK	SH	D	P-PRF	F&S	I	
<b>Topic 16 16. Vyadhi</b> (Lecture :4 hours, Non lecture: 0 hours)									
CO1	Define & enlist synonyms of Vyadhi	CK	MK	K	L&PP T	INT	F&S	I	
CO1	Enlist types of Vyadhi	CK	MK	K	L&PP T	INT	F&S	I	
CO1,CO2	Explain Adibala/ Sahaja and Hereditary disorders, Janmabala/ Garbhaja and Congenital disorders, Dosha bala/ Jataja and Acquired disorders, Sanghatabala/ Peedaja and Traumatic disorders, Daivabala/ Prabhavaja and Iatrogenic disorders, Kalabala/ Kalaja and Environmental and Geriatric disorders, Swabhava bhava vyadhi with suitable examples	CC	MK	KH	L&PP T	CL-PR	F&S	I	
<b>Topic 17 17. Ashtanindita (Endocrine disorders)</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1	Enlist and explain the Ashtanindita	CC	DK	KH	L&PP T	INT	F&S	I	
CO1	Describe the importance of Ashtanindita	CC	DK	KH	L&G D	DEB	F&S	I	
CO1,CO2	Correlate and describe the features of Hormonal/ Endocrinal	CE	DK	KH	L&G	COM	F&S	I	V-BL

	diseases (Pituitary disorders, Parathyroid disorders, Adrenal disorders etc.) with Ashtanindita				D,TP W				
<b>Topic 18 18. Janapadodhwamsa vikara (Pandemic disorders)</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1	Describe sadharana and asadharana hetu for Janapadodhwamsa Vikara and correlate with contemporary etiologies	CC	DK	KH	L&G D	DEB	F&S	I	V-KC ,H- SW
<b>Topic 19 19. Nidanarthakara Vyadhi, Vyadhisankara</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1	Define and enlist types of Nidanarthakara Vyadhi with examples along with its concept	CC	DK	KH	L&G D	INT	F&S	I	
CO1	Explain the concept of Vyadhi Sankara with specific Nidana and relevant examples	CC	DK	KH	L&PP T	INT	F&S	I	
<b>Topic 20 20. Vyadhikshamatva</b> (Lecture :2 hours, Non lecture: 0 hours)									
CO1	Define Vyadhikshamatva	CK	MK	K	L&PP T	INT	F&S	I	
CO1	Describe Trividha bala and relate to Balavruddhikara Bhava and Shareeravruddhikara Bhava	CC	MK	K	L&PP T	M-CHT	F&S	I	
CO1	Describe Vikara Vighata Bhava and Abhava along with its relation to Vyadhikshamatva	CC	MK	KH	DIS	INT	F&S	I	
CO1	Analyze Satmya in relation with health and disease	CAN	MK	KH	L&G D	INT	F&S	I	
CO1	Define and explain Dwividha and Chaturvidha Ojas	CK	MK	K	L&PP T	INT	F&S	I	
CO1	Describe Dosha Paka features with examples	CC	MK	KH	L&PP T	INT	F&S	I	

CO2	Describe pathophysiology of Healing with primary and secondary intention and Repair mechanism.	CC	MK	KH	L_VC	CL-PR	F&S	I	
CO1	Define Satmya and explain its types	CC	MK	KH	L&PP T	INT	F&S	I	
CO2	Define Immunity and describe classification of Immunity	CC	MK	KH	SDL	CL-PR	F&S	I	
CO2	Explain different mechanisms involved in Immunity	CC	MK	KH	SDL	CL-PR	F&S	I	
<b>Topic 21 21. Rogi bala Pareeksha</b> (Lecture :2 hours, Non lecture: 1 hours)									
CO1	Describe the importance of Rogi bala Pareeksha	CC	MK	KH	L&G D	DEB	F&S	I	
CO1,CO8	Describe the parameters of Rogi bala Pareeksha - Prakruti, Sara, Samhanana, Pramana, Satmya, Satwa, Aahara shakti, Vyayama shakti, Vaya and other factors such as Aushadha kshama dehatva, Yuvajatva, Pumjatvam, Vishayanasakta indriyajatva, Padasampad bhavatvam, and Anukoola grahatva, etc.	CC	MK	KH	L&PP T	INT	F&S	I	
<b>Topic 22 22. Dhatu Paka</b> (Lecture :12 hours, Non lecture: 1 hours)									
CO1	Describe Dhatupaka features with examples	CC	MK	KH	L&PP T	INT	F&S	I	
CO1	Describe different stages of Ojo dusti	CK	MK	K	L&PP T	INT	F&S	I	
CO2	Define Asatmya	CK	MK	K	L&PP T	O-QZ	F&S	I	
CO2	Define Hypersensitivity	CK	MK	K	L&PP T	QZ	F&S	I	
CO2	Describe four types of Hypersensitivity with suitable examples	CC	MK	KH	L_VC	CL-PR	F&S	I	

CO2	Define Autoimmunity	CK	MK	K	L&PP T	O-QZ	F&S	I	
CO2	Describe mechanism and classification of Autoimmunity with suitable examples	CC	MK	KH	L_VC	CL-PR	F&S	I	
CO2	Define Immunodeficiency.	CK	MK	K	L&PP T	CL-PR	F&S	I	
CO2	Describe classification of Immunodeficiency with suitable examples.	CC	MK	KH	L&PP T	M-CHT	F&S	I	
CO2	Define Cell Injury	CK	MK	K	L&PP T	QZ	F&S	I	
CO2	Describe causes and mechanism of Reversible and Irreversible Cell Injury with microscopic and macroscopic features.	CC	MK	KH	L_VC	CL-PR	F&S	I	
CO2	Define Cellular Adaptation	CK	MK	K	L&PP T	QZ	F&S	I	
CO2	Describe types and mechanisms of Cellular Adaptations with suitable examples.	CC	MK	KH	L_VC	CL-PR	F&S	I	
CO2	Describe and discuss types of Cell Death (including apoptosis) and the mechanism with suitable examples.	CC	MK	KH	L_VC	CL-PR	F&S	I	
CO2	Define, classify and describe mechanism of Inflammation, Septicaemia, Oedema, Shock, Haemorrhage, Thrombosis, Embolism, Ischemia and Infarction	CC	MK	KH	L_VC	CL-PR	F&S	I	
CO2	Define and describe Tumors	CC	MK	KH	L&PP T	CL-PR	F&S	I	
CO2	Describe nomenclature of Tumors	CC	MK	KH	L&PP T,SD	CL-PR	F&S	I	

					L				
CO2	Differentiate Benign and Malignant Tumours	CC	MK	KH	L&G D	M-CHT	F&S	I	
CO2	Describe mechanism of Metastasis	CC	MK	KH	L&PP T	CL-PR	F&S	I	
<b>Topic 23 23. Infection and Nutritional disorders</b> (Lecture :4 hours, Non lecture: 1 hours)									
CO2	Define and classify Viruses, Bacteria, and Fungi	CC	DK	KH	L&PP T,SD L	COM	F&S	I	
CO2	Describe components of Nutrition, and classify nutritional disorders	CC	DK	KH	PER	QZ	F&S	I	H-SW
CO2	Describe Macro nutritional disorders, Water soluble vitamins deficiency disorders and Fat soluble vitamins deficiency disorders	CC	DK	KH	PER	QZ	F&S	I	V-KC ,H- SW
CO2	Describe Protein Energy Malnutrition in adults and differentiate Kwashiorkor and Marasmus	CC	DK	KH	PER	QZ	F&S	I	V-KC ,V-BL
<b>Topic 24 24. Upadrava</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1	Define and explain the concept and importance of Upadrava	CC	MK	KH	L&G D	DEB	F&S	II	
<b>Topic 25 25. Arishta</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1	Define Arishta and Ristaabhasa	CK	NK	K	L&PP T	INT	F&S	II	
CO1	Enumerate and describe types of Arishta with its importance	CC	NK	KH	L&G D	DEB	F&S	II	

<b>Topic 26 26. Vyadhi bala pareeksha</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1	Describe Vikrititaha Pareeksha with its importance	CC	DK	KH	L&G D	DEB	F&S	II	
CO1	Describe the parameters to be assessed for Vyadhi bala - Exposure to Nidana, Samprapti, Poorvaroop, Roopa, Upadrava, Tulya dosha - dushyatvam, Atulya ritu, Number of dosha involved, Number of Rogamarga involved, Kala, Desha, Prakruti, Involvement of Marma and other factors	CC	DK	KH	L&G D	DEB	F&S	II	
<b>Topic 27 27. Sadhyasadhyatva – Prognosis</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1	Enumerate and describe the features of sadhyasadhyatva	CC	MK	KH	L&PP T	INT	F&S	II	
CO1	Analyse the components of Vyadhi from Sadhyasadhyatva	CAN	MK	KH	L&G D	INT	F&S	II	
<b>Topic 28 28. Digital health and Artificial intelligence in the context of Roganidana</b> (Lecture :1 hours, Non lecture: 1 hours)									
CO6	Define and describe the scope of Digital health and Artificial intelligence in Ayurveda Diagnosis and Prognosis	CC	NK	KH	BL	COM	F&S	II	
CO6	Explain need of Instrumentation and Biosensors for diagnosis and prognosis in Ayurveda.	CC	NK	KH	BL	INT	F&S	II	
CO6	Justify scope of Diagnostic tool development in Ayurveda and their implementation.	CE	NK	KH	BL	INT	F&S	II	

<b>Paper 2 Vyadhi Vigyan, contemporary understanding and updates</b>									
<b>A3</b> Course	<b>B3</b> Learning Objective (At the end of the session, the students	<b>C3</b> Doma	<b>D3</b> Must to know	<b>E3</b> Level	<b>F3</b> T-L	<b>G3</b> Assessment	<b>H3</b> Form	<b>I3</b> Term	<b>J3</b> Integr

outcome	should be able to)	in/sub	/ desirable to know / Nice to know	Does/ Shows how/ Knows how/ Know	method	(Refer abbreviations)	ative/ summative		ation
<b>Topic 1 1. Agnimandya – Ajeerna, Anaha, Adhmana, Atopa</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1	Define Anaha	CK	MK	K	L&P T	QZ	F&S	II	
CO1	Enlist types of Anaha	CK	MK	K	L&P T	QZ	F&S	II	
CO1,CO5	Describe Adhmana and Atopa	CC	MK	KH	L&P T	INT	F&S	II	
<b>Topic 2 2. Chhardi</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1	Define Chhardi	CK	DK	K	L&P T	QZ	F&S	II	
CO1	Describe hetu and samprapti of Chhardi.	CC	DK	KH	L&G D	INT	F&S	II	
CO1	Enlist bheda of Chhardi	CK	DK	K	L&P T	QZ	F&S	II	
CO1	Describe purvaroop, samanya lakshana, vishishta lakshana, upadrava and sadhya asadhyata of Chhardi	CC	DK	KH	L&P T	INT	F&S	II	
<b>Topic 3 3. Amlapitta</b> (Lecture :2 hours, Non lecture: 0 hours)									

CO1	Define Amlapitta	CK	MK	K	L&PP T	QZ	F&S	II	
CO1	Describe hetu and samprapti of Amlapitta	CC	MK	KH	L&G D	M-CHT	F&S	II	
CO1	Enlist bheda of Amlapitta	CK	MK	K	L&PP T	QZ	F&S	II	
CO1	Describe purvaroop, samanya lakshana, vishishta lakshana, and sadhya asadhyata of Amlapitta	CC	MK	KH	L&PP T	INT	F&S	II	
<b>Topic 4 4. Shoola</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1	Define Shoola	CK	MK	K	L&PP T	QZ	F&S	II	
CO1	Enlist Shoola bheda	CK	MK	K	L&PP T	QZ	F&S	II	
CO1,CO5	Describe and differentiate Parinama shoola and Annadrava shoola	CC	MK	KH	L&PP T	INT	F&S	II	
<b>Topic 5 5. Atisara, and Pravahika</b> (Lecture :3 hours, Non lecture: 1 hours)									
CO1	Describe pratyatma lakshana of Atisara	CC	MK	KH	L&PP T	QZ	F&S	II	
CO1	Describe hetu and samprapti of Atisara	CC	MK	KH	L&G D	INT	F&S	II	
CO1	Enlist bheda of Atisara	CK	MK	KH	L&PP T	QZ	F&S	II	
CO1	Describe purvaroop of Atisara	CC	MK	KH	L&PP T,CB	INT	F&S	II	

					L				
CO1	Enlist and describe upadrava of Atisara	CK	MK	K	L&PP T	INT	F&S	II	
CO1	Describe sadhya asadhyata of Atisara	CC	MK	KH	L&PP T	T-CS,INT	F&S	II	
CO1	Describe nivrutta Atisara lakshana or vigata Atisara lakshana	CC	MK	KH	L&PP T	INT	F&S	II	
CO1	Describe samprapti of Pravahika	CC	MK	KH	L&G D	M-CHT	F&S	II	
CO1	Enlist bheda of Pravahika	CK	MK	KH	L&PP T	QZ	F&S	II	
CO1	Describe samanya and vishishta lakshana of Pravahika	CC	MK	KH	L&PP T,CB L	T-CS	F&S	II	
CO1	Differentiate between Atisara and Pravahika	CC	MK	KH	L&G D,PB L	CL-PR	F&S	II	
CO1	Differentiate Doshaja Atisara	CC	MK	KH	L&G D,PB L	CL-PR	F&S	II	
CO1	Explain Bhayaja atisara, Shokaja atisara and Raktaja atisara lakshana	CC	MK	KH	L&G D,PB L	CL-PR	F&S	II	
<b>Topic 6 6. Grahani</b> (Lecture :2 hours, Non lecture: 1 hours)									
CO1	Describe pratyatma lakshana of Grahani	CC	MK	KH	L&PP	PUZ	F&S	II	

					T				
CO1	Describe hetu and samprapti of Grahani	CC	MK	KH	L&G D	M-CHT	F&S	II	
CO1	Enlist bheda of Grahani	CK	MK	KH	L&PP T	QZ	F&S	II	
CO1	Describe purvaroop, and samanya lakshana of Grahani	CC	MK	KH	L&PP T	T-CS,INT	F&S	II	
CO1	Explain Sangraha grahani and Ghati yantra grahani	CC	MK	KH	L&PP T,CB L	INT	F&S	II	
CO1	Explain sadhya asadhyata of Grahani	CC	MK	KH	L&PP T	T-CS,INT	F&S	II	
CO1	Differentiate Atisara and Grahani Roga	CC	MK	KH	L&G D,PB L	T-CS	F&S	II	
CO1	Differentiate Grahani dosha and Grahani roga	CC	MK	KH	L&G D,PB L	T-CS,CL-PR	F&S	II	
CO1	Differentiate Doshaja Grahani	CC	MK	KH	L&G D,PB L	CL-PR	F&S	II	
<b>Topic 7 7. Visuchika, Alasaka, Vilambika</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1	Define Visuchika	CK	MK	K	L&PP T	QZ	F&S	II	
CO1	Describe lakshana, upadrava, and sadhyasadhyata of Visuchika ,	CC	MK	KH	L&PP	INT	F&S	II	

	Alasaka and Vilambika				T				
<b>Topic 8 8. Common GIT diseases</b> (Lecture :1 hours, Non lecture: 4 hours)									
CO2	Describe the clinical features of Ulcerative dyspepsia and Non-ulcerative dyspepsia, Irritable Bowel Syndrome, and Inflammatory Bowel Diseases	CC	DK	KH	RP,T UT	INT	F&S	II	
CO3	Perform relevant clinical examination of Ulcerative dyspepsia and Non-ulcerative dyspepsia, Irritable Bowel Syndrome, and Inflammatory Bowel Diseases	PSY-GUD	DK	SH	L_VC	OSCE	F&S	II	
CO4	Order and interpret relevant investigations of Ulcerative dyspepsia and Non-ulcerative dyspepsia, Irritable Bowel Syndrome, and Inflammatory Bowel Diseases	CAP	DK	SH	L&G D,LRI ,D_L	T-CS	F&S	II	
<b>Topic 9 9. Mutrakrichhra</b> (Lecture :2 hours, Non lecture: 1 hours)									
CO1	Explain pratyatma lakshana of Mutrakrichhra	CC	MK	KH	L&PP T	PUZ	F&S	II	
CO1	Describe hetu and samprapti of Mutrakrichhra	CC	MK	KH	L&G D	INT	F&S	II	
CO1	Enlist bheda of Mutrakrichhra	CK	MK	KH	L&PP T	QZ	F&S	II	
CO1,CO5	Describe vishishta lakshana of Mutrakrichhra	CC	MK	KH	L&PP T,CB L	INT	F&S	II	
<b>Topic 10 10. Mutraghata</b> (Lecture :3 hours, Non lecture: 1 hours)									
CO1	Define Mutraghata	CK	MK	K	L&PP T	QZ	F&S	II	

CO1	Enlist conditions of Mutra shoshana and Mutra pratihanyate among different types of Mutraghata	CK	MK	K	L&G D	INT	F&S	II	
CO1	Describe different types of Mutraghata	CC	MK	KH	L&PP T,PB L	INT	F&S	II	
CO1	Differentiate Mutrakrichra and Mutraghata	CC	MK	KH	L&G D,PB L	T-CS	F&S	II	
<b>Topic 11 11. Common Urinary diseases</b> (Lecture :1 hours, Non lecture: 6 hours)									
CO2	Describe the clinical features of Urinary Tract Infection, Prostatomegaly, Nephrotic syndrome, Nephritic syndrome, Acute Kidney Injury and Chronic Kidney Disease	CC	DK	KH	L&G D,RP	T-CS	F&S	II	
CO3	Perform relevant clinical examination of Urinary Tract Infection, Prostatomegaly, Nephrotic syndrome, Nephritic syndrome, Acute Kidney Injury and Chronic Kidney Disease	PSY- GUD	DK	SH	L_VC	T-CS	F&S	II	
CO4	Order and interpret relevant investigations of Urinary Tract Infection, Prostatomegaly, Nephrotic syndrome, Nephritic syndrome, Acute Kidney Injury and Chronic Kidney Disease	CAP	DK	SH	L&G D,LRI	T-CS	F&S	II	
<b>Topic 12 12. Hikka</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1	Describe pratyatma lakshana, hetu, and samprapti of Hikka	CC	NK	KH	L&PP T	PUZ	F&S	II	
CO1	Describe cardinal features of Pancha Hikka	CC	NK	KH	L&PP T	INT	F&S	II	
<b>Topic 13 13. Shwasa</b> (Lecture :2 hours, Non lecture: 1 hours)									

CO1	Define Shwasa	CK	MK	K	L&PP T	QZ	F&S	II	
CO1	Describe hetu and samanya samprapti of Shwasa	CC	MK	KH	L&G D	T-CS	F&S	II	
CO1	Enlist bheda of Shwasa	CK	MK	K	L&PP T	P-VIVA,QZ	F&S	II	
CO1	Describe purvaroop, and sadhya asadhyata of Shwasa	CC	MK	KH	L&PP T	T-CS	F&S	II	
CO1	Describe vishishta lakshana of Tamaka shwasa with its avastha bheda	CC	MK	KH	L&PP T	T-CS	F&S	II	
CO1	Describe dosha predominance in Shwasa	CC	MK	KH	DIS	INT	F&S	II	
CO1	Identify cardinal features of Pancha shwasa and correlate with the current science	CAN	MK	KH	L&PP T	INT	F&S	II	
CO1	Differentiate Pancha shwasa	CC	MK	KH	PBL	CL-PR	F&S	II	

**Topic 14 14. Kasa** (Lecture :2 hours, Non lecture: 0 hours)

CO1	Define Kasa	CK	MK	K	L&PP T	QZ	F&S	II	
CO1	Describe hetu and samprapti of Kasa	CC	MK	KH	L&G D	INT	F&S	II	
CO1	Enlist bheda of Kasa	CK	MK	K	L&PP T	QZ	F&S	II	
CO1	Describe purvaroop and sadhya asadhyata of Kasa	CC	MK	KH	L&PP T	T-CS	F&S	II	
CO1	Describe the differential diagnosis of Kasa based on kapha	CC	MK	KH	L&PP	T-CS	F&S	II	

	lakshana				T				
CO1	Describe the differential diagnosis of Kshayaja kasa and Rajayakshma	CC	MK	KH	L&G D	T-CS	F&S	II	
CO1	Describe the differential diagnosis of Kshataja kasa and kshata ksheena	CC	MK	KH	L&G D	T-CS	F&S	II	
CO1	Differentiate Doshaja kasa	CC	MK	KH	DIS	INT	F&S	II	
<b>Topic 15 15. Rajayakshma &amp; Shosha</b> (Lecture :3 hours, Non lecture: 0 hours)									
CO1	Describe Rajayakshma vyadhi swabhava	CC	DK	KH	L&PP T	INT	F&S	II	
CO1	Describe hetu and samprapti of Rajayakshma	CC	DK	KH	L&G D	M-CHT	F&S	II	
CO1	Enlist bheda of Rajayakshma	CK	DK	K	L&PP T	QZ	F&S	II	
CO1	Explain tri roopa, shad roopa, ekadasha roopa, and sadhyasadhyata of Rajayakshma	CC	DK	KH	L&PP T	INT	F&S	II	
CO1	Classify and describe Ashta shosha	CC	DK	KH	L&PP T	INT	F&S	II	
<b>Topic 16 16. Common lung disorders</b> (Lecture :1 hours, Non lecture: 4 hours)									
CO2	Describe the clinical features of Pneumonia, Chronic Obstructive Pulmonary Disease, Pleural effusion, and Bronchiectasis	CC	DK	KH	L_VC ,RP,D _BED	INT	F&S	II	
CO3	Perform relevant clinical examination of Pneumonia, Chronic Obstructive Pulmonary Disease, Pleural effusion, and Bronchiectasis	PSY- GUD	DK	SH	L_VC	OSCE	F&S	II	

CO4	Order and interpret relevant investigations of Pneumonia, Chronic Obstructive Pulmonary Disease, Pleural effusion, and Bronchiectasis	CAP	DK	KH	XRy, LRI	T-CS	F&S	II	
<b>Topic 17 17. Jwara</b> (Lecture :4 hours, Non lecture: 1 hours)									
CO1	Define and enlist types of Jwara based on vidhi samprapti	CK	MK	K	L&PP T	QZ	F&S	II	
CO1	Describe nidana, samprapti, samanya poorvaroopo, vishishta poorvaroopo, pratyatma lakshana and samprapti of Doshaja jwara	CC	MK	KH	L&G D	PUZ,INT	F&S	II	
CO1	Describe Doshaja jwara along with sannipataja jwara according to Charaka	CC	MK	KH	L&G D	PUZ,INT	F&S	II	
CO1	Describe Abhishanga jwara, Vishama jwara, and Punaravartaka jwara	CC	MK	KH	L&PP T	T-CS	F&S	II	
CO1	Explain Antarvega, Bhahirvega jwara, Vata balasaka and Pralapaka jwara	CC	MK	KH	L&PP T	INT	F&S	II	
CO1	Differentiate Ama, Pachyamana and Nirama jwara lakshana	CC	MK	KH	L&G D	CL-PR	F&S	II	
CO1	Analyze Agantu and Doshaja jawara with reference to Jwara samprapti	CAN	MK	KH	DIS	INT	F&S	II	
CO1	Describe sadhyasadhyata of Jwara	CC	MK	KH	L&PP T	INT	F&S	II	
CO1	Enlist Jwara mukta lakshana	CK	MK	K	L&PP T	QZ	F&S	II	
<b>Topic 18 18. Masurika – Romantika</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1	Enlist nidana of Masurika	CK	NK	K	L&PP	QZ	F&S	II	

					T				
CO1	Describe samprapti of Masurika	CC	NK	KH	L&G D	INT	F&S	II	
CO1	Enlist bheda of Masurika	CC	NK	KH	L&PP T	QZ	F&S	II	
CO1	Explain the avasthika lakshana of Masurika	CC	NK	KH	L&PP T	INT	F&S	II	
CO1	Enlist features of Romantika	CK	NK	K	L&PP T	QZ	F&S	II	
<b>Topic 19 19. Fever</b> (Lecture :1 hours, Non lecture: 6 hours)									
CO2	Describe the organism, incubation period, and mode of transmission of Measles virus, Varicella-zoster virus and Herpes zoster, Coxsackie virus, Rubella virus, various Malaria parasites, Influenza virus, Dengue virus, Leptospira, Chikungunya virus, Salmonella and causative agents of other common regional disorders presenting with fever	CC	DK	KH	L_VC ,FC	WP,INT	F&S	II	
CO2	Describe the clinical features of Measles, Chicken pox and Herpes zoster, Hand foot mouth disease, Rubella, Malaria, Filariasis, Influenza, Dengue, Leptospirosis, Chikungunya, and Typhoid	CC	DK	KH	L_VC ,RP	T-CS	F&S	II	
CO2	Describe the common regional disorders presenting with fever	CC	DK	KH	L&G D	T-CS	F&S	II	
CO2	Describe the complications of Measles, Chicken pox and Herpes zoster, Hand foot mouth disease, Rubella, Malaria, Filariasis, Influenza, Dengue, Leptospirosis, Chikungunya, Typhoid, and other common regional disorders presenting with fever	CC	DK	KH	TUT	INT	F&S	II	

CO3	Perform relevant clinical examination related to Measles, Chicken pox and Herpes zoster, Hand foot mouth disease, Rubella, Malaria, Filariasis, Influenza, Dengue, Leptospirosis, Chikungunya, Typhoid, and other common regional disorders presenting with fever	PSY-GUD	DK	SH	L_VC	OSCE	F&S	II	
CO4	Order and interpret relevant investigations related to Measles, Chicken pox and Herpes zoster, Hand foot mouth disease, Rubella, Malaria, Filariasis, Influenza, Dengue, Leptospirosis, Chikungunya, Typhoid, and other common regional disorders presenting with fever	CAP	DK	SH	LRI	T-CS	F&S	II	
<b>Topic 20 20. Pandu</b> (Lecture :2 hours, Non lecture: 0 hours)									
CO1	Describe pratyatma lakshana of Pandu	CC	MK	KH	L&PP T	PUZ	F&S	II	
CO1	Describe hetu and samprapti of Pandu	CC	MK	KH	L&PP T	INT	F&S	II	
CO1	Enlist bheda of Pandu	CC	MK	KH	L&PP T	QZ	F&S	II	
CO1	Describe purvaroop of Pandu	CC	MK	KH	L&PP T	INT	F&S	II	
CO1	Enlist upadrava of Pandu	CK	MK	K	L&PP T	QZ	F&S	II	
CO1	Describe sadhya asadhyata of Pandu	CC	MK	KH	L&PP T	INT	F&S	II	
CO1	Explain Pancha pandu	CC	MK	KH	L&PP T	T-CS	F&S	II	

CO1	Differentiate Doshaja pandu	CC	MK	KH	L&G D	CL-PR	F&S	II	
<b>Topic 21 21. Raktapitta</b> (Lecture :1 hours, Non lecture: 1 hours)									
CO1	Define Raktapitta and mention the rakta pravrutti marga	CK	MK	K	L&PP T	QZ	F&S	II	
CO1	Explain the swabhava of Raktapitta	CC	MK	KH	DIS	INT	F&S	II	
CO1	Enlist bheda of Raktapitta	CK	MK	KH	L&PP T	QZ	F&S	II	
CO1	Describe nidana, samprapti, purvaroop, vishishta lakshana of Raktapitta	CC	MK	KH	L&G D	T-CS	F&S	II	
CO1	Enlist upadrava of Raktapitta	CK	MK	KH	L&PP T	PUZ	F&S	II	
CO1	Describe sadhya asadyata of Raktapitta	CC	MK	KH	DIS	INT	F&S	II	
<b>Topic 22 22. Hematopoietic diseases</b> (Lecture :1 hours, Non lecture: 6 hours)									
CO2	Describe the clinical features of anaemia, nutritional anaemia, thalassemia, sickle cell anaemia, leukaemia, and thrombocytopenia	CC	DK	KH	L_VC ,RP	WP	F&S	II	
CO4	Order and interpret relevant investigations of anaemia, nutritional anaemia, thalassemia, sickle cell anaemia, leukaemia, and thrombocytopenia	CAP	DK	KH	L&G D,LRI	T-CS	F&S	II	
CO2	Describe the differential diagnosis of anaemia, nutritional anaemia, thalassemia, sickle cell anaemia, leukaemia, and thrombocytopenia	CC	DK	KH	L&G D,PB L	PRN	F&S	II	
<b>Topic 23 23. Hridroga</b> (Lecture :1 hours, Non lecture: 1 hours)									

CO1	Describe hetu and samprapti of Hridroga	CC	DK	KH	L&G D	QZ	F&S	II	
CO1	Enlist bheda of Hridroga	CK	DK	KH	L&PP T	PUZ	F&S	II	
CO1	Analyze samanya lakshana of Hridroga	CAN	DK	KH	DIS	T-CS	F&S	II	
CO1	Describe vishishta lakshana of Hridroga	CC	DK	KH	L&PP T	INT	F&S	II	
CO1	Enlist upadrava of Hridroga	CK	DK	KH	L&PP T	WP	F&S	II	
<b>Topic 24 24. Shotha</b> (Lecture :2 hours, Non lecture: 0 hours)									
CO1	Describe hetu of Shotha	CC	MK	KH	L&G D	O-QZ	F&S	II	
CO1	Enlist bheda of Shotha	CK	MK	KH	L&PP T	O-QZ	F&S	II	
CO1	Describe vidhi samprapti of shotha	CC	MK	KH	DIS	O-GAME	F&S	II	
CO1	Describe purvaroopta, vishishta lakshana, samprapti and sadhya asadhyata of Nija shotha	CC	MK	KH	L&G D	INT	F&S	II	
CO1	Differentiate Doshaja shotha	CC	MK	KH	L&G D	INT	F&S	II	
<b>Topic 25 25. Cardiovascular disorders</b> (Lecture :1 hours, Non lecture: 5 hours)									
CO2	Describe the clinical features of Coronary Artery Disease (Ischemic Heart Disease, and Myocardial Infarction) and Congestive cardiac failure	CC	DK	KH	L_VC ,RP	C-VC	F&S	II	V-KC

CO3	Perform relevant clinical examination of Coronary Artery Disease (Ischemic Heart Disease, and Myocardial Infarction) and Congestive cardiac failure	PSY-GUD	DK	SH	L_VC ,SIM	OSCE	F&S	I	
CO4	Order and interpret relevant investigations of Coronary Artery Disease (Ischemic Heart Disease, and Myocardial Infarction) and Congestive cardiac failure	CAP	DK	KH	L&G D,LRI	O-QZ	F&S	II	
<b>Topic 26 26. Kamala</b> (Lecture :2 hours, Non lecture: 0 hours)									
CO1	Define Kamala	CK	MK	K	L&PP T	QZ	F&S	II	
CO1	Describe hetu and samprapti of Kamala	CC	MK	KH	L&G D	INT	F&S	II	
CO1	Classify Kamala on the basis of vidhi samprapti of Kamala	CC	MK	KH	L&PP T	INT	F&S	II	
CO1	Differentiate Koshta shakhashrita and Shakhashrita Kamala	CC	MK	KH	DIS	PRN	F&S	II	
CO1	Enlist upadrava of Kamala	CK	MK	KH	L&PP T	QZ	F&S	II	
CO1	Describe sadhya asadhyata of Kamala	CC	MK	KH	TUT	M-CHT	F&S	II	
CO1,CO5	Describe Swatantra-Paratantra Kamala, Alpapitta-Bahupitta Kamala	CC	MK	KH	L&PP T	INT	F&S	II	
<b>Topic 27 27. Udara Roga</b> (Lecture :2 hours, Non lecture: 1 hours)									
CO1	Explain pratyatma lakshana of Udara	CC	MK	KH	L&PP T	PUZ	F&S	II	
CO1	Describe hetu and samprapti of Udara	CC	MK	KH	L&G D	WP	F&S	II	

CO1	Enlist bheda of Udara	CK	MK	K	L&PP T	QZ	F&S	II	
CO1,CO5	Describe purvaroop, samanya lakshana and sadhya asadhyata of Udara	CC	MK	KH	L&PP T	T-CS	F&S	II	
CO1	Explain avastha bheda of Udara	CC	MK	KH	DIS	PRN	F&S	II	
CO1,CO5	Differentiate Doshaja udara	CC	MK	KH	L&G D	M-CHT	F&S	II	
CO1,CO5	Explain Vishishta lakshana of Baddha gudodara, Pleehodara, Jalodara and Chidrodara	CC	MK	KH	L&PP T	M-CHT	F&S	II	
<b>Topic 28 28. Hepatobiliary diseases</b> (Lecture :1 hours, Non lecture: 2 hours)									
CO2,CO5	Describe the clinical features of Liver cirrhosis, Alcoholic and Non - Alcoholic Liver Disease, Hepatitis, Jaundice and Ascites	CC	DK	KH	L_VC ,RP	C-VC	F&S	II	
CO3	Perform relevant clinical examination of Liver cirrhosis, Alcoholic and Non - Alcoholic Liver Disease, Hepatitis, Jaundice and Ascites	PSY- GUD	DK	SH	L_VC ,D_B ED	OSCE	F&S	II	
CO4	Order and interpret relevant investigations of Liver cirrhosis, Alcoholic and Non - Alcoholic Liver Disease, Hepatitis, Jaundice and Ascites	CAP	DK	SH	L&G D,LRI	PRN	F&S	II	
CO2,CO5	Describe the differential diagnosis of Liver cirrhosis, Alcoholic and Non - Alcoholic Liver Disease, Hepatitis, Jaundice and Ascites	CC	DK	KH	L&G D,PB L	M-CHT	F&S	II	
<b>Topic 29 29. Kushtha - Maha Kushtha &amp; Kshudra Kushtha (According to Charaka)</b> (Lecture :3 hours, Non lecture: 1 hours)									
CO1	Define Kushtha	CK	MK	K	L&PP T	O-QZ	F&S	III	

CO1	Describe hetu and samprapti of Kushtha	CC	MK	KH	L&G D	COM	F&S	III	
CO1	Enlist bheda of Maha Kushtha & Kshudra Kushtha	CK	MK	K	L&PP T	O-QZ	F&S	III	
CO1	Describe purvaroop of Kushtha	CC	MK	KH	L&G D	INT	F&S	III	
CO1,CO5	Describe vishishta lakshana of Maha Kushtha & Kshudra Kushtha	CC	MK	KH	L&PP T,CD	O-GAME	F&S	III	
CO1,CO5	Describe dosha anusara Kushtha lakshana	CC	MK	KH	L&G D	M-POS	F&S	III	
CO1	Describe sadhya asadhyata of Maha Kushtha & Kshudra Kushtha	CC	MK	KH	L&PP T	O-QZ	F&S	III	
CO1,CO5	Differentiate Maha kushtha & Kshudra kushtha	CC	MK	KH	DIS	CL-PR	F&S	III	
<b>Topic 30 30. Sheetapitta</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1	Describe Sheetapitta samprapti	CC	MK	KH	L&PP T	M-CHT	F&S	III	
CO1,CO5	Describe Sheetapitta and Udarda lakshana	CC	MK	KH	L&PP T	QZ	F&S	III	
CO1	Describe Kotha lakshana	CC	MK	KH	L&PP T	QZ	F&S	III	
CO1,CO5	Differentiate Sheetapitta and Udarda	CC	MK	KH	DIS	QZ	F&S	III	
<b>Topic 31 31. Shwitra</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1	Enlist types of Shwitra	CK	MK	K	L&PP	O-QZ	F&S	III	

					T				
CO1,CO5	Describe lakshana and sadhya asadhyata of Shwitra	CC	MK	KH	L&PP T	INT	F&S	III	
<b>Topic 32 32. Visarpa</b> (Lecture :2 hours, Non lecture: 0 hours)									
CO1	Define Visarpa	CK	MK	K	L&PP T	O-QZ	F&S	III	
CO1	Describe hetu and samprapti of Visarpa	CC	MK	KH	L&G D	M-CHT	F&S	III	
CO1	Enlist bheda of Visarpa	CK	MK	K	L&PP T	QZ	F&S	III	
CO1,CO5	Describe purvaroop of visarpa, features of Bahya and Abhyantara visarpa and sadhya asadhyata of Visarpa	CC	MK	KH	L&PP T	PRN	F&S	III	
CO1,CO5	Differentiate Doshaja Visarpa	CC	MK	KH	DIS	INT	F&S	III	
CO1,CO5	Explain Agni, Kardama and Granthi visarpa	CC	MK	KH	L&PP T	T-CS	F&S	III	
<b>Topic 33 33. Skin diseases</b> (Lecture :1 hours, Non lecture: 6 hours)									
CO2,CO5	Describe the clinical features of Allergic disorders - Eczema, Urticaria; Squamous lesions - Psoriasis, Lichen planus; Bullous lesion – Pemphigus and Pemphigoid; Mycotic skin diseases; Leprosy; Vitiligo; Cellulitis	CC	DK	KH	L_VC	C-VC	F&S	III	
CO3	Perform relevant clinical examination of Allergic disorders - Eczema, Urticaria; Squamous lesions - Psoriasis, Lichen planus; Bullous lesion – Pemphigus and Pemphigoid; Mycotic skin diseases; Leprosy; Vitiligo; Cellulitis	PSY-GUD	DK	SH	L_VC ,D_B ED	OSCE	F&S	III	

CO4	Order and interpret relevant investigations of Allergic disorders - Eczema, Urticaria; Squamous lesions - Psoriasis, Lichen planus; Bullous lesion – Pemphigus and Pemphigoid; Mycotic skin diseases; Leprosy; Vitiligo; Cellulitis	CAP	DK	SH	L&G D,LRI	INT	F&S	III	
<b>Topic 34 34. Galaganda</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1	Describe pratyatma lakshana and samprapti of Galaganda	CC	NK	KH	L&PP T	PUZ	F&S	III	
<b>Topic 35 35. Thyroid disorders</b> (Lecture :1 hours, Non lecture: 1 hours)									
CO2,CO5	Describe the clinical features of Hypothyroidism and hyperthyroidism	CC	DK	KH	L_V _VC ,RP	M-POS	F&S	III	
CO3	Perform relevant clinical examination of Hypothyroidism and hyperthyroidism	PSY- GUD	DK	SH	L_V _VC ,D_B ED	OSCE	F&S	III	
CO4	Order and interpret relevant investigations of Hypothyroidism and hyperthyroidism	CAP	DK	SH	L&G D,LRI	SP	F&S	III	
<b>Topic 36 36. Sthoulya – Karshya</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1	Describe nidana of Sthoulya and Karshya	CC	MK	KH	L&PP T	T-OBT	F&S	III	
CO1	Describe samprapti of Sthoulya	CC	MK	KH	L&G D	M-CHT	F&S	III	
CO1,CO5	Describe samanya and vishista lakshana of Sthoulya	CC	MK	KH	L&PP T	QZ	F&S	III	
CO1,CO5	Describe samanya lakshana of Karshya	CC	MK	KH	L&PP T	O-QZ	F&S	III	

CO1	Describe upadrava of Sthoulya	CC	MK	KH	L&PP T	O-QZ	F&S	III	
CO1,CO5	Differential diagnosis of Karshya	CC	MK	KH	DIS	CL-PR	F&S	III	
<b>Topic 37 37. Obesity</b> (Lecture :1 hours, Non lecture: 1 hours)									
CO2,CO5	Describe the clinical features of Obesity	CC	DK	KH	FC	WP	F&S	III	H-SW
CO3	Perform relevant clinical examination of Obesity	PSY- GUD	DK	SH	L_VC ,D_B ED	OSCE	F&S	III	
CO4	Order and interpret relevant investigations of Obesity	CAP	DK	SH	PBL, LRI	INT	F&S	III	
CO2,CO5	Describe the differential diagnosis of Obesity	CC	DK	KH	L&G D,PB L	INT	F&S	III	
<b>Topic 38 38. Prameha</b> (Lecture :2 hours, Non lecture: 1 hours)									
CO1	Describe pratyatma lakshana of Prameha	CC	MK	KH	L&PP T	PUZ	F&S	III	
CO1	Describe hetu and samprapti of Prameha	CC	MK	KH	L&G D	M-CHT	F&S	III	
CO1	Enlist bheda of Prameha	CK	MK	K	L&PP T	QZ	F&S	III	
CO1,CO5	Describe purvaroop, vishishta lakshana, upadrava and sadhya asadhyata of Prameha	CC	MK	KH	L&PP T	PRN	F&S	III	
<b>Topic 39 39. Diabetes Mellitus and Pancreatitis</b> (Lecture :1 hours, Non lecture: 1 hours)									

CO2,CO5	Describe the clinical features of Diabetes Mellitus and Pancreatitis	CC	DK	KH	L&G D,CB L	INT	F&S	III	
CO2	Describe the complications of Diabetes Mellitus and Pancreatitis	CC	DK	KH	L_VC	T-CS	F&S	III	
CO3	Perform relevant clinical examination of Diabetes Mellitus and Pancreatitis	PSY- GUD	DK	SH	L_VC ,D_B ED	OSCE	F&S	III	
CO4	Order and interpret relevant investigations of Diabetes Mellitus and Pancreatitis	CAP	DK	SH	L&G D,LRI	SP	F&S	III	
CO2,CO5	Describe Pancreatitis induced Diabetes mellitus (Fibrocalculous pancreatic Diabetes)	CC	DK	KH	L&G D	INT	F&S	III	
<b>Topic 40 40. Vatavyadhi</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1,CO5	Describe nidana, samanya purvaroop, and samanya lakshana of Vatavyadhi	CC	MK	KH	L&PP T	QZ	F&S	III	
<b>Topic 41 41. Snayugata vata</b> (Lecture :4 hours, Non lecture: 2 hours)									
CO1	Define Akshepaka	CK	MK	K	L&PP T	QZ	F&S	III	
CO1	Enlist Snayugata vata	CK	MK	K	L&PP T	QZ	F&S	III	
CO1,CO5	Describe Akshepaka	CC	MK	KH	L_VC	C-VC	F&S	III	
CO1	Enlist Akshepaka bheda	CK	MK	K	L&PP T	QZ	F&S	III	
CO1	Explain Akshepaka Samprapti	CC	MK	KH	L&G D	M-CHT	F&S	III	

CO1,CO5	Describe Apatanaka	CC	MK	KH	L&PP T	INT	F&S	III	
CO1	Enlist Apatanaka bheda	CK	MK	K	L&PP T	QZ	F&S	III	
CO1,CO5	Describe Dandapatanaka, Antarayama and Bahirayama	CC	MK	KH	L&PP T,CB L	C-VC	F&S	III	
CO1	Define Ardita	CK	MK	K	L&PP T	O-QZ	F&S	III	
CO1,CO5	Describe Ardita, samprapti of Ardita and lakshana of Ardita	CC	MK	KH	L_VC	INT, C-VC	F&S	III	
CO1	Compare Ardita according to Charaka and Sushruta	CC	MK	KH	DIS	C-VC	F&S	III	
CO1	Enlist Sadyasadyata of Ardita	CK	MK	K	L&PP T	INT	F&S	III	
CO1	Define Pakshaghata	CK	MK	K	L&PP T	QZ	F&S	III	
CO1,CO5	Describe Pakshaghata samprapti, and Pakshaghata lakshana	CC	MK	KH	L&G D,CD	C-VC	F&S	III	
CO1,CO5	Describe Kampavata	CC	MK	KH	L_VC	C-VC	F&S	III	
CO1,CO5	Describe Gridhrasi and Vishwachi with its lakshana	CC	MK	KH	CBL	T-CS	F&S	III	
CO1,CO5	Describe differential diagnosis of Gridhrasi and Viswachi	CC	MK	KH	L&G D	INT	F&S	III	
CO1,CO5	Describe Pangutwa	CC	MK	KH	L_VC	C-VC	F&S	III	
CO1,CO5	Differentiate Khanja with Gridhrasi	CC	MK	KH	L&G	C-VC	F&S	III	

					D				
<b>Topic 42 42. Common neurologic and spine disorders</b> (Lecture :2 hours, Non lecture: 4 hours)									
CO2,CO5	Describe the clinical features of Common neurologic diseases: Parkinson's disease, Stroke, Bell's Palsy, Motor Neuron Disease, Transverse myelitis, Epilepsy (Organic) and Common Spine disorders: Lumbago- Sciatica syndrome, Brachial neuralgia, Cervical and Lumber Spondylosis	CC	DK	KH	L_VC ,RP	C-VC	F&S	III	
CO3	Perform relevant clinical examination of Common neurologic diseases: Parkinson's disease, Stroke, Bell's Palsy, Motor Neuron Disease, Transverse myelitis, Epilepsy (Organic) and Common Spine disorders: Lumbago- Sciatica syndrome, Brachial neuralgia, Cervical and Lumber Spondylosis	PSY- GUD	DK	SH	L_VC ,D_B ED	OSCE	F&S	III	
CO4	Order and interpret relevant investigations of Common neurologic diseases: Parkinson's disease, Stroke, Bell's Palsy, Motor Neuron Disease, Transverse myelitis, Epilepsy (Organic) and Common Spine disorders: Lumbago- Sciatica syndrome, Brachial neuralgia, Cervical and Lumber Spondylosis	CAP	DK	SH	L&G D,LRI	INT	F&S	III	
<b>Topic 43 43. Sandhigatavata and Asthi majja gata vata</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1,CO5	Describe Sandhigatavata	CC	MK	KH	L_VC	C-VC	F&S	III	
CO1,CO5	Describe Katigraha and Manyastambha	CC	MK	KH	L&PP T	INT	F&S	III	
CO1,CO5	Explain Vatakantaka	CC	MK	KH	L&PP T	T-CS	F&S	III	
CO1,CO5	Describe Avabahuka and Amsashosha	CC	MK	KH	L&PP T	INT	F&S	III	

CO1,CO5	Describe the differential diagnosis of Avabahuka with Vishwachi	CC	MK	KH	L&G D	QZ	F&S	III	
CO1,CO5	Describe Asthi-majjagata vata	CC	MK	KH	L&PP T	INT	F&S	III	
<b>Topic 44 44. Diseases of bone, joints, and muscles</b> (Lecture :1 hours, Non lecture: 2 hours)									
CO2,CO5	Describe the clinical features of Diseases of bone and Joints - Osteoarthritis, Osteoporosis, Frozen Shoulder, Calcaneal spur/ Plantar fasciitis, Tennis elbow, Carpel tunnel syndrome; Muscular diseases - Muscular Dystrophy	CC	DK	KH	L_VC	C-VC	F&S	III	
CO3	Perform relevant clinical examination of Diseases of bone and Joints - Osteoarthritis, Osteoporosis. Frozen Shoulder, Calcaneal spur/ Plantar fasciitis, Tennis elbow, Carpel tunnel syndrome; Muscular diseases - Muscular Dystrophy	PSY- GUD	DK	SH	L_VC ,D_B ED	OSCE	F&S	III	
CO4	Order and interpret relevant investigations of Diseases of bone and Joints - Osteoarthritis, Osteoporosis. Frozen Shoulder, Calcaneal spur/ Plantar fasciitis, Tennis elbow, Carpel tunnel syndrome; Muscular diseases - Muscular Dystrophy	CAP	DK	SH	L&G D,XR ay,LR I	INT	F&S	III	
<b>Topic 45 45. Amavata</b> (Lecture :2 hours, Non lecture: 0 hours)									
CO1	Describe hetu and samprapti of Amavata	CC	MK	KH	L&PP T	M-CHT	F&S	III	
CO1	Enlist bheda of Amavata	CK	MK	K	L&PP T	QZ	F&S	III	
CO1,CO5	Describe samanya lakshana, vishishta lakshana, upadrava and sadhya asadhyata of Amavata	CC	MK	KH	L_VC	C-VC	F&S	III	
<b>Topic 46 46. Vatarakta</b> (Lecture :2 hours, Non lecture: 1 hours)									

CO1	Define Vatarakta with its synonyms	CK	MK	K	L&PP T	O-QZ	F&S	III	
CO1	Describe hetu and samprapti of Vatarakta	CC	MK	KH	L&G D	M-CHT	F&S	III	
CO1	Explain Samprapti of Avasthika Vatarakta	CC	MK	KH	L&G D	INT	F&S	III	
CO1,CO5	Enlist and explain vidhi samprapti of Vatarakta	CC	MK	KH	L&G D	INT	F&S	III	
CO1,CO5	Enlist and explain bheda of doshaja Vatarakta	CC	MK	KH	L&G D	T-CS	F&S	III	
CO1,CO5	Describe purvaroop, upadrava, and sadhya asadhyata of Vatarakta	CC	MK	KH	L&PP T	INT	F&S	III	
CO1,CO5	Describe the differential diagnosis of Sandhigata vata, Amavata and Vata rakta	CC	MK	KH	L&G D	T-CS,INT	F&S	III	
<b>Topic 47 47. Immunological &amp; Metabolic disorders</b> (Lecture :1 hours, Non lecture: 2 hours)									
CO2,CO5	Describe the clinical features of Rheumatic fever, Rheumatoid arthritis, SLE, Ankylosing spondylitis, Gout	CC	DK	KH	L_VC ,RP	C-VC	F&S	III	
CO3	Perform relevant clinical examination of Rheumatic fever, Rheumatoid arthritis, SLE, Ankylosing spondylitis, Gout	PSY- GUD	DK	SH	L_VC ,D_B ED	OSCE	F&S	III	
CO4	Order and interpret relevant investigations of Rheumatic fever, Rheumatoid arthritis, SLE, Ankylosing spondylitis, Gout	CAP	DK	SH	L&G D,LRI	T-CS	F&S	III	
CO2,CO5	Describe the differential diagnosis of Arthritis	CC	DK	KH	L&G D,PB L	T-CS	F&S	III	

<b>Topic 48 48. Klaibya &amp; Vandhyatva</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1	Describe Klaibya and vandhyatva	CC	NK	KH	L&PP T	QZ	F&S	III	
CO1	Enlist types of Klaibya and Vandhyatva	CK	NK	K	L&PP T	QZ	F&S	III	
<b>Topic 49 49. Sexual dysfunction and Infertility</b> (Lecture :1 hours, Non lecture: 1 hours)									
CO2	Order and interpret relevant investigations of Sexual dysfunction and Infertility	CAP	NK	SH	L&G D,LRI	T-CS	F&S	III	
CO2	Describe differential diagnosis of Sexual dysfunction and Infertility	CC	NK	KH	L&G D	INT	F&S	III	V-SP
<b>Topic 50 50. Unmada &amp; Apasmara</b> (Lecture :3 hours, Non lecture: 0 hours)									
CO1	Explain nirukti of Unmada and Apasmara	CC	NK	KH	L&PP T	O-QZ	F&S	III	
CO1	Explain pratyatmalakshana of Unmada and Apasmara	CC	NK	KH	L&PP T	PUZ	F&S	III	
CO1	Describe hetu and samprapti of Unmada and Apasmara	CC	NK	KH	L&G D	M-CHT	F&S	III	
CO1	Enlist bheda of Unmada and Apasmara	CK	NK	K	L&PP T	QZ	F&S	III	
CO1	Describe samanya lakshana of Unmada and Apasmara	CC	NK	KH	L&G D,L_ VC	QZ , C-VC	F&S	III	
<b>Topic 51 51. Vishada</b> (Lecture :1 hours, Non lecture: 0 hours)									

CO1	Define Vishada	CK	NK	K	L&PP T	QZ	F&S	III	
<b>Topic 52 52. Murchha, and Sanyasa</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1	Describe the Utpadaka hetu of Murchha, and Sanyasa	CC	NK	KH	L&PP T	INT	F&S	III	
CO1	Describe samprapti of Murchha, and Sanyasa	CC	NK	KH	L&G D	M-CHT	F&S	III	
<b>Topic 53 53. Common Psychiatric diseases</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO2,CO5	Describe clinical manifestation of Depression, Anxiety neurosis and Epilepsy (Non-organic)	CC	NK	KH	L&PP T	QZ	F&S	III	
CO2,CO5	Differentiate Depression, Anxiety neurosis, and Epilepsy (Non-organic)	CC	NK	KH	L&G D	CL-PR	F&S	III	
CO3	Perform mental status examination for Depression, Anxiety neurosis, and Epilepsy (Non-organic)	PSY- GUD	NK	SH	L_V ,D_B ED	INT	F&S	III	
<b>Topic 54 54. Phiranga and Upadamsha</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1	Describe nidana of Phiranga and Upadamsha	CC	NK	KH	L&PP T	QZ	F&S	III	
CO1	Explain the Upadamsha samprapti	CC	NK	KH	L&PP T	M-CHT	F&S	III	
CO1	Enlist the types of Phiranga	CK	NK	K	L&PP T	QZ	F&S	III	
<b>Topic 55 55. Syphilis &amp; Gonorrhoea</b> (Lecture :1 hours, Non lecture: 1 hours)									

CO2	Describe causative factors, and clinical features of Syphilis and Gonorrhoea	CC	NK	KH	L&G D	T-CS	F&S	III	
CO2	Describe differential diagnosis of Syphilis and Gonorrhoea	CC	NK	KH	FC	T-CS	F&S	III	
CO4	Order and interpret relevant investigation of Syphilis and Gonorrhoea	CAP	NK	SH	L&G D,LRI	INT	F&S	III	
<b>Topic 56 56. Krimiroga</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1	Describe hetu of Krimiroga	CC	NK	KH	L&PP T	O-QZ	F&S	III	
CO1	Enlist bheda of Krimiroga	CK	NK	K	L&PP T	O-QZ	F&S	III	
CO1	Describe samanya lakshana of Krimiroga	CC	NK	KH	L&PP T	O-GAME	F&S	III	
<b>Topic 57 57. Clinical presentation of common parasitic disorders</b> (Lecture :1 hours, Non lecture: 2 hours)									
CO2,CO5	Describe the clinical presentation of Hook worm, Round worm, Thread worm, and Pin worm	CC	DK	KH	L_VC	C-VC	F&S	III	
CO3	Perform relevant examination of clinical presentation of Hook worm, Round worm, Thread worm, and Pin worm	PSY- GUD	DK	SH	L&PP T	INT	F&S	III	
CO4	Order and interpret relevant investigations of clinical presentation of Hook worm, Round worm, Thread worm, and Pin worm	CAP	DK	SH	L&G D,LRI	T-CS	F&S	III	
<b>Topic 58 58. Khalitya &amp; Palitya</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1	Describe Khalitya and Palitya	CC	NK	KH	L&PP T	O-QZ	F&S	III	

<b>Topic 59 59. Shleepada</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1	Describe nidana and samprapti of Shleepada	CC	NK	KH	L&PP T	M-CHT	F&S	III	
CO1	Enlist bheda of Shleepada	CK	NK	K	L&PP T	QZ	F&S	III	
CO1	Enlist features of Shleepada	CK	NK	K	L&PP T	O-QZ	F&S	III	
<b>Topic 60 60. Tuberculosis</b> (Lecture :1 hours, Non lecture: 2 hours)									
CO2,CO5	Describe the clinical presentation of Tuberculosis	CC	DK	KH	L_VC	INT, C-VC	F&S	III	H-SW
CO3	Perform relevant clinical examination of Tuberculosis	PSY- GUD	DK	SH	L&PP T	INT	F&S	III	
CO4	Order and interpret relevant investigations of clinical presentation of Tuberculosis	CAP	DK	SH	L&G D,LRI	INT	F&S	III	

**List of Practicals** (Term and Hours)

<b>PRACTICALS (Marks-100)</b>			
<b>S.No</b>	<b>List of Topics</b>	<b>Term</b>	<b>Hours</b>
1	1. Aptopadesha Pareeksha/Prashna Pareeksha	1	10
2	2. Introduction to case sheet. Pratyaksha and Anumana Pareeksha.	1	10
3	3. General clinical and Systemic examination -A	1	20
4	4. General clinical and Systemic examination - B	1	20
5	5. Common Symptomatology of different systems	2	20
6	6. Vyavachedaka nidana/ Differential diagnosis	2	4
7	7. Case presentation	2	40
8	8. Introduction to Diagnostic procedures - Hematology, Biochemistry, Microbiology, Urine, Stool	2	26
9	9. Introduction to Electro Cardio Gram (ECG), Different imaging techniques	2	10
10	10. Introduction to Histopathology	2	4
11	11. Study of Histopathology Specimens	3	4
12	12. Retas pareeksha	3	2
13	13. Pathology practical (Perform/ Observation/ Interpretation)	3	40

**Table 4: Learning objectives (Practical)**

<b>A4</b> Course outcome	<b>B4</b> Learning Objective (At the end of the session, the students should be able to)	<b>C4</b> Doma in/sub	<b>D4</b> Must to know / desirable to know / Nice to know	<b>E4</b> Level Does/ Shows how/ Knows how/ Know	<b>F4</b> T-L meth od	<b>G4</b> Assessment  (Refer abbreviations)	<b>H4</b> Form ative/ summ ative	<b>I4</b> Term	<b>K4</b> Integr ation
<b>Topic 1 1. Aptopadesha Pareeksha/Prashna Pareeksha</b>									
CO3,CO5	Perform Aptopadesha pareeksha, Prashna pareeksha or History taking mentioned in Ayurveda and contemporary medical literature for drawing clinical diagnosis and prognosis	PSY-GUD	MK	KH	D_BE D	CHK,RK	F&S	I	
CO7,CO8	Adopt and reflect ward ethics and communication skills while engaging in the process of examination	AFT-RES	MK	SH	SIM	SP,RK	F&S	I	
<b>Topic 2 2. Introduction to case sheet. Pratyaksha and Anumana Pareeksha.</b>									
CO3,CO5	Perform Darshanendriya, Sparshanendriya, Srotrendriya pareeksha mentioned in Ayurveda and contemporary medical literature for drawing clinical diagnosis and prognosis	PSY-GUD	MK	SH	D_BE D	P-CASE	F&S	I	
CO5	Perform Ghranendriya, & infer Rasanendriyataha pareeksha mentioned in Ayurveda and contemporary medical literature for drawing clinical diagnosis and prognosis	CAN	MK	KH	SIM	P-CASE,RK	F&S	I	
CO5,CO7	Report the findings of patient through structured case sheet	CC	MK	KH	CD	P-CASE,RK	F&S	I	
CO3,CO5	Perform Nadi pareeksha as per Ayurveda classics for identifying predominance of dosha.	PSY-GUD	MK	SH	D_BE D	P-PRF	F&S	I	

<b>Topic 3 3. General clinical and Systemic examination -A</b>									
CO3,CO5	Perform general examination and various systemic examination - General physical examination, Nervous system, Musculo skeletal system, Gastro intestinal system, Respiratory system, Integumentary system, Uro-genital system, Cardiovascular system, etc. (Inspection, Palpation, Percussion, Auscultation)	PSY-GUD	MK	SH	SIM, D_BE D	CL-PR,OSCE ,RK	F&S	I	
<b>Topic 4 4. General clinical and Systemic examination - B</b>									
CO3,CO5	Interpret the findings of general examination and various systemic examination - General physical examination, Nervous system, Musculo skeletal system, Gastro intestinal system, Respiratory system, Integumentary system, Uro-genital system, Cardiovascular system, etc. (Inspection, Palpation, Percussion, Auscultation)	CAP	MK	SH	SIM	SP,RK	F&S	I	
<b>Topic 5 5. Common Symptomatology of different systems</b>									
CO2,CO5	Describe the causes and mechanism of manifestation of Pain abdomen, Edema, Diarrhea, Dysentery, Dehydration and Constipation, Hiccough, Breathlessness, Cough, Vomiting, Joint pain with or without swelling Differential Diagnosis, Neck and Low back pain radiating to corresponding limb, Hematuria, Stroke in various case scenarios	CC	DK	KH	L_VC	COM	F&S	II	
CO2,CO5	Investigate the causes and mechanism of manifestation of Pain abdomen, Edema, Diarrhea, Dysentery, Dehydration and Constipation, Hiccough, Breathlessness, Cough, Vomiting, Joint pain with or without swelling, Neck and Low back pain radiating to corresponding limb, Hematuria, Stroke in various case scenarios	AFT-RES	DK	SH	IBL,P BL	INT	F&S	II	
<b>Topic 6 6. Vyavachedaka nidana/ Differential diagnosis</b>									

CO5	Infer diagnosis and prognosis based on a given clinical scenario	CAN	MK	KH	PBL, CD	SP	F&S	II	
CO5	Apply hypothetic-deductive model of clinical reasoning, Pattern recognition model, dual process diagnostic reasoning model, pathway for clinical reasoning model, integrative model of clinical reasoning model, model of diagnostic reasoning strategies in primary care for clinical diagnosis	CAP	DK	SH	SIM, CD	INT,SP	F&S	II	
CO5	Apply intuitive and analytical approach in clinical decision making	CAP	DK	SH	PBL,S IM,C D	SP	F&S	II	
CO5	Perform clinical diagnosis using these clinical reasoning models	PSY- GUD	DK	SH	SIM, CD	SP	F&S	II	
<b>Topic 7 7. Case presentation</b>									
CO5,CO7	Demonstrate case presentation skills	PSY- GUD	MK	SH	L_VC ,D_B ED	P-CASE,CL- PR	F&S	II	
<b>Topic 8 8. Introduction to Diagnostic procedures - Hematology, Biochemistry, Microbiology, Urine, Stool</b>									
CO4,CO5,CO 6	Order and interpret Diagnostic procedures - Haematology, Biochemistry, Microbiology, Urine, and Stool.	CAP	MK	SH	PBL, LRI	T-CS	F&S	II	
CO3	Suggest patient's preparation for Diagnostic procedures - Haematology, Biochemistry, Microbiology, Urine, and Stool	AFT- RES	MK	SH	L&PP T	SP	F&S	II	
CO3	Perform sample collection for Diagnostic procedures - Haematology, Biochemistry, Microbiology, Urine, and Stool	PSY- GUD	MK	SH	SIM	SP,RK	F&S	II	
<b>Topic 9 9. Introduction to Electro Cardio Gram (ECG), Different imaging techniques</b>									
CO4,CO5,CO	Order and interpret given report for Electro Cardio Gram (ECG)	CAP	DK	SH	L&PP	P-ID,CL-PR	F&S	II	

6	and different imaging techniques				T, XRay				
CO3	Suggest patient's preparation for Electro Cardio Gram (ECG) and different imaging techniques	AFT-RES	DK	SH	L&PPT	INT,SP	F&S	II	
<b>Topic 10 10. Introduction to Histopathology</b>									
CO4,CO5,CO6	Order and interpret tests for Histopathology specimens	CAP	NK	SH	LRI	INT	F&S	III	
<b>Topic 11 11. Study of Histopathology Specimens</b>									
CO4,CO5	Distinguish and describe prepared histopathology specimens of Lung and trachea/ Blood, Spleen and lymph/ Heart and vessels/ Glands/ Liver (Provide normal and abnormal slides to distinguish while deomonstration and spotting)	AFT-RES	NK	SH	D_L	P-ID	F&S	III	
<b>Topic 12 12. Retas pareeksha</b>									
CO1,CO5	Describe and interpret retas pareeksha	CC	DK	KH	D_L	INT	F&S	III	
<b>Topic 13 13. Pathology practical (Perform/ Observation/ Interpretation)</b>									
CO4,CO5,CO6	Order and interpret Hb, RBC Count, WBC count, Haematocrit, Platelet count, Differential count, RBC indices and ESR* - Haematology Analyser through Flow cytometry technique	CAP	MK	SH	CBL	INT,RK	F&S	III	
CO3	Perform Hb, RBC Count, WBC count, Haematocrit, Platelet count, Differential count, RBC indices procedure through - Haematology Analyser or Cell counter through Flow cytometry technique	PSY-GUD	MK	SH	PT	P-PRF	F&S	III	
CO4,CO5,CO6	Order and interpret Urine physical examination (Appearance, colour, odour)	CAP	MK	SH	LRI	INT	F&S	III	

CO3	Perform Urine physical examination ( <u>Appearance, colour, odour</u> ) through <u>Visual method</u>	PSY-GUD	MK	SH	CBL, PT	P-PRF	F&S	III	
CO4,CO5,CO6	Order and interpret Urine physical and chemical examination (Urine specific gravity, Urine-ph, Sugar, Albumin, Bile pigment, Bile salt, Occult blood, Ketone, Urobilinogen) - Multistix (Urine test strips)	CAP	MK	SH	CBL, LRI	INT,RK	F&S	III	
CO3	Perform Urine physical and chemical examination (Urine specific gravity, Urine-ph, Sugar, Albumin, Bile pigment, Bile salt, Occult blood, Ketone, Urobilinogen) - Multistix (Urine test strips) (Create or simulate abnormal samples to demonstrate positive results)	PSY-GUD	MK	SH	PRA	P-PRF	F&S	III	
CO4,CO5,CO6	Order and interpret Urine Microscopic Examination (Epithelial cells, RBCs, Leukocytes, Casts, Crystals) - Light microscopy on centrifuged sediment	CAP	MK	SH	CBL, LRI	INT	F&S	III	
CO3	Perform Urine Microscopic Examination (Epithelial cells, RBCs, Leukocytes, Casts, Crystals by Light microscopy on centrifuged sediment)	PSY-GUD	MK	SH	PRA	P-PRF	F&S	III	
CO4,CO5,CO6	Order and interpret Liver Function Test (LFT) (Total Bilirubin, Direct – indirect bilirubin, SGOT, SGPT, ALK Phosphates, T Protein, Albumin, Globulin, A/G Ratio) -Semi-automated/ fully automated biochemical analyser through Photometry	CAP	NK	SH	CBL, LRI	INT	F&S	III	
CO2	Describe Liver Function Test (LFT) (Total Bilirubin, Direct – indirect bilirubin, SGOT, SGPT, ALK Phosphates, T Protein, Albumin, Globulin, A/G Ratio) procedure through demonstration	CC	DK	KH	D_L	INT	F&S	III	

	- Semi-automated/ fully automated biochemical analyser through Photometry								
CO2	Explain the principle and mechanism of functioning of biochemical analyzer	CC	DK	KH	D_L	QZ	F&S	III	
CO4,CO5,CO6	Order and interpret Renal Function Test (RFT) (Urea, Creatinine, Uric acid) - Semi-automated/ fully automated biochemical analyser through Photometry	CAP	MK	SH	CBL, LRI	INT,RK	F&S	III	
CO4,CO5,CO6	Order and interpret Diabetic profile (Blood Glucose-FBS, PPBS, RBS. HbA1C, Insulin, C-peptide) - Semi-automated/ fully automated biochemistry analyser/ ELISA reader through Photometry/ immunoturbidometry/ELISA Technique	CAP	MK	SH	CBL, LRI	INT,RK	F&S	III	
CO4,CO5,CO6	Order and interpret Thyroid profile (TSH, T3, T4, F T3, F T4) - ELISA Reader/ CLIA through ELISA/ CLIA Technique	CAP	MK	KH	CBL, LRI	INT	F&S	III	
CO2	Describe Thyroid profile (TSH, T3, T4, F T3, F T4) procedure through demonstration - ELISA Reader/ CLIA through ELISA/ CLIA Technique	CAP	DK	KH	D_L	QZ	F&S	III	
CO4,CO5,CO6	Order and interpret Lipid profile (Cholesterol, HDL, LDL, TG) - Semi-automated/ fully automated biochemical analyser through Photometry	CAP	MK	SH	CBL, LRI	INT,RK	F&S	III	
CO4,CO5,CO6	Order and interpret Peripheral smear (Malaria, Microfilaria) - Microscopy through Leishmans staining	CAP	MK	SH	CBL, LRI	INT,RK	F&S	III	
CO2	Describe Peripheral smear (Malaria, Microfilaria) procedure through demonstration - Microscopy through Leishmans staining	CC	DK	KH	D_L	QZ	F&S	III	
CO4,CO5,CO6	Order and interpret RA factor (qualitative), WIDAL (qualitative), VDRL (qualitative), ASO (qualitative) and CRP (qualitative) - Microscopy (if required) through Latex agglutination/	CAP	MK	SH	CBL, LRI	INT,RK	F&S	III	

	Turbidometry								
CO3	Perform RA factor (qualitative), WIDAL (qualitative), VDRL (qualitative), ASO (qualitative) and CRP (qualitative) - Microscopy (if required) through Latex agglutination/ Turbidometry	PSY-GUD	MK	SH	PRA	P-PRF	F&S	III	
CO4,CO5,CO6	Order and interpret Stool examination (Colour, Consistency) - Visual method	CAP	NK	SH	CBL, LRI	INT,RK	F&S	III	
CO2	Describe Stool examination (Colour, Consistency) - Visual method	CC	DK	KH	D_L	INT	F&S	III	
CO4,CO5,CO6	Order and interpret Stool examination (Ova , Cyst, Pus cells) - Microscopy through Wet smear (saline and iodine)	CAP	NK	SH	CBL, LRI	INT,RK	F&S	III	
CO2	Describe Stool examination (Ova , Cyst, Pus cells) - Microscopy through Wet smear (saline and iodine)	CC	DK	KH	D_L	INT	F&S	III	
CO4,CO5,CO6	Order and interpret Semen examination (Colour, Liquefaction, Viscosity) - Visual method	CAP	DK	SH	CBL, LRI	INT,RK	F&S	III	
CO2	Describe Semen examination (Colour, Liquefaction, Viscosity) procedure through demonstration - Visual method	CC	DK	KH	D_L	INT	F&S	III	
CO4,CO5,CO6	Order and interpret Semen examination (Sperm count, Motility, Morphology) - Microscopy through Cytometry/ Wet smear/ stained smear	CAP	DK	SH	CBL, LRI	INT,RK	F&S	III	
CO2	Describe Semen examination (Sperm count, Motility, Morphology) procedure through demonstration - Microscopy through Cytometry/ Wet smear/ stained smear	CC	DK	KH	D_L	INT,COM	F&S	III	
CO4,CO5,CO6	Order and interpret BT, CT, Prothrombin Time - Coagulometer	CAP	MK	SH	CBL, LRI	INT,RK	F&S	III	

**Table 4a: List of Practical**

<b>S.No</b>	<b>Name of practical</b>	<b>Term</b>	<b>Activity</b>	<b>Practical hrs</b>
<b>1</b>	1. Aptopadesha Pareeksha/Prashna Pareeksha	1	History taking/ Ward ethics/ Communication skills	10
<b>2</b>	2. Introduction to case sheet. Pratyaksha and Anumana Pareeksha.	1	Darshanendriya, Sparshanedriya, Srotrendriya & Ghranendriya & Rasanendriyataha pareeksha. General principle of systemic examination – Inspection, Palpation, Percussion, Auscultation	10
<b>3</b>	3. General clinical and Systemic examination -A	1	Demonstration on patients and using simulators, software or applications	20
<b>4</b>	4. General clinical and Systemic examination - B	1	General and Systemic examination	20
<b>5</b>	5. Common Symptomatology of different systems	2	Pain abdomen, Edema, Diarrhea, Dysentery, Dehydration and constipation, Hiccough, Breathlessness, Cough, Vomiting, Joint pain with or without swelling Differential Diagnosis, Neck and Low back pain radiating to corresponding limb, Hematuria, Stroke Differential Diagnosis	20
<b>6</b>	6. Vyavachedaka nidana/ Differential diagnosis	2	Clinical reasoning models	4
<b>7</b>	7. Case presentation	2	Demonstrating and presenting steps of clinical diagnosis	40
<b>8</b>	8. Introduction to Diagnostic procedures - Hematology, Biochemistry, Microbiology, Urine, Stool	2	A. Order an investigation B. Patient's preparation C. Sample collection	26
<b>9</b>	9. Introduction to Electro Cardio Gram (ECG), Different imaging techniques	2	Order and interpret reports related to ECG and Diagnostic imaging	10
<b>10</b>	10. Introduction to Histopathology	2	Order and Interpret	4

<b>11</b>	11. Study of Histopathology Specimens	3	Prepared histopathology specimens to be demonstrated, observed and studied (Lung and trachea/ Blood, Spleen and lymph/ Heart and vessels/ Glands/ Liver)	4
<b>12</b>	12. Retas pareeksha	3	Interpret observations derived from reto pareeksha	2
<b>13</b>	13. Pathology practical (Perform/ Observation/ Interpretation)	3	13.1 Hematology (Discipline) - Hemogram (Profile) 13.2 Clinical pathology (Discipline) - Urine Physical Examination (Profile) 13.3 Clinical pathology (Discipline) - Urine Physical and Chemical Examination (Profile) 13.4 Clinical pathology (Discipline) - Urine Microscopic Examination (Profile) 13.5 Clinical biochemistry (Discipline) - Liver Function Test (LFT) (Profile) 13.6 Clinical biochemistry (Discipline) - Renal Function Test (RFT) (Profile) 13.7 Clinical biochemistry (Discipline) - Diabetic profile (Profile) 13.8 Clinical biochemistry (Discipline) - Thyroid profile (Profile) 13.9 Clinical biochemistry (Discipline) - Lipid profile (Profile) 13.10 Clinical Pathology/ Haematology (Discipline) - Peripheral Smear (Profile) 13.11 Serology (Discipline) - RA Factor/ WIDAL (Profile) 13.12 Clinical Pathology (Discipline) - Stool examination (Profile) 13.13 Clinical Pathology (Discipline) - Stool examination (Profile) 13.14 Clinical Pathology (Discipline) - Semen examination (Profile) 13.15 Serology (Discipline) - Coagulation test (Profile)	40

### Activity

CO	Topic name	Activity Details	Hours #
CO1,CO2,CO3,CO4,CO6,CO7,CO8	<p>1. Assessment of Dosha Vikriti:</p> <p>A. Nidana (Vyadhi janaka hetu)</p> <p>B. Agni bheda and Vikriti</p> <p>C. Dosha Vriddhi, Kshaya and Dushta Karma, Samsargaja, Sannipataja.</p> <p>D. Dosha swabhava - Nityasamshleshita (Leena) dosha and Parichedita dosha</p> <p>E. Paridhavamana dosha</p>	<p>Survey : After the completion of the topic the students are instructed to identify:</p> <p>The contemporary etiologies for the nidana or hetu are mentioned in various contexts as a part of case diagnosis.</p> <p>Identify Dosha Vriddhi, Kshaya and Dushta Karma, Samsargaja, Sannipataja features as a part of Case diagnosis.</p> <p>Minimum - 5 cases</p>	6
CO1,CO2	<p>2. Dhatu Paka</p> <p>A. Ojodusti lakshana</p> <p>B. Asatmya - Immune pathology,</p> <p>C. Cell Injury and Cellular Adaptations</p> <p>D. Inflammation</p> <p>E. Hemodynamic disorders</p> <p>F. Neoplasia</p>	<p>Creating video presentations (5 to 7 minutes):</p> <p>After understanding the basic concepts:</p> <p>Group of 5 students together are instructed to prepare one quality educational video with current research updates in the field in a structured format and submit the same to the instructor.</p> <p>Topics of Ayurveda and various contemporary learning objectives defined can be provided for the same.</p> <p>The topics for video presentations should be selected from the subtopics, it can be regarding a specific point or research update or collection</p>	5

		<p>and summary of scientific articles, etc. which will be assisting in clinical practice.</p> <p>The video presentations should be submitted to create a repository and presented to the department.</p>	
CO2	3. Infection and Nutritional disorders	<p>Class presentations:</p> <p>Group activity with self-directed learning:</p> <p>Students are instructed to compile the subtopics given to the group.</p> <p>Prepare a PPT presentation and present it in class with the groups.</p> <p>10 min. for presentation and 5 min for question answers for each group.</p> <p>Topics to be covered in the presentation:</p> <p>A) The detailed knowledge of specific organisms, infectious disease symptomatology, and diagnostic procedures with recent advancements and challenges in diagnosis. B) Nutritional disorders with the thought of understanding the spectrum of signs and symptoms with Ayurveda literature, methods to diagnose in contemporary science, complications, etc.</p> <p>Monitored by instructors or mentors assigned for each group.</p>	2
CO6	4. Digital health and Artificial intelligence in the context of Roganidana	<p>Poster making:</p> <p>After a basic understanding of the topic, the students are instructed to prepare Posters regarding the use of Information and Communication Technology and other recent digital developments in understanding diagnosis, prognosis, and developing repositories related to morbidities or Roganidana Evum Vikriti Vigyan in the current era aiding for academics and</p>	1

		clinical practice. Similarly, the implementation of artificial intelligence in diagnosis and prognosis also can be prepared.	
CO1,CO2,CO3,CO4,CO6,CO7,CO8	5. Methods of Rogi pareeksha	<p>Demonstration bed side:</p> <p>After understanding the core concepts of pareeksha the student will be Demonstrated regarding various pareekshas before performing the same in practical session.</p> <p>The students are supposed to observe the same, receive, understand and imitate the methods demonstrated.</p> <p>Students will be assigned with the mentioned topics as a part of the activity by the instructor in minimum 5 simulated patients or patients.</p>	5
CO6	6. Vyadhinamakarana	<p>Demonstration:</p> <p>The instructor will be demonstrating the operations of the NAMASTE (National AYUSH Morbidity and Standardized Terminologies Electronic Portal) portal.</p> <p>The student should observe and implement the same for reporting terminologies or diagnosis. The instructor can give modified data indicating the disease diagnosis with masked patient details for mentioning the allotted codes of diseases or conditions from NAMASTE portal and WHO international standard terminologies on Ayurveda or A list of common diseases prevailing in the area can be given to the students to search the portal and mention the codes by themselves.</p> <p>Students can be assigned with any of the mentioned topics as a part of the activity by the instructor.</p>	1

CO2,CO3,CO6,CO7,CO8	<p>7. Perform relevant clinical examinations in the following disorders:</p> <p>Gastrointestinal disorders: Ulcerative and Non-ulcerative dyspepsia, Irritable Bowel Syndrome, Inflammatory Bowel Diseases.</p> <p>Urinary disorders: Urinary Tract Infection, Prostatomegaly, Nephrotic syndrome, Nephritic syndrome, Acute Kidney Injury and Chronic Kidney Disease.</p> <p>Respiratory disorders: Pneumonia, Chronic Obstructive Pulmonary Disease, Pleural effusion and Bronchiectasis.</p> <p>Measles, Chickenpox and herpes zoster, Hand foot mouth disease, Rubella, Malaria, Filariasis, Influenza, Dengue, Leptospirosis, Chikungunya, Typhoid, and other common regional disorders presenting with fever.</p> <p>Coronary Artery Disease (Ischemic Heart Disease, and Myocardial Infarction) and Congestive cardiac failure.</p> <p>Hepatobiliary diseases - Liver cirrhosis, Alcoholic and Non - Alcoholic Liver Diseases, Hepatitis, Jaundice, and Ascites.</p>	<p>Demonstration bedside (Simulated patients):</p> <p>The students will be instructed to observe the bedside demonstration activity by the instructor, followed by students imitating or performing the same activity relevant to the condition associated.</p> <p>The case study will be written in the activity book.</p>	8
---------------------	---	---	---

Allergic disorders -  
Eczema, Urticaria;  
Squamous lesions -  
Psoriasis, Lichen planus;  
Bullous lesion –  
Pemphigus and  
Pemphigoid. Mycotic skin  
diseases. Leprosy.  
Vitiligo. Cellulitis.

Hypothyroidism and  
hyperthyroidism.

Obesity.

Diabetes Mellitus and  
Pancreatitis.

Common neurologic  
diseases: Parkinson's  
disease, Stroke, Bell's  
Palsy, Motor Neuron  
Disease, Transverse  
myelitis, Epilepsy  
(Organic)

Common Spine disorders:  
Lumbago- Sciatica  
syndrome, Brachial  
neuralgia, Cervical and  
Lumber Spondylosis.

Diseases of bone and  
Joints - Osteoarthritis,  
Osteoporosis. Frozen  
Shoulder, Calcaneal spur/  
Plantar fasciitis, Tennis  
elbow, Carpel tunnel  
syndrome.

Muscular diseases -  
Muscular Dystrophy.  
Rheumatic fever,  
Rheumatoid arthritis,  
SLE, Ankylosing  
spondylitis, Gout.

Mental status examination  
for Depression, Anxiety  
neurosis and Epilepsy

	<p>(Non - organic).</p> <p>Common parasitic infestations: Hookworm, Roundworm, Threadworm, and Pinworm.</p>		
CO4,CO6,CO7,CO8	<p>8. Order and interpret relevant investigations with the clinical correlation of the following disorders:</p> <p>Gastrointestinal disorders: Ulcerative and Non-ulcerative dyspepsia, Irritable Bowel Syndrome, Inflammatory Bowel Diseases.</p> <p>Urinary Tract Infection, Prostatomegaly, Nephrotic syndrome, Nephritic syndrome, Acute Kidney Injury, and Chronic Kidney Disease.</p> <p>Pneumonia, Chronic Obstructive Pulmonary Disease, Pleural effusion, and Bronchiectasis.</p> <p>Measles, Chicken pox and Herpes zoster, Hand foot mouth disease, Rubella, Malaria, Filariasis, Influenza, Dengue, Leptospirosis, Chikungunya, Typhoid, and other common regional disorders presenting with fever.</p> <p>Anaemia, Nutritional anaemia, Thalassemia, Sickle cell anaemia, Leukaemia, and</p>	<p>Lab report interpretation:</p> <p>Students will be given a clinical scenario or a case or report in the respective training hour.</p> <p>Based on the training given the students are expected to draw a provisional diagnosis based on the Lab report interpretation.</p> <p>The same has to be recorded in the activity book</p>	8

Thrombocytopenia.

Coronary Artery Disease (Ischemic Heart Disease, and Myocardial Infarction) and Congestive cardiac failure.

Hepatobiliary diseases - Liver cirrhosis, Alcoholic and Non - Alcoholic Liver Diseases, Hepatitis, Jaundice, and Ascites.

Allergic disorders - Eczema, Urticaria; Squamous lesions - Psoriasis, Lichen planus; Bullous lesion – Pemphigus and Pemphigoid. Mycotic skin diseases. Leprosy. Vitiligo. Cellulitis.

Hypothyroidism and hyperthyroidism. Obesity. Diabetes Mellitus and Pancreatitis. Common neurologic diseases: Parkinson's disease, Stroke, Bell's Palsy, Motor Neuron Disease, Transverse myelitis, Epilepsy (Organic).

Common Spine disorders: Lumbago - Sciatica syndrome, Brachial neuralgia, Cervical and Lumber Spondylosis.

Diseases of bone and Joints - Osteoarthritis, Osteoporosis. Frozen Shoulder, Calcaneal spur/ Plantar fasciitis, Tennis elbow, Carpel tunnel syndrome.

	<p>Muscular diseases - Muscular Dystrophy.</p> <p>Rheumatic fever, Rheumatoid arthritis, SLE, Ankylosing spondylitis, Gout.</p> <p>Sexual dysfunction and Infertility. Syphilis and Gonorrhoea.</p> <p>Parasitic infestations: Hookworm, Roundworm, Threadworm, and Pinworm.</p> <p>Tuberculosis</p>		
CO1,CO2	<p>9. Differential diagnosis:</p> <p>Differentiate between Atisara and Pravahika.</p> <p>Differentiate Atisara and Grahani Roga.</p> <p>Differentiate Grahani dosha and Grahani Roga.</p> <p>Describe the differential diagnosis of Ulcerative and Non-ulcerative dyspepsia, Irritable Bowel Syndrome, and Inflammatory Bowel Diseases.</p> <p>Enlist conditions of Mutra shoshana (Kshaya and Aukasada) and Mutra pratihanyate (Avarodha) among different types of Mutraghata.</p> <p>Describe different types of Mutraghata.</p>	<p>Problem-Based Learning:</p> <p>The students will be grouped for PBL sessions with a specific topic from the topic list given.</p> <p>At the end of the session, the groups will present in class.</p> <p>Peer learning will also be achieved with this activity.</p>	10

Differentiate  
Mootrakrichra and  
Mootraghata.

Describe the differential  
diagnosis of Pneumonia,  
Chronic Obstructive  
Pulmonary Disease,  
Pleural effusion, and  
Bronchiectasis.

Describe the differential  
diagnosis of Measles,  
Chicken pox and Herpes  
zoster, Hand foot mouth  
disease, Rubella, Malaria,  
Filariasis, Influenza,  
Dengue, Leptospirosis,  
Chikungunya, Typhoid  
and other common  
regional disorders  
presenting with fever.

Describe the differential  
diagnosis of Anaemia,  
Nutritional anemia,  
Thalassemia, Sickle cell  
anemia, Leukaemia, and  
Thrombocytopenia.

Describe the differential  
diagnosis of Coronary  
Artery Disease (Ischemic  
Heart Disease, and  
Myocardial Infarction)  
and Congestive cardiac  
failure.

Describe the differential  
diagnosis of Hepatobiliary  
diseases - Liver cirrhosis,  
Alcoholic and Non -  
Alcoholic Liver Diseases,  
Hepatitis, Jaundice, and  
Ascites.

Describe the differential  
diagnosis of  
Hypothyroidism and  
hyperthyroidism.

Describe the differential diagnosis of Obesity.

Describe the differential diagnosis of Diabetes Mellitus and Pancreatitis.

Describe the differential diagnosis of Common neurologic diseases: Parkinson's disease, Stroke, Bell's Palsy, Motor Neuron Disease, Transverse myelitis, Epilepsy (Organic), and Common Spine disorders: Lumbago- Sciatica syndrome, Brachial neuralgia, Cervical, and Lumber Spondylosis.

Describe the differential diagnosis of Diseases of bone and Joints - Osteoarthritis, Osteoporosis. Frozen Shoulder, Calcaneal spur/ Plantar fasciitis, Tennis elbow, Carpel tunnel syndrome, and Muscular diseases - Muscular Dystrophy.

Describe the differential diagnosis of Rheumatic fever, Rheumatoid arthritis, SLE, Ankylosing spondylitis, and Gout.

Describe differential diagnosis of Sexual dysfunction and Infertility.

Describe differential diagnosis of Syphilis and Gonorrhoea.

Describe the differential

	<p>diagnosis of clinical presentation of Hookworm, Roundworm, Threadworm, and Pinworm.</p> <p>Describe the differential diagnosis of the clinical presentation of Tuberculosis.</p>		
CO2,CO5	<p>10. Clinical features - Role plays in learning:</p> <p>Describe the clinical features of Ulcerative and Non-ulcerative dyspepsia, Irritable Bowel Syndrome, and Inflammatory Bowel Diseases.</p> <p>Describe the clinical features of Urinary Tract Infection, Prostatomegaly, Nephrotic syndrome, Nephritic syndrome, Acute Kidney Injury, and Chronic Kidney Disease.</p> <p>Describe the clinical features of Pneumonia, Chronic Obstructive Pulmonary Disease, Pleural effusion, and Bronchiectasis.</p> <p>Describe the clinical features of Measles, Chicken pox and Herpes zoster, Hand foot mouth disease, Rubella, Malaria, Filariasis, Influenza, Dengue, Leptospirosis, Chikungunya, typhoid, and other common regional disorders presenting with fever.</p>	<p>Role plays:</p> <p>Role plays are an effective method of teaching to create a real-world scenario in a controlled manner.</p> <p>In this certain group of students will be trained for pre-class preparation regarding a disease or condition to be presented in the class in front of small cluster groups of students.</p> <p>Further, the groups are asked to interact with the performing student to understand more about a condition and use their clinical acumen to diagnose the condition moderated by an instructor.</p>	10

Describe the complications of Measles, Chicken pox and Herpes zoster, Hand foot mouth disease, Rubella, Malaria, Filariasis, Influenza, Dengue, Leptospirosis, Chikungunya, Typhoid, and other common regional disorders presenting with fever.

Describe the clinical features of Anaemia, Nutritional anemia, Thalassemia, Sickle cell anemia, Leukaemia, and Thrombocytopenia.

Describe the clinical features of Coronary Artery Disease (Ischemic Heart Disease, and Myocardial Infarction) and Congestive cardiac failure.

Describe the clinical features of Hepatobiliary diseases - Liver cirrhosis, Alcoholic and Non - Alcoholic Liver Diseases, Hepatitis, Jaundice, and Ascites.

Describe the clinical features of Hypothyroidism and hyperthyroidism.

Describe the clinical features of Diabetes Mellitus and Pancreatitis.

Describe the clinical features of Common neurologic diseases: Parkinson's disease, Stroke, Bell's Palsy,

	<p>Motor Neuron Disease, Transverse myelitis, Epilepsy (Organic), and Common Spine disorders: Lumbago- Sciatica syndrome, Brachial neuralgia, Cervical, and Lumber Spondylosis.</p> <p>Describe the clinical features of Diseases of bone and Joints - Osteoarthritis, Osteoporosis. Frozen Shoulder, Calcaneal spur/ Plantar fasciitis, Tennis elbow, Carpel tunnel syndrome, and Muscular diseases - Muscular Dystrophy.</p> <p>Describe the clinical features of Rheumatic fever, Rheumatoid arthritis, SLE, Ankylosing spondylitis, and Gout.</p>		
CO4,CO6,CO8	<p>11. Field visits:</p> <p>Visit to Pathology laboratory and Diagnostic imaging center.</p>	<p>Visit: Students are instructed to visit at least one pathology laboratory and one imaging center; observe the procedures followed. Record the observations and submit the report to the instructor.</p>	10

# Hours indicated are included in calculations of Table 3 and 4

**Table 5- Teaching learning method**

Sr No	Teaching learning methods in the course	No of Activities
1	Lecture	2
2	Lecture with Power point presentation	222
3	Lecture & Group Discussion	133

4	Lecture with Video clips	45
5	Discussions	16
6	Brainstorming	3
7	Inquiry-Based Learning	4
8	PBL	14
9	CBL	9
10	Project-Based Learning	16
11	Team project work	2
12	Flipped classroom	4
13	Blended Learning	3
14	Edutainment	2
15	Simulation	1
16	Role plays	10
17	Self-directed learning	6
18	Problem solving method	1
19	Recitation	31
20	Tutorial	3
21	Presentations	3
22	X ray identification	2
23	Case diagnosis	3
24	Lab report interpretation	18
25	Demonstration	2
26	Demonstration bedside	15
27	Demonstration Lab	1

These are overall teaching learning methods listed in Table 3 and 4. Teachers can select the best possible method amongst the given methods as per objective, available time etc.

**Table 6: Assessment Summary: Assessment is subdivided in A to H points**

### 6 A-Number of Papers and Marks Distribution

Subject Code	Papers	Theory	Practical/Clinical Assessment					Grand
			Practical	Viva	Elective	IA	Sub	

							<b>Total</b>	<b>Total</b>
AyUG- RN	2	200	100	70	-	30	200	400

**6 B - Scheme of Assessment (formative and Summative)**

<b>PROFESSIONAL COURSE</b>	<b>DURATION OF PROFESSIONAL COURSE</b>		
	<b>First Term (1-6 Months)</b>	<b>Second Term (7-12 Months)</b>	<b>Third Term (13-18 Months)</b>
Second	3 PA & First TT	3 PA & Second TT	3 PA & UE **

**PA:** Periodical Assessment; **TT:** Term Test; **UE:** University Examinations.

\*\* University Examination shall be on entire syllabus

## 6 C - Calculation Method for Internal assessment Marks

TERM	PERIODICAL ASSESSMENT*					TERM TEST**	TERM ASSESSMENT	
	A 3	B	C	D	E	F	G	H
	1 (15 Marks)	2 (15 Marks)	3 (15 Marks)	Average (A+B+C/3)	Converted to 30 Marks (D/15*30)	Term Test (Marks converted to 30)	Sub Total _/60 Marks	Term Assessment (.../30)
FIRST							E+F	(E+F)/2
SECOND							E+F	(E+F)/2
THIRD						NIL		E
<b>Final IA</b>	Average of Three Term Assessment Marks as Shown in 'H' Column.							
	Maximum Marks in Parentheses *Select an Evaluation Method which is appropriate for the objectives of Topics from the Table 6 D for Periodic assessment. Conduct 15 marks assessment and enter marks in A, B, and C. ** Conduct Theory (100 Marks)(MCQ(20*1 Marks), SAQ(8*5), LAQ(4*10)) and Practical (100 Marks) Then convert to 30 marks.							

## 6 D - Evaluation Methods for Periodical Assessment

S. No	Evaluation Methods
1	Activities Indicated in Table 3 - Column G3 as per Indicated I, II or III term in column I3

### Evaluation Methods in MSE

1. Practical / Clinical Performance
2. Viva Voce, MCQs, MEQ (Modified Essay Questions/Structured Questions)
3. Open Book Test (Problem Based)
4. Summary Writing (Research Papers/ Samhitas)
5. Class Presentations; Work Book Maintenance
6. Problem Based Assignment
7. Objective Structured Clinical Examination (OSCE), Objective Structured Practical Examination (OPSE), Mini Clinical Evaluation Exercise (Mini-CEX), Direct Observation of Procedures (DOP), Case Based Discussion (CBD)

## 6 E Question Paper Pattern

### II PROFESSIONAL BAMS EXAMINATIONS AyUG-RN

#### PAPER-1

Time: 3 Hours Maximum Marks: 100

INSTRUCTIONS: All questions compulsory

		<b>Number of Questions</b>	<b>Marks per question</b>	<b>Total Marks</b>
Q 1	MULTIPLE CHOICE QUESTIONS (MCQ)	20	1	20
Q 2	SHORT ANSWER QUESTIONS (SAQ)	8	5	40
Q 3	LONG ANSWER QUESTIONS (LAQ)	4	10	40
				100

Similar for Paper II

## 6 F Distribution of theory examination

<b>Paper 1 Fundamental Principles of Vikriti Vigyan</b>						
<b>Sr. No</b>	<b>A List of Topics</b>	<b>B Term</b>	<b>C Marks</b>	<b>MCQ (1 Mark)</b>	<b>SAQ (5 Marks)</b>	<b>LAQ (10 Marks)</b>

## 6 H Distribution of Practical Exam

S.No	Heads	Marks
1	<p><b>Spotting/ Identification: (10 Questions X 3 Marks = 30 Marks): (Note: Minimum of one spotting should be kept mandatorily from all the different heads mentioned below)</b></p> <p><b>X-Ray/ECG/ Clinical sign picture/ Slide/ Diagnostic report/ Causative factors</b></p> <p><b>X-Ray (Assessment format):</b></p> <p>On a given X-Ray film (Any of the below):</p> <ul style="list-style-type: none"> <li>• Comment on inspiration and rotation (chest), position, penetration or exposure, and artifacts in a given X-Ray film</li> <li>• Find out the abnormal findings or sign that indicates a specific condition (By assessing size, shape, density, and location of structures) – Airway/ Bones and soft tissue/ Cardiac/ Diaphragm/ Effusion/ Gastric bubble/ Hila and mediastinum)</li> </ul> <p><b>ECG (Assessment format):</b></p> <p>On a given Electro Cardio Gram (Any of the below):</p> <ul style="list-style-type: none"> <li>• Determine and comment on rhythm and rate (Paper and pencil method/ Caliper method/ 10-times method/ 1500 method)</li> <li>• P wave interpretation (Location/ Amplitude/ Duration/ Configuration/ Deflection)</li> <li>• PR interval interpretation (Location and duration)</li> <li>• QRS complex interpretation (Location/ Amplitude/ Duration/ Configuration/ Deflection)</li> <li>• ST segment interpretation (Location and deflection)</li> <li>• T wave interpretation (Location/ Amplitude/ Configuration/ Deflection)</li> </ul> <p><b>Clinical sign/ image or picture (Assessment format):</b></p> <p>On a given image of a patient with sign (Any of the below):</p> <ul style="list-style-type: none"> <li>• Identify the sign</li> <li>• Possible aetiologies behind the case</li> <li>• Possible investigations for further confirmation of a case</li> <li>• Differential diagnosis</li> <li>• Diagnose the condition or disease associated with the sign</li> </ul> <p><b>Slide (Assessment format):</b></p> <p>Identify and mention the provisional diagnosis of (Any of the below):</p> <ul style="list-style-type: none"> <li>• Haematology (Peripheral blood smear)</li> <li>• Histopathology (Lung and trachea/ Blood, Spleen and lymph/ Heart and vessels/ Glands/ Liver)</li> <li>• Stool microscopy (Ova, Cyst, Pus cells)</li> </ul>	30

	<ul style="list-style-type: none"> <li>• Urine microscopy (Epithelial cells, RBCs, Leukocytes, Casts, Crystals)</li> <li>• Microbiology (Bacterial identification – Shape, Gram+ve/ Gram –ve)</li> <li>• Parasitology (Slide/ Specimen)</li> </ul> <p><b>Diagnostic report (Assessment format):</b> Interpret the report and mention the provisional diagnosis (Any of the below):</p> <ul style="list-style-type: none"> <li>• Hemogram</li> <li>• Liver Function Test (LFT)</li> <li>• Renal Function Test (RFT)</li> <li>• Diabetic profile</li> <li>• Thyroid profile</li> <li>• Lipid profile</li> </ul> <p><b>Causative factors/ Hetu (Assessment format):</b> Mention the disease or diseases that are associated with the cause or hetu (Shown as an object/ model/ specimen/ picture) with brief justification (Any of the below):</p> <ul style="list-style-type: none"> <li>• Any specific diet</li> <li>• Any specific regimen</li> <li>• Any specific factor mentioned for causing a disease</li> </ul>	
2	<p><b>Long Case: History taking, Examination, Investigation (Order and interpretation), Differential Diagnosis, Provisional Diagnosis (1 Case X 40 Marks = 40 Marks)</b></p> <p><b>a. History taking (Including communication skills) - 10 Marks</b></p> <p>History taking should cover the following points:</p> <ul style="list-style-type: none"> <li>• AturaVivara (Basic patient details)</li> <li>• Pradhana Vedana with Kala prakarsha (Chief complaints with duration)</li> <li>• Vartamana vyadhi vruttant (History of present illness)</li> <li>• Poorva vyadhi Vrittanta (Past illness)</li> <li>• Kula vruttanta (Family history)</li> <li>• Chikitsa Vruttanta (Treatment history)</li> <li>• Vayaktika Vruttanta (Personal history) – Ahara, Vihara, Vyasana, Vyayama shakti, Mala pravritti, Mutra pravritti, Raja pravritti, Koshtha, Nature of work and duration of work, Emotional makeup, and Social Relation.</li> </ul> <p><b>b. Examination &amp; Order and interpretation of investigations – 20 Marks</b></p> <p>The examination should include the following points:</p> <ul style="list-style-type: none"> <li>• General examination including Ashtasthana pareeksha</li> <li>• Systemic examination - Pratyaksha and Anumana Pariksha/ Panchajnanendriyataha Pareeksha (Affected system/ systems), Sroto pareeksha and Mana pareeksha</li> </ul>	40

	<p>Investigations should include the following points: • Ordered investigation to patient</p> <ul style="list-style-type: none"> <li>• Any further comment on the previously ordered investigations and any further suggestions</li> <li>• Interpretation of ordered investigation to the relevant case</li> </ul> <p><b>c. Differential Diagnosis, Provisional Diagnosis, and Final diagnosis. – 10 Marks</b></p> <p>Differential diagnosis and diagnosis (Vyavachedaka nidana and vyadhi vinischaya) should include the following:</p> <ul style="list-style-type: none"> <li>• Group of suspicious diseases based on your knowledge on Ayurveda and contemporary science against your observation on patient</li> <li>• Justification for inclusion and exclusion of diseases based on pratyatma lakshana</li> <li>• Arriving at a final diagnosis based on the clinical acumen</li> <li>• Drafting the samprapti ghataka (Involvement of dosha, dushya, indriya, manas, agni, koshta, srotas, srotodushti prakara, udbhava sthana, sanchara sthana vyakta sthana, rogamarga, upadrava, arishta, sadhyasadhyata)</li> </ul>	
3	<p><b>Demonstration: Clinical examination on the simulator or a patient or Simulated patient (SP) (1 Demonstration X 30 Marks = 30 Marks):</b></p> <p>The student will be given a specific case or a scenario (other than the case given for long case taking) and asked to perform the examination of a particular system as a whole or a part of the examination such as inspection or palpation or percussion or auscultation or any specific tests or group of tests or elicit any particular sign for any of the following system (Only steps of examination to be written with observation and interpretation after demonstration):</p> <ul style="list-style-type: none"> <li>• Respiratory system examination</li> <li>• Cardiovascular System examination</li> <li>• Oral cavity and per abdominal examination</li> <li>• Nervous system examination</li> <li>• Locomotor system examination</li> <li>• Integumentary system examination</li> </ul>	30
4	<p><b>Viva mark distribution and basic instructions</b></p> <p><b>Conceptual and theoretical questions:</b></p> <p><b>MK:</b></p>	70

Pareeksha, Dosha Vkr̥ti, Dhatu and Sroto vaigunya, Ama, Nidana Panchaka, Kriyakala, Vyadhi, Vyadhikshamatwa, Dhatu Paka etc. Annavaha, Pureeshavaha, Pranavaha, Mutravaha, Rasavaha, Raktavaha, Medovaha, Vatavyadhi, Snayugata, Sandhigata vikara etc. **(20 Marks)**

**DK:**

Rogi and Roga Bala pareeksha, Doshagata and Rogamarga, Nidanarthakara roga, Vyadhi namakarana, Sadyasadyata, Upadrava etc. Common GIT diseases, Common Urinary diseases, Common lung disorders, Fever, Hematopoietic diseases, Cardiovascular disorders, Hepato-biliary disorders, Skin diseases, Thyroid disorders, Obesity, Metabolic diseases, Common neurologic and spine disorders, Diseases of bone, joints, and muscles, Immunological & Metabolic disorders, Common parasitic disorders, Tuberculosis etc. **(10 Marks)**

**Link to existing literature and critical thinking:**

**MK:**

Pareeksha, Dosha Vkr̥ti, Dhatu and Sroto vaigunya, Ama, Nidana Panchaka, Kriyakala, Vyadhi, Vyadhikshamatwa, Dhatu Paka etc. Annavaha, Pureeshavaha, Pranavaha, Mutravaha, Rasavaha, Raktavaha, Medovaha, Vatavyadhi, Snayugata, Sandhigata vikara etc. **(20 Marks)**

**DK:**

Rogi and Roga Bala pareeksha, Doshagata and Rogamarga, Nidanarthakara roga, Vyadhi namakarana, Sadyasadyata, Upadrava etc. **(10 Marks)**

**Viva on activity book:**

Questions to be asked as per the heads provided in the activity book (10 Marks)

**Basic instructions:**

Number of questions: There must be a total minimum of 10 questions and a maximum of 15 questions from both examiners.

1. The questions asked during a viva should be relevant, thought-provoking, and designed to assess the candidate's understanding, knowledge, and critical thinking skills.
2. Breadth and depth: The questions should cover a wide range of topics related to both the papers as well as activity and practical with equal importance, ensuring that they have a comprehensive understanding, critical thinking, and analysis.
3. Open-ended: Questions should be open-ended rather than requiring simple yes/no answers. This allows the candidate to demonstrate their understanding and ability to provide detailed explanations and justifications.

	<p>4. Conceptual and theoretical: Some questions should focus on the candidate's understanding of key concepts, theories, and methodologies within their syllabus. This helps evaluate their grasp of foundational knowledge and their ability to apply it.</p> <p>5. Critical thinking: The questions should encourage the candidate to think critically, analyze the subject, and findings, and identify limitations or alternative perspectives.</p> <p>6. Link to existing literature: Some questions can explore the candidate's knowledge and understanding of relevant literature in contemporary science.</p> <p>7. Follow-up questions: It can be effective to ask follow-up questions to probe deeper into the candidate's responses. This helps assess their ability to defend, respond to challenges, and think on their feet.</p> <p>8. Avoid leading questions: It is important to avoid leading questions that provide the candidate with clues or guide them towards a specific answer. The goal is to assess their independent thinking and understanding.</p> <p>9. Balance: The questions should strike a balance between being challenging and fair. It should push the candidate's limits without being excessively difficult or intimidating.</p> <p>10. No questions will be asked from Nice to know category. However, 70% of the questions are to be asked from Must Know category and 30% from the Desirable to Know category by the examiner.</p>

## II Professional Ayurvedacharya (BAMS)

**Subject Code : AyUG-SA2**

### Summary

Total number of Teaching hours: 240			
Lecture hours(LH)-Theory		100	100(LH)
Paper I	100		
Non Lecture hours(NLH)-Theory		140	140(NLH)
Paper I	40		
Non Lecture hours(NLH)-Practical			
Paper I	NA		

Examination (Papers & Mark Distribution)					
Item	Theory Component Marks	Practical Component Marks			
		Practical	Viva	(Set SB)	IA
Paper I	100	-	75	10	15
Sub-Total	100	100			
Total marks	200				

**Important Note:-**The User Manual II BAMS is a valuable resource that provides comprehensive details about the curriculum file. It will help you understand and implement the curriculum. Please read the User Manual II before reading this curriculum file. The curriculum file has been thoroughly reviewed and verified for accuracy. However, if you find any discrepancies, please note them. Details in Practical list, Table 4 and Table 4a, considered authentic.

In case of difficulty and questions regarding curriculum write to [cur.imp@ncismindia.org](mailto:cur.imp@ncismindia.org)

## PREFACE

In continuation with the curriculum reforms started previous year, **Samhita Adhyayan-2** focuses on learning Samhita with due significance to the methodology of textual structuring and interpretation. Charakasamhita is taken as a model text here considering its vast contributions to Ayurveda. Students who learn Ayurveda will benefit by Samhita Adhyayan to comprehend sense of importance of its traditional classical literature. SA2 tries to justify the methodology of structuring samhita and appraise the importance of tools of decoding samhita such as tantrayukti and vyakhyana. Relating and interpreting the various references, explaining and interpreting important sidhantas, applying sidhantas in clinical practice, making use of specific diagnostic and assessment guidelines mentioned in Carakasamhita, demonstrating principles of management of various clinical conditions etc. are some of the thrust areas addressed. Importance of by hearting important slokas also is highlighted. The content of SA2 belongs to 54 chapters of Carakasamhita viz. Sutrasthana (18 chapters 13-30, initial 12 chapters already dealt in SA1), Nidanasthana (8 chapters), Vimanasthana (8 chapters), Shareerasthana (8 chapters) and Indriyasthana (12 chapters). Each chapter is taken as a unit in the syllabus. A chapter starts with short introduction (**adhyaya parichaya**) through justifying the position of the chapter and introducing key terms in the chapter. This is followed by explaining important sidhantas (**sidhanta-vivarana**) in the chapter. At the end summary of the chapter (**adhyayasangraha**) is done with the help of summarizing slokas at the end of the chapter. This will help students to map the whole content of the chapter, even though some of them are not dealt in detail during sidhanta-vivarana. **Sloka sangraha** (compilation of sloka) compiles the most important slokas in the chapter. Application of **Tantrayukti** and **Vyakhyana** in proper understanding of Samhita also is envisaged as a separate section while planning practicals. Efforts have been taken to design some interesting and innovative activities and practical as a part of developing this syllabus. They have been added to respective tables here. It does not restrict our teachers from designing and implementing more attractive and effective activities or customizing those ones which are enlisted, as and when needed, without losing spirit of the new outlook.

Paper 1									
A3 Course outcome	B3 Learning Objective (At the end of the session, the students should be able to)	C3 Domain/sub	D3 Must to know / desirable to know / Nice to know	E3 Level Does/ Shows how/ Knows how/ Knows	F3 T-L method	G3 Assessment  (Refer abbreviations)	H3 Formative/ summative	I3 Term	J3 Integration
<b>Topic 1 Cha.Su.13- Sneha Adhyaya</b> (Lecture :3 hours, Non lecture: 1 hours)									
CO1,CO2	Justify the position of the chapter in the Samhita and its importance	CC	MK	K	L&G D	INT,TT-Theory,VV-Viva	F&S	I	
CO2	Explain basic meaning and importance of key terms in the chapter such as sneha, snehayoni, caturvidhasneha, acchasnehapaana, sadyasneha and pravicharana.	CK	MK	K	L&G D,BS	QZ ,COM,TT-Theory,VV-Viva	F&S	I	
CO4,CO5	Enlist sthavara and jangam snehayoni Ch Su 13/9-11	CK	MK	K	L&G D,ML	M-POS,TT-Theory	F&S	I	
CO4,CO5	Justify why tila taila is the best among taila varga. Ch Su 13/12	CK	MK	KH	L,L& PPT, DA	T-EMI	F&S	I	
CO4,CO5	Explain qualities and mode of action of eranda taila Ch. Su 13/12	CK	DK	KH	L,L_ VC,D A	T-EMI	F&S	I	
CO4,CO5	Enlist four types of sneha and justify sarpi as the best (shreshta).	CC	MK	KH	L,DIS	PRN,TT-Theo	F&S	I	

	Ch .Su 13/13				,DA	ry,VV-Viva			
CO4,CO5	Explain snehapaan kaala and anupaan Ch .Su 18-22	CK	MK	K	L&G D	TT-Theory,V V-Viva	F&S	I	
CO4,CO5	Define and enlist 24 types of pravicharana sneha and other types of sneha pravicharana. Ch Su 13/23, 24, 25, 27, 28	CC	MK	KH	L&G D	CL-PR,TT-Th eory,VV-Viva	F&S	I	
CO4,CO5	Explain acchasnehapaana and its importance Ch Su 13/26	CK	DK	KH	L&G D,RP, PL	TT-Theory,V V-Viva	F&S	I	
CO4,CO5	Enlist types of snehamatra Ch.Su 13/29-30	CC	MK	KH	L&G D,RE C	QZ ,TT-Theor y,VV-Viva	F&S	I	
CO4,CO5	Mention rule for duration of snehapaana Ch. Su 13/51	CC	MK	KH	L&G D,BS	PUZ,TT-Theo ry,VV-Viva	F&S	I	
CO4,CO5	Mention yogya and ayogya for snehana Ca Su 13/52-56.	CC	DK	KH	L,L& PPT,L &GD, CBL	TT-Theory,V V-Viva	F&S	I	V-PC
CO4,CO5	Summarize samyak snigdha lakshana, asnigdha lakshana and atisnigdha lakshana. Ch Su 13/57-59	CC	DK	KH	L&G D,D	P-ID,TT-Theo ry,VV-Viva	F&S	I	
CO2,CO4,CO5	Summarise snehavyapat karana, lakshana and chikitsa Ch Su 75-79	CAP	NK	KH	L&G D,PL	TT-Theory,V V-Viva	F&S	I	
CO4,CO5	Figure out importance of pathya and apathya in snehapaan.Ch Su 13/60-61-64	CK	DK	KH	L&G D,SD L	M-CHT,TT-T heory,VV- Viva	F&S	I	
CO4,CO5	Explain pathyaapathya to be followed during and after	CC	MK	KH	L&G	CHK,TT-Theo	F&S	I	

	snehapana. Ch Su 62-64				D,ED U	ry,VV-Viva			
CO4,CO5	Explain criteria's for assessing koshta. Ch Su 13/ 65-69.	CC	MK	KH	L&G D,CB L	TT-Theory,V V-Viva	F&S	I	
CO4,CO5,CO 6	Illustrate types of koshta in patients undergoing snehapana	PSY- SET	NK	SH	CBL, CD,D _BED	P-ID,VV-Viva	F&S	I	
CO4,CO5	Mention some examples for recipes of vicharanasneha.Ch Su 13/82-94	CK	DK	K	L,L& PPT	TT-Theory,V V-Viva	F&S	I	
CO4,CO5	Interpret the role of agni in sadyasneha Ca Su 13/96-97	CK	DK	K	L,L& GD,I BL	TT-Theory,V V-Viva	F&S	I	
CO1,CO2	Recite sutra no. Ch Su 13/13-17, 22, 57-59.	CK	MK	K	SDL, REC	P-REC	F&S	I	
CO1,CO2	Summarize the chapter as per Ch Su 13/100.	CK	NK	K	SDL	P-VIVA	F&S	I	
CO4,CO5	Relate dravya classification mentioned in Ch Su 1 (trividha) with snehayoni	CAP	MK	KH	DIS	PRN	F	I	
<b>Topic 2 Cha.Su.14- Sveda Adhyaya</b> (Lecture :2 hours, Non lecture: 1 hours)									
CO1,CO2	Justify the position of the chapter in the samhita and its importance	CC	MK	K	L&G D	INT,TT-Theor y,VV-Viva	F&S	I	
CO2	Explain basic meaning and importance of key terms in the chapter such as agnisweda, niragnisweda, snigdhapurva, ruskhapurva and trayodasasweda	CK	MK	K	L&G D,BS	QZ ,COM,TT- Theory,VV- Viva	F&S	I	
CO4,CO5	Explain the benefits of swedana. Ch Su 14/ 3-5	CC	MK	KH	L&G	TT-Theory,V	F&S	I	

					D,RL E	V-Viva			
CO4,CO5	Explain samyak swedana and ati swedana lakshana Ch Su 14/13-15	CC	MK	KH	L&G D	TT-Theory,V V-Viva	F&S	I	
CO4,CO5	Summarize the indications and contraindications for swedana Ch Su 14/ 16-24.	CC	DK	KH	L&G D,CB L	TT-Theory,V V-Viva	F&S	I	
CO4,CO5	Differentiate pinda sweda, nadi sweda, avagah sweda and upanaha sweda with respect to the drugs used and procedure. Ch Su 14/25-37.	CC	DK	KH	L&G D,L_ VC,C BL	TT-Theory,V V-Viva	F&S	I	
CO4,CO5	Enlist 13 types of agni sweda. Ch Su 14/39-63	CC	MK	KH	L&PP T,L_ VC	QZ ,TT-Theor y,VV-Viva	F&S	I	
CO4,CO5	Enlist 10 types of niragnisweda Ch. Su 14/64.	CC	MK	KH	L,L& GD	O-QZ,TT-The ory,VV-Viva	F&S	I	
CO4,CO5	Enlist three classifications of dvividha sweda. Ch Su 14/66	CK	MK	KH	L&G D	M-CHT,TT-T heory,VV- Viva	F&S	I	
CO1,CO2	Recite sutras Ch Su 14/4,5,39,40,64.	CK	MK	K	SDL, REC	P-REC	F&S	I	
CO1,CO2	Summarize the chapter as per sutra Ch Su 14/68-71	CK	NK	K	SDL	P-VIVA	F&S	I	
<b>Topic 3 Cha.Su.15- Upakalpaneeya Adhyaya</b> (Lecture :2 hours, Non lecture: 3 hours)									
CO1,CO2	Justify the position of the chapter in the Samhita and its importance	CK	MK	K	L&G D	INT,TT-Theor y,VV-Viva	F&S	I	

CO1,CO2	Explain basic meaning and importance of key terms in the chapter such as sambharan, aturaalaya, samsarjan krama.	CK	MK	K	L&G D,BS	QZ ,COM,TT- Theory,VV- Viva	F&S	I	
CO4,CO5	Summarize the guidelines for Vaidyas before commencing chikitsa Ch Su 15/3-5.	CK	DK	KH	L&G D	M-CHT,TT-T heory,VV- Viva	F&S	I	
CO4,CO5	Enlist samshodhana upayogi dravya sangraha Ch Su 15/6	CK	MK	KH	L&G D	QZ ,TT-Theor y,VV-Viva	F&S	I	
CO4,CO5	Figure out the procedure of vamana karma. Ch Su 15/9-15	CC	DK	KH	L&G D,RP	CHK,TT-Theo ry,VV-Viva	F&S	I	
CO4,CO5	Explain samsarjana krama Ch Su 15/16	CC	MK	KH	L,L& GD	CL-PR,TT-Th eory,VV-Viva	F&S	I	
CO4,CO5	Identify merits of samsarjanakrama in patients	PSY- SET	NK	SH	BS,IB L,D_ BED	P-CASE,SP	F&S	I	
CO4,CO5	Outline procedure for virechana karma Ch Su 15/17-18	CC	DK	KH	L&G D,RP	CHK,TT-Theo ry,VV-Viva	F&S	I	
CO4,CO5	Explain benefits of samshodhana. Ch Su 15/22.	CC	MK	KH	L,L& GD	TT-Theory,V V-Viva	F&S	I	
CO5,CO7	Relate the structure of aturalaya (hospital) with the present scenario	CAP	DK	KH	DIS,B S,PrB L	DEB,M- MOD,INT	F	I	
CO1	Recite sutra Ch Su 15/22	CK	MK	K	SDL, REC	P-REC	F&S	I	
CO1	Summarize the chapter as per sutra Ch Su 15/2-25	CK	NK	K	SDL	P-VIVA	F&S	I	

Topic 4 Cha.Su.16- Chikitsaprabhritiya Adhyaya (Lecture :2 hours, Non lecture: 2 hours)									
CO1,CO2	Justify the position of the chapter in the Samhita and its importance.	CC	MK	K	L&G D	INT,TT-Theor y,VV-Viva	F&S	I	
CO2	Explain basic meaning and importance of key terms such as bahudosha lakshana, swabhaavoparamvaada, chikitsaprabhirta.	CK	MK	K	L&G D,BS	QZ ,COM,TT- Theory,VV- Viva	F&S	I	
CO4,CO5	Summarize samyak virikta –avirikta – ativirikta lakshana. Ch Su 16/6-10	CC	DK	KH	L&G D,D	RS,TT-Theory ,VV-Viva	F&S	I	
CO4,CO5	Explain bahudosha lakshana Ch Su 16/13-16	CC	MK	KH	L&G D	PUZ,TT-Theo ry,VV-Viva	F&S	I	
CO3,CO6	Identify bahudoshalakshana in patients	PSY- SET	DK	SH	CBL, D_BE D	P-VIVA	F&S	I	
CO4,CO5	Explain benefits and importance of samshodhana. Ch .Su 16/16-21	CC	MK	KH	L&G D	TT-Theory,V V-Viva	F&S	I	
CO4,CO5	Explain swabhavoparama vada Ch Su 16/ 27-32	CC	MK	KH	L&G D,BS	DEB,TT-Theo ry,VV-Viva	F&S	I	
CO2,CO5	Outline chikitsa of ayoga, atiyoga of samsodhana	CAP	DK	KH	L_VC ,CBL, D	SP,TT-Theory ,VV-Viva	F&S	I	
CO4,CO5	Define chikitsa Ch Su 16/34-36	CC	MK	KH	L&G D	TT-Theory,V V-Viva	F&S	I	
CO4,CO8	Appreciate benefits of chikitsa prabhrita bhishak. Ch Su. 16/37-38	CK	DK	KH	L&G D,D	TT-Theory,V V-Viva	F&S	I	
CO1	Recite sutras Ch Su 16/13-21,27,28,34-36	CK	MK	K	SDL,	P-REC	F&S	I	

					REC				
CO4,CO6,CO7	Relate swabhavoparama with concept of nidana parivarjana	CAP	MK	KH	DIS	PRN	F	I	
CO1	Summarize the chapter as per sutra Ch Su 16/39-41	CK	NK	K	SDL	P-VIVA	F&S	I	
<b>Topic 5 Cha.Su.17- Kiyantashiraseeya Adhyaya</b> (Lecture :3 hours, Non lecture: 0 hours)									
CO1,CO2	Justify the position of the chapter in the Samhita and its importance	CC	MK	K	L&G D	INT,TT-Theor y,VV-Viva	F&S	I	
CO2	Explain basic meaning and importance of key terms in the chapter such as doshagati, doshavalpa, trayodasasannipata	CK	MK	K	L&G D,BS	QZ ,COM,TT- Theory,VV- Viva	F&S	I	
CO2,CO3	Explain importance of shiras. Ch Su 17/12	CK	MK	K	L&G D	TT-Theory,V V-Viva	F&S	I	
CO3,CO4	Enlist types of siroroga, hridroga and vidradhi	CC	MK	KH	L&G D	SP,TT-Theory	F&S	I	
CO3,CO4	Figure out 62 types of permutation and combination of doshas Ch Su 17/41-44	CK	DK	K	L&G D,GB L	PUZ,TT-Theo ry,VV-Viva	F&S	I	
CO3,CO4	Figure out 12 types of vishama sannipata Ch Su 17/45-61	CK	DK	K	L&G D	M-POS	F&S	I	
CO3,CO4,CO6	Complement knowledge about kshayalaskhana of dosha-dhatu-mala to the existing understanding (additional important features mentioned in CS)	CK	DK	KH	DIS,F C	TT-Theory,V V-Viva	F&S	I	
CO3,CO4	Interpret dosha-vikalpa (combinations of doshas) in different conditions. Ch.Su. 17/45-61	CAP	MK	KH	IBL,C BL	P-PS,TT-Theo ry,VV-Viva	F&S	I	

CO3,CO7	Complement knowledge of Ojus to the existing understanding (additional important features mentioned in CS) Ch Su 17/73-77	CC	MK	K	DIS,FC	TT-Theory	F&S	I	H-RN
CO3,CO4,CO6	Outline the samprapti of madhumeha and importance of ojus. Ch Su 17/78-81	CAP	MK	KH	L&GD	TT-Theory	F&S	I	
CO2,CO3,CO4,CO7	Define the term “gati” and Classify and explain various kinds of gati. Ch.Su 17/112 - 118 Cakrapani	CK	MK	K	L&GD,RP	TT-Theory,V V-Viva	F&S	I	
CO2,CO4,CO6	Interpret asaya apakarsha-gati in relationship with dosha-gati. Ch.Su. 17/45-46	CC	DK	KH	L&GD	TT-Theory	F&S	I	
CO3,CO4,CO7	Explain kshayahetu Ch.Su. 17/ 76-77	CC	MK	KH	L&GD	TT-Theory,V V-Viva	F&S	I	
CO3,CO4,CO6	Illustrate dosha-gati in clinical conditions	CAP	MK	KH	CBL,D	P-RP,P-CASE	F&S	I	
CO3,CO4	Explain identification of dosha vriddhi, kshaya, samya Ch.Su. 17/ 62	CC	MK	KH	L	CL-PR,TT-Theory,VV-Viva	F&S	I	
CO1	Recite sutras Ch Su 17/12, 41-44, 62, 112-118	CK	MK	K	SDL,REC	P-REC	F&S	I	
CO1	Summarize the chapter as per sutra Ch Su 17/120-121	CK	NK	K	SDL	P-VIVA	F&S	I	
<b>Topic 6 Cha.Su.18-Trisotheeya Adhyaya</b> (Lecture :1 hours, Non lecture: 3 hours)									
CO1,CO2	Justify the position of the chapter in the Samhita and its importance	CC	MK	K	L&GD	INT,TT-Theory,VV-Viva	F&S	I	
CO2	Explain basic meaning and importance of key terms in the chapter such as trisotha, trividhabodhya sangraha and anukta roga	CC	MK	K	L&PP T	TT-Theory,V V-Viva	F&S	I	
CO5	Name and explain trividha-bodhya-sangraha (three-fold method	CC	MK	K	L&GD	TT-Theory,V	F&S	I	

	for understanding disease – vikara prakriti, samuthana and adhisthana) Ca.Su. 18/55, 46-47				D	V-Viva			
CO3,CO6	Illustrate use of trividha-bodhya-sangraha in anuktavyadhi Ch Su 18/44-45	CAP	DK	KH	L&G D,CB L	TT-Theory,V V-Viva	F&S	I	
CO3,CO5	Outline pradesika sotha (local edema) Ch Su 18/19-36	CC	DK	K	L&G D,L_ VC	P-ID,TT-Theo ry,VV-Viva	F&S	I	
CO3,CO6	Explain aparisankhyeyatwa of diseases (innumerability) Ch Su 18/42	CK	MK	K	L&G D	TT-Theory,V V-Viva	F&S	I	
CO3	Complement tridosha-samanyakarma with additional details mentioned in CS	CC	MK	K	BS,IB L,FC	PRN,TT-Theo ry,VV-Viva	F&S	I	
CO1	Recite sutras Ch Su 42,43,44-47	CK	MK	K	SDL, REC	P-REC	F&S	I	
CO1	Summarize the chapter as per sutra Ch Su 18/54-56	CK	NK	K	SDL	P-VIVA	F&S	I	
<b>Topic 7 Cha.Su.19-Ashtodareeya Adhyaya</b> (Lecture :1 hours, Non lecture: 3 hours)									
CO1,CO2	Justify the position of the chapter in the Samhita and its importance	CC	MK	K	L&G D	INT,TT-Theor y,VV-Viva	F&S	I	
CO2	Explain basic meaning and importance of key terms in the chapter such as nijavyadhi (intrinsic diseases), samanyaja-vyadhi (general diseases) and sankhyasamprapti (enumeration of types of diseases)	CK	MK	K	L&G D,BS	QZ ,COM,TT- Theory,VV- Viva	F&S	I	
CO2,CO3	Outline the types of diseases (sankhyasamprapti) mentioned in the chapter	CK	DK	K	L&G D,GB L	QZ ,PUZ,TT- Theory,VV- Viva	F&S	I	

CO3,CO4	Illustrate the importance of tridosha in occurrence of diseases Ch Su 19/5	CC	MK	KH	DIS,S DL	TT-Theory,V V-Viva	F&S	I	
CO3,CO4	Explain the relationship between Nija and Agatu rogas (intrinsic and extrinsic diseases) Ch Su 19/6,7	CK	MK	K	L&G D,PL	TT-Theory,V V-Viva	F&S	I	
CO6,CO8	Classify diseases in Ayurveda using available online resources (Activity, ref: activity table)	CAP	DK	KH	DIS,B L	SA,TT-Theory ,VV-Viva	F	I	
CO1,CO2	Recite sutras Ch Su 19/5, 6	CK	MK	K	SDL, REC	P-REC	F&S	I	
CO1,CO2	Summarize the chapter as per sutra Ch Su 19/8,9	CK	NK	K	SDL	P-VIVA	F&S	I	
CO3,CO6,CO 7	Summarize different classifications of diseases mentioned in deerghanjeeviteeya, tisraishaneeya, ashtodareeya, maharoga and roganeeka	CC	MK	KH	DIS, W	P-POS	F	I	
<b>Topic 8 Cha.Su.20- Maharoga adhyaya</b> (Lecture :2 hours, Non lecture: 2 hours)									
CO1,CO2	Justify the position of the chapter in the Samhita and its importance	CC	MK	K	L&G D	INT,TT-Theor y,VV-Viva	F&S	I	
CO2	Explain basic meaning and importance of key terms such as agantumukha, trividhaperana, samanyaja-vikara, nanatmaja-vikara and atmarupa	CK	MK	K	L&G D,BS	QZ ,COM,TT- Theory,VV- Viva	F&S	I	
CO3,CO5	Explain the basis for the classification of diseases. Ch.Su. 20/3	CK	MK	K	L&G D,ML	M-CHT,TT-T heory,VV- Viva	F&S	I	
CO5	Define nija and agantuja vyadhi. Ch.Su. 20/7	CK	MK	K	L&G D	TT-Theory,V V-Viva	F&S	I	
CO5	Describe kaarana for nija and agantuja vyadhi. Ch.Su. 20/4-5	CK	MK	K	L&G D	TT-Theory,V V-Viva	F&S	I	

CO3,CO5	Enlist nanatmajavyadhi of vata and relate guna, atmarupa, vikritakarma of vata and its upakrama. Ch.Su. 20/12,13	CAP	MK	K	L&G D	M-CHT,VV- Viva	F&S	I	
CO3,CO5	Enlist nanatmajavyadhi of pitta and relate guna, atmarupa, vikritakarma of pitta, and its upakrama Ch.Su. 20/14-16	CAP	MK	K	L&G D	M-CHT,VV- Viva	F&S	I	
CO3,CO5	Enlist nanatmajavyadhi of Kapha and Relate guna, atmarupa, vikritakarma of Kapha and its Upakrama. Ch.Su. 20/17-19	CAP	MK	K	L&G D	M-CHT,VV- Viva	F&S	I	
CO4,CO6,CO 8	Make monographs of nanatamaja-vikaras (Activity, see activity list)	CAP	DK	KH	TPW, BL	M-CHT,CR- W	F	I	
CO3,CO6,CO 7	Relate paribhasha of different terms in nanatamajavyadhi with descriptions available in Ashatanga sangraha Su 20/18	CC	DK	KH	DIS	T-OBT	F	I	
CO1,CO2	Recite sutras Ch. Su. 20/ 3, 4, 5, 11,14, 17, 20-22	CK	MK	K	SDL, REC	P-REC	F&S	I	
CO1,CO2	Summarize the chapter as per sutra Ch Su 20/ 23-25	CC	NK	K	SDL	P-VIVA	F&S	I	
<b>Topic 9 Cha.Su.21- Ashtauninditeeya adhyaya</b> (Lecture :3 hours, Non lecture: 3 hours)									
CO1,CO2	Justify the position of the chapter in the Samhita and its importance	CC	MK	K	L&G D	INT,TT-Theor y,VV-Viva	F&S	I	
CO2	Explain basic meaning and importance of key terms such as ashtaninditapurusha, ashtadosha of atisthauya, prasastapurushalakshana	CK	MK	K	L&G D,BS	QZ ,COM,TT- Theory,VV- Viva	F&S	I	
CO2	Enlist ashtaninditapurusha Ch Su 21/3	CK	MK	K	L&G D,RP	TT-Theory,V V-Viva	F&S	I	
CO4,CO5	Enlist ashtadosha of atisthoola purusha and justify its ashtadosha Ch.Su. 21/4	CAP	MK	K	L&G D,RP	P-SUR,CL- PR,VV-Viva	F&S	I	
CO4,CO5,CO	Outline the diagnostic features of atisthula. Ch.Su.21/9	CC	MK	K	L&G	TT-Theory,V	F&S	I	

7					D	V-Viva			
CO5,CO6,CO7	Outline hetu and samprapti of atisthaulya Ch.Su. 21/4-8	CAP	DK	K	L&PP T	TT-Theory,V V-Viva	F&S	I	
CO4,CO5	Describe chikistasutra for atisthula purusha and mention different formulations. Ch.Su. 21/20- 28	CAP	MK	K	L&G D	TT-Theory,V V-Viva	F&S	I	
CO5,CO6	Describe hetu, dosha and lakshana for atikrusha purusha. Ch.Su. 21/11-15	CC	MK	K	L&PP T	TT-Theory,V V-Viva	F&S	I	
CO4,CO5	Describe chikistasutra for atikrusha purusha and mention different formulations Ch.Su. 21/20, 29-34	CC	MK	KH	L&G D	TT-Theory,V V-Viva	F&S	I	
CO6	Interpret why atisthula purusha is difficult to treat compared to krushapurusha Ch.Su. 21/16-17	CAP	MK	K	L&G D	TT-Theory,V V-Viva	F&S	I	
CO5	Enlist the features of ideal physique in individuals (prashasta purusha lakshana) Ch.Su. 21/18-19	CC	MK	KH	L&G D	TT-Theory,V V-Viva	F&S	I	
CO4,CO7	Define nidra and enlist its types Ch Su 21/35&58	CK	MK	K	L&PP T	TT-Theory,V V-Viva	F&S	I	
CO3,CO7	Determine significance of nidra as an etiological factor of sthaulya and karsya and its role in management of the same Ca.Su. 21/51	CAP	MK	KH	DIS,C BL,F C	CL-PR	F&S	I	
CO1,CO2	Recite sutras Ch Su 21/ 3,4,16, 18, 19, 35, 50, 58	CK	MK	K	SDL, REC	P-REC	F&S	I	
CO1,CO2	Summarize the chapter as per sutra Ch Su 21/60-62	CC	NK	K	SDL	P-VIVA	F&S	I	
<b>Topic 10 Cha.Su.22- Langhanabrimhaneeya Adhyaya</b> (Lecture :3 hours, Non lecture: 2 hours)									
CO1,CO2	Justify the position of the chapter in the Samhita and its importance	CC	MK	K	L&G D	INT,TT-Theor y,VV-Viva	F&S	I	

CO2	Explain basic meaning and importance of key terms such as shadupakrama and dasavidhalanghana	CK	MK	K	L&G D,BS	QZ ,COM,TT- Theory,VV- Viva	F&S	I	
CO2,CO4,CO 5	Enlist and define shadupakrama. Ch.Su. 22/4, 9-12	CK	MK	K	L&G D	TT-Theory,V V-Viva	F&S	I	
CO2,CO5,CO 7	Explain properties of dravyas used in shadupakrama with examples. Ch.Su. 22/12-17	CK	MK	K	L&PP T,PB L	TT-Theory,V V-Viva	F&S	I	
CO4,CO5	Enlist dasavidha-langhana and their indications Ch.Su. 22/19-23	CK	MK	K	L&G D	TT-Theory,V V-Viva	F&S	I	
CO2,CO4,CO 5	Relate gurvadi guna and samanya visesha sidhanta with shadupakrama Ch Su 22/12-17	CK	DK	KH	DIS,F C	T-EMI,VV- Viva	F&S	I	
CO4,CO5	Identify dasavidhalanghana in treatment guidelines mentioned for different diseases	CAP	NK	KH	IBL,C BL	T-OBT,VV- Viva	F&S	I	
CO4,CO5	Explain samyaklakshana of langhana, brimhana and sthambhana Ch Su 22/34,35,38,40	CK	MK	K	L&G D	TT-Theory,V V-Viva	F&S	I	
CO4,CO5	Outline atiyoga and ayogalakshana of brimhana, langhana and sthambhana Ch Su 22/36-38	CK	DK	K	L&G D,CB L	M-CHT,TT-T heory,VV- Viva	F&S	I	
CO1,CO2	Recite sutras Ch Su 21/9-24	CK	MK	K	SDL, REC	P-REC	F&S	I	
CO1,CO2	Summarize chapter as per sutra Ch Su 22/44	CC	NK	K	SDL	P-VIVA	F&S	I	
<b>Topic 11 Cha.Su.23- Santarpaneeya Adhyaya</b> (Lecture :2 hours, Non lecture: 0 hours)									
CO1,CO2	Justify the position of the chapter in the Samhita and its importance	CC	MK	KH	L&G D	INT,TT-Theor y,VV-Viva	F&S	I	

CO2	Explain basic meaning and importance of key terms such as santarpana and apatarpana	CK	MK	K	L&G D,BS	QZ ,COM,TT- Theory,VV- Viva	F&S	I	
CO3,CO5	Enlist santarpanadravya Ch Su 23/3-5	CK	MK	K	L&G D	TT-Theory,V V-Viva	F&S	I	
CO3	Enlist santarpanajanyavyadhis Ch Su 23/5-7	CK	MK	K	L&G D	TT-Theory,V V-Viva	F&S	I	
CO3,CO6	Explain chikitsa-sutra for santarpana-janya-roga. Ch.Su. 23/ 8	CAP	MK	K	L&G D	TT-Theory,V V-Viva	F&S	I	
CO3	Explain apatarpanajanya vyadhis Ch Su 23/26-29	CK	MK	K	L&G D	TT-Theory,V V-Viva	F&S	I	
CO3,CO6	Outline the management approach to apatarpana janya vyadhi Ch Su 23/30-32	CC	MK	KH	L&G D,CB L	TT-Theory,V V-Viva	F&S	I	
CO1,CO2	Recite sutras Ch Su 23/ 5-7, 26-29	CK	MK	K	SDL, REC	P-REC	F&S	I	
CO2	Summarize chapter as per sutra Ch Su 23/40	CC	NK	K	SDL	P-VIVA	F&S	I	
<b>Topic 12 Cha.Su.24- Vidhishoniteeya Adhyaya</b> (Lecture :3 hours, Non lecture: 2 hours)									
CO1,CO2	Justify the position of the chapter in the Samhita and its importance	CC	MK	K	L&G D	INT,TT-Theor y,VV-Viva	F&S	I	
CO2	Explain basic meaning and importance of key terms such as sonitadushti and visuddharakta	CK	MK	K	L&G D,BS	QZ ,COM,TT- Theory,VV- Viva	F&S	I	
CO3,CO4,CO 7	Explain causative factors for raktadushti Ch.Su. 24/ 5-10	CK	MK	K	L&G D	CHK	F&S	I	

CO4,CO6	Explain diagnostic criteria of raktadushti. Ca.Su. 24/17	CC	MK	K	L&G D	TT-Theory,V V-Viva	F&S	I	
CO4,CO6,CO 7	Enlist rakta-dushtijanya-roga. Ch.Su. 24/11-16, 28/11-13	CC	MK	K	L&G D	TT-Theory,V V-Viva	F&S	I	
CO4,CO5	Explain treatment principles of rakta-dushti. Ch.Su. 24/18.	CC	MK	K	L&G D	INT,VV-Viva	F&S	I	
CO3,CO4,CO 7	Explain visudha-rakta lakshana Ch Su 23/22	CK	MK	K	L&G D	TT-Theory,V V-Viva	F&S	I	
CO3,CO4,CO 5	Explain visuddha-rakta-purusha lakshana Ch Su 23/24	CK	MK	K	L&G D	TT-Theory,V V-Viva	F&S	I	
CO3,CO6,CO 7	Relate the concept of raktadushti with similar references such as Ch.vi. 5/26	CC	MK	KH	DIS	T-OBT	F	I	
CO4,CO5,CO 7	Explain pathya in raktamoksha Ch Su 24/23	CK	MK	K	L&G D	TT-Theory,V V-Viva	F&S	I	
CO4,CO5,CO 6	Summarize the samprapti of mada, murchaya and sanyasa Ch Su 24/25-29	CAP	DK	KH	L&G D,IBL ,RP	PUZ,TT-Theo ry,VV-Viva	F&S	I	
CO1,CO2	Recite sutras Ch Su 24/ 14,18,20,21,22,24	CK	MK	K	SDL, REC	P-REC	F&S	I	
CO2	Summarise the chapter as per sutra Ch Su 24/59-60	CC	NK	K	SDL	TT-Theory,V V-Viva	F&S	I	
<b>Topic 13 Cha.Su.25- Yajjapurusheeya Adhyaya</b> (Lecture :2 hours, Non lecture: 4 hours)									
CO1	Justify the position of the Yajjapurusheeya chapter in the Samhita and its importance	CC	MK	K	L&G D	INT,TT-Theor y,VV-Viva	F&S	I	

CO2	Explain basic meaning and importance of key terms in the chapter such as Hita, Ahita, Pathya and Apathya	CK	MK	K	L&G D,BS	QZ ,COM,TT-Theory,VV-Viva	F&S	I	
CO4,CO7	Justify the role of different factors responsible for formation of purusha Ch Su 25/3-29	CC	DK	KH	L&G D,ML	TT-Theory,V V-Viva	F&S	I	
CO1,CO8	Appreciate importance of sambhasha in bringing out scientific conclusions	AFT-REC	NK	KH	L&G D,RP, PL	SA,TT-Theory ,VV-Viva	F&S	I	
CO2,CO3	Differentiate factors related with ahara like Aharayoni, Prabhava, udarka, Upayoga, Rasa, Gurvadi Guna etc Ch Su 25/36	CK	MK	KH	L&G D,LS	T-OBT,TT-Theory,VV-Viva	F&S	I	
CO3,CO4,CO5	Enlist important agryas related with aushadha, anna and vihara Ch Su 25/38-40	CK	DK	K	L&G D,FC, GBL	T-OBT,TT-Theory,VV-Viva	F&S	I	H-DG ,H-RN
CO4,CO5,CO7	Define pathya and explain its importance Ch Su 25/45-47	CC	MK	K	L&G D	TT-Theory,V V-Viva	F&S	I	
CO4,CO7,CO8	Justify importance of hitahara and ahitahara (See activity list)	CAP	DK	KH	DIS,F C	INT,TT-Theory,VV-Viva	F&S	I	
CO5	Mention asavayonis Ch Su 25/49	CK	MK	K	L&G D	TT-Theory,V V-Viva	F&S	I	
CO1,CO2	Recite sutras Ch Su 25/ 29,31,33,45,46,47,50	CK	MK	K	SDL, REC	P-REC	F&S	I	
CO1	Summarize the chapter with shloka number Ch Su 25/51	CK	NK	K	SDL	TT-Theory,V V-Viva	F&S	I	
<b>Topic 14 Cha.Su.26- Atreyabhadraakaapyeeya Adhyaya</b> (Lecture :3 hours, Non lecture: 3 hours)									
CO1,CO2	Justify the position of the chapter in the Samhita and its	CC	MK	K	L&G	INT,TT-Theory	F&S	I	

	importance				D	y,VV-Viva			
CO2	Explain basic meaning and importance of key terms such as dravyaprabhava, gunaprabhava, rasapanchaka and viruddha	CK	MK	K	L&G D,BS	QZ ,COM,TT- Theory,VV- Viva	F&S	I	
CO2,CO3,CO 5	Enlist gunas of parthivadi dravyas Ch Su 26/11	CK	DK	K	L&G D	TT-Theory,V V-Viva	F&S	I	
CO4,CO5	Differentiate dravyaprabhava and gunaprabhava with examples Ch Su 26/13	CK	MK	KH	L&G D	PUZ,TT-Theo ry,VV-Viva	F&S	I	H-DG
CO4,CO5	Explain dravyakarmukata siddhant with examples Ch Su 26/13	CK	MK	KH	L&G D,DA	TT-Theory,V V-Viva	F&S	I	H-DG
CO4,CO5,CO 6	Explain the importance of paradi gunas as chikitsopayogi gunas (in diagnosis and treatment). Ch Su 26/29-35 (see activity list, activity no.5)	CK	DK	KH	L&G D,FC, SDL	TT-Theory,V V-Viva	F&S	I	
CO2,CO5	Complement the existing knowledge of 'rasadi panchaka' with additions from Charakasamhita.	CK	DK	K	FC,S DL	T-OBT,TT-Th eory,VV-Viva	F&S	I

CO3,CO5,CO8	Appreciate importance of Shastra jnana Ch Su 30/84-85	AFT-VAL	DK	KH	L&GD,BS	VV-Viva	F&S	II	
CO1,CO2	Explain importance of sangraha adhyayas	CC	DK	K	BL,SDL	VV-Viva	F&S	II	
CO1,CO2	Recite sutras Ch Su 30/3,410,11,12.	CK	MK	K	SDL,REC	P-REC	F&S	II	
CO1,CO2	Summarize the chapter as per sutras Ch Su 30/86-87	CK	NK	K	SDL	T-OBT,VV-Viva	F&S	II	
<b>Topic 19 Cha.Ni.01-Jwara nidana Adhyaya</b> (Lecture :2 hours, Non lecture: 2 hours)									
CO1	Describe the sthana adhikarana (objectives) of Nidanasthana Ch.Ni.1/15	CK	MK	K	L	P-VIVA,TT-Theory	F	II	

CO1	Justify the position of the chapter in the samhita and its importance	CK	MK	K	L	T-EMI	F	II	
CO2	Explain basic meaning and importance of key terms such as nidanapanchaka and jwara	CK	MK	K	L&G D,BS	QZ ,COM,TT- Theory,VV- Viva	F&S	II	
CO4,CO6,CO 7	Explain nidanapanchaka with suitable examples. Ch.Ni.1/6-13	CK	MK	KH	L&G D,FC	P-VIVA,TT- Theory	F&S	II	
CO4,CO6	Differentiate vyadhibodhaka nidana and vyadhi janaka nidana Ch Ni 1/1 Cakrapani commentary	CAN	DK	KH	L&G D,TB L	VV-Viva	F	II	
CO2,CO4,CO 6	Enlist synonyms of nidana (causative factors) and roga (disease) Ch Ni 1/3,5	CK	MK	KH	L	TT-Theory,V V-Viva	F&S	II	
CO4,CO6	Explain the importance of nidanapanchaka Ch.Ni 1/13	CK	MK	K	L&G D	TT-Theory,V V-Viva	F&S	II	
CO6	Explain nidanapanchaka and elaborate nidana (causative factor), purvarupa (premonitory symptoms) lakshana/rupa (symptoms)	CK	MK	KH	L&G D	T- EW	F	II	
CO4,CO6,CO 7	Describe upashaya along with its types in detail Ch Ni 1/10	CC	MK	SH	L&G D,BS	TT-Theory,V V-Viva	F&S	II	
CO4,CO6	Interpret the classification of samprapti (pathogenesis) Ch Ni 1/12	CK	MK	KH	L&PP T,CB L	TT-Theory,V V-Viva	F&S	II	
CO4,CO6	Diffrentiate the samanya and vishesha samprapti of disease	CAP	MK	SH	L_ VC ,DIS	TT-Theory,V V-Viva	F&S	II	
CO3,CO4	Describe the vishesha nidana (specific factors of diseases) prakopa karana (causes of aggravation),samprapti (pathogenesis)	CAP	MK	KH	L&G D	TT-Theory,V V-Viva	F	II	

	and lakshana (symptoms) of jwara (fever)								
CO3,CO6	Outline vataja, pittaja, kaphaja, samsarga and sannipataja jwara Ch Ni 1/19-30	CC	MK	KH	L&G D,CB L	TT-Theory,V V-Viva	F&S	II	
CO3,CO4,CO6	Describe agantuja jwara nidana (causes factor of exogenous fever) Ch Ni 1/30,31	CK	MK	KH	L	TT-Theory,V V-Viva	F&S	II	
CO2,CO4,CO5	Differentiate nava and jeerna jwara chikitsa sutra (line of treatment) Ch Ni 1/36	CK	MK	K	L,L& GD	TT-Theory,V V-Viva	F&S	II	
CO1,CO2	Recite sutras Ch Ni/3,5,7-11,38-40	CK	MK	K	SDL, REC	P-REC	F	II	
CO1,CO2	Summarize the chapter as per sutras given at the end of the chapter Ch Ni 1/42-44	CK	NK	K	SDL	T-OBT	F&S	II	
<b>Topic 20 Cha.Ni.02-Raktapitta nidana Adhyaya</b> (Lecture :2 hours, Non lecture: 2 hours)									
CO1,CO2	Justify the position of the chapter in the Samhita	CC	MK	K	L&G D	INT,TT-Theor y,VV-Viva	F&S	II	
CO2	Explain basic meaning and importance of key terms such as pratimargaharana, sadhyasadhyata, raktapitta	CK	MK	KH	L&G D,BS	QZ ,COM,TT- Theory,VV- Viva	F&S	II	
CO2,CO4,CO6	Justify raktapitta paryaya and nirukti Ch Ni 2/5	CK	MK	K	L&G D	TT-Theory,V V-Viva	F&S	II	
CO2,CO4,CO6	Outline raktapitta nidana and samprapti (etiology and pathogenesis of raktapitta)	CC	DK	KH	L&G D	TT-Theory,V V-Viva	F&S	II	
CO3,CO4,CO6	Define raktapitta and outline raktapitta purvarupa (premonitory features of raktapitta) upadrava (complication of raktapitta) Ch Ni 2/6,7	CC	MK	KH	L&G D	TT-Theory,V V-Viva	F&S	II	

CO4,CO6	Relate concept of trividha gati (adha, urdhwa, tiryag) with samprapti of raktapitta Ch Ni 2/8	CAP	DK	KH	L&G D	T-EMI,TT-Theory,VV-Viva	F&S	II	
CO4,CO5,CO7	Explain concept of pratimargaharana in the context of raktapitta Ch Ni 2/9	CAP	MK	KH	L&G D,LS	TT-Theory,V V-Viva	F&S	II	
CO4,CO6	Illustrate sadhyasadyata of raktapitta Ch Ni 2/9,12-20	CAP	MK	KH	L&G D,PL	TT-Theory,V V-Viva	F&S	II	
CO4,CO6	Outline asadhya lakshana of raktapitta (features of incurable disease) Ch Ni 2/23-26	CC	DK	KH	L&G D	TT-Theory,V V-Viva	F&S	II	
CO1,CO2	Recite sutras Ch Ni/19,27	CK	MK	K	SDL, REC	P-REC	F&S	II	
CO2	Summarize the chapter as per sutra Ch Ni 2/28,29	CK	NK	K	SDL	T-OBT	F&S	II	
<b>Topic 21 Cha.Ni.03-Gulma nidana Adhyaya</b> (Lecture :2 hours, Non lecture: 2 hours)									
CO1,CO2	Justify the position of the chapter in the Samhita	CC	MK	K	L&G D	INT,TT-Theory,VV-Viva	F&S	II	
CO2	Explain basic meaning and importance of key terms such as gulma, panchagulma and raktagulma	CK	MK	K	L&G D,BS	QZ ,COM,TT-Theory,VV-Viva	F&S	II	
CO2,CO4,CO6	Demonstrate the prakruti samasamveta and vikruti vishama samaveta siddhanta in the context of gunma Ch.Ni 3/6	CAP	DK	KH	L&G D,IBL	INT,TT-Theory,VV-Viva	F	II	
CO3,CO6	Mention the importance of gulmasthana in samprapti Ch Ni 3/7	CC	MK	K	L&G D	TT-Theory,V V-Viva	F&S	II	
CO3,CO6	Outline the features of vataja-pittaja-kaphaja and raktaja gulma along with samprapti lakshana (pathogenesis and clinical features) Ch Ni 3/6-11	CC	DK	KH	L&G D	TT-Theory,V V-Viva	F&S	II	

CO3,CO6	Describe raktaja gulma samprapti, lakshana (pathogenesis and clinical features) Ch Ni 3/13-14	CC	MK	K	L&G D	TT-Theory,V V-Viva	F&S	II	
CO4,CO6	Outline poorvarupa of gulma Ch Ni 3/15	CC	DK	KH	L&G D	TT-Theory,V V-Viva	F&S	II	
CO4,CO5	Outline treatment principle of gulma Ch Ni 2/16,17	CAP	MK	KH	L&G D	TT-Theory,V V-Viva	F&S	II	
CO1,CO2	Summarise the chapter as per sutra Ch Ni 3/18	CK	NK	K	SDL	T-OBT	F&S	II	
<b>Topic 22 Cha.Ni.04-Prameha nidana adhyaya</b> (Lecture :2 hours, Non lecture: 3 hours)									
CO1,CO2	Justify the position of the chapter in the Samhita and its importance	CC	MK	KH	L&G D	INT,TT-Theor y,VV-Viva	F&S	II	
CO2	Explain basic meaning and importance of key terms such as kleda, vikaravighatakara bhava	CK	MK	KH	L&G D,BS	TT-Theory,V V-Viva	F&S	II	
CO3,CO4,CO 6	Describe the concept of kleda and its role in samprapti of prameha Ch Ni 4/6-8	CC	DK	KH	L&G D,CB L	TT-Theory,V V-Viva	F&S	II	H-RN
CO4,CO6,CO 7	Summarise the sankhyasamprapti of prameha Ch Ni 4/11,25,39	CK	MK	K	L	TT-Theory,V V-Viva	F&S	II	
CO2,CO3,CO 6	Enlist causative factors and samprapi ghatakas in prameha Ch Ni 4/7	CK	MK	K	L&G D,CB L	TT-Theory,V V-Viva	F&S	II	
CO2,CO3,CO 6	Explore the sootra ‘eha khalu nidana-dosha-dooshya vishesaebhyo.....’ in the manifestation of diseases Ch Ni 4/4	CAP	MK	KH	L&G D,BS, CBL	TT-Theory,V V-Viva	F&S	II	
CO2,CO3,CO 6	Relate nidana, dosha, dushya and samprapti of vataja, pittaja and kaphaja prameha Ch Ni 4/5,8,24,36,37	CC	MK	KH	L&G D,CB	TT-Theory,V V-Viva	F&S	II	

					L				
CO2,CO3,CO6	Justify the role of samprapti ghatakas in diagnosed cases of prameha	PSY-SET	NK	SH	L&G D,CB L,D_ BED	P-PS,TT-Theo ry,VV-Viva	F&S	II	H-RN
CO2,CO4,CO5	Outline the chikitsas sutra of prameha Ch Ni 4/49	CC	DK	KH	L&G D,CB L	TT-Theory,V V-Viva	F&S	II	H-RN
CO4,CO6	Explain sadhyasadhyata of prameha Ch Ni 4/11,27,38	CC	MK	K	L&G D	TT-Theory,V V-Viva	F&S	II	
CO4,CO6	Describe purvarupa and upadrava of prameha Ch Ni 4/47,48	CC	MK	K	L_VC ,CBL	TT-Theory,V V-Viva	F&S	II	H-RN
CO3,CO7	Relate predisposing factors of prameha with present day lifestyle	CAP	DK	KH	DIS,F C	VV-Viva	F&S	II	
CO1,CO2	Recite sutras Ch Ni 4/3,4,48,49	CK	MK	K	SDL, REC	P-REC	F&S	II	
CO1,CO2	Summarise the chapter as per sutra Ch Ni 4/53-55	CK	NK	K	SDL	T-OBT	F&S	II	
<b>Topic 23 Cha.Ni.05-Kushta nidana Adhyaya</b> (Lecture :2 hours, Non lecture: 4 hours)									
CO1,CO2	Justify the position of the chapter in the Samhita and its importance	CC	MK	K	L&G D	INT,TT-Theor y,VV-Viva	F&S	II	
CO2	Explain basic meaning and importance of key terms such as saptadravya, saptakushta	CK	MK	K	L&G D,BS	QZ ,COM,TT- Theory,VV- Viva	F&S	II	
CO4,CO6,CO7	Enlist and explain saptadravya of kushta Ch Ni 5/3	CC	MK	KH	L&G D,CB	TT-Theory,V V-Viva	F&S	II	

					L				
CO2,CO3,CO6	Explain the role of 'kleda' in the manifestation of kushta Ch Ni 5/3	CC	DK	KH	L&G D,CB L	TT-Theory,V V-Viva	F&S	II	H-RN
CO2,CO3,CO6	Outline anekarupa of kushta (multiplicity) based on vedana, varna, samsthana and prabhava Ch Ni 5/4	CC	DK	KH	L_VC ,CBL	TT-Theory,V V-Viva	F&S	II	H-RN
CO2,CO3,CO6	Enlist saptakushta with their dosha predominance Ch Ni 5/5	CK	MK	K	L&G D,BL	TT-Theory,V V-Viva	F&S	II	
CO2,CO4,CO6	Outline samanyanidana of kushta Ch Ni 5/6	CC	DK	KH	L&G D,CB L	TT-Theory,V V-Viva	F&S	II	
CO4,CO6	Enlist purvarupa of kushta Ch Ni 5/7	CC	MK	KH	L&G D,CB L	TT-Theory,V V-Viva	F&S	II	H-RN
CO4,CO6	Outline upadrava of kushta Ch Ni 5/11	CC	DK	KH	L&G D,CB L	TT-Theory,V V-Viva	F&S	II	
CO2,CO3,CO6	Explain sadhyasadyata of kushta Ch Ni 5/9	CK	MK	K	L&G D	TT-Theory,V V-Viva	F&S	II	
CO1,CO2	Recite sutras Ch Ni 5/3,5	CK	MK	K	SDL, REC	P-REC	F&S	II	
CO1,CO2	Summarise the chapter as per sutra Ch Ni 5/16	CK	NK	K	SDL	T-OBT	F&S	II	
<b>Topic 24 Cha.Ni.06-Shosha nidana Adhyaya</b> (Lecture :2 hours, Non lecture: 2 hours)									
CO1,CO2	Justify the position of the chapter in the Samhita and its importance	CC	MK	K	L&G D	INT,TT-Theor y,VV-Viva	F&S	II	

CO2	Explain basic meaning and importance of key terms such as chaturvidha ayatana and ekadasarupa	CK	MK	K	L&G D,BS	QZ ,COM,TT- Theory,VV- Viva	F&S	II	
CO2,CO3,CO 6	Explain role of four aetiological factors (chaturvidha-ayatana) in samprapti of shosha. Ch Ni 6/4,6,7(1),8,10	CC	MK	KH	L&PP T,CB L	TT-Theory,V V-Viva	F&S	II	
CO2,CO3,CO 6	Enlist ekadasarupa of shosha Ch Ni 6/14	CK	MK	K	L&G D,ML	TT-Theory,V V-Viva	F&S	II	
CO2,CO3,CO 6	Outline the purvarupa of sosha Ch Ni 6/13	CC	DK	KH	L&G D	TT-Theory,V V-Viva	F&S	II	
CO2,CO3,CO 6	Explain sadhyasadyata of shosha Ch Ni 6/15,16	CK	MK	K	L&G D	TT-Theory,V V-Viva	F&S	II	
CO4,CO6,CO 7	Relate concept of dharaneeya adharaneeya vega to the context of shosha nidana	CAP	MK	KH	DIS	CL-PR	F	II	
CO3,CO4,CO 7	Justify the importance of ashtaahara vidhi visesha ayatana in the context of prevention of shosha	CAP	MK	KH	DIS,F C	CL-PR	F	II	
CO1,CO2	Recite sutras Ch Ni 6/3,5,7,9,11,14	CK	MK	K	SDL, REC	P-REC	F&S	II	
CO1,CO2	Summarise the chapter as per sutra Ch 6/17	CK	NK	K	SDL	T-OBT	F&S	II	
<b>Topic 25 Cha.Ni.07-Unmada nidana Adhyaya</b> (Lecture :2 hours, Non lecture: 4 hours)									
CO1,CO2	Justify the position of the chapter in the Samhita and its importance`	CC	MK	K	L&G D	INT,TT-Theor y,VV-Viva	F&S	II	
CO2	Explain basic meaning and importance of key terms such as ashtavibhrama, doshonmada and bhutonmada	CK	MK	K	L&G D,BS	QZ ,COM,TT- Theory,VV- Viva	F&S	II	

CO2,CO3,CO6	Define unmada and enlist ashtavibhrama Ch N 7/5	CK	MK	K	L&G D	QZ ,TT-Theor y,VV-Viva	F&S	II	
CO2,CO3,CO6	Illustrate ashtavibhrama in different types of unmada	CAP	NK	KH	L_VC ,CBL	TT-Theory,V V-Viva	F	II	
CO4,CO6,CO7	Explain sankhyasamprapti of unmada Ch Ni 7/3	CK	MK	K	L&G D	TT-Theory,V V-Viva	F&S	II	
CO4,CO6,CO7	Interpret unmada abhimukha karana (predisposing factors for unmada) in the contemporary scenario Ch Ni 7/3-4	CC	DK	KH	L_VC ,CBL	TT-Theory,V V-Viva	F&S	II	
CO2,CO3,CO6	Interpret the role of prajnaparadha as an important etiological factor in the background of unmada Ca.Ni. 7/19-22	CC	DK	KH	L&G D,L_ VC	CR-RED,TT- Theory,VV- Viva	F&S	II	
CO4,CO6,CO7	Summarise different descriptions of concept of prajnaparadha as aetiological factor Ch Su 8, 11, Ch Vi Ch Sa 1, Ch Vi 3	CC	MK	KH	DIS,F C	PRN	F	II	
CO2,CO3,CO6	Outline the purvarupa of unmada Ch Ni 7/6	CC	DK	K	L_VC ,CBL	TT-Theory,V V-Viva	F&S	II	
CO2,CO4,CO5	Explain chikitsasutra of unmada Ch Ni 7/8,9	CC	MK	K	L&G D	TT-Theory,V V-Viva	F&S	II	
CO2,CO3,CO4,CO6	Differentiate doshonamda and bhutonmada Ch Ni 7/10-11	CC	DK	KH	L&PP T	TT-Theory,V V-Viva	F&S	II	
CO2,CO3,CO6	Summarize causes, features purpose (prayojana) and treatment of agantu unmada Ch Ni 7/12-17	CK	DK	K	L&PP T	TT-Theory,V V-Viva	F&S	II	
CO1,CO2	Recite sutras Ch Ni 7/ 3,5,19-22	CK	MK	K	SDL, REC	P-REC	F&S	II	
CO1,CO2	Summarise the chapter based on Sutra Ch Ni 7/24	CK	NK	K	SDL	T-OBT	F&S	II	

Topic 26 Cha.Ni.08-Apasmara nidana adhyaya (Lecture :2 hours, Non lecture: 4 hours)									
CO1,CO2	Justify the position of the chapter in the Samhita and its importance	CC	MK	K	L&G D	INT,TT-Theor y,VV-Viva	F&S	II	
CO2	Explain basic meaning and importance of key terms such as nidanarthakara roga, vyadhisankara, tiryaggata dosha	CK	MK	K	L&G D,BS	QZ ,COM,TT- Theory,VV- Viva	F&S	II	
CO2,CO4,CO 6	Define apasmara Ch Ni 8/5	CK	MK	K	L,L& PPT	TT-Theory,V V-Viva	F&S	II	
CO2,CO4,CO 6	Explain apasmaraabhimukhakarana (predisposing factors of apasmara) Ch Ni 8/4	CK	MK	KH	L&G D,CB L	TT-Theory,V V-Viva	F&S	II	
CO2,CO4,CO 6	Outline visesha-lakshana of apasmara Ch Vi 8/8	CC	DK	KH	L&G D	TT-Theory,V V-Viva	F&S	II	
CO2,CO4,CO 6	Explain cikitsasutra of apasmara Ch Ni 8/10	CK	MK	K	L&G D	TT-Theory,V V-Viva	F&S	II	
CO2,CO4,CO 6	Explain nidanarthakara roga Ch Ni 8/16-19	CC	MK	KH	L&G D,L_ VC,C BL	TT-Theory,V V-Viva	F&S	II	
CO2,CO4,CO 6	Explain vyadhisankara Ch Ni 8/21-22	CC	MK	KH	L&PP T,L_ VC,C BL	TT-Theory,V V-Viva	F&S	II	H-RN
CO2,CO4,CO 5	Differentiate sudha and asuddha chikitsa Ch Ni 8/23	CC	MK	KH	L&G D,BS, CBL	TT-Theory,V V-Viva	F&S	II	

CO2,CO4,CO6	Define and relate different types of sadhyasadyata Ch Ni 8/33-35	CC	MK	KH	DIS,P BL,C BL,P ER	TT-Theory,V V-Viva	F&S	II	H-RN
CO2,CO4,CO5	Describe tiryaggatadosha - cikitsasutra Ch Ni 8/36-39	CK	MK	K	L&G D	TT-Theory	F&S	II	
CO6,CO8	Document experiences of physicians on nidanarthakara roga (Activity no.9)	PSY- SET	DK	KH	DIS,T PW	C-INT	F	II	
CO4,CO6,CO7	Summarise the information gathered from Nidanasthana through Quiz (activity no.10)	CAP	DK	KH	FC,D	QZ	F	II	
CO1,CO2	Recite sutras Ch Ni 8/3, 5, 16-22, 33-35,36-39	CK	MK	K	SDL, REC	P-REC	F&S	II	
CO1,CO2	Summarise the chapter based on sutra 42-44	CK	NK	K	SDL	T-OBT	F&S	II	
<b>Topic 27 Cha.Vi.01- Rasa vimana Adhyayam</b> (Lecture :2 hours, Non lecture: 3 hours)									
CO1,CO2	Explain sthana adhikarana of (objectives) of Vimanasthana Ch Vi 1/3	CK	MK	K	L&G D,LS	CR-W,TT-The ory,VV-Viva	F&S	III	
CO1,CO2	Justify the position of the chapter in the Samhita and its importance	CC	MK	K	L&G D	INT,TT-Theor y,VV-Viva	F&S	III	
CO2,CO4	Explain basic meaning and importance of key terms such as prakritisama samaveta, vikirti vishama samaveta, ahara vidhi visesha ayatana, satmya	CK	MK	K	DIS,P rBL	TT-Theory,V V-Viva	F&S	III	
CO2,CO4	Explain the prakrutisamasamavet and vikrutivishamasamavet siddhanta with suitable examples. Ch Vi 1/9,10	CK	MK	KH	L&G D	TT-Theory,V V-Viva	F&S	III	H-DG
CO2,CO4,CO5	Explain chaturvidha prabhava(rasa-dravya-dosh-vikara prabhava) with examples Ch Vi 1/12	CK	MK	KH	L&G D	TT-Theory,V V-Viva	F&S	III	H-DG

CO2,CO4	Describe the dravyaprabhava in taila,ghrita and madhu with the help of 'samanya vishesha siddhanta' Ch Vi 1/14	CC	MK	KH	L&G D,BL	DEB,TT-Theo ry,VV-Viva	F&S	III	
CO2,CO5,CO 7	Explain the dravyas which should be avoided for regular consumption Ch Vi 1/15-19	CC	MK	KH	L&G D,RL E	M-CHT,TT-T heory,VV- Viva	F&S	III	
CO2,CO4,CO 7	Explain satmya and its types Ch Vi 1/20	CC	MK	KH	L&G D,BS	TT-Theory,V V-Viva	F&S	III	
CO2,CO7	Summarize ashta aharavidhivisheshayatana and its role in preservation of health. Ch Vi 1/20-23	CK	MK	K	L&G D,PS M	DEB,TT-Theo ry,VV-Viva	F&S	III	H-SW
CO2,CO4,CO 7	Relate concept of satmya with satmyapareeksha Ch.Vi 8	CC	MK	KH	DIS	CL-PR	F	III	
CO2,CO7	Explain aharavidhi vidhana and bhojya sadgunya Ch Vi 1/24,25	CC	MK	KH	L&G D	TT-Theory,V V-Viva	F&S	III	H-SW
CO3,CO7	Appreciate the importance of popularizing importance of dietary rules (see activity list)	CAP	DK	KH	PrBL	Log book	F	III	
CO4,CO5	Differentiate and apply samanagunadravya and samanagunabhuyishtadravya Ca Vi 1/7	CAP	NK	KH	DIS	CL-PR	F	III	
CO1,CO2	Recite sutras Ch Vi 1/9,10,20,24	CK	MK	K	SDL, REC	P-VIVA,TT- Theory	F&S	III	
CO1,CO2	Summarize the chapter based on sutra Ch Vi 1/27,28	CK	NK	K	SDL	T-OBT,VV- Viva	F&S	III	
<b>Topic 28 Cha.Vi.02-Trividha kuksheeya Adhyayam</b> (Lecture :2 hours, Non lecture: 0 hours)									
CO1,CO2	Justify the position of the chapter in the Samhita and its importance	CC	MK	KH	L&G D	INT,TT-Theor y,VV-Viva	F&S	III	

CO2	Explain basic meaning of key terms such as trividha kukshi, matra-amatra ahara, amadosha, amavisha	CK	MK	K	L&G D,BS	QZ ,COM,TT- Theory,VV- Viva	F&S	III	
CO2,CO4,CO 7	Explain aharamatra based on trividha kukshi Ch Vi 2/3	CC	MK	KH	L&G D,IBL	C-INT,TT-The ory,VV-Viva	F&S	III	
CO2,CO7	Explain the matrvat ahara (ideal quantity of food) and amatrvatwa of ahara with its types Ch Vi 2/6	CC	MK	KH	L&G D	TT-Theory,V V-Viva	F&S	III	
CO4,CO7	Justify effects of heenamatra and atimatra ahara Ch Vi 2/7	CAP	MK	KH	L&G D,PB L,FC	TT-Theory,V V-Viva	F&S	III	
CO2,CO7	Enlist and explain the mental factors affecting digestion of food Ch Vi 2/8	CC	MK	KH	L_VC ,EDU	TT-Theory,V V-Viva	F&S	III	
CO4,CO5	Outline hetu, linga and aushadha of two types of amadosha Ch Vi 2/10-13	CC	MK	KH	L&PP T,CB L,PE R	TT-Theory,V V-Viva	F&S	III	
CO2,CO7	Explain the concept of amavisha Ch Vi 2/12	CC	MK	KH	L&G D,CB L	TT-Theory,V V-Viva	F&S	III	
CO2,CO3,CO 4	Define amasaya with reference to its position Ch Vi 2/17	CK	MK	K	L&G D,D- M	TT-Theory,V V-Viva	F&S	III	
CO1,CO2	Recite sutras Ch Vi 2/9	CK	MK	K	SDL, REC	P-REC,TT- Theory	F&S	III	
CO2	Summarize the chapter based on sutra Ch Vi 2/19	CK	NK	K	SDL	T-OBT,VV- Viva	F&S	III	

Topic 29 Cha.Vi.03-Janapadodhwansaneeya Vimanam Adhyaya (Lecture :2 hours, Non lecture: 2 hours)									
CO1,CO2	Justify the position of the chapter in the Samhita and its importance	CC	MK	K	L&G D	INT,TT-Theor y,VV-Viva	F&S	III	
CO2	Explain basic meaning and importance of key terms like janapadodhwamsa, daiva and purushakara	CK	MK	K	L&G D,BS	QZ ,COM,TT- Theory,VV- Viva	F&S	III	
CO2,CO5	Justify the importance of timely collection of medicines Ch Vi 3/4	CAP	DK	K	L&G D,BS	TT-Theory,V V-Viva	F&S	III	
CO2,CO7	Enlist the commomn causes of janapadodhwamsa Ch Vi 3/6	CC	MK	KH	L&G D,BS, FC	TT-Theory,V V-Viva	F&S	III	
CO2,CO7	Describe the lakshanas of dushti of vayu, jala, desha and kala. Ch Vi 3/7	CC	MK	KH	L_V C ,PBL, RP	TT-Theory,V V-Viva	F&S	III	
CO4,CO7	Interpret janapadodhwamsa in contemporary epidemiology (see also activity list)	CAP	NK	KH	DIS,B S,PBL ,FV	Log book,VV- Viva	F&S	III

<b>Topic 41 Cha.Sha.07- Sareerasankhya sareera Adhyaya</b> (Lecture :1 hours, Non lecture: 2 hours)									
CO1,CO2	Justify the position of the chapter in the Samhita and its importance	CC	MK	K	L&G D	INT,TT-Theor y,VV-Viva	F&S	II	
CO2	Explain the basic meaning and importance of key terms in the chapter such as chetanaadishtana, pranayathana, koshtanga, pratyanga, anjali pramana etc.	CK	MK	K	L&G D,BS	QZ ,COM,TT- Theory,VV- Viva	F&S	II	
CO2,CO3,CO 7	Explain paramanu bheda shariram Ch Sha 7/17	CK	MK	K	L&G D	TT-Theory,V V-Viva	F&S	II	
CO1,CO2	Recite sutra Ch Sha 7/17	CK	MK	K	SDL, REC	P-REC,TT- Theory	F&S	II	
CO1,CO2	Summarize the chapter as per sutra Ch Sha 7/19, 20	CK	NK	K	SDL	T-OBT	F&S	II	
<b>Topic 42 Cha.Sha.08-Jathisutreeya Adhyaya</b> (Lecture :1 hours, Non lecture: 12 hours)									
CO1,CO2	Justify the position of the chapter in the Samhita and its importance	CC	MK	K	L&G D	INT,TT-Theor y,VV-Viva	F&S	II	
CO2	Explain basic meaning and importance of key terms in the chapter such as jathi, pumsavana, sutikagara etc	CK	MK	K	L&G D,BS	QZ ,COM,TT- Theory,VV- Viva	F&S	II	
CO2	Enlist garbha upaghatakara bhava Ch.Su 8/21	CK	MK	K	L&G D	TT-Theory,V V-Viva	F&S	II	
CO2	Describe the infrastructure of a sutikagaram Ch. Su 8/33	CK	NK	K	PrBL, SDL	M-MOD,TT- Theory	F&S	II	V-BL
CO3,CO8	Demonstrate garbhopghatakarakabhava through skit (see activity list)	PSY- SET	DK	KH	ML,R P	QZ ,CHK,VV- Viva	F	II	
CO1,CO2	Summarize the chapter as per the sutra Ch Sha 8/68,69	CK	NK	K	SDL	T-OBT,VV-	F&S	II	

						Viva			
<b>Topic 43 Cha.In.1-Varnasvariya Indriya Adhyaya</b> (Lecture :1 hours, Non lecture: 1 hours)									
CO1,CO2	Describe sthana adhikarana (objectives) of Indriyasthana	CK	MK	KH	L&G D	INT,TT-Theor y,VV-Viva	F&S	III	
CO1,CO2	Justify the position of the chapter in the Samhita and its importance	CC	MK	KH	L&G D	INT,TT-Theor y,VV-Viva	F&S	III	
CO2	Explain basic meaning and importance of key terms such as arishta, vikritibheda, varna, swara etc. related to rishta	CK	MK	K	L&G D,BS	QZ ,COM,TT- Theory,VV- Viva	F&S	III	
CO2,CO6	Enlist factors for assessing rishta Ref: Ch. In 1/3	CK	MK	K	L&G D,BL	TT-Theory,V V-Viva	F&S	III	
CO2,CO6	Enlist six types of prakruti bheda. Ch In 1/5	CK	MK	K	L&G D,ED U	TT-Theory,V V-Viva	F&S	III	
CO2,CO6	Enlist vikritibheda (types of vikriti) in the context of rishta Ch In 1/6,7, 17-23	CK	MK	K	L&G D	TT-Theory,V V-Viva	F&S	III	
CO2,CO6	Explain prakruta and vaikarika varna Ch In 1/8,9	CK	MK	K	L&G D,ML	TT-Theory,V V-Viva	F&S	III	
CO2,CO6	Summarize varnavishayak arishta (rishta related to varna) Ch In 1/9-13	CC	MK	KH	L&G D	TT-Theory,V V-Viva	F&S	III	
CO2,CO6	Explain prakruta and vaikarika swara (normal and abnormal voices) Ch In 1/14	CK	MK	K	L&G D,ED U	QZ ,TT-Theor y,VV-Viva	F&S	III	
CO2,CO6	Summarize swara vishayak arishta (arishta related to voice) Ch In 1/15,24,25	CC	DK	KH	L&G D	TT-Theory,V V-Viva	F&S	III	

CO1,CO2	Summarize the chapter Ch In 1/26	CC	NK	KH	SDL	T-OBT,VV-Viva	F&S	III	
<b>Topic 44 Cha.In.2-Pushpitakam Indriya Adhyaya</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1,CO2	Justify the position of the chapter in the sequence	CK	MK	K	L&G D	INT,TT-Theor y,VV-Viva	F&S	III	
CO2	Explain basic meaning and importance of key terms such as niyatarishta, aniyatarishta	CK	MK	K	L&G D,BS	QZ ,COM,TT- Theory,VV- Viva	F&S	III	
CO6	Outline gandhavishayak arishta (prognostic signs identified through smell) Ch In 2/7-16	CK	DK	K	L&G D	TT-Theory,V V-Viva	F&S	III	
CO2,CO3,CO 6	Summarize rasavishayak arishta (prognostic signs related to taste) Ch In 2/17-22	CK	DK	K	L&G D	TT-Theory,V V-Viva	F&S	III	
CO1,CO2	Summarise the chapter Ch In 3/23	CK	NK	K	SDL	T-OBT,VV- Viva	F&S	III	
<b>Topic 45 Cha.In.3-Parimarshaneeyam Indriyam Adhyaya</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1,CO2	Justify the position of the chapter in the Samhita and its importance	CC	MK	K	L&G D	INT,TT-Theor y,VV-Viva	F&S	III	
CO2,CO6	Enlist Sparshagamy bhava (palpable signs) in arishta Ch In 3/4	CK	MK	K	L&G D	TT-Theory,V V-Viva	F&S	III	
CO2,CO6	Explain Sparshavishayak Arishta lakshna (based on palpation) Ch In 3/5,6	CK	MK	K	L&G D	TT-Theory,V V-Viva	F&S	III	
CO1,CO2	Summarise the chapter as per the sutras given at the end of the chapter Ch In 3/7	CK	NK	K	SDL	T-OBT,VV- Viva	F&S	III	
<b>Topic 46 Cha.In.4-Indriyaneekam Indriya adhyaya</b> (Lecture :1 hours, Non lecture: 0 hours)									

CO1,CO2	Justify the position of the chapter in the Samhita and its importance	CK	MK	K	L&G D	INT,TT-Theor y,VV-Viva	F	III	
CO2,CO6	Explain indriya vishayaka arishta samanya niyama (general rule regarding involvement of indriya) Ch In 4/3-6	CK	MK	K	L&G D	TT-Theory,V V-Viva	F&S	III	
CO1,CO2	Summarise the chapter as per the sutras given at the end of the chapter Ch In 4/27	CK	NK	K	SDL	T-OBT,VV- Viva	F&S	III	
<b>Topic 47 Cha.In.5-Purvarupeeyam Indriyam Adhyaya</b> (Lecture :1 hours, Non lecture: 2 hours)									
CO1,CO2	Justify the position of the chapter in the Samhita and its importance	CC	MK	K	L&G D	INT,TT-Theor y,VV-Viva	F&S	III	
CO2,CO6	Enlist jvara rupa vishayaka poorvaroopiya rishta (rishta based on purvarupa of jvara) Ch In 5/3-5	CK	MK	K	L&G D	TT-Theory,V V-Viva	F&S	III	
CO2,CO3,CO 4	Define swapna Ch In 5/41-42	CK	MK	K	L&G D	TT-Theory,V V-Viva	F&S	III	
CO2,CO6	Enlist and explain swapna bheda (types of swapna) Ch In 5/43	CC	MK	KH	L&G D	TT-Theory,V V-Viva	F&S	III	
CO1,CO2	Recite sutra Ch In 5/41-43	CK	MK	K	SDL, REC	P-REC,TT- Theory	F&S	III	
CO1,CO2	Summarise the chapter as per sutra Ch In 5/47	CK	NK	K	SDL	T-OBT,VV- Viva	F&S	III	
<b>Topic 48 Cha.In.6-Katamanisharireeyam Indriyam Adhyaya</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1,CO2	Justify the position of the chapter in the Samhita and explain basic meaning and importance of key terms in the chapter	CK	MK	K	L&G D	INT,TT-Theor y,VV-Viva	F&S	III	
CO2,CO3,CO 6	Outline arishta related to pureesha, mutra and swayathu Ch In 6/11-19	CC	DK	K	L&G D	TT-Theory,V V-Viva	F&S	III	

CO1,CO2	Summarise the chapter as per sutras given at the end of the chapter Ch In 6/25	CK	NK	K	SDL	T-OBT,VV-Viva	F&S	III	
<b>Topic 49 Cha.In.7-Pannarupiyam Indriyam Adhyaya</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1,CO2	Justify the position of the chapter in the Samhita	CK	MK	K	L&G D	INT,TT-Theor y,VV-Viva	F&S	III	
CO2,CO3,CO 6	Explain basic meaning and importance of chaya, pratichaya and prabha	CC	MK	K	L&G D	TT-Theory,V V-Viva	F&S	III	
CO2,CO6	Explain pratichaya vishayaka arishta. Ch In 7/4-6	CK	MK	K	L&G D	TT-Theory,V V-Viva	F&S	III	
CO2,CO6	Explain chaya vikruti arishtas. Ch In 7/4-6	CK	MK	K	L&G D	TT-Theory,V V-Viva	F&S	III	
CO2,CO6	Enlist five types chaya Ch In 7/10-13	CK	MK	K	L&G D	TT-Theory,V V-Viva	F&S	III	
CO2,CO6	Enlist seven types of prabha Ch In 7/14-15	CK	MK	K	L&G D	TT-Theory,V V-Viva	F&S	III	
CO2,CO3,CO 6	Differentiate chaya and prabha Ch In 7/16-17	CC	MK	K	L_VC	TT-Theory,V V-Viva	F&S	III	
CO1,CO2	Summarise the chapter Ch In 7/32	CK	NK	K	SDL	T-OBT,VV-Viva	F&S	III	
<b>Topic 50 Cha.In.8-Avakshiraseeyam Indriyam Adhyaya</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1,CO2	Justify position of the chapter in Samhita	CC	MK	K	L&G D	INT,TT-Theor y,VV-Viva	F&S	III	
CO1,CO2	Summarise the chapter as per sutra given at the end of the chapter	CK	NK	K	SDL	T-OBT,VV-Viva	F&S	III	

<b>Topic 51 Cha.In.9-Yasya shyavanimittiya Indriya Adhyaya</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1	Justify position of the chapter in Samhita	CK	MK	K	L&G D	INT,TT-Theor y,VV-Viva	F&S	III	
CO2	Explain basic meaning and importance of key terms such as ashtamaharoga	CC	MK	K	L	TT-Theory,V V-Viva	F&S	III	
CO2,CO4,CO 6	Enlist ashtamaharogas Ch In 9/8-9	CC	MK	K	L&G D	TT-Theory,V V-Viva	F&S	III	
CO1,CO2	Summarise the chapter as per the sutra given at the end of the chapter Ch In 9/23,24	CK	NK	K	SDL	T-OBT,VV- Viva	F&S	III	
<b>Topic 52 Cha.In.10-Sadyomaraneeyam Indriya Adhyaya</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1,CO2	Justify position of the chapter and key terms in the chapter	CC	MK	K	L&G D	INT,TT-Theor y,VV-Viva	F&S	III	
CO2,CO6	Explain sadyomaraneeya arishtas Ch In 10/3-20	CK	MK	K	L&G D	TT-Theory,V V-Viva	F&S	III	
CO1,CO2	Summarise the chapter as per the sutras given at the end of the chapter Ch In 10/21	CK	NK	K	SDL	T-OBT,VV- Viva	F&S	III	
<b>Topic 53 Cha.In.11-Anujyotiyam Indriya Adhyaya</b> (Lecture :1 hours, Non lecture: 0 hours)									
CO1,CO2	Justify the position of the chapter and explain key terms such as arishta Ch In 11/29	CC	MK	K	L&G D	INT,TT-Theor y,VV-Viva	F&S	III	
CO2,CO6	Define arishta Ch In 11/29	CK	MK	K	L&G D	TT-Theory,V V-Viva	F&S	III	
CO1,CO2	Recite sutra Ch In 11/29	CK	MK	K	SDL	P-VIVA,TT- Theory	F&S	III	

<b>Topic 54 Cha.In.12-Gomayachurniyam Indriya Adhyaya</b> (Lecture :1 hours, Non lecture: 17 hours)									
CO1,CO2	Justify the posttion of the chapter and explain key terms such as mumurshu, prasasta duta and mangalika dravya	CC	MK	K	L&G D	INT,TT-Theor y,VV-Viva	F&S	III	
CO2,CO6	Summarize mumurshu lakshana Ch In 12/9-25	CK	MK	K	L&G D	TT-Theory,V V-Viva	F&S	III	
CO2,CO6	Outline prashasta doota lakshana and mangalika dravya Ch In 12/71-80	CK	MK	K	L&G D	TT-Theory,V V-Viva	F&S	III	
CO2,CO4	Define arogya in the context of arishta Ch In 12/87	CC	MK	K	L&G D	TT-Theory,V V-Viva	F&S	III	
CO1,CO2	Summarise the chapter as per sutra given at the end of the chapter Ch In 12/89	CK	NK	K	SDL	T-OBT,VV- Viva	F&S	III	

**List of Practicals** (Term and Hours)

<b>PRACTICALS</b> (M (As a part of NLH))			
<b>S.No</b>	<b>List of Topics</b>	<b>Term</b>	<b>Hours</b>
1	SHLOKA PATHANA- 1	1	10
2	LEARNING THROUGH VYAKHYANA-1	1	3
3	OBSERVING THE PRACTICAL UTILITY OF SNEHANA AND SWEDANA	1	2
4	IDENTIFICATION OF BAHUDOSHA LAKSHANA IN PATIENTS	1	2
5	ASSESSMENT OF DISEASES BASED ON TRIVIDHA BODHYA SANGRAHA	1	2
6	IDENTIFICATION OF ASHTA DOSHA IN STHOULYA	1	2
7	CLINICAL OBSERVATIONS ON NIJA AGANTUJA RELATIONSHIP	1	2
8	CLINICAL OBSERVATION ON SHADUPAKRAMA	1	2
9	ASSESSMENT OF RAKTA DUSHTI KARANA IN SPECIFIC CLINICAL CONDITIONS	1	2
10	OBSERVATIONS ON USE OF AGRYA AUSHADHA IN CLINICAL PRACTICE	1	2
11	ASSESSMENT OF DHATU-UPADHATU-MALA PRADOSHAJA VIKARAS IN PATIENTS	1	3
12	SHLOKA PATHANA- 2	2	10
13	LEARNING THROUGH VYAKHYANA-2	2	3
14	CASE TAKING IN RELATION TO NIDANA PANCHAKA	2	12
15	DIFFERENTIAL DIAGNOSIS OF SKIN DISEASES BASED ON GUIDELINES ON KUSHTA	2	2
16	PRAMANA PARIKSHA	2	2
17	IDENTIFICATION OF VIKARAVIGHATA BHAVA ABHAVA IN PATIENTS	2	2
18	EXPLORATION OF LOKA PURUSHA SAMYA VADA IN THE BACK GROUND OF ONE HEALTH	2	2
19	SHLOKA PATHANA-3	3	10
20	LEARNING THROUGH VYAKHYANA-3	3	3
21	LEARNING THROUGH SAMBHASHA PARISHAD	3	6
22	SROTAS PROFORMA	3	2

23	LEARNING THROUGH TANTRA YUKTI	3	5
24	ASSESSMENT OF HEALTH THROUGH DHATU SAMYA PAREEKSHA	3	2
25	AGNI ASSESSMENT BASED ON APACHARA	3	2
26	TRIVIDHA ROGA VISHESHAVIJNANA IN DIAGNOSIS	3	3
27	ASSESSMENT OF UPASAYA AND ANUPASAYA IN PATIENTS	3	2

**Table 4: Learning objectives (Practical)**

<b>Topic 1 SHLOKA PATHANA- 1</b>									
CO1,CO2	Recite the selected slokas in each chapter	CK	MK	K	REC	PP-Practical,V V-Viva	F&S	I	
CO1,CO2	Compile slokas selected for recitation	CK	MK	K	SDL	PP-Practical,V V-Viva	F&S	I	
<b>Topic 2 LEARNING THROUGH VYAKHYANA-1</b>									
CO1,CO2	Interpret selected sutras with the help of Ayurveda Deepika Vyakhyana of Carakasamhita	CC	MK	KH	L&G D,DIS ,TBL	PP-Practical,V V-Viva	F&S	I	
CO1,CO2	Prepare narrative summary of vyakhyana for the specified sutras	CAP	MK	KH	SDL	PP-Practical,V V-Viva	F&S	I	
CO1,CO2	Appreciate importance of Vyakhyana in learning Samhita	AFT- REC	MK	KH	D	P-VIVA	F&S	I	
<b>Topic 3 OBSERVING THE PRACTICAL UTILITY OF SNEHANA AND SWEDANA</b>									
CO4,CO5	Identify and compile experiences of people undergoing sneha-	CAP	MK	KH	SDL,	PP-Practical	F&S	I	V-PC

	sweda				RLE				
<b>Topic 4 IDENTIFICATION OF BAHUDOSHA LAKSHANA IN PATIENTS</b>									
CO3,CO4,CO6,CO7	Assess Bahudoshalakshana in patients	PSY-SET	MK	SH	CBL, PT	PP-Practical,V V-Viva	F&S	I	
CO3,CO4,CO6,CO7	Appreciate the role and importance of assessing bahudosha lakshana in clinical practice	AFT-REC	MK	SH	CBL, PRA	PP-Practical,V V-Viva	F&S	I	
<b>Topic 5 ASSESSMENT OF DISEASES BASED ON TRIVIDHA BODHYA SANGRAHA</b>									
CO3,CO4,CO6,CO7	Assess diseases based on trividha-bodhya-sangraha ie. vikaraprakriti(nature of disease), samuthana (causative factors) and adhishtana (site of disease)	PSY-SET	MK	SH	CBL, PRA	PP-Practical,V V-Viva	F&S	I	
CO3,CO4,CO6,CO7	Appreciate role and importance of trividhabodhyasangraha in clinical practice	AFT-REC	MK	SH	CBL, PRA	PP-Practical,V V-Viva	F&S	I	
<b>Topic 6 IDENTIFICATION OF ASHTA DOSHA IN STHOULYA</b>									
CO3,CO4,CO6,CO7	Assess ashtadosha of atisthoulya in subjects	PSY-SET	MK	SH	CBL, D	TT-Theory,V V-Viva	F&S	I	
CO3,CO4,CO6,CO7	Maintain good communication skills with patients	AFT-RES	MK	SH	CBL, D, PRA	TT-Theory,V V-Viva	F&S	I	
<b>Topic 7 CLINICAL OBSERVATIONS ON NIJA AGANTUJA RELATIONSHIP</b>									
CO3,CO4,CO6,CO8	Identify relationship between nija and agantu in clinical conditions	PSY-SET	MK	SH	CBL, PT,D	PP-Practical,V V-Viva	F&S	I	
CO4,CO8	Develop good rapport with patients	AFT-VAL	MK	SH	CBL, PT,D	P-VIVA,VV-Viva	F&S	I	

**Topic 8 CLINICAL OBSERVATION ON SHADUPAKRAMA**

CO3,CO4,CO5,CO8	Identify shadupakrama in treatment plans of different diseases	PSY-SET	MK	SH	CBL,PT,D	PP-Practical,V V-Viva	F&S	I	
CO5,CO8	Develop good communications skills in clinics	AFT-REC	MK	SH	CBL,PT,D	PP-Practical,V V-Viva	F&S	I	

**Topic 9 ASSESSMENT OF RAKTA DUSHTI KARANA IN SPECIFIC CLINICAL CONDITIONS**

CO3,CO4,CO6,CO7	Identify raktadushti karanas in patients affected by raktadushti, especially, skin diseases	PSY-SET	MK	SH	CBL,D,PR A	PP-Practical,V V-Viva	F&S	I	
CO3,CO4,CO6,CO7	Develop good communication skills with patients	AFT-REC	MK	SH	CBL,D,PR A	PP-Practical,V V-Viva	F&S	I	

**Topic 10 OBSERVATIONS ON USE OF AGRYA AUSHADHA IN CLINICAL PRACTICE**

CO1,CO4,CO5	Justify use of agraushadhas in common clinical conditions	PSY-MEC	MK	SH	PER	P-VIVA	F&S	I	
CO8	Develop good communication skills	AFT-REC	MK	SH	DIS,PER	P-VIVA	F&S	I	

**Topic 11 ASSESSMENT OF DHATU-UPADHATU-MALA PRADOSHAJA VIKARAS IN PATIENTS**

CO3,CO4,CO6,CO7	Identify dhatu-mala-upadahtu pradoshaja vikaras in patients	PSY-SET	MK	SH	CBL,PT,D_ BED	P-EXAM,VV- Viva	F&S	I	
CO3,CO4,CO8	Develop rapport with patients	AFT-REC	MK	SH	CBL,D_ BED	P-VIVA,VV- Viva	F&S	I	

<b>Topic 12 SHLOKA PATHANA- 2</b>									
CO2	Recite the selected slokas in each chapter	CK	MK	K	REC	P-VIVA	F&S	II	
CO2	Compile slokas selected for recitation	CK	MK	K	TBL, SDL	P-VIVA	F&S	II	
<b>Topic 13 LEARNING THROUGH VYAKHYANA-2</b>									
CO2	Interpret selected sutras with the help of Ayurveda Deepika Vyakhyana of Carakasamhita	CAP	MK	KH	L&G D,DIS ,TBL	P-VIVA	F&S	II	
CO2	Prepare narrative summary of vyakhyana for the specified sutras	CAP	MK	KH	DIS,S DL	P-VIVA	F&S	II	
CO1,CO2	Appreciate importance of Vyakhyana in learning Samhita	AFT- REC	MK	KH	D	P-VIVA	F&S	II	
<b>Topic 14 CASE TAKING IN RELATION TO NIDANA PANCHAKA</b>									
CO3,CO4,CO 6,CO7	Perform case taking based on nidana-panchaka	PSY- SET	MK	SH	CBL, D_BE D	P-VIVA	F&S	II	
CO8	Develop rapport with patients	AFT- REC	MK	SH	CBL, D_BE D	T-EMI,P- VIVA	F&S	II	
CO6,CO8	Develop clinical skills based on Ayurvedic clinical methods	PSY- SET	MK	SH	CBL, D_BE	PP-Practical	F&S	III	

					D				
<b>Topic 15 DIFFERENTIAL DIAGNOSIS OF SKIN DISEASES BASED ON GUIDELINES ON KUSHTA</b>									
CO4,CO6,CO8	Assess skin diseases based on Ayurvedic parameters	PSY-SET	MK	SH	CBL, D_BE D	PP-Practical	F&S	II	
CO6,CO8	Develop skills based on Ayurvedic clinical methods	AFT-REC	MK	SH	D_BE D	PP-Practical	F&S	II	
<b>Topic 16 PRAMANA PARIKSHA</b>									
CO3,CO4,CO6,CO7	Assess physiometry based on pramana-pareeksha mentioned in Ayurveda	PSY-SET	MK	SH	D	VV-Viva	F&S	II	
CO8	Appreciate importance of Ayurvedic methods of measurements	AFT-REC	MK	SH	D	VV-Viva	F&S	II	
<b>Topic 17 IDENTIFICATION OF VIKARAVIGHATA BHAVA ABHAVA IN PATIENTS</b>									
CO2,CO3,CO4,CO6,CO7	Apply the concept of "vikaravisatabhavabhavapractivisesha" in understanding diseases	CAP	MK	KH	CBL, CD	P-VIVA	F&S	II	
CO6	Perform case taking based on the concept of vikaravighata bhava abhava	PSY-SET	MK	SH	CD,D	P-VIVA	F&S	II	
<b>Topic 18 EXPLORATION OF LOKA PURUSHA SAMYA VADA IN THE BACK GROUND OF ONE HEALTH</b>									
CO4,CO7,CO8	Apply lokapurusha-samyasidhanta in contemporary life	CAP	MK	KH	DIS,BS,PrBL	VV-Viva	F&S	II	
<b>Topic 19 SHLOKA PATHANA-3</b>									
CO1,CO2	Recite the selected slokas in each chapter	CK	MK	K	REC	VV-Viva	F&S	III	

CO1,CO2	Compile slokas selected for recitation	CK	MK	K	SDL	VV-Viva	F&S	III	
<b>Topic 20 LEARNING THROUGH VYAKHYANA-3</b>									
CO1,CO2	Interpret selected sutras with the help of Ayurveda Deepika Vyakhyana of Carakasamhita	CAP	MK	KH	L,LS	VV-Viva	F&S	III	
CO1,CO2	Prepare narrative summary of vyakhyana for the specified sutras	CC	MK	KH	SDL	VV-Viva	F&S	III	
CO1,CO2	Appreciate importance of Vyakhyana in learning Samhita	AFT-REC	MK	KH	D	P-VIVA	F&S	III	
<b>Topic 21 LEARNING THROUGH SAMHASHA PARISHAD</b>									
CO1,CO2	Demonstrate Sambhasha parishat to discuss different topics	PSY-ADT	MK	SH	D	P-VIVA	F&S	III	
CO8	Appreciate the importance of collective thinking in learning Ayurveda	AFT-VAL	MK	SH	DIS,D	P-VIVA	F&S	III	
<b>Topic 22 SROTAS PROFORMA</b>									
CO4,CO6,CO8	Assess involvement of srotas in clinical conditions	PSY-SET	MK	SH	D_BE D	VV-Viva	F&S	III	
CO8	Develop clinical skills based on Ayurvedic clinical methods	AFT-REC	MK	SH	D_BE D	VV-Viva	F&S	III	
<b>Topic 23 LEARNING THROUGH TANTRA YUKTI</b>									
CO1,CO2,CO4	Apply tantrayukti and interpret the sutras	CAP	MK	KH	TBL, D	P-VIVA	F&S	III	
CO1	Appreciate the importance of Tantrayukti in interpreting Samhita	CAP	MK	KH	DIS,T BL	P-VIVA,VV-Viva	F&S	III	

<b>Topic 24 ASSESSMENT OF HEALTH THROUGH DHATU SAMYA PAREEKSHA</b>									
CO3,CO4,CO 6	Assess health of a person based through dhatu-samya-pareeksha	PSY- SET	MK	SH	CBL, D_BE D	P-VIVA	F&S	III	
CO8	Appreciate health of a person through interaction	AFT- RES	MK	SH	D_BE D	P-VIVA,VV- Viva	F&S	III	
<b>Topic 25 AGNI ASSESSMENT BASED ON APACHARA</b>									
CO3,CO4,CO 7	Assess agni based on apachara-visesha	PSY- SET	MK	SH	DIS,D _BED	P-VIVA	F&S	III	
CO8	Develop good rapport with patients	AFT- REC	MK	SH	CBL, D_BE D	P-VIVA	F&S	III	
<b>Topic 26 TRIVIDHA ROGA VISHESHAVIJNANA IN DIAGNOSIS</b>									
CO4,CO6,CO 7	Demonstrate trividha roga visesha vijnana in clinical methods	PSY- SET	MK	SH	DIS,C BL,D	P-VIVA	F&S	III	
CO8	Appreciate the importance of Ayurvedic parameters in clinical methods	AFT- VAL	DK	SH	DIS,C BL,D	P-VIVA	F&S	III	
<b>Topic 27 ASSESSMENT OF UPASAYA AND ANUPASAYA IN PATIENTS</b>									
CO3,CO5,CO 6	Identify upasaya-anupasaya in patients	PSY- SET	MK	SH	CBL, D_BE D	P-VIVA	F&S	III	
CO8	Appreciate wellness of patients	AFT- REC	DK	SH	D_BE D	P-VIVA	F&S	III	

**Table 4a: List of Practical** (As a part of NHL)

S.No	Name of practical	Term	Activity	Practical hrs
1	SHLOKA PATHANA- 1	1	<p><b>Purpose:</b> To by heart sutras selected from Charakasamhita</p> <p><b>Teacher's role:</b> Teachers should instruct the students to by heart the slokas when the respective portions are over. A log book may be kept by the teacher to mark the date and signature to note the satisfactory recitation of the slokas by the students. The performance of students can be considered for formative assessment. During summative assessment, sloka recitation will be a part of practical examination.</p> <p><b>Students role:</b> To by heart the selected slokas given below and to compile minimum 100 sutras (three terms)</p> <p><b>Sutras suggested:</b></p> <ol style="list-style-type: none"> <li>1. Cha.Su.13- Sneha Adhyaya- 13-17, 22, 57-59</li> <li>2. Cha.Su.14- Sveda Adhyaya- 4,5,39,40,64</li> <li>3. Cha.Su.15- Upakalpaneeya Adhyaya – 22</li> <li>4. Cha.Su.16- Chikitsaprabhritiya Adhyaya - 13-21,27,28,34-36</li> <li>5. Cha.Su.17- Kiyantashiraseeya Adhyaya- 12, 41-44, 62, 112-118</li> <li>6. Cha.Su.18-Trisotheeya Adhyaya- 42-43, 44-47</li> <li>7. Cha.Su.19-Ashtodareeya Adhyaya- 5,6</li> <li>8. Cha.Su.20- Maharoga adhyaya- 3, 4, 5, 11,14, 17, 20-22</li> <li>9. Cha.Su.21- Ashtauninditeeya adhyaya- 3,4,16, 18, 19, 35, 50, 58</li> <li>10. Cha.Su.22- Langhanabrimhaneeya Adhyaya- 9-24</li> <li>11. Cha.Su.23- Santarpaneeya Adhyaya- 5-7, 26-29</li> <li>12. Cha.Su.24- Vidhisoniteeya Adhyaya- 14,18,20,21,22,24</li> <li>13. Cha.Su.25- Yajjapuruseeya Adhyaya- 29,,31,33,45,46,47,50</li> <li>14. Cha.Su.26- Atreyabhadraakaapeeya Adhyaya- 13,36,37,61,62,66,81,85,86</li> <li>15. Cha.Su.27- Annapaanvidhi Adhyaya- 351-352</li> <li>16. Cha.Su.28- Vividhaasheetapeetiya Adhyaya- 9-19,35-39, 45</li> </ol>	10

2	LEARNING THROUGH VYAKHYANA-1	1	<p><b>Purpose:</b> To familiarize and expose the students to the relevant vyakhyana of Charaka Samhita. The following specific portions in the Vyakhyana are selected for this purpose.</p> <ol style="list-style-type: none"> <li>1. Cha.Su.20- Maharoga adhyaya - 11,16,19</li> <li>2. Cha.Su.26- Atreyabhadhrakaapyeya Adhyaya - 13,29</li> <li>3. Cha.Su.28- Vividhaasheetapeetiya Adhyaya - 7</li> </ol> <p><b>Teacher's role:</b> Teachers will teach those sutras along with the commentary and explain the importance of vyakhyana in better understanding of sutras.</p> <p><b>Students' role:</b> Students will prepare a narrative summary of all the proposed vyakhyanas to highlight their importance in interpreting the sutras. During viva students are asked to interpret the respective sutras along with its vyakhyana.</p>	3
3	OBSERVING THE PRACTICAL UTILITY OF SNEHANA AND SWEDANA	1	<p><b>Purpose:</b> To familiarize commonly available snehayogas and commonly undertaken swedaprayogas. (Ref: Ch Su 13,14)</p> <p><b>Teacher's role:</b> Make five or six groups and instruct them to enlist available ghruta and taila yoga in hospital pharmacy. Enlist the types of swedana followed in panchakarma theatre in the hospital.</p> <p><b>Student's role:</b> Student in groups should document the assigned work in a prescribed format and present to all in the class.</p>	2
4	IDENTIFICATION OF BAHUDOSHA LAKSHANA IN PATIENTS	1	<p><b>Purpose:</b> To assess bahudosha lakshana with the help of proforma in patients posted in hospital wards. (Ref: Ch Su 16/13-16)</p> <p><b>Teacher's role:</b> Teacher should introduce the proforma in the class and guide the students how to furnish the proforma. Teacher may identify patients exhibiting bahudosha lakshana from the ward, those who are posted for Shodhana. Collect the</p>	2

			<p>proformas duly filled by students and analyze the data and discuss with students.</p> <p><b>Students' role:</b> Student should interact with given patient and identify the Bahudosha lakshanas available in the patient and document in the proforma (minimum three cases).</p>	
5	ASSESSMENT OF DISEASES BASED ON TRIVIDHA BODHYA SANGRAHA	1	<p><b>Purpose:</b> To orient students on the use of trividha-bodhya-sangraha (i.e, vikaraprakriti, adhishtana, samuthana) in understanding diseases and thereby enabling them using the unique assessment protocol mentioned in Caraka samhita. (Ref: Ch Su 18/44-47 along with Chakrapani commentary)</p> <p><b>Teacher's role:</b> Introduce the concept of trividha bodhya sangraha, Introduce the case proforma in the class, demonstrate case taking based on trividha-bodhya-sangraha</p> <p><b>Students role:</b> Fill up the observations in the proforma during their routine clinical posting (minimum 3 cases).</p>	2
6	IDENTIFICATION OF ASHTA DOSHA IN STHOULYA	1	<p><b>Purpose:</b> To identify prevalence of ashtadosha of sthaulya in individuals (Ref: Ch Su 21/4)</p> <p><b>Teacher's role:</b> Explain ashtadosha in the class; Introduce the questionnaire to document ashtadosha in individuals; Demonstrate the questionnaire in obese individuals</p> <p><b>Students role:</b> Students will furnish the questionnaire among five people of different age groups and prepare a report based on the findings of the questionnaire survey.</p>	2
7	CLINICAL OBSERVATIONS ON NIJA AGANTUJA RELATIONSHIP	1	<p><b>Purpose:</b> To explore relationship between nija and agantu diseases (Ref: Ch Su 19/7)</p> <p><b>Teacher's role:</b> Teacher explains nija-agantu relationship with examples in the class; Demonstrate some cases where disease starts as agantu and advance to nija and vice versa.</p> <p><b>Students' role:</b> Observe minimum three</p>	2

			cases in OP/IP and make reports to establish the relationship between nija and agantu.	
8	CLINICAL OBSERVATION ON SHADUPAKRAMA	1	<p><b>Purpose:</b> To explore application of shadupakrama in therapeutics (Ref Ch Su 22)</p> <p><b>Teacher's role:</b> After teaching shadupakrama, teachers shall identify some cases in the hospital to demonstrate any one or more upakramas; Try to include cases with varieties of upakrama; Train students to see patients, explore the case sheets and hospital records to find out upakramas adopted to a particular patient.</p> <p><b>Students' role:</b> Observe minimum three cases from hospital and go through case sheets to identify types of upakrama adopted; Interact with interns, teachers to map the upakramas adopted in each patient; Make reports on type of upakrama, nature of medicines used and effects of upakramas based on the above observations; Document observations in three cases</p>	2
9	ASSESSMENT OF RAKTA DUSHTI KARANA IN SPECIFIC CLINICAL CONDITIONS	1	<p><b>Purpose:</b> To identify raktadushtikaranas in cases where raktadushti is suspected (Ref: Ch Su 24/5-10)</p> <p><b>Teacher's role:</b> Teach raktadushti karana; Select some cases where raktadushti is suspected; Demonstrate presence of raktadushti karanas in one or two cases; Assign cases to students to identify presence of raktadushtikarana</p> <p><b>Student's role:</b> Identify presence of raktadushti karanas in three cases with the help of questionnaire provided; Document the observations</p>	2
10	OBSERVATIONS ON USE OF AGRYA AUSHADHA IN CLINICAL PRACTICE	1	<p><b>Purpose:</b> To justify the importance of agryoushadha in clinical practice (Ref: Ch Su 25/38-40)</p> <p><b>Teacher's role:</b> Identify some important agryoushadhas from the list given in Annapanachatushka; Divide the whole class into five or six groups and assign</p>	2

			each group with two or three agrya aushadhas <b>Students role:</b> Make monographs of agryoushadha; Interact with practitioners and collect details of use of these aushadhas in routine practice; Document the observations in the record book.	
11	ASSESSMENT OF DHATU-UPADHATU-MALA PRADOSHAJA VIKARAS IN PATIENTS	1	<b>Purpose:</b> To identify dhatu-upadhatu-mala pradoshaja vikaras in selected cases. (Ref Ch Su 27/9-22) <b>Teacher's role:</b> Demonstrate the proforma in a few cases. <b>Students' role:</b> Make five case sheets reporting the findings of the assessment.	3
12	SHLOKA PATHANA- 2	2	See Practical.1 for instructions <b>Sutras suggested:</b> 1. Cha.Su.30- Arthedashamahamooleeyam Adhyaya - 3,4,10,11,12 2. Cha.Ni.01-Jwara nidana Adhyaya- 3,5,7,8,9,10,11,38-40 3. Cha.Ni.02-Raktapitta nidana Adhyaya- 19,27 4. Cha.Ni.04-Prameha nidana adhyaya- 3, 4, 48-49 5. Cha.Ni.05- Kushta nidana Adhyaya- 3,4,5,8 6. Cha.Ni.06-Shosha nidana Adhyaya- 3, 5,7,9,11,14 7. Cha.Ni.07- Unmada nidana Adhyaya- 5,19-22 8. Cha.Ni.08- Apasmara nidana adhyaya- 3,5,17-22, 33-35,37-39 9. Cha.Sha.1-Katithapurushheeya Adhyaya- 16-23, 28-30,36, 63, 64,70-74, 98,102,109,137-139, 148,149 10. Cha.Sha.02-Atulyagothreeyam Adhyaaya- 26, 27, 35,44,45-47 11. Cha.Sha.03-Khuddika garbhavakranti Adhyaya- 17 12. Cha.Sha.04-Mahatee garbhavakranti Adhyaya- 6,36 13. Cha.Sha.05-Purushavichaya Shareera Adhyaya- 3, 5, 8,16	10

			14. Cha.Sha.06-Sareeravichaya adhyaya-4, 5-11, 12,13, 17, 28, 30 15. Cha.Sha.07- Sareerasankhya sareera Adhyaya	
13	LEARNING THROUGH VYAKHYANA-2	2	See Practical No.2 for instructions <b>Suggested sutras:</b> 1. Cha.Ni. 4-Prameha nidana adhyaya -4 2. Cha.Sha.1-Katithapurushheeya Adhyaya-21 3. Cha.Sha. 6- Sareeravichaya adhyaya - 9-11	3
14	CASE TAKING IN RELATION TO NIDANA PANCHAKA	2	<b>Purpose:</b> To map the disease process through nidana-panchaka (Ref: Ch Ni 1) <b>Teacher's role:</b> Demonstrate the case proforma in patients; Assign five patients to students for documenting nidanapanchaka <b>Students role:</b> Furnish the case proforma in five patients	12
15	DIFFERENTIAL DIAGNOSIS OF SKIN DISEASES BASED ON GUIDELINES ONKUSHTA	2	<b>Purpose:</b> To familiarize differential diagnosis of kushta through Ayurvedic parameters (Ref: Ch Ni 5) <b>Teacher's role:</b> Demonstrate case taking in a few cases <b>Students role:</b> Furnish the case proforma for minimum three cases of skin diseases	2
16	PRAMANA PARIKSHA	2	<b>Purpose:</b> To familiarize Ayurvedic methods of physiometry (Ref: Ch Sha 7) <b>Teacher's role:</b> Preparing measurement methods based on anguleprmana and anjaleepramana as explained in Ayurveda; Demonstrating such methods in healthy individuals <b>Students role:</b> Assessing physiometry based on the guidelines given by the teacher in three individuals/peers and document the observations	2
17	IDENTIFICATION OF VIKARAVIGHATA BHAVA ABHAVA IN PATIENTS	2	<b>Purpose:</b> To explore concept of vikara- vighata-bhava-abhava in clinical scenario. (Ref: Ch Ni 4/3 along with Chakrapani commentary)	2

			<p><b>Teachers role:</b> Divide class into four or five groups and assign most commonly seen diseases to each group (Eg. Prameha); Conduct group discussions to identify risk factors / protective factors of respective diseases through literature review, interaction with peers and teachers; Sum up findings of group discussions and prepare check list for each disease</p> <p><b>Student's role:</b> Conduct group discussions to identify risk/protective factors of disease assigned to them; Prepare check list for each disease regarding probable risk/protective factors; Identify presence/absence of items in the check list in minimum of three cases of the respective disease</p>	
18	EXPLORATION OF LOKA PURUSHA SAMYA VADA IN THE BACK GROUND OF ONE HEALTH	2	<p><b>Purpose:</b> To explore loka-purusha-samya in the background of one health movement (Ref: Ch Sha 5)</p> <p><b>Teacher's role:</b> Conduct discussions in the class to identify how nature is related to human being; Explore this relationship in the background of concept of one health; conduct discussions</p> <p><b>Students role:</b> Conduct the discussions and prepare a summary report</p>	2
19	SHLOKA PATHANA-3	3	<p>Refer Practical No.1 for instructions</p> <p><b>Sutras suggested:</b></p> <ol style="list-style-type: none"> <li>1. Cha.Vi. 01- Rasa vimaana Adhyayam-10,24</li> <li>2. Cha.Vi. 02-Trividha kaksheeya Adhyayam-15-18</li> <li>3. Cha.Vi. 04-Trividha roga vishesha vijnyaneeya adhyaya-4,12</li> <li>4. Cha.Vi. 05- Sroto vimana Adhyaya-3,4,7,9-27</li> <li>5. Cha.Vi. 06-Roganika vimana adhyaya -19</li> <li>6. Cha.Vi. 07- Vyadhita rupeeya vimana Adhyaya-28</li> <li>7. Cha.Vi. 08-Rogabhishagjiteeyam Adhyaayam-3,6,68-78</li> <li>8. Cha.In.5-Purvarupeeyam Indriyam Adhyaya-43</li> <li>9. Cha.In.11-Anujyotiyam Indriya</li> </ol>	10

			Adhyaya-29	
20	LEARNING THROUGH VYAKHYANA-3	3	Refer Practical No.2 for instructions <b>Sutras suggested:</b> 1. Cha.Vi.01- Rasa vimaana Adhyayam -10 2. Cha.Vi.08- Rogabhishagjiteeyam Adhyaayam-68 -80	3
21	LEARNING THROUGH SAMBHASHA PARISHAD	3	<b>Purpose:</b> To familiarize the method of Sambhasha parishad in bringing out scientific discussions. (Ref: Ch Vi 8) <b>Teacher's role:</b> Prepare guidelines for conducting Sambhasha parishat as per descriptions in Vadamarga; Demonstrate parishat in the class either through a video demonstration or otherwise; Divide the class into four or five groups and assign one topic each for them; Evaluate the group presentations based on the guidelines <b>Student's role:</b> Each group will prepare and demonstrate a parishat in the subject concerned; Prepare summary of the parishat <b>Suggested topics:</b> 1. Relevance of Daivavyapasraya cikitsa 2. Rakta as fourth dosha 3. Relevance of food classification 4. Specific agrya related to vihara (Eg: vishado rogavardhananam) 5. Importance of naming of disease 6. Relevance of viruddha ahara	6
22	SROTAS PROFORMA	3	<b>Purpose:</b> To assess status of srotodushti in different clinical conditions (Ref: Ch Vi 5) <b>Teacher's role:</b> Demonstrate the proforma for assessment of srotas in clinical conditions <b>Students role:</b> Furnish the srotas proforma in at least three cases	2
23	LEARNING THROUGH TANTRA YUKTI	3	<b>Purpose:</b> Demonstrate use of tantrayukti in different sutras <b>Teachers role:</b> Identify and demonstrate application of tantrayukti in different sutras	5

**Student's role:** Identify tantrayukti and prepare summary on justifying importance of tantrayukti in selected sutras

**Suggested Tantrayuktis:**

1. Adhikaran - commonly seen in many sutras
2. Yoga - commonly seen in many sutras
3. Padartha - commonly seen in many sutras
4. Vakyasesha - commonly seen in many sutras
5. Upadesha - Ca. Su. 13/18-19, Ca. Su. 13/94
6. Niyoga - Ca. Su. 13/34, Ca. Ni. 3/17
7. Apadesha - Ca. Su. 13/13, Ca. Su. 18/44-46, Ca. Su. 26/41, Ca. Ni. 2/12-17
8. Samuchaya - Ca. Su. 13/23-25, Ca. Su. 20/8, Ca. Su. 23/5-7, Ca. Su. 23/27-30, Ca. Ni. 3/7
9. Nidarshana - Ca. Su. 13/96-97, Ca. Su. 17/75(1), Ca. Su. 14/5, Ca. Su. 19/5, Ca. Su. 30/5
10. Nirvachana - Ca. Su. 16/31-32, Ca. Su. 16/34, Ca. Su. 17/95, Ca. Su. 21/9, Ca. Su. 25/4, 11. Ca. Su. 29/4, Ca. Su. 30/5, Ca. Su. 30/12, Ca. Su. 30/24
12. Vidhana - Ca. Su. 15/11, Ca. Su. 15/16, Ca. Su. 16/27
13. Prasanga - Ca. Su. 17/113, Ca. Su. 20/8, Ca. Su. 25/4, Ca. Ni. 1/3, Ca. Sa. 1/118-126
14. Viparyaya - Ca. Su. 25/31, Ca. Sa. 6/6, Ca. Sa. 6/9, Ca. Ni. 3/7, Ca. Ni. 3/9, Ca. Ni. 3/11
15. Ekantika - Ca. Su. 15/5, Ca. Su. 20/22, Ca. Su. 21/20, Ca. Su. 25/31, Ca. Su. 30/25, Ca. Ni. 1/32
16. Atitaveksha - Ca. Su. 22/31, Ca. Su. 28/25-30
17. Anagataveksha - Ca. Su. 15/5, Ca. Su. 28/30, Ca. Vi. 8/93, Ca. Vi. 8/135, Ca. Vi. 8/136
18. Swasangya - Ca. Su. 30/3
19. Prayojana - Ca. Su. 30/26, Ca. Sa. 5/5
20. Anumata - Ca. Su. 26/64-65, Ca. Su. 16/28, Ca. Sa. 1/16
21. Vikalpa - Ca. Su. 26/105
22. Pradesha - Ca. Su. 27/329, Ca. Vi. 8/137

			<p>23. Sambhava - Ca. Su. 28/45  24. Hetwartha - Ca. Ni. 2/21, Ca. Ni. 4/4, Ca. Ni. 7/28, Ca. Vi. 3/40  25. Atidesha - Ca. Sa. 6/11  26. Apavarga - Ca. Su. 26/106  27. Uddhara - Ca. Su. 25/29  28. Anaikantika - Ca. Su. 15/4  29. Pratyutsara and Uddhara - Ca. Su. 25/10-28  30. Nirnaya - Ca. Su. 25/29  31. Apavarga - Ca. Vi. 1/10</p>	
24	ASSESSMENT OF HEALTH THROUGH DHATU SAMYA PAREEKSHA	3	<p><b>Purpose:</b> To assess health status of a person based on dhatusamya pareeksha. (Ref: Ch Vi 8/89)  <b>Teacher's role:</b> Demonstrate use of proforma in healthy subjects  <b>Students role:</b> Assess dhatusamya in ten individuals using the proforma</p>	2
25	AGNI ASSESSMENT BASED ON APACHARA	3	<p><b>Purpose:</b> To familiarise the assessment of agni based on apacara-visesha (Ref: Ch Vi 6/12)  <b>Teacher's role:</b> Explain the concept of agnipareeksha based on apacharavishesha; Demonstrate the questionnaire in a few subjects  <b>Students role:</b> Assess agni of ten individuals using the proforma</p>	2
26	TRIVIDHA ROGA VISHESHAVIJNANA IN DIAGNOSIS	3	<p><b>Purpose:</b> To justify the role of trividha-rogavishesha vijnana (pratyaksha, anumana and aptopadesa) in clinical methods. (Ref: Ch Vi 4)  <b>Teacher's role:</b> Demonstrate the use of pratyaksha, anumana and aptopadesa in case taking, stressing on use of sense organs (smell, touch, vision and sound), methods of inference and importance of aptopadesa (writing respective references relevant in a particular case); Assigning cases to demonstrate the above methods  <b>Students role:</b> Prepare reports on application of trividha visesha vijnana in three cases</p>	3

27	ASSESSMENT OF UPASAYA AND ANUPASAYA IN PATIENTS	3	<p><b>Purpose:</b> To justify importance of upasaya and anupasaya clinical examination (Ref: Ch Ni 1 with Chakrapani commentary)</p> <p><b>Teacher's role:</b> Demonstrate identification of upasaya and anupasaya in selected cases</p> <p><b>Students role:</b> Identify upasaya and anupasaya in a minimum of three cases and document it</p>	2
<b>Total Hr</b>				<b>100</b>

### Activity

CO	Topic name	Activity Details	Hours #
CO5,CO7	Cha.Su.15-Upakalpaneeya Adhyaya	<b>Expert Lecture on Aturalaya:</b> This activity will evoke an interest among students about planning for construction of Hospitals and Nursing homes. Topic: Standard guidelines to setup Ayurveda Clinics, Nursing Homes and Hospitals.	1
CO6,CO7,CO8	Cha.Su.19-Ashtodareeya Adhyaya	<b>Activity on Disease classification:</b> Teacher should give an insight to NAMASTE portal published by Ministry of AYUSH. Students should go through with every standardised Ayurveda terminologies related to disease classification and also National Ayurveda Morbidity codes.	2
CO4,CO6,CO8	Cha.Su.20- Maharoga adhyaya	<b>Compilation/ Making monograph on Nanatmaja vikara:</b> Steps (1) Teacher should make teams of 3-5 students.(2) An Editorial team for making monograph has to be made including experts of Roga Nidana. (3) Divide the 140 diseases into available number of teams. (4) Teacher should provide a format to collect data on each diseases which must include pictorial representation of disease and cross references. (5) The Editorial team will collect the data from all teams and edit in the form of a	3

		book. (6) The content should be reviewed by Experts and made as E-Monograph (PDF)/ Book.	
CO4,CO7	Cha.Su.21- Ashtauninditeeya adhyaya	<b>Video making on concept of Nidra:</b> Steps (1) Teacher should explain the content on which students should make video (2) The Minimum duration of Video should be 3 minutes. (3) Video can be in regional languages. (4) Teacher should select the best videos and can publish in social media after rectifying the content of the video.	1
CO4,CO5,CO7	Cha.Su.25- Yajjapurusheeya Adhyaya	<b>Justifying concept of Hita and Ahita ahara:</b> Steps (1) Students should be divided in to groups and assign some of the Hita and Ahita ahara dravya (2) Student should find and discuss the logical explanations on justifying the given dravya as Hita or Ahita	2
CO4,CO5,CO7	Cha.Su.26- Atreyabhadraakaapeeyya Adhyaya	<b>Application of paradi guna:</b> Steps (1) Any probable drug or treatment plan to be selected and assign to various groups (2) Students should view them through paradi guna and document it.	2
CO5,CO8	Cha.Su.27- Annapaanvidhi Adhyaya	<b>Collection of different dravya's:</b> Steps (1) Student should collect different dravya's available in their locality. (2) Student should exhibit the same and discuss with experts. (3) Document opinion given by experts.	2
CO4,CO8	Cha.Su.29- Dashapraanaayataneeya Adhyaya	<b>Skit on different types of vaidya in relation to medical ethics:</b> Steps (1) The class has to be divided into teams and they should be assigned to write a story for skit, considering different qualities of vaidya (2) They should perform the skit after Screening done by concerned teachers	2
CO4,CO6	Cha.Ni. 08- Apasmara nidana adhyaya	<b>Documentation of Nidanarthakara roga:</b> Student should discuss and document the experiences of practising physicians of their	2

		Hospital or outside about Nidanarthakara roga.	
CO3,CO4,CO6,CO7	Cha.Ni. 08- Apasmara nidana adhyaya	<b>Quiz on Nidana sthana:</b> Steps (1) Teacher should give a written test including important multiple choice questions of nidana sthana. (2) The highest scoring students should be selected and made into different teams as per the convenience. (3) The selected students should be conducted quiz with different rounds considering the content of the Nidana sthana.	2
CO3,CO4,CO7	Cha.Sha.1-Katithapurshaya Adhyaya.	<b>Game on Ashta smruti karana:</b> Steps (1) Plan the Memory check games by using Different materials such as Drugs, Books and instruments.(2) Students should be subjected for memory check sessions. (3) Later their experiences should be interpreted through Ashta smruti karana.	2
CO4,CO6,CO7	Cha.Sha. 04- Mahatee garbhavakranti Adhyaya	<b>Identify film/Tv serial characters having different qualities of Trividha satwa and their varieties:</b> Steps (1) Students has to be divided into teams and each team should be assigned some of the satwa. (2) The team should collect the video clips of those characters and has to present to all after getting scrutinized by teachers.	2
CO4,CO8	Cha.Sha. 05- Purushavichaya Adhyaya	<b>Adopting pravrutti and nivrutti upayas in present era:</b> Steps (1) Teacher should make teams and assign different pravrutti and nivrutti upayas.(2) Team should present the pravrutti and nivrutti upayas considering relevance in present era.	2
CO4,CO7,CO8	Cha.Sha. 06- Sareeravichaya adhyaya	<b>Analysing Data on causes of akala mrutyu:</b> Students should search and collect data from online sources published by Govt or Private Authorities about the causes of Akala mrutyu. Analyse and present the data and discuss on Akala mrutyu in the class.	2

CO4,CO7	Cha.Sha.08- Jathisutreeya Adhyaya	<b>Street play on awareness of garbhopaghatakara bhava:</b> Steps (1) Teacher should make teams and explain about the structure of street play (2) Student should create a narrative story to present the concept in public (3) Minimum duration of the play is 15 minutes	2
CO7,CO8	Cha.Vi.01- Rasa vimaana Adhyayam	<b>Digital Posters for public awareness on Ahara vidhi:</b> Steps (1) Teacher should assign the topic to the students individually or in group. (2) Student should make a digital posters or infographics with the help of various online tools such as CANVA etc.	2
CO4,CO7,CO8	Cha.Vi. 03- Janapadodhwansaneeya Vimanam Adhyaya	<b>Short Documentary on any of the Janapadodhwamsakara bhava:</b> Steps (1) Teacher should guide the students on Janapadodhwamsakara bhava (2) Students should be taught on what is documentaries and should fix the duration of video. (3) Teams should be made and they have to shoot and edit the videos on any of the janapadodhwamsakara bhava. (4) Present the documentaries and share experience.	2
CO4,CO8	Cha.Vi. 8-Rogabbishagjiteeyam Adhyaayam.	<b>Identifying Adhyayana vidhi:</b> Steps (1) Teacher should guide the students to identify and document different individual and group learning techniques. (2) Students should present and share experience on their learning techniques	2
CO3,CO4,CO7	Cha.In.5-Purvarupeeyam Indriyam Adhyaya	<b>Identifying types of swapna:</b> Steps (1) Teacher should assist to make a Proforma for different types of Swapna. (2) Student should assess the proforma with Healthy individuals or diseased and analyse the Data.	2
CO3,CO4,CO7,CO8	Cha.In.12-Gomayachurni yam Indriya Adhyaya	<b>Discussion on death signs:</b> Steps (1) Teacher should assign set of students to interact with	1

		concerned ICU Doctors/ Nurses or assistants. (2) Students should interact with them based on arishta lakshanas and document it.	
CO3,CO6,CO7	Cha.In.01-Varnaswareeya Adhyaya	<b>Use of various standard tools for assessing factors related to arishta :</b> Students are assigned with some of the standard tools to assess various factors relevant in arishta-vijnana available in the following source: <a href="https://www.carakasamhitaonline.com/mediawiki-1.32.1/index.php?title=Varnasvariyaam_Indriyam_Adhyaya#Assessment_of_complexion">https://www.carakasamhitaonline.com/mediawiki-1.32.1/index.php?title=Varnasvariyaam_Indriyam_Adhyaya#Assessment_of_complexion</a>	2

{# Hours indicated are included in calculations of Table 3 and 4 }

**Table 5- Teaching learning method**

Sr No	Teaching learning methods in the course	No of Activities
1	Lecture	30
2	Lecture with Power point presentation	17
3	Lecture & Group Discussion	364
4	Lecture with Video clips	20
5	Discussions	37
6	Brainstorming	58
7	Inquiry-Based Learning	14
8	PBL	6
9	CBL	48
10	Project-Based Learning	5
11	TBL	1
12	Team project work	2
13	Flipped classroom	29
14	Blended Learning	9
15	Edutainment	9
16	Mobile learning	7

17	Role plays	15
18	Self-directed learning	105
19	Problem solving method	2
20	Workshops	2
21	Game-Based Learning	4
22	Demo on Model	1
23	Library Session	4
24	Peer learning	6
25	Real life experience	4
26	Recitation	40
27	Presentations	3
28	Case diagnosis	1
29	Drug analysis	4
30	Demonstration	9
31	Demonstration bedside	4
32	Field visit	3

These are overall teaching learning methods listed in Table 3 and 4. Teachers can select the best possible method amongst the given methods as per objective, available time etc.

**Table 6: Assessment Summary: Assessment is subdivided in A to H points**

#### 6 A-Number of Papers and Marks Distribution

Subject Code	Papers	Theory	Practical/Clinical Assessment					Grand Total
			Practical	Viva	Elective	IA	Sub Total	
AyUG-SA2	1	100	-	75	(Set SB)	15	100	200

#### 6 B - Scheme of Assessment (formative and Summative)

PROFESSIONAL COURSE	DURATION OF PROFESSIONAL COURSE		
	First Term (1-6 Months)	Second Term (7-12 Months)	Third Term (13-18 Months)
Second	3 PA & First TT	3 PA & Second TT	3 PA & UE

**PA:** Periodical Assessment; **TT:** Term Test; **UE:** University Examinations.

⌈\*\* University Examination shall be on entire syllabus ⌋

## 6 C - Calculation Method for Internal assessment Marks

TERM	PERIODICAL ASSESSMENT*					TERM TEST**	TERM ASSESSMENT	
	A	B	C	D	E	F	G	H
	1 (15 Marks)	2 (15 Marks)	3 (15 Marks)	Average (A+B+C/ 3)	Converted to 15 Marks (D/15*15)	Term Test (Marks converted to 15) (15 Marks)	Sub Total _/30 Marks	Term Ass essment (.../15)
FIRST							E+F	(E+F)/2
SECOND							E+F	(E+F)/2
THIRD						NIL		E
<b>Final IA</b>	Average of Three Term Assessment Marks as Shown in 'H' Column.							
	Maximum Marks in Parentheses *Select an Evaluation Method which is appropriate for the objectives of Topics from the Table 6 D for Periodic assessment. Conduct 15 marks assessment and enter marks in A, B, and C. ** Conduct Theory (100 Marks) (MCQ(20*1 Marks), SAQ(8*5), LAQ(4*10)) and Practical (100 Marks) Then convert total to 15 marks.							

## 6 D - Evaluation Methods for Periodical Assessment

S. No	Evaluation Methods
1	Activities Indicated in Table 3 - Column G3 as per Indicated I, II or III term in column I3

### Evaluation Methods in MSE

1. Practical / Clinical Performance
2. Viva Voce, MCQs, MEQ (Modified Essay Questions/Structured Questions)
3. Open Book Test (Problem Based)
4. Summary Writing (Research Papers/ Samhitas)
5. Class Presentations; Work Book Maintenance
6. Problem Based Assignment
7. Objective Structured Clinical Examination (OSCE), Objective Structured Practical Examination (OPSE), Mini Clinical Evaluation Exercise (Mini-CEX), Direct Observation of Procedures (DOP), Case Based Discussion (CBD)
8. Extra-curricular Activities, (Social Work, Public Awareness, Surveillance Activities, Sports or Other Activities which may be decided by the department).
9. Small Project etc.

## 6 E Question Paper Pattern

### II PROFESSIONAL BAMS EXAMINATIONS AyUG- SA2

#### PAPER-1

Time: 3 Hours Maximum Marks: 100

INSTRUCTIONS: All questions compulsory

		<b>Number of Questions</b>	<b>Marks per question</b>	<b>Total Marks</b>
Q 1	MULTIPLE CHOICE QUESTIONS (MCQ)	20	1	20
Q 2	SHORT ANSWER QUESTIONS (SAQ)	8	5	40
Q 3	LONG ANSWER QUESTIONS (LAQ)	4	10	40
				100

**Similar for Paper II (If applicable).**

## 6 F Distribution of theory examination

Paper 1						
Sr. No	A List of Topics	B Term	C Marks	MCQ (1 Mark)	SAQ (5 Marks)	LAQ (10 Marks)

**Course curriculum for Second Professional BAMS (PRESCRIBED BY**

**NCISM)**

# **Swasthavritta evam Yoga**

**(SUBJECT CODE : AyUG-SW)**

**(Applicable from 2021-22 batch, from the academic year 2023-24 onwards for 5 years or until further notification by NCISM, whichever is earlier)**

**BOARD OF AYURVEDA**

**NATIONAL COMMISSION FOR INDIAN SYSTEM OF MEDICINE NEW DELHI-**

**110058**

## II Professional Ayurvedacharya (BAMS)

### Subject Code : AyUG-SW

#### Summary

Total number of Teaching hours: 400			
Lecture hours(LH)-Theory		150	150(LH)
Paper I	75		
Paper II	75		
Non Lecture hours(NLH)-Theory		250	250(NLH)
Paper I & II	75		
Non Lecture hours(NLH)-Practical			
Paper I & II	175		

Examination (Papers & Mark Distribution)					
Item	Theory Component Marks	Practical Component Marks			
		Practical	Viva	Elective	IA
Paper I	100	100	60	(Set SC) 10	30
Paper II	100				
Sub-Total	200	200			
Total marks	400				

**Important Note:-**The User Manual II BAMS is a valuable resource that provides comprehensive details about the curriculum file. It will help you understand and implement the curriculum. Please read the User Manual II before reading this curriculum file. The curriculum file has been thoroughly reviewed and verified for accuracy. However, if you find any discrepancies, please note that the contents related to the MSE should be considered authentic.

In case of difficulty and questions regarding curriculum write to [cur.imp@ncismindia.org](mailto:cur.imp@ncismindia.org)

## **PREFACE**

Health care, especially the preventive health care is coming to a fore front, most so during recent years due to pandemic situation. In fact, the preventive health care is indeed the strength of Ayurveda as its primary motto itself is 'Swasthasya swasthya rakshanam', Keep sustaining health of a healthy and nourishes it. The students of Ayurveda need to understand it better, who can carry this message and contribute for building a healthy India, may the entire world. Keeping this in mind any effort to sensitize the student community to understand the basics of Swasthavritta, the preventive health care of Ayurveda is laudable. Swasthavritta is an important subject of the BAMS program for the undergraduate students of Ayurveda. The term Swastha means healthy individual and Vritta means actions or regimen thus Swasthavritta denotes the actions or regimen which can be observed to maintain the health of a healthy individual and to prevent the diseases. This subject refers to the Preventive medicine and social medicine/ Community medicine of contemporary medical science.

Swasthavritta deals with the Vaiyaktika swasthavritta ( Individualized lifestyle including in terms of prevention, promotion & maintainance of health) incudes Dinacharya, Ritucharya, Sadvritta, Rasayana , Pathya-Apathya for both Swastha as well as disease condition. Samajika swasthavritta- Community health deals with Janapadodhwamsa, Environmental health, Occupational health, School health and National health programs etc, along with these topics Swasthavritta also deals Yoga and Naturopathy. Thus, Swasthavritta provides holistic health care to community.

New curriculum of Swasthavritta is designed considering cognitive, affective, and psychomotor domains. There are group discussions, workshops, field visits, health institutional visits, factory visits health surveys and activities beyond the textbook during the practical hours like preparation of charts, models, seminar presentations by students. Swasthavritta subject also deals with teaching learning methods like role play, flipped the classroom, etc. Some assessment methods like OSPE, PBL, DOPS, CBD, skill assessment, etc are incorporated.

This curriculum serves as a valuable resource for both educators and students, guiding them through the fascinating realm of swasthavritta. May the knwoledge gained from this curriculum empower students to make a positive impact in promoting health, preventing diseases and creating a healthier society. This curriculum epmowers the Ayurvedic graduates who capable of designing customized individualized lifestyle as well as community health measures as per Ayurvedic principles. This also makes graduates to become health educators, who will take part in national health programs, who can assess community needs and develop measures to counteract the health problems and make them to prepare competent community physicians.

<b>Paper 1 Principles of Swasthavritta, Yoga and Naturopathy</b>					
<b>Sr. No</b>	<b>A2 List of Topics</b>	<b>B2 Term</b>	<b>C2 Marks</b>	<b>D2 Lecture hours</b>	<b>E2 Non- Lecture hours</b>
1	<p><b>Swastha and Swasthya</b>            Definition of Swasthavritta and its objective.            Swasthalakshanas, Arogyalakshanas, Dhatusamyalakshanas.            Concept of Health &amp; Operational definition of health.            Importance of Shodhana in Swastha in relation to Sanchita &amp; Asanchitha Dosha &amp; Classification of Swastha purusha as Sanchita dosha and Asanchita Dosha. Dimensions of health -Physical, Mental and Social. Concept of well-being : objective component of well-being - standard of living and level of living and subjective component of well-being - Quality of Life. One health concept / Vasudhaiva Kutumbakam” or “One Earth · One Family- One Future”.</p>	1	6	3	0
2	<p><b>Healthy Life style -Dinacharya (Daily regimen)</b>            Concept of Primordial, Primary, Secondary and Tertiary Prevention along with examples in Ayurveda. Importance of Ahara and Vihara as the health promotive and disease preventive measures. Importance of <b>Niyata kala vihara</b> (Dinacharya, Ritucharya) and <b>Aniyata kalaVihara</b>(Vegadharana, Vegaudirana, Ritushodhana, Brumhana and Bhutadi asparshana ) for health promotion and disease prevention. Concept of waking up at 'Brahme muhurta' in the present scenario and the effect of early rise on health, sleep, alertness and memory. UshaJalapana' (Drinking water in early morning). Importance of Malatyaga in vata kaala - early morning (Good Bowel Habits.). Mukhaprakshalana and face washes used currently. Concept of Dantadhavana and modern-day brushing techniques and dentifrices. Concept of Jihwanirlekhana and the tools used in today's era and their benefits. Concept of Anjana as a health promotive measure. Kavala and gandusha for oral hygiene including mouthwashes available in the market. Abhyanga as as health promotive measure. Importance of the Tambula. Prayogika Dhoomapana ( Practicable &amp; non-practicable Dhoomapana- inhalation of herbal fumes/ herbal inhalers with their benefits and contraindications. Ill effects of tobacco smoking of various sorts viz. beedi, cigarette, hookah on health. Applied aspects of Sarvanga Abhyanga, Padabhyanga, Shiroabhyanga and their possible physiological effects. Application of Abhyanga according to different age groups and occupation/activity. Different snehas/oils to be used for daily abhyanga as per seasons and geographical variations. Concept of Vyayama and present-</p>	1	38	8	5

	<p>day practices such as aerobic exercises, muscle strengthening exercises etc. to be practiced as per prakriti, age and occupation. Ardhashakti lakshanas of vyayama and the consequences of ati vyayama. Udwartana, Utsadana Udgharshana . Snana- Types of different types of bath and Physiological effects of snana on body and mind. Importance and benefits of Anulepana. Merits and demerits of present-day applications like face powder, face pack, balm, lotions, lipsticks, deodorants and perfumes etc. Importance of proper clothing (Vastradharana) in social life.</p>				
3	<p><b>Ratricharya</b> Ratri bhojanvidhi and its relation to health. Ratri shayana vidhi in relation to the proper time of sleep. Relation between Nidra and health. Effects of Yukta &amp; Ayukta nidra. Effects of Ratri Jagarana, Diwaswapna, Anidra, Atinidra and Akala Nidra. Ahara and Vihara Causing sound sleep as well as disturbed sleep. Formulation of the duration of sleep according to age and Sleep in healthy and ailing persons. Various Aspects of Sleep like: a. Daytime Sleepiness and Alertness b. Sleep Deprivation c. Sleep and Host Defense d. Master Circadian Clock and Master Circadian Rhythm e. Human Circadian Timing System and Sleep-Wake Regulation f. Circadian Rhythms in Sleepiness, Alertness, and Performance g. Circadian Disorders of the Sleep-Wake Cycle. Sleep apnea , insomnia, narcolepsy and restless leg syndrome. Solutions to Asatmya jagarana (sleep disorders). Importance of observing brahmacharya and abrahmacharya in ratricharya in relation to health. Brahmacharya with special reference to lifestyle guidelines. Reproductive and sexual health according Ayurveda.</p>	1		6	1
4	<p><b>Ritucharya</b> Classification of kaala , Adana kala and visarga kala , identification of seasons based on the ritu lakshanas in different geographical areas. Sanchaya- Prakopa- Prashamana of Dosha with their gunas in each ritu. Relation of Agni , Bala and Ritu with its application. Ritu shodhana for the prevention of diseases. Pathya - Apathya in regards to Ahara -Vihara in all six ritus in present scenario. Importance of ahara and vihara in ritu sandhi and Yamadanshtra kala. Rituharitaki as a rasayana with research updates. Effects of Rituviparyaya on health and its relation to janapadaudhwamsa/maraka vyadhis with present day examples.</p>	1		5	2
5	<p><b>Roganutpadaniya</b> Concept of vegadharana and vega-udirana in relation to health and morbidity. Symptoms and management principles of adharaniya vega janya vyadhis from</p>	1	13	2	1

	bruhattrayee. Concept of vegaudirana (viz. Use of snuffing powder, forcible evacuation of bowels & bladder etc.). Importance of dharaniya vegas in promotion of mental health.				
6	<b>Sadvritta</b> Sadavritta measures for the maintenance of personal ,social and spiritual health. Observance of Sadvritta for the prevention of Adharma. Achara Rasayana" and its role in the prevention and control of diseases. Characteristics of a mentally healthy person, warning signals of poor mental health, types of mental illness and causes of mental ill-health. Mental health services and comprehensive mental health programme. Role of trigunas and satvavajaya in mental health promotion in present era. Digital health promotion	1		2	1
7	<b>Ahara</b> Significance of Ahara for health and well-being according to Ayurveda & Contemporary science. Classification of aharadravyas as per Ayurveda & Contemporary science. Ahara vidhividhana, Ahara sevanakala & Dwadasha ashanapravicharana . Applied aspect of Pathyahara, Apathyahara, Samashana, Adhyashana, Vishamashana. Ahara & vihara leading to Santarpanajanya evam Apararpanajanyavyadhi and importance of upavasa and concept of intermittent fasting. Benefits of Shadrasabhojana. Importance of Ashta aharavidhivishesha ayatanani in present era. Importance of Nityasevaniyadravyas in the maintenance of health. Properties (Guna& karmas) of Ahara dravyas in the following vargas with their nutritive value: Dhanyavarga – Shuka Dhanya (Cereals and Millets), Shami Dhanya (Pulses), Shaka and Haritavarga (Leafy and Non leafy vegetables), Kanda varga (roots and tubers), Phalavarga (Fruits), Taila varga (Fats and Oils), Ikshuvarga (Sugarcane Products) & Madyavarga (Alcoholic Beverages), Dugdhavarga (Milk and Milk products), Ahara Upayogi Varga (Spices & Condiments), Kritannavarga (Prepared Food), Mamsavarga (Meat types) and Jala Varga. Definition of Pro-biotics and Pre-biotics and their utility. Proximate principles of Food - Recommended Daily Allowance according to various conditions, Sources and deficiency diseases of Protein, Carbohydrate, Fats, Vitamins, and Minerals. Definition of Balanced diet and diet for an individual depending on age, body weight and physiological status and Social Aspects of Nutrition. Food hygiene, Sanitation of eating places, Preservation of food, Food handlers, Foodborne diseases, Food fortification, Food adulteration and Food toxicants. Milk Hygiene, Milk composition, Source of infection for Milk, Milk borne	1	20	20	15

	<p>diseases, Clean and Safe milk and Pasteurization of milk Meat Hygiene, Meat inspection, Slaughterhouse and Freshness of fish and egg. Safety and hygiene measures for Fruits and Vegetables. Formulation of Pathya-Apathya diet for prevention of lifestyle disorders such as Obesity, Diabetes mellitus, Cardiovascular diseases and Acid peptic diseases. Description of Food safety and standards regulation (Ayurveda Ahara Regulations), 2022 and Food safety and standards Act, 2006. Different Dietary Supplements and Ergogenic Aids. Impact of different dietary patterns: Mediterranean diet, Keto Diet, DASH diet, the MIND diet, Vegan diet, Ovo-lacto-vegetarian, Pesco- vegetarian, Plant-based diet, Intermittent diet, the Nordic diet, importance of organic foods, merits and demerits of genetically modified foods and inflammatory foods such as fried foods, cookies, hot dogs, red meat, refined grains, pizza, burger etc., and instant foods like Maggi etc.,. Concept of slow and fast foods and impact of cooking processes like boiling, steaming, sautéing, fermenting etc. (samskara) on health. Definition of Nutraceuticals, Nutrigenomics, Nutrigenetics. Concept of Viruddhaahara with classical and modern-day examples and the application of this in the prevention of diseases</p>				
8	<p><b>Rasayana for Swastha</b> Definition of Rasayana and benefits of Rasayana. Classification and types of Rasayana with examples. Urjaskara Rasayan as per age and occupations /Activities .Antioxidant &amp; immunomodulatory effects of Rasayana with reference to research articles. Importance of lifestyle counselling with its methods.</p>	1	5	2	2
9	<p><b>Yoga</b> Etymology/derivation of the word 'Yoga'. Definitions of Yoga according to Patanjali Yogasutras, Bhagavad Gita and Charaka Samhita. Difference between Rajayoga, Hathayoga and Karmayoga. Yogabhyasa Pratibhandhakas and Yoga Siddhikarabhavas. Mitahara and Pathya-apathyas during Yogabhyasa . Concept of Panchakosha theory. Description of Ashtangas of Yoga - Yama , Niyama , Asana .Pranayama , Pratyahara, Dharana, Dhyana and Samadhi. Suryanamaskara . Description of Shatkarmas - Dhauti, Basti, Neti, Trataka, Nauli, and Kapalabhati. Bandha - procedure and benefits of Mulabandha, Jalandharabandha and Uddiyanabandha. Mudras - Shanmukhi mudra and Jnana mudra. Shatchakras and their importance in Yoga practice. Description of Ida-Pingala-Sushumna nadis and their importance in yoga practice. Concept of Moksha according to Charaka , Muktatmalakshana and Moksha upayas. Importance of International Day of Yoga (IDY).</p>	2	18	22	6

	Adverse effects of improper Yoga practices			
10	<b>Naturopathy</b> Basic principles of Naturopathy. Concept of Panchabhutopasana. Therapeutic effects of Mud therapy. Therapeutic effects of Sun bath. Fasting therapy - its types and benefits. Hydrotherapy - types of water used based on the temperature and therapeutic effects of Hydrotherapy. Therapeutic effects of Massage	2	5	4

<b>Paper 2 Public health</b>					
<b>Sr. No</b>	<b>A2 List of Topics</b>	<b>B2 Term</b>	<b>C2 Marks</b>	<b>D2 Lecture hours</b>	<b>E2 Non-Lecture hours</b>
11	<b>Janapadodhwamsa / Maraka Vyadhi</b> Causes of Janapadodhwamsa/ maraka vyadhi. Manifestation and control measures of Janapadodhwamsa. Principles and uses of epidemiology. Dynamics of disease transmission. Theory of disease causation - epidemiological triad and natural history of disease. Concept of prevention, modes of intervention, risk factors, incidence and prevalence. Susceptible host and host defense. Immunizing Agents. Concept of vyadhikshamatwa. Investigation of an epidemic. Prevention and control of an epidemic. Sankramaka roga as per Ayurveda. Epidemiological determinants, brief pathology, transmission, incubation period, clinical features, diagnosis and preventive measures of 1. Droplet Infections such as Chicken Pox, Measles, Rubella, Diphtheria, Pertussis, Mumps, Tuberculosis, SARS, Influenza, Pneumonia, Covid-19 and Leprosy. 2. Water borne Infections / intestinal infections - Cholera, Polio, Viral Hepatitis, Typhoid. 3. Intestinal infestations – Ascariasis, Hook worm and Tape worm. 4. Emerging and re-emerging diseases. Explain Role of Ayurveda in Epidemics like COVID-19, Zika Virus, H1N1, H3N2, etc.,. 5. Sexually transmitted diseases (STDs) with prevention and control - HIV/ AIDS, Syphilis and Gonorrhoea. Role of Ayurveda in the prevention and control with recent research updates of Lifestyle diseases such as DM, Obesity, Coronary artery disease (CAD) and Cancer. Epidemic Diseases (Amendment) Ordinance Act, 2020 .,	2	10	37	10
12	<b>Environmental health</b> <b>Air:</b> Properties of Vayu and composition of air. Changes in	2	16	10	5

	<p>air of the occupied room. Comfort zone and indices of thermal comfort. Air pollution -causes, prevention and control. Effects of air pollution on health and social aspects .Effects of Global warming with recent updates. Definition of ventilation and types of Ventilation. Effects of high altitude and mountain air on health. <b>Water</b> : Safe and wholesome water and water requirements. Properties of water from different sources. Water pollution and health hazards. Contemporary and Ayurvedic methods of water purification. Hard Water - its effects on health and methods of removal of hardness. Quality of water stored in different vessels as per classics. Rain water harvesting - methods and its importance. <b>Soil</b> : Types of soil and relation between soil and health. Land pollution - its prevention and control. Land purification as per the classics. Social goals of Housing and Housing standards. The Building and other construction workers ( Regulation of employment and conditions of services) Act, 1996 Effects of housing on health. Overcrowding and its impact on health. <b>Light</b>: Good lighting, natural lighting and artificial lighting. Biological effects of lighting. <b>Noise</b> : Definition of noise and its sources, effects on health and control measures. <b>Radiation</b>: Radiation - sources and effects on health and control measures. <b>Waste disposal</b> : Types of solid waste, Storage and collection of refuse. Methods of disposal of solid waste (Rural &amp; urban). Excreta Disposal methods &amp; Sanitary Latrines. Modern Sewage disposal methods. Disposal methods of Excreta during camps, fairs, and festivals. Bio-medical waste management and Bio-medical waste management rules, 2016. Environment protection Act, 1986.</p>				
13	<p><b>Disaster management</b> Definition of disaster and disaster management. Effects of natural and man-made disasters. Epidemiologic surveillance and disease control measures.</p>	2		1	2
14	<p><b>Occupational Health</b> Definition of occupational health and Ergonomics. Occupational Hazards and Occupational diseases. Prevention and control of Occupational diseases . ESI Act ,1948 and The factories Act.1948. Role of Ayurveda in various Occupational health problems. The Merchant Shipping / Medical Examination Rules,2000</p>	2	20	3	3
15	<p><b>School health services</b> Health problems of school children. Aspects of school health services. Duties of school medical officers. Healthy environment in the school.</p>	2		2	3
16	<p><b>Disinfection</b></p>	2		2	3

	Definition of different term used in relation to disinfection. Types of disinfection. Natural agents, Physical agents and Chemical agents of disinfection. Recommended disinfection procedures of feces & urine, sputum, and room. Ayurvedic disinfection methods.				
17	<b>Primary health care</b> Definition of Primary Health Care. Principles and elements of primary health care. Levels of health care. Structure of Primary health care at village, sub-center, Primary health center (PHC), Community health center (CHC) and Rural hospital levels. Primary health care in Health insurance, Private agencies, Voluntary health agencies, NGOs and the AYUSH sector. Role of Ayurveda in Primary Health Care.	2	20	2	1
18	<b>Mother and Child health care</b> Objectives of Maternal and Child Care services. MCH problems & indicators of MCH care.	2		1	1
19	<b>Family welfare programme</b> Definition of Demography and sources of demographic statistics in India. Demographic cycle & definition of life expectancy. Definition of family planning, eligible couple and target couple. Objectives of family planning. Problems of population explosion . National population policy. Methods of Contraceptive (Fertility Regulating Methods).	2		2	2
20	<b>Preventive Geriatrics</b> Health problems of the aged and prevention and control measures. Relation between lifestyle and healthy aging. Role of Rasayana in preventive geriatrics.	2		1	1
21	<b>World Health Organization and International health agencies</b> Definition of World Health organization. Structure, regions, and works of the World Health Organization. Functions of various international health agencies - United Nations health agencies, Bilateral health agencies and Non- Governmental agencies. Contribution of the World health organization to the global acceptance of Ayurveda.	2		19	3
22	<b>Vital Statistics</b> Definition of Vital Statistics. Sources of Vital statistics. Fertility , Morbidity and Mortality rates. Registration of Birth and Death Act, 1969	2	1		1
23	<b>Health Administration</b> Health administration including AYUSH at the Central, State, District, and Village levels.	2	2		1
24	<b>National Health Programmes</b>	2	15	7	3

	National Health Programs : Leprosy(NLEP), AIDS (NACP), Blindness (NPCB), Polio , National TB Elimination program , Vector born disease control program, RCH program, ICDS program, Universal Immunization program, National mental health program , National Program for Prevention and Control of Cancer, Diabetes, Cardiovascular Diseases & Stroke (NPCDCS) , Swachha Bharat mission, Ayushman Bharat Yojana, Ayushman Bharat Digital Mission, National health mission (NRHM&NUHM), National AYUSH Mission (NAM).National nutrition programs: National Iodine Deficiency Disorders Control program, National Iron Plus Initiative for Anemia Control, National Vitamin A prophylaxis program, Mid-Day Meal program & Balwadi nutrition program.			
25	<b>National Health Policy</b> National Health Policy (NHP) and the scope of Ayurveda in NHP.	2	1	1

CO1,CO2	Mention different snehas/oils to be used for daily abhyanga as per seasons and geographical variations.	CK	MK	K	L&PP T	INT	F&S	I	
CO1,CO2	Justify the importance of the classical tambula by comparing it with the present-day betel chewing.	CE	DK	KH	TBL	TT-Theory	F	I	
CO1,CO2	Explain the practical application of Prayogika Dhoomapana (inhalation of herbal fumes/ herbal inhalers) with their benefits and contraindications	CAP	MK	SH	BL	TT-Theory	S	I	
CO1,CO2	Explain the ill effects of tobacco smoking of various sorts viz. beedi, cigarette, hookah on health	CAP	MK	KH	ECE	P-CASE	F&S	I	
CO1,CO2	Describe the applied aspects of Sarvanga Abhyanga, Padabhyanga, Shiroabhyanga and	CAP	MK	KH	DIS	T- EW	F&S	I	V-PC
CO1,CO2	Explain the application of Abhyanga according to different age groups and occupation/activity.	CAP	DK	KH	SDL	T-CS	F	I	V-PC

CO1,CO2	Explain the indications, contraindications and benefits of Vyayama.	CK	MK	KH	L&PP T	T- EW	F&S	I	
CO1,CO2	Describe the types & benefits of vyayama and present-day practices such as aerobic exercises, muscle strengthening exercises etc.to be practiced as per prakriti, age and occupation.	CAP	MK	KH	DIS	CR-RED	F&S	I	
CO1,CO2	Describe the assessment of ardhashakti lakshanas of vyayama and the consequences of ati vyayama.	CE	MK	KH	DIS	TT-Theory	F&S	I	
CO1,CO2	Describe and compare the dravyas, benefits, and application of Udvartana, Udgharshana and Utsadana.	CAN	MK	KH	L&PP T	M-CHT	F&S	I	V-KC
CO1,CO2	Explain the physiological effects of snana on body and mind and explain the reasons for contraindications of Snana.	CAN	MK	KH	L&PP T	CR-W	F&S	I	
CO1,CO2	Explain the importance and benefits of Anulepana.	CK	MK	KH	L&PP T	P-VIVA	F&S	I	
CO1,CO2	Describe the merits and demerits of present-day applications like face powder, face pack, balm, lotions, lipsticks, deodorants and perfumes.	CAP	NK	KH	PrBL	CL-PR	F	I	
CO1,CO2	Explain the importance of proper clothing (vastradharana) in social life.	CK	MK	KH	L&PP T	INT	F&S	I	
<b>Topic 3 Ratricharya</b> (Lecture :6 hours, Non lecture: 1 hours)									
CO1,CO2	Describe ratri bhojanvidhi and its relation to health.	CK	MK	KH	L&PP T	T- EW	F&S	I	
CO1,CO2	Describe ratri shayana vidhi in relation to the proper time of sleep.	CK	MK	KH	L&PP T	T- EW	F&S	I	
CO1,CO2	Explain the relation between Nidra and health.	CK	MK	KH	L&PP T	T- EW	F&S	I	

CO1,CO2	Describe effects of Yukta & Ayukta nidra.	CK	MK	KH	L&PP T	T- EW	F&S	I	
CO1,CO2	Explain the effects of Ratri Jagarana, Diwaswapna, Anidra, Atinidra and Akala Nidra.	CK	MK	K	L&PP T	T- EW	F&S	I	
CO1,CO2	Identify Ahara and Vihara Causing sound sleep as well as disturbed sleep.	CAN	DK	KH	SDL	INT	F	I	
CO1,CO2	Formulate the duration of sleep according to age, Sleep in healthy and ailing persons.	CE	DK	KH	SDL	INT	F	I	
CO1,CO2,CO 8	Explain various Aspects of Sleep like: a. Daytime Sleepiness and Alertness b. Sleep Deprivation c. Sleep and Host Defense d. Master Circadian Clock and Master Circadian Rhythm e. Human Circadian Timing System and Sleep-Wake Regulation f. Circadian Rhythms in Sleepiness, Alertness, and Performance g. Circadian Disorders of the Sleep-Wake Cycle	CK	DK	KH	L&PP T	C-INT	F	I	
CO1,CO2,CO 8	Explain Sleep apnoea , insomnia, narcolepsy and restless leg syndrome. Explain solutions to Asatmya jagarana (sleep disorders .)	CK	DK	KH	L&PP T	C-INT	F	I	
CO1	Explain the importance of observing brahmacharya and abrahmacharya in relation to health	CAP	MK	KH	L&G D	TT-Theory	F&S	I	
CO1	Describe Brahmacharya with specail reference to lifestyle guidelines	CAP	MK	KH	L&G D	TT-Theory	F&S	I	
CO1	Describe reproductive and sexual health according to Ayurveda	CAP	MK	KH	L&G D	TT-Theory	F&S	I	
<b>Topic 4 Ritucharya</b> (Lecture :5 hours, Non lecture: 2 hours)									

CO1	Explain classification of kaala , distinguish Adana kala and visarga kala , identification of seasons based on the ritu lakshanas in different geographical areas.	CAP	MK	K	L&PP T	M-CHT	F&S	I	
CO1	Analyse the Sanchaya- Prakopa- Prashamana of Dosha with their gunas in each ritu.	CAN	MK	K	L&PP T	PUZ	F&S	I	
CO1	Describe the Relation of Agni , Bala and Ritu with its application.	CAP	MK	K	L&PP T	CL-PR	F&S	I	
CO1	Explain ritu shodhana for the prevention of diseases.	CC	MK	KH	L	T- EW	F&S	I	
CO1	Analyse Pathya - Apathya in regards to Ahara -Vihara in all six ritus in present scenario.	CAN	MK	K	FC	CL-PR	F&S	I	
CO1	Explain the importance of ahara and vihara in ritu sandhi and yamadanshra kala.	CK	MK	KH	SDL	T- EW	F&S	I	
CO1	Describe rituharitaki as a rasayana with research updates.	CE	DK	K	SDL	CR-RED	F	I	
CO1	Explain the effects of Rituviparyaya on health and its relation to janapadaudhwansa/maraka vyadhis with present day examples.	CAP	MK	K	L&PP T	CL-PR	F&S	I	
<b>Topic 5 Roganutpadaniya</b> (Lecture :2 hours, Non lecture: 1 hours)									
CO1,CO2	Explain vegadharana and vega-udirana in relation to health and morbidity.	CK	MK	K	L&PP T	T- EW	F&S	I	
CO1,CO2	Compare the symptoms and management principles of adharaniya vega janya vyadhis from bruhattrayee.	CAN	MK	K	L&PP T	T- EW	F&S	I	
CO1,CO2	Explain with examples the concept of vega-udirana (viz. Use of snuffing powder, forcible evacuation of bowels & bladder etc.).	CK	MK	K	L&PP T	T- EW	F&S	I	
CO1,CO2	Explain the importance of dharaniya vegas in promotion of	CK	MK	K	L&PP	T- EW	F&S	I	

	mental health.				T				
<b>Topic 6 Sadvritta</b> (Lecture :2 hours, Non lecture: 1 hours)									
CO1	Describe digital health	CK	DK	KH	L&G D	TT-Theory	F&S	I	
CO1,CO2	Explain Promotion of Digital health	CAP	DK	KH	L&G D	TT-Theory	F&S	I	
CO1,CO2	Describe Digital health problems	CAP	DK	KH	DIS	PP-Practical	F&S	I	V- SHL
CO1,CO2	Understand and adopt the Sadavritta measures for the maintenance of personal ,social and spiritual health.	AFT- VAL	DK	D	RP	INT	F	I	
CO1,CO2	Explain how the observance of Sadvritta helps for the prevention of Adharma.	CC	MK	KH	DIS	T- EW	F&S	I	
CO1,CO2	Describe 'Achara Rasayana" and its role in the prevention and control of diseases.	CK	MK	K	L&PP T	TT-Theory	F&S	I	
CO1,CO2	Explain characteristics of a mentally healthy person, warning signals of poor mental health, types of mental illness and causes of mental ill-health.	CK	MK	K	L&PP T	TT-Theory	F&S	I	
CO1,CO2	Describe the mental health services and comprehensive mental health programme.	CK	MK	K	L&PP T	TT-Theory	F&S	I	
CO1,CO2	Explain the role of trigunas and satvavajaya in mental health promotion in present era.	CAP	DK	KH	CBL	INT	F	I	V-KC
<b>Topic 7 Ahara</b> (Lecture :20 hours, Non lecture: 15 hours)									
CO1	Explain significance of Ahara for health and well-being according to Ayurveda & Contemporary science Explain	CK	MK	K	L	T- EW	F&S	I	

	significance of Ahara for health and well-being according to Ayurveda & Contemporary science								
CO1	Classify aharadravyas as per Ayurveda & Contemporary science	CK	MK	K	L&PP T	T- EW	F&S	I	
CO1	Enumerate and explain the features of Ahara vidhividhana, Ahara sevanakala & Dwadashashanapravicharana .	CK	MK	K	L&PP T	T- EW	F&S	I	
CO1	Discuss the applied aspect of Pathyahara, Apathyahara, Samashana, Adhyashana, Vishamashana. Discuss the Ahara & vihara leading to Santarpanajanya evam Apatarpanajanyavyadhi and importance of upavasa and effects of practice of intermittant fasting on health	CAN	MK	KH	L&PP T	T- EW	F&S	I	
CO1	Explain the benefits of Shadrasabhojana	CAP	MK	KH	L&PP T	T- EW	F&S	I	
CO1	Enumerate and explain the importance of Ashtaharavidhivisheshayatanani in present era	CK	MK	KH	L&PP T	T- EW	F&S	I	
CO1	Explain the importance of Nityasevaniyadravyas in the maintenance of health	CAP	MK	KH	L&PP T	T- EW	F&S	I	H-DG
CO1	Explain the properties (Guna& karmas) of Ahara dravyas in the following vargas with their nutritive value: Dhanyavarga – Shuka Dhanya (Cereals and Millets), Shami Dhanya (Pulses), Shaka and Haritavarga (Leafy and Non leafy vegetables), Kanda varga (roots and tubers), Phalavarga (Fruits), Taila varga (Fats and Oils), Ikshuvarga (Sugarcane Products)&Madyavarga(Alcoholic Beverages), Dugdhavarga (Milk and Milk products), Ahara Upayogi Varga (Spices & Condiments), Kritannavarga(Prepared Food), Mamsavarga (Meat types) and Jala Varga	CC	MK	KH	L&PP T	T- EW	F&S	I	H-DG

CO1	Define Pro-biotics and Pre-biotics and explain their utility	CK	DK	KH	IBL	INT	F	I	
CO1	Explain the Proximate principles of Food, Recommended Daily Allowance according to various conditions, Sources, and deficiency diseases of Protein, Carbohydrate, Fats, Vitamins, and Minerals.	CC	MK	K	L_VC	COM	F&S	I	
CO1	Define Balanced diet and explain diet for an individual depending on age, body weight and physiological status and explain the Social Aspects of Nutrition	CK	MK	KH	L&G D	T- EW	F&S	I	
CO1	Explain Food hygiene, Sanitation of eating places, Preservation of food, Food handlers, Foodborne diseases, Food fortification, Food adulteration, and Food toxicants	CC	NK	KH	L&PP T,ML	P-REC,CHK	F	I	
CO1	Explain Milk Hygiene, Milk composition, Source of infection for Milk, Milk borne diseases, Clean and Safe milk and Pasteurization of milk	CC	DK	KH	L&PP T,ML	P-REC,CHK	F	I	
CO1	Explain Meat Hygiene, Meat inspection, Slaughterhouse and Freshness of fish and egg	CC	DK	KH	L&PP T,ML	P-REC,CHK	F	I	
CO1	Explain safety and hygiene measures for Fruits and Vegetables	CC	NK	K	ML	O-QZ	F	I	
CO1	Formulate a Pathya-Apathya diet for prevention of lifestyle disorders such as Obesity, Diabetes mellitus, Cardiovascular diseases and Acid peptic diseases	CAP	DK	D	SDL	P-REC,CHK	F	I	
CO1	Describe Food safety and standards regulation( Ayurveda Ahara Regulations), 2022 and Food safety and standards Act, 2006.	CK	NK	K	ML	INT	F	I	
CO1	Explain different Dietary Supplements and Ergogenic Aids	CK	NK	K	IBL	TT-Theory	F	I	
CO1	Explain the impact of different dietary patterns: Mediterranean	CC	NK	KH	L&G	INT	F	I	

	diet, Keto Diet, DASH diet, the MIND diet, Vegan diet, Ovo-lacto-vegetarian, pesco-vegetarian, plant-based diet, Intermittent diet, the Nordic diet, importance of organic foods, merits and demerits of genetically modified foods				D				
CO1	Describe the Slow and Fast foods . Explain the impact of cooking processes like boiling, steaming, sautéing, fermenting etc. (samskara) on health and effect of instant foods like Maggi etc,..	CC	NK	KH	DIS	TT-Theory	F	I	
CO1	Define Nutraceuticals, Nutrigenomics, Nutrigenetics	CK	DK	K	L&PP T	T- EW	F	I	
CO1	Explain the concept of Viruddhaahara with classical and modern-day examples and the application of this in the prevention of diseases	CK	MK	KH	ECE	T- EW	F&S	I	H-AT
<b>Topic 8 Rasayana for Swastha</b> (Lecture :2 hours, Non lecture: 2 hours)									
CO1	Explain the importance of lifestyle counselling with its methods	CC	NK	K	L&G D	TT-Theory	F&S	I	
CO1	Define Rasayana and mention the benefits of Rasayana	CK	MK	K	L&PP T	T- EW	F&S	I	
CO1	Classify the types of Rasayana with examples	CK	MK	K	L&PP T	T- EW	F&S	I	
CO1	Explain Urjaskara Rasayanas as per age and occupations /Activities	CAP	MK	K	L&G D	T-CS	F&S	I	
CO1	Explain the antioxidant&immunomodulatory effects of Rasayana with reference to research articles	CC	NK	K	L&G D	CR-RED	F	I	
<b>Topic 9 Yoga</b> (Lecture :22 hours, Non lecture: 6 hours)									
CO1	Describe adverse effects of improper Yoga practices	CK	DK	KH	L&G	TT-Theory	F&S	II	

					D				
CO3	Describe Global importance of International Day of Yoga (IDY)	CK	NK	K	L&PP T	INT	F	II	
CO3	Explain the etymology / derivation of the word 'Yoga' .	CK	MK	K	L&PP T	T- EW	F&S	II	
CO3	Define Yoga according to Patanjali Yogasutras, Bhagavad Gita and Charaka Samhita.	CK	MK	K	L&PP T	TT-Theory	F&S	II	
CO3	Distinguish between Rajayoga, Hathayoga and Karmayoga.	CAN	MK	KH	L&PP T	M-CHT	S	II	
CO3	Explain Yogabhyasa Pratibhandhakas and Yoga Siddhikarabhavas.	CK	MK	K	L&PP T	T- EW	F&S	II	
CO3	Describe Mitahara and Pathya-apathyas during Yogabhyasa.	CC	MK	KH	L&PP T	T- EW	F&S	II	
CO3	Explain Panchakosha theory.	CC	MK	KH	L&PP T	M-POS	F&S	II	
CO3	List out the Ashtangas of Yoga.	CK	MK	K	L&PP T	T- EW	F&S	II	
CO3	Describe Yama and Niyama with meaning according to Yogasutras and Hathayogapradipika.	CC	MK	K	L&PP T	T- EW	F&S	II	
CO3	Define Asana and explain the importance of asana. Distinguish between asana and physical exercise.	CK	MK	K	L&PP T	TT-Theory	F&S	II	
CO3	Describe the procedure, benefits, indications, and contraindications of Standing Yoga Postures such as Ardhakatichakrasana, Padahasthasana, Ardhakachakrasana, and Trikonasana.	CC	MK	KH	L_VC	PRN	F&S	II	

CO3	Describe the procedure, benefits, indications and contraindications of Sitting Yoga postures such as Swasthikasana, Gomukhasana, Padmasana, Vajrasana, Bhadrasana, Shashankasana, Ushtrasana, Pashchimottanasana, Suptavajrasana, Ardhamatsyendrasana, and Siddhasana.	CC	MK	KH	L_VC	PRN	F&S	II	
CO3	Describe the procedure, benefits, indications and contra indications of Supine Yoga postures such as Pavanamuktasana, Sarvangasana, Matsyasana, Halasana, Chakrasana, Shavasana and Setubandhasana.	CC	MK	KH	L_VC	PRN	S	II	
CO3	Describe the procedure, benefits, indications, and contraindications of Prone Yoga postures such as Bhujangasana, Shalabhasana, Dhanurasana, and Makarasana.	CC	MK	KH	L_VC	PRN	F&S	II	
CO3	Describe the procedure, benefits and contraindications of Suryanamaskara.	CC	MK	KH	L_VC	PRN	S	II	
CO3	Define pranayama and explain its types, benefits, time of practice, and avara-pravara-madhyamalakshanas.	CC	MK	KH	L&PP T	T- EW	F&S	II	
CO3	Describe the procedure of Nadishudhi Pranayama, its benefits, and Nadishudhilakshana.	CC	MK	KH	L_VC	PRN	S	II	
CO3	Enumerate the Kumbhakabhedas.	CK	MK	K	L&PP T	TT-Theory	S	II	
CO3	Describe the procedure and benefits of Suryabhedana, Ujjayi, Sheetal, Sitkari, Bhastrika, Bhramari, Murcha, and Plavini.	CC	MK	KH	L_VC	PRN	F&S	II	
CO3	Enlist Shatkarmas of Yoga , indications and their importance.	CK	MK	K	L&PP T	TT-Theory	S	II	
CO3	Describe the procedure, benefits, indications, contraindications, and precautions of Dhauti, Basti, Neti, Trataka, Nauli, and	CC	MK	KH	L_VC	T- EW	S	II	

	Kapalabhati.								
CO3	Explain the term bandha & Describe the procedure and benefits of Mulabandha, Jalandharabandha, and Uddiyanabandha.	CC	MK	KH	L_VC	T- EW	S	II	
CO3	Describe Mudras and explain the benefits of Shanmukhi mudra and Jnana mudra .	CC	DK	KH	L_VC	T- EW	F	II	
CO3	Describe Shatchakras and explain their importance in Yoga practice.	CAP	DK	KH	L&PP T	T-OBT	F	II	
CO3	Describe Ida-pingala-sushumna nadis and their importance in yoga practice.	CAP	NK	K	L&PP T	T- EW	F	II	
CO3	Define Pratyahara and explain its importance in Yoga practice.	CAP	MK	KH	L&PP T	TT-Theory	S	II	
CO3	Define Dharana and explain its importance in Yoga practice.	CAP	MK	KH	L&PP T	TT-Theory	S	II	
CO3	Define Dhyana and explain its importance in Yoga practice.	CAP	MK	KH	L&PP T	TT-Theory	S	II	
CO3	Describe Cyclic Meditation and Mindfulness meditation and their benefits.	CAP	DK	KH	L&PP T,L_ VC	CL-PR	F	II	
CO3	Define Samadhi and explain its types and importance.	CK	MK	K	L&PP T	TT-Theory	S	II	
CO3	Define Moksha according to Charaka and explain Muktatmalakshana and Moksha upayas.	CK	DK	K	L&G D	INT	F	II	
<b>Topic 10 Naturopathy</b> (Lecture :5 hours, Non lecture: 4 hours)									
CO3	Explain the basic principles of Naturopathy.	CK	DK	K	L&PP	INT	F&S	II	

					T				
CO3	Describe the concept of Panchabhutopasana.	CK	DK	KH	L&PP T	INT	F&S	II	
CO3	Explain the procedure and therapeutic effects of Mud therapy.	CAP	MK	KH	L_VC	TT-Theory	F&S	II	
CO3	Explain the procedure and therapeutic benefits of Sun bath.	CAP	MK	KH	L_VC	TT-Theory	F&S	II	
CO3	Explain Fasting therapy and its types and benefits.	CK	MK	KH	L&PP T	TT-Theory	F&S	II	
CO3	Explain hydrotherapy, types of water used based on the temperature and therapeutic effects of Hydrotherapy.	CAP	MK	KH	L_VC	TT-Theory	F&S	II	
CO3	Describe types, methods and benefits of massage.	CAP	MK	KH	L_VC	TT-Theory	F&S	II	

### Paper 2 Public health

<b>A3</b> Course outcome	<b>B3</b> Learning Objective (At the end of the session, the students should be able to)	<b>C3</b> Domain/sub	<b>D3</b> Must to know / desirable to know / Nice to know	<b>E3</b> Level Does/ Shows how/ Knows how/ Knows	<b>F3</b> T-L method	<b>G3</b> Assessment  (Refer abbreviations)	<b>H3</b> Formative/ summative	<b>I3</b> Term	<b>J3</b> Integration
<b>Topic 1 Janapadodhwamsa / Maraka Vyadhi</b> (Lecture :37 hours, Non lecture: 10 hours)									
CO1	Understanding the Epidemic Diseases (Amendment) Ordinance	CK	MK	KH	L&G	TT-Theory	F&S	II	

	Act,2020 ..				D				
CO1	Explain the causes of Janapadodhwamsa/ maraka vyadhi State the manifestation and control measures of Jnapadodhwamsa Explain the importance of Panchakarma and Rasayana in preventing Janapadodhwamsa	CK	MK	KH	L&PP T	T- EW	F&S	I	
CO1	Define Epidemiology, enumerate and describe the principles and uses of epidemiology.	CK	MK	KH	L&G D	T- EW	S	I	
CO3	Describe the basic terms of epidemiology.Explain and discuss the dynamics of disease transmission.Explain the theory of disease causation, epidemiological triad and natural history of disease.	CK	MK	KH	L&PP T	T- EW	S	II	
CO2	Explain the concept of prevention, modes of intervention, risk factors, incidence and prevalence.	CK	MK	KH	L&PP T	T-EMI	S	II	
CO2	Explain Susceptible host and host defense.Describe Immunizing Agents.Explain the concept of vyadhikshamatwa.Enlist methods to improve Vyadhikshamatwa.Classify Bala, enlist factors of Bala vriddhikara bhava.	CK	MK	KH	L&PP T	T- EW	F&S	II	
CO2	Explain the investigation of an epidemic. Explain prevention and control of an epidemic.	CK	MK	KH	L&PP T	T- EW	F&S	II	
CO1	Explain Sankramaka roga as per Ayurveda.	CK	MK	K	L&PP T	T- EW	S	II	
CO2	Explain Epidemiological determinants, brief pathology ,transmission, incubation period , clinical features, diagnosis and preventive measures of 1.Droplet Infections such as Chicken Pox, Measles, Rubella, Diphtheria, Pertussis, Mumps, Tuberculosis, SARS, Influenza, Pneumonia, Covid-19 and Leprosy	CK	MK	KH	L&PP T,ED U,D_ BED	T- EW	F&S	II	

CO2	2. Water borne Infections / intestinal infections - Cholera, Polio, Viral Hepatitis, Typhoid	CK	MK	K	L&PP T,D_ BED	T- EW	S	II	V-KC
CO2	3. Intestinal infestations – Ascariasis, Hook worm, Tape worm 4. Emerging and re-emerging diseases. Explain Role of Ayurveda in Epidemics like COVID-19, Zika Virus, H1N1, H3N2, etc	CK	MK	KH	L&G D,D_ BED	T- EW	S	II	
CO2	5. Sexually transmitted diseases (STDs) with prevention and control - HIV/ AIDS, Syphilis and Gonorrhoea.	CK	MK	KH	L&G D,D_ BED	T- EW	S	II	
CO2	Explain the role of Ayurveda in the prevention and control with recent research updates of Lifestyle diseases such as DM, Obesity, Coronary artery disease (CAD) and Cancer	CK	MK	KH	L&PP T,D_ BED	T- EW	S	II	
<b>Topic 2 Environmental health</b> (Lecture :10 hours, Non lecture: 5 hours)									
CO1	Understanding the Environment protection Act, 1986	CK	MK	KH	L&G D	TT-Theory	F&S	II	
CO1	Describe the properties of Vayu and state the composition of air.	CK	DK	KH	L	INT	F	II	
CO1	Specify the changes in air of the occupied room.	CK	DK	KH	L	INT	F	II	
CO1	Explain comfort zone and indices of thermal comfort.	CK	DK	KH	L	INT	F	II	
CO2	Comprehend the causes, prevention and control of air pollution. Discuss the effects of air pollution on health and social aspects	CC	DK	KH	L	DEB	F	II	
CO2	Elaborate the effects of Global warming with recent updates	CAP	DK	KH	L&G D	CR-RED	F	II	
CO2	Define ventilation and illustrate its types.	CAP	DK	KH	L&G D	DEB	F	II	

CO2	Explain the effects of high altitude and mountain air on health.	CAP	DK	KH	L&G D	DEB	F	II	
CO1	Explain safe and wholesome water and state water requirements.	CK	MK	KH	L&PP T	TT-Theory,V V-Viva	F&S	II	
CO1	Explain the properties of water from different sources.	CK	MK	KH	L&PP T	TT-Theory,V V-Viva	F&S	II	
CO1,CO6	Explain water pollution and health hazards.	CAP	MK	KH	L&PP T,DIS	CL-PR	F&S	II	
CO1,CO6	Describe the contemporary methods of water purification along with Ayurvedic methods.	CAP	MK	KH	L&PP T,DIS	CL-PR	F&S	II	
CO1,CO6	Elucidate the effects of Hard Water on health and methods of removal of hardness.	CAP	MK	KH	L&PP T,DIS	CL-PR	F&S	II	
CO7	Describe the quality of water stored in different vessels as per classics.	CAP	DK	SH	L	DEB	F	II	
CO7	Explain the rain water harvesting methods and its importance	CAN	NK	SH	L	DEB	F	II	
CO7	Enlist the types of soil.	CK	DK	KH	L&PP T	INT	F	II	
CO7	Interpret the relation between soil and health.	CK	DK	KH	L&PP T	INT	F	II	
CO7	Explain Land pollution and its prevention and control	CK	DK	KH	L&PP T	INT	F	II	
CO7	Explain land purification as per the classics.	CAN	NK	KH	L&G D	T-OBT	F	II	
CO7	Explain the Social goals of Housing and Housing	CE	DK	KH	L&G	T- EW	F	II	

	standards. Understanding of The building and other construction workers Act,1996				D				
CO7	Analyze the effects of housing on health.	CE	DK	KH	L&G D	T- EW	F	II	
CO7	Explain overcrowding and its impact on health	CE	DK	KH	L&G D	TT-Theory	F	II	
CO7	Explain good lighting, natural lighting and artificial lighting	CK	DK	KH	L&PP T	M-POS	F	II	
CO7	Explain the biological effects of lighting.	CK	DK	KH	L&PP T	M-POS	F	II	
CO7	Define noise. Illustrate its sources, effects on health and control measures.	CK	DK	KH	L&PP T	PRN	F	II	
CO7	Enlist the sources of Radiation and explain its effects on health and describe control measures.	CK	DK	KH	L	PRN	F	II	
CO7	Enlist Different types of solid waste and Explain the Storage and collection of refuse.	CK	MK	KH	L,D- M	TT-Theory	S	II	
CO7	Explain the Methods of disposal of solid waste (Rural & urban)	CK	MK	KH	D-M	M-MOD	S	II	
CO7	Describe Bio-medical waste management and Bio-Medical waste management rules, 2016	CK	MK	KH	D-M	TT-Theory	S	II	
CO7	Enlist excreta Disposal methods and explain Sanitary Latrines	CAN	DK	KH	D-M	DEB	F	II	
CO7	Explain the Modern Sewage disposal method	CAN	DK	KH	D-M	DEB	F	II	
CO7	Describe the disposal methods of Excreta during camps, fairs, and festivals	CAN	DK	KH	D-M	DEB	F	II	

**Topic 3 Disaster management** (Lecture :1 hours, Non lecture: 2 hours)

CO5	Define disaster and explain disaster management	CK	DK	KH	L&G D	PRN	F	II	
CO5	Explain effects of natural and man-made disasters	CK	DK	KH	L&G D	PRN	F	II	
CO2	Explain epidemiologic surveillance and identify disease control measures	CAP	DK	KH	L&G D	PRN	F	II	

**Topic 4 Occupational Health** (Lecture :3 hours, Non lecture: 3 hours)

CO1	Understand the Merchant Shipping / Medical Examination Rules, 2000	CK	DK	KH	L&G D	TT-Theory	F	II	
CO7,CO8	Define Occupational Health and Ergonomics.	CK	MK	K	L&G D	TT-Theory	F&S	II	
CO7,CO8	Explain occupational Hazards.	CK	MK	K	L&G D	T- EW	F&S	II	
CO7,CO8	Enlist occupational diseases and explain their prevention & control.	CK	MK	K	L&G D	T- EW	F&S	II	
CO1	Explain ESI Act, 1948 and The factories Act,1948	CK	MK	K	L&PP T	T- EW	S	II	
CO1	Describe the role of Ayurveda in various Occupational health problems.	CK	MK	KH	L&G D	TT-Theory	S	II	

**Topic 5 School health services** (Lecture :2 hours, Non lecture: 3 hours)

CO2	State the Health problems of school children.	CC	MK	KH	L&PP T	T- EW	F&S	II	

CO2	Mention the aspects of school health services.	CC	MK	KH	L&PP T	T- EW	F&S	II	
CO2	Mention the duties of school medical officers.	CC	MK	KH	FV	T- EW	F&S	II	
CO2	Explain how to Maintain a healthy environment in the school.	CC	MK	KH	FV	T- EW	F&S	II	
<b>Topic 6 Disinfection</b> (Lecture :2 hours, Non lecture: 3 hours)									
CO1,CO2,CO 6,CO7	Define the term disinfection	CK	MK	K	L	TT-Theory	F&S	II	
CO1,CO2,CO 6,CO7	Enlist and explain the types of disinfection.	CK	MK	K	L&PP T	P-VIVA,P-PS	F&S	II	
CO1,CO2,CO 6,CO7	Describe the Natural agents, Physical agents, and chemical agents of disinfection	CK	MK	K	L&PP T	T- EW	F&S	II	
CO1,CO2,CO 6,CO7	Demonstrate the recommended disinfection procedures of feces & urine, sputum, and room.	PSY- MEC	DK	KH	L_VC	P-VIVA,QZ	F	II	
CO1,CO2,CO 6,CO7	Explain Ayurvedic disinfection methods.	CK	DK	K	L&PP T	QZ	F	II	
<b>Topic 7 Primary health care</b> (Lecture :2 hours, Non lecture: 1 hours)									
CO1,CO2,CO 3,CO4,CO5,C O8	Define Primary Health Care.	CK	MK	K	L	TT-Theory	S	II	
CO1,CO2,CO 3,CO4,CO5,C O8	Describe the principles and elements of primary health care and the levels of health care.	CK	MK	K	L&PP T	T- EW	F&S	II	
CO1,CO2,CO 3,CO4,CO5,C	Describe the Structure at village, sub-centre, PHC, CHC, Rural hospital levels	CK	MK	K	L&PP T	T- EW	F&S	II	

O8									
CO1,CO2,CO3,CO4,CO5,CO8	Describe primary health care in Health insurance, Private agencies, Voluntary health agencies, NGOs, and the AYUSH sector	CK	DK	K	L&PP T	T-OBT	F	II	
CO1,CO2,CO3,CO4,CO5,CO8	Describe the role of Ayurveda in Primary Health Care.	CK	MK	K	L&PP T	TT-Theory	F&S	II	
<b>Topic 8 Mother and Child health care</b> (Lecture :1 hours, Non lecture: 1 hours)									
CO2,CO3,CO8	Describe the objectives of Maternal and Child Care services.	CK	MK	K	L	T- EW	F&S	II	
CO2,CO3,CO8	Explain the MCH problems & enlist the indicators of MCH care	CC	MK	K	L&PP T	T- EW	F&S	II	
<b>Topic 9 Family welfare programme</b> (Lecture :2 hours, Non lecture: 2 hours)									
CO4,CO5,CO6	Define demography and enlist the sources of demographic statistics in India.	CK	MK	K	L&PP T	TT-Theory	F&S	II	
CO4,CO5,CO6	Describe the demographic cycle & define life expectancy.	CK	MK	K	L&PP T	CL-PR	F&S	II	
CO2,CO4,CO5	Define family planning, eligible couple and target couple.Enlist & explain the objectives of family planning.	CK	MK	K	L&PP T	TT-Theory	F&S	II	
CO2,CO4,CO5	Explain the problems of population explosion and describe national population policy.	CK	MK	K	DIS	TT-Theory	F&S	II	
CO2,CO4,CO5	Classify and describe the Contraceptive methods (Fertility Regulating Methods).	CK	MK	K	L_VC	M-CHT	F&S	II	
<b>Topic 10 Preventive Geriatrics</b> (Lecture :1 hours, Non lecture: 1 hours)									

CO8	Enlist the health problems of the aged and explain their prevention and control measures	CK	MK	K	DIS	INT	F&S	II	
CO8	Explain the relation between lifestyle and healthy aging.	CC	MK	K	DIS	INT	F&S	II	
CO8	Describe the role of rasayana in preventive geriatrics.	CC	MK	K	L&PP T,W	INT	F&S	II	
<b>Topic 11 World Health Organization and International health agencies</b> (Lecture :3 hours, Non lecture: 1 hours)									
CO4	Define and describe the structure, regions, and works of the World Health Organization	CK	MK	KH	L&G D	T- EW,P- VIVA	F&S	III	
CO4	Describe the functions of various international health agencies - United Nations health agencies, bilateral health agencies, and Non- Governmental agencies	CK	MK	KH	L&G D	T- EW,P- VIVA	F&S	III	
CO4	Describe the contribution of the world health organization to the global acceptance of Ayurveda	CK	MK	KH	L&G D	T- EW,P- VIVA	F&S	III	
<b>Topic 12 Vital Statistics</b> (Lecture :1 hours, Non lecture: 1 hours)									
CO1	Understanding of Registration of Birth and Death Act, 1969	CK	MK	KH	L&G D	TT-Theory	F&S	II	
CO4,CO8	Define Vital Statistics.  Enumerate the sources ofVital statistics	AFT- RES	MK	SH	DIS	T- EW,P- VIVA	F&S	III	
CO4,CO8	Describe Fertility , Morbidity and Mortality rates	AFT- RES	MK	SH	L&G D	T- EW,P- VIVA	F&S	III	

<b>Topic 13 Health Administration</b> (Lecture :2 hours, Non lecture: 1 hours)									
CO4,CO8	Describe the health administration including AYUSH at the Central, State, District, and Village levels	CK	DK	KH	L&G D	T- EW,P- VIVA	S	III	
<b>Topic 14 National Health Programmes</b> (Lecture :7 hours, Non lecture: 3 hours)									
CO4,CO8	<p>State the vision/objective and outline the goals, strategies and plan of action of National Health Programs - Leprosy(NLEP), AIDS (NACP), Blindness (NPCB), Polio , National TB Elimination Program , Vector born disease control program, RCH program, ICDS program, Universal Immunization Program, National mental health program , National Program for Prevention and Control of Cancer, Diabetes, Cardiovascular Diseases &amp; Stroke (NPCDCS) , Swachha Bharat mission, Ayushman Bharat Yojana, Ayushman Bharat Digital Mission, National health mission (NRHM&amp;NUHM), National AYUSH Mission (NAM).</p> <p>National nutrition programs- National Iodine Deficiency Disorders Control program, National Iron Plus Initiative for Anemia Control, National Vitamin A prophylaxis program, Mid-Day Meal program &amp; Balwadi nutrition program.</p>	CK	MK	KH	L&PP T,DIS ,FV	T- EW,P- VIVA	F&S	III	
<b>Topic 15 National Health Policy</b> (Lecture :1 hours, Non lecture: 1 hours)									
CO4	Describe the National Health Policy (NHP) and the scope of Ayurveda in NHP.	CK	MK	KH	L,L& PPT	T- EW,P- VIVA	F&S	III	

**List of Practicals** (Term and Hours)

<b>PRACTICALS (Marks-100)</b>			
<b>S.No</b>	<b>List of Topics</b>	<b>Term</b>	<b>Hours</b>
1	Dinacharya	1	25
2	Disinfectants	1	2
3	Ahara	1	30

5	Yoga performance	2	35
6	Community survey	3	20
7	Local Health Educational Visits	3	36
8	Visit to Observe National Health Programs and Ayurveda Centre	3	12
9	Monitoring of health and hygiene	1	5

**Table 4: Learning objectives (Practical)**

A4 Course outcome	B4 Learning Objective (At the end of the session, the students should be able to)	C4 Doma in/sub	D4 Must to know / desirable to know / Nice to know	E4 Level Does/ Show s how/ Know s how/ Know	F4 T-L meth od	G4 Assessment  (Refer abbreviations)	H4 Form ative/ summ ative	I4 Term	K4 Integr ation
<b>Topic 1 Dinacharya</b>									
CO1	Collect and Compare different Dantadhawana Churnas/ Tooth pastes available in the market and choose/ advise the appropriate one based on the need.	PSY-ADT	DK	D	PrBL	PRN	F	I	
CO1	Collect and Compare different JiwhaNirlekhana Yantra(Tongue cleaners) available in the local area/ market and choose/advise the appropriate one for swastha	PSY-ADT	DK	D	PrBL	PRN	F	I	
CO1	Collect different dravya/kashaya/mouthwashes available in the market for kavala and gandusha; demonstrate the procedure of kavala and gandusha with appropriate liquids /dravyas for swastha	PSY-ADT	MK	D	PrBL, D,PR A	PRN	F&S	I	
CO1	Collect different types of Anjana (Collyriums) available in the market, Demonstrate Anjana procedure as per local traditions and	PSY-ADT	MK	D	PrBL, PT,D	PRN	F&S	I	

	advise different types of Anjana for swastha.								
CO1	Demonstrate Pratimarsha Nasya with Anutaila/ Sesame oil and prescribe the appropriate taila for Pratimarsha Nasya for swastha.	PSY-ADT	MK	D	PrBL, PT,D	DOPS	F&S	I	
CO1	Demonstrate Prayogika Dhoomapana and advise prayogika dhoomapana dravya for swastha.	PSY-ADT	MK	D	PrBL, PT,D	DOPS	F&S	I	
CO1	Demonstrate the procedure of Abhyanga techniques for full body abhyanga, padabhyanga and shiroabhyanga and prescribe suitable taila for Abhyana for Swatha.	PSY-ADT	MK	D	PrBL, PT,D	DOPS	F&S	I	
CO1	Demonstrate the procedure of Udwartana techniques and prescribe suitable dravya for Udwartana for Swatha.	PSY-ADT	MK	D	PrBL, PT,D	DOPS	F&S	I	
CO2	Prescribe appropriate dinacharya module regarding ahara and vihara as per age and occupation /activity.	CE	MK	SH	PrBL	P-CASE	F&S	I	
CO2	Advise /counsel people regarding healthy lifestyle based on the Ayurvedic principles ( one student should counsel at least five person and should be documented).	CE	MK	SH	PrBL	P-CASE	F&S	I	
<b>Topic 2 Disinfectants</b>									
CO7	Identify and demonstrate the suitability, dose, dilution, and contact period of the following disinfectants: Bleaching powder, Dettol, Lysol, Savlon.	PSY-ADT	MK	SH	CBL	PP-Practical	S	II	
CO7	Observe the procedure of fumigation of the operation theatre.	AFT-REC	NK	D	D	P-VIVA	F	II	
CO7	Write the mode of working and uses of an autoclave.	CK	DK	KH	SDL	T- EW	F	II	

Topic 3 Ahara									
CO8	Collect and compile different regional staple food articles.	PSY-SET	MK	D	SDL	COM	F	I	H-DG
CO8	Mention the nutritive value of the following preparations per 100gm and calculate the food portions/serving size of the following recipes: a. Yusha b. Yavagu c. Odana d. Krushara e. Peya f. Panaka g. Takra h. Manda i. Vilepi	CE	MK	D	PT	P-EN	F&S	I	
CO8	Plan a dietary Menu according to different Prakriti (preparation of diet chart considering all ahara vargas for eka doshaja , dvidoshaja prakriti)	PSY-GUD	MK	SH	TBL	P-MOD,P-POS	F	I	
CO8	Plan the dietary menu for different occupations / Activities, Age groups, and physiological conditions. ( diet chart for 1-5 years child, 6-18 years, 18& above till 60 years, above 60 years, sedentary, sedentary intellectuals, night shifts , drivers, standing professionals. physiological conditions like Garbhini, Sutika, Kshirapa, Ksheerada, Ksheerannada, Annada etc,..)	PSY-GUD	MK	D	CBL	P-CASE	F&S	I	
CO8	Plan Ahara-Vihara based on the different Ritus(preparation of diet and lifestyle charts for each ritu)	PSY-GUD	MK	D	PrBL	M-CHT	F	I	
CO8	Plan a dietary menu for any one individual according to prakriti, agni, Sara, satva, age, sex, occupation/ activity, and season based on the regional food habits with serving sizes with different food exchange/options.	PSY-GUD	MK	D	IBL	P-CASE	F	I	
CO8	Document the maintenance of various equipment and appliances used in the kitchen/ diet section of the hospital such as cooking gas, pressure cooker, mixer-grinder, microwave oven, refrigerator	AFT-RES	NK	D	PL	PP-Practical	F	I	

CO8	Assess various Anthropometric variables like Weight, height, and BMI ( including differentiation between Sara )and Mid-arm Circumference in order to assess the state of nutrition.	AFT-RES	MK	D	PSM	PP-Practical	F	I	
<b>Topic 4 Health Education (IEC)</b>									
CO5	Demonstrate communication methods for health education.	PSY-SET	MK	SH	DIS, W	P-RP,M-POS,OSPE ,DOPS	F&S	II	
CO5	Demonstrate/present different health education materials (dinacharya practices, sadvritta practices,family planning methods, breast feeding techniques, environmental hygiene, preventive and control measures of communicable and non - communicable diseases etc.) to the target population in the community.	AFT-RES	MK	SH	DIS,T PW,R P	DOPS,Log book	F&S	II	
<b>Topic 5 Yoga performance</b>									
CO3	Perform four Standing Postures namely - Ardhakatichakrasana, Padahastasana, Ardihakrasana, and Trikonasana step by step with Sthiti, main procedure, and vishrama.	PSY-ADT	MK	SH	KL	DOPS	S	II	
CO3	Perform eleven Sitting Postures namely - Swasthikasana, Gomukhasana, Padmasana, Vajrasana, Bhadrasana, Shashankasana, Ushtrasana, Pashchimottanasana, Suptavajrasana, Ardhamatsyendrasana, and Siddhasana step by step with Sthiti, main procedure, and vishrama.	PSY-ADT	MK	SH	KL	DOPS	S	II	
CO3	Perform seven Supine Postures namely - Pavanamuktasana, Sarvangasana, Matsyasana, Halasana, Chakrasana, Shavasana, and Setubandhasana step by step with Sthiti, main procedure and visrama	PSY-ADT	MK	SH	KL	DOPS	S	II	
CO3	Perform four Prone Postures namely - Bhujangasana,	PSY-	MK	SH	KL	DOPS	S	II	

	Shalabhasana, Dhanurasana, and Makarasana step by step with Sthiti, main procedure and vishrama.	ADT							
CO3	Perform Nadishuddhi Pranayama with inhalation-retention-exhalation in the ratio of 1:4:2 in a comfortable sitting posture.	PSY-ADT	MK	SH	KL	DOPS	S	II	
CO3	Perform Kumbhakabhedas namely - Suryabhedana, Ujjayi, Sitkari, Sheetali, Bhastrika and Bhramari.	PSY-ADT	MK	SH	KL	DOPS	S	II	
CO3	Perform Jalaneti, Kapalabhati and Trataka.	PSY-ADT	MK	SH	KL	DOPS	S	II	
CO3	Demonstrate and instruct Common Yoga Protocol of IDY (International Day of Yoga).	PSY-ADT	DK	SH	EDU	DOPS	F	II	
<b>Topic 6 Community survey</b>									
CO6	Conduct minimum 05 Family surveys using structured questionnaire in specific rural populations and report the survey finding and discuss possible solutions to the family	PSY-SET	MK	D	ECE	DOPS	F&S	III	
CO6	Conduct minimum 05 Family surveys using structured questionnaire in specific urban populations and report the survey finding and discuss possible solutions to the family.	PSY-SET	MK	D	ECE	DOPS	F&S	III	
<b>Topic 7 Local Health Educational Visits</b>									
CO2	Report the functioning of milk dairy such as methods of processing and preservation of milk, testing of milk before and after pasteurization and the standards of milk & milk products.	PSY-SET	MK	KH	EDU, FV	P-VIVA,RK	F&S	III	
CO2,CO7	Report and explain the various process involved in large-scale water purification.	PSY-MEC	MK	KH	D-M,FV	P-VIVA,RK	F&S	III	
CO2,CO7	Explain and Report the processes involved in modern sewage treatment.	PSY-MEC	MK	KH	D-M,FV	P-EXAM,RK	F&S	III	

CO1,CO2,CO5,CO6,CO8	Explain and report the various measures adopted in the industry for the prevention and control of occupational diseases.	CC	MK	KH	TPW, FV	P-VIVA,RK	F&S	III	
CO1,CO2,CO8	Explain and Report the food safety standards and methods of food processing techniques.	CC	MK	K	PrBL, RLE, FV	P-VIVA,RK	F&S	III	
CO3,CO6	Report and explain various naturopathic treatment methods.	CC	MK	KH	L_VC, EDU, FV	P-EXAM,RK	F&S	III	
<b>Topic 8 Visit to Observe National Health Programs and Ayurveda Centre</b>									
CO4,CO8	Report the functioning of National Health Programs at Primary health centers/Community health centers/District hospitals and Govt. Ayurveda Dispensary	PSY-SET	MK	SH	L_VC, IBL, FV	T- EW,P-VIVA,RK	F&S	III	V-KC
CO4	Report the functioning of a Primary Health Centre/ Community Health Centre/ Rural Hospital/ District Hospital with regards to the implementation of different National Health Programmes viz. infectious disease control, immunization, ANC, Family planning etc.	AFT-RES	DK	D	FV	Log book	F	III	
CO4	Report the structure and functioning of an Ayurvedic Dispensary/ Taluk Hospital/ District Hospital available in the district.	AFT-RES	DK	D	FV	Log book	F	III	
<b>Topic 9 Monitoring of health and hygiene</b>									
CO2,CO6,CO7,CO8	Collect the demographic profile of allotted 2 subjects/Individuals ( one from the community and one from employees of the college/hospital ) and conduct clinical examination (Assess Prakriti, Sattva, Saara, etc.)	AFT-RES	MK	D	IBL	P-CASE,RK	F&S	I	
CO2,CO6,CO7,CO8	Conduct periodic check-ups for allotted individual/employer (2) health status / occupational health status and if any treatment	AFT-RES	MK	D	PT	P-CASE,OSCE	F	I	

	is prescribed then coordinate the treatment under the overall guidance of the Mentor								
CO2,CO6,CO7,CO8	Counsel the adopted individuals/employer (2) and analyze the health trajectory( individual following the prescribed regimen ) of the adopted individual/employer under the overall guidance of the mentor	AFT-RES	MK	D	PT	P-SUR,RK	F	II	
CO2,CO6,CO7,CO8	Document the maintenance of water sanitation, waste disposal, food hygiene, etc., in the hospital canteen/ pathya section/cafeteria	CE	MK	KH	PrBL	RK	F	I	

**Table 4a: List of Practical**

<b>S.No</b>	<b>Name of practical</b>	<b>Term</b>	<b>Activity</b>	<b>Practical hrs</b>
1	Dinacharya	1	<ol style="list-style-type: none"><li>1. Analyze the composition of different Dantadhawana Churnas/ Tooth pastes and tooth brushes available in the market</li><li>2. Analyze different Jivwa Nirlekhana Yantra(Tongue cleaners) available in the local area/ market</li><li>3. Demonstrate the procedure of kavala and gandusha with appropriate liquids /dravyas for swastha</li><li>4. Demonstrate Anjana procedure as per local traditions and advise different types of Anjana for swastha.</li><li>5. Demonstrate Pratimarsha Nasya with Anutaila/ Sesame oil and prescribe the appropriate taila for Pratimarsha Nasya for swastha.</li><li>6. Demonstrate Prayogika Dhoomapana (Practicable and Non- practicable Dhoomapana )and advise prayogika dhoomapana dravya for swastha.</li><li>7. Demonstrate the procedure of Abhyanga techniques for full body abhyanga, padabhyanga and shiroabhyanga and prescribe suitable Taila for Abhyana for Swatha.</li><li>8. Demonstrate the procedure of Udwartana techniques and prescribe suitable dravya for Udwartana for Swatha.</li><li>9. Prescribe appropriate dinacharya module regarding ahara and vihara as per age and occupation /activity.</li><li>10. Advise /counsel people regarding healthy lifestyle based on the Ayurvedic principles ( one student should counsel at least five person and should be documented).</li></ol>	25
2	Disinfectants	1	Identify and demonstrate the suitability, dose, dilution, and contact period of the following disinfectants : Bleaching powder, Dettol, Lysol, Savlon . Observe the procedure of fumigation of the operation theatre. Write the mode of working and uses of an autoclave.	2

3	Ahara	1	<p>Collect, compile and document region wise different varieties of Ahara Varga (Millets, cereals, pulses, vegetables, varieties of milk/oil/honey/ available in the market). Demonstrate the therapeutic indication and nutritive values of Pathya kalpanas a. Manda b. Peya c. Vilepi d. Yavagu e. Odana f. Krishara g. Yusha h. Takra .</p> <p>Prepare the dietary regime according to different Prakriti. Prepare/Prescribe the dietary regime for different occupations / activities, age groups, and physiological conditions. Prepare/Prescribe the diet and lifestyle regimen (pathya- apathya) with reference to Ahara and Vihara for each ritu. Conduct diet counselling according to prakriti, agni, sara, satva, age, sex, occupation/ activity, and prevailing season based on the regional food habits with serving sizes with different food exchange/options for 5 persons. Assess various anthropometric variables like weight, height, and BMI and mid-arm circumference etc., in order to assess the state of nutrition of five individuals.</p>	30
4	Health Education (IEC)	2	<p>Demonstrate communication methods for health education. Demonstrate/ Present different health education materials (dinacharya practices, Sadvritta practices, family planning methods, breastfeeding techniques, etc. ) patients and general public .</p>	10
5	Yoga performance	2	<p>Perform four Standing Postures namely - Ardhakatichakrasana, Padahasthasana, Ardhabhujanghasana, and Trikonasana step by step with sthiti, main procedure and vishrama.</p> <p>Perform eleven Sitting Postures namely - Swasthikasana, Gomukhasana, Padmasana, Vajrasana, Bhadrasana, Shashankasana, Ushtrasana, Pashchimottanasana, Suptavajrasana, Ardhamatsyendrasana, and Siddhasana step by step with sthiti, main procedure and vishrama.</p> <p>Perform seven Supine Postures namely - Pavanamuktasana, Sarvangasana,</p>	35

			<p>Matsyasana, Halasana, Chakrasana, Shavasana, and Setubandhasana step by step with sthiti, main procedure and visrama</p> <p>Perform four Prone Postures namely - Bhujangasana, Shalabhasana, Dhanurasana, and Makarasana step by step with Sthiti, main procedure and vishrama. Perform Jalaneti and kapalbhati . Perform Anuloma – Viloma Pranayama in a comfortable sitting posture. Perform Nadishuddhi Pranayama with inhalation-retention-exhalation in the ratio of 1:4:2 in a comfortable sitting posture. Perform Kumbhakabhedas namely - Suryabhedana, Ujjayi, Sitkari, Sheetali, Bhastrika and Bhramari.</p> <p>Demonstrate and instruct Common Yoga Protocol of IDY (International Day of Yoga).</p>	
6	Community survey	3	<p>Conduct minimum 05 Family surveys using a structured questionnaire in specific rural populations and report the survey findings and discuss possible solutions to the family.</p> <p>Conduct minimum 05 family surveys using a structured questionnaire in specific urban populations and report the survey findings and discuss possible solutions to the family.</p>	20
7	Local Health Educational Visits	3	<p>Report the functioning of milk dairies such as methods of processing and preservation of milk, testing of milk before and after pasteurization, and the standards of milk &amp; milk products. Report the various process involved in water purification plant. Report the processes involved in modern sewage treatment plant. Report the various measures adopted for the prevention and control of occupational diseases in any industry. Report the food safety standards and methods of food processing techniques adopted in any food industry. Report the various treatment modalities adopted in Naturopathy and Yoga canthers.</p> <p>Note : Swasthavritta, Agada Tantra.</p>	36

			Dravyaguna & Rasashastra - Combined out campus visits can be palled wherever feasible.	
8	Visit to Observe National Health Programs and Ayurveda Centre	3	Report the functioning of a Primary health centre/Community health centre/Rural hospital/District hospital with regards to the implementation of different National Health Programmes viz. infectious disease control, immunization, ANC, Family planning etc. Report the structure and functioning of a Ayurveda Dispensary/ Taluk Hospital /District Hospital available in the district.	12
9	Monitoring of health and hygiene	1	Conduct periodic check-ups , collect demographic profile and clinical examination of allotted 2 subjects/Individuals - Assess Prakriti, Satva, Sara, etc.)for their health status / occupational health status and if any treatment is prescribed then coordinate the treatment under the overall guidance of the teacher/Mentor. Counsel and advice the allotted 2 subjects a healthy regime prescription and analyze their health status after following the healthy regime under the overall guidance of the teacher/mentor. Document the maintenance of water sanitation, waste disposal including biomedical waste in the hospital.	5
<b>Total Hr</b>				<b>175</b>

### Activity

CO	Topic name	Activity Details	Hours #
CO1	Dinacharya	Demonstration, Making posters, Real-life experiences , Roleplay , We- based activities	5

		Example - Collection and analyze of different tooth paste/tooth brushes, mouth washes and collyriums available in the market including GMP pharmacies	
CO1	Ratricharya	Chart preparation and real-life experiences of Ratri bhojana and Sleep principles	1
CO1	Ritucharya	Assessment of changes happening in the human body in particular ritu Poster preparation of food recipes in different ritus	2
CO1	Sadvritta	Role play	1
CO1	Ahara	Listing of Ahitakara (Junk) food habits, Gathering information of Organic farming and Organic food items , Application of Ashtaahara vidhivesha ayatana in real life - Team base project, Roleplay , Presentation & Collection of Research updates in the field of Ayurvedic food	15
CO1	Roganutpadaniya	Survey and documentation on effect of Adharaneeya vega on different occupations	1
CO1	Rasayana for swastha	Poster making and Library work	2
CO1	Nidra	Survey on sleep and awakening patterns among the staff and students	1
CO7	Yoga	Participation in International day of Yoga , Poster presentation of Yogic practices as per diseases , Preparation of Short videos on Yoga and Conducting Quiz	7
CO2,CO5	Disaster management	Group discussion	2
CO1	Janapadodwamsa	Assignment , Symposiums and Problem-based learning	10
CO1,CO5	Environmental health	Seminars, Quiz andm PBL	5
CO3	Disinfection	PBL	3
CO2	Family welfare programe	Roleplay , Web-based learning and Discussion	2

CO7,CO8	Mother and child health care	PBL	1
CO8	Preventive geriatrics	Group discussion and Seminar	1
CO4,CO8	National health programs	Web-based learning , Assignments and Participating in celebration of health related days	3
CO3	School health services	Role play and Presentations	2
CO7,CO8	Occupational health	Poster making , PBL and Group discussion	3
CO2,CO3,CO4,CO5,CO8	<b>Primary health care</b>	Group discussions	2
CO3	Naturopathy	Web-based learning , Tutorials and Group disussions	4
CO4	World health organizations and International health agencies	Web-based learning and Quiz	1
CO8	Health Statistics	Presentations and Seminars	1

# Hours indicated are included in calculations of Table 3 and 4

**Table 5- Teaching learning method**

Sr No	Teaching learning methods in the course	No of Activities
1	Lecture	14
2	Lecture with Power point presentation	61
3	Lecture & Group Discussion	16
4	Lecture with Video clips	15

5	Discussions	6
6	Inquiry-Based Learning	1
7	Project-Based Learning	1
8	TBL	1
9	Flipped classroom	1
10	Blended Learning	1
11	ECE	1
12	Self-directed learning	8
13	Demo on Model	6

These are overall teaching learning methods listed in Table 3 and 4. Teachers can select the best possible method amongst the given methods as per objective, available time etc.

**Table 6: Assessment Summary: Assessment is subdivided in A to H points**

#### 6 A-Number of Papers and Marks Distribution

Subject Code	Papers	Theory	Practical/Clinical Assessment					Grand Total
			Practical	Viva	Elective	IA	Sub Total	
AyUG-SW	2	200	100	60	10	30	200	400

#### 6 B - Scheme of Assessment (formative and Summative)

PROFESSIONAL COURSE	DURATION OF PROFESSIONAL COURSE		
	First Term (1-6 Months)	Second Term (7-12 Months)	Third Term (13-18 Months)
Second	3 PA & First TT	3 PA & Second TT	3 PA & UE**

**PA:** Periodical Assessment; **TT:** Term Test; **UE:** University Examinations.

\*\* University Examination shall be on entire syllabus

## 6 C - Calculation Method for Internal assessment Marks

TERM	PERIODICAL ASSESSMENT*					TERM TEST**	TERM ASSESSMENT	
	A 6	B	C	D	E	F	G	H
	1 (15 Marks)	2 (15 Marks)	3 (15 Marks)	Average (A+B+C/3)	Converted to 30 Marks (D/15*30)	Term Test (Marks converted to 30)	Sub Total _/60 Marks	Term Assessment (.../30)
FIRST							E+F	(E+F)/2
SECOND							E+F	(E+F)/2
THIRD						NIL		E
<b>Final IA</b>	Average of Three Term Assessment Marks as Shown in 'H' Column.							
	Maximum Marks in Parentheses *Select an Evaluation Method which is appropriate for the objectives of Topics from the Table 6 D for Periodic assessment. Conduct 15 marks assessment and enter marks in A, B, and C. ** Conduct Theory (100 Marks)(MCQ(20*1 Marks), SAQ(8*5), LAQ(4*10)) and Practical (100 Marks) Then convert to 30 marks.							

## 6 D - Evaluation Methods for Periodical Assessment

S. No	Evaluation Methods
1	Activities Indicated in Table 3 - Column G3 as per Indicated I, II or III term in column I3

Evaluation Methods in MSE

1. Practical / Clinical Performance
2. Viva Voce, MCQs, MEQ (Modified Essay Questions/Structured Questions)
3. Open Book Test (Problem Based)
4. Summary Writing (Research Papers/ Samhitas)
5. Class Presentations; Work Book Maintenance

- 9.1 Lakshana, classification
- 9.2 Clinical significances in Ayurveda.

**PAPER II****Padartha Vigyan and Ayurveda Itihas**

100 marks

**PART A - Pramana/ Pariksha- Vigyaniyam**

75 marks

**1. Pariksha**

- 1.1. Definition, significance, necessity and use of *Pariksha*.
- 1.2. Definition of *Prama*, *Prameya*, *Pramata*, *Pramana*.
- 1.3. Significance and importance of *Pramana*, Enumeration of *Pramana* according to different schools of philosophy.
- 1.4. Four types of methods for examination in *Ayurveda* (Chaturvidha-Parikshavidhi), *Pramana* in Ayurveda.
- 1.5. Subsudation of different *Pramanas* under three *Pramanas*.
- 1.6. Practical application of methods of examination (Parikshavidhi) in treatment (Chikitsa).

**2. Aptopdesha Pariksha/ Pramana**

- 2.1. Lakshana of Aptopadesha, Lakshana of Apta.
- 2.2. Lakshana of Shabda, and its types.
- 2.3. Shabdavritti-Abhidha, Lakshana, Vyanjana and Tatparyakhya. Shaktigrahaheetu.
- 2.4. Vaakya: Characteristics, Vaakyarthagyanahetu- Aakanksha, Yogyata, Sannidhi.

### 3. Pratyaksha Pariksha/ Pramana

- 3.1. Lakshana of Pratyaksha, types of Pratyaksha- Nirvikalpaka- Savikalpaka with description, description of Laukika and Alaukika types and their further classification.
- 3.2. Indriya-prapyakaritvam, six types of Sannikarsha.
- 3.3. Indriyanam lakshanam, classification and enumeration of Indriya. Description of Panchapanchaka, Penta-elemental nature of Indriya by Panchamahabhuta (*Panchabhautikatwa* of Indriya) and similarity in sources (*Tulyayonitva*) of Indriya.
- 3.4. Trayodasha Karana, dominance of Antahkaran.
- 3.5. Hindrances in direct perception (*pratyaksha-anupalabdihikaaran*), enhancement of direct perception (Pratyaksha) by various instruments/ equipments, necessity of other Pramanas in addition to Pratyaksha.
- 3.6. Practical study/ application of Pratyaksha in physiological, diagnostic, therapeutics and research grounds.

### 4. Anumanapariksha/Pramana

- 4.1. Lakshana of Anumana. Introduction of Anumiti, Paramarsha, Vyapti, Hetu, Sadhya, Paksha, Drishtanta. Types of Anumana mentioned by Charaka and Nyayadarshana.
- 4.2. Characteristic and types of Vyapti.
- 4.3. Lakshana and types of Hetu, description of Ahetu and Hetwabhasa.
- 4.4. Characteristic and significance of Tarka.
- 4.5. Practical study/ application of Anumanapramana in physiological, diagnostic, therapeutics and research.

### 5. Yুক্তipariksha/ Pramana

- 5.1. Lakshana and discussion.
- 5.2. Importance in Ayurveda.
- 5.3. Practical study and utility in therapeutics and research.

### 6. Upamana Pramana

- 6.1 Lakshana.
- 6.2 Application in therapeutics and research.

### 7. Karya- Karana Siddhanta (Cause and Effect Theory)

- 7.1. Lakshana of Karya and Karana. Types of Karana.
- 7.2. Significance of Karya and Karana in Ayurveda.
- 7.3. Different opinions regarding the manifestation of Karya from Karana: Satkaryavada, Asatkaryavada, Parinamavada, Arambhavada, Paramanuvada, Vivartavada, Kshanabhanguvada, Swabhavavada, Pilupaka, Pitharpaka, Anekantavada, Swabhavoparamavada.

## PART B - Ayurved Itihas

25 marks

1. Etymological derivation (Vyutpatti), syntactical derivation (Nirukti) and definition of the word Itihas, necessity of knowledge of history, its significance and utility, means and method of history, historical person (Vyakti), subject (Vishaya), time period (Kaal), happening (Ghatana) and their impact on Ayurveda.
2. Introduction to the authors of classical texts during Samhitakaal and their contribution: Atreya, Dhanwantari, Kashyapa, Agnivesha, Sushruta, Bhela, Harita, Charaka,

Dridhabala, Vagbhata, Nagarjuna, Jivaka.

3. Introduction to the commentators of classical Samhitas – Bhattaraharicchandra, Jejjata, Chakrapani, Dalhana, Nishchalakara, Vijayarakshita, Gayadas, Arunadutta, Hemadri, Gangadhara, Yogindranath Sen, Haranachandra, Indu.
4. Introduction to the authors of compendiums (Granthasamgrahakaala) – Bhavmishra, Sharngadhara, Vrinda, Madhavakara, Shodhala, Govinda Das (Author of Bhaishajyaratnawali), Basavraja.
5. Introduction to the authors of Modern era –Gana Nath Sen, Yamini Bhushan Rai, Shankar Dajishastri Pade, Swami Lakshmiram, Yadavji Tikramji, Dr. P. M. Mehta, Ghanekar, Damodar Sharma Gaur, Priyavrat Sharma.
6. Globalization of Ayurveda – Expansion of Ayurveda in Misra (Egypt), Sri Lanka, Nepal other nations.
7.
  - a) Developmental activities in Ayurveda in the post-independence period, development in educational trends.
  - b) Establishment of different committees, their recommendations.
  - c) Introduction to and activities of the following Organizations :- Department of AYUSH, Central Council of Indian Medicine, Central Council for Research in Ayurvedic Sciences, Ayurvedic Pharmacopeia commission, National Medicinal Plants Board, Traditional Knowledge Digital Library (TKDL)
  - d) Introduction to the following National Institutions :
    - National Institute of Ayurved, Jaipur.
    - IPGT&RA, Gujrat Ayurved University, Jamnagar.
    - Faculty of Ayurved, BHU, Varanasi.
    - Rashtriya Ayurveda Vidyapeetha, New Delhi.
8. Introduction to national & international popular journals of Ayurveda.
9. Introduction to activities of WHO in the promotion of Ayurved.

### **1.3 KRIYA SHARIR (PHYSIOLOGY)**

Theory-Two Papers-200 Marks (100 marks each)

Teaching hours-180 hours

PAPER- I

100 marks

PART- A

50 marks

1. Conceptual study of fundamental principles of Ayurvediya Kriya Sharir e.g - Panchamahabhuta, Tridosha, Triguna, Loka-Purusha Samya, Samanya-Vishesha. Description of basics of Srotas.
2. Definition and synonyms of the term Sharir, definition and synonyms of term Kriya, description of Sharir Dosha and Manasa Dosha. Mutual relationship between Triguna-Tridosha & Panchmahabhuta. Difference between Shaarir and Sharir. Description of the components of Purusha and classification of Purusha, role of Shatdhatupurusha in Kriya Sharira and Chikitsa.
3. Dosha- General description of Tridosha. Inter relationship between Ritu-Dosha-Rasa-Guna. Biological rhythms of Tridosha on the basis of day-night-age-season and food intake. Role of Dosha in the formation of Prakriti of an individual and in maintaining of health. Prakrita and Vaikrita Dosha.
4. Vata Dosha: Vyutpatti (derivation), Nirukti (etymology) of the term Vata, general locations, general properties and general functions of Vata, five types of Vata (Prana, Udana, Samana, Vyana, Apana) with their specific locations, specific properties, and specific functions.  
Respiratory Physiology in Ayurveda, Physiology of speech in Ayurveda.
5. Pitta Dosha: Vyutpatti, Nirukti of the term Pitta, general locations, general properties and general functions of Pitta, five types of Pitta (Pachaka, Ranjaka, Alochaka, Bhrajaka, Sadhaka) with their specific locations, specific properties, and specific functions. Similarities and differences between Agni and Pitta.
6. Kapha Dosha: Vyutpatti, Nirukti of the term Kapha, general locations, general properties and general functions of Kapha, five types of Kapha (Bodhaka, Avalambaka, Kledaka, Tarpaka, Śleshaka ) with their specific locations, specific properties, and specific functions.
7. Etiological factors responsible for Dosha Vriddhi, Dosha Kshaya and their manifestations.
8. Concept of Kriyakala.
9. Prakriti:
  - a) Deha- Prakriti: Vyutpatti, Nirukti, various definitions and synonyms for the term „Prakriti“. Intra-uterine and extra-uterine factors influencing Deha-Prakriti, classification and characteristic features of each kind of Deha-Prakriti.
  - b) Manasa- Prakriti: Introduction and types of Manasa- Prakriti.
10. Ahara: Definition, classification and significance of Ahara, Ahara-vidhi-vidhana, Ashta Aharavidhi Viseshayatana, Ahara Parinamkar Bhava.

11. Aharapaka (Process of digestion): Description of Annavaha Srotas and their Mula. Role of Grahani & Pittadhara Kala.
12. Description of Avasthapaka (Madhura, Amla and Katu). Description of Nishthapaka (Vipaka) and its classification. Separation of Sara and Kitta. Absorption of Sara. Genesis of Vata-Pitta-Kapha during Aharapaka process. Definition of the term Koshta. Classification of Koshta and the characteristics of each type of Koshta.
13. Agni – Definition and importance, synonyms, classification, location, properties and functions of Agni and functions of Jatharagni, Bhutagni, and Dhatvagni.

**PART- B**

**50 marks**

**Modern Physiology**

- a) Definition and mechanisms of maintenance of homeostasis. Cell physiology. Membrane physiology. Transportation of various substances across cell membrane.
- b) Resting membrane potential and action potential.
- c) Physiology of respiratory system: functional anatomy of respiratory system. Definition of ventilation, mechanism of respiration, exchange and transport of gases, neural and chemical control of respiration, artificial respiration, asphyxia, hypoxia. Introduction to Pulmonary Function Tests.
- d) Physiology of Nervous System: General introduction to nervous system, neurons, mechanism of propagation of nerve impulse, physiology of CNS, PNS, ANS; physiology of sensory and motor nervous system, Functions of different parts of brain and physiology of special senses, intelligence, memory, learning and motivation. Physiology of sleep and dreams, EEG. Physiology of speech and articulation. Physiology of temperature regulation.
- e) Functional anatomy of gastro-intestinal tract, mechanism of secretion and composition of different digestive juices. Functions of salivary glands, stomach, liver, pancreas, small intestine and large intestine in the process of digestion and absorption. Movements of the gut (deglutition, peristalsis, defecation) and their control. Enteric nervous system.
- f) Acid-base balance, water and electrolyte balance. Study of basic components of food. Digestion and metabolism of proteins, fats and carbohydrates. Vitamins & Minerals- sources, daily requirement, functions, manifestations of hypo and hypervitaminosis.

**PAPER- II**

**100 marks**

**PART- A**

**50 marks**

**1. Dhatu:**

Etymology, derivation, definition, general introduction of term Dhatu, different theories related to Dhatuposhana (Dhatuposhana Nyaya)

**2. Rasa Dhatu:**

Etymology, derivation, location, properties, functions and Praman of Rasa-dhatu. Physiology of Rasavaha Srotas, Formation of Rasa Dhatu from Aahara Rasa, circulation of Rasa (Rasa-Samvahana), role of Vyana Vayu and Samana Vayu in Rasa Samvahana. Description of functioning of Hridaya. Ashtavidha Sara (8 types

of Sara), characteristics of Tvakasara Purusha, conceptual study of mutual interdependence (Aashraya-Aashrayi Bhaava) and its relation to Rasa and Kapha. Manifestations of Kshaya and Vriddhi of Rasa.

### **3. Rakta Dhatu:**

Etymology, derivation, synonyms, location, properties, functions and Praman of Rakta Dhatu. Panchabhautikatva of Rakta Dhatu, physiology of Raktavaha Srotas, formation of Raktadhatu, Ranjana of Rasa by Ranjaka Pitta, features of Shuddha Rakta, specific functions of Rakta, characteristics of Raktasara Purusha, manifestations of Kshaya and Vriddhi of Raktadhatu, mutual interdependence of Rakta and Pitta.

### **4. Mamsa Dhatu :**

Etymology, derivation, synonyms, location, properties and functions of Mamsa Dhatu, physiology of Mamsavaha Srotas, formation of Mamsa Dhatu, characteristics of Mamsasara Purusha, manifestations of Kshaya and Vriddhi of Mamsa Dhatu .Concept of Peshi.

### **5. Meda Dhatu :**

Etymology, derivation, location, properties, functions and Praman of Meda Dhatu, physiology of Medovaha Srotas, formation of Medo Dhatu, characteristics of Medasara Purusha and manifestations of Kshaya and Vriddhi of Meda.

### **6. Asthi Dhatu:**

Etymology, derivation, synonyms, location, properties, functions of Asthi Dhatu. Number of Asthi. Physiology of Asthivaha Srotas and formation of Asthi Dhatu, characteristics of Asthisara Purusha, mutual interdependence of Vata and Asthi Dhatu, manifestations of Kshaya and Vriddhi of Asthi Dhatu.

### **7. Majja Dhatu :**

Etymology, derivation, types, location, properties, functions and Praman of Majjaa Dhatu, physiology of Majjavaha Srotas, formation of Majja Dhatu, characteristics of Majja Sara Purusha, relation of Kapha, Pitta, Rakta and Majja, manifestations of Kshaya and Vriddhi of Majja Dhatu.

### **8. Shukra Dhatu:**

Etymology, derivation, location, properties, functions and Praman of Shukra Dhatu, physiology of Shukraravaha Srotas and formation of Shukra Dhatu. Features of Shuddha Shukra, characteristics of Shukra-Sara Purusha, manifestations of Kshaya and Vriddhi of Shukra Dhatu.

**9.** Concept of **Ashraya-Ashrayi** bhava i.e. inter-relationship among Dosha, Dhatu Mala and Srotas.

**10. Ojas:** Etymological derivation, definition, formation, location, properties, Praman, classification and functions of Ojas. Description of Vyadhikshamatva. Bala Vriddhikara Bhava. Classification of Bala. Etiological factors and manifestations of Ojavisramsas, Vyapat and Kshaya.

- 11. Upadhatu:** General introduction, etymological derivation and definition of the term Upadhatu. Formation, nourishment, properties, location and functions of each Upadhatu.
- Stanya: Characteristic features and methods of assessing Shuddha and Dushita Stanya, manifestations of Vriddhi and Kshaya of Stanya.
  - Artava: Characteristic features of Shuddha and Dushita Artava. Differences between Raja and Artava, physiology of Artavavaha Srotas.
  - Tvak: classification, thickness of each layer and functions.
- 12. Mala:** Etymological derivation and definition of the term Mala. Aharamala: Enumeration and description of the process of formation of Aharamala.
- Purisha: Etymological derivation, definition, formation, properties, quantity and functions of Purisha. Physiology of Purishavaha Srotas, manifestations of Vriddhi and Kshaya of Purisha.
  - Mutra: Etymological derivation, definition, formation, properties, quantity and functions of Mutra. Physiology of Mutravaha Srotas, physiology of urine formation in Ayurveda, manifestations of Vriddhi and Kshaya of Mutra.
  - Sveda: Etymological derivation, definition, formation and functions of Sveda. Manifestations of Vriddhi and Kshaya of Sveda. Description of Svedvaha Srotas
  - Dhatumala: Brief description of each type of Dhatumala.
- 13. Panchagyanendriya:** Physiological description of Panchagyaanendriya and physiology of perception of Shabda, Sparsha, Rupa, Rasa and Gandha. Physiological description of Karmendriya.
- 14. Manas:** Etymological derivation, definition, synonyms, location, properties, functions and objects of Manas. Physiology of Manovaha Srotas.
- 15. Atma:** Etymological derivation, definition, properties of Atma. Difference between Paramatma and Jivatma; Characteristic features of existence of Atma in living body.
- 16. Nidra:** Nidrotpatti, types of Nidra, physiological and clinical significance of Nidra; Svapnotpatti and types of Svapna.

PART –B

50 marks

#### Modern Physiology

- Haemopoetic system – composition, functions of blood and blood cells, Haemopoiesis (stages and development of RBCs, and WBCs and platelets), composition and functions of bone marrow, structure, types and functions of haemoglobin, mechanism of blood clotting, anticoagulants, physiological basis of blood groups, plasma proteins, introduction to anaemia and jaundice.
- Immunity, classification of immunity: Innate, acquired and artificial. Different mechanisms involved in immunity: Humoral (B-cell mediated) and T-Cell mediated immunity. Hypersensitivity.
- Muscle physiology – comparison of physiology of skeletal muscles, cardiac muscles and smooth muscles. Physiology of muscle contraction.
- Physiology of cardio-vascular system: Functional anatomy of cardiovascular system. Cardiac cycle. Heart sounds. Regulation of cardiac output and venous

return. Physiological basis of ECG. Heart-rate and its regulation. Arterial pulse. Systemic arterial blood pressure and its control.

5. Adipose tissue, lipoproteins like VLDL, LDL and HDL triglycerides.
6. Functions of skin, sweat glands and sebaceous glands.
7. Physiology of male and female reproductive systems. Description of ovulation, spermatogenesis, oogenesis, menstrual cycle.
8. Physiology of Excretion – functional anatomy of urinary tract, functions of kidney. Mechanism of formation of urine, control of micturition. Formation of faeces and mechanism of defecation.
9. Endocrine glands – General introduction to endocrine system, classification and characteristics of hormones, physiology of all endocrine glands, their functions and their effects.

#### **PRACTICAL**

**100 marks**

**Teaching hours-180**

#### **Ayurvedic practical**

1. Assessment of Prakriti
2. Assessment of Dosha (Features of Vriddhi- Kshaya )
3. Assessment of Dhatu (Features of Vriddhi- Kshaya)
4. Assessment of Agni
5. Assessment of Koshtha
6. Assessment of Sara
7. Nadi pariksha

#### **Modern physiology practical**

1. Introduction to laboratory instruments- Simple & Compound Microscope, Scalp vein set, bulbs for blood collection, Sahli's Haemometer, Haemocytometer, pipettes, Urinometer, Albuminometer, Stethoscope, B.P. Apparatus, Harpenden's caliper, Clinical Hammer, Tuning Fork, Stop Watch, Thermometer, Centrifuge machine, ECG Machine
2. Collection of blood sample – prick, vene-puncture method, use of anticoagulants
3. Preparation of blood smear and staining
4. Estimation of Hemoglobin
5. Microscopic examination of blood
  - a. Total RBC count
  - b. Total WBC count
  - c. Differential leucocyte count
6. Packed cell volume (PCV) demonstration
7. ESR demonstration
8. Bleeding time, Clotting time
9. Blood grouping and Rh typing
10. Examination of Cardio-Vascular system
  - a. Pulse examination
  - b. Arterial blood pressure measurement
  - c. Examination of heart sounds
  - d. ECG demonstration
11. Examination of Respiratory system
  - a. Respiratory rate
  - b. Breath sounds
  - c. Spirometry
12. Examination of Nervous System- Sensory & Motor.

13. Urine examination –Physical examination, chemical examination. Test for normal constituents of urine. Detection of specific gravity and reaction of urine.

**Distribution of Practical marks**

1. Laboratory Practical	- 20
2. Human Experiment	- 15
3. Spotting	- 15
4. Prakriti Saradi pariksha	- 20

## 1.4 RACHNA SHARIR (ANATOMY)

Theory- Two Papers-200 Marks-(100 marks each)

Teaching Hours-180 hours

PAPER-I

100 marks

PART-A

50 marks

### 1. Shariropkramaniya Shaarira

Sharira and shaarira vyakhya (definitions of sharira and shaarira), shadangatvam (six regions of the body), anga pratyanga vibhaga (sub divisions). Mrita sharir samshodhan. Shaarira shastra vibhaga, shaarira gyan prayojana . Constitution of purusha according to dhatubheda, panchabhautikatvam, trigunatmakatvam, tridoshamayatvam, karma purusha, and doshadhatumala-mulakatvam.

### 2. Paribhasha Shaarira

Kurcha, kandara, jala, asthisanghat, seemanta, seevani, rajju, snayu and lasika.

### 3. Garbha Shaarira

Garbha definitions, explanation of shukra, artava, garbhadhana. Role of tridosha and panchmahabhuta in the fetal development. Beeja, beejabhaga and beejabhagavayava, linga vinischaya, masanumasika garbha vriddhi-krama, garbhottpadakbhava, garbhavriddhikara bhava, garbha poshana, apara nirmana , nabhinadi nirmana. Aanga pratyanga utpatti.

### 4. Pramana Shaarira: Anguli pramana.

### 5. Asthi Shaarira

Asthi vyakhya, number, types, asthi swaroopa, vasa, meda and majja.

### 6. Sandhi Shaarira

Sandhi vyakhya, numbers, types of asthi sandhi.

### 7. Sira, Dhamani, Srotas Shaarira

- Definition, types and number of sira and dhamani.
- Description of Hridaya.
- Sroto shaarira: Definition, types of srotas and srotomula.

### 8. Peshi Shaarira

- Peshi vyakhya, structure, types, number and importance.
- Description of Peshi.

### 9. Koshta Evam Ashaya Shaarira

- Definition of koshta and number of koshtanga.
- Types and description of ashaya.

### 10. Kalaa Shaarira

Kalaa: definition and types.

### 11. Uttamangiya Shaarira

Shatchakra, ida, pingala and sushumna nadi - brief description.

### 12. Marma Shaarira

Marma: definition, number, location, classification, clinical importance with viddha lakshana. Explanation of trimarmas. Detail description of marmas.

### **13. Indriya Shaarira**

Definition of indriya, indriya artha and indriya adhistan, their number and importance. Description of gyanendria, karmendriya and ubhayendriya (manas).

#### **PART-B**

**50 marks**

**1.** Definition and branches of anatomy. Preservation methods of the cadaver.

#### **2. Anatomical Terminologies**

Anatomical position, Planes, and explanation of anatomical terms related to skin, fasciae, bones, joints and their movements, muscles, ligaments, tendons, blood vessels, nerves,.

#### **3. Embryology**

Definitions and branches of embryology. Embryo and fetus. Sperm and ovum, fertilization. Cleavage. Germ layers formation and their derivatives. Laws of heredity, Sex determination and differentiation, Month-wise development of embryo. Foetal circulation, placenta formation, Umbilical cord formation.

#### **4. Osteology**

Bone: Definition, ossification, structure and types. Description of bones with clinical anatomy.

#### **5. Arthrology**

Joints: Definition, structure types and movements. Description of joints of extremities, vertebral joints and temporomandibular joint with their clinical anatomy.

#### **6. Cardiovascular system**

- a. Definition, types and structure of arteries and veins.
- b. Description of heart and blood vessels with their course and branches.
- c. Pericardium with applied aspect.

#### **7. Lymphatic system**

Definition, types and structure of lymph vessels, lymph glands with their clinical aspect.

#### **8. Myology**

- a) Structure and types of muscles.
- b) Description of muscles; their origin, insertion, actions, nerve supply and clinical anatomy.

#### **Paper II**

**100 marks**

#### **Part A**

**50 marks**

#### **1. Respiratory System**

- a. Bronchial tree and lungs with their clinical aspects.
- b. Respiratory tract: nasal cavity, pharynx, larynx, trachea, bronchial tree.
- c. Pleura with its clinical aspects.
- d. Diaphragm.

#### **2. Digestive system**

- a. Organs of digestive tract (alimentary tract) with their clinical aspects.
- b. Digestive glands: liver, spleen and pancreas.
- c. Description of peritoneum with its clinical aspects.

### 3. Urinary System

Urinary tract: kidney, ureter, urinary bladder and urethra with their clinical aspects.

### 4. Reproductive system

- a. Male Reproductive system: reproductive organs, tract and glands (prostate and seminal vesicles) with their clinical aspects.
- b. Female reproductive system: reproductive organs, tract and glands with their clinical aspects.

### 5. Endocrinology

Definition, classification & description of endocrine glands (pituitary, thyroid, parathyroid, thymus and suprarenal glands) with clinical aspects.

## PART B

50 marks

### 6. Nervous System

Nervous system: definition, classification and its importance. Description of brain and spinal cord.

Description of peripheral nervous system: cranial and spinal nerves, nerve plexuses, and autonomic nervous system, formation and circulation of cerebrospinal fluid and blood supply of brain and spinal cord.

### 7. Sensory organs

Description of structures of eye, ear, nose, tongue and skin with their clinical aspects.

### 8. Surface and radiological anatomy

- a. Study of radio-imaging of limbs, abdomen, pelvis and vertebral column with its clinical application.
- b. Surface anatomy of thoracic and abdominal viscera.

## PRACTICAL

100 marks

Teaching hours: 180

### Content of practical

1. Practical study of bones
2. Practical study of organs
3. Practical study of surface and radiological anatomy.
4. Shava vichhedana – detailed dissection of the whole body.
5. Practical study of location of marma
6. Demonstration of histology slides (10 slides)

### Distribution of marks

1. Spotting -	20 marks
2. Dissected organs and histology slides -	20 Marks
3. Bones, joints, marma -	20 Marks
4. Surface & radiological anatomy -	10 Marks
5. Practical records -	10 Marks
6. Viva-Voce -	20 Marks
<b>Total</b>	<b>100 Marks</b>

### Reference Books :-

<b>S. No.</b>	<b>Name of Book</b>	<b>Author</b>
1.	Brihat Shariram Vaidyaratna-	P.S. Varrier
2.	Abhinava Shariram-	Acharya Damodar Sharma Gaur

COURSE**

**INDEX**

**2<sup>ND</sup> PROFESSIONAL**

1.1	DRAVYAGUNA VIGHYAN	2-9
1.2	ROGA NIDAN	10-14
1.3	RASASHATRA	15-23
1.4	CHARAK SAMHITA	24

**2.1**

## **DRAVYAGUNA VIGYAN**

**(PHARMACOLOGY & MATERIA MEDICA)**

Lectures: 200 Hrs.

**Practicals: 200 Hrs.**

Total Marks -400

**Theory Two Papers– 100 Marks Each**

**Practical/Viva voce – 200 Marks**

Paper I

100 Marks

**Part A**

**50 Marks**

- 1- Dravyaguna Shastra Paribhasa-** Lakshana of Sapta Padartha of Dravyaguna Vijnana viz Dravya- Rasa-Guna- Virya- Vipaka- Prabhava and Karma.
- 2- Dravya:**  
Etymological derivation, definition, panchbhoutikatwa.  
Classification of Dravya according to Samhitas and Nighantus Taxonomical classification.
- 3- Guna:**  
Etymological derivation, definition and Classification of Guna.  
Detailed knowledge of Gurvadi Guna & Paradi gunas.
- 4- Rasa:**  
Etymological derivation, definition, Meaning of "Rasa" in various contexts. Shad Rasas (Madhura, Amla, Lavana, Katu, Tikta, and Kashaya), Panchabhautik constitution of Rasas, Nirvritivisheshakrama (manifestation in general and particular), Ritu and shad rasa Rasanurasayoh bheda (Difference between rasa and anurasa), Lakshana (characteristics),Guna and Karma of shad Rasas, Kopana and Shamana of Dosha and dushya by Shad rasas. Effects of excess usage of Rasa. Rasopalabdhi, Rasaskandha.
- 5- Vipaka:**  
Etymological derivation and definition, difference between Avasthapaka and Vipaka, Types of Vipaka, (Dvididha-Trividha,Panchavidha) Guna and karma of Vipaka.  
Grades of Vipaka (taratamya), Vipakopalabdhi hetu (Factors to determineVipaka).
- 6- Veerya:**  
Etymological derivation, definition and Swarupa of Virya, Number of Virya.  
(Dwividha & Ashtavidha), Panchabhauthikatva  
Virya karmani (Effects of Virya), General principles in determination of virya along with exceptions.

---

**7- Prabhava:**

Definition, Effects of Prabhava.

**8-** Interrelation of Rasa-Guna-Virya-Vipaka-Prabhava with respect to their strength (balabal nirupana). Samanapratyayarabdha and Vichitrapratyayarabdha dravyas.

**9- Karma:**

Lakshana, swarupa and bheda of karma (Definition, nature and types of action).

Explanation of the following Karmas with examples:

- |                 |                |                 |
|-----------------|----------------|-----------------|
| 1. Deepana      | 2. Pachana     | 3. Samshodhana  |
| 4. Samshamana   | 5. Anulomana   | 6. Sransana     |
| 7. Bhedana      | 8. Rechana     | 9. Chhedana     |
| 10. Lekhana     | 11. Grahi      | 12. Sthambhana  |
| 13. Madakari    | 14. Pramathi   | 15. Abhishyandi |
| 16. Vyavayi     | 17. Vikashi    | 18. Rasayana    |
| 19. Vajeekarana | 20. Jeevaneeya | 21. Balya       |
| 22. Brimhana    | 23. Langhana   | 24. Medhya      |

**10.** Brief information on Karmas of dashemani gana of Charak Samhita.

**11- Mishraka Gana:**

11a)- Audbhida Gana (Vegetable origin) Brihatpanchamoola, Laghupanchamoola, Vallipanchamoola, Kantakapanchamoola, Trinapanchamoola, Madhyamapanchamoola, Jeevaneeya panchamoola, Panchapallava, Panchavalakala, Triphala, Trikatu, Trimada, Chaturusana, Panchakola, Shadusana, Chaturbeeja, Jeevaniya gana, Ashtavarga, Trijataka, Chaturajataka, Katuchaturjataka Panchatikta, Amlapanchaka, Chaturbhadra, Trikarshika, Swalpatriphala, Madhuratriphala, Mahavisha, Upavisha, Agrya aushadh varga- Knowledge of Agrayaaushadha Varga with example.

11 b)- Jangama Gana (Animal origin)- Ksheerashtaka, Mutrashtaka, Pitta panchaka.

11 c)- Parthiva Gana (Mineral origin) - Lavana Panchaka, Kshara dvaya, Kshara Ashtaka.

**12- Basis of nomenclature:**

Basis of nomenclature of dravya, Basis and Derivation of synonyms.

**13.** Bheashaja Pariksha vidhi (as described in Charaka samhita vimana sthana 8), Dravya Sangrahana (collection of dravya)- Ecology- Classification of desha (geographical area) and bhumi (soil), swarupa of sangrahaniya dravya of (Nature and quality of drug to be collected). Sangrahana vidhi (Method of collection) -Vegetable and Animal origin drugs according to part used. Period of collection according to virya, samrakshana vidhi (preservation of collected dravyas), bheshajagara (Storehouse), study on different prayojyanga (useful plant parts).

**Part B****50 Marks****(I)****20 Marks**

14 a) Concept of dravya shodhan (purification of dravya).

14 b) Brief knowledge of Apamishran (adulterants)

14 c) Concept of Abhava pratinidhi dravya (substitutes)

**15-** Prashasta bsheshaja (ideal drug), plant extracts. Concept of viruddha Dravya (incompatibility of the dravya).

**16-** Introduction to Nighantu Vigyan - Dhanwantari Nighantu, Bhavaprakashanighantu, Rajanighantu.

**17-** Brief knowledge of cultivation, conservation of medicinal plants and information about endangered species.

**(II)****30 Marks**

**18.** - Introduction, Definition & scope of Pharmacology and Principles of general Pharmacology. Brief Knowledge about pharmacology of the following - Anaesthetics, CNS depressants, Sedatives, Hypnotics, Tranquilisers, Antipyretics, Analgesics, Antiepileptics, Antihypertensive, Antianginal, Antiplatelet, Hypolipidaemic, Haemopoetic, Coagulants, Bronchodilators, Aerosols/ Inhalants, Expectorants, Digestants, Carminatives, Antacids, Antiulcer, Laxatives, Antidiarrhoeals, Antiemetic, Hepatoprotective, Diuretic, Antidiuretic, Lithotriptic, Antiinflammatory, Hormonal therapy, Antiobesity, Antidiabetic, Antithyroid, Oxytocic. Galactagogues, Contraceptives, Styptics, Antihistamines, Antimicrobial, Antibiotics, Antimalarial, Amoebicidal, Antifilarial, Anthelmentic, Antifungal, Vitamins, Minerals, Water imbalance and IV fluids, Vaccines, antivenom, antirabbies serum, Local anti septics, drugs in ophthalmic practice, Anti cancer drugs and immunomodulators.

**Paper II****100 Marks****Part A****70 marks****1-Detailed Knowledge of Following Dravya –**

1- Detailed knowledge of following drugs with respect to Basonym of drug, Main Synonyms, Regional Name, Botanical Name, Family, Classification of Dravya (Gana) as described in Charak and Sushrut, External morphology, Useful parts, Important phytoconstituents, Rasa panchaka, Action on Dosha, Dhatu, Mala, Prayogarha vyadhi (therapeutic indications), Amayikaprayoga and Matra (Therapeutic administration and Dose), Vishishta yoga (names of important formulations), Vishakta Lakshan (adverse effects), Chikitsopachara (remedial measures) and Shodhana (as required)

[Alphabetical order and Botanical names to all the drugs are to be added]

Agaru	Guggulu	Pashanabheda
Agnimantha	Haridradvaya	Patala
Agnimantha	Haritaki	Pippali-Pippalimula
Ahiphena	Hingu	Prishniparni
Amalaki	Jambu	Punarnava
Apamarga	Jatamansi	Pushkarmoola
Aragvadha	Jatiphal	Rasna
Aragvadha	Jeerakadvaya	Rasona
Ardraaka-Sunti	Jyotishmati	Rohitaka
Arjuna	Kalamegha	Saireyaka
Arjuna	Kampillaka	Sarivadvaya
Arkadvaya	Kanchanara	Sarpagandha
Ashvagandha	Kantakari	Shalaparni
Asoka	Kapikacchu	Shallaki
Ativisha	Karkatakshringi	Shalmali
Bakuchi	Karpura	Shankhapushpi
Baladvayam.	Katuki	Shatavari
Bhallataka	Khadira	Shigru
Bharangi	Kiratatikta	Shirisha
Bhrungaraj	Kumari	Shyonaka
Bibhitaka	Kumkum Kesara	Talisa Patra
Bijak/ Vijaysar	Kupilu	Tila
Bilva	Kushta	Trivrut
Brahmi	Kutaja	Tulasi
Bruhati	Lavanga	Tvak
Chandanadvaya,	Lodhra	Ushira
Chitraka	Madanaphala	Vacha
Dadima	Mandukaparni.	Varahi
Devadaru	Manjishtha	Varahi
Dhataki	Maricha	Varuna
Durva	Musta	Vasa
Eladvayam	Nagakeshara	Vatsanabha
Eranda	Nimba	Vidanga
Gambhari	Nirgundi	Vidari
Gokshura	Palasha	Yastimadhu
Guduchi	Parpata	Yavani

### Part B-

**II-** Brief Knowledge of following dravyas with Respect to Sanskrit Name, Botanical Name, Family, Habit (Samanya Swarupa), Parts Used and Indications.

Agastya	Jati	Palandu
Ajamoda	Jayapala	Parasika Yavani
Akarkarabh	Jeevanti	Parijata
Amlavetasa	Kadali,	Parisha
Amra	Kadamba	Parnabija

Amragandhiharidra	Kaidarya	Parnayavani
Ankola	Kakamachi	Parpataka
Aparajita	Kamala	Parushaka
Ashvagol	Kankola	Patalagarudi
Ashvattha	Karanja	Patha
Asthishrunkhala	Karavellaka	Patola
Atasi	Karavira	Patranga
Avartaki	Karira	Pilu
Avartani	Karpasa	Plaksha
Babbula	Kasamarda	Prasarani
Badara	Kasha	Priyala
Bakula	Kasni	Priyangu
Bhumyamalki	Kataka	Puga
Bijapooru	Katphala	Putiha
Bola	Kebuka	Putranjivaka
Chakramarda	Kharjura	Rajika/Sarshapa
Champaka	Kitmari	Rohitaka
Chandrashura	Kokilaksha	Saptachakra
Changeri	Koshataki	Saptaparna
Chavya	Kulatha	Saral
Chirbilva	Kumuda	Sarja
Chopachini	Kusha	Shala
Danti	Kusmanda	Shara
Darbha	Lajjalu	Sharapunkha
Dattura	Langali	Shatahwa
Dhanvayasa	Latakaranja	Shati
Dhanyaka	Latakasturi	Snuhi
Draksha	Madayantika	Sringataka
Dronapushpi	Mahanimba	Svarnakshiri
Gandhaprasarini	Mandukaparni	Tagara .
Garjara	Markandika	Tailaparni
Gojihva,	Masha	Talmuli
Gorakshaganja	Mashaparni	Taruni
Gunja	Matulunga	Tavakshira
hinsapa	Mayaphala	Teja Patra
Hinstra	Meshashrungi	Tuvaraka
Hribera	Methika	Udumbara
Hrutpatri	Mudgaparni	urana
Ikshu	Mulaka	Vamsha
Indravaruni	Murva	Vata
Ingudi	Nagabala	Vatada
Irimeda	Nala	Vrudhadaru
Ishvaku	Narikela	Vrukshamla
Isvari	Nili	
Japa	Padmaka	

**III .-**Introduction, Guna, Karma and Uses of following Jantava Dravya (Drugs of Animal Origin).

1. Kasturi

2. Gorochana

3. Mrigasringa

**IV- Introductory Knowledge of Following Annapana Varga:**

- |                |                     |                      |
|----------------|---------------------|----------------------|
| 1. Jala Varga  | 2. Dugdha Varga     | 3. Madhu Varga       |
| 4. Taila Varga | 5. Sukadhanya Varga | 6. Shamidhanya Varga |
| 7. Phala Varga | 8. Shaka Varga      | 9. Mamsa Varga       |
| 10. Aharayogi  |                     |                      |

**PRACTICALS**

1. A. Study of Macroscopic, Microscopic characters and Demonstration of organoleptic characteristics and grahya-agrahyatva of following plants and their useful parts.
  - i. Kanda (stem) - Guduchi or Ashtishrinkhala
  - ii. Patra (leaves) - Vasa or Kumari
  - iii. Pushpa (flower and Parts of flower)- Dhataki or Japa
  - iv. Phala (fruit) – Maricha or Madanaphala or Vidanga
  - v. Beeja (seeds) – Eranda or Kapikacchhu
  - vi. Twak (bark) – Kutaja or Arjuna or Ashwattha
  - vii. Moola(Root)- Punarnava or Chitraka
  - viii. Niryasa (exudate) – Guggulu or Mocharasa
  - ix. Jangama dravya - Madhu or Ghrita.
2. Records of Herbarium sheets of 50 medicinal plants Compulsory study tour other state/s for field knowledge and procurement of plant species.

**PRACTICAL MARKS DIVISION**

1	Herbarium	20 Marks
2	Practical record	20 Marks
3	Drug identification- spotting –Raw/crude drugs	30 marks
4	Plant identification spotting –fresh	30 marks
5	Practical	40 marks
6.	Viva-Voce	60 Marks
<b>Total</b>		<b>200 marks</b>

**Theory Two Papers – 100 Marks Each**  
**Practical/Viva voce – 100 Marks**

PAPER -1

100 Marks

**Part A****50 Marks****I. Dosha Dushyadi Vigyan**

1. Definition and importance of Roganidana.
2. Samanya Nidana and Samanya Lakshana of Dosha Vriddhi, Kshaya and Prakopa.
3. Dosha Dhatu Ashraya Ashrayi Bhava.
4. Dhatu Kshaya Vriddhi Lakshana.
6. Mala Kshaya Vriddhi Lakshana.
7. Hetu, Bheda and Lakshana of Agni Dushti.
8. Definitions and Samanya Lakshana of Ama.
9. Sama and nirama Dosha, Dushya Lakshana.
10. Dosha Paka and Dhatu Paka Lakshana.
11. Concept, classification, diagnosis and general complications of Avarana.
12. Doshagati and Rogmarga.
13. Detailed study of Srotomoola and Srotodushti Samanya and Vishishta Hetu Lakshana of all Srotas. Differences between Sroto Dushti and Kha Vaigunya.

**II. Vyadhi Vigyan**

1. Definition, synonyms and classification of Vyadhi & Vyadhi Ghatak.
2. Criteria for nomenclature of Diseases in Ayurveda (Vyadhinamakarana).
3. Bija, Bija Bhaga and Bija Bhaga Avayava Dushti.
4. Basic knowledge of Hereditary, Congenital, Acquired, Multifactorial, Traumatic and Environmental disorders.
5. Introduction to ICD Classification of Diseases of WHO and DSM classification.
6. Samanyaja and Nanatmaja Vikara. NidanarthakaraVyadhi, Hetu Sankara, Lingasankara, Vyadhisankara, Vyadhi Awastha.
7. Dhatu, Updhatu, Mala and Indriya Pradoshaj Vikara.
8. Concept of AshtaMahagada .
9. Introduction to Ashta Nindita.
10. Definition and classification of Vyadhikshamatva.
11. Ojas – types of Ojo Dushti- Visrimsa- Vyapad & Kshaya & It's Diseases.

**III. Basic Pathology**

1. Introduction to pathology and its sub-divisions.
2. Introduction to Cell Injury and Cellular adaptations.
3. Definition and brief description of inflammation – Healing/repair.
4. Definition and brief description of edema – shock – hemorrhage, Thrombosis , embolism, Ischemia and Infarction.
5. Types of Immunity – different types of immune responses in the body – Basic knowledge of auto immune diseases, Acquired immune deficiency disease and hypersensitivity.
6. Nomenclature and classification of tumors - difference between benign and malignant tumors.

7. Introduction to Nutritional disorders – disorders of macro and micro nutrients.
  8. Introduction to infections.
-

9. Introduction and classification of microorganisms such as virus- bacteria-fungus.

**Part B**

**50 Marks**

**IV. Nidana Panchaka Vigyana**

1. Difference between Roga and Rogi Pariksha.
2. Importance of Nidan Panchaka.
3. Hetu - Definition, Synonyms and Classification.
4. Purva Rupa – Definition, Synonyms, Samanya and Vishishta Purvarupa.
5. Rupa - Definition, Synonyms, Samanya and Pratyatma Lakshana. Difference between Vyadhi and Lakshana.
6. Upashaya / Anupashaya– Definition, Types and its importance in diagnosis.
7. Samprapti – Definition, Synonyms and Type and Samprapti Ghataka.
8. Shat Kriyakaala. Relationship between Nidana Panchaka and Shat Kriyakaala.
9. Upadrava and Udarka.
10. ArishtaVigyan – Definition, Types and its importance.
11. Sadhyasadhyatwa – Types, their parameters and importance.
12. General diagnostic principles of AnuktaVyadhi (Ch. Vi. 4).

**V. Pariksha Vigyana**

1. Importance and knowledge of Aptopadeshadi & Darshanadi Trividha, Chaturvidha, and Shadvidha Pariksha.
2. Importance and Knowledge of Ashtasthana Pariksha.
3. Importance and Knowledge of Karanadi Dashavidha Parikshya Bhava.
4. Importance and Knowledge of Dashavidha Pariksha.
5. Basic knowledge of ECG, USG, X Ray, CT Scan, MRI.

**Paper II**

**100 Marks**

**Part A**

**50 Marks**

Systematic study of Nidana Panchaka of following diseases (Including Upadrava, Arishta and Sadhyasadhyata).

**I. Diseases of Rasavaha Srotas**

- 1(a) Jwara(Jwarabheda-Ama, Pachyamana and Nirama Jwara,Agantukajwara, Punaravartaka Jwara,Vishama Jwara, Dhatugata Jwara, Charakokta Sannipata Jwara.
- 1(b) General mechanism of Fever, Introduction to the Aetiopathogenesis of Malaria,Typhoid, Dengue fever, Influenza and Chikungunya.
- 2(a) Pandu, Amavata, Hridroga, Shotha.
- 2(b) Introduction to Anaemia & its Classification, Rheumatic fever, Rheumatoid Arthritis, Hypertension, Angina, Ischaemic Heart Disease, Myocardial Infarction and CCF.

**II. Diseases of Raktavaha Srotas**

1. Kamala - Raktapitta - Vatarakta – Kroshtuksheersha - Shitapitta – Maha Kushtha – Visarpa – Shwitra and Introduction to Kshudra Kushtha.
2. Introduction to Hepatomegaly, Spleenomegaly, Leukaemia, Thalessemia, Sickle cell Anaemia.
3. Introduction to Urticaria, Psoriasis, Eczema, Pemphigus.

**III. Diseases of Mamsavaha Srotas**

- (a) Galganda
- (b) Introduction to Thyroid disorders

**IV. Diseases of Medovaha Srotas**

- 
1. Sthoulya - Karshya – Prameha.
  2. Introduction to Obesity and Diabetes Mellitus.

**V. Diseases of Asthi – Majjavaha Srotas**

1. Vatavyadhi - Akshepaka - Apatanaka - Ardita - Pakshaghata – Gridhrasi –Vishwachi, Avabahuka, - Manyasthambha ,Katigraha,Pangutwa
2. Sandhigatavata, Asthi-Majjagata vata.
3. Introduction to Osteo- Arthritis, Osteoporosis.
4. Introduction to Parkinson’s disease, Stroke, Lumbago- Sciatica syndrome, Bell’s Palsy, Cervical- Lumber & Ankylosing Spondylitis.

**VI. Diseases of Shukravaha Srotas**

1. Introduction to Klaibya and Vandhyatva.
2. Introduction to male and female infertility.

**Part B**

**VII. Diseases of Pranavaha Srotas**

- 1(a). Kasa - Shwasa - Hikka – Urahkshata – Shosha – Rajayakshma.

**50 Marks**

1(b). Introduction to the aetiopathogenesis of Pneumonia, Pleural effusion, Bronchitis, Bronchiectasis, Bronchial Asthma.

#### **VIII. Diseases of Annavaha- PureeshavahaSrotas**

1. Agnimandya - Ajirna - Aruchi- Chhardi - Amlapitta- Shoola – Parinama Shoola – AnnadravaShoola- Atisara – Pravahika - Grahani –Gulma- Udara Roga.
2. Introduction to Anaha, Adhmana, Atopa, Visuchika Alasaka, Vilambika.
3. Introduction to Peptic Ulcer, Irritable Bowel Syndrome (IBS) Diarrhoea, Dysentery, Constipation, Inflammatory Bowel Diseases.

#### **IX. Diseases of Udakavaha Srotas**

- 1(a) Introduction to Trishna, Daha.
- 1(b) Introduction to water and electrolyte imbalance disorders.

#### **X. Diseases of Mutravaha Srotas**

- 1(a) Mutrakrichha – Mutraghata.
- 1(b) Introduction to Urinary Tract Infection, Nephropathies.

#### **XI. Diseases of Swedavaha Srotas**

- 1(a) Introduction to Khalitya, Palitya.

#### **XII. Diseases of Manovaha Srotas**

- 1(a) Apasmara, Unmada, Atatwabhinivesha-Vishada, Anidra, Mada, Murchha, Sanyasa.
- 1(b) Introduction to Epilepsy, Depression, Anxiety neurosis.

#### **XIII. Upasargajanya Vyadhi (Communicable diseases)**

- 1(a) Romantika – Masurika – Upadamsha – Phiranga.
- 1(b) Introduction to Measels, Chickenpox, Leprosy, Tuberculosis and AIDS.

#### **XIV. Krimi Vigyana**

- 1) Definition, classification of Krimi and features of Krimiroga
- 2) Snayuka, Shleepada.
- 3) Introduction of Filariasis and classification of common parasites.

### **PRACTICAL**

**(100 Marks)**

#### **i) Fundamental Principles of Laboratory Tests**

---

Introduction to laboratory, Sterilization, glass wares, solutions reagents and safety procedures, Disposal of biomedical wastes.

#### **ii) Haematology**

- 1 Haemoglobin estimation.
- 2 Blood cells counting - WBC, RBC, platelets.
- 3 Hematocrit /Packed cell volume (PCV).
- 4 Erythrocyte indices - MCV, MCH, MCHC.
- 5 Peripheral blood smear, staining technique and differential leucocyte count.
- 6 Peripheral blood film examination in Anemia, Leukemia, Malaria, Filariasis (Demonstration).
- 7 ESR.
- 8 Screening test for bleeding disorders- bleeding time (BT), Clotting time (CT), Demonstration of Prothrombin time (PT).
- 9 Blood grouping - ABO system, Rh typing (Rhesus system).

#### **iii) Urine Examination**

1. Ayurveda anusara mutrapariksha.
2. Physical Examination - Volume, Reaction (Ph) & Specific Gravity.

3. Chemical Examination for - Proteins, Glucose, Phosphate, Ketone, Bile salts, Bile pigment.
4. Dipstick examination
5. Demonstration of Microscopic Examination.

**iv) Stool Examination**

- 1 Ayurveda anusara purishapariksha.
- 2 Physical examination, Sama-Nirama Pariksha.
- 3 Microscopic examination of ova & cyst (Demonstration)
- 4 Occult Blood Test.

**v) Demonstration of Sputum Examination**

- 1 Ayurveda anusara sthivanapariksha.
- 2 Physical, Chemical and Microscopic Examination of the sputum.
- 3 Sample collection and Demonstration of AFB.

**vi) Demonstration of Semen examination**

- 1 Ayurveda anusara Retaspariksha.
- 2 Semen examination.

**vii) Biochemical Examination – (Demonstration)**

Blood Glucose, Serum Bilirubin, Blood Urea, Lipid Profile, Serum Creatinine, Serum Uric acid etc.

**viii)** Demonstration of different staining techniques in microbiology.

**ix)** Demonstration of Sero-immunological Investigations: RA and Widal.

**x) Laboratory record** – maintenance of laboratory record book.

**Bed side Practical (Clinical Methods)**

1. Introduction and demonstration of clinical methods (General and Systemic Examination).
  2. Practical demonstration of examination of Roga based on Pancha Nidana.
  3. Demonstration of instruments used for clinical examination.
  4. Practical records of clinical examination of at least 20 long cases in I.P.D including Aturbala-pramana pareeksha.
  5. Practical records of clinical examination of at least 20 short Cases based on Ashta vidha pariksha in O.P.D.
-

6. Demonstration of ECG, USG and Radio imaging techniques.

### **Distribution of Marks for final Practical Examination**

1. Daily Record -10 Marks
2. Identification of Instruments -10 Marks
3. Laboratory Experiments -20 Marks
4. Short Case -10 Marks
5. Long Case -20 Marks
6. Viva - Voce -30 Marks

**Total 100 Marks**

### **Reference Books**

1. Madhava Nidana (Madhukosha Pt. Yadunandan Upadhyay Commentary) Part 1 – 2
2. Doshakaranatwa Mimamsa - Acharya P.V. Sharma
3. Nadi Darshan - Vd. Tara Shankar Mishra
4. Nadi Vigyana Vidyotini Hindi Tika
5. Nadi Vigyan- Shri Satya Dev Vashisht
6. Nadi Vigyan- Gangadhar Tika
7. Rogi Pariksha vidhi Acharya- Priyavrata Sharma
8. Ayurvediya Roga Vargikaran- Vd. Ramanath Dwivedi & Vd. Gurdip Singh.
9. Ayurvediya Nidan Evum Chikitsa Ke Siddhanta - Prof. Ram Harsh Singh.
10. Relevant portions of Charak Samhita, Sushrut Samhita and Vagbhata.
11. Text Book of Pathology- William Boyds.
12. Text Book of Pathology- Harsh Mohan.
13. Text Book of Pathology- Dey and Dey.
14. Text Book of Parasitology -Ramnik Sood.
15. Clinical Pathology and Bacteriology- S.P. Gupta.
16. Clinical methods in Ayurveda- K. R . S. Murthy.
17. Parameswarappa's Ayurvediya Vikriti Vigyan and Roga Vikriti Vigyan-Dr. P.S. Byadgi.
18. Oxford Handbook of Clinical Examination Oxford Handbooks and Practical Skills.
19. Advanced Clinical Evaluation System for Practical Assessment of Clinical Examination Skills.
20. Symptoms & Signs in Clinical Medicine - Chamberlains.
21. Clinical Methods- Hutchison's.
22. Bedside Clinics in Medicine Part- I & II-Kundu.
23. Common Medical Symptoms- Mehta.
24. Advances in Pathology & Lab Med- Weimstean, Gralem, Anderson, Cortan, Wick, Zumwelt.
25. Clinical Laboratory medicine Edited by Kenneth D Mc. Chately.
26. General Pathology- Walter & Israel Churchill Living stone.
27. A Comprehensive Dictionary of Pathology- Chris Newann.
28. Practical Pathology- Dr. K. Uma Chaturvedi.
29. Clinical examination- Douglas/Macleod's.
30. Pathology Practical book for Undergraduates- Harsh Mohan.
31. Medical Laboratory Technology - R. Sood.
32. Clinical Diagnosis and Management by Todd, Sanford and Davidson Laboratory methods
33. Clinical Hematology In Medical Practice- Degruchy's.
34. Robbins Basic Pathology- Kumar, Abbas, Fausto et al.

### RASASHASTRA

Paper 1

100 Marks

Part A

50 Marks

1. Definition and etymology of Rasa, History of Rasashastra, Importance of Rasaushadhi, Concept of Rasa-Rasayana, Concept of Raseshwar Darshana. Concept of Rasashala and Rasamandap.
2. Brief Description and Application of Technical terminologies (Paribhasha): Avapa, Nirvapa, Dhalana, Bhavana, Jarana, Murchana, Shodhana, Marana, Amrutikarana, Lohitikarana, Mruta Loha, Satwa Patana, Druti, Apunarbhava, Niruttha, Rekhapurna, Varitara.
3. Dravya Varga: Amlavarga, Panchamrittika, Panchagavya, Panchamrita, Ksharashtaka, Dravakagana, Mitra panchaka, Rakta varga, Lavanapanchaka.
4. Brief description of Yantras and their application Ulukhala Yantra, Khalwa Yantra, Kachhapa Yantra, Damaru Yantra - Vidhyadhara Yantra- Urdhwapatan, Addhapatan & Tiryakpatana Yantra, Jaranartha Tulayantra, Dolayantra, Patalayantra, Palika Yantra, Baluka Yantra, Bhudhara Yantra, Sthali Yantra, Swedana Yantra.
5. Brief description & application of Musha (Crucible): Samanya Musha, Gostani musha, Vajra Musha, Maha musha, Yoga musha, Vrintaka Musha, Malla / Pakwa musha. Different types of crucibles e.g. Silica crucible, platinum crucible. Mudra and Sandhi Bandhana.
6. Brief description & applications of Chullika, Satwapatana Koshthi, Patala Kosthi, Gara Koshthi, Angarakoshthi and knowledge of various heating appliances viz. Gas stove, Hot plate, Heating mantle, Induction Stove, Hot Air Oven.
7. Concept, definition and types of Puta: Suryaputa, Chandraputa, Gomayaputa, Lawakaputa, Kukkutaputa, Kapotaputa, Varahaputa, Gajaputa, Mahaputa, Kumbhaputa, Valukaputa, Bhudharaputa, Applications of Electric muffle furnace and fuel (diesel)dependent furnace. Brief introduction to thermocouple and pyrometer.
8. Knowledge of Parada: Synonyms, Occurrence, natural and artificial sources of Parada, Hingulottha parada, Types of Parada, Parada Dosha: Naisargika, Yougika, Aupadhika

(Kanchuka). Grahya-Agrahya Parada, Parada gati, Parada bandha, Shodhana of Parada. Parada sanskara and brief description of Ashtasamskara.

9. Concept of Murchhana and Jarana of Parada, Preparation of Kajjali, Classification of Rasaushadhi: Khalvi rasa e.g. Tribhuvana Keerti Rasa, Parpati Rasa- Rasa Parpati, Kupipakva Rasa- Rasa sindur, Pottali rasa - Hemagarbha pottali. Rasa sevana vidhi and pathya and apathya.
10. Brief introduction of quality control , standardization and GMP of Rasaoushadhies.

## Part B

50 Marks

Occurrence, Synonyms, Minerological identification, Sources, Types, Grahya and Agrahyata, Shodhana, Marana and other processing techniques. Properties, dose, anupan and therapeutic uses, pathya – apathya and ashuddha, apakwa and avidhee sevanjanya dosha and its management, important formulations of the following:

1. **Maharasa** –Abhraka (Biotite Mica), Vaikrantha, Makshika (Chalco-pyrite), Vimala (Iron Pyrite), Shilajatu, Sasyaka (Peacock ore), Chapala and Rasaka (Sphalerite).
2. **Uparasa** – Gandhaka (Sulfur), Gairika (Red Ochre), Kasisa (Green Vitriol), Kankshi (Alum), Haratala (Orpiment), Manahshila (Realgar), Anjana and Kankustha.
3. **Sadharana Rasa** – Kampillaka, Gauri pashana (Arsenic oxide), Navasadara (Ammonium chloride), Kaparda (Cowry), Agnijara, Giri Sindura (Red oxide of Hg), Hingula (Red Cinnabar) and Mriddara shringa (Litharge).
4. **Dhatu** -Swarna (Gold), Rajata (Silver), Tamra (Copper), Loha (Iron), Vanga (Tin), Naga (Lead), Yashada (Zinc), Kamsya (Bronze), Pittala (Brass), Vartaloha. Dhatu -graha sambandha.
5. **Ratna** - Manikya (Ruby), Mukta (Pearl), Pravala (Coral), Tarkshya (Emerald), Pushparaga (Topaz), Vajra (Diamond), Nilam (Sapphire), Gomeda (Zircon or Cinnamone stone), Vaidurya (Cats eye). Ratnapariksha, Ratnadosha, Ratna-graha sambandha.
6. **Uparatna**- Vaikranta (Tourmaline), Suryakanta (Sun stone), Chandrakanta (Moon stone), Rajavarta (Lapis lazuli), Perojaka (Turquise), Sphatikamani (Quartz), Trinakanta, Palanka, Putika, Rudhir.
7. **Sudha varga** – Sudha (Lime stone ), Kaparda (Cowries), Shukti (Oyster Shell) , Shankh (Conch Shell), Mriga shringa (Stag horn), Khatika, Godanti (Gypsum) and Samudraphena (Cattle Fish bone), Kukkutanda twak (Hen's Egg Shell).
8. **Sikata varga** - Sikata (Silica), Dugdhapashana (Talc), Nagapashana / Jaharmohara (Serpentine), Badarshama (silicate of lime), Vyomashma (Sangeyashab - Jade),

Kousheyashma (Asbestos) and Akika (Agate).

**9. Kshara varga** - Sarja kshara (Sodium bicarbonate), Yava kshara, Tankana kshara (Borax), Surya Kshara (Potassium Nitrate).

**10. Miscellaneous** - Mandura, Bola, Dam-ul Akhawayan (Raktabandhini), Kasturi, Bhoonag, Mayurpiccha, Sarjarasa, Madhoochishta.

**11. Visha and Upavisha**-Introduction, collection and storage, classification, synonyms, shodhana, antidote, therapeutic and toxic doses, anupan, therapeutic uses, and formulations of following Visha and Upavisha-Vatsanabha, Kuchala, Jayapala, Dhattura, Bhanga, Bhallataka, Gunja, Arka, Snuhi. Langali, Karaveera, Ahiphena and Chitrakmool.

**12. Aushadhi Yoga Gyanam- ingredients, manufacturing process, and bhesajprayogvidhi.** Arogya Vardhini Gutika, Kasturibhairava Rasa, Kumara Kalyana Rasa, Garbhapala Rasa, Chandraprabha Vati, Chandramrita Rasa, Pratapalankeshwara Rasa, Pravalapanchamrita Rasa, Anandbhairava Rasa, Yogendra Rasa, Laxmivilas Rasa, Vasantakusumakara, Vasantamalati Rasa, Brihat Vata Chintamani Rasa, Shankha vati, Shwaskuthara Rasa, Hinguleswara Rasa, Hemagarbhapottali, Hridyarnava Rasa, Swarnavanga, Makaradhwaja, Putapakwavaisham Jwarantaka Loha, Vatvidhvamsan Rasa, Kamadugha Rasa, Laghusutshekhar Rasa, Navayasa Loha, Saptamrita Loha, Tamra Parpati, Panchamrita Parpati, Sveta Parpati.

**13. Introduction to pharamcovigilance and its status in India, with reference to Ayurvedic drugs.**

- A) Necessary to know - From part A and B : S. No. 1 to 9  
B) Desired to know - From part B : S. No. 10

## Practical

**100 Marks**

Minimum Twenty five practicals to be performed

- |           |                       |  |
|-----------|-----------------------|--|

Shodana of Manashila

---

<b>4.</b>	<b>Sadharana rasa varga</b>	Shodhana of Hingula Shodhana of Navasadar Shodhana of Kapardika
<b>5.</b>	<b>Sudha Varga</b>	Shodhana of Shankha Shodhana of Shukti Shodhana of Pravala mula Shodhana of Godanti
<b>6.</b>	<b>Dhatu varga</b>	Samanya Shodhana of Lauha Shodhana of Mandura Samanya Shodhana of Tamra Shodhana of Naga Shodhana of Vanga Shodhana of Yashada
<b>7.</b>	<b>Kshara Varga</b>	Shodhana of Tankana
<b>8.</b>	<b>Parpati</b>	Preparation of Rasaparpati, Bola Parpati and Swetaparpati
<b>9.</b>	<b>Visha varga</b>	Shodhana of Vatsanabha, Bhallataka, Kupilu, Dhattura beeja, Jayapala, Gunja, Chitrakamoola.

#### **PRACTICAL FOR DEMONSTRATION / GROUP PRACTICALS**

- 1.** Hingulad rasakrishti (Hingulottha Parada).
- 2.** Bhasma: 4 (One from each group)
  - i. Abhraka bhasma, Swarna Makshika bhasma, Tamra bhasma
  - ii. Vanga bhasma, Naga bhasma, Yashada bhasma
  - iii. Mandura bhasma, Kasisa bhasma
  - iv. Shankha bhasma, Kapardika bhasma, Godanti bhasma.
- 3.** Pishti : 1 Pravala pishti, Jaharmohara / Akika pishti,  
Trina kantha mani pishti, Mukta pishti.
- 4.** Druti : 1 Gandhaka druti.
- 5.** Formulations 4 (one from each group)
  - i. Rasasindura, Swarna vanga, Sameer pannaga rasa
  - ii. Saptamruta lauha, Punarnava mandura, Navayasa lauha
  - iii. Agnitundi vati, Tribhuvana kirti rasa, Sootshekhara rasa,  
Laghusutashekhara Rasa
  - iv. Arogyavardhini vati, Laghumalinivasanta rasa, Hinguleshwar rasa,  
Anandbhairav rasa, Rajapravartini vati

## BHAISHAJYAKALPANA

Paper II

100 Marks

**Part A**

**50 Marks**

- 1. History and Chronological (kramika vikasa) development** of Bhaishajyakalpana. Concept of Aushadha and Bhesaja.
- 2. Fundamental principles of Bhaishajya Kalpana.**
- 3. Study of Ancient and Contemporary systems of 'Maana' (Units of measurement), Shushka -ardra -drava- dravya grahan niyam (Rules of measures of dry, fresh, liquid drugs);** Grahyagrahyatva, Nava Puran dravya grahan niyam.
- 4. Guidelines and Methods of collection, storage, preservation of Aushadhi dravya.** Concept of Saviryatavadhi (shelf life) and stability in ancient and contemporary science.
- 5. Bhesajprayogavidhi : Aushadha Matra, Anupana and sahapan and Aushadh sevan kaala. (Posology).**
- 6. Panchavidha kashaya kalpana and Other kalpana :** Kashaya Yoni, Swarasa, Kalka, Kwatha, Hima and Phanta, Pramathya, Aushadha siddha paniya, Tandulodaka, Laksha rasa, Mantha, Panaka, Arka, Churna, Rasakriya, Ghana, Phanita, Avaleha, Prasha, Gudapaka, Sharkara, Syrups, Ksheerapaka, Satva, Guggulu kalpana, Vati, Gutti, Pinda, Modaka, Varti Preparation of Tablets, pills, capsule and Suppositories. Masi kalpana, Lavana kalpana, Kshara kalpana and Kshara sutra.
- 7. Introduction and general knowledge of useful instruments/ Equipments -** Disintegrator, Mixer, Grinder, End Runner, Edge Runner, Sieve-Shaker, Granulator, Tableting machine, Pill making machines, coating and polishing pan, capsule filling machine, sieves and mesh.
- 8. Sneha kalpana :** Sneha yoni, Types of Sneha, Sneha murchana vidhi, Sneha paka vidhi, patra paka, types and their use. Sneha siddhi lakshana, dose, Preparation and uses of Triphala Ghrita, Bramhighrita, Narayana taila, Anutaila.
- 9. Sandhana Kalpana and its types:** Madya Kalpana, Asava, Arishta, Sura (Prasanna - Kadambari - Medaka - Jagala - Bakkasa), Maireya, Surasava, Shukta, Kanjika, Sauviraka, Tushodaka, Sidhu kalpana their methods of preparation, siddhi lakshana, properties, uses, doses. Takrarishta, Draksharishta, Ashokarishta, Dashamoolarishta, Kumaryasava, Chandanasava.

- 10. Kritanna and Aushadhisiddha anna Kalpana:** Definition of Kritanna, Concept of Pathya and Apathya, Yavagu –types of yavagu, Manda, Peya, Vilepi, Anna, Bhakta, Odan, Yush –types, Krishara, Mansa rasa, Vesavara, Khad Kamblika, Raga, Shadava, Dadhi and Takra Varga – Takra, Udasvita, Katvar, Mathita, Chhachika.

## **PART B**

- 1. Bahyopacharartha kalpana (External Applications)-Lepa** -Types of Lepa, methods of preparation and mode of application. Udvartan and Avachurnan, Method of preparation of Siktha Taila, Malahara – Sarjarasa Malahara, Gandhak Malahara, Upanaha, Atasi upanaha, Shatadhouta and Sahastradhouta Ghrita. Brief introduction of semi solid dosage forms- Ointments, Creams, Emulsions, Gels, Lotions.
- 2. Principles and precautions for preparation of formulations for following:**
  - 2.1 Netraupacharartha kalpana (Ophthalmic preparations)** – Seka, Drava, Pindi, Anjana - Ashchyotana - Tarpana - Putapaka and Vidalaka, Methods of preparation of eye drops, eye ointments.
  - 2.2 Nasyopachararth Kalpana** - Classification of Nasya, Navana, Avapidana, Pradhaman, Marsha and Pratimarsha nasya.
  - 2.3 Dhumapanarth kalpana** - Classification of dhumpaana, Method of preparation of dhumvarti and it's therapeutic uses. Dhupan: Vranadhupan, arshodhupan.
  - 2.4 Mukhaprayogarth kalpana** - Gandoosha - Kavala - Pratisaran, Tooth paste, Tooth powders and Mouth wash.
  - 2.5 Basti kalpana**- Classification, Method of preparation of Niruha and Anuvasana, Basti Therapeutic properties and uses of Basti.
- 3** Brief knowledge of Standardization of Ayurvedic formulations- Kastaushadhi.
- 4** Brief introduction of Drug and Cosmetics Act 1940 and Rules 1945.
- 5** Concept of, Aushadhi Nirmanshala, with respect to Good Manufacturing Practices (GMP) in accordance to Schedule T.

## **Practical Bhaishajya Kalpana**

**50 Marks**

**Following practicals to be performed- (Minimum one from each category)**

Method of preparation, therapeutic uses, dose and anupana of the following

- 1.** Swarasa- Ardraka swarasa, Tulasi swarasa, Kumari Swarasa, Vasa putapaka swarasa
- 2.** Kalka- Nimba kalka, Rasona kalka.
- 3.** Kwatha- Punarnavasthaka kwatha, Rasna Saphthaka kwatha, Kulattha kwath.
- 4.** Hima- Dhanyaka hima, Sarivadi hima .
- 5.** Phanta- Panchakola phanta, Yastimadhu Phanta.

6. Pramathya- Mustadi pramathya
7. Mantha- Kharjuradi mantha
8. Aushadh siddha paniya- Shadanga paniya
9. Laksha Rasa.
10. Arka - Yavani arka, Gulab arka, Misreya arka
11. Panaka- Chinchapanaka, Chandan panaka.
12. Sharkara- Banapsha sharkara, Nimbu sarkara.
13. Churna- Sitopaladi Churna, Hinguwashtaka Churna.
14. Gutika- Chitrakadi Gutika, Sanjivani Vati.
15. Guggulu-Triphala Guggulu, Kaishora Guggulu.
16. Avaleha- Chyavanaprashavaleha, Vasavaleha, Vyaghri Haritaki avaleha, Manibadra avaleha.
17. Rasa kriya - Darvi Rasakriya, Guduchi Ghana, Kutaja Ghana.
18. Khanda- Haridra khanda, Narikela khanda, Sowbhagya shunti paka
19. Satva- Amruta satva,
20. Varti- Phala varti, Chandrodaya varthi
21. Lavana- Arka lavana, Narikela lavana
22. Masi- Triphala masi, Mayurpiccha Masi
23. Ksheerapaka- Arjuna ksheerapaka, Rasona ksheerapaka, Shunthi Ksheerapaka
24. Kshara- Apamarga kshara, Snuhi kshara, Ksharasutra. .
25. Manda, Peya, Vilepi, Yavagu, Krishra, Vesavara
26. Yusha - Mudga yusha, Saptamushtika yusha, Kulattha yusha
27. Aristha- Kutajarishta, Takrarishta .
28. Asava - Kumaryasava, Kanakasava
29. Sukta kalpana- Kanji
30. Udaka- Tandulodaka
31. Upanaha- Atasi Upanaha
32. Siktha Taila Nirmaan
33. Malahara- Sarjarasa malahara, Gandaka malahara, Cream, Emulsion. Sneha Kalpana  
Sneha Murchhana - Ghrita Murchana, Taila Moorchhana, Ghrita kalpana: Jatyadi ghrita, Triphala ghrita, ksheerashatphala ghrita- Taila kalpana-Panchaguna taila, Arka taila, Bala taila, Jatyadi taila
35. Taila patana- Bhallataka taila patana, Jayapala taila patana
36. Shodhana- Guggulu, Hingu.

## II. Visit of minimum three GMP approved Ayurvedic manufacturing units.

### **3.2**

## **SWASTHAVRITTA**

**Theory- Two papers - 100 marks each**

**Practical / Viva voce -100 marks**

Lectures –200 Hrs

Practicals and demonstration – 100 Hrs

Paper-I

### **PART A- VAIYAKTIKA SWASTHAVRITTA**

**50 marks**

#### **Introduction**

Definition of swastha & swasthya and swasthavritta. Arogya lakshana, swasthavritta prayojanam, WHO definition of health.

Dimensions of health-Physical, Mental, Social.

Concept of wellbeing- objective, subjective, standard of living, quality of life.

#### **Dinacharya**

1. Definition of Dinacharya
2. Aims and importance of dinachary
3. Brahma Muhurta evam Utthana
4. Usha Jalapana
5. Sharirachinta
6. Malatyaga
7. Mukha prakshalan
8. Dantadhavana and preparation of Ayurvedic tooth powder and paste
9. Jihvanirlekhanavidhi
10. Anjana
11. Pratimarsha Nasya
12. Gandusha and Kavala
13. Tambulasevana
14. Dhoomapana
15. Abhyanga
16. Udvartana
17. Utsadana
18. Vyayama
19. Chankramana
20. Snana
21. Anulepana
22. Vastra dharana
23. Danda dharana
24. Padatra dharana
25. Chatra dharana
26. Ushnisha dharana
27. Ratnabharana dharana
28. Madhyahna charya
29. Cosmetic effect of Dinacharya procedures

#### **Rathricharya**

1. Sandhya charya
2. Rathri bhojana vidhi
3. Shayanavidhi according to Bhavamishra

## **Ritucharya**

1. Importance of ritucharya
2. Ritu presentation as per different acharyas
3. Adana kala & visarga kala
4. Sanchaya-Prakopa-Prashamana of Dosha according to ritu
5. Doshashodhana in Ritu Charya
6. Relation of Agni bala and Ritu
7. Pathya and Apathya Ahara and Vihara in different ritus
8. a) Ritusandhi  
b) Yamadamsthra  
c) Rituharitaki  
d) Rituviparyaya

## **Sadvritta**

Description of Sadvritta and Achara Rasayana their role in Prevention and control of diseases.

## **Trayopastambha**

**i) Ahara-** Nirukti, Swarupa, Pramukhatva, Ahara dravya Vargikaranam, Aharavidhividhana, Dwadashashana pravicharana, Ashtaharvidhivisheshayatanani, Pathyahara, Apathyahara, Samashana, Adhyashana, Vishamashana, Ahara dushparinama & tajjanya vyadhaya, Santarpanajanya evam Apatarpanajanya vyadhi, Viruddhahara and its effects, Shadrasabhojanasya mahatwam.

Dietetic standards, Proximate principles of Food, Nutritional requirements, Sources and deficiency diseases of Protein, Carbohydrate, Fat, Vitamins and Minerals.

Concept of balanced diet in Ayurveda, Nitya sevaneeya dravya, Balanced diet for different sections of people in the society, Social aspects of nutrition.

Aharavarga - Dhanya varga(Cereals and millets), Shaka and Harita varga (Leafy and Non leafy vegetables), Kanda varga (roots and tubers), Phala varga (Fruits), Taila varga(Fats and Oils), Ikshu varga & Madhya varga(Alcoholic Beverages), Dugdha varga (Milk and Milk products), Masala and vyanjana dravyas (Spices & Condiments), Kritanna varga(Prepared Food), Mamsa varga (Meat types).

### Food hygiene

Milk hygiene-Milk composition, Source of infection (for Milk), Milk borne diseases, Clean and Safe milk, Pasteurization of milk.

Meat hygiene-Meat inspection, Slaughter house, Freshness of fish and egg. Fruits and Vegetables hygiene

Sanitation of eating places, Preservation of food, Food handlers, Food borne diseases, Food fortification, and Food adulteration, Food toxicants, Properties of Vegetarian and Non- vegetarian diet, Effects of spices and condiments

Consumption of Alcohol and its effects on personal and social health. Effects of pathya-apathya in life style disorders-Diabetes, Hypertension, Obesity and Coronary heart Disease.

**ii) Nidra-** Nirukti and Utpatti, Types , Nidra – Swasthya sambandha, Properties of Yukta Nidra, Effects of Ratri Jagarana, Diwaswapna, Anidra, Atinidra, Ahara and Vihara causing disturbed sleep , Ahara and Vihara Causing sound sleep.

Duration of sleep according to age, Sleep in healthy and diseased persons.

**iii) Brahmacharya** – Brahmacharya and Abrahmacharya, Importance of Bharmacharya and Abrahmacharya, Vyavaya sambandhi niyama, Effects of Ativyavaya. Methods of Virya Raksha, Surataspriha (Libido) through Vajikarana, Viryanasa phala.

**Roganutpadaniya-** Concept of Vega- Adharaniya Vega and Dharaneeya Vega, Diseases due to vegadharana and their chikitsa, sharir shodhan.

**Rasayana for Swastha-**Nirukti, paribhasha (definition), classification and examples

**Ashta nindita purusha**

**Menstrual hygiene**

**Part B (YOGA AND NISARGOPACHARA)**

**50 marks**

## **YOGA**

### **Introduction**

Yoga shabda utpatti, definitions, Different schools of Yoga – Rajayoga, Hathayoga, Mantrayoga, Layayoga, Jnanayoga, Karmayoga, Bhaktiyoga.  
Yoga prayojana

Ayurveda yoga sambandha, swasthya rakshane yogasya mahatvam  
Yogabhyasa pratibhandhaka & siddhikara bhavas as per Hathayoga.  
Mitahara and Pathyapathyani during Yogabhyasa.

### **Panchakosha Theory**

#### **Astanga yoga**

Yama, Niyama

Asana and its importance

#### Standing Postures

Ardhakatichakrasana, Padahastasana, Ardachakrasana, Trikonasana.

#### Sitting postures

Swasthika, Gomukhasana, Padmasana, Vajrasana, Bhadrasana, Shashankasana, Ushtrasana, Pashchimottanasana, Suptavajrasana, ardhmatsyendrasana, Siddhasana.

#### Supine Postures

Pavanamuktasana, Sarvangasana, Matsyasana, Halasana, Chakrasana, Shavasana, Setubandhasana.

#### Prone postures

Bhujangasana, Shalabhasana, Dhanurasana, Makarasana.

Suryanamaskara – procedure and benefits.

#### **Pranayama**

Benefits of pranayama, time of practice, avara-pravara-madhyama lakshana, yukta-ayukta lakshana

Nadishudhi Pranayama .

Kumbhakabheda – suryabhedana, ujjayi, sheetali, Sitkari, Bhastrika, BhramariMurcha, Plavini.

Nadishudhilakshana

#### **Shatkarma**

Dhauti, Basti, Neti, Trataka, Nauli, Kapalabhati

### **Bandhas and Mudras**

**Shad chakras, Ida-pingala-sushumna nadis.**

**Pratyahara, Dharana, Dhyana, Samadhi**

### **Description of Yoga in Ayurveda**

Moksha and Muktatma lakshana and upaya, Naishthiki chikitsa, Satyabuddhi, Tatvasmriti, Ashta Aishwarya, Ashta siddhis.

### **NISARGOPACHARA (Prakritika chikitsa)**

Definition, history, aims and objectives Theories as per Western school of Naturopathy Indian school – Panchabhutopasana

Relation of Ayurveda and Naturopathy

Importance of Naturopathy in present era.

**Jalachikitsa(hydrotherapy)** – Hot water treatment, Cold water treatment, foot and arm bath, Spinal bath, hip bath, abdominal wet pack, Steam bath, enema and whirl pool bath.

#### **Mrittika chikitsa (Mud therapy)**

Types of soil, doctrine of mud selection, mud bath.

#### **Suryakirana sevana (sun bath - heliotherapy)**

**Mardana (Massage)** – different methods and effects.

**Diet types** – Soothing, Eliminative, Constructive, Positive and negative diet, Acidic and alkaline diet

**Upavasa chikitsa(Fasting therapy)** – Importance, types, therapeutic effects of fasting.

#### **Visrama chikitsa upayoga**

### **PAPER II – SAMAJIKA SWASTHAVRITTA**

Part A

50 marks

### **Janapadodhwamsa**

Causes, Manifestations and control measures, importance of Panchakarma and Rasayana.

### **Vayu (Air)**

Vayu guna according to sushruta samhita, Properties of Vayu as per different directions, Vayu shudhi prakara – Ayurvedic aspect.

Composition of air.

Air of occupied room- Thermal discomfort and comfort zone, indices of thermal comfort.

Air pollution – health and social aspects, Prevention and control of air pollution ,Global warming.

Ventilation and its types.

Mountain air & High altitude – Health problems

### **Jala (Ayurvedic and modern aspects)**

Importance of water , safe and wholesome water, water requirements, properties, types and sources of water, water pollution and health hazards, Methods of water purification.

Hardness of Water.  
Examination, Tests and analysis of water.  
Rain water harvesting and water recycling

**Bhumi and nivasa sthana(Land and housing)**

Types of soil, soil & health, Land pollution, Bhumi shodhana, Nivasa yogya bhoomi, Social goals of housing, Housing standards, Mahanasa (Kitchen) standards, Rural housing, Housing and health, Overcrowding.

**Prakasha(lightning)**

Requirement of good lighting, natural lighting, artificial lighting, biological effects of lighting.

**Dhwani pradooshana(Noise pollution) -Noise, Sources, effects, & control**

**Vikirana(Radiation)-** sources, effects and control

**Apadravya Nirmulana (Disposal of solid waste)**

Different types of solid waste  
Storage and collection of refuse  
Methods of disposal of solid waste (Rural & urban)  
Bio-medical waste management

**Malanishkasana Vyavastha (Excreta Disposal)**

Methods for Unsewered area and Sewered area Latrines  
for camps, fairs and festivals

**Disposal of dead body** – Burial, Burning, Electric cremation.

**Meteorology (Ritu evam Vatavarana jnanam)**

Definition of weather and climate, factors influencing weather and climate.

**Disaster management**

Definition, natural and man-made disasters, epidemiologic surveillance and disease control.

**Occupational Health**

Occupational Hazards, Occupational Diseases, Prevention of Occupational Diseases, Health & precautionary measures, ESI Act, Indian factories Act.

Offensive Trades- Effects on health and precautionary measures .

**School health services**

Health problems of school children, aspects of school health service, duties of school medical officers, Maintenance of healthy environment

**Epidemiology**

Concept of Epidemiology, Dynamics of disease transmission, concept of diseases, concept of causation, Epidemiological triad, natural history of disease, concept of control, concept of prevention, Risks factor, modes of intervention, incidence and prevalence. Susceptible host, host defenses, Immunizing Agents, Disease prevention and control, investigation of epidemic.

Disinfection – definition, types.

Ayurvedic concept of Vyadhikshamatva and sankramaka rogas.

Epidemiology of communicable Diseases

Chicken Pox, Measles, Diphtheria, Pertussis, Mumps, Tuberculosis, SARS, Influenza, Pneumonia, Cholera, Polio, Viral Hepatitis , Typhoid, Leptospirosis, Dengue Fever, Chikungunia, Malaria, Filariasis , Leprosy, Rabies , Tetanus, Emerging and re-emerging diseases

Kuprasangaja vyadhi (STDs)

AIDS, Syphilis, Gonorrhoea, Chancroid

**Non-communicable disease epidemiology**

Diabetes, Obesity, Hypertension, Coronary Heart Diseases, Rheumatic Heart Disease, Cancer

**Chikitsalaya Bhavana (Hospital Building)**

**Part B**

**50marks**

Prathamika swasthya samrakshana(Primary Health Care)Definition, principle, elements,levels of health care.  
Structure at village, sub centre, PHC,CHC, Rural hospital levels.  
Health insurance, Private agencies, Voluntary health agencies, NGOs and AYUSH sector.Role of Ayurveda in Primary Health Care.

**Parivara kalyana Yojana (Family welfare Programmes)**– Demography, demographic cycle, life expectancy.

Family planning, methods of family planning.

**Matru sishu kalyana Yojana – MCH programme**

Ante natal, intra natal, post natal, neo natal care. Child health problems and indicators of MCH care.

**Preventive geriatrics**–Problems of elderly,prevention and control measures.

**World Health Organisation**–Objectives,structure and functions.

**International health agencies**–United Nations agencies,Health work of bilateral agencies.

**Alma Ata declaration  
National Health Policy**

**Health statistics**– Definition, Sources, uses Data collection, Classification, Presentation.  
Vital statistics–Morbidity rates,Mortality rates ,Fertility rates.  
Health survey

**Swasthya prashasana(Health Administration)** – Health administration at Centralincluding AYUSH, state, district, village levels.

**National health programmes**

Tuberculosis(RNTCP), Leprosy(NLEP), AIDS (NACP), Blindness (NPCB), Polio(PPI),Diabetes (NDCP), Cancer (NCCP) , Guinea worm, Vector born disease control programme, NRHM, allthe upcoming national health programmes, RCH programme, Universal ImmunizationProgramme.

**National Nutritional Programmes** - IDD, Vitamin A prophylaxis, Mid day meal, anemia control programmes.

# PRACTICALS

**Demonstration of Dinacharya procedures-** anjana, nasya, kavala, gandoosha dhoomapana, abhyanga, udvartana.

Parichaya of aharadravya, immunization agents, disinfectants and family planning devices

Practical demonstrations of Asanas mentioned in the syllabus  
Pranayama (Suryabhedana, Ujjayi, Shitali, Sitkari, Bhastrika, Bhramari and Nadishuddhi) and Shad karmas (Jala dhauti, Jalaneti, Sutraneti, Trataka, Kapalabhati).

Preparing and delivering of a health educational talk on health related issues.  
A short compilation on any topic on environmental health.

## **Educational Visits**

Observe the functioning of the Milk Dairy, Water purification unit, Sewage treatment unit, MCH/Family welfare centre, Leprosy hospital and industrial unit.  
Visit to Primary Health Centre for knowledge of actual implementation of National health programmes including knowledge of rural health.  
Visit of rural Ayurvedic dispensary.  
Visit to naturopathy centre to observe naturopathic treatment modalities.

**Health survey-** Minimum 5 families of rural and urban areas.

There should be 3 case sheets for Yoga Naturopathy & pathya apathya together and 3 case sheets for communicable diseases.  
Proformas for Case sheets/practical records/survey/Dinacharya projects etc should be prepared by the respective universities.

## **Practical and Viva Voce examination**

### **Marks distribution**

	<b>100 marks</b>
1. Vaiyaktika Swasthavritta	20
2. Samajik swasthavritta	20
3. Demonstration of Yoga	10
4. Naturopathy	10
5. Journal and compilation work	10
6. Viva voce	30

### **Reference Books:**

Relevant portions of Charaka, Sushruta, Vagbhata, Sarngadhara, Bhavaprakasha, Yogaratnakara, Madhavanidana and Bhelasamhita.

Swasthavritta Samucchaya	- Pandit Rajeshwar dutt Shastri
Swasthya Vigyan	- Dr. Bhaskar Govind Ghanekar
Swasthya Vigyan	- Dr. Mukund swarup Varma
Swasthavritta	- Vaidya Sakad
Swasthavritta	- Dr. Ranade and Dr. Firke

Ayurveda Hitopadesh	- Vaidya Ranjit Rai Desai
Yoga and Ayurved	- Acharya Rajkumar Jain
Swasthavritta vigyan	- Dr. Ramharsha Singh
Swasthavrittam	- Dr. Brahmanand Tripathi
Swasthavrittam	- Dr. Shivkumar Gaud
Ayurvediya Swasthavritta	- Vaidya Jalukar Shastri
Patanjala yogasutra	- Patanjali Maharshi
Hathayogapradipika	- Swatmaram Yogendra
Gheranda samhita	- Gherand Muni
Yoga Paddhati	- Bharatiya Prakritik Chikitsa Parishad
Yogik Chikitsa	- Shri. Kedar Nath Gupta

## **PRASUTI TANTRA & STRIROGA**

**Marks 200 (100marks each paper)**

Practical-100 marksHOURS

Theory-200 HrsPractical-100

Hrs

PAPER-1 PRASUTI TANTRA

### **PART-A**

#### **INTRODUCTION TO SUBJECTSTRI**

#### **SHARIRAVIJNAN**

Etymological origin of the word Stri. Artava vaha and Stanyavaha strotamsi. Tryavarta yoni Stri Vishishta,Peshi Marmani.

Anatomy of female reproductive system.(External and internal genital organs) Soft & Bony Pelvis and its obstetrical importance.

DESIRABLE (non detail)

Vayobhedena Stri sangnya

#### **RAJO VIGYANA**

Description of Raja, Artava and Prathama Rajo Darshana, Rajasvala Charya. Ritumati Lakshana, Ritumaticharya, Ritukala

Menarche, Menstrual cycle and their regulation by endocrine glands,

Ovulation –Importance in conception

DESIRABLE (non detail)

Concept of Stri Sukra

#### **GARBHA VIGYANA**

- a) Garbhasya paribhasha, Garbhadhanavidhi, Garbhavakranti, Garbha Sambhava samagri, Garbhakara bhava, Panchabhautikatwa of Garbha, Masanumasika Vridhi of Garbha, Garbha Poshana , Garbhasayasthe Garbhasthiti

Foetal attitude, lie, position, presentation

- b) Apari, GarbhaNabhinadi, Jarayu, Ulba

Formation, Development, Function of Placenta, Umbilical cord, Amniotic fluid

Foetal membranes -Abnormalities of Placenta

DESIRABLE (non detail)

Garbhalingotpatti, Garbhasya Avayavotpatti, Garbha Varnotpatti, Garbha Vikriti

### **GARBHINI VIGYANA**

- a) Lakshana of Sadhyograhita Garbha, Lakshana of Vyakta Garbha, Pumsavana vidhi  
Diagnosis of Pregnancy
- b) Garbhini vyavastha: Garbhini Paricharya, Garbha Upaghatakara Bhava, Dauhrida  
Ante Natal care-Examination, Investigation and Management
- c) Garbha Vyapada: Nidana, Samprapthy and Chikitsa Garbhasrava and Garbhapata-  
Garbha shosha-Upavishtaka, Nagodara, Upashushka, Leena garbha,  
Antarmrita garbha, Raktagulma, Bahugarbhatha
- d) Abortions, Rh-incompatability-  
Causes, clinical features, complications and management.

Gestational trophoblastic neoplasias, Ectopic pregnancy, IUGR, Intrauterine foetal death, Multiple pregnancy

### **GARBHINI VYAPAD**

- a) Hrillasa, Chardi, Aruchi, Atisara, Vibandha, Arsa, Udavarta, Sotha, Parikarthika, Vaivarnya, Kandua, Kikkisa, Pandu, and Kamala, makkala
- b) Common ailments of Pregnancy-High Risk Pregnancy, Emesis gravidarum, Gestational Anemia, Gestational Hypertension, Gestational Diabetes, Toxemias of Pregnancy, Jaundice, AIDS,

Ante Partum Hemorrhage causes, clinical features complications and Management

## **PART B**

### **PRASAVA VIGYANA**

- a) Prasava Paribhasha, Prasava hetu, Prasavkaala, Sutikagaranirmana, Sangrahananiya Dravyani, Sutikagara pravesavidhi.
- b) Prasavavastha; Prajayani/ Upasthita Prasava/ Asannaprasava lakshana, Aavi. Prasavaparicharya, Jatamatraparicharya
- c) Normal Labour:-Definition of Labour, Physiology & Mechanism of Labour, Monitoring of Labour and management, Pictogram, Episiotomy, care and resuscitation of newborn.

## **PRASAVA VYAPAD**

- a) Garbhasanga, Yonisamvarana, Aparasanga, Mudagarbha-defenition, Nidana, Types & Management
- b) Induction and augmentation of labour, Cervical dystocia, Cephalopelvic disproportion, Prolonged labour, Preterm labour, Post term labour, foetal distress, Assisted Labour, Caesarian
- c) Retention of Placenta, PPH - causes, clinical features and management, Genital tract Injuries during labour

DESIRABLE (non detail)

Uterine Inversion, Amniotic Fluid Embolism, Garbhasthithi parivarthan(Version), Forceps Delivery, Ventouse Delivery.

## **SUTIKA VIGYANA**

- a) Sutika Paribhasha, Sutika Kaal, Sutika paricharya. Changes during sootika avastha(Sareerika&Manasika)  
Normal and abnormal Puerperium and its Management
- b) Sutika Roga – Number of Sutika Roga, Sutika Jwara, Shotha and Makkala.
- c) Stanyavijnan- Sthanyadushti, Sthanyakshaya, Sthanyavidhi -their causes, clinical features and treatment
- d) Emergency care in obstetrics

DESIRABLE(non detail)Stana stanya –Pareeksha, Stanya sampat.

## **PART-2 STRI ROGA PART-**

### **A**

## **ARTAVA VYAPAD**

- a) Artava-kshaya vridhi, Ashtartavadushti lakshana chikitsa  
Asrigdara lakshana samprapti Chikitsa
- b) Menstrual disorders-Amenorrhoea, hypomenorrhoea, Oligomenorrhoea, Dysmenorrhoea, Abnormal uterine Bleeding

## **YONI VYAPAD**

Sankhya, Nidana, Lakshana, Upadrava evam Chikitsa

Endometriosis, Fibroid uterus, Genital Prolapses, Retroverted Uterus, Pelvic infections, Cervical erosion, Pelvic Inflammatory Diseases

**VANDHYATWA** – Prakar, Nidana, Chikitsa

Infertility – Causes, Types, Investigations and Management.

Yoni Kanda, Yoni Arsa, Granthi, Arbud,

Pelvic Infections including Sexually Transmitted Infections, HIV, AIDS, Preventive measures.

MENOPAUSE-changes during menopause ,menopause syndrome, management.

DESIRABLE (non detail)

Congenital malformations of female genital tract.

Sukra vijnan –kshaya,vridhi, dushti hetu lakshana and chikitsa

Benign and Malignant tumours of Genital Tract

## **PART-B**

### **STANA ROGA**

- a) Stanakeela- nidana lakshana chikitsa, Stanagranthi, Stanavidradhi, Stanashoph Mastitis, Breast abscess, Galactocele -Etiopathology, clinicalfeatures, diagnosis, prognosis and complications
- b) Sthanik Chikitsa  
Snehana, Swedana, Uttarabasti, Pichu, Varti, Lepana, Dhupana, Dhavana, Dahana, Ksharakarma -. Practical knowledge of all these procedures along with indications, complications and management.

### **Shastra Karma**

Surgical procedures their Indications, Contraindications of cauterization of cervix, cervical dilatation and curettage, female surgical sterilization

Knowledge of indication and procedure of PAP smear. Endometrial biopsy and interpretation of the reports

Stri roga Sambandhita Pramukha Aushadhyai, Prasuti & Stri Roga Chikitsa Upayogi Yantra Shastra Parichaya and Vyadhivinishchaya Upaya (Investigative and Diagnostic Aids)

Garbhanirodhaka Upaya.

Parivar Niyojana, Reproductive and Child Health Care, AIDS/HIV control Programme, MCH, PNDT Act, MTP Act, and importance of current National Programme

Knowledge of important Commonly used Ayurvedic and Allopathic drugs used in Prasutitantra and Streeroga. Pharmacotherapeutics of allopathic drugs in obstetrics and Gynaecology

Record keeping,ethical and medicolegal issues in Streeroga and prasutitantra

DESIRABLE (non detail)

Laproscopy, hysteroscopy, hysterosalpingography, USG, X-RAY, Colposcopy, Cervical Biopsy. Granthi evum Granthi nirharan samanyajnan (Myomectomy, hysterectomy)

## **CLINICAL TRAINING-OBSTETRIC SKILLS**

To perform independently

1. History taking and examination of antenatal and gynaecological cases
2. Diagnosis of Pregnancy, assessing of gestational period, to diagnose onset of labour
3. To monitor labour progress, able to plot Partogram
4. Observation of 10 labours
5. To diagnose abnormalities of labour and decide about the referral of the patient
6. Able to provide first aid for obstetric emergencies
7. Recognition of post partum complications
8. Counselling and promoting of breast feeding
9. Record 5 antenatal cases, 5 intrapartum and 5 post partum cases

To observe/assist-D&C, D&E, Caesarean section, Repair operations, Resuscitation of new born.

## **GYNAECOLOGICAL SKILLS** -To perform independently

1. History taking and examination of gynaecological cases
2. Recording 10 gynaecological cases, 5 gynaecological procedures
3. Taking vaginal smear, high vaginal swab
4. Practical knowledge of sthanika chikitsa
5. Observation and practical knowledge of minor gynaecological procedures
6. Observation of Surgical procedures
7. Identification, uses., Demonstration of surgical instruments
8. Observation of Method of sterilization, MTP, Surgical procedures Hystrectomy, Oopherctomy

## **DISTRIBUTION OF PRACTICAL MARKS**

1. Case taking-2cases –one Gynec,one obstetric- 30marks

2. Instruments ,Drugs, &Models-	20 marks
3. General Viva-	40 marks
4. Record -2-(one Prasuti, one streerog)-	10 marks
<b>Total</b>	<b>100 marks</b>

### **3.4. Kaumarbhritya (Ayurvedic Pediatrics)**

**Theory One Paper – 100 Marks**  
**Practical Viva Voce - 50 Marks**

Paper I 100 Marks

#### **Kaumarbhritya Parichaya Evum Balaka Paricharya (Introduction to Ayurvedic Pediatrics and Child Care)**

Part A 50 Marks

1. General introduction and scope of Kaumarbhritya (Ayurvedic Pediatrics), Definitions and terminologies used in Kaumarbhritya.
2. Scientific contribution of Kashyapa Samhita in Kaumarbhritya.
3. Vayobheda (Classification of age): Garbha, Bala, Kumara; Kshirada, Kshirannada & Annada etc. and modern classification of childhood period.
4. Prana Pratyagamanam (Neonatal Resuscitation): Methodology; complications and their management (Ayurvedic and modern view). Assessment of gestational age.
5. Navajata Shishu Paricharya (Neonatal Care): Care of the Jatmatra (Newly born child) and the Sadyojata, Care of the Samaya-purvajata Shishu (Preterm), Purnakalika Shishu (Full term), and Samaya-Paschatjata Shishu (Post term neonate), Nabhinala Chhedana (Cutting of umbilical cord), Complications of improper cutting of umbilical cord and its treatment, Rakshoghna Karma (Protective measures- Ayurvedic and modern view).
6. Navajata Shishu Parikshana (Examination of newborn): Ayu-Parikshana, Modern approach to Neonatal Examination
7. Navajat Shishu Poshana (infant feeding): Specific feeding schedule as per Ayurvedic texts and modern concept; Stanya-Sampat (Properties of normal breast milk) Stanyotpatti (Physiology of lactation), Stanya Sangathana (Composition of breast milk), Stanya Parikshana (Examination of breast milk), Stanya-Piyusha (Colostrum); Stanya-Pana-Vidhi (Techniques of breast feeding), Stanyakshaya- Stanyanasha (Inadequate production and absence of breast milk), Dhatri (wet nurse)- Stanyabhava dugdh Vyavastha (alternative feeding in the absence of breast milk), Various other milk feeding methods.
8. Stanyadosha (Vitiation of Breast milk), Stanya Shodhana (Purification of breast milk), Stanya Janana and Vardhanopakrama (Methods to enhance breast milk formation).
9. Garbha Vridhi Vikasa Krama: Samanya Parichaya (brief monthwise development of

fetus), Milestones of development during infancy and childhood including concepts of various Samskaras.

10. Poshana (Nutrition): Normal requirements of nutrients and common food sources.
11. Dantotpatti evum Danta Raksha Vidhi (Dentition and dental care): Danta-sampat (Characteristics of healthy teeth), Danta Nisheka evum Dantodbheda (Eruption of teeth), Dantodbhedjanya Vikara (Dentition disorders).
12. Vyadhikshamatva: General concepts of Bala (Immunity) and methods of Bala Vriddhi.
13. Prashan & Lehana: Indications, contra-indications, different drugs used in lehana
14. Knowledge of National Programs related to Child Health Care: Reproductive and Child Health (RCH) Program, Community Child Health Programs, Nutritional Programs, National Immunization Program and other programs incorporated by Govt. of India from time to time

## **Part B**

**50 Marks**

### **Samanya Chikitsa Siddhanta and Balaroga**

#### **(General Principles of Treatment and Management of Pediatric Disorders)**

1. Bala Pariksha-vidhi Evam Shishu Vedana Parigyan (Examination of sick child and Diagnostic methods-Ayurvedic and modern). Samanya Chikitsa Siddhanta (General principles of treatment in children).
2. General Aushadhi Matra Nirdharana - for Ayurvedic and modern drugs preparations (drug doses according to age, weight and drug contents)
3. Specific therapeutic panchakarma procedures in children with special emphases on snehan, swedan and basti.
4. Prasava Kaleena Abhighata (Birth injuries): Shwasavrodha (Asphyxia neonatorum), Ulvaka, Upashirshaka (Caput Succidanum and Cephalohaematoma), Facial Paralysis, Erb's Paralysis, Bhagna (fractures).
5. Brief description of Sahajavyadhi (Congenital disorders): Sahaja Hridaya Vikara (Congenital Cardiac Disorders) Jalashirshaka (Hydrocephalus), Khandaoushtha (cleft lip), Khanda-Talu (cleft palate) Sanniruddha Guda (Anal stricture / imperforated anus), Pada Vikriti (Talipes equinovarus and valgus), Spina bifida, Meningocele, Meningomyelocele.
6. Brief knowledge of genetic disorders): Down syndrome, Turner Syndrome, Muscular dystrophy, Sickle-Cell Anemia, Thalassaemia, Sahaja Madhumeha (Juvenile diabetes).
7. Prasavottara Vyadhi (Neonatal disorders): Navajata Kamala (Neonatal Jaundice), Navajata Netrabhishyanda (Neonatal conjunctivitis), Nabhiroga (Umbilical disorders), Navajatshishu-raktavishmayata (Neonatal Septicemia)
8. Dushta Stanyapanajanya Vyadhi (Disorders due to Vitiated Milk): Lactose intolerance, Kshiralasaka, Kukunaka, Ahiputana (Napkin Rashes)
9. Kuposhanajanya Vyadhi (Nutritional disorders): Karshya, Phakka, Balashosha and Parigarbhika (Protein Energy Malnutrition), Vitamin and Micro-nutrient deficiency

disorders, Hyper-vitaminosis, failure to thrive.

10. Aupasargika Vyadhi (Infectious Diseases): Karnamula Shotha (Mumps), Romantika (Measles), Rubella, Masurika (Chicken Pox), Rohini (Diphtheria), Kukkura-Kasa (Whooping Cough), Dhanurvata (Tetanus), Krimiroga (Worm Infestations), AntrikaJwara (Typhoid), Mastisakavarnashotha (Meningitis), AIDS, Dengue, Malaria, Rajayakshma (Tuberculosis), Jivanujanya Yakrit Shotha (Hepatitis)
1. Srotas Vikara:
  - a) Pranavaha Srotas: Pratishyaya (common cold), Kasa (Cough), Shwasa (Respiratory distress syndrome), Tamaka Shwasa (Bronchial Asthma), Utphuliika, Swasanaka Jwara (Pneumonia/Pneumonitis, Bronchiolitis), Gala shotha (Pharyngitis, Laryngitis), Talukantaka (Tonsillitis)
  - b) Annavaha\_ Srotas: Ajirna (Indigestion), Atisara (Diarrhoea), Chhardi (Vomiting), Vibandha (Constipation), Mukhapaka (Stomatitis), Gudapaka (Proctitis), Parikartika (Anal fissure), Udarshula (Infantile Colic), Pravahika (Dysentery), Gudabhransa (Rectal Prolapse). Ama and its disorders like Ama vata jwara (Rheumatic fever).
  - c) Rasavaha Srotas: Jwara (Fever), Pandu (Anemia), Mridbhakshanajanya Pandu (Anemia associated with clay eating/Pica).
  - d) Raktavaha Srotas: Kamala (Jaundice), Raktapitta (Haemorrhagic disorders), Yakritodara (Hepatomegaly).and Pieehodara (Spleenomegaly)
  - e) Mamsa-Medovaha Srotas: Apachi (Lymphadenitis), Galaganda (Goitre), Gandamala (Cervical Lymphadenopathy).
  - f) Mutravaha Srotas: Shopha in Vrikka (Glomerulonephritis and Nephrotic syndrome)
2. Anya Bala Vikara (Miscellaneous Pediatric Disorders), Apasmara (Epilepsy), Akshepa (Convulsions), Nirudhaprakasha (Phimosis), Cerebral palsy.
3. Behavioral Disorders of Children, their management and counseling: Breath holding spell, Shayyamutra (Bed wetting), Pica, Unmada, Autism, ADHD (Attention Deficit and Hyperactive Disorders), Jadatwa (Mental retardation).
4. Pran raksha vidhi (Life saving measures in children): Principles of management of Shock and Anaphylaxis, Poisoning, Foreign body in respiratory tract, Status epilepticus, Hemorrhage, Acute Renal Failure, Febrile Convulsion, Status Asthmaticus, Fluid and Electrolyte Management.
5. Balagraha: General description, classification, clinical features and management.

## **PRACTICAL**

### **Content of Practical / demonstration**

1. Clinical training of above mentioned disorders of children.
2. Exposure to -
  - a) Navajata Shishu Paricharya (Care of the newborn)
  - b) Pranapratyagamana Vidhi (Resuscitation procedure of new born)
  - c) Vaccination
  - d) Panchakarma Vidhi (Panchakarma procedures) especially Snehana, Swedana, Basti.
3. Knowledge of various equipments such as phototherapy unit, overhead radiant

warmer, resuscitation equipments, Panchakarma equipments and their application

4. Knowledge of IV fluid administration, blood sampling
5. Anthropometry measurements and their interpretation
6. Various Ayurvedic & modern Procedures and investigations in pediatric practice

### **Distribution of Marks**

Clinical work: Pediatric and neonatal case records [1.0 case sheets of each]	10 Marks
Patient Examination	20 Marks
Spotting	05 Marks
Viva – voce	15 Marks
<b>Total</b>	<b>50 Marks</b>

### **Reference Books**

14. Other relevant publications on subjects concerned

## **4.2. PANCHAKARMA**

Theory One Paper – 100 Marks Practical Viva-voce – 50 Marks

Hours of teaching Theory – 100 Clinical training: 3 months

### **I. Snehana**

1. Etymology and Definition of Sneha and Snehana
2. Snehayoni- Sthavara and Jangama: Properties of Sneha dravyas, Snehopag Dravyas
3. General knowledge of Ghrita, Taila, Vasa and Majja with their specific utility and actions ,Yamaka, Trivrit and Maha Sneha
4. Metabolism of fat
5. Achcha and Pravicharana of Sneha
6. Snehapaka and its importance in Panchakarma
7. **Types of Snehana:** i) Bahya and ii) Abhyantara Snehana

#### **i) Bāhya Snehana :**

Methods, indications and contraindications of the following types of Bahyasnehana; Mardana, Unmardana, Pādāghāta, Samvāhana, Karna Purana & Akshi Tarpan, Lepa, Talam,

**Murdhni Taila:** Siro-Abhyanga, Shiro Seka/dhārā, Siro Pichu and Siro-Basti

#### **ii) Ābhyantara Snehana**

Three Types of Ābhyantara Snehana: Shodhanārtha, Shamanārtha and Brimhanārtha Snehana, Indications and contraindications for Snehana

##### Shodhanārtha Snehana

- a. Importance and method of Deepan Pāchan and Rookshana in Shodhanārtha Snehana. Properties of Rookshana Dravya. Samyak Rookshana Lakshana
- b. Consideration of Agni and Koshtha in Snehana
- c. Indication of Different Matra, Various dose schedules for Shodhanārtha Snehana; Hraseeyasi, Hrasva, Madhyama and Uttama Mātrā, Ārohana Mātrā
- d. Methods of Shodhanārtha Snehana,

##### e. Jeerna and Jeeryaman Lakshana

- f. Samyak Yoga, Ayoga and Atiyoga of Snehana, Sneha Vyāpat & their management according to Ayurveda & Modern Medicine
- g. Diet and regimen during Snehana

**Sadyo Sneha:** Method of administration, dose fixation and utility **Shamanārtha Snehana,** Method of administration, dose fixation and utility **Bronhanarth Senhana:** Method of administration, dose fixation and utility **Avapeedak Sneha:** Method of administration, dose fixation and utility

### 8. Snehana Kārmukata (mode of action)

9. Special Procedures:

Takradhara, Udvartanam, Putpāka, Aschotana, Anjana, Gandusha, Kavala, Dhoompāna, Udvartana, Utsādana, Udgharshana, Talapothichil

**II.** Svedana

1. Etymology and Definition of Sveda and Svedana
2. Classifications of Sveda/Svedana
3. General Sweda dravya, Properties of Sweda dravyas, Swedaopag dravyas ,
4. Indications and contraindications of Svedana
5. Ten Types of Niragni Svedana
6. Knowledge of 13 types of Sagni Svedana and Chaturvidh Svedan
7. Detailed Knowledge with their Utility of the following Svedana procedures:  
Sankara/Pinda Sveda-Ruksha and Snigdha Sveda  
Patrapinda Sveda, Jambir Pinda Sveda, Vāluka Sveda, Churna Pinda Sveda, Kukkutand  
Pinda Sveda, Shashtika Shalipinda Sveda, Nadi Sveda, Bashpa Sveda Ksheer dhooma  
, Ksheer Seka, Kwath Seka, Avagaha Sveda, Dhanymla Dhara  
Parisheka Sveda, Pizichil, Upanaha Sveda, Annalepa
8. Local Basti such as Kati Basti, Janu Basti, Greeva Basti and Urobasti
9. General precautions during Sagni Svedana and Methods to protect vital during svedana
10. Samyak Yoga, Ayoga and Atiyoga of Svedana
11. Complications of Svedana and their Management according to Ayurveda & Modern Medicine
12. Diet and management during and after Svedana
13. Parihār Vishaya
14. Svedana Kārmukata (Mode of action)
15. General Knowledge about current Sudation techniques like Sauna bath, Steam bath

**III.** Vamana Karma

1. Etymology, definition and importance of Vamana Karma
2. Utility of Vamana Karma in health and disease
3. Indications and Contraindications for Vamana
4. Knowledge of Koshta and Agni
5. General knowledge of Vamana and Vamanopaga drugs; properties, actions, preparations, preservation with special reference to Madanphala, Kutaj, Nimba, Yashti, Vacha
6. Purva Karma of Vamana: Deepan-Pāchana, Abhyantara Snehana and diet

7. Management of one gap day-Abhyanga & Svedana, diet, special Kapha increasing diet
8. Preparation of the patient on Morning of Vamana day
9. Vamaka Yoga, Anupana, fixation of dose and method of administration
10. Administration of Vamanopaga Dravya such as milk, sugarcane juice, Yashtimadhu decoction
11. Lakshana indicating Doshagati during the process
12. Management during Vamana Karma & observations
13. Symptoms of Samyak Yoga, Ayoga and Atiyoga of Vamana Karma
14. Post Vamana management
15. Types of Shuddhi-Hina, Madhya and Pravara
16. Peyadi Samsarjana Krama and Tarpanadi Kram with their specific indications
17. Complication of Vamana and their management with Ayurveda and modern drugs
18. Pariharya Vishaya
19. Vamana Karmukata (Mode of action).

#### **IV. Virechana Karma**

1. Etymology, definition and importance of Virechana Karma
2. Utility of Virechana Karma in health and disease
3. Indications and Contraindications for Virechana
4. Knowledge of Koshta and Agni
5. Classification of Virechana Drugs, General properties of Virchana dravya
6. General knowledge of single and compound Virechan drugs; properties, actions, preparations, preservation with special reference to Trivrutta, Aragvadha, Eranda, Katuki, Jaipal
7. Purva Karma of Virechana: Deepan- Pachana, Abhyantara Snehana and diet
8. Management of 3 gap days-Abhyanga, Svedana & diet
9. Management on Morning of Virechana day
10. Preparation of Virechana Kalpa, Anupana, dose and method of its administration
11. Method of Virechana Karma and management during Virechana Karma & observations
12. Symptoms of Samyak Yoga, Ayoga and Atiyoga of Virechana Karma
13. Post Virechana management
14. Types of Shuddhi-Hina, Madhya and Pravara and accordingly Samsarjana Krama
15. Complications of Virechana and their management with Ayurveda and modern drugs
16. Pariharya Vishaya
17. Virechana Kārmukatā (Mode of action)

#### **V. Basti Karma**

1. Etymology, definition and importance of Basti as Ardha-Chikitsa
2. Utility of Basti Karma in health and disease
3. Basti Yantra- Putaka & Netra, Detailed study of traditional Basti Yantra and their Doshas  
Knowledge of alternative Basti Yantra-enema can, enema syringe, modified plastic/rubber bag for Putaka, modified plastic netra.
4. Classifications of Basti

5. Karma, Kāla and Yoga Basti schedules along with their utility.
6. **Niruha Basti:** Its etymology, synonyms, definition, classifications, sub-classifications & indications and contraindications.
  - a. Dose fixation of Niruha Basti according to age
  - b. Contents and Method of preparation of Niruha Basti dravya
  - c. Diet
  - d. Administration of Niruha Basti
  - e. Pratyāgamana Kāla, Post Niruha Basti management
  - f. Samyak Yoga, Ayoga and Atiyoga of Niruha.
  - g. Complication of Niruha Basti and its management according to Ayurved and Modern Medicines
  - h. Pariharya Vishaya and kala
7. **Anuvasana Basti:** Its etymology, synonyms, definition, classifications, sub-classifications & indications and contraindications.
  - a. Dose fixation of Anuvasan Basti according to age
  - b. Contents and Method of preparation of Anuvasan Basti dravya
  - c. Diet
  - d. Administration of Anuvasan Basti
  - e. Pratyāgamana Kāla, Post Anuvasan Basti management
  - f. Samyak Yoga, Ayoga and Atiyoga of Anuvasana.
  - g. Complication of Anuvasan and its management according to Ayurved and Modern Medicines
  - h. Pariharya Vishaya and kala
8. Basti Kārmukatā (Mode of action).
9. Knowledge of following types of Basti:  
Madhutailika Basti, Erandmuladi Basti, Yāpana Basti, Pichchha Basti, Kshira Basti, Kshara Basti, Vaitarana Basti, Panchprasutik Basti, Lekhan Basti, Krumighna Basti, Tiktashir Basti, Ardhamātrika Basti
10. **Uttara Basti:** its definition, indications and contraindications, Detailed study of traditional Basti Yantra and their Doshas Knowledge of alternative Basti Yantra
  - a. Preparation of patient,
  - b. Preparation of Trolley for Uttarbasti,
  - c. drug preparation and Fixation of dose,
  - d. method of administration in male and females,
  - e. observations,
  - f. complications and their management

## VI. Nasya

1. Etymology, definition, Significance of Nasya Karma.
2. Classifications and sub-classifications
3. Knowledge of general Dravya used for Nasya Karma, Shirovirechan Gana, Shirovirechanopag dravyas
4. Indications and contraindications of Nasya
5. Time of administration of Nasya
6. Dose fixation of different types of Nasya
7. Diet and regimen before and after Nasya Karma
8. Administration of Marsha, Pratimarsha, Avapeedaka, Dhoomapana and Dhuma Nasya
9. Symptoms of Samyak-yoga of Nasya,

10. Complication of Nasya and their management
11. Parihār Vishaya
12. Nasya Karmukata (mode of action)

**VII. Raktamokshana**

1. Definition, importance and Types of Raktamokshana
2. General Principles and rules of Raktamokshana
3. Classification of Raktamokshan
4. General Indication and Contra indication of Raktamokshan
5. **Jalaukavacharana:** Knowledge of different types of Jalauka (Leech) , Indications and contraindications of Jalaukavacharana, various types of Jalauka. Method of Application, Samyak Lakshan, Complication of Jalaukavacharana and their management with Ayurveda and Modern medicines.
6. **Pracchāna:** Indications and contraindications of Pracchana. Method of Application, Samyak Lakshan, Complication of Pracchana and their management with Ayurveda and Modern medicines
7. **Sirāvedha:** Indications and contraindications of Siravedha. Method of Application, Samyak Lakshan, Complication of Siravedha and their management with Ayurveda and Modern medicines
8. Knowledge of emergency management of complications such as water & electrolyte imbalance, shock, bleeding per rectal, hematemesis, epistaxis

**VIII. Physiotherapy**

1. Definition, Utility and Importance of Physiotherapy.
2. Basic Knowledge of Static exercise, Infrared, Short wave diathermy, Electromagnetic therapy, Wax bath therapy, Ultrasonic therapy.

PRACTICALS / CLINICAL TRAINING –

Total Duration of 3 Months posting

OPD (for 1-Month): observation of OPD patients, selection of the patients, observation of OPD base Panchakarma procedures

IPD (Panchakarma) and Panchakarma Unit – Observation of different procedures of Panchakarma, Assistance to the procedure under guidance of Panchakarma specialist  
Under clinical posting, each student has to study and write 15-long Cases and 10 short cases in prescribed format

Long case Paper- minimum 1 Vaman , 1 Virechan, 1Niruha & Anuvasan Basti, 1Nasya, 1 Raktamokshan

Short case paper –Minimum one each of Pinda sweda, Shirodhara, Abhyanga, Netra Tarpan, Bahya Basti, Nadi Sweda etc.

Distribution of Marks

## **4.3 SHALYA TANTRA**

Theory Two Papers – 100 Marks Each  
Practical - Viva voce – 100 Marks

PAPER –I

100 Marks

Part – A

50 Marks

### **Definition of Shalya, Shalya Tantra and its importance. Introduction to Shalya**

**Tantra:** Historical background and progress made.

- **Target** - Fluency in textual reading and comprehension.
- Preferable targets - Know recent developments and controversies.

### **Description of Yantra, Shastra, Anushastra: Definition, number, types, uses, Dosh, Guna, Karma. Relevant modern instruments.**

- Target - Basic understanding of the concepts of Yantra and Shastra. Acquaintance with commonly used surgical instruments. Knowledge of textual descriptions.
- Preferable targets - Knowledge about currently used surgical instruments, their specifications, procurement sources etc.

### **Nirjantukarana / Sterilization: Methods, types and its role in surgical practice.**

- Target - Basic surgical discipline of maintaining asepsis.
- Preferable targets- Knowledge of recently developed chemicals, instruments for sterilization.

### **Sangyahan / Anaesthesia: Definition and Types.**

- Local anaesthesia** – Drugs, Techniques, Indications, Contraindications, Complications and their Management.
  - Regional and General anaesthesia**- Drugs, Techniques, Indications, Contraindications, Complications and their Management.
- Target-Basic knowledge of the drugs and instruments of anaesthesia. To observe the process of induction, monitoring and recovery.
  - Preferable targets- Assisting and handling anaesthesia.

### **Trividha Karma – Purva Karma, Pradhana Karma and Paschat Karma.**

- Target- Capability to identify conditions which can affect the outcome of surgery in pre, intra and post- operative period.
- Preferable targets- Experience of handling incidents.

### **Ashtavidha Shastra Karma - Surgical procedures.**

- Targets- Appreciation and comprehension of concepts and indications of different procedures.
- Preferable targets –Hands on experience of surgical procedures.

### **Yogya - Experimental Surgery.**

- Target –Appreciation and comprehension of concepts of Yogya. Idea of patient's safety in experimental training.
- Preferable targets- Hands on training on mannequins.

### **Marma: Nirukti, types, description and importance.**

- Target –Clinical application of concepts of marma.
- Preferable targets- Study of relevance of marma in the light of current anatomical and surgical knowledge.

### **Kshara and Kshara Karma:**

- Nirukti, Pradhanyata, Guna, Dosha, Karma, Prakara, Yogya, Ayogya, Procedure, Upadrava and Chikitsa.**
- Kshara nirmana vidhi, knowledge of Kshara Varti, Taila and Pichu.
- Kshara Sutra – Preparation, Indications, Contraindications and Method of application, Complications and their Management.**
  - Target – Capability to identify and practice the use of kshara, kshara sutra in common clinical conditions.
  - Preferable targets – Broader knowledge of current trends and ongoing researches in kshara application.

### **Agnikarma: Mahatva, Upakarana, Vidhi, Akrti bheda, Yogya, Ayogya and Upadrava Chikitsa.**

Contemporary techniques and tools of Agnikarma.

- Target - Capability to appreciate the clinical indications and comprehend Agnikarma procedure.
- Preferable targets - Hands on experience of use of cautery in surgical practice.

### **Raktamokshana: Mahatva, Prakara - Siravyadha, Pracchanna, Shringa, Alabu, Jaloukavacharana – Yogya, Ayogya, Procedure, Upadrava and Chikitsa.**

- Target- Capability to appreciate and comprehend clinical indications of Jaloukavacharana and other Raktamokshana procedures.
- Preferable targets - Uses of bloodletting in current therapy.

### **Bandha Vidhi – Prayojana, Dravya, Indications, Contraindications, Prakara, Upadrava, Pichu, Plota, Kavalika and Vikeshika.**

- Target- Hands on experience of techniques of bandaging.
- Preferable targets - New generation of bandaging and splintage tools.

### **Pranasta Shalya and Nirharana Upaya.**

- Target – Importance of concepts of Sushruta in the management of Shalya and concerns of patient safety. Identification and management of foreign bodies.
- Preferable targets - Current concepts and diagnostic tools of dealing with foreign bodies.

---

**Fluid, Electrolyte, Acid Base Balance and Nutrition:**

- i. Introduction of physiology of fluids and electrolytes.
- ii. Dehydration and over hydration.
- iii. Specific electrolyte loss, Acidosis, Alkalosis, Symptomatology and Management.
- iv. Electrolyte changes in specific diseases like pyloric stenosis, intestinal obstruction and anuria.
- v. Various replacement fluids in surgery, mode of administration and complications.
- vi. Nutrition.
  - Target – Capability to identify and manage fluid and electrolyte imbalance. Ability to administer parenteral fluid.
  - Preferable targets - Advanced techniques of fluid and electrolyte assessment and management.

**Rakta Mahatwa, Raktasrava / Haemorrhage: Prakara and Lakshana.**

- i. Raktastambhana – Haemostasis.
- ii. Blood Transfusion –Blood groups, Compatibility, Indications, Contraindications and Complications with Management.
- iii. Component therapy.
  - Target-Knowledge of achieving haemostasis in haemorrhage.
  - Preferable targets - Detailed knowledge of blood bank techniques.

**Antibiotics, analgesics, anti-inflammatory and emergency drugs in surgical practice.**

- Target – Working knowledge of commonly used drugs.
- Preferable targets - Advanced pharmacological study of the above drugs.

**Diagnostic techniques** – X-ray, Imaging techniques, Ultrasonography, CAT Scan, MRI, Biopsy / Cytological study.

- Target- Knowledge of proper indications for optimum investigational tools and their interpretation.
- Preferable targets - Capability to work independently in the field of diagnostic techniques.

**Part - B**

50 Marks

**Shat Kriyakala in surgical practice.**

- Target- Clinical utility of the concepts.
- Preferable targets - Applied aspects of Kriyakalas in the light of current concepts of pathogenesis.

**Nirukti, Nidana, Samprapti, Prakara, Lakshana, Sadhya-asadhyata, Upadrava and Chikitsa of the following disorders.**

- i. Vranashotha - Inflammation
  - ii. Vidhradi - Abscess
  - iii. Pidika - Boils
  - iv. Nadi Vrana - Sinus / Fistulae
  - v. Vrana Granthi - Keloid / Hypertrophic scar
- 
- vi. Marmagata - Shock
  - vii. Kotha – Gangrene and Principles of Amputation.
  - viii. Granthi - Cyst
  - ix. Arbuda - Tumour
- Target-Clinical application of the concepts.
  - Preferable targets - Hands on experience of management of different conditions.

**Vrana – Nirukti and Prakara**

- i. Nija Vrana – Nidana, Samprapti, Vrana Vasthu, Prakara, Lakshana, Vrana Pariksha – Sthana, Vrana Akrti, Srava, Gandha, Vedana. Vrana Avastha- Dustavrana, Shuddha Vrana, Ruhyamana Vrana, Samyak Roodha Vrana, Vrana Sadhya-asadhyatha and Vrana Upadrava.
- ii. Vrana Chikitsa – Pathya-apathya and Shashti Upakrama, Vranitagara and Rakshakarma.
- iii. Agantuja Vrana :
  - a. Sadyo Vrana - Traumatic wounds – Nidana, Prakara, Lakshana, Upadrava and Chikitsa.
  - b. Management of bites and stings.
- iv. Dagdha Vrana – Burns and scalds.
- v. Ulcer - Types and their management.
- vi. Wound healing stages and their management.
- vii. Pramehapidaka - Diabetic carbuncle and wounds.
  - Target - Clinical application of the concepts.
  - Preferable targets - Hands on experience of management of different conditions.

**Twak Vikara - Nidana, Samprapti, Lakshana and Chikitsa of Chippa – Paronychia, Kadara – Corn and Kshudra rogas.**

- Target - Clinical application of the concepts.
- Preferable targets - Hands on experience of management of different conditions.

**Manya Vikara – Nidana, Samprapti, Lakshana and Chikitsa of Galaganda – Goitre, Gandamala, Apachi –Lymphadenitis, Pashanagardhabha – diseases of parotid gland.**

- Target-Clinical application of the concepts.
- Preferable targets - Hands on experience of management of different conditions.

**Sira Vikara - Venous disorders – Superficial and Deep venous thrombosis, Haemangioma, Varicose veins - Diagnosis and their Management.**

- Target - Clinical application of the concepts.
- Preferable targets - Hands on experience of management of different conditions.

**Dhamani Vikara - Arterial disorders – Nidana, Samprapti, Lakshana and Chikitsa of Aneurysm, Buerger’s disease, Atherosclerosis, Raynaud’s disease.**

- Target - Clinical application of the concepts.
- Preferable targets - Hands on experience of management of different conditions.

**Snayu Vikara - Diseases of tendons and ligaments – Tennis elbow, Ganglion and their Management.**

- Target - Clinical application of the concepts.
- Preferable targets - Hands on experience of management of different conditions.

**Care of AIDS - HIV and hepatitis infected patients.**

- Target - *Knowledge of safety precautions.*

PAPER - II

100 Marks

Part - A

50 Marks

**Bhagna – Skeletal injuries: Prakara including pathological fracture, Samanya Lakshana, Upadrava and Chikitsa.**

Description of fracture of following bones with Clinical features, Diagnosis, Complications and Management – scapula, clavicle, humerus, radius, ulna, femur, patella, tibia and pelvis bones.

Sandimoksha - Dislocation: Dislocation of following joints with Clinical features, Diagnosis, Complications and Management of shoulder, elbow and hip.

- Target - Clinical utility of the concepts.
- Preferable targets - Hands on experience of management of different conditions.

**Diseases of bone:** Aetiopathogenesis, Classification, Clinical features, Diagnosis, Complications and Management of Congenital anomalies, Osteomyelitis, Cysts, Tumours and Tuberculosis.

- Target - Clinical utility of the concepts.
- Preferable targets - Hands on experience of management of different conditions.

**Cranio-cerebral injuries:** Mechanism, Pathology, Classification, Investigations, Complications and primary management.

- Target - Clinical utility of the concepts.
- Preferable targets - Hands on experience of management of different conditions.

**Diseases of Spine:** Mechanism, Pathology, Classification, Investigations, Complications and primary management of Tuberculosis, Ankylosing Spondylitis and Disc prolapse.

- Target - Clinical utility of the concepts.
- Preferable targets - Hands on experience of management of different conditions.

**Diseases of breast:** Aetiopathogenesis, Classification, Clinical features, Diagnosis, Complications and Management of Sthana Vidradhi - Breast abscess and Sthana Arbuda - Breast tumours.

- Target - Clinical utility of the concepts.
- Preferable targets - Hands on experience of management of different conditions.

**Diseases of chest:** Aetiopathogenesis, Classification, Clinical features, Diagnosis, Complications and Management of Chest injury, Pleural effusion, Pleurisy and Tumours.

- Target - Clinical utility of the concepts.
- Preferable targets - Hands on experience of management of different conditions.

**Diseases of esophagus:** Aetiopathogenesis, Classification, Clinical features, Diagnosis, Complications and Management of Congenital anomalies, Oesophagitis, Varices, Ulcer and Tumours.

- Target - Clinical utility of the concepts.
- Preferable targets - Hands on experience of management of different conditions.

**Gulma Roga** - Nidana, Prakara, Lakshana, Upadrava and Chikitsa.

**Shoola vyadhi** - Nidana, Prakara, Lakshana, Upadrava and Chikitsa.

- Target - Clinical utility of the concepts.
- Preferable targets - Hands on experience of management of acute abdomen.

**Udara Roga:** Aetiopathogenesis, Classification, Clinical features, Diagnosis, Complications and Management of Jalodara - Ascites, Chidrodara – Perforation, Peritonitis and Badhagudodara-Intestinal obstruction.

- Target - Clinical utility of the concepts.
- Preferable targets - Hands on experience of management of different conditions.

**Diseases of stomach and duodenum:** Aetiopathogenesis, Classification, Clinical features, Diagnosis, Complications and Management of Pyloric Stenosis, Peptic Ulcer and Tumours.

- Target - Clinical utility of the concepts.
- Preferable targets - Hands on experience of management of different conditions.

**Diseases of small intestine:** Aetiopathogenesis, Classification, Clinical features, Diagnosis, Complications and Management of Tuberculosis, Obstruction and Perforation.

- Target - Clinical utility of the concepts.
- Preferable targets - Hands on experience of management of different conditions.

**Diseases of large intestine** - Aetiopathogenesis, Classification, Clinical features, Diagnosis, Complications and Management of Tuberculosis, Obstruction, Perforation, Tumours, Appendicitis, Crohn's disease and Ulcerative Colitis.

- Target - Clinical utility of the concept.
- Preferable targets - Hands on experience of management of different conditions.

**Diseases of Rectum and Anal Canal** – Aetiopathogenesis, Classification, Clinical features, Diagnosis, Complications and Management of Congenital disorders, Arshas - Haemorrhoids, Parikartika - Fissure-in-ano, Bhagandara - Fistula-in-ano, Guda Vidradi - Anorectal abscesses, Gudabhramsa - Rectal prolapse, Sanniruddaguda - Anal stricture, Incontinence, Rectal Polyp and Tumours.

- Target - Clinical utility of the concepts.
- Preferable targets - Hands on experience of management of different conditions.

**Abdominal injuries and their management.**

- Target - Clinical utility of the concepts.
- Preferable targets - Hands on experience of management of different conditions.

---

**Part – B**

**50 Marks**

**Diseases of Liver:** Aetiopathogenesis, Classification, Clinical features, Diagnosis, Complications and Management of Yakrit Vidhradi - Abscess, Neoplasia, Portal hypertension and Yakritdalyodar –Hepatomegaly.

- Target - Clinical utility of the concepts.
- Preferable targets - Hands on experience of management of different conditions.

**Diseases of Gallbladder:** Aetiopathogenesis, Classification, Clinical features, Diagnosis, Complications and Management of Cholecystitis, Cholelithiasis, Obstructive jaundice and Tumours.

- Target - Clinical utility of the concepts.
- Preferable targets - Hands on experience of management of different conditions.

**Diseases of Pancreas:** Aetiopathogenesis, Classification, Clinical features, Diagnosis, Complications and Management of Pancreatitis, Cysts of Pancreas and Tumours.

- Target - Clinical utility of the concepts.
- Preferable targets - Hands on experience of management of different conditions.

**Diseases of Spleen** – Aetiopathogenesis, Classification, Clinical features, Diagnosis, Complications and Management of Pleehodara – Splenomegaly and Splenic rupture.

- Target - Clinical utility of the concepts.
- Preferable targets - Hands on experience of management of different conditions.

**Diseases of Kidney and Ureters** - Aetiopathogenesis, Classification, Clinical features, Diagnosis, Complications and Management of Congenital anomalies, Polycystic kidney, Injuries, Perinephric abscess, Calculus and Neoplasms.

- Target - Clinical utility of the concepts.
- Preferable targets - Hands on experience of management of different conditions.

**Diseases of Urinary bladder** – Aetiopathogenesis, Classification, Clinical features, Diagnosis, Complications and Management of Congenital anomalies, Injuries, Ashmari - Vesical Calculus, Cystitis and Neoplasms.

- Target - Clinical utility of the concepts.
- Preferable targets - Hands on experience of management of different conditions.

**Mutraghata and Mutrakrichra** - Aetiopathogenesis, Classification, Clinical features, Diagnosis, Complications and Management. Retention of urine.

- Target - Clinical utility of the concepts.
- Preferable targets - Hands on experience of management of different conditions.

**Diseases of Prostate** - Aetiopathogenesis, Classification, Clinical features, Diagnosis, Complications and Management of Prostatitis, Prostatic abscess, Benign Enlargement of Prostate and Carcinoma of Prostate.

- Target - Clinical utility of the concepts.
  - Preferable targets - Hands on experience of management of different conditions.
-

**Diseases of Urethra** – Aetiopathogenesis, Classification, Clinical features, Diagnosis, Complications and Management of Urethritis, Stricture and Rupture.

- Target - Clinical utility of the concepts.
- Preferable targets - Hands on experience of management of different conditions.

**Diseases of Penis:** Aetiopathogenesis, Classification, Clinical features, Diagnosis, Complications and Management of Congenital anomalies, Niruddhaprakasha -Phimosis, Parivartika -Paraphimosis, Avapatika - Prepuceal ulcer, Arbuda- Tumours and Lingarsha - Penile Warts.

- Target - Clinical utility of the concepts.
- Preferable targets - Hands on experience of management of different conditions.

**Diseases of Scrotum and Testis:** Aetiopathogenesis, Classification, Clinical features, Diagnosis, Complications and Management of Epididymo-orchitis, Epididymal cyst, Scrotal filariasis, Shukrashmari - Seminal calculus, Torsion of testis, Ectopic testis, Undescended testis and Tumours.

**Vridhhi Roga:** Aetiopathogenesis, Classification, Clinical features, Diagnosis, Complications and Management of Mutravridhhi – Hydrocele.

- Target - Clinical utility of the concepts.
- Preferable targets - Hands on experience of management of different conditions.

**Antra Vridhhi** – Aetiopathogenesis, Classification, Clinical features, Diagnosis, Complications and Management of Hernia - Inguinal, Femoral, Epigastric, Umbilical, Incisional and rare forms of Hernia.

- Target - Clinical utility of the concepts.
- Preferable targets - Hands on experience of management of different conditions.

### PRACTICALS

#### **Content of Practicals:**

1. Identification, uses, demonstration of surgical instruments and methods of sterilization.
2. Training of case taking, bed side clinicals and case presentation.
3. Demonstration and Practical training in Anaesthesia.
4. Training to develop skills in following Parasurgical and other procedures
  - i. Kshara Karma
  - ii. Agnikarma
  - iii. Kshara Sutra
  - iv. Raktamokshana
  - v. Application of bandages and splints
  - vi. Catheterization
  - vii. Wound management procedures like Parisheka and Patradana
  - viii. Ryle's tube aspiration
  - ix. Injections -Intramuscular / Intravenous / Subcutaneous / Intradermal
  - x. Incision and drainage of abscess
  - xi. Suturing of open wounds
5. Observation of following procedures

- i. Circumcision
  - ii. Hydrocele
  - iii. Hernial repair
  - iv. Vasectomy
  - v. Haemorrhoidectomy
  - vi. Fistulectomy
  - vii. Fissurectomy
  - viii. Appendectomy
  - ix. Cholecystectomy
6. Training of Surgical Emergencies and Management.

**Clinical Training (Indoor and Outdoor)**

- Shalya (Samanya)
- Shalya (Kshara and Anushastra Karma)
- Asthi and Sandhi Chikitsa (Orthopaedics and Trauma)
- Anaesthesia
- Radiology

**09 Months**

- 03 Months (atleast one month in OT)
- 03 Months (atleast one month in OT)
- 02 Months
- 15 days
- 15 days

**Distribution of Marks**

- |                  |             |
|------------------|-------------|
| 1) Daily records | - 10 Marks  |
| 2) Instruments   | - 20 Marks  |
| 3) Short case    | - 10 Marks  |
| 4) Long case     | - 20 Marks  |
| 5) Viva – voce   | - 40 Marks  |
| Total            | - 100 Marks |

Theory Two Papers – 100 Marks Each  
Practical/Viva voce – 100 Marks

**NETRA ROGA VIGYAN**

Paper I

100

Marks

**I. Introduction**

- Shalakyatantra nirukti, Parichayam, Ithihasam
- Netra rachana shariram (Mandala, Patala, Sandhi, Drushti Vichara) and Netra Kriya Sharira alongwith modern anatomy of Eye.
- Eye examination and knowledge of basic instruments/equipments required for examination of Eye.
- Netrarognanam – Samanya Hetu (Nija and agantuja), Purvarupa, Samprapti, Rupa and Chikitsa.
- Classification of Netraroga and its importance.

**II. Netra Samanya and Vishishta Chikitsa - Kriya Kalpa**

- Netra and Chakshu swasthya hitkara Dinacharya, Ritucharya, Aahara evam Vihara.
- Kriya-kalpa-Seka, Aschyotana, Pindi, Vidalaka, Tarpana, Putapaka, Anjana and importance of Panchkarma in Netra Chikitsa.
- Basic fundamentals of Netra Shastra Chikitsa e.g. Purva – Pradhana - Paschat karma, Ama-Pachyaman-Pakva Vrana shotha, Vranitopasana, Pranashashalya, & Vranbandhana. Methods and concepts of sterilization, asepsis and antisepsis as per ancient and modern point of view.
- Basic applied knowledge of Ashtavidha shastrakarma, agni, kshara, raktamokshana in Netra rogas.
- Essential diagnostic and therapeutic modern pharmacological agents required in Netra Chikitsa

**III. Sandhigata Roga(Diseases of junctional areas of eye)**

- Number of sandhigata rogas, detailed etiology, pathology, clinical features and management of Pooyalasa and Srava Rogas.
- Brief Study of krimi granthi, Parvani and Alaji Rogas.
- Study of Acute and Chronic Dacryocystitis, Epiphora, Blepharitis including their aetiology, pathology, signs & symptoms, differential diagnosis and medical & surgical management.

**IV. Vartmagata Roga(Diseases of Lids)**

- Number of vartmagata rogas, and detailed knowledge of etiology, pathology, clinical features and management of Anjananamika, Utsangini, Lagana, Vatahata vartma, Pakshma kopa, Sikta vartma, Pothaki, Klinna vartma, Krichronmeelana and Kukunaka diseases of Vartma.
- Brief Knowledge of Vartmarbuda, Utklishta vartma, Nimesh, Pakshmeshata, Vartmarsha
- Knowledge of Hordeolum, Ptosis, Trachoma, Trichiasis, Entropion, Ectropion including their Etiology, signs and symptoms differential diagnosis and medical & surgical management.

**V. Shuklagata Roga(Diseases of sclera and conjunctiva)**

- Number of Shuklagata rogas, detailed knowledge of etiology, pathology, clinical features

- 
- and management of Arma, Arjuna and Shuktika
- b) Brief Knowledge of Sira pidika, Sira jala, Pishtaka, Balasgrathita.
  - c) Study of Pterygium, Scleritis, Episcleritis, Sub-Conjunctival Hemorrhage including their Etiology, signs and symptoms, differential diagnosis and medical & surgical management.

**VI. Krishnagata Roga (Diseases of cornea and uvea)**

- a) Number of krishnagata rogas, detailed knowledge of Etiology, Pathology, Clinical features, differential diagnosis, complications and Management of Savrana /kshata Shukla (Shukra), Avrana shukra (Shukla)
- b) Brief knowledge of Sira shukla, Akshipakatyaya and Ajakajata.
- c) Knowledge of Corneal ulcer, Corneal Opacity, Uveitis, Acute Iridocyclitis, Staphyloma, their aetiology, pathology, symptoms, differential diagnosis, complications and management.

**VII. Sarvagata Roga (Diseases effecting all parts of eye)**

- a) Number of Sarvagata rogas, detailed knowledge of etiology, pathology, clinical features, complications, differential diagnosis and Management of Abhishyanda, Adhimantha, Hatadhimantha and Shushkakshipaka.
- b) Brief Knowledge of Amloshit, Vata paryaya, Anyato vata, Sashopha & Ashophakshipaka-Pilla roga, Sirotkata and Siraharsha.
- c) Knowledge of Conjunctivitis, Glaucoma, Dry Eye Syndrome including their etiology, pathology, clinical features, differential diagnosis, complications and their management.

**VIII. Drishtigata Roga (vision disorders)**

- a) Number of Drishtigata rogas detailed knowledge of - etiology, pathology, clinical features, differential diagnosis and management of Timira, Kacha and Linga nasha.
- b) Brief Knowledge of Abhighataja lingnasha, sanimittaja & Annimittaja Lingnasha Doshandhya/Kaphavidagdha drishti, Naktandhya, Ushna vidagdha drishti, Pittavidagdha drishti, Dhumadarshi, Hriswajadya, Gambhirika, Nakulandhya, Nayanabhighata.
- c) Knowledge of Refractive errors, Cataract including their etiology, pathology, clinical features, differential diagnosis, complications and their management.
- d) Study of Eale's disease, Hypertensive & Diabetic Retinopathies, Age related Macular degeneration, Strabismus, Retinitis pigmentosa, Night blindness, Amblyopia, Central serous retinopathy, Optic Neuritis and Optic atrophy

**IX. Miscellaneous Diseases**

- a) Xerophthalmia and other malnutritional eye disorders.
- b) Knowledge of ocular trauma and their management.
- c) Introduction to Eye bank, Eye donation, Corneal Transplantation
- d) Preventive Ophthalmology and Community Ophthalmology

## SHIRA - KARNA- NASA- MUKHA ROGAS

**PAPER II**

**100 Marks**

### **I Samanya Chikitsa**

- a) Study of therapeutic procedures like Sveda, Kavala, Gandusa, Dhuma, Murdhni Taila, Nasya, Pratisarana, Karna Purana, karna prakshalana, nasa prakshalana Mukha Lepa.
- b) Ashtavidha shastrakarma and anushastrakarma used in the treatment of Shira, Karna, Nasa evam Mukha Rogas.

### **II Shiro Roga**

- a) Importance and Superiority of Shira.
- b) Number, general etiology, pathology and cardinal features of shiro rogas and kapalgata rogas along with their common line of management/treatment.
- c) Detailed study of Vataja, Pittaja, Kaphaja shirashoola, Suryavarta, Ardhavabhedaka, Khalitya, Palitya.
- d) Brief Knowledge of Raktaja shiraha shoola, Krimija shiraha shoola, Kshayaja shiraha shoola & Sannipataja shiraha shoola, Ananta vata, Indralupta, Darunaka.
- e) Detailed study of Headache, Migraine its differential diagnosis and treatment.

### **III Karna Roga**

- a) Detailed study of Rachana and Kriyasharir of Karna (Ear) & Shravanendriya as per Ayurvedic and modern view, Examination of Ear along with instruments/equipments required in Ear examination.
- b) Detailed study of etiology, pathology, classification, clinical features and management of diseases of Karna – karna shool, karna nada & shweda, Badhirya, karnastrava, karna pratinaha, pootikarna, karnagoothaka, karnavidradhi.
- c) Brief Knowledge of karna kandu, karnapaka, karnarsha, karnarbuda, krimikaran & karnapali rogas, Karna sandhana (Auroplasty), fundamentals, method and Vaikritpaham
- d) Detailed study of Otagia, ASOM, CSOM, Deafness, wax including their etiology, pathology, clinical features, differential diagnosis, complications and medical & surgical management
- e) Brief Knowledge of Otomycosis, Otosclerosis, Tinnitus, Vertigo, Foreign body in ear and Noise pollution.

### **IV Nasa Roga**

- a) Detailed study of Rachana and Kriyasharir of Nasa (Nose and paranasal sinuses) & Ghranendriya as per Ayurvedic and modern view, Examination of Nose. along with instruments/equipments required in Nose examination.
- b) Detailed study of Pratishyaya, Dushta pratishyaya, Nasanaha, Kshavathu, Nasagata raktapitta & Nasarsha.
- c) Brief Knowledge of Putinasa, Bhranshatu, Peenasa, Apeenasa, Nasarbuda, Nasashotha, Dipta, Nasa Sandhana.
- d) Detailed study of Rhinitis & Sinusitis Epistaxis, Nasal Polyp, DNS, Foreign body including their Etiology, pathology, clinical features differential diagnosis and medical & surgical management.
- e) Brief Knowledge of Nasal trauma, Tumours of nose and Para nasal sinuses.

## **V Mukha Roga (Diseases of Oral Cavity)**

- a) Detailed study of Rachana and Kriyasharir of Mukha Rogaadhithana- oshtha, dantamoola, danta, jivha, talu, gal, sarvasara (Oral cavity ) as per Ayurvedic and modern view along with their Basic examination including instruments/equipments required for the examination
- b) Mukha and Danta Swasthya as per ancient and modern concepts including prevention of malignancy of oral cavity.
- c) Number and general aetiology, pathology, cardinal features of Mukha rogas along with their common line of management/treatment.

### **Oshtha Roga (Diseases of Lips)**

- a) Detailed study of Etiology, pathology, classification, clinical features and management of - Oshtha prakopa, khandoshtha
- b) Brief Knowledge of Gandalaji, Jalarbuda, Kshataja Oshthaprakopa
- c) Knowledge of cleft lip.

### **Dant Mula Gata Roga (Diseases of Periodontia)**

- a) Detailed study of Etiology, pathology, classification, clinical features and management of - Shitada, Dantaveshta, Upakush, Danta Nadi, Danta Vidradhi, Adhimansa
- b) Brief Knowledge of dantapupputaka, Saushira, Mahasaushira, Danta Vaidarbha , Paridara, Vardhana.
- c) Detailed study of Etiology, pathology, classification, clinical features and management of Gingivitis, Apical abscess, Periodontitis (Pyorrhoea).

### **Danta Roga (Dental Diseases)**

- a) Detailed study of Etiology, pathology, classification, clinical features and management of Daalan, Krimidanta, Dantaharsha, Danta sharkara, Hanumoksha
- b) Brief Knowledge of karala, Bhanjanak , Kapalika, Shyava Danta, Danta bheda,
- c) Danta chaal, Adhidanta, Danta Utpatana including Jalandhar bandha method and Danta Purna.
- d) Knowledge of Dental Caries, Dental Tartar & Tooth extraction.

### **Jihva Gata Roga (Diseases of Tongue)**

- a) Detailed study of Etiology, pathology, classification, clinical features and management of - jivha kantaka (vataja, pittaja and kaphaja)
- b) Brief Knowledge of Upajihva, Adhijihva, Alasa.
- c) Knowledge of Glossitis, Tongue Tie, Ranula, Benign and Malignant Tumors of tongue.

### **Talu Roga (Diseases of Palate)**

- a) Detailed study of Etiology, pathology, classification, clinical features and management of - Gala shundika, Talushosha, Talupaka
- b) Brief Knowledge of Talupupputa, Adhrusha, Kacchapa, Talvarbuda, Mamsasanghata.
- c) Knowledge of Cleft palate, palatitis, uvulitis and tumours of the palate.

### **Kantha and Gala gata Roga (Diseases of Pharynx & Larynx)**

Detailed study of Etiology, pathology, classification, clinical features and management of - Tundikeri, Kantha shaluka, Gilayu, Galaganda,

- Swrabhedha , Galavidradhi.
- Brief Knowledge of Rohini, Galashotha, Kantharbuda, Kanthavidradhi, Galarbuda Galaugham, Vrindam, Ekavrindam, Valaya, balasa , Shataghni, Swaraghna.
  - Detailed study of Etiology, pathology, classification, clinical features and management of - Pharyngitis, Laryngitis, Tonsillitis & Adenoiditis
  - Brief Knowledge of foreign body in the throat, Carcinoma of Larynx & Pharynx, Dysphagia Diphtheria & diseases of salivary glands.

Sarvasara Mukha Roga (Generalised mucosal affections of the oral cavity)

- Detailed study of Etiology, pathology, classification, clinical features and management of Sarvasar mukhapaka
- Brief Knowledge of urdhvaguda, putivaktrata, mukharbuda
- Detailed Knowledge of Stomatitis.

## VI Miscellaneous Diseases

National Programme for Prevention and Control of Deafness.

## PRACTICAL

### Content of Practical

Identification, Uses, Demonstration of surgical/non-surgical equipment/ instruments, materials used in shalaky chikitsa. Method of sterilization. Training of case taking, bedside clinics and case presentation.

Training in para- surgical procedures-

- Kshara karma
- Agnikarma
- Raktamokshana
- Training of ward procedures. Application of bandages, wound management
- Training of minor procedures (ashtavidha)
- Observation of surgical procedures in Shalaky

<b>Clinical Training</b>	04 Months (OPD, IPD OT and kriya kalpa)
<b>Distribution of marks</b>	
1) Long Case	30 Marks
2) Short Case	20 Marks
3) Identification of instruments	10Marks
quipments,medicines,etc	30 Marks
4) Viva – voce	10 Marks
5) Daily Record (Case record)	
<b>Total</b>	<b>100 Marks</b>

## 4.5

### **Research methodology and Medical statistics**

Total Marks 50 (Part A-30 and Part B- 20)

#### PART – A –Research Methodology

1. Brief historical background of research in Ayurved and contemporary medical science  
Evidences of researches in ayurvedic classics
2. Etymology, definitions and synonyms (Anveshana, Gaveshana, Prayeshana, Anusandhan and Shodha) of the word Research
3. Research in Ayurved - Scope, need, importance, utility
4. Types of Research (familiarization of the terms)
  - a) Pure and Applied
  - b) Qualitative , Quantitative and Mixed  
Observational and interventional.
5. Research process (Importance of each steps in brief)
  - a. Selection of the topic
  - b. Review of the literature
  - c. Formulation of Hypothesis
  - d. Aims and Objectives
  - e. Materials and methods
  - f. Observations and results
  - g. Methods of communication of Research
6. Research tools – Role of the pramanas as research tools
7. The concept and importance of ethics in research
8. Concept of Evidence Based Medicine and Scientific Writing
9. Importance of IT in data mining and important research data portals concerned with Ayurved and contemporary medical science (DHARA , PubMed, Ayush Research Portal, Bioinformatics Center, Research Management Informatic System etc.)

#### Part – B Medical-Statistics

1. Definition, scope and importance of the Medical statistics
2. Common statistical terms and notations
  - a. Population
  - b. Sample
  - c. Data
  - d. Variable
  - e. Normal distribution
3. Collection and Presentation of data
  - a. Tabular
  - b. Graphical
  - c. Diagrammatical
4. Measures of location

- a. Average
  - b. Percentile
- Measures of Central Tendency
- a. Arithmetic mean
  - b. Median

---

c. Mode

- 5. Variability and its measurement
  - a. Range
  - b. Standard deviation
  - c. Standard error
- 6. Introduction to probability and test of significance
- 7. Parametric and non parametric tests
- 8. Introduction to commonly used statistical soft-wares.

## **School of Pharmacy (AVIPS)**

Shobhit University, Gangoh

**(Established by UP Shobhit University Act No. 3,  
2012)**

**School Of Pharmacy**

**Ordinances, Regulations & Syllabus**

**For**

**Master of Pharmacy (M.Pharm) 2 Year Programme  
Semester Pattern  
(w.e.f. session 2019-2020)**

**Approved by PCI and adopted in the  
year 2019 (13<sup>th</sup> Meeting ,Board of  
Studies)**

## CHAPTER -I:REGULATIONS

### **1. Short Title and Commencement**

These regulations shall be called as “The Revised Regulations for the Master of Pharmacy (M. Pharm.)Degree Program - Credit Based Semester System (CBSS) of the Pharmacy Council of India, New Delhi”. They shall come into effect from the Academic Year 2016-17. The regulations framed are subject to modifications from time to time by the authorities of the university.

### **2. Minimum qualification for admission**

A Pass in the following examinations

a) B. Pharm Degree examination of an Indian university established by law in India from an institution approved by Pharmacy Council of India and has scored not less than 55 % of the maximum marks (aggregate of 4 years of B.Pharm.)

b) Every student, selected for admission to post graduate pharmacy program in any PCI approved institution should have obtained registration with the State Pharmacy Council or should obtain the same within one month from the date of his/her admission, failing which the admission of the candidate shall be cancelled.

Note: It is mandatory to submit a migration certificate obtained from the respective university where the candidate had passed his/her qualifying degree (B.Pharm.)

### **3. Duration of the program**

The program of study for M.Pharm. shall extend over a period of four semesters (two academic years). The curricula and syllabi for the program shall be prescribed from time to time by Pharmacy Council of India, New Delhi.

### **4. Medium of instruction and examinations**

Medium of instruction and examination shall be in English.

### **5. Working days in each semester**

Each semester shall consist of not less than 100 working days. The odd semesters shall be conducted from the month of June/July to November/December and the even semesters shall be conducted from the month of December/January to May/June in every calendar year.

## 6. Attendance and progress

A candidate is required to put in at least 80% attendance in individual courses considering theory and practical separately. The candidate shall complete the prescribed course satisfactorily to be eligible to appear for the respective examinations.

## 7. Program/Course credit structure

As per the philosophy of Credit Based Semester System, certain quantum of academic work viz. theory classes, practical classes, seminars, assignments, etc. are measured in terms of credits. On satisfactory completion of the courses, a candidate earns credits. The amount of credit associated with a course is dependent upon the number of hours of instruction per week in that course. Similarly the credit associated with any of the other academic, co/extra- curricular activities is dependent upon the quantum of work expected to be put in for each of these activities per week/per activity.

### Credit assignment

#### Theory and Laboratory courses

Courses are broadly classified as Theory and Practical. Theory courses consist of lecture (L) and Practical (P) courses consist of hours spent in the laboratory. Credits (C) for a course is dependent on the number of hours of instruction per week in that course, and is obtained by using a multiplier of one (1) for lecture and a multiplier of half (1/2) for practical (laboratory) hours. Thus, for example, a theory course having four lectures per week throughout the semester carries a credit of 4. Similarly, a practical having four laboratory hours per week throughout semester carries a credit of 2.

The contact hours of seminars, assignments and research work shall be treated as that of practical courses for the purpose of calculating credits. i.e., the contact hours shall be multiplied by 1/2. Similarly, the contact hours of journal club, research work presentations and discussions with the supervisor shall be considered as theory course and multiplied by 1.

#### Minimum credit requirements

The minimum credit points required for the award of M. Pharm. degree is 95. However based on the credit points earned by the students under the head of co-curricular activities, a student shall earn a maximum of 100 credit points. These credits are divided into Theory courses, Practical, Seminars, Assignments, Research work, Discussions with the supervisor, Journal club and Co-Curricular activities over the duration of four semesters. The credits

are distributed semester-wise as shown in Table 14. Courses generally progress in sequence, building competencies and their positioning indicates certain academic maturity on the part of the learners. Learners are expected to follow the semester-wise schedule of courses given in the syllabus.

## 8. Academic work

A regular record of attendance both in Theory, Practical, Seminar, Assignment, Journal club, Discussion with the supervisor, Research work presentation and Dissertation shall be maintained by the department / teaching staff of respective courses.

## 9. Course of study

The specializations in M.Pharm program is given in Table 1.

**Table – 1: List of M.Pharm. Specializations and their Code**

S. No.	Specialization	Code
1.	Pharmaceutics	MPH
2.	Pharmaceutical Chemistry	MPC
3.	Pharmacology	MPL

The course of study for M.Pharm specializations shall include Semester wise Theory & Practical as given in Table – 2 to 11. The number of hours to be devoted to each theory and practical course in any semester shall not be less than that shown in Table – 2 to 11.

Table – 2: Course of study for M. Pharm. (Pharmaceutics)

Course Code	Course	Credit Hours	Credit Points	Hrs./week	Marks
<b>Semester I</b>

Table – 8: Guidelines for Awarding Credit Points for Co-curricular Activities

Name of the Activity	Maximum Credit Points Eligible / Activity
Participation in National Level Seminar/Conference/Workshop/Symposium/ Training Programs (related to the specialization of the student)	01
Participation in international Level Seminar/Conference/Workshop/Symposium/ Training Programs (related to the specialization of the student)	02
Academic Award/Research Award from State Level/National Agencies	01
Academic Award/Research Award from International Agencies	02
Research / Review Publication in National Journals (Indexed in Scopus / Web of Science)	01
Research / Review Publication in International Journals	02

Note: International Conference: Held Outside India International Journal:

The Editorial Board Outside India

\*The credit points assigned for extracurricular and or co-curricular activities shall be given by the Principals of the colleges and the same shall be submitted to the University. The criteria to acquire this credit point shall be defined by the colleges from time to time.

## 10. Program Committee

1. The M. Pharm. programme shall have a Programme Committee constituted by the Head of the institution in consultation with all the Heads of the departments.
2. The composition of the Programme Committee shall be as follows:  
A teacher at the cadre of Professor shall be the Chairperson; One Teacher from each M.Pharm specialization and four student representatives (two from each academic year), nominated by the Head of the institution.
3. Duties of the Programme Committee:
  - i. Periodically reviewing the progress of the classes.
  - ii. Discussing the problems concerning curriculum, syllabus and the conduct of classes.
  - iii. Discussing with the course teachers on the nature and scope of assessment for the course and the same shall be announced to the students at the beginning of respective semesters.

- iv. Communicating its recommendation to the Head of the institution on academic matters.
- v. The Programme Committee shall meet at least twice in a semester preferably at the end of each sessionalexam and before the end semester exam.

## **11. Examinations/Assessments**

The schemes for internal assessment and end semester examinations are given in Table – 9.

### **End semester examinations**

The End Semester Examinations for each theory and practical course through semesters I to IV shall be conducted by the respective university except for the subject with asterix symbol (\*) in table I and II for which examinations shall be conducted by the subject experts at college level and the marks/grades shall be submitted to the university.

Tables – 9 : Schemes for internal assessments and end semester

## Internal assessment: Continuous mode

The marks allocated for Continuous mode of Internal Assessment shall be awarded as per the scheme given below.

Table – 13: Scheme for awarding internal assessment: Continuous mode

Theory	
Criteria	Maximum Marks
Attendance (Refer Table – 28)	8
Student – Teacher interaction	2
Total	10
Practical	
Attendance (Refer Table – 28)	10
Based on Practical Records, Regular viva voce, etc.	10
Total	20

Table – 14: Guidelines for the allotment of marks for attendance

Percentage of Attendance	Theory	Practical
95 – 100	8	10
90 – 94	6	7.5
85 – 89	4	5
80 – 84	2	2.5
Less than 80	0	0

### 11.2.1. Sessional Exams

Two sessional exams shall be conducted for each theory / practical course as per the schedule fixed by the college(s). The scheme of question paper for theory and practical sessional examinations is given in the table. The average marks of two sessional exams shall be computed for internal assessment as per the requirements given in tables.

## 12. Promotion and award of grades

A student shall be declared PASS and eligible for getting grade in a course of M.Pharm programme if he/she secures at least 50% marks in that particular course including internal assessment.

## 13. Carry forward of marks

In case a student fails to secure the minimum 50% in any Theory or Practical course as specified in 12, then he/she shall reappear for the end semester examination of that course. However his/her marks of the Internal Assessment shall be carried over and he/she shall be entitled for grade obtained by him/her on passing.

#### 14. Improvement of internal assessment

A student shall have the opportunity to improve his/her performance only once in the sessional exam component of the internal assessment. The re-conduct of the sessional exam shall be completed before the commencement of next end semester theory examinations.

#### 15. Reexamination of end semester examinations

Reexamination of end semester examination shall be conducted as per the schedule given in table 15. The exact dates of examinations shall be notified from time to time.

Table – 15: Tentative schedule of end semester examinations

Semester	For Regular Candidates	For Failed Candidates
I and III	November / December	May / June
II and IV	May / June	November / December

#### 16. Allowed to keep terms (ATKT):

No student shall be admitted to any examination unless he/she fulfills the norms given in 6. ATKT rules are applicable as follows:

A student shall be eligible to carry forward all the courses of I and II semesters till the III semester examinations. However, he/she shall not be eligible to attend the courses of IV semester until all the courses of I, II and III semesters are successfully completed.

A student shall be eligible to get his/her CGPA upon successful completion of the courses of I to IV semesters within the stipulated time period as per the norms.

Note: Grade AB should be considered as failed and treated as one head for deciding ATKT. Such rules are also applicable for those students who fail to register for examination(s) of any course in any semester.

#### 17. Grading of performances

##### Letter grades and grade points allocations:

Based on the performances, each student shall be awarded a final letter grade at the end of the semester for each course. The letter grades and their corresponding grade points are given in Table – 16.

Table – 16: Letter grades and grade points equivalent to Percentage of marks and performances

Percentage of Marks Obtained	Letter Grade	Grade Point	Performance
90.00 – 100	O	10	Outstanding
80.00 – 89.99	A	9	Excellent
70.00 – 79.99	B	8	Good
60.00 – 69.99	C	7	Fair
50.00 – 59.99	D	6	Average
Less than 50	F	0	Fail
Absent	AB	0	Fail

A learner who remains absent for any end semester examination shall be assigned a letter grade of AB and a corresponding grade point of zero. He/she should reappear for the said evaluation/examination in due course.

### 18. The Semester grade point average (SGPA)

The performance of a student in a semester is indicated by a number called ‘Semester Grade Point Average’ (SGPA). The SGPA is the weighted average of the grade points obtained in all the courses by the student during the semester. For example, if a student takes five courses (Theory/Practical) in a semester with credits C<sub>1</sub>, C<sub>2</sub>, C<sub>3</sub> and C<sub>4</sub> and the student’s grade points in these courses

are G<sub>1</sub>, G<sub>2</sub>, G<sub>3</sub> and G<sub>4</sub>, respectively, and then students’ SGPA is equal to:

$$\text{SGPA} = \frac{C_1G_1 + C_2G_2 + C_3G_3 + C_4G_4}{C_1 + C_2 + C_3 + C_4}$$

The SGPA is calculated to two decimal points. It should be noted that, the SGPA for any semester shall take into consideration the F and ABS grade awarded in that semester. For example if a learner has a F or ABS grade in course 4, the SGPA shall then be computed as:

$$\text{SGPA} = \frac{C_1G_1 + C_2G_2 + C_3G_3 + C_4 * \text{ZERO}}{C_1 + C_2 + C_3 + C_4}$$

### 19. Cumulative Grade Point Average (CGPA)

The CGPA is calculated with the SGPA of all the IV semesters to two decimal points and is indicated in final grade report card/final transcript showing the grades of all IV semesters and their courses. The CGPA shall reflect the failed status in case of F grade(s), till the course(s) is/are passed. When the course(s) is/are passed by obtaining a pass grade on subsequent examination(s) the CGPA

shall only reflect the new grade and not the fail grades earned earlier. The CGPA is calculated as:

$$\text{CGPA} = \frac{C_1S_1 + C_2S_2 + C_3S_3 + C_4S_4}{C_1 + C_2 + C_3 + C_4}$$

where  $C_1, C_2, C_3, \dots$  is the total number of credits for semester I, II, III,  $\dots$  and  $S_1, S_2, S_3, \dots$  is the SGPA of semester I, II, III,  $\dots$ .

## 20. Declaration of class

The class shall be awarded on the basis of CGPA as follows: First Class with

Distinction = CGPA of 7.50 and above	= CGPA of 6.00 to 7.49
First Class	= CGPA of 5.00 to 5.99
Second Class	

## 21. Project work

All the students shall undertake a project under the supervision of a teacher in Semester III to IV and submit a report. 4 copies of the project report shall be submitted (typed & bound copy not less than 75 pages).

The internal and external examiner appointed by the University shall evaluate the project at the time of the Practical examinations of other semester(s). The projects shall be evaluated as per the criteria given below.

### Evaluation of Dissertation Book:

Objective(s) of the work done	50 Marks
Methodology adopted	150 Marks
Results and Discussions	250 Marks
Conclusions and Outcomes	50 Marks

<b>Total</b>	<b>500 Marks</b>
--------------	------------------

### Evaluation of Presentation:

Presentation of work	100 Marks
Communication skills	50 Marks
Question and answer skills	100 Marks

<b>Total</b>	<b>250 Marks</b>
--------------	------------------

## **22. Award of Ranks**

Ranks and Medals shall be awarded on the basis of final CGPA. However, candidates who fail in one or more courses during the M.Pharm program shall not be eligible for award of ranks. Moreover, the candidates should have completed the M. Pharm program in minimum prescribed number of years, (two years) for the award of Ranks.

## **23. Award of degree**

Candidates who fulfill the requirements mentioned above shall be eligible for award of degree during the ensuing convocation.

## **24. Duration for completion of the program of study**

The duration for the completion of the program shall be fixed as double the actual duration of the program and the students have to pass within the said period, otherwise they have to get fresh Registration.

## **25. Revaluation I Retotaling of answer papers**

There is no provision for revaluation of the answer papers in any examination. However, the candidates can apply for retotaling by paying prescribed fee.

## **26. Re-admission after break of study**

Candidate who seeks re-admission to the program after break of study has to get the approval from the university by paying a condonation fee

**Course Programme-  
Pharmaceutics**

### **Program Educational Objectives (PEOs)**

Program Educational Objectives (PEOs) for a Master of Pharmacy (M.Pharm) with a focus on Pharmaceutics program typically outline the broad goals that graduates are expected to achieve in their professional careers and further education.

**PEO1 Comprehensive Understanding of Pharmaceutics:** Graduates will possess a thorough understanding of the principles and practices of pharmaceutical formulation, design, and delivery systems, including their biochemical and biopharmaceutical aspects.

**PEO2 Research and Development Expertise:** Graduates will engage in innovative research and development, contributing to the advancement of novel drug formulations and technologies that enhance therapeutic efficacy and safety.

**PEO3 Application of Advanced Analytical Techniques:** Graduates will demonstrate proficiency in employing advanced analytical techniques for the characterization and quality assessment of pharmaceutical products.

**PEO4 Regulatory Knowledge and Compliance:** Graduates will understand regulatory frameworks and guidelines related to pharmaceutical development, ensuring compliance throughout the drug development process.

**PEO5 Critical Thinking and Problem-Solving Skills:** Graduates will apply critical thinking and problem-solving skills to address complex challenges in drug formulation and delivery, optimizing therapeutic outcomes.

**PEO6 Collaborative Skills in Interdisciplinary Teams:** Graduates will effectively collaborate with healthcare professionals and researchers from diverse disciplines to enhance drug development and patient care.

**PEO7 Ethical and Professional Standards:** Graduates will uphold high ethical standards and professional integrity in their research and practice, prioritizing patient safety and the responsible conduct of research.

**PEO8 Effective Communication Skills:** Graduates will be able to communicate complex pharmaceutical concepts and research findings clearly and effectively to various stakeholders, including peers, regulatory agencies, and the public.

**PEO9 Global Health Awareness:** Graduates will understand global health issues and contribute to developing pharmaceutical solutions that improve access to essential medicines and enhance public health outcomes.

### Programme Specific Objectives (PSO's)

**PSO1 Advanced Pharmaceutical Knowledge:** Graduates will demonstrate a deep understanding of drug development processes, including formulation, synthesis, and quality control of pharmaceutical products.

**PSO2 Clinical Pharmacy Skills:** Graduates will apply clinical knowledge to assess patient medication regimens, provide pharmaceutical care, and contribute to interdisciplinary healthcare teams.

**PSO3 Research Methodology:** Graduates will be proficient in research methodologies, enabling them to design, conduct, and analyze pharmaceutical research effectively, including clinical trials and drug studies.

**PSO4 Pharmacokinetics and Pharmacodynamics:** Graduates will understand the principles of pharmacokinetics and pharmacodynamics, applying this knowledge to optimize drug therapy for diverse patient populations.

**PSO5 Regulatory Affairs Expertise:** Graduates will navigate regulatory frameworks and guidelines, ensuring compliance in the development and marketing of pharmaceutical products.

**PSO6 Formulation Development:** Graduates will be skilled in the development and evaluation of various dosage forms, utilizing modern techniques and technologies for innovative drug delivery systems.

**PSO7 Quality Assurance and Control:** Graduates will implement quality assurance and control measures in pharmaceutical manufacturing and laboratory settings, ensuring the safety and efficacy of products.

**PSO8 Patient Counseling and Education:** Graduates will effectively communicate medication-related information to patients, enhancing adherence and promoting safe medication use.

**PSO9 Ethical and Professional Responsibility:** Graduates will adhere to ethical guidelines and professional standards, promoting integrity and accountability in their pharmacy practice.

**PSO10 Interprofessional Collaboration:** Graduates will work collaboratively with healthcare professionals, understanding the roles of various team members in providing comprehensive patient care.

### (Programme Outcome Objectives (POO's))

**POO1 Pharmaceutical Knowledge Application:** Graduates will apply advanced knowledge of pharmaceuticals to develop, formulate, and evaluate pharmaceutical products effectively.

**POO2 Research Competence:** Graduates will demonstrate the ability to design and conduct independent research in pharmaceuticals, utilizing appropriate methodologies and analytical techniques.

**POO3 Formulation Development Skills:** Graduates will be skilled in developing various drug delivery systems, optimizing formulations for different routes of administration.

**POO4 Analytical Proficiency:** Graduates will utilize advanced analytical techniques to assess the quality and stability of pharmaceutical formulations, ensuring compliance with regulatory standards.

**POO5 Clinical Application:** Graduates will apply their knowledge of pharmacokinetics and pharmacodynamics to optimize drug therapy and improve patient outcomes.

**POO6 Regulatory Compliance:** Graduates will understand and navigate regulatory requirements and guidelines affecting pharmaceutical development and commercialization.

**POO7 Ethical Standards:** Graduates will uphold ethical principles in research and practice, ensuring patient safety and adherence to professional standards.

**POO8 Communication Skills:** Graduates will effectively communicate complex pharmaceutical concepts and research findings to a variety of audiences, including healthcare professionals and regulatory agencies.

**POO9 Collaborative Teamwork:** Graduates will work effectively in interdisciplinary teams, contributing to collaborative problem-solving and enhancing healthcare delivery.

**POO10 Commitment to Lifelong Learning:** Graduates will demonstrate a commitment to lifelong learning, actively engaging in professional development and staying updated on advancements in pharmaceuticals.

## PHARMACEUTICS(MPH)

### MODERN PHARMACEUTICAL ANALYTICAL TECHNIQUES (MPH 101T)

#### Scope

This subject deals with various advanced analytical instrumental techniques for identification, characterization and quantification of drugs. Instruments dealt are NMR, Mass spectrometer, IR, HPLC, GC etc.

#### Objectives

After completion of course student is able to know,

- Chemicals and Excipients
- The analysis of various drugs in single and combination dosage forms
- Theoretical and practical skills of the instruments

#### THEORY

60 HOURS

- |    |   |           |
|----|---|-----------|
| 1. | a. UV-Visible spectroscopy: Introduction, Theory, Laws, Instrumentation associated with UV-Visible spectroscopy, Choice of solvents and solvent effect and Applications of UV- Visible spectroscopy.  | 11<br>Hrs |
|    | b. IR spectroscopy: Theory, Modes of Molecular vibrations, Sample handling, Instrumentation of Dispersive and Fourier - Transform IR Spectrometer, Factors affecting vibrational frequencies and Applications of IR spectroscopy  |           |
|    | c. Spectrofluorimetry: Theory of Fluorescence, Factors affecting fluorescence, Quenchers, Instrumentation and Applications of fluorescence spectrophotometer.   |           |

## DRUG DELIVERY SYSTEMS (MPH 102T)

### SCOPE

This course is designed to impart knowledge on the area of advances in novel drug delivery systems.

### OBJECTIVES

Upon completion of the course, student shall be able to understand

- The various approaches for development of novel drug delivery systems.
- The criteria for selection of drugs and polymers for the development of delivering system
- The formulation and evaluation of Novel drug delivery systems..

## MODERN PHARMACEUTICS (MPH 103T)

### Scope

Course designed to impart advanced knowledge and skills required to learn various aspects and concepts at pharmaceutical industries

### Objectives

Upon completion of the course, student shall be able to understand

- The elements of preformulation studies.
- The Active Pharmaceutical Ingredients and Generic drug Product development
- Industrial Management and GMP Considerations.
- Optimization Techniques & Pilot Plant Scale Up Techniques
- Stability Testing, sterilization process & packaging of dosage forms.

## REGULATORY AFFAIRS (MPH 104T)

### Scope

Course designed to impart advanced knowledge and skills required to learn the concept of generic drug and their development, various regulatory filings in different countries, different phases of clinical trials and submitting regulatory documents : filing process of IND, NDA and ANDA

- To know the approval process of
- To know the chemistry, manufacturing controls and their regulatory importance
- To learn the documentation requirements for
- To learn the importance and

### Objectives:

Upon completion of the course, it is expected that the students will be able to understand

- The Concepts of innovator and generic drugs, drug development process
- The Regulatory guidance's and guidelines for filing and approval process
- Preparation of Dossiers and their submission to regulatory agencies in different countries
- Post approval regulatory requirements for actives and drug products
- Submission of global documents in CTD/ eCTD formats
- Clinical trials requirements for approvals for conducting clinical trials
- Pharmacovigilance and process of monitoring in clinical trials.

### THEORY

60 Hrs

1. a. Documentation in Pharmaceutical industry: Master formula record, DMF (Drug Master File), distribution records. Generic drugs product development Introduction , Hatch- Waxman act and amendments, CFR (CODE OF FEDERAL REGULATION) ,drug product performance, in-vitro, ANDA regulatory approval process, NDA approval process, BE and drug product assessment, in –vivo, scale up process approval changes, post marketing surveillance, outsourcing BA and BE to CRO. 12 Hrs
- b. Regulatory requirement for product approval: API, biologics, novel, therapies obtaining NDA, ANDA for generic drugs ways and means of US registration for foreign drugs

2	CMC, post approval regulatory affairs. Regulation for combination products and medical devices. CTD and ECTD format, industry and FDA liaison. ICH - Guidelines of ICH-Q, S E, M. Regulatory requirements of EU, MHRA, TGA and ROW countries.	12 Hrs
3	Non clinical drug development: Global submission of IND, NDA, ANDA. Investigation of medicinal products dossier, dossier (IMPD) and investigator brochure (IB).	12 Hrs
4	Clinical trials: Developing clinical trial protocols. Institutional review board/ independent ethics committee Formulation and working procedures informed Consent process and procedures. HIPAA- new, requirement to clinical study process, pharmacovigilance safety monitoring in clinical trials.	12 Hrs

**PHARMACEUTICS PRACTICALS - I**  
**(MPH 105P)**

1. Analysis of pharmacopoeial compounds and their formulations by UV Vis spectrophotometer
2. Simultaneous estimation of multi component containing formulations by UV spectrophotometry
3. Experiments based on HPLC
4. Experiments based on Gas Chromatography
5. Estimation of riboflavin/quinine sulphate by fluorimetry
6. Estimation of sodium/potassium by flame photometry
7. To perform In-vitro dissolution profile of CR/ SR marketed formulation
8. Formulation and evaluation of sustained release matrix tablets
9. Formulation and evaluation osmotically controlled DDS
10. Preparation and evaluation of Floating DDS- hydro dynamically balanced DDS
11. Formulation and evaluation of Muco adhesive tablets.
12. Formulation and evaluation of trans dermal patches.
13. To carry out preformulation studies of tablets.
14. To study the effect of compressional force on tablets disintegration time.
15. To study Micromeritic properties of powders and granulation.
16. To study the effect of particle size on dissolution of a tablet.
17. To study the effect of binders on dissolution of a tablet.
18. To plot Heckal plot, Higuchi and peppas plot and determine similarity factors.

**MOLECULAR PHARMACEUTICS (NANO TECHNOLOGY &  
TARGETED DDS) (NTDS)  
(MPH 201T)**

**Scope**

This course is designed to impart knowledge on the area of advances in novel drug delivery systems.

**Objectives**

Upon completion of the course student shall be able to understand

- The various approaches for development of novel drug delivery systems.
- The criteria for selection of drugs and polymers for the development of NTDS
- The formulation and evaluation of novel drug delivery systems.

**THEORY**

60 Hrs

- |    |   |           |
|----|---|-----------|
| 1. | Targeted Drug Delivery Systems: Concepts, Events and biological process involved in drug targeting. Tumor targeting and Brain specific delivery.  | 12<br>Hrs |
| 2. | Targeting Methods: introduction preparation and evaluation.<br>Nano Particles & Liposomes: Types, preparation and evaluation.   | 12<br>Hrs |
| 3. | Micro Capsules / Micro Spheres: Types, preparation and evaluation ,<br>Monoclonal Antibodies ; preparation and application, preparation and<br>application of Niosomes, Aquasomes, Phytosomes, Electrosomes.  | 12<br>Hrs |
| 4. | Pulmonary Drug Delivery Systems : Aerosols, propellents,<br>Containers Types, preparation and evaluation, Intra Nasal Route Delivery<br>systems; Types, preparation and evaluation.   | 12<br>Hrs |
| 5. | Nucleic acid based therapeutic delivery system : Gene therapy, introduction<br>(ex-vivo & in-vivo gene therapy). Potential target diseases for gene therapy<br>(inherited disorder and cancer). Gene expression systems (viral and nonviral gene<br>transfer). Liposomal gene delivery systems.<br>Biodistribution and Pharmacokinetics. knowledge of therapeutic antisense<br>molecules and aptamers as drugs of future. | 12<br>Hrs |

## ADVANCED BIOPHARMACEUTICS & PHARMACOKINETICS (MPH 202T)

### Scope

This course is designed to impart knowledge and skills necessary for dose calculations, dose adjustments and to apply biopharmaceutics theories in practical problem solving. Basic theoretical discussions of the principles of biopharmaceutics and pharmacokinetics are provided to help the students' to clarify the concepts.

### Objectives

Upon completion of this course it is expected that students will be able understand,

- The basic concepts in biopharmaceutics and pharmacokinetics.
- The use raw data and derive the pharmacokinetic models and parameters the best describe the process of drug absorption, distribution, metabolism and elimination.
- The critical evaluation of biopharmaceutic studies involving drug product equivalency.
- The design and evaluation of dosage regimens of the drugs using pharmacokinetic and biopharmaceutic parameters.
- The potential clinical pharmacokinetic problems and application of basics of pharmacokinetic

### THEORY

60 Hrs

1. Drug Absorption from the Gastrointestinal Tract: Gastrointestinal tract, Mechanism of drug absorption, Factors affecting drug absorption, pH-partition theory of drug absorption. Formulation and physicochemical factors: Dissolution rate, Dissolution process, Noyes-Whitney equation and drug dissolution, Factors affecting the dissolution rate. Gastrointestinal absorption: role of the dosage form: Solution (elixir, syrup and solution) as a dosage form, Suspension as a dosage form, Capsule as a dosage form, Tablet as a dosage form, Dissolution methods, Formulation and processing factors, Correlation of in vivo data with in vitro dissolution data. Transport model: Permeability-Solubility-Charge State and the pH Partition Hypothesis, Properties of the Gastrointestinal Tract (GIT), pH Microclimate Intracellular pH Environment, Tight-Junction Complex. 12 Hrs

- |   |   |           |
|---|---|-----------|
| 2 | Biopharmaceutic considerations in drug product design and In Vitro Drug Product Performance: Introduction, biopharmaceutic factors affecting drug bioavailability, rate-limiting steps in drug absorption, physicochemical nature of the drug formulation factors affecting drug product performance, in vitro: dissolution and drug release testing, compendial methods of dissolution, alternative methods of dissolution testing, meeting dissolution requirements, problems of variable control in dissolution testing performance of drug products. In vitro-in vivo correlation, dissolution profile comparisons, drug product stability, considerations in the design of a drug product.                       | 12<br>Hrs |
| 3 | Pharmacokinetics: Basic considerations, pharmacokinetic models, compartment modeling: one compartment model- IV bolus, IV infusion, extra-vascular. Multi compartment model: two compartment - model in brief, non-linear pharmacokinetics: cause of non-linearity, Michaelis – Menten equation, estimation of $k_{max}$ and $V_{max}$ . Drug interactions: introduction, the effect of protein-binding interactions, the effect of tissue-binding interactions, cytochrome p450-based drug interactions, drug interactions linked to transporters.   | 12<br>Hrs |
| 4 | Drug Product Performance, In Vivo: Bioavailability and Bioequivalence: drug product performance, purpose of bioavailability studies, relative and absolute availability. methods for assessing bioavailability, bioequivalence studies, design and evaluation of bioequivalence studies, study designs, crossover study designs, evaluation of the data, bioequivalence example, study submission and drug review process. biopharmaceutics classification system, methods. Permeability: In-vitro, in-situ and In-vivo methods. generic biologics (biosimilar drug products), clinical significance of bioequivalence studies, special concerns in bioavailability and bioequivalence studies, generic substitution. | 12<br>Hrs |
| 5 | Application of Pharmacokinetics: Modified-Release Drug Products, Targeted Drug Delivery Systems and Biotechnological Products. Introduction to Pharmacokinetics and pharmacodynamic, drug interactions. Pharmacokinetics and pharmacodynamics of biotechnology drugs. Introduction, Proteins and peptides, Monoclonal antibodies, Oligonucleotides, Vaccines (immunotherapy), Gene therapies.   | 12<br>Hrs |

## COMPUTER AIDED DRUG DEVELOPMENT (MPH 203T)

### Scope

This course is designed to impart knowledge and skills necessary for computer Applications in pharmaceutical research and development who want to understand the application of computers across the entire drug research and development process. Basic theoretical discussions of the principles of more integrated and coherent use of computerized information (informatics) in the drug development process are provided to help the students to clarify the concepts.

### Objectives

Upon completion of this course it is expected that students will be able to understand,

- History of Computers in Pharmaceutical Research and Development
- Computational Modeling of Drug Disposition
- Computers in Preclinical Development
- Optimization Techniques in Pharmaceutical Formulation
- Computers in Market Analysis
- Computers in Clinical Development
- Artificial Intelligence (AI) and Robotics
- Computational fluid dynamics(CFD)

### THEORY

60 Hrs

1. a. Computers in Pharmaceutical Research and Development: 12  
A General Overview: History of Computers in Pharmaceutical Research and Development. Statistical modeling in Pharmaceutical research and development: Descriptive versus Mechanistic Modeling, Statistical Parameters, Estimation, Confidence Regions, Nonlinearity at the Optimum, Sensitivity Analysis, Optimal Design, Population Modeling Hrs  
b. Quality-by-Design In Pharmaceutical Development: Introduction, ICH Q8 guideline, Regulatory and industry views on QbD, Scientifically based QbD - examples of application.
2. Computational Modeling Of Drug Disposition: Introduction  
.Modeling Techniques: Drug Absorption, Solubility, Intestinal Permeation, Drug Distribution ,Drug Excretion, Active Transport; P-gp, BCRP, Nucleoside Transporters, hPEPT1, ASBT, OCT, OATP, BBB-Choline Transporter. 12 Hrs

- |   |  |           |
|---|--|-----------|
| 3 | Computer-aided formulation development:: Concept of optimization, Optimization parameters, Factorial design, Optimization technology & Screening design. Computers in Pharmaceutical Formulation: Development of pharmaceutical emulsions, microemulsion drug carriers Legal Protection of Innovative Uses of Computers in R&D, The Ethics of Computing in Pharmaceutical Research, Computers in Market analysis   | 12<br>Hrs |
| 4 | a. Computer-aided biopharmaceutical characterization: Gastrointestinal absorption simulation. Introduction, Theoretical background, Model construction, Parameter sensitivity analysis, Virtual trial, Fed vs. fasted state, In vitro dissolution and in vitro- in vivo correlation, Biowaiver considerations<br>b. Computer Simulations in Pharmacokinetics and Pharmacodynamics: Introduction, Computer Simulation: Whole Organism, Isolated Tissues, Organs, Cell, Proteins and Genes.<br>c. Computers in Clinical Development: Clinical Data Collection and Management, Regulation of Computer Systems | 12<br>Hrs |
| 5 | Artificial Intelligence (AI), Robotics and Computational fluid dynamics: General overview, Pharmaceutical Automation, Pharmaceutical applications, Advantages and Disadvantages. Current Challenges and Future Directions.   | 12<br>Hrs |

#### REFERENCES

## COSMETICS AND COSMECEUTICALS (MPH 204T)

### Scope

This course is designed to impart knowledge and skills necessary for the fundamental need for cosmetic and cosmeceutical products.

### Objectives

Upon completion of the course, the students shall be able to understand

- Key ingredients used in cosmetics and cosmeceuticals.
- Key building blocks for various formulations.
- Current technologies in the market
- Various key ingredients and basic science to develop cosmetics and cosmeceuticals
- Scientific knowledge to develop cosmetics and cosmeceuticals with desired Safety, stability, and efficacy.

### THEORY

60 Hrs

1. Cosmetics – Regulatory : Definition of cosmetic products as per Indian regulation. Indian regulatory requirements for labeling of cosmetics Regulatory provisions relating to import of cosmetics, Misbranded and spurious cosmetics. Regulatory provisions relating to manufacture of cosmetics – Conditions for obtaining license, prohibition of manufacture and sale of certain cosmetics, loan license, offences and penalties. 12 Hrs
- 2 Cosmetics - Biological aspects : Structure of skin relating to problems like dry skin, acne, pigmentation, prickly heat, wrinkles and body odor. Structure of hair and hair growth cycle. Common problems associated with oral cavity. Cleansing and care needs for face, eye lids, lips, hands, feet, nail, scalp, neck, body and under-arm. 12 Hrs
- 3 Formulation Building blocks: Building blocks for different product formulations of cosmetics/cosmeceuticals. Surfactants – Classification and application. Emollients, rheological additives: classification and application. Antimicrobial used as preservatives, their merits and demerits. Factors affecting microbial preservative efficacy. Building blocks for formulation of a moisturizing cream, vanishing cream, cold cream, shampoo and toothpaste. Soaps and syndet bars. 12 Hrs  
Perfumes; Classification of perfumes. Perfume ingredients listed as allergens in EU regulation.

- Controversial ingredients: Parabens, formaldehyde liberators, dioxane.
- |   |   |           |
|---|---|-----------|
| 4 | Design of cosmeceutical products: Sun protection, sunscreens classification and regulatory aspects. Addressing dry skin, acne, sun-protection, pigmentation, prickly heat, wrinkles, body odor., dandruff, dental cavities, bleeding gums, mouth odor and sensitive teeth through cosmeceutical formulations. | 12<br>Hrs |
| 5 | Herbal Cosmetics : Herbal ingredients used in Hair care, skincare and oral care. Review of guidelines for herbal cosmetics by private bodies like Cosmos with respect to preservatives, emollients, foaming agents, emulsifiers and rheology modifiers. Challenges in formulating herbal cosmetics.           | 12<br>Hrs |

#### REFERENCES

4. Handbook of cosmetic science and Technology A.O. Barel, M. Paye and H.I. Maibach. 3<sup>rd</sup> edition
5. Cosmetic and Toiletries recent suppliers catalogue.
6. CTFA directory.

**PHARMACEUTICS PRACTICALS - II**  
**(MPH 205P)**

1. To study the effect of temperature change , non solvent addition, incompatible polymer addition in microcapsules preparation
2. Preparation and evaluation of Alginate beads
3. Formulation and evaluation of gelatin /albumin microspheres
4. Formulation and evaluation of liposomes/niosomes
5. Formulation and evaluation of spherules
6. Improvement of dissolution characteristics of slightly soluble drug by Solid dispersion technique.
7. Comparison of dissolution of two different marketed products /brands
8. Protein binding studies of a highly protein bound drug & poorly protein bound drug
9. Bioavailability studies of Paracetamol in animals.
10. Pharmacokinetic and IVIVC data analysis by Winnoline<sup>R</sup> software
11. In vitro cell studies for permeability and metabolism
12. DoE Using Design Expert<sup>®</sup> Software
13. Formulation data analysis Using Design Expert<sup>®</sup> Software
14. Quality-by-Design in Pharmaceutical Development
15. Computer Simulations in Pharmacokinetics and Pharmacodynamics
16. Computational Modeling Of Drug Disposition
17. To develop Clinical Data Collection manual
18. To carry out Sensitivity Analysis, and Population Modeling.
19. Development and evaluation of Creams
20. Development and evaluation of Shampoo and Toothpaste base
21. To incorporate herbal and chemical actives to develop products
22. To address Dry skin, acne, blemish, Wrinkles, dandruff

**Course Programme-  
Pharmaceutical chemistry**

## **Program Educational Objectives (PEOs)**

Program Educational Objectives (PEOs) for a Master of Pharmacy (M.Pharm) program typically outline the broad goals that graduates are expected to achieve in their professional careers and further education. Here are some common PEOs for an M.Pharm program:

**PEO1 Professional Competence:** Graduates will demonstrate advanced knowledge and skills in pharmaceutical sciences, enabling them to contribute effectively in various sectors such as industry, academia, and healthcare.

**PEO2 Research and Innovation:** Graduates will engage in research activities, promoting innovation and development of new drug formulations, therapeutic approaches, and pharmaceutical technologies.

**PEO3 Leadership and Teamwork:** Graduates will exhibit leadership qualities and the ability to work collaboratively in multidisciplinary teams, enhancing their effectiveness in professional settings.

**PEO4 Ethical Practice:** Graduates will uphold ethical standards and practices in pharmacy, ensuring patient safety, regulatory compliance, and responsible conduct in research and practice.

**PEO5 Ethical Lifelong Learning:** Graduates will demonstrate a commitment to lifelong learning and professional development, staying updated with the latest advancements in the pharmaceutical field.

**PEO6 Ethical Community Engagement:** Graduates will engage with the community, promoting public health initiatives and contributing to the education of patients and healthcare professionals about medication use and safety.

**PEO7 Critical Thinking and Problem-Solving:** Graduates will apply critical thinking and analytical skills to address complex pharmaceutical problems, making informed decisions based on scientific evidence.

**PEO8 Regulatory Knowledge:** Graduates will possess a thorough understanding of regulatory frameworks governing pharmaceutical development, approval processes, and marketing, ensuring compliance in their practices.

**PEO9 Interdisciplinary Collaboration:** Graduates will effectively collaborate with healthcare professionals, researchers, and industry partners to enhance patient care and drive pharmaceutical innovation.

**PEO10 Communication Skills:** Graduates will demonstrate strong oral and written communication skills, effectively conveying complex pharmaceutical concepts to diverse audiences, including patients, colleagues, and regulatory bodies.

**PEO11 Pharmacovigilance and Safety:** Graduates will be equipped to monitor, evaluate, and manage drug safety, actively participating in pharmacovigilance activities to ensure the well-being of patients.

**PEO12 Global Perspective:** Graduates will develop a global perspective on healthcare and pharmaceutical practices, understanding the impact of cultural, economic, and policy factors on medication management.

## **Programme Specific Objectives (PSO's)**

**PSO1 Advanced Chemical Knowledge:** Graduates will demonstrate a thorough understanding of organic, inorganic, and medicinal chemistry principles as they apply to drug design and development.

**PSO2 Synthesis and Characterization:** Graduates will be skilled in the synthesis, purification, and characterization of pharmaceutical compounds using modern analytical techniques.

**PSO3 Drug Design and Development:** Graduates will apply knowledge of structure-activity relationships (SAR) and molecular modeling to design and develop new pharmaceutical agents.

**PSO4 Analytical Method Development:** Graduates will be proficient in developing and validating analytical methods for the quantitative and qualitative analysis of pharmaceutical substances.

**PSO5 Quality Assurance and Control:** Graduates will understand and implement quality assurance and control measures in pharmaceutical manufacturing processes to ensure product safety and efficacy.

**PSO6 Regulatory Affairs Knowledge:** Graduates will possess a comprehensive understanding of the regulatory frameworks governing the pharmaceutical industry, including drug approval processes and compliance requirements.

**PSO7 Interdisciplinary Collaboration:** Graduates will effectively collaborate with professionals in related fields, including pharmacology and pharmacognosy, to enhance drug development and therapeutic outcomes.

**PSO8 Research and Innovation:** Graduates will engage in innovative research projects, contributing to the field of pharmaceutical chemistry through publications and presentations.

**PSO9 Ethical Practice:** Graduates will adhere to ethical guidelines in research and pharmaceutical practice, ensuring integrity in all scientific endeavors.

### Programme Outcome Objectives (POO's)

**POO1 Knowledge Application:** Graduates will apply advanced knowledge of pharmaceutical sciences to solve complex problems in drug development, formulation, and patient care.

**POO2 Research Proficiency:** Graduates will demonstrate the ability to conduct independent research, critically analyze data, and contribute to scientific literature in the field of pharmacy.

**POO3 Clinical Judgment:** Graduates will make informed clinical decisions based on evidence-based practices, optimizing therapeutic outcomes for patients.

**POO4 Communication Skills:** Graduates will effectively communicate pharmaceutical information, both orally and in writing, to diverse audiences, including patients, healthcare professionals, and regulatory bodies.

**POO5 Ethical Standards:** Graduates will adhere to ethical principles in all aspects of pharmaceutical practice, ensuring patient safety and promoting public health.

**POO6 Team Collaboration:** Graduates will work effectively in interdisciplinary teams, contributing to comprehensive patient care and fostering collaboration among healthcare providers.

**POO7 Lifelong Learning:** Graduates will exhibit a commitment to lifelong learning, seeking out continuing education opportunities to stay updated with advancements in the pharmaceutical field.

**POO8 Regulatory Knowledge:** Graduates will understand and navigate the regulatory landscape governing pharmaceutical products, ensuring compliance with laws and guidelines.

**POO9 Patient-Centered Care:** Graduates will provide patient-centered pharmaceutical care, considering individual patient needs, preferences, and values in their practice.

**POO10 Innovation and Entrepreneurship:** Graduates will demonstrate the ability to innovate and explore entrepreneurial opportunities in the pharmaceutical industry, contributing to the development of new products and services.

## PHARMACEUTICAL CHEMISTRY (MPC)

### MODERN PHARMACEUTICAL ANALYTICAL TECHNIQUES (MPC 101T)

#### Scope

This subject deals with various advanced analytical instrumental techniques for identification, characterization and quantification of drugs. Instruments dealt are NMR, Mass spectrometer, IR, HPLC, GC etc.

#### Objectives

After completion of course student is able to know about chemicals and excipients

- The analysis of various drugs in single and combination dosage forms
- Theoretical and practical skills of the instruments

#### THEORY

60 Hrs

1. a. UV-Visible spectroscopy: Introduction, Theory, Laws, Instrumentation associated with UV-Visible spectroscopy, Choice of solvents and solvent effect and Applications of UV-Visible spectroscopy, Difference/ Derivative spectroscopy. 10 Hrs  
b. IR spectroscopy: Theory, Modes of Molecular vibrations, Sample handling, Instrumentation of Dispersive and Fourier - Transform IR Spectrometer, Factors affecting vibrational frequencies and Applications of IR spectroscopy, Data Interpretation.  
c. Spectrofluorimetry: Theory of Fluorescence, Factors affecting fluorescence (Characteristics of drugs that can be analysed by fluorimetry), Quenchers, Instrumentation and Applications of fluorescence spectrophotometer.  
d. Flame emission spectroscopy and Atomic absorption spectroscopy: Principle, Instrumentation, Interferences and Applications.
2. NMR spectroscopy: Quantum numbers and their role in NMR, Principle, Instrumentation, Solvent requirement in NMR, Relaxation process, NMR signals in various compounds, Chemical shift, Factors influencing chemical shift, Spin-Spin coupling, Coupling constant, Nuclear magnetic double resonance, Brief outline of principles of FT-NMR and <sup>13</sup>C NMR. Applications of NMR spectroscopy. 10 Hrs

- |   |   |           |
|---|---|-----------|
| 3 | <p><b>Mass Spectroscopy: Principle, Theory, Instrumentation of Mass Spectroscopy, Different types of ionization like electron impact, chemical, field, FAB and MALDI, APCI, ESI, APPI Analyzers of Quadrupole and Time of Flight, Mass fragmentation and its rules, Meta stable ions, Isotopic peaks and Applications of Mass spectroscopy.</b></p>   | 10<br>Hrs |
| 4 | <p><b>Chromatography: Principle, apparatus, instrumentation, chromatographic parameters, factors affecting resolution, isolation of drug from excipients, data interpretation and applications of the following:</b></p> <p>a) Thin Layer chromatography<br/> b) High Performance Thin Layer Chromatography<br/> c) Ion exchange chromatography<br/> d) Column chromatography<br/> e) Gas chromatography<br/> f) High Performance Liquid chromatography<br/> g) Ultra High Performance Liquid chromatography<br/> h) Affinity chromatography<br/> i) Gel Chromatography</p> | 10<br>Hrs |
| 5 | <p><b>a. Electrophoresis: Principle, Instrumentation, Working conditions, factors affecting separation and applications of the following:</b></p> <p>a) Paper electrophoresis b) Gel electrophoresis c) Capillary electrophoresis d) Zone electrophoresis e) Moving boundary electrophoresis f) Iso electric focusing</p> <p><b>b) X ray Crystallography: Production of X rays, Different X ray methods, Bragg's law, Rotating crystal technique, X ray powder technique, Types of crystals and applications of X-ray diffraction.</b></p>                                  | 10<br>Hrs |
| 6 | <p><b>a. Potentiometry: Principle, working, Ion selective Electrodes and Application of potentiometry.</b></p> <p><b>b. Thermal Techniques: Principle, thermal transitions and Instrumentation (Heat flux and power-compensation and designs), Modulated DSC, Hyper DSC, experimental parameters (sample preparation, experimental conditions, calibration, heating and cooling rates, resolution, source of errors) and their influence, advantage and disadvantages, pharmaceutical applications. Differential Thermal Analysis (DTA): Principle, instrumentation</b></p> | 10<br>Hrs |

and advantage and disadvantages, pharmaceutical applications, derivative differential thermal analysis (DDTA). TGA: Principle, instrumentation, factors affecting results, advantage and disadvantages, pharmaceutical applications.

**ADVANCED ORGANIC CHEMISTRY - I**  
**(MPC 102T)**

**Scope**

The subject is designed to provide in-depth knowledge about advances in organic chemistry, different techniques of organic synthesis and their applications to process chemistry as well as drug discovery.

**Objectives**

Upon completion of course, the student shall be to understand

- The principles and applications of retrosynthesis
- The mechanism & applications of various named reactions
- The concept of disconnection to develop synthetic routes for small target molecule.
- The various catalysts used in organic reactions
- The chemistry of heterocyclic compounds

**THEORY**

60 Hrs

**1. Basic Aspects of Organic Chemistry:**

12

1. Organic intermediates: Carbocations, carbanions, free radicals, carbenes and nitrenes. Their method of formation, stability and synthetic applications. Hrs
2. Types of reaction mechanisms and methods of determining them,
3. Detailed knowledge regarding the reactions, mechanisms and their relative reactivity and orientations.

**Addition reactions**

- a) Nucleophilic uni- and bimolecular reactions (SN1 and SN2)
- b) Elimination reactions (E1 & E2; Hoffman & Saytzeff's rule)
- c) Rearrangement reaction

**2 Study of mechanism and synthetic applications of following named Reactions:**

12

Ugi reaction, Brook rearrangement, Ullmann coupling reactions, Dieckmann Reaction, Doebner-Miller Reaction, Sandmeyer Reaction, Mitsunobu reaction, Mannich reaction, Vilsmeier-Haack Reaction, Sharpless asymmetric epoxidation, Baeyer-Villiger oxidation, Shapiro & Suzuki reaction, Ozonolysis and Michael addition reaction Hrs

- 3 **Synthetic Reagents & Applications:** 12  
Aluminiumisopropoxide, N-bromosuccinamide, diazomethane, 12  
dicyclohexylcarbodiimide, Wilkinson reagent, Wittig reagent. Osmium Hrs  
tetroxide, titanium chloride, diazopropane, diethyl azodicarboxylate,  
Triphenylphosphine, Benzotriazol-1-yloxy) tris (dimethylamino) phosphonium  
hexafluoro-phosphate (BOP).
- Protecting groups**
- Role of protection in organic synthesis
  - Protection for the hydroxyl group, including 1,2-and1,3-diols:ethers, esters,  
carbonates, cyclic acetals & ketals
  - Protection for the Carbonyl Group: Acetals and Ketals
  - Protection for the Carboxyl Group: amides and hydrazides,esters
  - Protection for the Amino Group and Amino acids: carbamatesand amides
- 4 **Heterocyclic Chemistry:** 12  
Organic Name reactions with their respective mechanism and application Hrs  
involved in synthesis of drugs containing five, six membered and fused  
hetrocyclics such as Debus-Radziszewski imidazole synthesis, Knorr Pyrazole  
Synthesis Pinner Pyrimidine Synthesis, Combes Quinoline Synthesis,  
Berntsen Acridine Synthesis, Smiles rearrangement and Traube purine  
synthesis.
- Synthesis of few representative drugs containing these hetrocyclic nucleus  
such as Ketoconazole, Metronidazole, Miconazole, celecoxib, antipyrin,  
Metamizole sodium, Terconazole, Alprazolam, Triamterene, Sulfamerazine,  
Trimethoprim, Hydroxychloroquine, Quinine, Chloroquine, Quinacrine,  
Amsacrine, Prochlorperazine, Promazine, Chlorpromazine, Theophylline ,  
Mercaptopurine and Thioguanine.
- 5 **Synthon approach and retrosynthesis applications**
- Basic principles, terminologies and advantages of retrosynthesis;  
guidelines for dissection of molecules. Functional group interconversion  
and addition (FGI and FGA) 12  
Hrs
  - C-X disconnections; C-C disconnections – alcohols and carbonyl  
compounds; 1,2-, 1,3-,1,4-, 1,5-, 1,6-difunctionalized compounds
  - Strategies for synthesis of three, four, five and six-membered ring.

## ADVANCED MEDICINAL CHEMISTRY (MPC 103T)

### Scope

The subject is designed to impart knowledge about recent advances in the field of medicinal chemistry at the molecular level including different techniques for the rational drug design.

### Objectives

At completion of this course it is expected that students will be able to understand

- Different stages of drug discovery
- Role of medicinal chemistry in drug research
- Different techniques for drug discovery
- Various strategies to design and develop new drug like molecules for biological targets
- Peptidomimetics

### THEORY

60 Hrs

1. Drug discovery: Stages of drug discovery, lead discovery; identification, validation and diversity of drug targets. 12 Hrs

Biological drug targets: Receptors, types, binding and activation, theories of drug receptor interaction, drug receptor interactions, agonists vs antagonists, artificial enzymes.

- 2 Prodrug Design and Analog design: 12 Hrs
- a) Prodrug design: Basic concept, Carrier linked prodrugs/ Bioprecursors, Prodrugs of functional group, Prodrugs to improve patient acceptability, Drug solubility, Drug absorption and distribution, site specific drug delivery and sustained drug action. Rationale of prodrug design and practical consideration of prodrug design.
  - b) Combating drug resistance: Causes for drug resistance, strategies to combat drug resistance in antibiotics and anticancer therapy, Genetic principles of drug resistance.
  - c) Analog Design: Introduction, Classical & Non classical, Bioisosteric replacement strategies, rigid analogs,

alteration of chain branching, changes in ring size, ring position isomers, design of stereo isomers and geometric isomers, fragments of a lead molecule, variation in inter atomic distance.

- 3 a) Medicinal chemistry aspects of the following class of drugs 12  
Systematic study, SAR, Mechanism of action and synthesis of new Hrs  
generation molecules of following class of drugs:  
a) Anti-hypertensive drugs, Psychoactive drugs, Anticonvulsant drugs, H1 & H2  
receptor antagonist, COX1 & COX2 inhibitors, Adrenergic & Cholinergic  
agents, Antineoplastic and Antiviral agents.  
b) Stereochemistry and Drug action: Realization that stereo selectivity is a  
pre-requisite for evolution. Role of chirality in selective and specific  
therapeutic agents. Case studies, Enantio selectivity in drug adsorption,  
metabolism, distribution and elimination.
- 4 Rational Design of Enzyme Inhibitors 12  
Enzyme kinetics & Principles of Enzyme inhibitors, Enzyme inhibitors in Hrs  
medicine, Enzyme inhibitors in basic research, rational design of non-  
covalently and covalently binding enzyme inhibitors.
- 5 Peptidomimetics 12  
Therapeutic values of Peptidomimetics, design of peptidomimetics by Hrs  
manipulation of the amino acids, modification of the peptide backbone,  
incorporating conformational constraints locally or globally. Chemistry of  
prostaglandins, leukotrienes and thromboxones.

# CHEMISTRY OF NATURAL PRODUCTS (MPC 104T)

## Scope

The subject is designed to provide detail knowledge about chemistry of medicinal compounds from natural origin and general methods of structural elucidation of such compounds. It also emphasizes on isolation, purification and characterization of medicinal compounds from natural origin.

## Objectives

At completion of this course it is expected that students will be able to understand-

- Different types of natural compounds and their chemistry and medicinal importance
- The importance of natural compounds as lead molecules for new drug discovery
- The concept of rDNA technology tool for new drug discovery
- General methods of structural elucidation of compounds of natural origin
- Isolation, purification and characterization of simple chemical constituents from natural source

## THEORY

60 Hrs

1. Study of Natural products as leads for new pharmaceuticals for the following class of drugs 12 Hrs
  - a) Drugs Affecting the Central Nervous System: Morphine Alkaloids
  - b) Anticancer Drugs: Paclitaxel and Docetaxel, Etoposide, and Teniposide
  - c) Cardiovascular Drugs: Lovastatin, Teprotide and Dicoumarol
  - d) Neuromuscular Blocking Drugs: Curare alkaloids
  - e) Anti-malarial drugs and Analogues
  - f) Chemistry of macrolid antibiotics (Erythromycin, Azithromycin, Roxithromycin, and Clarithromycin) and  $\beta$  - Lactam antibiotics (Cephalosporins and Carbapenem)
- 2 a) Alkaloids 12 Hrs  
General introduction, classification, isolation, purification, molecular modification and biological activity of alkaloids, general methods of structural determination of alkaloids, structural elucidation and stereochemistry of ephedrine, morphine, ergot, emetine and reserpine.

- b) Flavonoids**  
Introduction, isolation and purification of flavonoids, General methods of structural determination of flavonoids; Structural elucidation of quercetin.
- c) Steroids**  
General introduction, chemistry of sterols, sapogenin and cardiac glycosides. Stereochemistry and nomenclature of steroids, chemistry of contraceptive agents male & female sex hormones (Testosterone, Estradiol, Progesterone), adrenocorticoids (Cortisone), contraceptive agents and steroids (Vit – D).
- 3 a) Terpenoids** 12  
Hrs
- Classification, isolation, isoprene rule and general methods of structural elucidation of Terpenoids; Structural elucidation of drugs belonging to mono (citral, menthol, camphor), di (retinol, Phytol, taxol) and tri terpenoids (Squalene, Ginsenoside) carotinoids ( $\beta$  carotene).
- b) Vitamins**  
Chemistry and Physiological significance of Vitamin A, B1, B2, B12, C, E, Folic acid and Niacin.
- 4 a). Recombinant DNA technology and drug discovery** 12  
Hrs
- rDNA technology, hybridoma technology, New pharmaceuticals derived from biotechnology; Oligonucleotide therapy. Gene therapy: Introduction, Clinical application and recent advances in gene therapy, principles of RNA & DNA estimation
- b). Active constituent of certain crude drugs used in Indigenous system**  
Diabetic therapy – *Gymnema sylvest*re, *Salacia reticulata*, *Pterocarpus marsupium*, *Swertia chirata*, *Trigonella foenum graecum*; Liver dysfunction – *Phyllanthus niruri*; Antitumor – *Curcuma longa* Linn.
- 5 Structural Characterization of natural compounds** 12  
Hrs
- Structural characterization of natural compounds using IR, <sup>1</sup>HNMR, <sup>13</sup>CNMR and MS Spectroscopy of specific drugs e.g., Penicillin, Morphine, Camphor, Vit-D, Quercetin and *Digitalis* glycosides.

**PHARMACEUTICAL CHEMISTRY PRACTICAL - I**  
**(MPC 105P)**

1. Analysis of Pharmacopoeial compounds and their formulations by UV Vis spectrophotometer, RNA & DNA estimation
2. Simultaneous estimation of multi component containing formulations by UV spectrophotometry
3. Experiments based on Column chromatography
4. Experiments based on HPLC
5. Experiments based on Gas Chromatography
6. Estimation of riboflavin/quinine sulphate by fluorimetry
7. Estimation of sodium/potassium by flame photometry

**To perform the following reactions of synthetic importance**

1. Purification of organic solvents, column chromatography
2. Claisen-schmidt reaction.
3. Benzylic acid rearrangement.
4. Beckmann rearrangement.
5. Hoffmann rearrangement
6. Mannich reaction
7. Synthesis of medicinally important compounds involving more than one step along with purification and Characterization using TLC, melting point and IR spectroscopy (4 experiments)
8. Estimation of elements and functional groups in organic natural compounds
9. Isolation, characterization like melting point, mixed melting point, molecular weight determination, functional group analysis, co-chromatographic technique for identification of isolated compounds and interpretation of UV and IR data.
10. Some typical degradation reactions to be carried on selected plant constituents

## ADVANCED SPECTRAL ANALYSIS (MPC 201T)

### Scope

This subject deals with various hyphenated analytical instrumental techniques for identification, characterization and quantification of drugs. Instruments dealt are LC-MS, GC-MS, ATR-IR, DSC etc.

### Objectives

At completion of this course it is expected that students will be able to understand-

- Interpretation of the NMR, Mass and IR spectra of various organic compounds
- Theoretical and practical skills of the hyphenated instruments
- Identification of organic compounds

THEORY	60Hrs
1. UV and IR spectroscopy: Woodward – Fieser rule for 1,3-butadienes, cyclic dienes and $\alpha$ , $\beta$ -carbonyl compounds and interpretation of enones. ATR-IR, IR Interpretation of organic compounds.	12 Hrs
2. NMR spectroscopy: 1-D and 2-D NMR, NOESY and COSY, HECTOR, INADEQUATE techniques, Interpretation of organic compounds.	12 Hrs
3. Mass Spectroscopy  Mass fragmentation and its rules, Fragmentation of important functional groups like alcohols, amines, carbonyl groups and alkanes, Meta stable ions, McLafferty rearrangement, Ring rule, Isotopic peaks, Interpretation of organic compounds.	12 Hrs
4. Chromatography: Principle, Instrumentation and Applications of the following : a) GC-MS b) GC-AAS c) LC-MS d) LC-FTIR e) LC-NMR f) CE-MS g) High Performance Thin Layer chromatography h) Super critical fluid chromatography i) Ion Chromatography j) I-EC (Ion-Exclusion Chromatography) k) Flash chromatography	12 Hrs

- 5 a). **Thermal methods of analysis** 12  
Introduction, principle, instrumentation and application of DSC,DTA and Hrs  
TGA.
- b). **Raman Spectroscopy**  
Introduction, Principle, Instrumentation and Applications.
- c). **Radio immuno assay**  
Biological standardization , bioassay, ELISA, Radioimmunoassay of digitalis and insulin.

**ADVANCED ORGANIC CHEMISTRY - II**  
**(MPC 202T)**

**Scope**

The subject is designed to provide in-depth knowledge about advances in organic chemistry, different techniques of organic synthesis and their applications to process chemistry as well as drug discovery.

**Objectives**

Upon completion of course, the student shall able to understand

- The principles and applications of Green chemistry
- The concept of peptide chemistry.
- The various catalysts used in organic reactions
- The concept of stereochemistry and asymmetric synthesis.

<b>THEORY</b>		<b>60 Hrs</b>
<b>1. Green Chemistry:</b>		<b>12</b>
a. Introduction, principles of green chemistry		<b>Hrs</b>
b. Microwave assisted reactions: Merit and demerits of its use, increased reaction rates, mechanism, superheating effects of microwave, effects of solvents in microwave assisted synthesis, microwave technology in process optimization, its applications in various organic reactions and heterocycles synthesis		
c. Ultrasound assisted reactions: Types of sonochemical reactions, homogenous, heterogeneous liquid-liquid and liquid-solid reactions, synthetic applications		
d. Continuous flow reactors: Working principle, advantages and synthetic applications.		
<b>2 Chemistry of peptides</b>		<b>12</b>
a. Coupling reactions in peptide synthesis		<b>Hrs</b>
b. Principles of solid phase peptide synthesis, t-BOC and FMOC protocols, various solid supports and linkers: Activation procedures, peptide bond formation, deprotection and cleavage from resin, low and high HF cleavage protocols, formation of free peptides and peptide amides, purification and case studies, site-specific chemical modifications of peptides		
c. Segment and sequential strategies for solution phase peptide synthesis with any two case studies		
d. Side reactions in peptide synthesis: Deletion peptides, side		

reactions initiated by proton abstraction, protonation, over- activation and side reactions of individual amino acids.

## COMPUTER AIDED DRUG DESIGN (MPC 203T)

### Scope

The subject is designed to impart knowledge on the current state of the art techniques involved in computer assisted drug design.

### Objectives

At completion of this course it is expected that students will be able to understand

- Role of CADD in drug discovery
- Different CADD techniques and their applications
- Various strategies to design and develop new drug like molecules.
- Working with molecular modeling softwares to design new drug molecules
- The in silico virtual screening protocols

### Theory

60 Hrs

#### 1. Introduction to Computer Aided Drug Design (CADD)

12

Hrs

History, different techniques and applications.

#### Quantitative Structure Activity Relationships: Basics

History and development of QSAR: Physicochemical parameters and methods to calculate physicochemical parameters: Hammett equation and electronic parameters ( $\sigma$ ), lipophilicity effects and parameters ( $\log P$ ,  $\pi$ -substituent constant), steric effects (Taft steric and MR parameters) Experimental and theoretical approaches for the determination of these physicochemical parameters.

#### 2. Quantitative Structure Activity Relationships: Applications Hansch analysis, Free Wilson analysis and relationship between them, Advantages and disadvantages; Deriving 2D-QSAR equations. 3D-QSAR approaches and contour map analysis.

12

Hrs

Statistical methods used in QSAR analysis and importance of statistical parameters.

#### 3. Molecular Modeling and Docking

a) Molecular and Quantum Mechanics in drug design.

12

b) Energy Minimization Methods: comparison between global

Hrs

minimum conformation and bioactive conformation

- c) Molecular docking and drug receptor interactions: Rigid docking, flexible docking and extra-precision docking. Agents acting on enzymes such as DHFR, HMG-CoA reductase and HIV protease, choline esterase ( AchE & BchE)

4	<b>Molecular Properties and Drug Design</b>	12
	a) Prediction and analysis of ADMET properties of new molecules and its importance in drug design.	Hrs
	b) De novo drug design: Receptor/enzyme-interaction and its analysis, Receptor/enzyme cavity size prediction, predicting the functional components of cavities, Fragment based drug design.	
	c) Homology modeling and generation of 3D-structure of protein.	
5	<b>Pharmacophore Mapping and Virtual Screening</b>	12
	Concept of pharmacophore, pharmacophore mapping, identification of Pharmacophore features and Pharmacophore modeling; Conformational search used in pharmacophore mapping.	Hrs

In Silico Drug Design and Virtual Screening Techniques

Similarity based methods and Pharmacophore based screening, structure based In-silico virtual screening protocols.

# PHARMACEUTICAL PROCESS CHEMISTRY (MPC 204T)

## Scope

Process chemistry is often described as scale up reactions, taking them from small quantities created in the research lab to the larger quantities that are needed for further testing and then to even larger quantities required for commercial production. The goal of a process chemist is to develop synthetic routes that are safe, cost-effective, environmentally friendly, and efficient. The subject is designed to impart knowledge on the development and optimization of a synthetic route/s and the pilot plant procedure for the manufacture of Active Pharmaceutical Ingredients (APIs) and new chemical entities (NCEs) for the drug development phase.

## Objectives

At completion of this course it is expected that students will be able to understand

- The strategies of scale up process of APIs and intermediates
- The various unit operations and various reactions in process chemistry

## THEORY

60 Hrs

### 1. Process chemistry

12

Introduction, Synthetic strategy

Hrs

Stages of scale up process: Bench, pilot and large scale process. In-process control and validation of large scale process.

Case studies of some scale up process of APIs.

Impurities in API, types and their sources including genotoxic impurities

### 2 Unit operations

12

- a) Extraction: Liquid equilibria, extraction with reflux, extraction with agitation, counter current extraction.
- b) Filtration: Theory of filtration, pressure and vacuum filtration, centrifugal filtration,
- c) Distillation: azeotropic and steam distillation
- d) Evaporation: Types of evaporators, factors affecting evaporation.
- e) Crystallization: Crystallization from aqueous, non- aqueous solutions factors affecting crystallization, nucleation. Principle and general methods of Preparation of polymorphs, hydrates, solvates and amorphous APIs.

- |   |   |           |
|---|---|-----------|
| 3 | <b>Unit Processes - I</b><br>a) Nitration: Nitrating agents, Aromatic nitration, kinetics and mechanism of aromatic nitration, process equipment for technical nitration, mixed acid for nitration,<br>b) Halogenation: Kinetics of halogenations, types of halogenations, catalytic halogenations. Case study on industrial halogenation process.<br>c) Oxidation: Introduction, types of oxidative reactions, Liquid phase oxidation with oxidizing agents. Nonmetallic Oxidizing agents such as H <sub>2</sub> O <sub>2</sub> , sodium hypochlorite, Oxygen gas, ozonolysis.   | 12<br>Hrs |
| 4 | <b>Unit Processes - II</b><br>a) Reduction: Catalytic hydrogenation, Heterogeneous and homogeneous catalyst; Hydrogen transfer reactions, Metal hydrides. Case study on industrial reduction process.<br>b) Fermentation: Aerobic and anaerobic fermentation.<br>Production of<br>i. Antibiotics; Penicillin and Streptomycin,<br>ii. Vitamins: B <sub>2</sub> and B <sub>12</sub><br>iii. Statins: Lovastatin, Simvastatin<br>c) Reaction progress kinetic analysis<br>i. Streamlining reaction steps, route selection,<br>ii. Characteristics of expedient routes, characteristics of cost-effective routes, reagent selection, families of reagents useful for scale-up. | 12<br>Hrs |
| 5 | <b>Industrial Safety</b><br>a) MSDS (Material Safety Data Sheet), hazard labels of chemicals and Personal Protection Equipment (PPE)<br>b) Fire hazards, types of fire & fire extinguishers<br>c) Occupational Health & Safety Assessment Series 1800 (OHSAS-1800) and ISO-14001 (Environmental Management System), Effluents and its management  | 12<br>Hrs |

**PHARMACEUTICAL CHEMISTRY PRACTICALS – II**  
**(MPC 205P)**

1. Synthesis of organic compounds by adapting different approaches involving (3 experiments)
  - a) Oxidation
  - b) Reduction/hydrogenation
  - c) Nitration
2. Comparative study of synthesis of APIs/intermediates by different synthetic routes (2 experiments)
3. Assignments on regulatory requirements in API (2 experiments)
4. Comparison of absorption spectra by UV and Woodward – Fieser rule
5. Interpretation of organic compounds by FT-IR
6. Interpretation of organic compounds by NMR
7. Interpretation of organic compounds by MS
8. Determination of purity by DSC in pharmaceuticals
9. Identification of organic compounds using FT-IR, NMR, CNMR and Mass spectra
10. To carry out the preparation of following organic compounds
11. Preparation of 4-chlorobenzhydrylpiperazine. (an intermediate for cetirizine HCl).
12. Preparation of 4-iodotoluene from p-toluidine.
13. NaBH<sub>4</sub> reduction of vanillin to vanillyl alcohol
14. Preparation of umbelliferone by Pechmann reaction
15. Preparation of triphenyl imidazole
16. To perform the Microwave irradiated reactions of synthetic importance (Any two)
17. Determination of log P, MR, hydrogen bond donors and acceptors of selected drugs using softwares
18. Calculation of ADMET properties of drug molecules and its analysis using softwares  
Pharmacophore modeling
19. 2D-QSAR based experiments
20. 3D-QSAR based experiments
21. Docking study based experiment
22. Virtual screening based experiment

**Course Programme-  
Pharmacology**

## Program Educational Objectives (PEOs)

Program Educational Objectives (PEOs) for a Master of Pharmacy (M.Pharm) program typically outline the broad goals that graduates are expected to achieve in their professional careers and further education. Here are some common PEOs for an M.Pharm program:

**PEO1 Professional Competence:** Graduates will demonstrate advanced knowledge and skills in pharmaceutical sciences, enabling them to contribute effectively in various sectors such as industry, academia, and healthcare.

**PEO2 Research and Innovation:** Graduates will engage in research activities, promoting innovation and development of new drug formulations, therapeutic approaches, and pharmaceutical technologies.

**PEO3 Leadership and Teamwork:** Graduates will exhibit leadership qualities and the ability to work collaboratively in multidisciplinary teams, enhancing their effectiveness in professional settings.

**PEO4 Ethical Practice:** Graduates will uphold ethical standards and practices in pharmacy, ensuring patient safety, regulatory compliance, and responsible conduct in research and practice.

**PEO5 Ethical Lifelong Learning:** Graduates will demonstrate a commitment to lifelong learning and professional development, staying updated with the latest advancements in the pharmaceutical field.

**PEO6 Ethical Community Engagement:** Graduates will engage with the community, promoting public health initiatives and contributing to the education of patients and healthcare professionals about medication use and safety.

**PEO7 Critical Thinking and Problem-Solving:** Graduates will apply critical thinking and analytical skills to address complex pharmaceutical problems, making informed decisions based on scientific evidence.

**PEO8 Regulatory Knowledge:** Graduates will possess a thorough understanding of regulatory frameworks governing pharmaceutical development, approval processes, and marketing, ensuring compliance in their practices.

**PEO9 Interdisciplinary Collaboration:** Graduates will effectively collaborate with healthcare professionals, researchers, and industry partners to enhance patient care and drive pharmaceutical innovation.

**PEO10 Communication Skills:** Graduates will demonstrate strong oral and written communication skills, effectively conveying complex pharmaceutical concepts to diverse audiences, including patients, colleagues, and regulatory bodies.

**PEO11 Pharmacovigilance and Safety:** Graduates will be equipped to monitor, evaluate, and manage drug safety, actively participating in pharmacovigilance activities to ensure the well-being of patients.

**PEO12 Global Perspective:** Graduates will develop a global perspective on healthcare and pharmaceutical practices, understanding the impact of cultural, economic, and policy factors on medication management.

## Programme Specific Objectives (PSO's)

**PSO1 Advanced Pharmaceutical Knowledge:** Graduates will demonstrate a deep understanding of drug development processes, including formulation, synthesis, and quality control of pharmaceutical products.

**PSO2 Clinical Pharmacy Skills:** Graduates will apply clinical knowledge to assess patient medication regimens, provide pharmaceutical care, and contribute to interdisciplinary healthcare teams.

**PSO3 Research Methodology:** Graduates will be proficient in research methodologies, enabling them to design, conduct, and analyze pharmaceutical research effectively, including clinical trials and drug studies.

**PSO4 Pharmacokinetics and Pharmacodynamics:** Graduates will understand the principles of pharmacokinetics and pharmacodynamics, applying this knowledge to optimize drug therapy for diverse patient populations.

**PSO5 Regulatory Affairs Expertise:** Graduates will navigate regulatory frameworks and guidelines, ensuring compliance in the development and marketing of pharmaceutical products.

**PSO6 Formulation Development:** Graduates will be skilled in the development and evaluation of various dosage forms, utilizing modern techniques and technologies for innovative drug delivery systems.

**PSO7 Quality Assurance and Control:** Graduates will implement quality assurance and control measures in pharmaceutical manufacturing and laboratory settings, ensuring the safety and efficacy of products.

**PSO8 Patient Counseling and Education:** Graduates will effectively communicate medication-related information to patients, enhancing adherence and promoting safe medication use.

**PSO9 Ethical and Professional Responsibility:** Graduates will adhere to ethical guidelines and professional standards, promoting integrity and accountability in their pharmacy practice.

**PSO10 Interprofessional Collaboration:** Graduates will work collaboratively with healthcare professionals, understanding the roles of various team members in providing comprehensive patient care.

### **(Programme Outcome Objectives (POO's)**

**POO1 Knowledge of Drug Mechanisms:** Understand the pharmacokinetics and pharmacodynamics of various drug classes and how they interact with biological systems.

**POO2 Clinical Application:** Apply pharmacological principles in clinical settings to optimize drug therapy and improve patient outcomes.

**POO3 Safety and Efficacy:** Evaluate the safety, efficacy, and potential side effects of medications, including understanding drug interactions and contraindications.

**POO4 Research Skills:** Conduct and interpret pharmacological research, including the ability to critically analyze scientific literature and apply findings to practice.

**POO5 Ethical Considerations:** Understand ethical issues related to pharmacotherapy, including informed consent, drug regulation, and the implications of new therapies.

**POO6 Patient-Centered Care:** Develop communication skills to educate patients about their medications, including dosage, administration, and potential side effects.

**POO7 Interprofessional Collaboration:** Work effectively as part of a healthcare team to ensure comprehensive patient care and medication management.

## PHARMACOLOGY (MPL)

### MODERN PHARMACEUTICAL ANALYTICAL TECHNIQUES (MPL 101T)

#### Scope

This subject deals with various advanced analytical instrumental techniques for identification, characterization and quantification of drugs. Instruments dealt are NMR, Mass spectrometer, IR, HPLC, GC etc.

#### Objectives

After completion of course student is able to know about,

- Chemicals and Excipients
- The analysis of various drugs in single and combination dosage forms
- Theoretical and practical skills of the instruments

#### THEORY

60 Hrs

1. UV-Visible spectroscopy: Introduction, Theory, Laws, Instrumentation associated with UV-Visible spectroscopy, Choice of solvents and solvent effect and Applications of UV-Visible spectroscopy, Difference/ Derivative spectroscopy. 10 Hrs  
IR spectroscopy: Theory, Modes of Molecular vibrations, Sample handling, Instrumentation of Dispersive and Fourier - Transform IR Spectrometer, Factors affecting vibrational frequencies and Applications of IR spectroscopy, Data Interpretation.  
Spectrofluorimetry: Theory of Fluorescence, Factors affecting fluorescence (Characteristics of drugs that can be analysed by fluorimetry), Quenchers, Instrumentation and Applications of fluorescence spectrophotometer.  
Flame emission spectroscopy and Atomic absorption spectroscopy: Principle, Instrumentation, Interferences and Applications.
2. NMR spectroscopy: Quantum numbers and their role in NMR, Principle, Instrumentation, Solvent requirement in NMR, Relaxation process, NMR signals in various compounds, Chemical shift, Factors influencing chemical shift, Spin-Spin coupling, Coupling constant, Nuclear magnetic double resonance, Brief outline of principles of FT-NMR and <sup>13</sup>C NMR. Applications of NMR spectroscopy. 10 Hrs

- 3 Mass Spectroscopy: Principle, Theory, Instrumentation of Mass Spectroscopy, Different types of ionization like electron impact, chemical, field, FAB and MALDI, APCI, ESI, APPI Analyzers of Quadrupole and Time of Flight, Mass fragmentation and its rules, Meta stable ions, Isotopic peaks and Applications of Mass spectroscopy. 10 Hrs
- 4 Chromatography: Principle, apparatus, instrumentation, chromatographic parameters, factors affecting resolution, isolation of drug from excipients, data interpretation and applications of the following: 10 Hrs
- j) Thin Layer chromatography
  - k) High Performance Thin Layer Chromatography
  - l) Ion exchange chromatography
  - m) Column chromatography
  - n) Gas chromatography
  - o) High Performance Liquid chromatography
  - p) Ultra High Performance Liquid chromatography
  - q) Affinity chromatography
  - r) Gel Chromatography
- 5 Electrophoresis: Principle, Instrumentation, Working conditions, factors affecting separation and applications of the following: 10 Hrs
- a) Paper electrophoresis
  - b) Gel electrophoresis
  - c) Capillary electrophoresis
  - d) Zone electrophoresis
  - e) Moving boundary electrophoresis
  - f) Iso electric focusing
- X ray Crystallography: Production of X rays, Different X ray methods, Bragg's law, Rotating crystal technique, X ray powder technique, Types of crystals and applications of X-ray diffraction. 10 Hrs
- 6 Potentiometry: Principle, working, Ion selective Electrodes and Application of potentiometry. 10 Hrs
- Thermal Techniques: Principle, thermal transitions and Instrumentation (Heat flux and power-compensation and designs), Modulated DSC, Hyper DSC, experimental parameters (sample preparation, experimental conditions, calibration, heating and cooling rates, resolution, source of errors) and their influence, advantage and disadvantages, pharmaceutical applications. Differential Thermal Analysis (DTA): Principle, instrumentation and advantage and disadvantages, pharmaceutical applications, derivative differential thermal analysis (DDTA). TGA: Principle, instrumentation, factors affecting results, advantage and disadvantages, pharmaceutical applications.

## ADVANCED PHARMACOLOGY - I (MPL 102T)

### Scope

The subject is designed to strengthen the basic knowledge in the field of pharmacology and to impart recent advances in the drugs used for the treatment of various diseases. In addition, this subject helps the students to understand the concepts of drug action and mechanisms involved

### Objectives

Upon completion of the course the student shall be able to :

- Discuss the pathophysiology and pharmacotherapy of certain diseases
- Explain the mechanism of drug actions at cellular and molecular level
- Understand the adverse effects, contraindications and clinical uses of drugs used in treatment of diseases

THEORY	60 Hrs
<b>1. General</b>	<b>Pharmacology 12 Hrs</b>
a. Pharmacokinetics: The dynamics of drug absorption, distribution, biotransformation and elimination. Concepts of linear and non-linear compartment models. Significance of Protein binding.	
b. Pharmacodynamics: Mechanism of drug action and the relationship between drug concentration and effect. Receptors, structural and functional families of receptors, quantitation of drug receptors interaction and elicited effects.	
<b>2 Neurotransmission</b>	<b>12 Hrs</b>
a. General aspects and steps involved in neurotransmission.	
b. Neurohumoral transmission in autonomic nervous system (Detailed study about neurotransmitters- Adrenaline and Acetyl choline).	
c. Neurohumoral transmission in central nervous system (Detailed study about neurotransmitters- histamine, serotonin, dopamine, GABA, glutamate and glycine).	
d. Non adrenergic non cholinergic transmission (NANC). Co-transmission	

## Systemic Pharmacology

A detailed study on pathophysiology of diseases, mechanism of action, pharmacology and toxicology of existing as well as novel drugs used in the following systems

### Autonomic Pharmacology

Parasympathomimetics and lytics, sympathomimetics and lytics, agents affecting

neuromuscular junction

12

### 3 Central nervous system Pharmacology

Hrs

General and local anesthetics

Sedatives and hypnotics, drugs used to treat anxiety.

Depression, psychosis, mania, epilepsy, neurodegenerative diseases.

Narcotic and non-narcotic analgesics.

12

### 4 Cardiovascular Pharmacology

Hrs

Diuretics, antihypertensives, antiischemics, anti-arrhythmics, drugs for heart failure and hyperlipidemia.

Hematinics, coagulants, anticoagulants, fibrinolytics and anti-platelet drugs

### 5 Autocoid Pharmacology

12

The physiological and pathological role of Histamine, Serotonin, Kinins

Hrs

Prostaglandins Opioid autocoids.

Pharmacology of antihistamines, 5HT antagonists.

**PHARMACOLOGICAL AND TOXICOLOGICAL SCREENING  
METHODS - I  
(MPL 103T)**

**Scope**

This subject is designed to impart the knowledge on preclinical evaluation of drugs and recent experimental techniques in the drug discovery and development. The subject content helps the student to understand the maintenance of laboratory animals as per the guidelines, basic knowledge of various in-vitro and in-vivo preclinical evaluation processes

**Objectives**

Upon completion of the course the student shall be able to,

- Appraise the regulations and ethical requirement for the usage of experimental animals.
- Describe the various animals used in the drug discovery process and good laboratory practices in maintenance and handling of experimental animals
- Describe the various newer screening methods involved in the drug discovery process
- Appreciate and correlate the preclinical data to humans

**THEORY**

60 Hrs

**1. Laboratory Animals**

12

Common laboratory animals: Description, handling and applications of different species and strains of animals.

Hrs

Transgenic animals: Production, maintenance and applications Anaesthesia and euthanasia of experimental animals.

Maintenance and breeding of laboratory animals. CPCSEA guidelines to conduct experiments on animals

Good laboratory practice.

Bioassay-Principle, scope and limitations and methods

**2 Preclinical screening of new substances for the pharmacological activity using in vivo, in vitro, and other possible animal alternative models.**

12

Hrs

General principles of preclinical screening. CNS Pharmacology: behavioral and muscle coordination, CNS stimulants and

depressants, anxiolytics, anti-psychotics, anti epileptics andnootropics. Drugs for neurodegenerative diseases like Parkinsonism, Alzheimers and multiple sclerosis. Drugs acting on Autonomic Nervous System.

- 3 Preclinical screening of new substances for the pharmacological activity using in vivo, in vitro, and other possible animal alternative models. 12 Hrs

Respiratory Pharmacology: anti-asthmatics, drugs for COPD and anti allergics. Reproductive Pharmacology: Aphrodisiacs and antifertility agents Analgesics, antiinflammatory and antipyretic agents. Gastrointestinal drugs: anti ulcer, anti - emetic, anti- diarrheal and laxatives.

- 4 Preclinical screening of new substances for the pharmacological activity using in vivo, in vitro, and other possible animal alternative models. 12 Hrs

Cardiovascular Pharmacology: antihypertensives, antiarrhythmics, antianginal, antiatherosclerotic agents and diuretics. Drugs for metabolic disorders like anti-diabetic, antidyslipidemic agents. Anti cancer agents. Hepatoprotective screening methods.

- 5 Preclinical screening of new substances for the pharmacological activity using in vivo, in vitro, and other possible animal alternative models. 12 Hrs

Immunomodulators, Immunosuppressants and immunostimulants

General principles of immunoassay: theoretical basis and optimization of immunoassay, heterogeneous and homogenous immunoassay systems. Immunoassay methods evaluation; protocol outline, objectives and preparation. Immunoassay for digoxin and insulin

Limitations of animal experimentation and alternate animal experiments.

Extrapolation of in vitro data to preclinical and preclinical to humans

## CELLULAR AND MOLECULAR PHARMACOLOGY (MPL 104T)

### Scope:

The subject imparts a fundamental knowledge on the structure and functions of cellular components and help to understand the interaction of these components with drugs. This information will further help the student to apply the knowledge in drug discovery process.

### Objectives:

Upon completion of the course, the student shall be able to,

- Explain the receptor signal transduction processes.
- Explain the molecular pathways affected by drugs.
- Appreciate the applicability of molecular pharmacology and biomarkers in drug discovery process.
- Demonstrate molecular biology techniques as applicable for pharmacology

THEORY	60 Hrs
1. Cell biology	12
Structure and functions of cell and its organelles	Hrs
Genome organization. Gene expression and its regulation, importance of siRNA and micro RNA, gene mapping and gene sequencing	
Cell cycles and its regulation.	
Cell death– events, regulators, intrinsic and extrinsic pathways of apoptosis.	
Necrosis and autophagy.	
2 Cell signaling	12
Intercellular and intracellular signaling pathways.	Hrs
Classification of receptor family and molecular structure ligand gated ion channels; G-protein coupled receptors, tyrosine kinase receptors and nuclear receptors.	
Secondary messengers: cyclic AMP, cyclic GMP, calcium ion, inositol 1,4,5-trisphosphate, (IP <sub>3</sub> ), NO, and diacylglycerol.	
Detailed study of following intracellular signaling pathways: cyclic AMP signaling pathway, mitogen-activated protein kinase (MAPK) signaling, Janus kinase (JAK)/signal transducer and activator of transcription (STAT) signaling pathway.

**PHARMACOLOGICAL AND TOXICOLOGICAL SCREENING  
METHODS-II  
(MPL 202T)**

**Scope:**

This subject imparts knowledge on the preclinical safety and toxicological evaluation of drug & new chemical entity. This knowledge will make the student competent in regulatory toxicological evaluation.

**Objectives:**

Upon completion of the course, the student shall be able to,

- Explain the various types of toxicity studies.
- Appreciate the importance of ethical and regulatory requirements for toxicity studies.
- Demonstrate the practical skills required to conduct the preclinical toxicity studies.

	THEORY	60 Hrs
1.	Basic definition and types of toxicology (general, mechanistic, regulatory and descriptive) Regulatory guidelines for conducting toxicity studies OECD, ICH, EPA and Schedule Y OECD principles of Good laboratory practice (GLP) History, concept and its importance in drug development	12 Hrs
2.	Acute, sub-acute and chronic- oral, dermal and inhalational studies as per OECD guidelines. Acute eye irritation, skin sensitization, dermal irritation & dermal toxicity studies. Test item characterization- importance and methods in regulatory toxicology studies	12 Hrs
3.	Reproductive toxicology studies, Male reproductive toxicity studies, female reproductive studies (segment I and segment III), teratogenicity studies (segment II) Genotoxicity studies (Ames Test, in vitro and in vivo Micronucleus and Chromosomal aberrations studies) In vivo carcinogenicity studies	12 Hrs
4.	IND enabling studies (IND studies)- Definition of IND, importance of IND, industry perspective, list of studies needed for IND submission.	12 Hrs

Safety pharmacology studies- origin, concepts and importance of safety pharmacology.

Tier1- CVS, CNS and respiratory safety pharmacology, HERG assay. Tier2- GI, renal and other studies

- 5 Toxicokinetics- Toxicokinetic evaluation in preclinical studies, saturation kinetics 12  
Importance and applications of toxicokinetic studies. Hrs  
Alternative methods to animal toxicity testing.

## PRINCIPLES OF DRUG DISCOVERY (MPL 203T)

### Scope:

The subject imparts basic knowledge of drug discovery process. This information will make the student competent in drug discovery process

### Objectives:

Upon completion of the course, the student shall be able to,

- Explain the various stages of drug discovery.
- Appreciate the importance of the role of genomics, proteomics and bioinformatics in drug discovery
- Explain various targets for drug discovery.
- Explain various lead seeking method and lead optimization
- Appreciate the importance of the role of computer aided drug design in drug discovery

THEORY	60 Hrs
1. An overview of modern drug discovery process: Target identification, target validation, lead identification and lead Optimization. Economics of drug discovery. Target Discovery and validation-Role of Genomics, Proteomics and Bioinformatics. Role of Nucleic acid microarrays, Protein microarrays, Antisense technologies, siRNAs, antisense oligonucleotides, Zinc finger proteins. Role of transgenic animals in target validation.	12 Hrs
2 Lead Identification- combinatorial chemistry & high throughput screening, in silico lead discovery techniques, Assay development for hit identification. Protein structure Levels of protein structure, Domains, motifs, and folds in protein structure. Computational prediction of protein structure: Threading and homology modeling methods. Application of NMR and X-ray crystallography in protein structure prediction	12 Hrs
3 Rational Drug Design Traditional vs rational drug design, Methods followed in traditional drug design, High throughput screening, Concepts of Rational Drug Design, Rational Drug Design Methods: Structure and Pharmacophore based approaches	12 Hrs

## CLINICAL RESEARCH AND PHARMACOVIGILANCE (MPL 204T)

### Scope:

This subject will provide a value addition and current requirement for the students in clinical research and pharmacovigilance. It will teach the students on conceptualizing, designing, conducting, managing and reporting of clinical trials. This subject also focuses on global scenario of Pharmacovigilance in different methods that can be used to generate safety data. It will teach the students in developing drug safety data in Pre-clinical, Clinical phases of Drug development and post market surveillance.

### Objectives:

Upon completion of the course, the student shall be able to,

- Explain the regulatory requirements for conducting clinical trial
- Demonstrate the types of clinical trial designs
- Explain the responsibilities of key players involved in clinical trials
- Execute safety monitoring, reporting and close-out activities
- Explain the principles of Pharmacovigilance
- Detect new adverse drug reactions and their assessment
- Perform the adverse drug reaction reporting systems and communication in Pharmacovigilance

**(MPL 205P)**

1. To record the DRC of agonist using suitable isolated tissues preparation.
2. To study the effects of antagonist/potentiating agents on DRC of agonist using suitable isolated tissue preparation.
3. To determine the strength of unknown sample by matching bioassay by using suitable tissue preparation.
4. To determine the strength of unknown sample by interpolation bioassay by using suitable tissue preparation.
5. To determine the strength of unknown sample by bracketing bioassay by using suitable tissue preparation.
6. To determine the strength of unknown sample by multiple point bioassay by using suitable tissue preparation.
7. Estimation of  $PA_2$  values of various antagonists using suitable isolated tissue preparations.
8. To study the effects of various drugs on isolated heart preparations.
9. Recording of rat BP, heart rate and ECG.
10. Recording of rat ECG
11. Drug absorption studies by averted rat ileum preparation.
12. Acute oral toxicity studies as per OECD guidelines.
13. Acute dermal toxicity studies as per OECD guidelines.
14. Repeated dose toxicity studies- Serum biochemical, haematological, urine analysis, functional observation tests and histological studies.
15. Drug mutagenicity study using mice bone-marrow chromosomal aberration test.
16. Protocol design for clinical trial. (3 Nos.)
17. Design of ADR monitoring protocol.
18. In-silico docking studies. (2 Nos.)
19. In-silico pharmacophore based screening.
20. In-silico QSAR studies.
21. ADR reporting

Semester III  
MRM 301T - Research Methodology & Biostatistics

UNIT – I

General Research Methodology: Research, objective, requirements, practical difficulties, review of literature, study design, types of studies, strategies to eliminate errors/bias, controls, randomization, crossover design, placebo, blinding techniques.

UNIT – II

Biostatistics: Definition, application, sample size, importance of sample size, factors influencing sample size, dropouts, statistical tests of significance, type of significance tests, parametric tests (students “t” test, ANOVA, Correlation coefficient, regression), non-parametric tests (wilcoxon rank tests, analysis of variance, correlation, chi square test), null hypothesis, P values, degree of freedom, interpretation of P values.

UNIT – III

Medical Research: History, values in medical ethics, autonomy, beneficence, non-maleficence, double effect, conflicts between autonomy and beneficence/non-maleficence, euthanasia, informed consent, confidentiality, criticisms of orthodox medical ethics, importance of communication, control resolution, guidelines, ethics committees, cultural concerns, truth telling, online business practices, conflicts of interest, referral, vendor relationships, treatment of family members, sexual relationships, fatality.

UNIT – IV

CPCSEA guidelines for laboratory animal facility: Goals, veterinary care, quarantine, surveillance, diagnosis, treatment and control of disease, personal hygiene, location of animal facilities to laboratories, anesthesia, euthanasia, physical facilities, environment, animal husbandry, record keeping, SOPs, personnel and training, transport of lab animals.

UNIT – V

Declaration of Helsinki: History, introduction, basic principles for all medical research, and additional principles for medical research combined with medical care

# Shobhit University, Gangoh

(Established by UP Shobhit University Act No. 3, 2012)

## School Of Pharmacy

### Ordinances, Regulations & Syllabus

For

**Bachelor of Pharmacy (B.Pharm) 4 Year Programme Semester  
Pattern  
(w.e.f.session2013-14)**

**Approved by Pharmacy Council of India and  
adopted in the year 2013, 1<sup>st</sup> Meeting, Board of  
Studies.**

[Frame under Regulation 6,7 & 8 of the Bachelor of Pharmacy (B. Pharm)]

## **CHAPTER- I: REGULATIONS**

### **1. Short Title and Commencement**

These regulations shall be called as “The Revised Regulations for the B. Pharm. Degree Program (CBCS)of the Pharmacy Council of India, New Delhi”. They shall come into effect from the Academic Year 2016-17. The regulations framed are subject to modifications from time to time by Pharmacy Council of India.

### **2. Minimum qualification for admission**

#### **First year B. Pharm:**

Candidate shall have passed 10+2 examination conducted by the respective state/central government authorities recognized as equivalent to 10+2 examination by the Association of Indian Universities (AIU) with English as one of the subjects and Physics, Chemistry, Mathematics (P.C.M) and or Biology (P.C.B / P.C.M.B.) as optional subjects individually. Any other qualification approved by the Pharmacy Council of India as equivalent to any of the above examinations.

#### **2.2. B. Pharm lateral entry (to third semester):**

A pass in D. Pharm. course from an institution approved by the Pharmacy Council of India under section 12 of the Pharmacy Act.

### **3. Duration of the program**

The course of study for B.Pharm shall extend over a period of eight semesters (four academic years) and six semesters (three academic years) for lateral entry students. The curricula and syllabi for the program shall be prescribed from time to time by Pharmacy Council of India, New Delhi.

### **4. Medium of instruction and examinations**

Medium of instruction and examination shall be in English.

### **5. Working days in each semester**

Each semester shall consist of not less than 100 working days. The odd semesters shall be conducted from the month of June/July to November/December and the even semesters shall be conducted from December/January to May/June in every calendar year.

### **6. Attendance and progress**

A candidate is required to put in at least 80% attendance in individual courses considering theory and practical separately. The candidate shall complete the prescribed course satisfactorily to be eligible to appear for the respective examinations.

## **7. Program/Course credit structure**

As per the philosophy of Credit Based Semester System, certain quantum of academic work viz. theory classes, tutorial hours, practical classes, etc. are measured in terms of credits. On satisfactory completion of the courses, a candidate earns credits. The amount of credit associated with a course is dependent upon the number of hours of instruction per week in that course. Similarly, the credit associated with any of the other academic, co/extra-curricular activities is dependent upon the quantum of work expected to be put in for each of these activities per week.

### **Credit assignment**

#### **Theory and Laboratory courses**

Courses are broadly classified as Theory and Practical. Theory courses consist of lecture (L) and /or tutorial (T) hours, and Practical (P) courses consist of hours spent in the laboratory. Credits (C) for a course is dependent on the number of hours of instruction per week in that course, and is obtained by using a multiplier of one (1) for lecture and tutorial hours, and a multiplier of half (1/2) for practical (laboratory) hours. Thus, for example, a theory course having three lectures and one tutorial per week throughout the semester carries a credit of 4. Similarly, a practical having four laboratory hours per week throughout semester carries a credit of 2.

#### **Minimum credit requirements**

The minimum credit points required for award of a B. Pharm. degree is 208. These credits are divided into Theory courses, Tutorials, Practical, Practice School and Project over the duration of eight semesters. The credits are distributed semester-wise as shown in Table IX. Courses generally progress in sequences, building competencies and their positioning indicates certain academic maturity on the part of the learners. Learners are expected to follow the semester-wise schedule of courses given in the syllabus.

The lateral entry students shall get 52 credit points transferred from their D. Pharm program. Such students shall take up additional remedial courses of 'Communication Skills' (Theory and Practical) and 'Computer Applications in Pharmacy' (Theory and Practical) equivalent to 3 and 4 credit points respectively, a total of 7 credit points to attain 59 credit points, the maximum of I and II semesters.

## **8. Academic work**

A regular record of attendance both in Theory and Practical shall be maintained by the teaching staff of respective courses.

### 9. Course of study

The course of study for B. Pharm shall include Semester Wise Theory & Practical as given in Table – I to VIII. The number of hours to be devoted to each theory, tutorial and practical course in any semester shall not be less than that shown in Table – I to VIII.

**Table-I: Course of study for semester I**

<b>Total credit points for the program</b>	<b>209/211<sup>§</sup>/212<sup>#</sup></b>

\* The credit points assigned for extracurricular and or co-curricular activities shall be given by the Principals of the colleges and the same shall be submitted to the University. The criteria to acquire this credit point shall be defined by the colleges from time to time.

<sup>§</sup>Applicable ONLY for the students studied Physics / Chemistry / Botany / Zoology at HSC and appearing for Remedial Mathematics course.

<sup>#</sup>Applicable ONLY for the students studied Mathematics / Physics / Chemistry at HSC and appearing for Remedial Biology course.

## **10. Program Committee**

1. The B. Pharm. program shall have a Program Committee constituted by the Head of the institution in consultation with all the Heads of the departments.
2. The composition of the Program Committee shall be as follows:

A senior teacher shall be the Chairperson; One Teacher from each department handling B.Pharm courses; and four student representatives of the program (one from each academic year), nominated by the Head of the institution.

3. Duties of the Program Committee:
  - i. Periodically reviewing the progress of the classes.
  - ii. Discussing the problems concerning curriculum, syllabus and the conduct of classes.
  - iii. Discussing with the course teachers on the nature and scope of assessment for the course and the same shall be announced to the students at the beginning of respective semesters.
  - iv. Communicating its recommendation to the Head of the institution on academic matters.
  - v. The Program Committee shall meet at least thrice in a semester preferably at the end of each Sessionalexam (Internal Assessment) and before the end semester exam.

## **11. Examinations/Assessments**

The scheme for internal assessment and end semester examinations is given in Table – X.

### **End semester examinations**

The End Semester Examinations for each theory and practical course through semesters I to VIII shall be conducted by the university except for the subjects with asterix symbol (\*) in table I and II for which examinations shall be conducted by the subject experts at college level and the marks/grades shall be submitted to the university.

**Tables-X: Schemes for internal assessments and end semester examinations semester wise**

<b>Total</b>	<b>40</b>	<b>60</b>	<b>4 Hrs</b>	<b>100</b>	<b>450</b>	<b>16 Hrs</b>	<b>550</b>
--------------	-----------	-----------	--------------	------------	------------	---------------	------------

**Internal assessment: Continuous mode**

The marks allocated for Continuous mode of Internal Assessment shall be awarded as per the scheme given below.

**Table-XI: Scheme for awarding internal assessment: Continuous mode**

<b>Theory</b>		
<b>Criteria</b>	<b>Maximum Marks</b>	
Attendance (Refer Table – XII)	4	2
Academic activities (Average of any 3 activities e.g. quiz, assignment, open book test, field work, group discussion and seminar)	3	1.5
Student – Teacher interaction	3	1.5
<b>Total</b>	<b>10</b>	<b>5</b>
<b>Practical</b>		
Attendance (Refer Table – XII)	2	
Based on Practical Records, Regular viva voce, etc.	3	
<b>Total</b>	<b>5</b>	

**Table- XII: Guidelines for the allotment of marks for attendance**

<b>Percentage of Attendance</b>	<b>Theory</b>	<b>Practical</b>
95 – 100	4	2
90 – 94	3	1.5
85 – 89	2	1
80 – 84	1	0.5
Less than 80	0	0

**11.2.1. Sessional Exams**

Two Sessional exams shall be conducted for each theory / practical course as per the schedule fixed by the college(s). The scheme of question paper for theory and practical Sessional examinations is given below. The average marks of two Sessional exams shall be computed for internal assessment as per the requirements given in tables – X.

Sessional exam shall be conducted for 30 marks for theory and shall be computed for 15 marks. Similarly Sessional exam for practical shall be conducted for 40 marks and shall be computed for 10 marks.

**Question paper pattern for theory Sessional examinations****For subjects having University examination**

I. Multiple Choice Questions (MCQs) = 10 x 1 = 10

OR

Objective Type Questions (5 x 2) = 05 x 2 = 10

(Answer all the questions)

I. Long Answers (Answer 1 out of 2) = 1 x 10 = 10

II. Short Answers (Answer 2 out of 3) = 2 x 5 = 10

Total = -----  
30 marks

**For subjects having Non University Examination**

I. Long Answers (Answer 1 out of 2)	=	1 x 10 = 10
II. Short Answers (Answer 4 out of 6)	=	4 x 5 = 20
		-----
Total	=	30 marks
		-----

**Question paper pattern for practical sessional examinations**

I. Synopsis	=	10
II. Experiments	=	25
III. Viva voce	=	05
		-----
Total	=	40 marks
		-----

**12. Promotion and award of grades**

A student shall be declared PASS and eligible for getting grade in a course of B.Pharm. program if he/she secures at least 50% marks in that particular course including internal assessment. For example, to be declared as PASS and to get grade, the student has to secure a minimum of 50 marks for the total of 100 including continuous mode of assessment and end semester theory examination and has to secure a minimum of 25 marks for the total 50 including internal assessment and end semester practical examination.

**13. Carry forward of marks**

In case a student fails to secure the minimum 50% in any Theory or Practical course as specified in 12, then he/she shall reappear for the end semester examination of that course. However his/her marks of the Internal Assessment shall be carried over and he/she shall be entitled for grade obtained by him/her on passing.

**14. Improvement of internal assessment**

A student shall have the opportunity to improve his/her performance only once in the Sessional exam component of the internal assessment. The re-conduct of the Sessional exam shall be completed before the commencement of next end semester theory examinations.

**15. Re-examination of end semester examinations**

Reexamination of end semester examination shall be conducted as per the schedule given in table XIII. The exact dates of examinations shall be notified from time to time.

**Table-XIII: Tentative schedule of end semester examinations**

Semester	For Regular Candidates	For Failed Candidates
I, III, V and VII	November / December	May / June
II, IV, VI and VIII	May / June	November / December

**Question paper pattern for end semester theory examinations**

**For 75 marks paper**

I. Multiple Choice Questions(MCQs)	=	20 x 1	=	20
OR				OR
Objective Type Questions (10 x 2)	=	10 x 2	=	20
(Answer all the questions)				
II. Long Answers (Answer 2 out of 3)	=	2 x 10	=	20
III. Short Answers (Answer 7 out of 9)	=	7 x 5	=	35

Total = 75 marks

**For 50 marks paper**

I. Long Answers (Answer 2 out of 3)	=	2 x 10	=	20
II. Short Answers (Answer 6 out of 8)	=	6 x 5	=	30

Total = 50 marks

**For 35 marks paper**

I. Long Answers (Answer 1 out of 2)	=	1 x 10	=	10
II. Short Answers (Answer 5 out of 7)	=	5 x 5	=	25

Total = 35 marks

**Question paper pattern for end semester practical examinations**

I. Synopsis	=	5
II. Experiments	=	25
III. Viva voce	=	5

Total = 35 marks

**16. Academic Progression:**

No student shall be admitted to any examination unless he/she fulfills the norms given in 6. Academic progression rules are applicable as follows:

A student shall be eligible to carry forward all the courses of I, II and III semesters till the IV semester examinations. However, he/she shall not be eligible to attend the courses of V semester until all the courses of I and II semesters are successfully completed.

A student shall be eligible to carry forward all the courses of III, IV and V semesters till the VI semester examinations. However, he/she shall not be eligible to attend the courses of VII semester until all the courses of I, II, III and IV semesters are successfully completed.

A student shall be eligible to carry forward all the courses of V, VI and VII semesters till the VIII semester examinations. However, he/she shall not be eligible to get the course completion certificate until all the courses of I, II, III, IV, V and VI semesters are successfully completed.

A student shall be eligible to get his/her CGPA upon successful completion of the courses of I to VIII semesters within the stipulated time period as per the norms specified in 26.

A lateral entry student shall be eligible to carry forward all the courses of III, IV and V semesters till the VI semester examinations. However, he/she shall not be eligible to attend the courses of VII semester until all the courses of III and IV semesters are successfully completed.

A lateral entry student shall be eligible to carry forward all the courses of V, VI and VII semesters till the VIII semester examinations. However, he/she shall not be eligible to get the course completion certificate until all the courses of III, IV, V and VI semesters are successfully completed.

A lateral entry student shall be eligible to get his/her CGPA upon successful completion of the courses of III to VIII semesters within the stipulated time period as per the norms specified in 26.

Any student who has given more than 4 chances for successful completion of I / III semester courses and more than 3 chances for successful completion of II / IV semester courses shall be permitted to attend V / VII semester classes ONLY during the subsequent academic year as the case may be. In simpler terms there shall NOT be any ODD BATCH for any semester.

Note: Grade AB should be considered as failed and treated as one head for deciding academic progression. Such rules are also applicable for those students who fail to register for examination(s) of any course in any semester.

### 17. Grading of performances

#### Letter grades and grade points allocations:

Based on the performances, each student shall be awarded a final letter grade at the end of the semester for each course. The letter grades and their corresponding grade points are given in Table – XII.

**Table – XII: Letter grades and grade points equivalent to Percentage of marks and performances**

Percentage of Marks Obtained	Letter Grade	Grade Point	Performance
90.00 – 100	O	10	Outstanding
80.00 – 89.99	A	9	Excellent
70.00 – 79.99	B	8	Good
60.00 – 69.99	C	7	Fair
50.00 – 59.99	D	6	Average
Less than 50	F	0	Fail
Absent	AB	0	Fail

A learner who remains absent for any end semester examination shall be assigned a letter grade of AB and a corresponding grade point of zero. He/she should reappear for the saidevaluation/examination in due course.

### 18. The Semester grade point average (SGPA)

The performance of a student in a semester is indicated by a number called ‘Semester Grade Point Average’ (SGPA). The SGPA is the weighted average of the grade points obtained in all the courses by the student during the semester. For example, if a student takes five courses(Theory/Practical) in a semester with credits C1, C2, C3, C4 and C5 and the student’s grade points in these courses are G1, G2, G3, G4 and G5, respectively, and then students’ SGPA is equal to:

$$SGPA = \frac{C_1G_1 + C_2G_2 + C_3G_3 + C_4G_4 + C_5G_5}{C_1 + C_2 + C_3 + C_4 + C_5}$$

The SGPA is calculated to two decimal points. It should be noted that, the SGPA for any semester shall take into consideration the F and ABS grade awarded in that semester. For example if a learner has a F or ABS grade in course 4, the SGPA shall then be computed as:

$$\text{SGPA} = \frac{C_1G_1 + C_2G_2 + C_3G_3 + C_4* \text{ZERO} + C_5G_5}{C_1 + C_2 + C_3 + C_4 + C_5}$$

**19. Cumulative Grade Point Average (CGPA)**

The CGPA is calculated with the SGPA of all the VIII semesters to two decimal points and is indicated in final grade report card/final transcript showing the grades of all VIII semesters and their courses. The CGPA shall reflect the failed status in case of F grade(s), till the course(s) is/are passed. When the course(s) is/are passed by obtaining a pass grade on subsequent examination(s) the CGPA shall only reflect the new grade and not the fail grades earned earlier. The CGPA is calculated as:

$$\text{CGPA} = \frac{C_1S_1 + C_2S_2 + C_3S_3 + C_4S_4 + C_5S_5 + C_6S_6 + C_7S_7 + C_8S_8}{C_1 + C_2 + C_3 + C_4 + C_5 + C_6 + C_7 + C_8}$$

where C<sub>1</sub>, C<sub>2</sub>, C<sub>3</sub>,... is the total number of credits for semester I,II,III,... and S<sub>1</sub>,S<sub>2</sub>, S<sub>3</sub>,...is the SGPA of semester I,II,III,....

**20. Declaration of class**

The class shall be awarded on the basis of CGPA as follows:

- First Class with Distinction = CGPA of 7.50 and above
- First Class = CGPA of 6.00 to 7.49
- Second Class = CGPA of 5.00 to 5.99

**21. Project work**

All the students shall undertake a project under the supervision of a teacher and submit a report. The area of the project shall directly relate any one of the elective subject opted by the student in semester VIII. The project shall be carried out in group not exceeding 5 in number. The project report shall be submitted in triplicate (typed & bound copy not less than 25 pages).

The internal and external examiner appointed by the University shall evaluate the project at the time of the Practical examinations of other semester(s). Students shall be evaluated in groups for four hours (i.e., about half an hour for a group of five students). The projects shall be evaluated as per the criteria given below.

***Evaluation of Dissertation Book:***

Objective(s) of the work done	15 Marks
Methodology adopted	20 Marks
Results and Discussions	20 Marks
Conclusions and Outcomes	20 Marks

**Total** 75 Marks

***Evaluation of Presentation:***

Presentation of work	25 Marks
Communication skills	20 Marks
Question and answer skills	30 Marks

**Total** 75 Marks

*Explanation:* The 75 marks assigned to the dissertation book shall be same for all the students in a group. However, the 75 marks assigned for presentation shall be awarded based on the performance of individual students in the given criteria.

**22. Industrial training (Desirable)**

Every candidate shall be required to work for at least 150 hours spread over four weeks in a Pharmaceutical Industry/Hospital. It includes Production unit, Quality Control department, Quality Assurance department, Analytical laboratory, Chemical manufacturing unit, Pharmaceutical R&D, Hospital (Clinical Pharmacy), Clinical Research Organization, Community Pharmacy, etc. After the Semester – VI and before the commencement of Semester – VII, and shall submit satisfactory report of such work and certificate duly signed by the authority of training organization to the head of the institute.

**23. Practice School**

In the VII semester, every candidate shall undergo practice school for a period of 150 hours evenly distributed throughout the semester. The student shall opt any one of the domains for practice school declared by the program committee from time to time.

At the end of the practice school, every student shall submit a printed report (in triplicate) on the practice school he/she attended (not more than 25 pages). Along with the exams of semester VII, the report submitted by the student, knowledge and skills acquired by the student through practice school shall be evaluated by the subject experts at college level and grade point shall be awarded.

**24. Award of Ranks**

Ranks and Medals shall be awarded on the basis of final CGPA. However, candidates who fail in one or more courses during the B.Pharm program shall not be eligible for award of ranks. Moreover, the candidates should have completed the B. Pharm program in minimum prescribed number of years, (four years) for the award of Ranks.

**25. Award of degree**

Candidates who fulfill the requirements mentioned above shall be eligible for award of degree during the ensuing convocation.

**26. Duration for completion of the program of study**

The duration for the completion of the program shall be fixed as double the actual duration of the program and the students have to pass within the said period, otherwise they have to get fresh Registration.

**27. Re-admission after break of study**

Candidate who seeks re-admission to the program after break of study has to get the approval from the university by paying a condonation fee.

No condonation is allowed for the candidate who has more than 2 years of break up period and he/she has to rejoin the program by paying the required fees.

## **Programme Educational Objectives (PEOs)**

**PEO1 Applying principles and technologies:** Graduates should be able to apply principles and technologies to develop, formulate, and manufacture drugs and pharmaceuticals.

**PEO2 Serving society:** Graduates should be able to use medications and devices appropriately to achieve optimal therapeutic outcomes.

**PEO3 Promoting leadership and ethics:** Graduates should be able to demonstrate leadership and entrepreneurship qualities, as well as professional ethics and human values.

**PEO4 Lifelong learning :** Graduates should be able to absorb new technologies and continue learning throughout their lives.

**PEO5 Communicating effectively:** Graduates should be able to communicate well with other healthcare professionals.

**PEO6 Meeting industry needs:** Graduates should be able to meet the needs of the pharmaceutical industry and provide clinical services to the community.

**PEO7 Academic excellence:** Graduates should have knowledge of fundamental principles and their applications in pharmaceutical sciences and technology.

**PEO8 Technical competence:** Graduates should have strong fundamental concepts and high technical competence in pharmaceutical sciences.

**PEO9 Professional Competence:** Graduates will demonstrate the knowledge and skills necessary to practice pharmacy effectively in various healthcare settings, ensuring safe and effective medication use.

**PEO10 Patient-Centered Care:** Graduates will provide high-quality, patient-centered care, including medication management, counseling, and health promotion, to improve patient outcomes.

**PEO11 Inter-professional Collaboration:** Graduates will work collaboratively within interdisciplinary healthcare teams to optimize patient care and contribute to public health initiatives.

### **Programme Specific Objectives (PSO's)**

**PSO1 Pharmaceutical Care Skills:** Students will demonstrate the ability to assess patient medication needs, develop individualized care plans, and implement appropriate therapeutic interventions.

**PSO2 Drug Development and Management:** Students will gain knowledge in drug formulation, development processes, and the management of pharmaceutical products throughout their lifecycle.

**PSO3 Clinical Knowledge Application:** Students will apply pharmacological principles and clinical knowledge to evaluate and optimize drug therapy in diverse patient populations.

**PSO4 Regulatory and Compliance Understanding:** Students will understand the regulatory frameworks governing pharmacy practice, including drug approval processes, safety, and quality assurance.

**PSO5 Communication Proficiency:** Students will develop effective communication skills to counsel patients, collaborate with healthcare professionals, and convey complex information clearly.

**PSO6 Health Promotion and Disease Prevention:** Students will engage in public health initiatives, providing education on disease prevention and health promotion strategies.

**PSO7 Research and Evidence-Based Practice:** Students will engage in research activities and apply evidence-based practices to inform clinical decisions and improve patient outcomes.

**PSO8 Ethical Decision-Making:** Students will learn to navigate ethical dilemmas in pharmacy practice, demonstrating professional judgment and integrity.

### **Programme Outcome Objectives (POO's)**

**POO1 Clinical Competence:** Graduates will be able to conduct comprehensive medication reviews, assess patient health needs, and design effective therapeutic regimens.

**POO2 Pharmaceutical Knowledge:** Graduates will possess a thorough understanding of pharmacology, pharmacotherapy, drug interactions, and the mechanisms of drug action.

**POO3 Ethical Practice:** Graduates will demonstrate professionalism and ethical behavior in all aspects of pharmacy practice, including patient interactions and professional relationships.

**POO4 Communication Skills:** Graduates will effectively communicate with patients, caregivers, and healthcare team members, ensuring clarity and understanding of medication information.

**POO5 Critical Thinking and Problem Solving:** Graduates will apply critical thinking skills to analyze patient data, identify medication-related problems, and develop appropriate solutions.

**POO6 Research and Evidence-Based Practice:** Graduates will be able to conduct research, critically evaluate scientific literature, and apply evidence-based guidelines in clinical practice.

**PO07 Interprofessional Collaboration:** Graduates will work effectively within interdisciplinary teams to enhance patient care and contribute to overall healthcare delivery.

**PO08 Lifelong Learning:** Graduates will demonstrate a commitment to continuous professional development and lifelong learning in the rapidly evolving field of pharmacy.

**PO09 Public Health Awareness:** Graduates will engage in community health initiatives, promoting wellness and preventive care through education and outreach.

## **CHAPTER - II: SYLLABUS**

## **Semester I**

## **BP101T. HUMAN ANATOMY AND PHYSIOLOGY-I (Theory)**

**45 Hours**

**Scope:** This subject is designed to impart fundamental knowledge on the structure and functions of the various systems of the human body. It also helps in understanding both homeostatic mechanisms. The subject provides the basic knowledge required to understand the various disciplines of pharmacy.

**Objectives:** Upon completion of this course the student should be able to

1. Explain the gross morphology, structure and functions of various organs of the human body.
2. Describe the various homeostatic mechanisms and their imbalances.
3. Identify the various tissues and organs of different systems of human body.
4. Perform the various experiments related to special senses and nervous system.
5. Appreciate coordinated working pattern of different organs of each system

### **Course Content:**

#### **Unit I**

**10 hours**

- **Introduction to human body**

Definition and scope of anatomy and physiology, levels of structural organization and body systems, basic life processes, homeostasis, basic anatomical terminology.

- **Cellular level of organization**

Structure and functions of cell, transport across cell membrane, cell division, cell junctions. General principles of cell communication, intracellular signaling pathway activation by extracellular signal molecule, Forms of intracellular signaling: a) Contact-dependent b) Paracrine c) Synaptic d) Endocrine

- **Tissue level of organization**

Classification of tissues, structure, location and functions of epithelial, muscular and nervous and connective tissues.

#### **Unit II**

**10 hours**

- **Integumentary system**

Structure and functions of skin

- **Skeletal system**

Divisions of skeletal system, types of bone, salient features and functions of bones of axial and appendicular skeletal system

Organization of skeletal muscle, physiology of muscle contraction, neuromuscular junction

- **Joints**

Structural and functional classification, types of joints movements and its articulation

**Unit III**

**10 hours**

- **Body fluids and blood**

- Body fluids, composition and functions of blood, hemopoiesis, formation of hemoglobin, anemia, mechanisms of coagulation, blood grouping, Rh factors, transfusion, its significance and disorders of blood, Reticulo endothelial system.

- **Lymphatic system**

Lymphatic organs and tissues, lymphatic vessels, lymph circulation and functions of lymphatic system

**Unit IV**

**08 hours**

**Peripheral nervous system:**

Classification of peripheral nervous system: Structure and functions of sympathetic and parasympathetic nervous system.

Origin and functions of spinal and cranial nerves.

- **Special senses**

Structure and functions of eye, ear, nose and tongue and their disorders.

**Unit V**

**07 hours**

- **Cardiovascular system**

Heart – anatomy of heart, blood circulation, blood vessels, structure and functions of artery, vein and capillaries, elements of conduction system of heart and heart beat, its regulation by autonomic nervous system, cardiac output, cardiac cycle. Regulation of blood pressure, pulse, electrocardiogram and disorders of heart.

## **BP107P. HUMAN ANATOMY AND PHYSIOLOGY (Practical)**

**4 Hours/week**

Practical physiology is complimentary to the theoretical discussions in physiology. Practicals allow the verification of physiological processes discussed in theory classes through experiments on living tissue, intact animals or normal human beings. This is helpful for developing an insight on the subject.

1. Study of compound microscope.
2. Microscopic study of epithelial and connective tissue
3. Microscopic study of muscular and nervous tissue
4. Identification of axial bones
5. Identification of appendicular bones
6. Introduction to hemocytometry.
7. Enumeration of white blood cell (WBC) count
8. Enumeration of total red blood corpuscles (RBC) count
9. Determination of bleeding time
10. Determination of clotting time
11. Estimation of hemoglobin content
12. Determination of blood group.
13. Determination of erythrocyte sedimentation rate (ESR).
14. Determination of heart rate and pulse rate.
15. Recording of blood pressure.

### **Recommended Books (Latest Editions)**

1. Essentials of Medical Physiology by K. Sembulingam and P. Sembulingam. Jaypee brothers medical publishers, New Delhi.
2. Anatomy and Physiology in Health and Illness by Kathleen J.W. Wilson, Churchill Livingstone, New York
3. Physiological basis of Medical Practice-Best and Tailor. Williams & WilkinsCo, Riverview,MI USA
4. Text book of Medical Physiology- Arthur C,Guyton andJohn.E. Hall. Miamisburg, OH, U.S.A.
5. Principles of Anatomy and Physiology by Tortora Grabowski. Palmetto, GA, U.S.A.

6. Textbook of Human Histology by Inderbir Singh, Jaypee brother's medical publishers, New Delhi.
7. Textbook of Practical Physiology by C.L. Ghai, Jaypee brother's medical publishers, New Delhi.
8. Practical workbook of Human Physiology by K. Srinageswari and Rajeev Sharma, Jaypee brother's medical publishers, New Delhi.

**Reference Books (Latest Editions)**

1. Physiological basis of Medical Practice-Best and Tailor. Williams & Wilkins Co, Riverview, MI USA
2. Text book of Medical Physiology- Arthur C, Guyton and John. E. Hall. Miamisburg, OH, U.S.A.
3. Human Physiology (vol 1 and 2) by Dr. C.C. Chatterrje ,Academic Publishers Kolkata

## BP102T. PHARMACEUTICAL ANALYSIS (Theory)

45 Hours

**Scope:** This course deals with the fundamentals of analytical chemistry and principles of electrochemical analysis of drugs

**Objectives:** Upon completion of the course student shall be able to

- understand the principles of volumetric and electro chemical analysis
- carryout various volumetric and electrochemical titrations
- develop analytical skills

### Course Content:

#### UNIT-I

10 Hours

(a) **Pharmaceutical analysis**- Definition and scope

- i) Different techniques of analysis
- ii) Methods of expressing concentration
- iii) Primary and secondary standards.
- iv) Preparation and standardization of various molar and normal solutions- Oxalic acid, sodium hydroxide, hydrochloric acid, sodium thiosulphate, sulphuric acid, potassium permanganate and ceric ammonium sulphate

(b) **Errors:** Sources of errors, types of errors, methods of minimizing errors, accuracy, precision and significant figures

(c) Pharmacopoeia, Sources of impurities in medicinal agents, limit tests.

#### UNIT-II

10 Hours

- **Acid base titration:** Theories of acid base indicators, classification of acid base titrations and theory involved in titrations of strong, weak, and very weak acids and bases, neutralization curves
- **Non aqueous titration:** Solvents, acidimetry and alkalimetry titration and estimation of Sodium benzoate and Ephedrine HCl

#### UNIT-III

10 Hours

- **Precipitation titrations:** Mohr's method, Volhard's, Modified Volhard's, Fajans method, estimation of sodium chloride.
- **Complexometric titration:** Classification, metal ion indicators, masking and demasking reagents, estimation of Magnesium sulphate, and calcium gluconate.
- **Gravimetry:** Principle and steps involved in gravimetric analysis. Purity of the precipitate: co-precipitation and post precipitation, Estimation of barium sulphate.
- Basic Principles ,methods and application of diazotisation titration.

## **UNIT-IV**

**08 Hours**

### **Redox titrations**

(a) Concepts of oxidation and reduction

(b) Types of redox titrations (Principles and applications)

Cerimetry, Iodimetry, Iodometry, Bromatometry, Dichrometry, Titration with potassium iodate

## **UNIT-V**

**07 Hours**

### **• Electrochemical methods of analysis**

- **Conductometry**- Introduction, Conductivity cell, Conductometric titrations, applications.
- **Potentiometry** - Electrochemical cell, construction and working of reference (Standard hydrogen, silver chloride electrode and calomel electrode) and indicator electrodes (metal electrodes and glass electrode), methods to determine end point of potentiometric titration and applications.
- **Polarography** - Principle, Ilkovic equation, construction and working of dropping mercury electrode and rotating platinum electrode, applications

## **BP108P. PHARMACEUTICAL ANALYSIS (Practical)**

**4 Hours / Week**

### **I Limit Test of the following**

- (1) Chloride
- (2) Sulphate
- (3) Iron
- (4) Arsenic

### **II Preparation and standardization of**

- (1) Sodium hydroxide
- (2) Sulphuric acid
- (3) Sodium thiosulfate
- (4) Potassium permanganate
- (5) Ceric ammonium sulphate

### **III Assay of the following compounds along with Standardization of Titrant**

- (1) Ammonium chloride by acid base titration
- (2) Ferrous sulphate by Cerimetry
- (3) Copper sulphate by Iodometry
- (4) Calcium gluconate by complexometry
- (5) Hydrogen peroxide by Permanganometry
- (6) Sodium benzoate by non-aqueous titration
- (7) Sodium Chloride by precipitation titration

### **IV Determination of Normality by electro-analytical methods**

- (1) Conductometric titration of strong acid against strong base
- (2) Conductometric titration of strong acid and weak acid against strong base
- (3) Potentiometric titration of strong acid against strong base

### **Recommended Books: (Latest Editions)**

1. A.H. Beckett & J.B. Stenlake's, Practical Pharmaceutical Chemistry Vol I & II, Stahlone Press of University of London
2. A.I. Vogel, Text Book of Quantitative Inorganic analysis
3. P. Gundu Rao, Inorganic Pharmaceutical Chemistry
4. Bentley and Driver's Textbook of Pharmaceutical Chemistry
5. John H. Kennedy, Analytical chemistry principles
6. Indian Pharmacopoeia.

## BP103T. PHARMACEUTICS- I (Theory)

45 Hours

**Scope:** This course is designed to impart a fundamental knowledge on the preparatory pharmacy with arts and science of preparing the different conventional dosage forms.

**Objectives:** Upon completion of this course the student should be able to:

- Know the history of profession of pharmacy
- Understand the basics of different dosage forms, pharmaceutical incompatibilities and pharmaceutical calculations
- Understand the professional way of handling the prescription
- Preparation of various conventional dosage forms

### Course Content:

#### UNIT – I

10 Hours

- **Historical background and development of profession of pharmacy:** History of profession of Pharmacy in India in relation to pharmacy education, industry and organization, Pharmacy as a career, Pharmacopoeias: Introduction to IP, BP, USP and Extra Pharmacopoeia.
- **Dosage forms:** Introduction to dosage forms, classification and definitions
- **Prescription:** Definition, Parts of prescription, handling of Prescription and Errors in prescription.
- **Posology:** Definition, Factors affecting posology. Pediatric dose calculations based on age, body weight and body surface area.

#### UNIT – II

10 Hours

- **Pharmaceutical calculations:** Weights and measures – Imperial & Metric system, Calculations involving percentage solutions, alligation, proof spirit and isotonic solutions based on freezing point and molecular weight.
- **Powders:** Definition, classification, advantages and disadvantages, Simple & compound powders – official preparations, dusting powders, effervescent, efflorescent and hygroscopic powders, eutectic mixtures. Geometric dilutions.
- **Liquid dosage forms:** Advantages and disadvantages of liquid dosage forms. Excipients used in formulation of liquid dosage forms. Solubility enhancement techniques

### UNIT – III

**08 Hours**

- **Monophasic liquids:** Definitions and preparations of Gargles, Mouthwashes, Throat Paint, Eardrops, Nasal drops, Enemas, Syrups, Elixirs, Liniments and Lotions.
- **Biphasic liquids:**
- **Suspensions:** Definition, advantages and disadvantages, classifications, Preparation of suspensions; Flocculated and Deflocculated suspension & stability problems and methods to overcome.
- **Emulsions:** Definition, classification, emulsifying agent, test for the identification of type of Emulsion, Methods of preparation & stability problems and methods to overcome.

### UNIT – IV

**08 Hours**

- **Suppositories:** Definition, types, advantages and disadvantages, types of bases, methods of preparations. Displacement value & its calculations, evaluation of suppositories.
- **Pharmaceutical incompatibilities:** Definition, classification, physical, chemical and therapeutic incompatibilities with examples.

### UNIT – V

**07 Hours**

- **Semisolid dosage forms:** Definitions, classification, mechanisms and factors influencing dermal penetration of drugs. Preparation of ointments, pastes, creams and gels. Excipients used in semi solid dosage forms. Evaluation of semi solid dosage forms

**1. Syrups**

- a) Syrup IP'66
- b) Compound syrup of Ferrous Phosphate BPC'68

**2. Elixirs**

- a) Piperazine citrate elixir
- b) Paracetamol pediatric elixir

**3. Linctus**

- a) Terpin Hydrate Linctus IP'66
- b) Iodine Throat Paint (Mandles Paint)

**4. Solutions**

- a) Strong solution of ammonium acetate
- b) Cresol with soap solution
- c) Lugol's solution

**5. Suspensions**

- a) Calamine lotion
- b) Magnesium Hydroxide mixture
- c) Aluminium Hydroxide gel

**6. Emulsions**

- a) Turpentine Liniment
- b) Liquid paraffin emulsion

**7. Powders and Granules**

- a) ORS powder (WHO)
- b) Effervescent granules
- c) Dusting powder
- d) Divided powders

**8. Suppositories**

- a) Glycero gelatin suppository
- b) Cocoa butter suppository
- c) Zinc Oxide suppository

**8. Semisolids**

- a) Sulphur ointment
- b) Non staining-iodine ointment with methyl salicylate
- c) Carbopal gel

**9. Gargles and Mouthwashes**

- a) Iodine gargle
- b) Chlorhexidine mouthwash

**Recommended Books: (Latest Editions)**

1. H.C. Ansel et al., Pharmaceutical Dosage Form and Drug Delivery System, Lippincott Williams and Walkins, New Delhi.
2. Carter S.J., Cooper and Gunn's-Dispensing for Pharmaceutical Students, CBS publishers, New Delhi.

## BP104T. PHARMACEUTICAL INORGANIC CHEMISTRY (Theory)

45 Hours

**Scope:** This subject deals with the monographs of inorganic drugs and pharmaceuticals.

**Objectives:** Upon completion of course student shall be able to

- know the sources of impurities and methods to determine the impurities in inorganic drugs and pharmaceuticals
- understand the medicinal and pharmaceutical importance of inorganic compounds

### Course Content:

#### UNIT I

10 Hours

- **Impurities in pharmaceutical substances:** History of Pharmacopoeia, Sources and types of impurities, principle involved in the limit test for Chloride, Sulphate, Iron, Arsenic, Lead and Heavy metals, modified limit test for Chloride and Sulphate

**General methods of preparation,** assay for the compounds superscripted with **asterisk (\*)**, properties and medicinal uses of inorganic compounds belonging to the following classes

#### UNIT II

10 Hours

- **Acids, Bases and Buffers:** Buffer equations and buffer capacity in general, buffers in pharmaceutical systems, preparation, stability, buffered isotonic solutions, measurements of tonicity, calculations and methods of adjusting isotonicity.
- **Major extra and intracellular electrolytes:** Functions of major physiological ions, Electrolytes used in the replacement therapy: Sodium chloride\*, Potassium chloride, Calcium gluconate\* and Oral Rehydration Salt (ORS), Physiological acid base balance.
- **Dental products:** Dentifrices, role of fluoride in the treatment of dental caries, Desensitizing agents, Calcium carbonate, Sodium fluoride, and Zinc eugenol cement.

#### UNIT III

10 Hours

- **Gastrointestinal agents**

**Acidifiers:** Ammonium chloride\* and Dil. HCl

**Antacid:** Ideal properties of antacids, combinations of antacids, Sodium

Bicarbonate\*, Aluminum hydroxide gel, Magnesium hydroxide mixture

**Cathartics:** Magnesium sulphate, Sodium orthophosphate, Kaolin and Bentonite

**Antimicrobials:** Mechanism, classification, Potassium permanganate, Boric acid, Hydrogen peroxide\*, Chlorinated lime\*, Iodine and its preparations

#### UNIT IV

**08 Hours**

- **Miscellaneous compounds**

**Expectorants:** Potassium iodide, Ammonium chloride\*.

**Emetics:** Copper sulphate\*, Sodium potassium tartarate

**Haematinics:** Ferrous sulphate\*, Ferrous gluconate

**Poison and Antidote:** Sodium thiosulphate\*, Activated charcoal, Sodium nitrite<sup>333</sup>

**Astringents:** Zinc Sulphate, Potash Alum

#### UNIT V

**07 Hours**

- **Radiopharmaceuticals:** Radio activity, Measurement of radioactivity, Properties of  $\alpha$ ,  $\beta$ ,  $\gamma$  radiations, Half life, radio isotopes and study of radio isotopes - Sodium iodide  $I^{131}$ , Storage conditions, precautions & pharmaceutical application of radioactive substances.

## BP110P. PHARMACEUTICAL INORGANIC CHEMISTRY (Practical)

4 Hours / Week

- I **Limit tests for following ions**
  - Limit test for Chlorides and Sulphates
  - Modified limit test for Chlorides and Sulphates
  - Limit test for Iron
  - Limit test for Heavy metals
  - Limit test for Lead
  - Limit test for Arsenic
- II **Identification test**
  - Magnesium hydroxide
  - Ferrous sulphate
  - Sodium bicarbonate
  - Calcium gluconate
  - Copper sulphate
- III **Test for purity**
  - Swelling power of Bentonite
  - Neutralizing capacity of aluminum hydroxide gel
  - Determination of potassium iodate and iodine in potassium Iodide
- IV **Preparation of inorganic pharmaceuticals**
  - Boric acid
  - Potash alum
  - Ferrous sulphate

### Recommended Books (Latest Editions)

1. A.H. Beckett & J.B. Stenlake's, Practical Pharmaceutical Chemistry Vol I & II, Stahlone Press of University of London, 4<sup>th</sup> edition.
2. A.I. Vogel, Text Book of Quantitative Inorganic analysis
3. P. Gundu Rao, Inorganic Pharmaceutical Chemistry, 3<sup>rd</sup> Edition
4. M.L Schroff, Inorganic Pharmaceutical Chemistry
5. Bentley and Driver's Textbook of Pharmaceutical Chemistry
6. Anand & Chatwal, Inorganic Pharmaceutical Chemistry
7. Indian Pharmacopoeia

## **BP105T.COMMUNICATION SKILLS (Theory)**

**30 Hours**

**Scope:** This course will prepare the young pharmacy student to interact effectively with doctors, nurses, dentists, physiotherapists and other health workers. At the end of this course the student will get the soft skills set to work cohesively with the team as a team player and will add value to the pharmaceutical business.

### **Objectives:**

Upon completion of the course the student shall be able to

1. Understand the behavioral needs for a Pharmacist to function effectively in the areas of pharmaceutical operation
2. Communicate effectively (Verbal and Non Verbal)
3. Effectively manage the team as a team player
4. Develop interview skills
5. Develop Leadership qualities and essentials

### **Course content:**

#### **UNIT – I**

**07 Hours**

- **Communication Skills:** Introduction, Definition, The Importance of Communication, The Communication Process – Source, Message, Encoding, Channel, Decoding, Receiver, Feedback, Context
- **Barriers to communication:** Physiological Barriers, Physical Barriers, Cultural Barriers, Language Barriers, Gender Barriers, Interpersonal Barriers, Psychological Barriers, Emotional barriers
- **Perspectives in Communication:** Introduction, Visual Perception, Language, Other factors affecting our perspective - Past Experiences, Prejudices, Feelings, Environment

#### **UNIT – II**

**07 Hours**

- **Elements of Communication:** Introduction, Face to Face Communication - Tone of Voice, Body Language (Non-verbal communication), Verbal Communication, Physical Communication
- **Communication Styles:** Introduction, The Communication Styles Matrix with example for each -Direct Communication Style, Spirited Communication Style, Systematic Communication Style, Considerate Communication Style

### UNIT – III

07 Hours

- **Basic Listening Skills:** Introduction, Self-Awareness, Active Listening, Becoming an Active Listener, Listening in Difficult Situations
- **Effective Written Communication:** Introduction, When and When Not to Use Written Communication - Complexity of the Topic, Amount of Discussion' Required, Shades of Meaning, Formal Communication
- **Writing Effectively:** Subject Lines, Put the Main Point First, Know Your Audience, Organization of the Message

### UNIT – IV

05 Hours

- **Interview Skills:** Purpose of an interview, Do's and Don't's of an interview
- **Giving Presentations:** Dealing with Fears, Planning your Presentation, Structuring Your Presentation, Delivering Your Presentation, Techniques of Delivery

### UNIT – V

04 Hours

- **Group Discussion:** Introduction, Communication skills in group discussion, Do's and Don't's of group discussion

## English Grammar and Creative Writing (BP105T-A)

### CO: COURSE OBJECTIVES

**CO-1 Understanding of Grammar:** Students will demonstrate a solid understanding of English grammar rules and conventions, including sentence structure, punctuation, and usage.

**CO-2 Application of Grammar in Writing:** Students will effectively apply grammatical concepts to enhance clarity and coherence in their writing, ensuring their work is polished and professional.

**CO-3 Creative Expression:** Students will develop their unique voice and style in creative writing, experimenting with different genres and forms, such as poetry, short stories, and narrative essays.

**CO-4 Revision and Editing Skills:** Students will engage in the revision process, applying constructive feedback to improve their writing and develop skills in self-editing.

**CO-5 Critical Reading Skills:** Students will analyze various texts, recognizing the use of grammar, style, and narrative techniques, and articulating their effects on meaning and reader engagement.

**CO-6: Presentation Skills:** Students will present their creative work to peers, articulating their writing choices and engaging with audience feedback.

## Course Contents

### UnitI: Proficiency in English Grammar

- Understand the fundamental rules of English grammar, including sentence structure, verb tenses, punctuation, and usage.
- Apply grammatical concepts in writing and speaking with accuracy and clarity.

### UnitII: Development of Writing Skills

- Develop clear and effective writing techniques for different purposes, such as descriptive, narrative, expository, and persuasive writing.
- Organize and structure ideas cohesively in paragraphs and essays.

### UnitIII: Creativity in Writing

- Explore and express creativity through various forms of writing like short stories, poetry, and essays.
- Experiment with different literary styles, tones, and voices to enhance personal expression.

### UnitIV: Understanding of Literary Techniques

- Recognize and apply literary devices such as metaphors, similes, imagery, symbolism, and personification in creative writing.
- Analyze and appreciate the use of these devices in literature and use them to improve personal writing.

### UnitV: Enhanced Reading and Interpretation Skills

- Read and interpret various literary and non-literary texts to understand different styles, perspectives, and techniques.
- Engage critically with texts to enhance understanding and application of grammar rules.

### UnitVI: Confidence in Communication

- Gain confidence in expressing ideas, opinions, and creative thoughts through well-structured, grammatically correct writing.
- Develop oral communication skills through discussions, presentations, and creative recitations.

### Suggested Readings:

- *Wren & Martin's High School English Grammar and Composition" by P.C. Wren and H. Martin*

*A comprehensive guide to grammar rules, sentence structure, and composition that is widely used in academic courses.*

- *"English Grammar in Use" by Raymond Murphy*

*A popular self-study grammar reference book, ideal for intermediate learners to clarify grammatical concepts.*

• *"Practical English Usage" by Michael Swan*  
*An authoritative reference book covering problem areas in English grammar and usage.*

• *"The Elements of Style" by William Strunk Jr. and E.B. White*  
*A concise handbook on writing style, grammar, and clarity in writing.*

#### **COURSE OUTCOMES-**

**COs-1** Students will develop the ability to write clearly and concisely for a variety of purposes, including essays, reports, and formal communications.

**COs-2** Students will be able to understand and apply advanced grammar rules, including sentence structures, punctuation, verb usage, and tenses.

**COs-3** Students will develop skills in self-editing and revising drafts to improve grammar, clarity, and overall style. And learn the peer-review process and incorporate constructive feedback to refine writing.

**COs-4** Students will develop skills to gain confidence in articulating thoughts and ideas in written form, particularly in creative genres.

#### **Speaking and Presentation Skills (BP105T-B)**

##### **CO: COURSE OBJECTIVES**

**CO-1** Learn about improve the ability to articulate thoughts clearly and confidently in various contexts, including discussions, debates, and presentations.

**CO-2** Learn techniques to manage speech anxiety and develop a strong stage presence. Build confidence in delivering speeches or presentations to an audience, with emphasis on clarity, organization, and engagement.

**CO-3** Learn to structure a presentation logically with a clear introduction, body, and conclusion to communicate messages effectively.

**CO-4** Develop an understanding of how to tailor presentations and speeches according to the needs, expectations, and interests of different audiences. And learn the strategies to engage the audience through storytelling, questions, and visual aids.

**CO-5** Learn to improve body language, facial expressions, eye contact, and gestures to complement verbal communication and create a stronger impact.

#### ***Course Contents***

##### **Unit I: Develop Effective Oral Communication**

- Improve the ability to articulate thoughts clearly and confidently in various contexts, including discussions, debates, and presentations.
- Enhance fluency, pronunciation, and diction for effective verbal communication.

- Build confidence in delivering speeches or presentations to an audience, with emphasis on clarity, organization, and engagement.
- Learn techniques to manage speech anxiety and develop a strong stage presence.

### **Unit II: Master the Art of Public Speaking**

- Build confidence in delivering speeches or presentations to an audience, with emphasis on clarity, organization, and engagement.
- Learn techniques to manage speech anxiety and develop a strong stage presence.

### **Unit III: Structure and Organize Presentations**

- Learn to structure a presentation logically with a clear introduction, body, and conclusion to communicate messages effectively.
- Focus on the use of transitions, signposting, and summary techniques to guide audiences through content seamlessly.

### **Unit IV: Audience Analysis and Engagement**

- Develop an understanding of how to tailor presentations and speeches according to the needs, expectations, and interests of different audiences.
- Learn strategies to engage the audience through storytelling, questions, and visual aids.

### **Unit V: Handle Q&A Sessions and Impromptu Speaking**

- Learn techniques for handling questions confidently and effectively during Q&A sessions, discussions, or after presentations.
- Practice impromptu speaking to improve the ability to think and respond quickly and coherently in unplanned scenarios.

### **Suggested Readings:**

**Public Speaking: An Audience-Centered Approach** by Steven A. Beebe and Susan J. Beebe

This book emphasizes the importance of understanding the audience while preparing and delivering speeches.

**"Speak With No Fear: Go from a Nervous, Nauseated, and Sweaty Speaker to an Excited, Energized, and Passionate Presenter"** by Mike Acker

Provides practical tips and strategies for overcoming fear and anxiety in public speaking.

## **COURSE OUTCOMES**

**COs-1** Students will develop the ability to communicate ideas clearly and confidently in various speaking situations, including formal and informal contexts. And also to improve pronunciation, and fluency in spoken English.

**COs-2** Learn to engage an audience effectively, maintain attention, and deliver impactful presentations. Develop the ability to tailor communication to different audiences, understanding the importance of audience demographics, interests, and feedback.

**COs-3** Build confidence to speak in front of large or small groups, handling nerves and overcoming the fear of public speaking. Gain practical experience through various public speaking activities and assignments that boost self-assurance.

**COs-4** Develop skills in delivering persuasive and informative speeches, including the use of evidence, logic, and emotional appeal. Learn how to construct well-reasoned arguments and present them convincingly to an audience.

**COs-5** Learn to manage speaking time efficiently, adhering to time limits while ensuring all key points are addressed. Develop the ability to adjust content and pace according to time constraints without sacrificing clarity or effectiveness.

### **Additional Benefits:**

- Improved teamwork and collaboration through group presentations.
- Enhanced critical thinking and problem-solving abilities when addressing audience questions or unexpected issues during presentations.

## **Life Management and Soft Skills (BP105T-C)**

### **CO: COURSE OBJECTIVES**

**CO-1** Enhance self-awareness by understanding personal strengths, weaknesses, values, and emotions. Improve emotional intelligence to better manage stress, emotions, and interpersonal relationships.

**CO-2** Develop organizational skills to balance personal, academic, and professional responsibilities effectively. Learn techniques to manage time efficiently, prioritize tasks, and set realistic goals.

**CO-3** Improve the ability to work collaboratively with others, including in team settings, by fostering cooperation, adaptability, and conflict resolution. Strengthen interpersonal skills to build strong, respectful relationships with peers, colleagues, and mentors.

**CO-4** Develop the ability to solve problems creatively, assess risks, and evaluate options effectively. Learn critical thinking and analytical skills to approach challenges logically and make informed decisions.

**CO-5** Understand the key principles of leadership and develop skills to inspire, motivate, and guide others. Learn influencing techniques to build trust, persuade effectively, and lead with empathy and confidence.

**CO-6** Develop a strong work ethic, accountability, and professionalism in both academic and workplace settings. Understand the importance of integrity, ethics, and responsibility in personal and professional life.

**CO-7** Explore career opportunities and develop strategies for career planning, setting short-term and long-term

goals. Learn how to prepare resumes, cover letters, and practice interview skills for job readiness.

## Course Contents

### Unit I: Introduction to Life Management and Soft Skills

- **Definition and Importance**  
Understanding the concept of life management and soft skills, and why they are crucial for personal and professional success.
- **Key Areas of Life Management**  
Time management, stress management, decision-making, and problem-solving skills.

### Unit II: Time Management

- **Principles of Time Management**  
Prioritizing tasks, setting goals, and creating effective schedules.
- **Time-Management Tools and Techniques**  
Using planners, to-do lists, digital tools, and calendars to manage time efficiently.
- **Work-Life Balance**  
Techniques for balancing personal and professional responsibilities.

### Unit III: Interpersonal Skills

- **Building Positive Relationships**  
Developing trust, empathy, and respect in personal and professional relationships.
- **Teamwork and Collaboration**  
Understanding the dynamics of working in teams, effective collaboration, and conflict resolution.
- **Networking and Social Skills**  
Building professional networks, improving social skills, and expanding connections.

### Unit IV: Interview and Job-Readiness Skills

- **Preparing for Interviews**  
Resume building, preparing for common interview questions, and conducting mock interviews.
- **Workplace Adaptation**  
Adjusting to new work environments, understanding corporate culture, and integrating into teams smoothly.

### Unit V Professional Etiquette and Workplace Skills

- **Professionalism in the Workplace**  
Maintaining a positive attitude, dressing appropriately, and upholding workplace etiquette.
- **Business Etiquette**  
Understanding professional conduct in meetings, email communication, and corporate environments.
- **Workplace Ethics and Integrity**  
Importance of ethical behavior and maintaining integrity in professional settings.

### Suggested Readings:

1. **"Emotional Intelligence: Why It Can Matter More Than IQ"** by Daniel Goleman  
A foundational book that explores the concept of emotional intelligence (EQ) and how it impacts personal and professional success.
2. **"The Seven Habits of Highly Effective People"** by Stephen R. Covey  
A classic on personal and professional effectiveness, focusing on habit formation, self-management, and interpersonal relations.
3. **"Difficult Conversations: How to Discuss What Matters Most"** by Douglas Stone, Bruce Patton, and Sheila Heen. A practical guide for navigating challenging conversations, resolving conflicts, and maintaining strong relationships

**4. The Art of Thinking Clearly"** by Rolf Dobelli .Focuses on cognitive biases and common errors in thinking, helping individuals make better decisions in both personal and professional contexts.

### **COURSE OUTCOMES**

**COs-1** Apply problem-solving techniques to resolve conflicts and challenges both in personal and professional contexts. Develop critical thinking skills to analyze situations and make informed decisions.

**COs-2** Strengthen both verbal and non-verbal communication skills for clear, confident, and effective interaction. Develop listening skills to engage in meaningful conversations and foster positive relationships.

**COs-3** Understand the importance of professionalism, work ethics, and integrity in the workplace. Learn business etiquette, including dress code, behavior, and professional interactions in various contexts.

**COs-4** Gain confidence in delivering speeches, presentations, and engaging in public discussions. Learn how to organize ideas, articulate thoughts clearly, and present effectively to different audiences.

**COs-5** Learn to set realistic, achievable personal and professional goals using the SMART (Specific, Measurable, Achievable, Relevant, Time-bound) framework.

## **BP111P.COMMUNICATION SKILLS (Practical)**

**2 Hours / week**

The following learning modules are to be conducted using wordsworth<sup>®</sup> English language lab software

### **Basic communication covering the following topics**

Meeting People

Asking Questions

Making Friends

What did you do?

Do's and Dont's

### **Pronunciations covering the following topics**

Pronunciation (Consonant Sounds)

Pronunciation and Nouns

Pronunciation (Vowel Sounds)

### **Advanced Learning**

Listening Comprehension / Direct and Indirect Speech

Figures of Speech

Effective Communication

Writing Skills

Effective Writing

Interview Handling Skills

E-Mail etiquette

Presentation Skills

### **Recommended Books: (Latest Edition)**

1. Basic communication skills for Technology, Andreja. J. Ruther Ford, 2<sup>nd</sup> Edition, Pearson Education, 2011
2. Communication skills, Sanjay Kumar, Pushpalata, 1<sup>st</sup> Edition, Oxford Press, 2011
3. Organizational Behaviour, Stephen .P. Robbins, 1<sup>st</sup> Edition, Pearson, 2013
4. Brilliant- Communication skills, Gill Hasson, 1<sup>st</sup> Edition, Pearson Life, 2011
5. The Ace of Soft Skills: Attitude, Communication and Etiquette for success, Gopala Swamy Ramesh, 5<sup>th</sup> Edition, Pearson, 2013
6. Developing your influencing skills, Deborah Dalley, Lois Burton, Margaret, Green hall, 1st Edition Universe of Learning LTD, 2010
7. Communication skills for professionals, Konar nira, 2<sup>nd</sup> Edition, New arrivals – PHI, 2011
8. Personality development and soft skills, Barun K Mitra, 1<sup>st</sup> Edition, Oxford Press, 2011
9. Soft skill for everyone, Butter Field, 1st Edition, Cengage Learning india pvt.ltd, 2011
10. Soft skills and professional communication, Francis Peters SJ, 1<sup>st</sup> Edition, Mc Graw Hill Education, 2011
11. Effective communication, John Adair, 4<sup>th</sup> Edition, Pan Mac Millan, 2009
12. Bringing out the best in people, Aubrey Daniels, 2<sup>nd</sup> Edition, Mc Graw Hill, 1999

### **English Grammar and Creative Writing (BP111P-A) Practical**

#### **CO: COURSE OBJECTIVES**

**CO-1** Ensure a solid understanding of English grammar, including sentence structure, verb tenses, punctuation, parts of speech, and syntax. Students will demonstrate correct usage of grammar in written and spoken communication.

**CO-2** Students will be able to write clear, coherent, and structured essays, stories, and reports. Introduce and practice various writing techniques, such as descriptive writing, narrative structure, and persuasive writing.

**CO-3** Foster creative thinking and the ability to express ideas imaginatively through written language. Enhance students' ability to read and analyze various forms of written texts for structure, grammar, and style.

**CO-4** Improve overall communication skills, both written and oral, for different audiences and purposes. Encourage students to develop their unique voice and style in writing.

#### **Practical:**

1. **Writing Prompts:** Daily or weekly writing exercises to foster creativity.
2. **Workshops:** Collaborative peer reviews and group critiques.
3. **Assignments:** Submission of short stories, essays, or poetry with revisions based on feedback.
4. **Journaling:** Regular personal writing journals to track progress, reflections, and ideas.
5. **Quizzes and Tests:** Focused on grammar, vocabulary, and punctuation.
6. **Creative Projects:** Submission of polished pieces of creative writing (stories, poems, or essays).
7. **Class Participation:** Engagement in peer reviews, discussions, and workshops.

## **COURSE OUTCOMES**

**COs-1** Students will demonstrate a comprehensive understanding of English grammar, including sentence structure, syntax, punctuation, and usage rules. This will aid in improving both written and spoken communication skills.

**COs-2** Students will develop the ability to craft original works of fiction, poetry, and other creative writing forms by exploring various techniques such as characterization, plot development, and narrative voice.

**COs-3** Through the analysis of literary works and creative writing exercises, students will enhance their critical thinking and analytical abilities, helping them understand the subtleties of language and meaning.

**COs-4** Students will learn to communicate their ideas clearly, coherently, and persuasively in writing, both in creative formats (stories, poems, etc.) and more structured forms (essays, reports).

**COs-5** Students will gain skills in self-editing and peer editing, learning how to refine and improve their drafts through multiple revisions and constructive feedback from peers and instructors.

**COs-6** Students will be exposed to various literary genres and forms, fostering an appreciation for diverse writing styles and approaches in literature and creative writing.

**COs-7** By experimenting with different genres and writing techniques, students will be able to discover and refine their personal writing style and voice.

### **Speaking and Presentation Skills (BP111P-B) Practical**

#### **CO: COURSE OBJECTIVES**

**CO-1** Enhance students to improve clarity, tone, and articulation for effective verbal communication. Practice structuring coherent and concise spoken messages.

**CO-2** Build confidence in speaking before an audience. And to overcome common speech-related anxieties.

**CO-3** Learn to design and deliver engaging and professional presentations.

**CO-4** Develop strategies for maintaining audience interest and attention. Practice appropriate non-verbal cues to reinforce spoken messages.

**CO-5** Learn how to integrate slides, charts, graphs, and other visual tools seamlessly into presentations. Practice peer review and learn from others' speaking techniques.

**CO-6** Practice adhering to time limits while maintaining content quality and flow. Organize presentation content effectively to fit within allotted time.

#### **Practical:**

1. **Confidence Building:** Overcoming stage fright and anxiety.
2. **Vocal Techniques:** Projection, tone modulation, clarity, and articulation.
3. **Body Language:** Posture, gestures, eye contact, and facial expressions.
4. **Audience Engagement:** Interacting with and addressing the audience's needs.
5. **Visual Aids:** Using PowerPoint, info graphics, and other visual tools effectively.
6. **Group Discussions:** Techniques for leading and contributing to group conversations.

7. **Debates:** Structuring arguments, listening actively, and providing counterpoints.
8. **Interviews and Networking:** Practicing one-on-one professional communication, including mock interviews
9. **Online Presentations:** Practicing virtual communication platforms such as Zoom, Google Meet, or Microsoft Teams.

## **COURSE OUTCOMES**

**COs-1** Students will develop the ability to articulate ideas clearly and confidently in both spoken and written formats, using appropriate communication techniques.

**COs-2** Students will demonstrate proficiency in public speaking by delivering structured and impactful presentations, taking into account audience needs and context.

**COs-3** Students will learn to use both verbal and non-verbal cues effectively to enhance their communication, including body language, eye contact, and tone.

**COs-4** Students will gain experience in incorporating various visual aids (PowerPoint, charts, props, etc.) into their presentations to improve clarity and engagement.

**COs-5** Students will be able to respond to questions and manage discussions confidently, handling both expected and unexpected queries during and after presentations.

**COs-6** Students will learn techniques to engage the audience, ensuring active participation and maintaining attention throughout their presentations.

**COs-7** Students will practice structuring presentations to fit within given time limits, focusing on key points and delivering concise messages without rushing.

### **Suggested Readings:**

- **"The Art of Public Speaking" by Dale Carnegie** A classic that covers the fundamentals of effective public speaking, providing techniques for confidence-building, engagement, and audience connection.
- **"Presentation Zen: Simple Ideas on Presentation Design and Delivery" by Garr Reynolds** Focuses on creating presentations that are visually engaging and effectively delivered. This book covers everything from slide design to storytelling techniques.
- **"The Quick and Easy Way to Effective Speaking" by Dale Carnegie** Another excellent resource from Dale Carnegie that provides actionable advice for improving public speaking through practice and understanding audience psychology.

## **Life Management and Soft Skills (BP111PC) Practical**

### **COURSE OBJECTIVES**

**CO-1** To promote self-awareness and personal growth by encouraging self-reflection and introspection. To help students understand their strengths, weaknesses, and areas of improvement.

**CO-2** To improve students' communication, collaboration, and relationship-building skills. And to develop effective teamwork and leadership skills by working in diverse groups.

**CO-3** To introduce students to techniques for managing stress and resolving conflicts constructively.

**CO-4** To improve professional etiquette, work ethics, and adaptability in diverse work environments. And to help students develop essential skills like presentation, negotiation, and public speaking.

**CO-5** To teach students strategies to maintain mental and physical health while managing various life domains.

### **Practical:**

1. Create a daily and weekly schedule for better productivity.
  2. Deliver a short presentation or speech
  3. Break down long-term goals into actionable steps.
  4. Keep a journal on stress triggers and how you manage them.
  5. Reflect on team dynamics, leadership roles, and collaboration methods.
  6. Solve a problem using critical thinking and a structured approach.
  7. Attend a networking event or connect with professionals on LinkedIn.
  8. Develop a personal development plan (PDP) for improving skills over time.
  9. Create a plan to better manage work, studies, and personal time.
- **Workshops:** To practice interpersonal skills, presentations, and team collaboration.
  - **Group Discussions:** To simulate real-life workplace scenarios and team interactions.
  - **Presentations:** Practicing public speaking and confidence building.

### **COURSE OUTCOMES**

**COs-1** Develop self-awareness, including strengths, weaknesses, emotional intelligence, and personal goals. Learn how to manage time, stress, and personal resources effectively.

**COs-2** Enhance verbal and non-verbal communication skills, including listening, articulation, public speaking, and presentation techniques.

**COs-3** Students will strengthen interpersonal skills such as teamwork, collaboration, conflict resolution, and empathy to build effective relationships in personal and professional settings.

**COs-4** Students will understand leadership dynamics and acquire skills to work in teams, including leadership, delegation, motivation, and conflict resolution in group activities.

**COs-5** Students will be able to develop skills for setting realistic career goals, understanding career paths, and creating strategies for career advancement, including personal branding and networking.

**COs-6** Students will learn techniques to engage the audience, ensuring active participation and maintaining attention throughout their presentations.

**COs-7** Learn about professional behavior, workplace ethics, and etiquette, such as dressing, communication in formal settings, and adherence to ethical guidelines in professional environments.

### **Suggested Readings:**

- *Emotional Intelligence: Why It Can Matter More Than IQ* by Daniel Goleman
- *Getting Things Done: The Art of Stress-Free Productivity* by David Allen
- *The Relaxation and Stress Reduction Workbook* by Martha Davis, Elizabeth Robbins Eshelman, and Matthew McKay
- *The 7 Habits of Highly Effective People* by Stephen R. Covey

## **BP 106RBT.REMEDIAL BIOLOGY (Theory)**

**30 Hours**

**Scope:** To learn and understand the components of living world, structure and functional system of plant and animal kingdom.

**Objectives:** Upon completion of the course, the student shall be able to

- know the classification and salient features of five kingdoms of life
- understand the basic components of anatomy & physiology of plant
- know understand the basic components of anatomy & physiology animal with special reference to human

### **UNIT I**

**07 Hours**

#### **Living world:**

- Definition and characters of living organisms
- Diversity in the living world
- Binomial nomenclature
- Five kingdoms of life and basis of classification. Salient features of Monera, Protista, Fungi, Animalia and Plantae, Virus,

#### **Morphology of Flowering plants**

- Morphology of different parts of flowering plants – Root, stem, inflorescence, flower, leaf, fruit, seed.
- General Anatomy of Root, stem, leaf of monocotyledons & Dicotyledones.

### **UNIT II**

**07 Hours**

#### **Body fluids and circulation**

- Composition of blood, blood groups, coagulation of blood
- Composition and functions of lymph
- Human circulatory system
- Structure of human heart and blood vessels
- Cardiac cycle, cardiac output and ECG

#### **Digestion and Absorption**

- Human alimentary canal and digestive glands
- Role of digestive enzymes
- Digestion, absorption and assimilation of digested food

#### **Breathing and respiration**

- Human respiratory system
- Mechanism of breathing and its regulation
- Exchange of gases, transport of gases and regulation of respiration
- Respiratory volumes

### **UNIT III**

**07 Hours**

#### **Excretory products and their elimination**

- Modes of excretion
- Human excretory system- structure and function
- Urine formation
- Rennin angiotensin system

#### **Neural control and coordination**

- Definition and classification of nervous system
- Structure of a neuron
- Generation and conduction of nerve impulse
- Structure of brain and spinal cord
- Functions of cerebrum, cerebellum, hypothalamus and medulla oblongata

#### **Chemical coordination and regulation**

- Endocrine glands and their secretions
- Functions of hormones secreted by endocrine glands

#### **Human reproduction**

- Parts of female reproductive system
- Parts of male reproductive system
- Spermatogenesis and Oogenesis
- Menstrual cycle

### **UNIT IV**

**05 Hours**

#### **Plants and mineral nutrition:**

- Essential mineral, macro and micronutrients
- Nitrogen metabolism, Nitrogen cycle, biological nitrogen fixation

#### **Photosynthesis**

- Autotrophic nutrition, photosynthesis, Photosynthetic pigments, Factors affecting photosynthesis.

### **UNIT V**

**04 Hours**

**Plant respiration:**Respiration, glycolysis, fermentation (anaerobic).

#### **Plant growth and development**

- Phases and rate of plant growth, Condition of growth,Introduction to plant growth regulators

#### **Cell - The unit of life**

- Structure and functions of cell and cell organelles.Cell division

#### **Tissues**

- Definition, types of tissues, location and functions.

**Text Books**

- a. Text book of Biology by S. B. Gokhale
- b. A Text book of Biology by Dr. Thulajappa and Dr. Seetaram.

**Reference Books**

- a. A Text book of Biology by B.V. Sreenivasa Naidu
- b. A Text book of Biology by Naidu and Murthy
- c. Botany for Degree students By A.C.Dutta.
- d.Outlines of Zoology by M. Ekambaranatha ayyer and T. N. Ananthkrishnan.
- e. A manual for pharmaceutical biology practical by S.B. Gokhale and C. K. Kokate

## **BP112RBP.REMEDIAL BIOLOGY (Practical)**

**30 Hours**

1. Introduction to experiments in biology
  - a) Study of Microscope
  - b) Section cutting techniques
  - c) Mounting and staining
  - d) Permanent slide preparation
2. Study of cell and its inclusions
3. Study of Stem, Root, Leaf, seed, fruit, flower and their modifications
4. Detailed study of frog by using computer models
5. Microscopic study and identification of tissues pertinent to Stem, Root  
Leaf, seed, fruit and flower
6. Identification of bones
7. Determination of blood group
8. Determination of blood pressure
9. Determination of tidal volume

### **Reference Books**

1. Practical human anatomy and physiology. by S.R.Kale and R.R.Kale.
2. A Manual of pharmaceutical biology practical by S.B.Gokhale, C.K.Kokate and S.P.Shriwastava.
3. Biology practical manual according to National core curriculum .Biology forum of Karnataka. Prof .M.J.H.Shafi

## BP 106RMT.REMEDIAL MATHEMATICS (Theory)

30 Hours

**Scope:** This is an introductory course in mathematics. This subject deals with the introduction to Partial fraction, Logarithm, matrices and Determinant, Analytical geometry, Calculus, differential equation and Laplace transform.

**Objectives:** Upon completion of the course the student shall be able to:-

1. Know the theory and their application in Pharmacy
2. Solve the different types of problems by applying theory
3. Appreciate the important application of mathematics in Pharmacy

### Course Content:

#### UNIT – I

06 Hours

##### • Partial fraction

Introduction, Polynomial, Rational fractions, Proper and Improper fractions, Partial fraction, Resolving into Partial fraction, Application of Partial Fraction in Chemical Kinetics and Pharmacokinetics

##### • Logarithms

Introduction, Definition, Theorems/Properties of logarithms, Common logarithms, Characteristic and Mantissa, worked examples, application of logarithm to solve pharmaceutical problems.

##### • Function:

Real Valued function, Classification of real valued functions,

##### • Limits and continuity :

Introduction, Limit of a function, Definition of limit of a function ( $\epsilon - \delta$ ) definition),  $\lim_{x \rightarrow a} \frac{x^n - a^n}{x - a} = na^{n-1}$ ,  $\lim_{\theta \rightarrow 0} \frac{\sin \theta}{\theta} = 1$ ,

#### UNIT –II

06 Hours

##### • Matrices and Determinant:

Introduction matrices, Types of matrices, Operation on matrices, Transpose of a matrix, Matrix Multiplication, Determinants, Properties of determinants, Product of determinants, Minors and co-Factors, Adjoint or adjugate of a square matrix, Singular and non-singular matrices, Inverse of a matrix, Solution of system of linear of equations using matrix method, Cramer's rule, Characteristic equation and roots of a square matrix, Cayley-Hamilton theorem, Application of Matrices in solving Pharmacokinetic equations

### UNIT – III

06 Hours

#### • Calculus

**Differentiation** : Introductions, Derivative of a function, Derivative of a constant, Derivative of a product of a constant and a function, Derivative of the sum or difference of two functions, Derivative of the product of two functions (product formula), Derivative of the quotient of two functions (Quotient formula) – **Without Proof**, Derivative of  $x^n$  w.r.t  $x$ , where  $n$  is any rational number, Derivative of  $e^x$ , Derivative of  $\log_e x$ , Derivative of  $a^x$ , Derivative of trigonometric functions from first principles (**without Proof**), Successive Differentiation, Conditions for a function to be a maximum or a minimum at a point. Application

### UNIT – IV

06 Hours

#### • Analytical Geometry

**Introduction:** Signs of the Coordinates, Distance formula,

**Straight Line** : Slope or gradient of a straight line, Conditions for parallelism and perpendicularity of two lines, Slope of a line joining two points, Slope – intercept form of a straight line

#### **Integration:**

Introduction, Definition, Standard formulae, Rules of integration, Method of substitution, Method of Partial fractions, Integration by parts, definite integrals, application

### UNIT-V

06 Hours

- **Differential Equations** : Some basic definitions, Order and degree, Equations in separable form, Homogeneous equations, Linear Differential equations, Exact equations, **Application in solving Pharmacokinetic equations**
- **Laplace Transform** : Introduction, Definition, Properties of Laplace transform, Laplace Transforms of elementary functions, Inverse Laplace transforms, Laplace transform of derivatives, Application to solve Linear differential equations, **Application in solving Chemical kinetics and Pharmacokinetics equations**

### Recommended Books (Latest Edition)

1. Differential Calculus by Shanthinarayan
2. Pharmaceutical Mathematics with application to Pharmacy by Panchaksharappa Gowda D.H.
3. Integral Calculus by Shanthinarayan
4. Higher Engineering Mathematics by Dr.B.S.Grewal

## **Semester II**

## **BP 201T. HUMAN ANATOMY AND PHYSIOLOGY-II (Theory)**

**45 Hours**

**Scope:** This subject is designed to impart fundamental knowledge on the structure and functions of the various systems of the human body. It also helps in understanding both homeostatic mechanisms. The subject provides the basic knowledge required to understand the various disciplines of pharmacy.

**Objectives:** Upon completion of this course the student should be able to:

1. Explain the gross morphology, structure and functions of various organs of the human body.
2. Describe the various homeostatic mechanisms and their imbalances.
3. Identify the various tissues and organs of different systems of human body.
4. Perform the hematological tests like blood cell counts, haemoglobin estimation, bleeding/clotting time etc and also record blood pressure, heart rate, pulse and respiratory volume.
5. Appreciate coordinated working pattern of different organs of each system
6. Appreciate the interlinked mechanisms in the maintenance of normal functioning (homeostasis) of human body.

### **Course Content:**

#### **Unit I**

**10 hours**

- **Nervous system**

Organization of nervous system, neuron, neuroglia, classification and properties of nerve fibre, electrophysiology, action potential, nerve impulse, receptors, synapse, neurotransmitters.

Central nervous system: Meninges, ventricles of brain and cerebrospinal fluid. structure and functions of brain (cerebrum, brain stem, cerebellum), spinal cord (gross structure, functions of afferent and efferent nerve tracts, reflex activity)

#### **Unit II**

**06 hours**

- **Digestive system**

Anatomy of GI Tract with special reference to anatomy and functions of stomach, ( Acid production in the stomach, regulation of acid production through parasympathetic nervous system, pepsin role in protein digestion) small intestine

and large intestine, anatomy and functions of salivary glands, pancreas and liver, movements of GIT, digestion and absorption of nutrients and disorders of GIT.

- **Energetics**

Formation and role of ATP, Creatinine Phosphate and BMR.

### **Unit III**

- **Respiratory system** **10 hours**

Anatomy of respiratory system with special reference to anatomy of lungs, mechanism of respiration, regulation of respiration

Lung Volumes and capacities transport of respiratory gases, artificial respiration, and resuscitation methods.

- **Urinary system**

Anatomy of urinary tract with special reference to anatomy of kidney and nephrons, functions of kidney and urinary tract, physiology of urine formation, micturition reflex and role of kidneys in acid base balance, role of RAS in kidney and disorders of kidney.

### **Unit IV**

**10 hours**

- **Endocrine system**

Classification of hormones, mechanism of hormone action, structure and functions of pituitary gland, thyroid gland, parathyroid gland, adrenal gland, pancreas, pineal gland, thymus and their disorders.

### **Unit V**

**09 hours**

- **Reproductive system**

Anatomy of male and female reproductive system, Functions of male and female reproductive system, sex hormones, physiology of menstruation, fertilization, spermatogenesis, oogenesis, pregnancy and parturition

- **Introduction to genetics**

Chromosomes, genes and DNA, protein synthesis, genetic pattern of inheritance

## **BP 207 P. HUMAN ANATOMY AND PHYSIOLOGY (Practical)**

**4 Hours/week**

Practical physiology is complimentary to the theoretical discussions in physiology. Practicals allow the verification of physiological processes discussed in theory classes through experiments on living tissue, intact animals or normal human beings. This is helpful for developing an insight on the subject.

1. To study the integumentary and special senses using specimen, models, etc.,
2. To study the nervous system using specimen, models, etc.,
3. To study the endocrine system using specimen, models, etc
4. To demonstrate the general neurological examination
5. To demonstrate the function of olfactory nerve
6. To examine the different types of taste.
7. To demonstrate the visual acuity
8. To demonstrate the reflex activity
9. Recording of body temperature
10. To demonstrate positive and negative feedback mechanism.
  
11. Determination of tidal volume and vital capacity.
12. Study of digestive, respiratory, cardiovascular systems, urinary and reproductive systems with the help of models, charts and specimens.
13. Recording of basal mass index .
14. Study of family planning devices and pregnancy diagnosis test.
15. Demonstration of total blood count by cell analyser
16. Permanent slides of vital organs and gonads.

### **Recommended Books (Latest Editions)**

1. Essentials of Medical Physiology by K. Sembulingam and P. Sembulingam. Jaypee brothers medical publishers, New Delhi.
2. Anatomy and Physiology in Health and Illness by Kathleen J.W. Wilson, Churchill Livingstone, New York
3. Physiological basis of Medical Practice-Best and Tailor. Williams & Wilkins Co,Riverview,MI USA

4. Text book of Medical Physiology- Arthur C, Guyton and John. E. Hall. Miamisburg, OH, U.S.A.
5. Principles of Anatomy and Physiology by Tortora Grabowski. Palmetto, GA, U.S.A.
6. Textbook of Human Histology by Inderbir Singh, Jaypee brothers medical publishers, New Delhi.
7. Textbook of Practical Physiology by C.L. Ghai, Jaypee brothers medical publishers, New Delhi.
8. Practical workbook of Human Physiology by K. Srinageswari and Rajeev Sharma, Jaypee brother's medical publishers, New Delhi.

**Reference Books:**

1. Physiological basis of Medical Practice-Best and Tailor. Williams & Wilkins Co, Riverview, MI USA
2. Text book of Medical Physiology- Arthur C, Guyton and John. E. Hall. Miamisburg, OH, U.S.A.
3. Human Physiology (vol 1 and 2) by Dr. C.C. Chatterrje ,Academic Publishers Kolkata

## BP202T. PHARMACEUTICAL ORGANIC CHEMISTRY –I (Theory)

45 Hours

**Scope:** This subject deals with classification and nomenclature of simple organic compounds, structural isomerism, intermediates forming in reactions, important physical properties, reactions and methods of preparation of these compounds. The syllabus also emphasizes on mechanisms and orientation of reactions.

**Objectives:** Upon completion of the course the student shall be able to

1. write the structure, name and the type of isomerism of the organic compound
2. write the reaction, name the reaction and orientation of reactions
3. account for reactivity/stability of compounds,
4. identify/confirm the identification of organic compound

### Course Content:

General methods of preparation and reactions of compounds superscripted with asterisk (\*) to be explained

To emphasize on definition, types, classification, principles/mechanisms, applications, examples and differences

### UNIT-I

07 Hours

- **Classification, nomenclature and isomerism**

Classification of Organic Compounds

Common and IUPAC systems of nomenclature of organic compounds

(up to 10 Carbons open chain and carbocyclic compounds)

Structural isomerisms in organic compounds

### UNIT-II 10 Hours

- **Alkanes\*, Alkenes\* and Conjugated dienes\***

SP<sup>3</sup> hybridization in alkanes, Halogenation of alkanes, uses of paraffins.

Stabilities of alkenes, SP<sup>2</sup> hybridization in alkenes

E<sub>1</sub> and E<sub>2</sub> reactions – kinetics, order of reactivity of alkyl halides, rearrangement of carbocations, Saytzeffs orientation and evidences. E<sub>1</sub> versus E<sub>2</sub> reactions, Factors affecting E<sub>1</sub> and E<sub>2</sub> reactions. Ozonolysis, electrophilic addition reactions of alkenes, Markownikoff's orientation, free radical addition reactions of alkenes, Anti Markownikoff's orientation.

Stability of conjugated dienes, Diel-Alder, electrophilic addition, free radical addition reactions of conjugated dienes, allylic rearrangement

### UNIT-III 10 Hours

- **Alkyl halides\***

SN<sub>1</sub> and SN<sub>2</sub> reactions - kinetics, order of reactivity of alkyl halides, stereochemistry and rearrangement of carbocations.

SN<sub>1</sub> versus SN<sub>2</sub> reactions, Factors affecting SN<sub>1</sub> and SN<sub>2</sub> reactions

Structure and uses of ethylchloride, Chloroform, trichloroethylene, tetrachloroethylene, dichloromethane, tetrachloromethane and iodoform.

- **Alcohols\***- Qualitative tests, Structure and uses of Ethyl alcohol, Methyl alcohol, chlorobutanol, Cetosteryl alcohol, Benzyl alcohol, Glycerol, Propylene glycol

#### **UNIT-IV 10 Hours**

- **Carbonyl compounds\* (Aldehydes and ketones)**

Nucleophilic addition, Electromeric effect, aldol condensation, Crossed Aldol condensation, Cannizzaro reaction, Crossed Cannizzaro reaction, Benzoin condensation, Perkin condensation, qualitative tests, Structure and uses of Formaldehyde, Paraldehyde, Acetone, Chloral hydrate, Hexamine, Benzaldehyde, Vanilin, Cinnamaldehyde.

#### **UNIT-V**

**08 Hours**

- **Carboxylic acids\***

Acidity of carboxylic acids, effect of substituents on acidity, inductive effect and qualitative tests for carboxylic acids, amide and ester

Structure and Uses of Acetic acid, Lactic acid, Tartaric acid, Citric acid, Succinic acid. Oxalic acid, Salicylic acid, Benzoic acid, Benzyl benzoate, Dimethyl phthalate, Methyl salicylate and Acetyl salicylic acid

- **Aliphatic amines\*** - Basicity, effect of substituent on Basicity. Qualitative test, Structure and uses of Ethanolamine, Ethylenediamine, Amphetamine

## **BP208P. PHARMACEUTICAL ORGANIC CHEMISTRY -I (Practical)**

**4 Hours / week**

1. Systematic qualitative analysis of unknown organic compounds like
  1. Preliminary test: Color, odour, aliphatic/aromatic compounds, saturation and unsaturation, etc.
  2. Detection of elements like Nitrogen, Sulphur and Halogen by Lassaigne's test
  3. Solubility test
  4. Functional group test like Phenols, Amides/ Urea, Carbohydrates, Amines, Carboxylic acids, Aldehydes and Ketones, Alcohols, Esters, Aromatic and Halogenated Hydrocarbons, Nitro compounds and Anilides.
  5. Melting point/Boiling point of organic compounds
  6. Identification of the unknown compound from the literature using melting point/ boiling point.
  7. Preparation of the derivatives and confirmation of the unknown compound by melting point/ boiling point.
  8. Minimum 5 unknown organic compounds to be analysed systematically.
2. Preparation of suitable solid derivatives from organic compounds
3. Construction of molecular models

### **Recommended Books (Latest Editions)**

1. Organic Chemistry by Morrison and Boyd
2. Organic Chemistry by I.L. Finar , Volume-I
3. Textbook of Organic Chemistry by B.S. Bahl & Arun Bahl.
4. Organic Chemistry by P.L.Soni
5. Practical Organic Chemistry by Mann and Saunders.
6. Vogel's text book of Practical Organic Chemistry
7. Advanced Practical organic chemistry by N.K.Vishnoi.
8. Introduction to Organic Laboratory techniques by Pavia, Lampman and Kriz.
9. Reaction and reaction mechanism by Ahluwalia/Chatwal.

## BP203 T. BIOCHEMISTRY (Theory)

45 Hours

**Scope:** Biochemistry deals with complete understanding of the molecular levels of the chemical process associated with living cells. The scope of the subject is providing biochemical facts and the principles to understand metabolism of nutrient molecules in physiological and pathological conditions. It is also emphasizing on genetic organization of mammalian genome and hetero & autocatalytic functions of DNA.

**Objectives:** Upon completion of course student shall be able to

1. Understand the catalytic role of enzymes, importance of enzyme inhibitors in design of new drugs, therapeutic and diagnostic applications of enzymes.
2. Understand the metabolism of nutrient molecules in physiological and pathological conditions.
3. Understand the genetic organization of mammalian genome and functions of DNA in the synthesis of RNAs and proteins.

### Course Content:

#### UNIT I

08 Hours

- **Biomolecules**

Introduction, classification, chemical nature and biological role of carbohydrate, lipids, nucleic acids, amino acids and proteins.

- **Bioenergetics**

Concept of free energy, endergonic and exergonic reaction, Relationship between free energy, enthalpy and entropy; Redox potential.

Energy rich compounds; classification; biological significances of ATP and cyclic AMP

#### UNIT II

10 Hours

- **Carbohydrate metabolism**

Glycolysis – Pathway, energetics and significance

Citric acid cycle- Pathway, energetics and significance

HMP shunt and its significance; Glucose-6-Phosphate dehydrogenase (G6PD) deficiency

Glycogen metabolism Pathways and glycogen storage diseases (GSD)

Gluconeogenesis- Pathway and its significance

Hormonal regulation of blood glucose level and Diabetes mellitus

- **Biological oxidation**

Electron transport chain (ETC) and its mechanism.

Oxidative phosphorylation & its mechanism and substrate level phosphorylation

Inhibitors ETC and oxidative phosphorylation/Uncouplers

**UNIT III**

**10 Hours**

• **Lipid metabolism**

β-Oxidation of saturated fatty acid (Palmitic acid)

Formation and utilization of ketone bodies; ketoacidosis

De novo synthesis of fatty acids (Palmitic acid)

Biological significance of cholesterol and conversion of cholesterol into bile acids, steroid hormone and vitamin D

Disorders of lipid metabolism: Hypercholesterolemia, atherosclerosis, fatty liver and obesity.

- **Amino acid metabolism**

General reactions of amino acid metabolism: Transamination, deamination & decarboxylation, urea cycle and its disorders

Catabolism of phenylalanine and tyrosine and their metabolic disorders (Phenylketonuria, Albinism, alpeptonuria, tyrosinemia)

Synthesis and significance of biological substances; 5-HT, melatonin, dopamine, noradrenaline, adrenaline

Catabolism of heme; hyperbilirubinemia and jaundice

#### **UNIT IV**

**10 Hours**

- **Nucleic acid metabolism and genetic information transfer**

Biosynthesis of purine and pyrimidine nucleotides

Catabolism of purine nucleotides and Hyperuricemia and Gout disease

Organization of mammalian genome

Structure of DNA and RNA and their functions

DNA replication (semi conservative model)

Transcription or RNA synthesis

Genetic code, Translation or Protein synthesis and inhibitors

## UNIT V

07 Hours

- **Enzymes**

Introduction, properties, nomenclature and IUB classification of enzymes

Enzyme kinetics (Michaelis plot, Line Weaver Burke plot)

Enzyme inhibitors with examples

Regulation of enzymes: enzyme induction and repression, allosteric enzymes regulation

Therapeutic and diagnostic applications of enzymes and isoenzymes

Coenzymes –Structure and biochemical functions

### BP 209 P. BIOCHEMISTRY (Practical)

4 Hours / Week

1. Qualitative analysis of carbohydrates (Glucose, Fructose, Lactose, Maltose, Sucrose and starch)
2. Identification tests for Proteins (albumin and Casein)
3. Quantitative analysis of reducing sugars (DNSA method) and Proteins (Biuret method)
4. Qualitative analysis of urine for abnormal constituents
5. Determination of blood creatinine
6. Determination of blood sugar
7. Determination of serum total cholesterol
8. Preparation of buffer solution and measurement of pH
9. Study of enzymatic hydrolysis of starch
10. Determination of Salivary amylase activity
11. Study the effect of Temperature on Salivary amylase activity.
12. Study the effect of substrate concentration on salivary amylase activity.

### **Recommended Books (Latest Editions)**

1. Principles of Biochemistry by Lehninger.
2. Harper's Biochemistry by Robert K. Murry, Daryl K. Granner and Victor W. Rodwell.
3. Biochemistry by Stryer.
4. Biochemistry by D. Satyanarayan and U.Chakrapani
5. Textbook of Biochemistry by Rama Rao.
6. Textbook of Biochemistry by Deb.
7. Outlines of Biochemistry by Conn and Stumpf
8. Practical Biochemistry by R.C. Gupta and S. Bhargavan.
9. Introduction of Practical Biochemistry by David T. Plummer. (3rd Edition)
10. Practical Biochemistry for Medical students by Rajagopal and Ramakrishna.
11. Practical Biochemistry by Harold Varley.

### **BP 204T.PATHOPHYSIOLOGY (THEORY)**

**45Hours**

**Scope:** Pathophysiology is the study of causes of diseases and reactions of the body to such disease producing causes. This course is designed to impart a thorough knowledge of the relevant aspects of pathology of various conditions with reference to its pharmacological applications, and understanding of basic pathophysiological mechanisms. Hence it will not only help to study the syllabus of pathology, but also to get baseline knowledge required to practice medicine safely, confidently, rationally and effectively.

**Objectives:** Upon completion of the subject student shall be able to –

1. Describe the etiology and pathogenesis of the selected disease states;
2. Name the signs and symptoms of the diseases; and
3. Mention the complications of the diseases.

#### **Course content:**

#### **Unit I**

**10Hours**

**Basic principles of Cell injury and Adaptation:**

Introduction, definitions, Homeostasis, Components and Types of Feedback systems, Causes of cellular injury, Pathogenesis (Cell membrane damage, Mitochondrial damage, Ribosome damage, Nuclear damage), Morphology of cell injury – Adaptive changes (Atrophy, Hypertrophy, hyperplasia, Metaplasia, Dysplasia), Cell swelling, Intra cellular accumulation, Calcification, Enzyme leakage and Cell Death Acidosis & Alkalosis, Electrolyte imbalance

**Basic mechanism involved in the process of inflammation and repair:**

Introduction, Clinical signs of inflammation, Different types of Inflammation, Mechanism of Inflammation – Alteration in vascular permeability and blood flow, migration of WBC's, Mediators of inflammation, Basic principles of wound healing in the skin, Pathophysiology of Atherosclerosis

**Unit II**

**10Hours**

**Cardiovascular System:**

Hypertension, congestive heart failure, ischemic heart disease (angina, myocardial infarction, atherosclerosis and arteriosclerosis)

**Respiratory system:** Asthma, Chronic obstructive airways diseases.

**Renal system:** Acute and chronic renal failure .

**Unit II**

**10Hours**

**Haematological Diseases:**

Iron deficiency, megaloblastic anemia (Vit B12 and folic acid), sickle cell anemia, thalasemia, hereditary acquired anemia, hemophilia

**Endocrine system:** Diabetes, thyroid diseases, disorders of sex hormones

**Nervous system:** Epilepsy, Parkinson's disease, stroke, psychiatric disorders: depression, schizophrenia and Alzheimer's disease.

**Gastrointestinal system:** Peptic Ulcer

**Unit IV**

**8 Hours**

Inflammatory bowel diseases, jaundice, hepatitis (A,B,C,D,E,F) alcoholic liver disease.

**Disease of bones and joints:** Rheumatoid arthritis, osteoporosis and gout

**Principles of cancer:** classification, etiology and pathogenesis of cancer

**Diseases of bones and joints:** Rheumatoid Arthritis, Osteoporosis, Gout

**Principles of Cancer:** Classification, etiology and pathogenesis of Cancer

**Unit V**

**7 Hours**

**Infectious diseases:** Meningitis, Typhoid, Leprosy, Tuberculosis

Urinary tract infections

**Sexually transmitted diseases:** AIDS, Syphilis, Gonorrhoea

**Recommended Books (Latest Editions)**

1. Vinay Kumar, Abul K. Abas, Jon C. Aster; Robbins & Cotran Pathologic Basis of Disease; South Asia edition; India; Elsevier; 2014.
2. Harsh Mohan; Text book of Pathology; 6<sup>th</sup> edition; India; Jaypee Publications; 2010.
3. Laurence B, Bruce C, Bjorn K. ; Goodman Gilman's The Pharmacological Basis of Therapeutics; 12<sup>th</sup> edition; New York; McGraw-Hill; 2011.
4. Best, Charles Herbert 1899-1978; Taylor, Norman Burke 1885-1972; West, John B (John Burnard); Best and Taylor's Physiological basis of medical practice; 12<sup>th</sup> ed; united states;
5. William and Wilkins, Baltimore; 1991 [1990 printing].
6. Nicki R. Colledge, Brian R. Walker, Stuart H. Ralston; Davidson's Principles and Practice of Medicine; 21<sup>st</sup> edition; London; ELBS/Churchill Livingstone; 2010.
7. Guyton A, John .E Hall; Textbook of Medical Physiology; 12<sup>th</sup> edition; WB Saunders Company; 2010.
8. Joseph DiPiro, Robert L. Talbert, Gary Yee, Barbara Wells, L. Michael Posey; Pharmacotherapy: A Pathophysiological Approach; 9<sup>th</sup> edition; London; McGraw-Hill Medical; 2014.
9. V. Kumar, R. S. Cotran and S. L. Robbins; Basic Pathology; 6<sup>th</sup> edition; Philadelphia; WB Saunders Company; 1997.
10. Roger Walker, Clive Edwards; Clinical Pharmacy and Therapeutics; 3<sup>rd</sup> edition; London; Churchill Livingstone publication; 2003.

#### **Recommended Journals**

1. The Journal of Pathology. ISSN: 1096-9896 (Online)
2. The American Journal of Pathology. ISSN: 0002-9440
3. Pathology. 1465-3931 (Online)
4. International Journal of Physiology, Pathophysiology and Pharmacology. ISSN: 1944-8171 (Online)
5. Indian Journal of Pathology and Microbiology. ISSN-0377-4929.

## BP205 T. COMPUTER APPLICATIONS IN PHARMACY (Theory)

30 Hrs (2 Hrs/Week)

**Scope:** This subject deals with the introduction Database, Database Management system, computer application in clinical studies and use of databases.

**Objectives:** Upon completion of the course the student shall be able to

1. know the various types of application of computers in pharmacy
2. know the various types of databases
3. know the various applications of databases in pharmacy

### Course content:

#### UNIT – I

06 hours

**Number system:** Binary number system, Decimal number system, Octal number system, Hexadecimal number systems, conversion decimal to binary, binary to decimal, octal to binary etc, binary addition, binary subtraction – One's complement, Two's complement method, binary multiplication, binary division

**Concept of Information Systems and Software :** Information gathering, requirement and feasibility analysis, data flow diagrams, process specifications, input/output design, process life cycle, planning and managing the project

#### UNIT –II

06 hours

**Web technologies:** Introduction to HTML, XML, CSS and Programming languages, introduction to web servers and Server Products

Introduction to databases, MYSQL, MS ACCESS, Pharmacy Drug database

#### UNIT – III

06 hours

**Application of computers in Pharmacy** – Drug information storage and retrieval, Pharmacokinetics, Mathematical model in Drug design, Hospital and Clinical Pharmacy, Electronic Prescribing and discharge (EP) systems, barcode medicine identification and automated dispensing of drugs, mobile technology and adherence monitoring

Diagnostic System, Lab-diagnostic System, Patient Monitoring System, Pharma Information System

**UNIT – IV**

**06 hours**

**Bioinformatics:** Introduction, Objective of Bioinformatics, Bioinformatics Databases, Concept of Bioinformatics, Impact of Bioinformatics in Vaccine Discovery

**UNIT-V**

**06 hours**

**Computers as data analysis in Preclinical development:**

Chromatographic data analysis(CDS), Laboratory Information management System (LIMS) and Text Information Management System(TIMMS)

### **BP210P. COMPUTER APPLICATIONS IN PHARMACY (Practical)**

1. Design a questionnaire using a word processing package to gather information about a particular disease.
2. Create a HTML web page to show personal information.
3. Retrieve the information of a drug and its adverse effects using online tools
4. Creating mailing labels Using Label Wizard , generating label in MS WORD
5. Create a database in MS Access to store the patient information with the required fields Using access
6. Design a form in MS Access to view, add, delete and modify the patient record in the database
7. Generating report and printing the report from patient database
8. Creating invoice table using – MS Access
9. Drug information storage and retrieval using MS Access
10. Creating and working with queries in MS Access
11. Exporting Tables, Queries, Forms and Reports to web pages
12. Exporting Tables, Queries, Forms and Reports to XML pages

#### **Recommended books (Latest edition):**

1. Computer Application in Pharmacy – William E.Fassett –Lea and Febiger, 600 South Washington Square, USA, (215) 922-1330.
2. Computer Application in Pharmaceutical Research and Development –Sean Ekins – Wiley-Interscience, A John Willey and Sons, INC., Publication, USA
3. Bioinformatics (Concept, Skills and Applications) – S.C.Rastogi-CBS Publishers and Distributors, 4596/1- A, 11 Darya Gani, New Delhi – 110 002(INDIA)
4. Microsoft office Access - 2003, Application Development Using VBA, SQL Server, DAP and Infopath – Cary N.Prague – Wiley Dreamtech India (P) Ltd., 4435/7, Ansari Road, Daryagani, New Delhi - 110002

## **BP 206 T. ENVIRONMENTAL SCIENCES (Theory)**

**30 hours**

**Scope:**Environmental Sciences is the scientific study of the environmental system and the status of its inherent or induced changes on organisms. It includes not only the study of physical and biological characters of the environment but also the social and cultural factors and the impact of man on environment.

**Objectives:** Upon completion of the course the student shall be able to:

1. Create the awareness about environmental problems among learners.
2. Impart basic knowledge about the environment and its allied problems.
3. Develop an attitude of concern for the environment.
4. Motivate learner to participate in environment protection and environment improvement.
5. Acquire skills to help the concerned individuals in identifying and solving environmental problems.
6. Strive to attain harmony with Nature.

### **Course content:**

#### **Unit-I**

**10hours**

The Multidisciplinary nature of environmental studies

Natural Resources

Renewable and non-renewable resources:

Natural resources and associated problems

a) Forest resources; b) Water resources; c) Mineral resources; d) Food resources; e) Energy resources; f) Land resources: Role of an individual in conservation of natural resources.

#### **Unit-II**

**10hours**

Ecosystems

- Concept of an ecosystem.
- Structure and function of an ecosystem.
- Introduction, types, characteristic features, structure and function of the ecosystems: Forest ecosystem; Grassland ecosystem; Desert ecosystem; Aquatic ecosystems (ponds, streams, lakes, rivers, oceans, estuaries)

#### **Unit- III**

**10hours**

Environmental Pollution: Air pollution; Water pollution; Soil pollution

**Recommended Books (Latest edition):**

1. Y.K. Sing, Environmental Science, New Age International Pvt, Publishers, Bangalore
2. Agarwal, K.C. 2001 Environmental Biology, Nidi Publ. Ltd. Bikaner.
3. Bharucha Erach, The Biodiversity of India, Mapin Publishing Pvt. Ltd., Ahmedabad – 380 013, India,
4. Brunner R.C., 1989, Hazardous Waste Incineration, McGraw Hill Inc. 480p
5. Clark R.S., Marine Pollution, Clarendon Press Oxford
6. Cunningham, W.P. Cooper, T.H. Gorhani, E & Hepworth, M.T. 2001, Environmental Encyclopedia, Jaico Publ. House, Mumbai, 1196p
7. De A.K., Environmental Chemistry, Wiley Eastern Ltd.
8. Down of Earth, Centre for Science and Environment

## **SEMESTER III**

## BP301T. PHARMACEUTICAL ORGANIC CHEMISTRY –II (Theory)

45 Hours

**Scope:** This subject deals with general methods of preparation and reactions of some organic compounds. Reactivity of organic compounds are also studied here. The syllabus emphasizes on mechanisms and orientation of reactions. Chemistry of fats and oils are also included in the syllabus.

**Objectives:** Upon completion of the course the student shall be able to

1. write the structure, name and the type of isomerism of the organic compound
2. write the reaction, name the reaction and orientation of reactions
3. account for reactivity/stability of compounds,
4. prepare organic compounds

### Course Content:

General methods of preparation and reactions of compounds superscripted with asterisk (\*) to be explained

To emphasize on definition, types, classification, principles/mechanisms, applications, examples and differences

#### UNIT I

10 Hours

- **Benzene and its derivatives**

- A. Analytical, synthetic and other evidences in the derivation of structure of benzene, Orbital picture, resonance in benzene, aromatic characters, Huckel's rule
- B. Reactions of benzene - nitration, sulphonation, halogenation- reactivity, Friedelcrafts alkylation- reactivity, limitations, Friedelcrafts acylation.
- C. Substituents, effect of substituents on reactivity and orientation of mono substituted benzene compounds towards electrophilic substitution reaction
- D. Structure and uses of DDT, Saccharin, BHC and Chloramine

#### UNIT II

10 Hours

- **Phenols\*** - Acidity of phenols, effect of substituents on acidity, qualitative tests, Structure and uses of phenol, cresols, resorcinol, naphthols
- **Aromatic Amines\*** - Basicity of amines, effect of substituents on basicity, and synthetic uses of aryl diazonium salts
- **Aromatic Acids\*** -Acidity, effect of substituents on acidity and important reactions of benzoic acid.

#### UNIT III

10 Hours

- **Fats and Oils**
  - a. Fatty acids – reactions.

- b. Hydrolysis, Hydrogenation, Saponification and Rancidity of oils, Drying oils.
- c. Analytical constants – Acid value, Saponification value, Ester value, Iodine value, Acetyl value, Reichert Meissl (RM) value – significance and principle involved in their determination.

**UNIT IV**

**08 Hours**

- **Polynuclear hydrocarbons:**

- a. Synthesis, reactions
- b. Structure and medicinal uses of Naphthalene, Phenanthrene, Anthracene, Diphenylmethane, Triphenylmethane and their derivatives

**UNIT V**

**07 Hours**

- **Cyclo alkanes\***

Stabilities – Baeyer's strain theory, limitation of Baeyer's strain theory, Coulson and Moffitt's modification, Sachse Mohr's theory (Theory of strainless rings), reactions of cyclopropane and cyclobutane only

## BP305P. PHARMACEUTICAL ORGANIC CHEMISTRY -II (Practical)

4 Hrs/week

- I Experiments involving laboratory techniques
- Recrystallization
  - Steam distillation
- II Determination of following oil values (including standardization of reagents)
- Acid value
  - Saponification value
  - Iodine value
- III Preparation of compounds**
- Benzanilide/Phenyl benzoate/Acetanilide from Aniline/ Phenol /Aniline by acylation reaction.
  - 2,4,6-Tribromo aniline/Para bromo acetanilide from Aniline/
  - Acetanilide by halogenation (Bromination) reaction.
  - 5-Nitro salicylic acid/Meta di nitro benzene from Salicylic acid / Nitro benzene by nitration reaction.
  - Benzoic acid from Benzyl chloride by oxidation reaction.
  - Benzoic acid/ Salicylic acid from alkyl benzoate/ alkyl salicylate by hydrolysis reaction.
  - 1-Phenyl azo-2-naphthol from Aniline by diazotization and coupling reactions.
  - Benzil from Benzoin by oxidation reaction.
  - Dibenzal acetone from Benzaldehyde by Claisen Schmidt reaction
  - Cinnamic acid from Benzaldehyde by Perkin reaction
  - *P*-Iodo benzoic acid from *P*-amino benzoic acid

### Recommended Books (Latest Editions)

1. Organic Chemistry by Morrison and Boyd
2. Organic Chemistry by I.L. Finar , Volume-I
3. Textbook of Organic Chemistry by B.S. Bahl & Arun Bahl.
4. Organic Chemistry by P.L.Soni
5. Practical Organic Chemistry by Mann and Saunders.
6. Vogel's text book of Practical Organic Chemistry
7. Advanced Practical organic chemistry by N.K.Vishnoi.

8. Introduction to Organic Laboratory techniques by Pavia, Lampman and Kriz.

**BP302T. PHYSICAL PHARMACEUTICS-I (Theory)**

**45Hours**

**Scope:** The course deals with the various physical and physicochemical properties, and principles involved in dosage forms/formulations. Theory and practical components of the subject help the student to get a better insight into various areas of formulation research and development, and stability studies of pharmaceutical dosage forms.

**Objectives:** Upon the completion of the course student shall be able to

1. Understand various physicochemical properties of drug molecules in the designing the dosage forms
2. Know the principles of chemical kinetics & to use them for stability testing and determination of expiry date of formulations
3. Demonstrate use of physicochemical properties in the formulation development and evaluation of dosage forms.

**Course Content:**

**UNIT-I**

**10 Hours**

**Solubility of drugs:** Solubility expressions, mechanisms of solute solvent interactions, ideal solubility parameters, solvation & association, quantitative approach to the factors influencing solubility of drugs, diffusion principles in biological systems. Solubility of gas in liquids, solubility of liquids in liquids, (Binary solutions, ideal solutions) Raoult's law, real solutions. Partially miscible liquids, Critical solution temperature and applications. Distribution law, its limitations and applications

**UNIT-II**

**10Hours**

**States of Matter and properties of matter:** State of matter, changes in the state of matter, latent heats, vapour pressure, sublimation critical point, eutectic mixtures, gases, aerosols – inhalers, relative humidity, liquid complexes, liquid crystals, glassy states, solid-crystalline, amorphous & polymorphism.

**Physicochemical properties of drug molecules:** Refractive index, optical rotation, dielectric constant, dipole moment, dissociation constant, determinations and applications

**UNIT-III**

**08 Hours**

**Surface and interfacial phenomenon:** Liquid interface, surface & interfacial tensions,

surface free energy, measurement of surface & interfacial tensions, spreading coefficient, adsorption at liquid interfaces, surface active agents, HLB Scale, solubilisation, detergency, adsorption at solid interface.

#### **UNIT-IV**

**08Hours**

**Complexation and protein binding:** Introduction, Classification of Complexation, Applications, methods of analysis, protein binding, Complexation and drug action, crystalline structures of complexes and thermodynamic treatment of stability constants.

#### **UNIT-V**

**07 Hours**

**pH, buffers and Isotonic solutions:** Sorensen's pH scale, pH determination (electrometric and calorimetric), applications of buffers, buffer equation, buffer capacity, buffers in pharmaceutical and biological systems, buffered isotonic solutions.

**BP306P. PHYSICAL PHARMACEUTICS – I (Practical)**

**4 Hrs/week**

1. Determination the solubility of drug at room temperature
2. Determination of pKa value by Half Neutralization/ Henderson Hasselbalch equation.
3. Determination of Partition co- efficient of benzoic acid in benzene and water
4. Determination of Partition co- efficient of Iodine in CCl<sub>4</sub> and water
5. Determination of % composition of NaCl in a solution using phenol-water system by CST method
6. Determination of surface tension of given liquids by drop count and drop weight method
7. Determination of HLB number of a surfactant by saponification method
8. Determination of Freundlich and Langmuir constants using activated char coal
9. Determination of critical micellar concentration of surfactants
10. Determination of stability constant and donor acceptor ratio of PABA-Caffeine complex by solubility method
11. Determination of stability constant and donor acceptor ratio of Cupric-Glycine complex by pH titration method

**Recommended Books: (Latest Editions)**

6. Liberman H.A, Lachman C, Pharmaceutical Dosage forms. Disperse systems, volume 1, 2, 3. Marcel Dekkar Inc.
7. Physical Pharmaceutics by Ramasamy C and ManavalanR.
8. Laboratory Manual of Physical Pharmaceutics, C.V.S. Subramanyam, J. Thimma settee
9. Physical Pharmaceutics by C.V.S. Subramanyam
10. Test book of Physical Phramacy, by Gaurav Jain & Roop K. Khar

## **BP 303 T. PHARMACEUTICAL MICROBIOLOGY (Theory)**

**45Hours**

### **Scope:**

- Study of all categories of microorganisms especially for the production of alcohol antibiotics, vaccines, vitamins enzymes etc..

**Objectives:** Upon completion of the subject student shall be able to;

1. Understand methods of identification, cultivation and preservation of various microorganisms
2. To understand the importance and implementation of sterilization in pharmaceutical processing and industry
3. Learn sterility testing of pharmaceutical products.
4. Carried out microbiological standardization of Pharmaceuticals.
5. Understand the cell culture technology and its applications in pharmaceutical industries.

### **Course content:**

#### **Unit I**

**10 Hours**

Introduction, history of microbiology, its branches, scope and its importance.

Introduction to Prokaryotes and Eukaryotes

Study of ultra-structure and morphological classification of bacteria, nutritional requirements, raw materials used for culture media and physical parameters for growth, growth curve, isolation and preservation methods for pure cultures, cultivation of anaerobes, quantitative measurement of bacterial growth (total & viable count).

Study of different types of phase contrast microscopy, dark field microscopy and electron microscopy.

#### **Unit II**

**10 Hours**

Identification of bacteria using staining techniques (simple, Gram's & Acid fast staining) and biochemical tests (IMViC).

Study of principle, procedure, merits, demerits and applications of physical, chemical gaseous, radiation and mechanical method of sterilization.

Evaluation of the efficiency of sterilization methods.

Equipments employed in large scale sterilization.

Sterility indicators.

### **Unit III**

**10 Hours**

Study of morphology, classification, reproduction/replication and cultivation of Fungi and Viruses.

Classification and mode of action of disinfectants

Factors influencing disinfection, antiseptics and their evaluation. For bacteriostatic and bactericidal actions

Evaluation of bactericidal & Bacteriostatic.

Sterility testing of products (solids, liquids, ophthalmic and other sterile products) according to IP, BP and USP.

### **Unit IV**

**08 Hours**

Designing of aseptic area, laminar flow equipments; study of different sources of contamination in an aseptic area and methods of prevention, clean area classification.

Principles and methods of different microbiological assay. Methods for standardization of antibiotics, vitamins and amino acids.

Assessment of a new antibiotic.

### **Unit V**

**07Hours**

Types of spoilage, factors affecting the microbial spoilage of pharmaceutical products, sources and types of microbial contaminants, assessment of microbial contamination and spoilage.

Preservation of pharmaceutical products using antimicrobial agents, evaluation of microbial stability of formulations.

Growth of animal cells in culture, general procedure for cell culture, Primary, established and transformed cell cultures.

Application of cell cultures in pharmaceutical industry and research.

## **BP 307P.PHARMACEUTICAL MICROBIOLOGY (Practical)**

**4 Hrs/week**

1. Introduction and study of different equipments and processing, e.g., B.O.D. incubator, laminar flow, aseptic hood, autoclave, hot air sterilizer, deep freezer, refrigerator, microscopes used in experimental microbiology.
2. Sterilization of glassware, preparation and sterilization of media.
3. Sub culturing of bacteria and fungus. Nutrient stabs and slants preparations.
4. Staining methods- Simple, Grams staining and acid fast staining (Demonstration with practical).
5. Isolation of pure culture of micro-organisms by multiple streak plate technique and other techniques.
6. Microbiological assay of antibiotics by cup plate method and other methods
7. Motility determination by Hanging drop method.
8. Sterility testing of pharmaceuticals.
9. Bacteriological analysis of water
10. Biochemical test.

### **Recommended Books (Latest edition)**

1. W.B. Hugo and A.D. Russel: Pharmaceutical Microbiology, Blackwell Scientific publications, Oxford London.
2. Prescott and Dunn., Industrial Microbiology, 4<sup>th</sup> edition, CBS Publishers & Distributors, Delhi.

13. Bergeys manual of systematic bacteriology, Williams and Wilkins- A Waverly company

## BP 304 T. PHARMACEUTICAL ENGINEERING (Theory)

45 Hours

**Scope:** This course is designed to impart a fundamental knowledge on the art and science of various unit operations used in pharmaceutical industry.

**Objectives:** Upon completion of the course student shall be able:

1. To know various unit operations used in Pharmaceutical industries.
2. To understand the material handling techniques.
3. To perform various processes involved in pharmaceutical manufacturing process.
4. To carry out various test to prevent environmental pollution.
5. To appreciate and comprehend significance of plant lay out design for optimum use of resources.
6. To appreciate the various preventive methods used for corrosion control in Pharmaceutical industries.

### Course content:

#### UNIT-I

10 Hours

- **Flow of fluids:** Types of manometers, Reynolds number and its significance, Bernoulli's theorem and its applications, Energy losses, Orifice meter, Venturimeter, Pitot tube and Rotometer.
- **Size Reduction:** Objectives, Mechanisms & Laws governing size reduction, factors affecting size reduction, principles, construction, working, uses, merits and demerits of Hammer mill, ball mill, fluid energy mill, Edge runner mill & end runner mill.
- **Size Separation:** Objectives, applications & mechanism of size separation, official standards of powders, sieves, size separation Principles, construction, working, uses, merits and demerits of Sieve shaker, cyclone separator, Air separator, Bag filter & elutriation tank.

#### UNIT-II

10 Hours

- **Heat Transfer:** Objectives, applications & Heat transfer mechanisms. Fourier's law, Heat transfer by conduction, convection & radiation. Heat interchangers & heat exchangers.

- **Evaporation:** Objectives, applications and factors influencing evaporation, differences between evaporation and other heat process. principles, construction, working, uses, merits and demerits of Steam jacketed kettle, horizontal tube evaporator, climbing film evaporator, forced circulation evaporator, multiple effect evaporator & Economy of multiple effect evaporator.
- **Distillation:** Basic Principles and methodology of simple distillation, flash distillation, fractional distillation, distillation under reduced pressure, steam distillation & molecular distillation

### UNIT- III

**08 Hours**

- **Drying:** Objectives, applications & mechanism of drying process, measurements & applications of Equilibrium Moisture content, rate of drying curve. principles, construction, working, uses, merits and demerits of Tray dryer, drum dryer spray dryer, fluidized bed dryer, vacuum dryer, freeze dryer.
- **Mixing:** Objectives, applications & factors affecting mixing, Difference between solid and liquid mixing, mechanism of solid mixing, liquids mixing and semisolids mixing. Principles, Construction, Working, uses, Merits and Demerits of Double cone blender, twin shell blender, ribbon blender, Sigma blade mixer, planetary mixers, Propellers, Turbines, Paddles & Silverson Emulsifier,

### UNIT-IV

**08 Hours**

- **Filtration:** Objectives, applications, Theories & Factors influencing filtration, filter aids, filter medias. Principle, Construction, Working, Uses, Merits and demerits of plate & frame filter, filter leaf, rotary drum filter, Meta filter & Cartridge filter, membrane filters and Seidtz filter.
- **Centrifugation:** Objectives, principle & applications of Centrifugation, principles, construction, working, uses, merits and demerits of Perforated basket centrifuge, Non-perforated basket centrifuge, semi continuous centrifuge & super centrifuge.

### UNIT- V

**07 Hours**

- **Materials of pharmaceutical plant construction, Corrosion and its prevention:** Factors affecting during materials selected for Pharmaceutical plant construction, Theories of corrosion, types of corrosion and there prevention. Ferrous and nonferrous metals, inorganic and organic non metals, basic of material handling systems.

**Recommended Books: (Latest Editions)**

1. Introduction to chemical engineering – Walter L Badger & Julius Banchemo, Latest edition.
2. Solid phase extraction, Principles, techniques and applications by Nigel J.K. Simpson- Latest edition.
3. Unit operation of chemical engineering – McCabe Smith, Latest edition.
4. Pharmaceutical engineering principles and practices – C.V.S Subrahmanyam et al., Latest edition.
5. Remington practice of pharmacy- Martin, Latest edition.
6. Theory and practice of industrial pharmacy by Lachmann., Latest edition.
7. Physical pharmaceuticals- C.V.S Subrahmanyam et al., Latest edition.
8. Cooper and Gunn's Tutorial pharmacy, S.J. Carter, Latest edition.

## **BP308P - PHARMACEUTICAL ENGINEERING (Practical)**

**4 Hours/week**

- I. Determination of radiation constant of brass, iron, unpainted and painted glass.
- II. Steam distillation – To calculate the efficiency of steam distillation.
- III. To determine the overall heat transfer coefficient by heat exchanger.
- IV. Construction of drying curves (for calcium carbonate and starch).
- V. Determination of moisture content and loss on drying.
- VI. Determination of humidity of air – i) From wet and dry bulb temperatures –use of Dew point method.
- VII. Description of Construction working and application of Pharmaceutical Machinery such as rotary tablet machine, fluidized bed coater, fluid energy mill, de humidifier.
- VIII. Size analysis by sieving – To evaluate size distribution of tablet granulations – Construction of various size frequency curves including arithmetic and logarithmic probability plots.
- IX. Size reduction: To verify the laws of size reduction using ball mill and determining Kicks, Rittinger's, Bond's coefficients, power requirement and critical speed of Ball Mill.
- X. Demonstration of colloid mill, planetary mixer, fluidized bed dryer, freeze dryer and such other major equipment.
- XI. Factors affecting Rate of Filtration and Evaporation (Surface area, Concentration and Thickness/ viscosity
- XII. To study the effect of time on the Rate of Crystallization.
- XIII. To calculate the uniformity Index for given sample by using Double Cone Blender.

## **SEMESTER IV**

## **BP401T. PHARMACEUTICAL ORGANIC CHEMISTRY –III (Theory)**

**45 Hours**

**Scope:** This subject imparts knowledge on stereo-chemical aspects of organic compounds and organic reactions, important named reactions, chemistry of important hetero cyclic compounds. It also emphasizes on medicinal and other uses of organic compounds.

**Objectives:** At the end of the course, the student shall be able to

1. understand the methods of preparation and properties of organic compounds
2. explain the stereo chemical aspects of organic compounds and stereo chemical reactions
3. know the medicinal uses and other applications of organic compounds

### **Course Content:**

**Note: To emphasize on definition, types, mechanisms, examples, uses/applications**

#### **UNIT-I**

**10 Hours**

##### **Stereo isomerism**

Optical isomerism –

Optical activity, enantiomerism, diastereoisomerism, meso compounds

Elements of symmetry, chiral and achiral molecules

DL system of nomenclature of optical isomers, sequence rules, RS system of nomenclature of optical isomers

Reactions of chiral molecules

Racemic modification and resolution of racemic mixture.

Asymmetric synthesis: partial and absolute

#### **UNIT-II**

**10 Hours**

Geometrical isomerism

Nomenclature of geometrical isomers (Cis Trans, EZ, Syn Anti systems)

Methods of determination of configuration of geometrical isomers.

Conformational isomerism in Ethane, n-Butane and Cyclohexane.

Stereo isomerism in biphenyl compounds (Atropisomerism) and conditions for optical activity.

Stereospecific and stereoselective reactions

#### **UNIT-III**

**10 Hours**

**Heterocyclic compounds:**

Nomenclature and classification

Synthesis, reactions and medicinal uses of following compounds/derivatives

Pyrrole, Furan, and Thiophene

Relative aromaticity and reactivity of Pyrrole, Furan and Thiophene

**UNIT-IV****8 Hours**

Synthesis, reactions and medicinal uses of following compounds/derivatives

Pyrazole, Imidazole, Oxazole and Thiazole.

Pyridine, Quinoline, Isoquinoline, Acridine and Indole. Basicity of pyridine

Synthesis and medicinal uses of Pyrimidine, Purine, azepines and their derivatives

**UNIT-V****07 Hours****Reactions of synthetic importance**

Metal hydride reduction ( $\text{NaBH}_4$  and  $\text{LiAlH}_4$ ), Clemmensen reduction, Birch reduction, Wolff Kishner reduction.

Oppenauer-oxidation and Dakin reaction.

Beckmanns rearrangement and Schmidt rearrangement.

Claisen-Schmidt condensation

**Recommended Books (Latest Editions)**

1. Organic chemistry by I.L. Finar, Volume-I & II.
2. A text book of organic chemistry – Arun Bahl, B.S. Bahl.
3. Heterocyclic Chemistry by Raj K. Bansal
4. Organic Chemistry by Morrison and Boyd
5. Heterocyclic Chemistry by T.L. Gilchrist

## BP402T. MEDICINAL CHEMISTRY – I (Theory)

45 Hours

**Scope:** This subject is designed to impart fundamental knowledge on the structure, chemistry and therapeutic value of drugs. The subject emphasizes on structure activity relationships of drugs, importance of physicochemical properties and metabolism of drugs. The syllabus also emphasizes on chemical synthesis of important drugs under each class.

**Objectives:** Upon completion of the course the student shall be able to

1. understand the chemistry of drugs with respect to their pharmacological activity
2. understand the drug metabolic pathways, adverse effect and therapeutic value of drugs
3. know the Structural Activity Relationship (SAR) of different class of drugs
4. write the chemical synthesis of some drugs

### Course Content:

**Study of the development of the following classes of drugs, Classification, mechanism of action, uses of drugs mentioned in the course, Structure activity relationship of selective class of drugs as specified in the course and synthesis of drugs superscripted (\*)**

#### UNIT- I

10 Hours

##### Introduction to Medicinal Chemistry

##### History and development of medicinal chemistry

##### Physicochemical properties in relation to biological action

Ionization, Solubility, Partition Coefficient, Hydrogen bonding, Protein binding, Chelation, Bioisosterism, Optical and Geometrical isomerism.

##### Drug metabolism

Drug metabolism principles- Phase I and Phase II.

Factors affecting drug metabolism including stereo chemical aspects.

#### UNIT- II

10 Hours

##### Drugs acting on Autonomic Nervous System

##### Adrenergic Neurotransmitters:

Biosynthesis and catabolism of catecholamine.

Adrenergic receptors (Alpha & Beta) and their distribution.

##### Sympathomimetic agents: SAR of Sympathomimetic agents

Direct acting: Nor-epinephrine, Epinephrine, Phenylephrine\*, Dopamine,

Methyldopa, Clonidine, Dobutamine, Isoproterenol, Terbutaline, Salbutamol\*, Bitolterol, Naphazoline, Oxymetazoline and Xylometazoline.

- Indirect acting agents: Hydroxyamphetamine, Pseudoephedrine, Propylhexedrine.
- Agents with mixed mechanism: Ephedrine, Metaraminol.

#### **Adrenergic Antagonists:**

**Alpha adrenergic blockers:** Tolazoline\*, Phentolamine, Phenoxybenzamine, Prazosin, Dihydroergotamine, Methysergide.

**Beta adrenergic blockers:** SAR of beta blockers, Propranolol\*, Metibranolol, Atenolol, Betazolol, Bisoprolol, Esmolol, Metoprolol, Labetolol, Carvedilol.

### **UNIT-III**

**10 Hours**

#### **Cholinergic neurotransmitters:**

Biosynthesis and catabolism of acetylcholine.

Cholinergic receptors (Muscarinic & Nicotinic) and their distribution.

#### **Parasympathomimetic agents: SAR of Parasympathomimetic agents**

**Direct acting agents:** Acetylcholine, Carbachol\*, Bethanechol, Methacholine, Pilocarpine.

**Indirect acting/ Cholinesterase inhibitors (Reversible & Irreversible):** Physostigmine, Neostigmine\*, Pyridostigmine, Edrophonium chloride, Tacrine hydrochloride, Ambenonium chloride, Isofluorophate, Echothiophate iodide, Parathione, Malathion.

**Cholinesterase reactivator:** Pralidoxime chloride.

#### **Cholinergic Blocking agents: SAR of cholinolytic agents**

**Solanaceous alkaloids and analogues:** Atropine sulphate, Hyoscyamine sulphate, Scopolamine hydrobromide, Homatropine hydrobromide, Ipratropium bromide\*.

**Synthetic cholinergic blocking agents:** Tropicamide, Cyclopentolate hydrochloride, Clidinium bromide, Dicyclomine hydrochloride\*, Glycopyrrolate, Methantheline bromide, Propantheline bromide, Benztropine mesylate, Orphenadrine citrate, Biperidine hydrochloride, Procyclidine hydrochloride\*, Tridihexethyl chloride, Isopropamide iodide, Ethopropazine hydrochloride.

### **UNIT- IV**

**08 Hours**

#### **Drugs acting on Central Nervous System**

### **A. Sedatives and Hypnotics:**

**Benzodiazepines:** SAR of Benzodiazepines, Chlordiazepoxide, Diazepam\*, Oxazepam, Chlorazepate, Lorazepam, Alprazolam, Zolpidem

**Barbiturates:** SAR of barbiturates, Barbitol\*, Phenobarbital, Mephobarbital, Amobarbital, Butobarbital, Pentobarbital, Secobarbital

#### **Miscellaneous:**

Amides & imides: Glutethimide.

Alcohol & their carbamate derivatives: Meprobamate, Ethchlorvynol.

Aldehyde & their derivatives: Triclofos sodium, Paraldehyde.

### **B. Antipsychotics**

**Phenothiazines:** SAR of Phenothiazines - Promazine hydrochloride, Chlorpromazine hydrochloride\*, Triflupromazine, Thioridazine hydrochloride, Piperacetazine hydrochloride, Prochlorperazine maleate, Trifluoperazine hydrochloride.

**Ring Analogues of Phenothiazines:** Chlorprothixene, Thiothixene, Loxapine succinate, Clozapine.

**Fluro buterophenones:** Haloperidol, Droperidol, Risperidone.

**Beta amino ketones:** Molindone hydrochloride.

**Benzamides:** Sulpieride.

**C. Anticonvulsants:** SAR of Anticonvulsants, mechanism of anticonvulsant action

**Barbiturates:** Phenobarbitone, Methobarbital. **Hydantoins:**

Phenytoin\*, Mephentyoin, Ethotoin **Oxazolidine diones:**

Trimethadione, Paramethadione **Succinimides:**

Phensuximide, Methsuximide, Ethosuximide\* **Urea and**

**monoacylureas:** Phenacemide, Carbamazepine\*

**Benzodiazepines:** Clonazepam

**Miscellaneous:** Primidone, Valproic acid, Gabapentin, Felbamate

**UNIT – V**

**07 Hours**

**Drugs acting on Central Nervous System**

**General anesthetics:**

**Inhalation anesthetics:** Halothane\*, Methoxyflurane, Enflurane, Sevoflurane, Isoflurane, Desflurane.

**Ultra short acting barbiturates:** Methohexital sodium\*, Thiopental sodium, Thiopental sodium.

**Dissociative anesthetics:** Ketamine hydrochloride.\*

**Narcotic and non-narcotic analgesics**

**Morphine and related drugs:** SAR of Morphine analogues, Morphine sulphate, Codeine, Meperidine hydrochloride, Anilerdine hydrochloride, Diphenoxylate hydrochloride, Loperamide hydrochloride, Fentanyl citrate\*, Methadone hydrochloride\*, Propoxyphene hydrochloride, Pentazocine, Levorphanol tartarate.

**Narcotic antagonists:** Nalorphine hydrochloride, Levallorphan tartarate, Naloxone hydrochloride.

**Anti-inflammatory agents:** Sodium salicylate, Aspirin, Mefenamic acid\*, Meclofenamate, Indomethacin, Sulindac, Tolmetin, Zomepiac, Diclofenac, Ketorolac, Ibuprofen\*, Naproxen, Piroxicam, Phenacetin, Acetaminophen, Antipyrine, Phenylbutazone.

## **BP406P. MEDICINAL CHEMISTRY – I (Practical)**

**4 Hours/Week**

### **I Preparation of drugs/ intermediates**

- 1 1,3-pyrazole
- 2 1,3-oxazole
- 3 Benzimidazole
- 4 Benztriazole
- 5 2,3- diphenyl quinoxaline
- 6 Benzocaine
- 7 Phenytoin
- 8 Phenothiazine
- 9 Barbiturate

### **II Assay of drugs**

- 1 Chlorpromazine
- 2 Phenobarbitone
- 3 Atropine
- 4 Ibuprofen
- 5 Aspirin
- 6 Furosemide

### **III Determination of Partition coefficient for any two drugs**

#### **Recommended Books (Latest Editions)**

1. Wilson and Giswold's Organic medicinal and Pharmaceutical Chemistry.
2. Foye's Principles of Medicinal Chemistry.
3. Burger's Medicinal Chemistry, Vol I to IV.
4. Introduction to principles of drug design- Smith and Williams.
5. Remington's Pharmaceutical Sciences.
6. Martindale's extra pharmacopoeia.

7. Organic Chemistry by I.L. Finar, Vol. II.
8. The Organic Chemistry of Drug Synthesis by Lednicer, Vol. 1-5.
9. Indian Pharmacopoeia.
10. Text book of practical organic chemistry- A.I.Vogel.

## BP 403 T. PHYSICAL PHARMACEUTICS-II (Theory)

45Hours

**Scope:** The course deals with the various physical and physicochemical properties, and principles involved in dosage forms/formulations. Theory and practical components of the subject help the student to get a better insight into various areas of formulation research and development, and stability studies of pharmaceutical dosage forms.

**Objectives:** Upon the completion of the course student shall be able to

1. Understand various physicochemical properties of drug molecules in the designing the dosage forms
2. Know the principles of chemical kinetics & to use them for stability testing and determination of expiry date of formulations
3. Demonstrate use of physicochemical properties in the formulation development and evaluation of dosage forms.

### Course Content:

#### UNIT-I

07 Hours

**Colloidal dispersions:** Classification of dispersed systems & their general characteristics, size & shapes of colloidal particles, classification of colloids & comparative account of their general properties. Optical, kinetic & electrical properties. Effect of electrolytes, coacervation, peptization & protective action.

#### UNIT-II

10 Hours

**Rheology:** Newtonian systems, law of flow, kinematic viscosity, effect of temperature, non-Newtonian systems, pseudoplastic, dilatant, plastic, thixotropy, thixotropy in formulation, determination of viscosity, capillary, falling Sphere, rotational viscometers

**Deformation of solids:** Plastic and elastic deformation, Heckel equation, Stress, Strain, Elastic Modulus

#### UNIT-III

10 Hours

**Coarse dispersion:** Suspension, interfacial properties of suspended particles, settling in suspensions, formulation of flocculated and deflocculated suspensions. Emulsions and theories of emulsification, microemulsion and multiple emulsions; Stability of emulsions, preservation of emulsions, rheological properties of emulsions and emulsion formulation by HLB method.

#### **UNIT-IV**

**10Hours**

**Micromeretics:** Particle size and distribution, mean particle size, number and weight distribution, particle number, methods for determining particle size by different methods, counting and separation method, particle shape, specific surface, methods for determining surface area, permeability, adsorption, derived properties of powders, porosity, packing arrangement, densities, bulkiness & flow properties.

#### **UNIT-V**

**10 Hours**

**Drug stability:** Reaction kinetics: zero, pseudo-zero, first & second order, units of basic rate constants, determination of reaction order. Physical and chemical factors influencing the chemical degradation of pharmaceutical product: temperature, solvent, ionic strength, dielectric constant, specific & general acid base catalysis, Simple numerical problems. Stabilization of medicinal agents against common reactions like hydrolysis & oxidation. Accelerated stability testing in expiration dating of pharmaceutical dosage forms. Photolytic degradation and its prevention

## **BP 407P. PHYSICAL PHARMACEUTICS- II (Practical)**

**3 Hrs/week**

1. Determination of particle size, particle size distribution using sieving method
2. Determination of particle size, particle size distribution using Microscopic method
3. Determination of bulk density, true density and porosity
4. Determine the angle of repose and influence of lubricant on angle of repose
5. Determination of viscosity of liquid using Ostwald's viscometer
6. Determination sedimentation volume with effect of different suspending agent
7. Determination sedimentation volume with effect of different concentration of single suspending agent
8. Determination of viscosity of semisolid by using Brookfield viscometer
9. Determination of reaction rate constant first order.
10. Determination of reaction rate constant second order
11. Accelerated stability studies

### **Recommended Books: (Latest Editions)**

2. Experimental pharmaceuticals by Eugene, Parott.
3. Tutorial pharmacy by Cooper and Gunn.
4. Stocklosam J. Pharmaceutical calculations, Lea & Febiger, Philadelphia.
5. Liberman H.A, Lachman C., Pharmaceutical Dosage forms, Tablets, Volume-1 to 3, Marcel Dekkar Inc.
6. Liberman H.A, Lachman C, Pharmaceutical dosage forms. Disperse systems, volume 1, 2, 3. Marcel Dekkar Inc.
7. Physical Pharmaceutics by Ramasamy C, and Manavalan R.

## **BP 404 T. PHARMACOLOGY-I (Theory)**

**45 Hrs**

**Scope:** The main purpose of the subject is to understand what drugs do to the living organisms and how their effects can be applied to therapeutics. The subject covers the information about the drugs like, mechanism of action, physiological and biochemical effects (pharmacodynamics) as well as absorption, distribution, metabolism and excretion (pharmacokinetics) along with the adverse effects, clinical uses, interactions, doses, contraindications and routes of administration of different classes of drugs.

**Objectives:** Upon completion of this course the student should be able to

1. Understand the pharmacological actions of different categories of drugs
2. Explain the mechanism of drug action at organ system/sub cellular/ macromolecular levels.
3. Apply the basic pharmacological knowledge in the prevention and treatment of various diseases.
4. Observe the effect of drugs on animals by simulated experiments
5. Appreciate correlation of pharmacology with other bio medical sciences

### **Course Content:**

#### **UNIT-I**

**08 hours**

##### **1. General Pharmacology**

- a. Introduction to Pharmacology- Definition, historical landmarks and scope of pharmacology, nature and source of drugs, essential drugs concept and routes of drug administration, Agonists, antagonists( competitive and non competitive), spare receptors, addiction, tolerance, dependence, tachyphylaxis, idiosyncrasy, allergy.
- b. Pharmacokinetics- Membrane transport, absorption, distribution, metabolism and excretion of drugs .Enzyme induction, enzyme inhibition, kinetics of elimination

#### **UNIT-II**

**12 Hours**

##### **General Pharmacology**

- a. Pharmacodynamics- Principles and mechanisms of drug action. Receptor theories and classification of receptors, regulation of receptors. drug receptors interactions signal transduction mechanisms, G-protein–coupled receptors, ion channel receptor, transmembrane enzyme linked receptors, transmembrane JAK-STAT binding receptor and receptors that regulate transcription factors, dose response relationship, therapeutic index, combined effects of drugs and factors modifying drug action.
- b. Adverse drug reactions.
- c. Drug interactions (pharmacokinetic and pharmacodynamic)
- d. Drug discovery and clinical evaluation of new drugs -Drug discovery phase, preclinical evaluation phase, clinical trial phase, phases of clinical trials and pharmacovigilance.

**UNIT-III****10 Hours****2. Pharmacology of drugs acting on peripheral nervous system**

- a. Organization and function of ANS.
- b. Neurohumoral transmission, co-transmission and classification of neurotransmitters.
- c. Parasympathomimetics, Parasympatholytics, Sympathomimetics, sympatholytics.
- d. Neuromuscular blocking agents and skeletal muscle relaxants (peripheral).
- e. Local anesthetic agents.
- f. Drugs used in myasthenia gravis and glaucoma

**UNIT-IV****08 Hours****3. Pharmacology of drugs acting on central nervous system**

- a. Neurohumoral transmission in the C.N.S. special emphasis on importance of various neurotransmitters like with GABA, Glutamate, Glycine, serotonin, dopamine.
- b. General anesthetics and pre-anesthetics.
- c. Sedatives, hypnotics and centrally acting muscle relaxants.
- d. Anti-epileptics
- e. Alcohols and disulfiram

**UNIT-V****07 Hours****3. Pharmacology of drugs acting on central nervous system**

- a. Psychopharmacological agents: Antipsychotics, antidepressants, anti-anxiety agents, anti-manics and hallucinogens.
- b. Drugs used in Parkinsons disease and Alzheimer's disease.
- c. CNS stimulants and nootropics.
- d. Opioid analgesics and antagonists
- e. Drug addiction, drug abuse, tolerance and dependence.

## **BP 408 P.PHARMACOLOGY-I (Practical)**

**4Hrs/Week**

1. Introduction to experimental pharmacology.
2. Commonly used instruments in experimental pharmacology.
3. Study of common laboratory animals.
4. Maintenance of laboratory animals as per CPCSEA guidelines.
5. Common laboratory techniques. Blood withdrawal, serum and plasma separation, anesthetics and euthanasia used for animal studies.
6. Study of different routes of drugs administration in mice/rats.
7. Study of effect of hepatic microsomal enzyme inducers on the phenobarbitone sleeping time in mice.
8. Effect of drugs on ciliary motility of frog oesophagus
9. Effect of drugs on rabbit eye.
10. Effects of skeletal muscle relaxants using rota-rod apparatus.
11. Effect of drugs on locomotor activity using actophotometer.
12. Anticonvulsant effect of drugs by MES and PTZ method.
13. Study of stereotype and anti-catatonic activity of drugs on rats/mice.
14. Study of anxiolytic activity of drugs using rats/mice.
15. Study of local anesthetics by different methods

*Note: All laboratory techniques and animal experiments are demonstrated by simulated experiments by softwares and videos*

## **BP 405 T.PHARMACOGNOSY AND PHYTOCHEMISTRY I (Theory)**

**45 Hours**

**Scope:** The subject involves the fundamentals of Pharmacognosy like scope, classification of crude drugs, their identification and evaluation, phytochemicals present in them and their medicinal properties.

**Objectives:** Upon completion of the course, the student shall be able

1. to know the techniques in the cultivation and production of crude drugs
2. to know the crude drugs, their uses and chemical nature
3. know the evaluation techniques for the herbal drugs
4. to carry out the microscopic and morphological evaluation of crude drugs

### **Course Content:**

#### **UNIT-I**

**10 Hours**

##### **Introduction to Pharmacognosy:**

- (a) Definition, history, scope and development of Pharmacognosy
- (b) Sources of Drugs – Plants, Animals, Marine & Tissue culture
- (c) Organized drugs, unorganized drugs (dried latex, dried juices, dried extracts, gums and mucilages, oleoresins and oleo- gum -resins).

##### **Classification of drugs:**

Alphabetical, morphological, taxonomical, chemical, pharmacological, chemo and sero taxonomical classification of drugs

##### **Quality control of Drugs of Natural Origin:**

Adulteration of drugs of natural origin. Evaluation by organoleptic, microscopic, physical, chemical and biological methods and properties.

Quantitative microscopy of crude drugs including lycopodium spore method, leaf constants, camera lucida and diagrams of microscopic objects to scale with camera lucida.

#### **UNIT-II**

**10 Hours**

##### **Cultivation, Collection, Processing and storage of drugs of natural origin:**

Cultivation and Collection of drugs of natural origin  
Factors influencing cultivation of medicinal plants.  
Plant hormones and their applications.  
Polyploidy, mutation and hybridization with reference to medicinal plants

##### **Conservation of medicinal plants**

#### **UNIT-III**

**07 Hours**

##### **Plant tissue culture:**

Historical development of plant tissue culture, types of cultures, Nutritional requirements, growth and their maintenance.

Applications of plant tissue culture in pharmacognosy.

Edible vaccines

#### **UNIT IV**

**10 Hours**

##### **Pharmacognosy in various systems of medicine:**

Role of Pharmacognosy in allopathy and traditional systems of medicine namely, Ayurveda, Unani, Siddha, Homeopathy and Chinese systems of medicine.

##### **Introduction to secondary metabolites:**

Definition, classification, properties and test for identification of Alkaloids, Glycosides, Flavonoids, Tannins, Volatile oil and Resins

#### **UNIT V**

**08 Hours**

Study of biological source, chemical nature and uses of drugs of natural origin containing following drugs

##### **Plant Products:**

Fibers - Cotton, Jute, Hemp

Hallucinogens, Teratogens, Natural allergens

##### **Primary metabolites:**

General introduction, detailed study with respect to chemistry, sources, preparation, evaluation, preservation, storage, therapeutic used and commercial utility as Pharmaceutical Aids and/or Medicines for the following Primary metabolites:

**Carbohydrates:** Acacia, Agar, Tragacanth, Honey

**Proteins and Enzymes :** Gelatin, casein, proteolytic enzymes (Papain, bromelain, serratiopeptidase, urokinase, streptokinase, pepsin).

**Lipids(Waxes, fats, fixed oils) :** Castor oil, Chaulmoogra oil, Wool Fat, Bees Wax

##### **Marine Drugs:**

Novel medicinal agents from marine sources

**BP408 P. PHARMACOGNOSY AND PHYTOCHEMISTRY I (Practical)**

**4 Hours/Week**

1. Analysis of crude drugs by chemical tests: (i)Tragacanth (ii) Acacia (iii)Agar (iv) Gelatin (v) starch (vi) Honey (vii) Castor oil
2. Determination of stomatal number and index
3. Determination of vein islet number, vein islet termination and palisade ratio.
4. Determination of size of starch grains, calcium oxalate crystals by eye piece micrometer
5. Determination of Fiber length and width
6. Determination of number of starch grains by Lycopodium spore method
7. Determination of Ash value
8. Determination of Extractive values of crude drugs
9. Determination of moisture content of crude drugs
10. Determination of swelling index and foaming

**Recommended Books: (Latest Editions)**

1. W.C.Evans, Trease and Evans Pharmacognosy, 16<sup>th</sup> edition, W.B. Saunders & Co., London, 2009.
2. Tyler, V.E., Brady, L.R. and Robbers, J.E., Pharmacognosy, 9<sup>th</sup> Edn., Lea and Febiger, Philadelphia, 1988.
3. Text Book of Pharmacognosy by T.E. Wallis
4. Mohammad Ali. Pharmacognosy and Phytochemistry, CBS Publishers & Distribution, New Delhi.
5. Text book of Pharmacognosy by C.K. Kokate, Purohit, Gokhlae (2007), 37<sup>th</sup> Edition, Nirali Prakashan, New Delhi.
6. Herbal drug industry by R.D. Choudhary (1996), 1<sup>st</sup> Edn, Eastern Publisher, New Delhi.
7. Essentials of Pharmacognosy, Dr.SH.Ansari, IInd edition, Birla publications, New Delhi, 2007
8. Practical Pharmacognosy: C.K. Kokate, Purohit, Gokhlae
9. Anatomy of Crude Drugs by M.A. Iyengar

**SEMESTER V**

## BP501T. MEDICINAL CHEMISTRY – II (Theory)

45 Hours

**Scope:** This subject is designed to impart fundamental knowledge on the structure, chemistry and therapeutic value of drugs. The subject emphasizes on structure activity relationships of drugs, importance of physicochemical properties and metabolism of drugs. The syllabus also emphasizes on chemical synthesis of important drugs under each class.

**Objectives:** Upon completion of the course the student shall be able to

1. Understand the chemistry of drugs with respect to their pharmacological activity
2. Understand the drug metabolic pathways, adverse effect and therapeutic value of drugs
3. Know the Structural Activity Relationship of different class of drugs
4. Study the chemical synthesis of selected drugs

### Course Content:

**Study of the development of the following classes of drugs, Classification, mechanism of action, uses of drugs mentioned in the course, Structure activity relationship of selective class of drugs as specified in the course and synthesis of drugs superscripted (\*)**

#### UNIT- I

10 Hours

**Antihistaminic agents:** Histamine, receptors and their distribution in the humanbody

**H<sub>1</sub>-antagonists:** Diphenhydramine hydrochloride\*, Dimenhydrinate, Doxylamines succinate, Clemastine fumarate, Diphenylpyraline hydrochloride, Tripelenamine hydrochloride, Chlorcyclizine hydrochloride, Meclizine hydrochloride, Buclizine hydrochloride, Chlorpheniramine maleate, Triprolidine hydrochloride\*, Phenidamine tartarate, Promethazine hydrochloride\*, Trimeprazine tartrate, Cyproheptadine hydrochloride, Azatidine maleate, Astemizole, Loratadine, Cetirizine, Levocetrazine Cromolyn sodium

**H<sub>2</sub>-antagonists:** Cimetidine\*, Famotidine, Ranitidin.

**Gastric Proton pump inhibitors:** Omeprazole, Lansoprazole, Rabeprazole, Pantoprazole

**Anti-neoplastic agents:**

**Alkylating agents:** Meclorothamine\*, Cyclophosphamide, Melphalan,

Chlorambucil, Busulfan, Thiotepa

**Antimetabolites:** Mercaptopurine\*, Thioguanine, Fluorouracil, Floxuridine, Cytarabine, Methotrexate\*, Azathioprine

**Antibiotics:** Dactinomycin, Daunorubicin, Doxorubicin, Bleomycin

**Plant products:** Etoposide, Vinblastin sulphate, Vincristin sulphate

**Miscellaneous:** Cisplatin, Mitotane.

## UNIT – II

**10 Hours**

### **Anti-anginal:**

**Vasodilators:** Amyl nitrite, Nitroglycerin\*, Pentaerythritol tetranitrate, Isosorbide dinitrite\*, Dipyridamole.

**Calcium channel blockers:** Verapamil, Bepridil hydrochloride, Diltiazem hydrochloride, Nifedipine, Amlodipine, Felodipine, Nicardipine, Nimodipine.

### **Diuretics:**

Carbonic anhydrase inhibitors: Acetazolamide\*, Methazolamide, Dichlorphenamide.

Thiazides: Chlorthiazide\*, Hydrochlorothiazide, Hydroflumethiazide, Cyclothiazide,

Loop diuretics: Furosemide\*, Bumetanide, Ethacrynic acid.

Potassium sparing Diuretics: Spironolactone, Triamterene, Amiloride.

Osmotic Diuretics: Mannitol

**Anti-hypertensive Agents:** Timolol, Captopril, Lisinopril, Enalapril, Benazepril hydrochloride, Quinapril hydrochloride, Methyldopate hydrochloride,\* Clonidine hydrochloride, Guanethidine monosulphate, Guanabenz acetate, Sodium nitroprusside, Diazoxide, Minoxidil, Reserpine, Hydralazine hydrochloride.

## UNIT- III

**10 Hours**

**Anti-arrhythmic Drugs:** Quinidine sulphate, Procainamide hydrochloride, Disopyramide phosphate\*, Phenytoin sodium, Lidocaine hydrochloride, Tocainide hydrochloride, Mexiletine hydrochloride, Lorcaïnide hydrochloride, Amiodarone, Sotalol.

**Anti-hyperlipidemic agents:** Clofibrate, Lovastatin, Cholesteramine and Cholestipol

**Coagulant & Anticoagulants:** Menadione, Acetomenadione, Warfarin\*, Anisindione, clopidogrel

**Drugs used in Congestive Heart Failure:** Digoxin, Digitoxin, Nesiritide, Bosentan, Tezosentan.

**UNIT- IV****08 Hours****Drugs acting on Endocrine system**

Nomenclature, Stereochemistry and metabolism of steroids

**Sex hormones:** Testosterone, Nandralone, Progesterones, Oestriol, Oestradiol, Oestrione, Diethyl stilbestrol.

**Drugs for erectile dysfunction:** Sildenafil, Tadalafil.

**Oral contraceptives:** Mifepristone, Norgestril, Levonorgestrol

**Corticosteroids:** Cortisone, Hydrocortisone, Prednisolone, Betamethasone, Dexamethasone

**Thyroid and antithyroid drugs:** L-Thyroxine, L-Thyronine, Propylthiouracil, Methimazole.

**UNIT – V****07 Hours****Antidiabetic agents:**

Insulin and its preparations

Sulfonyl ureas: Tolbutamide\*, Chlorpropamide, Glipizide, Glimepiride.

Biguanides: Metformin.

Thiazolidinediones: Pioglitazone, Rosiglitazone.

Meglitinides: Repaglinide, Nateglinide.

Glucosidase inhibitors: Acarbose, Voglibose.

**Local Anesthetics: SAR of Local anesthetics**

**Benzoic Acid derivatives;** Cocaine, Hexylcaine, Meprylcaine, Cyclomethycaine, Piperocaine.

**Amino Benzoic acid derivatives:** Benzocaine\*, Butamben, Procaine\*, Butacaine, Propoxycaine, Tetracaine, Benoxinate.

**Lidocaine/Anilide derivatives:** Lignocaine, Mepivacaine, Prilocaine, Etidocaine.

**Miscellaneous:** Phenacaine, Dipiperodon, Dibucaine.\*

**Recommended Books (Latest Editions)**

1. Wilson and Giswold's Organic medicinal and Pharmaceutical Chemistry.
2. Foye's Principles of Medicinal Chemistry.
3. Burger's Medicinal Chemistry, Vol I to IV.
4. Introduction to principles of drug design- Smith and Williams.
5. Remington's Pharmaceutical Sciences.
6. Martindale's extra pharmacopoeia.
7. Organic Chemistry by I.L. Finar, Vol. II.
8. The Organic Chemistry of Drug Synthesis by Lednicer, Vol. 1 to 5.
9. Indian Pharmacopoeia.
10. Text book of practical organic chemistry- A.I.Vogel.

## BP 502 T. Industrial PharmacyI (Theory)

**45 Hours**

**Scope:** Course enables the student to understand and appreciate the influence of pharmaceutical additives and various pharmaceutical dosage forms on the performance of the drug product.

**Objectives:** Upon completion of the course the student shall be able to

1. Know the various pharmaceutical dosage forms and their manufacturing techniques.
2. Know various considerations in development of pharmaceutical dosage forms
3. Formulate solid, liquid and semisolid dosage forms and evaluate them for their quality

### Course content:

**3 hours/ week**

#### UNIT-I

**07 Hours**

**Preformulation Studies:** Introduction to preformulation, goals and objectives, study of physicochemical characteristics of drug substances.

*a. Physical properties:* Physical form (crystal & amorphous), particle size, shape, flow properties, solubility profile (pKa, pH, partition coefficient), polymorphism

*b. Chemical Properties:* Hydrolysis, oxidation, reduction, racemisation, polymerization

BCS classification of drugs & its significant

Application of preformulation considerations in the development of solid, liquid oral and parenteral dosage forms and its impact on stability of dosage forms.

#### UNIT-II

**10 Hours**

##### Tablets:

- a. Introduction, ideal characteristics of tablets, classification of tablets. Excipients, Formulation of tablets, granulation methods, compression and processing problems. Equipments and tablet tooling.
- b. Tablet coating: Types of coating, coating materials, formulation of coating composition, methods of coating, equipment employed and defects in coating.
- c. Quality control tests: In process and finished product tests

**Liquid orals:** Formulation and manufacturing consideration of syrups and elixirs suspensions and emulsions; Filling and packaging; evaluation of liquid orals official in pharmacopoeia

### UNIT-III

08 Hours

#### Capsules:

- a. **Hard gelatin capsules:** Introduction, Production of hard gelatin capsule shells. size of capsules, Filling, finishing and special techniques of formulation of hard gelatin capsules, manufacturing defects. In process and final product quality control tests for capsules.
- b. **Soft gelatin capsules:** Nature of shell and capsule content, size of capsules, importance of base adsorption and minim/gram factors, production, in process and final product quality control tests. Packing, storage and stability testing of soft gelatin capsules and their applications.

**Pellets:** Introduction, formulation requirements, pelletization process, equipments for manufacture of pellets

### UNIT-IV

10 Hours

#### Parenteral Products:

- a. Definition, types, advantages and limitations. Preformulation factors and essential requirements, vehicles, additives, importance of isotonicity
- b. Production procedure, production facilities and controls, aseptic processing
- c. Formulation of injections, sterile powders, large volume parenterals and lyophilized products.
- d. Containers and closures selection, filling and sealing of ampoules, vials and infusion fluids. Quality control tests of parenteral products.

**Ophthalmic Preparations:** Introduction, formulation considerations; formulation of eye drops, eye ointments and eye lotions; methods of preparation; labeling, containers; evaluation of ophthalmic preparations

### UNIT-V

10 Hours

**Cosmetics:** Formulation and preparation of the following cosmetic preparations: lipsticks, shampoos, cold cream and vanishing cream, tooth pastes, hair dyes and sunscreens.

**Pharmaceutical Aerosols:** Definition, propellants, containers, valves, types of aerosol systems; formulation and manufacture of aerosols; Evaluation of aerosols; Quality control and stability studies.

**Packaging Materials Science:** Materials used for packaging of pharmaceutical products, factors influencing choice of containers, legal and official requirements for containers, stability aspects of packaging materials, quality control tests.

## **BP 506 P. Industrial PharmacyI (Practical)**

**4 Hours/week**

1. Preformulation studies on paracetamol/asparin/or any other drug
2. Preparation and evaluation of Paracetamol tablets
3. Preparation and evaluation of Aspirin tablets
4. Coating of tablets- film coating of tables/granules
5. Preparation and evaluation of Tetracycline capsules
6. Preparation of Calcium Gluconate injection
7. Preparation of Ascorbic Acid injection
8. Qulaity control test of (as per IP) marketed tablets and capsules
9. Preparation of Eye drops/ and Eye ointments
10. Preparation of Creams (cold / vanishing cream)
11. Evaluation of Glass containers (as per IP)

### **Recommended Books: (Latest Editions)**

1. Pharmaceutical dosage forms - Tablets, volume 1 -3 by H.A. Liberman, Leon Lachman &J.B.Schwartz
2. Pharmaceutical dosage form - Parenteral medication vol- 1&2 by Liberman & Lachman
3. Pharmaceutical dosage form disperse system VOL-1 by Liberman & Lachman
4. Modern Pharmaceutics by Gilbert S. Banker & C.T. Rhodes, 3rd Edition
5. Remington: The Science and Practice of Pharmacy, 20th edition Pharmaceutical Science (RPS)
6. Theory and Practice of Industrial Pharmacy by Liberman & Lachman
7. Pharmaceutics- The science of dosage form design by M.E.Aulton, Churchill livingstone, Latest edition
8. Introduction to Pharmaceutical Dosage Forms by H. C.Ansel, Lea &Febiger, Philadelphia, 5<sup>th</sup>edition, 2005
9. Drug stability - Principles and practice by Cartensen & C.J. Rhodes, 3rd Edition, Marcel Dekker Series, Vol 107.

## BP503.T. PHARMACOLOGY-II (Theory)

45 Hours

**Scope:** This subject is intended to impart the fundamental knowledge on various aspects (classification, mechanism of action, therapeutic effects, clinical uses, side effects and contraindications) of drugs acting on different systems of body and in addition, emphasis on the basic concepts of bioassay.

**Objectives:** Upon completion of this course the student should be able to

1. Understand the mechanism of drug action and its relevance in the treatment of different diseases
2. Demonstrate isolation of different organs/tissues from the laboratory animals by simulated experiments
3. Demonstrate the various receptor actions using isolated tissue preparation
4. Appreciate correlation of pharmacology with related medical sciences

### Course Content:

#### UNIT-I

10hours

##### 1. Pharmacology of drugs acting on cardio vascular system

- a. Introduction to hemodynamic and electrophysiology of heart.
- b. Drugs used in congestive heart failure
- c. Anti-hypertensive drugs.
- d. Anti-anginal drugs.
- e. Anti-arrhythmic drugs.
- f. Anti-hyperlipidemic drugs.

#### UNIT-II

10hours

##### 1. Pharmacology of drugs acting on cardio vascular system

- a. Drug used in the therapy of shock.
- b. Hematinics, coagulants and anticoagulants.
- c. Fibrinolytics and anti-platelet drugs
- d. Plasma volume expanders

##### 2. Pharmacology of drugs acting on urinary system

- a. Diuretics
- b. Anti-diuretics.

#### UNIT-III

10hours

##### 3. Autocoids and related drugs

- a. Introduction to autocoids and classification
- b. Histamine, 5-HT and their antagonists.
- c. Prostaglandins, Thromboxanes and Leukotrienes.
- d. Angiotensin, Bradykinin and Substance P.
- e. Non-steroidal anti-inflammatory agents
- f. Anti-gout drugs
- g. Antirheumatic drugs

**UNIT-IV****08hours****5. Pharmacology of drugs acting on endocrine system**

- a. Basic concepts in endocrine pharmacology.
- b. Anterior Pituitary hormones- analogues and their inhibitors.
- c. Thyroid hormones- analogues and their inhibitors.
- d. Hormones regulating plasma calcium level- Parathormone, Calcitonin and Vitamin-D.
- d. Insulin, Oral Hypoglycemic agents and glucagon.
- e. ACTH and corticosteroids.

**UNIT-V****07hours****5. Pharmacology of drugs acting on endocrine system**

- a. Androgens and Anabolic steroids.
- b. Estrogens, progesterone and oral contraceptives.
- c. Drugs acting on the uterus.

**6. Bioassay**

- a. Principles and applications of bioassay.
- b. Types of bioassay
- c. Bioassay of insulin, oxytocin, vasopressin, ACTH, d-tubocurarine, digitalis, histamine and 5-HT

## BP 507 P. PHARMACOLOGY-II (Practical)

4Hrs/Week

1. Introduction to *in-vitro* pharmacology and physiological salt solutions.
2. Effect of drugs on isolated frog heart.
3. Effect of drugs on blood pressure and heart rate of dog.
4. Study of diuretic activity of drugs using rats/mice.
5. DRC of acetylcholine using frog rectus abdominis muscle.
6. Effect of physostigmine and atropine on DRC of acetylcholine using frog rectus abdominis muscle and rat ileum respectively.
7. Bioassay of histamine using guinea pig ileum by matching method.
8. Bioassay of oxytocin using rat uterine horn by interpolation method.
9. Bioassay of serotonin using rat fundus strip by three point bioassay.
10. Bioassay of acetylcholine using rat ileum/colon by four point bioassay.
11. Determination of  $PA_2$  value of prazosin using rat anococcygeus muscle (by Schild's plot method).
12. Determination of  $PD_2$  value using guinea pig ileum.
13. Effect of spasmogens and spasmolytics using rabbit jejunum.
14. Anti-inflammatory activity of drugs using carrageenan induced paw-edema model.
15. Analgesic activity of drug using central and peripheral methods

*Note: All laboratory techniques and animal experiments are demonstrated by simulated experiments by softwares and videos*

### Recommended Books (Latest Editions)

## BP504 T. PHARMACOGNOSY AND PHYTOCHEMISTRY II (Theory)

45Hours

**Scope:** The main purpose of subject is to impart the students the knowledge of how the secondary metabolites are produced in the crude drugs, how to isolate and identify and produce them industrially. Also this subject involves the study of producing the plants and phytochemicals through plant tissue culture, drug interactions and basic principles of traditional system of medicine

**Objectives:** Upon completion of the course, the student shall be able

1. to know the modern extraction techniques, characterization and identification of the herbal drugs and phytoconstituents
2. to understand the preparation and development of herbal formulation.
3. to understand the herbal drug interactions
4. to carryout isolation and identification of phytoconstituents

### Course Content:

#### UNIT-I

7 Hours

##### Metabolic pathways in higher plants and their determination

- a) Brief study of basic metabolic pathways and formation of different secondary metabolites through these pathways- Shikimic acid pathway, Acetate pathways and Amino acid pathway.
- b) Study of utilization of radioactive isotopes in the investigation of Biogenetic studies.

#### UNIT-II

14 Hours

General introduction, composition, chemistry & chemical classes, biosources, therapeutic uses and commercial applications of following secondary metabolites:

**Alkaloids:** Vinca, Rauwolfia, Belladonna, Opium,

**Phenylpropanoids and Flavonoids:** Lignans, Tea, Ruta

**Steroids, Cardiac Glycosides & Triterpenoids:** Liquorice, Dioscorea, Digitalis

**Volatile oils:** Mentha, Clove, Cinnamon, Fennel, Coriander,

**Tannins:** Catechu, Pterocarpus

**Resins:** Benzoin, Guggul, Ginger, Asafoetida, Myrrh, Colophony

**Glycosides:** Senna, Aloes, Bitter Almond

**Iridoids, Other terpenoids & Naphthaquinones:** Gentian, Artemisia, taxus, carotenoids

#### UNIT-III

06 Hours

Isolation, Identification and Analysis of Phytoconstituents

- a) Terpenoids: Menthol, Citral, Artemisin
- b) Glycosides: Glycyrrhetic acid & Rutin
- c) Alkaloids: Atropine, Quinine, Reserpine, Caffeine
- d) Resins: Podophyllotoxin, Curcumin

#### UNIT-IV

10 Hours

Industrial production, estimation and utilization of the following phytoconstituents: Forskolin, Sennoside, Artemisinin, Diosgenin, Digoxin, Atropine, Podophyllotoxin, Caffeine, Taxol, Vincristine and Vinblastine

#### UNIT V

8 Hours

##### Basics of Phytochemistry

Modern methods of extraction, application of latest techniques like Spectroscopy, chromatography and electrophoresis in the isolation, purification and identification of crude drugs.

**BP 508 P. PHARMACOGNOSY AND PHYTOCHEMISTRY II (Practical)**

**4 Hours/Week**

1. Morphology, histology and powder characteristics & extraction & detection of: Cinchona, Cinnamon, Senna, Clove, Ephedra, Fennel and Coriander
2. Exercise involving isolation & detection of active principles
  - a. Caffeine - from tea dust.
  - b. Diosgenin from Dioscorea
  - c. Atropine from Belladonna
  - d. Sennosides from Senna
3. Separation of sugars by Paper chromatography
4. TLC of herbal extract
5. Distillation of volatile oils and detection of phytoconstituents by TLC
6. Analysis of crude drugs by chemical tests: (i) Asafoetida (ii) Benzoin (iii) Colophony (iv) Aloes (v) Myrrh

**Recommended Books: (Latest Editions)**

3. Text book of Pharmacognosy by C.K. Kokate, Purohit, Gokhlae (2007), 37<sup>th</sup> Edition, Nirali Prakashan, New Delhi.
4. Herbal drug industry by R.D. Choudhary (1996), 1<sup>st</sup> Edn, Eastern Publisher, New Delhi.
5. Essentials of Pharmacognosy, Dr.SH.Ansari, 1<sup>st</sup> edition, Birla publications, New Delhi, 2007
6. Herbal Cosmetics by H.Pande, Asia Pacific Business press, Inc, New Delhi.
7. A.N. Kalia, Textbook of Industrial Pharmacognosy, CBS Publishers, New Delhi, 2005.
8. R Endress, Plant cell Biotechnology, Springer-Verlag, Berlin, 1994.
9. Pharmacognosy & Pharmacobiotechnology. James Bobbers, Marilyn KS, VE Tylor.
10. The formulation and preparation of cosmetic, fragrances and flavours.
11. Remington's Pharmaceutical sciences.
12. Text Book of Biotechnology by Vyas and Dixit.
13. Text Book of Biotechnology by R.C. Dubey.

## **BP 505 T. PHARMACEUTICAL JURISPRUDENCE (Theory)**

**45 Hours**

**Scope:** This course is designed to impart basic knowledge on important legislations related to the profession of pharmacy in India.

**Objectives:** Upon completion of the course, the student shall be able to understand:

1. The Pharmaceutical legislations and their implications in the development and marketing of pharmaceuticals.
2. Various Indian pharmaceutical Acts and Laws
3. The regulatory authorities and agencies governing the manufacture and sale of pharmaceuticals
4. The code of ethics during the pharmaceutical practice

### **Course Content:**

#### **UNIT-I**

**10 Hours**

##### **Drugs and Cosmetics Act, 1940 and its rules 1945:**

Objectives, Definitions, Legal definitions of schedules to the Act and Rules

Import of drugs – Classes of drugs and cosmetics prohibited from import, Import under license or permit. Offences and penalties.

Manufacture of drugs – Prohibition of manufacture and sale of certain drugs,

Conditions for grant of license and conditions of license for manufacture of drugs, Manufacture of drugs for test, examination and analysis, manufacture of new drug, loan license and repacking license.

#### **UNIT-II**

**10 Hours**

##### **Drugs and Cosmetics Act, 1940 and its rules 1945.**

Detailed study of Schedule G, H, M, N, P,T,U, V, X, Y, Part XII B, Sch F & DMR (OA)

Sale of Drugs – Wholesale, Retail sale and Restricted license. Offences and penalties

Labeling & Packing of drugs- General labeling requirements and specimen labels for drugs and cosmetics, List of permitted colors. Offences and penalties.

Administration of the Act and Rules – Drugs Technical Advisory Board, Central drugs Laboratory, Drugs Consultative Committee, Government drug analysts, Licensing authorities, controlling authorities, Drugs Inspectors

#### **UNIT-III**

**10 Hours**

- **Pharmacy Act –1948:** Objectives, Definitions, Pharmacy Council of India; its constitution and functions, Education Regulations, State and Joint state pharmacy councils; constitution and functions, Registration of Pharmacists, Offences and

## Penalties

- **Medicinal and Toilet Preparation Act –1955:** Objectives, Definitions, Licensing, Manufacture In bond and Outside bond, Export of alcoholic preparations, Manufacture of Ayurvedic, Homeopathic, Patent & Proprietary Preparations. Offences and Penalties.
- **Narcotic Drugs and Psychotropic substances Act-1985 and Rules:** Objectives, Definitions, Authorities and Officers, Constitution and Functions of narcotic & Psychotropic Consultative Committee, National Fund for Controlling the Drug Abuse, Prohibition, Control and Regulation, opium poppy cultivation and production of poppy straw, manufacture, sale and export of opium, Offences and Penalties

## UNIT-IV

**08 Hours**

- **Study of Salient Features of Drugs and Magic Remedies Act and its rules:** Objectives, Definitions, Prohibition of certain advertisements, Classes of Exempted advertisements, Offences and Penalties
- **Prevention of Cruelty to animals Act-1960:** Objectives, Definitions, Institutional Animal Ethics Committee, CPCSEA guidelines for Breeding and Stocking of Animals, Performance of Experiments, Transfer and acquisition of animals for experiment, Records, Power to suspend or revoke registration, Offences and Penalties
- **National Pharmaceutical Pricing Authority:** Drugs Price Control Order (DPCO)-2013. Objectives, Definitions, Sale prices of bulk drugs, Retail price of formulations, Retail price and ceiling price of scheduled formulations, National List of Essential Medicines (NLEM)

## UNIT-V

**07 Hours**

- **Pharmaceutical Legislations** – A brief review, Introduction, Study of drugs enquiry committee, Health survey and development committee, Hathi committee and Mudaliar committee
- **Code of Pharmaceutical ethics** Definition, Pharmacist in relation to his job, trade, medical profession and his profession, Pharmacist's oath
- **Medical Termination of Pregnancy Act**
- **Right to Information Act**
- **Introduction to Intellectual Property Rights (IPR)**

### **Recommended books: (Latest Edition)**

1. Forensic Pharmacy by B. Suresh

2. Text book of Forensic Pharmacy by B.M. Mithal
3. Hand book of drug law-by M.L. Mehra
4. A text book of Forensic Pharmacy by N.K. Jain
5. Drugs and Cosmetics Act/Rules by Govt. of India publications.
6. Medicinal and Toilet preparations act 1955 by Govt. of India publications.
7. Narcotic drugs and psychotropic substances act by Govt. of India publications
8. Drugs and Magic Remedies act by Govt. of India publication
9. Bare Acts of the said laws published by Government. Reference books (Theory)

**SEMESTER VI**

## BP601T. MEDICINAL CHEMISTRY – III (Theory)

45 Hours

**Scope:** This subject is designed to impart fundamental knowledge on the structure, chemistry and therapeutic value of drugs. The subject emphasis on modern techniques of rational drug design like quantitative structure activity relationship (QSAR), Prodrug concept, combinatorial chemistry and Computer aided drug design (CADD). The subject also emphasizes on the chemistry, mechanism of action, metabolism, adverse effects, Structure Activity Relationships (SAR), therapeutic uses and synthesis of important drugs.

**Objectives:** Upon completion of the course student shall be able to

1. Understand the importance of drug design and different techniques of drug design.
2. Understand the chemistry of drugs with respect to their biological activity.
3. Know the metabolism, adverse effects and therapeutic value of drugs.
4. Know the importance of SAR of drugs.

### Course Content:

**Study of the development of the following classes of drugs, Classification, mechanism of action, uses of drugs mentioned in the course, Structure activity relationship of selective class of drugs as specified in the course and synthesis of drugs superscripted by (\*)**

#### UNIT – I

10 Hours

##### Antibiotics

Historical background, Nomenclature, Stereochemistry, Structure activity relationship, Chemical degradation classification and important products of the following classes.

**$\beta$ -Lactam antibiotics:** Penicillin, Cephalosporins,  $\beta$ - Lactamase inhibitors, Monobactams

**Aminoglycosides:** Streptomycin, Neomycin, Kanamycin

**Tetracyclines:** Tetracycline, Oxytetracycline, Chlortetracycline, Minocycline, Doxycycline

#### UNIT – II

10 Hours

##### Antibiotics

Historical background, Nomenclature, Stereochemistry, Structure activity relationship, Chemical degradation classification and important products of the following classes.

**Macrolide:** Erythromycin Clarithromycin, Azithromycin.

**Miscellaneous:** Chloramphenicol\*, Clindamycin.

**Prodrugs:** Basic concepts and application of prodrugs design.

**Antimalarials:** Etiology of malaria.

**Quinolines:** SAR, Quinine sulphate, Chloroquine\*, Amodiaquine, Primaquine phosphate, Pamaquine\*, Quinacrine hydrochloride, Mefloquine.

**Biguanides and dihydro triazines:** Cycloguanil pamoate, Proguanil.

**Miscellaneous:** Pyrimethamine, Artesunate, Artemether, Atovaquone.

### UNIT – III

**10 Hours**

#### **Anti-tubercular Agents**

**Synthetic anti tubercular agents:** Isoniazid\*, Ethionamide, Ethambutol, Pyrazinamide, Para amino salicylic acid.\*

**Anti tubercular antibiotics:** Rifampicin, Rifabutin, Cycloserine Streptomycine, Capreomycin sulphate.

#### **Urinary tract anti-infective agents**

**Quinolones:** SAR of quinolones, Nalidixic Acid, Norfloxacin, Enoxacin, Ciprofloxacin\*, Ofloxacin, Lomefloxacin, Sparfloxacin, Gatifloxacin, Moxifloxacin

**Miscellaneous:** Furazolidine, Nitrofurantoin\*, Methanamine.

#### **Antiviral agents:**

Amantadine hydrochloride, Rimantadine hydrochloride, Idoxuridine trifluoride, Acyclovir\*, Gancyclovir, Zidovudine, Didanosine, Zalcitabine, Lamivudine, Loviride, Delavirding, Ribavirin, Saquinavir, Indinavir, Ritonavir.

### UNIT – IV

**08 Hours**

#### **Antifungal agents:**

**Antifungal antibiotics:** Amphotericin-B, Nystatin, Natamycin, Griseofulvin.

**Synthetic Antifungal agents:** Clotrimazole, Econazole, Butoconazole, Oxiconazole Tioconazole, Miconazole\*, Ketoconazole, Terconazole, Itraconazole, Fluconazole, Naftifine hydrochloride, Tolnaftate\*.

**Anti-protozoal Agents:** Metronidazole\*, Tinidazole, Ornidazole, Diloxanide, Iodoquinol, Pentamidine Isethionate, Atovaquone, Eflornithine.

**Anthelmintics:** Diethylcarbamazine citrate\*, Thiabendazole, Mebendazole\*, Albendazole, Niclosamide, Oxamniquine, Praziquantal, Ivermectin.

### **Sulphonamides and Sulfones**

Historical development, chemistry, classification and SAR of Sulfonamides: Sulphamethizole, Sulfoxazole, Sulphamethizine, Sulfacetamide\*, Sulphapyridine, Sulfamethoxazole\*, Sulphadiazine, Mefenide acetate, Sulfasalazine.

**Folate reductase inhibitors:** Trimethoprim\*, Cotrimoxazole.

**Sulfones:** Dapsone\*.

## **UNIT – V**

**07 Hours**

### **Introduction to Drug Design**

Various approaches used in drug design.

Physicochemical parameters used in quantitative structure activity relationship (QSAR) such as partition coefficient, Hammett's electronic parameter, Taft's steric parameter and Hansch analysis.

Pharmacophore modeling and docking techniques.

**Combinatorial Chemistry:** Concept and applications of combinatorial chemistry: solid phase and solution phase synthesis.

## BP607P. MEDICINAL CHEMISTRY- III (Practical)

4 Hours / week

### **I Preparation of drugs and intermediates**

- 1 Sulphanilamide
- 2 7-Hydroxy, 4-methyl coumarin
- 3 Chlorobutanol
- 4 Triphenyl imidazole
- 5 Tolbutamide
- 6 Hexamine

### **II Assay of drugs**

- 1 Isonicotinic acid hydrazide
- 2 Chloroquine
- 3 Metronidazole
- 4 Dapsone
- 5 Chlorpheniramine maleate
- 6 Benzyl penicillin

### **III Preparation of medicinally important compounds or intermediates by Microwave irradiation technique**

### **IV Drawing structures and reactions using chem draw®**

### **V Determination of physicochemical properties such as logP, clogP, MR, Molecular weight, Hydrogen bond donors and acceptors for class of drugs course content using drug design software Drug likeliness screening (Lipinskies RO5)**

### **Recommended Books (Latest Editions)**

1. Wilson and Giswold's Organic medicinal and Pharmaceutical Chemistry.
2. Foye's Principles of Medicinal Chemistry.
3. Burger's Medicinal Chemistry, Vol I to IV.
4. Introduction to principles of drug design- Smith and Williams.
5. Remington's Pharmaceutical Sciences.
6. Martindale's extra pharmacopoeia.

7. Organic Chemistry by I.L. Finar, Vol. II.
8. The Organic Chemistry of Drug Synthesis by Lednicer, Vol. 1-5.
9. Indian Pharmacopoeia.
10. Text book of practical organic chemistry- A.I.Vogel.

## **BP602 T. PHARMACOLOGY-III (Theory)**

**45 Hours**

**Scope:** This subject is intended to impart the fundamental knowledge on various aspects (classification, mechanism of action, therapeutic effects, clinical uses, side effects and contraindications) of drugs acting on respiratory and gastrointestinal system, infectious diseases, immuno-pharmacology and in addition, emphasis on the principles of toxicology and chronopharmacology.

**Objectives:** Upon completion of this course the student should be able to:

1. understand the mechanism of drug action and its relevance in the treatment of different infectious diseases
2. comprehend the principles of toxicology and treatment of various poisonings and
3. appreciate correlation of pharmacology with related medical sciences.

### **Course Content:**

#### **UNIT-I**

**10hours**

##### **1. Pharmacology of drugs acting on Respiratory system**

- a. Anti -asthmatic drugs
- b. Drugs used in the management of COPD
- c. Expectorants and antitussives
- d. Nasal decongestants
- e. Respiratory stimulants

##### **2. Pharmacology of drugs acting on the Gastrointestinal Tract**

- a. Antiulcer agents.
- b. Drugs for constipation and diarrhoea.
- c. Appetite stimulants and suppressants.
- d. Digestants and carminatives.
- e. Emetics and anti-emetics.

#### **UNIT-II**

**10hours**

##### **3. Chemotherapy**

- a. General principles of chemotherapy.
- b. Sulfonamides and cotrimoxazole.
- c. Antibiotics- Penicillins, cephalosporins, chloramphenicol, macrolides, quinolones and fluoroquinolins, tetracycline and aminoglycosides

#### **UNIT-III**

**10hours**

##### **3. Chemotherapy**

- a. Antitubercular agents
- b. Antileprotic agents

- c. Antifungal agents
- d. Antiviral drugs
- e. Anthelmintics
- f. Antimalarial drugs
- g. Antiamoebic agents

**UNIT-IV**

**08hours**

**3. Chemotherapy**

- l. Urinary tract infections and sexually transmitted diseases.
- m. Chemotherapy of malignancy.

**4. Immunopharmacology**

- a. Immunostimulants
- b. Immunosuppressant

Protein drugs, monoclonal antibodies, target drugs to antigen, biosimilars

**UNIT-V**

**07hours**

**5. Principles of toxicology**

- a. Definition and basic knowledge of acute, subacute and chronic toxicity.
- b. Definition and basic knowledge of genotoxicity, carcinogenicity, teratogenicity and mutagenicity
- c. General principles of treatment of poisoning
- d. Clinical symptoms and management of barbiturates, morphine, organophosphorus compound and lead, mercury and arsenic poisoning.

**6. Chronopharmacology**

- a. Definition of rhythm and cycles.
- b. Biological clock and their significance leading to chronotherapy.

## BP 608 P. PHARMACOLOGY-III (Practical)

4Hrs/Week

1. Dose calculation in pharmacological experiments
2. Antiallergic activity by mast cell stabilization assay
3. Study of anti-ulcer activity of a drug using pylorus ligand (SHAY) rat model and NSAIDS induced ulcer model.
4. Study of effect of drugs on gastrointestinal motility
5. Effect of agonist and antagonists on guinea pig ileum
6. Estimation of serum biochemical parameters by using semi- autoanalyser
7. Effect of saline purgative on frog intestine
8. Insulin hypoglycemic effect in rabbit
9. Test for pyrogens ( rabbit method)
10. Determination of acute oral toxicity (LD50) of a drug from a given data
11. Determination of acute skin irritation / corrosion of a test substance
12. Determination of acute eye irritation / corrosion of a test substance
13. Calculation of pharmacokinetic parameters from a given data
14. Biostatistics methods in experimental pharmacology( student's t test, ANOVA)
15. Biostatistics methods in experimental pharmacology (Chi square test, Wilcoxon Signed Rank test)

*\*Experiments are demonstrated by simulated experiments/videos*

### Recommended Books (Latest Editions)

1. Rang H. P., Dale M. M., Ritter J. M., Flower R. J., Rang and Dale's Pharmacology, Churchill Livingstone Elsevier
2. Katzung B. G., Masters S. B., Trevor A. J., Basic and clinical pharmacology, Tata Mc Graw-Hill
3. Goodman and Gilman's, The Pharmacological Basis of Therapeutics
4. Marry Anne K. K., Lloyd Yee Y., Brian K. A., Robbin L.C., Joseph G. B., Wayne A. K., Bradley R.W., Applied Therapeutics, The Clinical use of Drugs. The Point Lippincott Williams & Wilkins
5. Mycek M.J, Gelnet S.B and Perper M.M. Lippincott's Illustrated Reviews- Pharmacology
6. K.D.Tripathi. Essentials of Medical Pharmacology, , JAYPEE Brothers Medical Publishers (P) Ltd, New Delhi.
7. Sharma H. L., Sharma K. K., Principles of Pharmacology, Paras medical publisher Modern Pharmacology with clinical Applications, by Charles R.Craig & Robert,
8. Ghosh MN. Fundamentals of Experimental Pharmacology. Hilton & Company, Kolkata,
9. Kulkarni SK. Handbook of experimental pharmacology. VallabhPrakashan,
10. N.Udupa and P.D. Gupta, Concepts in Chronopharmacology.

## **BP 603 T. HERBAL DRUG TECHNOLOGY**

**(Theory)**

**45 hours**

**Scope:** This subject gives the student the knowledge of basic understanding of herbal drug industry, the quality of raw material, guidelines for quality of herbal drugs, herbal cosmetics, natural sweeteners, nutraceutical etc. The subject also emphasizes on Good Manufacturing Practices (GMP), patenting and regulatory issues of herbal drugs

**Objectives:** Upon completion of this course the student should be able to:

1. understand raw material as source of herbal drugs from cultivation to herbal drug product
2. know the WHO and ICH guidelines for evaluation of herbal drugs
3. know the herbal cosmetics, natural sweeteners, nutraceuticals
4. appreciate patenting of herbal drugs, GMP .

### **Course content:**

#### **UNIT-I**

**11 Hours**

##### **Herbs as raw materials**

Definition of herb, herbal medicine, herbal medicinal product, herbal drug preparation

Source of Herbs

Selection, identification and authentication of herbal materials

Processing of herbal raw material

##### **Biodynamic Agriculture**

Good agricultural practices in cultivation of medicinal plants including Organic farming.

Pest and Pest management in medicinal plants: Biopesticides/Bioinsecticides.

##### **Indian Systems of Medicine**

a) Basic principles involved in Ayurveda, Siddha, Unani and Homeopathy

b) Preparation and standardization of Ayurvedic formulations viz Aristas and Asawas,

Ghutika, Churna, Lehya and Bhasma.

#### **UNIT-II**

**7 Hours**

##### **Nutraceuticals**

General aspects, Market, growth, scope and types of products available in the market. Health benefits and role of Nutraceuticals in ailments like Diabetes, CVS diseases, Cancer, Irritable bowel syndrome and various Gastro intestinal diseases.

Study of following herbs as health food: Alfaalfa, Chicory, Ginger, Fenugreek, Garlic, Honey, Amla, Ginseng, Ashwagandha, Spirulina

**Herbal-Drug and Herb-Food Interactions:** General introduction to interaction and classification. Study of following drugs and their possible side effects and interactions: Hypercium, kava-kava, Ginkobiloba, Ginseng, Garlic, Pepper & Ephedra.

#### **UNIT-III**

**10 Hours**

##### **Herbal Cosmetics**

Sources and description of raw materials of herbal origin used via, fixed oils, waxes, gums colours, perfumes, protective agents, bleaching agents, antioxidants in products such as skin care, hair care and oral hygiene products.

**Herbal excipients:**

Herbal Excipients – Significance of substances of natural origin as excipients – colorants, sweeteners, binders, diluents, viscosity builders, disintegrants, flavors & perfumes.

**Herbal formulations :**

Conventional herbal formulations like syrups, mixtures and tablets and Novel dosage forms like phytosomes

**UNIT- IV**

**10 Hours**

**Evaluation of Drugs** WHO & ICH guidelines for the assessment of herbal drugs  
Stability testing of herbal drugs.

**Patenting and Regulatory requirements of natural products:**

- a) Definition of the terms: Patent, IPR, Farmers right, Breeder's right, Bioprospecting and Biopiracy
- b) Patenting aspects of Traditional Knowledge and Natural Products. Case study of Curcuma & Neem.

**Regulatory Issues** - Regulations in India (ASU DTAB, ASU DCC), Regulation of manufacture of ASU drugs - Schedule Z of Drugs & Cosmetics Act for ASU drugs.

**UNIT-V**

**07 Hours**

**General Introduction to Herbal Industry**

Herbal drugs industry: Present scope and future prospects.

A brief account of plant based industries and institutions involved in work on medicinal and aromatic plants in India.

**Schedule T – Good Manufacturing Practice of Indian systems of medicine**

Components of GMP (Schedule – T) and its objectives

Infrastructural requirements, working space, storage area, machinery and equipments, standard operating procedures, health and hygiene, documentation and records.

## **BP 609 P. HERBAL DRUG TECHNOLOGY (Practical)**

**4 hours/ week**

1. To perform preliminary phytochemical screening of crude drugs.
2. Determination of the alcohol content of Asava and Arista
3. Evaluation of excipients of natural origin
4. Incorporation of prepared and standardized extract in cosmetic formulations like creams, lotions and shampoos and their evaluation.
5. Incorporation of prepared and standardized extract in formulations like syrups, mixtures and tablets and their evaluation as per Pharmacopoeial requirements.
6. Monograph analysis of herbal drugs from recent Pharmacopoeias
7. Determination of Aldehyde content
8. Determination of Phenol content
9. Determination of total alkaloids

### **Recommended Books: (Latest Editions)**

1. Textbook of Pharmacognosy by Trease & Evans.
2. Textbook of Pharmacognosy by Tyler, Brady & Robber.
3. Pharmacognosy by Kokate, Purohit and Gokhale
4. Essential of Pharmacognosy by Dr.S.H.Ansari
5. Pharmacognosy & Phytochemistry by V.D.Rangari
6. Pharmacopoeal standards for Ayurvedic Formulation (Council of Research in Indian Medicine & Homeopathy)
7. Mukherjee, P.W. Quality Control of Herbal Drugs: An Approach to Evaluation of Botanicals. Business Horizons Publishers, New Delhi, India, 2002.

## **BP 604 T. BIOPHARMACEUTICS AND PHARMACOKINETICS (Theory)**

45 Hours

**Scope:** This subject is designed to impart knowledge and skills of Biopharmaceutics and pharmacokinetics and their applications in pharmaceutical development, design of dose and dosage regimen and in solving the problems arising therein.

**Objectives:** Upon completion of the course student shall be able to:

1. Understand the basic concepts in biopharmaceutics and pharmacokinetics and their significance.
2. Use of plasma drug concentration-time data to calculate the pharmacokinetic parameters to describe the kinetics of drug absorption, distribution, metabolism, excretion, elimination.
3. To understand the concepts of bioavailability and bioequivalence of drug products and their significance.
4. Understand various pharmacokinetic parameters, their significance & applications.

### **Course Content:**

#### **UNIT-I**

**10 Hours**

##### **Introduction to Biopharmaceutics**

**Absorption:** Mechanisms of drug absorption through GIT, factors influencing drug absorption through GIT, absorption of drug from Non per oral extra-vascular routes, **Distribution** Tissue permeability of drugs, binding of drugs, apparent, volume of drug distribution, plasma and tissue protein binding of drugs, factors affecting protein-drug binding. Kinetics of protein binding, Clinical significance of protein binding of drugs

#### **UNIT- II**

**10 Hours**

**Elimination:** Drug metabolism and basic understanding metabolic pathways renal excretion of drugs, factors affecting renal excretion of drugs, renal clearance, Non renal routes of drug excretion of drugs

**Bioavailability and Bioequivalence:** Definition and Objectives of bioavailability, absolute and relative bioavailability, measurement of bioavailability, *in-vitro* drug dissolution models, *in-vitro-in-vivo* correlations, bioequivalence studies, methods to enhance the dissolution rates and bioavailability of poorly soluble drugs.

#### **UNIT- III**

**10 Hours**

**Pharmacokinetics:** Definition and introduction to Pharmacokinetics, Compartment models, Non compartment models, physiological models, One compartment open model. (a). Intravenous Injection (Bolus) (b). Intravenous infusion and (c) Extra vascular administrations. Pharmacokinetics parameters -  $K_E$ ,  $t_{1/2}$ ,  $V_d$ ,  $AUC$ ,  $K_a$ ,  $Cl_t$  and  $Cl_R$ - definitions methods of eliminations, understanding of their significance and application

**UNIT- IV****08 Hours****Multicompartment models:** Two compartment open model. IV bolus

Kinetics of multiple dosing, steady state drug levels, calculation of loading and maintenance doses and their significance in clinical settings.

**UNIT- V****07 Hours****Nonlinear Pharmacokinetics:** a. Introduction, b. Factors causing Non-linearity.

c. Michaelis-menton method of estimating parameters, Explanation with example of drugs.

**Recommended Books: (Latest Editions)**

1. Biopharmaceutics and Clinical Pharmacokinetics by, Milo Gibaldi.
2. Biopharmaceutics and Pharmacokinetics; By Robert F Notari
3. Applied biopharmaceutics and pharmacokinetics, Leon Shargel and Andrew B.C.YU 4th edition, Prentice-Hall International edition. USA
4. Bio pharmaceutics and Pharmacokinetics-A Treatise, By D. M. Brahmankar and Sunil B.Jaiswal, Vallabh Prakashan Pitampura, Delhi
5. Pharmacokinetics: By Milo Gibaldi Donald, R. Mercei Dekker Inc.
6. Hand Book of Clinical Pharmacokinetics, By Milo Gibaldi and Laurie Prescott by ADIS Health Science Press.
7. Biopharmaceutics; By Swarbrick
8. Clinical Pharmacokinetics, Concepts and Applications: By Malcolm Rowland and
9. Thomas, N. Tozen, Lea and Febrger, Philadelphia, 1995.
10. Dissolution, Bioavailability and Bioequivalence, By Abdou H.M, Mack, Publishing Company, Pennsylvania 1989.
11. Biopharmaceutics and Clinical Pharmacokinetics-An introduction 4th edition Revised and expanded by Robert F Notari Marcel Dekker Inc, New York and Basel, 1987.
12. Remington's Pharmaceutical Sciences, By Mack Publishing Company, Pennsylvania

## **BP 605 T. PHARMACEUTICAL BIOTECHNOLOGY (Theory)**

**45 Hours**

### **Scope:**

- Biotechnology has a long promise to revolutionize the biological sciences and technology.
- Scientific application of biotechnology in the field of genetic engineering, medicine and fermentation technology makes the subject interesting.
- Biotechnology is leading to new biological revolutions in diagnosis, prevention and cure of diseases, new and cheaper pharmaceutical drugs.
- Biotechnology has already produced transgenic crops and animals and the future promises lot more.
- It is basically a research-based subject.

**Objectives:** Upon completion of the subject student shall be able to;

1. Understanding the importance of Immobilized enzymes in Pharmaceutical Industries
2. Genetic engineering applications in relation to production of pharmaceuticals
3. Importance of Monoclonal antibodies in Industries
4. Appreciate the use of microorganisms in fermentation technology

### **Unit I**

**10 Hours**

- a) Brief introduction to Biotechnology with reference to Pharmaceutical Sciences.
- b) Enzyme Biotechnology- Methods of enzyme immobilization and applications.
- c) Biosensors- Working and applications of biosensors in Pharmaceutical Industries.
- d) Brief introduction to Protein Engineering.
- e) Use of microbes in industry. Production of Enzymes- General consideration - Amylase, Catalase, Peroxidase, Lipase, Protease, Penicillinase.
- f) Basic principles of genetic engineering.

### **Unit II**

**10 Hours**

- a) Study of cloning vectors, restriction endonucleases and DNA ligase.
- b) Recombinant DNA technology. Application of genetic engineering in medicine.
- c) Application of r DNA technology and genetic engineering in the production of:
  - i) Interferon ii) Vaccines- hepatitis- B iii) Hormones-Insulin.
- d) Brief introduction to PCR

### **Unit III**

**10 Hours**

Types of immunity- humoral immunity, cellular immunity

- a) Structure of Immunoglobulins
- b) Structure and Function of MHC
- c) Hypersensitivity reactions, Immune stimulation and Immune suppressions.
- d) General method of the preparation of bacterial vaccines, toxoids, viral vaccine, antitoxins, serum-immune blood derivatives and other products relative to immunity.
- e) Storage conditions and stability of official vaccines
- f) Hybridoma technology- Production, Purification and Applications
- g) Blood products and Plasma Substitutes.

### **Unit IV**

**08Hours**

- a) Immuno blotting techniques- ELISA, Western blotting, Southern blotting.
- b) Genetic organization of Eukaryotes and Prokaryotes
- c) Microbial genetics including transformation, transduction, conjugation, plasmids and transposons.
- d) Introduction to Microbial biotransformation and applications.
- e) Mutation: Types of mutation/mutants.

### **Unit V**

**07 Hours**

- a) Fermentation methods and general requirements, study of media, equipments, sterilization methods, aeration process, stirring.
- b) Large scale production fermenter design and its various controls.
- c) Study of the production of - penicillins, citric acid, Vitamin B12, Glutamic acid, Griseofulvin,
- d) Blood Products: Collection, Processing and Storage of whole human blood, dried human plasma, plasma Substitutes.

#### **Recommended Books (Latest edition):**

1. B.R. Glick and J.J. Pasternak: Molecular Biotechnology: Principles and Applications of Recombinant DNA: ASM Press Washington D.C.
2. RA Goldshy et. al., : Kuby Immunology.
3. J.W. Goding: Monoclonal Antibodies.
4. ~~J.M. Walker and E.B. Gingold: Molecular Biology and Biotechnology by Royal~~

Society of Chemistry.

5. Zaborsky: Immobilized Enzymes, CRC Press, Degraland, Ohio.
6. S.B. Primrose: Molecular Biotechnology (Second Edition) Blackwell Scientific Publication.
7. Stanbury F., P., Whitakar A., and Hall J., S., Principles of fermentation technology, 2nd edition, Aditya books Ltd., New Delhi

## **BP606TPHARMACEUTICAL QUALITY ASSURANCE (Theory)**

**45 Hours**

**Scope:** This course deals with the various aspects of quality control and quality assurance aspects of pharmaceutical industries. It deals with the important aspects like cGMP, QC tests, documentation, quality certifications and regulatory affairs.

**Objectives:** Upon completion of the course student shall be able to:

- understand the cGMP aspects in a pharmaceutical industry
- appreciate the importance of documentation
- understand the scope of quality certifications applicable to pharmaceutical industries
- understand the responsibilities of QA & QC departments

**Course content:**

### **UNIT – I**

**10 Hours**

**Quality Assurance and Quality Management concepts:** Definition and concept of Quality control, Quality assurance and GMP

**Total Quality Management (TQM):** Definition, elements, philosophies

**ICH Guidelines:** purpose, participants, process of harmonization, Brief overview of QSEM, with special emphasis on Q-series guidelines, ICH stability testing guidelines

**Quality by design (QbD):** Definition, overview, elements of QbD program, tools

**ISO 9000 & ISO14000:** Overview, Benefits, Elements, steps for registration

**NABL accreditation :** Principles and procedures

### **UNIT - II**

**10 Hours**

**Organization and personnel:** Personnel responsibilities, training, hygiene and personal records.

**Premises:** Design, construction and plant layout, maintenance, sanitation, environmental control, utilities and maintenance of sterile areas, control of contamination.

**Equipments and raw materials:** Equipment selection, purchase specifications, maintenance, purchase specifications and maintenance of stores for raw materials.

### **UNIT – III**

**10 Hours**

**Quality Control:** Quality control test for containers, rubber closures and secondary packing

materials.

**Good Laboratory Practices:** General Provisions, Organization and Personnel, Facilities, Equipment, Testing Facilities Operation, Test and Control Articles, Protocol for Conduct of a Nonclinical Laboratory Study, Records and Reports, Disqualification of Testing Facilities

#### **UNIT – IV**

**08 Hours**

**Complaints:** Complaints and evaluation of complaints, Handling of return good, recalling and waste disposal.

**Document maintenance in pharmaceutical industry:** Batch Formula Record, Master Formula Record, SOP, Quality audit, Quality Review and Quality documentation, Reports and documents, distribution records.

#### **UNIT – V**

**07 Hours**

**Calibration and Validation:** Introduction, definition and general principles of calibration, qualification and validation, importance and scope of validation, types of validation, validation master plan. Calibration of pH meter, Qualification of UV-Visible spectrophotometer, General principles of Analytical method Validation.

**Warehousing:** Good warehousing practice, materials management

#### **Recommended Books: (Latest Edition)**

1. Quality Assurance Guide by organization of Pharmaceutical Products of India.
2. Good Laboratory Practice Regulations, 2<sup>nd</sup> Edition, Sandy Weinberg Vol. 69.
3. Quality Assurance of Pharmaceuticals- A compendium of Guide lines and Related materials Vol I WHO Publications.
4. A guide to Total Quality Management- Kushik Maitra and Sedhan K Ghosh
5. How to Practice GMP's – P P Sharma.
6. ISO 9000 and Total Quality Management – Sadhank G Ghosh
7. The International Pharmacopoeia – Vol I, II, III, IV- General Methods of Analysis and Quality specification for Pharmaceutical Substances, Excipients and Dosage forms
8. Good laboratory Practices – Marcel Deckker Series
9. ICH guidelines, ISO 9000 and 14000 guidelines

**SEMESTER VII**

## **BP701T. INSTRUMENTAL METHODS OF ANALYSIS (Theory)**

**45 Hours**

**Scope:** This subject deals with the application of instrumental methods in qualitative and quantitative analysis of drugs. This subject is designed to impart a fundamental knowledge on the principles and instrumentation of spectroscopic and chromatographic technique. This also emphasizes on theoretical and practical knowledge on modern analytical instruments that are used for drug testing.

**Objectives:** Upon completion of the course the student shall be able to

1. Understand the interaction of matter with electromagnetic radiations and its applications in drug analysis
2. Understand the chromatographic separation and analysis of drugs.
3. Perform quantitative & qualitative analysis of drugs using various analytical instruments.

### **Course Content:**

#### **UNIT –I**

**10 Hours**

##### **UV Visible spectroscopy**

Electronic transitions, chromophores, auxochromes, spectral shifts, solvent effect on absorption spectra, Beer and Lambert's law, Derivation and deviations.

Instrumentation - Sources of radiation, wavelength selectors, sample cells, detectors- Photo tube, Photomultiplier tube, Photo voltaic cell, Silicon Photodiode.

Applications - Spectrophotometric titrations, Single component and multi component analysis

##### **Fluorimetry**

Theory, Concepts of singlet, doublet and triplet electronic states, internal and external conversions, factors affecting fluorescence, quenching, instrumentation and applications

#### **UNIT –II**

**10 Hours**

##### **IR spectroscopy**

Introduction, fundamental modes of vibrations in poly atomic molecules, sample handling, factors affecting vibrations

Instrumentation - Sources of radiation, wavelength selectors, detectors - Golay cell, Bolometer, Thermocouple, Thermister, Pyroelectric detector and applications

**Flame Photometry**-Principle, interferences, instrumentation and applications

**Atomic absorption spectroscopy-** Principle, interferences, instrumentation and applications

**Nepheloturbidometry-** Principle, instrumentation and applications

**UNIT –III**

**10 Hours**

**Introduction to chromatography**

**Adsorption and partition column chromatography-**Methodology, advantages, disadvantages and applications.

**Thin layer chromatography-** Introduction, Principle, Methodology, Rf values, advantages, disadvantages and applications.

**Paper chromatography-**Introduction, methodology, development techniques, advantages, disadvantages and applications

**Electrophoresis–** Introduction, factors affecting electrophoretic mobility, Techniques of paper, gel, capillary electrophoresis, applications

**UNIT –IV**

**08 Hours**

**Gas chromatography -** Introduction, theory, instrumentation, derivatization, temperature programming, advantages, disadvantages and applications

**High performance liquid chromatography (HPLC)-**Introduction, theory, instrumentation, advantages and applications.

**UNIT –V**

**07 Hours**

**Ion exchange chromatography-** Introduction, classification, ion exchange resins, properties, mechanism of ion exchange process, factors affecting ion exchange, methodology and applications

**Gel chromatography-** Introduction, theory, instrumentation and applications

**Affinity chromatography-** Introduction, theory, instrumentation and applications

## **BP705P. INSTRUMENTAL METHODS OF ANALYSIS (Practical)**

**4 Hours/Week**

- 1 Determination of absorption maxima and effect of solvents on absorption maxima of organic compounds
- 2 Estimation of dextrose by colorimetry
- 3 Estimation of sulfanilamide by colorimetry
- 4 Simultaneous estimation of ibuprofen and paracetamol by UV spectroscopy
- 5 Assay of paracetamol by UV- Spectrophotometry
- 6 Estimation of quinine sulfate by fluorimetry
- 7 Study of quenching of fluorescence
- 8 Determination of sodium by flame photometry
- 9 Determination of potassium by flame photometry
- 10 Determination of chlorides and sulphates by nephelo turbidometry
- 11 Separation of amino acids by paper chromatography
- 12 Separation of sugars by thin layer chromatography
- 13 Separation of plant pigments by column chromatography
- 14 Demonstration experiment on HPLC
- 15 Demonstration experiment on Gas Chromatography

### **Recommended Books (Latest Editions)**

1. Instrumental Methods of Chemical Analysis by B.K Sharma
2. Organic spectroscopy by Y.R Sharma
3. Text book of Pharmaceutical Analysis by Kenneth A. Connors
4. Vogel's Text book of Quantitative Chemical Analysis by A.I. Vogel
5. Practical Pharmaceutical Chemistry by A.H. Beckett and J.B. Stenlake
6. Organic Chemistry by I. L. Finar
7. Organic spectroscopy by William Kemp
8. Quantitative Analysis of Drugs by D. C. Garrett
9. Quantitative Analysis of Drugs in Pharmaceutical Formulations by P. D. Sethi
10. Spectrophotometric identification of Organic Compounds by Silverstein

## BP 702 T. INDUSTRIAL PHARMACYII (Theory)

45 Hours

**Scope:** This course is designed to impart fundamental knowledge on pharmaceutical product development and translation from laboratory to market

**Objectives:** Upon completion of the course, the student shall be able to:

1. Know the process of pilot plant and scale up of pharmaceutical dosage forms
2. Understand the process of technology transfer from lab scale to commercial batch
3. Know different Laws and Acts that regulate pharmaceutical industry
4. Understand the approval process and regulatory requirements for drug products

### Course Content:

#### UNIT-I

10 Hours

**Pilot plant scale up techniques:** General considerations - including significance of personnel requirements, space requirements, raw materials, Pilot plant scale up considerations for solids, liquid orals, semi solids and relevant documentation, SUPAC guidelines, Introduction to platform technology

#### UNIT-II

10 Hours

**Technology development and transfer:** WHO guidelines for Technology Transfer(TT): Terminology, Technology transfer protocol, Quality risk management, Transfer from R & D to production (Process, packaging and cleaning), Granularity of TT Process (API, excipients, finished products, packaging materials) Documentation, Premises and equipments, qualification and validation, quality control, analytical method transfer, Approved regulatory bodies and agencies, Commercialization - practical aspects and problems (case studies), TT agencies in India - APCTD, NRDC, TIFAC, BCIL, TBSE / SIDBI; TT related documentation - confidentiality agreement, licensing, MoUs, legal issues

#### UNIT-III

10 Hours

**Regulatory affairs:** Introduction, Historical overview of Regulatory Affairs, Regulatory authorities, Role of Regulatory affairs department, Responsibility of Regulatory Affairs Professionals

**Regulatory requirements for drug approval:** Drug Development Teams, Non-Clinical Drug Development, Pharmacology, Drug Metabolism and Toxicology, General considerations of Investigational New Drug (IND) Application, Investigator's Brochure (IB) and New Drug Application (NDA), Clinical research / BE studies, Clinical Research Protocols, Biostatistics in Pharmaceutical Product Development, Data Presentation for FDA Submissions, Management of Clinical Studies.

**UNIT-IV****08 Hours**

**Quality management systems:** Quality management & Certifications: Concept of Quality, Total Quality Management, Quality by Design (QbD), Six Sigma concept, Out of Specifications (OOS), Change control, Introduction to ISO 9000 series of quality systems standards, ISO 14000, NABL, GLP

**UNIT-V****07 Hours**

**Indian Regulatory Requirements:** Central Drug Standard Control Organization (CDSCO) and State Licensing Authority: Organization, Responsibilities, Certificate of Pharmaceutical Product (COPP), Regulatory requirements and approval procedures for New Drugs.

**Recommended Books: (Latest Editions)**

1. Regulatory Affairs from Wikipedia, the free encyclopedia modified on 7<sup>th</sup> April available at [http://en.wikipedia.org/wiki/Regulatory\\_Affairs](http://en.wikipedia.org/wiki/Regulatory_Affairs).
2. International Regulatory Affairs Updates, 2005. available at <http://www.iraup.com/about.php>
3. Douglas J Pisano and David S. Mantus. Text book of FDA Regulatory Affairs A Guide for Prescription Drugs, Medical Devices, and Biologics' Second Edition.
4. Regulatory Affairs brought by learning plus, inc. available at <http://www.cgmp.com/ra.htm>.

## **BP 703T. PHARMACY PRACTICE (Theory)**

**45 Hours**

**Scope:** In the changing scenario of pharmacy practice in India, for successful practice of Hospital Pharmacy, the students are required to learn various skills like drug distribution, drug information, and therapeutic drug monitoring for improved patient care. In community pharmacy, students will be learning various skills such as dispensing of drugs, responding to minor ailments by providing suitable safe medication, patient counselling for improved patient care in the community set up.

**Objectives:** Upon completion of the course, the student shall be able to

1. know various drug distribution methods in a hospital
2. appreciate the pharmacy stores management and inventory control
3. monitor drug therapy of patient through medication chart review and clinical review
4. obtain medication history interview and counsel the patients
5. identify drug related problems
6. detect and assess adverse drug reactions
7. interpret selected laboratory results (as monitoring parameters in therapeutics) of specific disease states
8. know pharmaceutical care services
9. do patient counseling in community pharmacy;
10. appreciate the concept of Rational drug therapy.

### **Unit I:**

**10 Hours**

#### **a) Hospital and its organization**

Definition, Classification of hospital- Primary, Secondary and Tertiary hospitals, Classification based on clinical and non- clinical basis, Organization Structure of a Hospital, and Medical staffs involved in the hospital and their functions.

#### **b) Hospital pharmacy and its organization**

Definition, functions of hospital pharmacy, Organization structure, Location, Layout and staff requirements, and Responsibilities and functions of hospital pharmacists.

#### **c) Adverse drug reaction**

Classifications - Excessive pharmacological effects, secondary pharmacological effects, idiosyncrasy, allergic drug reactions, genetically determined toxicity, toxicity following sudden withdrawal of drugs, Drug interaction- beneficial interactions, adverse interactions, and pharmacokinetic drug interactions, Methods for detecting

drug interactions, spontaneous case reports and record linkage studies, and Adverse drug reaction reporting and management.

**d) Community Pharmacy**

Organization and structure of retail and wholesale drug store, types and design, Legal requirements for establishment and maintenance of a drug store, Dispensing of proprietary products, maintenance of records of retail and wholesale drug store.

**Unit II:**

**10 Hours**

**a) Drug distribution system in a hospital**

Dispensing of drugs to inpatients, types of drug distribution systems, charging policy and labelling, Dispensing of drugs to ambulatory patients, and Dispensing of controlled drugs.

**b) Hospital formulary**

Definition, contents of hospital formulary, Differentiation of hospital formulary and Drug list, preparation and revision, and addition and deletion of drug from hospital formulary.

**c) Therapeutic drug monitoring**

Need for Therapeutic Drug Monitoring, Factors to be considered during the Therapeutic Drug Monitoring, and Indian scenario for Therapeutic Drug Monitoring.

**d) Medication adherence**

Causes of medication non-adherence, pharmacist role in the medication adherence, and monitoring of patient medication adherence.

**e) Patient medication history interview**

Need for the patient medication history interview, medication interview forms.

**f) Community pharmacy management**

Financial, materials, staff, and infrastructure requirements.

**Unit III:**

**10 Hours**

**a) Pharmacy and therapeutic committee**

Organization, functions, Policies of the pharmacy and therapeutic committee in including drugs into formulary, inpatient and outpatient prescription, automatic stop order, and emergency drug list preparation.

**b) Drug information services**

Drug and Poison information centre, Sources of drug information, Computerised services, and storage and retrieval of information.

**c) Patient counseling**

Definition of patient counseling; steps involved in patient counseling, and Special cases that require the pharmacist

**d) Education and training program in the hospital**

Role of pharmacist in the education and training program, Internal and external training program, Services to the nursing homes/clinics, Code of ethics for community pharmacy, and Role of pharmacist in the interdepartmental communication and community health education.

**e) Prescribed medication order and communication skills**

Prescribed medication order- interpretation and legal requirements, and Communication skills- communication with prescribers and patients.

**Unit IV**

**8 Hours**

**Budget preparation and implementation**

Budget preparation and implementation

**a) Clinical Pharmacy**

Introduction to Clinical Pharmacy, Concept of clinical pharmacy, functions and responsibilities of clinical pharmacist, Drug therapy monitoring - medication chart review, clinical review, pharmacist intervention, Ward round participation, Medication history and Pharmaceutical care.

Dosing pattern and drug therapy based on Pharmacokinetic & disease pattern.

**b) Over the counter (OTC) sales**

Introduction and sale of over the counter, and Rational use of common over the counter medications.

**Unit V**

**7 Hours**

**a) Drug store management and inventory control**

Organisation of drug store, types of materials stocked and storage conditions, Purchase and inventory control: principles, purchase procedure, purchase order, procurement and stocking, Economic order quantity, Reorder quantity level, and Methods used for the analysis of the drug expenditure

**b) Investigational use of drugs**

Description, principles involved, classification, control, identification, role of hospital pharmacist, advisory committee.

**c) Interpretation of Clinical Laboratory Tests**

Blood chemistry, hematology, and urinalysis

**Recommended Books (Latest Edition):**

1. Merchant S.H. and Dr. J.S.Quadry. *A textbook of hospital pharmacy*, 4th ed. Ahmadabad: B.S. Shah Prakakshan; 2001.

3. William E. Hassan. *Hospital pharmacy*, 5th ed. Philadelphia: Lea & Febiger; 1986.
4. Tipnis Bajaj. *Hospital Pharmacy*, 1<sup>st</sup> ed. Maharashtra: Career Publications; 2008.
5. Scott LT. *Basic skills in interpreting laboratory data*, 4th ed. American Society of Health System Pharmacists Inc; 2009.
6. Parmar N.S. *Health Education and Community Pharmacy*, 18th ed. India: CBS Publishers & Distributers; 2008.

**Journals:**

1. Therapeutic drug monitoring. ISSN: 0163-4356
2. Journal of pharmacy practice. ISSN : 0974-8326
3. American journal of health system pharmacy. ISSN: 1535-2900 (online)
4. Pharmacy times (Monthly magazine)

**Skill Enhancement Course : Practical (Qualifying course) (BP706PS-A)**

**CO: COURSE OBJECTIVES**

**CO-1** To equip students with hands-on skills and practical knowledge in various areas of pharmaceutical sciences, such as formulation, quality control, and analysis of pharmaceuticals.

**CO-2** To ensure students become proficient in laboratory techniques, including synthesis, testing, and analysis of drugs, as well as handling sophisticated instruments.

**CO-3** To cultivate ethical conduct and adherence to safety guidelines in the laboratory and other professional environments.

**CO-4** To strengthen students' ability to communicate scientific findings, collaborate in team-based projects, and present results effectively.

**CO-5** To prepare students for professional roles in the pharmaceutical industry, hospitals, and research by simulating real-world challenges and work environments.

**CO-6** To promote critical thinking and analytical skills, encouraging students to troubleshoot problems, analyze

data, and optimize processes.

**Practical:**

1. Patient counseling techniques.
2. Drug-drug interaction checks using standard drug databases.
3. Case studies on common diseases (like hypertension, diabetes, etc.)
4. Interpretation of laboratory data relevant to drug therapy.
5. Inventory control and management (FIFO, LIFO methods)
6. Preparation of reports on hospital pharmacy systems (outpatient and inpatient)
7. Practical sessions on Good Manufacturing Practices (GMP) and Quality Control
8. Familiarization with medical equipment used in hospitals and clinics.

**COURSE OUTCOMES**

**COs-1** Students will develop practical skills relevant to the pharmaceutical or technical industry through hands-on experience.

**COs-2** Students will Gain familiarity with standard equipment and techniques used in laboratory or field environments.

**COs-3** Students will learn and apply regulatory, safety, and ethical standards in practical situations, including laboratory work and industrial practices.

**COs-4** Students will develop effective communication and teamwork skills through group projects and collaborative tasks.

**COs-5** Students will be able to learn the skills to plan, execute, and manage time efficiently in practical projects and assignments.

**Suggested Readings:**

- "Pharmaceutical Analysis: A Textbook for Pharmacy Students and Pharmaceutical Chemists" by David G. Watson.
- "Practical Skills in Pharmacy" by John Hickey and Marjorie Weiss.
- "Pharmacy Practice" by Kevin Taylor, Geoffrey Harding, and Azzah Al-Muhtadi.

## Data Analysis / Computer Programming (BP706PS-B)

### CO: COURSE OBJECTIVES

**CO-1** To introduce students to fundamental programming concepts and techniques, including variables, data types, operators, control structures, and functions.

**CO-2** To provide knowledge about common data structures such as arrays, lists, stacks, queues, and their applications in organizing and managing data.

**CO-3** To teach students how to create and interpret various forms of data visualizations (e.g., charts, graphs) using programming tools.

**CO-4** To provide students with knowledge of basic statistical methods and how to apply them to analyze datasets using programming.

**CO-5** To guide students in designing and implementing projects that involve significant data analysis tasks, fostering creativity and problem-solving skills.

### Practical:

1. Handling missing values, outliers, and duplicates.
2. Visualizing data using plots (e.g., histograms, box plots, scatter plots), identifying patterns.
3. Retrieving data, joining tables, and performing aggregate functions.
4. Basics of working with databases like MongoDB or Firebase.
5. Students may be required to build a project based on real-world datasets, where they demonstrate data analysis, visualization, and model-building skills.
6. Using visual analytics tools for advanced data presentation.

### COURSE OUTCOMES

**COs-1** Students will demonstrate proficiency in at least one programming language, such as Python, R, or Java, by writing clean, efficient, and bug-free code.

**COs-2** Students will perform basic and advanced statistical analyses on datasets using appropriate algorithms and techniques.

**COs-3** Students will demonstrate the ability to work with databases by retrieving, manipulating, and analyzing data using SQL or NoSQL queries.

**COs-4** Students will develop a complete data analysis project from problem identification to solution presentation, demonstrating the ability to apply course concepts to real-world data.

**COs-5** Students will be able to demonstrate an understanding of data privacy laws and ethical considerations in data analysis and programming.

### Suggested Readings:

- "Clean Code: A Handbook of Agile Software Craftsmanship" by Robert C. Martin
- "The Pragmatic Programmer: Your Journey to Mastery" by Andrew Hunt and David Thomas

## Python Programming (BP706PS-C)

### CO: COURSE OBJECTIVES

**CO-1** To provide students with an understanding of Python's syntax, basic structure, and built-in data types such as strings, lists, dictionaries, and tuples.

**CO-2** To enable students to implement conditional statements, loops (for and while), and functions to write modular code.

**CO-3** To cultivate problem-solving skills by applying Python to solve computational and real-world problems using logical algorithms.

**CO-4** To introduce object-oriented programming principles in Python, including classes, objects, inheritance, polymorphism, and encapsulation.

**CO-5** To introduce advanced data structures such as stacks, queues, linked lists, and trees, and how to implement them in Python.

**CO-6** To provide an introduction to algorithmic techniques such as searching, sorting, and basic recursion, and implementing these algorithms in Python.

### Practical:

1. **Introduction to Python IDEs** (e.g., PyCharm, Jupyter Notebook, VS Code)
2. Python Syntax and Structure: Variables, Data Types (int, float, str, bool), Basic Input and Output
3. Parameters and Return Values
4. Importing and Using Built-in Modules (e.g., math, random, datetime)
5. **Numpy** (Numerical Python) – Arrays, Matrix Operations
6. Mini Projects that apply the learned concepts, such as: Data Analysis Projects using CSV files and Pandas
7. Debugging Code using Print Statements and Python Debugger (pdb)

### COURSE OUTCOMES

**COs-1** Students will be able to understand Python Syntax and Programming Structure. Ability to write Python code using appropriate syntax.

**COs-2** Students learn to use Python for problem-solving, including mathematical calculations, string manipulation, and list operations.

**COs-3** Students will learn to understand the concept of reusable code through functions and modularization.

**COs-4** Students will develop effective communication and teamwork skills through group projects and collaborative tasks.

**COs-5** Students will be able to understand the concepts of inheritance, encapsulation, and polymorphism.

**COs-6** Ability to design and develop small applications or scripts to automate tasks or solve specific problems.

### Suggested Readings:

- “Python Crash Course” by Eric Matthes
- “Learning Python” by Mark Lutz

## **BP 704T: NOVEL DRUG DELIVERY SYSTEMS (Theory)**

**45 Hours**

**Scope:** This subject is designed to impart basic knowledge on the area of novel drug delivery systems.

**Objectives:** Upon completion of the course student shall be able

1. To understand various approaches for development of novel drug delivery systems.
2. To understand the criteria for selection of drugs and polymers for the development of Novel drug delivery systems, their formulation and evaluation

### **Course content:**

#### **Unit-I**

**10 Hours**

**Controlled drug delivery systems:** Introduction, terminology/definitions and rationale, advantages, disadvantages, selection of drug candidates. Approaches to design controlled release formulations based on diffusion, dissolution and ion exchange principles. Physicochemical and biological properties of drugs relevant to controlled release formulations

**Polymers:** Introduction, classification, properties, advantages and application of polymers in formulation of controlled release drug delivery systems.

#### **Unit-II**

**10 Hours**

**Microencapsulation:** Definition, advantages and disadvantages, microspheres /microcapsules, microparticles, methods of microencapsulation, applications

**Mucosal Drug Delivery system:** Introduction, Principles of bioadhesion / mucoadhesion, concepts, advantages and disadvantages, transmucosal permeability and formulation considerations of buccal delivery systems

**Implantable Drug Delivery Systems:** Introduction, advantages and disadvantages, concept of implants and osmotic pump

#### **Unit-III**

**10 Hours**

**Transdermal Drug Delivery Systems:** Introduction, Permeation through skin, factors affecting permeation, permeation enhancers, basic components of TDDS, formulation approaches

**Gastroretentive drug delivery systems:** Introduction, advantages, disadvantages, approaches for GRDDS – Floating, high density systems, inflatable and gastroadhesive systems and their applications

**Nasopulmonary drug delivery system:** Introduction to Nasal and Pulmonary routes of drug delivery, Formulation of Inhalers (dry powder and metered dose), nasal sprays, nebulizers

#### **Unit-IV**

**08 Hours**

**Targeted drug Delivery:** Concepts and approaches advantages and disadvantages, introduction to liposomes, niosomes, nanoparticles, monoclonal antibodies and their applications

**Unit-V**

**07 Hours**

**Ocular Drug Delivery Systems:** Introduction, intra ocular barriers and methods to overcome –Preliminary study, ocular formulations and ocuserts

**Intrauterine Drug Delivery Systems:** Introduction, advantages and disadvantages, development of intra uterine devices (IUDs) and applications

**Recommended Books: (Latest Editions)**

1. Y W. Chien, Novel Drug Delivery Systems, 2<sup>nd</sup> edition, revised and expanded, Marcel Dekker, Inc., New York, 1992.
2. Robinson, J. R., Lee V. H. L, Controlled Drug Delivery Systems, Marcel Dekker, Inc., New York, 1992.
3. Encyclopedia of Controlled Delivery. Edith Mathiowitz, Published by Wiley Interscience Publication, John Wiley and Sons, Inc, New York. Chichester/Weinheim
4. N.K. Jain, Controlled and Novel Drug Delivery, CBS Publishers & Distributors, New Delhi, First edition 1997 (reprint in 2001).
5. S.P. Vyas and R.K. Khar, Controlled Drug Delivery -concepts and advances, Vallabh Prakashan, New Delhi, First edition 2002.

**Journals**

1. Indian Journal of Pharmaceutical Sciences (IPA)
2. Indian Drugs (IDMA)
3. Journal of Controlled Release (Elsevier Sciences)
4. Drug Development and Industrial Pharmacy (Marcel & Decker)
5. International Journal of Pharmaceutics (Elsevier Sciences)

**SEMESTER VIII**

## **BP801T. BIOSTATISTICS AND RESEARCH METHODOLOGY (Theory)**

**45 Hours**

**Scope:** To understand the applications of Biostatistics in Pharmacy. This subject deals with descriptive statistics, Graphics, Correlation, Regression, logistic regression Probability theory, Sampling technique, Parametric tests, Non Parametric tests, ANOVA, Introduction to Design of Experiments, Phases of Clinical trials and Observational and Experimental studies, SPSS, R and MINITAB statistical software's, analyzing the statistical data using Excel.

**Objectives:** Upon completion of the course the student shall be able to

- Know the operation of M.S. Excel, SPSS, R and MINITAB<sup>®</sup>, DoE (Design of Experiment)
- Know the various statistical techniques to solve statistical problems
- Appreciate statistical techniques in solving the problems.

### **Course content:**

#### **Unit-I**

**10 Hours**

**Introduction:** Statistics, Biostatistics, Frequency distribution

**Measures of central tendency:** Mean, Median, Mode- Pharmaceutical examples

**Measures of dispersion:** Dispersion, Range, standard deviation, Pharmaceutical problems

**Correlation:** Definition, Karl Pearson's coefficient of correlation, Multiple correlation - Pharmaceuticals examples

#### **Unit-II**

**10 Hours**

**Regression:** Curve fitting by the method of least squares, fitting the lines  $y = a + bx$  and  $x = a + by$ , Multiple regression, standard error of regression- Pharmaceutical Examples

**Probability:** Definition of probability, Binomial distribution, Normal distribution, Poisson's distribution, properties - problems

Sample, Population, large sample, small sample, Null hypothesis, alternative hypothesis, sampling, essence of sampling, types of sampling, Error-I type, Error-II type, Standard error of mean (SEM) - Pharmaceutical examples

**Parametric test:** t-test(Sample, Pooled or Unpaired and Paired) , ANOVA, (One way and Two way), Least Significance difference

#### **Unit-III**

**10 Hours**

**Non Parametric tests:** Wilcoxon Rank Sum Test, Mann-Whitney U test, Kruskal-Wallis test, Friedman Test

**Introduction to Research:** Need for research, Need for design of Experiments, Experiential Design Technique, plagiarism

**Graphs:** Histogram, Pie Chart, Cubic Graph, response surface plot, Counter Plot graph

**Designing the methodology:** Sample size determination and Power of a study, Report writing and presentation of data, Protocol, Cohorts studies, Observational studies, Experimental studies, Designing clinical trial, various phases.

#### **Unit-IV**

**8 Hours**

Blocking and confounding system for Two-level factorials

**Regression modeling:** Hypothesis testing in Simple and Multiple regression models

**Introduction to Practical components of Industrial and Clinical Trials Problems:**

Statistical Analysis Using Excel, SPSS, MINITAB<sup>®</sup>, DESIGN OF EXPERIMENTS, R - Online Statistical Software's to Industrial and Clinical trial approach

#### **Unit-V**

**7Hours**

**Design and Analysis of experiments:**

**Factorial Design:** Definition,  $2^2$ ,  $2^3$  design. Advantage of factorial design

**Response Surface methodology:** Central composite design, Historical design, Optimization Techniques

#### **Recommended Books (Latest edition):**

1. Pharmaceutical statistics- Practical and clinical applications, Sanford Bolton, publisher Marcel Dekker Inc. NewYork.
2. Fundamental of Statistics – Himalaya Publishing House- S.C.Guptha
3. Design and Analysis of Experiments –PHI Learning Private Limited, R. Pannerselvam,
4. Design and Analysis of Experiments – Wiley Students Edition, Douglas and C. Montgomery

## **BP 802T SOCIAL AND PREVENTIVE PHARMACY**

**Hours: 45**

### **Scope:**

The purpose of this course is to introduce to students a number of health issues and their challenges. This course also introduced a number of national health programmes. The roles of the pharmacist in these contexts are also discussed.

### **Objectives:**

After the successful completion of this course, the student shall be able to:

- Acquire high consciousness/realization of current issues related to health and pharmaceutical problems within the country and worldwide.
- Have a critical way of thinking based on current healthcare development.
- Evaluate alternative ways of solving problems related to health and pharmaceutical issues

### **Course content:**

#### **Unit I:**

**10 Hours**

**Concept of health and disease:** Definition, concepts and evaluation of public health. Understanding the concept of prevention and control of disease, social causes of diseases and social problems of the sick.

**Social and health education:** Food in relation to nutrition and health, Balanced diet, Nutritional deficiencies, Vitamin deficiencies, Malnutrition and its prevention.

**Sociology and health:** Socio cultural factors related to health and disease, Impact of urbanization on health and disease, Poverty and health

**Hygiene and health:** personal hygiene and health care; avoidable habits

#### **Unit II:**

**10 Hours**

**Preventive medicine:** General principles of prevention and control of diseases such as cholera, SARS, Ebola virus, influenza, acute respiratory infections, malaria, chicken guinea, dengue, lymphatic filariasis, pneumonia, hypertension, diabetes mellitus, cancer, drug addiction-drug substance abuse

#### **Unit III:**

**10 Hours**

**National health programs, its objectives, functioning and outcome of the following:** HIV AND AIDS control programme, TB, Integrated disease surveillance program (IDSP), National leprosy control programme, National mental health program, National

programme for prevention and control of deafness, Universal immunization programme, National programme for control of blindness, Pulse polio programme.

**Unit IV:**

**08 Hours**

National health intervention programme for mother and child, National family welfare programme, National tobacco control programme, National Malaria Prevention Program, National programme for the health care for the elderly, Social health programme; role of WHO in Indian national program

**Unit V:**

**07 Hours**

Community services in rural, urban and school health: Functions of PHC, Improvement in rural sanitation, national urban health mission, Health promotion and education in school.

**Recommended Books (Latest edition):**

1. Short Textbook of Preventive and Social Medicine, Prabhakara GN, 2<sup>nd</sup> Edition, 2010, ISBN: 9789380704104, JAYPEE Publications
2. Textbook of Preventive and Social Medicine (Mahajan and Gupta), Edited by Roy Rabindra Nath, Saha Indranil, 4<sup>th</sup> Edition, 2013, ISBN: 9789350901878, JAYPEE Publications
3. Review of Preventive and Social Medicine (Including Biostatistics), Jain Vivek, 6<sup>th</sup> Edition, 2014, ISBN: 9789351522331, JAYPEE Publications
4. Essentials of Community Medicine—A Practical Approach, Hiremath Lalita D, Hiremath Dhananjaya A, 2<sup>nd</sup> Edition, 2012, ISBN: 9789350250440, JAYPEE Publications
5. Park Textbook of Preventive and Social Medicine, K Park, 21<sup>st</sup> Edition, 2011, ISBN-14: 9788190128285, BANARSIDAS BHANOT PUBLISHERS.
6. Community Pharmacy Practice, Ramesh Adepu, BSP publishers, Hyderabad

**Recommended Journals:**

1. Research in Social and Administrative Pharmacy, Elsevier, Ireland

## **BP803ET. PHARMA MARKETING MANAGEMENT (Theory)**

**45 Hours**

### **Scope:**

The pharmaceutical industry not only needs highly qualified researchers, chemists and, technical people, but also requires skilled managers who can take the industry forward by managing and taking the complex decisions which are imperative for the growth of the industry. The Knowledge and Know-how of marketing management groom the people for taking a challenging role in Sales and Product management.

**Course Objective:** The course aims to provide an understanding of marketing concepts and techniques and their applications in the pharmaceutical industry.

### **Unit I**

**10 Hours**

#### **Marketing:**

Definition, general concepts and scope of marketing; Distinction between marketing & selling; Marketing environment; Industry and competitive analysis; Analyzing consumer buying behavior; industrial buying behavior.

#### **Pharmaceutical market:**

Quantitative and qualitative aspects; size and composition of the market; demographic descriptions and socio-psychological characteristics of the consumer; market segmentation & targeting. Consumer profile; Motivation and prescribing habits of the physician; patients' choice of physician and retail pharmacist. Analyzing the Market; Role of market research.

### **Unit II**

**10 Hours**

#### **Product decision:**

Classification, product line and product mix decisions, product life cycle, product portfolio analysis; product positioning; New product decisions; Product branding, packaging and labeling decisions, Product management in pharmaceutical industry.

### **Unit III**

**10 Hours**

#### **Promotion:**

Methods, determinants of promotional mix, promotional budget; An overview of personal selling, advertising, direct mail, journals, sampling, retailing, medical exhibition, public relations, online promotional techniques for OTC Products.

**Unit IV****10 Hours****Pharmaceutical marketing channels:**

Designing channel, channel members, selecting the appropriate channel, conflict in channels, physical distribution management: Strategic importance, tasks in physical distribution management.

**Professional sales representative (PSR):**

Duties of PSR, purpose of detailing, selection and training, supervising, norms for customer calls, motivating, evaluating, compensation and future prospects of the PSR.

**Unit V****10 Hours****Pricing:**

Meaning, importance, objectives, determinants of price; pricing methods and strategies, issues in price management in pharmaceutical industry. An overview of DPCO (Drug Price Control Order) and NPPA (National Pharmaceutical Pricing Authority).

**Emerging concepts in marketing:**

Vertical & Horizontal Marketing; Rural Marketing; Consumerism; Industrial Marketing; Global Marketing.

**Recommended Books: (Latest Editions)**

1. Philip Kotler and Kevin Lane Keller: Marketing Management, Prentice Hall of India, New Delhi
2. Walker, Boyd and Larreche : Marketing Strategy- Planning and Implementation, Tata MC GrawHill, New Delhi.
3. Dhruv Grewal and Michael Levy: Marketing, Tata MC Graw Hill
4. Arun Kumar and N Menakshi: Marketing Management, Vikas Publishing, India
5. Rajan Saxena: Marketing Management; Tata MC Graw-Hill (India Edition)
6. Ramaswamy, U.S & Nanakamari, S: Marketing Management: Global Perspective, Indian Context, Macmillan India, New Delhi.
7. Shanker, Ravi: Service Marketing, Excell Books, New Delhi
8. Subba Rao Changanti, Pharmaceutical Marketing in India (GIFT – Excel series) Excel Publications.

## **BP804 ET: PHARMACEUTICAL REGULATORY SCIENCE (Theory)**

**45Hours**

**Scope:** This course is designed to impart the fundamental knowledge on the regulatory requirements for approval of new drugs, and drug products in regulated markets of India & other countries like US, EU, Japan, Australia, UK etc. It prepares the students to learn in detail on the regulatory requirements, documentation requirements, and registration procedures for marketing the drug products.

**Objectives:** Upon completion of the subject student shall be able to;

1. Know about the process of drug discovery and development
2. Know the regulatory authorities and agencies governing the manufacture and sale of pharmaceuticals
3. Know the regulatory approval process and their registration in Indian and international markets

### **Course content:**

#### **Unit I**

**10Hours**

##### **New Drug Discovery and development**

Stages of drug discovery, Drug development process, pre-clinical studies, non-clinical activities, clinical studies, Innovator and generics, Concept of generics, Generic drug product development.

#### **Unit II**

**10Hours**

##### **Regulatory Approval Process**

Approval processes and timelines involved in Investigational New Drug (IND), New Drug Application (NDA), Abbreviated New Drug Application (ANDA). Changes to an approved NDA / ANDA.

##### **Regulatory authorities and agencies**

Overview of regulatory authorities of India, United States, European Union, Australia, Japan, Canada (Organization structure and types of applications)

#### **Unit III**

**10Hours**

##### **Registration of Indian drug product in overseas market**

Procedure for export of pharmaceutical products, Technical documentation, Drug Master Files (DMF), Common Technical Document (CTD), electronic Common Technical

Document (eCTD), ASEAN Common Technical Document (ACTD)research.

#### **Unit IV**

**08Hours**

##### **Clinical trials**

Developing clinical trial protocols, Institutional Review Board / Independent Ethics committee - formation and working procedures, Informed consent process and procedures, GCP obligations of Investigators, sponsors & Monitors, Managing and Monitoring clinical trials, Pharmacovigilance - safety monitoring in clinical trials

#### **Unit V**

**07Hours**

##### **Regulatory Concepts**

Basic terminology, guidance, guidelines, regulations, Laws and Acts, Orange book, Federal Register, Code of Federal Regulatory, Purple book

##### **Recommended books (Latest edition):**

1. Drug Regulatory Affairs by Sachin Itkar, Dr. N.S. Vyawahare, Nirali Prakashan.
2. The Pharmaceutical Regulatory Process, Second Edition Edited by Ira R. Berry and Robert P. Martin, Drugs and the Pharmaceutical Sciences, Vol.185. Informa Health care Publishers.
3. New Drug Approval Process: Accelerating Global Registrations By Richard A Guarino, MD, 5<sup>th</sup> edition, Drugs and the Pharmaceutical Sciences, Vol.190.
4. Guidebook for drug regulatory submissions / Sandy Weinberg. By John Wiley & Sons. Inc.
5. FDA Regulatory Affairs: a guide for prescription drugs, medical devices, and biologics /edited by Douglas J. Pisano, David Mantus.
6. Generic Drug Product Development, Solid Oral Dosage forms, Leon Shargel and Isader Kaufer, Marcel Dekker series, Vol.143
7. Clinical Trials and Human Research: A Practical Guide to Regulatory Compliance By Fay A. Rozovsky and Rodney K. Adams
8. Principles and Practices of Clinical Research, Second Edition Edited by John I. Gallin and Frederick P. Ognibene
9. Drugs: From Discovery to Approval, Second Edition By Rick Ng

## **BP 805T: PHARMACOVIGILANCE (Theory)**

**45 hours**

**Scope:** This paper will provide an opportunity for the student to learn about development of pharmacovigilance as a science, basic terminologies used in pharmacovigilance, global scenario of Pharmacovigilance, train students on establishing pharmacovigilance programme in an organization, various methods that can be used to generate safety data and signal detection. This paper also develops the skills of classifying drugs, diseases and adverse drug reactions.

### **Objectives:**

*At completion of this paper it is expected that students will be able to (know, do, and appreciate):*

1. Why drug safety monitoring is important?
2. History and development of pharmacovigilance
3. National and international scenario of pharmacovigilance
4. Dictionaries, coding and terminologies used in pharmacovigilance
5. Detection of new adverse drug reactions and their assessment
6. International standards for classification of diseases and drugs
7. Adverse drug reaction reporting systems and communication in pharmacovigilance
8. Methods to generate safety data during pre clinical, clinical and post approval phases of drugs' life cycle
9. Drug safety evaluation in paediatrics, geriatrics, pregnancy and lactation
10. Pharmacovigilance Program of India (PvPI) requirement for ADR reporting in India
11. ICH guidelines for ICSR, PSUR, expedited reporting, pharmacovigilance planning
12. CIOMS requirements for ADR reporting
13. Writing case narratives of adverse events and their quality.

### **Course Content**

#### **Unit I**

**10 Hours**

##### **Introduction to Pharmacovigilance**

- History and development of Pharmacovigilance
- Importance of safety monitoring of Medicine
- WHO international drug monitoring programme
- Pharmacovigilance Program of India(PvPI)

##### **Introduction to adverse drug reactions**

- Definitions and classification of ADRs
- Detection and reporting
- Methods in Causality assessment
- Severity and seriousness assessment
- Predictability and preventability assessment
- Management of adverse drug reactions

##### **Basic terminologies used in pharmacovigilance**

- Terminologies of adverse medication related events
- Regulatory terminologies

## **Unit II**

**10 hours**

### **Drug and disease classification**

- Anatomical, therapeutic and chemical classification of drugs
- International classification of diseases
- Daily defined doses
- International Non proprietary Names for drugs

### **Drug dictionaries and coding in pharmacovigilance**

- WHO adverse reaction terminologies
- MedDRA and Standardised MedDRA queries
- WHO drug dictionary
- Eudravigilance medicinal product dictionary

### **Information resources in pharmacovigilance**

- Basic drug information resources
- Specialised resources for ADRs

### **Establishing pharmacovigilance programme**

- Establishing in a hospital
- Establishment & operation of drug safety department in industry
- Contract Research Organisations (CROs)
- Establishing a national programme

## **Unit III**

**10 Hours**

### **Vaccine safety surveillance**

- Vaccine Pharmacovigilance
- Vaccination failure
- Adverse events following immunization

### **Pharmacovigilance methods**

- Passive surveillance – Spontaneous reports and case series
- Stimulated reporting
- Active surveillance – Sentinel sites, drug event monitoring and registries
- Comparative observational studies – Cross sectional study, case control study and cohort study
- Targeted clinical investigations

### **Communication in pharmacovigilance**

- Effective communication in Pharmacovigilance
- Communication in Drug Safety Crisis management
- Communicating with Regulatory Agencies, Business Partners, Healthcare facilities & Media

## Unit IV

8 Hours

### Safety data generation

- Pre clinical phase
- Clinical phase
- Post approval phase (PMS)

### ICH Guidelines for Pharmacovigilance

- Organization and objectives of ICH
- Expedited reporting
- Individual case safety reports
- Periodic safety update reports
- Post approval expedited reporting
- Pharmacovigilance planning
- Good clinical practice in pharmacovigilance studies

## Unit V

7 hours

### Pharmacogenomics of adverse drug reactions

- Genetics related ADR with example focusing PK parameters.

### Drug safety evaluation in special population

- Paediatrics
- Pregnancy and lactation
- Geriatrics

### CIOMS

- CIOMS Working Groups
- CIOMS Form

### CDSCO (India) and Pharmacovigilance

- D&C Act and Schedule Y
- Differences in Indian and global pharmacovigilance requirements

### Recommended Books (Latest edition):

1. Textbook of Pharmacovigilance: S K Gupta, Jaypee Brothers, Medical Publishers.
2. Practical Drug Safety from A to Z By Barton Cobert, Pierre Biron, Jones and Bartlett Publishers.
3. Mann's Pharmacovigilance: Elizabeth B. Andrews, Nicholas, Wiley Publishers.
4. Stephens' Detection of New Adverse Drug Reactions: John Talbot, Patrick Walle, Wiley Publishers.
5. An Introduction to Pharmacovigilance: Patrick Waller, Wiley Publishers.
6. Cobert's Manual of Drug Safety and Pharmacovigilance: Barton Cobert, Jones & Bartlett Publishers.
7. Textbook of Pharmacoepidemiology edited by Brian L. Strom, Stephen E Kimmel, Sean Hennessy, Wiley Publishers.
8. A Textbook of Clinical Pharmacy Practice -Essential Concepts and Skills: G. Parthasarathi, Karin Nyfort Hansen, Milap C. Nahata
9. National Formulary of India
10. Text Book of Medicine by Yashpal Munjal

11. Text book of Pharmacovigilance: concept and practice by GP Mohanta and PK Manna

## **BP 806 ET. QUALITY CONTROL AND STANDARDIZATION OF HERBALS (Theory)**

**Scope:** In this subject the student learns about the various methods and guidelines for evaluation and standardization of herbs and herbal drugs. The subject also provides an opportunity for the student to learn cGMP, GAP and GLP in traditional system of medicines.

**Objectives:** Upon completion of the subject student shall be able to;

1. know WHO guidelines for quality control of herbal drugs
2. know Quality assurance in herbal drug industry
3. know the regulatory approval process and their registration in Indian and international markets
4. appreciate EU and ICH guidelines for quality control of herbal drugs

### **Unit I**

**10 hours**

Basic tests for drugs – Pharmaceutical substances, Medicinal plants materials and dosage forms

WHO guidelines for quality control of herbal drugs.

Evaluation of commercial crude drugs intended for use

### **Unit II**

**10 hours**

**Quality assurance in herbal drug industry** of cGMP, GAP, GMP and GLP in traditional system of medicine.

WHO Guidelines on current good manufacturing Practices (cGMP) for Herbal Medicines

WHO Guidelines on GACP for Medicinal Plants.

### **Unit III**

**10 hours**

EU and ICH guidelines for quality control of herbal drugs.

Research Guidelines for Evaluating the Safety and Efficacy of Herbal Medicines

### **Unit IV**

**08 hours**

Stability testing of herbal medicines. Application of various chromatographic techniques in standardization of herbal products.

Preparation of documents for new drug application and export registration

GMP requirements and Drugs & Cosmetics Act provisions.

## **Unit V**

**07 hours**

Regulatory requirements for herbal medicines.

WHO guidelines on safety monitoring of herbal medicines in pharmacovigilance systems

Comparison of various Herbal Pharmacopoeias.

Role of chemical and biological markers in standardization of herbal products

### **Recommended Books: (Latest Editions)**

1. Pharmacognosy by Trease and Evans
2. Pharmacognosy by Kokate, Purohit and Gokhale
3. Rangari, V.D., Text book of Pharmacognosy and Phytochemistry Vol. I, Carrier Pub., 2006.
4. Aggrawal, S.S., Herbal Drug Technology. Universities Press, 2002.

## BP 807 ET. COMPUTER AIDED DRUG DESIGN (Theory)

45 Hours

**Scope:** This subject is designed to provide detailed knowledge of rational drug design process and various techniques used in rational drug design process.

**Objectives:** Upon completion of the course, the student shall be able to understand

- Design and discovery of lead molecules
- The role of drug design in drug discovery process
- The concept of QSAR and docking
- Various strategies to develop new drug like molecules.
- The design of new drug molecules using molecular modeling software

### Course Content:

#### UNIT-I

10 Hours

##### Introduction to Drug Discovery and Development

Stages of drug discovery and development

##### Lead discovery and Analog Based Drug Design

Rational approaches to lead discovery based on traditional medicine, Random screening, Non-random screening, serendipitous drug discovery, lead discovery based on drug metabolism, lead discovery based on clinical observation.

**Analog Based Drug Design:** Bioisosterism, Classification, Bioisosteric replacement. Any three case studies

#### UNIT-II

10 Hours

##### Quantitative Structure Activity Relationship (QSAR)

SAR versus QSAR, History and development of QSAR, Types of physicochemical parameters, experimental and theoretical approaches for the determination of physicochemical parameters such as Partition coefficient, Hammett's substituent constant and Taft's steric constant. Hansch analysis, Free Wilson analysis, 3D-QSAR approaches like COMFA and COMSIA.

#### UNIT-III

10 Hours

##### Molecular Modeling and virtual screening techniques

**Virtual Screening techniques:** Drug likeness screening, Concept of pharmacophore mapping and pharmacophore based Screening,

**Molecular docking:** Rigid docking, flexible docking, manual docking, Docking based screening. *De novo* drug design.

**UNIT-IV****08 Hours****Informatics & Methods in drug design**

Introduction to Bioinformatics, chemo informatics. ADME databases, chemical, biochemical and pharmaceutical databases.

**UNIT-V****07 Hours**

**Molecular Modeling:** Introduction to molecular mechanics and quantum mechanics. Energy Minimization methods and Conformational Analysis, global conformational minima determination.

**Recommended Books (Latest Editions)**

1. Robert GCK, ed., "Drug Action at the Molecular Level" University Prak Press Baltimore.
2. Martin YC. "Quantitative Drug Design" Dekker, New York.
3. Delgado JN, Remers WA eds "Wilson & Gisvolds's Text Book of Organic Medicinal & Pharmaceutical Chemistry" Lippincott, New York.
4. Foye WO "Principles of Medicinal chemistry 'Lea & Febiger.
5. Koro Ikovas A, Burckhalter JH. "Essentials of Medicinal Chemistry" Wiley Interscience.
6. Wolf ME, ed "The Basis of Medicinal Chemistry, Burger's Medicinal Chemistry" John Wiley & Sons, New York.
7. Patrick Graham, L., An Introduction to Medicinal Chemistry, Oxford University Press.
8. Smith HJ, Williams H, eds, "Introduction to the principles of Drug Design" Wright Boston.
9. Silverman R.B. "The organic Chemistry of Drug Design and Drug Action" Academic Press New York.

**BP808ET: CELL AND MOLECULAR BIOLOGY (Elective subject)**

**45 Hours**

**Scope:**

- Cell biology is a branch of biology that studies cells – their physiological properties, their structure, the organelles they contain, interactions with their environment, their life cycle, division, death and cell function.
- This is done both on a microscopic and molecular level.
- Cell biology research encompasses both the great diversity of single-celled organisms like bacteria and protozoa, as well as the many specialized cells in multi-cellular organisms such as humans, plants, and sponges.

**Objectives:** Upon completion of the subject student shall be able to;

- Summarize cell and molecular biology history.
- Summarize cellular functioning and composition.
- Describe the chemical foundations of cell biology.
- Summarize the DNA properties of cell biology.
- Describe protein structure and function.
- Describe cellular membrane structure and function.
- Describe basic molecular genetic mechanisms.
- Summarize the Cell Cycle

**Course content:**

**Unit I**

**10Hours**

- a) Cell and Molecular Biology: Definitions theory and basics and Applications.
- b) Cell and Molecular Biology: History and Summation.
- c) Properties of cells and cell membrane.
- d) Prokaryotic versus Eukaryotic
- e) Cellular Reproduction
- f) Chemical Foundations – an Introduction and Reactions (Types)

**Unit II**

**10 Hours**

- a) DNA and the Flow of Molecular Information
- b) DNA Functioning
- c) DNA and RNA
- d) Types of RNA
- e) Transcription and Translation

**Unit III**

**10 Hours**

- a) Proteins: Defined **and** Amino Acids
- b) Protein Structure

- c) Regularities in Protein Pathways
- d) Cellular Processes
- e) Positive Control and significance of Protein Synthesis

**Unit IV**

**08 Hours**

- a) Science of Genetics
- b) Transgenics and Genomic Analysis
- c) Cell Cycle analysis
- d) Mitosis and Meiosis
- e) Cellular Activities and Checkpoints

**Unit V**

**07 Hours**

- a) Cell Signals: Introduction
- b) Receptors for Cell Signals
- c) Signaling Pathways: Overview
- d) Misregulation of Signaling Pathways
- e) Protein-Kinases: Functioning

**Recommended Books (latest edition):**

1. W.B. Hugo and A.D. Russel: Pharmaceutical Microbiology, Blackwell Scientific publications, Oxford London.
2. Prescott and Dunn., Industrial Microbiology, 4<sup>th</sup> edition, CBS Publishers & Distributors, Delhi.
3. Pelczar, Chan Kreig, Microbiology, Tata McGraw Hill edn.
4. Malcolm Harris, Balliere Tindall and Cox: Pharmaceutical Microbiology.
5. Rose: Industrial Microbiology.
6. Probisher, Hinsdill et al: Fundamentals of Microbiology, 9th ed. Japan
7. Cooper and Gunn's: Tutorial Pharmacy, CBS Publisher and Distribution.
8. Pepler: Microbial Technology.
9. Edward: Fundamentals of Microbiology.
10. N.K.Jain: Pharmaceutical Microbiology, Vallabh Prakashan, Delhi
11. Bergeys manual of systematic bacteriology, Williams and Wilkins- A Waverly company
12. B.R. Glick and J.J. Pasternak: Molecular Biotechnology: Principles and Applications of RecombinantDNA: ASM Press Washington D.C.
13. RA Goldshy et. al., : Kuby Immunology.

## BP809ET. COSMETIC SCIENCE(Theory)

45Hours

### UNIT I

10Hours

Classification of cosmetic and cosmeceutical products

Definition of cosmetics as per Indian and EU regulations, Evolution of cosmeceuticals from cosmetics, cosmetics as quasi and OTC drugs

**Cosmetic excipients:** Surfactants, rheology modifiers, humectants, emollients, preservatives. Classification and application

**Skin:** Basic structure and function of skin.

**Hair:** Basic structure of hair. Hair growth cycle.

**Oral Cavity:** Common problem associated with teeth and gums.

### UNIT II

10 Hours

**Principles of formulation and building blocks of skin care products:**

Face wash,

Moisturizing cream, Cold Cream, Vanishing cream and their advantages and disadvantages. Application of these products in formulation of cosmeceuticals.

**Antiperspirants & deodorants-** Actives & mechanism of action.

**Principles of formulation and building blocks of Hair care products:**

Conditioning shampoo, Hair conditioner, anti-dandruff shampoo.

Hair oils.

Chemistry and formulation of Para-phenylene diamine based hair dye.

Principles of formulation and building blocks of oral care products:

Toothpaste for bleeding gums, sensitive teeth. Teeth whitening, Mouthwash.

### UNIT III

10 Hours

Sun protection, Classification of Sunscreens and SPF.

**Role of herbs in cosmetics:**

Skin Care: Aloe and turmeric

Hair care: Henna and amla.

Oral care: Neem and clove

**Analytical cosmetics:** BIS specification and analytical methods for shampoo, skin-cream and toothpaste.

### UNIT IV

08 Hours.

Principles of Cosmetic Evaluation: Principles of sebumeter, corneometer. Measurement of TEWL, Skin Color, Hair tensile strength, Hair combing properties

Soaps, and syndet bars. Evolution and skin benefits.

## **UNIT V**

**07 Hours**

Oily and dry skin, causes leading to dry skin, skin moisturisation. Basic understanding of the terms Comedogenic, dermatitis.

Cosmetic problems associated with Hair and scalp: Dandruff, Hair fall causes

Cosmetic problems associated with skin: blemishes, wrinkles, acne, prickly heat and body odor.

Antiperspirants and Deodorants- Actives and mechanism of action

### **References**

- 1) Harry's Cosmeticology, Wilkinson, Moore, Seventh Edition, George Godwin.
- 2) Cosmetics – Formulations, Manufacturing and Quality Control, P.P. Sharma, 4<sup>th</sup> Edition, Vandana Publications Pvt. Ltd., Delhi.
- 3) Text book of cosmeticology by Sanju Nanda & Roop K. Khar, Tata Publishers.

## BP810 ET. PHARMACOLOGICAL SCREENING METHODS

45 Hours

**Scope:** This subject is designed to impart the basic knowledge of preclinical studies in experimental animals including design, conduct and interpretations of results.

### Objectives

Upon completion of the course the student shall be able to,

- Appreciate the applications of various commonly used laboratory animals.
- Appreciate and demonstrate the various screening methods used in preclinical research
- Appreciate and demonstrate the importance of biostatistics and research methodology
- Design and execute a research hypothesis independently

<b>Unit –I</b>	<b>08 Hours</b>
<b>Laboratory Animals:</b> Study of CPCSEA and OECD guidelines for maintenance, breeding and conduct of experiments on laboratory animals, Common lab animals: Description and applications of different species and strains of animals. Popular transgenic and mutant animals. Techniques for collection of blood and common routes of drug administration in laboratory animals, Techniques of blood collection and euthanasia.	
<b>Unit –II</b>	<b>10 Hours</b>
<b>Preclinical screening models</b> a. Introduction: Dose selection, calculation and conversions, preparation of drug solution/suspensions, grouping of animals and importance of sham negative and positive control groups. Rationale for selection of animal species and sex for the study. <b>b. Study of screening animal models for</b> Diuretics, nootropics, anti-Parkinson's, antiasthmatics, <b>Preclinical screening models:</b> for CNS activity- analgesic, antipyretic, anti-inflammatory, general anaesthetics, sedative and hypnotics, antipsychotic, antidepressant, antiepileptic, antiparkinsonism, alzheimer's disease	

<p><b>Unit –III</b></p> <p><b>Preclinical screening models:</b> for ANS activity, sympathomimetics, sympatholytics, parasympathomimetics, parasympatholytics, skeletal muscle relaxants, drugs acting on eye, local anaesthetics</p>	
<p><b>Unit –IV</b></p> <p><b>Preclinical screening models:</b> for CVS activity- antihypertensives, diuretics, antiarrhythmic, antidyslipidemic, anti aggregatory, coagulants, and anticoagulants</p> <p>Preclinical screening models for other important drugs like antiulcer, antidiabetic, anticancer and antiasthmatics.</p>	
<p><b>Research methodology and Bio-statistics</b></p> <p>Selection of research topic, review of literature, research hypothesis and study design</p> <p>Pre-clinical data analysis and interpretation using Students ‘t’ test and One-way ANOVA. Graphical representation of data</p>	<p><b>05 Hours</b></p>

**Recommended Books (latest edition):**

1. Fundamentals of experimental Pharmacology-by M.N.Ghosh
2. Hand book of Experimental Pharmacology-S.K.Kulakarni
3. CPCSEA guidelines for laboratory animal facility.
4. Drug discovery and Evaluation by Vogel H.G.
5. Drug Screening Methods by Suresh Kumar Gupta and S. K. Gupta
6. Introduction to biostatistics and research methods by PSS Sundar Rao and J Richard

## BP 811 ET. ADVANCED INSTRUMENTATION TECHNIQUES

45 Hours

**Scope:** This subject deals with the application of instrumental methods in qualitative and quantitative analysis of drugs. This subject is designed to impart advanced knowledge on the principles and instrumentation of spectroscopic and chromatographic hyphenated techniques. This also emphasizes on theoretical and practical knowledge on modern analytical instruments that are used for drug testing.

**Objectives:** Upon completion of the course the student shall be able to

- understand the advanced instruments used and its applications in drug analysis
- understand the chromatographic separation and analysis of drugs.
- understand the calibration of various analytical instruments
- know analysis of drugs using various analytical instruments.

### Course Content:

#### UNIT-I

10 Hours

##### **Nuclear Magnetic Resonance spectroscopy**

Principles of H-NMR and C-NMR, chemical shift, factors affecting chemical shift, coupling constant, Spin - spin coupling, relaxation, instrumentation and applications

**Mass Spectrometry-** Principles, Fragmentation, Ionization techniques – Electron impact, chemical ionization, MALDI, FAB, Analyzers-Time of flight and Quadrupole, instrumentation, applications

#### UNIT-II

10 Hours

**Thermal Methods of Analysis:** Principles, instrumentation and applications of Thermogravimetric Analysis (TGA), Differential Thermal Analysis (DTA), Differential Scanning Calorimetry (DSC)

**X-Ray Diffraction Methods:** Origin of X-rays, basic aspects of crystals, X-ray

Crystallography, rotating crystal technique, single crystal diffraction, powder diffraction, structural elucidation and applications.

#### UNIT-III

10 Hours

**Calibration and validation-**as per ICH and USFDA guidelines

##### **Calibration of following Instruments**

Electronic balance, UV-Visible spectrophotometer, IR spectrophotometer,

Fluorimeter, Flame Photometer, HPLC and GC

**UNIT-IV**

**08 Hours**

**Radio immune assay:**Importance, various components, Principle, different methods, Limitation and Applications of Radio immuno assay

**Extraction techniques:**General principle and procedure involved in the solid phase extraction and liquid-liquid extraction

**UNIT-V**

**07 Hours**

**Hyphenated techniques-**LC-MS/MS, GC-MS/MS, HPTLC-MS.

**Recommended Books (Latest Editions)**

1. Instrumental Methods of Chemical Analysis by B.K Sharma
2. Organic spectroscopy by Y.R Sharma
3. Text book of Pharmaceutical Analysis by Kenneth A. Connors
4. Vogel's Text book of Quantitative Chemical Analysis by A.I. Vogel
5. Practical Pharmaceutical Chemistry by A.H. Beckett and J.B. Stenlake
6. Organic Chemistry by I. L. Finar
7. Organic spectroscopy by William Kemp
8. Quantitative Analysis of Drugs by D. C. Garrett
9. Quantitative Analysis of Drugs in Pharmaceutical Formulations by P. D. Sethi
10. Spectrophotometric identification of Organic Compounds by Silverstein

## BP 812 ET. DIETARY SUPPLEMENTS AND NUTRACEUTICALS

**No. of hours :3**

**Tutorial:1**

**Credit point:4**

### **Scope :**

This subject covers foundational topic that are important for understanding the need and requirements of dietary supplements among different groups in the population.

### **Objective:**

This module aims to provide an understanding of the concepts behind the theoretical applications of dietary supplements. By the end of the course, students should be able to :

1. Understand the need of supplements by the different group of people to maintain healthy life.
2. Understand the outcome of deficiencies in dietary supplements.
3. Appreciate the components in dietary supplements and the application.
4. Appreciate the regulatory and commercial aspects of dietary supplements including health claims.

### **UNIT I**

**07 hours**

- a. Definitions of Functional foods, Nutraceuticals and Dietary supplements. Classification of Nutraceuticals, Health problems and diseases that can be prevented or cured by Nutraceuticals i.e. weight control, diabetes, cancer, heart disease, stress, osteoarthritis, hypertension etc.
- b. Public health nutrition, maternal and child nutrition, nutrition and ageing, nutrition education in community.
- c. Source, Name of marker compounds and their chemical nature, Medicinal uses and health benefits of following used as nutraceuticals/functional foods: Spirulina, Soyabean, Ginseng, Garlic, Broccoli, Gingko, Flaxseeds

### **UNIT II**

**15 hours**

Phytochemicals as nutraceuticals: Occurrence and characteristic features(chemical nature medicinal benefits) of following

- a) Carotenoids-  $\alpha$  and  $\beta$ -Carotene, Lycopene, Xanthophylls, leutin
- b) Sulfides: Diallyl sulfides, Allyl trisulfide.
- c) Polyphenolics: Reservetrol
- d) Flavonoids- Rutin , Naringin, Quercitin, Anthocyanidins, catechins, Flavones
- e) Prebiotics / Probiotics.: Fructo oligosaccharides, Lacto bacillum
- f) Phyto estrogens : Isoflavones, daidzein, Geebustin, lignans
- g) Tocopherols
- h) Proteins, vitamins, minerals, cereal, vegetables and beverages as functional foods: oats, wheat bran, rice bran, sea foods, coffee, tea and the like.

### **UNIT III**

**07 hours**

- a) Introduction to free radicals: Free radicals, reactive oxygen species, production of free radicals in cells, damaging reactions of free radicals on lipids, proteins, Carbohydrates, nucleic acids.

- b) Dietary fibres and complex carbohydrates as functional food ingredients..

**UNIT IV**

**10 hours**

- a) Free radicals in Diabetes mellitus, Inflammation, Ischemic reperfusion injury, Cancer, Atherosclerosis, Free radicals in brain metabolism and pathology, kidney damage, muscle damage. Free radicals involvement in other disorders. Free radicals theory of ageing.
- b) Antioxidants: Endogenous antioxidants – enzymatic and nonenzymatic antioxidant defence, Superoxide dismutase, catalase, Glutathione peroxidase, Glutathione Vitamin C, Vitamin E,  $\alpha$ - Lipoic acid, melatonin  
Synthetic antioxidants: Butylated hydroxy Toluene, Butylated hydroxy Anisole.
- c) Functional foods for chronic disease prevention

**UNIT V**

**06 hours**

- a) Effect of processing, storage and interactions of various environmental factors on the potential of nutraceuticals.
- b) Regulatory Aspects; FSSAI, FDA, FPO, MPO, AGMARK. HACCP and GMPs on Food Safety. Adulteration of foods.
- c) Pharmacopoeial Specifications for dietary supplements and nutraceuticals.

**References:**

**Semester VIII – Elective course on Pharmaceutical Product Development**

**No of Hours: 3**

**Tutorial:1**

**Credit points:4**

**Unit-I**

**10 Hours**

Introduction to pharmaceutical product development, objectives, regulations related to preformulation, formulation development, stability assessment, manufacturing and quality control testing of different types of dosage forms

**Unit-II**

**10 Hours**

An advanced study of Pharmaceutical Excipients in pharmaceutical product development with a special reference to the following categories

- i. Solvents and solubilizers
- ii. Cyclodextrins and their applications
- iii. Non - ionic surfactants and their applications
- iv. Polyethylene glycols and sorbitols
- v. Suspending and emulsifying agents
- vi. Semi solid excipients

**Unit-III**

**10 Hours**

An advanced study of Pharmaceutical Excipients in pharmaceutical product development with a special reference to the following categories

- i. Tablet and capsule excipients
- ii. Directly compressible vehicles
- iii. Coat materials
- iv. Excipients in parenteral and aerosols products
- v. Excipients for formulation of NDDS

Selection and application of excipients in pharmaceutical formulations with specific industrial applications

**Unit-IV**

**08 Hours**

Optimization techniques in pharmaceutical product development. A study of various optimization techniques for pharmaceutical product development with specific examples. Optimization by factorial designs and their applications. A study of QbD and its application in pharmaceutical product development.

**Unit-V**

**07 Hours**

Selection and quality control testing of packaging materials for pharmaceutical product development- regulatory considerations.

### **Recommended Books (Latest editions)**

1. Pharmaceutical Statistics Practical and Clinical Applications by Stanford Bolton, CharlesBon; Marcel Dekker Inc.
2. Encyclopedia of Pharmaceutical Technology, edited by James swarbrick, Third Edition, Informa Healthcare publishers.
3. Pharmaceutical Dosage Forms, Tablets, Volume II, edited by Herbert A. Lieberman and Leon Lachman; Marcel Dekker, Inc.
4. The Theory and Practice of Industrial Pharmacy, Fourth Edition, edited by Roop kKhar, S P Vyas, Farhan J Ahmad, Gaurav K Jain; CBS Publishers and Distributors Pvt.Ltd. 2013.
5. Martin's Physical Pharmacy and Pharmaceutical Sciences, Fifth Edition, edited by Patrick J. Sinko, BI Publications Pvt. Ltd.
6. Targeted and Controlled Drug Delivery, Novel Carrier Systems by S. P. Vyas and R. K.Khar, CBS Publishers and Distributors Pvt. Ltd, First Edition 2012.
7. Pharmaceutical Dosage Forms and Drug Delivery Systems, Loyd V. Allen Jr., Nicholas B.Popovich, Howard C. Ansel, 9th Ed. 40
8. Aulton's Pharmaceutics – The Design and Manufacture of Medicines, Michael E. Aulton, 3rd Ed.
9. Remington – The Science and Practice of Pharmacy, 20th Ed.
10. Pharmaceutical Dosage Forms – Tablets Vol 1 to 3, A. Liberman, Leon Lachman and Joseph B. Schwartz
11. Pharmaceutical Dosage Forms – Disperse Systems Vol 1 to 3, H.A. Liberman, Martin, M.R and Gilbert S. Banker.
12. Pharmaceutical Dosage Forms – Parenteral Medication Vol 1 & 2, Kenneth E. Avis and H.A. Libermann.
13. Advanced Review Articles related to the topics.

# Shobhit University, Gangoh

(Established by UP Shobhit University Act No. 3, 2012)

## School Of Pharmacy

### Ordinances, Regulations & Syllabus

For

**Bachelor of Pharmacy (B.Pharm) 4 Year Programme Semester  
Pattern**

(w.e.f.session2013-14)

**Approved by Pharmacy Council of India and  
adopted in the year 2013, 1<sup>st</sup> Meeting, Board of  
Studies.**

[Frame under Regulation 6,7 & 8 of the Bachelor of Pharmacy (B. Pharm)]

## **CHAPTER- I: REGULATIONS**

### **1. Short Title and Commencement**

These regulations shall be called as “The Revised Regulations for the B. Pharm. Degree Program (CBCS)of the Pharmacy Council of India, New Delhi”. They shall come into effect from the Academic Year 2016-17. The regulations framed are subject to modifications from time to time by Pharmacy Council of India.

### **2. Minimum qualification for admission**

#### **First year B. Pharm:**

Candidate shall have passed 10+2 examination conducted by the respective state/central government authorities recognized as equivalent to 10+2 examination by the Association of Indian Universities (AIU) with English as one of the subjects and Physics, Chemistry, Mathematics (P.C.M) and or Biology (P.C.B / P.C.M.B.) as optional subjects individually. Any other qualification approved by the Pharmacy Council of India as equivalent to any of the above examinations.

#### **2.2. B. Pharm lateral entry (to third semester):**

A pass in D. Pharm. course from an institution approved by the Pharmacy Council of India under section 12 of the Pharmacy Act.

### **3. Duration of the program**

The course of study for B.Pharm shall extend over a period of eight semesters (four academic years) and six semesters (three academic years) for lateral entry students. The curricula and syllabi for the program shall be prescribed from time to time by Pharmacy Council of India, New Delhi.

### **4. Medium of instruction and examinations**

Medium of instruction and examination shall be in English.

### **5. Working days in each semester**

Each semester shall consist of not less than 100 working days. The odd semesters shall be conducted from the month of June/July to November/December and the even semesters shall be conducted from December/January to May/June in every calendar year.

### **6. Attendance and progress**

A candidate is required to put in at least 80% attendance in individual courses considering theory and practical separately. The candidate shall complete the prescribed course satisfactorily to be eligible to appear for the respective examinations.

## **7. Program/Course credit structure**

As per the philosophy of Credit Based Semester System, certain quantum of academic work viz. theory classes, tutorial hours, practical classes, etc. are measured in terms of credits. On satisfactory completion of the courses, a candidate earns credits. The amount of credit associated with a course is dependent upon the number of hours of instruction per week in that course. Similarly, the credit associated with any of the other academic, co/extra-curricular activities is dependent upon the quantum of work expected to be put in for each of these activities per week.

### **Credit assignment**

#### **Theory and Laboratory courses**

Courses are broadly classified as Theory and Practical. Theory courses consist of lecture (L) and /or tutorial (T) hours, and Practical (P) courses consist of hours spent in the laboratory. Credits (C) for a course is dependent on the number of hours of instruction per week in that course, and is obtained by using a multiplier of one (1) for lecture and tutorial hours, and a multiplier of half (1/2) for practical (laboratory) hours. Thus, for example, a theory course having three lectures and one tutorial per week throughout the semester carries a credit of 4. Similarly, a practical having four laboratory hours per week throughout semester carries a credit of 2.

#### **Minimum credit requirements**

The minimum credit points required for award of a B. Pharm. degree is 208. These credits are divided into Theory courses, Tutorials, Practical, Practice School and Project over the duration of eight semesters. The credits are distributed semester-wise as shown in Table IX. Courses generally progress in sequences, building competencies and their positioning indicates certain academic maturity on the part of the learners. Learners are expected to follow the semester-wise schedule of courses given in the syllabus.

The lateral entry students shall get 52 credit points transferred from their D. Pharm program. Such students shall take up additional remedial courses of 'Communication Skills' (Theory and Practical) and 'Computer Applications in Pharmacy' (Theory and Practical) equivalent to 3 and 4 credit points respectively, a total of 7 credit points to attain 59 credit points, the maximum of I and II semesters.

## **8. Academic work**

A regular record of attendance both in Theory and Practical shall be maintained by the teaching staff of respective courses.

### 9. Course of study

The course of study for B. Pharm shall include Semester Wise Theory & Practical as given in Table – I to VIII. The number of hours to be devoted to each theory, tutorial and practical course in any semester shall not be less than that shown in Table – I to VIII.

**Table-I: Course of study for semester I**

<b>Total credit points for the program</b>	<b>209/211<sup>§</sup>/212<sup>#</sup></b>

\* The credit points assigned for extracurricular and or co-curricular activities shall be given by the Principals of the colleges and the same shall be submitted to the University. The criteria to acquire this credit point shall be defined by the colleges from time to time.

<sup>§</sup>Applicable ONLY for the students studied Physics / Chemistry / Botany / Zoology at HSC and appearing for Remedial Mathematics course.

<sup>#</sup>Applicable ONLY for the students studied Mathematics / Physics / Chemistry at HSC and appearing for Remedial Biology course.

## **10. Program Committee**

1. The B. Pharm. program shall have a Program Committee constituted by the Head of the institution in consultation with all the Heads of the departments.

2. The composition of the Program Committee shall be as follows:

A senior teacher shall be the Chairperson; One Teacher from each department handling B.Pharm courses; and four student representatives of the program (one from each academic year), nominated by the Head of the institution.

3. Duties of the Program Committee:

- i. Periodically reviewing the progress of the classes.
- ii. Discussing the problems concerning curriculum, syllabus and the conduct of classes.
- iii. Discussing with the course teachers on the nature and scope of assessment for the course and the same shall be announced to the students at the beginning of respective semesters.
- iv. Communicating its recommendation to the Head of the institution on academic matters.
- v. The Program Committee shall meet at least thrice in a semester preferably at the end of each Sessionalexam (Internal Assessment) and before the end semester exam.

## **11. Examinations/Assessments**

The scheme for internal assessment and end semester examinations is given in Table – X.

### **End semester examinations**

The End Semester Examinations for each theory and practical course through semesters I to VIII shall be conducted by the university except for the subjects with asterix symbol (\*) in table I and II for which examinations shall be conducted by the subject experts at college level and the marks/grades shall be submitted to the university.

**Tables-X: Schemes for internal assessments and end semester examinations semester wise**

### Internal assessment: Continuous mode

The marks allocated for Continuous mode of Internal Assessment shall be awarded as per the scheme given below.

**Table-XI:Scheme for awarding internal assessment: Continuous mode**

Theory		
Criteria	Maximum Marks	
Attendance (Refer Table – XII)	4	2
Academic activities (Average of any 3 activities e.g. quiz, assignment, open book test, field work, group discussion and seminar)	3	1.5
Student – Teacher interaction	3	1.5
<b>Total</b>	<b>10</b>	<b>5</b>
Practical		
Attendance (Refer Table – XII)	2	
Based on Practical Records, Regular viva voce, etc.	3	
<b>Total</b>	<b>5</b>	

**Table- XII: Guidelines for the allotment of marks for attendance**

Percentage of Attendance	Theory	Practical
95 – 100	4	2
90 – 94	3	1.5
85 – 89	2	1
80 – 84	1	0.5
Less than 80	0	0

#### 11.2.1. Sessional Exams

Two Sessional exams shall be conducted for each theory / practical course as per the schedule fixed by the college(s). The scheme of question paper for theory and practical Sessional examinations is given below. The average marks of two Sessional exams shall be computed for internal assessment as per the requirements given in tables – X.

Sessional exam shall be conducted for 30 marks for theory and shall be computed for 15 marks. Similarly Sessional exam for practical shall be conducted for 40 marks and shall be computed for 10 marks.

#### Question paper pattern for theory Sessional examinations

##### For subjects having University examination

I. Multiple Choice Questions (MCQs) = 10 x 1 = 10

OR

Objective Type Questions (5 x 2) = 05 x 2 = 10

(Answer all the questions)

I. Long Answers (Answer 1 out of 2) = 1 x 10 = 10

II. Short Answers (Answer 2 out of 3) = 2 x 5 = 10

Total = -----  
30 marks

**For subjects having Non University Examination**

I. Long Answers (Answer 1 out of 2)	=	1 x 10 = 10
II. Short Answers (Answer 4 out of 6)	=	4 x 5 = 20
		-----
Total	=	30 marks
		-----

**Question paper pattern for practical sessional examinations**

I. Synopsis	=	10
II. Experiments	=	25
III. Viva voce	=	05
		-----
Total	=	40 marks
		-----

**12. Promotion and award of grades**

A student shall be declared PASS and eligible for getting grade in a course of B.Pharm. program if he/she secures at least 50% marks in that particular course including internal assessment. For example, to be declared as PASS and to get grade, the student has to secure a minimum of 50 marks for the total of 100 including continuous mode of assessment and end semester theory examination and has to secure a minimum of 25 marks for the total 50 including internal assessment and end semester practical examination.

**13. Carry forward of marks**

In case a student fails to secure the minimum 50% in any Theory or Practical course as specified in 12, then he/she shall reappear for the end semester examination of that course. However his/her marks of the Internal Assessments shall be carried over and he/she shall be entitled for grade obtained by him/her on passing.

**14. Improvement of internal assessment**

A student shall have the opportunity to improve his/her performance only once in the Sessional exam component of the internal assessment. The re-conduct of the Sessional exam shall be completed before the commencement of next end semester theory examinations.

**15. Re-examination of end semester examinations**

Reexamination of end semester examinations shall be conducted as per the schedule given in table XIII. The exact dates of examinations shall be notified from time to time.

**Table-XIII: Tentative schedule of end semester examinations**

<b>Semester</b>	<b>For Regular Candidates</b>	<b>For Failed Candidates</b>
I, III, V and VII	November / December	May / June
II, IV, VI and VIII	May / June	November / December

**Question paper pattern for end semester theory examinations**

**For 75 marks paper**

I. Multiple Choice Questions(MCQs)	=	20 x 1	=	20
OR				OR
Objective Type Questions (10 x 2)	=	10 x 2	=	20
(Answer all the questions)				
II. Long Answers (Answer 2 out of 3)	=	2 x 10	=	20
III. Short Answers (Answer 7 out of 9)	=	7 x 5	=	35
				-----
Total	=			75 marks
				-----

**For 50 marks paper**

I. Long Answers (Answer 2 out of 3)	=	2 x 10	=	20
II. Short Answers (Answer 6 out of 8)	=	6 x 5	=	30
				-----
Total	=			50 marks
				-----

**For 35 marks paper**

I. Long Answers (Answer 1 out of 2)	=	1 x 10	=	10
II. Short Answers (Answer 5 out of 7)	=	5 x 5	=	25
				-----
Total	=			35 marks
				-----

**Question paper pattern for end semester practical examinations**

I. Synopsis	=	5
II. Experiments	=	25
III. Viva voce	=	5
		-----
Total	=	35 marks
		-----

**16. Academic Progression:**

No student shall be admitted to any examination unless he/she fulfills the norms given in 6. Academic progression rules are applicable as follows:

A student shall be eligible to carry forward all the courses of I, II and III semesters till the IV semester examinations. However, he/she shall not be eligible to attend the courses of V semester until all the courses of I and II semesters are successfully completed.

A student shall be eligible to carry forward all the courses of III, IV and V semesters till the VI semester examinations. However, he/she shall not be eligible to attend the courses of VII semester until all the courses of I, II, III and IV semesters are successfully completed.

A student shall be eligible to carry forward all the courses of V, VI and VII semesters till the VIII semester examinations. However, he/she shall not be eligible to get the course completion certificate until all the courses of I, II, III, IV, V and VI semesters are successfully completed.

A student shall be eligible to get his/her CGPA upon successful completion of the courses of I to VIII semesters within the stipulated time period as per the norms specified in 26.

A lateral entry student shall be eligible to carry forward all the courses of III, IV and V semesters till the VI semester examinations. However, he/she shall not be eligible to attend the courses of VII semester until all the courses of III and IV semesters are successfully completed.

A lateral entry student shall be eligible to carry forward all the courses of V, VI and VII semesters till the VIII semester examinations. However, he/she shall not be eligible to get the course completion certificate until all the courses of III, IV, V and VI semesters are successfully completed.

A lateral entry student shall be eligible to get his/her CGPA upon successful completion of the courses of III to VIII semesters within the stipulated time period as per the norms specified in 26.

Any student who has given more than 4 chances for successful completion of I / III semester courses and more than 3 chances for successful completion of II / IV semester courses shall be permitted to attend V / VII semester classes ONLY during the subsequent academic year as the case may be. In simpler terms there shall NOT be any ODD BATCH for any semester.

Note: Grade AB should be considered as failed and treated as one head for deciding academic progression. Such rules are also applicable for those students who fail to register for examination(s) of any course in any semester.

### 17. Grading of performances

#### Letter grades and grade points allocations:

Based on the performances, each student shall be awarded a final letter grade at the end of the semester for each course. The letter grades and their corresponding grade points are given in Table – XII.

**Table – XII: Letter grades and grade points equivalent to Percentage of marks and performances**

Percentage of Marks Obtained	Letter Grade	Grade Point	Performance
90.00 – 100	O	10	Outstanding
80.00 – 89.99	A	9	Excellent
70.00 – 79.99	B	8	Good
60.00 – 69.99	C	7	Fair
50.00 – 59.99	D	6	Average
Less than 50	F	0	Fail
Absent	AB	0	Fail

A learner who remains absent for any end semester examination shall be assigned a letter grade of AB and a corresponding grade point of zero. He/she should reappear for the saidevaluation/examination in due course.

### 18. The Semester grade point average (SGPA)

The performance of a student in a semester is indicated by a number called ‘Semester Grade Point Average’ (SGPA). The SGPA is the weighted average of the grade points obtained in all the courses by the student during the semester. For example, if a student takes five courses(Theory/Practical) in a semester with credits C1, C2, C3, C4 and C5 and the student’s grade points in these courses are G1, G2, G3, G4 and G5, respectively, and then students’ SGPA is equal to:

$$SGPA = \frac{C_1G_1 + C_2G_2 + C_3G_3 + C_4G_4 + C_5G_5}{C_1 + C_2 + C_3 + C_4 + C_5}$$

The SGPA is calculated to two decimal points. It should be noted that, the SGPA for any semester shall take into consideration the F and AB Sgrade awarded in that semester. For example if a learner has a F or ABS grade in course 4, the SGPA shall then be computed as:

$$\text{SGPA} = \frac{C_1G_1 + C_2G_2 + C_3G_3 + C_4* \text{ZERO} + C_5G_5}{C_1 + C_2 + C_3 + C_4 + C_5}$$

**19. Cumulative Grade Point Average (CGPA)**

The CGPA is calculated with the SGPA of all the VIII semesters to two decimal points and is indicated in final grade report card/final transcript showing the grades of all VIII semesters and their courses. The CGPA shall reflect the failed status in case of F grade(s), till the course(s) is/are passed. When the course(s) is/are passed by obtaining a pass grade on subsequent examination(s) the CGPA shall only reflect the new grade and not the fail grades earned earlier. The CGPA is calculated as:

$$\text{CGPA} = \frac{C_1S_1 + C_2S_2 + C_3S_3 + C_4S_4 + C_5S_5 + C_6S_6 + C_7S_7 + C_8S_8}{C_1 + C_2 + C_3 + C_4 + C_5 + C_6 + C_7 + C_8}$$

where C<sub>1</sub>, C<sub>2</sub>, C<sub>3</sub>,... is the total number of credits for semester I,II,III,... and S<sub>1</sub>,S<sub>2</sub>, S<sub>3</sub>,...is the SGPA of semester I,II,III,....

**20. Declaration of class**

The class shall be awarded on the basis of CGPA as follows:

- First Class with Distinction = CGPA of. 7.50 and above
- First Class = CGPA of 6.00 to 7.49
- Second Class = CGPA of 5.00 to 5.99

**21. Project work**

All the students shall undertake a project under the supervision of a teacher and submit a report. The area of the project shall directly relate any one of the elective subject opted by the student in semester VIII. The project shall be carried out in group not exceeding 5 in number. The project report shall be submitted in triplicate (typed & bound copy not less than 25 pages).

The internal and external examiner appointed by the University shall evaluate the project at the time of the Practical examinations of other semester(s). Students shall be evaluated in groups for four hours (i.e., about half an hour for a group of five students). The projects shall be evaluated as per the criteria given below.

***Evaluation of Dissertation Book:***

Objective(s) of the work done	15 Marks
Methodology adopted	20 Marks
Results and Discussions	20 Marks
Conclusions and Outcomes	20 Marks

**Total** 75 Marks

***Evaluation of Presentation:***

Presentation of work	25 Marks
Communication skills	20 Marks
Question and answer skills	30 Marks

**Total** 75 Marks

*Explanation:* The 75 marks assigned to the dissertation book shall be same for all the students in a group. However, the 75 marks assigned for presentation shall be awarded based on the performance of individual students in the given criteria.

**22. Industrial training (Desirable)**

Every candidate shall be required to work for at least 150 hours spread over four weeks in a Pharmaceutical Industry/Hospital. It includes Production unit, Quality Control department, Quality Assurance department, Analytical laboratory, Chemical manufacturing unit, Pharmaceutical R&D, Hospital (Clinical Pharmacy), Clinical Research Organization, Community Pharmacy, etc. After the Semester – VI and before the commencement of Semester – VII, and shall submit satisfactory report of such work and certificate duly signed by the authority of training organization to the head of the institute.

**23. Practice School**

In the VII semester, every candidate shall undergo practice school for a period of 150 hours evenly distributed throughout the semester. The student shall opt any one of the domains for practice school declared by the program committee from time to time.

At the end of the practice school, every student shall submit a printed report (in triplicate) on the practice school he/she attended (not more than 25 pages). Along with the exams of semester VII, the report submitted by the student, knowledge and skills acquired by the student through practice school shall be evaluated by the subject experts at college level and grade point shall be awarded.

#### **24. Award of Ranks**

Ranks and Medals shall be awarded on the basis of final CGPA. However, candidates who fail in one or more courses during the B.Pharm program shall not be eligible for award of ranks. Moreover, the candidates should have completed the B. Pharm program in minimum prescribed number of years, (four years) for the award of Ranks.

#### **25. Award of degree**

Candidates who fulfill the requirements mentioned above shall be eligible for award of degree during the ensuing convocation.

#### **26. Duration for completion of the program of study**

The duration for the completion of the program shall be fixed as double the actual duration of the program and the students have to pass within the said period, otherwise they have to get fresh Registration.

#### **27. Re-admission after break of study**

Candidate who seeks re-admission to the program after break of study has to get the approval from the university by paying a condonation fee.

No condonation is allowed for the candidate who has more than 2 years of break up period and he/she has to rejoin the program by paying the required fees.

### **Programme Educational Objectives (PEOs)**

**PEO1 Applying principles and technologies:** Graduates should be able to apply principles and technologies to develop, formulate, and manufacture drugs and pharmaceuticals.

**PEO2 Serving society:** Graduates should be able to use medications and devices appropriately to achieve optimal therapeutic outcomes.

**PEO3 Promoting leadership and ethics:** Graduates should be able to demonstrate leadership and entrepreneurship qualities, as well as professional ethics and human values.

**PEO4 Lifelong learning :** Graduates should be able to absorb new technologies and continue learning throughout their lives.

**PEO5 Communicating effectively:** Graduates should be able to communicate well with other healthcare professionals.

**PEO6 Meeting industry needs:** Graduates should be able to meet the needs of the pharmaceutical industry and provide clinical services to the community.

**PEO7 Academic excellence:** Graduates should have knowledge of fundamental principles and their applications in pharmaceutical sciences and technology.

**PEO8 Technical competence:** Graduates should have strong fundamental concepts and high technical competence in pharmaceutical sciences.

**PEO9 Professional Competence:** Graduates will demonstrate the knowledge and skills necessary to practice pharmacy effectively in various healthcare settings, ensuring safe and effective medication use.

**PEO10 Patient-Centered Care:** Graduates will provide high-quality, patient-centered care, including medication management, counseling, and health promotion, to improve patient outcomes.

**PEO11 Inter-professional Collaboration:** Graduates will work collaboratively within interdisciplinary healthcare teams to optimize patient care and contribute to public health initiatives.

### **Programme Specific Objectives (PSO's)**

**PSO1 Pharmaceutical Care Skills:** Students will demonstrate the ability to assess patient medication needs, develop individualized care plans, and implement appropriate therapeutic interventions.

**PSO2 Drug Development and Management:** Students will gain knowledge in drug formulation, development processes, and the management of pharmaceutical products throughout their lifecycle.

**PSO3 Clinical Knowledge Application:** Students will apply pharmacological principles and clinical knowledge to evaluate and optimize drug therapy in diverse patient populations.

**PSO4 Regulatory and Compliance Understanding:** Students will understand the regulatory frameworks governing pharmacy practice, including drug approval processes, safety, and quality assurance.

**PSO5 Communication Proficiency:** Students will develop effective communication skills to counsel patients, collaborate with healthcare professionals, and convey complex information clearly.

**PSO6 Health Promotion and Disease Prevention:** Students will engage in public health initiatives, providing education on disease prevention and health promotion strategies.

**PSO7 Research and Evidence-Based Practice:** Students will engage in research activities and apply evidence-based practices to inform clinical decisions and improve patient outcomes.

**PSO8 Ethical Decision-Making:** Students will learn to navigate ethical dilemmas in pharmacy practice, demonstrating professional judgment and integrity.

### **Programme Outcome Objectives (POO's)**

**POO1 Clinical Competence:** Graduates will be able to conduct comprehensive medication reviews, assess patient health needs, and design effective therapeutic regimens.

**POO2 Pharmaceutical Knowledge:** Graduates will possess a thorough understanding of pharmacology, pharmacotherapy, drug interactions, and the mechanisms of drug action.

**POO3 Ethical Practice:** Graduates will demonstrate professionalism and ethical behavior in all aspects of pharmacy practice, including patient interactions and professional relationships.

**POO4 Communication Skills:** Graduates will effectively communicate with patients, caregivers, and healthcare team members, ensuring clarity and understanding of medication information.

**POO5 Critical Thinking and Problem Solving:** Graduates will apply critical thinking skills to analyze patient data, identify medication-related problems, and develop appropriate solutions.

**POO6 Research and Evidence-Based Practice:** Graduates will be able to conduct research, critically evaluate scientific literature, and apply evidence-based guidelines in clinical practice.

**POO7 Interprofessional Collaboration:** Graduates will work effectively within interdisciplinary teams to enhance patient care and contribute to overall healthcare delivery.

**POO8 Lifelong Learning:** Graduates will demonstrate a commitment to continuous professional development and lifelong learning in the rapidly evolving field of pharmacy.

**POO9 Public Health Awareness:** Graduates will engage in community health initiatives, promoting wellness and preventive care through education and outreach.

## **CHAPTER - II: SYLLABUS**

## **Semester I**

## **BP101T. HUMAN ANATOMY AND PHYSIOLOGY-I (Theory)**

**45 Hours**

**Scope:** This subject is designed to impart fundamental knowledge on the structure and functions of the various systems of the human body. It also helps in understanding both homeostatic mechanisms. The subject provides the basic knowledge required to understand the various disciplines of pharmacy.

**Objectives:** Upon completion of this course the student should be able to

1. Explain the gross morphology, structure and functions of various organs of the human body.
2. Describe the various homeostatic mechanisms and their imbalances.
3. Identify the various tissues and organs of different systems of human body.
4. Perform the various experiments related to special senses and nervous system.
5. Appreciate coordinated working pattern of different organs of each system

### **Course Content:**

#### **Unit I**

**10 hours**

- **Introduction to human body**

Definition and scope of anatomy and physiology, levels of structural organization and body systems, basic life processes, homeostasis, basic anatomical terminology.

- **Cellular level of organization**

Structure and functions of cell, transport across cell membrane, cell division, cell junctions. General principles of cell communication, intracellular signaling pathway activation by extracellular signal molecule, Forms of intracellular signaling: a) Contact-dependent b) Paracrine c) Synaptic d) Endocrine

- **Tissue level of organization**

Classification of tissues, structure, location and functions of epithelial, muscular and nervous and connective tissues.

#### **Unit II**

**10 hours**

- **Integumentary system**

Structure and functions of skin

- **Skeletal system**

Divisions of skeletal system, types of bone, salient features and functions of bones of axial and appendicular skeletal system

Organization of skeletal muscle, physiology of muscle contraction, neuromuscular junction

- **Joints**

Structural and functional classification, types of joints movements and its articulation

**Unit III**

**10 hours**

- **Body fluids and blood**

- Body fluids, composition and functions of blood, hemopoiesis, formation of hemoglobin, anemia, mechanisms of coagulation, blood grouping, Rh factors, transfusion, its significance and disorders of blood, Reticulo endothelial system.

- **Lymphatic system**

Lymphatic organs and tissues, lymphatic vessels, lymph circulation and functions of lymphatic system

**Unit IV**

**08 hours**

**Peripheral nervous system:**

Classification of peripheral nervous system: Structure and functions of sympathetic and parasympathetic nervous system.

Origin and functions of spinal and cranial nerves.

- **Special senses**

Structure and functions of eye, ear, nose and tongue and their disorders.

**Unit V**

**07 hours**

- **Cardiovascular system**

Heart – anatomy of heart, blood circulation, blood vessels, structure and functions of artery, vein and capillaries, elements of conduction system of heart and heart beat, its regulation by autonomic nervous system, cardiac output, cardiac cycle. Regulation of blood pressure, pulse, electrocardiogram and disorders of heart.

## **BP107P. HUMAN ANATOMY AND PHYSIOLOGY (Practical)**

**4 Hours/week**

Practical physiology is complimentary to the theoretical discussions in physiology. Practicals allow the verification of physiological processes discussed in theory classes through experiments on living tissue, intact animals or normal human beings. This is helpful for developing an insight on the subject.

1. Study of compound microscope.
2. Microscopic study of epithelial and connective tissue
3. Microscopic study of muscular and nervous tissue
4. Identification of axial bones
5. Identification of appendicular bones
  
6. Introduction to hemocytometry.
7. Enumeration of white blood cell (WBC) count
8. Enumeration of total red blood corpuscles (RBC) count
9. Determination of bleeding time
10. Determination of clotting time
11. Estimation of hemoglobin content
12. Determination of blood group.
13. Determination of erythrocyte sedimentation rate (ESR).
14. Determination of heart rate and pulse rate.
15. Recording of blood pressure.

### **Recommended Books (Latest Editions)**

1. Essentials of Medical Physiology by K. Sembulingam and P. Sembulingam. Jaypee brothers medical publishers, New Delhi.
2. Anatomy and Physiology in Health and Illness by Kathleen J.W. Wilson, Churchill Livingstone, New York
3. Physiological basis of Medical Practice-Best and Tailor. Williams & Wilkins Co,Riverview,MI USA
4. Text book of Medical Physiology- Arthur C,Guyton andJohn.E. Hall. Miamisburg, OH, U.S.A.
5. Principles of Anatomy and Physiology by Tortora Grabowski. Palmetto, GA, U.S.A.

6. Textbook of Human Histology by Inderbir Singh, Jaypee brother's medical publishers, New Delhi.
7. Textbook of Practical Physiology by C.L. Ghai, Jaypee brother's medical publishers, New Delhi.
8. Practical workbook of Human Physiology by K. Srinageswari and Rajeev Sharma, Jaypee brother's medical publishers, New Delhi.

**Reference Books (Latest Editions)**

1. Physiological basis of Medical Practice-Best and Tailor. Williams & Wilkins Co, Riverview, MI USA
2. Text book of Medical Physiology- Arthur C, Guyton and John. E. Hall. Miamisburg, OH, U.S.A.
3. Human Physiology (vol 1 and 2) by Dr. C.C. Chatterrje ,Academic Publishers Kolkata

## BP102T. PHARMACEUTICAL ANALYSIS (Theory)

45 Hours

**Scope:** This course deals with the fundamentals of analytical chemistry and principles of electrochemical analysis of drugs

**Objectives:** Upon completion of the course student shall be able to

- understand the principles of volumetric and electro chemical analysis
- carryout various volumetric and electrochemical titrations
- develop analytical skills

### Course Content:

#### UNIT-I

10 Hours

(a) **Pharmaceutical analysis**- Definition and scope

- i) Different techniques of analysis
- ii) Methods of expressing concentration
- iii) Primary and secondary standards.
- iv) Preparation and standardization of various molar and normal solutions- Oxalic acid, sodium hydroxide, hydrochloric acid, sodium thiosulphate, sulphuric acid, potassium permanganate and ceric ammonium sulphate

(b) **Errors:** Sources of errors, types of errors, methods of minimizing errors, accuracy, precision and significant figures

(c) Pharmacopoeia, Sources of impurities in medicinal agents, limit tests.

#### UNIT-II

10 Hours

- **Acid base titration:** Theories of acid base indicators, classification of acid base titrations and theory involved in titrations of strong, weak, and very weak acids and bases, neutralization curves
- **Non aqueous titration:** Solvents, acidimetry and alkalimetry titration and estimation of Sodium benzoate and Ephedrine HCl

#### UNIT-III

10 Hours

- **Precipitation titrations:** Mohr's method, Volhard's, Modified Volhard's, Fajans method, estimation of sodium chloride.
- **Complexometric titration:** Classification, metal ion indicators, masking and demasking reagents, estimation of Magnesium sulphate, and calcium gluconate.
- **Gravimetry:** Principle and steps involved in gravimetric analysis. Purity of the precipitate: co-precipitation and post precipitation, Estimation of barium sulphate.
- Basic Principles, methods and application of diazotisation titration.

## **UNIT-IV**

**08 Hours**

### **Redox titrations**

(a) Concepts of oxidation and reduction

(b) Types of redox titrations (Principles and applications)

Cerimetry, Iodimetry, Iodometry, Bromatometry, Dichrometry, Titration with potassium iodate

## **UNIT-V**

**07 Hours**

### **• Electrochemical methods of analysis**

- **Conductometry**- Introduction, Conductivity cell, Conductometric titrations, applications.
- **Potentiometry** - Electrochemical cell, construction and working of reference (Standard hydrogen, silver chloride electrode and calomel electrode) and indicator electrodes (metal electrodes and glass electrode), methods to determine end point of potentiometric titration and applications.
- **Polarography** - Principle, Ilkovic equation, construction and working of dropping mercury electrode and rotating platinum electrode, applications

## **BP108P. PHARMACEUTICAL ANALYSIS (Practical)**

**4 Hours / Week**

### **I Limit Test of the following**

- (1) Chloride
- (2) Sulphate
- (3) Iron
- (4) Arsenic

### **II Preparation and standardization of**

- (1) Sodium hydroxide
- (2) Sulphuric acid
- (3) Sodium thiosulfate
- (4) Potassium permanganate
- (5) Ceric ammonium sulphate

### **III Assay of the following compounds along with Standardization of Titrant**

- (1) Ammonium chloride by acid base titration
- (2) Ferrous sulphate by Cerimetry
- (3) Copper sulphate by Iodometry
- (4) Calcium gluconate by complexometry
- (5) Hydrogen peroxide by Permanganometry
- (6) Sodium benzoate by non-aqueous titration
- (7) Sodium Chloride by precipitation titration

### **IV Determination of Normality by electro-analytical methods**

- (1) Conductometric titration of strong acid against strong base
- (2) Conductometric titration of strong acid and weak acid against strong base
- (3) Potentiometric titration of strong acid against strong base

### **Recommended Books: (Latest Editions)**

1. A.H. Beckett & J.B. Stenlake's, Practical Pharmaceutical Chemistry Vol I & II, Stahlone Press of University of London
2. A.I. Vogel, Text Book of Quantitative Inorganic analysis
3. P. Gundu Rao, Inorganic Pharmaceutical Chemistry
4. Bentley and Driver's Textbook of Pharmaceutical Chemistry
5. John H. Kennedy, Analytical chemistry principles
6. Indian Pharmacopoeia.

## BP103T. PHARMACEUTICS- I (Theory)

45 Hours

**Scope:** This course is designed to impart a fundamental knowledge on the preparatory pharmacy with arts and science of preparing the different conventional dosage forms.

**Objectives:** Upon completion of this course the student should be able to:

- Know the history of profession of pharmacy
- Understand the basics of different dosage forms, pharmaceutical incompatibilities and pharmaceutical calculations
- Understand the professional way of handling the prescription
- Preparation of various conventional dosage forms

### Course Content:

#### UNIT – I

10 Hours

- **Historical background and development of profession of pharmacy:** History of profession of Pharmacy in India in relation to pharmacy education, industry and organization, Pharmacy as a career, Pharmacopoeias: Introduction to IP, BP, USP and Extra Pharmacopoeia.
- **Dosage forms:** Introduction to dosage forms, classification and definitions
- **Prescription:** Definition, Parts of prescription, handling of Prescription and Errors in prescription.
- **Posology:** Definition, Factors affecting posology. Pediatric dose calculations based on age, body weight and body surface area.

#### UNIT – II

10 Hours

- **Pharmaceutical calculations:** Weights and measures – Imperial & Metric system, Calculations involving percentage solutions, alligation, proof spirit and isotonic solutions based on freezing point and molecular weight.
- **Powders:** Definition, classification, advantages and disadvantages, Simple & compound powders – official preparations, dusting powders, effervescent, efflorescent and hygroscopic powders, eutectic mixtures. Geometric dilutions.
- **Liquid dosage forms:** Advantages and disadvantages of liquid dosage forms. Excipients used in formulation of liquid dosage forms. Solubility enhancement techniques

**UNIT – III****08 Hours**

- **Monophasic liquids:** Definitions and preparations of Gargles, Mouthwashes, Throat Paint, Eardrops, Nasal drops, Enemas, Syrups, Elixirs, Liniments and Lotions.
- **Biphasic liquids:**
- **Suspensions:** Definition, advantages and disadvantages, classifications, Preparation of suspensions; Flocculated and Deflocculated suspension & stability problems and methods to overcome.
- **Emulsions:** Definition, classification, emulsifying agent, test for the identification of type of Emulsion, Methods of preparation & stability problems and methods to overcome.

**UNIT – IV****08 Hours**

- **Suppositories:** Definition, types, advantages and disadvantages, types of bases, methods of preparations. Displacement value & its calculations, evaluation of suppositories.
- **Pharmaceutical incompatibilities:** Definition, classification, physical, chemical and therapeutic incompatibilities with examples.

**UNIT – V****07 Hours**

- **Semisolid dosage forms:** Definitions, classification, mechanisms and factors influencing dermal penetration of drugs. Preparation of ointments, pastes, creams and gels. Excipients used in semi solid dosage forms. Evaluation of semi solid dosage forms

## **BP109P. PHARMACEUTICALS (Practical)**

**3 Hours / week**

### **1. Syrups**

- a) Syrup IP'66
- b) Compound syrup of Ferrous Phosphate BPC'68

### **2. Elixirs**

- a) Piperazine citrate elixir
- b) Paracetamol pediatric elixir

### **3. Linctus**

- a) Terpin Hydrate Linctus IP'66
- b) Iodine Throat Paint (Mandles Paint)

### **4. Solutions**

- a) Strong solution of ammonium acetate
- b) Cresol with soap solution
- c) Lugol's solution

### **5. Suspensions**

- a) Calamine lotion
- b) Magnesium Hydroxide mixture
- c) Aluminium Hydroxide gel

### **6. Emulsions**

- a) Turpentine Liniment
- b) Liquid paraffin emulsion

### **7. Powders and Granules**

- a) ORS powder (WHO)
- b) Effervescent granules
- c) Dusting powder
- d) Divided powders

### **8. Suppositories**

- a) Glycero gelatin suppository
- b) Cocoa butter suppository
- c) Zinc Oxide suppository

### **8. Semisolids**

- a) Sulphur ointment
- b) Non staining-iodine ointment with methyl salicylate
- c) Carbopal gel

### **9. Gargles and Mouthwashes**

- a) Iodine gargle
- b) Chlorhexidine mouthwash

**Recommended Books: (Latest Editions)**

## BP104T. PHARMACEUTICAL INORGANIC CHEMISTRY (Theory)

45 Hours

**Scope:** This subject deals with the monographs of inorganic drugs and pharmaceuticals.

**Objectives:** Upon completion of course student shall be able to

- know the sources of impurities and methods to determine the impurities in inorganic drugs and pharmaceuticals
- understand the medicinal and pharmaceutical importance of inorganic compounds

### Course Content:

#### UNIT I

10 Hours

- **Impurities in pharmaceutical substances:** History of Pharmacopoeia, Sources and types of impurities, principle involved in the limit test for Chloride, Sulphate, Iron, Arsenic, Lead and Heavy metals, modified limit test for Chloride and Sulphate

**General methods of preparation,** assay for the compounds superscripted with **asterisk (\*)**, properties and medicinal uses of inorganic compounds belonging to the following classes

#### UNIT II

10 Hours

- **Acids, Bases and Buffers:** Buffer equations and buffer capacity in general, buffers in pharmaceutical systems, preparation, stability, buffered isotonic solutions, measurements of tonicity, calculations and methods of adjusting isotonicity.
- **Major extra and intracellular electrolytes:** Functions of major physiological ions, Electrolytes used in the replacement therapy: Sodium chloride\*, Potassium chloride, Calcium gluconate\* and Oral Rehydration Salt (ORS), Physiological acid base balance.
- **Dental products:** Dentifrices, role of fluoride in the treatment of dental caries, Desensitizing agents, Calcium carbonate, Sodium fluoride, and Zinc eugenol cement.

#### UNIT III

10 Hours

- **Gastrointestinal agents**

**Acidifiers:** Ammonium chloride\* and Dil. HCl

**Antacid:** Ideal properties of antacids, combinations of antacids, Sodium

Bicarbonate\*, Aluminum hydroxide gel, Magnesium hydroxide mixture

**Cathartics:** Magnesium sulphate, Sodium orthophosphate, Kaolin and Bentonite

**Antimicrobials:** Mechanism, classification, Potassium permanganate, Boric acid, Hydrogen peroxide\*, Chlorinated lime\*, Iodine and its preparations

#### UNIT IV

**08 Hours**

- **Miscellaneous compounds**

**Expectorants:** Potassium iodide, Ammonium chloride\*.

**Emetics:** Copper sulphate\*, Sodium potassium tartarate

**Haematinics:** Ferrous sulphate\*, Ferrous gluconate

**Poison and Antidote:** Sodium thiosulphate\*, Activated charcoal, Sodium nitrite<sup>333</sup>

**Astringents:** Zinc Sulphate, Potash Alum

#### UNIT V

**07 Hours**

- **Radiopharmaceuticals:** Radio activity, Measurement of radioactivity, Properties of  $\alpha$ ,  $\beta$ ,  $\gamma$  radiations, Half life, radio isotopes and study of radio isotopes - Sodium iodide  $I^{131}$ , Storage conditions, precautions & pharmaceutical application of radioactive substances.

## **BP110P. PHARMACEUTICAL INORGANIC CHEMISTRY (Practical)**

**4 Hours / Week**

- I Limit tests for following ions**
  - Limit test for Chlorides and Sulphates
  - Modified limit test for Chlorides and Sulphates
  - Limit test for Iron
  - Limit test for Heavy metals
  - Limit test for Lead
  - Limit test for Arsenic
- II Identification test**
  - Magnesium hydroxide
  - Ferrous sulphate
  - Sodium bicarbonate
  - Calcium gluconate
  - Copper sulphate
- III Test for purity**
  - Swelling power of Bentonite
  - Neutralizing capacity of aluminum hydroxide gel
  - Determination of potassium iodate and iodine in potassium Iodide
- IV Preparation of inorganic pharmaceuticals**
  - Boric acid
  - Potash alum
  - Ferrous sulphate

### **Recommended Books (Latest Editions)**

1. A.H. Beckett & J.B. Stenlake's, Practical Pharmaceutical Chemistry Vol I & II, Stahlone Press of University of London, 4<sup>th</sup> edition.
2. A.I. Vogel, Text Book of Quantitative Inorganic analysis
3. P. Gundu Rao, Inorganic Pharmaceutical Chemistry, 3<sup>rd</sup> Edition
4. M.L Schroff, Inorganic Pharmaceutical Chemistry
5. Bentley and Driver's Textbook of Pharmaceutical Chemistry
6. Anand & Chatwal, Inorganic Pharmaceutical Chemistry
7. Indian Pharmacopoeia

## **BP105T.COMMUNICATION SKILLS (Theory)**

**30 Hours**

**Scope:** This course will prepare the young pharmacy student to interact effectively with doctors, nurses, dentists, physiotherapists and other health workers. At the end of this course the student will get the soft skills set to work cohesively with the team as a team player and will add value to the pharmaceutical business.

### **Objectives:**

Upon completion of the course the student shall be able to

1. Understand the behavioral needs for a Pharmacist to function effectively in the areas of pharmaceutical operation
2. Communicate effectively (Verbal and Non Verbal)
3. Effectively manage the team as a team player
4. Develop interview skills
5. Develop Leadership qualities and essentials

### **Course content:**

#### **UNIT – I**

**07 Hours**

- **Communication Skills:** Introduction, Definition, The Importance of Communication, The Communication Process – Source, Message, Encoding, Channel, Decoding, Receiver, Feedback, Context
- **Barriers to communication:** Physiological Barriers, Physical Barriers, Cultural Barriers, Language Barriers, Gender Barriers, Interpersonal Barriers, Psychological Barriers, Emotional barriers
- **Perspectives in Communication:** Introduction, Visual Perception, Language, Other factors affecting our perspective - Past Experiences, Prejudices, Feelings, Environment

#### **UNIT – II**

**07 Hours**

- **Elements of Communication:** Introduction, Face to Face Communication - Tone of Voice, Body Language (Non-verbal communication), Verbal Communication, Physical Communication
- **Communication Styles:** Introduction, The Communication Styles Matrix with example for each -Direct Communication Style, Spirited Communication Style, Systematic Communication Style, Considerate Communication Style

**UNIT – III**

**07 Hours**

- **Basic Listening Skills:** Introduction, Self-Awareness, Active Listening, Becoming an Active Listener, Listening in Difficult Situations
- **Effective Written Communication:** Introduction, When and When Not to Use Written Communication - Complexity of the Topic, Amount of Discussion' Required, Shades of Meaning, Formal Communication
- **Writing Effectively:** Subject Lines, Put the Main Point First, Know Your Audience, Organization of the Message

**UNIT – IV**

**05 Hours**

- **Interview Skills:** Purpose of an interview, Do's and Dont's of an interview
- **Giving Presentations:** Dealing with Fears, Planning your Presentation, Structuring Your Presentation, Delivering Your Presentation, Techniques of Delivery

**UNIT – V**

**04 Hours**

- **Group Discussion:** Introduction, Communication skills in group discussion, Do's and Dont's of group discussion

## **BP111P.COMMUNICATION SKILLS (Practical)**

**2 Hours / week**

The following learning modules are to be conducted using wordsworth® English language lab software

### **Basic communication covering the following topics**

Meeting People

Asking Questions

Making Friends

What did you do?

Do's and Dont's

### **Pronunciations covering the following topics**

Pronunciation (Consonant Sounds)

Pronunciation and Nouns

Pronunciation (Vowel Sounds)

### **Advanced Learning**

Listening Comprehension / Direct and Indirect Speech

Figures of Speech

Effective Communication

Writing Skills

Effective Writing

Interview Handling Skills

E-Mail etiquette

Presentation Skills

**Recommended Books: (Latest Edition)**

1. Basic communication skills for Technology, Andreja. J. Ruther Ford, 2<sup>nd</sup> Edition, Pearson Education, 2011
2. Communication skills, Sanjay Kumar, Pushpalata, 1<sup>st</sup>Edition, Oxford Press, 2011
3. Organizational Behaviour, Stephen .P. Robbins, 1<sup>st</sup>Edition, Pearson, 2013
4. Brilliant- Communication skills, Gill Hasson, 1<sup>st</sup>Edition, Pearson Life, 2011
5. The Ace of Soft Skills: Attitude, Communication and Etiquette for success, Gopala Swamy Ramesh, 5<sup>th</sup>Edition, Pearson, 2013
6. Developing your influencing skills, Deborah Dalley, Lois Burton, Margaret, Green hall, 1st Edition Universe of Learning LTD, 2010
7. Communication skills for professionals, Konar nira, 2<sup>nd</sup>Edition, New arrivals – PHI, 2011
8. Personality development and soft skills, Barun K Mitra, 1<sup>st</sup>Edition, Oxford Press, 2011
9. Soft skill for everyone, Butter Field, 1st Edition, Cengage Learning india pvt.ltd, 2011
10. Soft skills and professional communication, Francis Peters SJ, 1<sup>st</sup>Edition, Mc Graw Hill Education, 2011
11. Effective communication, John Adair, 4<sup>th</sup>Edition, Pan Mac Millan,2009
12. Bringing out the best in people, Aubrey Daniels, 2<sup>nd</sup>Edition, Mc Graw Hill, 1999

## **BP 106RBT.REMEDIAL BIOLOGY (Theory)**

**30 Hours**

**Scope:** To learn and understand the components of living world, structure and functional system of plant and animal kingdom.

**Objectives:** Upon completion of the course, the student shall be able to

- know the classification and salient features of five kingdoms of life
- understand the basic components of anatomy & physiology of plant
- know understand the basic components of anatomy & physiology animal with special reference to human

### **UNIT I**

**07 Hours**

#### **Living world:**

- Definition and characters of living organisms
- Diversity in the living world
- Binomial nomenclature
- Five kingdoms of life and basis of classification. Salient features of Monera, Protista, Fungi, Animalia and Plantae, Virus,

#### **Morphology of Flowering plants**

- Morphology of different parts of flowering plants – Root, stem, inflorescence, flower, leaf, fruit, seed.
- General Anatomy of Root, stem, leaf of monocotyledons & Dicotyledones.

### **UNIT II**

**07 Hours**

#### **Body fluids and circulation**

- Composition of blood, blood groups, coagulation of blood
- Composition and functions of lymph
- Human circulatory system
- Structure of human heart and blood vessels
- Cardiac cycle, cardiac output and ECG

#### **Digestion and Absorption**

- Human alimentary canal and digestive glands
- Role of digestive enzymes
- Digestion, absorption and assimilation of digested food

#### **Breathing and respiration**

- Human respiratory system
- Mechanism of breathing and its regulation
- Exchange of gases, transport of gases and regulation of respiration
- Respiratory volumes

### **UNIT III**

**07 Hours**

#### **Excretory products and their elimination**

- Modes of excretion
- Human excretory system- structure and function
- Urine formation
- Rennin angiotensin system

#### **Neural control and coordination**

- Definition and classification of nervous system
- Structure of a neuron
- Generation and conduction of nerve impulse
- Structure of brain and spinal cord
- Functions of cerebrum, cerebellum, hypothalamus and medulla oblongata

#### **Chemical coordination and regulation**

- Endocrine glands and their secretions
- Functions of hormones secreted by endocrine glands

#### **Human reproduction**

- Parts of female reproductive system
- Parts of male reproductive system
- Spermatogenesis and Oogenesis
- Menstrual cycle

### **UNIT IV**

**05 Hours**

#### **Plants and mineral nutrition:**

- Essential mineral, macro and micronutrients
- Nitrogen metabolism, Nitrogen cycle, biological nitrogen fixation

#### **Photosynthesis**

- Autotrophic nutrition, photosynthesis, Photosynthetic pigments, Factors affecting photosynthesis.

### **UNIT V**

**04 Hours**

**Plant respiration:** Respiration, glycolysis, fermentation (anaerobic).

#### **Plant growth and development**

- Phases and rate of plant growth, Condition of growth, Introduction to plant growthregulators

#### **Cell - The unit of life**

- Structure and functions of cell and cell organelles. Cell division

#### **Tissues**

- Definition, types of tissues, location and functions.

**Text Books**

- a. Text book of Biology by S. B. Gokhale
- b. A Text book of Biology by Dr. Thulajappa and Dr. Seetaram.

**Reference Books**

- a. A Text book of Biology by B.V. Sreenivasa Naidu
- b. A Text book of Biology by Naidu and Murthy
- c. Botany for Degree students By A.C.Dutta.
- d.Outlines of Zoology by M. Ekambaranatha ayyer and T. N. Ananthkrishnan.
- e. A manual for pharmaceutical biology practical by S.B. Gokhale and C. K. Kokate

## **BP112RBP.REMEDIAL BIOLOGY (Practical)**

**30 Hours**

1. Introduction to experiments in biology
  - a) Study of Microscope
  - b) Section cutting techniques
  - c) Mounting and staining
  - d) Permanent slide preparation
2. Study of cell and its inclusions
3. Study of Stem, Root, Leaf, seed, fruit, flower and their modifications
4. Detailed study of frog by using computer models
5. Microscopic study and identification of tissues pertinent to Stem, Root  
Leaf, seed, fruit and flower
6. Identification of bones
7. Determination of blood group
8. Determination of blood pressure
9. Determination of tidal volume

### **Reference Books**

1. Practical human anatomy and physiology. by S.R.Kale and R.R.Kale.
2. A Manual of pharmaceutical biology practical by S.B.Gokhale, C.K.Kokate and S.P.Shriwastava.
3. Biology practical manual according to National core curriculum .Biology forum of Karnataka. Prof .M.J.H.Shafi

## BP 106RMT.REMEDIAL MATHEMATICS (Theory)

30 Hours

**Scope:** This is an introductory course in mathematics. This subject deals with the introduction to Partial fraction, Logarithm, matrices and Determinant, Analytical geometry, Calculus, differential equation and Laplace transform.

**Objectives:** Upon completion of the course the student shall be able to:-

1. Know the theory and their application in Pharmacy
2. Solve the different types of problems by applying theory
3. Appreciate the important application of mathematics in Pharmacy

### Course Content:

#### UNIT – I

06 Hours

- **Partial fraction**

Introduction, Polynomial, Rational fractions, Proper and Improper fractions, Partial fraction, Resolving into Partial fraction, Application of Partial Fraction in Chemical Kinetics and Pharmacokinetics

- **Logarithms**

Introduction, Definition, Theorems/Properties of logarithms, Common logarithms, Characteristic and Mantissa, worked examples, application of logarithm to solve pharmaceutical problems.

- **Function:**

Real Valued function, Classification of real valued functions,

- **Limits and continuity :**

Introduction, Limit of a function, Definition of limit of a function ( $\epsilon - \delta$  definition),  $\lim_{x \rightarrow a} \frac{x^n - a^n}{x - a} = na^{n-1}$ ,  $\lim_{\theta \rightarrow 0} \frac{\sin \theta}{\theta} = 1$ ,

#### UNIT –II

06 Hours

- **Matrices and Determinant:**

Introduction matrices, Types of matrices, Operation on matrices, Transpose of a matrix, Matrix Multiplication, Determinants, Properties of determinants, Product of determinants, Minors and co-Factors, Adjoint or adjugate of a square matrix, Singular and non-singular matrices, Inverse of a matrix, Solution of system of linear of equations using matrix method, Cramer's rule, Characteristic equation and roots of a square matrix, Cayley–Hamilton theorem, Application of Matrices in solving Pharmacokinetic equations

### UNIT – III

06 Hours

#### • Calculus

**Differentiation** : Introductions, Derivative of a function, Derivative of a constant, Derivative of a product of a constant and a function, Derivative of the sum or difference of two functions, Derivative of the product of two functions (product formula), Derivative of the quotient of two functions (Quotient formula) – **Without Proof**, Derivative of  $x^n$  w.r.t  $x$ , where  $n$  is any rational number, Derivative of  $e^x$ , Derivative of  $\log_e x$ , Derivative of  $a^x$ , Derivative of trigonometric functions from first principles (**without Proof**), Successive Differentiation, Conditions for a function to be a maximum or a minimum at a point. Application

### UNIT – IV

06 Hours

#### • Analytical Geometry

**Introduction:** Signs of the Coordinates, Distance formula,

**Straight Line** : Slope or gradient of a straight line, Conditions for parallelism and perpendicularity of two lines, Slope of a line joining two points, Slope – intercept form of a straight line

#### **Integration:**

Introduction, Definition, Standard formulae, Rules of integration, Method of substitution, Method of Partial fractions, Integration by parts, definite integrals, application

### UNIT-V

06 Hours

- **Differential Equations** : Some basic definitions, Order and degree, Equations in separable form, Homogeneous equations, Linear Differential equations, Exact equations, **Application in solving Pharmacokinetic equations**
- **Laplace Transform** : Introduction, Definition, Properties of Laplace transform, Laplace Transforms of elementary functions, Inverse Laplace transforms, Laplace transform of derivatives, Application to solve Linear differential equations, **Application in solving Chemical kinetics and Pharmacokinetics equations**

### Recommended Books (Latest Edition)

1. Differential Calculus by Shanthinarayan
2. Pharmaceutical Mathematics with application to Pharmacy by Panchaksharappa Gowda D.H.
3. Integral Calculus by Shanthinarayan
4. Higher Engineering Mathematics by Dr.B.S.Grewal

## **Semester II**

## **BP 201T. HUMAN ANATOMY AND PHYSIOLOGY-II (Theory)**

**45 Hours**

**Scope:** This subject is designed to impart fundamental knowledge on the structure and functions of the various systems of the human body. It also helps in understanding both homeostatic mechanisms. The subject provides the basic knowledge required to understand the various disciplines of pharmacy.

**Objectives:** Upon completion of this course the student should be able to:

1. Explain the gross morphology, structure and functions of various organs of the human body.
2. Describe the various homeostatic mechanisms and their imbalances.
3. Identify the various tissues and organs of different systems of human body.
4. Perform the hematological tests like blood cell counts, haemoglobin estimation, bleeding/clotting time etc and also record blood pressure, heart rate, pulse and respiratory volume.
5. Appreciate coordinated working pattern of different organs of each system
6. Appreciate the interlinked mechanisms in the maintenance of normal functioning (homeostasis) of human body.

### **Course Content:**

#### **Unit I**

**10 hours**

- **Nervous system**

Organization of nervous system, neuron, neuroglia, classification and properties of nerve fibre, electrophysiology, action potential, nerve impulse, receptors, synapse, neurotransmitters.

Central nervous system: Meninges, ventricles of brain and cerebrospinal fluid. structure and functions of brain (cerebrum, brain stem, cerebellum), spinal cord (gross structure, functions of afferent and efferent nerve tracts, reflex activity)

#### **Unit II**

**06 hours**

- **Digestive system**

Anatomy of GI Tract with special reference to anatomy and functions of stomach, ( Acid production in the stomach, regulation of acid production through parasympathetic nervous system, pepsin role in protein digestion) small intestine

and large intestine, anatomy and functions of salivary glands, pancreas and liver, movements of GIT, digestion and absorption of nutrients and disorders of GIT.

- **Energetics**

Formation and role of ATP, Creatinine Phosphate and BMR.

### **Unit III**

- **Respiratory system** **10 hours**

Anatomy of respiratory system with special reference to anatomy of lungs, mechanism of respiration, regulation of respiration

Lung Volumes and capacities transport of respiratory gases, artificial respiration, and resuscitation methods.

- **Urinary system**

Anatomy of urinary tract with special reference to anatomy of kidney and nephrons, functions of kidney and urinary tract, physiology of urine formation, micturition reflex and role of kidneys in acid base balance, role of RAS in kidney and disorders of kidney.

### **Unit IV**

**10 hours**

- **Endocrine system**

Classification of hormones, mechanism of hormone action, structure and functions of pituitary gland, thyroid gland, parathyroid gland, adrenal gland, pancreas, pineal gland, thymus and their disorders.

### **Unit V**

**09 hours**

- **Reproductive system**

Anatomy of male and female reproductive system, Functions of male and female reproductive system, sex hormones, physiology of menstruation, fertilization, spermatogenesis, oogenesis, pregnancy and parturition

- **Introduction to genetics**

Chromosomes, genes and DNA, protein synthesis, genetic pattern of inheritance

## **BP 207 P. HUMAN ANATOMY AND PHYSIOLOGY (Practical)**

**4 Hours/week**

Practical physiology is complimentary to the theoretical discussions in physiology. Practicals allow the verification of physiological processes discussed in theory classes through experiments on living tissue, intact animals or normal human beings. This is helpful for developing an insight on the subject.

1. To study the integumentary and special senses using specimen, models, etc.,
2. To study the nervous system using specimen, models, etc.,
3. To study the endocrine system using specimen, models, etc
4. To demonstrate the general neurological examination
5. To demonstrate the function of olfactory nerve
6. To examine the different types of taste.
7. To demonstrate the visual acuity
8. To demonstrate the reflex activity
9. Recording of body temperature
10. To demonstrate positive and negative feedback mechanism.
11. Determination of tidal volume and vital capacity.
12. Study of digestive, respiratory, cardiovascular systems, urinary and reproductive systems with the help of models, charts and specimens.
13. Recording of basal mass index .
14. Study of family planning devices and pregnancy diagnosis test.
15. Demonstration of total blood count by cell analyser
16. Permanent slides of vital organs and gonads.

### **Recommended Books (Latest Editions)**

1. Essentials of Medical Physiology by K. Sembulingam and P. Sembulingam. Jaypee brothers medical publishers, New Delhi.
2. Anatomy and Physiology in Health and Illness by Kathleen J.W. Wilson, Churchill Livingstone, New York
3. Physiological basis of Medical Practice-Best and Tailor. Williams & WilkinsCo, Riverview, MI USA

4. Text book of Medical Physiology- Arthur C, Guyton and John.E. Hall. Miamisburg, OH, U.S.A.
5. Principles of Anatomy and Physiology by Tortora Grabowski. Palmetto, GA, U.S.A.
6. Textbook of Human Histology by Inderbir Singh, Jaypee brothers medical publishers, New Delhi.
7. Textbook of Practical Physiology by C.L. Ghai, Jaypee brothers medical publishers, New Delhi.
8. Practical workbook of Human Physiology by K. Srinageswari and Rajeev Sharma, Jaypee brother's medical publishers, New Delhi.

**Reference Books:**

1. Physiological basis of Medical Practice-Best and Tailor. Williams & Wilkins Co, Riverview, MI USA
2. Text book of Medical Physiology- Arthur C, Guyton and John. E. Hall. Miamisburg, OH, U.S.A.
3. Human Physiology (vol 1 and 2) by Dr. C.C. Chatterrje ,Academic Publishers Kolkata

## BP202T. PHARMACEUTICAL ORGANIC CHEMISTRY –I (Theory)

45 Hours

**Scope:** This subject deals with classification and nomenclature of simple organic compounds, structural isomerism, intermediates forming in reactions, important physical properties, reactions and methods of preparation of these compounds. The syllabus also emphasizes on mechanisms and orientation of reactions.

**Objectives:** Upon completion of the course the student shall be able to

1. write the structure, name and the type of isomerism of the organic compound
2. write the reaction, name the reaction and orientation of reactions
3. account for reactivity/stability of compounds,
4. identify/confirm the identification of organic compound

### Course Content:

General methods of preparation and reactions of compounds superscripted with asterisk (\*) to be explained

To emphasize on definition, types, classification, principles/mechanisms, applications, examples and differences

### UNIT-I

07 Hours

- **Classification, nomenclature and isomerism**

Classification of Organic Compounds

Common and IUPAC systems of nomenclature of organic compounds

(up to 10 Carbons open chain and carbocyclic compounds)

Structural isomerisms in organic compounds

### UNIT-II 10 Hours

- **Alkanes\*, Alkenes\* and Conjugated dienes\***

SP<sup>3</sup> hybridization in alkanes, Halogenation of alkanes, uses of paraffins.

Stabilities of alkenes, SP<sup>2</sup> hybridization in alkenes

E<sub>1</sub> and E<sub>2</sub> reactions – kinetics, order of reactivity of alkyl halides, rearrangement of carbocations, Saytzeffs orientation and evidences. E<sub>1</sub> versus E<sub>2</sub> reactions, Factors affecting E<sub>1</sub> and E<sub>2</sub> reactions. Ozonolysis, electrophilic addition reactions of alkenes, Markownikoff's orientation, free radical addition reactions of alkenes, Anti Markownikoff's orientation.

Stability of conjugated dienes, Diel-Alder, electrophilic addition, free radical addition reactions of conjugated dienes, allylic rearrangement

### UNIT-III 10 Hours

- **Alkyl halides\***

SN<sub>1</sub> and SN<sub>2</sub> reactions - kinetics, order of reactivity of alkyl halides, stereochemistry and rearrangement of carbocations.

SN<sub>1</sub> versus SN<sub>2</sub> reactions, Factors affecting SN<sub>1</sub> and SN<sub>2</sub> reactions

Structure and uses of ethylchloride, Chloroform, trichloroethylene, tetrachloroethylene, dichloromethane, tetrachloromethane and iodoform.

- **Alcohols\***- Qualitative tests, Structure and uses of Ethyl alcohol, Methyl alcohol, chlorobutanol, Cetosteryl alcohol, Benzyl alcohol, Glycerol, Propylene glycol

#### **UNIT-IV 10 Hours**

- **Carbonyl compounds\* (Aldehydes and ketones)**

Nucleophilic addition, Electromeric effect, aldol condensation, Crossed Aldol condensation, Cannizzaro reaction, Crossed Cannizzaro reaction, Benzoin condensation, Perkin condensation, qualitative tests, Structure and uses of Formaldehyde, Paraldehyde, Acetone, Chloral hydrate, Hexamine, Benzaldehyde, Vanilin, Cinnamaldehyde.

#### **UNIT-V**

**08 Hours**

- **Carboxylic acids\***

Acidity of carboxylic acids, effect of substituents on acidity, inductive effect and qualitative tests for carboxylic acids, amide and ester

Structure and Uses of Acetic acid, Lactic acid, Tartaric acid, Citric acid, Succinic acid. Oxalic acid, Salicylic acid, Benzoic acid, Benzyl benzoate, Dimethyl phthalate, Methyl salicylate and Acetyl salicylic acid

- **Aliphatic amines\*** - Basicity, effect of substituent on Basicity. Qualitative test, Structure and uses of Ethanolamine, Ethylenediamine, Amphetamine

## **BP208P. PHARMACEUTICAL ORGANIC CHEMISTRY -I (Practical)**

**4 Hours / week**

1. Systematic qualitative analysis of unknown organic compounds like
  1. Preliminary test: Color, odour, aliphatic/aromatic compounds, saturation and unsaturation, etc.
  2. Detection of elements like Nitrogen, Sulphur and Halogen by Lassaigne's test
  3. Solubility test
  4. Functional group test like Phenols, Amides/ Urea, Carbohydrates, Amines, Carboxylic acids, Aldehydes and Ketones, Alcohols, Esters, Aromatic and Halogenated Hydrocarbons, Nitro compounds and Anilides.
  5. Melting point/Boiling point of organic compounds
  6. Identification of the unknown compound from the literature using melting point/ boiling point.
  7. Preparation of the derivatives and confirmation of the unknown compound by melting point/ boiling point.
  8. Minimum 5 unknown organic compounds to be analysed systematically.
2. Preparation of suitable solid derivatives from organic compounds
3. Construction of molecular models

### **Recommended Books (Latest Editions)**

1. Organic Chemistry by Morrison and Boyd
2. Organic Chemistry by I.L. Finar , Volume-I
3. Textbook of Organic Chemistry by B.S. Bahl & Arun Bahl.
4. Organic Chemistry by P.L.Soni
5. Practical Organic Chemistry by Mann and Saunders.
6. Vogel's text book of Practical Organic Chemistry
7. Advanced Practical organic chemistry by N.K.Vishnoi.
8. Introduction to Organic Laboratory techniques by Pavia, Lampman and Kriz.
9. Reaction and reaction mechanism by Ahluwalia/Chatwal.

## BP203 T. BIOCHEMISTRY (Theory)

45 Hours

**Scope:** Biochemistry deals with complete understanding of the molecular levels of the chemical process associated with living cells. The scope of the subject is providing biochemical facts and the principles to understand metabolism of nutrient molecules in physiological and pathological conditions. It is also emphasizing on genetic organization of mammalian genome and hetero & autocatalytic functions of DNA.

**Objectives:** Upon completion of course student shall be able to

1. Understand the catalytic role of enzymes, importance of enzyme inhibitors in design of new drugs, therapeutic and diagnostic applications of enzymes.
2. Understand the metabolism of nutrient molecules in physiological and pathological conditions.
3. Understand the genetic organization of mammalian genome and functions of DNA in the synthesis of RNAs and proteins.

### Course Content:

#### UNIT I

08 Hours

- **Biomolecules**

Introduction, classification, chemical nature and biological role of carbohydrate, lipids, nucleic acids, amino acids and proteins.

- **Bioenergetics**

Concept of free energy, endergonic and exergonic reaction, Relationship between free energy, enthalpy and entropy; Redox potential.

Energy rich compounds; classification; biological significances of ATP and cyclic AMP

#### UNIT II

10 Hours

- **Carbohydrate metabolism**

Glycolysis – Pathway, energetics and significance

Citric acid cycle- Pathway, energetics and significance

HMP shunt and its significance; Glucose-6-Phosphate dehydrogenase (G6PD) deficiency

Glycogen metabolism Pathways and glycogen storage diseases (GSD)

Gluconeogenesis- Pathway and its significance

Hormonal regulation of blood glucose level and Diabetes mellitus

- **Biological oxidation**

Electron transport chain (ETC) and its mechanism.

Oxidative phosphorylation & its mechanism and substrate level phosphorylation

Inhibitors ETC and oxidative phosphorylation/Uncouplers

### **UNIT III**

**10 Hours**

- **Lipid metabolism**

β-Oxidation of saturated fatty acid (Palmitic acid)

Formation and utilization of ketone bodies; ketoacidosis

De novo synthesis of fatty acids (Palmitic acid)

Biological significance of cholesterol and conversion of cholesterol into bile acids, steroid hormone and vitamin D

Disorders of lipid metabolism: Hypercholesterolemia, atherosclerosis, fatty liver and obesity.

- **Amino acid metabolism**

General reactions of amino acid metabolism: Transamination, deamination & decarboxylation, urea cycle and its disorders

Catabolism of phenylalanine and tyrosine and their metabolic disorders (Phenylketonuria, Albinism, alcaptonuria, tyrosinemia)

Synthesis and significance of biological substances; 5-HT, melatonin, dopamine, noradrenaline, adrenaline

Catabolism of heme; hyperbilirubinemia and jaundice

#### **UNIT IV**

**10 Hours**

- **Nucleic acid metabolism and genetic information transfer**

Biosynthesis of purine and pyrimidine nucleotides

Catabolism of purine nucleotides and Hyperuricemia and Gout disease

Organization of mammalian genome

Structure of DNA and RNA and their functions

DNA replication (semi conservative model)

Transcription or RNA synthesis

Genetic code, Translation or Protein synthesis and inhibitors

## UNIT V

07 Hours

- **Enzymes**

Introduction, properties, nomenclature and IUB classification of enzymes

Enzyme kinetics (Michaelis plot, Line Weaver Burke plot)

Enzyme inhibitors with examples

Regulation of enzymes: enzyme induction and repression, allosteric enzymes regulation

Therapeutic and diagnostic applications of enzymes and isoenzymes

Coenzymes –Structure and biochemical functions

### **BP 209 P. BIOCHEMISTRY (Practical)**

**4 Hours / Week**

1. Qualitative analysis of carbohydrates (Glucose, Fructose, Lactose, Maltose, Sucrose and starch)
2. Identification tests for Proteins (albumin and Casein)
3. Quantitative analysis of reducing sugars (DNSA method) and Proteins (Biuret method)
4. Qualitative analysis of urine for abnormal constituents
5. Determination of blood creatinine
6. Determination of blood sugar
7. Determination of serum total cholesterol
8. Preparation of buffer solution and measurement of pH
9. Study of enzymatic hydrolysis of starch
10. Determination of Salivary amylase activity
11. Study the effect of Temperature on Salivary amylase activity.
12. Study the effect of substrate concentration on salivary amylase activity.

### **Recommended Books (Latest Editions)**

1. Principles of Biochemistry by Lehninger.
2. Harper's Biochemistry by Robert K. Murry, Daryl K. Granner and Victor W. Rodwell.
3. Biochemistry by Stryer.
4. Biochemistry by D. Satyanarayan and U.Chakrapani
5. Textbook of Biochemistry by Rama Rao.
6. Textbook of Biochemistry by Deb.
7. Outlines of Biochemistry by Conn and Stumpf
8. Practical Biochemistry by R.C. Gupta and S. Bhargavan.
9. Introduction of Practical Biochemistry by David T. Plummer. (3rd Edition)
10. Practical Biochemistry for Medical students by Rajagopal and Ramakrishna.
11. Practical Biochemistry by Harold Varley.

### **BP 204T.PATHOPHYSIOLOGY (THEORY)**

**45Hours**

**Scope:** Pathophysiology is the study of causes of diseases and reactions of the body to such disease producing causes. This course is designed to impart a thorough knowledge of the relevant aspects of pathology of various conditions with reference to its pharmacological applications, and understanding of basic pathophysiological mechanisms. Hence it will not only help to study the syllabus of pathology, but also to get baseline knowledge required to practice medicine safely, confidently, rationally and effectively.

**Objectives:** Upon completion of the subject student shall be able to –

1. Describe the etiology and pathogenesis of the selected disease states;
2. Name the signs and symptoms of the diseases; and
3. Mention the complications of the diseases.

#### **Course content:**

##### **Unit I**

**10Hours**

- **Basic principles of Cell injury and Adaptation:**

Introduction, definitions, Homeostasis, Components and Types of Feedback systems, Causes of cellular injury, Pathogenesis (Cell membrane damage, Mitochondrial damage, Ribosome damage, Nuclear damage), Morphology of cell injury – Adaptive changes (Atrophy, Hypertrophy, hyperplasia, Metaplasia, Dysplasia), Cell swelling, Intra cellular accumulation, Calcification, Enzyme leakage and Cell Death Acidosis & Alkalosis, Electrolyte imbalance

- **Basic mechanism involved in the process of inflammation and repair:**

Introduction, Clinical signs of inflammation, Different types of Inflammation, Mechanism of Inflammation – Alteration in vascular permeability and blood flow, migration of WBC's, Mediators of inflammation, Basic principles of wound healing in the skin, Pathophysiology of Atherosclerosis

**Unit II**

**10Hours**

- **Cardiovascular System:**

Hypertension, congestive heart failure, ischemic heart disease (angina, myocardial infarction, atherosclerosis and arteriosclerosis)

- **Respiratory system:** Asthma, Chronic obstructive airways diseases.

- **Renal system:** Acute and chronic renal failure .

**Unit II**

**10Hours**

- **Haematological Diseases:**

Iron deficiency, megaloblastic anemia (Vit B12 and folic acid), sickle cell anemia, thalasemia, hereditary acquired anemia, hemophilia

- **Endocrine system:** Diabetes, thyroid diseases, disorders of sex hormones

- **Nervous system:** Epilepsy, Parkinson's disease, stroke, psychiatric disorders: depression, schizophrenia and Alzheimer's disease.

- **Gastrointestinal system:** Peptic Ulcer

- 

**Unit IV**

**8 Hours**

- Inflammatory bowel diseases, jaundice, hepatitis (A,B,C,D,E,F) alcoholic liver disease.

- **Disease of bones and joints:** Rheumatoid arthritis, osteoporosis and gout

- **Principles of cancer:** classification, etiology and pathogenesis of cancer

- **Diseases of bones and joints:** Rheumatoid Arthritis, Osteoporosis, Gout

- **Principles of Cancer:** Classification, etiology and pathogenesis of Cancer

**Unit V**

**7 Hours**

- **Infectious diseases:** Meningitis, Typhoid, Leprosy, Tuberculosis, Urinary tract infections

- **Sexually transmitted diseases:** AIDS, Syphilis, Gonorrhoea

**Recommended Books (Latest Editions)**

1. Vinay Kumar, Abul K. Abas, Jon C. Aster; Robbins & Cotran Pathologic Basis of Disease; South Asia edition; India; Elsevier; 2014.
2. Harsh Mohan; Text book of Pathology; 6<sup>th</sup> edition; India; Jaypee Publications; 2010.
3. Laurence B, Bruce C, Bjorn K. ; Goodman Gilman's The Pharmacological Basis of Therapeutics; 12<sup>th</sup> edition; New York; McGraw-Hill; 2011.
4. Best, Charles Herbert 1899-1978; Taylor, Norman Burke 1885-1972; West, John B (John Burnard); Best and Taylor's Physiological basis of medical practice; 12<sup>th</sup> ed; united states;
5. William and Wilkins, Baltimore; 1991 [1990 printing].
6. Nicki R. Colledge, Brian R. Walker, Stuart H. Ralston; Davidson's Principles and Practice of Medicine; 21<sup>st</sup> edition; London; ELBS/Churchill Livingstone; 2010.

8. Joseph DiPiro, Robert L. Talbert, Gary Yee, Barbara Wells, L. Michael Posey; Pharmacotherapy: A Pathophysiological Approach; 9<sup>th</sup> edition; London; McGraw-Hill Medical; 2014.
9. V. Kumar, R. S. Cotran and S. L. Robbins; Basic Pathology; 6<sup>th</sup> edition; Philadelphia; WB Saunders Company; 1997.
10. Roger Walker, Clive Edwards; Clinical Pharmacy and Therapeutics; 3<sup>rd</sup> edition; London; Churchill Livingstone publication; 2003.

#### **Recommended Journals**

1. The Journal of Pathology. ISSN: 1096-9896 (Online)
2. The American Journal of Pathology. ISSN: 0002-9440
3. Pathology. 1465-3931 (Online)
4. International Journal of Physiology, Pathophysiology and Pharmacology. ISSN: 1944-8171 (Online)
5. Indian Journal of Pathology and Microbiology. ISSN-0377-4929.

## BP205 T. COMPUTER APPLICATIONS IN PHARMACY (Theory)

30 Hrs (2 Hrs/Week)

**Scope:** This subject deals with the introduction Database, Database Management system, computer application in clinical studies and use of databases.

**Objectives:** Upon completion of the course the student shall be able to

1. know the various types of application of computers in pharmacy
2. know the various types of databases
3. know the various applications of databases in pharmacy

### Course content:

#### UNIT – I

06 hours

**Number system:** Binary number system, Decimal number system, Octal number system, Hexadecimal number systems, conversion decimal to binary, binary to decimal, octal to binary etc, binary addition, binary subtraction – One's complement, Two's complement method, binary multiplication, binary division

**Concept of Information Systems and Software :** Information gathering, requirement and feasibility analysis, data flow diagrams, process specifications, input/output design, process life cycle, planning and managing the project

#### UNIT –II

06 hours

**Web technologies:** Introduction to HTML, XML, CSS and Programming languages, introduction to web servers and Server Products

Introduction to databases, MYSQL, MS ACCESS, Pharmacy Drug database

#### UNIT – III

06 hours

**Application of computers in Pharmacy** – Drug information storage and retrieval, Pharmacokinetics, Mathematical model in Drug design, Hospital and Clinical Pharmacy, Electronic Prescribing and discharge (EP) systems, barcode medicine identification and automated dispensing of drugs, mobile technology and adherence monitoring

Diagnostic System, Lab-diagnostic System, Patient Monitoring System, Pharma Information System

**UNIT – IV**

**06 hours**

**Bioinformatics:** Introduction, Objective of Bioinformatics, Bioinformatics Databases, Concept of Bioinformatics, Impact of Bioinformatics in Vaccine Discovery

**UNIT-V**

**06 hours**

**Computers as data analysis in Preclinical development:**

Chromatographic data analysis(CDS), Laboratory Information management System (LIMS) and Text Information Management System(TIMMS)

### **BP210P. COMPUTER APPLICATIONS IN PHARMACY (Practical)**

1. Design a questionnaire using a word processing package to gather information about a particular disease.
2. Create a HTML web page to show personal information.
3. Retrieve the information of a drug and its adverse effects using online tools
4. Creating mailing labels Using Label Wizard , generating label in MS WORD
5. Create a database in MS Access to store the patient information with the required fields Using access
6. Design a form in MS Access to view, add, delete and modify the patient record in the database
7. Generating report and printing the report from patient database
8. Creating invoice table using – MS Access
9. Drug information storage and retrieval using MS Access
10. Creating and working with queries in MS Access
11. Exporting Tables, Queries, Forms and Reports to web pages
12. Exporting Tables, Queries, Forms and Reports to XML pages

#### **Recommended books (Latest edition):**

1. Computer Application in Pharmacy – William E.Fassett –Lea and Febiger, 600 South Washington Square, USA, (215) 922-1330.
2. Computer Application in Pharmaceutical Research and Development –Sean Ekins – Wiley-Interscience, A John Willey and Sons, INC., Publication, USA
3. Bioinformatics (Concept, Skills and Applications) – S.C.Rastogi-CBS Publishers and Distributors, 4596/1- A, 11 Darya Gani, New Delhi – 110 002(INDIA)
4. Microsoft office Access - 2003, Application Development Using VBA, SQL Server, DAP and Infopath – Cary N.Prague – Wiley Dreamtech India (P) Ltd., 4435/7, Ansari Road, Daryagani, New Delhi - 110002

## **BP 206 T. ENVIRONMENTAL SCIENCES (Theory)**

**30 hours**

**Scope:** Environmental Sciences is the scientific study of the environmental system and the status of its inherent or induced changes on organisms. It includes not only the study of physical and biological characters of the environment but also the social and cultural factors and the impact of man on environment.

**Objectives:** Upon completion of the course the student shall be able to:

1. Create the awareness about environmental problems among learners.
2. Impart basic knowledge about the environment and its allied problems.
3. Develop an attitude of concern for the environment.
4. Motivate learner to participate in environment protection and environment improvement.
5. Acquire skills to help the concerned individuals in identifying and solving environmental problems.
6. Strive to attain harmony with Nature.

### **Course content:**

#### **Unit-I**

**10hours**

The Multidisciplinary nature of environmental studies

Natural Resources

Renewable and non-renewable resources:

Natural resources and associated problems

a) Forest resources; b) Water resources; c) Mineral resources; d) Food resources; e) Energy resources; f) Land resources: Role of an individual in conservation of natural resources.

#### **Unit-II**

**10hours**

Ecosystems

- Concept of an ecosystem.
- Structure and function of an ecosystem.
- Introduction, types, characteristic features, structure and function of the ecosystems: Forest ecosystem; Grassland ecosystem; Desert ecosystem; Aquatic ecosystems (ponds, streams, lakes, rivers, oceans, estuaries)

#### **Unit- III**

**10hours**

Environmental Pollution: Air pollution; Water pollution; Soil pollution

**Recommended Books (Latest edition):**

1. Y.K. Sing, Environmental Science, New Age International Pvt, Publishers, Bangalore
2. Agarwal, K.C. 2001 Environmental Biology, Nidi Publ. Ltd. Bikaner.
3. Bharucha Erach, The Biodiversity of India, Mapin Publishing Pvt. Ltd., Ahmedabad – 380 013, India,
4. Brunner R.C., 1989, Hazardous Waste Incineration, McGraw Hill Inc. 480p
5. Clark R.S., Marine Pollution, Clarendon Press Oxford
6. Cunningham, W.P. Cooper, T.H. Gorhani, E & Hepworth, M.T. 2001, Environmental Encyclopedia, Jaico Publ. House, Mumbai, 1196p
7. De A.K., Environmental Chemistry, Wiley Eastern Ltd.
8. Down of Earth, Centre for Science and Environment

## **SEMESTER III**

## BP301T. PHARMACEUTICAL ORGANIC CHEMISTRY –II (Theory)

45 Hours

**Scope:** This subject deals with general methods of preparation and reactions of some organic compounds. Reactivity of organic compounds are also studied here. The syllabus emphasizes on mechanisms and orientation of reactions. Chemistry of fats and oils are also included in the syllabus.

**Objectives:** Upon completion of the course the student shall be able to

1. write the structure, name and the type of isomerism of the organic compound
2. write the reaction, name the reaction and orientation of reactions
3. account for reactivity/stability of compounds,
4. prepare organic compounds

### Course Content:

General methods of preparation and reactions of compounds superscripted with asterisk (\*) to be explained

To emphasize on definition, types, classification, principles/mechanisms, applications, examples and differences

#### UNIT I

10 Hours

- **Benzene and its derivatives**

- A. Analytical, synthetic and other evidences in the derivation of structure of benzene, Orbital picture, resonance in benzene, aromatic characters, Huckel's rule
- B. Reactions of benzene - nitration, sulphonation, halogenation- reactivity, Friedelcrafts alkylation- reactivity, limitations, Friedelcrafts acylation.
- C. Substituents, effect of substituents on reactivity and orientation of mono substituted benzene compounds towards electrophilic substitution reaction
- D. Structure and uses of DDT, Saccharin, BHC and Chloramine

#### UNIT II

10 Hours

- **Phenols\*** - Acidity of phenols, effect of substituents on acidity, qualitative tests, Structure and uses of phenol, cresols, resorcinol, naphthols
- **Aromatic Amines\*** - Basicity of amines, effect of substituents on basicity, and synthetic uses of aryl diazonium salts
- **Aromatic Acids\*** -Acidity, effect of substituents on acidity and important reactions of benzoic acid.

#### UNIT III

10 Hours

- **Fats and Oils**
  - a. Fatty acids – reactions.

- b. Hydrolysis, Hydrogenation, Saponification and Rancidity of oils, Drying oils.
- c. Analytical constants – Acid value, Saponification value, Ester value, Iodine value, Acetyl value, Reichert Meissl (RM) value – significance and principle involved in their determination.

**UNIT IV**

**08 Hours**

- **Polynuclear hydrocarbons:**

- a. Synthesis, reactions
- b. Structure and medicinal uses of Naphthalene, Phenanthrene, Anthracene, Diphenylmethane, Triphenylmethane and their derivatives

**UNIT V**

**07 Hours**

- **Cyclo alkanes\***

Stabilities – Baeyer's strain theory, limitation of Baeyer's strain theory, Coulson and Moffitt's modification, Sachse Mohr's theory (Theory of strainless rings), reactions of cyclopropane and cyclobutane only

## BP305P. PHARMACEUTICAL ORGANIC CHEMISTRY -II (Practical)

4 Hrs/week

### I Experiments involving laboratory techniques

- Recrystallization
- Steam distillation

### II Determination of following oil values (including standardization of reagents)

- Acid value
- Saponification value
- Iodine value

### III Preparation of compounds

- Benzanilide/Phenyl benzoate/Acetanilide from Aniline/ Phenol /Aniline by acylation reaction.
- 2,4,6-Tribromo aniline/Para bromo acetanilide from Aniline/
- Acetanilide by halogenation (Bromination) reaction.
- 5-Nitro salicylic acid/Meta di nitro benzene from Salicylic acid / Nitro benzene by nitration reaction.
- Benzoic acid from Benzyl chloride by oxidation reaction.
- Benzoic acid/ Salicylic acid from alkyl benzoate/ alkyl salicylate by hydrolysis reaction.
- 1-Phenyl azo-2-naphthol from Aniline by diazotization and coupling reactions.
- Benzil from Benzoin by oxidation reaction.
- Dibenzal acetone from Benzaldehyde by Claisen Schmidt reaction
- Cinnamic acid from Benzaldehyde by Perkin reaction
- *P*-Iodo benzoic acid from *P*-amino benzoic acid

### Recommended Books (Latest Editions)

1. Organic Chemistry by Morrison and Boyd
2. Organic Chemistry by I.L. Finar , Volume-I
3. Textbook of Organic Chemistry by B.S. Bahl & Arun Bahl.
4. Organic Chemistry by P.L.Soni
5. Practical Organic Chemistry by Mann and Saunders.
6. Vogel's text book of Practical Organic Chemistry
7. Advanced Practical organic chemistry by N.K.Vishnoi.

8. Introduction to Organic Laboratory techniques by Pavia, Lampman and Kriz.

**BP302T. PHYSICAL PHARMACEUTICS-I (Theory)**

**45Hours**

**Scope:** The course deals with the various physical and physicochemical properties, and principles involved in dosage forms/formulations. Theory and practical components of the subject help the student to get a better insight into various areas of formulation research and development, and stability studies of pharmaceutical dosage forms.

**Objectives:** Upon the completion of the course student shall be able to

1. Understand various physicochemical properties of drug molecules in the designing the dosage forms
2. Know the principles of chemical kinetics & to use them for stability testing and determination of expiry date of formulations
3. Demonstrate use of physicochemical properties in the formulation development and evaluation of dosage forms.

**Course Content:**

**UNIT-I**

**10 Hours**

**Solubility of drugs:** Solubility expressions, mechanisms of solute solvent interactions, ideal solubility parameters, solvation & association, quantitative approach to the factors influencing solubility of drugs, diffusion principles in biological systems. Solubility of gas in liquids, solubility of liquids in liquids, (Binary solutions, ideal solutions) Raoult's law, real solutions. Partially miscible liquids, Critical solution temperature and applications. Distribution law, its limitations and applications

**UNIT-II**

**10Hours**

**States of Matter and properties of matter:** State of matter, changes in the state of matter, latent heats, vapour pressure, sublimation critical point, eutectic mixtures, gases, aerosols – inhalers, relative humidity, liquid complexes, liquid crystals, glassy states, solid-crystalline, amorphous & polymorphism.

**Physicochemical properties of drug molecules:** Refractive index, optical rotation, dielectric constant, dipole moment, dissociation constant, determinations and applications

**UNIT-III**

**08 Hours**

**Surface and interfacial phenomenon:** Liquid interface, surface & interfacial tensions, surface free energy, measurement of surface & interfacial tensions, spreading coefficient, adsorption at liquid interfaces, surface active agents, HLB Scale, solubilisation, detergency, adsorption at solid interface.

**UNIT-IV****08Hours**

**Complexation and protein binding:** Introduction, Classification of Complexation, Applications, methods of analysis, protein binding, Complexation and drug action, crystalline structures of complexes and thermodynamic treatment of stability constants.

**UNIT-V****07 Hours**

**pH, buffers and Isotonic solutions:** Sorensen's pH scale, pH determination (electrometric and calorimetric), applications of buffers, buffer equation, buffer capacity, buffers in pharmaceutical and biological systems, buffered isotonic solutions.

### **BP306P. PHYSICAL PHARMACEUTICS – I (Practical)**

**4 Hrs/week**

1. Determination the solubility of drug at room temperature
2. Determination of pKa value by Half Neutralization/ Henderson Hasselbalch equation.
3. Determination of Partition co- efficient of benzoic acid in benzene and water
4. Determination of Partition co- efficient of Iodine in CCl<sub>4</sub> and water
5. Determination of % composition of NaCl in a solution using phenol-water system by CST method
6. Determination of surface tension of given liquids by drop count and drop weight method
7. Determination of HLB number of a surfactant by saponification method
8. Determination of Freundlich and Langmuir constants using activated char coal
9. Determination of critical micellar concentration of surfactants
10. Determination of stability constant and donor acceptor ratio of PABA-Caffeine complex by solubility method
11. Determination of stability constant and donor acceptor ratio of Cupric-Glycine complex by pH titration method

#### **Recommended Books: (Latest Editions)**

1. Physical Pharmacy by Alfred Martin
2. Experimental Pharmaceutics by Eugene, Parott.
3. Tutorial Pharmacy by Cooper and Gunn.
4. Stocklosam J. Pharmaceutical Calculations, Lea &Febiger, Philadelphia.
5. Liberman H.A, Lachman C., Pharmaceutical Dosage forms, Tablets, Volume-1 to 3, MarcelDekkar Inc.
6. Liberman H.A, Lachman C, Pharmaceutical Dosage forms. Disperse systems, volume 1, 2, 3. Marcel Dekkar Inc.
7. Physical Pharmaceutics by Ramasamy C and ManavalanR.
8. Laboratory Manual of Physical Pharmaceutics, C.V.S. Subramanyam, J. Thimma settee
9. Physical Pharmaceutics by C.V.S. Subramanyam
10. Test book of Physical Phramacy, by Gaurav Jain & Roop K. Khar

## **BP 303 T. PHARMACEUTICAL MICROBIOLOGY (Theory)**

**45Hours**

### **Scope:**

- Study of all categories of microorganisms especially for the production of alcohol antibiotics, vaccines, vitamins enzymes etc..

**Objectives:** Upon completion of the subject student shall be able to;

1. Understand methods of identification, cultivation and preservation of various microorganisms
2. To understand the importance and implementation of sterilization in pharmaceutical processing and industry
3. Learn sterility testing of pharmaceutical products.
4. Carried out microbiological standardization of Pharmaceuticals.
5. Understand the cell culture technology and its applications in pharmaceutical industries.

### **Course content:**

#### **Unit I**

**10 Hours**

Introduction, history of microbiology, its branches, scope and its importance.

Introduction to Prokaryotes and Eukaryotes

Study of ultra-structure and morphological classification of bacteria, nutritional requirements, raw materials used for culture media and physical parameters for growth, growth curve, isolation and preservation methods for pure cultures, cultivation of anaerobes, quantitative measurement of bacterial growth (total & viable count).

Study of different types of phase contrast microscopy, dark field microscopy and electron microscopy.

#### **Unit II**

**10 Hours**

Identification of bacteria using staining techniques (simple, Gram's & Acid fast staining) and biochemical tests (IMViC).

Study of principle, procedure, merits, demerits and applications of physical, chemical gaseous, radiation and mechanical method of sterilization.

Evaluation of the efficiency of sterilization methods.

Equipments employed in large scale sterilization.

Sterility indicators.

### **Unit III**

**10 Hours**

Study of morphology, classification, reproduction/replication and cultivation of Fungi and Viruses.

Classification and mode of action of disinfectants

Factors influencing disinfection, antiseptics and their evaluation. For bacteriostatic and bactericidal actions

Evaluation of bactericidal & Bacteriostatic.

Sterility testing of products (solids, liquids, ophthalmic and other sterile products) according to IP, BP and USP.

### **Unit IV**

**08 Hours**

Designing of aseptic area, laminar flow equipments; study of different sources of contamination in an aseptic area and methods of prevention, clean area classification.

Principles and methods of different microbiological assay. Methods for standardization of antibiotics, vitamins and amino acids.

Assessment of a new antibiotic.

### **Unit V**

**07Hours**

Types of spoilage, factors affecting the microbial spoilage of pharmaceutical products, sources and types of microbial contaminants, assessment of microbial contamination and spoilage.

Preservation of pharmaceutical products using antimicrobial agents, evaluation of microbial stability of formulations.

Growth of animal cells in culture, general procedure for cell culture, Primary, established and transformed cell cultures.

Application of cell cultures in pharmaceutical industry and research.

## **BP 307P.PHARMACEUTICAL MICROBIOLOGY (Practical)**

**4 Hrs/week**

1. Introduction and study of different equipments and processing, e.g., B.O.D. incubator, laminar flow, aseptic hood, autoclave, hot air sterilizer, deep freezer, refrigerator, microscopes used in experimental microbiology.
2. Sterilization of glassware, preparation and sterilization of media.
3. Sub culturing of bacteria and fungus. Nutrient stabs and slants preparations.
4. Staining methods- Simple, Grams staining and acid fast staining (Demonstration with practical).
5. Isolation of pure culture of micro-organisms by multiple streak plate technique and other techniques.
6. Microbiological assay of antibiotics by cup plate method and other methods
7. Motility determination by Hanging drop method.
8. Sterility testing of pharmaceuticals.
9. Bacteriological analysis of water
10. Biochemical test.

### **Recommended Books (Latest edition)**

1. W.B. Hugo and A.D. Russel: Pharmaceutical Microbiology, Blackwell Scientific publications, Oxford London.
2. Prescott and Dunn., Industrial Microbiology, 4<sup>th</sup> edition, CBS Publishers & Distributors, Delhi.
3. Pelczar, Chan Kreig, Microbiology, Tata McGraw Hill edn.

5. Rose: Industrial Microbiology.
6. Probisher, Hinsdill et al: Fundamentals of Microbiology, 9th ed. Japan
7. Cooper and Gunn's: Tutorial Pharmacy, CBS Publisher and Distribution.
8. Pepler: Microbial Technology.
9. I.P., B.P., U.S.P.- latest editions.
10. Ananthnarayan : Text Book of Microbiology, Orient-Longman, Chennai
11. Edward: Fundamentals of Microbiology.
12. N.K.Jain: Pharmaceutical Microbiology, Vallabh Prakashan, Delhi
13. Bergeys manual of systematic bacteriology, Williams and Wilkins- A Waverly company

## BP 304 T. PHARMACEUTICAL ENGINEERING (Theory)

45 Hours

**Scope:** This course is designed to impart a fundamental knowledge on the art and science of various unit operations used in pharmaceutical industry.

**Objectives:** Upon completion of the course student shall be able:

1. To know various unit operations used in Pharmaceutical industries.
2. To understand the material handling techniques.
3. To perform various processes involved in pharmaceutical manufacturing process.
4. To carry out various test to prevent environmental pollution.
5. To appreciate and comprehend significance of plant lay out design for optimum use of resources.
6. To appreciate the various preventive methods used for corrosion control in Pharmaceutical industries.

### Course content:

#### UNIT-I

10 Hours

- **Flow of fluids:** Types of manometers, Reynolds number and its significance, Bernoulli's theorem and its applications, Energy losses, Orifice meter, Venturimeter, Pitot tube and Rotometer.
- **Size Reduction:** Objectives, Mechanisms & Laws governing size reduction, factors affecting size reduction, principles, construction, working, uses, merits and demerits of Hammer mill, ball mill, fluid energy mill, Edge runner mill & end runner mill.
- **Size Separation:** Objectives, applications & mechanism of size separation, official standards of powders, sieves, size separation Principles, construction, working, uses, merits and demerits of Sieve shaker, cyclone separator, Air separator, Bag filter & elutriation tank.

#### UNIT-II

10 Hours

- **Heat Transfer:** Objectives, applications & Heat transfer mechanisms. Fourier's law, Heat transfer by conduction, convection & radiation. Heat interchangers & heat exchangers.

- **Evaporation:** Objectives, applications and factors influencing evaporation, differences between evaporation and other heat process. principles, construction, working, uses, merits and demerits of Steam jacketed kettle, horizontal tube evaporator, climbing film evaporator, forced circulation evaporator, multiple effect evaporator & Economy of multiple effect evaporator.
- **Distillation:** Basic Principles and methodology of simple distillation, flash distillation, fractional distillation, distillation under reduced pressure, steam distillation & molecular distillation

### UNIT- III

**08 Hours**

- **Drying:** Objectives, applications & mechanism of drying process, measurements & applications of Equilibrium Moisture content, rate of drying curve. principles, construction, working, uses, merits and demerits of Tray dryer, drum dryer spray dryer, fluidized bed dryer, vacuum dryer, freeze dryer.
- **Mixing:** Objectives, applications & factors affecting mixing, Difference between solid and liquid mixing, mechanism of solid mixing, liquids mixing and semisolids mixing. Principles, Construction, Working, uses, Merits and Demerits of Double cone blender, twin shell blender, ribbon blender, Sigma blade mixer, planetary mixers, Propellers, Turbines, Paddles & Silverson Emulsifier,

### UNIT-IV

**08 Hours**

- **Filtration:** Objectives, applications, Theories & Factors influencing filtration, filter aids, filter medias. Principle, Construction, Working, Uses, Merits and demerits of plate & frame filter, filter leaf, rotary drum filter, Meta filter & Cartridge filter, membrane filters and Seidtz filter.
- **Centrifugation:** Objectives, principle & applications of Centrifugation, principles, construction, working, uses, merits and demerits of Perforated basket centrifuge, Non-perforated basket centrifuge, semi continuous centrifuge & super centrifuge.

### UNIT- V

**07 Hours**

- **Materials of pharmaceutical plant construction, Corrosion and its prevention:** Factors affecting during materials selected for Pharmaceutical plant construction, Theories of corrosion, types of corrosion and there prevention. Ferrous and nonferrous metals, inorganic and organic non metals, basic of material handling systems.

**Recommended Books: (Latest Editions)**

1. Introduction to chemical engineering – Walter L Badger & Julius Banchemo, Latest edition.
2. Solid phase extraction, Principles, techniques and applications by Nigel J.K. Simpson- Latest edition.
3. Unit operation of chemical engineering – McCabe Smith, Latest edition.
4. Pharmaceutical engineering principles and practices – C.V.S Subrahmanyam et al., Latest edition.
5. Remington practice of pharmacy- Martin, Latest edition.
6. Theory and practice of industrial pharmacy by Lachmann., Latest edition.
7. Physical pharmaceuticals- C.V.S Subrahmanyam et al., Latest edition.
8. Cooper and Gunn's Tutorial pharmacy, S.J. Carter, Latest edition.

## **BP308P - PHARMACEUTICAL ENGINEERING (Practical)**

**4 Hours/week**

- I. Determination of radiation constant of brass, iron, unpainted and painted glass.
- II. Steam distillation – To calculate the efficiency of steam distillation.
- III. To determine the overall heat transfer coefficient by heat exchanger.
- IV. Construction of drying curves (for calcium carbonate and starch).
- V. Determination of moisture content and loss on drying.
- VI. Determination of humidity of air – i) From wet and dry bulb temperatures –use of Dew point method.
- VII. Description of Construction working and application of Pharmaceutical Machinery such as rotary tablet machine, fluidized bed coater, fluid energy mill, de humidifier.
- VIII. Size analysis by sieving – To evaluate size distribution of tablet granulations – Construction of various size frequency curves including arithmetic and logarithmic probability plots.
- IX. Size reduction: To verify the laws of size reduction using ball mill and determining Kicks, Rittinger's, Bond's coefficients, power requirement and critical speed of Ball Mill.
- X. Demonstration of colloid mill, planetary mixer, fluidized bed dryer, freeze dryer and such other major equipment.
- XI. Factors affecting Rate of Filtration and Evaporation (Surface area, Concentration and Thickness/ viscosity
- XII. To study the effect of time on the Rate of Crystallization.
- XIII. To calculate the uniformity Index for given sample by using Double Cone Blender.

## **SEMESTER IV**

## **BP401T. PHARMACEUTICAL ORGANIC CHEMISTRY –III (Theory)**

**45 Hours**

**Scope:** This subject imparts knowledge on stereo-chemical aspects of organic compounds and organic reactions, important named reactions, chemistry of important hetero cyclic compounds. It also emphasizes on medicinal and other uses of organic compounds.

**Objectives:** At the end of the course, the student shall be able to

1. understand the methods of preparation and properties of organic compounds
2. explain the stereo chemical aspects of organic compounds and stereo chemical reactions
3. know the medicinal uses and other applications of organic compounds

### **Course Content:**

**Note: To emphasize on definition, types, mechanisms, examples, uses/applications**

#### **UNIT-I**

**10 Hours**

##### **Stereo isomerism**

Optical isomerism –

Optical activity, enantiomerism, diastereoisomerism, meso compounds

Elements of symmetry, chiral and a chiral molecules

DL system of nomenclature of optical isomers, sequence rules, RS system of nomenclature of optical isomers

Reactions of chiral molecules

Racemic modification and resolution of racemic mixture.

Asymmetric synthesis: partial and absolute

#### **UNIT-II**

**10 Hours**

Geometrical isomerism

Nomenclature of geometrical isomers (Cis Trans, EZ, Syn Anti systems)

Methods of determination of configuration of geometrical isomers.

Conformational isomerism in Ethane, n-Butane and Cyclohexane.

Stereo isomerism in biphenyl compounds (Atropisomerism) and conditions for optical activity.

Stereospecific and stereoselective reactions

#### **UNIT-III**

**10 Hours**

**Heterocyclic compounds:**

Nomenclature and classification

Synthesis, reactions and medicinal uses of following compounds/derivatives

Pyrrole, Furan, and Thiophene

Relative aromaticity and reactivity of Pyrrole, Furan and Thiophene

**UNIT-IV****8 Hours**

Synthesis, reactions and medicinal uses of following compounds/derivatives

Pyrazole, Imidazole, Oxazole and Thiazole.

Pyridine, Quinoline, Isoquinoline, Acridine and Indole. Basicity of pyridine

Synthesis and medicinal uses of Pyrimidine, Purine, azepines and their derivatives

**UNIT-V****07 Hours****Reactions of synthetic importance**

Metal hydride reduction ( $\text{NaBH}_4$  and  $\text{LiAlH}_4$ ), Clemmensen reduction, Birch reduction, Wolff Kishner reduction.

Oppenauer-oxidation and Dakin reaction.

Beckmanns rearrangement and Schmidt rearrangement.

Claisen-Schmidt condensatio

**Recommended Books (Latest Editions)**

1. Organic chemistry by I.L. Finar, Volume-I & II.
2. A text book of organic chemistry – Arun Bahl, B.S. Bahl.
3. Heterocyclic Chemistry by Raj K. Bansal
4. Organic Chemistry by Morrison and Boyd
5. Heterocyclic Chemistry by T.L. Gilchrist

## BP402T. MEDICINAL CHEMISTRY – I (Theory)

**45 Hours**

**Scope:** This subject is designed to impart fundamental knowledge on the structure, chemistry and therapeutic value of drugs. The subject emphasizes on structure activity relationships of drugs, importance of physicochemical properties and metabolism of drugs. The syllabus also emphasizes on chemical synthesis of important drugs under each class.

**Objectives:** Upon completion of the course the student shall be able to

1. understand the chemistry of drugs with respect to their pharmacological activity
2. understand the drug metabolic pathways, adverse effect and therapeutic value of drugs
3. know the Structural Activity Relationship (SAR) of different class of drugs
4. write the chemical synthesis of some drugs

### Course Content:

**Study of the development of the following classes of drugs, Classification, mechanism of action, uses of drugs mentioned in the course, Structure activity relationship of selective class of drugs as specified in the course and synthesis of drugs superscripted (\*)**

#### UNIT- I

**10 Hours**

##### **Introduction to Medicinal Chemistry**

##### **History and development of medicinal chemistry**

##### **Physicochemical properties in relation to biological action**

Ionization, Solubility, Partition Coefficient, Hydrogen bonding, Protein binding, Chelation, Bioisosterism, Optical and Geometrical isomerism.

##### **Drug metabolism**

Drug metabolism principles- Phase I and Phase II.

Factors affecting drug metabolism including stereo chemical aspects.

#### UNIT- II

**10 Hours**

##### **Drugs acting on Autonomic Nervous System**

##### **Adrenergic Neurotransmitters:**

Biosynthesis and catabolism of catecholamine.

Adrenergic receptors (Alpha & Beta) and their distribution.

##### **Sympathomimetic agents: SAR of Sympathomimetic agents**

Direct acting: Nor-epinephrine, Epinephrine, Phenylephrine\*, Dopamine,

Methyldopa, Clonidine, Dobutamine, Isoproterenol, Terbutaline, Salbutamol\*, Bitolterol, Naphazoline, Oxymetazoline and Xylometazoline.

- Indirect acting agents: Hydroxyamphetamine, Pseudoephedrine, Propylhexedrine.
- Agents with mixed mechanism: Ephedrine, Metaraminol.

#### **Adrenergic Antagonists:**

**Alpha adrenergic blockers:** Tolazoline\*, Phentolamine, Phenoxybenzamine, Prazosin, Dihydroergotamine, Methysergide.

**Beta adrenergic blockers:** SAR of beta blockers, Propranolol\*, Metibranolol, Atenolol, Betazolol, Bisoprolol, Esmolol, Metoprolol, Labetolol, Carvedilol.

### **UNIT-III**

**10 Hours**

#### **Cholinergic neurotransmitters:**

Biosynthesis and catabolism of acetylcholine.

Cholinergic receptors (Muscarinic & Nicotinic) and their distribution.

#### **Parasympathomimetic agents: SAR of Parasympathomimetic agents**

**Direct acting agents:** Acetylcholine, Carbachol\*, Bethanechol, Methacholine, Pilocarpine.

**Indirect acting/ Cholinesterase inhibitors (Reversible & Irreversible):** Physostigmine, Neostigmine\*, Pyridostigmine, Edrophonium chloride, Tacrine hydrochloride, Ambenonium chloride, Isofluorophate, Echothiophate iodide, Parathione, Malathion.

**Cholinesterase reactivator:** Pralidoxime chloride.

#### **Cholinergic Blocking agents: SAR of cholinolytic agents**

**Solanaceous alkaloids and analogues:** Atropine sulphate, Hyoscyamine sulphate, Scopolamine hydrobromide, Homatropine hydrobromide, Ipratropium bromide\*.

**Synthetic cholinergic blocking agents:** Tropicamide, Cyclopentolate hydrochloride, Clidinium bromide, Dicyclomine hydrochloride\*, Glycopyrrolate, Methantheline bromide, Propantheline bromide, Benztropine mesylate, Orphenadrine citrate, Biperidine hydrochloride, Procyclidine hydrochloride\*, Tridihexethyl chloride, Isopropamide iodide, Ethopropazine hydrochloride.

### **UNIT- IV**

**08 Hours**

#### **Drugs acting on Central Nervous System**

### **A. Sedatives and Hypnotics:**

**Benzodiazepines:** SAR of Benzodiazepines, Chlordiazepoxide, Diazepam\*, Oxazepam, Chlorazepate, Lorazepam, Alprazolam, Zolpidem

**Barbiturates:** SAR of barbiturates, Barbitol\*, Phenobarbital, Mephobarbital, Amobarbital, Butobarbital, Pentobarbital, Secobarbital

#### **Miscellaneous:**

Amides & imides: Glutethimide.

Alcohol & their carbamate derivatives: Meprobamate, Ethchlorvynol.

Aldehyde & their derivatives: Triclofos sodium, Paraldehyde.

### **B. Antipsychotics**

**Phenothiazines:** SAR of Phenothiazines - Promazine hydrochloride, Chlorpromazine hydrochloride\*, Triflupromazine, Thioridazine hydrochloride, Piperacetazine hydrochloride, Prochlorperazine maleate, Trifluoperazine hydrochloride.

**Ring Analogues of Phenothiazines:** Chlorprothixene, Thiothixene, Loxapine succinate, Clozapine.

**Fluro buterophenones:** Haloperidol, Droperidol, Risperidone.

**Beta amino ketones:** Molindone hydrochloride.

**Benzamides:** Sulpieride.

**C. Anticonvulsants:** SAR of Anticonvulsants, mechanism of anticonvulsant action

**Barbiturates:** Phenobarbitone, Methobarbital. **Hydantoins:**

Phenytoin\*, Mephénytoin, Ethotoin **Oxazolindione diones:**

Trimethadione, Paramethadione **Succinimides:**

Phensuximide, Methsuximide, Ethosuximide\* **Urea and**

**monoacylureas:** Phenacemide, Carbamazepine\*

**Benzodiazepines:** Clonazepam

**Miscellaneous:** Primidone, Valproic acid, Gabapentin, Felbamate

**UNIT – V**

**07 Hours**

**Drugs acting on Central Nervous System**

**General anesthetics:**

**Inhalation anesthetics:** Halothane\*, Methoxyflurane, Enflurane, Sevoflurane, Isoflurane, Desflurane.

**Ultra short acting barbiturates:** Methohexital sodium\*, Thiopental sodium, Thiopental sodium.

**Dissociative anesthetics:** Ketamine hydrochloride.\*

**Narcotic and non-narcotic analgesics**

**Morphine and related drugs:** SAR of Morphine analogues, Morphine sulphate, Codeine, Meperidine hydrochloride, Anileridine hydrochloride, Diphenoxylate hydrochloride, Loperamide hydrochloride, Fentanyl citrate\*, Methadone hydrochloride\*, Propoxyphene hydrochloride, Pentazocine, Levorphanol tartarate.

**Narcotic antagonists:** Nalorphine hydrochloride, Levallorphan tartarate, Naloxone hydrochloride.

**Anti-inflammatory agents:** Sodium salicylate, Aspirin, Mefenamic acid\*, Meclofenamate, Indomethacin, Sulindac, Tolmetin, Zomepirac, Diclofenac, Ketorolac, Ibuprofen\*, Naproxen, Piroxicam, Phenacetin, Acetaminophen, Antipyrine, Phenylbutazone.

## **BP406P. MEDICINAL CHEMISTRY – I (Practical)**

**4 Hours/Week**

### **I Preparation of drugs/ intermediates**

- 1 1,3-pyrazole
- 2 1,3-oxazole
- 3 Benzimidazole
- 4 Benztriazole
- 5 2,3- diphenyl quinoxaline
- 6 Benzocaine
- 7 Phenytoin
- 8 Phenothiazine
- 9 Barbiturate

### **II Assay of drugs**

- 1 Chlorpromazine
- 2 Phenobarbitone
- 3 Atropine
- 4 Ibuprofen
- 5 Aspirin
- 6 Furosemide

### **III Determination of Partition coefficient for any two drugs**

#### **Recommended Books (Latest Editions)**

1. Wilson and Giswold's Organic medicinal and Pharmaceutical Chemistry.
2. Foye's Principles of Medicinal Chemistry.
3. Burger's Medicinal Chemistry, Vol I to IV.
4. Introduction to principles of drug design- Smith and Williams.
5. Remington's Pharmaceutical Sciences.
6. Martindale's extra pharmacopoeia.

7. Organic Chemistry by I.L. Finar, Vol. II.
8. The Organic Chemistry of Drug Synthesis by Lednicer, Vol. 1-5.
9. Indian Pharmacopoeia.
10. Text book of practical organic chemistry- A.I.Vogel.

## **BP 403 T. PHYSICAL PHARMACEUTICS-II (Theory)**

**45Hours**

**Scope:** The course deals with the various physical and physicochemical properties, and principles involved in dosage forms/formulations. Theory and practical components of the subject help the student to get a better insight into various areas of formulation research and development, and stability studies of pharmaceutical dosage forms.

**Objectives:** Upon the completion of the course student shall be able to

1. Understand various physicochemical properties of drug molecules in the designing the dosage forms
2. Know the principles of chemical kinetics & to use them for stability testing and determination of expiry date of formulations
3. Demonstrate use of physicochemical properties in the formulation development and evaluation of dosage forms.

### **Course Content:**

#### **UNIT-I**

**07 Hours**

**Colloidal dispersions:** Classification of dispersed systems & their general characteristics, size & shapes of colloidal particles, classification of colloids & comparative account of their general properties. Optical, kinetic & electrical properties. Effect of electrolytes, coacervation, peptization & protective action.

#### **UNIT-II**

**10 Hours**

**Rheology:** Newtonian systems, law of flow, kinematic viscosity, effect of temperature, non-Newtonian systems, pseudoplastic, dilatant, plastic, thixotropy, thixotropy in formulation, determination of viscosity, capillary, falling Sphere, rotational viscometers

**Deformation of solids:** Plastic and elastic deformation, Heckel equation, Stress, Strain, Elastic Modulus

#### **UNIT-III**

**10 Hours**

**Coarse dispersion:** Suspension, interfacial properties of suspended particles, settling in suspensions, formulation of flocculated and deflocculated suspensions. Emulsions and theories of emulsification, microemulsion and multiple emulsions; Stability of emulsions, preservation of emulsions, rheological properties of emulsions and emulsion formulation by HLB method.

#### **UNIT-IV**

**10Hours**

**Micromeretics:** Particle size and distribution, mean particle size, number and weight distribution, particle number, methods for determining particle size by different methods, counting and separation method, particle shape, specific surface, methods for determining surface area, permeability, adsorption, derived properties of powders, porosity, packing arrangement, densities, bulkiness & flow properties.

#### **UNIT-V**

**10 Hours**

**Drug stability:** Reaction kinetics: zero, pseudo-zero, first & second order, units of basic rate constants, determination of reaction order. Physical and chemical factors influencing the chemical degradation of pharmaceutical product: temperature, solvent, ionic strength, dielectric constant, specific & general acid base catalysis, Simple numerical problems. Stabilization of medicinal agents against common reactions like hydrolysis & oxidation. Accelerated stability testing in expiration dating of pharmaceutical dosage forms. Photolytic degradation and its prevention

## **BP 407P. PHYSICAL PHARMACEUTICS- II (Practical)**

**3 Hrs/week**

1. Determination of particle size, particle size distribution using sieving method
2. Determination of particle size, particle size distribution using Microscopic method
3. Determination of bulk density, true density and porosity
4. Determine the angle of repose and influence of lubricant on angle of repose
5. Determination of viscosity of liquid using Ostwald's viscometer
6. Determination sedimentation volume with effect of different suspending agent
7. Determination sedimentation volume with effect of different concentration of single suspending agent
8. Determination of viscosity of semisolid by using Brookfield viscometer
9. Determination of reaction rate constant first order.
10. Determination of reaction rate constant second order
11. Accelerated stability studies

### **Recommended Books: (Latest Editions)**

1. Physical Pharmacy by Alfred Martin, Sixth edition
2. Experimental pharmaceuticals by Eugene, Parott.
3. Tutorial pharmacy by Cooper and Gunn.
4. Stocklosam J. Pharmaceutical calculations, Lea & Febiger, Philadelphia.
5. Liberman H.A, Lachman C., Pharmaceutical Dosage forms, Tablets, Volume-1 to 3, Marcel Dekkar Inc.
6. Liberman H.A, Lachman C, Pharmaceutical dosage forms. Disperse systems, volume 1, 2, 3. Marcel Dekkar Inc.
7. Physical Pharmaceutics by Ramasamy C, and Manavalan R.

## **BP 404 T. PHARMACOLOGY-I (Theory)**

**45 Hrs**

**Scope:** The main purpose of the subject is to understand what drugs do to the living organisms and how their effects can be applied to therapeutics. The subject covers the information about the drugs like, mechanism of action, physiological and biochemical effects (pharmacodynamics) as well as absorption, distribution, metabolism and excretion (pharmacokinetics) along with the adverse effects, clinical uses, interactions, doses, contraindications and routes of administration of different classes of drugs.

**Objectives:** Upon completion of this course the student should be able to

1. Understand the pharmacological actions of different categories of drugs
2. Explain the mechanism of drug action at organ system/sub cellular/ macromolecular levels.
3. Apply the basic pharmacological knowledge in the prevention and treatment of various diseases.
4. Observe the effect of drugs on animals by simulated experiments
5. Appreciate correlation of pharmacology with other bio medical sciences

### **Course Content:**

#### **UNIT-I**

**08 hours**

##### **1. General Pharmacology**

- a. Introduction to Pharmacology- Definition, historical landmarks and scope of pharmacology, nature and source of drugs, essential drugs concept and routes of drug administration, Agonists, antagonists( competitive and non competitive), spare receptors, addiction, tolerance, dependence, tachyphylaxis, idiosyncrasy, allergy.
- b. Pharmacokinetics- Membrane transport, absorption, distribution, metabolism and excretion of drugs .Enzyme induction, enzyme inhibition, kinetics of elimination

#### **UNIT-II**

**12 Hours**

##### **General Pharmacology**

- a. Pharmacodynamics- Principles and mechanisms of drug action. Receptor theories and classification of receptors, regulation of receptors. drug receptors interactions signal transduction mechanisms, G-protein–coupled receptors, ion channel receptor, transmembrane enzyme linked receptors, transmembrane JAK-STAT binding receptor and receptors that regulate transcription factors, dose response relationship, therapeutic index, combined effects of drugs and factors modifying drug action.
- b. Adverse drug reactions.
- c. Drug interactions (pharmacokinetic and pharmacodynamic)
- d. Drug discovery and clinical evaluation of new drugs -Drug discovery phase, preclinical evaluation phase, clinical trial phase, phases of clinical trials and pharmacovigilance.

**UNIT-III****10 Hours****2. Pharmacology of drugs acting on peripheral nervous system**

- a. Organization and function of ANS.
- b. Neurohumoral transmission, co-transmission and classification of neurotransmitters.
- c. Parasympathomimetics, Parasympatholytics, Sympathomimetics, sympatholytics.
- d. Neuromuscular blocking agents and skeletal muscle relaxants (peripheral).
- e. Local anesthetic agents.
- f. Drugs used in myasthenia gravis and glaucoma

**UNIT-IV****08 Hours****3. Pharmacology of drugs acting on central nervous system**

- a. Neurohumoral transmission in the C.N.S. special emphasis on importance of various neurotransmitters like with GABA, Glutamate, Glycine, serotonin, dopamine.
- b. General anesthetics and pre-anesthetics.
- c. Sedatives, hypnotics and centrally acting muscle relaxants.
- d. Anti-epileptics
- e. Alcohols and disulfiram

**UNIT-V****07 Hours****3. Pharmacology of drugs acting on central nervous system**

- a. Psychopharmacological agents: Antipsychotics, antidepressants, anti-anxiety agents, anti-manics and hallucinogens.
- b. Drugs used in Parkinsons disease and Alzheimer's disease.
- c. CNS stimulants and nootropics.
- d. Opioid analgesics and antagonists
- e. Drug addiction, drug abuse, tolerance and dependence.

## BP 408 P.PHARMACOLOGY-I (Practical)

4Hrs/Week

1. Introduction to experimental pharmacology.
2. Commonly used instruments in experimental pharmacology.
3. Study of common laboratory animals.
4. Maintenance of laboratory animals as per CPCSEA guidelines.
5. Common laboratory techniques. Blood withdrawal, serum and plasma separation, anesthetics and euthanasia used for animal studies.
6. Study of different routes of drugs administration in mice/rats.
7. Study of effect of hepatic microsomal enzyme inducers on the phenobarbitone sleeping time in mice.
8. Effect of drugs on ciliary motility of frog oesophagus
9. Effect of drugs on rabbit eye.
10. Effects of skeletal muscle relaxants using rota-rod apparatus.
11. Effect of drugs on locomotor activity using actophotometer.
12. Anticonvulsant effect of drugs by MES and PTZ method.
13. Study of stereotype and anti-catatonic activity of drugs on rats/mice.
14. Study of anxiolytic activity of drugs using rats/mice.
15. Study of local anesthetics by different methods

*Note: All laboratory techniques and animal experiments are demonstrated by simulated experiments by softwares and videos*

## **BP 405 T.PHARMACOGNOSY AND PHYTOCHEMISTRY I (Theory)**

**45 Hours**

**Scope:** The subject involves the fundamentals of Pharmacognosy like scope, classification of crude drugs, their identification and evaluation, phytochemicals present in them and their medicinal properties.

**Objectives:** Upon completion of the course, the student shall be able

1. to know the techniques in the cultivation and production of crude drugs
2. to know the crude drugs, their uses and chemical nature
3. know the evaluation techniques for the herbal drugs
4. to carry out the microscopic and morphological evaluation of crude drugs

### **Course Content:**

#### **UNIT-I**

**10 Hours**

##### **Introduction to Pharmacognosy:**

- (a) Definition, history, scope and development of Pharmacognosy
- (b) Sources of Drugs – Plants, Animals, Marine & Tissue culture
- (c) Organized drugs, unorganized drugs (dried latex, dried juices, dried extracts, gums and mucilages, oleoresins and oleo- gum -resins).

##### **Classification of drugs:**

Alphabetical, morphological, taxonomical, chemical, pharmacological, chemo and sero taxonomical classification of drugs

##### **Quality control of Drugs of Natural Origin:**

Adulteration of drugs of natural origin. Evaluation by organoleptic, microscopic, physical, chemical and biological methods and properties.

Quantitative microscopy of crude drugs including lycopodium spore method, leaf constants, camera lucida and diagrams of microscopic objects to scale with camera lucida.

#### **UNIT-II**

**10 Hours**

##### **Cultivation, Collection, Processing and storage of drugs of natural origin:**

Cultivation and Collection of drugs of natural origin  
Factors influencing cultivation of medicinal plants.  
Plant hormones and their applications.  
Polyploidy, mutation and hybridization with reference to medicinal plants

##### **Conservation of medicinal plants**

#### **UNIT-III**

**07 Hours**

##### **Plant tissue culture:**

Historical development of plant tissue culture, types of cultures, Nutritional requirements, growth and their maintenance.

Applications of plant tissue culture in pharmacognosy.

Edible vaccines

**UNIT IV****10 Hours****Pharmacognosy in various systems of medicine:**

Role of Pharmacognosy in allopathy and traditional systems of medicine namely, Ayurveda, Unani, Siddha, Homeopathy and Chinese systems of medicine.

**Introduction to secondary metabolites:**

Definition, classification, properties and test for identification of Alkaloids, Glycosides, Flavonoids, Tannins, Volatile oil and Resins

**UNIT V****08 Hours**

Study of biological source, chemical nature and uses of drugs of natural origin containing following drugs

**Plant Products:**

Fibers - Cotton, Jute, Hemp

Hallucinogens, Teratogens, Natural allergens

**Primary metabolites:**

General introduction, detailed study with respect to chemistry, sources, preparation, evaluation, preservation, storage, therapeutic used and commercial utility as Pharmaceutical Aids and/or Medicines for the following Primary metabolites:

**Carbohydrates:** Acacia, Agar, Tragacanth, Honey

**Proteins and Enzymes :** Gelatin, casein, proteolytic enzymes (Papain, bromelain, serratiopeptidase, urokinase, streptokinase, pepsin).

**Lipids(Waxes, fats, fixed oils) :** Castor oil, Chaulmoogra oil, Wool Fat, Bees Wax

**Marine Drugs:**

Novel medicinal agents from marine sources

**BP408 P. PHARMACOGNOSY AND PHYTOCHEMISTRY I (Practical)**

**4 Hours/Week**

1. Analysis of crude drugs by chemical tests: (i)Tragacanth (ii) Acacia (iii)Agar (iv) Gelatin (v) starch (vi) Honey (vii) Castor oil
2. Determination of stomatal number and index
3. Determination of vein islet number, vein islet termination and palisade ratio.
4. Determination of size of starch grains, calcium oxalate crystals by eye piece micrometer
5. Determination of Fiber length and width
6. Determination of number of starch grains by Lycopodium spore method
7. Determination of Ash value
8. Determination of Extractive values of crude drugs
9. Determination of moisture content of crude drugs
10. Determination of swelling index and foaming

**Recommended Books: (Latest Editions)**

1. W.C.Evans, Trease and Evans Pharmacognosy, 16<sup>th</sup> edition, W.B. Saunders & Co., London, 2009.
2. Tyler, V.E., Brady, L.R. and Robbers, J.E., Pharmacognosy, 9<sup>th</sup> Edn., Lea and Febiger, Philadelphia, 1988.

4. Mohammad Ali. Pharmacognosy and Phytochemistry, CBS Publishers & Distribution, New Delhi.
5. Text book of Pharmacognosy by C.K. Kokate, Purohit, Gokhlae (2007), 37<sup>th</sup> Edition, Nirali Prakashan, New Delhi.
6. Herbal drug industry by R.D. Choudhary (1996), 1<sup>st</sup> Edn, Eastern Publisher, New Delhi.
7. Essentials of Pharmacognosy, Dr.SH.Ansari, IInd edition, Birla publications, New Delhi, 2007
8. Practical Pharmacognosy: C.K. Kokate, Purohit, Gokhlae
9. Anatomy of Crude Drugs by M.A. Iyengar

**SEMESTER V**

## BP501T. MEDICINAL CHEMISTRY – II (Theory)

45 Hours

**Scope:** This subject is designed to impart fundamental knowledge on the structure, chemistry and therapeutic value of drugs. The subject emphasizes on structure activity relationships of drugs, importance of physicochemical properties and metabolism of drugs. The syllabus also emphasizes on chemical synthesis of important drugs under each class.

**Objectives:** Upon completion of the course the student shall be able to

1. Understand the chemistry of drugs with respect to their pharmacological activity
2. Understand the drug metabolic pathways, adverse effect and therapeutic value of drugs
3. Know the Structural Activity Relationship of different class of drugs
4. Study the chemical synthesis of selected drugs

### Course Content:

**Study of the development of the following classes of drugs, Classification, mechanism of action, uses of drugs mentioned in the course, Structure activity relationship of selective class of drugs as specified in the course and synthesis of drugs superscripted (\*)**

#### UNIT- I

10 Hours

**Antihistaminic agents:** Histamine, receptors and their distribution in the humanbody

**H<sub>1</sub>-antagonists:** Diphenhydramine hydrochloride\*, Dimenhydrinate, Doxylamines succinate, Clemastine fumarate, Diphenylpyraline hydrochloride, Tripelenamine hydrochloride, Chlorcyclizine hydrochloride, Meclizine hydrochloride, Buclizine hydrochloride, Chlorpheniramine maleate, Triprolidine hydrochloride\*, Phenidamine tartarate, Promethazine hydrochloride\*, Trimeprazine tartrate, Cyproheptadine hydrochloride, Azatidine maleate, Astemizole, Loratadine, Cetirizine, Levocetrazine Cromolyn sodium

**H<sub>2</sub>-antagonists:** Cimetidine\*, Famotidine, Ranitidin.

**Gastric Proton pump inhibitors:** Omeprazole, Lansoprazole, Rabeprazole, Pantoprazole

**Anti-neoplastic agents:**

**Alkylating agents:** Meclorothamine\*, Cyclophosphamide, Melphalan,

Chlorambucil, Busulfan, Thiotepa

**Antimetabolites:** Mercaptopurine\*, Thioguanine, Fluorouracil, Floxuridine, Cytarabine, Methotrexate\*, Azathioprine

**Antibiotics:** Dactinomycin, Daunorubicin, Doxorubicin, Bleomycin

**Plant products:** Etoposide, Vinblastin sulphate, Vincristin sulphate

**Miscellaneous:** Cisplatin, Mitotane.

## UNIT – II

**10 Hours**

### **Anti-anginal:**

**Vasodilators:** Amyl nitrite, Nitroglycerin\*, Pentaerythritol tetranitrate, Isosorbide dinitrite\*, Dipyridamole.

**Calcium channel blockers:** Verapamil, Bepridil hydrochloride, Diltiazem hydrochloride, Nifedipine, Amlodipine, Felodipine, Nicardipine, Nimodipine.

### **Diuretics:**

Carbonic anhydrase inhibitors: Acetazolamide\*, Methazolamide, Dichlorphenamide.

Thiazides: Chlorthiazide\*, Hydrochlorothiazide, Hydroflumethiazide, Cyclothiazide,

Loop diuretics: Furosemide\*, Bumetanide, Ethacrynic acid.

Potassium sparing Diuretics: Spironolactone, Triamterene, Amiloride.

Osmotic Diuretics: Mannitol

**Anti-hypertensive Agents:** Timolol, Captopril, Lisinopril, Enalapril, Benazepril hydrochloride, Quinapril hydrochloride, Methyldopate hydrochloride,\* Clonidine hydrochloride, Guanethidine monosulphate, Guanabenz acetate, Sodium nitroprusside, Diazoxide, Minoxidil, Reserpine, Hydralazine hydrochloride.

## UNIT- III

**10 Hours**

**Anti-arrhythmic Drugs:** Quinidine sulphate, Procainamide hydrochloride, Disopyramide phosphate\*, Phenytoin sodium, Lidocaine hydrochloride, Tocainide hydrochloride, Mexiletine hydrochloride, Lorcaïnide hydrochloride, Amiodarone, Sotalol.

**Anti-hyperlipidemic agents:** Clofibrate, Lovastatin, Cholesteramine and Cholestipol

**Coagulant & Anticoagulants:** Menadione, Acetomenadione, Warfarin\*, Anisindione, clopidogrel

**Drugs used in Congestive Heart Failure:** Digoxin, Digitoxin, Nesiritide, Bosentan, Tezosentan.

**UNIT- IV****08 Hours****Drugs acting on Endocrine system**

Nomenclature, Stereochemistry and metabolism of steroids

**Sex hormones:** Testosterone, Nandralone, Progesterones, Oestriol, Oestradiol, Oestrione, Diethyl stilbestrol.

**Drugs for erectile dysfunction:** Sildenafil, Tadalafil.

**Oral contraceptives:** Mifepristone, Norgestril, Levonorgestrol

**Corticosteroids:** Cortisone, Hydrocortisone, Prednisolone, Betamethasone, Dexamethasone

**Thyroid and antithyroid drugs:** L-Thyroxine, L-Thyronine, Propylthiouracil, Methimazole.

**UNIT – V****07 Hours****Antidiabetic agents:**

Insulin and its preparations

Sulfonyl ureas: Tolbutamide\*, Chlorpropamide, Glipizide, Glimepiride.

Biguanides: Metformin.

Thiazolidinediones: Pioglitazone, Rosiglitazone.

Meglitinides: Repaglinide, Nateglinide.

Glucosidase inhibitors: Acarbose, Voglibose.

**Local Anesthetics:** SAR of Local anesthetics

**Benzoic Acid derivatives;** Cocaine, Hexylcaine, Meprylcaine, Cyclomethycaine, Piperocaine.

**Amino Benzoic acid derivatives:** Benzocaine\*, Butamben, Procaine\*, Butacaine, Propoxycaine, Tetracaine, Benoxinate.

**Lidocaine/Anilide derivatives:** Lignocaine, Mepivacaine, Prilocaine, Etidocaine.

**Miscellaneous:** Phenacaine, Dipiperodon, Dibucaine.\*

**Recommended Books (Latest Editions)**

1. Wilson and Giswold's Organic medicinal and Pharmaceutical Chemistry.
2. Foye's Principles of Medicinal Chemistry.
3. Burger's Medicinal Chemistry, Vol I to IV.
4. Introduction to principles of drug design- Smith and Williams.
5. Remington's Pharmaceutical Sciences.
6. Martindale's extra pharmacopoeia.
7. Organic Chemistry by I.L. Finar, Vol. II.
8. The Organic Chemistry of Drug Synthesis by Lednicer, Vol. 1 to 5.
9. Indian Pharmacopoeia.
10. Text book of practical organic chemistry- A.I.Vogel.

## BP 502 T. Industrial PharmacyI (Theory)

**45 Hours**

**Scope:** Course enables the student to understand and appreciate the influence of pharmaceutical additives and various pharmaceutical dosage forms on the performance of the drug product.

**Objectives:** Upon completion of the course the student shall be able to

1. Know the various pharmaceutical dosage forms and their manufacturing techniques.
2. Know various considerations in development of pharmaceutical dosage forms
3. Formulate solid, liquid and semisolid dosage forms and evaluate them for their quality

### Course content:

**3 hours/ week**

#### UNIT-I

**07 Hours**

**Preformulation Studies:** Introduction to preformulation, goals and objectives, study of physicochemical characteristics of drug substances.

*a. Physical properties:* Physical form (crystal & amorphous), particle size, shape, flow properties, solubility profile (pKa, pH, partition coefficient), polymorphism

*b. Chemical Properties:* Hydrolysis, oxidation, reduction, racemisation, polymerization

BCS classification of drugs & its significant

Application of preformulation considerations in the development of solid, liquid oral and parenteral dosage forms and its impact on stability of dosage forms.

#### UNIT-II

**10 Hours**

##### Tablets:

- a. Introduction, ideal characteristics of tablets, classification of tablets. Excipients, Formulation of tablets, granulation methods, compression and processing problems. Equipments and tablet tooling.
- b. Tablet coating: Types of coating, coating materials, formulation of coating composition, methods of coating, equipment employed and defects in coating.
- c. Quality control tests: In process and finished product tests

**Liquid orals:** Formulation and manufacturing consideration of syrups and elixirs suspensions and emulsions; Filling and packaging; evaluation of liquid orals official in pharmacopoeia

### UNIT-III

08 Hours

#### Capsules:

- a. **Hard gelatin capsules:** Introduction, Production of hard gelatin capsule shells. size of capsules, Filling, finishing and special techniques of formulation of hard gelatin capsules, manufacturing defects. In process and final product quality control tests for capsules.
- b. **Soft gelatin capsules:** Nature of shell and capsule content, size of capsules, importance of base adsorption and minim/gram factors, production, in process and final product quality control tests. Packing, storage and stability testing of soft gelatin capsules and their applications.

**Pellets:** Introduction, formulation requirements, pelletization process, equipments for manufacture of pellets

### UNIT-IV

10 Hours

#### Parenteral Products:

- a. Definition, types, advantages and limitations. Preformulation factors and essential requirements, vehicles, additives, importance of isotonicity
- b. Production procedure, production facilities and controls, aseptic processing
- c. Formulation of injections, sterile powders, large volume parenterals and lyophilized products.
- d. Containers and closures selection, filling and sealing of ampoules, vials and infusion fluids. Quality control tests of parenteral products.

**Ophthalmic Preparations:** Introduction, formulation considerations; formulation of eye drops, eye ointments and eye lotions; methods of preparation; labeling, containers; evaluation of ophthalmic preparations

### UNIT-V

10 Hours

**Cosmetics:** Formulation and preparation of the following cosmetic preparations: lipsticks, shampoos, cold cream and vanishing cream, tooth pastes, hair dyes and sunscreens.

**Pharmaceutical Aerosols:** Definition, propellants, containers, valves, types of aerosol systems; formulation and manufacture of aerosols; Evaluation of aerosols; Quality control and stability studies.

**Packaging Materials Science:** Materials used for packaging of pharmaceutical products, factors influencing choice of containers, legal and official requirements for containers, stability aspects of packaging materials, quality control tests.

## **BP 506 P. Industrial PharmacyI (Practical)**

**4 Hours/week**

1. Preformulation studies on paracetamol/asparin/or any other drug
2. Preparation and evaluation of Paracetamol tablets
3. Preparation and evaluation of Aspirin tablets
4. Coating of tablets- film coating of tables/granules
5. Preparation and evaluation of Tetracycline capsules
6. Preparation of Calcium Gluconate injection
7. Preparation of Ascorbic Acid injection
8. Qulaity control test of (as per IP) marketed tablets and capsules
9. Preparation of Eye drops/ and Eye ointments
10. Preparation of Creams (cold / vanishing cream)
11. Evaluation of Glass containers (as per IP)

### **Recommended Books: (Latest Editions)**

1. Pharmaceutical dosage forms - Tablets, volume 1 -3 by H.A. Liberman, Leon Lachman &J.B.Schwartz
2. Pharmaceutical dosage form - Parenteral medication vol- 1&2 by Liberman & Lachman
3. Pharmaceutical dosage form disperse system VOL-1 by Liberman & Lachman
4. Modern Pharmaceutics by Gilbert S. Banker & C.T. Rhodes, 3rd Edition
5. Remington: The Science and Practice of Pharmacy, 20th edition Pharmaceutical Science (RPS)
6. Theory and Practice of Industrial Pharmacy by Liberman & Lachman
7. Pharmaceutics- The science of dosage form design by M.E.Aulton, Churchill livingstone, Latest edition
8. Introduction to Pharmaceutical Dosage Forms by H. C.Ansel, Lea &Febiger, Philadelphia, 5<sup>th</sup>edition, 2005
9. Drug stability - Principles and practice by Cartensen & C.J. Rhodes, 3rd Edition, Marcel Dekker Series, Vol 107.

## BP503.T. PHARMACOLOGY-II (Theory)

45 Hours

**Scope:** This subject is intended to impart the fundamental knowledge on various aspects (classification, mechanism of action, therapeutic effects, clinical uses, side effects and contraindications) of drugs acting on different systems of body and in addition, emphasis on the basic concepts of bioassay.

**Objectives:** Upon completion of this course the student should be able to

1. Understand the mechanism of drug action and its relevance in the treatment of different diseases
2. Demonstrate isolation of different organs/tissues from the laboratory animals by simulated experiments
3. Demonstrate the various receptor actions using isolated tissue preparation
4. Appreciate correlation of pharmacology with related medical sciences

### Course Content:

#### UNIT-I

10hours

##### 1. Pharmacology of drugs acting on cardio vascular system

- a. Introduction to hemodynamic and electrophysiology of heart.
- b. Drugs used in congestive heart failure
- c. Anti-hypertensive drugs.
- d. Anti-anginal drugs.
- e. Anti-arrhythmic drugs.
- f. Anti-hyperlipidemic drugs.

#### UNIT-II

10hours

##### 1. Pharmacology of drugs acting on cardio vascular system

- a. Drug used in the therapy of shock.
- b. Hematinics, coagulants and anticoagulants.
- c. Fibrinolytics and anti-platelet drugs
- d. Plasma volume expanders

##### 2. Pharmacology of drugs acting on urinary system

- a. Diuretics
- b. Anti-diuretics.

#### UNIT-III

10hours

##### 3. Autocoids and related drugs

- a. Introduction to autocoids and classification
- b. Histamine, 5-HT and their antagonists.
- c. Prostaglandins, Thromboxanes and Leukotrienes.
- d. Angiotensin, Bradykinin and Substance P.
- e. Non-steroidal anti-inflammatory agents
- f. Anti-gout drugs
- g. Antirheumatic drugs

**UNIT-IV****08hours****5. Pharmacology of drugs acting on endocrine system**

- a. Basic concepts in endocrine pharmacology.
- b. Anterior Pituitary hormones- analogues and their inhibitors.
- c. Thyroid hormones- analogues and their inhibitors.
- d. Hormones regulating plasma calcium level- Parathormone, Calcitonin and Vitamin-D.
- d. Insulin, Oral Hypoglycemic agents and glucagon.
- e. ACTH and corticosteroids.

**UNIT-V****07hours****5. Pharmacology of drugs acting on endocrine system**

- a. Androgens and Anabolic steroids.
- b. Estrogens, progesterone and oral contraceptives.
- c. Drugs acting on the uterus.

**6. Bioassay**

- a. Principles and applications of bioassay.
- b. Types of bioassay
- c. Bioassay of insulin, oxytocin, vasopressin, ACTH, d-tubocurarine, digitalis, histamine and 5-HT

## BP 507 P. PHARMACOLOGY-II (Practical)

4Hrs/Week

1. Introduction to *in-vitro* pharmacology and physiological salt solutions.
2. Effect of drugs on isolated frog heart.
3. Effect of drugs on blood pressure and heart rate of dog.
4. Study of diuretic activity of drugs using rats/mice.
5. DRC of acetylcholine using frog rectus abdominis muscle.
6. Effect of physostigmine and atropine on DRC of acetylcholine using frog rectus abdominis muscle and rat ileum respectively.
7. Bioassay of histamine using guinea pig ileum by matching method.
8. Bioassay of oxytocin using rat uterine horn by interpolation method.
9. Bioassay of serotonin using rat fundus strip by three point bioassay.
10. Bioassay of acetylcholine using rat ileum/colon by four point bioassay.
11. Determination of  $PA_2$  value of prazosin using rat anococcygeus muscle (by Schilds plot method).
12. Determination of  $PD_2$  value using guinea pig ileum.
13. Effect of spasmogens and spasmolytics using rabbit jejunum.
14. Anti-inflammatory activity of drugs using carrageenan induced paw-edema model.
15. Analgesic activity of drug using central and peripheral methods

*Note: All laboratory techniques and animal experiments are demonstrated by simulated experiments by softwares and videos*

### Recommended Books (Latest Editions)

10. Kulkarni SK. Handbook of experimental pharmacology. Vallabh Prakashan.

## BP504 T. PHARMACOGNOSY AND PHYTOCHEMISTRY II (Theory)

45Hours

**Scope:** The main purpose of subject is to impart the students the knowledge of how the secondary metabolites are produced in the crude drugs, how to isolate and identify and produce them industrially. Also this subject involves the study of producing the plants and phytochemicals through plant tissue culture, drug interactions and basic principles of traditional system of medicine

**Objectives:** Upon completion of the course, the student shall be able

1. to know the modern extraction techniques, characterization and identification of the herbal drugs and phytoconstituents
2. to understand the preparation and development of herbal formulation.
3. to understand the herbal drug interactions
4. to carryout isolation and identification of phytoconstituents

### Course Content:

#### UNIT-I

7 Hours

##### Metabolic pathways in higher plants and their determination

- a) Brief study of basic metabolic pathways and formation of different secondary metabolites through these pathways- Shikimic acid pathway, Acetate pathways and Amino acid pathway.
- b) Study of utilization of radioactive isotopes in the investigation of Biogenetic studies.

#### UNIT-II

14 Hours

General introduction, composition, chemistry & chemical classes, biosources, therapeutic uses and commercial applications of following secondary metabolites:

**Alkaloids:** Vinca, Rauwolfia, Belladonna, Opium,

**Phenylpropanoids and Flavonoids:** Lignans, Tea, Ruta

**Steroids, Cardiac Glycosides & Triterpenoids:** Liquorice, Dioscorea, Digitalis

**Volatile oils:** Mentha, Clove, Cinnamon, Fennel, Coriander,

**Tannins:** Catechu, Pterocarpus

**Resins:** Benzoin, Guggul, Ginger, Asafoetida, Myrrh, Colophony

**Glycosides:** Senna, Aloes, Bitter Almond

**Iridoids, Other terpenoids & Naphthaquinones:** Gentian, Artemisia, taxus, carotenoids

#### UNIT-III

06 Hours

Isolation, Identification and Analysis of Phytoconstituents

- a) Terpenoids: Menthol, Citral, Artemisin
- b) Glycosides: Glycyrrhetic acid & Rutin
- c) Alkaloids: Atropine, Quinine, Reserpine, Caffeine
- d) Resins: Podophyllotoxin, Curcumin

#### UNIT-IV

10 Hours

Industrial production, estimation and utilization of the following phytoconstituents: Forskolin, Sennoside, Artemisinin, Diosgenin, Digoxin, Atropine, Podophyllotoxin, Caffeine, Taxol, Vincristine and Vinblastine

#### UNIT V

8 Hours

##### Basics of Phytochemistry

Modern methods of extraction, application of latest techniques like Spectroscopy, chromatography and electrophoresis in the isolation, purification and identification of crude drugs.

**BP 508 P. PHARMACOGNOSY AND PHYTOCHEMISTRY II (Practical)**

**4 Hours/Week**

1. Morphology, histology and powder characteristics & extraction & detection of: Cinchona, Cinnamon, Senna, Clove, Ephedra, Fennel and Coriander
2. Exercise involving isolation & detection of active principles
  - a. Caffeine - from tea dust.
  - b. Diosgenin from Dioscorea
  - c. Atropine from Belladonna
  - d. Sennosides from Senna
3. Separation of sugars by Paper chromatography
4. TLC of herbal extract
5. Distillation of volatile oils and detection of phytoconstituents by TLC
6. Analysis of crude drugs by chemical tests: (i) Asafoetida (ii) Benzoin (iii) Colophony (iv) Aloes (v) Myrrh

**Recommended Books: (Latest Editions)**

1. W.C.Evans, Trease and Evans Pharmacognosy, 16<sup>th</sup> edition, W.B. Saunders & Co., London, 2009.
2. Mohammad Ali. Pharmacognosy and Phytochemistry, CBS Publishers & Distribution, New Delhi.
3. Text book of Pharmacognosy by C.K. Kokate, Purohit, Gokhlae (2007), 37<sup>th</sup> Edition, Nirali Prakashan, New Delhi.
4. Herbal drug industry by R.D. Choudhary (1996), 1<sup>st</sup> Edn, Eastern Publisher, New Delhi.
5. Essentials of Pharmacognosy, Dr.SH.Ansari, 1<sup>st</sup> edition, Birla publications, New Delhi, 2007
6. Herbal Cosmetics by H.Pande, Asia Pacific Business press, Inc, New Delhi.
7. A.N. Kalia, Textbook of Industrial Pharmacognosy, CBS Publishers, New Delhi, 2005.
8. R Endress, Plant cell Biotechnology, Springer-Verlag, Berlin, 1994.
9. Pharmacognosy & Pharmacobiotechnology. James Bobbers, Marilyn KS, VE Tylor.
10. The formulation and preparation of cosmetic, fragrances and flavours.
11. Remington's Pharmaceutical sciences.
12. Text Book of Biotechnology by Vyas and Dixit.
13. Text Book of Biotechnology by R.C. Dubey.

## **BP 505 T. PHARMACEUTICAL JURISPRUDENCE (Theory)**

**45 Hours**

**Scope:** This course is designed to impart basic knowledge on important legislations related to the profession of pharmacy in India.

**Objectives:** Upon completion of the course, the student shall be able to understand:

1. The Pharmaceutical legislations and their implications in the development and marketing of pharmaceuticals.
2. Various Indian pharmaceutical Acts and Laws
3. The regulatory authorities and agencies governing the manufacture and sale of pharmaceuticals
4. The code of ethics during the pharmaceutical practice

### **Course Content:**

#### **UNIT-I**

**10 Hours**

##### **Drugs and Cosmetics Act, 1940 and its rules 1945:**

Objectives, Definitions, Legal definitions of schedules to the Act and Rules

Import of drugs – Classes of drugs and cosmetics prohibited from import, Import under license or permit. Offences and penalties.

Manufacture of drugs – Prohibition of manufacture and sale of certain drugs,

Conditions for grant of license and conditions of license for manufacture of drugs, Manufacture of drugs for test, examination and analysis, manufacture of new drug, loan license and repacking license.

#### **UNIT-II**

**10 Hours**

##### **Drugs and Cosmetics Act, 1940 and its rules 1945.**

Detailed study of Schedule G, H, M, N, P,T,U, V, X, Y, Part XII B, Sch F & DMR (OA)

Sale of Drugs – Wholesale, Retail sale and Restricted license. Offences and penalties

Labeling & Packing of drugs- General labeling requirements and specimen labels for drugs and cosmetics, List of permitted colors. Offences and penalties.

Administration of the Act and Rules – Drugs Technical Advisory Board, Central drugs Laboratory, Drugs Consultative Committee, Government drug analysts, Licensing authorities, controlling authorities, Drugs Inspectors

#### **UNIT-III**

**10 Hours**

- **Pharmacy Act –1948:** Objectives, Definitions, Pharmacy Council of India; its constitution and functions, Education Regulations, State and Joint state pharmacy councils; constitution and functions, Registration of Pharmacists, Offences and

## Penalties

- **Medicinal and Toilet Preparation Act –1955:** Objectives, Definitions, Licensing, Manufacture In bond and Outside bond, Export of alcoholic preparations, Manufacture of Ayurvedic, Homeopathic, Patent & Proprietary Preparations. Offences and Penalties.
- **Narcotic Drugs and Psychotropic substances Act-1985 and Rules:** Objectives, Definitions, Authorities and Officers, Constitution and Functions of narcotic & Psychotropic Consultative Committee, National Fund for Controlling the Drug Abuse, Prohibition, Control and Regulation, opium poppy cultivation and production of poppy straw, manufacture, sale and export of opium, Offences and Penalties

## UNIT-IV

**08 Hours**

- **Study of Salient Features of Drugs and Magic Remedies Act and its rules:** Objectives, Definitions, Prohibition of certain advertisements, Classes of Exempted advertisements, Offences and Penalties
- **Prevention of Cruelty to animals Act-1960:** Objectives, Definitions, Institutional Animal Ethics Committee, CPCSEA guidelines for Breeding and Stocking of Animals, Performance of Experiments, Transfer and acquisition of animals for experiment, Records, Power to suspend or revoke registration, Offences and Penalties
- **National Pharmaceutical Pricing Authority:** Drugs Price Control Order (DPCO)-2013. Objectives, Definitions, Sale prices of bulk drugs, Retail price of formulations, Retail price and ceiling price of scheduled formulations, National List of Essential Medicines (NLEM)

## UNIT-V

**07 Hours**

- **Pharmaceutical Legislations** – A brief review, Introduction, Study of drugs enquiry committee, Health survey and development committee, Hathi committee and Mudaliar committee
- **Code of Pharmaceutical ethics** Definition, Pharmacist in relation to his job, trade, medical profession and his profession, Pharmacist's oath
- **Medical Termination of Pregnancy Act**
- **Right to Information Act**
- **Introduction to Intellectual Property Rights (IPR)**

### **Recommended books: (Latest Edition)**

1. Forensic Pharmacy by B. Suresh

2. Text book of Forensic Pharmacy by B.M. Mithal
3. Hand book of drug law-by M.L. Mehra
4. A text book of Forensic Pharmacy by N.K. Jain
5. Drugs and Cosmetics Act/Rules by Govt. of India publications.
6. Medicinal and Toilet preparations act 1955 by Govt. of India publications.
7. Narcotic drugs and psychotropic substances act by Govt. of India publications
8. Drugs and Magic Remedies act by Govt. of India publication
9. Bare Acts of the said laws published by Government. Reference books (Theory)

**SEMESTER VI**

## BP601T. MEDICINAL CHEMISTRY – III (Theory)

45 Hours

**Scope:** This subject is designed to impart fundamental knowledge on the structure, chemistry and therapeutic value of drugs. The subject emphasis on modern techniques of rational drug design like quantitative structure activity relationship (QSAR), Prodrug concept, combinatorial chemistry and Computer aided drug design (CADD). The subject also emphasizes on the chemistry, mechanism of action, metabolism, adverse effects, Structure Activity Relationships (SAR), therapeutic uses and synthesis of important drugs.

**Objectives:** Upon completion of the course student shall be able to

1. Understand the importance of drug design and different techniques of drug design.
2. Understand the chemistry of drugs with respect to their biological activity.
3. Know the metabolism, adverse effects and therapeutic value of drugs.
4. Know the importance of SAR of drugs.

### Course Content:

**Study of the development of the following classes of drugs, Classification, mechanism of action, uses of drugs mentioned in the course, Structure activity relationship of selective class of drugs as specified in the course and synthesis of drugs superscripted by (\*)**

#### UNIT – I

10 Hours

##### Antibiotics

Historical background, Nomenclature, Stereochemistry, Structure activity relationship, Chemical degradation classification and important products of the following classes.

**β-Lactam antibiotics:** Penicillin, Cephalosporins, β- Lactamase inhibitors, Monobactams

**Aminoglycosides:** Streptomycin, Neomycin, Kanamycin

**Tetracyclines:** Tetracycline, Oxytetracycline, Chlortetracycline, Minocycline, Doxycycline

#### UNIT – II

10 Hours

##### Antibiotics

Historical background, Nomenclature, Stereochemistry, Structure activity relationship, Chemical degradation classification and important products of the following classes.

**Macrolide:** Erythromycin Clarithromycin, Azithromycin.

**Miscellaneous:** Chloramphenicol\*, Clindamycin.

**Prodrugs:** Basic concepts and application of prodrugs design.

**Antimalarials:** Etiology of malaria.

**Quinolines:** SAR, Quinine sulphate, Chloroquine\*, Amodiaquine, Primaquine phosphate, Pamaquine\*, Quinacrine hydrochloride, Mefloquine.

**Biguanides and dihydro triazines:** Cycloguanil pamoate, Proguanil.

**Miscellaneous:** Pyrimethamine, Artesunate, Artemether, Atovaquone.

### UNIT – III

10 Hours

#### Anti-tubercular Agents

**Synthetic anti tubercular agents:** Isoniazid\*, Ethionamide, Ethambutol, Pyrazinamide, Para amino salicylic acid.\*

**Anti tubercular antibiotics:** Rifampicin, Rifabutin, Cycloserine Streptomycine, Capreomycin sulphate.

#### Urinary tract anti-infective agents

**Quinolones:** SAR of quinolones, Nalidixic Acid, Norfloxacin, Enoxacin, Ciprofloxacin\*, Ofloxacin, Lomefloxacin, Sparfloxacin, Gatifloxacin, Moxifloxacin

**Miscellaneous:** Furazolidine, Nitrofurantoin\*, Methanamine.

#### Antiviral agents:

Amantadine hydrochloride, Rimantadine hydrochloride, Idoxuridine trifluoride, Acyclovir\*, Gancyclovir, Zidovudine, Didanosine, Zalcitabine, Lamivudine, Loviride, Delavirding, Ribavirin, Saquinavir, Indinavir, Ritonavir.

### UNIT – IV

08 Hours

#### Antifungal agents:

**Antifungal antibiotics:** Amphotericin-B, Nystatin, Natamycin, Griseofulvin.

**Synthetic Antifungal agents:** Clotrimazole, Econazole, Butoconazole, Oxiconazole Tioconazole, Miconazole\*, Ketoconazole, Terconazole, Itraconazole, Fluconazole, Naftifine hydrochloride, Tolnaftate\*.

**Anti-protozoal Agents:** Metronidazole\*, Tinidazole, Ornidazole, Diloxanide, Iodoquinol, Pentamidine Isethionate, Atovaquone, Eflornithine.

**Anthelmintics:** Diethylcarbamazine citrate\*, Thiabendazole, Mebendazole\*, Albendazole, Niclosamide, Oxamniquine, Praziquantal, Ivermectin.

### **Sulphonamides and Sulfones**

Historical development, chemistry, classification and SAR of Sulfonamides: Sulphamethizole, Sulfoxazole, Sulphamethizine, Sulfacetamide\*, Sulphapyridine, Sulfamethoxazole\*, Sulphadiazine, Mefenide acetate, Sulfasalazine.

**Folate reductase inhibitors:** Trimethoprim\*, Cotrimoxazole.

**Sulfones:** Dapsone\*.

## **UNIT – V**

**07 Hours**

### **Introduction to Drug Design**

Various approaches used in drug design.

Physicochemical parameters used in quantitative structure activity relationship (QSAR) such as partition coefficient, Hammett's electronic parameter, Taft's steric parameter and Hansch analysis.

Pharmacophore modeling and docking techniques.

**Combinatorial Chemistry:** Concept and applications of combinatorial chemistry: solid phase and solution phase synthesis.

## BP607P. MEDICINAL CHEMISTRY- III (Practical)

4 Hours / week

### **I Preparation of drugs and intermediates**

- 1 Sulphanilamide
- 2 7-Hydroxy, 4-methyl coumarin
- 3 Chlorobutanol
- 4 Triphenyl imidazole
- 5 Tolbutamide
- 6 Hexamine

### **II Assay of drugs**

- 1 Isonicotinic acid hydrazide
- 2 Chloroquine
- 3 Metronidazole
- 4 Dapsone
- 5 Chlorpheniramine maleate
- 6 Benzyl penicillin

### **III Preparation of medicinally important compounds or intermediates by Microwave irradiation technique**

### **IV Drawing structures and reactions using chem draw®**

### **V Determination of physicochemical properties such as logP, clogP, MR, Molecular weight, Hydrogen bond donors and acceptors for class of drugs course content using drug design software Drug likeliness screening (Lipinskies RO5)**

### **Recommended Books (Latest Editions)**

1. Wilson and Giswold's Organic medicinal and Pharmaceutical Chemistry.
2. Foye's Principles of Medicinal Chemistry.
3. Burger's Medicinal Chemistry, Vol I to IV.
4. Introduction to principles of drug design- Smith and Williams.
5. Remington's Pharmaceutical Sciences.
6. Martindale's extra pharmacopoeia.

7. Organic Chemistry by I.L. Finar, Vol. II.
8. The Organic Chemistry of Drug Synthesis by Lednicer, Vol. 1-5.
9. Indian Pharmacopoeia.
10. Text book of practical organic chemistry- A.I.Vogel.

## **BP602 T. PHARMACOLOGY-III (Theory)**

**45 Hours**

**Scope:** This subject is intended to impart the fundamental knowledge on various aspects (classification, mechanism of action, therapeutic effects, clinical uses, side effects and contraindications) of drugs acting on respiratory and gastrointestinal system, infectious diseases, immuno-pharmacology and in addition, emphasis on the principles of toxicology and chronopharmacology.

**Objectives:** Upon completion of this course the student should be able to:

1. understand the mechanism of drug action and its relevance in the treatment of different infectious diseases
2. comprehend the principles of toxicology and treatment of various poisonings and
3. appreciate correlation of pharmacology with related medical sciences.

### **Course Content:**

#### **UNIT-I**

**10hours**

##### **1. Pharmacology of drugs acting on Respiratory system**

- a. Anti -asthmatic drugs
- b. Drugs used in the management of COPD
- c. Expectorants and antitussives
- d. Nasal decongestants
- e. Respiratory stimulants

##### **2. Pharmacology of drugs acting on the Gastrointestinal Tract**

- a. Antiulcer agents.
- b. Drugs for constipation and diarrhoea.
- c. Appetite stimulants and suppressants.
- d. Digestants and carminatives.
- e. Emetics and anti-emetics.

#### **UNIT-II**

**10hours**

##### **3. Chemotherapy**

- a. General principles of chemotherapy.
- b. Sulfonamides and cotrimoxazole.
- c. Antibiotics- Penicillins, cephalosporins, chloramphenicol, macrolides, quinolones and fluoroquinolins, tetracycline and aminoglycosides

#### **UNIT-III**

**10hours**

##### **3. Chemotherapy**

- a. Antitubercular agents
- b. Antileprotic agents

- c. Antifungal agents
- d. Antiviral drugs
- e. Anthelmintics
- f. Antimalarial drugs
- g. Antiamoebic agents

**UNIT-IV**

**08hours**

**3. Chemotherapy**

- l. Urinary tract infections and sexually transmitted diseases.
- m. Chemotherapy of malignancy.

**4. Immunopharmacology**

- a. Immunostimulants
  - b. Immunosuppressant
- Protein drugs, monoclonal antibodies, target drugs to antigen, biosimilars

**UNIT-V**

**07hours**

**5. Principles of toxicology**

- a. Definition and basic knowledge of acute, subacute and chronic toxicity.
- b. Definition and basic knowledge of genotoxicity, carcinogenicity, teratogenicity and mutagenicity
- c. General principles of treatment of poisoning
- d. Clinical symptoms and management of barbiturates, morphine, organophosphorus compound and lead, mercury and arsenic poisoning.

**6. Chronopharmacology**

- a. Definition of rhythm and cycles.
- b. Biological clock and their significance leading to chronotherapy.

## BP 608 P. PHARMACOLOGY-III (Practical)

4Hrs/Week

1. Dose calculation in pharmacological experiments
2. Antiallergic activity by mast cell stabilization assay
3. Study of anti-ulcer activity of a drug using pylorus ligand (SHAY) rat model and NSAIDS induced ulcer model.
4. Study of effect of drugs on gastrointestinal motility
5. Effect of agonist and antagonists on guinea pig ileum
6. Estimation of serum biochemical parameters by using semi- autoanalyser
7. Effect of saline purgative on frog intestine
8. Insulin hypoglycemic effect in rabbit
9. Test for pyrogens ( rabbit method)
10. Determination of acute oral toxicity (LD50) of a drug from a given data
11. Determination of acute skin irritation / corrosion of a test substance
12. Determination of acute eye irritation / corrosion of a test substance
13. Calculation of pharmacokinetic parameters from a given data
14. Biostatistics methods in experimental pharmacology( student's t test, ANOVA)
15. Biostatistics methods in experimental pharmacology (Chi square test, Wilcoxon Signed Rank test)

*\*Experiments are demonstrated by simulated experiments/videos*

10. N.Udupa and P.D. Gupta, Concepts in Chronopharmacology.

## **BP 603 T. HERBAL DRUG TECHNOLOGY**

**(Theory)**

**45 hours**

**Scope:** This subject gives the student the knowledge of basic understanding of herbal drug industry, the quality of raw material, guidelines for quality of herbal drugs, herbal cosmetics, natural sweeteners, nutraceutical etc. The subject also emphasizes on Good Manufacturing Practices (GMP), patenting and regulatory issues of herbal drugs

**Objectives:** Upon completion of this course the student should be able to:

1. understand raw material as source of herbal drugs from cultivation to herbal drug product
2. know the WHO and ICH guidelines for evaluation of herbal drugs
3. know the herbal cosmetics, natural sweeteners, nutraceuticals
4. appreciate patenting of herbal drugs, GMP .

### **Course content:**

#### **UNIT-I**

**11 Hours**

##### **Herbs as raw materials**

Definition of herb, herbal medicine, herbal medicinal product, herbal drug preparation

Source of Herbs

Selection, identification and authentication of herbal materials

Processing of herbal raw material

##### **Biodynamic Agriculture**

Good agricultural practices in cultivation of medicinal plants including Organic farming.

Pest and Pest management in medicinal plants: Biopesticides/Bioinsecticides.

##### **Indian Systems of Medicine**

a) Basic principles involved in Ayurveda, Siddha, Unani and Homeopathy

b) Preparation and standardization of Ayurvedic formulations viz Aristas and Asawas, Ghutika, Churna, Lehya and Bhasma.

#### **UNIT-II**

**7 Hours**

##### **Nutraceuticals**

General aspects, Market, growth, scope and types of products available in the market. Health benefits and role of Nutraceuticals in ailments like Diabetes, CVS diseases, Cancer, Irritable bowel syndrome and various Gastro intestinal diseases.

Study of following herbs as health food: Alfaalfa, Chicory, Ginger, Fenugreek, Garlic, Honey, Amla, Ginseng, Ashwagandha, Spirulina

**Herbal-Drug and Herb-Food Interactions:** General introduction to interaction and classification. Study of following drugs and their possible side effects and interactions: Hypercium, kava-kava, Ginkobiloba, Ginseng, Garlic, Pepper & Ephedra.

#### **UNIT-III**

**10 Hours**

##### **Herbal Cosmetics**

Sources and description of raw materials of herbal origin used via, fixed oils, waxes, gums colours, perfumes, protective agents, bleaching agents, antioxidants in products such as skin care, hair care and oral hygiene products.

**Herbal excipients:**

Herbal Excipients – Significance of substances of natural origin as excipients – colorants, sweeteners, binders, diluents, viscosity builders, disintegrants, flavors & perfumes.

**Herbal formulations :**

Conventional herbal formulations like syrups, mixtures and tablets and Novel dosage forms like phytosomes

**UNIT- IV**

**10 Hours**

**Evaluation of Drugs** WHO & ICH guidelines for the assessment of herbal drugs  
Stability testing of herbal drugs.

**Patenting and Regulatory requirements of natural products:**

- a) Definition of the terms: Patent, IPR, Farmers right, Breeder's right, Bioprospecting and Biopiracy
- b) Patenting aspects of Traditional Knowledge and Natural Products. Case study of Curcuma & Neem.

**Regulatory Issues** - Regulations in India (ASU DTAB, ASU DCC), Regulation of manufacture of ASU drugs - Schedule Z of Drugs & Cosmetics Act for ASU drugs.

**UNIT-V**

**07 Hours**

**General Introduction to Herbal Industry**

Herbal drugs industry: Present scope and future prospects.

A brief account of plant based industries and institutions involved in work on medicinal and aromatic plants in India.

**Schedule T – Good Manufacturing Practice of Indian systems of medicine**

Components of GMP (Schedule – T) and its objectives

Infrastructural requirements, working space, storage area, machinery and equipments, standard operating procedures, health and hygiene, documentation and records.

## **BP 609 P. HERBAL DRUG TECHNOLOGY (Practical)**

**4 hours/ week**

1. To perform preliminary phytochemical screening of crude drugs.
2. Determination of the alcohol content of Asava and Arista
3. Evaluation of excipients of natural origin
4. Incorporation of prepared and standardized extract in cosmetic formulations like creams, lotions and shampoos and their evaluation.
5. Incorporation of prepared and standardized extract in formulations like syrups, mixtures and tablets and their evaluation as per Pharmacopoeial requirements.
6. Monograph analysis of herbal drugs from recent Pharmacopoeias
7. Determination of Aldehyde content
8. Determination of Phenol content
9. Determination of total alkaloids

### **Recommended Books: (Latest Editions)**

1. Textbook of Pharmacognosy by Trease & Evans.
2. Textbook of Pharmacognosy by Tyler, Brady & Robber.
3. Pharmacognosy by Kokate, Purohit and Gokhale
4. Essential of Pharmacognosy by Dr.S.H.Ansari
5. Pharmacognosy & Phytochemistry by V.D.Rangari
6. Pharmacopoeal standards for Ayurvedic Formulation (Council of Research in Indian Medicine & Homeopathy)
7. Mukherjee, P.W. Quality Control of Herbal Drugs: An Approach to Evaluation of Botanicals. Business Horizons Publishers, New Delhi, India, 2002.

**BP 604 T. BIOPHARMACEUTICS AND PHARMACOKINETICS  
(Theory)**

45 Hours

**Scope:** This subject is designed to impart knowledge and skills of Biopharmaceutics and pharmacokinetics and their applications in pharmaceutical development, design of dose and dosage regimen and in solving the problems arising therein.

**Objectives:** Upon completion of the course student shall be able to:

1. Understand the basic concepts in biopharmaceutics and pharmacokinetics and their significance.
2. Use of plasma drug concentration-time data to calculate the pharmacokinetic parameters to describe the kinetics of drug absorption, distribution, metabolism, excretion, elimination.
3. To understand the concepts of bioavailability and bioequivalence of drug products and their significance.
4. Understand various pharmacokinetic parameters, their significance & applications.

**Course Content:**

**UNIT-I**

**10 Hours**

**Introduction to Biopharmaceutics**

**Absorption:** Mechanisms of drug absorption through GIT, factors influencing drug absorption through GIT, absorption of drug from Non per oral extra-vascular routes, **Distribution** Tissue permeability of drugs, binding of drugs, apparent, volume of drug distribution, plasma and tissue protein binding of drugs, factors affecting protein-drug binding. Kinetics of protein binding, Clinical significance of protein binding of drugs

**UNIT- II**

**10 Hours**

**Elimination:** Drug metabolism and basic understanding metabolic pathways renal excretion of drugs, factors affecting renal excretion of drugs, renal clearance, Non renal routes of drug excretion of drugs

**Bioavailability and Bioequivalence:** Definition and Objectives of bioavailability, absolute and relative bioavailability, measurement of bioavailability, *in-vitro* drug dissolution models, *in-vitro-in-vivo* correlations, bioequivalence studies, methods to enhance the dissolution rates and bioavailability of poorly soluble drugs.

**UNIT- III**

**10 Hours**

**Pharmacokinetics:** Definition and introduction to Pharmacokinetics, Compartment models, Non compartment models, physiological models, One compartment open model. (a). Intravenous Injection (Bolus) (b). Intravenous infusion and (c) Extra vascular administrations. Pharmacokinetics parameters -  $K_E$ ,  $t_{1/2}$ ,  $V_d$ ,  $AUC$ ,  $K_a$ ,  $Cl_t$  and  $Cl_R$ - definitions methods of eliminations, understanding of their significance and application

**UNIT- IV****08 Hours****Multicompartment models:** Two compartment open model. IV bolus

Kinetics of multiple dosing, steady state drug levels, calculation of loading and maintenance doses and their significance in clinical settings.

**UNIT- V****07 Hours**

**Nonlinear Pharmacokinetics:** a. Introduction, b. Factors causing Non-linearity.  
c. Michaelis-menton method of estimating parameters, Explanation with example of drugs.

**Recommended Books: (Latest Editions)**

1. Biopharmaceutics and Clinical Pharmacokinetics by, Milo Gibaldi.
2. Biopharmaceutics and Pharmacokinetics; By Robert F Notari
3. Applied biopharmaceutics and pharmacokinetics, Leon Shargel and Andrew B.C.YU 4th edition, Prentice-Hall International edition, USA
4. Bio pharmaceutics and Pharmacokinetics-A Treatise, By D. M. Brahmankar and Sunil B.Jaiswal, Vallabh Prakashan Pitampura, Delhi
5. Pharmacokinetics: By Milo Gibaldi Donald, R. Merceel Dekker Inc.
6. Hand Book of Clinical Pharmacokinetics, By Milo Gibaldi and Laurie Prescott by ADIS Health Science Press.
7. Biopharmaceutics; By Swarbrick
8. Clinical Pharmacokinetics, Concepts and Applications: By Malcolm Rowland and Thomas, N. Tozen, Lea and Febiger, Philadelphia, 1995.
10. Dissolution, Bioavailability and Bioequivalence, By Abdou H.M, Mack, Publishing Company, Pennsylvania 1989.
11. Biopharmaceutics and Clinical Pharmacokinetics-An introduction 4th edition Revised and expanded by Robert F Notari Marcel Dekker Inc, New York and Basel, 1987.
12. Remington's Pharmaceutical Sciences, By Mack Publishing Company, Pennsylvania

## **BP 605 T. PHARMACEUTICAL BIOTECHNOLOGY (Theory)**

**45 Hours**

### **Scope:**

- Biotechnology has a long promise to revolutionize the biological sciences and technology.
- Scientific application of biotechnology in the field of genetic engineering, medicine and fermentation technology makes the subject interesting.
- Biotechnology is leading to new biological revolutions in diagnosis, prevention and cure of diseases, new and cheaper pharmaceutical drugs.
- Biotechnology has already produced transgenic crops and animals and the future promises lot more.
- It is basically a research-based subject.

**Objectives:** Upon completion of the subject student shall be able to;

1. Understanding the importance of Immobilized enzymes in Pharmaceutical Industries
2. Genetic engineering applications in relation to production of pharmaceuticals
3. Importance of Monoclonal antibodies in Industries
4. Appreciate the use of microorganisms in fermentation technology

### **Unit I**

**10 Hours**

- a) Brief introduction to Biotechnology with reference to Pharmaceutical Sciences.
- b) Enzyme Biotechnology- Methods of enzyme immobilization and applications.
- c) Biosensors- Working and applications of biosensors in Pharmaceutical Industries.
- d) Brief introduction to Protein Engineering.
- e) Use of microbes in industry. Production of Enzymes- General consideration - Amylase, Catalase, Peroxidase, Lipase, Protease, Penicillinase.
- f) Basic principles of genetic engineering.

### **Unit II**

**10 Hours**

- a) Study of cloning vectors, restriction endonucleases and DNA ligase.
- b) Recombinant DNA technology. Application of genetic engineering in medicine.
- c) Application of r DNA technology and genetic engineering in the production of:
  - i) Interferon
  - ii) Vaccines- hepatitis- B
  - iii) Hormones-Insulin.
- d) Brief introduction to PCR

### **Unit III**

**10 Hours**

Types of immunity- humoral immunity, cellular immunity

- a) Structure of Immunoglobulins
- b) Structure and Function of MHC
- c) Hypersensitivity reactions, Immune stimulation and Immune suppressions.
- d) General method of the preparation of bacterial vaccines, toxoids, viral vaccine, antitoxins, serum-immune blood derivatives and other products relative to immunity.
- e) Storage conditions and stability of official vaccines
- f) Hybridoma technology- Production, Purification and Applications
- g) Blood products and Plasma Substitutes.

### **Unit IV**

**08Hours**

- a) Immuno blotting techniques- ELISA, Western blotting, Southern blotting.
- b) Genetic organization of Eukaryotes and Prokaryotes
- c) Microbial genetics including transformation, transduction, conjugation, plasmids and transposons.
- d) Introduction to Microbial biotransformation and applications.
- e) Mutation: Types of mutation/mutants.

### **Unit V**

**07 Hours**

- a) Fermentation methods and general requirements, study of media, equipments, sterilization methods, aeration process, stirring.
- b) Large scale production fermenter design and its various controls.
- c) Study of the production of - penicillins, citric acid, Vitamin B12, Glutamic acid, Griseofulvin,
- d) Blood Products: Collection, Processing and Storage of whole human blood, dried human plasma, plasma Substitutes.

### **Recommended Books (Latest edition):**

1. B.R. Glick and J.J. Pasternak: Molecular Biotechnology: Principles and Applications of RecombinantDNA: ASM Press Washington D.C.
2. RA Goldshy et. al., : Kuby Immunology.
3. J.W. Goding: Monoclonal Antibodies.
4. J.M. Walker and E.B. Gingold: Molecular Biology and Biotechnology by Royal

Society of Chemistry.

5. Zaborsky: Immobilized Enzymes, CRC Press, Degraland, Ohio.
6. S.B. Primrose: Molecular Biotechnology (Second Edition) Blackwell Scientific Publication.
7. Stanbury F., P., Whitakar A., and Hall J., S., Principles of fermentation technology, 2nd edition, Aditya books Ltd., New Delhi

## **BP606TPHARMACEUTICAL QUALITY ASSURANCE (Theory)**

**45 Hours**

**Scope:** This course deals with the various aspects of quality control and quality assurance aspects of pharmaceutical industries. It deals with the important aspects like cGMP, QC tests, documentation, quality certifications and regulatory affairs.

**Objectives:** Upon completion of the course student shall be able to:

- understand the cGMP aspects in a pharmaceutical industry
- appreciate the importance of documentation
- understand the scope of quality certifications applicable to pharmaceutical industries
- understand the responsibilities of QA & QC departments

**Course content:**

### **UNIT – I**

**10 Hours**

**Quality Assurance and Quality Management concepts:** Definition and concept of Quality control, Quality assurance and GMP

**Total Quality Management (TQM):** Definition, elements, philosophies

**ICH Guidelines:** purpose, participants, process of harmonization, Brief overview of QSEM, with special emphasis on Q-series guidelines, ICH stability testing guidelines

**Quality by design (QbD):** Definition, overview, elements of QbD program, tools

**ISO 9000 & ISO14000:** Overview, Benefits, Elements, steps for registration

**NABL accreditation :** Principles and procedures

### **UNIT - II**

**10 Hours**

**Organization and personnel:** Personnel responsibilities, training, hygiene and personal records.

**Premises:** Design, construction and plant layout, maintenance, sanitation, environmental control, utilities and maintenance of sterile areas, control of contamination.

**Equipments and raw materials:** Equipment selection, purchase specifications, maintenance, purchase specifications and maintenance of stores for raw materials.

### **UNIT – III**

**10 Hours**

**Quality Control:** Quality control test for containers, rubber closures and secondary packing

materials.

**Good Laboratory Practices:** General Provisions, Organization and Personnel, Facilities, Equipment, Testing Facilities Operation, Test and Control Articles, Protocol for Conduct of a Nonclinical Laboratory Study, Records and Reports, Disqualification of Testing Facilities

#### **UNIT – IV**

**08 Hours**

**Complaints:** Complaints and evaluation of complaints, Handling of return good, recalling and waste disposal.

**Document maintenance in pharmaceutical industry:** Batch Formula Record, Master Formula Record, SOP, Quality audit, Quality Review and Quality documentation, Reports and documents, distribution records.

#### **UNIT – V**

**07 Hours**

**Calibration and Validation:** Introduction, definition and general principles of calibration, qualification and validation, importance and scope of validation, types of validation, validation master plan. Calibration of pH meter, Qualification of UV-Visible spectrophotometer, General principles of Analytical method Validation.

**Warehousing:** Good warehousing practice, materials management

#### **Recommended Books: (Latest Edition)**

1. Quality Assurance Guide by organization of Pharmaceutical Products of India.
2. Good Laboratory Practice Regulations, 2<sup>nd</sup> Edition, Sandy Weinberg Vol. 69.
3. Quality Assurance of Pharmaceuticals- A compendium of Guide lines and Related materials Vol I WHO Publications.
4. A guide to Total Quality Management- Kushik Maitra and Sedhan K Ghosh
5. How to Practice GMP's – P P Sharma.
6. ISO 9000 and Total Quality Management – Sadhank G Ghosh
7. The International Pharmacopoeia – Vol I, II, III, IV- General Methods of Analysis and Quality specification for Pharmaceutical Substances, Excipients and Dosage forms
8. Good laboratory Practices – Marcel Deckker Series
9. ICH guidelines, ISO 9000 and 14000 guidelines

**SEMESTER VII**

## **BP701T. INSTRUMENTAL METHODS OF ANALYSIS (Theory)**

**45 Hours**

**Scope:** This subject deals with the application of instrumental methods in qualitative and quantitative analysis of drugs. This subject is designed to impart a fundamental knowledge on the principles and instrumentation of spectroscopic and chromatographic technique. This also emphasizes on theoretical and practical knowledge on modern analytical instruments that are used for drug testing.

**Objectives:** Upon completion of the course the student shall be able to

1. Understand the interaction of matter with electromagnetic radiations and its applications in drug analysis
2. Understand the chromatographic separation and analysis of drugs.
3. Perform quantitative & qualitative analysis of drugs using various analytical instruments.

### **Course Content:**

#### **UNIT –I**

**10 Hours**

##### **UV Visible spectroscopy**

Electronic transitions, chromophores, auxochromes, spectral shifts, solvent effect on absorption spectra, Beer and Lambert's law, Derivation and deviations.

Instrumentation - Sources of radiation, wavelength selectors, sample cells, detectors- Photo tube, Photomultiplier tube, Photo voltaic cell, Silicon Photodiode.

Applications - Spectrophotometric titrations, Single component and multi component analysis

##### **Fluorimetry**

Theory, Concepts of singlet, doublet and triplet electronic states, internal and external conversions, factors affecting fluorescence, quenching, instrumentation and applications

#### **UNIT –II**

**10 Hours**

##### **IR spectroscopy**

Introduction, fundamental modes of vibrations in poly atomic molecules, sample handling, factors affecting vibrations

Instrumentation - Sources of radiation, wavelength selectors, detectors - Golay cell, Bolometer, Thermocouple, Thermister, Pyroelectric detector and applications

**Flame Photometry**-Principle, interferences, instrumentation and applications

**Atomic absorption spectroscopy-** Principle, interferences, instrumentation and applications

**Nepheloturbidometry-** Principle, instrumentation and applications

**UNIT –III**

**10 Hours**

**Introduction to chromatography**

**Adsorption and partition column chromatography-**Methodology, advantages, disadvantages and applications.

**Thin layer chromatography-** Introduction, Principle, Methodology, Rf values, advantages, disadvantages and applications.

**Paper chromatography-**Introduction, methodology, development techniques, advantages, disadvantages and applications

**Electrophoresis–** Introduction, factors affecting electrophoretic mobility, Techniques of paper, gel, capillary electrophoresis, applications

**UNIT –IV**

**08 Hours**

**Gas chromatography -** Introduction, theory, instrumentation, derivatization, temperature programming, advantages, disadvantages and applications

**High performance liquid chromatography (HPLC)-**Introduction, theory, instrumentation, advantages and applications.

**UNIT –V**

**07 Hours**

**Ion exchange chromatography-** Introduction, classification, ion exchange resins, properties, mechanism of ion exchange process, factors affecting ion exchange, methodology and applications

**Gel chromatography-** Introduction, theory, instrumentation and applications

**Affinity chromatography-** Introduction, theory, instrumentation and applications

## **BP705P. INSTRUMENTAL METHODS OF ANALYSIS (Practical)**

**4 Hours/Week**

- 1 Determination of absorption maxima and effect of solvents on absorption maxima of organic compounds
- 2 Estimation of dextrose by colorimetry
- 3 Estimation of sulfanilamide by colorimetry
- 4 Simultaneous estimation of ibuprofen and paracetamol by UV spectroscopy
- 5 Assay of paracetamol by UV- Spectrophotometry
- 6 Estimation of quinine sulfate by fluorimetry
- 7 Study of quenching of fluorescence
- 8 Determination of sodium by flame photometry
- 9 Determination of potassium by flame photometry
- 10 Determination of chlorides and sulphates by nephelo turbidometry
- 11 Separation of amino acids by paper chromatography
- 12 Separation of sugars by thin layer chromatography
- 13 Separation of plant pigments by column chromatography
- 14 Demonstration experiment on HPLC
- 15 Demonstration experiment on Gas Chromatography

### **Recommended Books (Latest Editions)**

1. Instrumental Methods of Chemical Analysis by B.K Sharma
2. Organic spectroscopy by Y.R Sharma
3. Text book of Pharmaceutical Analysis by Kenneth A. Connors
4. Vogel's Text book of Quantitative Chemical Analysis by A.I. Vogel
5. Practical Pharmaceutical Chemistry by A.H. Beckett and J.B. Stenlake
6. Organic Chemistry by I. L. Finar
7. Organic spectroscopy by William Kemp
8. Quantitative Analysis of Drugs by D. C. Garrett
9. Quantitative Analysis of Drugs in Pharmaceutical Formulations by P. D. Sethi
10. Spectrophotometric identification of Organic Compounds by Silverstein

## BP 702 T. INDUSTRIAL PHARMACYII (Theory)

45 Hours

**Scope:** This course is designed to impart fundamental knowledge on pharmaceutical product development and translation from laboratory to market

**Objectives:** Upon completion of the course, the student shall be able to:

1. Know the process of pilot plant and scale up of pharmaceutical dosage forms
2. Understand the process of technology transfer from lab scale to commercial batch
3. Know different Laws and Acts that regulate pharmaceutical industry
4. Understand the approval process and regulatory requirements for drug products

### Course Content:

#### UNIT-I

10 Hours

**Pilot plant scale up techniques:** General considerations - including significance of personnel requirements, space requirements, raw materials, Pilot plant scale up considerations for solids, liquid orals, semi solids and relevant documentation, SUPAC guidelines, Introduction to platform technology

#### UNIT-II

10 Hours

**Technology development and transfer:** WHO guidelines for Technology Transfer(TT): Terminology, Technology transfer protocol, Quality risk management, Transfer from R & D to production (Process, packaging and cleaning), Granularity of TT Process (API, excipients, finished products, packaging materials) Documentation, Premises and equipments, qualification and validation, quality control, analytical method transfer, Approved regulatory bodies and agencies, Commercialization - practical aspects and problems (case studies), TT agencies in India - APCTD, NRDC, TIFAC, BCIL, TBSE / SIDBI; TT related documentation - confidentiality agreement, licensing, MoUs, legal issues

#### UNIT-III

10 Hours

**Regulatory affairs:** Introduction, Historical overview of Regulatory Affairs, Regulatory authorities, Role of Regulatory affairs department, Responsibility of Regulatory Affairs Professionals

**Regulatory requirements for drug approval:** Drug Development Teams, Non-Clinical Drug Development, Pharmacology, Drug Metabolism and Toxicology, General considerations of Investigational New Drug (IND) Application, Investigator's Brochure (IB) and New Drug Application (NDA), Clinical research / BE studies, Clinical Research Protocols, Biostatistics in Pharmaceutical Product Development, Data Presentation for FDA Submissions, Management of Clinical Studies.

**UNIT-IV****08 Hours**

**Quality management systems:** Quality management & Certifications: Concept of Quality, Total Quality Management, Quality by Design (QbD), Six Sigma concept, Out of Specifications (OOS), Change control, Introduction to ISO 9000 series of quality systems standards, ISO 14000, NABL, GLP

**UNIT-V****07 Hours**

**Indian Regulatory Requirements:** Central Drug Standard Control Organization (CDSCO) and State Licensing Authority: Organization, Responsibilities, Certificate of Pharmaceutical Product (COPP), Regulatory requirements and approval procedures for New Drugs.

**Recommended Books: (Latest Editions)**

1. Regulatory Affairs from Wikipedia, the free encyclopedia modified on 7<sup>th</sup> April available at [http://en.wikipedia.org/wiki/Regulatory\\_Affairs](http://en.wikipedia.org/wiki/Regulatory_Affairs).
2. International Regulatory Affairs Updates, 2005. available at <http://www.iraup.com/about.php>
3. Douglas J Pisano and David S. Mantus. Text book of FDA Regulatory Affairs A Guide for Prescription Drugs, Medical Devices, and Biologics' Second Edition.
4. Regulatory Affairs brought by learning plus, inc. available at <http://www.cgmp.com/ra.htm>.

## **BP 703T. PHARMACY PRACTICE (Theory)**

**45 Hours**

**Scope:** In the changing scenario of pharmacy practice in India, for successful practice of Hospital Pharmacy, the students are required to learn various skills like drug distribution, drug information, and therapeutic drug monitoring for improved patient care. In community pharmacy, students will be learning various skills such as dispensing of drugs, responding to minor ailments by providing suitable safe medication, patient counselling for improved patient care in the community set up.

**Objectives:** Upon completion of the course, the student shall be able to

1. know various drug distribution methods in a hospital
2. appreciate the pharmacy stores management and inventory control
3. monitor drug therapy of patient through medication chart review and clinical review
4. obtain medication history interview and counsel the patients
5. identify drug related problems
6. detect and assess adverse drug reactions
7. interpret selected laboratory results (as monitoring parameters in therapeutics) of specific disease states
8. know pharmaceutical care services
9. do patient counseling in community pharmacy;
10. appreciate the concept of Rational drug therapy.

### **Unit I:**

**10 Hours**

#### **a) Hospital and its organization**

Definition, Classification of hospital- Primary, Secondary and Tertiary hospitals, Classification based on clinical and non- clinical basis, Organization Structure of a Hospital, and Medical staffs involved in the hospital and their functions.

#### **b) Hospital pharmacy and its organization**

Definition, functions of hospital pharmacy, Organization structure, Location, Layout and staff requirements, and Responsibilities and functions of hospital pharmacists.

#### **c) Adverse drug reaction**

Classifications - Excessive pharmacological effects, secondary pharmacological effects, idiosyncrasy, allergic drug reactions, genetically determined toxicity, toxicity following sudden withdrawal of drugs, Drug interaction- beneficial interactions, adverse interactions, and pharmacokinetic drug interactions, Methods for detecting

drug interactions, spontaneous case reports and record linkage studies, and Adverse drug reaction reporting and management.

**d) Community Pharmacy**

Organization and structure of retail and wholesale drug store, types and design, Legal requirements for establishment and maintenance of a drug store, Dispensing of proprietary products, maintenance of records of retail and wholesale drug store.

**Unit II:**

**10 Hours**

**a) Drug distribution system in a hospital**

Dispensing of drugs to inpatients, types of drug distribution systems, charging policy and labelling, Dispensing of drugs to ambulatory patients, and Dispensing of controlled drugs.

**b) Hospital formulary**

Definition, contents of hospital formulary, Differentiation of hospital formulary and Drug list, preparation and revision, and addition and deletion of drug from hospital formulary.

**c) Therapeutic drug monitoring**

Need for Therapeutic Drug Monitoring, Factors to be considered during the Therapeutic Drug Monitoring, and Indian scenario for Therapeutic Drug Monitoring.

**d) Medication adherence**

Causes of medication non-adherence, pharmacist role in the medication adherence, and monitoring of patient medication adherence.

**e) Patient medication history interview**

Need for the patient medication history interview, medication interview forms.

**f) Community pharmacy management**

Financial, materials, staff, and infrastructure requirements.

**Unit III:**

**10 Hours**

**a) Pharmacy and therapeutic committee**

Organization, functions, Policies of the pharmacy and therapeutic committee in including drugs into formulary, inpatient and outpatient prescription, automatic stop order, and emergency drug list preparation.

**b) information services**

**Drug**

Drug and Poison information centre, Sources of drug information, Computerised services, and storage and retrieval of information.

**c) Patient counseling**

Definition of patient counseling; steps involved in patient counseling, and Special cases that require the pharmacist

**d) Education and training program in the hospital**

Role of pharmacist in the education and training program, Internal and external training program, Services to the nursing homes/clinics, Code of ethics for community pharmacy, and Role of pharmacist in the interdepartmental communication and community health education.

**e) Prescribed medication order and communication skills**

Prescribed medication order- interpretation and legal requirements, and Communication skills- communication with prescribers and patients.

**Unit IV**

**8 Hours**

**Budget preparation and implementation**

**a) Clinical Pharmacy**

Introduction to Clinical Pharmacy, Concept of clinical pharmacy, functions and responsibilities of clinical pharmacist, Drug therapy monitoring - medication chart review, clinical review, pharmacist intervention, Ward round participation, Medication history and Pharmaceutical care.

Dosing pattern and drug therapy based on Pharmacokinetic & disease pattern.

**b) Over the counter (OTC) sales**

Introduction and sale of over the counter, and Rational use of common over the counter medications.

**Unit V**

**7 Hours**

**a) Drug store management and inventory control**

Organisation of drug store, types of materials stocked and storage conditions, Purchase and inventory control: principles, purchase procedure, purchase order, procurement and stocking, Economic order quantity, Reorder quantity level, and Methods used for the analysis of the drug expenditure

**b) Investigational use of drugs**

Description, principles involved, classification, control, identification, role of hospital pharmacist, advisory committee.

**c) Interpretation of Clinical Laboratory Tests**

Blood chemistry, hematology, and urinalysis

**Recommended Books (Latest Edition):**

1. Merchant S.H. and Dr. J.S.Quadry. *A textbook of hospital pharmacy*, 4th ed. Ahmadabad: B.S. Shah Prakakshan; 2001.
2. Parthasarathi G, Karin Nyfort-Hansen, Milap C Nahata. *A textbook of Clinical Pharmacy Practice- essential concepts and skills*, 1<sup>st</sup> ed. Chennai: Orient Longman Private Limited; 2004.
3. William E. Hassan. *Hospital pharmacy*, 5th ed. Philadelphia: Lea & Febiger; 1986.
4. Tipnis Bajaj. *Hospital Pharmacy*, 1<sup>st</sup> ed. Maharashtra: Career Publications; 2008.
5. Scott LT. *Basic skills in interpreting laboratory data*, 4th ed. American Society of Health System Pharmacists Inc; 2009.
6. Parmar N.S. *Health Education and Community Pharmacy*, 18th ed. India: CBS Publishers & Distributers; 2008.

**Journals:**

1. Therapeutic drug monitoring. ISSN: 0163-4356
2. Journal of pharmacy practice. ISSN : 0974-8326
3. American journal of health system pharmacy. ISSN: 1535-2900 (online)
4. Pharmacy times (Monthly magazine)

## **BP 704T: NOVEL DRUG DELIVERY SYSTEMS (Theory)**

**45 Hours**

**Scope:** This subject is designed to impart basic knowledge on the area of novel drug delivery systems.

**Objectives:** Upon completion of the course student shall be able

1. To understand various approaches for development of novel drug delivery systems.
2. To understand the criteria for selection of drugs and polymers for the development of Novel drug delivery systems, their formulation and evaluation

### **Course content:**

#### **Unit-I**

**10 Hours**

**Controlled drug delivery systems:** Introduction, terminology/definitions and rationale, advantages, disadvantages, selection of drug candidates. Approaches to design controlled release formulations based on diffusion, dissolution and ion exchange principles. Physicochemical and biological properties of drugs relevant to controlled release formulations

**Polymers:** Introduction, classification, properties, advantages and application of polymers in formulation of controlled release drug delivery systems.

#### **Unit-II**

**10 Hours**

**Microencapsulation:** Definition, advantages and disadvantages, microspheres /microcapsules, microparticles, methods of microencapsulation, applications

**Mucosal Drug Delivery system:** Introduction, Principles of bioadhesion / mucoadhesion, concepts, advantages and disadvantages, transmucosal permeability and formulation considerations of buccal delivery systems

**Implantable Drug Delivery Systems:** Introduction, advantages and disadvantages, concept of implants and osmotic pump

#### **Unit-III**

**10 Hours**

**Transdermal Drug Delivery Systems:** Introduction, Permeation through skin, factors affecting permeation, permeation enhancers, basic components of TDDS, formulation approaches

**Gastroretentive drug delivery systems:** Introduction, advantages, disadvantages, approaches for GRDDS – Floating, high density systems, inflatable and gastroadhesive systems and their applications

**Nasopulmonary drug delivery system:** Introduction to Nasal and Pulmonary routes of drug delivery, Formulation of Inhalers (dry powder and metered dose), nasal sprays, nebulizers

#### **Unit-IV**

**08 Hours**

**Targeted drug Delivery:** Concepts and approaches advantages and disadvantages, introduction to liposomes, niosomes, nanoparticles, monoclonal antibodies and their applications

**Unit-V**

**07 Hours**

**Ocular Drug Delivery Systems:** Introduction, intra ocular barriers and methods to overcome –Preliminary study, ocular formulations and ocuserts

**Intrauterine Drug Delivery Systems:** Introduction, advantages and disadvantages, development of intra uterine devices (IUDs) and applications

**Recommended Books: (Latest Editions)**

1. Y W. Chien, Novel Drug Delivery Systems, 2<sup>nd</sup> edition, revised and expanded, Marcel Dekker, Inc., New York, 1992.
2. Robinson, J. R., Lee V. H. L, Controlled Drug Delivery Systems, Marcel Dekker, Inc., New York, 1992.
3. Encyclopedia of Controlled Delivery. Edith Mathiowitz, Published by Wiley Interscience Publication, John Wiley and Sons, Inc, New York. Chichester/Weinheim
4. N.K. Jain, Controlled and Novel Drug Delivery, CBS Publishers & Distributors, New Delhi, First edition 1997 (reprint in 2001).
5. S.P. Vyas and R.K. Khar, Controlled Drug Delivery -concepts and advances, Vallabh Prakashan, New Delhi, First edition 2002.

**Journals**

1. Indian Journal of Pharmaceutical Sciences (IPA)
2. Indian Drugs (IDMA)
3. Journal of Controlled Release (Elsevier Sciences)
4. Drug Development and Industrial Pharmacy (Marcel & Decker)
5. International Journal of Pharmaceutics (Elsevier Sciences)

**SEMESTER VIII**

## **BP801T. BIOSTATISTICS AND RESEARCH METHODOLOGY (Theory)**

**45 Hours**

**Scope:** To understand the applications of Biostatistics in Pharmacy. This subject deals with descriptive statistics, Graphics, Correlation, Regression, logistic regression Probability theory, Sampling technique, Parametric tests, Non Parametric tests, ANOVA, Introduction to Design of Experiments, Phases of Clinical trials and Observational and Experimental studies, SPSS, R and MINITAB statistical software's, analyzing the statistical data using Excel.

**Objectives:** Upon completion of the course the student shall be able to

- Know the operation of M.S. Excel, SPSS, R and MINITAB<sup>®</sup>, DoE (Design of Experiment)
- Know the various statistical techniques to solve statistical problems
- Appreciate statistical techniques in solving the problems.

### **Course content:**

#### **Unit-I**

**10 Hours**

**Introduction:** Statistics, Biostatistics, Frequency distribution

**Measures of central tendency:** Mean, Median, Mode- Pharmaceutical examples

**Measures of dispersion:** Dispersion, Range, standard deviation, Pharmaceutical problems

**Correlation:** Definition, Karl Pearson's coefficient of correlation, Multiple correlation - Pharmaceuticals examples

#### **Unit-II**

**10 Hours**

**Regression:** Curve fitting by the method of least squares, fitting the lines  $y = a + bx$  and  $x = a + by$ , Multiple regression, standard error of regression- Pharmaceutical Examples

**Probability:** Definition of probability, Binomial distribution, Normal distribution, Poisson's distribution, properties - problems

Sample, Population, large sample, small sample, Null hypothesis, alternative hypothesis, sampling, essence of sampling, types of sampling, Error-I type, Error-II type, Standard error of mean (SEM) - Pharmaceutical examples

**Parametric test:** t-test(Sample, Pooled or Unpaired and Paired) , ANOVA, (One way and Two way), Least Significance difference

#### **Unit-III**

**10 Hours**

**Non Parametric tests:** Wilcoxon Rank Sum Test, Mann-Whitney U test, Kruskal-Wallis test, Friedman Test

**Introduction to Research:** Need for research, Need for design of Experiments, Experiential Design Technique, plagiarism

**Graphs:** Histogram, Pie Chart, Cubic Graph, response surface plot, Counter Plot graph

**Designing the methodology:** Sample size determination and Power of a study, Report writing and presentation of data, Protocol, Cohorts studies, Observational studies, Experimental studies, Designing clinical trial, various phases.

#### **Unit-IV**

**8 Hours**

Blocking and confounding system for Two-level factorials

**Regression modeling:** Hypothesis testing in Simple and Multiple regression models

**Introduction to Practical components of Industrial and Clinical Trials Problems:**

Statistical Analysis Using Excel, SPSS, MINITAB<sup>®</sup>, DESIGN OF EXPERIMENTS, R - Online Statistical Software's to Industrial and Clinical trial approach

#### **Unit-V**

**7Hours**

**Design and Analysis of experiments:**

**Factorial Design:** Definition,  $2^2$ ,  $2^3$  design. Advantage of factorial design

**Response Surface methodology:** Central composite design, Historical design, Optimization Techniques

#### **Recommended Books (Latest edition):**

1. Pharmaceutical statistics- Practical and clinical applications, Sanford Bolton, publisher Marcel Dekker Inc. New York.
2. Fundamental of Statistics – Himalaya Publishing House- S.C.Guptha
3. Design and Analysis of Experiments –PHI Learning Private Limited, R. Pannerselvam,
4. Design and Analysis of Experiments – Wiley Students Edition, Douglas and C. Montgomery

## **BP 802T SOCIAL AND PREVENTIVE PHARMACY**

**Hours: 45**

### **Scope:**

The purpose of this course is to introduce to students a number of health issues and their challenges. This course also introduced a number of national health programmes. The roles of the pharmacist in these contexts are also discussed.

### **Objectives:**

After the successful completion of this course, the student shall be able to:

- Acquire high consciousness/realization of current issues related to health and pharmaceutical problems within the country and worldwide.
- Have a critical way of thinking based on current healthcare development.
- Evaluate alternative ways of solving problems related to health and pharmaceutical issues

### **Course content:**

#### **Unit I:**

**10 Hours**

**Concept of health and disease:** Definition, concepts and evaluation of public health. Understanding the concept of prevention and control of disease, social causes of diseases and social problems of the sick.

**Social and health education:** Food in relation to nutrition and health, Balanced diet, Nutritional deficiencies, Vitamin deficiencies, Malnutrition and its prevention.

**Sociology and health:** Socio cultural factors related to health and disease, Impact of urbanization on health and disease, Poverty and health

**Hygiene and health:** personal hygiene and health care; avoidable habits

#### **Unit II:**

**10 Hours**

**Preventive medicine:** General principles of prevention and control of diseases such as cholera, SARS, Ebola virus, influenza, acute respiratory infections, malaria, chicken guinea, dengue, lymphatic filariasis, pneumonia, hypertension, diabetes mellitus, cancer, drug addiction-drug substance abuse

#### **Unit III:**

**10 Hours**

**National health programs, its objectives, functioning and outcome of the following:** HIV AND AIDS control programme, TB, Integrated disease surveillance program (IDSP), National leprosy control programme, National mental health program, National

programme for prevention and control of deafness, Universal immunization programme, National programme for control of blindness, Pulse polio programme.

**Unit IV:**

**08 Hours**

National health intervention programme for mother and child, National family welfare programme, National tobacco control programme, National Malaria Prevention Program, National programme for the health care for the elderly, Social health programme; role of WHO in Indian national program

**Unit V:**

**07 Hours**

Community services in rural, urban and school health: Functions of PHC, Improvement in rural sanitation, national urban health mission, Health promotion and education in school.

**Recommended Books (Latest edition):**

1. Short Textbook of Preventive and Social Medicine, Prabhakara GN, 2<sup>nd</sup> Edition, 2010, ISBN: 9789380704104, JAYPEE Publications
2. Textbook of Preventive and Social Medicine (Mahajan and Gupta), Edited by Roy Rabindra Nath, Saha Indranil, 4<sup>th</sup> Edition, 2013, ISBN: 9789350901878, JAYPEE Publications
3. Review of Preventive and Social Medicine (Including Biostatistics), Jain Vivek, 6<sup>th</sup> Edition, 2014, ISBN: 9789351522331, JAYPEE Publications
4. Essentials of Community Medicine—A Practical Approach, Hiremath Lalita D, Hiremath Dhananjaya A, 2<sup>nd</sup> Edition, 2012, ISBN: 9789350250440, JAYPEE Publications
5. Park Textbook of Preventive and Social Medicine, K Park, 21<sup>st</sup> Edition, 2011, ISBN-14: 9788190128285, BANARSIDAS BHANOT PUBLISHERS.
6. Community Pharmacy Practice, Ramesh Adepu, BSP publishers, Hyderabad

**Recommended Journals:**

1. Research in Social and Administrative Pharmacy, Elsevier, Ireland

## **BP803ET. PHARMA MARKETING MANAGEMENT (Theory)**

**45 Hours**

### **Scope:**

The pharmaceutical industry not only needs highly qualified researchers, chemists and, technical people, but also requires skilled managers who can take the industry forward by managing and taking the complex decisions which are imperative for the growth of the industry. The Knowledge and Know-how of marketing management groom the people for taking a challenging role in Sales and Product management.

**Course Objective:** The course aims to provide an understanding of marketing concepts and techniques and their applications in the pharmaceutical industry.

### **Unit I**

**10 Hours**

#### **Marketing:**

Definition, general concepts and scope of marketing; Distinction between marketing & selling; Marketing environment; Industry and competitive analysis; Analyzing consumer buying behavior; industrial buying behavior.

#### **Pharmaceutical market:**

Quantitative and qualitative aspects; size and composition of the market; demographic descriptions and socio-psychological characteristics of the consumer; market segmentation & targeting. Consumer profile; Motivation and prescribing habits of the physician; patients' choice of physician and retail pharmacist. Analyzing the Market; Role of market research.

### **Unit II**

**10 Hours**

#### **Product decision:**

Classification, product line and product mix decisions, product life cycle, product portfolio analysis; product positioning; New product decisions; Product branding, packaging and labeling decisions, Product management in pharmaceutical industry.

### **Unit III**

**10 Hours**

#### **Promotion:**

Methods, determinants of promotional mix, promotional budget; An overview of personal selling, advertising, direct mail, journals, sampling, retailing, medical exhibition, public relations, online promotional techniques for OTC Products.

**Unit IV****10 Hours****Pharmaceutical marketing channels:**

Designing channel, channel members, selecting the appropriate channel, conflict in channels, physical distribution management: Strategic importance, tasks in physical distribution management.

**Professional sales representative (PSR):**

Duties of PSR, purpose of detailing, selection and training, supervising, norms for customer calls, motivating, evaluating, compensation and future prospects of the PSR.

**Unit V****10 Hours****Pricing:**

Meaning, importance, objectives, determinants of price; pricing methods and strategies, issues in price management in pharmaceutical industry. An overview of DPCO (Drug Price Control Order) and NPPA (National Pharmaceutical Pricing Authority).

**Emerging concepts in marketing:**

Vertical & Horizontal Marketing; Rural Marketing; Consumerism; Industrial Marketing; Global Marketing.

**Recommended Books: (Latest Editions)**

1. Philip Kotler and Kevin Lane Keller: Marketing Management, Prentice Hall of India, New Delhi
2. Walker, Boyd and Larreche : Marketing Strategy- Planning and Implementation, Tata MC GrawHill, New Delhi.
3. Dhruv Grewal and Michael Levy: Marketing, Tata MC Graw Hill
4. Arun Kumar and N Menakshi: Marketing Management, Vikas Publishing, India
5. Rajan Saxena: Marketing Management; Tata MC Graw-Hill (India Edition)
6. Ramaswamy, U.S & Nanakamari, S: Marketing Managemnt:Global Perspective, IndianContext,Macmilan India, New Delhi.
7. Shanker, Ravi: Service Marketing, Excell Books, New Delhi
8. Subba Rao Changanti, Pharmaceutical Marketing in India (GIFT – Excel series) Excel Publications.

## **BP804 ET: PHARMACEUTICAL REGULATORY SCIENCE (Theory)**

**45Hours**

**Scope:** This course is designed to impart the fundamental knowledge on the regulatory requirements for approval of new drugs, and drug products in regulated markets of India & other countries like US, EU, Japan, Australia, UK etc. It prepares the students to learn in detail on the regulatory requirements, documentation requirements, and registration procedures for marketing the drug products.

**Objectives:** Upon completion of the subject student shall be able to;

1. Know about the process of drug discovery and development
2. Know the regulatory authorities and agencies governing the manufacture and sale of pharmaceuticals
3. Know the regulatory approval process and their registration in Indian and international markets

### **Course content:**

#### **Unit I**

**10Hours**

##### **New Drug Discovery and development**

Stages of drug discovery, Drug development process, pre-clinical studies, non-clinical activities, clinical studies, Innovator and generics, Concept of generics, Generic drug product development.

#### **Unit II**

**10Hours**

##### **Regulatory Approval Process**

Approval processes and timelines involved in Investigational New Drug (IND), New Drug Application (NDA), Abbreviated New Drug Application (ANDA). Changes to an approved NDA / ANDA.

##### **Regulatory authorities and agencies**

Overview of regulatory authorities of India, United States, European Union, Australia, Japan, Canada (Organization structure and types of applications)

#### **Unit III**

**10Hours**

##### **Registration of Indian drug product in overseas market**

Procedure for export of pharmaceutical products, Technical documentation, Drug Master Files (DMF), Common Technical Document (CTD), electronic Common Technical

Document (eCTD), ASEAN Common Technical Document (ACTD)research.

#### **Unit IV**

**08Hours**

##### **Clinical trials**

Developing clinical trial protocols, Institutional Review Board / Independent Ethics committee - formation and working procedures, Informed consent process and procedures, GCP obligations of Investigators, sponsors & Monitors, Managing and Monitoring clinical trials, Pharmacovigilance - safety monitoring in clinical trials

#### **Unit V**

**07Hours**

##### **Regulatory Concepts**

Basic terminology, guidance, guidelines, regulations, Laws and Acts, Orange book, Federal Register, Code of Federal Regulatory, Purple book

##### **Recommended books (Latest edition):**

1. Drug Regulatory Affairs by Sachin Itkar, Dr. N.S. Vyawahare, Nirali Prakashan.
2. The Pharmaceutical Regulatory Process, Second Edition Edited by Ira R. Berry and Robert P. Martin, Drugs and the Pharmaceutical Sciences, Vol.185. Informa Health care Publishers.
3. New Drug Approval Process: Accelerating Global Registrations By Richard A Guarino, MD, 5<sup>th</sup> edition, Drugs and the Pharmaceutical Sciences, Vol.190.
4. Guidebook for drug regulatory submissions / Sandy Weinberg. By John Wiley & Sons. Inc.
5. FDA Regulatory Affairs: a guide for prescription drugs, medical devices, and biologics /edited by Douglas J. Pisano, David Mantus.
6. Generic Drug Product Development, Solid Oral Dosage forms, Leon Shargel and Isader Kaufer, Marcel Dekker series, Vol.143
7. Clinical Trials and Human Research: A Practical Guide to Regulatory Compliance By Fay A. Rozovsky and Rodney K. Adams
8. Principles and Practices of Clinical Research, Second Edition Edited by John I. Gallin and Frederick P. Ognibene
9. Drugs: From Discovery to Approval, Second Edition By Rick Ng

## **BP 805T: PHARMACOVIGILANCE (Theory)**

**45 hours**

**Scope:** This paper will provide an opportunity for the student to learn about development of pharmacovigilance as a science, basic terminologies used in pharmacovigilance, global scenario of Pharmacovigilance, train students on establishing pharmacovigilance programme in an organization, various methods that can be used to generate safety data and signal detection. This paper also develops the skills of classifying drugs, diseases and adverse drug reactions.

### **Objectives:**

*At completion of this paper it is expected that students will be able to (know, do, and appreciate):*

1. Why drug safety monitoring is important?
2. History and development of pharmacovigilance
3. National and international scenario of pharmacovigilance
4. Dictionaries, coding and terminologies used in pharmacovigilance
5. Detection of new adverse drug reactions and their assessment
6. International standards for classification of diseases and drugs
7. Adverse drug reaction reporting systems and communication in pharmacovigilance
8. Methods to generate safety data during pre clinical, clinical and post approval phases of drugs' life cycle
9. Drug safety evaluation in paediatrics, geriatrics, pregnancy and lactation
10. Pharmacovigilance Program of India (PvPI) requirement for ADR reporting in India
11. ICH guidelines for ICSR, PSUR, expedited reporting, pharmacovigilance planning
12. CIOMS requirements for ADR reporting
13. Writing case narratives of adverse events and their quality.

### **Course Content**

#### **Unit I**

**10 Hours**

##### **Introduction to Pharmacovigilance**

- History and development of Pharmacovigilance
- Importance of safety monitoring of Medicine
- WHO international drug monitoring programme
- Pharmacovigilance Program of India(PvPI)

##### **Introduction to adverse drug reactions**

- Definitions and classification of ADRs
- Detection and reporting
- Methods in Causality assessment
- Severity and seriousness assessment
- Predictability and preventability assessment
- Management of adverse drug reactions

##### **Basic terminologies used in pharmacovigilance**

- Terminologies of adverse medication related events
- Regulatory terminologies

## **Unit II**

**10 hours**

### **Drug and disease classification**

- Anatomical, therapeutic and chemical classification of drugs
- International classification of diseases
- Daily defined doses
- International Non proprietary Names for drugs

### **Drug dictionaries and coding in pharmacovigilance**

- WHO adverse reaction terminologies
- MedDRA and Standardised MedDRA queries
- WHO drug dictionary
- Eudravigilance medicinal product dictionary

### **Information resources in pharmacovigilance**

- Basic drug information resources
- Specialised resources for ADRs

### **Establishing pharmacovigilance programme**

- Establishing in a hospital
- Establishment & operation of drug safety department in industry
- Contract Research Organisations (CROs)
- Establishing a national programme

## **Unit III**

**10 Hours**

### **Vaccine safety surveillance**

- Vaccine Pharmacovigilance
- Vaccination failure
- Adverse events following immunization

### **Pharmacovigilance methods**

- Passive surveillance – Spontaneous reports and case series
- Stimulated reporting
- Active surveillance – Sentinel sites, drug event monitoring and registries
- Comparative observational studies – Cross sectional study, case control study and cohort study
- Targeted clinical investigations

### **Communication in pharmacovigilance**

- Effective communication in Pharmacovigilance
- Communication in Drug Safety Crisis management
- Communicating with Regulatory Agencies, Business Partners, Healthcare facilities & Media

## Unit IV

8 Hours

### Safety data generation

- Pre clinical phase
- Clinical phase
- Post approval phase (PMS)

### ICH Guidelines for Pharmacovigilance

- Organization and objectives of ICH
- Expedited reporting
- Individual case safety reports
- Periodic safety update reports
- Post approval expedited reporting
- Pharmacovigilance planning
- Good clinical practice in pharmacovigilance studies

## Unit V

7 hours

### Pharmacogenomics of adverse drug reactions

- Genetics related ADR with example focusing PK parameters.

### Drug safety evaluation in special population

- Paediatrics
- Pregnancy and lactation
- Geriatrics

### CIOMS

- CIOMS Working Groups
- CIOMS Form

### CDSCO (India) and Pharmacovigilance

- D&C Act and Schedule Y
- Differences in Indian and global pharmacovigilance requirements

### Recommended Books (Latest edition):

1. Textbook of Pharmacovigilance: S K Gupta, Jaypee Brothers, Medical Publishers.
2. Practical Drug Safety from A to Z By Barton Cobert, Pierre Biron, Jones and Bartlett Publishers.
3. Mann's Pharmacovigilance: Elizabeth B. Andrews, Nicholas, Wiley Publishers.
4. Stephens' Detection of New Adverse Drug Reactions: John Talbot, Patrick Walle, Wiley Publishers.
5. An Introduction to Pharmacovigilance: Patrick Waller, Wiley Publishers.
6. Cobert's Manual of Drug Safety and Pharmacovigilance: Barton Cobert, Jones & Bartlett Publishers.
7. Textbook of Pharmacoepidemiology edited by Brian L. Strom, Stephen E Kimmel, Sean Hennessy, Wiley Publishers.
8. A Textbook of Clinical Pharmacy Practice -Essential Concepts and Skills: G. Parthasarathi, Karin Nyfort Hansen, Milap C. Nahata
9. National Formulary of India
10. Text Book of Medicine by Yashpal Munjal

11. Text book of Pharmacovigilance: concept and practice by GP Mohanta and PK Manna

12. <http://www.whoumc.org/DynPage.aspx?id=105825&mn1=7347&mn2=7259&mn3=7297>

## **BP 806 ET. QUALITY CONTROL AND STANDARDIZATION OF HERBALS (Theory)**

**Scope:** In this subject the student learns about the various methods and guidelines for evaluation and standardization of herbs and herbal drugs. The subject also provides an opportunity for the student to learn cGMP, GAP and GLP in traditional system of medicines.

**Objectives:** Upon completion of the subject student shall be able to;

1. know WHO guidelines for quality control of herbal drugs
2. know Quality assurance in herbal drug industry
3. know the regulatory approval process and their registration in Indian and international markets
4. appreciate EU and ICH guidelines for quality control of herbal drugs

### **Unit I**

**10 hours**

Basic tests for drugs – Pharmaceutical substances, Medicinal plants materials and dosage forms

WHO guidelines for quality control of herbal drugs.

Evaluation of commercial crude drugs intended for use

### **Unit II**

**10 hours**

**Quality assurance in herbal drug industry** of cGMP, GAP, GMP and GLP in traditional system of medicine.

WHO Guidelines on current good manufacturing Practices (cGMP) for Herbal Medicines

WHO Guidelines on GACP for Medicinal Plants.

### **Unit III**

**10 hours**

EU and ICH guidelines for quality control of herbal drugs.

Research Guidelines for Evaluating the Safety and Efficacy of Herbal Medicines

### **Unit IV**

**08 hours**

Stability testing of herbal medicines. Application of various chromatographic techniques in standardization of herbal products.

Preparation of documents for new drug application and export registration

GMP requirements and Drugs & Cosmetics Act provisions.

**Unit V****07 hours**

Regulatory requirements for herbal medicines.

WHO guidelines on safety monitoring of herbal medicines in pharmacovigilance systems

Comparison of various Herbal Pharmacopoeias.

Role of chemical and biological markers in standardization of herbal products

**Recommended Books: (Latest Editions)**

1. Pharmacognosy by Trease and Evans
2. Pharmacognosy by Kokate, Purohit and Gokhale
3. Rangari, V.D., Text book of Pharmacognosy and Phytochemistry Vol. I, Carrier Pub., 2006.
4. Aggrawal, S.S., Herbal Drug Technology. Universities Press, 2002.

## BP 807 ET. COMPUTER AIDED DRUG DESIGN (Theory)

45 Hours

**Scope:** This subject is designed to provide detailed knowledge of rational drug design process and various techniques used in rational drug design process.

**Objectives:** Upon completion of the course, the student shall be able to understand

- Design and discovery of lead molecules
- The role of drug design in drug discovery process
- The concept of QSAR and docking
- Various strategies to develop new drug like molecules.
- The design of new drug molecules using molecular modeling software

### Course Content:

#### UNIT-I

10 Hours

##### Introduction to Drug Discovery and Development

Stages of drug discovery and development

##### Lead discovery and Analog Based Drug Design

Rational approaches to lead discovery based on traditional medicine, Random screening, Non-random screening, serendipitous drug discovery, lead discovery based on drug metabolism, lead discovery based on clinical observation.

**Analog Based Drug Design:** Bioisosterism, Classification, Bioisosteric replacement. Any three case studies

#### UNIT-II

10 Hours

##### Quantitative Structure Activity Relationship (QSAR)

SAR versus QSAR, History and development of QSAR, Types of physicochemical parameters, experimental and theoretical approaches for the determination of physicochemical parameters such as Partition coefficient, Hammett's substituent constant and Taft's steric constant. Hansch analysis, Free Wilson analysis, 3D-QSAR approaches like COMFA and COMSIA.

#### UNIT-III

10 Hours

##### Molecular Modeling and virtual screening techniques

**Virtual Screening techniques:** Drug likeness screening, Concept of pharmacophore mapping and pharmacophore based Screening,

**Molecular docking:** Rigid docking, flexible docking, manual docking, Docking based screening. *De novo* drug design.

**UNIT-IV****08 Hours****Informatics & Methods in drug design**

Introduction to Bioinformatics, chemoinformatics. ADME databases, chemical, biochemical and pharmaceutical databases.

**UNIT-V****07 Hours**

**Molecular Modeling:** Introduction to molecular mechanics and quantum mechanics. Energy Minimization methods and Conformational Analysis, global conformational minima determination.

**Recommended Books (Latest Editions)**

1. Robert GCK, ed., "Drug Action at the Molecular Level" University Park Press Baltimore.
2. Martin YC. "Quantitative Drug Design" Dekker, New York.
3. Delgado JN, Remers WA eds "Wilson & Gisvolds's Text Book of Organic Medicinal & Pharmaceutical Chemistry" Lippincott, New York.
4. Foye WO "Principles of Medicinal chemistry 'Lea & Febiger.
5. Koro Ikovas A, Burckhalter JH. "Essentials of Medicinal Chemistry" Wiley Interscience.
6. Wolf ME, ed "The Basis of Medicinal Chemistry, Burger's Medicinal Chemistry" John Wiley & Sons, New York.
7. Patrick Graham, L., An Introduction to Medicinal Chemistry, Oxford University Press.
8. Smith HJ, Williams H, eds, "Introduction to the principles of Drug Design" Wright Boston.
9. Silverman R.B. "The organic Chemistry of Drug Design and Drug Action" Academic Press New York.

**BP808ET: CELL AND MOLECULAR BIOLOGY (Elective subject)**

**45 Hours**

**Scope:**

- Cell biology is a branch of biology that studies cells – their physiological properties, their structure, the organelles they contain, interactions with their environment, their life cycle, division, death and cell function.
- This is done both on a microscopic and molecular level.
- Cell biology research encompasses both the great diversity of single-celled organisms like bacteria and protozoa, as well as the many specialized cells in multi-cellular organisms such as humans, plants, and sponges.

**Objectives:** Upon completion of the subject student shall be able to;

- Summarize cell and molecular biology history.
- Summarize cellular functioning and composition.
- Describe the chemical foundations of cell biology.
- Summarize the DNA properties of cell biology.
- Describe protein structure and function.
- Describe cellular membrane structure and function.
- Describe basic molecular genetic mechanisms.
- Summarize the Cell Cycle

**Course content:**

**Unit I**

**10Hours**

- a) Cell and Molecular Biology: Definitions theory and basics and Applications.
- b) Cell and Molecular Biology: History and Summation.
- c) Properties of cells and cell membrane.
- d) Prokaryotic versus Eukaryotic
- e) Cellular Reproduction
- f) Chemical Foundations – an Introduction and Reactions (Types)

**Unit II**

**10 Hours**

- a) DNA and the Flow of Molecular Information
- b) DNA Functioning
- c) DNA and RNA
- d) Types of RNA
- e) Transcription and Translation

**Unit III**

**10 Hours**

- a) Proteins: Defined **and** Amino Acids
- b) Protein Structure

- c) Regularities in Protein Pathways
- d) Cellular Processes
- e) Positive Control and significance of Protein Synthesis

**Unit IV**

**08 Hours**

- a) Science of Genetics
- b) Transgenics and Genomic Analysis
- c) Cell Cycle analysis
- d) Mitosis and Meiosis
- e) Cellular Activities and Checkpoints

**Unit V**

**07 Hours**

- a) Cell Signals: Introduction
- b) Receptors for Cell Signals
- c) Signaling Pathways: Overview
- d) Misregulation of Signaling Pathways
- e) Protein-Kinases: Functioning

**Recommended Books (latest edition):**

1. W.B. Hugo and A.D. Russel: Pharmaceutical Microbiology, Blackwell Scientific publications, Oxford London.
2. Prescott and Dunn., Industrial Microbiology, 4<sup>th</sup> edition, CBS Publishers & Distributors, Delhi.
3. Pelczar, Chan Kreig, Microbiology, Tata McGraw Hill edn.
4. Malcolm Harris, Balliere Tindall and Cox: Pharmaceutical Microbiology.
5. Rose: Industrial Microbiology.
6. Probisher, Hinsdill et al: Fundamentals of Microbiology, 9th ed. Japan
7. Cooper and Gunn's: Tutorial Pharmacy, CBS Publisher and Distribution.
8. Pepler: Microbial Technology.
9. Edward: Fundamentals of Microbiology.
10. N.K.Jain: Pharmaceutical Microbiology, Vallabh Prakashan, Delhi
11. Bergeys manual of systematic bacteriology, Williams and Wilkins- A Waverly company
12. B.R. Glick and J.J. Pasternak: Molecular Biotechnology: Principles and Applications of RecombinantDNA: ASM Press Washington D.C.
13. RA Goldshy et. al., : Kuby Immunology.

**BP809ET. COSMETIC SCIENCE**  
(Theory)

**45Hours**

**UNIT I**

**10Hours**

Classification of cosmetic and cosmeceutical products  
Definition of cosmetics as per Indian and EU regulations, Evolution of cosmeceuticals from cosmetics, cosmetics as quasi and OTC drugs

**Cosmetic excipients:** Surfactants, rheology modifiers, humectants, emollients, preservatives. Classification and application

**Skin:** Basic structure and function of skin.

**Hair:** Basic structure of hair. Hair growth cycle.

**Oral Cavity:** Common problem associated with teeth and gums.

**UNIT II**

**10 Hours**

**Principles of formulation and building blocks of skin care products:**

Face wash,

Moisturizing cream, Cold Cream, Vanishing cream and their advantages and disadvantages. Application of these products in formulation of cosmeceuticals.

**Antiperspirants & deodorants-** Actives & mechanism of action.

**Principles of formulation and building blocks of Hair care products:**

Conditioning shampoo, Hair conditioner, anti-dandruff shampoo.

Hair oils.

Chemistry and formulation of Para-phenylene diamine based hair dye.

Principles of formulation and building blocks of oral care products:

Toothpaste for bleeding gums, sensitive teeth. Teeth whitening, Mouthwash.

**UNIT III**

**10 Hours**

Sun protection, Classification of Sunscreens and SPF.

**Role of herbs in cosmetics:**

Skin Care: Aloe and turmeric

Hair care: Henna and amla.

Oral care: Neem and clove

**Analytical cosmetics:** BIS specification and analytical methods for shampoo, skin-cream and toothpaste.

**UNIT IV**

**08 Hours.**

Principles of Cosmetic Evaluation: Principles of sebumeter, corneometer. Measurement of TEWL, Skin Color, Hair tensile strength, Hair combing properties

Soaps, and syndet bars. Evolution and skin benefits.

## **UNIT V**

**07 Hours**

Oily and dry skin, causes leading to dry skin, skin moisturisation. Basic understanding of the terms Comedogenic, dermatitis.

Cosmetic problems associated with Hair and scalp: Dandruff, Hair fall causes

Cosmetic problems associated with skin: blemishes, wrinkles, acne, prickly heat and body odor.

Antiperspirants and Deodorants- Actives and mechanism of action

### **References**

- 2) Cosmetics – Formulations, Manufacturing and Quality Control, P.P. Sharma, 4<sup>th</sup> Edition, Vandana Publications Pvt. Ltd., Delhi.
- 3) Text book of cosmeticology by Sanju Nanda & Roop K. Khar, Tata Publishers.

## BP810 ET. PHARMACOLOGICAL SCREENING METHODS

45 Hours

**Scope:** This subject is designed to impart the basic knowledge of preclinical studies in experimental animals including design, conduct and interpretations of results.

### Objectives

Upon completion of the course the student shall be able to,

- Appreciate the applications of various commonly used laboratory animals.
- Appreciate and demonstrate the various screening methods used in preclinical research
- Appreciate and demonstrate the importance of biostatistics and research methodology
- Design and execute a research hypothesis independently

<b>Unit –I</b>	<b>08 Hours</b>
<b>Laboratory Animals:</b> Study of CPCSEA and OECD guidelines for maintenance, breeding and conduct of experiments on laboratory animals, Common lab animals: Description and applications of different species and strains of animals. Popular transgenic and mutant animals. Techniques for collection of blood and common routes of drug administration in laboratory animals, Techniques of blood collection and euthanasia.	
<b>Unit –II</b>	<b>10 Hours</b>
<b>Preclinical screening models</b> a. Introduction: Dose selection, calculation and conversions, preparation of drug solution/suspensions, grouping of animals and importance of sham negative and positive control groups. Rationale for selection of animal species and sex for the study. <b>b. Study of screening animal models for</b> Diuretics, nootropics, anti-Parkinson's, antiasthmatics, <b>Preclinical screening models:</b> for CNS activity- analgesic, antipyretic, anti-inflammatory, general anaesthetics, sedative and hypnotics, antipsychotic, antidepressant, antiepileptic, antiparkinsonism, alzheimer's disease	

<p><b>Unit –III</b>  <b>Preclinical screening models:</b> for ANS activity, sympathomimetics, sympatholytics, parasympathomimetics, parasympatholytics, skeletal muscle relaxants, drugs acting on eye, local anaesthetics</p>	
<p><b>Unit –IV</b>  <b>Preclinical screening models:</b> for CVS activity- antihypertensives, diuretics, antiarrhythmic, antidyslipidemic, anti aggregatory, coagulants, and anticoagulants  Preclinical screening models for other important drugs like antiulcer, antidiabetic, anticancer and antiasthmatics.</p>	
<p><b>Research methodology and Bio-statistics</b>  Selection of research topic, review of literature, research hypothesis and study design  Pre-clinical data analysis and interpretation using Students ‘t’ test and One-way ANOVA. Graphical representation of data</p>	<p><b>05 Hours</b></p>

**Recommended Books (latest edition):**

1. Fundamentals of experimental Pharmacology-by M.N.Ghosh
2. Hand book of Experimental Pharmacology-S.K.Kulakarni
3. CPCSEA guidelines for laboratory animal facility.
4. Drug discovery and Evaluation by Vogel H.G.
5. Drug Screening Methods by Suresh Kumar Gupta and S. K. Gupta
6. Introduction to biostatistics and research methods by PSS Sundar Rao and J Richard

## **BP 811 ET. ADVANCED INSTRUMENTATION TECHNIQUES**

**45 Hours**

**Scope:** This subject deals with the application of instrumental methods in qualitative and quantitative analysis of drugs. This subject is designed to impart advanced knowledge on the principles and instrumentation of spectroscopic and chromatographic hyphenated techniques. This also emphasizes on theoretical and practical knowledge on modern analytical instruments that are used for drug testing.

**Objectives:** Upon completion of the course the student shall be able to

- understand the advanced instruments used and its applications in drug analysis
- understand the chromatographic separation and analysis of drugs.
- understand the calibration of various analytical instruments
- know analysis of drugs using various analytical instruments.

### **Course Content:**

#### **UNIT-I**

**10 Hours**

##### **Nuclear Magnetic Resonance spectroscopy**

Principles of H-NMR and C-NMR, chemical shift, factors affecting chemical shift, coupling constant, Spin - spin coupling, relaxation, instrumentation and applications

**Mass Spectrometry-** Principles, Fragmentation, Ionization techniques – Electron impact, chemical ionization, MALDI, FAB, Analyzers-Time of flight and Quadrupole, instrumentation, applications

#### **UNIT-II**

**10 Hours**

**Thermal Methods of Analysis:** Principles, instrumentation and applications of Thermo gravimetric Analysis (TGA), Differential Thermal Analysis (DTA), Differential Scanning Calorimetry (DSC)

**X-Ray Diffraction Methods:** Origin of X-rays, basic aspects of crystals, X-ray

Crystallography, rotating crystal technique, single crystal diffraction, powder diffraction, structural elucidation and applications.

#### **UNIT-III**

**10 Hours**

**Calibration and validation-**as per ICH and USFDA guidelines

##### **Calibration of following Instruments**

Electronic balance, UV-Visible spectrophotometer, IR spectrophotometer,

Fluorimeter, Flame Photometer, HPLC and GC

**UNIT-IV**

**08 Hours**

**Radio immune assay:** Importance, various components, Principle, different methods, Limitation and Applications of Radio immuno assay

**Extraction techniques:** General principle and procedure involved in the solid phase extraction and liquid-liquid extraction

**UNIT-V**

**07 Hours**

**Hyphenated techniques-LC-MS/MS, GC-MS/MS, HPTLC-MS.**

**Recommended Books (Latest Editions)**

1. Instrumental Methods of Chemical Analysis by B.K Sharma
2. Organic spectroscopy by Y.R Sharma
3. Text book of Pharmaceutical Analysis by Kenneth A. Connors
4. Vogel's Text book of Quantitative Chemical Analysis by A.I. Vogel
5. Practical Pharmaceutical Chemistry by A.H. Beckett and J.B. Stenlake
6. Organic Chemistry by I. L. Finar
7. Organic spectroscopy by William Kemp
8. Quantitative Analysis of Drugs by D. C. Garrett
9. Quantitative Analysis of Drugs in Pharmaceutical Formulations by P. D. Sethi
10. Spectrophotometric identification of Organic Compounds by Silverstein

## BP 812 ET. DIETARY SUPPLEMENTS AND NUTRACEUTICALS

**No. of hours :3**

**Tutorial:1**

**Credit point:4**

### **Scope :**

This subject covers foundational topic that are important for understanding the need and requirements of dietary supplements among different groups in the population.

### **Objective:**

This module aims to provide an understanding of the concepts behind the theoretical applications of dietary supplements. By the end of the course, students should be able to :

1. Understand the need of supplements by the different group of people to maintain healthy life.
2. Understand the outcome of deficiencies in dietary supplements.
3. Appreciate the components in dietary supplements and the application.
4. Appreciate the regulatory and commercial aspects of dietary supplements including health claims.

### **UNIT I**

**07 hours**

- a. Definitions of Functional foods, Nutraceuticals and Dietary supplements. Classification of Nutraceuticals, Health problems and diseases that can be prevented or cured by Nutraceuticals i.e. weight control, diabetes, cancer, heart disease, stress, osteoarthritis, hypertension etc.
- b. Public health nutrition, maternal and child nutrition, nutrition and ageing, nutrition education in community.
- c. Source, Name of marker compounds and their chemical nature, Medicinal uses and health benefits of following used as nutraceuticals/functional foods: Spirulina, Soyabean, Ginseng, Garlic, Broccoli, Gingko, Flaxseeds

### **UNIT II**

**15 hours**

Phytochemicals as nutraceuticals: Occurrence and characteristic features(chemical nature medicinal benefits) of following

- a) Carotenoids-  $\alpha$  and  $\beta$ -Carotene, Lycopene, Xanthophylls, leutin
- b) Sulfides: Diallyl sulfides, Allyl trisulfide.
- c) Polyphenolics: Reservetrol
- d) Flavonoids- Rutin , Naringin, Quercitin, Anthocyanidins, catechins, Flavones
- e) Prebiotics / Probiotics.: Fructo oligosaccharides, Lacto bacillum
- f) Phyto estrogens : Isoflavones, daidzein, Geebustin, lignans
- g) Tocopherols
- h) Proteins, vitamins, minerals, cereal, vegetables and beverages as functional foods: oats, wheat bran, rice bran, sea foods, coffee, tea and the like.

### **UNIT III**

**07 hours**

- a) Introduction to free radicals: Free radicals, reactive oxygen species, production of free radicals in cells, damaging reactions of free radicals on lipids, proteins, Carbohydrates, nucleic acids.

- b) Dietary fibres and complex carbohydrates as functional food ingredients..

#### **UNIT IV**

**10 hours**

- a) Free radicals in Diabetes mellitus, Inflammation, Ischemic reperfusion injury, Cancer, Atherosclerosis, Free radicals in brain metabolism and pathology, kidney damage, muscle damage. Free radicals involvement in other disorders. Free radicals theory of ageing.
- b) Antioxidants: Endogenous antioxidants – enzymatic and nonenzymatic antioxidant defence, Superoxide dismutase, catalase, Glutathione peroxidase, Glutathione Vitamin C, Vitamin E,  $\alpha$ - Lipoic acid, melatonin  
Synthetic antioxidants: Butylated hydroxy Toluene, Butylated hydroxy Anisole.
- c) Functional foods for chronic disease prevention

#### **UNIT V**

**06 hours**

- a) Effect of processing, storage and interactions of various environmental factors on the potential of nutraceuticals.
- b) Regulatory Aspects; FSSAI, FDA, FPO, MPO, AGMARK. HACCP and GMPs on Food Safety. Adulteration of foods.
- c) Pharmacopoeial Specifications for dietary supplements and nutraceuticals.

**Semester VIII – Elective course on Pharmaceutical Product Development No of**

**Hours: 3**

**Tutorial:1**

**Credit points:4**

**Unit-I**

**10 Hours**

Introduction to pharmaceutical product development, objectives, regulations related to preformulation, formulation development, stability assessment, manufacturing and quality control testing of different types of dosage forms

**Unit-II**

**10 Hours**

An advanced study of Pharmaceutical Excipients in pharmaceutical product development with a special reference to the following categories

- i. Solvents and solubilizers
- ii. Cyclodextrins and their applications
- iii. Non - ionic surfactants and their applications
- iv. Polyethylene glycols and sorbitols
- v. Suspending and emulsifying agents
- vi. Semi solid excipients

**Unit-III**

**10 Hours**

An advanced study of Pharmaceutical Excipients in pharmaceutical product development with a special reference to the following categories

- i. Tablet and capsule excipients
- ii. Directly compressible vehicles
- iii. Coat materials
- iv. Excipients in parenteral and aerosols products
- v. Excipients for formulation of NDDS

Selection and application of excipients in pharmaceutical formulations with specific industrial applications

**Unit-IV**

**08 Hours**

Optimization techniques in pharmaceutical product development. A study of various optimization techniques for pharmaceutical product development with specific examples. Optimization by factorial designs and their applications. A study of QbD and its application in pharmaceutical product development.

**Unit-V**

**07 Hours**

Selection and quality control testing of packaging materials for pharmaceutical product development- regulatory considerations.

12. Pharmaceutical Dosage Forms – Parenteral Medication Vol 1 & 2, Kenneth E. Avis and H.A. Libermann.
13. Advanced Review Articles related to the topics.

# **ORDINANCE**

**For the Degree of**

**Doctor of Philosophy (Ph.D.)**

**Shobhit University**

**Gangoh, Saharanpur**

**2023**

[Includes the provisions & guidelines of UGC (Minimum Standards and Procedure for award of Ph.D. Degree) Regulations 2022]

## **Ordinance for the Degree of Doctor of Philosophy (2023)**

All Schools/Institutes/Departments/Centers/Colleges of Shobhit University, Gangoh shall be eligible to offer Ph.D. programmes. None of the School/Institute/Department/Center/College shall conduct any Ph.D. programme through distance mode. These rules shall be applicable to all the new candidates joining Ph.D. programmes of Shobhit University on/ or after its implementation. This ordinance entails all the provisions of the gazette notification of UGC (Minimum Standards and Procedure for Award of Ph.D. Degree), Regulation, 2022, and amendments made there in from time to time.

### **1. Important Definitions**

- a. “Act” means the University Grants Commission Act,1956 (3 of 1956);
- b. “Adjunct Faculty” means a part-time or contingent instructor, but not full-time faculty member hired to teach by a Higher Educational Institution;
- c. “Cumulative Grade Point Average (CGPA)” means a measure of the overall cumulative performance of a student over all semesters. The CGPA is the ratio of total credit points secured by a student in various courses in all semesters and the sum of the total credits of all courses in all semesters. It is expressed up to two decimal places;
- d. “Credit” means the number of hours of instruction required per week over the duration of a semester. A three-credit course in a semester means three one-hour lectures per week, with each one-hour lecture counted as one credit;
- e. “Course” means one of the specified units which go to comprise a programme of study;
- f. “Course Work” means courses of study prescribed by the School/Department/ Centre to be undertaken by a student registered for the Ph.D. Degree;
- g. “Degree” means a degree awarded by a Higher Educational Institution in accordance with the provisions of section 22 (3) of the Act;
- h. “External Examiner” means an academician/researcher with published research work who is not part of the Higher Educational Institution where the Ph.D. scholar has registered for the Ph.D. programme;
- i. “Grade Point” means a numerical weight allotted to each letter grade on a 10-point scale;
- j. “Guide/Research Supervisor” means an academician/researcher recognized by Higher Educational Institution to supervise the Ph.D. scholar for his/her research;
- k. “Interdisciplinary Research” means research conducted by a Ph.D. scholar in two or more academic disciplines;
- l. “Plagiarism” means the practice of taking someone else’s work or idea and passing them as one’s own;
- m. “Programme” means a higher education programme pursued for a degree specified by the

Commission under sub-section (3) of section 22 of the Act;

- n. "Prospectus" means any document, whether in print or otherwise, issued for providing fair and transparent information relating to a Higher Educational Institution and programmes, to the general public (including to those seeking admission in such Higher Educational Institutions) by the Higher Educational Institutions;
- o. "Research Proposal" means a brief write-up giving an outline of the proposed research work which the Ph.D. scholar shall submit along with the application for registration for Ph.D. programme;
- p. "University" means a Higher Educational Institution established or incorporated by or under a Central Act, a Provincial Act, or a State Act, and shall include any institution for higher education deemed to be a University under Section 3 of the Act.

## **2. Categories of candidates for admission to Ph.D. programs**

### **(i) Full-time candidates**

A **full-time** Ph.D. candidate shall be required to remain present in the University campus till submission of his/her Ph.D. thesis. He/she shall also have to undertake minimum 6 hours per week of academic work load as assigned by the School/ Institute/Department/Center/College in which, he/she is registered for Ph.D. programme besides the course work and Ph.D. work. Such candidates are eligible to receive assistantship from the University or fellowship from CSIR/UGC or any other funding agency.

### **(ii) Part-time candidates**

A **part-time** Ph.D. candidate can be a regular Shobhit University academic or non-academic faculty/staff member who satisfies the eligibility requirements. Other eligible candidates can be those who are sponsored by Public Sector Undertaking/ Research and Development Organizations/ Private Industries/ Service Sectors/ Educational Institutions/ any other State and Central Government Organization

**(iii) Inter-disciplinary Ph.D. (I-Ph.D.)** is intended for students whose interests cross multiple academic disciplines. Such students who have excellent academic record and clear understanding of their research topic are eligible for this program. The program seeks to offer an intimate and varied community in which the students bring strong individual initiative together with the shared research concerns and expertise of a diverse supervisory committee in diverse studies that cross traditional disciplinary borders.

### **(iv) Eligibility**

A candidate seeking registration for the Degree of Doctor of Philosophy (Ph.D.) in Shobhit University must possess the following qualifications:

- (a) Candidates for admission to the Ph D programme shall have a Master's degree or a professional degree declared equivalent to the Master's degree by the corresponding statutory regulatory body, with at least 55% marks in aggregate or its equivalent grade 'B' in the UGC 7-point scale (or an equivalent grade in a point scale wherever grading system is followed) or an equivalent degree/ M.Phil. from a foreign educational Institution accredited by an

Assessment and Accreditation Agency which is approved, recognized or authorized by an authority, established or incorporated under a law in its home country or any other statutory authority in that country for the purpose of assessing, accrediting or assuring quality and standards of educational institutions.

- (b) Candidates who have cleared the M.Phil. Course work with at least 55% marks in aggregate or its equivalent grade 'B' in the UGC 7-point scale (or an equivalent grade in a point scale wherever grading system is followed) and successfully completing the M.Phil. Degree shall be eligible to proceed to do research work leading to the Ph. D. Degree in the same Institution in an integrated programme.
- (c) Bachelor's Degree in Engineering/Pharmacy with 75 % or more marks or the grade equivalent in relevant field of Engineering/ Technology/ Architecture /Pharmacy of a University or its equivalent, with at least five years of experience in Public Sector Undertaking/ Research and Development Organizations/ Private Industries/ Service Sectors/ Educational Institutions/ any other State and Central Government Organizations
- (d) A relaxation of 5% of marks, from 55% to 50%, or an equivalent relaxation of grade, may be allowed for those belonging to SC/ST/OBC (non-creamy layer)/Differently-abled and other categories of candidates as per the decision of the Commission from time to time, or for those who had obtained their Master's degree prior to 19th September, 1991. The eligibility marks of 55% (or an equivalent grade in a point scale wherever grading system is followed) and the relaxation of 5% to the categories mentioned above are permissible based only on the qualifying marks without including the grace mark procedures.

### **3. Application**

A candidate seeking registration for Ph.D. degree must apply to the University on the prescribed application form. The application form shall be accompanied by:

- (i) Documents supporting all academic qualifications (Self Attested copies of the mark-sheets/ grade-sheets and degree certificates).
- (ii) Documents supporting his/her previous work experience, if any.
- (iii) Prescribed application fee, as applicable.
- (iv) No Objection Certificate (NOC) from the employer, in case the candidate is employed.
- (v) Migration Certificate.

### **4. Admission Procedure**

The university shall notify well in advance in the institutional website and through advertisement in national newspapers, of which at least one shall be in the regional language, the number of seats for admission, subject/discipline-wise distribution of available seats, criteria for admission, procedure for admission, examination centre(s) where entrance test(s) shall be conducted and all other relevant information for the benefit of the candidates.

The eligible candidates shall apply on the prescribed application available in the university or on the website. The duly completed form with the prescribed fee shall be submitted to the Registrar, Shobhit University, Gangoh, Saharanpur-247341 on or before the notified date.

The University shall decide on an annual basis through their academic bodies a predetermined and manageable number of Ph.D. scholars to be admitted depending on the number of available Research Supervisors and other academic and physical facilities available, keeping in mind the norms regarding the scholar- teacher ratio [as indicated in clause 5(vi)], laboratory, library and such other facilities. The university shall adhere to the National/State-level reservation policy, as applicable.

The University shall admit candidates by a two stage process through:

(a) An Entrance Test shall be deemed to be qualified with 50% marks. The syllabus of the Entrance Test shall consist of 50% of research methodology and 50% shall be subject specific. The Entrance Test shall be conducted at the Centre(s) notified in advance (changes of Centres, if any, also to be notified well in advance) at the level of the University and

(b) An interview/viva-voce to be organized by the University where the candidates are required to discuss their research interest/area through a presentation before a duly constituted Department/School Level Research Committee. A weightage of 70 % for the entrance test and 30 % for the performance in the interview/viva- voce shall be given.

The interview/viva voce shall also consider the following aspects.

- (i) The candidate possesses the competence for the proposed research.
- (ii) The research work can be suitably undertaken at the institution.
- (iii) The proposed area of research can contribute to new/additional knowledge.

The University shall maintain the list of all the Ph.D. registered students on its website on year-wise basis. The list shall include the name of the registered candidate, topic of his/her research, name of his/her supervisor/co-supervisor, date of enrolment/registration.

*Note: The candidates who have qualified UGC/CSIR (JRF) examination/ NET/SLET/GATE/GPAT/CEED & similar national level test or are holder of teacher fellowship or have passed M.Phil. Degree, from a recognized university may be exempted from the University entrance test. However, they shall be required to appear for personal interview and to discuss their proposed research area(s).*

## **5. Allocation of Supervisor(s)**

- (i) The allocation of the supervisor for a selected student shall be made formally by the School/ Institutes/departments/Centers/College depending upon the research interest of the student and the availability of a supervisor.
- (ii) Only a full time regular teacher of the working as Professor/Associate Professor of the University with a Ph.D., and at least five research publications in peer-reviewed or refereed journals and permanent faculty members working as Assistant Professors with a Ph.D., and at least three research publications in peer-reviewed or refereed

journals can act as a supervisor. The external supervisors are not allowed. However, Co-Supervisor can be allowed in inter-disciplinary areas from other departments of the same institute or from other related institutions with the recommendation of the Research Advisory Committee and approval by the competent authority.

- (iii) The allocation of Research Supervisor for a selected research scholar shall be decided by the School/Institutes/departments/Centers/College concerned depending on the number of scholars per Research Supervisor, the available specialization among the Supervisors and research interests of the scholars as indicated by them at the time of interview/viva voce.
- (iv) Co-Supervisor(s) from within the same department or other departments of the same institution or other institutions may be permitted with the approval of the competent authority. Adjunct Faculty members shall not act as Research Supervisors and can only act as co-supervisors
- (v) In case of topics which are of inter-disciplinary nature where it is felt that the expertise has to be supplemented from outside, the School/ Institutes/departments/Centers/College may appoint a Research Supervisor from within, who shall be known as the Research Supervisor, and a Co-Supervisor from outside the Department/ Faculty/College/Institution on such terms and conditions as may be specified and agreed upon by the consenting Institutions/Colleges.
- (vi) An eligible Professor/Associate Professor/Assistant Professor can guide up to eight (8) / six (6) / four (4) Ph.D. scholars, respectively, at any given time.

**Note:** A close relative of the candidate cannot function as a Supervisor or Co-Supervisor.

*Close relative shall include father, mother, husband, wife, son, daughter, brother, sister, uncle, nephew, father-in-law, mother-in-law, or any other such relation as may be determined by the competent authority.*

## **6. Admission of International Students in Ph.D. Programme (As per UGC Regulations, 2022)**

- (i) Each supervisor can guide up to two international research scholars on a supernumerary basis over and above the permitted number of Ph.D. scholars as specified in above clause 5(vi).
- (ii) The eligibility criteria shall be the same for the international candidates as mentioned in clause 2 (iv) and the admission of such candidates shall also be done as per the clause 4 of this ordinance. The other rules applicable to international students shall be followed.

**Note:** At any point, the total number of Ph.D. scholars under a faculty member, either as a supervisor or a co-supervisor, shall not exceed the number prescribed in clause 5(vi) and clause 6(i).

## **7. (a) Pre-requisite for the submission of synopsis**

### **Course Work**

All Ph.D. students shall be required to undertake course-work for a minimum period of one semester as a pre-requisite which shall include a course on Research Methodology, review of

published research in the relevant field besides one or more courses from the relevant field/ interdisciplinary area, as may be prescribed by the Supervisors/ Research Advisory Committee/University Research Degree Committee (URDC) as the case may be.

The course work may be carried out by the Ph.D. candidates in sister departments/ institutions either within or outside the University, if recommended by the URDC for which due credit shall be given to them.

#### **8. Credit Requirements, number, duration, syllabus, minimum standards for completion, etc.**

- (a) The Credit requirement for the Ph.D. coursework is a minimum of **12 credits**, including a **“Research and Publication Ethics”** course. The Research Advisory Committee can also recommend UGC recognized online courses as part of the credit requirements for the Ph.D. programme.
- (b) The course work shall be treated as prerequisite for Ph.D. preparation. A minimum of four credits shall be assigned to one or more courses on Research Methodology which could cover areas such as quantitative methods, computer applications, research ethics and review of published research in the relevant field, training, field work, etc. Other courses shall be advanced level courses preparing the students for Ph.D. degree.
- (c) All courses prescribed Ph.D. course work shall be in conformity with the credit hour instructional requirement and shall specify content, instructional and assessment methods. They shall be duly approved by the authorized academic bodies.
- (d) The Department where the scholar pursues his/her research shall prescribe the course(s) to him/her based on the recommendations of the Research Advisory Committee, as stipulated under sub-Clause 10 (a) below, of the research scholar.
- (e) All candidates admitted to the Ph.D. programs shall be required to complete the prescribed course work during the initial one or two semesters.
- (f) Candidates already holding M. Phil. degree and admitted to the Ph.D. programme, or those who have already completed the course work in M. Phil and have been permitted to proceed to the Ph.D. in integrated course, may be exempted by the Department from the Ph.D. course work. All other candidates admitted to the Ph.D. programme shall be required to complete the prescribed Ph.D. course work.
- (g) Grades in the course work, including research methodology courses shall be finalized after a combined assessment by the Research Advisory Committee and the Department and the final grades shall be communicated to the Institution/College.
- (h) A Ph.D. scholar has to obtain a minimum of 55% of marks or its equivalent grade in the UGC 10-point scale (or an equivalent grade/CGPA in a point scale wherever grading system is followed) in the course work in order to be eligible to continue in the programme and submit the dissertation/thesis.

The attendance monitoring shall be done in the same way as envisaged in the ordinance for PG Courses. Teaching and evaluation of Ph.D. course work and subject code will be as follows: -

Sr. No.	Name of the Course	Credits	Assessment Method
1.	Research Methodology	4	Written Exam.
2.	Research and Publication Ethics	2	Written Exam.
3.	Recent Advances in the Specialization	4	Written Exam.
4.	Review of Literature	2	Seminar
<b>Total</b>		<b>12</b>	

### Subject Codes

- (i) The code for Research Methodology shall be **RM-901**
- (ii) The codes for other courses will be based on Alpha-Numeric pattern as under: -  
There will be two alphabets indicating the subject/ Specialization viz.  
EC-Electronics & Communication, CS-Computer Science, ME-Mechanical Engineering BT-Biotechnology, BI-Bio-Informatics, BM-Biomedical Sciences, MG-Management, PS-Pharmaceutical Sciences, MA-Mathematics, PH-Physics, CH-Chemistry, AG-Agriculture and AI-Agri-Informatics, HI-History, ED-Education, EN-English, LW-Law, FC-Fundamentals of Computer Applications and so on.

#### After 2 alphabets, there will be three numbers as under:

- 1<sup>st</sup> number will be 9 indicating a Ph.D. degree.
- 2<sup>nd</sup> number will be either 0 indicating a theory course or 5 indicating a practical course or 8 indicating a seminar course.
- 3<sup>rd</sup> number will be 1 or 2 indicating the number of courses being offered

**For Example-** A code **PS-902** will stand for first Ph.D. Theory Course of Pharmaceutical Sciences to be offered, the second course and a code of **PS-981** will stand for third Ph.D. seminar based course of Pharmaceutical Sciences.

After approval of the synopsis, the candidate shall undertake proposed research work and produce a thesis within a reasonable time as stipulated.

### 9. University Research Degree Committee (URDC)

The University Research Degree Committee (URDC) shall consist of the following members:

- Vice-Chancellor/ Nominee of the Vice-Chancellor: Chairperson
- Director or equivalent of the concerned School: Member
- One Professor/Assoc. Professor (other than the Supervisor(s)), having the knowledge of the research area of the candidate: Member
- Supervisor(s) Member

- Two subject-experts (Professors/ Assoc. Professors/ Readers/ Senior Scientists or equivalent) from any University/ Institution other than Shobhit University, to be nominated by the Vice-Chancellor from the panel submitted by the concerned Director: Member

**Note:** The presence of at least one subject expert is necessary for holding any meeting of URDC

## **10. Duties and Powers of URDC**

(a) The duties and powers of URDC shall be, but not limited to the following:

- URDC shall examine the synopsis (appendix 1 of this ordinance) of the proposed Ph.D. work for registration and shall give a clear report as, “The topic and the synopsis approved/ The synopsis to be submitted again/ Rejected”.
- URDC may monitor the progress of the candidate and give recommendations
- Any such duty as mentioned in the ordinance or otherwise

(b) At least three members shall form the quorum for the meeting of the URDC. However, presence of one of the external experts is essential for holding the meeting.

(c) The minutes of the URDC meeting shall be reported by the Director concerned in the next meeting of the Academic Council for ratification.

## **11. Research Advisory Committee and its functions**

(a) There shall be a Research Advisory Committee comprised of 3 or more members, for each Ph.D. scholar. The Research Supervisor of the scholar shall be the Convener of this Committee. This Committee shall have the following responsibilities:

- To review the research proposal and finalize the topic of research;
- To guide the research scholar to develop the study design and methodology of research and identify the course(s) that he/she may have to do.
- To periodically review and assist in the progress of the research work of the research scholar.

(b) A research scholar shall appear before the Research Advisory Committee once in six months to make a presentation of the progress of his/her work for evaluation and further guidance. The six monthly progress reports shall be submitted by the Research Advisory Committee to the Institution/College with a copy to the research scholar.

(c) In case the progress of the research scholar is unsatisfactory, the Research Advisory Committee shall record the reasons for the same and suggest corrective measures. If the research scholar fails to implement these corrective measures, the Research Advisor Committee may recommend to the university with specific reasons for cancellation of the registration of the research scholar.

## 12. Place of Work

- (a) The School/Institute/Department/Center/College in the University shall be the place of work for the full-time candidates.
- (b) In case of a part-time candidate, a Research Lab/ Institution/ University/ Industry/ Centre where the candidate works and which has the required research facilities and there is formal permission for use of the laboratory to the student for research work, can also be the place of work, subject to approval of URDC.

**Note:** *In case the candidate changes his/her University/ Institution, the work place of the candidate may also change to the new work place of the candidate, if it has the required research facilities. The candidate is required to seek prior approval from the URDC for any such change.*

## 13. Transfers from Other Universities

- (a) A candidate who has been admitted in or has registered for Ph.D. program in any other recognized university and meets the requisite eligibility for admission to the Ph.D. program of this university, may be allowed to transfer his/her admission to the university provided:
  - (i) He/she produces an NOC from previous university
  - (ii) The URDC recommends and the Academic Council approves the transfer
- (b) Further the extent of transfer of credits earned towards the course work, publication and progress of research in the previous university shall be decided by the URDC.
- (c) In such cases of transfer, the date of admission in the university shall be decided by the URDC considering the date of admission/registration in the previous university and the extent of achievements. The candidate shall fulfill the remaining requirements as decided by the URDC.
- (d) In case of relocation of a Ph. D woman research scholar due to marriage or otherwise, the research data shall be allowed to be transferred to the university provided that all other conditions are followed in letter and spirit and the research work does not pertain to the project secured by parent institution/supervisor from any funding agency and due credit is given to parent guide for the part of research already done. The transfer of data is permissible only if it is independent project of the research scholar.\in other cases the data/material shall remain with the parent institution.
- (e) The candidate shall deposit the requisite fee as applicable.

## 14. Duration for submitting Ph.D. Thesis

### (a) Full-time Research Scholars

- (i) A full-time research scholar is not permitted to submit his/her thesis earlier than 36 months from the date of registration, including the duration of the course work. Further he/she shall publish at least **two** research papers related to his/her work in refereed Indian Journals or at least **one** paper in refereed International Journal (preferably SCOPUS indexed), before the submission of the thesis and produce evidence for the same either in the form of an acceptance letter or the reprint of the paper. A review paper published in any journal shall not count towards the above requirement, however, filed/published patents can be considered.
- (ii) The maximum time allowed for submission of the thesis shall be 6 years (72 months)

from the date of registration. This period can be extended by one year by the vice-Chancellor under special and genuine circumstances. No further extension shall be granted and the registration to Ph.D. shall stand cancelled after the expiry of 7 years( 84 months) from the date of registration.

(iii) Vice-Chancellor may permit a candidate to get re-registered on the same topic on payment of a re-registration fee as decided by the University from time to time, for a further period of two years. The requirement of regular attendance shall not apply to such re-registered candidates. In such a case, the candidate shall apply to the University one month before the expiry of the last extension period. If the candidate is unable to submit his/her thesis in the stipulated period, his/her registration shall stand automatically cancelled, and the University shall not be bound to inform the candidate about the cancellation.

**(b) Part-time Research Scholars**

(i) A part-time research scholar is not permitted to submit his/her thesis earlier than 42 months from the date of registration, including the duration of course work. Further he/she shall publish at least **two** research papers related to his/her work in refereed Indian Journals or at least **one** paper in a refereed International Journal (preferably SCOPUS indexed), before the submission of the thesis and produce evidence for the same in the form of an acceptance letter or the reprint of the paper. A review paper published in any journal(s) shall not count towards the above requirement, however, filed/published patents can be considered.

(ii) The maximum time allowed for submission of the thesis shall be 6 years (72 months) from the date of registration. This period can be extended by one year by the Vice-Chancellor under special and genuine circumstances. No further extension shall be granted and the registration to Ph.D. shall stand cancelled after the expiry of 7 years (84 months) from the date of registration.

(iii) Vice-Chancellor may permit a candidate to get re-registered on the same topic on payment of a re-registration fee as decided by the University from time to time, for a further period of two years. The requirement of regular attendance shall not apply to such re-registered candidates. In such a case, the candidate shall apply to the University one month before the expiry of the last extension period. If the candidate is unable to submit his/her thesis in the stipulated period, his/her registration shall stand automatically cancelled, and the University shall not be bound to inform the candidate about the cancellation.

(c) The period for submission of thesis can be reduced by 6 months on the recommendation of URDC if a candidate has published at least 04 (Four) research papers in National/International Journals that are indexed in the SCOPUS/Web of science or other renowned database as applicable.

**Note 1:** *Application for an extension can be considered only when it has the recommendations of the supervisor(s).*

**Note 2:** *Extension of period after 6 years shall not be automatic. Application for extension shall be*

*considered if submitted to the office of the Director of the concerned School/ Institutes/departments/Centers/College 4-6 months prior to the date of expiry of 72 months period, as the case may be.*

**Note 3:** *Maternity Leave/Child Care Leave for up to 240 days in the entire duration of the Ph.D. programme may be provided in case of Female Research Candidate.*

## **15. Change of Supervisor**

### **(a) Supervisor**

- (i) The change of supervisor can be permitted by the Vice-Chancellor subject to ratification by the URDC on production of the No Objection Certificates (NOC) from the Supervisor(s).
- (ii) Vice-Chancellor, subject to ratification by the URDC may permit the supervisor who has left the University or has retired from the university service, to continue as the supervisor if a request to this effect is received from the concerned supervisor. If no such request is received within one month, the supervisor may be removed by the Vice Chancellor.

### **(b) Co-Supervisor**

In case of non-availability of the co-supervisor for any reason, the Vice-Chancellor, subject to ratification by the URDC, can either permit another co-supervisor (under clause 5) or allow the candidate to work and submit the thesis under the Supervisor alone.

## **16. Cancellation of Registration**

The registration of a candidate to a Ph.D. programme may be cancelled on the basis of following.

- (i) Automatically, on the expiry of the period of extension granted by the Vice-Chancellor or the maximum time allowed under Clause 12(a)(iii) or 12(b)(iii), as the case may be, in case the extension has not been sought from the Vice-Chancellor.
- (ii) If the candidate is found involved in an act of gross indiscipline, unlawful activities, plagiarism and/or any such activity that may endanger the peace in the University campus.
- (iii) If the candidate fails to comply the provisions of this ordinance or any other relevant rules pertaining to Ph.D.

## **17. Progress Reports**

- (a) The candidate shall submit a progress report (Annexure –1) every 6 months (not later than 3 weeks of completing 6 months).
- (b) The progress report shall be signed by the candidate and the Supervisor(s).

## 18. Submission of Thesis

- (a) Based upon the research work done, the candidate may modify the synopsis, before three months of the submission of thesis and shall present it to the URDC for approval. Prior to submission of the thesis, the student shall make a pre-submission presentation in the School/Institute/Department/Center/College before a committee constituted by the Dean/Director/Principal and approved by the Vice Chancellor that may be open to all faculty members and research students, for getting feedback and comments, which may be suitably incorporated into the draft thesis under the advice of the Supervisor. This committee shall include, but not limited to the Dean/Director/Principal or as the case may be as Chairperson and supervisor(s) & other relevant persons from or outside as members. The committee will formally submit the report on the performance of the candidate in the pre-submission presentation. The candidate shall be permitted to submit the thesis to the University after incorporating the modifications/ suggestions made by the above committee, if any. The Supervisors shall certify that the modifications/ suggestions made by the above committee have been duly incorporated.
- (b) The University shall seek an assurance with evidence that the thesis is free of plagiarism and other forms of academic dishonesty. While submitting for the evaluation, the thesis shall have an undertaking from the research scholar and a certificate from the Research Supervisor attesting to the originality of the work, vouching that there is no plagiarism and that the work has not been submitted for the award of any other degree/diploma of the University where the work was carried out, or to any other university or institution
- (c) The candidate shall submit to the University the following documents at the time of submission of the Ph.D. thesis.
  - (i) Four copies of the Synopsis approved by the URDC and four copies of the Summary of the thesis.
  - (ii) Four spiral-bound typed (on both sides) copies of thesis. The thesis shall also be accompanied by:
    - (a) A certificate from the candidate (Annexure –2).
    - (b) A certificate from the supervisor (Annexure – 3 & 4).
    - (c) An appendix at the end of the thesis containing reprints of the research papers already published.
    - (d) Self-attested photocopies of the acceptance letters of the research papers accepted for publication.
    - (e) List of communicated research papers along with author(s) name(s), name of the Journal to which the paper has been communicated and the date of communication.
  - (iii) A copy of the receipt of applicable examination fee, along with no dues certificate.

- (iv) A certificate from the Supervisor in terms of Clause 16(a), if applicable.
- (v) A soft copy on CD/ DVD of the items referred to in Clause (i) and (ii) above.
- (vi) An undertaking from the research scholar countersigned by the Supervisor(s) attesting to the originality of the work, vouching that there is no plagiarism.

## 19. Evaluation of the thesis

- (a) The supervisor shall inform through the Director of the School to the Registrar of the University about the intent to submit the thesis two months before its submission along with
  - (i) Four copies of the synopsis, duly approved by the URDC.
  - (ii) Names and contact details of at least eight examiners, not below the rank of an Associate Professor in the research area of the candidate, in a sealed envelope. The list must also include at least two names of examiners who are from outside the State in which the University is located. It may include the names of one or two names of examiners from outside India.

**Note:** *The name of any close relative of the candidate or of the supervisor shall not be included in the panel of examiners (as defined under clause 5)*

- (b) From this panel, the Vice-Chancellor shall appoint **three** examiners ensuring that one of the examiners is from outside the State. One of the Examiners may be appointed from outside the country. The Vice-Chancellor may include any new name.
- (c) The examiners would be requested to evaluate the thesis and submit the evaluation report within three months of the receipt of thesis. In case of inability shown by the examiner for evaluation of thesis, the Vice-Chancellor may appoint alternate examiner(s). In case of delay of more than 3 months in sending the evaluation report by any examiner, the Registrar would request the examiner(s) to send the report at the earliest in the interest of the candidate(not later than one month) failing which the Vice-Chancellor may appoint alternative examiner(s) after intimation to the existing examiner(s).
- (d) For awarding the Ph.D. degree, the thesis must comply with the following conditions:
  - (i) It must be an original piece of research work characterized either by the discovery of new facts or by fresh approach towards the interpretation of the existing facts or theories. In either case, it should evince the candidate's capacity to make critical examination and sound judgment.
  - (ii) It must be satisfactory in language and presentation of the subject matter.
- (f) The examiners shall specifically report on the prescribed proforma whether the thesis fulfils the requirements of the clauses 19(d)(i) and (ii). They shall clearly recommend whether the thesis be:

- (i) Approved as it is,
- (ii) Approved after minor revision,
- (iii) Be resubmitted after major revision with
  - a) Major rewriting  
and/or
  - b) Some extra work,

The examiners shall also answer the following:

- a) Do you agree to re-evaluate the revised thesis? (Yes/No)
- b) If re-evaluation is not needed, should the candidate be allowed to appear in the viva-voce examination with the revised thesis? (Yes/No)
- (iv) Rejected (In such a case, the Examiner should clearly mention the reason(s) for rejection)
- (f)
  - (i) If at least two examiners clearly recommend for the viva-voce examination and award of the degree, then the Ph.D. viva-voce examination shall be held.
  - (ii) If one examiner recommends for the viva-voce examination and the other two suggest modifications, or all the three examiners suggest modifications, then the candidate shall be asked to re-submit the thesis within one year from the date of communication after revising it in the light of modifications suggested by the examiner(s).
  - (iv) The revised thesis shall be sent to the examiner(s) who suggested modifications and accepted to re-evaluate the thesis, for final opinion. If at least two of the examiners recommend for viva-voce examination and award of degree, then Ph.D. viva-voce examination will be held. Otherwise the Vice-Chancellor may refer the case to a high level committee. The decision of the committee will be final.
  - (v) In case, the thesis is recommended by the examiners with minor modifications, the same shall be incorporated in the thesis before the viva-voce examination.
- (g) In case the thesis is recommended, an open viva-voce examination of the candidate shall be held by the viva-voce Board comprising of.
  - (i) One External Examiner who will be one of the thesis examiners. (The name of the external examiner shall be approved by the Vice-Chancellor)
  - (ii) Director of the concerned School.
  - (iii) Supervisor(s)

The suggestion/ modifications suggested by the Examiners and Viva Voce Board should be incorporated in the thesis and four hard-bound copies (print both sides) should be submitted for record.

- (h) The date, time and venue of viva-voce examination shall be notified by the Registrar and the copies of the reports of the Examiners will be provided to the Supervisor(s) in a sealed envelope at least one week in advance. At the time of viva-voce examination, the Viva Voce Board shall be provided copies of the reports of the examiners.

(i) The candidate shall present the work embodied in the thesis before the Board of examiners, members of faculty, research scholars and other persons interested in the subject. After the presentation of the research work, the members of the Board shall ask questions together with the questions, raised in the examiners' reports. After the formal viva-voce is over, the members of the audience can also ask questions.

- (j) The viva-voce Board shall give a final decision and a clear verdict whether the candidate be awarded the Ph.D. degree or be asked to re-appear for viva-voce examination once again. In case of the second verdict, the candidate shall be required to re-appear for viva-voce before the same Board, on a date to be decided by the University.

## **20. Award of Ph.D. Degree**

- (a) After successfully clearing the viva-voce examination, the candidate shall be awarded Ph.D. degree after the approval of the Executive Council.
- (b) The award of Ph.D. degree can be withdrawn by the University in case the thesis submitted by the candidate is found to be a duplication of an old work or pirated research work.

**21.** No research scholar shall join any other course of study or appear at any other examination conducted by any University leading to a degree (except Certificate Course of Languages, Research Methodology, Statistics, and Computer Courses etc).

**22.** The approved thesis shall be published only after obtaining permission from the University and such publication shall state on the title page itself that **this was a thesis approved for the award of the Ph.D. degree of the Shobhit University.**

## **23. Provisional Degree**

The candidate may be issued a Provisional Certificate after successful completion of the examination procedure in accordance with the provisions of the UGC (Minimum Standards and Procedure for Awards of Ph.D. Degree) Regulations 2016 and after the Vice-Chancellor approves the recommendation of the Viva-Voce Board.

## **24. Depository with UGC**

Following the successful completion of the evaluation process and announcement of the award of Ph.D., the University shall submit a soft copy (in the form of CD/DVD) of the Ph.D. thesis to the UGC within a period of 30 days for hosting the same in INFLIBNET to be made accessible to all Institutions/ Universities.

**25.** Notwithstanding anything contained in the Ordinance, all the Ph.D. candidates/ research scholars shall be governed by the rules and procedures prevailing at the time of registration.

**26.** Notwithstanding anything stated in this Ordinance, for any unforeseen issues arising, and not covered by the Ordinance, or in the event of difference of interpretation, the decision of the

Vice-Chancellor shall be final.

## **Appendix – 1**

### **Format of Synopsis**

The synopsis (preferably not exceeding 5000 words) shall contain the following :

- (i) Topic of the research work.
- (ii) Area/Specialization of the research work.
- (iii) Aims and objectives of research work.
- (iv) Methodology of the research work.
- (v) A survey of literature in the area of research.
- (vi) The impact of the research work on academics/industry/society.
- (vii) The proposed plan of work: It will include a tentative schedule of research work.
- (viii) A list of equipments, software and other tools/ facilities, needed for the proposed research as part of the required Lab facility and its availability/ provisions made.
- (ix) Bibliography.
- (x) List of previous publications of the candidates, if any.

## **Annexure-1**

### **Progress Report**

**(To be submitted every 6 months from the date of Registration)**

Name of the School/Centre where registered : .....

1. Name of the Research Scholar : .....

2. Registration No. and the Date of Registration : .....

3. Topic of Research : .....

4. Name(s) of the Supervisor(s) 1) .....

2) .....

5. Period for which the report is being submitted: From.....to.....

6. Report (Brief details of the work done, papers published/ communicated, conferences attended/ paper(s) presented, etc.) ( may use additional sheets, if required)

**Supervisor(s)**

**Research Scholar**

Note : 1. Please attach one copy each of the previous Progress Report(s), if any.

2. Please attach copies of papers published/communicated, if mentioned in the above progress report.

## **Annexure-2**

### **Declaration by the Candidate**

I, hereby, declare that the work presented in this thesis, entitled ..... in fulfillment of the requirements for the award of Degree of Doctor of Philosophy in....., submitted to the School of / Centre for ..... at Shobhit University, Gangoh, Saharanpur is an authentic record of my own research work carried out under the supervision of .....

I also declare that the work embodied in the present thesis

- (i) is my original work and has not been copied from any Journal/thesis/book, and
- (ii) has not been submitted by me for any other Degree or Diploma of any university/ institution.

**Signature of the candidate**

### **Annexure-3**

#### **Certificate of the Supervisor(s)**

This is to certify that the thesis, entitled “.....” submitted by ..... for the award of Degree of Doctor Philosophy in the School of / Centre for ..... of Shobhit University, , Gangoh, Saharanpur is a record of authentic work carried out by him/her under my/our supervision.

To the best of my/our knowledge, the matter embodied in this thesis is the original work of the candidate and has not been submitted for the award of any other degree or diploma of any university or institution.

It is further certified that he/she has worked with me/us for a period of ..... in the School of / Center for ..... , Shobhit University, , Gangoh, Saharanpur.

**(Supervisor)**

## **Annexure-4**

### **Certificate of the Co-Supervisor(s)**

This is to certify that the thesis entitled “.....” submitted by ..... for the award of Degree of Doctor Philosophy in the School of / Center for ..... of Shobhit University, Gangoh, Saharanpur is a record of authentic work carried out by him/her under my/our supervision.

To the best of my/our knowledge, the matter embodied in this thesis is the original work of the candidate and has not been submitted for the award of any other degree or diploma.

It is further certified that he/she has worked with me for a period of ..... in the School/ Center/Institute/College/ Department of .....

**(Co-Supervisor)**

**ORDINANCE**

**For**

**The Degree**

**of**

**Doctor of Philosophy (Ph.D.)**

**Shobhit University**

**Gangoh, Saharanpur**

**2018**

## **Ordinance for the Degree of Doctor of Philosophy (2018)**

All Schools/Institutes/Departments/Centers/Colleges of Shobhit University, Gangoh shall be eligible to offer Ph.D. programmes. None of the School/Institute/Department/Center/College shall conduct any Ph.D. programme through distance mode. These rules shall be applicable to all the new candidates joining Ph.D. programmes of Shobhit University on/ or after July 1, 2018. This ordinance entails all the provisions of the gazette notification of UGC (Minimum Standards and Procedure for Award of Ph.D. Degree), Regulation, 2016, and amendments made there in from time to time.

### **1. Categories of candidates for admission to Ph.D. programmes**

- **Full-time** candidates
- **Part-time** candidates

A **full-time** Ph.D. candidate shall be required to remain present in the University campus till submission of his/her Ph.D. thesis. He/she shall also have to undertake minimum 6 hours per week of academic work load as assigned by the School/Institutes/departments/Centers/College in which, he/she is registered for Ph.D. programme besides the course work and Ph.D. work. Such candidates are eligible to receive assistantship from the University or fellowship from CSIR/UGC or any other funding agency.

A **part-time** Ph.D. candidate can be a regular Shobhit University academic or non-academic faculty/staff member who satisfies the eligibility requirements. Other eligible candidates can be those who are sponsored by Public Sector Undertaking/ Research and Development Organizations/ Private Industries/ Service Sectors/ Educational Institutions/ any other State and Central Government Organization

**Inter-disciplinary Ph.D (IPhD)** is intended for students whose interests cross multiple academic disciplines. Such students who have excellent academic record and clear understanding of their research topic are eligible for this program. The program seeks to offer an intimate and varied community in which the students bring strong individual initiative together with the shared research concerns and expertise of a diverse supervisory committee in diverse studies that cross traditional disciplinary borders.

### **Eligibility**

A candidate seeking registration for the Degree of Doctor of Philosophy (Ph.D.) in Shobhit University must possess the following qualifications:

- (a) Candidates for admission to the Ph D programme shall have a Master's degree or a professional degree declared equivalent to the Master's degree by the corresponding statutory regulatory body, with at least 55% marks in aggregate or its equivalent grade 'B' in the UGC 7-point scale (or an equivalent grade in a point scale wherever grading system is followed) or an equivalent degree/ M.Phil. from a foreign educational Institution accredited by an Assessment and Accreditation Agency which is approved, recognized or authorized by an authority, established or incorporated under a law in its home country or any other statutory authority in that country for the purpose of assessing, accrediting or assuring quality and standards of educational institutions.
- (b) Candidates who have cleared the M.Phil. course work with at least 55% marks in aggregate or its equivalent grade 'B' in the UGC 7-point scale (or an equivalent grade in a point scale

wherever grading system is followed) and successfully completing the M.Phil. Degree shall be eligible to proceed to do research work leading to the Ph. D. Degree in the same Institution in an integrated programme.

- (c) A person whose M.Phil. dissertation has been evaluated and the viva voce is pending may be admitted to the Ph.D. programme of the same Institution.
  
- (d) Bachelor's Degree in Engineering with 75 % or more marks or the grade equivalent in relevant field of Engineering/ Technology/ Architecture of a University or its equivalent, with at least five years of experience in Public Sector Undertaking/ Research and Development Organizations/ Private Industries/ Service Sectors/ Educational Institutions/ any other State and Central Government Organizations
  
- (e) A relaxation of 5% of marks, from 55% to 50%, or an equivalent relaxation of grade, may be allowed for those belonging to SC/ST/OBC (non-creamy layer)/Differently-abled and other categories of candidates as per the decision of the Commission from time to time, or for those who had obtained their Master's degree prior to 19th September, 1991. The eligibility marks of 55% (or an equivalent grade in a point scale wherever grading system is followed) and the relaxation of 5% to the categories mentioned above are permissible based only on the qualifying marks without including the grace mark procedures.

## **2. Application**

A candidate seeking registration for Ph.D. degree must apply to the University on the prescribed application form. The application form shall be accompanied by:

- (i) Documents supporting all academic qualifications (Self Attested copies of the mark-sheet/ grade-sheet and degree certificates).
- (ii) Documents supporting his/her previous work experience, if any.
- (iii) Prescribed application fee, as applicable.
- (iv) No Objection Certificate (NOC) from the employer, in case the candidate is employed.
- (v) Migration Certificate.

## **3. Admission Procedure**

The university shall notify well in advance in the institutional website and through advertisement in at least two (2) national newspapers, of which at least one (1) shall be in the regional language, the number of seats for admission, subject/discipline-wise distribution of available seats, criteria for admission, procedure for admission, examination centre(s) where entrance test(s) shall be conducted and all other relevant information for the benefit of the candidates.

The eligible candidates shall apply on the prescribed application available in the university or on the website. The duly completed form with the prescribed fee shall be submitted to the Registrar, Shobhit University, Gangoh, Saharanpur-247341 on or before the notified date.

The University shall decide on an annual basis through their academic bodies a predetermined and manageable number of Ph.D. scholars to be admitted depending on the number of available Research Supervisors and other academic and physical facilities available, keeping in mind the norms regarding the scholar- teacher ratio [as indicated in clause 5(v)], laboratory, library and such other facilities. The university shall adhere to the National/State-level reservation policy, as applicable.

The University shall admit candidates by a two stage process through:

(i) An Entrance Test shall be qualifying with qualifying marks as 50%. The syllabus of the Entrance Test shall consist of 50% of research methodology and 50% shall be subject specific. The Entrance Test shall be conducted at the Centre(s) notified in advance (changes of Centres, if any, also to be notified well in advance) at the level of the University and

(ii) An interview/viva-voce to be organized by the University where the candidates are required to discuss their research interest/area through a presentation before a duly constituted Department Research Committee.

The interview/viva voce shall also consider the following aspects, viz. whether:

(i) The candidate possesses the competence for the proposed research.

(ii) The research work can be suitably undertaken at the Institution/College.

(iii) The proposed area of research can contribute to new/additional knowledge.

The University shall maintain the list of all the Ph.D. registered students on its website on year-wise basis. The list shall include the name of the registered candidate, topic of his/her research, name of his/her supervisor/co-supervisor, date of enrolment/registration.

*Note: The candidates who have qualified UGC/CSIR (JRF) examination/ NET/SLET/GATE/GPAT or are holder of teacher fellowship or have passed M.Phil. Degree, from a recognized university may be exempted from the University entrance test. However, they shall be required to appear for personal interview and to discuss their proposed research area(s).*

## **5. Allocation of Supervisor(s)**

The allocation of the supervisor for a selected student shall be made formally by the School/ Institutes/departments/Centers/College depending upon the research interest of the student and the availability of a supervisor.

(i) Any regular Professor of the University with at least five research publications in refereed journals and any regular Associate/Assistant Professor of the university/institution deemed to be a university/college with a Ph.D. degree and at least two research publications in refereed journals may be recognized as Research Supervisor. Provided that in areas/disciplines where there is no or only a limited number of refereed journals, the Institution may relax the above condition for recognition of a person as Research Supervisor with reasons recorded in writing.

(ii) Only a full time regular teacher of the concerned University can act as a supervisor. The external supervisors are not allowed. However, Co-Supervisor can be allowed in inter-disciplinary areas from other departments of the same institute or from other related institutions with the approval of the Research Advisory Committee.

- (iii) The allocation of Research Supervisor for a selected research scholar shall be decided by the School/Institutes/departments/Centers/College concerned depending on the number of scholars per Research Supervisor, the available specialization among the Supervisors and research interests of the scholars as indicated by them at the time of interview/viva voce.
- (iv) In case of topics which are of inter-disciplinary nature where it is felt that the expertise has to be supplemented from outside, the School/ Institutes/departments/Centers/College may appoint a Research Supervisor from within, who shall be known as the Research Supervisor, and a Co-Supervisor from outside the Department/ Faculty/College/Institution on such terms and conditions as may be specified and agreed upon by the consenting Institutions/Colleges.
- (v) A Research Supervisor/Co-supervisor who is a Professor, at any given point of time, cannot guide more than three (3) M. Phil and Eight (8) Ph.D. scholars. An Associate Professor as Research Supervisor can guide up to a maximum of two (2) M. Phil and six (6) Ph.D. scholars and an Assistant Professor as Research Supervisor can guide up to a maximum of one (1) M. Phil and four (4) Ph.D. scholars.
- (vi) In case of relocation of an Ph.D. woman scholar due to marriage or otherwise, the research data shall be allowed to be transferred to the University to which the scholar intends to relocate provided all the other conditions in these regulations are followed in letter and spirit and the research work does not pertain to the project secured by the parent institution/ supervisor from any funding agency. The scholar will however give due credit to the parent guide and the institution for the part of research already done.

**Note:** *A close relative of the candidate cannot function as a Supervisor or Co-Supervisor.*

**Close relative** shall include father, mother, husband, wife, son, daughter, brother, sister, uncle, nephew, father-in-law, mother-in-law, or any other such relation as may be determined by the competent authority.

## **6. Registration and duration of Ph D programme**

(a) Ph.D. programme shall be for a minimum duration of three years, including course work and a maximum of six years.

(b) Extension beyond the above limits will be governed by clause 12 a (ii) & b (ii).

(c) The women candidates and Persons with Disability (more than 40% disability) may be allowed a relaxation of one year for M. Phil and two years for Ph.D. in the maximum duration. In addition, the women candidates may be provided Maternity Leave/Child Care Leave once in the entire duration of Ph.D. for up to 240 days.

## **7. (a) Pre-requisite for the submission of synopsis**

### **Course Work**

All Ph.D. students shall be required to undertake course-work for a minimum period of one semester as a pre-requisite which shall include a course on Research Methodology, review of published research in the relevant field besides one or more courses from the relevant field/

interdisciplinary area, as may be prescribed by the Supervisors/ Research Advisory Committee/University Research Degree Committee (URDC) as the case may be.

However, the NET-qualified/ M.Phil./ M. Tech. / M. Pharm/ MBA candidates may be exempted from one or more courses on the basis of their previously completed coursework and marks/grades obtained in the same, on recommendations of the URDC.

The course work may be carried out by the Ph.D. candidates in sister departments/ institutions either within or outside the University, if recommended by the URDC for which due credit shall be given to them.

### **Credit Requirements, number, duration, syllabus, minimum standards for completion, etc.**

(a) The credit assigned to the Ph.D. course work shall be a minimum of 08 credits and a maximum of 16 credits.

(b) The course work shall be treated as prerequisite for Ph.D. preparation. A minimum of four credits shall be assigned to one or more courses on Research Methodology which could cover areas such as quantitative methods, computer applications, research ethics and review of published research in the relevant field, training, field work, etc. Other courses shall be advanced level courses preparing the students for Ph.D. degree.

(c) All courses prescribed Ph.D. course work shall be in conformity with the credit hour instructional requirement and shall specify content, instructional and assessment methods. They shall be duly approved by the authorized academic bodies.

(d) The Department where the scholar pursues his/her research shall prescribe the course(s) to him/her based on the recommendations of the Research Advisory Committee, as stipulated under sub-Clause 10 (a) below, of the research scholar.

(e) All candidates admitted to the Ph.D. programmes shall be required to complete the course work prescribed by the Department during the initial one or two semesters.

(f) Candidates already holding M. Phil. degree and admitted to the Ph.D. programme, or those who have already completed the course work in M. Phil and have been permitted to proceed to the Ph.D. in integrated course, may be exempted by the Department from the Ph.D. course work. All other candidates admitted to the Ph.D. programme shall be required to complete the Ph.D. course work prescribed by the Department.

(g) Grades in the course work, including research methodology courses shall be finalized after a combined assessment by the Research Advisory Committee and the Department and the final grades shall be communicated to the Institution/College.

(h) A Ph.D. scholar has to obtain a minimum of 55% of marks or its equivalent grade in the UGC 7-point scale (or an equivalent grade/CGPA in a point scale wherever grading system is followed) in the course work in order to be eligible to continue in the programme and submit the dissertation/thesis.

The attendance monitoring shall be done in the same way as envisaged in the ordinance for PG Courses. Teaching and evaluation of Ph.D. course work and subject code will be as under: -

- (i) 1<sup>st</sup> course- Research Methodology: **4 Credits** - Evaluation on the basis of written exam.
- (ii) 2<sup>nd</sup> course- Review of literature: **2 Credits** - Evaluation on seminar basis.
- (iii) 3<sup>rd</sup> course- Recent advances in specialization: **4 Credits** - Evaluation on the basis of written exam.

### Subject Codes

- (i) The code for Research Methodology shall be **RM-901**
- (ii) The codes for other courses will be based on Alpha-Numeric pattern as under: -  
There will be two alphabets indicating the subject/ Specialization viz.  
EC- Electronics & Communication, CS- Computer Science, BT- Biotechnology, BI- Bio-Informatics, BM- Biomedical Sciences, MG- Management, PS- Pharmaceutical Sciences, MA- Mathematics, PH- Physics, CY- Chemistry, AG- Agriculture and AI- Agri-Informatics and so on.  
After 2 alphabets, there will be three numbers as under:
  - 1<sup>st</sup> number will be 9 indicating a Ph.D. degree.
  - 2<sup>nd</sup> number will be either 0 indicating a theory course or 5 indicating a practical course or 8 indicating a seminar course.
  - 3<sup>rd</sup> number will be 1 or 2 indicating the number of courses being offered**e.g.** - A code **PS-902** will stand for first Ph.D. Theory Course of Pharmaceutical Sciences to be offered, the second course and a code of **PS-981** will stand for third Ph.D. seminar based course of Pharmaceutical Sciences.

After approval of the synopsis, the candidate shall undertake proposed research work and produce a thesis within a reasonable time as stipulated.

### 8. University Research Degree Committee (URDC)

The University Research Degree Committee (URDC) shall consist of the following members:

- Vice-Chancellor/ Nominee of the Vice-Chancellor: Chairperson
- Director of the concerned School: Member
- One Professor/Assoc. Professor (other than the Supervisor(s)), having the knowledge of the research area of the candidate: Member
- Supervisor(s) Member
- Two subject-experts (Professors/ Assoc. Professors/ Readers/ Senior Scientists or equivalent) from any University/ Institution other than Shobhit University, to be nominated by the Vice-Chancellor from the panel submitted by the concerned Director: Member

**Note:** The presence of at least one subject expert is necessary for holding any meeting of URDC

### 9. Duties and Powers of URDC

The duties and powers of URDC shall be, but not limited to the following:

- (a) URDC shall examine the synopsis of the proposed Ph.D. work for registration and shall give a clear report as
  - The topic and the synopsis approved.
  - The synopsis to be submitted again.
  - Rejected.
- (b) At least three members shall form the quorum for the meeting of the URDC. However, presence of one of the external experts is essential for holding the meeting.
- (c) The minutes of the URDC meeting shall be reported by the Director concerned in the next meeting of the Academic Council for ratification.

#### **10. Research Advisory Committee and its functions**

(a) There shall be a Research Advisory Committee, for each Ph.D. scholar. The Research Supervisor of the scholar shall be the Convener of this Committee. This Committee shall have the following responsibilities:

- (i) To review the research proposal and finalize the topic of research;
- (ii) To guide the research scholar to develop the study design and methodology of research and identify the course(s) that he/she may have to do.
- (iii) To periodically review and assist in the progress of the research work of the research scholar.

(b) A research scholar shall appear before the Research Advisory Committee once in six months to make a presentation of the progress of his/her work for evaluation and further guidance. The six monthly progress reports shall be submitted by the Research Advisory Committee to the Institution/College with a copy to the research scholar.

(c) In case the progress of the research scholar is unsatisfactory, the Research Advisory Committee shall record the reasons for the same and suggest corrective measures. If the research scholar fails to implement these corrective measures, the Research Advisor Committee may recommend to the university with specific reasons for cancellation of the registration of the research scholar.

#### **11. Place of Work**

- (a) The School/Institute/Department/Center/College in the University shall be the place of work for the full-time candidates.
- (b) In case of a part-time candidate, a Research Lab/ Institution/ University/ Industry/ Centre where the candidate works and which has the required research facilities and there is formal permission for use of the laboratory to the student for research work, can also be the place of work, subject to approval of URDC.

**Note:** *In case the candidate changes his/her University/ Institution, the work place of the candidate may also change to the new work place of the candidate, if it has the required research facilities. The candidate is required to seek prior approval from the URDC for any such change.*

## **12. Transfers from Other Universities**

- (a) A candidate who has been admitted in or has registered for Ph D program in any other recognized university and meets the requisite eligibility for admission to the Ph D program of this university, may be allowed to transfer his/her admission to the university provided:
  - (i) He/she produces an NOC from previous university
  - (ii) The URDC recommends and the Academic Council approves the transfer
- (b) Further the extent of transfer of credits earned towards the course work, publication and progress of research in the previous university shall be decided by the URDC.
- (c) In such cases of transfer, the date of admission in the university shall be decided by the URDC considering the date of admission/registration in the previous university and the extent of achievements. The candidate shall fulfill the remaining requirements as decided by the URDC.
- (d) In case of relocation of a Ph.D woman research scholar due to marriage or otherwise, the research data shall be allowed to be transferred to the university provided that all other conditions are followed in letter and spirit and the research work does not pertain to the project secured by parent institution/supervisor from any funding agency and due credit is given to parent guide for the part of research already done. The transfer of data is permissible only if it is independent project of the research scholar.\in other cases the data/material shall remain with the parent institution.
- (e) The candidate shall deposit the requisite fee as applicable.

## **13. Duration for submitting Ph.D. Thesis**

### **(a) Full-time Research Scholars**

- (i) A full-time research scholar is not permitted to submit his/her thesis earlier than 36 months from the date of registration, including the duration of the course work. Further he/she shall publish at least **two** research papers related to his/her work in refereed Indian Journals or at least **one** paper in refereed International Journal (preferably SCOPUS indexed), before the submission of the thesis and produce evidence for the same either in the form of an acceptance letter or the reprint of the paper. A review paper published in any journal shall not count towards the above requirement.
- (ii) The maximum time allowed for submission of the thesis shall be 6 years (72 months) from the date of registration. This period can be extended by one year by the vice-Chancellor under special and genuine circumstances. No further extension shall be granted and the registration to Ph.D. shall stand cancelled after the expiry of 7 years( 84 months) from the date of registration.
- (iii) Vice-Chancellor may permit a candidate to get re-registered on the same topic on payment of a re-registration fee as decided by the University from time to time, for a further period of two years. The requirement of regular attendance shall not apply to such re-registered candidates. In such a case, the candidate shall apply to the University one month before the expiry of the last extension period. If the candidate is unable to submit his/her thesis in the stipulated

period, his/her registration shall stand automatically cancelled, and the University shall not be bound to inform the candidate about the cancellation.

**(b) Part-time Research Scholars**

(i) A part-time research scholar is not permitted to submit his/her thesis earlier than 42 months from the date of registration, including the duration of course work. Further he/she shall publish at least **two** research papers related to his/her work in refereed Indian Journals or at least **one** paper in a refereed International Journal (preferably SCOPUS indexed), before the submission of the thesis and produce evidence for the same in the form of an acceptance letter or the reprint of the paper. A review paper published in any journal(s) shall not count towards the above requirement.

(ii) The maximum time allowed for submission of the thesis shall be 6 years (72 months) from the date of registration. This period can be extended by one year by the Vice-Chancellor under special and genuine circumstances. No further extension shall be granted and the registration to Ph.D. shall stand cancelled after the expiry of 7 years (84 months) from the date of registration.

(iii) Vice-Chancellor may permit a candidate to get re-registered on the same topic on payment of a re-registration fee as decided by the University from time to time, for a further period of two years. The requirement of regular attendance shall not apply to such re-registered candidates. In such a case, the candidate shall apply to the University one month before the expiry of the last extension period. If the candidate is unable to submit his/her thesis in the stipulated period, his/her registration shall stand automatically cancelled, and the University shall not be bound to inform the candidate about the cancellation.

(c) The period for submission of thesis can be reduced by 6 months on the recommendation of URDC if a candidate has published at least 04 (Four) research papers in National/International Journals that are indexed in the SCOPUS/Web of science or other renowned database as applicable.

**Note 1:** *Application for an extension can be considered only when it has the recommendations of the supervisor(s).*

**Note 2:** *Extension of period after 6 years shall not be automatic. Application for extension shall be considered if submitted to the office of the Director of the concerned School/ Institutes/departments/Centers/College 4-6 months prior to the date of expiry of 72 months period, as the case may be.*

**14. Change of Supervisor**

**(a) Supervisor**

(i) The change of supervisor can be permitted by the Vice-Chancellor on the recommendations of URDC on production of the No Objection Certificates (NOC) from the Supervisor(s).

(ii) Vice-Chancellor, on the recommendations of the URDC may permit the supervisor who

has left the University or has retired from the university service, to continue as the supervisor if a request to this effect is received from the concerned supervisor. If no such request is received within one month, the supervisor may be removed by the Vice Chancellor.

**(b) Co- Supervisor**

In case of non-availability of the co- supervisor for any reason, the Vice-Chancellor, on the recommendations of the URDC, can either permit another co- supervisor (under clause 5) or allow the candidate to work and submit the thesis under the Supervisor alone.

**15. Cancellation of Registration**

The registration of a candidate to a Ph.D. programme may be cancelled on the basis of following.

- (i) Automatically, on the expiry of the period of extension granted by the Vice-Chancellor or the maximum time allowed under Clause 12(a)(iii) or 12(b)(iii), as the case may be, in case the extension has not been sought from the Vice-Chancellor.
- (ii) If the candidate is found involved in an act of gross indiscipline, unlawful activities, plagiarism and/or any such activity that may endanger the peace in the University campus.

**16. Progress Reports**

- (a) The candidate shall submit a progress report (Annexure –1) every 6 months (not later than 3 weeks of completing 6 months).
- (b) The progress report shall be signed by the candidate and the Supervisor(s).

**17. Submission of Thesis**

- (a) Based upon the research work done, the candidate may modify the synopsis, before three months of the submission of thesis and shall present it to the URDC for approval. Prior to submission of the thesis, the student shall make a pre-submission presentation in the School/Institute/Department/Center/College before a committee constituted by the Dean/Director/Principal and approved by the Vice Chancellor that may be open to all faculty members and research students, for getting feedback and comments, which may be suitably incorporated into the draft thesis under the advice of the Supervisor. This committee shall include, but not limited to the Dean/Director/Principal or as the case may be as Chairperson and supervisor(s) & other relevant persons from or outside as members .The committee will formally submit the report on the performance of the candidate in the pre-submission presentation. The candidate shall be permitted to submit the thesis to the

University after incorporating the modifications/ suggestions made by the above committee, if any. The Supervisors shall certify that the modifications/ suggestions made by the above committee have been duly incorporated.

- (b) The University shall evolve a mechanism using well developed software and gadgets to detect plagiarism and other forms of academic dishonesty. While submitting for the evaluation, the thesis shall have an undertaking from the research scholar and a certificate from the Research Supervisor attesting to the originality of the work, vouching that there is no plagiarism and that the work has not been submitted for the award of any other degree/diploma of the University where the work was carried out, or to any other university or institution
  
- (c) The candidate shall submit to the University the following documents at the time of submission of the Ph.D. thesis.
  - (i) Six copies of the Synopsis approved by the URDC and six copies of the Summary of the thesis.
  - (ii) Six hard-bound typed (on both side) copies of thesis. The thesis shall also be accompanied by:
    - (a) A certificate from the candidate (Annexure –2).
    - (b) A certificate from the supervisor (Annexure – 3 & 4).
    - (c) An appendix at the end of the thesis containing reprints of the research papers already published.
    - (d) Self-attested photocopies of the acceptance letters of the research papers accepted for publication.
    - (e) List of communicated research papers along with author(s) name(s), name of the Journal to which the paper has been communicated and the date of communication.
  - (iii) A copy of the receipt of applicable examination fee, along with no dues certificate.
  - (iv) A certificate from the Supervisor in terms of Clause 16(a), if applicable.
  - (v) A soft copy on CD/ DVD of the items referred to in Clause (i) and (ii) above.
  - (vi) An undertaking from the research scholar countersigned by the Supervisor(s) attesting to the originality of the work, vouching that there is no plagiarism.

## **18. Evaluation of the thesis**

- (a) The supervisor shall inform through the Director of the School to the Registrar of the

University about the intent to submit the thesis two months before its submission along with

- (i) Four copies of the synopsis, duly approved by the URDC.
- (ii) Names and contact details of at least eight examiners, not below the rank of an Associate Professor in the research area of the candidate, in a sealed envelope. The list must also include at least two names of examiners who are from outside the State in which the University is located. It may include the names of one or two names of examiners from outside India.

**Note:** *The name of any close relative of the candidate or of the supervisor shall not be included in the panel of examiners (as defined under clause 5)*

- (b) From this panel, the Vice-Chancellor shall appoint **three** examiners ensuring that one of the examiners is from outside the State. One of the Examiners may be appointed from outside the country. The Vice-Chancellor may include any new name.
- (c) The examiners would be requested to evaluate the thesis and submit the evaluation report within three months of the receipt of thesis. In case of inability shown by the examiner for evaluation of thesis, the Vice-Chancellor may appoint alternate examiner(s). In case of delay of more than 3 months in sending the evaluation report by any examiner, the Registrar would request the examiner(s) to send the report at the earliest in the interest of the candidate(not later than one month) failing which the Vice-Chancellor may appoint alternative examiner(s) after intimation to the existing examiner(s).
- (d) For awarding the Ph.D. degree, the thesis must comply with the following conditions:
  - (i) It must be an original piece of research work characterized either by the discovery of new facts or by fresh approach towards the interpretation of the existing facts or theories. In either case, it should evince the candidate's capacity to make critical examination and sound judgment.
  - (ii) It must be satisfactory in language and presentation of the subject matter.
- (e) The examiners shall specifically report on the prescribed proforma whether the thesis fulfils the requirements of the clauses 17(d)(i) and (ii). They shall clearly recommend whether the thesis be:
  - (i) Approved as it is,
  - (ii) Approved after minor revision,
  - (iii) Be resubmitted after major revision with
    - a) Major rewriting  
and/or
    - b) Some extra work,

The examiners shall also answer the following:

- a) Do you agree to re-evaluate the revised thesis? (Yes/No)

- b) If re-evaluation is not needed, should the candidate be allowed to appear in the viva-voce examination with the revised thesis? (Yes/No)
- (iv) Rejected (In such a case, the Examiner should clearly mention the reason(s) for rejection)
- (f) (i) If at least two examiners clearly recommend for the viva-voce examination and award of the degree, then the Ph.D. viva-voce examination shall be held.
- (ii) If one examiner recommends for the viva-voce examination and the other two suggest modifications, or all the three examiners suggest modifications, then the candidate shall be asked to re-submit the thesis within one year from the date of communication after revising it in the light of modifications suggested by the examiner(s).
- (iii) The revised thesis shall be sent to the examiner(s) who suggested modifications and accepted to re-evaluate the thesis, for final opinion. If at least two of the examiners recommend for viva-voce examination and award of degree, then Ph.D. viva-voce examination will be held. Otherwise the Vice-Chancellor may refer the case to a high level committee. The decision of the committee will be final.
- (iv) In case, the thesis is recommended by the examiners with minor modifications, the same shall be incorporated in the thesis before the viva-voce examination.
- (g) In case the thesis is recommended, an open viva-voce examination of the candidate shall be held by the viva-voce Board comprising of.
- (i) One External Examiner who will be one of the thesis examiners. (The name of the external examiner shall be approved by the Vice-Chancellor)
- (ii) Director of the concerned School.
- (iii) Supervisor(s)

The suggestion/ modifications suggested by the Viva Voce Board should be incorporated.

- (h) The date, time and venue of viva-voce examination shall be notified by the Registrar and the copies of the reports of the Examiners will be provided to the Supervisor(s) in a sealed envelope at least one week in advance. At the time of viva-voce examination, the Viva Voce Board shall be provided copies of the reports of the examiners.
- (i) The candidate shall present the work embodied in the thesis before the Board of examiners, members of faculty, research scholars and other persons interested in the subject. After the presentation of the research work, the members of the Board shall ask questions together with the questions, raised in the examiners' reports. After the formal viva-voce is over, the members of the audience can also ask questions.
- (j) The viva-voce Board shall give a final decision and a clear verdict whether the candidate be awarded the Ph.D. degree or be asked to re-appear for viva-voce examination once again. In case of the second verdict, the candidate shall be required to re-appear for viva-

voce before the same Board, on a date to be decided by the University.

**19. Award of Ph.D. Degree**

- (a) After successfully clearing the viva-voce examination, the candidate shall be awarded Ph.D. degree after the approval of the Executive Council.
- (b) The award of Ph.D. degree can be withdrawn by the University in case the thesis submitted by the candidate is found to be a duplication of an old work or pirated research work.

**20.** No research scholar shall join any other course of study or appear at any other examination conducted by any University leading to a degree (except Certificate Course of Languages, Research Methodology, Statistics, Computer Courses etc).

**21.** The approved thesis shall be published only after obtaining permission from the University and such publication shall state on the title page itself that **this was a thesis approved for the award of the Ph.D. degree of the Shobhit University.**

**22. Provisional Degree**

The candidate may be issued a Provisional Certificate after successful completion of the examination procedure in accordance with the provisions of the UGC (Minimum Standards and Procedure for Awards of Ph.D. Degree) Regulations 2016 and after the Vice-Chancellor approves the recommendation of the Viva-Voce Board.

**23. Depository with UGC**

Following the successful completion of the evaluation process and announcement of the award of Ph.D., the University shall submit a soft copy (in the form of CD/DVD) of the Ph.D. thesis to the UGC within a period of 30 days for hosting the same in INFLIBNET to be made accessible to all Institutions/ Universities.

**24.** Notwithstanding anything contained in the Ordinance, all the Ph.D. candidates/ research scholars shall be governed by the rules and procedures prevailing at the time of registration.

**25.** Notwithstanding anything stated in this Ordinance, for any unforeseen issues arising, and not covered by the Ordinance, or in the event of difference of interpretation, the decision of the Vice-Chancellor shall be final.

**Appendix – 1**

**Format of Synopsis**

The synopsis (approximately 5000 words) shall contain the following :

- (i) Topic of the research work.
- (ii) Area/Specialization of the research work.
- (iii) Aims and objectives of research work.
- (iv) Methodology of the research work.
- (v) A survey of literature in the area of research.
- (vi) The impact of the research work on academics/industry/society.
- (vii) The proposed plan of work: It will include a tentative schedule of research work.
- (viii) A list of equipments, software and other tools/ facilities, needed for the proposed research as part of the required Lab facility and its availability/ provisions made.
- (ix) Bibliography.
- (x) List of previous publications of the candidates, if any.

## **Annexure-1**

### **Progress Report**

**(To be submitted every 6 months from the date of Registration)**

Name of the School/Centre where registered : .....

1. Name of the Research Scholar : .....

2. Registration No. and the Date of Registration : .....

3. Topic of Research : .....

4. Name(s) of the Supervisor(s) 1) .....

2) .....

5. Period for which the report is being submitted: From.....to.....

6. Report (Brief details of the work done, papers published/ communicated, conferences attended/ paper(s) presented, etc.) ( may use additional sheets, if required)

**Supervisor(s)**

**Research Scholar**

Note : 1. Please attach one copy each of the previous Progress Report(s), if any.

2. Please attach copies of papers published/communicated, if mentioned in the above progress report.

## **Annexure-2**

### **Declaration by the Candidate**

I, hereby, declare that the work presented in this thesis, entitled  
..... in fulfillment of the  
requirements for the award of Degree of Doctor of Philosophy, submitted in the School of / Centre  
for ..... at Shobhit University, Gangoh, Sahranpur  
is an authentic record of my own research work carried out under the supervision of  
.....

I also declare that the work embodied in the present thesis

- (i) is my original work and has not been copied from any Journal/thesis/book, and
- (ii) has not been submitted by me for any other Degree or Diploma of any university/ institution.

**Signature of the candidate**

### **Annexure-3**

#### **Certificate of the Supervisor(s)**

This is to certify that the thesis, entitled “.....” submitted by ..... for the award of Degree of Doctor Philosophy in the School of / Centre for ..... of Shobhit University, , Gangoh, Sahranpur is a record of authentic work carried out by him/her under my/our supervision.

To the best of my/our knowledge, the matter embodied in this thesis is the original work of the candidate and has not been submitted for the award of any other degree or diploma of any university or institution.

It is further certified that he/she has worked with me/us for a period of ..... in the School of / Center for ..... , Shobhit University, , Gangoh, Sahranpur.

**(Supervisor)**

## **Annexure-4**

### **Certificate of the Co-Supervisor(s)**

This is to certify that the thesis entitled “.....” submitted by ..... for the award of Degree of Doctor Philosophy in the School of / Center for ..... of Shobhit University, Gangoh, Sahranpur is a record of authentic work carried out by him/her under my/our supervision.

To the best of my/our knowledge, the matter embodied in this thesis is the original work of the candidate and has not been submitted for the award of any other degree or diploma.

It is further certified that he/she has worked with me for a period of ..... in the School/ Center/Institute/College/ Department of .....

**(Co-Supervisor)**
