### **Vision**

NICE School of Business aims to become a Centre of Excellence through research and continuous innovation to nurture global managers, leaders and entrepreneurs for sustainable development by synthesizing Indian ethics with modern technology.

### **Mission**

*The Mission of NICE School of Business Studies is:*

- To nurture global talent and develop Industry ready professionals and socially responsible leaders / to face the challenges of fast changing business environment.
- To achieve academic excellence in research, consulting, training and teaching by adopting best practices and cutting edge technologies.
- To promote continuous innovation and entrepreneurship.
- To encourage collaborations, cooperation and partnerships with all stake holders to meet sustainable development goals.

### **Program Educational Objectives (PEOs)**

PEO1: Possess wide spectrum of managerial skills along with competency building qualities in specific areas of management and business studies.

PEO2: Select and apply appropriate tools for decision making required for ill structured managerial problems.

PEO3: Students will be able to independently conduct theoretical as well as applied research.

PEO4: To practice sound knowledge of the entrepreneurial process and inculcate creativity and innovation among students.

PEO5: Analyze ethical implications of business practices using advanced levels of ethical reasoning

### **Program Specific Objectives (PSOs)**

PSO1: To enrich communication, ethical values, team work, professional and leadership skill sets of students.

PSO2: To integrate knowledge, skill and attitude that will sustain an environment of learning and creativity among the students with an assurance for good careers.

PSO3: Analyze the economic, social and environmental issues related to business.

PSO4: Ability to identify, explore and harness opportunities presented by emerging trends and changing business environment.

PSO5: Understand the leadership skills through internship training.

### **Program Outcomes Objectives (POOs)**

PO1: Demonstrate the knowledge of management science to solve complex corporate problems using limited resources.

PO2: Apply ethical principles for making judicious management decisions.

PO3: To develop proactive thinking so as to perform effectively in the dynamic socio-economic and business ecosystem.

PO4: Identify business opportunities, entrepreneurship approach and skill sets.

PO5: Communicate effectively with various stakeholders.

### **MASTER OF BUSINESS ADMINISTRATION (MBA):**

The M.B.A. course aims at providing inputs to the students relevant to the business industry and trade so that they can function in different organizations and face the challenges arising there from. The course not only aims at providing knowledge and skills in different areas of management, but also provides inputs necessary for the overall development of the personality of the students.

The structure of the Course is designed in a way that students have to study the core courses from different functional areas of management that are made compulsory. Later on, specializations are offered in functional areas where the students can opt for any one specialization out of the seven offered: Marketing, Finance, International Business, Operations Management, HRM, Pharma Business Management and Agri-Business Management. Right from the beginning of the course, the focus is on providing relevant inputs through case discussion/ analysis, simulation games, role-plays etc. keeping in mind the current business scenario.

Broadly, the course is of two years divided into four semesters, each semester having eight compulsory papers of 40 sessions each of one-hour duration. The students will have to opt for one functional areas for their specialization, each having five papers (three in third semester and two in the fourth semester from Specialization Papers).

Summer Training for 8/10 weeks is compulsory for every student pursuing the course, which they have to undergo at the end of second semester examination. Comprehensive viva and Research project are part of the course.

### **SUMMER TRAINING PROJECT REPORT:**

1. At the end of second semester examination, every student of MBA will undergo on-the-job practical training in any manufacturing, service or financial organization. The training will be of 8 to 10 weeks duration. The College/Institute will facilitate this compulsory training for students.
2. During the training, the student is expected to learn about the organization and analyze and suggest solutions of a live problem. The objective is to equip the student with the knowledge of actual functioning of the organization and problems faced by them for exploring feasible solutions and suggestions.
3. During the course of training, the organization (where the student is undergoing training) will assign a problem/project to the student.
4. The student, after the completion of training will submit a report to the College/Institute, which will form part of third semester examination. However, the report must be submitted by the end of August during third semester so that it is evaluated well in time and third semester results are not delayed.
5. The report (based on training and the problem/project studied) prepared by the student will be known as Summer Training Project Report. The report should ordinarily be based on primary data. It should reflect in depth study of micro problem, ordinarily assigned by the organization where student undergoes training. Relevant tables and bibliography should support it.

One comprehensive chapter must be included about the organization where the student has undergone training. This should deal with brief history of the organization, its structure, performance products/services and problems faced. This chapter will form part I of the Report. Part II of the Report will contain the study of micro research problem.

The average size of Report ordinarily will be 100 to 150 typed pages in standard font size (12) and double spacing. Three neatly typed and soft bound (paperback) copies of the report will be submitted to the College/Institute. The report will be typed in A-4 size paper.

6. The Report will have two certificates. One by the Head of the Institute/College and the other by the Reporting Officer of the organization where the student has undergone training. These two certificates should be attached in the beginning of the report.

7. The report will be evaluated by two external examiners. It will carry total of 100 marks divided into written report of 50 marks and presentation of 50marks. There will be no internal examiner.

Only such persons will evaluate the project report who has minimum 3 years of experience of teaching MBA classes in a College/University. Experience of teaching MBA classes as guest faculty shall not be counted.

SCHOOL OF BUSINESS STUDIES & ENTREPRENEURSHIP, SHOBHIT UNIVERSITY, GANGOH

8. It is mandatory that the student will make presentation in the presence of teachers and students. The student is expected to answer to the queries and questions raised in such a meeting.

**RESEARCH PROJECT REPORT:**

In fourth semester, candidates will have to submit a Research Project Report on a problem/topic to be assigned by the School of Business Studies under the supervision of a core faculty member of the department. The research project report will carry 100 marks. The evaluation of the project report will be done by two external examiners. The average of the marks awarded by the two examiners will be taken into account for the results.

The report will contain the objectives and scope of the study. Research methodology, use, importance of the study, analysis of data collected, conclusions and recommendations. It will contain relevant charts, diagrams and bibliography. A certificate of the Supervisor and the Head of the MBA program certifying the authenticity of the report shall be attached therewith. The student will submit three copies of the report to the Head of the MBA program. The number of pages in the report will be 75 or more. The report should be typed in A-4 size paper.

**COMPREHENSIVE VIVA:**

The comprehensive viva voce is scheduled at the end of II & IV Semester in order to judge the understanding as well as application of the knowledge gained by the students by the end of 2<sup>nd</sup> & 4<sup>th</sup> Semester of the course. This is also to see the articulation of what is being learnt by them. The idea is to see that students are able to understand what is being taught in two full year and see their relevance not only in the practical field but also their inter relationship. The viva voce is of 100 marks to be conducted by the external examiner appointed by the University.

**MBA**  
**Semester –I**  
**BS-611: Management Principles and Practices**

**Objectives of the Course** - The objective of this course is to achieve organizational goals, optimize resource utilization, improve efficiency, foster communication, encourage innovation, enhance employee development, promote ethical behavior, support effective leadership, facilitate decision-making, and establish accountability. These principles guide managers in creating productive, sustainable, and adaptable organizations.

**Unit 1: Introduction**

**a) Management:** Nature, purpose, and functions; Managerial functions at different levels of organization; Managerial skills and organizational hierarchy; Goals of managers and organization

**b) Evolution of Management Thoughts:** Taylor and scientific management, Fayol's contribution; Hawthorne studies: Recent contributions to management thought System Approach to Management Process: Managerial Transformation Process; Communication system; External variables, Outputs

**C) Functions of Manager:** Planning, Organizing, Staffing, Leading, Controlling: An overview; Coordination: The Essence of Managership

**Unit 2: Planning**

**Types of Plans:** Mission or purposes, Objectives or goals; Strategies, Procedures, Rules, Programme, Budgets Policies; Planning process; Nature of objectives; Setting the objectives; management by Objectives (MBA): Concept, strengths, and weaknesses; Nature and purpose of strategies and policies; Planning process: Inputs to organization, industry analysis, enterprise profile; External and internal environment; Medium and short-range planning and implementation; TOWS Matrix; Alternative strategies; Time dimension and the TOWS Matrix; The Portfolio Matrix; Major kinds of strategies and policies: Porter's generic competitive strategies, planning premises.

**Unit 3: Organising**

Concept; Formal and informal organizations; Organisational division: The department; Span of Management: Concept and issues; Entrepreneurship and intrapreneuring, re-engineering the organization, Rationale of organizing; Territorial departmentation; Customer-group departmentation; Concepts of power and authority, empowerment; Scalar Principle; Line authority and staff relationship; Functional authority and decentralization; Different kinds of decentralization; Delegation of authority; Personal attitudes towards delegation; making delegation effective; Re-centralisation; Concept of organization charts.

**Unit 4: Staffing**

Concept of staffing; The System Approach to human resource management; Factors affecting the number and kinds of managers required; The management inventory; Analysis of the need for managers; An overview of the situational factors affecting staffing: External environment and internal environment factors; An overview of systems approach to selection, recruitment, and promotion; The Peter Principle.

### **Unit 5: Leading and Controlling**

**a) Leading:** Human factors in managing; The importance of personal dignity and the •,, consideration of their whole person; Overview of Motivation concept and Theory X and Theory Y of the Concept of leadership: Motivation ingredients; Principles of leadership; Leadership styles: Autocratic, democratic, and free-reign.

**b) Controlling:** Concept and process, establishment of standards; Measurement of performance, correction of deviations; Critical Control Points: Concept and types; Control as a Feedback System; Real-time Information and control; Feed-forward control; Feed-forward versus feedback systems; Feed-forward in management; Control of overall performance; Profit and loss control: Concept, nature, purpose and limitations; Control through Return on Investment; Bureaucratic and Clan Control.

**MBA**  
**Semester –I**  
**BS-612: Managerial Economics**

**Objectives of the Course** - The objectives of managerial economics are to apply economic theory to business decision-making, optimize resource allocation, analyze market trends, evaluate costs and benefits, forecast demand, maximize profitability, and guide managerial strategies. It aims to improve decision-making efficiency, enhance competitive advantage, and ensure sustainable business growth.

**Unit 1: Introduction**

Nature and scope of managerial economics and its relationship with other disciplines; Its role and significance in decision-making; Basic concepts; Positive Vs normative analysis.

**Unit 2: Market Forces: Demand and Supply**

- a) **Demand analysis:** Theory of demand; Objectives of demand analysis and determinants of demand; Theory of consumer behaviour; Elasticity of demand and its measurement methods; Importance in decision-making  
b) **Supply analysis:** Objective of supply analysis; Determinants of supply.

**Unit 3: Production Function and Cost Analysis**

Theory of production and cost analysis; Production function and its managerial uses ; Laws of production and analysis; Empirical estimates of production and cost; Short-run and long-run average cost curves and their analysis; Economies and diseconomies of scale.

**Unit 4: Organisation of the Firm**

Pricing decision; Pricing under different market structure; Perfect and imperfect (monopoly, monopolistic, and oligopoly markets); Pricing strategies; Collusive and non-collusive oligopoly; Baumol's Marries; and O. Williamsons' models.

**Unit 5: Factor Pricing**

Determination of factor pricing; Marginal productivity theory; Richardiaii and modern theories of rent; quasi-rent; Modern theory of wage rate determination; Classical, neo-classical, and Keynesian theory of interest; Modern theory of profit; Welfare economics; Pareto optimality conditions; Social welfare function.

**MBA**  
**Semester –I**  
**BS-613: Financial Accounting and Analysis**

**Objectives**

The objective of this paper is to help students to acquire conceptual knowledge of the financial accounting and to impart skills for recording various kinds of business transactions.

**Course Contents**

**Unit 1: Theoretical Framework**

**a) Accounting:** An introduction, Accounting as an information system. The users of financial accounting information and their needs, Qualitative characteristics of accounting information, Functions, advantages, and limitations of accounting, Branches of accounting.

**b) Nature of Financial Accounting Principles:** Basic concepts and conventions: entity, money measurement, going-concern, cost, realization, accruals, periodicity, consistency, prudence (conservatism), materiality and full disclosure.

**c) Financial Accounting Standards:** Concept, benefits, procedure for issuing accounting standards in India. Salient features of accounting standard: 1 (ICAI)

**Unit 2**

**a) Accounting Process:** The journal, the ledger, and trial balance: Meaning, need, preparation

**b) Business Income:** Measurement of business income-net income: The accounting period, the continuity doctrine and matching concept, Objectives of measurement, Depreciation policy, and Inventory valuation.

**c) Preparation of Final Accounts:**

Difference between Capital and Revenue Expenditure, Trading Account, Profit and Loss Account, Balance Sheet: Meaning, Need, Finance accounts for non-profit organization: An overview.

**Unit 3**

**Royalty Accounts:** Meaning, characteristics, types of royalty, journal entries and its accounting procedure, Hire Purchase System.

**Unit 4: Analysis of financial statements:**

Meaning, need, Ratio Analysis- solvency ratios, profitability ratios, activity ratios, liquidity ratios, market capitalization ratios; common size statement.

**Unit 5**

**a) Funds Flow Statement:** Meaning, concept of gross and net working capital, preparation of schedule of changes in working capital, preparation of funds flow statement and its analysis.

**b) Cash Flow Statement:** Various cash and non-cash transactions, flow of cash, preparation of Cash Flow Statement and its analysis.

**Suggested Readings:**

1. Anthony, R.N., David F. Hawkins, and Kenneth A. Merchant, Accounting: Text and Cases, 12th ed., Richard D. Irwin, Inc.
2. Monga, IR., Financial Accounting: Concepts and Applications, Mayoor Paper Backs, New Delhi
3. Shukla, M.C., T.S. Grewal, and S.C. Gupta, Advanced Accounts, Vol. 1, S. Chand & Co., New Delhi
4. Gupta, R.L., and V.K. Gupta, Financial Accounting, Vol. 1, Sultan Chand & Sons, New Delhi, 2006

6. Bhattacharya, Ashish K., Essentials of Financial Accounting, PHI, New Delhi
7. N. Ramachandran and Ram Kumar Kakani, Financial Accounting for Management, Tata McGraw-Hill Publishing Co., New Delhi, 2011

**MBA**  
**Semester –I**  
**BS-614: Statistics for Management**

**Objectives of the Course** - The objectives of statistics for management are to aid in decision-making through data analysis, identify trends and patterns, improve forecasting accuracy, measure performance, optimize processes, and support risk management. It helps managers make informed, data-driven decisions to enhance operational efficiency, profitability, and strategic planning.

**Unit 1: Introduction**

Definition of Statistics, scope of Statistics; Applications in decision-making in Business, Measures of Central Tendency and Dispersion: Grouped Data, Drawing a Histogram; Unequal Class Intervals; Mean; Median; Mode; Quartiles; Standard and Quartile Deviation; Significance of Measures of Location and Dispersion; Coefficient of Variation. Index Numbers; Index of Retail Prices and Industrial Production.

**Unit 2: Data Collection**

Types of data, primary and secondary data, Census and survey and their relative advantages and limitations; development of questionnaire; Advantages and limitations of interview and postal questionnaire design; Problems of non-response measures.

**Unit 3: Time Series Analysis**

Time series, Moving average to calculate the trend, Plot trend on time series graph, calculate the seasonal factors for either the additive or multiplicative model, Forecasting methods.

**Unit 4: Correlation and Regression**

Definition of correlation and regression, Scatter diagram, Least squares method, Use of regression analysis, Forecasting and its precision, Concept of product moment correlation coefficient, Spearman's rank correlation coefficient and Coefficient of determination.

**Unit 5: Probability and Probability Distribution**

**a) Probability:** Definition, Mutually exclusive events, Addition and multiplication rules of probability, Venn diagram and tree diagram to solve probability problems.

**b) Chi-square distribution, Student's t distribution, F distribution - its significance and simple problems**

**c) Probability Distribution:** Concept of probability distribution, continuous probability distribution, Poisson distribution, Binomial distribution.

**d) Sampling and Sampling Distribution:** Various sampling methods, simple random sampling, stratified random sampling and Cluster sampling.

**Suggested Books:**

1. Richard I., Levin and David S. Rubin, Statistics for Management, 7th ed., Prentice-Hall of India, Pearson Education, 2007
2. T.NSrivastava and SheljaRego, Statistics for Management, Tata McGraw-Hill Publishing Co., New Delhi, 2008
3. Mark L., Berenson and David M. Levine, Basic Business Statistics: Concepts and Application, Prentice-Hall of India
4. GC Beri, Business Statistics, 2nd ed., Tata McGraw-Hill, 2008

**MBA**  
**Semester –I**  
**BS-615: Legal Aspects of Business**

**Objectives of the Course** - The objectives of the legal aspect of business are to ensure compliance with laws, protect intellectual property, manage contracts effectively, minimize legal risks, and resolve disputes. It helps businesses operate within legal frameworks, avoid legal penalties, safeguard organizational interests, and promote ethical practices for long-term sustainability.

**Unit I: The Indian Contract Act, 1872**

Concept of Contract, offer and acceptance; valid contracts and its essential elements; void agreements; classification of contracts; Quasi contract; performance of contract; discharge of contract; remedies for breach of contract. Special Contracts: Indemnity, Guarantee, Bailment, pledge, and agency.

**(8 Sessions)**

**Unit 2: a) The Sale of Goods Act, 1930:** Nature of Contract of Sale; Formation of Contract of sale, agreement to sell, conditions and warranties, transfer of property in goods, performance of the contract of sale, remedies for breach, unpaid seller and his rights, rights of buyers, sale by auction.

**b) The Partnership Act, 1932:** Nature of Partnership, Formulation of Partnership; rights, duties, and liabilities of partners; Dissolution of Partnership Term

**(8 Sessions)**

**Unit 3: The Negotiable Instruments Act, 1881**

Definition, Features and types of negotiable instruments; Methods of negotiation of instruments; holder and holder in due Course; Endorsement and delivery of a negotiable instrument; Presentation of Negotiable Instrument. Banker and Customer: An introduction; Crossing of a cheque; Types of crossing; Bouncing of cheques, Obligations of banker and customer; Dishonour and discharge of negotiable instruments

**(8 Sessions)**

**Unit 4:a) The Consumer Protection Act, 1986:** Basic Concepts: Complaint, Complainant, Consumer, Rights of consumer, Consumer forums, their role, powers and functions, Procedure for consumer grievance redressal, Major decided Cases.

**b) The Competition Act, 2002:** Basic concepts, Powers of Central Government under the Competition Act, Major Provisions of the Competition Act: Role and working of Competition Commission of India.

**(8 Sessions)**

**Unit 5: The Companies Act**

An overview; Nature and kinds of Companies; Formation of a company; Company Management; Company Meetings

**(8 Sessions)**

**Suggested Books:**

- 1) Avtar Singh, Principles of Mercantile Law, 10th ed., Eastern Book Company, Lucknow
- 2) M.C. Kuchhal, Vivek Kuchhal, Business Law, 7th ed., Vikas Publishing House, New Delhi
- 3) Ravindra Kumar, Legal Aspects of Business, Cengage Learning, New Delhi, 2016
- 4) Avtar Singh, Consumer Protection Law, Eastern Book Co., Lucknow, 2006.
- 5) MC Kuchhal, Indian Company Law, Shree Mahabir Book Depot, Delhi, 2008
- 6) The bare acts of relevant legislations.

**MBA**  
**Semester –I**  
**BS-616: Business Environment**

**Objective**

To enable students to learn the concepts of economic environment of business, changes in policies and latest developments in India and abroad.

**Allocation of Periods: 45** (30 Lectures, 5 Tutorials, 10 Practicals)

**Unit 1: Introduction**

Concept, Significance and Nature of Business Environment. Types of environment, Interaction between Internal and External environments, Nature and Structure of Economy, Techniques for Environmental Analysis, Approaches and Significance of Environmental Forecasting.

**(Periods: 6 -1 - 2)**

**Unit 2: Economic Environment**

History of Economic Systems, Market, Planned and Mixed Economy, Planning in India: Emergence and Objective; Planning Monetary Policy, Fiscal Policy. Union Budget as instrument of growth and its Impact on Business, Industrial Policy: Meaning Objective and Recent Developments in New Economic Policy and its Impact on Business.

**(Periods: 7 -1 - 3)**

**Unit 3: Politico-Legal Environment**

Relationship between Business and Government, Economic, Planning, Regulatory, Promotional and Entrepreneurial Roles of Government, Constitutional provisions affecting Business. An overview of major laws affecting business, Consumerism, Social Responsibility of Business.

**(Periods: 6 -1 - 1)**

**Unit 4: a) Technological Environment:** Factors Influencing Technological Environment, Role and Impact of Technology on Business. Transfer of Technology - Channels, Methods and Limitations.

**b) Demographic and Socio-cultural Environment:** Population size, falling birth rate, Changing age structure and its impact on business, Business and Society, Business and Culture, Culture and Organisational Behaviour.

**(Periods: 5 -1 - 1)**

**Unit 5 : WTO:** Salient features and Current Developments; Globalisation: Meaning and dimensions, Features of Current Globalisation, Stages of Globalisation, Multinational Corporation (MNCs) and Transnational Corporations (TNCs), Disinvestments of PSUs, Foreign Direct Investments (FDI) and Regulation of Foreign Trade.

**(Periods: 5 -1 -3)**

**Suggested Readings:**

1. Francis Cherunilam, Business Environment, Himalaya Publishing House, Mumbai.
2. S K Mishra, and V K Puri, Economic Environment of -Business, 3rd Edition, Himalaya Publishing House, Mumbai.
3. Justin Paul, Business Environment Text and Cases, Tata McGraw Hill, New Delhi.
4. Suresh Bedi, Business Environment, Excel Books, New Delhi, 2004.
5. I. C Dhingra, India Economy: Environment and Policy, 23rd ed., Sultan Chand & Sons, New Delhi, 2009.

## SYLLABUS

### MBA-1<sup>st</sup> SEMESTER

#### COURSE TITLE: NUTRITION AND WELL BEING

#### COURSE CODE: MBA-616-A

**Objectives of the Course** - The objectives of nutrition and well-being are to promote healthy eating habits, improve overall physical health, enhance mental well-being, prevent nutritional deficiencies, and support long-term wellness. It aims to educate individuals about balanced diets, healthy lifestyles, and the importance of proper nutrition in maintaining vitality and preventing diseases.

**Unit 1: Introduction to Nutrition:** 10 Hours

Definition and scope of nutrition, Macronutrients and micronutrients their functions and sources. Overview of the digestive system, Digestion and absorption of nutrients, Age-specific nutritional needs (infants, children, adults, and elderly)

**Unit 2: Dietary Guidelines and Eating Patterns:** 10 Hours

Overview of global dietary guidelines (e.g., MyPlate, Food Pyramid, Mediterranean diet), Key principles for healthy eating, Portion control and balanced meals, Plant-based diets, intermittent fasting, ketogenic diets, and their health impacts, Strategies for planning nutritious meals, Cooking methods that preserve nutrients and reduce fat.

**Unit 3: Nutrition and Lifestyle Diseases:** 10 Hours

Causes and health risks of obesity, Effective weight loss strategies (caloric deficit, exercise, behavioral changes), Role of exercise and physical activity in weight management, Nutrition and heart disease prevention (impact of fats, cholesterol, sodium, and fiber), Relationship between diet and type 2 diabetes.

**Unit 4: Nutrition for Optimal Well-Being:** 10 Hours

Nutrients that affect mood, cognition, and mental health (e.g., Omega-3s, B vitamins), The role of diet in stress management and mental well-being, Nutrition for athletes and physical performance, The impact of food choices on the environment, Sustainable diets and their role in promoting global health.

- Srilakshmi, B. Nutrition Science; 2012; New Age International (P) Ltd
- Lakra, P., Singh, M.D. Textbook of Nutrition and Health; First Ed; 2008; Academic Excellence.
- Manay, M.S, Shadaksharaswamy. Food – Facts and Principles; 2004; New Age International (P) Ltd.

**SYLLABUS**  
**MBA-1<sup>st</sup> SEMESTER**  
**COURSE TITLE- DISASTER MANAGEMENT**  
**SUBJECT CODE-MBA-616-B**

**Objective of the Course**

1. To provide basic conceptual understanding of disasters.
2. To understand approaches of Disaster Management
3. To build skills to respond to disaster

**Unit: I -Definition and types of disaster**

Hazards and Disasters, Risk and Vulnerability in Disasters, Natural and Man-made disasters, earthquakes, floods drought, landside, land subsidence, cyclones, volcanoes, tsunamis, avalanches, global climate extremes. Man-made disasters: Terrorism, gas and radiations leaks, toxic waste disposal, oil spills, forest fires.

**Unit: II Study of Important disasters**

Earthquakes and its types, magnitude and intensity, seismic zones of India, major fault systems of India plate, flood types and its management, drought types and its management, landside and its managements case studies of disasters in Sikkim (e.g Earthquakes, Landside). Social Economics and Environmental impact of disasters.

**Unit: III Mitigation and Management techniques of Disaster**

Basic principles of disasters management, Disaster Management cycle, Disaster management policy, National and State Bodies for Disaster Management, Early Warning Systems, Building design and construction in highly seismic zones, retrofitting of buildings.

**Unit IV Training, awareness program and project on disaster management**

Training and drills for disaster preparedness, Awareness generation program, Usages of GIS and Remote sensing techniques in disaster management, Mini project on disaster risk assessment and preparedness for disasters with reference to disasters in Sikkim and its surrounding areas.

**Text Books:**

1. Disaster Management Guidelines, GOI-UND Disaster Risk Program (2009-2012)
2. Damon, P. Copola, (2006) Introduction to International Disaster Management, Butterworth Heineman.
3. Gupta A.K., Niar S.S and Chatterjee S. (2013) Disaster management and Risk Reduction, Role of Environmental Knowledge, Narosa Publishing House, Delhi.
4. Murthy D.B.N. (2012) Disaster Management, Deep and Deep Publication PVT. Ltd. New Delhi.

## SYLLABUS

### MBA-1 Semester

**Course Title: Environmental Policy**

**Course Code: BS-616-C**

**Objectives of the Course** - The objectives of environmental policy are to protect natural resources, reduce pollution, promote sustainability, and ensure responsible resource management. It aims to mitigate environmental impact, enhance biodiversity, comply with environmental regulations, and encourage eco-friendly practices to safeguard the environment for future generations while supporting economic growth.

#### **UNIT-1: INTRODUCTION**

**10 Hours**

Introduction to environment, Environment and society, Composition of healthy environment, Climate change, Biodiversity and climate change, Natural resource conservation and management. Over Population and its impact on environment.

#### **UNIT-2: WASTE MANAGEMENT**

**8 Hours**

Introduction of waste management, Solid and Liquid waste management. Environmental policy and evolution, Environmental policy and laws in India. National environmental policy.

#### **UNIT-3: ENVIRONMENTAL HAZARD AND NGT**

**10 Hours**

Environmental hazard and risk management, Ministry of environment, forest and climate change, CPCB (Central pollution control board, SPCB (State pollution control board) Roles and their functions. National Green tribunal and key environmental issues.

#### **UNIT-4: AN OVERVIEW OF ENVIRONMENTAL MODELING**

**10 Hours**

**RIO earth summit 1992**, Kyoto Protocol 1997, Sustainable development and Green technology, The Environment (Protection) Act, 1986, Laws concerning wildlife in India, Biological diversity act, 2002, The Air (Prevention and Control of Pollution) Act, 1981, The Water (Prevention and Control Pollution) Act, 1974

**MBA**  
**Semester –I**  
**BS-617: Business Communication**

**Objectives of the Course** - The objectives of business communication are to facilitate clear, effective information exchange, enhance decision-making, foster collaboration, and build strong relationships with stakeholders. It aims to improve organizational efficiency, resolve conflicts, promote transparency, and ensure accurate dissemination of information, ultimately contributing to business growth and success.

**Unit 1: Introduction**

Nature of communication; Myths about communication; Communication process and stages in communication cycle; Barriers to effective communication; Formal and informal communication; Communication channels; Choosing the means of communication, like Letters, memos, reports, fax, e-mail, presentation, telephone, and multimedia; Improving the communication skills and projecting professionalism through various channels of communication; Verbal and non-verbal communication; Organisational culture; Communication and ethics.

**Unit 2: Communication for Managers**

Importance of communication to managers; Internal and external audiences in the organisation; Planning and creating business managers; Analysing the problem and defining the purpose; Analysing business communication situations; Adapting the message to the audience.

**Unit 3: Written Communication**

Planning, writing, and revising business document; Designing documents, slides, and screens; Polishing the writing; Editing for grammar and punctuation; Choosing the right word; Revising sentences and paragraphs, letters, memos; e-mails, and web writing, informative and positive messages, negative messages, persuasive messages; Reports: Types, characteristics of business reports, purposes of reports; Planning and techniques of writing a report.

**Unit 4: Recruitment and Employment Correspondence**

Researching job; Job application letter; Curriculum vitae/ resumes; Employment; Interview; References; Offer of employment; Job description; Letter of acceptance; Letter of resignation.

**Unit 5: Interpersonal Communication**

Listening, working, and writing in teams; Planning, conducting, and recording; Meetings; making effective oral presentations; Overcoming stage fright; Telephonic communication; Conversation and discussion; Public speaking; Seminar presentation; Conference; Group discussion.

**Suggested Readings:**

1. Locker, K.O., and Kaczmarek, S.K., Business Communication: Building Critical Skill, 2nd ed., Tata McGraw-Hill, 2002
2. Bovee, C.L., et al., Business Communication Today, Pearson Education, 2002
3. Taylor, Shirley, Communication for Business, Pearson Education, 2002
4. Lesikar, R.V., and Pettit, Jr., J.D., Business Communication: Theory and Application, Tata McGraw-Hill, 2002
5. James, S.O' Rourke IV, Management Communication: A Case Analysis Approach, 2nd ed., Pearson Education, 2005

## **Course Title: Personality Development**

Course Code: BS617-A

Program & Semester: MBA I

**Objectives of the Course** - The objectives of personality development are to enhance self-awareness, improve communication skills, boost confidence, foster emotional intelligence, and promote positive behavior. It aims to cultivate leadership qualities, strengthen interpersonal relationships, and help individuals achieve personal and professional success by developing a well-rounded and resilient character.

### **Course contents:**

#### **UNIT I**

Introduction to Personality Development The concept of personality - Dimensions of personality – Theories of Freud & Erickson-Significance of personality development. The concept of success and failure: What is success? - Hurdles in achieving success - Overcoming hurdles - Factors responsible for success – What is failure - Causes of failure. SWOT analysis.

#### **UNIT II**

Attitude & Motivation Attitude - Concept - Significance - Factors affecting attitudes - Positive attitude – Advantages –Negative attitude- Disadvantages - Ways to develop positive attitude - Differences between personalities having positive and negative attitude. Concept of motivation - Significance – Internal and external motives - Importance of self- motivation- Factors leading to de-motivation

#### **UNIT III**

Self-esteem Term self-esteem - Symptoms - Advantages - Do's and Don'ts to develop positive self-esteem – Low self-esteem - Symptoms - Personality having low self-esteem - Positive and negative self-esteem. Interpersonal Relationships – Defining the difference between aggressive, submissive and assertive behaviours - Lateral thinking.

#### **UNIT IV**

Other Aspects of Personality Development Body language - Problem-solving - Conflict and Stress Management - Decision-making skills - Leadership and qualities of a successful leader – Character building -Team-work – Time management - Work ethics –Good manners and etiquette.

#### **UNIT V**

Employability Quotient Resume building- The art of participating in Group Discussion – Facing the Personal (HR & Technical) Interview -Frequently Asked Questions - Psychometric Analysis - Mock Interview Sessions.

Total: 45 Periods

#### **Text Books:**

1. Hurlock, E.B (2006). Personality Development, 28th Reprint. New Delhi: Tata McGraw Hill.
2. Stephen P. Robbins and Timothy A. Judge (2014), Organizational Behavior 16th Edition: Prentice Hall.

#### **Reference Books:**

2. Heller, Robert. Effective leadership. Essential Manager series. D K Publishing, 2002
3. Hindle, Tim. Reducing Stress. Essential Manager series. D K Publishing, 2003
4. Lucas, Stephen. Art of Public Speaking. New Delhi. Tata - Mc-Graw Hill. 2001
5. Mile, D.J Power of positive thinking. Delhi. Rohan Book Company, (2004).
6. Pravesh Kumar. All about Self- Motivation. New Delhi. Goodwill Publishing House. 2005.
7. Smith, B . Body Language. Delhi: Rohan Book Company. 2004

**Course Title: Speaking skills & Leadership**  
**Course Code: BS617-B**  
**Program & Semester: MBA I**

**Objectives of the Course** - The objectives of speaking skills and leadership are to enhance effective communication, inspire and motivate others, build confidence, and foster collaboration. It aims to improve public speaking, persuasion, and active listening, while developing leadership qualities that empower individuals to lead teams, make decisions, and drive organizational success.

Course contents:

- UNIT – I 07 Hours  
Speaking Skills: Introduction, Definition, The Importance of Communication, The Communication Process – Source, Message, Encoding, Channel, Decoding, Receiver, Feedback, Context Barriers to communication: Physiological Barriers, Physical Barriers, Cultural Barriers, Language Barriers, Gender Barriers, Interpersonal Barriers, Psychological Barriers, Emotional barriers Perspectives in Communication: Introduction, Visual Perception, Language, Other factors affecting our perspective - Past Experiences, Prejudices, Feelings, Environment
- UNIT – II 07 Hours  
Elements of Communication: Introduction, Face to Face Communication – Tone of voice, Body Language (Non-Verbal Communication), Verbal Communication Physical Communication. Communication Styles: Introduction, The Communication styles Matrix with example for each Direct Communication style, Spirited Communication style, Systematic Communication style, Considerate Communication style.
- UNIT – III 07 Hours  
Basic Listening Skills: Introduction, Self-Awareness, Active Listening, Becoming an Active Listener, Listening in Difficult Situations. Effective Written Communication: Introduction, When and When Not to Use Written Communication - Complexity of the Topic, Amount of Discussion Required, Shades of Meaning, Formal Communication.
- UNIT – IV 05 Hours  
Leadership Skills: Purpose of an interview, Do's and Don't's of an interview Giving Presentations: Dealing with Fears, Planning your Presentation, Structuring Your Presentation, Delivering Your Presentation, Techniques of Delivery
- UNIT – V 04 Hours  
Group Discussion: Introduction, Communication skills in group discussion, Do's and Don't's of group discussion

**Recommended Books: (Latest Edition)**

1. Basic communication skills for Technology, Andreja. J. Ruther Ford, 2nd Edition, Pearson Education, 2011
2. Communication skills, Sanjay Kumar, Pushpalata, 1 st Edition, Oxford Press, 2011
3. Organizational Behaviour, Stephen .P. Robbins, 1 st Edition, Pearson, 2013
4. Brilliant- Communication skills, Gill Hasson, 1 st Edition, Pearson Life, 2011
5. The Ace of Soft Skills: Attitude, Communication and Etiquette for success, GopalaSwamy Ramesh, 5 th Edition, Pearson, 2013
6. Developing your influencing skills, Deborah Dalley, Lois Burton, Margaret, Greenhall, 1st Edition Universe of Learning LTD, 2010
7. Communication skills for professionals, Konar nira, 2nd Edition, New arrivals –PHI, 2011
8. Personality development and soft skills, Barun K Mitra, 1 st Edition, Oxford Press, 2011
9. Soft skill for everyone, Butter Field, 1st Edition, Cengage Learning india pvt.ltd, 2011
10. Soft skills and professional communication, Francis Peters SJ, 1st Edition, McGraw Hill Education, 2011
11. Effective communication, John Adair, 4 th Edition, Pan Mac Millan, 2009
12. Bringing out the best in people, Aubrey Daniels, 2 nd Edition, Mc Graw Hill, 1999

**Course Title: Effective Writing Skills**

**Course Code: BS617-C**  
**Program & Semester: MBA I**

**Objectives of the Course** - The objectives of effective writing skills are to convey ideas clearly and concisely, enhance communication, engage the reader, and ensure accuracy. It aims to improve grammar, structure, and style, enabling individuals to write persuasively, professionally, and creatively. Effective writing supports successful business, academic, and personal communication.

**Course contents:**

Effective Writing Skills

- (i) Diary Writing
- (ii) Paragraph Writing
- (iii) Summary/Note making
- (iv) Formal and Informal Letter Writing
- (v) CV/ Resume Writing
- (vi) Report Writing
- (vii) Interview/Feature Article
- (viii) Notice Writing

**Classroom Activity:** Speaking Skills, Listening Skills, Mock Interview, Speech Making Project Work

**Suggested Projects:** Sports Writing, Poetry about Women/Men, Poetry in Translation, Translating a Poem, Telling a Story, Fantasy Writing, Chat Shows, The Menace of Dowry, A Success Story, Creative Writing, Theatre Groups, Interviewing a Celebrity, Writing a Newspaper Article on a Current Topic, Today's Youth and Youth Icons, Leadership and Politics, Examination System and Benefits of Reform, the Epics, Communalism, Gender Discrimination, Social Activism.

**Recommended Reading:** 1. English Communication Skills: AECC under CBCS, HPU. Meenakshi F. Paul and Madhumita Chakraborty. Macmillan, 2017.

**Suggested Readings:**

1. Fluency in English. Part I. Macmillan, 2005.
2. Fluency in English. Part II. OUP, 2006. Unit 1-15.
3. El Dorado: A Textbook of Communication Skills. Orient Blackswan, 2014. Units 1-5.
4. Interchange. Workbook III. Fourth Edition. Cambridge University Press, 2015. Units 1-8.
5. New Headway. Intermediate Student's Book. 3rd Edition. Oxford University Press, 2012. Units 1-6.
6. Write to be Read: Reading, Reflecting & Writing. First South Asian edition. Cambridge University Press, 2014. Units 1-4.
7. Business English. Pearson, 2008. Units 4-6.

**MBA**  
**Semester –I**  
**BS-618: Computer Applications in Management**

**Objectives of the Course** - The objectives of computer applications in management are to enhance data processing, improve decision-making, streamline operations, and automate tasks. It aims to optimize resource management, facilitate real-time communication, support data analysis, and improve efficiency, enabling managers to make informed decisions and drive business growth through technology integration.

**Unit I Conceptual Framework**

**(06 hours)**

Hardware: (a) Input devices - keyboard, printing devices, voice speech devices, scanner, MICR, OMR, Bar code reader, digital camera etc. (b) Output devices - Visual Display Unit, printers, plotters (c) Storage Devices – Magnetic storage devices, Optical storage devices, Flash Memory.

**Unit II: Operating System and Software**

**(06 hours)**

Software: Types of software with examples; Introduction to languages, compiler, interpreter and Assembler, Operating System Functions, Types and Classification, Elements of GUI based operating system.

**Unit III: Communication Technology**

**(08 hours)**

Network and Internet: Types of computer networks (LAN, WAN and MAN), Network topologies, EDI.  
Internet: Netiquettes, Architecture & Functioning of Internet, Basic services over Internet like WWW, FTP, Telnet, Gopher, IP addresses, ISPs, URL, Domain names, Web Browsers, Internet Protocols, Search engines, e-mail.

**Unit IV: Office tools for Business**

**(12 hours)**

Use of MS-Office: Word: Paragraph formatting, Page formatting, Header and footer, Bullets and numbering, Finding and replacing text, Mail merge, Macros. Cell referencing, Ranges.  
Excel: Formulae, Functions, Auto sum, Copying formula, Formatting data, creating charts, creating Database, sorting data, filtering.  
Power Point: Formatting text on slides, Inserting charts, adding tables, Clipping, Slide animation, Slide shows.

**Unit-5 Security and Ethical Challenges of IT**

**(8 hours)**

Concept of Business Ethics, Technology Ethics; Security and Ethical Challenges of IT, Cyber Crime and Privacy Issues, Cyber Laws, IT Act 2000.

**Suggested Readings**

1. Shrivastava-Fundamental of Computer& Information Systems (Wiley Dreamtech)
2. Leon A and Leon M - Introduction to Computers ( Vikas, 1st Edition).
3. ITL ESL – Introduction to Information Technology (Pearson, 2nd Edition).
1. 4 ITL ESL – Introduction to Computer science (Pearson, 2nd Edition).
4. Introduction to Computers, Norton P. (TATA McGraw Hill)
5. Leon - Fundamentals of Information Technology, (Vikas)

**MBA**  
**Semester –II**  
**BS-621: Organisational Behaviour**

**Objectives of the Course** - The objectives of organizational behavior are to understand and improve individual and group dynamics, enhance employee motivation, foster effective communication, and promote teamwork. It aims to improve leadership, increase job satisfaction, manage conflict, and create a positive organizational culture, ultimately improving productivity and organizational performance.

**Unit 1: Introduction**

Conceptual foundations of organizational behaviour; Nature and characteristics; Determinants; Contributing disciplines; Challenges and opportunities for Organisational Behaviour

**Unit 2**

- a) Perception, Attitudes, and Values: Nature, process, importance of perception; Factors influencing perception; Attribution theory of perception; Issues involved in perception: Selective - perception, Halo effect, Contrast effect, Projection, Stereotyping; Applications of perception theories in organization; Concept of Pygmalion effect; An overview of emotions values, beliefs and attitudes with emphasis on their managerial implications.
- b) Learning: Concept; Theories of learning: Classical conditioning, Operant conditioning, Social learning, Methods of shaping the behaviour, Managerial implication of learning theories.
- c) Motivation: Why people work? Concept, major theories and process of motivation: Maslow's need-hierarchy theory; Herzberg's motivation-hygiene theory; McGregor's Theory X and Theory Y; Cognitive evaluation theory; Goal-setting theory; Reinforcement theory; ERG theory; Vroom's expectancy theory; Job design theory; Equity theory; Integrating contemporary theories of motivation; Culture's influence on motivation theories: Managerial implications of various theories; Linking MBO with goal-setting theory; Linking recognition programmes and reinforcement theory; Linking employee involvement programmes and motivation theories.

**Unit 3**

- a) Personality: Concept and determinants; Personality traits; Major personality attributes influencing Organisational Behaviour; Locus of control; Machiavellianism; Self-esteem; Self-monitoring; Risk-taking; Type A and Type B personality; Proactive personality; Personality and national culture; Holland's typology of personality and congruent occupations.
- b) Leadership: Concept and functions; Style and theories of leadership: Traits, behavioural and situational/contingency groups of theories; Inspirational approaches to leadership: Charismatic leadership, Transformational leadership, and transactional leadership, Contemporary leadership roles; Challenges to the leadership construct; Substitutes and neutralizers to leadership.
- c) Stress: Concept; Consequences and sources; Stress Management: Individual approaches and organisational approaches.

**Unit 4**

- a) Group Behaviour: Groups: Concept and classification; Stages of group development; Group structure; Roles and group norms; Premises and issues; Group decision-making: Group vs individual; Groupthink and groups shift; Group decision-making techniques and process
- b) Interpersonal Relationships: Understanding self and others; Developing interpersonal relationships; Transactional analysis; Johari window.
- c) Conflict Management: Concept; Causes of conflict; Types of conflicts; Stages of conflicts; Effects of conflicts; Managing conflicts.

## Unit 5

- a) Organisation power and politics: Concept; Sources and classification; Power tactics; Coalitions; Organisational politics: Concept and people's response to organisational politics, The concept of impression management.
- b) Organisational culture and change: Concept; Dominant culture; Strong vs weak cultures; Creating and sustaining culture; Employees learning of the culture; Creating a customer-responsive culture
- c) Organisational change: Concept and forces for change; Managing planned changes; Resistance to change; Approaches to manage organisational' change; Organisational development; The concept of learning organization; Culture-boundedness of managing the change.

### **Suggested Readings:**

1. Robbins, SP, Stephen P., Timothy Judge, 'and SeemaSanghi, OrganisationalBehaviour, 15th ed., Pearson Education, 2012
2. W. Newstrom, John, OrganisationalBehaviour, 14th ed., Tata McGraw-Hill, 2014
3. Fred Luthans, OrganisationalBehaviour, 12<sup>th</sup>ed., McGraw-Hill, 2013
4. Heresy, Paul, Kenneth H. Blanchard, and Dewey E. Johnson, Management of OrganisationalBehaviour, 10th ed., Prentice-Hall of India, Eastern Economy Edition, 2013
5. SS Khanka, OrganisationalBehaviour, S. Chand & Co., New Delhi, 2013, 4<sup>th</sup> Edition

**MBA**  
**Semester –II**  
**BS-622: Management Accounting**

**Objective**

To provide the students the knowledge about the use of accounting information for planning, control and decision-making in organizations.

**Course Contents**

**Unit 1: Introduction**

Nature, scope, and importance of management accounting; difference between financial accounting and management accounting; difference between cost accounting and management accounting; cost control, cost reduction, and cost management.

**Unit 2: Budget and Budgetary Control**

Concept of budget and budgetary control; objectives, merits, and limitations of budget administration; types of budgets: fixed and flexible budgets, zero-base budget, programme and performance budget.

**Unit 3: Standard Costing**

Concept of standard cost and standard costing; advantages, limitations, and application; variance analysis: calculation of material variances, labour variances, and overhead variances, disposition of variances.

**Unit 4: Marginal Costing and Decision-making**

Concept of marginal costing, differential costing and absorption costing, break-even analysis, use of above costs in decision-making; make or buy, change of product-mix, pricing and determination of shut-down point.

**Unit 5: Responsibility Accounting**

Concept and approaches to responsibility accounting. Steps involved in responsibility centres and their types; Divisional performance measurement — financial measures.

**Suggested Readings:**

1. Charles C. Horngren, Gary L. Sundem, and William O. Stratton, Introduction to Management Accounting, 15th ed., Prentice—Hall of India/Pearson Education, Delhi, 2009
2. Khan, M.Y., and P.K. Jain, Management Accounting, 6th ed., Tata McGraw-Hill, New Delhi, 2013
3. Richard M. Lynch and Robert W. Williams, Accounting and Management: Planning and Control, 3rd ed., Tata McGraw-Hill, New Delhi, 2005
4. Anthony, Robert N., David F. Hawkins, and Kenneth A. Merchant, Accounting: Text and Cases, 13th ed., Tata McGraw-Hill, New Delhi, 2013

**BS-622A: Analysis and Interpretation of Data**

**Objective of the Course:**

To equip students with the fundamental techniques used in data analysis and interpretation, enabling them to effectively analyze business data for informed decision-making.

**Course Contents**

**Unit 1: Introduction to Data Analysis and Descriptive Statistics**

**Periods:** 8-1-2

**Topics Covered:**

- **Nature and Importance of Data Analysis:** Role of data in decision-making, types of data (qualitative vs. quantitative).
- **Types of Data:** Cross-sectional data, time-series data, panel data.
- **Descriptive Statistics:** Measures of central tendency (mean, median, mode), measures of dispersion (range, variance, standard deviation), and measures of shape (skewness and kurtosis).
- **Graphical Representation of Data:** Bar charts, histograms, pie charts, and frequency distributions.

**Unit 2: Probability and Probability Distributions**

**Periods:** 7-1-2

**Topics Covered:**

- **Basic Probability Concepts:** Definition of probability, events, sample spaces, conditional probability.
- **Probability Rules:** Addition rule, multiplication rule, Bayes' theorem.
- **Probability Distributions:**
  - **Discrete Probability Distributions:** Binomial distribution, Poisson distribution.
  - **Continuous Probability Distributions:** Normal distribution, exponential distribution.
- **Applications of Probability Distributions** in business decision-making.

**Unit 3: Inferential Statistics**

**Periods:** 8-1-2

**Topics Covered:**

- **Sampling and Sampling Distribution:** Sampling techniques, Central Limit Theorem, sampling distribution of the sample mean.
- **Estimation:** Point estimation and interval estimation, confidence intervals for population parameters (mean, proportion, variance).
- **Hypothesis Testing:** Formulation of null and alternative hypotheses, types of errors (Type I and Type II), p-value approach, and confidence intervals.
- **Tests of Significance:** z-test, t-test, chi-square test, and F-test.

## Unit 4: Regression and Correlation Analysis

**Periods:** 7-1-2

**Topics Covered:**

- **Correlation Analysis:** Types of correlation (positive, negative, and zero correlation), Pearson's correlation coefficient, Spearman's rank correlation.
- **Simple Linear Regression:** Model formulation, least squares method, interpretation of regression coefficients, assumptions, and limitations.
- **Multiple Linear Regression:** Introduction, model formulation, multicollinearity, interpretation of coefficients, R-squared, and adjusted R-squared.
- **Applications in business:** Predicting sales, forecasting demand, and risk analysis.

## Unit 5: Multivariate Analysis and Time Series Analysis

**Periods:** 8-1-2

**Topics Covered:**

- **Multivariate Analysis:** Introduction to multivariate data, principal component analysis (PCA), factor analysis, cluster analysis.
- **Time Series Analysis:** Components of time series (trend, seasonality, cyclical variations, irregular variations), moving averages, exponential smoothing, and ARIMA models.
- **Forecasting:** Techniques for forecasting in business, time series forecasting, and applications in demand forecasting and sales prediction.

**Suggested Readings:**

1. **"Statistics for Business and Economics"** by Paul Newbold, William L. Carre, and Betty Thorne – Pearson Education, 9th ed., 2013
2. **"Business Statistics: A Decision-Making Approach"** by David F. Groebner, Patrick W. Shannon, Philip C. Fry – Pearson Education, 8th ed., 2010
3. **"Business Analytics: Data Analysis and Decision Making"** by S. Christian Albright and Wayne L. Winston – Cengage Learning, 7th ed., 2019
4. **"Quantitative Methods for Business"** by David R. Anderson, Dennis J. Sweeney, and Thomas A. Williams – Cengage Learning, 12th ed., 2014
5. **"Applied Multivariate Statistical Analysis"** by Richard A. Johnson and Dean W. Wichern – Pearson, 6th ed., 2013
6. **"Statistics for Management"** by Levin, Rubin, and Stinson – Pearson Education, 7th ed., 2014

**MBA**  
**Semester – II**  
**BS-622B: Analysis and Interpretation of Data**

**Objectives of the Course** - The objectives of data analysis and interpretation are to extract meaningful insights, identify trends, make informed decisions, and solve business problems. It aims to improve accuracy, support forecasting, and enhance strategic planning.

**Unit 1: Introduction to Statistics and Data Collection**

- **Introduction to Statistics**
  - Definition and importance of statistics
  - Types of statistics: Descriptive and Inferential
  - Applications of statistics in various fields (e.g., business, social sciences, healthcare, etc.)
- **Types of Data**
  - Qualitative vs Quantitative data
  - Discrete vs Continuous data
  - Levels of measurement: Nominal, Ordinal, Interval, and Ratio scales
- **Data Collection and Sampling**
  - Types of data collection methods (surveys, experiments, observational studies)
  - Sampling techniques: Simple Random Sampling, Stratified Sampling, Systematic Sampling, Cluster Sampling
  - Errors in sampling: Sampling bias, Non-sampling errors
- **Introduction to Data Representation**
  - Frequency distribution tables
  - Graphical representation of data: Bar charts, Histograms, Pie charts, and Line graphs

**Unit 2: Descriptive Statistics**

- **Measures of Central Tendency**
  - Mean: Arithmetic and weighted
  - Median: Calculation and interpretation
  - Mode: Unimodal, bimodal, and multimodal distributions
- **Measures of Dispersion (Spread)**
  - Range: Definition and limitations
  - Variance and Standard Deviation: Calculation for population and sample
  - Coefficient of Variation: Interpretation in comparison
  - Interquartile Range (IQR) and Box Plots
- **Shape of the Distribution**
  - Skewness: Positive, negative, and symmetrical skewness
  - Kurtosis: Leptokurtic, platykurtic, and mesokurtic distributions
- **Exploratory Data Analysis (EDA)**
  - Use of graphical tools (Histograms, Box Plots, Stem-and-leaf displays) to summarize data

**Unit 3: Probability and Probability Distributions**

- **Basic Probability Concepts**

SCHOOL OF BUSINESS STUDIES & ENTREPRENEURSHIP, SHOBHIT UNIVERSITY, GANGOH

- Experiment, Sample space, Events, and Outcomes
- Probability of events: Classical, Relative frequency, and Subjective methods
- Addition and multiplication rules of probability
- Conditional probability and the concept of independence
- **Random Variables and Probability Distributions**
  - Discrete Random Variables: Probability mass functions (PMF)
  - Continuous Random Variables: Probability density functions (PDF)
  - Cumulative Distribution Function (CDF)
- **Common Probability Distributions**
  - **Discrete Distributions:**
    - Binomial distribution
    - Poisson distribution
  - **Continuous Distributions:**
    - Normal distribution
    - Exponential distribution
- **The Central Limit Theorem**
  - Importance of the Central Limit Theorem
  - Sampling distributions of sample means and their properties
  - Standard Error

#### Unit 4: Inferential Statistics

- **Sampling and Sampling Distributions**
  - Concept of a sample and population
  - Sampling distribution of the sample mean
  - Standard error and sample size considerations
- **Estimation and Confidence Intervals**
  - Point estimation and interval estimation
  - Confidence intervals for population mean, proportion, and variance
  - Interpretation of Confidence Intervals (e.g., 95% confidence level)
- **Hypothesis Testing**
  - Hypothesis testing framework: Null hypothesis ( $H_0$ ) vs Alternative hypothesis ( $H_1$ )
  - Type I and Type II errors
  - p-value, significance level ( $\alpha$ ), and decision-making
  - One-tailed and two-tailed tests
  - Tests for population mean (Z-test, t-test) and population proportion (Z-test)
- **Chi-Square Test**
  - Chi-square test for goodness of fit
  - Chi-square test for independence
  - Contingency tables

#### Unit 5: Regression, Correlation, and Statistical Analysis

- **Correlation**
  - Definition and types of correlation (positive, negative, no correlation)
  - Pearson correlation coefficient (r): Calculation and interpretation
  - Spearman rank correlation coefficient
- **Simple Linear Regression**
  - Linear regression model:  $Y = \beta_0 + \beta_1 X$
  - Estimation of coefficients (Least squares method)
  - Interpretation of regression coefficients
  - Coefficient of determination ( $R^2$ ): Goodness of fit

- Assumptions in linear regression
  - **Multiple Linear Regression**
    - Model with multiple predictors:  $Y = \beta_0 + \beta_1X_1 + \beta_2X_2 + \dots + \beta_nX_n$
    - Estimation of coefficients and interpretation
    - Multicollinearity and its effects
  - **Analysis of Variance (ANOVA)**
    - Concept of variance between and within groups
    - One-way ANOVA: Assumptions and application
    - Post-hoc tests: Tukey's HSD
    - F-statistic interpretation
- 

### Course Summary:

This syllabus provides a comprehensive foundation in both **descriptive** and **inferential statistics**, covering key concepts such as data collection, measures of central tendency, probability distributions, hypothesis testing, regression, and correlation. Practical skills in using statistical tools and methods are developed throughout the course, preparing students for real-world data analysis.

By the end of the course, students should be able to:

1. Collect, organize, and summarize data.
2. Perform basic probability calculations and understand common distributions.
3. Use statistical techniques to make inferences about populations from samples.
4. Conduct hypothesis tests and estimate population parameters.
5. Analyze relationships between variables using correlation and regression.

### Suggestive Readings:

- "Data Science for Business" by Foster Provost
- "The Art of Data Science" by Roger D. Peng
- "Data Analysis for Business Decisions" by Duane J. Ireland.

**MBA**  
**Semester – II**  
**BS-622C: Statistics, Computation and application**

**Objectives of the Course** - The objectives of statistics, computation, and application are to analyze data, model relationships, and make data-driven decisions. It aims to improve problem-solving, forecast trends, optimize processes, and enhance decision-making through statistical methods and computational tools applied in various fields like business, economics, and engineering.

## **Unit 1: Introduction to Statistics and Computational Tools**

### **1.1 Introduction to Statistics**

- Definition and scope of statistics
- Role of statistics in decision making and problem-solving
- Descriptive vs. Inferential statistics
- Applications of statistics in various fields (business, healthcare, engineering, etc.)

### **1.2 Types of Data and Variables**

- Qualitative vs. Quantitative data
- Discrete vs. Continuous data
- Nominal, Ordinal, Interval, and Ratio scales of measurement
- Cross-sectional vs. time-series data

### **1.3 Introduction to Statistical Software**

- Overview of statistical computation tools (e.g., **R**, **Python**, **SAS**, **SPSS**)
- Installation and basic setup of **R** and **Python**
- Introduction to key libraries: numpy, pandas, matplotlib in Python; ggplot2, dplyr in R
- Data input, cleaning, and exploration using computational tools
- Importing datasets and performing basic operations (mean, median, mode, etc.)

### **1.4 Computational Tools for Data Visualization**

- Creating histograms, bar charts, scatter plots, and box plots
- Customizing plots (titles, labels, colors, etc.)
- Visualizing distributions and summary statistics

---

## **Unit 2: Descriptive Statistics and Exploratory Data Analysis (EDA)**

### **2.1 Measures of Central Tendency**

- Mean, median, and mode: Definition, calculation, and interpretation
- Weighted mean and trimmed mean

### **2.2 Measures of Dispersion**

- Range, variance, and standard deviation
- Interquartile range (IQR) and boxplots
- Coefficient of variation and its application in comparisons

### **2.3 Data Distribution and Shape**

- Skewness and kurtosis
- Normal distribution and its properties
- Empirical rule for normal distribution
- Outliers: Detection using IQR and Z-scores

### **2.4 Exploratory Data Analysis (EDA)**

- Visual and computational methods for exploring data
- Summarizing data with tables and graphical methods
- Identifying patterns, trends, and relationships in data using plots and summary statistics

### **2.5 Data Cleaning and Preprocessing**

- Handling missing data (imputation, deletion, etc.)
- Outlier detection and treatment
- Transforming variables (log transformation, normalization)

## **Unit 3: Probability Theory and Probability Distributions**

### **3.1 Basic Probability Concepts**

- Sample space, events, and outcomes
- Conditional probability and Bayes' theorem
- Probability rules: Addition, multiplication, and complement

### **3.2 Random Variables and Probability Distributions**

- Definition of random variables: Discrete and continuous
- Probability mass function (PMF) for discrete variables
- Probability density function (PDF) for continuous variables

### **3.3 Common Probability Distributions**

- **Discrete Distributions:**
  - Binomial distribution: Properties and applications
  - Poisson distribution: Applications in rare events
- **Continuous Distributions:**
  - Normal distribution: Standard normal and Z-scores
  - Exponential distribution: Memoryless property
  - Uniform distribution: Properties and applications

### **3.4 The Central Limit Theorem (CLT)**

- Understanding the importance of CLT
- Sampling distributions of the sample mean and sample proportion
- Practical implications of CLT for inferential statistics

### **3.5 Simulation and Monte Carlo Methods**

- Generating random numbers and simulating random processes
  - Using Monte Carlo simulations to approximate probability distributions
  - Applications of simulation in risk analysis and forecasting
- 

## **Unit 4: Inferential Statistics and Hypothesis Testing**

### **4.1 Introduction to Inferential Statistics**

- Estimation and confidence intervals (for means, proportions, and variances)
- Point estimates vs. interval estimates
- Confidence interval for population mean (with known and unknown variance)

### **4.2 Hypothesis Testing**

- Framework of hypothesis testing: Null vs. Alternative hypothesis
- Type I and Type II errors, significance level ( $\alpha$ )
- One-tailed vs. two-tailed tests
- p-value and its interpretation

### **4.3 Parametric Tests**

- Z-test and t-test for means (one-sample, two-sample, paired)
- Hypothesis testing for population proportions (Z-test)
- Analysis of variance (ANOVA) for comparing multiple means

### **4.4 Non-Parametric Tests**

- Chi-square test for goodness of fit and independence
- Mann-Whitney U test, Kruskal-Wallis test for comparing ranks
- Wilcoxon signed-rank test

### **4.5 Practical Computation of Hypothesis Tests**

- Performing hypothesis tests using statistical software (R, Python)
  - Interpreting results and drawing conclusions
  - Application of hypothesis testing to real-world datasets
- 

## **Unit 5: Regression Analysis, Time Series, and Applications**

### **5.1 Simple and Multiple Linear Regression**

- Simple linear regression: Model, assumptions, and interpretation
- Multiple linear regression: Multiple predictors and the regression equation
- Least squares method: Fitting the model and estimating coefficients
- Model diagnostics: Residual analysis, R-squared, and multicollinearity

## **5.2 Logistic Regression**

- Introduction to logistic regression for binary outcomes
- Estimating the odds ratio and interpretation of coefficients
- Model fit and evaluation: ROC curve, AUC

## **5.3 Time Series Analysis and Forecasting**

- Components of time series: Trend, seasonality, and noise
- Autocorrelation and lag plots
- Time series decomposition: Additive and multiplicative models
- Forecasting models: Moving averages, exponential smoothing, and ARIMA models

## **5.4 Applications in Data Science and Machine Learning**

- Data preprocessing and feature engineering
- Introduction to machine learning models: Supervised vs. unsupervised learning
- Introduction to algorithms: Decision trees, k-means clustering, SVM, etc.
- Evaluating models: Accuracy, precision, recall, and F1-score

## **5.5 Case Studies and Applications**

- Applying statistical models to real-world data
- Case studies in business, healthcare, economics, or environmental science
- Using statistical computation tools (e.g., R, Python) for solving practical problems

## **Suggestive Readings:**

- "Statistics for Business and Economics" by Paul Newbold
- "Applied Multivariate Statistical Analysis" by Richard A. Johnson
- "Introduction to Computational Statistics" by James E. Gentle
- "The Elements of Statistical Learning" by Trevor Hastie, Robert Tibshirani, and Jerome Friedman.

**MBA**  
**Semester –II**  
**BS-623: Operations Research**

**Objective of the Course**

To equip the students with the basic understanding of techniques used in operations research, so as to apply them in business decision-making.

**Allocation of Periods: 45 (Lectures-50, Tutorials-5, Practicals-10)**

**Course Contents**

**Unit 1**

**a) Operations Research:** Nature, scope, and applications

**b) Linear Programming:** Mathematical formulation, Graphical Method and Simplex Method of solving LP problem; Special cases: Infeasible Solution, Degeneracy, Unboundedness, and Multiple 'Optimal Solutions; Sensitivity analysis; Duality; Business applications of linear programming.

**(Periods-8-1-2)**

**Unit 2**

**a) Transportation Technique:** Major methods of finding initial basic feasible solution, Stepping-stone and MODI methods for finding optimal solution; Special cases of transportation problem.

**b) Assignment Problem:** Algorithm, Special cases.

**(Periods-6-1-**

**2)**

**Unit 3: Inventory Control**

Concept, functions, and significance of inventory; major decisions; Relevant costs; Classical EOQ model: limitations, extensions of the classical EOQ model; gradual receipt; application of EOQ model in production process; quantity discount; Planned stock-out; Re-order level; ABC analysis.

**(Periods-5-1-**

**2)**

**Unit 4**

**a) Project Management:** PERT and CPM and their applications, PERT/Cost; Resource leveling.

**b) Queuing Theory:** Introduction; Structure of queuing system; characteristics of M/M/I queuing model; Applications of queuing theory.

**(Periods-5-1-2)**

**Unit 5**

**a) Game Theory:** Concept of game; 'two-person', 'zero-sum' games; pure and mixed-strategy games; rule of dominance; major methods of solving game theory problems; Limitations and applications of game theory.

**b) Simulation:** Definition; Types; Advantages and limitations; Phases of simulation model; Applications to PERT problems, investment problem, and inventory problems.

**(Periods-6-1-**

**2)**

**Suggested Readings:**

- 1) Anderson, David R., Dennis J. Sweeney, and Thomas A. Williams, Quantitative Methods for Business, Thomas South-Western, New Delhi, 12th ed., 2004
- 2) Hillier, F.S., and G.J. Lieberman, Introduction to Operations Research, McGraw-Hill Book Co., New Delhi, 10th ed., 2015
- 3) Vohra, N.D., Quantitative Techniques in Management, Tata McGraw-Hill, New Delhi, 4<sup>th</sup> ed., 2011.
- 4) Levin, R.I., D.S. Rubin, J.P. Stinson, and E.S. Gardner, Jr., Quantitative Approaches to Management, McGraw-Hill Book Co., New Delhi, 5th ed., 2005
- 5) Hamdy, A. Taha, Operations Research: An Introduction, Prentice-Hall, New Delhi, 8th ed., 2016.

SCHOOL OF BUSINESS STUDIES & ENTREPRENEURSHIP, SHOBHIT UNIVERSITY, GANGOH

**MBA**  
**Semester –II**  
**BS-624: Marketing Management**

**Objectives**

To acquaint the students with the principles and practices of marketing

**Unit 1: a) Marketing Concept** - Marketing management; Nature and scope; Evolution of marketing; Selling vs marketing; Emerging role of marketing; Marketing mix.

**b) Marketing Environment** - Concept; Need for study; Major elements and their impact on marketing decisions.

**Unit 2: a) Consumer Behaviour** - Consumer vs. organisational/ industrial buyer; Their characteristics; Importance of understanding consumer behaviour; Determinants of consumer behaviour; Theories of consumer behaviour; Various buying roles in family; Types of buying behaviour; Consumer decision-making process in buying.

**b) Market Segmentation** - Nature and importance of segmentation; Pre-requisites for effective segmentation; Bases of segmenting consumer markets; Market selection strategies; Positioning.

**Unit 3: Product Decisions**

Concept of product; Classification of products; Product line and Product mix; Branding, packaging, and labeling; Customer services; Development of new product; Product Life-cycle; The new product (Consumer); Adoption process.

**Unit 4: a) Price Decisions** - Pricing as a marketing variable-its role and importance; Price vs. non-price competition; Factors influencing price determination; Price setting in practice; Price policies and strategies.

**b) Distribution Channels and Physical Distribution Decisions** - Why are marketing intermediaries used? Marketing channel functions; Selecting channels of distribution; Determining the intensity of distribution; Channel management decisions-selection, motivation and evaluation of individual middlemen; Manufacturer-distribution relationship; Retailing and wholesaling; Logistics of distribution.

**Unit 5: a) Promotion Decisions** - Nature; Objectives and importance of promotion; Communication process; Promotion mix and methods; Advertising; Personal Selling; Public Relations; and Sales Promotion.

**b) Legal, Ethical, and Social Aspects of Marketing** - Consumerism; Consumer protection measures in India; Recent developments in consumer protection in India.

**Suggested Readings:**

1. Philip Kotler, • Levin Lane Keller, Abraham Koshy, and MithleshwarJha, *Marketing Management: South Asian Perspective*, 13<sup>th</sup> ed., Pearson Education, New Delhi, 2012
2. Michale J. Etzel, Bruce J. Walker, William J. Stanton, and Ajay Pandit, *Marketing: Indian Adaptation*, 14<sup>th</sup> ed., Tata McGraw-Hill, New Delhi, 2009
3. E. Jerome McCarthy and William B. Perrealet, *Basic Marketing: A Managerial Approach*, 15<sup>th</sup> ed., Tata McGraw-Hill, New Delhi, 2009
4. Philip Kotler and Gary Armstrong, *Principle of Marketing*, 14<sup>th</sup> ed., Prentice-Hall of India, New Delhi, 2014
5. *The Consumer Protection Act, 1986*

**MBA**  
**Semester –II**  
**BS-625: Financial Management**

**Objectives of the Course**

This course seeks to help the students in developing their skills for financial decision-making.

**Course Contents**

**Unit 1: Introduction to Financial Management**

Nature, scope, and objectives of financial management; Time-value of money; Concept of risk and return; Valuation of securities: Bonds and Equities; Functions of Finance Management in modern age.

**Unit 2: Long-term Investment Decisions**

Concept and Principles of Capital Budgeting; Methods of capital Budgeting: Payback Method, Accounting Rate of Return, Net Present Value (NPV), Net Terminal Value, Internal Rate of Return (IRR), Profitability Index; Capital budgeting under risk; Certainty-Equivalent Approach and Risk-adjusted Discount Rate

**Unit 3 : Working Capital Management**

Concept of working capital; Planning for working capital, The risk-return trade-off; Management of cash and near-cash assets; Payables management; Management of accounts receivable; Inventory management; Sources, of short-term finance.

**Unit 4 : Long-term Financing Decisions and Cost of Capital**

Capitalisation; Capital structure; Factors affecting the pattern of capital structure; Basic assumptions and theory of capital structure; Estimation of components of cost of capital; Equity capital and external and internal retained earnings; Debt and preference capital; Weighted-Average Cost of Capital (WACC) and marginal cost of capital; Sources of long-term financing: Capital structure; Operating and financial leverage; Determinants of capital structure; Corporate securities.

**Unit 5 : Dividend Decisions**

Concept of dividend; Significance of dividend decision in business; Forms of dividend; Factors affecting dividend policy; Dividend policy theories: Walter's Model; Modigliani-Miller approach; Gordon's Model; Dividend policy in practice.

**Suggested Readings:**

1. James C Van home, Financial Management and Policy, 13th ed., Prentice-Hall of India, New Delhi
2. I.M. Pandey, Financial Management, Vikas Publication, 11 ed., 2015
3. M.Y. Khan and P.K. Jain, Financial Management, Tata McGraw-Hill, 7th ed., 2014
4. V. Sharan, Essentials of Financial Management, Prentice-Hall of India, New Delhi, 6<sup>th</sup> ed., 2010
5. Van Horne and Wachowicz, Jr., Fundamentals of Financial Management, 13th ed., 2015
1. Prentice-Hall of India,
6. Eugene F. Brigham and Joel F. Houston, Fundamentals of Financial Management, concise 9<sup>th</sup> ed. (Indian Edition), Thomson South-western (now Cengage Learning), New Delhi, 2016
7. Ravi M. Kishor, Financial Management, 5th ed., 2018, Taxmann, New Delhi
8. R.P. Rustagi, Financial Management, Galgotia Publishers, New Delhi, 11<sup>th</sup> edition, 2016
9. Lawrence J. Gitman, Principles of Managerial Finance, Pearson Education, 14<sup>th</sup> ed., New Delhi
10. Prasanna Chandra, Fundamentals of Financial Management, Tata McGraw-Hill, 6<sup>th</sup> ed., 2014

**MBA**  
**Semester –II**  
**BS-626: Human Resource Management**

**Objective of the Course**

To enable students to understand procedures, processes and techniques applied in the management of Human Resource in an organisation.

**Allocation of Periods: 45 (Lectures-30, Tutorials-5, Practicals-10)**

**Course Contents**

**Unit 1 : Introduction to Human Resource Management**

Evolution of FIRM (b) Objectives and functions of HRM (c) Role and responsibilities of HR manager (d) Relevance of HRM (e) Systems approach to HRM.

**(Period-6-1-2)**

**Unit 2 : Acquisition of Human Resource Management**

Human Resource Planning: Purpose and process (b) Recruitment and Selection: Sources of Recruitment, Stages in Selection Process (c) Placement, goals analysis: Job description and job specification.

**(Period-7-1-4)**

**Unit 3 : Developing Human Resources**

(a) Training and Development: Training needs, training methods, application of computers in training, developing effective training programmes (b) Concept of HRD (c) Management development programmes

**(Period-4-1-2)**

**Unit 4 : Performance Appraisal**

(a) Concept and objectives of performance appraisal (b) Process of performance appraisal (c) Criteria for performance appraisal (d) Benefits of performance appraisal (d) Limitations and constraints (f) 360 degree performance appraisal (g) Promotion-degree, transfer and separation: Promotion, purpose, principles and types; Transfer: Reasons, principles and types; Separation: Lay-off, resignation, dismissal, retrenchment, voluntary, retirement scheme.

**(Period-4-1-1)**

**Unit 5 : Motivating Human Resources**

(a) Motivation at Work, Major Motivation Theory: An Overview (b) Participative Management (c) Compensation Management, Major Elements of Compensation Management (d) Incentives: Concepts, types of incentives; Incentives schemes in Indian industries; Fringe benefits (e) Discipline and employees' grievance redressal

**(Period-5-1-0)**

**Suggested Readings:**

1. Dessler, Gary, and Biju Varkkey, Human Resource Management, 14<sup>th</sup> ed. Pearson Education, New Delhi, 2015.
2. Gomez-Mejia, et al., Managing Human Resources, 7<sup>th</sup> ed., Pearson Education
3. Ivancevich, Human Resource Management, Tata McGraw-Hill, 8<sup>th</sup> ed., 2000
4. David S. Decenzo and Stephen P. Robbins, Personal/Human Resource Management, 8<sup>th</sup> ed., Prentice-Hall of India, New Delhi, 2015
5. Biswajeet Pattanayak, Human Resource Management, 4<sup>th</sup> ed., Prentice-Hall of India, New Delhi
6. K. Aswathappa, Human Resource and Personnel Management, Tata McGraw-Hill, 6<sup>th</sup> ed.
7. RS Dwivedi, Managing Human Resources in Indian Enterprises, Galgotia Publishing Co., New Delhi, 5<sup>th</sup> ed.

**MBA**  
**Semester –II**  
**BS-627: Production and Operations Management**

**Objective of the Course**

To enable students to understand the techniques of Production and Operations Management, and be able to apply those effectively in the business.

**Allocation of Periods: 45 (Lectures-30, Tutorials-5, Practicals-10) Course Contents**

**Unit 1 : Introduction to Production and Operations Management (P&OM)**

(a) Nature, Objectives and Scope of P&OM (b) Evolution of P&OM (c) Transformation System (d) Functions and Responsibilities of Operations Manager (e) Difference between Goods and Services (f) New product development

**(Periods- 4-1-2)**

**Unit 2 : Facilities Management**

(a) Types of Processes (b) Process Selection (c) Importance of Facilities Location (d) Factors Affecting Facilities Location (e) Location Evaluation (f) Facility's Layout: Criteria for Good Layout, Benefits of good layout, Symptoms of Poor Layout, Types of Facility's Layout, Layout planning

**(Periods- 6-1-2)**

**Unit 3 : Production Planning**

(a) Introduction to Production Planning (b) Production Planning Strategies (c) Introduction to Capacity Planning (d) Aggregate Planning (e) Master Production Scheduling (f) Material Requirement Planning (g) Production Scheduling

**(Periods- 6-1-2)**

**Unit 4 : Production Control**

(a) Elements of Production Control (b) Purchase Process (c) Receiving (d) Inventory Management: Graphical, Tabular and EOQ Models of Inventory Control; Economic Production Lot Size (EPLS) (e) Just-In-Time Inventory (f) Selective Control Tools of Inventory.

**(Periods- 6-1-2)**

**Unit 5 :**

**a) Quality Management:** Concepts of Total Quality Management (TQM)

**b) Tools for Lean and Six Sigma:** Value stream map; 7 wastes; Pure and replenishment types; Standardised work; Total Productivity Management (TPM); Just-in-time (JIT)

**(Periods- 8-1-2)**

**Suggested Readings:**

1. Chase, Jacob, Aquilano, and Agarwal, *Production and Operations Management*, 13<sup>th</sup>ed. (TMH, New Delhi), 2009
2. Lee J. Krajwski, *Operations Management: Strategy and Analysis*, 6<sup>th</sup> ed., Pearson Education, N. Delhi
3. Jeffery K. Liver, *Toyota Production Way*
4. Adam Ebert, *Production and Operations Management*, 6<sup>th</sup> ed., Pearson Education, N. Delhi
5. S.N. Chary, *Production and Operations Management*, TMH, New Delhi, 5<sup>th</sup> edition
6. William J. Stevenson, *Operations Management*, 13<sup>th</sup> ed., 2017, McGraw-Hill, New Delhi
7. Muhlemann, Oakland, Lockyer, Sudhir, and Katyayani, *Production and Operations Management*, 6<sup>th</sup> ed., Pearson Education, 2007
8. Elwoods S. Buffa and Rakesh K. Sarin, *Modern Production/ Operations Management*, 8<sup>th</sup> ed., Wiley Student Edition, 2009
9. Joseph S. Martinich, *Production and Operations Management*, 10<sup>th</sup> Reprint, Tata McGraw-Hill, New Delhi/Nbida, 2005
10. Norman Gaither, *Operations Management*, Cengage Learning
11. Ritzman, et al., *Operations Management*, Pearson, 11<sup>th</sup> ed., 2015

**MBA**  
**Semester –II**  
**BS-628: Management Information System**

**Objective of the Course**

To enable students to understand and apply Information Technology and e-commerce in the business decision-making

**Allocation of Periods: 45 (Lectures-30, Tutorials-5, Practicals-10)**

**Course Contents**

**Unit 1 : Information Systems in Business**

- a) Information Technology, Information System, Information versus data.
- b) Transaction processing system, Process control system.
- c) Electronic Business (e-business), Electronic Commerce (e-commerce), Legacy system
- d) Competitive Advantage, Competitive Strategies, Strategic Information Systems, Reengineering Business Processes, Total Quality Management (TQM), Porter's Competitive Model.

**Unit 2 : Computer Hardware, Software, and Network**

- a) Central Processing Unit (CPU), Primary storage (memory), Secondary storage, Minicomputer (midrange), Automated input devices, Storage devices' Microprocessor' Peripheral devices.
- b) Application-specific programs, general-purpose application software, end-user software, system software, system development software, general purpose vs application specific programming language, machine language.
- c) Digital versus analog network, modem, network topology, Local Area Network (LAN), and Wide Area Network (WAN), fiber optic cable.

**Unit 3 : E-Business Systems**

- a) Batch Processing, On-line (real-time) Systems, Inventory Control.
- b) Cross-Functional Enterprise Applications, Enterprise Application Integration,
- c) Collaboration Systems, Direct Business Model.
- d) Supply Chain Management (SCM), Challenges of SCM, Enterprise Resource Planning (ERP), Challenges of ERP, Customer Relationship Management (CRM), Challenges of CRM, Outsourcing.
- e) Internet, Intranet, and Extranet, B2B e-Commerce, B2C e-Commerce, C2C e-Commerce, Electronic Payment Systems, Electronic Funds Transfer, Access Control and Security.

**Unit 4 : Decision Support System**

- a) Decision Structure, Decision Support system versus management reporting, Reporting alternatives, Data mining, On-line Analytical Processing (OLAP)
- b) Expert System, Level of Management Decision Making, Artificial Intelligence, Neural Network, Virtual Reality.

**Unit 5 : Developing Business/ IT Solutions**

- a) Feasibility Study, Cost/benefit analysis, Functional requirements, Organisational Analysis, Prototype, Systems development life-cycle, Conversion Methods, Tangible versus Intangible Benefits, Post-implementation review, Documentation.
- b) Water-fall Model, Incremental Model, Spiral Model
- c) Data flow diagram, Entity-relationship model

**Suggested Readings:**

1. O'Brien, James, and Marakas, George, Management Information Systems, Tata McGraw-Hill, 2009, 10<sup>th</sup>ed.
2. Abhijit Chaudhury, Abhijit and Jean-Pierre Kuilboer, e-Business and e-Commerce Infrastructure: Technologies Supporting the e-Business Initiative, Mc-Graw-Hill Companies, 2002
3. Jawadekar, W.S, Management information System, Tata McGraw-Hill, 6<sup>th</sup>ed.
4. Bajaj, K.K., and Nag, Debjani, e-Commerce, Tata McGraw-Hill, 2<sup>nd</sup> edition
5. Davis, Olsan, Management Information System, Tata McGraw-Hill, New Delhi, 8<sup>th</sup> ed., 2006
6. Loudan and Loudan, Management Information System, 13<sup>th</sup>ed.

**MBA**  
**Semester –III**  
**BS-631: Strategic Management**

**Objective of the Course**

To acquaint the students with the essentials of formulation, implementation, decision-making, and control strategies in the management of a corporate business organization, in 3. achieving social impact of public and not for profit organizations, global value chain strategies, managing and evaluating entrepreneurship opportunities and start ups, change management, challenges of global businesses, emerging technologies and fostering innovation

**Allocation of Periods: 45 (Lectures-30, Tutorials-5, Practicals-10)**

**Course Contents**

**Unit 1 : Introduction:** Concept of Strategic Management; Strategic management process; Business policy; Corporate strategy; Mission, vision, objectives; Basic model of strategic management; Strategic decision-making; Role of strategic management in marketing, finance, HRM, and global competitiveness.

**(Periods-2-0-0)**

**Unit 2 : Formulation of Strategy**

- a) Defining the Organisational Mission Triple Bottom-line and Social Responsibility.
- b) External Environment (Analysis and Implications).
- c) The Global Environment: Strategic Considerations for Multinational Firms.
- d) Internal Analysis.
- e) Formulating Long-Term Objectives and Grand Strategies

**(Periods-10-1-2)**

**Unit 3 : Strategic Analysis**

- a) Strategic Analysis and Choice in Single or Dominant Product Business: Building Sustainable Comparative Advantages.
- b) Strategic Analysis and Choice in the Multibusiness Company: Rationalising Diversification and Building Shareholder Value

**(Periods-6-1-2)**

**Unit 4 : Implementation of Strategy**

- a) Implementing Strategy through Short-Term Objectives, Functional Tactics, Reward System and Employee Empowerment, Leadership, and Culture
- b) Managing and Evaluating Entrepreneurship
- c) Change Management and Continuous Improvement.

**(Periods-2-1-2)**

**Unit 5**

- a) Global Value Chain Strategies
- b) Contemporary Issues: Management of Emerging Technologies; Innovations (Research, Development and Applications); Management of Non-Profit Organizations; Business in Volatile Global Environment.

**(Periods-8-2-4)**

**Suggested Readings:**

1. John A Pearce II, Richard B Robinson. Jr., Strategic Management, 11th ed., Tata McGraw Hill, 2015
2. Lawrence R. Gauch & William F. Glueck, Business Policy and Strategic Management, McGraw Hill, 2<sup>nd</sup> edition
3. AzharKazmi, Business Policy of Strategic Management, Tata McGraw Hill, 4<sup>th</sup> edition, 2008.
4. Thomson, Strategic Management: Concept and Cases, Tata McGraw-Hill, New Delhi, 13<sup>th</sup> International edition
5. Gregory G. Dess, GT (Tom) Lumpkin, Alan Eisner, Strategic Management, Tata McGraw-Hill, Noida, 2015
6. Wheeler David and K. Rangarajan, Concepts of Strategic Management and Business Policy, Pearson Education, New Delhi, 13<sup>th</sup> edition
7. Cliff Broman, Business Policy and Strategic Management, PHI, New Delhi, 2014
8. Ohmae, K., The Mind of the Strategist, McGraw-Hill, New York, 1<sup>st</sup> edition
9. Chandler, Alfred, Strategy and Structure, Doubleday, New York
10. Drucker, Peter, The Practice of Management,

**MBA**  
**Semester –III**  
**BS-632: International Business**

**Objective of the Course**

To expose students to the concept, importance, and dynamics of international business and India's involvement with global business operations.

**Allocation of Periods: 45 (Lectures-35, Tutorials-5, Practicals-5) Course Contents**

**Unit 1**

**a) Introduction:** Nature and scope of International business; Rationale of International business; Concept of globalization and its importance; Impact of globalization; International business Vs domestic business.

**b) International business environment:** Economic, Socio-cultural and politic-legal environment; Complexities of International business; Modes of entry into International business; Global trading environment-recent trends in world trade in goods and services; Trends in India's foreign trade.

**Unit 2**

**a) Theories of International Trade:** An overview; Commercial Policy Instruments-tariff and non-tariff measures; Balance of payment account and its components.

**b) International Organisations and Arrangements:** WTO - Its objectives, principles, organisational structure and functioning; An overview of other organizations — UNCTAD, World Bank and IMF; Commodity and other trading agreements.

**Unit 3**

**a) Regional Economic Co-operation:** Forms of regional groupings; Integration efforts among countries in Europe, North America, and Asia.

**b) International Financial Environment:** International financial system and institutions; Foreign exchange markets and risk management; Foreign investments-types and flows; Foreign investment in Indian perspective.

**Unit 4**

**a) Organisational structure for international business operations:** Key issues involved in making international production, finance, marketing and human resource decisions; International business negotiations.

**b) Developments and issues in International business:** Outsourcing and its ' potentials for India; Strategic alliances, mergers and acquisitions; Role of IT in International business; International business and ecological considerations.

**Unit 5**

a) Foreign Trade promotion measures and organizations in India; Special economic zones (SEZs) and 100% export oriented units (EOUs); Measures for promoting foreign investments into and from India; Indian joint ventures and acquisitions abroad.

b) Financing of foreign trade and payment terms.

**Suggested Readings:**

1. Charles, W.L. Hill and Arun K. Jain, International Business, Tata McGraw-Hill, New Delhi, 2011, 6<sup>th</sup> edition
2. Johnson, Derbe, and Colin Turner, International Business — Themes and Issues in the Modern Global Economy, London: Routledge, 2010, 2<sup>nd</sup> edition
3. Cherunilam, Francis, International Business: Text and Cases, Prentice-Hall of India Ltd., 2009, 6<sup>th</sup> edition.
4. John, H. Daniels and Lee H. Radenbaugh, International Business Environments and Operations, Pearson, Delhi, 2009, 12<sup>th</sup> edition
5. Justin, Paul, International Business, Prentice-Hall of India Ltd., 2008, 5<sup>th</sup> edition
6. Michael R. Czinkota, et al., International Business, The Dryden Press, Fortforth, 2002
7. RBI, Report on Currency and Finance, Various issues.
8. Griffin, Ricky, and Michael W. Pustay, International Business — A Managerial Perspective, Prentice-Hall, Upper Saddle River, New Jersey, 2003
9. Bennett, Roger, International Business, Pearson, Delhi, 1999, 2<sup>nd</sup> edition
10. UNCTAD Reports
11. WTO, Annual Report, Various Issue

**MBA**  
**Semester –III**  
**BS-633: Research Methodology**

**Objectives of the Course** - The objectives of research methodology are to provide systematic methods for data collection, analysis, and interpretation. It aims to ensure accuracy, reliability, and validity in research findings, guide researchers in problem-solving, and enable them to draw meaningful conclusions that contribute to knowledge advancement and informed decision-making.

**Unit 1 Concept of Research:** Definition, Meaning, Importance types and Qualities of Research; Research applications in functional areas of Business, Emerging trends in Business research.

Research & the Scientific Method: Characteristics of scientific method. Steps in Research Process

Research Proposal – Elements of a Research Proposal, Drafting a Research Proposal, evaluating a research proposal.

**Unit 2 Research design:** Concept, Features of a good research design, Use of a good research design; Exploratory Research Design: Concept, Types: Qualitative techniques – Projective Techniques, Depth Interview, Experience Survey, Focus Groups, OBS-ervation.

Descriptive Research Designs: Concept, types and uses. Concept of Cross-sectional and Longitudinal Research

Experimental Design: Concept of Cause, Causal relationships, Concept of Independent & Dependent variables, concomitant variable, extraneous variable, Treatment, Control group.

**Unit 3 Scaling & measurement techniques:** Concept of Measurement: Need of Measurement; Problems in measurement in management research – Validity and Reliability. Levels of measurement – Nominal, Ordinal, Interval, Ratio.

Attitude Scaling Techniques: Concept of Scale – Rating Scales viz. Likert Scales, Semantic Differential Scales, Constant Sum Scales, Graphic Rating Scales – Ranking Scales – Paired comparison & Forced Ranking – Concept and Application.

**Unit 4 Sampling:** Basic Concepts: Defining the Universe, Concepts of Statistical Population, Sample, Characteristics of a good sample. Sampling Frame (practical approach for determining the sample frame expected), Sampling errors, Non Sampling errors, Methods to reduce the errors, Sample Size constraints, Non Response.

Probability Sample: Simple Random Sample, Systematic Sample, Stratified Random Sample, Area Sampling & Cluster Sampling.

Non Probability Sample: Judgment Sampling, Convenience Sampling, Purposive Sampling, Quota Sampling & Snowballing Sampling methods.

**Unit 5 Data Analysis:** Editing, Coding, Tabular representation of data, frequency tables, Construction of frequency distributions, Graphical Representation of Data: Appropriate Usage of Bar charts, Pie charts, Histogram, Leaf and stem, Candle stick, Box plots.

Bi-variate Analysis: Linear Regression Analysis: Meaning and two lines of regression; relationship between correlation and regression co-efficient, Cross tabulations, Chi-square test;

Hypothesis: Qualities of a good Hypothesis –Framing Null Hypothesis & Alternative Hypothesis. Concept of Hypothesis Testing – Logic & Importance.

Test of Significance: Small sample tests: t (Mean, proportion) and F tests, Z test, on-parametric tests: Binomial test of proportion, Randomness test; Analysis of Variance: One way and two-way Classifications, Interpretation of the given data and scenario analysis is expected for appropriate managerial decision inferences to be drawn.

**Suggested Readings:**

1. Business Research Methods, Naval Bajpai, Pearson Education, 2015
2. Research Methodology, C R Kothari, New Age International, 2<sup>nd</sup> edition, 2013
3. Research Methodology, Deepak Chawla, NeenaSondhi, Vikas Publication, 1<sup>st</sup> edition, 2011
4. Business Research Methods by Donald Cooper & Pamela Schindler, TMGH, 12<sup>th</sup> Edition (2013)
5. Business Research Methods by Alan Bryman & Emma Bell, Oxford University Press, 4<sup>th</sup> Edition. (2015)

**MBA**  
**Semester –III**  
**BS-633A: PUBLICATION ETHICS**

**Objectives of the Course** - The objectives of publication ethics are to ensure integrity, transparency, and fairness in the publishing process. It aims to prevent plagiarism, authorship disputes, and data manipulation. Ethical publishing fosters credibility, promotes accurate knowledge dissemination, and upholds academic standards, ensuring research is shared responsibly and contributes to the scientific community.

**Unit 1: Introduction to Publication Ethics**

- **1.1 Definition and Scope of Publication Ethics**
  - What is publication ethics?
  - Importance of ethics in academic publishing and research dissemination
  - Ethical issues in publication: Plagiarism, authorship, conflicts of interest, duplicate publication
- **1.2 The Role of Integrity in Research and Publication**
  - The importance of honesty, transparency, and accountability
  - Ethical principles guiding research and publication
  - Key guidelines from professional bodies: COPE (Committee on Publication Ethics), ICMJE (International Committee of Medical Journal Editors), Elsevier, Springer
- **1.3 Ethical Issues in Scholarly Publishing**
  - Plagiarism: Definition, types, and how to avoid it
  - Fabrication and falsification of data
  - Redundant or duplicate publication
  - Conflicts of interest and how to manage them
- **1.4 Introduction to Ethical Guidelines for Authors**
  - Guidelines on authorship, contribution, and order of authorship
  - The concept of "Ghostwriting" and "Guest Authorship"
  - Ethical responsibility of authors in reporting research findings

**Unit 2: Ethical Standards in the Research Process**

- **2.1 Ethical Issues in Research Design**
  - Importance of ethical considerations in research design
  - Obtaining informed consent and the role of Institutional Review Boards (IRBs) or Ethics Committees
  - Ethical considerations for vulnerable populations in research
- **2.2 Data Management and Ethics**
  - Responsible data collection, storage, and sharing practices
  - Ensuring data accuracy and integrity
  - Avoiding data manipulation or selective reporting
- **2.3 Authorship and Accountability**
  - Criteria for authorship: Who qualifies as an author?
  - Determining the order of authorship
  - Responsibilities of authors, co-authors, and corresponding authors
- **2.4 Ethical Issues in Peer Review**
  - The peer review process and its role in ensuring publication quality
  - Types of peer review: Single-blind, double-blind, open peer review
  - Ethical concerns in peer review: Confidentiality, bias, and conflict of interest
  - Handling reviewer reports and revising manuscripts ethically

### Unit 3: Ethical Publishing Practices

- **3.1 The Publication Process**
  - Steps involved in submitting a manuscript to a journal: Initial submission, revision, acceptance
  - Ethical responsibilities of the editor and the publisher
  - Publisher's role in enforcing ethical publishing standards
- **3.2 Avoiding Publication Malpractices**
  - Plagiarism detection and prevention techniques
  - Self-plagiarism and recycling content across multiple publications
  - Dealing with simultaneous submissions to multiple journals
  - Ethical issues related to the manipulation of impact factors or citation counts
- **3.3 Case Studies of Publication Ethics Violations**
  - Real-life examples of ethical violations in publishing (e.g., retracted papers, fabricated data)
  - The consequences of unethical practices in research and publishing
  - Case studies of journals and researchers who have faced ethical issues
- **3.4 Copyright and Intellectual Property**
  - Copyright laws and their application in academic publishing
  - Licensing agreements and open access publishing
  - The role of Creative Commons in sharing academic work responsibly

### Unit 4: Ethical Challenges in Open Access and Self-Publishing

- **4.1 Open Access Publishing: Ethical Considerations**
  - Definition and models of open access publishing
  - Advantages and ethical concerns in open access publishing
  - Predatory publishers: Characteristics and how to identify them
  - Ethical implications of publishing in paid vs. free access journals
- **4.2 Ethical Challenges in Self-Publishing and Preprints**
  - Risks of self-publishing and ethical issues surrounding it
  - Preprint servers: Benefits and ethical concerns (e.g., early dissemination of unreviewed research)
  - Maintaining academic rigor and transparency in self-publishing platforms
- **4.3 Ethical Issues in Citation Practices**
  - Proper citation practices: Avoiding citation manipulation and inappropriate referencing
  - Citation cartels and the unethical practice of forced citation
  - Ethical implications of citing non-existent or misleading sources
- **4.4 Addressing Unethical Practices in Research**
  - Dealing with research misconduct: Steps for investigation and reporting
  - Reporting ethical violations to journals, publishers, and institutions
  - Whistleblowing ethics and the protection of whistleblowers

### Unit 5: Ethical Decision-Making in Publishing

- **5.1 Ethical Decision-Making Models**
  - Ethical theories and their application in research and publication ethics
  - Utilitarianism, deontology, virtue ethics, and the application in publishing decisions
  - Ethical dilemmas in publishing and how to resolve them
- **5.2 Institutional and Legal Aspects of Publication Ethics**
  - Role of universities, research institutions, and professional organizations in promoting ethical publishing
  - The role of ethics committees in research misconduct investigations
  - Legal frameworks surrounding academic publishing: Libel, defamation, and plagiarism laws

- **5.3 Research Misconduct and Handling Ethical Violations**
  - Types of research misconduct: Plagiarism, falsification, fabrication
  - Procedures for handling allegations of misconduct
  - Consequences of research misconduct for authors and institutions
  - Ethical implications of retraction and correction of published work
- **5.4 Promoting Ethical Publishing in Academia**
  - Training researchers and authors on ethical publishing practices
  - Institutional responsibility for upholding ethical standards
  - Promoting transparency and accountability in academic research
  - Initiatives to support ethical publication practices (e.g., open science, open peer review)

### **Course Summary:**

This course on **Publication Ethics** provides a comprehensive understanding of the ethical standards, practices, and responsibilities involved in academic publishing. It covers everything from the research process to the publication process, peer review, and the ethical challenges posed by emerging trends such as open access publishing. The course also emphasizes how researchers, authors, and publishers can uphold integrity, transparency, and accountability in disseminating research.

### **Learning Outcomes:**

By the end of this course, students should be able to:

1. Understand and apply key principles of publication ethics.
2. Recognize ethical issues in the research and publishing process and handle them appropriately.
3. Maintain research integrity through responsible data management and authorship practices.
4. Navigate the challenges of open access, copyright, and self-publishing in the context of ethical publishing.
5. Address and resolve ethical dilemmas in academic publishing with integrity and professionalism.

### **Suggested Readings:**

1. **Publication Ethics** by Barbara J. Troup (Springer)
2. **Ethical Guidelines for Publication in Scholarly Journals** by COPE (Committee on Publication Ethics)
3. **Research Ethics: A Philosophical Guide to the Responsible Conduct of Research** by Gary Comstock
4. **Research Misconduct in the Health Sciences** by John I. Gallin & Frederick P. Ognibene
5. **Publication Ethics: The Role of Authors and Editors** by H. U. Kambhampati & J. P. Johnso

**MBA**  
**Semester –III**  
**BS-633B: Emerging trends in Research**

**Objectives of the Course** - The objectives of emerging trends in research are to explore innovative methodologies, incorporate advanced technologies, and address contemporary challenges. It aims to foster interdisciplinary collaboration, enhance data-driven insights, and promote sustainable, impactful solutions. These trends drive scientific discovery, improve research efficiency, and contribute to addressing global issues.

**Unit 1: Introduction to Emerging Trends in Research**

- **1.1 Defining Emerging Trends in Research**
  - What constitutes an emerging trend?
  - Importance of staying updated with research trends
  - Factors influencing changes in research practices (technology, globalization, etc.)
- **1.2 Evolution of Research Methodologies**
  - Traditional vs. modern research methods
  - Technological advancements that are transforming research (e.g., big data, artificial intelligence, machine learning)
  - The impact of interdisciplinary research
- **1.3 Role of Digital Tools in Research**
  - Introduction to digital tools for data collection and analysis
  - Research software: Data management systems, qualitative analysis tools, and modeling software
  - The role of cloud computing in research collaboration
- **1.4 Globalization and Its Influence on Research Trends**
  - Cross-border collaboration in research
  - Global research funding trends and priorities
  - International standards and guidelines in research practices

**Unit 2: Big Data and Artificial Intelligence in Research**

- **2.1 Understanding Big Data**
  - Definition and characteristics of big data (Volume, Variety, Velocity, Veracity)
  - Sources of big data in business research (e.g., social media, consumer behavior, sensors, etc.)
  - Big data analytics techniques: Descriptive, Predictive, and Prescriptive Analytics
- **2.2 Role of Artificial Intelligence and Machine Learning in Research**
  - Machine learning algorithms in data analysis (supervised, unsupervised, reinforcement learning)
  - AI-driven research tools for automation of repetitive tasks (data cleaning, summarizing literature, etc.)
  - Case studies of AI applications in business research (predictive modeling, sentiment analysis)
- **2.3 Data Visualization Techniques for Big Data**
  - Visualizing large datasets: Heatmaps, cluster maps, time series, and geospatial visualization
  - Tools for data visualization (e.g., Tableau, PowerBI, D3.js, R, Python libraries)
  - Creating interactive dashboards for business decision-making
- **2.4 Ethical Considerations in Big Data and AI Research**
  - Privacy concerns and data security issues in big data research
  - Bias in machine learning algorithms and ethical implications
  - Responsible AI and fair use of data

---

## Unit 3: Digital and Social Media Research

- **3.1 Introduction to Digital and Social Media Research**
  - Impact of digital platforms on research practices
  - Types of data available from digital platforms (social media, blogs, forums, online reviews)
  - Ethical and privacy considerations in digital and social media research
- **3.2 Social Media Analytics**
  - Social media as a research tool: Sentiment analysis, trend analysis, influencer analysis
  - Tools for social media research (e.g., Hootsuite, Brandwatch, Sprout Social, Twitter API)
  - Measuring social media impact and engagement
- **3.3 Text Mining and Natural Language Processing (NLP)**
  - Techniques in text mining: Information retrieval, topic modeling, sentiment analysis
  - Applications of NLP in business research (e.g., analyzing customer feedback, market research)
  - Case studies of successful text mining applications in marketing and customer service
- **3.4 Digital Surveys and Crowdsourcing**
  - Designing and implementing digital surveys using platforms like Google Forms, SurveyMonkey, Qualtrics
  - Crowdsourcing as a method for gathering large-scale research data
  - Ethical concerns in digital surveys and crowdsourcing

## Unit 4: Sustainability and Social Impact Research

- **4.1 Research on Sustainability and Corporate Social Responsibility (CSR)**
  - Importance of sustainability in business research
  - Measuring environmental, social, and governance (ESG) factors
  - Integrating sustainability metrics into business decision-making
- **4.2 Green and Sustainable Business Practices**
  - Emerging trends in eco-friendly business models and practices
  - Research on renewable energy, sustainable supply chains, and waste reduction
  - Role of technology in promoting sustainability in businesses
- **4.3 Social Impact and Social Entrepreneurship Research**
  - The role of social entrepreneurship in addressing global challenges
  - Research methodologies in social impact measurement (e.g., social return on investment, impact assessment)
  - Case studies of businesses with a strong social impact focus
- **4.4 Trends in Corporate Governance and Ethics**
  - New approaches in corporate governance research
  - Ethical considerations and transparency in business research
  - Regulatory changes and their impact on business practice

## Unit 5: The Future of Research: Collaborative and Open Research Practices

- **5.1 Open Science and Open Access Publishing**
  - Definition and benefits of open science: Open data, open methodology, open access journals
  - The rise of open access publishing: Impact on research dissemination
  - Platforms for open access research (e.g., arXiv, Open Science Framework)
- **5.2 Collaborative Research Networks**
  - Benefits of interdisciplinary and international research collaboration
  - Research consortia and academic-business partnerships
  - Platforms for collaborative research (e.g., ResearchGate, Mendeley, Google Scholar)

- **5.3 The Role of Crowdsourcing in Innovation and Research**
  - Crowdsourcing as a method for innovation and problem-solving in research
  - Crowdsourcing in product development, idea generation, and market research
  - Examples of successful crowdsourcing initiatives in business research
- **5.4 Emerging Technologies in Research: Blockchain, IoT, and 3D Printing**
  - The role of blockchain technology in ensuring research data integrity and transparency
  - Internet of Things (IoT) and its potential for gathering real-time business data
  - 3D printing technology in business research and prototyping.

### **Learning Outcomes:**

By the end of the course, students will be able to:

1. Identify and evaluate emerging research trends and their impact on business research.
2. Apply advanced data analytics techniques, including AI and machine learning, to business problems.
3. Understand and leverage digital and social media platforms for research.
4. Explore and conduct research on sustainability, CSR, and social impact.
5. Understand the future of research, including open science, crowdsourcing, and collaborative practices.

### **Suggested Readings:**

1. **Big Data and Business Analytics** by Jay Liebowitz
2. **Research Methods for Business Students** by Mark Saunders, Philip Lewis, Adrian Thornhill (7th Edition, Pearson)
3. **Artificial Intelligence in Business: Research and Applications** by Andreas Kaplan and Michael Haenlein
4. **Digital Research Methods** by Sue McKemmish and Melissa Adler
5. **The Open Access Movement in Research** by Tim Gowers

**MBA**  
**Semester –III**  
**BS-634: Supply Chain Management**

**Objective of the Course**

The objective of the course is to familiarize the students with the mechanism of supply chain planning, design, and operations in the firms. This will help to manage Facilities, inventory, transportation, and information the key drivers of supply chain management

**Allocation of Periods: 45 (Lectures-30, Tutorials-5, Practicals-10)**

**Contents of the Course**

**Unit 1 : Introduction to Supply Chain Management (SCM)**

(a)Basic Concepts, Scope And Philosophy Of Supply Chain Management, (b) Importance Of Supply Chain Management, (c) Supply Chain Decision, (d) Evolution Of Supply Chain Management.

**(Periods-4-1-2)**

**Unit 2 : Designing the Supply Chain**

(a) Role Of Distribution In Supply Chain, (b) Factors Influencing Distribution Network, (c) Process Of Supply Network Design, (d) Distribution Strategy, (e) Models For Facilities Location And Capacity Allocation, (f) Impact Of Uncertainty In Supply Chain Design, (g) Evaluation Of Supply Chain Design, (h) Demand Chain Management, (i) Strategic Alliances.

**(Periods- 6-1-2)**

**Unit 3 : Performance Measurement and Control**

(a)Concept, Dimensions Of Performance Measurement, (b)Tools For Performance Improvement: Benchmarking: Introduction, Forms Of Benchmarking, GAP Analysis, Benchmarking Study Report; (c)Achieving Strategic Integration, (d)Supply Chain Operations Reference (SCOR) Modeling, SCOR Analysis, (e)Value Chain, (f) Concept Of Configurability, (g)Evaluation Of Supply Chain Performance (Supply Chain Cost Analysis), (h)Impediments To Improved Performance.

**(Periods- 7-1-2)**

**Unit 4 : Logistics Management**

(a)Concept of LOGistics, Inbound And Outbound Logistics, (b) Key Activities of Logistics, (c) Managing The Costs Of Logistics, (d)Application Of Logistics Management, (e)Trade-Offs In Logistics Management, (f)Bull-Whip Effect In Logistics, (g)Third And Fourth Party Logistics, (h)Emergence Of IT In Logistics, (i) International Issues In Logistics, (j)Warehousing, Types Of Warehouses, Site Selection, Layout And Design Of Warehouses.

**(Periods- 7-1-2)**

**Unit 5 : Emerging Trends in Supply Chain Management**

(a)Role Of Information Technology (IT) In Supply Chain Management: Electronic Data Interchange (EDI), E-Customer Relationship Management, Use Of Data Mining Tools, E-Business Framework, (b) Customer Profitability Analysis (CPA), (c) International Issues In Supply Chain Management.

**(Periods- 6-1-2)**

**Suggested Readings:**

1. Chopra, Meindl; Supply Chain Management: Strategic Planning and Operation, 7th ed., Pearson Education, New Delhi, 2016
2. Altekar, Supply Chain Management: Concepts and Cases, Prentice-Hall of India, New Delhi, 10<sup>th</sup> print, 2015
3. BS-Sahay, Supply Chain Management, Macmillan, New Delhi, 2007
4. G. Raghuram , Logistics and Supply Chain Management, Macmillan, New Delhi, 2000
5. Balou, Supply Chain Management, Pearson Education, 5<sup>th</sup> edition, 200

**MBA**  
**Semester –IV**  
**BS-641: Entrepreneurship Development**  
**Allocation of Periods: 45 (Lectures-30, Tutorials-5, Practicals-10)**

**Objectives of the Course** - The objectives of entrepreneurship development are to foster innovation, create job opportunities, and promote economic growth. It aims to equip individuals with the necessary skills, knowledge, and resources to start and manage successful ventures. The goal is to enhance entrepreneurial spirit, encourage risk-taking, and drive sustainable business development.

**Course Contents**

**Unit 1 : Foundations of Entrepreneurship Development**

Concept and need of entrepreneurship; Definition of entrepreneur, entrepreneurship, innovation, invention, creativity, business idea; Entrepreneurship as a career; Entrepreneurship as a style of management; The changing role of the entrepreneur; Entrepreneurial traits.

**(Periods-6-1-2)**

**Unit 2 : Theories of Entrepreneurship**

Influences on entrepreneurship development; External influences on entrepreneurship development; Socio-cultural, political, economical, personal entrepreneurial success and failure: reasons and remedies; Women entrepreneurs; Challenge to women entrepreneurs; achievements of women entrepreneurs.

**(Periods-4-1-2)**

**Unit 3 : Business Planning Process**

The business plan as an entrepreneurial tool; Elements of business plan; Objectives; Market analysis; Development of product/idea; Marketing, finance, organization and management; Ownership; Critical risk contingencies of the proposal; Scheduling and milestones

**(Periods-7-1-2)**

**Unit 4 : Project Management**

Technical, financial, marketing personnel, and management feasibility reports; Financial schemes offered by various financial institution, like Commercial Banks, IDBI, ICICI, SIDBI, SFCs.

**(Periods-7-1-2)**

**Unit 5 : Entrepreneurship Development and Government**

Role of Central Government and State Government in promoting entrepreneurship with various incentives, subsidies, grants, etc.

**(Periods-5-3)**

**Suggested Readings:**

1. Khanka, S.S., Entrepreneurial Development, S. Chand, New Delhi
2. Hisrich D. Robert, Michael P. Peters, Dean A. Shepherd, Entrepreneurship, McGraw-Hill, 6th ed.
3. Zimmerer W. Thomas, Norman M. Scarborough, Essentials of Entrepreneurship and Small Business Management, PHI, 4th ed.
4. Holt H. David, Entrepreneurship: New Venture Creation, Prentice-Hall of India, New Delhi, Latest edition.
5. Kuratko, F. Donald, Richard M. Hodgetts, Entrepreneurship: Theory, Process, Practice, Thomson, 7th ed.
6. Desai, Vasant, Dynamics of Entrepreneurial Development and Management, Mumbai, Himalaya Publishing House, Latest edition.
7. Dollinger, Mare J., Entrepreneurship: New Venture Creation, Prentice-Hall of India, New Delhi, Latest edition.
8. Patel, V.G., The Seven Business Crises and how to Beat them, Tata McGraw-Hill, New Delhi, 1995.
9. Roberts, Edward B. (ed.), Innovation: Driving Product, Process; and Market Change, Jossey Bass, 2002.
10. SIDBI Report on Small Scale Industries Sector, Latest edition.

**MBA**  
**Semester –IV**

**BS-642: Corporate Social Responsibility & Corporate Governance**

**Objective:** The course aims to develop student's general theoretical knowledge of corporate social responsibility in contemporary economies and to reflect upon and analysis CSR as an evolving management practice and to gain basic knowledge on Corporate Governance Principles and purpose of good corporate governance

**Allocation of Periods: 45 (Lectures-30, Tutorials-5, Practicals-10)**

**Unit 1 : Introduction to Corporate Social Responsibility**

**(Periods-6-1-2)**

Definition, Necessity, Demands and Implications of CSR, Global Perspective, Trends and Generation of CSR, Social and ecological responsibility, Forces causing social and ecological responsibility, Corporate Responsibility, Accountability and Sustainability, Integrating Bottom Line Measures in CSR, Indian Approach to' CSR.

**Unit 2 : Corporate Sustainability**

**(Periods-6-0-2)**

Concept of corporate sustainability, Drivers for corporate sustainability, External drivers: Governments, community activists, consumers, customers, market expectations, other corporations, industry associations and non-government organisations. Internal drivers: Corporate leaders and change agents within the company.

**Unit 3 : Corporate Governance**

**(Periods-8-2-3)**

Evolution of Corporate Governance, Narasirnhao Com ittee and other Committee Recommendations on Corporate Governance, Effective Board of Directors and its role, Independent Directors and Audit Committee, Remuneration Committee, Nomination Committee; Corporate and Capital Structures

**Unit 4 : Evaluation of effectiveness of Internal Control**

**(Periods-10-2-3)**

Management Accounting applications and Directors' Responsibility Statement; Going Concern status-financial and other indicators, role of management audit, evaluation of going concern uncertainties; Related party transactions and disclosures; Project management audit and corporate governance; Relevance of Risk Evaluation and Risk management; Evaluation of key financial decisions and disclosures; Management Audit for investors' protection in the context of Corporate Governance, Corporate Governance Norms as prescribed by SEBI,

**Suggested Readings:**

1. May, Steve, George Cheney, and Juliet Roper (eds.) (2006), The Debate over Corporate Social Responsibility, Oxford University Press.
2. Baxi CV, and Prasad Ajit, Corporate Social Responsibility: Concept and Cases, Excel Books, 2006.
3. Dunphy, D., A. Griffiths, and S. Benn, Organisational Change for Corporate Sustainability, London: Routledge, 2003.
4. Laura P. Hartman and AbhaChatterjee, Perspectives in Business Ethics, Tata McGraw Hill, 3rd ed., 2007.
5. John L. Colley, Jacqueline L. Doyle, George W. Logan, and Wallace Stettinius, Corporate Governance, McGraw-Hill, 2003.

**MBA**  
**Semester –IV**  
**BS-643: E- Business**

**Objectives of the Course** - The objectives of e-business are to enhance efficiency, expand market reach, and streamline operations through digital platforms. It aims to improve customer experience, reduce costs, and enable real-time communication. E-business fosters innovation, supports global transactions, and helps businesses gain a competitive edge in a rapidly evolving digital marketplace.

**Unit I** **(8 Sessions)**

Introduction to E-Business: Overview of E-Business; Information Services; Interpersonal Communication; Shopping Services; Virtual Enterprises

E-Commerce: Origin and Need of E-Commerce; Factors affecting E-Commerce; Business dimension and technological dimension of E-Commerce; E-Commerce frame work; Internet as an E-Commerce enabler handling business transactions;

Handling payments: Electronic Fund Transfer System, Digital Token an notational based electronic payment system, smart card, credit card and emerging financial instruments

**Unit II** **(8 Sessions)**

B2B E-Commerce: B2B E-Commerce models: supply oriented, buyer oriented, intermediary oriented; Just-in-time for B2B commerce

Mobile Commerce: Introduction to mobile commerce; Frame required for mobile computing; Challenges emerging in mobile commerce security considerations

**Unit III** **(8 Sessions)**

E-Commerce and Banking: changing dynamics in banking industry; Home banking and its implementation; Management issues in on-line banking

E-Commerce and retailing: On-line retail industry dynamics; On-line mercantile models from customer perspective; Management challenges in on-line retailing

**Unit IV** **(8 Sessions)**

E-Commerce and on-line publishing: On-line publishing approach from customer prospective; Supply chain management fundamentals; Intranets and Supply Chain Management; Managing retail supply chains, Supply chain Application Software

EDI: EDI application in business development; EDI technology; EDI as a re-engineering tool; Financial EDI

**Unit V** **(8 Sessions)**

Indian Perspective: Benefits of E-Commerce; Drawbacks and limitations of E-Commerce; Major requirements in E-Business; Emerging trends and technologies in E-Business; From E-Commerce to E-Business, Web security: Introduction; Firewalls and transaction security.

**Suggested Readings**

1. Bhaskar- E-Commerce (Tata McGraw-Hill)
2. Krishnamurthy- E-Commerce Management: Text and Cases (Vikas)
3. Laudon and Traver- E-Commerce: Business, Technology, Society (Pearson Education)
4. Michel D et al- Business-to-Business Marketing (Palgrave, 2003)
5. Greenstein and Feinman- Internet securities
6. Kalakota and Whinston- Frontiers of electronic commerce (Pearson Education),
7. Kalakota R- Electronic Commerce: A manager's guide (Pearson Education) 2000

**MBA**  
**Semester –IV**  
**MARKETING GROUP**  
**(Electives)**

**Group A**

**BS-6M1: Consumer Behaviour**

**Objective of the Course**

To enable students to understand the Concepts and Strategies of Management of Consumer Behaviour and Branding.

**Allocation of Periods: 45 (Lectures-30, Tutorials-5, Practicals-10)**

**Unit 1 : Introduction**

Defining consumer behaviour; Reasons for studying consumer behaviour, applying consumer behaviour knowledge; Scope of consumer behaviour; Market segmentation; Bases of segmentation, Criteria for effective targeting of market segments

**(Periods-6-1 -2)**

**Unit 2 Consumer as an Individual**

Consumer Motivation; Consumer involvement, Personality and Self Concept; Perception; Consumer Learning and memory; Information processing, Attitudes and Changing Attitudes

**(Periods-7-1-2)**

**Unit 3 Consumers in Social and Cultural Settings**

Reference Groups and Family Influences; Social class, Cultural; Sub cultural and Cross cultural Influences on Consumer Behaviour; Personal influences and Diffusion of Innovations; Impact of Media and Globalization.

**(Periods-7-1-2)**

**Unit 4 : Consumer Decision Process**

Problem Recognition; Search and Evaluating; Purchasing processes; Post-purchase Behaviour; Consumer Behaviour Models; Consumerism; Organisational Buying Behaviour.

**(Periods-4-1-2)**

**Unit 5 : Branding**

(a) Concept of Brand (b) Types of Brand (c) Branding Challenges (d) Products & Brands (e) Brand Image & Personality (f) Brand Equity (g) Association (h) Brand Positioning, Core values, & Brand Mantra (i) Brand Extension (j) Managing Brands (k) Branding in Services. (l) Global Branding.

**(Periods-6-1-2)**

**Suggested Readings:**

1. Schiffman and Kanuk, Consumer Behaviour, Prentice-Hall of India, 2007.
2. H.V. Verma, Brand Management Excel Books -2007
3. Desmond J, Consumer Behaviour, Palgrave, 2007
4. Loudon, D L, Consumer Behaviour, Tata McGraw-Hill, 2007 edition)
5. Blackwell, et al, Consumer Behaviour ,Vikas, 9th edition (Blackwell) 2007.

**MBA**  
**Semester –IV**

**BS-6M2: Sales Management**

**Course Objective**

To enable a students to understand the Processes, Planning and Strategies of Sales and Distribution Management.

**Allocation of Periods: 45 (Lectures-30, Tutorials-5, Practicals-10)**

**Unit 1 : Introduction**

(a)Selling as a part of marketing, Sales management process (b) Role of sales manager, Concept of personal selling, Sales management and salesmanship (c) Theories of personal selling; Process of personal selling.

**(Periods-6-1-2)**

**Unit 2 : Goals in Sales Management**

(a) Goal setting process in sales amangement, Analysing market demand and sales potential (b) Techniques of sales forecasting; Preparation of sales budget (c) Formulating selling strategies (d) Designing sales territories and allocating sales effort, objectives and Quota for sales personnel.

**Periods-(6-1-2)**

**Unit 3 : Sales Force Management**

(a)Organising the sales force, Designing the structure and size of sales force (b) Recruitment and selection of sales personnel, Leading alid motivating the sales force (c)Training the sales personnel, Designing and administering Compensation Plan, Sales contest; Evaluation Programme (d) Sales analysis, Cost analysis.

**UNIT-4**

Managing Human Resources inflow- Resourcing plans; Recruitment and selection strategies; alternative to recruitment; selection methods and techniques; role of consultants and assessment centers in recruitment and selection and retention policies. Developing Human Resources ñ Concept of HRD; HRD as a strategic approach to employee performance: HRD and TQM; HRD experience in different industries; corporate training and development strategies.

**UNIT-5**

Strategic management of employee relations, HRM approach to employee relations: HRM values and employee relations; change management; creating employee commitment through the HRM Approach; HRM and culture management; employees involvement and participation in decision- making and management of organization; negotiating employee relations: HRM and trade unions: HRM changes in management control systems: HRM accounting.

**Suggested Readings:**

1. Kenneth Andrew, A Concept of Corporate Strategy.
2. HRM by Gary Dessler
3. HRM by Decenzo and Robbins

**MBA**  
**BS-6H3: Training & Development of Human Resources**

**Objective of the Course**

To enable students to understand, the Purpose, Processes and Methodology of Planning and Conduct of Training and Development of Human Resource in an Organisation.

**Allocation of Periods: 45 (Lectures-30, Tutorials-5, Practicals-10)**

**Course Contents**

**Unit 1 : Training and Development in Organisation:**

(a) Relationship between Training and Development (b) Objectives of Training (c) Purpose, (d) Aligning of Training to Organisation needs and Strategies. (e) Budgeting for Training in Organisation (f) Benefits of Training.

**(Periods- 6-1-2)**

**Unit 2 : Process of Training in Organisation**

(a) Identifying and Analyzing Training Needs in Organisation (b) Designing Training and Development Programme (c) Implementation of the Training Programme (d) Evaluation of the Programme.

**(Periods-5-1-1)**

**Unit 3 : How to Conduct Training Effectively in Organisation** (a) Involvement of Top Management (b) Dedication of Trainers (c) Motivation of Trainees (d) Quality Infrastructure for Training (e) Availability of Time (f) Environment for Teaching-Learning.

**1)**

**(Periods-5-1-1)**

**Unit 4 : Trends of Training in Modern Organisations**

(a) Concept of Learning Organisations (b) Training for Team Work (c) Training for Effective Communications (d) Training for Management of Cultural Diversity in Organisations (e) Training for Total Quality Management (f) Training for Management of MNCs.

**(Periods-7-1-3)**

**Unit 5 : Human Resource Development**

(a) Concept and Historical Perspective (b) Objectives of HRD, (c) Aim and Problems in Learning, (d) Challenges and Methods of Adult Learning, (e) Shaping Individual Response to Development (Johari Window, Transactional Analysis), (f) Career Planning (g) Succession Planning (h) Employee Appraisal and Counseling (i) Employee Mentoring

**(Periods-7-1-3)**

**Suggested Readings:**

1. Blanchard, Effective Training, PHI Publications
2. Singh R P, Management of Training Programmes, Anmol Publications, New Delhi, 2000.
3. Lynton R P and Pareek U, Training for Organizations Transformation Sage Publications, New Delhi, 2004.
4. Dessler Gary, Human Resource Management, Prentice-Hall of India, New Delhi, 2005.

**MBA**  
**BS-6H4: Performance and Compensation Management**

**Objective of the Course**

To enable students to learn the strategies & management of wages, salary and compensation in an organisation & the legal provisions involved there in.

**Allocation of Periods: 45 (30 Lectures, 5 Tutorials, 10 Practicals)**

**Unit 1 : Introduction**

**(Periods: 7 - 1 - 2)**

Compensation meaning, Importance, Components & types of compensations, Factors Influencing Compensation, Challenges of Compensation, Theory of wages, Wages - Living wage, Fair wage and Minimum wage. Related Case Laws. Difference between Wages and salary, Wages Plans, Compensation Management: Role of Trade Unions, Government and Other Stake Holders.

**Unit 2 :**

**(Periods: 5 - 1 - 1)**

Internal alignment, Factors influencing internal structure, Strategic choices in defining internal structure, Job analysis: procedure and design. Job evaluation- definition, Purpose of job evaluation, Job based structures, its role in determining the compensation system, categories of job evaluation- analytical, non-analytical and market pricing; developing and maintaining job evaluation schemes.

**Unit 3 : Individual and Team Pay**

**(Periods: 6 - 1 - 2)**

Types of grade and pay structure, developing grade and pay structure, individual contingent pay, performance and competency related pay, contribution related pay; Team rewards- developing team pay, profit sharing, ESOPs, Recognition schemes, Role of performance appraisal in compensation decisions.

**Unit 4 Legal Aspects of Wages & Salary**

**(Periods: 7 - 1 - 3)**

Administration International Labour Standards & Norms for Wage determination, Salient features of Payment of Wages Act 1936, Minimum Wages Act 1948, Employees Provident & Misc. Provisions Act, Latest developments in Govt pension schemes, Equal Remuneration Act.

**Unit 5 : International pay systems**

**(Periods: 5 - 1 - 2)**

Managing variations, The social contract, culture, National systems: Comparative compensations. Future trends in compensation management, case studies.

**Suggested Readings**

1. George T Milkovich, Jerry Newman, C.S VenkataRatnam - Compensation (McGrawHill) Ninth Edition.
2. Michael Armstrong- A Handbook of Employee Reward Management & Practice, Kogan Page 2/e
3. Dipak Kumar Bhattacharyya -Compensation Management — Oxford University Press 2009
4. P.L Malik - Handbook of Labour and Industrial Law (EBC) (12th Edition, 2009)
5. Richard I Henderson, Compensation Management in a Knowledge- Based World, Pearson education, 10/e, 2009
6. K Aswathappa- Human Resource Management- Tata McGraw Hill Fifth Edition. 5/e, 2008

**MBA**  
**BS-6H5: Negotiation and Counseling**

**Objective of the Course:**

To understand the concepts of conflict, negotiation, counselling and their significance for modern business. To enable students to identify the patterns of negotiations and counselling and also the influence of various factors and issues that have bearing on effective negotiations and counselling.

**Course Contents**

**Unit 1 : Conflict**

Concept, sources, types, stages of conflict. Classification of conflict- intra-individual, inter-personal and inter-group; strategies for conflict - individual, organisational. Role of Communication in conflict, stimulating conflicts in organisations.

**Unit 2 : Negotiation**

Concept, resolving conflict through negotiations, critical elements of negotiations, strategy and tactics of distributive bargaining and integrative negotiations. Strategies of negotiations, importance of perception and cognition in negotiation, cognitive biases in negotiations, communication and negotiations, gender and negotiations

**Unit 3**

- a) Important Factors and Emotions in Negotiation: Creativity, BATNA, Role of emotions.
- b) International and Cross Culture Negotiations: Environmental and cultural context. Influence of culture on negotiations.
- c) Role of Third Party in Negotiations: benefit and liability of third party interventions, types of third party interventions, formal intervention methods -mediation, arbitration, process consultation and combination. Latest developments in the field of Alternative dispute resolutions.

**Unit 4**

- a) Counselling: Concept and definition of counselling, emergence and growth of counselling, counselling psychotherapy, instructions and counselling,
- b) Approaches to Counselling- psychoanalytical, behaviouristic and humanistic approach;

**Unit 5**

Goals of counselling, characteristics of counsellor, values in counselling, 5 D model of counselling process, phases of counselling, procedures of counselling, core conditions of counselling, principles and techniques of counselling, Organisational applications of counselling, concepts of mentoring, ethics in counselling

**Suggested Readings:**

1. Roy, J, Levick, David M. Saunders, Bruce Barry Negotiation, Tata McGraw Hill, New Delhi, 5/e, 2008.
2. Kavita Singh, Counselling skills for managers, Pearson Education, New Delhi, 1/e, 2006.
3. Steven Cohen -- Negotiating skills for managers, Tata McGraw Hill, New Delhi, 1/e, 2008.
4. Richard Welson, Jones, Introduction to Counseling skills -- Texts and Activities, Sage Publications, 2000.
5. Barbara A. Budge, Corvete, Conflict Management: A Practical Guide to Developing Negotiation Strategies, Pearson Education, New Delhi, 2007.

**MBA**  
**Open Specialization**  
**BS-6H6: Corporate Leadership**

**Objective of the Course**

To enable students to understand Basic Concepts, Values and Implications of Total Quality Leadership.

**Allocation of Periods: 45 (Lecture-30, Tutorials-5, Practicals-10)**

**Contents of the Course**

**Unit 1 : Concept, Implications and Quality of Leadership**

(a) Concept and Roles of Leadership. (b) Leadership and Management. (c) Leader and Controlling Authority. (d) Leader, Organisation and People. (e) Leadership, Competitors, Competence and Performance. (f) Leadership and Self-Care. (g) Leadership Responsibilities. (h) Leadership Dilemma and Priorities. (j) Leadership and Success. (k) Effectiveness of Leadership. (l) Leadership and Quality.

**(Periods-3-0-0)**

**Unit 2 : Academic Thoughts on Leadership Effectiveness**

(a) Trait Approach. (b) Leader- Group — Situation Approach. (c) Behavioural Style Approach. (d) Motivational Approach. (e) Skill Approach. (f) Systems Approach.

**(Periods-6-1-2)**

**Unit 3 : Values, Ethics and Leadership**

(a) Genesis of the Philosophy of Values and Ethics. (b) Definition and Relationship between Values and Ethics. (c) Scope, Implications and Criteria of Ethical Values of the Leadership. (d) Role of Leadership in Cultivation of the Values and Ethics.

**(Periods-2-1-2)**

**Unit 4 : Approach to the Values, Ethical Philosophy and Role Model of Total Quality Leadership**

(a) Prevalent Thoughts on Leadership Values, Ethics and Role Model. (b) Analysis of the Prevalent Thoughts on Leadership Values, Ethical Philosophy and Role Model. (c) Approach to the Selection of the Values and Ethics and of Total Quality Leadership.

**(Periods-2-1-2)**

**Unit 5**

Leadership Values Advocated in the Ancient Scriptures, Values Practised by the Great Leaders, Leadership Values Cherished in the Modern Era, Ethical. Application of the Values of Total Quality Leadership.

**(Periods-6-0-4)**

**Suggested Readings:**

1. Bombay Chamber of Commerce and Industry, Value Based Leadership- A Compendium of Lectures on Leadership (2001-2002), 2001-2002.
2. Chibber, M.L., How to be a successful Leader, Natraj Publishing House, New Delhi, 1986.
3. Chibber, M.L., Sai Baba's Mahavakya on Leadership. Sri Sathya Sai Books and Publications Trust, Prasanthi Nilayam, Anantapur District, (A.P.), India, 1992
4. Dhody, Chandan Lal, (1987) The Gospel of Love, An English Rendering of Tulasi 'sShri Ram Charita Manasa. Sidharth Publications, New Delhi.
5. Growse, F.S. (1983): Eternal Ramayana, the Ramayana of Tulasi Das. Interprint, New Delhi.
6. Gangadharan, N. (1985) The Agni Purana, Parts-I (1984), II (1985), III (1986), IV (1987). Motilal, Banarasi Dass, Delhi.
7. Lal Bahadur Shastri, National Academy of Administration, Mussoorie, India, Publication: Selected Readings, Ethical Issues in Today's Administration (September 18 to 22, 2000), Volumes IV.
8. Puryear, Edgar F. Jr. (2003): Nineteen Stars. A Study in Military Character and Leadership. Lancer International, New Delhi.
9. Posner, Barry Z. and Schmidt, Warren H7 (1991): Values. and the American Managers, An update. In California Management Review, Vol. XXVI, No.3, Spring 1991.
10. J.R. Bhatti, Total Quality Leadership (Concept Values, Ethical Philosophy and Role Model, New Age International Publishers, 2007.

**MBA**  
**BS-6H7: Organisational Development and Change Management**

**Objective of the Course**

To enable students to understand the organisational structure, importance of change, nature of change process, effective handling of change vis-à-vis organisational objectives and key aspects of organisational development.

**Course Contents**

**Unit 1 : Introduction**

- a) Concept of organisational structure, organisational culture, organisational design and change; importance of organisational design and change; organisational environment-specific and general.
- b) Organisational effectiveness- Internal systems approach, external resources approach and technical approach of organisational effectiveness, measuring effectiveness in terms of organisational goals; organisation and ethics; creating an ethical organisation. technology and organisational effectiveness.

**Unit 2**

- a) Challenges of organisational design: organisational roles, functions and divisions, balancing, differentiations and integrations.
- b) Designing organisational structure: functional, divisional (geographic and market), matrix structure; network structure and boundary less organisations, organisational design and strategy in changing global world-environment.

**Unit 3 :Organisational Change**

Concepts and targets of change, planned and unplanned change, stimulating factors for organisational change, resistance to organisational change- organisational and individual, Lewin's force field theory of change, evolutionary and revolutionary change in organisation, concept of Total quality management, developments in revolutionary change - re-engineering, restructuring.

**Unit 4**

- a) Concept of Organisational Development, history of organization development, phases and foundations of organisational development, values, assumptions and beliefs in O.D
- b) Managing changes: Action research - diagnosing the organisation, determination of desired future state, implementing action, evaluating action, institutionalizing action research,

**Unit 5**

- a) Organisational transformation- Birth, growth, decline and death, institutional theory of organisational growth, Greiner's model of organisational growth. O.D techniques to deal with resistance to change, O.D techniques to promote change;
- b) O.D. intervention- human process interventions, structure and technological interventions and strategy interventions - sensitivity training - survey feedback, process consultation - team building - inter-group development - innovations -learning organisations.

**Suggested Readings:**

1. Wendell L. French Cecil H. Bell, Jr.: Organisational Development , McGraw-Hill. 6 Ed, 2009.
2. Barbara Senior, Jocelyne Fleming - Organisational Change, Pearson Education, New Delhi 3Ed, 2009.
3. Gareth R., Mary Mathew - Organisational Theory, Design, and Change, Pearson Education, New Delhi 5 Ed, 2008.
4. Ian Palmer, Richard Dundford, Gib Akin,/Managing Organisational Change: A Multiple Perspectives Approach, McGraw Hill, 2/e, 2009.

**BS-60M1: Facilities Management**

**Objective of the Course**

To enable students to understand the processes and methodology of operational management of facilities.

**Allocation of Periods: 45 (Lectures-30, Tutorials-5, Practicals-10)**

**Contents Course**

**Unit 1 : Product Selection and Design**

(a)Product selection process, (b) development of products (Goods and Services), (c)sources of product innovations, (d) design for customer (quality fune on deployment), (e)value analysis / value engineering, (1) measuring product development performance.

**(Periods- 6-1-2)**

**Unit 2: Production Process Management**

(a)Introduction, factors affecting process selection, (b) classification of processes: based on materials management and customer order type, (c) process flow design, (d) process analysis, (e) product-process strategy.

**(Periods- 6-1-2)**

**Unit 3:Operations Technology**

(a)Definition of technology, (b)types of technology, (c)factors affecting technology selection decision, (d)misalignments in technology implementation, (e)level of automation, (f)technology development process, (g)Technologies for processes: Computer Integrated Manufacturing (CIM), CNC/ DNC machines, Computer Aided Manufacturing (CAM), Computer Aided Engineering (CAE),Office Automation, Electronic Data Interchange (EDI), and Internet, evaluation of technology investments.

**(Periods- 6-1-2)**

**Unit 4 : Facilities Location**

(a)Importance, factors affecting facilities location, (b)methods for evaluating, (c) facilities location: factor rating system, multiplant location method, locating facility within a network, dimensional analysis, methods for locating service outlet, (d)cost-volume analysis of facilities location.

**(Periods- 6-1-2)**

**Unit 5 : Facilities Layout**

(a)Importance of facility layout, (b)criteria for good layout, (c)symptoms of poor layout, (d) types of facility layout: product layout, process layout, cellular layout, mixed layout, fixed position layout, retail service layout, office layout, (e)flow and activity analysis, (f) layout design procedure: assembly line balancing, designing based on closeness rating, (g) computerized layout planning, (h)evaluating, and implementation of layout design.

**(Periods- 6-1-2)**

**Suggested Readings**

1. Chase, Aquilano, Jacob, Production and Operations Management, 8111 Ed. (TMH, N Delhi). 2. Lee J Krajwski, Operations Management: Strategy & Analysis, 6th Ed. (Pearson Education) Delhi).
2. S.N Chary, Production and Operations Management, (TMH, N Delhi).
3. Adam Ebert, Production and Operations Management, 6th Ed. (Pearson Education, N. Delhi).

**MBA**  
**Semester –IV**

**BS-6OM2: Production Planning and Control**

**Objective of the Course**

Production Planning and Control are the two important components of the management process. The subject will enable the consideration of all input variables to achieve defined output goals and control will help in corrective action taken to meet the planned output.

**Course Contents**

**Unit 1 : Strategic Capacity Planning**

Concept, importance and objectives of capacity planning, (b) Type of capacity, Issues related to capacity planning, (e) Process of capacity planning: demand identification (qualitative and quantitative methods), assessment of capacity, alternative ways of altering capacity (make or buy decision), evaluation of alternatives.

**(Periods-7-1-2)**

**Unit 2 : Aggregate Planning**

(a) Concept of Aggregation, Aggregate Planning Environment, (b) Aggregation Techniques, Planning Product Mix (Simple Application of Linear Programming), Process Of Aggregate Planning, (c) Mixed Strategy, (d) Mathematical Planning Models, (e) Performance Measures.

**(Periods- 4-1-1)**

**Unit 3 : Master Production Schedule and Material Requirement Planning (MRP)**

(a) Concept Of Master Production Schedule (MPS), (b) Importance Of MPS, (c) Process Of Preparing MPS, (d) Rough-Cut Planning, (e) Importance Of Material Requirement Planning (MRP), (f) Process Of Material Requirement Planning (MIP), Elements Of Material Requirement Planning (MRP), Bill of Materials.

**(Periods- 5-1-2)**

**Unit 4 : Job Scheduling and Sequencing**

Introduction To Types Of JoBS- In Organization, (b) Methods Of Job Scheduling: One Machine- N JoBS-, Two Machines- N JoBS-, N Machines- N JoBS-, M Machines- N JoBS-, Project Scheduling , Network Diagrams (PERT And CPM), (c) Job Sequencing, Job Sequencing In Service Organization (Application Of Simulation).

**(Periods- 7-1-3)**

**Unit 5 : Production Control System**

Concept, Function, and importance of production control, (b) centralization and decentralization, (c) documents and procedures used in production control: work order, material requisition, control sheet, internal delivery note, progress note, machine load chart.

**(Periods- 7-1-2)**

**Suggested Reading:**

1. J L Riggs, Production System Planning, Analysis, and Control, John Willy & Sons, New York
2. Lee J Krajwski, Operations Management: Strategy & Analysis, 6th Ed. (Pearson Education, N. Delhi).
2. Buffa, Sarin, Production and Operations Management, Willey- Publication, New Delhi.
3. Adam Ebert, Production and Operations Management, 6th Ed. (Pearson Education, New Delhi).

**MBA**  
**BS-6OM3: Project Management**

**Objective of the Course**

This subject will help the students to understand importance of job design and productivity and its role in organizations. The subject will also enable students to learn about various processes of the organization to improve organisation's productivity.

**Course Contents**

**Unit 1 : Productivity**

(a)Concept of productivity, (b)Measures of productivity, (c)Methods for productivity enhancement, (d)Productivity in manufacturing and service organization, (e)Principles of motion economy.

**(Periods-5 -1-2)**

**Unit 2 : Job Design**

(a)Concept of job simplification and job standardization, (b) Specialization and automation, (c) Approaches to job design, (d) Behavioral considerations of job design, (e)Work analysis and work measurement, (f)Time-study methods: work sampling, stop-watch method, man-machine charts, calculation of allowances, normal time, and standard time; (g) Compensation, legal and ethical consideration.

**(Periods- 8-1-2)**

**Unit 3 : Project Management**

(a)Project planning, objective of project management, (b) Classification of projects, (c) Project planning tools, GANTT charts, Milestone Charts, Network Analysis: PERT and CPM, finding critical path, earliest and latest activity time, (d) Time-Cost trade offs, (e) multilevel scheduling system.

**(Periods- 9-2-4)**

**Unit 4 : Maintenance and Safety Management**

(a)Concept, objectives and importance of maintenance, (b) maintenance strategies, (c)maintenance economy, (d)Total productivity maintenance (TPM), (e)Measurements of maintenance performance; (f)Plant Safety: plant and equipments conditions, accidents' costs, approaches for accidents prevention, risk management.

**(Periods- 8-1-2)**

**Suggested Readings:**

1. Lee J Krajwski, Operations Management: Strategy & Analysis, 6th Ed. (Pearson Education, N. Delhi.
2. S.N Chary, Production and Operations Management, 11th Ed., (TMI-I, N Delhi)
3. Adam Ebert, Production and Operations Management, 6th Ed. (Pearson Education, N. Delhi)

**MBA**  
**BS-6OM4: Materials Management**

**Objective of the Course**

To enable the students to maximize materials productivity by well coordinated and integrated approach towards various process involving decision making with respect to materials.

**Allocation of Periods: 45 (Lectures-30, Tutorials-5, Practicals-10)**

**Contents of Course**

**Unit 1 : Purchase Management:**

Concept, objectives, and role of purchase function, (b)Inputs to procurement process, (c)Restrains and functions affecting purchase decision, (d)Procurement decisions: supplier selection, timing of purchase, price, quality and quantity of material, (e)Evaluation of procurement process, (f)Purchasing in government departments.

**(Periods- 8-1-2)**

**Unit 2 : Inventory Management:**

(a)Introduction To Inventory System: Concept, Costs Associated With Inventory, Functions Of Inventory, Types Of Inventory, (b)Splective Control Of Inventory: ABC, VED, FNSD, GOLF, HML, (c)Models Of Inventory Control, Determination Of Economic Order Quantity (EOQ): Graphical , Tabular, And Mathematical Models (For Deterministic And Probabilistic Demand), Safety Stock, Reorder Level, (d)Concept Of Just In Time (JIT) System.

**(Periods- 10-2-3)**

**Unit 3 : Stores Management:**

(a)Introduction, (b)Functions Of Stores, (c)Organization. Of Store, (d)Types Of Stores, (e)Stores System And Procedures, (f)Decentralization V/S Centralization, (g)Control Of Spare Parts, (h)Codification And Classification Of Materials, (i)Stores Audit System, (j)Store's Location And Layouts.

**(Periods- 6-1-1)**

**Unit 4 : Waste Management:**

(a)Concept Of Waste Management, Importance Of Waste Management, (b)Concept Of Productivity And Wastivity, Gross And Net Wastivity, Wastivity As. Performance Measurement, (c)Wastivity V/S Productivity, (d)Classification of Waste Management, (e) Waste Reduction Methods, (f)Treatment of Waste In Cost Accounting.

**(Periods- 6-1-2)**

**Suggested Readings:**

1. JR Tony Arnold, et al, Introduction to Material Management, 5th Ed., Pearson,
2. N K Nayar, Resource Management, Vikas Publication, New Delhi
3. AK Citall et al, Materials Management : Text and Cases, .TMH, N Delhi
4. AK Datta, Materials Management: Procedure, Text and Cases, PHI, 2nd , N Delhi.

**MBA**  
**BS-6OM5: Total Quality Management and Quality Standards**

**Objective of the Course**

To enable students to understand the Concept, Principles and Strategies Applied in Total Quality Management.

**Allocation of Periods: 45 (Lectures-30, Tutorials-5, Practicals-10)**

**Contents of the Course**

**Unit 1 : Total Quality Management (TQM) Concept and Fundamentals**

(a) Definition, Basic Approach, (b) TQM Framework, (c) Principles of TQM, (d) Philosophies Of Quality Gurus: Deming's 14 Points, Crosby's Four Absolutes, Juran's Trilogy, Feigenbaum's Total Quality Control, The Total Quality Triad, (e) Evolution of TQM. **(Periods- 6-1-2)**

**Unit 2 : Human Aspect of Total Quality Management (TQM)**

(a) The human factor: The fundamental prerequisite for success, (b) TQM's human elements, (c) Motivating people for total quality, (d) Resistance to change, (e) Characteristics of quality leaders, (f) Role of quality leaders, (g) Teams for TQM, (h) On-the-job satisfaction and quality, (i) Participative management, (j) Compensation system, (k) Ergonomics.

**(Periods- 5-1-1)**

**Unit 3 Strategic Quality Planning**

(a.) Strategic quality management, (b) Quality statement, culture, product quality cycle, (c) TQM planning environment, (d) Role of quality control department, (e) Planning for productivity, (f) Quality and re-engineering, (g) The cost of quality (Direct & Indirect cost), (h) Evaluating the cost of TQM, (i) Quality index, (j) The total quality cost curve, (k) Standardization.

**(Periods- 7-1-3)**

**Unit 4: Total Quality Management (TQM) Practices**

(a) TQM technologies, (b) TQM practices: policy deployment, benchmarking, backtracking, cross-functional teams, QFD, Taguchi Method, failure-mode and effect analysis, the Poka-Yoke concept, concurrent engineering, (c) Malcolm Baldrige award, European Quality award, (d) TQM Implementation Process.

**(Periods- 5-1-2)**

**Unit 5 : Quality Management Standards**

(a) Concept and need of quality standards, (b) National quality standard organizations: Bureau of Indian Standards (BIS), Agmark Grading of agriculture and allied commodities, Quality council of India; (c) International Organisation for standardization (ISO), ISO standards: ISO 9000 and 14000 series, integration of ISO 14000 with ISO 9000, (d) Process of ISO certification, (e) Implementing the system, (f) Post certification.

**(Periods- 7-1-3)**

**Suggested Readings:**

1. Dale, Carol, Glen, Mary, Total Quality Management, 3rd ed., Pearson Education, New Delhi
2. Ross, Total Quality Management: Text, Cases, and Readings, 2nd ed. St. Lucie Press.
3. H Lal, Total Quality Management: A practical approach, New Age International, New Delhi.
4. Hand Book for- ISO certification.

## MBA

### BS-6OM6: Productivity Management

**Objectives of the Course** - The objective of productivity management is to optimize the use of resources, improve efficiency, and maximize output. It focuses on streamlining processes, reducing waste, and enhancing employee performance. The goal is to achieve higher productivity levels, improve profitability, and ensure sustainable growth while maintaining quality standards and customer satisfaction.

#### **Contents of the Course:**

**Unit 1:** Nature, Objectives and Scope of Productivity Management, Evolution of PM, Functions and Responsibilities of Production Manager, New product development

**Unit 2:** Process analysis, design for manufacturing and service operations, capacity planning, facility location and layout.

**Unit 3:** PPC: Job, batch, Mass (assembly) and continuous and Master Production Schedule. Product control systems, Gantt Charts, Bar Charts.

**Unit 4:** Elements of Production Control, Purchase Process, Inventory Management: Graphical, Tabular and EOQ Models of Inventory Control; Just-In-Time Inventory, Selective Control Tools of Inventory.

**Unit 5 :**Concepts of Total Quality Management (TQM), Pure and replenishment types; Standardised work; Total Productivity Management (TPM).

#### **Suggested Readings:**

1. Chase, Jacob, Aquilano, and Agarwal, *Production and Operations Management*, 13<sup>th</sup>ed. (TMH, New Delhi), 2009
2. Lee J. Krajwski, *Operations Management: Strategy and Analysis*, 6<sup>th</sup> ed., Pearson Education, N. Delhi
3. MartandTelsang, "Industrial Engineering and Production Management", S. Chand and Company, First edition, 2000.
4. Jeffery K. Liver, *Toyota Production Way*
5. Adam Ebert, *Production and Operations Management*, 6<sup>th</sup> ed., Pearson Education, N. Delhi
6. S.N. Chary, *Production and Operations Management*, TMH, New Delhi, 5<sup>th</sup> edition
7. William J. Stevenson, *Operations Management*, 13<sup>th</sup> ed., 2017, McGraw-Hill, New Delhi

## MBA

### BS-6OM7: World Class Manufacturing

**Objectives of the Course** - The objectives of world-class manufacturing are to achieve superior product quality, operational efficiency, and cost competitiveness. It aims to optimize production processes, reduce waste, enhance customer satisfaction, and foster innovation. The goal is to implement best practices, adopt cutting-edge technologies, and ensure continuous improvement for long-term success.

#### **Contents of the Course:**

**Unit 1:** Information Age and Global Competitiveness: The Emergence of Information Age; Competition and Business Challenge; Operating Environment; Globalization and International Business; Global Competitiveness and Manufacturing Excellence; World Class Manufacturing and Information Age Competition; Manufacturing Challenges, Problems in Manufacturing Industry

**Unit 2:** Cutting Edge Technology & Philosophy of World Class Manufacturing: Value Added Engineer in - Hall's Framework; Schonberger's Framework of WCM; Gunn's Model; Maskell's Model Evolution of WCM; Ohno's View on WCM; Principles and Practices; Quality in WCM; Deming's & Shingo's Approach to Quality Management; Culmination of WCM, Generic Manufacturing Strategies for Information Age; Planning Methodology and Issues in Strategic Planning of WCM; Performance Measurement - PO-P System, TOPP System and Ambite System.

**Unit 3:** System and Tools for World Class Manufacturing: The Integration Imperative; Overview of Systems and Tools; Information Management Tools - Product and Process Design Tools, Bar Code Systems, Kanban: A Lean Production Tool, Statistical Quality Control (SQC),

**Unit 4:** Material Processing and Handling Tools; Assessment of Manufacturing Systems and Tools. Function of maintenance management, dynamics of maintenance organization/ departments, types of maintenance system, maintenance planning and scheduling, universal maintenance practices, total productivity maintenance.

**Unit 5:** Competitive Indian Manufacturing Performance and Competitiveness – Indian Firms: Manufacturing Objectives and Strategy; Usage of Management Tools and Technologies; Manufacturing Management Practices; IT Infrastructure and Practices; Strategic Intent Framework; Breadth and Integration of IT Infrastructure.

#### **Suggested Readings:**

1. World Class Manufacturing- A Strategic Perspective by BS-Sahay, KBS-Saxena & Ashish Kumar, Publisher: Rajiv Beri for Macmillan India Ltd.
2. Making Common Sense Common Practice – Models for Manufacturing Excellence by Ron Moore, Publisher: Butter Worth Heinemann
3. The Toyota Way by Jeffrey K.Liker, Publisher: Tata McGraw Hill
4. Managing Technology & Innovation for Competitive Advantage by V. K. Narayanan, Publisher: Prentice Hall
5. World Class Manufacturing - The Lesson of Simplicity by Richard J Schonberger, Publisher: Free Press - A Division of Simon and Schuster

## MBA

### BS-6IB1: International Business Environment

#### Objective:

The purpose of this paper is to enable the students learn nature scope and structure of International Business, and understand the influence of various environmental factors on international business operations

#### UNIT 1

Introduction to International Business: Importance nature and scope of International business; modes of entry into International Business internationalization process and managerial Implications. Environmental Context of International Business: Framework for analyzing international business environment

#### UNIT 2

Domestic, foreign and global environments and their impact on international business decisions-Global Trading Environment: World trade in goods and services – Major trends and developments; World trade and protectionism – Tariff and non-tariff barriers; Counter trade.

#### UNIT 3

International Financial Environment: Foreign investments -Pattern, Structure and effects; Movements in foreign exchange and interest rates and then impact on trade and investment flows.

#### UNIT 4

International Economic Institutions and Agreements: WTO, IMF, World Bank UNCTAD, Agreement on Textiles and Clothing (ATC), GSP, GSTP and other International agreements; International commodity trading and agreements. Emerging Developments and Other Issues: Growing concern for ecology; Counter trade; IT and international business.

#### **Suggested Readings:**

1. Bennet, Roger, International Business, Financial Times, Pitman Publishing, London, 1999.

**MBA**  
**BS-6IB2: International Marketing**

**Objectives:** To understand the principles & concepts in Marketing, to provide the knowledge of marketing management in the international perspective to develop marketing strategies for the dynamic international markets.

**UNIT-1**

The importance and scope of marketing - Evolution of marketing: From transaction-based to relationship marketing- Marketing research and Decision support systems .Market Segmentation, Targeting and Positioning.

**UNIT-2**

Product Mix - Product management decisions, Product Life Cycle strategies - New Product Development - Pricing considerations and approaches, pricing strategies.

**UNIT-3**

Distribution channels and physical distribution. Marketing communication and Promotion mix Strategies. Nature of international marketing: meaning, Framework for International Marketing-Barriers for International Marketing.

**UNIT-4**

International Marketing Decisions: Product Planning, Designing and Development for international markets- Pricing Decisions: Pricing Strategies and Price setting For International Markets.

**UNIT-5**

Distribution: Channel Management and Physical distribution Management in International Marketing. Promotion: International Advertising Programs, Sales Management and Sales Promotion for Foreign Markets.

**Suggested Readings**

4. Ramasamy, Namakumari (2010) Marketing Management, McMillan Publishers
5. Saxena: Marketing Management (Tata McGraw-Hill)

**BS-6IB3: Financing Of International Trade**

**Objectives:** To familiarize the students with the basic documents required and financing techniques of foreign trade.

**UNIT-1**

Methods of payment- Cash, Open account, Cash against Documents, Documents on acceptance, Advance payment, Bills of exchange and Letter of Credit (LoC), International commercial terms- Contract terms for carriage by sea transport – FAS–FOB–CFR–CIF–DES–DEQ–contract terms for carriage by any mode of transport – EXW-FCA-CPT-CIP-DAF-DDP-DDU. Procedure for drawing various LoC and their operations - Types of Letter of Credit – Discrepancies, Letter of credit - UCP- 600

**UNIT – II**

Pre-shipment Credit: Meaning, Procedure, rates and documents needed, Post Shipment Credit: Definition and features– Various applications of post shipment finance and their procedure, Negotiation of export bills, Bills purchased discounted under limits granted to customers. Advances against claims for export incentives, deferred payment export credits.

**UNIT – III**

Export credit insurance: Role of ECGC – Standard policies – Risks covered: Commercial Banks, Political Risks – Risks not covered, how to obtain a policy and file claim - Maximum liability and credit, Guarantees for covering export finance. Insurance policies and bank Guarantees and Special Schemes. FEMA: Exchange control, regulations and procedure in India

**Unit – IV**

Export, import trade control procedure, Processing of an export order: Customs and Port clearance. Procedure and documents relating to quality control, Export contracts, Basic Principles of Insurance: Marine insurance – types of policies, perils covered, EXIM Banks – Objectives, Organizations Functions of EXIM Bank – Export financing programmes.

**UNIT-5**

Relevant Case studies

**Suggested Readings**

2. G.S. Lal, 'Finance of foreign trade and foreign exchange' H.P.J Kapoor Publications
3. S.C. Jain, 'Export Procedure and documents' Nabhi Publications
4. Current Export and import policies
5. Paras Ram, 'Export What, Where, and How' Anupama Publishers

**MBA**  
**BS-6IB4: Export Management And Documentation**

**Objectives:** It gives an understanding on the India's trade Position in the World and the various trade procedures involved in an international business. It gives an insight to the various documents required for trading.

**UNIT-1**

International Trade: Need and importance of International Trade – Recent Trends in World Trade – Leading players – India's Foreign Trade – Commodity composition and Destination – India's position in World merchandise trade and services – India's Foreign Trade Policy.

**UNIT-2**

Export Procedure: Starting an export firm – Selection of an export product – Market selection – Buyer selection - Registration procedure with Sales Tax, Central Exercise and various Boards and councils – Exim code number – Elements of export contract- Incoterms – Terms of payment and Letter of Credit.

**UNIT-3**

Export Documentation: Types of documents – Transport, Negotiation and Insurance documents.

**UNIT-4**

Export Finance: Sources of Finance - Role of commercial bank, EXIM Bank, ECGC and others – Export promotion Schemes – Insurance for Export – Types – export credit insurance – Risk Management – Types of risks – mitigation methods.

**UNIT-5**

Import Procedure and Documentation: Global sourcing – Types of global procurement – Tender – Negotiation – Contract and others – Customs regulations and import clearance formalities – Types of import licenses Export Promotion Capital Goods Scheme (EPCG) license- Duty exemption scheme – Duty Entitlement Pass Book Scheme (DEPBS-)- Import formalities for 100% EOUs and SEZs - Import Risk Management.

**MBA**  
**BS-6IB5: International Logistics Management**

**Objective:** The course provides the analytical framework for understanding the logistic models and supply chain techniques in an international perspective.

**UNIT-1**

Logistics Management: Concepts – Importance – Elements of the logistic System – Marketing and logistic mix – Logistics and marketing interface – Value-chain and production efficiency.

**UNIT-2**

Shipping Industry: Types of ships – Shipping systems: linear, Tramp, conference, chartering, Baltic freight exchange – Shipping intermediaries: agent , forwarder, brokers and others – containerization – types of containers – ICDs – CFS – CONCOR.

**UNIT-3**

Air Transport: Air transport – Air freight – IATA – Cargo handling – Designing the International Information system – system modules – Distribution and Transportation.

**UNIT-4**

**Supply chain:** Definition – scope and importance of supply chain – supply chain drivers and metrics - efficient and responsive supply chain - Designing supply chain network: Distribution network – Factor influencing distribution - Transportation decision in supply chain management.

**UNIT-5**

Forecasting and planning in supply chain management – Pricing in supply chain management- Role of IT in supply chain management - co-ordination in supply chain management.

**Suggested Readings:**

**MBA**  
**BS-6IB6: International Contract Management**

**Objectives of the Course** - The objectives of international contract management are to ensure compliance with legal and regulatory requirements, mitigate risks, and protect the interests of all parties. It aims to establish clear terms, manage cross-border agreements efficiently, and ensure timely delivery of goods/services, while maintaining strong relationships and resolving disputes effectively.

**Unit-1:**

The Scope, Schedule, Budget, Resources relationship for projects Project delivery systems and International contract management.

**Unit-2:**

Ethics When Dealing with Contractors, why ethics are important to the Contract, Unlawful activity, basic requirements for a contract.

**Unit-3:**

General Conditions of Contract, Special Conditions of Contract, Pricing & Proposal Information, Technical Specifications, Drawings and Amendments.

**Unit-4:**

Contract requirements, Monitoring techniques, S-Curves including baseline, target and actual Earned, Value Analysis.

**Unit-5:**

Due Diligence, Cost of workplace injuries, Daily activity reports, Daily activity report uses, Daily activity report contents, Interface responsibilities of the Contract Manager, Meetings Planning, mediating, interferences, Schedule and procurement coordination, Substantial and Final Completion.

**Suggested Readings:**

**AGRI - BUSINESS MANAGEMENT**  
**GROUP-F**  
**BS-6AG1: Principles of Management in Agri Business**

**Objectives of the Course** - The objectives of principles of management in agribusiness are to optimize resource use, enhance productivity, and ensure sustainable growth. It focuses on effective planning, organizing, and controlling agricultural operations, improving decision-making, fostering innovation, and adapting to market demands, while promoting financial stability and environmental responsibility in agribusiness management.

**Unit-1:** Nature of Agri-Business, Evolution of Changing Dimensions of Agri-Business in India. Application of management principles in agri-business. Type, pattern and scope of Agri-Business.

**Unit-2:** Characteristics of Production, consumption and Marketable surplus of Agri Business in India. Rural Marketing, Distribution system, Marketing of Agriculture inputs, Marketing by the Govt., functioning of selected procurement agencies. Location factors and other problems in processing of Agricultural products.

**Unit-3:** Management of Agro industries. Locational Factors and other problems faced by Agri. industries and other industries related to Agri-business, Management of water shed and development projects, management of irrigation system, farm power and machinery mgt., food technology mgt., environmental mgt.

**Unit-4:** Nature, scope and functions of farm business management, working out existing and alternative farm plans. Farm labour, farm capital and farm machinery. Decision making process in farm management

**Unit-5:** Advanced concepts in Agricultural production: Technology Management for Livestock products, Quality Management in food industry, Agricultural inputs supply management, Vegetable seeds production management, Crop seed production management, Fertilizer management, Management of veterinary hospitals.

**Suggested Readings:**

1. Koontz, H. and Wehrich, Horticulture Management, 10th edition New York McGrawhill 1995

**MBA**  
**BS-6AG4: Management of Cooperatives**

**Objectives of the Course** – The objectives of management of cooperatives are to ensure effective governance, promote member participation, and achieve financial stability. It focuses on improving service delivery, enhancing resource utilization, and fostering mutual benefits. The goal is to support cooperative principles, enhance community development, and provide sustainable economic opportunities for members.

**Unit-1:**

Nature of cooperative principles, Management principles and their applications to cooperative organizations, structure and functions of various types of cooperatives.

**Unit-2:**

Managerial problems of cooperatives, consumer stores, role of consumer stores, role of Government in the development of cooperatives.

**Unit- 3:**

Financing of cooperatives, staffing in cooperatives and training methods in cooperatives and efficiency criteria.

**Unit 4:**

marketing Public accountability, price, output and profit and policies of cooperatives; Special problem of cooperatives in agricultural and industrial sectors.

**Unit-5:**

Management practices of successful cooperatives in India: selected case studies.

**Suggested Readings:**

1. Ramkishen Y, Management of Co-operatives, JAICO Publishing House.
2. K. M. Rai. Cooperative Societies And Rural Development', Mittal Publication, New Delhi

**MBA**  
**BS-6AG5: Farm Management**

**Objectives of the Course** - The objectives of farm management are to optimize resource use, improve productivity, and ensure financial sustainability. It focuses on effective planning, budgeting, and decision-making to enhance crop and livestock performance. Farm management aims to reduce costs, maximize profits, and promote sustainable agricultural practices for long-term success.

**Unit 1:** Introduction, Definitions, Objectives of farm Management, Scope of Farm Management, Economic theory and farm management science, what makes a successful farm manager? Relationship of farm management with other sciences, Farm management problems under Indian conditions

**Unit2:** Economic Principles applied to Farm management: Principle of Variable proportion, Cost principle, principle of factor substitution, law of equi-marginal returns, Opportunity cost principle, principle of combining enterprises, Principle of comparative advantage, Time Comparison principle, Limitations of principles of farm management.

**Unit 3:** Farm Planning, Budgeting and Programming: Farm planning, Farm budgeting, Steps of Complete budgeting, Programming Techniques.

**Unit 4:** Systems of Farm Organization: Different systems of farming, Peasant farming, Corporate farming, State farming, Co-operative farming, Collective farming, Criteria for choice in India, Suitability of alternative systems.

**Unit 5:** Farm Size and Practices: Measurement of size of farm, Pattern of farm holdings in India, Factors determining economic holdings, Farm size practices – Large scale and small scale farming, Specialized and diversified farming, Mixed farming, Extensive and intensive farming.

**Suggested Readings:**

1. Dhondyal, S.P. (2007) Farm Management: An Economic Analysis
2. Broadway and Broadway (2009), Agri-Business Management.
3. Johl and Kapur (2005) Farm Business Management

**MBA**  
**BS-6AG6: Management of Dairies and Live Stock**

**Objectives of the Course** - The objectives of management of dairies and livestock are to optimize animal health and productivity, ensure efficient resource utilization, and maximize profitability. It focuses on improving breeding, feeding, and health practices, while maintaining sustainability. Effective management aims to enhance milk and meat production, reduce costs, and ensure animal welfare.

**Unit1:**

Issues in establishment and management of dairy projects, Important dairy projects in India.

**Unit 2:**

Sourcing milk and other raw materials, milk and milk products processing and technology, processing equipment and facilities for selected products.

**Unit 3:**

Managing plant operations, quality management and standardization, dairy products marketing, product development, packaging, branding, pricing, promotion, marketing channels and logistics, Export marketing of dairy products, and trends in Indian Dairy industry.

**Unit 4:**

Farm production-breed selection, feeding, disease control and quality management.

**Unit5:**

Purchases and inventory management, output marketing-market targeting, working capital management, cost-volume-profit analysis.

**Suggested Readings:**

1. J.D. Drilon Jr., Introduction to Agribusiness Management.
2. John N. Devid and Ray, Concept of Agri-Business Management.

**MBA**  
**BS-6AG7: Plantation Management**

**Objectives of the Course** - The objectives of plantation management are to optimize land use, increase productivity, and ensure sustainable cultivation practices. It focuses on improving crop yields, managing resources efficiently, and maintaining environmental balance. Plantation management aims to enhance profitability, reduce risks, and support long-term growth through effective planning and resource utilization.

**Unit 1:** Current scenario of major plantation industries in India, plantation field operations in estates of Tea, Coffee, Rubber, Spices, etc (cultivation, harvest management, post harvest management).

**Unit 2:** Manufacturing/processing operations in estates, quality control aspects, estate management and labour relations, legal aspects of plantation business, sustainable management in terms of environmental, social and economic aspects, managing technological innovation in terms of cultivation and processing in Tea, Coffee, Rubber, Spices and other relevant plantation crops.

**Unit 3:** Marketing of plantation crops marketing channels, product development, branding, pricing and promotion.

**Unit 4:** Export environment for plantation crops, logistics management-purchase, stores and transport, Financial management in plantations, cost-volume-profit analysis.

**Unit 5:** Relevant promotional agencies and cooperatives, problems and prospects of the major plantation sectors.

**Suggested Readings:**

1. David, A. Avant, Plantation Management.
2. Pankaj Kumar, Practical Manual of Plantation.
3. P. Sudarshan, Plantation Management.

**MBA**  
**BS-6PH1: Pharmaceutical Marketing**

**Objectives of the Course** - The objectives of pharmaceutical marketing are to promote products effectively, increase market share, and ensure compliance with regulations. It aims to build strong relationships with healthcare professionals, enhance brand awareness, and educate consumers. Pharmaceutical marketing focuses on driving sales, ensuring product accessibility, and supporting health outcomes through targeted strategies.

**Units 1:** Fundamentals of Pharmaceutical Marketing: the 4 'Ps' in a regulated Pharma market, the Strategic Triangle; Market Segmentation in the pharmaceutical context, conceptual difference with consumer products market segmentation

**Unit 2:** PLC Management, reinforcing and revitalizing pharmaceutical brands, line-extensions. Product-mix Optimization

**Unit 3:** Promotional-mix Optimization: Portfolio Analysis by factoring key determinants, BCG Matrix, brand building decisions; leveraging the Promotional-mix for Brand Building. Designing Marketing Programs for New Product launch

**Unit 4:** The Pharmaceutical Industry: India and Global Scenario: Essential differences between domestic Marketing in India and International Marketing; generic products dominated market vis-à-vis patented products dominated markets

**Unit 5:** Role of pharmacies in dispensing products, role of mass media in product advertisements and social campaigns for market expansion; Structure and role of field management and product management, India Vs. Global

**Suggested Readings:**

1. Kotler, Philip, Marketing Management: Analysis, Planning, Implementation, and Control Latest Edition, Prentice Hall
2. Best, Roger J., Market-Based Management – Strategies for Growing Customer Value and Profitability (3rd Edition), Prentice Hall
3. Lehmann, Donald R. and Russell S. Winer, Product Management (2005 4th Edition). McGraw-Hill/Irwin.
4. Philip Kotler(2003). Marketing Management: Eleventh Edition, New Delhi: Pearson Education.

**BS-6PH2: Regulatory Framework of Pharmaceutical Business**

**Objectives of the Course** - The objectives of the regulatory framework of the pharmaceutical business are to ensure product safety, efficacy, and quality. It aims to protect public health by enforcing compliance with standards, preventing fraudulent practices, and ensuring transparency. The framework regulates production, distribution, and marketing to maintain ethical practices and industry integrity.

**Unit 1:** Law of Contract - Agreement - Offer - Acceptance - Consideration - Capacity of Contract Contingent Contract - Quasi Contract - Performance - Discharge - Remedies to breach of Contract

**Unit 2:** Partnership - Sale of Goods - Law of Insurance - Negotiable Instruments - Notes, Bills, Cheques - Crossing - Endorsement - Holder in due course - Holder in value - Contract of Agency.

**Unit-3:** Company - Formation - Memorandum - Articles - Prospectus - Shares - Debentures -Directors - Appointment - Powers and Duties - Meetings - Proceedings – Management - Accounts - Audit - Oppression and Mismanagement - Winding up.

**Unit-4:** Intellectual Property Rights & Regulations: Overview of Intellectual Properties, their types and importance of intellectual property protection. Patents: Requirement of patenting, patent specifications and claims, Indian Patent act 1970 and amendments. Patent search, analysis, drafting and stages of filing patent at national level.

**Unit-5:** International Treaties & IPR Organizations: Paris Conventions, Patent Cooperation Treaty (PCT) – introduction, application and general rules. Introduction to concept behind WIPO / WTO / TRIPS / GATT / GATS system & Uruguay Round.

**Suggested Readings:**

1. Pathak, LEGAL ASPECTS OF BUSINESS, Tata McGraw- Hill Publishing Company Limited, New Delhi

## MBA

### BS-6PH4: Pharmaceutical Retail Management

**Objectives of the Course** - The objectives of pharmaceutical retail management are to ensure efficient inventory management, provide quality customer service, and optimize sales. It focuses on maintaining compliance with regulatory standards, improving product accessibility, managing pricing strategies, and enhancing customer satisfaction. The goal is to drive profitability while promoting health and wellness in communities.

#### Unit 1: Retailing

An Overview, Understanding, Scope and Benefits of pharmaceutical retailing, Overview of Pharmaceutical retailing

#### Unit2: Retail Strategies

Classification of Retailers, Understanding the Retail Customer Population, demographic and geographic analysis, Retail Market Strategy, Strategic Planning Process, Pharmacies as retail outlets for switched drugs, Building Sustainable Competitive Advantage, Marketing Strategies, Product mix and assortment planning process Merchandising and store management Branding strategies.

#### Unit3: Retail of OTC drugs

Historical development of the OTC market, Major players within the OTC market, Rx-to-OTC switching: The changing role of the consumer, Consumer buying behavior for OTC drugs, Growth potential within the OTC market, Merchandise assortment planning, Organizing the buying process by categories, Merchandise purchasing process.

#### Unit4: Store Management

Store layout, design and visual merchandise, Store interior, exterior and security, Visual Merchandising for OTC drug retailing, Future Drivers of OTC Pharmaceuticals, The impact of technology on the drugs market, OTC pharmaceuticals: growth or maturity : in India and global Market Development in Pharmaceutical Marketing

#### Suggested Readings:

1. Barry Berman and Joel R. Evans, Retail Management: A Strategic Approach, Pearson,
2. Michael Levy and Barton AWeitz, Retailing Management, Tata McGraw-Hill,
3. Pradhan, Swapna, Retailing Management-Text & Cases, Tata McGraw-Hill)
4. Bajaj, Chetan, Srivastava Nidhi V, Tuli Rajesh, Retail Management, Oxford,

**MBA**  
**BS-6PH5: Supply Chain Management in Pharmaceutical Industry**

**Objectives of the Course** - The objectives of supply chain management in the pharmaceutical industry are to ensure timely and efficient delivery of products, maintain product quality, and optimize inventory levels. It aims to minimize costs, ensure regulatory compliance, enhance traceability, and improve collaboration across stakeholders, ensuring continuous availability of medications while safeguarding patient safety.

**Unit 1 Introduction to supply chain management (S.C.M)**

(a) Basic Concepts, Scope And Philosophy Of Supply Chain Management, (b)Importance Of Supply Chain Management, (c)Supply Chain Decision, (d)Evolution Of Supply Chain Management.

**Unit 2 Designing the Supply Chain**

(a)Role Of Distribution In Supply Chain, (b)Factors Influencing Distribution Network, (c)Process Of Supply Network Design, (d)Distribution Strategy, (e)Models For Facilities Location And Capacity Allocation, (f)Impact Of Uncertainty On Supply Chain Design, (g)Evaluation Of Supply Chain Design, (h)Demand Chain Management, (i)Strategic Alliances.

**Unit 3 Performance Measurement and Control**

(a)Concept, Dimensions Of Performance Measurement, (b)Tools For Performance Improvement: Benchmarking: Introduction, Forms Of Benchmarking, GAP Analysis, Benchmarking Study Report; (c)Achieving Strategic Integration, (d)Supply Chain Operations Reference (SCOR) Modeling, SCOR Analysis, (e)Value Chain, (f)Concept Of Configurability, (g)Evaluation Of Supply Chain Performance (Supply Chain Cost Analysis), (h)Impediments To Improved Performance.

**Unit 4 Logistics Management**

(a)Concept of Logistics, Inbound And Outbound Logistics, (b)Key Activities of Logistics, (c)Managing The Costs Of Logistics, (d)Application Of Logistics Management, (e)Trade-Offs In Logistics Management, (f)Bull-Whip Effect In Logistics, (g)Third And Fourth Party Logistics, (h)Emergence Of IT In Logistics, (i)International Issues In Logistics, (j)Warehousing, Types Of Warehouses, Site Selection, Layout And Design Of Warehouses.

**Unit 5 Emerging Trends in Supply Chain Management**

(a)Role Of Information Technology (IT) In Supply Chain Management: Electronic Data Interchange (EDI), Use Of Data Mining Tools, E-Business Framework, (b)Customer Profitability Analysis (CPA), (c)International Issues In Supply Chain Management.

**Suggested Readings:**

1. Chopra, Meindl; *Supply Chain Management: Strategic Planning and Operation*, 2nd ed., Pearson Education, New Delhi.
2. Altekar, *Supply Chain Management: Concepts and Cases*, Prentice-Hall of India, New Delhi
3. BS-Sahay, *Supply Chain Management*, Macmillan, New Delhi.
4. G. Raghuram, *Logistics and Supply Chain Management*, Macmillan, New Delhi
5. Balou, *Supply Chain Management*, Pearson Education

**MBA**  
**BS-6PH6: Marketing of Medical Devices**

**Objectives of the Course** - The objectives of marketing medical devices are to increase market awareness, educate healthcare professionals, and promote product benefits. It aims to ensure regulatory compliance, build brand trust, and expand market reach. Effective marketing drives sales, supports customer loyalty, and enhances patient outcomes by providing innovative, high-quality medical solutions.

**Unit 1:** Marketing management; Nature and scope; Evolution of marketing; Selling vs marketing; Emerging role of marketing in medical devices; Marketing mix.

**Unit 2:** Market Segmentation of Medical Devices: Nature and importance of segmentation; Pre-requisites for effective segmentation; Bases of segmenting consumer markets; Market selection strategies; Positioning.

**Unit 3:** Product Decisions of Medical Devices: Concept of product; Classification of products; Product line and Product mix; Branding, packaging, and labeling; Customer services; Development of new product; Product Life-cycle.

**Unit 4:** Price Decisions of Medical Services: Pricing as a marketing variable-its role and importance; Price vs. non-price competition; Factors influencing price determination; Price setting in practice; Price policies and strategies.

Distribution Channels and Physical Distribution Decisions: Marketing channel functions; Selecting channels of distribution; Determining the intensity of distribution; Channel management decisions-selection, motivation and evaluation of individual middlemen; Manufacturer-distribution relationship; Retailing and wholesaling; Logistics of distribution.

**Unit 5:** Promotion Decisions - Nature; Objectives and importance of promotion; Communication process; Promotion mix and methods; Advertising; Personal Selling; Public Relations; and Sales Promotion. India as an emerging market for medical devices, Recent developments in marketing of medical devices.

**MBA**  
**BS-6PH7: Strategic Procurement**

**Objectives of the Course** - The objectives of strategic procurement are to optimize sourcing, reduce costs, and ensure the timely availability of high-quality goods and services. It focuses on building strong supplier relationships, managing risks, and aligning procurement decisions with organizational goals. Strategic procurement aims to enhance operational efficiency and drive long-term business success.

**Unit 1:** Importance of purchasing and sourcing management in pharmaceutical industry, role the supply function plays on the competitive success and profitability of modern organizations.

**Unit 2:** Function of Strategic Procurement in pharmaceutical industry, role in a company as well as its influence and interdependencies with other corporate functions, such as R&D, manufacturing, accounting, finance, etc.

**Unit 3:** Importance of the procurement function in supply chain design and function through its responsibility for the firm's sourcing strategy, strategic sourcing process

**Unit 4:** Supplier performance management methodologies, supplier identification, selection, and development, total costs, materials management, transportation and inventory decisions, and environmental and social responsibility issues.

**Unit 5:** Role of global sourcing and the procurement process in supply chain management, ethical, contractual, and legal issues faced by procurement professionals

**Suggested Readings:**

1. Benton, W C Jr. (2007) Purchasing and Supply Management, McGraw-Hill/Irwin, New York, USA.
2. Handfield, R B, Monczka, R M, Giunipero, L C and Patterson, J L (2009) Sourcing and Supply Chain Management, 4th edn, South-Western, Cengage Learning, Canada.
3. International Trade Centre (2000) Module 10: Managing Logistics in the Supply Chain, International Purchasing & Supply Management Modular Learning System, UNCTAD/WTO.
4. Leenders, M R, Johnson, P F, Flynn, A E and Fearon, H E (2006) Purchasing and Supply Management: With 50 Supply Chain Cases, 13th edn, McGraw-Hill/Irwin, USA.
5. Lysons, K and Farrington, B (2006) Purchasing and Supply Chain Management, Pearson Education Limited, England.

## **Master of Business Administration**

**(WEF Academic Session 2020-22)**

### **Vision**

NICE School of Business aims to become a Centre of Excellence through research and continuous innovation to nurture global managers, leaders and entrepreneurs for sustainable development by synthesizing Indian ethics with modern technology.

### **Mission**

*The Mission of NICE School of Business Studies is:*

- To nurture global talent and develop Industry ready professionals and socially responsible leaders / to face the challenges of fast changing business environment.
- To achieve academic excellence in research, consulting, training and teaching by adopting best practices and cutting edge technologies.
- To promote continuous innovation and entrepreneurship.
- To encourage collaborations, cooperation and partnerships with all stake holders to meet sustainable development goals.

### **Program Educational Objectives (PEOs)**

PEO1: Possess wide spectrum of managerial skills along with competency building qualities in specific areas of management and business studies.

PEO2: Select and apply appropriate tools for decision making required for ill structured managerial problems.

PEO3: Students will be able to independently conduct theoretical as well as applied research.

PEO4: To practice sound knowledge of the entrepreneurial process and inculcate creativity and innovation among students.

PEO5: Analyze ethical implications of business practices using advanced levels of ethical reasoning

### **Program Specific Objectives (PSOs)**

PSO1: To enrich communication, ethical values, team work, professional and leadership skill sets of students.

PSO2: To integrate knowledge, skill and attitude that will sustain an environment of learning and creativity among the students with an assurance for good careers.

PSO3: Analyze the economic, social and environmental issues related to business.

PSO4: Ability to identify, explore and harness opportunities presented by emerging trends and changing business environment.

PSO5: Understand the leadership skills through internship training.

### **Program Outcomes Objectives (POOs)**

- PO1: Demonstrate the knowledge of management science to solve complex corporate problems using limited resources.
- PO2: Apply ethical principles for making judicious management decisions.
- PO3: To develop proactive thinking so as to perform effectively in the dynamic socio-economic and business ecosystem.
- PO4: Identify business opportunities, entrepreneurship approach and skill sets.
- PO5: Communicate effectively with various stakeholders.

### **MASTER OF BUSINESS ADMINISTRATION (MBA):**

The M.B.A. course aims at providing inputs to the students relevant to the business industry and trade so that they can function in different organizations and face the challenges arising there from. The course not only aims at providing knowledge and skills in different areas of management, but also provides inputs necessary for the overall development of the personality of the students.

The structure of the Course is designed in a way that students have to study the core courses from different functional areas of management that are made compulsory. Later on, specializations are offered in functional areas where the students can opt for any one specialization out of the seven offered: Marketing, Finance, International Business, Operations Management, HRM, Pharma Business Management and Agri-Business Management. Right from the beginning of the course, the focus is on providing relevant inputs through case discussion/ analysis, simulation games, role-plays etc. keeping in mind the current business scenario.

Broadly, the course is of two years divided into four semesters, each semester having eight compulsory papers of 40 sessions each of one-hour duration. The students will have to opt for one functional areas for their specialization, each having five papers (three in third semester and two in the fourth semester from Specialization Papers).

Summer Training for 8/10 weeks is compulsory for every student pursuing the course, which they have to undergo at the end of second semester examination. Comprehensive viva and Research project are part of the course.

### **SUMMER TRAINING PROJECT REPORT:**

1. At the end of second semester examination, every student of MBA will undergo on-the-job practical training in any manufacturing, service or financial organization. The training will be of 8 to 10 weeks duration. The College/Institute will facilitate this compulsory training for students.
2. During the training, the student is expected to learn about the organization and analyze and suggest solutions of a live problem. The objective is to equip the student with the knowledge of actual functioning of the organization and problems faced by them for exploring feasible solutions and suggestions.
3. During the course of training, the organization (where the student is undergoing training) will assign a problem/project to the student.
4. The student, after the completion of training will submit a report to the College/Institute, which will form part of third semester examination. However, the report must be submitted by the end of August during third semester so that it is evaluated well in time and third semester results are not delayed.
5. The report (based on training and the problem/project studied) prepared by the student will be known as Summer Training Project Report. The report should ordinarily be based on primary data. It should reflect in depth study of micro problem, ordinarily assigned by the organization where student undergoes training. Relevant tables and bibliography should support it.

One comprehensive chapter must be included about the organization where the student has undergone training. This should deal with brief history of the organization, its structure, performance products/services and problems faced. This chapter will form part I of the Report. Part II of the Report will contain the study of micro research problem.

The average size of Report ordinarily will be 100 to 150 typed pages in standard font size (12) and double spacing. Three neatly typed and soft bound (paperback) copies of the report will be submitted to the College/Institute. The report will be typed in A-4 size paper.

6. The Report will have two certificates. One by the Head of the Institute/College and the other by the Reporting Officer of the organization where the student has undergone training. These two certificates should be attached in the beginning of the report.
7. The report will be evaluated by two external examiners. It will carry total of 100 marks divided into written report of 50 marks and presentation of 50marks. There will be no internal examiner.  
Only such persons will evaluate the project report who has minimum 3 years of experience of teaching MBA classes in a College/University. Experience of teaching MBA classes as guest faculty shall not be counted.
8. It is mandatory that the student will make presentation in the presence of teachers and students. The student is expected to answer to the queries and questions raised in such a meeting.

#### **RESEARCH PROJECT REPORT:**

In fourth semester, candidates will have to submit a Research Project Report on a problem/topic to be assigned by the School of Business Studies under the supervision of a core faculty member of the department. The research project report will carry 100 marks. The evaluation of the project report will be done by two external examiners. The average of the marks awarded by the two examiners will be taken into account for the results.

The report will contain the objectives and scope of the study. Research methodology, use, importance of the study, analysis of data collected, conclusions and recommendations. It will contain relevant charts, diagrams and bibliography. A certificate of the Supervisor and the Head of the MBA program certifying the authenticity of the report shall be attached therewith. The student will submit three copies of the report to the Head of the MBA program. The number of pages in the report will be 75 or more. The report should be typed in A-4 size paper.

#### **COMPREHENSIVE VIVA:**

The comprehensive viva voce is scheduled at the end of II & IV Semester in order to judge the understanding as well as application of the knowledge gained by the students by the end of 2<sup>nd</sup> & 4<sup>th</sup> Semester of the course. This is also to see the articulation of what is being learnt by them. The idea is to see that students are able to understand what is being taught in two full year and see their relevance not only in the practical field but also their inter relationship. The viva voce is of 100 marks to be conducted by the external examiner appointed by the University.

# SYLLABUS

## MBA I Semester

**Course Title :**Management Practices &Organisation Behaviour

**Course Code: MBA-101**

L	T	P	C.U.
32	8	0	3

**Programme& Semester:** MBA I

**Pre-requisites:** Basic knowledge of general management, student must have basic understanding of general management. (Covered by bridge course)

**Course Description:** The main objective of this course is to help the students to acquire and develop skill to take rational decisions in the process of O.B. People have always been regarded as important in managing organizations. This course covers the explanations about the human behavior in the organizational context. It details the impact of individual, group and organizational factors on human behavior. The course also focuses on understanding the behavior of the employees working in the organization. The approach taken in this course will expose students to psychological theories that will enable them to gain insight into behavior in organizations. The use of case studies will provide students the opportunity to apply theories to real life organizational issues and analyze the contributions and limitations of relevant theories.

**Course Objectives:** The objective of the course is to acquaint students develop an understanding of the basic management concepts and behavioral processes in organizations and organizational behavioral dynamics which are important to adapt in the changing corporate environment.

**Course Outcomes (COs):** At the end of this course students will be able to:

CO1- Define the nature, functions, skills and roles of managers

CO2- Describe the foundations of individual behavior with an understanding of human personality, perception, learning and emotions.

CO3- Appraise how managers can use the models to enhance motivational levels of employees and basic dynamics of interpersonal relationships.

CO4- Illustrate the organization of teams and groups in organizations.

CO5- Developing conceptual understanding of change and its implementation

### Course Contents:

#### Unit 1: Introduction

**8 Hours**

Concept of Management, Management: Art and Science, Management Vs Administration, Levels of Management, Functions of management, Management as a Profession, Management skills, Qualities and characteristics of managers. Evolution of Management thought: Early contributions: Taylor and Scientific Management, Fayol's Administrative Management, Bureaucracy, Human Relations, and Modern Approach, Social responsibility of managers, Managerial Ethics.

#### Unit 2 Functions of Management:

**8 Hours**

Concept of **planning**, Significance and Classification of planning: Strategic plan, Tactical plan and Operational plan, Process of planning, Barriers to effective planning. MBO, Management by Exception. Decision Making: Strategies of decision making. **Organizing**: Principles and Process of Organizing, Types of organizational structure, Span of control, Centralization vs. Decentralization of authority. **Staffing**: Concept, Objective of staffing, System approach to staffing, Manpower planning. **Directing**: Concept, Techniques of directing and supervision, Types of

supervision, Essential characteristics of supervisor. Leadership vs Management, Process of Leadership, Importance of leadership, Characteristics of an effective leader. **Controlling:** Concept, Importance of controlling, Types of control, Steps in control process.

**Unit 3 Foundations of Organizational Behaviour-**

**8 Hours**

Introduction to OB – Organizing Process – Organization design and structure - Departmentation Types – Making Organization Effective - Understanding Individual Behavior – Perception – Learning – Personality Types – Theories of Personality- Determinants of Personality Learning and Theories of Learning- Johari window- Transactional Analysis

**Unit 4 Group Dynamics & Motivation –**

**8 Hours**

Benefits of Groups – Types of Groups – Group Formation and Development, Motivation – Concept of Motivation - Motivational Theories of Maslow, Herzberg, David Mc Clelland, and Porter and Lawler. Emotions-Meaning- Characteristics-Emotions in Context of OB.

**Unit 5 Leadership and Organizational Culture and Climate:**

**8 Hours**

Leadership – Traits Theory – Managerial Grid – Transactional Vs Transformational Leadership – Qualities of good Leader, Change Management – Conflict Management. Organizational Stress-Definition and Meaning- Sources of stress- Types- Stress Management Techniques.

**Text Book (s):**

1. Luthans, F. (2015). Organizational Behaviour: An Evidence Based Approach(13th ed.).McGraw-Hill Irwin.
2. Luthans, F. (2015). Principles and Practices of Management (13th ed.).McGraw-Hill Irwin.

**Suggested Readings:**

**Course Title:**Economic Analysis for Business

**Course Code:** MBA-102

L	T	P	C.U.
32	8	0	3

**Programme& Semester:** MBA I

**Pre-requisites:** Basic knowledge of general management, student must have basic understanding of general management. (Covered by bridge course)

**Course Objectives:**

1. To equip the students of management with time tested tools and techniques of economic analysis to enable them to appreciate its relevance in decision making.
2. To explore the economics of information and network industries and to equip students with an understanding of how economics affect the business strategy of companies in these industries

**Course Outcome: On completion of the course student will be able to:**

CO1: Understand tools and techniques of managerial economics to enable them to appreciate its relevance in decision making.

CO2: Explore the economics of information and network industries

CO3: Understand how economics affect the business strategy of companies in these industries.

CO4: Develop economic way of thinking in dealing with practical business

**UNIT I INTRODUCTION**

**8 Hours**

The themes of economics – scarcity and efficiency – three fundamental economic problems – society’s capability – Production possibility frontiers (PPF) – Productive efficiency Vs economic efficiency – economic growth & stability – Micro economies and Macro economies – the role of markets and government – Positive Vs negative externalities.

**UNIT II CONSUMER AND PRODUCER BEHAVIOUR**

**8 Hours**

Market – Demand and Supply – Determinants – Market equilibrium – elasticity of demand and supply – consumer behaviour – consumer equilibrium – Approaches to consumer behaviour – Production – Short-run and long-run Production Function – Returns to scale – economies Vs diseconomies of scale – Analysis of cost – Short-run and long-run cost function – Relation between Production and cost function.

**UNIT III PRODUCT AND FACTOR MARKET**

**8 Hours**

Product market – perfect and imperfect market – different market structures – Firm’s equilibrium and supply – Market efficiency – Economic costs of imperfect competition – factor market – Land, Labour and capital – Demand and supply – determination of factor price – Interaction of product and factor market – General equilibrium and efficiency of competitive markets.

**UNIT IV PERFORMANCE OF AN ECONOMY – MACRO ECONOMICS 8 Hours**

Macro-economic aggregates – circular flow of macroeconomic activity – National income determination – Aggregate demand and supply – Macroeconomic equilibrium – Components of aggregate demand and national income – multiplier effect – Demand side management – Fiscal policy in theory, Introduction to Public Finance.

**UNIT V AGGREGATE SUPPLY AND THE ROLE OF MONEY 8 Hours**

Short-run and Long-run supply curve – Unemployment and its impact – Okun’s law – Inflation and the impact – reasons for inflation – Demand Vs Supply factors –Inflation Vs Unemployment tradeoff – Phillips curve –short-run and long-run –Supply side Policy and management- Money market- Demand and supply of money – money-market equilibrium and national income – the role of monetary policy.

**Course Title:**Accounting for Managers

**Course Code:** MBA-103

L	T	P	C.U.
30	5	5	3

**Programme& Semester:** MBA I

**Pre-requisite:** Foundation Course - Financial Accounting

**Course Description:** Accounting for managers can be used in short-term and long-term decisions involving the financial health of a company. Managerial accounting helps managers make operational decisions–intended to help increase the company's operational efficiency and cost management. The syllabus of Accounting for Managers spread over five units; unit 1 covers the conceptual framework of Management Accounting which includes cost control, cost reduction, and cost management, Accounting Standards and IFRS. Unit 2 covers Preparation of Final Accounts. Unit 3 covers Analysis of financial statements; Ratio Analysis, Common size statement and Trend Analysis. Unit-4 Covers Budget and Budgetary Control and Unit-5 covers Marginal Costing and Decision-making, Concept of responsibility accounting. Students will also be trained on computerised accounting system.

The Andragogy in this subject includes power point presentations, case studies, assignments, class test, quiz, mini project etc.

**Course Objectives:**

1. To understand the basic concepts of financial accounting, cost accounting and management accounting.
2. To develop basic computerized accounting skills.
3. To understand the use of accounting information for planning, controlling and decision-making in organizations.
4. To develops skills of interpreting financial statements.
5. To develop decision making skills using the techniques of management accounting.

**Course Outcome: On completion of the course student will be able to:**

CO1: Understand the basic concepts of financial accounting, cost accounting and management accounting.

CO2: Understand accounting process as an information system for decision-making.

CO3: Use of various tools of accounting for analyzing business situations and to take decision.

CO4: Analyze the financial position business.

CO5: Solve the problems related to managerial decisions using the techniques of management accounting.

**Course Contents**

**Unit 1 Concept**

**8 Hours**

Nature, scope, and importance of management accounting; difference between financial accounting and management accounting; difference between cost accounting and management accounting; cost control, cost reduction, and cost management.

**Accounting Standards and IFRS:** International Accounting Principles and Standards; Matching of Indian Accounting Standards with International Accounting Standards, Human Resource Accounting, Forensic Accounting.

**Unit II Preparation of Final Accounts:**

**8 Hours**

Trading Account, Profit and Loss Account, Balance Sheet: Meaning, Need.Excel Application to make Balance sheet. Accounting for non-profit organization -An overview

**Unit III Analysis of financial statements:**

**8 Hours**

Meaning and need of ratio analysis; various types of ratios; solvency ratios, profitability ratios, activity ratios, liquidity ratios, market capitalization ratios.Common size statement, Trend Analysis.

**Unit IV Budget and Budgetary Control**

**8 Hours**

Concept of budget and budgetary control; objectives, merits, and limitations of budget administration; types of budgets: fixed and flexible budgets, zero-base budget, programme and performance budget.

**UNIT V Marginal Costing and Decision-making**

**8 Hours**

Concept of marginal costing, differential costing and absorption costing, break-even analysis, use of above costs in decision-making; make or buy, change of product-mix, pricing and determination of shut-down point.

**Responsibility Accounting**

Concept of responsibility accounting, responsibility centres and their types.

**Lab.: Computerized accounting using Tally.**

**Course Title:**Quantitative Techniques for Managers

**Course Code:** MBA-104

L	T	P	C.U.
30	5	5	3

**Programme& Semester:** MBA I

**Pre-requisite:** Business Mathematics

**Course Description:** Quantitative techniques are collection of statistical tools that are used to provide powerful means of analysis using quantitative data for effective decision making in business. The syllabus of quantitative techniques for managers includes five units; unit one is introduction which includes basic concept of quantitative techniques, applications in decision-making in Business and management, graphical representation of Data, measures of central tendency, measures of skewness and kurtosis; Unit 2 includes measures of dispersion and index number; Unit 3 includes correlation and regression analysis; in unit-4 includes time series analysis, components and methods; Unit-5 includes probability distribution & formulation of hypothesis & hypothesis testing. The Andragogy in this subject includes power point presentations, case studies, assignments, class test, quiz, mini project etc.

**Course Objectives:** The objective of this course is to familiarize students with the basic quantitative techniques tools used for managerial decision-making and to have a proper understanding of quantitative techniques applications in business and management.

**Course Outcomes (COs):** At the end of this course students will be able to:

CO1: Describe basic concepts of quantitative techniques.

CO2: Examine various Measures of Central Tendency, Measures of Dispersion, Correlation and Regression analysis in decision making.

CO3: Interpret the trend analysis with different methods of time series analysis.

CO4: Explain basic concepts of probability and perform probability theoretical distributions. Understanding

CO5: Operate the concept of statistical analysis which includes various hypothesis tests like chi square test, ANOVA

**Course Contents:**

**Unit 1: Introduction:**

**8 Hours**

Basic Concept of Quantitative techniques, Applications in decision-making in Business and Management, Graphical representation of Data, Measures of Central Tendency: Mean; Median; Mode, Measures of Skewness and Kurtosis

**Unit-2 Measures of Dispersion and Index Number:**

**8 Hours**

Introduction to Measures of Dispersion, Range, Quartile Deviation, Quartiles, Standard Deviation, Significance of Measures of Dispersion, Coefficient of Variation. Index Numbers: Introduction, Characteristics, Uses, Simple Index Numbers, Weighted Index Numbers: Laspeyres, Paasche's, Marshall-Edgeworth's, Walsh's, Bowley's and Fisher's Index Number

**Unit 3: Correlation Analysis and Regression Analysis:**

**8 Hours**

Introduction of correlation, Importance and types of correlation, Degrees of correlation, Methods to Measure correlation: Scatter diagram, Karl Pearson's Coefficient of Correlation, Spearman's rank correlation coefficient and Concurrent deviation method.

Introduction and importance of regression analysis, Properties, Regression equations, Methods to Measure Regression: Least squares method: Direct Mean and Short- Cut Method, Using r and S.D.

**Unit 4: Time Series Analysis:**

**8 Hours**

Introduction, Importance of Time series analysis, Components of time series, Time series models: Additive and multiplicative model, Method of time series analysis/ Trend Analysis: Semi Average Method, Moving Average Method and Method of Least Squares

**Unit 5: Probability Distribution & Formulation of Hypothesis & Hypothesis Testing** **8 Hours**

- a) Probability: Concept, Mutually exclusive events, Addition and multiplication rules of probability.
- b) Probability Distribution: Concept of probability distribution, Normal probability distribution, Poisson distribution, Binomial distribution.
- c) Formulation of Hypothesis & Hypothesis Testing: Formulation of Alternate and Null hypothesis, Procedure of hypothesis testing, ANOVA, Chi-square test: Test of Independence; Test of Goodness of fit

**Course Title:**Legal Aspects of Business

**Course Code:** MBA-105

L	T	P	C.U.
32	5	3	3

**Programme& Semester:** MBA I

**Pre-requisite:**NIL

**Course Description:** To provide a basis of understanding to the students with reference to the rules, practices and regulations that governs the formation as well as the operation of business. The course will help them to understand the different legal and illegal activities and actions in the business.

**Course Objective:** The objective of this course is to understand about different acts related to business. To understand the duties of members and their relationship to one another. To create an awareness about important legislations namely Sale of Goods Act, Consumer Protection Act, Factories Act having impact on business

**Course Outcomes:** Upon the successful completion of this course, the student will be able to:

CO1: Acquire a sound understanding of the legal aspects of the laws affecting businesses

CO2: Apply basic legal knowledge to business transactions

CO3: Communicate effectively using standard business and legal terminology

CO4: Analyse a given business context using basic understanding of the applicable Acts and develop a suitable operational framework.

CO5: Describe current law, rules, and regulations related to settling business disputes

### **Course Contents**

#### **Unit I: Law of Contract**

**8 Hours**

Concept of Contract, offer and acceptance; valid contracts and its essential elements; void agreements; classification of contracts; Quasi contract; performance of contract; discharge of contract; remedies for breach of contract. Special Contracts: Indemnity, Guarantee, Bailment, pledge. Law of Agency: Essentials, kinds of agents, rights and duties of agent and principal, creation of agency, termination of agency

#### **Unit 2: Law of Sales of Goods**

**8 Hours**

Contract of sale, Goods and their classification, Meaning of price, Conditions and Warranties, Passing of property in goods, Transfer of title by non-owners, Performance of a contract of sale, Unpaid seller and his rights, Remedies for breach of contract

**Consumer Protection Act:** Objectives, definition, consumer protection council and state consumer protection council.

**The Partnership Act:** Nature of Partnership, Formulation of Partnership firms; rights, duties, and liabilities of partners; Dissolution of Partnership Term

#### **Unit 3: The Negotiable Instruments Act, 1881**

**8 Hours**

Definition, Features and types of negotiable instruments, kinds of negotiable instruments, Methods of negotiation of instruments; holder and holderin due Course; Endorsement and delivery of a negotiable instrument; Presentation of Negotiable Instrument.

Banker and Customer: An introduction; Crossing of a cheque; Types of crossing; Bouncing of cheques, Obligations of banker and customer; Dishonour and discharge of negotiable instruments

**Unit 4: The Companies Act****8 Hours**

Definition, characteristics and kinds of companies, steps in formation of company.

Memorandum of association, articles of association and prospectus.

Directors: appointment, power, duties and liabilities, meeting and resolutions: types of meetings. Auditor: appointment, rights and liabilities. Modes of winding up of a company.

**Unit 5: The Information Technology Act, 2000****8 Hours**

Definition, Digital Signature, Electronic Governance, Attribution, Acknowledgment and Dispatch of Electronic Records, Sense Electronic Records and Sense Digital Signatures, Regulation of Certifying Authorities, Digital Signature Certificates, Duties of Subscribers, Penalties and Offences.

**Intellectual Property Laws-** Introduction, Legal Aspects of Patents, Filing of Patent Applications, Rights from Patents, Infringement of Patents, Copyright and its Ownership, Infringement of Copyright, Civil Remedies for Infringement.

**Suggested Readings**

1. Kuchhal M.C. - Business Law (Vikas Publication)
2. Gulshan S.S. - Business Law Including Company Law (Excel Books)
3. N D Kapoor – Elements of Mercantile Law – Sultan Chand-2014
4. Dr Avatar Singh- Principles of Mercantile Law, Eastern Book Company 2014
5. NandanKamath- Law relating to Computer, Internet and E-Commerce (A Guide to cyber Laws), Universal Law Publishing Co. Ltd.New Delhi, 2012.

**Course Title:** Business Ethics

**Course Code:** MBA-106

L	T	P	C.U.
32	8	0	3

**Programme& Semester:** MBA I

**Pre-Requisite:** NIL

**Course Objectives:** The basic objective of this course is to gain insight into ethical behavior and to become familiar with inherent conflicts in being ethical. To understand the ethical dilemmas in business situations and to find out ways to resolve them. To learn to make decisions effectively based on ethical thinking and decision making processes.

**Course Outcomes (COs):** At the end of this course students will be able to:

- CO 1: Analyze the concepts of business ethics from a personal and an organizational perspective
- CO 2: Assess the ethical issues facing business leaders.
- CO 3: Evaluate and distinguish between the concepts of social responsibility, integrity, and business ethics
- CO 4: Discuss the moral and social responsibility dimensions of corporate governance;
- CO 5: understanding of Global modern Business Ethics and their residing applications in different context

**Course Contents:**

**Unit-1:**

**8 Hours**

Meaning and Nature of Ethics, Moral and Ethics: Importance of Ethics, Types of Ethics, Causes of Unethical Behavior Meaning, Nature and Importance of Business Ethics, Types of Business Ethics, Factors Influencing Business Ethics, Corporate Ethics: Ethical Behavior and Audit of Ethical Behavior.

**Unit-2:**

**8 Hours**

Individual Ethics, Professional Ethics, Gandhian Philosophy of Ethical Behavior, Social Audit, Concept of Globalization and Global Business Network, Relationship among Business, Business Ethics and BusinessDevelopment Developing Business System Ethics relating to Ethics in Global Economy, Marketing Ethics in Foreign Trade, Role of Business Ethics in Developing Civilized Society.

**Unit-3:**

**8 Hours**

Managing Business Ethics: Ethical Decision Making Processes and Guidelines; Building an Ethical Value System in the organization; Role of Laws and Enforcement; Training in Business Ethics; business and ecological/ environmental issues in the Indian context.

**Unit-4:**

**8 Hours**

Corporate Social Responsibility: Definition & Drivers of CSR; The Scope of Social Responsibility; Social Responsibility and Indian Corporations; CSR and Environmental Protection; Role of Government in Corporate Governance: Government Interference in Market Economies; Different Roles of Government in the Economy; Forms of Government Regulation; The Scope of Government's Relations with Business.

**Unit – 5:****8 Hours** Global

Business and Ethical Convergence: Role of International bodies like WTO in establishing Model Codes of Conduct; Cross-Cultural Ethical Dilemmas and their Resolution.

**Text Book:**

Fernando, A.C. (2011). Corporate Governance: Principles, Policies and Practices. Pearson Education.

**Reference Readings:**

1. Hartman Laura P. & Chatterjee Abha, “Perspectives in Business Ethics”, McGraw Hill.
2. Velasquez, Manuel G., “Business Ethics – Concepts and Cases”, PHI Publications.
3. Crane Andrew & Matten Dirk, “Business Ethics”, Oxford University Press, New Delhi.

**Course Title:**Personality Development and Communication Skills

**Course Code:** MBA-107

L	T	P	C.U.
30	5	5	3

**Programme& Semester:** MBA I

**Pre-requisites:** The learners are expected to have completed Graduation in any discipline.

**Course Description:** This course covers various dimensions and importance of effective personality and business communication. It helps to understand personality traits and importance of business communication in the world of business. Also, the course makes the students aware about the various dynamics of personality development. The course aims to cause a basic awareness about the significance of soft skills in professional and inter-personal communication s and facilitate an all-round development of personality.

**Course Objective:** The course objective is to develop all forms of communication skills in students to enable them to conduct well in an any business process without any communication barrier.This course covers various dimensions and importance of effective personality. It helps to understand personality traits and formation and vital contribution in the world of business. Also, the course makes the students aware about the various dynamics of personality development.

**Course Outcomes: (CO)**

After completion of this course, the student will be able to:

CO1: Understand business communication strategies and principles for effective communication in domestic and international business situations.

CO2: Develop the ability to research and write a documented paper and/or to give an oral presentation.

CO3: Develop the ability to communicate via electronic mail, Internet, and other technologies for presenting business messages.

CO4: Identify ethical, legal, cultural, and global issues affecting business communication.

CO5:Operate in team activities that lead to the development of collaborative work skills.

**Course Contents**

**Unit1: Introduction:**

**8 Hours**

NatureofCommunication,ProcessofCommunication,TypesofCommunication(verbal&NonVerbal),Importance ofCommunication,characteristics of successful communication Different forms of Communication Barriers to Communication Causes, Linguistic Barriers, Psychological Barriers, Interpersonal Barriers, Cultural Barriers, Physical Barriers, Organizational Barriers.

**Unit 2: Business Correspondence:**

**8 Hours**

Business letters: Introduction to business letters: writing routine and persuasive letters positive and negative messages- writing memos, presentation, inviting quotations, sending quotations, placing orders, inviting tenders,Salesletters,claim&adjustmentlettersandsocialcorrespondence,Memorandum,Inter-officeMemo,Notices,Agenda,Minutes,Jobapplicationletter,preparingtheResume.

**Unit 3: Report Writing:****8 Hours**

Business reports: what is a report purpose, kinds and objectives of report writing. Characteristics, Importance, Elements of structure, Process of writing, Order of writing, the final draft, checklists for reports. Oral Presentation: Importance, Characteristics, Presentation Plan, Power point presentation, Visual aids.

**Unit4: Personality & Group Communication****8 Hours**

Define Personality, Determinants of Personality Development, Perception: Definition, Perceptual Process. Factors of Association Relationship, Personality Traits, Developing Effective Habits, Emotional Intelligence. Interpersonal Relationship, Personality Spiritual journey beyond management of change, Good manners & Etiquettes, Effective Speech, Understanding Body language, projective positive body language

Group communication: Meetings – Planning meetings, objectives, participants, timing, venue of meetings, leading meetings. Media management: the press release press conference, media interviews Seminars, workshop, conferences.

**Unit 5: Business Communication****8 Hours**

Group Discussions. Interview skills, Impact of Technological Advancement on Business Communication. Stress Management: Introduction, Causes, stress management techniques, Time management: Importance of time management, Techniques of time management, Time management styles.

**Text Book**

## SYLLABUS

### MBA-1 Semester

#### Course Title: STRESS MANAGEMENT

#### Course Code: MBA-107 A

**Objectives of the Course** - The objectives of stress management are to reduce the negative effects of stress on physical and mental health, improve coping mechanisms, and promote overall well-being. It aims to enhance productivity, increase emotional resilience, and maintain a balanced lifestyle, helping individuals manage stress effectively for better personal and professional performance.

#### Unit 1: Understanding Stress and Its Impact

**Objective:** Introduce the concept of stress, its types, and the physiological and psychological impact on individuals.

- **Key Topics:**
  - **Definition of Stress:** What is stress? Eustress vs. Distress.
  - **Sources of Stress:** Academic pressures, time management, interpersonal conflicts, expectations, and career planning.
  - **Stress Responses:** The fight-or-flight response, physical, emotional, and behavioral symptoms of stress.
  - **Impact of Stress:** How chronic stress affects health, well-being, and academic performance.
  - **Stress and Performance:** The Yerkes-Dodson Law (the relationship between stress and performance).

#### Unit 2: Time Management and Prioritization

**Objective:** Equip students with practical tools to manage their time effectively and reduce stress caused by workload.

- **Key Topics:**
  - **Time Management Strategies:** The Pomodoro Technique, Time Blocking, and the Eisenhower Matrix (urgent vs. important tasks).
  - **Goal Setting:** SMART Goals (Specific, Measurable, Achievable, Relevant, Time-bound).
  - **Prioritization Techniques:** How to determine what to focus on based on urgency and importance.
  - **Dealing with Procrastination:** Understanding procrastination and strategies to overcome it.

#### Unit 3: Emotional Intelligence (EI) and Stress

**Objective:** Help students understand how emotional intelligence can help in managing stress and building interpersonal relationships.

- **Key Topics:**
  - **Components of EI:** Self-awareness, self-regulation, motivation, empathy, and social skills.
  - **How EI Impacts Stress:** Emotional triggers, coping strategies, and resilience.
  - **Managing Difficult Emotions:** Techniques like mindfulness and emotional regulation to reduce stress.

- **Empathy in Stress Management:** How understanding others' emotions can reduce conflict and stress in group work.

#### Unit 4: Mindfulness and Relaxation Techniques

**Objective:** Teach students practical techniques for reducing stress through mindfulness, breathing, and relaxation exercises.

- **Key Topics:**
  - **Introduction to Mindfulness:** What is mindfulness, and how it helps reduce stress?
  - **Breathing Techniques:** Deep breathing exercises, diaphragmatic breathing, and the 4-7-8 technique.
  - **Progressive Muscle Relaxation (PMR):** A method of systematically tensing and relaxing muscle groups to release stress.
  - **Mindful Meditation:** Guided meditation techniques for reducing stress and improving focus.
  - **The Role of Sleep:** Importance of sleep in stress management and cognitive performance.

#### Unit 5: Building Resilience and Coping Strategies

**Objective:** Focus on building resilience and effective coping strategies to handle challenges and setbacks in both academic and professional life.

- **Key Topics:**
  - **What is Resilience?:** Definition and importance of resilience in overcoming stress.
  - **Developing a Resilient Mindset:** Positive thinking, reframing challenges, and finding opportunities in adversity.
  - **Coping Strategies:** Active vs. passive coping, problem-solving techniques, and seeking support.
  - **Stress-Buffering Resources:** Social support networks, mentorship, and seeking professional help when necessary.
  - **Work-Life Balance:** How to maintain balance and avoid burnout.

#### Suggested readings-

- **Davis, M., Eshelman, E.R., & McKay, M. (2000).** *The Relaxation and Stress Reduction Workbook*. 5th ed., New Harbinger Publications.
- **Maté, G. (2003).** *When the Body Says No: The Cost of Hidden Stress*. Wiley.
- **Benson, H. (1975).** *The Relaxation Response*. William Morrow & Co.
- **Nagoski, E., & Nagoski, A. (2020).** *Burnout: The Secret to Unlocking the Stress Cycle*. Ballantine Books.
- **Posen, D. (2010).** *The Little Book of Stress Relief*. Macmillan.
- **Sivananda, Swami (2001).** *The Art of Stress-Free Living*. The Divine Life Society.

**SYLLABUS**  
**MBA-1<sup>st</sup> SEMESTER**  
**COURSE TITLE- INTRODUCTION TO PSYCHOLOGY**  
**SUBJECT CODE-MBA-107 B**

**Objectives of the Course** - The objectives of an introduction to psychology are to explore human behavior, cognition, and emotions. It aims to provide foundational knowledge of psychological theories and principles, understanding mental processes, and addressing psychological issues. The course seeks to develop critical thinking, enhance self-awareness, and apply psychological concepts in everyday life.

Unit 1: Basics of Psychology and its Importance for Business

- **What is Psychology?**
  - Definition, history, and key branches (e.g., cognitive, social, organizational psychology)
- **The Role of Psychology in Business**
  - Understanding human behavior in organizational settings
  - Psychological principles that apply to leadership, marketing, consumer behavior, and management
- **Subfields of Psychology Relevant to MBA**
  - Industrial-organizational psychology, social psychology, consumer psychology
- **The Scientific Method in Psychology**
  - Research methods: experimental, survey, observational, and case study

Unit 2: Human Behavior and Personality

*Key Topics:*

- **Understanding Human Behavior**
  - Nature vs. Nurture debate
  - The role of motivation, emotion, and cognition
- **Personality Theories**
  - Freud's Psychoanalytic Theory
  - Jung's Analytical Psychology
  - The Big Five Personality Traits
- **Personality and Business**
  - How personality influences work style, decision-making, and team interactions
  - Leadership styles based on personality

Unit 3: Perception and Decision-Making in Business

*Key Topics:*

- **Perception and its Influence**
  - The process of perception: attention, interpretation, and response
  - Factors influencing perception (e.g., stereotypes, biases)

- **Cognitive Biases and Heuristics**
  - Common biases in decision-making (e.g., confirmation bias, availability heuristic)
  - The impact of cognitive shortcuts on business decisions
- **The Psychology of Decision-Making**
  - Rational vs. bounded rationality
  - Groupthink and its effects on organizational decisions

#### Unit 4: Motivation and Leadership

##### *Key Topics:*

- **Motivation Theories**
  - Maslow's Hierarchy of Needs
  - Herzberg's Two-Factor Theory
  - Vroom's Expectancy Theory
  - McClelland's Theory of Needs
- **Motivational Strategies in Business**
  - Intrinsic vs. extrinsic motivation
  - Designing jobs and rewards systems to motivate employees
- **Leadership and Motivation**
  - Leadership styles: transformational, transactional, and servant leadership
  - How leaders motivate and inspire teams

#### Unit 5: Group Behavior and Organizational Culture

##### *Key Topics:*

- **Group Dynamics**
  - Types of groups in organizations: formal and informal
  - Group formation and development (Tuckman's stages: forming, storming, norming, performing, adjourning)
  - Group roles and behaviors
- **Organizational Culture**
  - Definition and elements of organizational culture (values, norms, rituals)
  - The role of culture in shaping behavior and decision-making
  - Aligning organizational culture with business strategy
- **Conflict and Cooperation in Teams**
  - Managing conflict in teams
  - Techniques for fostering collaboration and teamwork

##### Suggested readings-

- *The Relaxation and Stress Reduction Workbook* by Martha Davis
  - *Emotional Intelligence 2.0* by Travis Bradberry and Jean Greaves
  - Articles and case studies on stress management in academic settings
-

## SYLLABUS

### MBA-1<sup>st</sup> SEMESTER

#### COURSE TITLE- ART OF HAPPINESS /YOGA & MEDITATION

#### SUBJECT CODE-MBA-107 C

**Objectives of the Course** - The objectives of the art of happiness, yoga, and meditation are to enhance mental clarity, reduce stress, and promote emotional well-being. They aim to cultivate mindfulness, balance, and inner peace, fostering self-awareness and resilience. These practices improve physical health, increase positivity, and lead to a harmonious, fulfilling life.

#### Unit 1: Introduction to Happiness and Well-being

- **The Concept of Happiness:** Definitions of happiness from different cultural, psychological, and philosophical perspectives.
- **The Science of Happiness:** How happiness impacts the brain and body. The role of positive psychology.
- **External vs Internal Happiness:** The difference between fleeting happiness (based on external circumstances) and lasting joy (cultivated through internal practices).
- **Reflection Activity:** Journaling about moments of true happiness and what made them meaningful.

#### Unit 2: Introduction to Yoga

- **What is Yoga?:** Its origin, history, and philosophy (including the 8 Limbs of Yoga).
- **Benefits of Yoga:** How physical postures (asanas) affect the body, mind, and spirit.
- **Connection between Yoga and Happiness:** How regular practice can reduce stress, increase mindfulness, and foster a sense of contentment.
- **Beginner-Friendly Poses:** Teaching basic asanas (like Downward Dog, Child's Pose, and Mountain Pose) that promote relaxation and ease.
- **Practical Session:** A guided 15-minute yoga session focusing on breathing and gentle stretching.

#### Unit 3: The Power of Breath (Pranayama)

- **What is Pranayama?:** Introduction to controlled breathing techniques in yoga and meditation.
- **The Link between Breath and Mind:** How conscious breathing impacts emotional regulation and mental health.
- **Common Breathing Techniques:**
  - **Nadi Shodhana** (Alternate nostril breathing) for calming the mind.
  - **Kapalbhati** (Breath of Fire) for energizing the body.
- **Practical Session:** Guided Pranayama session for 10 minutes.

#### Unit 4: Meditation and Mindfulness

- **What is Meditation?:** A deeper look into the practice of meditation as a tool for mindfulness, relaxation, and clarity.
- **Mindfulness Meditation:** Developing the ability to stay present and non-reactive in the moment.
- **Types of Meditation:**
  - **Guided Meditation:** Focusing on imagery or a specific theme.

- **Mantra Meditation:** Using a sound or word to center the mind.
- **Loving-Kindness Meditation (Metta):** Cultivating compassion towards self and others.
- **The Science of Meditation:** How regular practice can reduce stress, improve concentration, and enhance emotional resilience.
- **Practical Session:** A 10-minute guided meditation focusing on breath awareness.

#### **Unit 5: Integrating Yoga, Meditation, and Happiness**

- **Bringing Yoga into Daily Life:** How to practice mindfulness and yoga in everyday situations (e.g., mindful eating, walking, or even at work).
- **The Role of Gratitude:** Developing a gratitude practice and how it enhances happiness and emotional well-being.
- **Sustainable Practices:** Creating a personal routine for practicing yoga, meditation, and mindful living.
- **Reflection and Journaling:** Encouraging participants to reflect on their journey, personal growth, and plans for continuing the practices.

#### **Suggested readings-**

- Dalai Lama, T., & Cutler, H. C. (1998).** *The Art of Happiness: A Handbook for Living.* Riverhead Books.
- Kabat-Zinn, J. (1990).** *Full Catastrophe Living: Using the Wisdom of Your Body and Mind to Face Stress, Pain, and Illness.* Delta.
- Iyengar, B. K. S. (1966).** *Light on Yoga.* HarperCollins.
- Tolle, E. (1997).** *The Power of Now: A Guide to Spiritual Enlightenment.* New World Library.
- Nhat Hanh, T. (1999).** *The Miracle of Mindfulness: An Introduction to the Practice of Meditation.* Beacon Press.

**Course Title:**Information Systems

**Course Code:** MBA-108

L	T	P	C.U.
30	5	5	3

**Programme& Semester:** MBA I

**Pre-Requisite: Basic Knowledge of Computer**

**Course Description:** An examination of the use of information systems to support the management activities of an organization. Topics include: the fundamentals of hardware, software, database management, data communications, transaction processing information systems, decision support systems, information reporting systems, office automation, networks, expert systems, and systems analyses and design. Case studies and several software packages will be utilized to illustrate the principles covered.

**Course Objectives:**

This course is designed to provide students with an understanding of the theoretic and practical issues related to the application of information systems within organizations. The main objectives of the course are to:

- Demonstrate how information systems integrate information and organizational processes across functional areas into unified systems.
- Outline challenges and benefits from the most commonly used enterprise systems.
- Employ a software package to illustrate how enterprise systems work.
- Integrate conceptual and technical (software) skills of students so that a business problem is addressed within the scope of a group project.

**Course Outcome: On completion of the course student will be able to:**

CO1: Evaluate the role of information systems in today's competitive business environment.

CO2: Identify and describe important features of organizations in order to build and use information systems successfully.

CO3: Demonstrate systems analysis, design and decision making in a business setting.

CO4: Define and describe the fundamentals of hardware, software, database management, data communications and systems related to the management activities of an organization.

CO5: Assess how information systems support the activities of managers and end-users in organizations.

CO6: Identify the principal management challenges posed by the ethical and social impact of information systems and management solutions.

**Course Contents:**

**UNIT –I Information System introduction**

**8 Hours**

The meaning and use MIS, System View of Business, Process of MIS, Development of MIS within the organization, Management Process, Information Needs, System Approach in Planning Organizing and Controlling MIS.

**Unit II Conceptual Framework****6 Hours**

Hardware: (a)

Input devices - keyboard, printing devices, voice speech devices, scanner, MICR, OMR, Bar code reader, digital camera etc. (b) Output devices - Visual Display Unit, printers, plotters (c) Storage Devices – Magnetic storage devices, Optical storage devices, Flash Memory.

**Unit III: Operating System and Software****6 Hours**

Software: Types of software with examples; Introduction to languages, compiler, interpreter and Assembler, Operating System Functions, Types and Classification, Elements of GUI based operating system.

**Unit IV: Communication Technology****6 Hours**

Network and Internet: Types of computer networks (LAN, WAN and MAN), Network topologies, EDI.

Internet: Netiquettes, Architecture & Functioning of Internet, Basic services over Internet like WWW, FTP, Telnet, Gopher, IP addresses, ISPs, URL, Domain names, Web Browsers, Internet Protocols, Search engines, e-mail.

**Unit V: Office tools for Business****6 Hours**

Use of MS-Office: Word: Paragraph formatting, Page formatting, Header and footer, Bullets and numbering, Finding and replacing text, Mail merge, Macros. Cell referencing, Ranges.

Excel: Formulae, Functions, Auto sum, Copying formula, Formatting data, creating charts, creating Database, sorting data, filtering.

Power Point: Formatting text on slides, Inserting charts, adding tables, Clipping, Slide animation, Slide shows.

**Unit-VI Security and Ethical Challenges of IT****4 Hours**

Concept of Business Ethics, Technology Ethics; Security and Ethical Challenges of IT, Cyber Crime and Privacy Issues, Cyber Laws, IT Act 2000.

**Suggested Readings**

1. Shrivastava-Fundamental of Computer& Information Systems (Wiley Dreamtech)
2. Leon A and Leon M - Introduction to Computers ( Vikas, 1st Edition).
3. IITL ESL – Introduction to Information Technology (Pearson, 2nd Edition).
- 4 IITL ESL – Introduction to Computer science (Pearson, 2nd Edition).
5. Introduction to Computers, Norton P. (TATA McGraw Hill)
6. Leon - Fundamentals of Information Technology, (Vikas)

## SYLLABUS

### MBA-1<sup>st</sup> SEMESTER

### COURSE TITLE- FUNDAMENTAL OF COMPUTER

### SUBJECT CODE-MBA-108 A

**Objectives of the Course** - The objectives of Fundamentals of Computer are to provide a basic understanding of computer hardware, software, and applications. It aims to teach essential computing skills, including operating systems, data processing, and problem-solving techniques. The course seeks to build foundational knowledge for using technology effectively in personal and professional environments.

#### Unit 1: Introduction to Computers

1. **Definition and Characteristics of a Computer:**
  - What is a computer?
  - Characteristics of computers (Speed, Accuracy, Automation, Storage, Versatility, etc.)
2. **Types of Computers:**
  - Analog, Digital, Hybrid
  - Classification based on size (Supercomputers, Mainframe, Minicomputers, Microcomputers)
3. **Components of a Computer System:**
  - Hardware: Input devices (keyboard, mouse), Output devices (monitor, printer), Central Processing Unit (CPU)
  - Software: System software (Operating System), Application software
  - Memory: Primary (RAM, Cache), Secondary (Hard Disk, SSD, etc.)
4. **Generation of Computers:**
  - First generation (Vacuum tubes)
  - Second generation (Transistors)
  - Third generation (Integrated Circuits)
  - Fourth generation (Microprocessors)
  - Fifth generation (AI, Quantum Computing)
5. **Uses of Computers in Business:**
  - Information Management, Decision Making, Process Automation, Communication, Data Analysis

#### Unit 2: Hardware and Software Basics

1. **Computer Hardware Components:**
  - Input Devices (keyboard, scanner, microphone)
  - Output Devices (monitor, printer, speakers)
  - Storage Devices (HDD, SSD, USB, cloud storage)
  - Motherboard, CPU, RAM, etc.
2. **Software Overview:**
  - System Software: Operating Systems (Windows, Linux, macOS)
  - Application Software: Word processors, Spreadsheet programs (Microsoft Office, Google Docs)
  - Development Software: IDEs, programming languages (C, Python, Java)
3. **Types of Software:**
  - Proprietary vs. Open Source Software
  - Application Software vs. System Software
4. **Operating System:**
  - Functions and types of operating systems (Windows, Linux, Mac OS, Android)
  - Multitasking, Multithreading, and Memory Management

- File Systems (FAT32, NTFS, ext3/ext4)

### **Unit 3: Data Representation and Storage**

- 1. Data Representation:**
  - Binary System (Bits, Bytes, etc.)
  - Number Systems (Binary, Octal, Decimal, Hexadecimal)
  - Data encoding (ASCII, Unicode)
- 2. Storage Devices:**
  - Primary Memory: RAM (Random Access Memory), Cache Memory
  - Secondary Storage: Hard Drives, Solid State Drives, Optical Drives (CD/DVD), Cloud Storage
  - Tertiary Storage: Magnetic tapes, Backup systems
- 3. Data Compression:**
  - Lossy vs Lossless compression (JPEG, PNG, MP3, ZIP)
- 4. Storage and Retrieval of Data:**
  - File Systems and Directories
  - Database Management Systems (DBMS)

### **Unit 4: Computer Networks and Internet**

- 1. Introduction to Networking:**
  - Definition of a Network, Types of Networks (LAN, MAN, WAN)
  - Components: Routers, Switches, Hubs, and Modems
- 2. Internet:**
  - Basic Terminology: IP Address, DNS, HTTP, HTTPS
  - Web Browsers and Web Servers
  - Internet Protocols (TCP/IP)
- 3. E-commerce and Digital Marketing:**
  - Role of the Internet in Business: E-commerce models (B2B, B2C, C2C, etc.)
  - Digital Marketing: SEO, SEM, Social Media Marketing
- 4. Cybersecurity:**
  - Types of Cyber Threats (Viruses, Malware, Phishing)
  - Basic Security Measures (Firewalls, Antivirus, Encryption)

### **Unit 5: Applications of Computers in Business**

- 1. Business Information Systems (BIS):**
  - ERP (Enterprise Resource Planning), CRM (Customer Relationship Management)
  - MIS (Management Information Systems), DSS (Decision Support Systems)
- 2. Business Communication:**
  - Email, Video Conferencing, Collaborative Tools (Slack, Microsoft Teams, Google Meet)
- 3. Automation in Business:**
  - Robotics Process Automation (RPA), AI in customer service (Chatbots, Virtual Assistants)
  - Cloud Computing: SaaS, PaaS, IaaS
- 4. Data Analytics and Business Intelligence:**
  - Importance of Data Analytics in Business
  - Tools: Microsoft Power BI, Tableau, Google Analytics
  - Data-driven Decision Making
- 5. Future Trends in Computing:**
  - Artificial Intelligence and Machine Learning in business
  - Blockchain Technology
  - Internet of Things (IoT)
  - Big Data and its applications

### **Key Tips for Study:**

- **Concept Understanding:** Focus on understanding the core concepts of computers and their application in business.
- **Practical Knowledge:** Learn about popular software and tools used in business contexts (e.g., Microsoft Office, Google Workspace, CRM software).
- **Current Trends:** Keep up with emerging technologies and their impact on business (e.g., AI, blockchain, and data analytics).

### **Suggestive Readings:**

- **"Computer Fundamentals"** by P.K. Sinha – A comprehensive guide on computer basics, covering hardware, software, and applications.
- **"Understanding Computers: Today and Tomorrow"** by Deborah Morley – Provides an overview of modern computing systems and technology trends.
- **"Introduction to Computers"** by Peter Norton – A well-known resource for beginners, focusing on computer hardware, software, and operating systems.
- **"Computers: Understanding Technology"** by Alan Evans, Kendall Martin, and Mary Anne Poatsy – A textbook that explains computer concepts in a user-friendly manner.
  
- **"Fundamentals of Computers"** by V. Rajaraman – A detailed guide that introduces computer systems, networks, and programming basics.

**SYLLABUS**  
**MBA-1<sup>st</sup> SEMESTER**  
**COURSE TITLE- DATA ANALYSIS**  
**SUBJECT CODE-MBA-108 B**

**Objectives of the Course** - The objectives of data analysis are to extract meaningful insights, identify patterns, and make informed decisions. It aims to improve forecasting, optimize processes, and support evidence-based decision-making, ultimately enhancing business efficiency and problem-solving.

Unit 1: Introduction to Data Analysis

- **Overview of Data Analysis**
  - Importance and scope of data analysis in different domains (business, healthcare, science, etc.)
  - Types of data: Quantitative vs. Qualitative data, Structured vs. Unstructured data
  - Data collection techniques and sources
- **Data Types and Variables**
  - Nominal, Ordinal, Interval, and Ratio data
  - Understanding continuous and discrete data
- **Descriptive Statistics**
  - Measures of central tendency: Mean, Median, Mode
  - Measures of dispersion: Range, Variance, Standard deviation
  - Data distribution: Frequency distributions, Histograms
- **Data Cleaning and Preprocessing**
  - Handling missing data
  - Identifying and dealing with outliers
  - Data normalization and standardization

Unit 2: Statistical Foundations for Data Analysis

- **Probability and Probability Distributions**
  - Basics of probability theory
  - Common probability distributions: Normal distribution, Binomial distribution, Poisson distribution
  - Central Limit Theorem
- **Sampling Techniques**
  - Types of sampling: Random, Stratified, Systematic, Convenience
  - Sampling error and biases
- **Hypothesis Testing**
  - Null and Alternative Hypotheses
  - Type I and Type II errors
  - p-values and significance levels
  - Common tests: t-tests, Chi-square tests, ANOVA
- **Confidence Intervals**
  - Understanding and calculating confidence intervals
  - Interpreting results in the context of data analysis
- **Regression Analysis**
  - Simple linear regression: Interpretation and assumptions

Unit 3: Advanced Data Analysis Techniques

- Multiple linear regression: Variables selection, Multicollinearity
- Model fitting and evaluation: R-squared, Adjusted R-squared, Residual analysis
- **Correlation Analysis**
  - Pearson correlation, Spearman's rank correlation
  - Understanding correlation vs causation
- **Time Series Analysis**
  - Components of time series data: Trend, Seasonality, Noise
  - Moving averages and smoothing techniques
  - ARIMA models (Autoregressive Integrated Moving Average)
- **Multivariate Analysis**
  - Principal Component Analysis (PCA)
  - Cluster analysis
  - Factor analysis

#### Unit 4: Data Visualization and Interpretation

- **Introduction to Data Visualization**
  - Importance of visualization in data analysis
  - Principles of effective data visualization
- **Charts and Graphs**
  - Bar charts, Line graphs, Histograms, Box plots
  - Scatter plots and heat maps
  - Pie charts and their limitations
- **Advanced Visualizations**
  - Interactive dashboards and data storytelling
  - Visualizing correlations and regression lines
  - Geographic Information Systems (GIS) and mapping data
- **Visualization Tools**
  - Introduction to visualization tools: Excel, Tableau, Power BI, R (ggplot2), Python (Matplotlib, Seaborn)
  - Best practices in data visualization

#### Unit 5: Tools and Applications for Data Analysis

- **Introduction to Data Analysis Tools**
  - Overview of statistical software and programming languages: Excel, R, Python
  - Setting up and using Python libraries for data analysis: NumPy, Pandas, SciPy, StatsModels
  - Using R for statistical analysis
- **Data Analytics Platforms and Big Data**
  - Introduction to big data technologies: Hadoop, Spark, NoSQL databases
  - Working with databases: SQL and NoSQL
  - Data pipelines and workflows
- **Machine Learning Basics (Optional, if included in syllabus)**
  - Supervised vs. Unsupervised learning
  - Introduction to regression, classification, and clustering
  - Evaluation metrics for machine learning models
- **Real-world Data Analysis Applications**
  - Case studies from different industries (e.g., business, finance, healthcare)
  - Problem-solving using data analysis tools and techniques

#### Additional Topics (Optional)

- **Ethical Considerations in Data Analysis**
  - Data privacy, security, and consent

- Ethical use of data and algorithms

**Suggested Readings:**

- "Data Science for Business" by Foster Provost
- "The Art of Data Science" by Roger D. Peng
- "Practical Data Science with R" by Nina Zumel & John Mount.

## SYLLABUS

### MBA-1<sup>st</sup> SEMESTER

### COURSE TITLE- STATISTICS, COMPUTATION AND APPLICATIONS

### SUBJECT CODE-MBA-108 C

**Objectives of the Course** - The objectives of statistics, computation, and application are to analyze data, model relationships, and solve real-world problems. It focuses on improving decision-making, forecasting trends, and optimizing processes using statistical techniques and computational tools across various fields like business, economics, and engineering.

#### Unit 1: Introduction to Statistics and Probability

- **Overview of Statistics**
  - Role of statistics in various fields (business, science, social science, healthcare, etc.)
  - Types of statistics: Descriptive vs. Inferential statistics
  - The importance of data in decision-making
- **Basic Probability Theory**
  - Basic concepts: Sample space, events, probability, conditional probability
  - Rules of probability: Addition and multiplication rules
  - Bayes' Theorem and its applications
- **Random Variables and Probability Distributions**
  - Discrete vs. continuous random variables
  - Common probability distributions: Binomial, Poisson, Uniform, Normal, Exponential, etc.
  - Probability mass functions (PMF) and probability density functions (PDF)
- **Descriptive Statistics**
  - Measures of central tendency: Mean, Median, Mode
  - Measures of spread: Range, Variance, Standard deviation, Interquartile range
  - Graphical methods: Histograms, Bar charts, Pie charts

#### Unit 2: Statistical Inference and Hypothesis Testing

- **Estimation and Confidence Intervals**
  - Point estimation and interval estimation
  - Confidence intervals for population mean, variance, proportion
  - Margin of error and sample size determination
- **Hypothesis Testing**
  - Formulation of null and alternative hypotheses
  - Type I and Type II errors, power of a test
  - p-values, significance levels, and decision-making
  - Common tests: t-tests, Chi-square test, Z-test, F-test
- **Analysis of Variance (ANOVA)**
  - One-way ANOVA for comparing multiple groups
  - Assumptions of ANOVA and post-hoc tests
  - Interpretation of F-statistic and p-values
- **Non-parametric Tests**
  - Wilcoxon signed-rank test, Mann-Whitney U test
  - Kruskal-Wallis test
  - Use cases for non-parametric tests

### Unit 3: Regression Analysis and Multivariate Techniques

- **Simple Linear Regression**
  - Regression line, least squares estimation
  - Model assumptions and diagnostics
  - Interpretation of coefficients, R-squared, residual analysis
- **Multiple Linear Regression**
  - Multiple predictors and multicollinearity
  - Model selection techniques: Forward, backward, and stepwise regression
  - Interaction effects and interpretation of results
- **Logistic Regression**
  - Binary logistic regression model and interpretation
  - Odds ratios, Likelihood Ratio Tests
  - Model evaluation metrics: ROC curve, AUC, confusion matrix
- **Multivariate Analysis**
  - Principal Component Analysis (PCA)
  - Factor Analysis
  - Cluster Analysis (K-means, Hierarchical Clustering)
  - Canonical Correlation Analysis (CCA)

### Unit 4: Computational Methods in Statistics

- **Introduction to Computational Statistics**
  - The role of computation in modern statistics
  - Overview of software tools for statistical analysis (R, Python, SAS, SPSS)
- **Simulation Methods**
  - Monte Carlo simulations
  - Bootstrap methods and resampling techniques
  - Markov Chain Monte Carlo (MCMC) methods
- **Optimization Techniques**
  - Numerical optimization methods: Gradient descent, Newton-Raphson, and others
  - Solving systems of equations computationally
  - Maximum likelihood estimation (MLE) and its computational implementation
- **Statistical Software: R and Python**
  - Introduction to R for statistical analysis: Data structures, plotting, statistical modeling
  - Python for statistics: Using libraries like NumPy, SciPy, Pandas, StatsModels
  - Writing efficient statistical code and automating analyses

### Unit 5: Applications of Statistics in Real-World Problems

- **Statistics in Business and Economics**
  - Market research, customer satisfaction surveys, and opinion polls
  - Time series analysis for forecasting sales, demand, and stock prices
  - A/B testing for experimental design and decision-making
- **Statistics in Healthcare and Medicine**
  - Clinical trials: Randomized control trials (RCTs) and observational studies
  - Epidemiological studies: Cohort studies, Case-control studies
  - Survival analysis (Kaplan-Meier estimator, Cox regression)
- **Data Science and Machine Learning Applications**
  - Data preprocessing: Feature selection, cleaning, and transformation
  - Supervised and unsupervised learning methods in statistics
  - Evaluating machine learning models: Cross-validation, bias-variance tradeoff
  - Applications in image recognition, text analysis, and recommender systems
- **Environmental Statistics**

- Statistical models in environmental monitoring (pollution levels, climate change)
  - Spatial statistics and geographic information systems (GIS)
  - **Statistical Applications in Social Sciences**
    - Surveys and sampling techniques in political science, sociology, and psychology
    - Structural Equation Modeling (SEM) and path analysis
- 

Additional Topics (Optional):

- **Ethical Considerations in Data and Statistics**
  - Data privacy, informed consent, and ethical use of statistical methods
  - Bias and fairness in statistical modeling
- **Advanced Statistical Techniques (Optional)**
  - Bayesian statistics and inference
  - Advanced time series models (GARCH, ARIMA with exogenous variables)
  - Neural networks and deep learning for statistical modeling
- **Project/Case Studies**
  - Hands-on application of statistical methods to solve real-world problems
  - Group or individual projects using datasets from various fields like business, healthcare, or social sciences

**Suggested Readings:**

- "Statistics for Business and Economics" by Paul Newbold
- "Applied Multivariate Statistical Analysis" by Richard A. Johnson
- "Introduction to Computational Statistics" by James E. Gentle.

## MBA 2 Semester

**Course Title:**Marketing Management

**Course Code:** MBA-201

L	T	P	C.U.
35	5	0	3

**Programme& Semester:** MBA II

**Course Description:** The main objective of this course is to acquaint the students with the principles and practices of marketing. Marketing management course enables students to understand the fundamental of marketing concept and role marketing plays in business. . It will enable the student to understand the marketing mix elements and strategies and principles underlying the modern marketing practices.

**Course Objectives:** The objective of the course is to help the students to gain understanding of the functions and responsibilities of the marketing manager, provide them tools and techniques to perform the marketing function smoothly in an organization.

**Course Outcomes (COs):** At the end of this course students will be able to:

CO1: Understand strong conceptual knowledge in the functional area of marketing management.

CO2: Develop marketing strategies based on segmentation, target marketing and positioning by examining consumer behavior.

CO3: Evaluate the relevance of marketing concepts impact on environmental change while designing marketing plans, strategies and practices.

CO4: Understand the product life cycle, product mix and branding

CO5: Explain factors influencing pricing decisions.

### **Course Contents:**

**Unit 1: a) Marketing Concept** - Marketing management; Nature and scope; Evolution of marketing; Selling vs marketing; Emerging role of marketing; Marketing mix.

**b) Marketing Environment** - Concept; Need for study; Major elements and their impact on marketing decisions.

**Unit 2: a) Consumer Behaviour** - Consumer vs. organisational/ industrial buyer; Their characteristics; Importance of understanding consumer behaviour; Determinants of consumer behaviour; Theories of consumer behaviour; Various buying roles in family; Types of buying behaviour; Consumer decision-making process in buying.

**b) Market Segmentation** - Nature and importance of segmentation; Pre-requisites for effective segmentation; Bases of segmenting consumer markets; Market selection strategies; Positioning.

### **Unit 3: Product Decisions**

Concept of product; Classification of products; Product line and Product mix; Branding, packaging, and labeling; Customer services; Development of new product; Product Life-cycle; The new product (Consumer); Adoption process.

**Unit 4: a) Price Decisions** - Pricing as a marketing variable-its role and importance; Price vs. non-price competition; Factors influencing price determination; Price setting in practice; Price policies and strategies.

**b) Distribution Channels and Physical Distribution Decisions** - Why are marketing intermediaries used? Marketing channel functions; Selecting channels of distribution; Determining the intensity of distribution; Channel management decisions-selection, motivation and evaluation of individual middlemen; Manufacturer-distribution relationship; Retailing and wholesaling; Logistics of distribution.

**Unit 5: a) Promotion Decisions** - Nature; Objectives and importance of promotion; Communication process; Promotion mix and methods; Advertising; Personal Selling; Public Relations; and Sales Promotion.

**b) Legal, Ethical, and Social Aspects of Marketing** - Consumerism; Consumer protection measures in India; Recent developments in consumer protection in India.

**Suggested Readings:**

1. Philip Kotler, • Levin Lane Keller, Abraham Koshy, and MithleshwarJha, *Marketing Management: South Asian Perspective*, 13<sup>th</sup> ed., Pearson Education, New Delhi, 2012
2. Michale J. Etzel, Bruce J. Walker, William J. Stanton, and Ajay Pandit, *Marketing: Indian Adaptation*, 14<sup>th</sup> ed., Tata McGraw-Hill, New Delhi, 2009
3. E. Jerome McCarthy and William B. Perrealet, *Basic Marketing: A Managerial Approach*, 15<sup>th</sup> ed., Tata McGraw-Hill, New Delhi, 2009
4. Philip Kotler and Gary Armstrong, *Principle of Marketing*, 14<sup>th</sup> ed., Prentice-Hall of India, New Delhi, 2014
5. *The Consumer Protection Act, 1986*

**Course Title:**Financial Management

**Course Code:** MBA-202

L	T	P	C.U.
35	5	0	3

**Programme& Semester:** MBA II

**Objectives of the Course:** This course seeks to help the students in developing their skills for financial decision-making.

**Course Outcome:** On completion of this course, the students will be able to:

- CO1 Understand the concept of time value of Money
- CO2 To evaluate the various projects by different methods.
- CO3 Understand and compare the theories of dividend policy
- CO4 To analyse and evaluate the various available financing options.
- CO5 Identify the major sources of short-term financing available to the firm

### **Course Contents**

#### **Unit 1: Introduction to Financial Management**

Nature, scope, and objectives of financial management; Time-value of money; Concept of risk and return; Valuation of securities: Bonds and Equities; Functions of Finance Management in modern age.

#### **Unit 2: Long-term Investment Decisions**

Concept and Principles of Capital Budgeting; Methods of capital Budgeting: Payback Method, Accounting Rate of Return, Net Present Value (NPV), Net Terminal Value, Internal Rate of Return (IRR), Profitability Index; Capital budgeting under risk; Certainty-Equivalent Approach and Risk-adjusted Discount Rate

#### **Unit 3 : Working Capital Management**

Concept of working capital; Planning for working capital, The risk-return trade-off; Management of cash and near-cash assets; Payables management; Management of accounts receivable; Inventory management; Sources, of short-term finance.

#### **Unit 4 : Long-term Financing Decisions and Cost of Capital**

Capitalisation; Capital structure; Factors affecting the pattern of capital structure; Basic assumptions and theory of capital structure; Estimation of components of cost of capital; Equity capital and external and internal retained earnings; Debt and preference capital; Weighted-Average Cost of Capital (WACC) and marginal cost of capital; Sources of long-term financing: Capital structure; Operating and financial leverage; Determinants of capital structure; Corporate securities.

#### **Unit 5 : Dividend Decisions**

Concept of dividend; Significance of dividend decision in business; Forms of dividend; Factors affecting dividend policy; Dividend policy theories: Walter's Model; Modigliani-Miller approach; Gordon's Model; Dividend policy in practice.

#### **Suggested Readings:**

1. James C Van home, Financial Management and Policy, 13th ed., Prentice-Hall of India, New Delhi
2. I.M. Pandey, Financial Management, Vikas Publication, 11 ed., 2015
3. M.Y. Khan and P.K. Jain, Financial Management, Tata McGraw-Hill, 7th ed., 2014
4. V. Sharan, Essentials of Financial Management, Prentice-Hall of India, New Delhi, 6<sup>th</sup> ed., 2010
5. Van Horne and Wachowicz, Jr., Fundamentals of Financial Management, 13th ed., 2015  
Prentice-Hall of India,
6. Eugene F. Brigham and Joel F. Houston, Fundamentals of Financial Management, concise 9<sup>th</sup> ed. (Indian Edition), Thomson South-western (now Cengage Learning), New Delhi, 2016

## Syllabus

**Course Title:** Human Resource Management

**Course Code:** MBA-203

L	T	P	C.U.
35	5	0	3

**Programme & Semester:** MBA II

**Course Objective:** In this course the students will learn the basic concepts and frameworks of Human Resource Management (HRM) and understand the role that HRM has to play in effective business administration. It will provide an insight as how to use Human Resource as a tool to implement strategies.

### Course Outcomes (CO)

After completion of this course, the student will be able:

CO1: To State the basic concept of Human Resource Management and role played by HR Manager.

CO2: To explain the key issues related to administering the human elements such as recruitment, selection, motivation, placement, compensation, appraisal, career planning, diversity, ethics, and training.

CO3: To schedule appropriate implementation, monitoring and assessment procedures of training.

CO4: To interpret the significance of employee compensation benefits to both employers and employees.

CO5: To value the concept of performance management and outline its role in contemporary organizations.

### Course Contents

#### Unit 1: Introduction to Human Resource Management

(a) Evolution of FIRM (b) Objectives and functions of HRM (c) Role and responsibilities of HR manager (d) Relevance of HRM (e) Systems approach to HRM.

#### Unit 2: Acquisition of Human Resource Management

(a) Human Resource Planning: Purpose and process (b) Recruitment and Selection: Sources of Recruitment, Stages in Selection Process (c) Placement, goals analysis: Job description and job specification.

#### Unit 3: Developing Human Resources

(a) Training and Development: Training needs, training methods, application of computers in training, developing effective training programs (b) Concept of HRD (c) Management development programs.

#### Unit 4: Performance Appraisal

(a) Concept and objectives of performance appraisal (b) Process of performance appraisal (c) Criteria for performance appraisal (d) Benefits of performance appraisal (d) Limitations and constraints (f) 360-degree performance appraisal (g) Promotion-degree, transfer and separation: Promotion, purpose, principles and types; Transfer: Reasons, principles and types; Separation: Lay-off, resignation, dismissal, retrenchment, voluntary, retirement scheme.

#### Unit 5: Motivating Human Resources

(a) Motivation at Work, Major Motivation Theory: An Overview (b) Participative Management (c) Compensation Management, Major Elements of Compensation Management (d) Incentives: Concepts, types of incentives; Incentives schemes in Indian industries; Fringe benefits (e) Discipline and employees' grievance redressal.

**Course Title:** Production & Operations Management

**Course Code:** MBA-204

L	T	P	C.U.
35	5	0	3

**Programme & Semester:** MBA II

**Course Description:** The course description is to make the students examines the functional area of production and operations management as practiced in the manufacturing industry. The course includes decision-making, capacity planning, aggregate planning, forecasting, and inventory management, distribution planning, materials requirements planning (MRP), project management and quality control. The course will demonstrate awareness and an appreciation of the importance of the operations and supply management to the sustainability of an enterprise.

**Course Objectives:** The objective of the course is to help the students to introduce major concepts and tools used in the design and use of operations systems in organizations. It introduces the discipline and the role the function plays in a value-creating organization. Emphasis is given both to familiarization of various production processes and service systems, and to quantitative analysis of problems/ issues arising in the management of operations.

**Course Outcomes (COs):** At the end of this course students will be able to:

CO1- Identify the role of Operations in overall Business Strategy of the industry.

CO2- Discuss the application of operations management policies and techniques to the service sector as well as manufacturing firms.

CO3- Evaluate the vital factors and their interdependence of these factors in the design of effective operations system.

CO4- Classify the trends and challenges of Operations Management in the current business scenario.

CO5- Explain the students with the tools and techniques for effective utilization of operational resources and managing the processes to produce good quality products and services at competitive prices.

**Course Contents:**

**Unit 1 : Introduction to Production and Operations Management (P&OM)**

Nature, Objectives and Scope of P&OM (b) Evolution of P&OM (c) Transformation System (d) Functions and Responsibilities of Operations Manager (e) Difference between Goods and Services (f) New product development

**Unit 2 : Facilities Management**

(a) Types of Processes (b) Process Selection (c) Importance of Facilities Location (d) Factors Affecting Facilities Location (e) Location Evaluation (f) Facility's Layout: Criteria for Good Layout, Benefits of good layout, Symptoms of Poor Layout, Types of Facility's Layout, Layout planning

**Unit 3 : Production Planning**

(a) Introduction to Production Planning (b) Production Planning Strategies (c) Introduction to Capacity Planning (d) Aggregate Planning (e) Master Production Scheduling (f) Material Requirement Planning (g) Production Scheduling

**Unit 4 : Production Control**

(a) Elements of Production Control (b) Purchase Process (c) Receiving (d) Inventory Management: Graphical, Tabular and EOQ Models of Inventory Control; Economic Production Lot Size (EPLS) (e) Just-In-Time Inventory (f) Selective Control Tools of Inventory.

**Unit 5 :**

**a) Quality Management:** Concepts of Total Quality Management (TQM)

**b) Tools for Lean and Six Sigma:** Value stream map; 7 wastes; Pure and replenishment types; Standardized work; Total Productivity Management (TPM); Just-in-time (JIT)

**Suggested Readings:**

1. Chase, Jacob, Aquilano, and Agarwal, Production and Operations Management, 13<sup>th</sup>ed. (TMH, New Delhi), 2009
2. Lee J. Krajwski, Operations Management: Strategy and Analysis, 6<sup>th</sup> ed., Pearson Education, N. Delhi
3. Jeffery K. Liver, Toyota Production Way
4. Adam Ebert, Production and Operations Management, 6<sup>th</sup> ed., Pearson Education, N. Delhi
5. S.N. Chary, Production and Operations Management, TMH, New Delhi, 5<sup>th</sup> edition
6. William J. Stevenson, Operations Management, 13<sup>th</sup> ed., 2017, McGraw-Hill, New Delhi
7. Muhlemann, Oakland, Lockyer, Sudhir, and Katyayani, Production and Operations Management, 6<sup>th</sup> ed., Pearson Education, 2007
8. Elwoods S. Buffa and Rakesh K. Sarin, Modern Production/ Operations Management, 8<sup>th</sup> ed., Wiley Student Edition, 2009
9. Joseph S. Martinich, Production and Operations Management, 10<sup>th</sup> Reprint, Tata McGraw-Hill, New Delhi/Nbida, 2005
10. Norman Gaither, Operations Management, Cengage Learning
11. Ritzman, et al., Operations Management, Pearson, 11<sup>th</sup>ed.

**Course Title:** Research Methodology

L	T	P	C.U.
30	5	5	3

**Course Code:**MBA-205

**Programme& Semester:** MBA II

**Pre-requisite:** Statistics for Management

**Course Description:** Research methodology is a systematic approach to solve the research problem. We study various steps that are generally adopted by the researcher in studying his research problem along with logic behind them. The syllabus of research methodology includes five units; unit one is concept of research which includes an overview of research and research methodology, defining a research problem and research proposal. Unit 2 includes various research design and their characteristics. Unit 3 includes various Scaling & Measurement Techniques; in unit-4 Sampling Design & Collection of Data are included and Unit-5 includes Data Analysis, Hypothesis Testing & Report Writing.

The Andragogy in this subject includes power point presentations, case studies, assignments, class test, quiz, mini project etc.

**Course Objectives:** The course is designed to develop a research orientation among the students and make the students aware with the different research methods and techniques and to develop understanding the practical application of various research techniques.

**Course Outcomes (COs):** At the end of this course students will be able to:

CO 1: Explain the basic framework of research process involved in research.

CO 2: Construct the research proposal related to business or management problems.

CO 4: Design the questionnaire related to primary data collection method.

CO 5: Operate the concept of statistical analysis which includes various tests like t-test, F Test, Z test.

CO 6: Identify the mechanism and techniques of report writing.

**Course Contents:**

**Unit 1 Concept of Research:** Definition, Importance & Objectives of Research, Types of Research, Concept of Research Methodology, Research Problems: Problems encountered by researchers in India, Precautions to be taken while selecting the Research Problem, Research Process: Steps involved in Research Process, Research Proposal – Elements of a Research Proposal and Drafting a Research Proposal

**Unit 2 Research design:** Concept, Features of a good research design, Exploratory Research Design: Concept, Types: Literature Research, Experience Survey and Case study Method

Descriptive Research Designs: Concept & Types: Cross-sectional and Longitudinal Research

Experimental Design: Concept of Causal relationships, Important experimental designs: Informal experimental designs and Formal experimental designs.

**Unit 3 Scaling & Measurement Techniques:** Concept of Measurement: Need of Measurement; Levels of measurement: Nominal, Ordinal, Interval, Ratio. Attitude Scaling Techniques: Concept & Applications of Scales: Rating Scales viz. Likert Scales, Semantic Differential Scales, Constant Sum Scales, Graphic Rating Scales, Ranking Scales, Paired comparison.

**Unit 4 Sampling Design & Collection of Data:** Sampling Design Concepts: Defining the Universe, Concepts of Statistical Population, Sample, Procedure in sampling design, Sample Size, Factor affecting sample size, Sampling errors and Non Sampling errors

Probability Sampling: Simple Random Sampling, Systematic Sampling, Stratified Random Sampling, Area Sampling & Cluster Sampling.

Non Probability Sampling: Judgment Sampling, Convenience Sampling, Purposive Sampling, Quota Sampling & Snowballing Sampling methods.

Secondary and Primary Sources of data, Methods of Data Collection: Observation, Interview, Questionnaire and Schedule Method and Preparation of Questionnaire.

**Unit 5 Hypothesis Testing & Report Writing:** Test of Significance: Small sample tests: t (Mean, proportion) and F tests, Z test

Mechanism of Report Writing: Layout of the research report, Steps involved in research report writing, Precautions while writing research report, Citation of References.

**Text Book:**

1. Cooper D.R., Schindler P.S. (2013). *Business Research Methods*, 11th Ed., TMGH, New Delhi.

**Reference Readings:**

1. Collis J and Hussy R. (2009). *Business Research*, 3<sup>rd</sup> ed., Palgrave.

2. Emma B., Alan B. and Bill H. (2018). *Business Research Methods*, 5th ed., Oxford University Press.

3. Beri G.C. (2013). *Marketing Research*, 5th ed., Mc Graw Hill.

4. Saunders M., Lewis P., Thronhill A. (2012). *Research Methods for Business Students*, 6th ed., Pearson Education

5. Kothari C.R. (2011). *Research Methodology*, 2nd ed. (Revised), New Age International Publication.

## SYLLABUS

### MBA-2 Semester

#### Course Title: PUBLICATION ETICHS

#### COURSE CODE- 205 A

**Objectives of the Course** - The objectives of publication ethics are to ensure integrity, transparency, and accountability in the publishing process. It aims to prevent plagiarism, data manipulation, and authorship disputes. Publication ethics promotes the dissemination of reliable, accurate research while upholding fairness, confidentiality, and respect for intellectual property in academic publishing.

#### Unit 1: Introduction to Publication Ethics

- **Overview of Publication Ethics**
  - Definition of Publication Ethics.
  - Importance of ethical standards in academic publishing.
  - Role of ethical practices in maintaining credibility and integrity in research.
- **Common Ethical Issues in Publishing**
  - Plagiarism: Copying others' work without proper attribution.
  - Fabrication and falsification: Misleading data, results, or references.
  - Authorship ethics: Who should be credited and the criteria for authorship.
  - Duplicate publication: Publishing the same work in more than one journal without disclosure.
- **Ethical Responsibilities of Authors**
  - Originality of content.
  - Accurate representation of research findings.
  - Acknowledging the contributions of others.

#### Unit 2: Research Ethics and Data Integrity

- **Research Ethics in Publishing**
  - Ethical considerations in conducting research.
  - Protecting participant confidentiality and privacy in business studies.
  - Consent and transparency in research involving human subjects.
- **Data Integrity**
  - Importance of accurate data collection and reporting.
  - Ethical issues related to data manipulation or misrepresentation.
  - Importance of data sharing and open access.
  - Tools and techniques for verifying data authenticity.
- **Reporting Results Responsibly**
  - Ensuring transparency in results.
  - Ethical reporting of negative results and failures.
  - Reproducibility of research findings.

#### Unit 3: Peer Review Process and Ethical Considerations

- **Role of Peer Review in Academic Publishing**
  - The peer review process: Definition, steps, and benefits.
  - Types of peer review: Single-blind, double-blind, open review.
  - How the peer review process ensures the quality of published work.
- **Ethical Challenges in Peer Review**

- Conflicts of interest: Managing bias and objectivity.
- Reviewer misconduct: Plagiarism, inappropriate suggestions, or unethical behavior.
- Ethics of accepting or rejecting articles for review.
- **Responsibility of Editors and Reviewers**
  - Editor's role in maintaining publication integrity.
  - Ethical expectations for reviewers: Constructive feedback, confidentiality, and fairness.

#### Unit 4: Copyright, Intellectual Property, and Legal Issues

- **Understanding Copyright in Academic Publishing**
  - Definition of copyright and its role in protecting academic work.
  - How authors, editors, and publishers handle copyright issues.
  - Licensing models: Creative Commons, open access, etc.
- **Intellectual Property Rights (IPR) in Publishing**
  - Importance of intellectual property protection in research and publications.
  - Ethical implications of intellectual property theft.
  - Differences between plagiarism and legitimate use of intellectual property.
- **Legal Issues in Academic Publishing**
  - Overview of legal frameworks governing academic publishing.
  - Copyright infringement and its legal consequences.
  - How to legally cite and reference intellectual property.

#### Unit 5: Ethical Publishing Practices and Consequences of Misconduct

- **Best Practices for Ethical Publishing**
  - Writing transparent, honest, and properly cited academic papers.
  - Collaboration and authorship ethics in multi-author publications.
  - Use of ethical journals and platforms for publishing.
- **Consequences of Research Misconduct**
  - Institutional and legal consequences of academic dishonesty.
  - Impact on the reputation of authors, institutions, and publishers.
  - Case studies of well-known ethical violations in academic publishing (e.g., retracted papers, scandal cases).
- **Promoting Ethical Publishing in Business Research**
  - Role of universities and business schools in promoting ethical research.
  - Educating students and researchers on ethical publishing standards.
  - Developing a culture of ethical scholarship in business education.

#### Reference Readings:

- **"Publication Ethics: A Handbook for Journalists and Authors"** by L. J. Kaltwasser – A practical guide to understanding ethical practices in academic publishing.
- **"Publication Ethics and Social Responsibility: A Handbook for Academic Writers"** by Elizabeth Wager – Offers insights on maintaining ethical standards during the publishing process.

**Course Title:**Business Environment

**Course Code:** MBA-206

L	T	P	C.U.
35	5	0	3

**Programme& Semester:** MBA II

**Course Objectives:** The course is designed to enable the students to learn the concepts of economic environment of business, changes in policies and latest developments in India and abroad. The students will be able to analyse the overall business environment and evaluate its various components in business decision making. The course will be providing the concept of contemporary ethical issues and challenges existing throughout the professional business arena. Emphasis will be placed upon the manager's social and environmental responsibilities to a wide variety of stakeholders, including employees, customers and the public.

**Course Outcomes:** At the end of the course, students will be able to:

CO1: Understand the relationship between environment and business, and its components;

CO2: Understand the economic, socio-cultural and technological environment;

CO3: Explain the economic policies, legislation and economic reforms laid by the government;

CO4: Demonstrate and develop conceptual framework of business environment in international business.

### **Course Content**

#### **Unit 1: Introduction**

Concept, significance and nature of Business Environment, types of business environment, components of business environment, Interaction between internal and external environments, Nature and structure of Economy, Techniques for business environmental analysis, Approaches and Significance of Environmental Forecasting

#### **Unit 2: Economic Environment**

History of Economic Systems, Market, Planned and Mixed Economy, Planning in India: Emergence and Objective; Planning Monetary Policy, Fiscal Policy. Union Budget as instrument of growth and its Impact on Business, Industrial Policy: Meaning Objective and Recent Developments in New Economic Policy and its Impact on Business.

#### **Unit 3: Politico-Legal Environment**

Relationship between Business and Government, Economic, Planning, Regulatory, Promotional and Entrepreneurial Roles of Government, Constitutional provisions affecting Business. An overview of major laws affecting business, Consumer protection Act 2019, Social Responsibility of Business

**Unit 4:a):** Factors Influencing Technological Environment, Role and Impact of Technology on Business. Transfer of Technology - Channels, Methods and Limitations.

**b) Demographic and Socio-cultural Environment:** Population size, falling birth rate, Changing age structure and its impact on business, Business and Society, Business and Culture, Culture and Organisational Behaviour.

#### **Unit 5:**

**WTO:** Salient features and Current Developments; Globalisation: Meaning and dimensions, Features of Current Globalisation, Stages of Globalisation, Multinational Corporation (MNCs) and Transnational Corporations (TNCs), Disinvestments of PSUs, Foreign Direct Investments (FDI) and Regulation of Foreign Trade.

#### **Suggested Readings:**

## SYLLABUS

### MBA-2<sup>nd</sup> SEMESTER

#### COURSE TITLE: NUTRITION AND WELL BEING

#### COURSE CODE: MBA-206-A

**Objectives of the Course** - The objectives of nutrition and well-being are to promote balanced diets, improve physical health, and enhance mental well-being. It aims to prevent nutrition-related diseases, encourage healthy lifestyle choices, and educate individuals on the importance of proper nutrition for maintaining energy, vitality, and overall quality of life.

#### **Unit 1: Introduction to Nutrition:**

10 Hours

Definition and scope of nutrition, Macronutrients and micronutrients their functions and sources. Overview of the digestive system, Digestion and absorption of nutrients, Age-specific nutritional needs (infants, children, adults, and elderly)

#### **Unit 2: Dietary Guidelines and Eating Patterns:**

10 Hours

Overview of global dietary guidelines (e.g., MyPlate, Food Pyramid, Mediterranean diet), Key principles for healthy eating, Portion control and balanced meals, Plant-based diets, intermittent fasting, ketogenic diets, and their health impacts, Strategies for planning nutritious meals, Cooking methods that preserve nutrients and reduce fat.

#### **Unit 3: Nutrition and Lifestyle Diseases:**

10 Hours

Causes and health risks of obesity, Effective weight loss strategies (caloric deficit, exercise, behavioral changes), Role of exercise and physical activity in weight management, Nutrition and heart disease prevention (impact of fats, cholesterol, sodium, and fiber), Relationship between diet and type 2 diabetes.

#### **Unit 4: Nutrition for Optimal Well-Being:**

10 Hours

Nutrients that affect mood, cognition, and mental health (e.g., Omega-3s, B vitamins), The role of diet in stress management and mental well-being, Nutrition for athletes and physical performance, The impact of food choices on the environment, Sustainable diets and their role in promoting global health.

**SYLLABUS**  
**MBA-2<sup>nd</sup> SEMESTER**  
**COURSE TITLE- DISASTER MANAGEMENT**  
**SUBJECT CODE-MBA-206-B**

**Objective of the Course**

1. To provide basic conceptual understanding of disasters.
2. To understand approaches of Disaster Management
3. To build skills to respond to disaster

**Unit: I -Definition and types of disaster**

Hazards and Disasters, Risk and Vulnerability in Disasters, Natural and Man-made disasters, earthquakes, floods drought, landside, land subsidence, cyclones, volcanoes, tsunami, avalanches, global climate extremes. Man-made disasters: Terrorism, gas and radiations leaks, toxic waste disposal, oil spills, forest fires.

**Unit: II Study of Important disasters**

Earthquakes and its types, magnitude and intensity, seismic zones of India, major fault systems of India plate, flood types and its management, drought types and its management, landside and its managements case studies of disasters in Sikkim (e.g Earthquakes, Landside). Social Economics and Environmental impact of disasters.

**Unit: III Mitigation and Management techniques of Disaster**

Basic principles of disasters management, Disaster Management cycle, Disaster management policy, National and State Bodies for Disaster Management, Early Warning Systems, Building design and construction in highly seismic zones, retrofitting of buildings.

**Unit IV Training, awareness program and project on disaster management**

Training and drills for disaster preparedness, Awareness generation program, Usages of GIS and Remote sensing techniques in disaster management, Mini project on disaster risk assessment and preparedness for disasters with reference to disasters in Sikkim and its surrounding areas.

**Text Books:**

1. Disaster Management Guidelines, GOI-UND Disaster Risk Program (2009-2012)

**Course Title:** Supply Chain Management

L	T	P	C.U.
32	5	3	3

**Course Code:**MBA-303

**Programme& Semester:** MBA III

**Pre-requisite:** Production & Operations Management

### **Objective of the Course**

The objective of the course is to familiarize the students with the mechanism of supply chain planning, design, and operations in the firms. This will help to manage Facilities, inventory, transportation, and information the key drivers of supply chain management

**Course Outcomes:**At the end of the course, students will be able to:

CO1: To explain the concept of supply chain management and logistics management.

CO2: To describe performance measurement and control tools.

CO3: To interpret the E business framework related to supply chain management.

### **Course Contents:**

#### **Unit 1 : Introduction to Supply Chain Management (SCM)**

(a) Basic Concepts, Scope And Philosophy Of Supply Chain Management, (b) Importance Of Supply Chain Management, (c) Supply Chain Decision, (d) Evolution Of Supply Chain Management.

#### **Unit 2 : Designing the Supply Chain**

(a) Role Of Distribution In Supply Chain, (b) Factors Influencing Distribution Network, (c) Process Of Supply Network Design, (d) Distribution Strategy, (e) Models For Facilities Location And Capacity Allocation, (f) Impact Of Uncertainty )01n Supply Chain Design, (g) Evaluation Of Supply Chain Design, (h) Demand Chain Management, (i) Strategic Alliances.

#### **Unit 3 : Performance Measurement and Control**

(a) Concept, Dimensions Of Performance Measurement, (b)Tools For Performance Improvement: Benchmarking: Introduction, Forms Of Benchmarking, GAP Analysis, Benchmarking Study Report; (c)Achieving Strategic Integration, (d)Supply Chain Operations Reference (SCOR) Modeling, SCOR Analysis, (e)Value Chain, (f) Concept Of Configurability, (g)Evaluation Of Supply Chain Performance (Supply Chain Cost Analysis), (h)Impediments To Improved Performance.

#### **Unit 4 : Logistics Management**

(a) Concept of LOGistics, Inbound And Outbound Logistics, (b) Key Activities of Logistics, (c) Managing The Costs Of Logistics, (d)Application Of Logistics Management, (e)Trade-Offs In Logistics Management, (f)Bull-Whip Effect In Logistics, (g)Third And Fourth Party Logistics, (h)Emergence Of IT In Logistics, (i) International Issues In Logistics, (j)Warehousing, Types Of Warehouses, Site Selection, Layout And Design Of Warehouses.

#### **Unit 5 : Emerging Trends in Supply Chain Management**

(a) Role Of Information Technology (IT) In Supply Chain Management: Electronic Data Interchange (EDI), E-Customer Relationship Management, Use Of Data Mining Tools, E-Business Framework, (b) Customer Profitability Analysis (CPA), (c) International Issues In Supply Chain Management.

### **Suggested Readings:**

## SEMESTER IV

**Course Title:** Entrepreneurship Development

L	T	P	C.U.
32	5	3	3

**Course Code:**MBA-401

**Programme& Semester:** MBA IV

**Pre-requisite:** HRM

**Course Objectives:** The basic objective of course is to provide students with skills, knowledge, and networks needed to become entrepreneurs and innovators. This course also helps the students to involve participation in group work from diverse backgrounds. The course aims to acquaint the students with challenges of starting new ventures and enable them to investigate, understand and internalize the process of setting up a business.

**Course Outcomes:**

CO1: Explain the meaning and significance of entrepreneurship and understand the process of entrepreneurial action

CO2: To discuss the Theories of Entrepreneurship and analyze global impact of Entrepreneurship

CO3: To demonstrate & design the business plan.

CO4: To evaluate the financial schemes offered by various financial institutions, like Commercial Banks, IDBI, ICICI, SIDBI, SFCs.

CO5: To discuss and employ role of Central Government and State Government in promoting entrepreneurship with various incentives, subsidies, grants, etc.

### **Course Contents**

Unit 1 : Foundations of Entrepreneurship Development

Concept and need of entrepreneurship; Definition of entrepreneur, entrepreneurship, innovation, invention, creativity, business idea; Entrepreneurship as a career; Entrepreneurship as a style of management; The changing role of the entrepreneur; Entrepreneurial traits.

Unit 2 : Theories of Entrepreneurship

Influences on entrepreneurship development; External influences on entrepreneurship development; Socio-cultural, political, economical, personal entrepreneurial success and failure: reasons and remedies; Women entrepreneurs; Challenge to women entrepreneurs; achievements of women entrepreneurs.

Unit 3 : Business Planning Process

The business plan as an entrepreneurial tool; Elements of businessman; Objectives; Market analysis; Development of product/idea; Marketing, finance, organization and management; Ownership; Critical risk contingencies of the proposal; Scheduling and milestones

Unit 4 : Project Management

Technical, financial, marketing personnel, and management feasibility reports; Financial schemes offered by various financial institution, like Commercial Banks, IDBI, ICICI, SIDBI, SFCs.

## Unit 5 : Entrepreneurship Development and Government

Role of Central Government and State Government in promoting entrepreneurship with various incentives, subsidies, grants, etc

**Course Title:** E- Business

L	T	P	C.U.
30	5	5	3

**Course Code:**MBA-403

**Programme& Semester:** MBA IV

**Pre-requisite:** Nil

**Course Objectives:**

The primary objective of this course is to introduce concepts, tools and approaches to electronic business to the post-graduate students. Further the subject will help the students to develop skills to manage business in the digital world.

**Course Outcomes:** On successful completion of this module students should be able to:

CO1: Understand the E-Commerce and E- business infrastructure and trends

CO2: Analyze different types of portal technologies and deployment methodologies commonly used in the industry.

CO3: Analyze the effectiveness of network computing and cloud computing policies in a multi- location organization.

CO4: Analyze real business cases regarding their e-business strategies and transformation processes and choices.

CO5: Integrate theoretical frameworks with business strategies.

**Unit I**

**(8 Sessions)**

Introduction to E-Business: Overview of E-Business; Information Services; Interpersonal Communication; Shopping Services; Virtual Enterprises

E-Commerce: Origin and Need of E-Commerce; Factors affecting E-Commerce; Business dimension and technological dimension of E-Commerce; E-Commerce frame work; Internet as an E-Commerce enabler handling business transactions;

Handling payments: Electronic Fund Transfer System, Digital Token an notational based electronic payment system, smart card, credit card and emerging financial instruments

**Unit II**

**(8 Sessions)**

B2B E-Commerce: B2B E-Commerce models: supply oriented, buyer oriented, intermediary oriented; Just-in-time for B2B commerce

Mobile Commerce: Introduction to mobile commerce; Frame required for mobile computing; Challenges emerging in mobile commerce security considerations

**Unit III**

**(8 Sessions)**

E-Commerce and Banking: changing dynamics in banking industry; Home banking and its implementation; Management issues in on-line banking

E-Commerce and retailing: On-line retail industry dynamics; On-line mercantile models from customer perspective; Management challenges in on-line retailing

**Unit IV**

**(8 Sessions)**

E-Commerce and on-line publishing: On-line publishing approach from customer prospective; Supply chain management fundamentals; Intranets and Supply Chain Management; Managing retail supply chains, Supply chain Application Software

EDI: EDI application in business development; EDI technology; EDI as a re-engineering tool; Financial EDI

**Unit V**

**(8 Sessions)**

Indian Perspective: Benefits of E-Commerce; Drawbacks and limitations of E-Commerce; Major requirements in E-Business; Emerging trends and technologies in E-Business; From E-Commerce to E-Business, Web security: Introduction; Firewalls and transaction security.

**Suggested Readings**

**Course Title:** Marketing of Non Profit Organisations

L	T	P	C.U.
30	5	5	3

**Course Code:**MBA-3MK2

**Programme& Semester:** MBA III

**Course Objective:** This course examines the marketing principles of mission-driven organizations, specifically nonprofits and government agencies. Marketing is one tool available to managers to improve organizational performance and encourage effective communication to stakeholders. However, public and nonprofit marketers face unique marketing challenges—from deficient resources for adequately addressing marketing needs to a general lack of understanding of the power of marketing. The course will address these and other challenges of nonprofit and public sector marketers, providing students with an introduction to marketing theory. It will also equip students with practical experience in developing a strategic marketing plan, influencing the attitudes and behaviors of diverse stakeholders, leveraging social media and other emerging technologies, and other skills relevant to nonprofit and public sector marketers.

**Course Outcome:** After completion of this course, students will be able to:

CO1. Understand the use of marketing concepts, theories and practices as applied to non-profit organizations.

CO2. Work with local nonprofit organizations to provide volunteer support and to conduct marketing plans that will aid the organizations in accomplishing their missions and obtaining their objectives.

CO3. Apply their knowledge of marketing by utilizing planning and implementation tools to improve organizational performance

**Course Contents:**

Unit1: Introduction and Overview of Non-Profit Organizations, Objectives of Non-Profit Organizations. Economic and legal framework of the nonprofit sector. Social entrepreneurship and basic concepts of social economy and third sector. Introduction to the concept of social entrepreneurship and its place in the third sector (NGOs) and social economy. Non-profits' role in the three-sector economy, Incentives and control in the nonprofit organizations. Competition for and management of the nonprofit workforce, Nonprofit organizations and market competition, Redistribution, welfare policy, and charitable organizations.

Unit 2: Factors of success for nonprofit organizations and social enterprises, The entrepreneurial team. Leadership, motivation and team management, Social Innovation, Communicative skills, Partnerships, networks and joint ventures, Examples of social enterprises of success and failure in India.

Unit 3: Social needs and business opportunities, The concept of social need. Social needs as the foundation of business opportunities, The analysis of needs and generating solutions, Social Impact. The measurement of social impact. Indicators to measure impact: quantitative and qualitative. Measuring Tools (SROI, IRIS).

Unit 4: Social Business Model: The social need as the basis for developing a sustainable business model and positive social impact. The ecosystem of nonprofits and social entrepreneurship in India and Europe. Main challenges of social entrepreneurship in India and Europe. Funding instruments and project selection criteria. Alternative financing instruments for social entrepreneurship projects, Public funding through grants, the role of banks, business angels and venture capital, and the negotiation process with investors, and the new social investment industry, such as crowdfunding, patronage and sponsorships.

**Course Code:**MBA-3HR1

**Programme& Semester:** MBA III

**Course Description:** The objective of the course is to prepare HR managers to participate in the organizational knowledge management efforts and facilitate management of knowledge. The course using case studies of many organizations shows the various aspects of KM and how the three aspects, Strategy, technology and HRM need to be aligned together to manage knowledge management.

**Course Objective:** 1. To familiarise the concepts of Knowledge Management.

2. To understand the challenges of Knowledge Based Organisations and the HR mechanisms to manage them effectively.
3. To identify the importance of the values of autonomy and accountability in Knowledge based organisations.

Course Outcomes: After studying this course the student will be able:

CO1: To explain the concept of knowledge management.

CO2: To understand the planning regarding organization structure

CO3: To describe the strategies related to knowledge management.

### Course Contents:

**Unit 1: Introduction to Knowledge Management :** Introduction to Knowledge management, the significance of KM, history and the close relationship of KM with other concepts; the three major inputs viz. strategy, people and IT for a successful KM system, the difference between data, information and knowledge, various types of knowledge viz. tacit and explicit, consequences of knowledge types on managing knowledge. Challenges for knowledge based organizations.

**Unit 2 Knowledge Management and Organization Design:** People vs. emphasis on technology in managing knowledge and its impact on organization design, impact of organization structure can affect knowledge management, how culture affects knowledge, Impact of culture on employees, Managing knowledge for organization effectiveness

**Unit 3 Knowledge Management, Strategy and HRM:** Understanding the need to align individual needs with organization, how HRM can design reward systems to facilitate KM, Using “organizational routines” for managing knowledge, Pitfalls of a global Knowledge Management and problems of cross border issues in knowledge management.

**Unit 4 Managing Knowledge for organizational Effectiveness:** Process and Methods- Concept of Intellectual Capital and Learning Orientation in the Organizations - Knowledge and Role related issues - Performance Appraisal in a KBO - Intellectual Property Rights (IPR).

**Unit 5 Knowledge Management: The Indian Experience:**

- Discussion of the case of Infosys, Tata Steel and other organizations that are experimenting with Knowledge Management
- The problems Indian organization face with respect to Knowledge Management

**Course Title:** Organizational Change and Development

L	T	P	C.U.
33	5	2	3

**Course Code:**MBA-3HR2

**Programme& Semester:** MBA III

**Course Description:** In the fast-changing world of business the organizations have to be ready for the changes and should facilitate in adopting these changes. This course aims to give a broad theoretical and practical understanding of key concepts and issues in managing organizational changes.

**Course Objectives:** The course is designed to give a broad theoretical and practical understanding of key concepts and issues in managing organizational changes and development.

**Course Outcomes (COs):** At the end of this course students will be able:

CO1: To define the models and approaches of Organizational change and development.

CO2: To discuss the assumptions and relevance of organizational development and effectiveness

CO3: To explain the roles and functions of designing organization structure.

CO4: To interpret the intervening strategies of Organizational change and development.

### **Course Contents**

**Unit 1: Organizational Change:** Meaning, definition and nature of Organizational Change, Types of organizational change, Strategies for change, stimulating factors for organizational change, Theories of Planned Change (Kurt Lewin's Three Step change model), Managing Workforce Diversity, Employee Wellness. Organizational Life Cycle, Types and Forms of Organizational Change, Roles and Responsibilities in the Change Process.

**Unit 2: Organisational Development:** Concept and meaning, Characteristics of OD, Organization Development Vs Management Development, Need and significance of OD, History of OD, Relevance of Organizational Development for Managers, Assumptions of OD, Limitations of Organization Development, Steps in Organization Development, Change Agent, OD intervention Techniques, Sensitivity Training, Role Playing.

**Unit 3: Organizations as Strategic Design:** Meaning and concept of organization, Organizational Design, Determinants and Implications of organization design, Challenges of organizational design, organizational roles, functions and divisions, Types of organizational structure, designing organizational structure, functional, divisional (geographic and market), matrix structure. Resistance to Change, OD techniques to deal with resistance to change. Technology and Change: TQM, Business Process Reengineering.

**Unit 4: Organizational Development HRD Managers viewpoint:** Organizational Strategy and Structure, Technology, Size, Age and Structure. Organizations through Cultural Lens: Implications of Corporate Culture, Culture and Mergers and Acquisitions, Managing Cultural Diversity. Organizations through Political lens: Power and Politics in Organizations, Structural Conflict in Organizations. Organization and ethics, technology and organizational effectiveness. Departmentation, Authority, Power, Responsibility and Accountability. Linkage of Organizational Elements (Structure, Culture and Capabilities) to Organizational Effectiveness.

**Unit 5: Future of OD:** Organizational Development and Globalization, Emerging Trends in OD: OD in, health care organizations, family owned organizations, educational institutions, public sector organizations. Executing change: challenges of execution, execution framework, developing cross functional linkages, aligning policies, and removing structural impediments, developing new routines for innovation and improvement, considering human element.

**Course Title:** Performance Management & Competency Mapping

L	T	P	C.U.
33	5	2	3

**Course Code:**MBA-3HR3

**Programme& Semester:** MBA III

**Course Description:**Performance Management and Competency Mapping (PMCM) is a Human Resource Management course that has been developed to choose the right candidate for a particular job and also to see that the candidate performs well in his assigned job role. This course envisions the totality of an organization's function, along with its teams and individuals, by 'organising and managing performance within an agreed framework of planned goals, standards and competency requirements'. It will equip students with the necessary skills and critical understanding of the performance review process that combines challenge and support & places a focus on personal, team & organizational learning & accountability.

**Course Objectives:**The students, through this course would develop a knowledge for measuring the performance and expectations from employees over a period of time, gain an idea of how the annual review and appraisal process takes place, to generate the kind of work environment to attract and retain talented workforce in the company. Competency Mapping segment encapsulates the key competencies of an individual or an organization and shows how to incorporate those competencies through various processes, so that the organizations gain a competitive edge over others with its workforce ability. The students would also gain the ability to identify and map various competencies required in a particular work environment, use the different techniques and tools used to design a Competency Model, use assorted Assessment Center tools and 360 Degrees' Feedback to identify the highly competent workforce for an organization.

**Course Outcomes (COs):** At the end of this course students will be able to:

**CO1:** Explain the performance management & Performance appraisal

**CO2:** Compare and contrast various organizational performance management programs and best Practices and define attributes of effective performance management

**CO3:** Design an organizations performance management process that is compliant with law and Supports organizational mission and strategy.

**CO4:** Evaluate a performance appraisal system

**CO5:** Construct competency model

**CO6:** Conduct competency mapping exercise

**CO7:** Develop Assessment centre for competency identification

**Course Contents:**

**Unit I: Concept, Principles and Contribution of Performance Management-** Historical perspective of PMS- processes of PMS Contributions of Performance Management– Background to Performance Management- Components of Manage Performance & Development Plan, setting objectives in manage Performance & Development –Annual Stock taking- Performance Feedback

**Unit II: Process of Performance Management–** Goal oriented Performance Management Cycle– Role Definition– Key to Successful Performance Management–Dimensions of PM–Performance planning & Goal setting- performance Review— Benchmarking process.

**Unit III: Performance Appraisal Model**–Meaning, Features and Objectives of Performance Appraisal– Factors affecting Performance Appraisal–Individual KRAs & KPIs- Benefits of Performance Appraisal– Problems with Performance Appraisal– Essentials of a Good Appraisal System–Performance Criteria Evaluation of a Performance Appraisal System.

**Unit IV: Appraisal Methods on the basis of approaches** – Ranking–Forced Distribution–Paired Comparison– Check List– Critical Incident–Graphic Rating Scale– BARS–MBO–Human Resource Accounting. - 360 degree Feedback– Definition & Uses of 360 degree feedback– Rationale for 360 degree feedback—Scope of application in various industries – Advantage and disadvantage of 360 degree feedback- Concept of Potential Appraisal – Requirements for an Effective Potential Appraisal system-Performance Appraisal and Potential Appraisal-Web based Performance Appraisal System-Facilitating Factors of the Performance Appraisal-Rating errors by raters- Organizational Performance Appraisal Problems-Ways to improve the accuracy of Performance ratings

**Unit V: Introduction to Competency Mapping:** Concept of Competency and Competence-History of Competency- Constituents of competence-Types of Competencies-Competency Model Pyramid-Correlation between Competency Model & HRM- Benefits of using competency Mapping Model in the organization-Issues related to Developing Competency Models-Process for writing Competencies-Assessment Centre Tools-Competency based Interviewing-Competency Modelling

**Course Title:** Industrial Relations and Labour Laws

L	T	P	C.U.
33	5	2	3

**Course Code:**MBA-4HR4

**Programme & Semester:** MBA IV

**Course Objectives:** To enable students to learn the concepts of industrial relations including Trade unions, collective bargaining, discipline and various labour enactments.

**Course Outcomes (COs):** At the end of this course students will be able:

CO1: To explain the concept of industrial relations.

CO2: To interpret the international dimensions of Industrial relations.

CO3: To explain the role of Workers' Participation in Management.

CO4: To interpret the role Grievance Redressal.

## Course Contents

### Unit I: Industrial Relations

Concept of Industrial Relations; Nature of Industrial Relations; Objectives of IR; Factors affecting IR in changing Environment , Evolution of IR in India ; Role of State; Trade Union; Employers' Organisation; Human Resource Management and IR, Role of I.L.O in Industrial Relations, International Dimensions of IR

### Unit 2: Trade Union

Trade Union: Origin and growth, unions after independence, unions in the era of liberalization; Factor Affecting Growth of Trade Unions in India, Multiplicity & Recognition of Trade Unions; Provisions of Trade Union Act 1926.

### Unit 3: Collective Bargaining and Workers' Participation in Management

a) Collective Bargaining: Meaning, Nature, Types, Process and Importance of CB-prerequisites issues involved. Status of Collective Bargaining in India, Functions and role of Trade Unions in collective bargaining; b) Workers' Participation in Management: Concept- practices in India works committees, Joint management councils. Participative Management and co-ownership; Productive Bargaining and Gain Sharing

### Unit 4: Discipline and Grievance Redressal

Discipline - Causes of Indiscipline - Maintenance of discipline and misconduct, Highlights of Domestic enquiries - Principles of Natural Justice; Labour turnover; Absenteeism Grievance - Meaning of Grievance, Grievance redressal machinery in India- Grievance Handling Procedure; Salient features of Industrial Employment (Standing Orders) Act, 1946.

### Unit 5

a) **The Industrial Disputes Act, 1947:** Definitions of Industry, Workman and Industrial Dispute - Authorities under the Act —Procedure, Powers and Duties of Authorities — Strikes and Lock outs — Lay off and Retrenchment — Special Provisions relating to Layoff, Retrenchment and Closure.

b) **The Factories Act, 1948:** Provisions relating to Health, Safety, Welfare facilities, Working hours, Employment of young persons Annual Leave with wages etc.

### Suggested Readings:

**Course Title:** Compensation Management

L	T	P	C.U.
33	5	2	3

**Course Code:**MBA-4HR5

**Programme& Semester:** MBA IV

**Course Objective:** The objective of the course is to develop an understanding and familiarity among the student on an understanding to various components of executive and non-executive compensation; tools and techniques of job evaluation for assessing and monetizing the relative value of jobs/ job categories; and an understanding in designing a compensation policy and managing compensation system on the principles of equity, fairness and efficiency

**Course Outcomes:**

CO1: Students will be able to discuss key concepts related to compensation components, factors, theory, role of Trade Unions and government and other stake holder

CO2: To describe different Job Evaluation techniques for determining basic pay and will be able to demonstrate a sample Job Evaluation tool

CO3: To evaluate various components of a compensation package, how to structure them, and how to develop a company's compensation policy

CO4: To describe different statutory/ voluntary benefits, perks, incentives, and employee services offered by different organizations in order to motivate employees for better performance and retention

CO5: To discuss the role of collective bargaining / executive compensation negotiations in determining various employee/ executive benefits

CO6: Participants will be able to understand recent trends in executive compensation, rewards and recognition programs, and employee benefits.

**Course Contents**

Unit 1 : Introduction: Compensation meaning, Importance, Components & types of compensations, Factors Influencing Compensation, Challenges of Compensation, Theory of wages, Wages – Living wage, Fair wage and Minimum wage, Related Case Laws, Difference between Wages and salary, Wages Plans, Compensation Management: Role of Trade Unions, Government and Other Stakeholders.

Unit 2 : Internal alignment, Factors influencing internal structure, Strategic choices in defining internal structure, Job analysis: procedure and design. Job evaluation- definition, Purpose of job evaluation, Job based structures, its role in determining the compensation system, categories of job evaluation- analytical, non-analytical and market pricing; developing and maintaining job evaluation schemes.

Unit 3 : Individual and Team Pay Types of grade and pay structure, developing grade and pay structure, individual contingent pay, performance and competency related pay, contribution related pay; Team rewards- developing team pay, profit sharing, ESOPs, Recognition schemes, Role of performance appraisal in compensation decisions.

Unit 4 Legal Aspects of Wages & Salary Administration International Labour Standards & Norms for Wage determination, Salient features of Payment of Wages Act 1936, Minimum Wages Act 1948, Employees Provident & Misc. Provisions Act, Latest developments in Govt pension schemes, Equal Remuneration Act

Unit 5 : International pay systems Managing variations, The social contract, culture, National systems: Comparative compensations. Future trends in compensation management, case studies.

## INTERNATIONAL BUSINESS GROUP

(Electives)

**Course Title:**International Business Environment

**Course Code:** MBA-3IB1

L	T	P	C.U.
35	5	0	3

**Programme& Semester:** MBA III

**Pre-requisite:** Business Environment

Course Objective: The purpose of this paper is to enable the students learn nature scope and structure of International Business, and understand the influence of various environmental factors on international business operations.

Course Outcomes: At the end of the course, students will be able:

- CO1: To explain the nature, scope, and role of international business & globalization;
- CO2: To discuss the theoretical aspects of international business and the functions of international organizations;
- CO3: To explain the concept of economic integration and international economic environment;
- CO4: To interpret the Organizational structure for international business operations

UNIT 1 Introduction to International Business: Importance nature and scope of International business; modes of entry into International Business internationalization process and managerial Implications. Environmental Context of International Business: Framework for analyzing international business environment

UNIT 2 Domestic, foreign and global environments and their impact on international business decisions-Global Trading Environment: World trade in goods and services – Major trends and developments; World trade and protectionism – Tariff and non-tariff barriers; Counter trade.

UNIT 3 International Financial Environment: Foreign investments -Pattern, Structure and effects; Movements in foreign exchange and interest rates and then impact on trade and investment flows.

UNIT 4 International Economic Institutions and Agreements: WTO, IMF, World Bank UNCTAD, Agreement on Textiles and Clothing (ATC), GSP, GSTP and other International agreements; International commodity trading and agreements. Emerging Developments and Other Issues: Growing concern for ecology; Counter trade; IT and international business.

### **Suggested Readings:**

5. Griffin, Ricky W. and Pustay, Michael W, International Business: A Managerial Perspective, Addison Wesley, Readings, 1999.
6. Hill, Charles W. L., International Business, McGraw Hill, New York, 2000.

**Course Title:International Marketing**

**Course Code: MBA-3IB2**

L	T	P	C.U.
35	5	0	3

**Programme& Semester: MBA III**

**Pre-requisite: Marketing Management**

Course Objectives: To understand the principles & concepts in Marketing, to provide the knowledge of marketing management in the international perspective to develop marketing strategies for the dynamic international markets.

Course Outcomes: At the end of the course, students will be able:

CO1: To provide understanding of product and pricing decisions appropriate for international market.

CO2: To analyze the international marketing strategies.

CO3: To understand how companies adjust their international strategies based on the global environmental changes (e.g., globalization)

CO4: To build skills and respect toward the understanding of cultures of nations by critically analyzing the social, political, legal, and economic forces that affect the business performance of international marketing

**Course Contents**

UNIT-1 The importance and scope of marketing - Evolution of marketing: From transaction-based to relationship marketing- Marketing research and Decision support systems .Market Segmentation, Targeting and Positioning.

UNIT-2 Product Mix - Product management decisions, Product Life Cycle strategies - New Product Development - Pricing considerations and approaches, pricing strategies.

UNIT-3 Distribution channels and physical distribution. Marketing communication and Promotion mix Strategies. Nature of international marketing: meaning, Framework for International Marketing-Barriers for International Marketing.

UNIT-4 International Marketing Decisions: Product Planning, Designing and Development for international markets-Pricing Decisions: Pricing Strategies and Price setting For International Markets.

UNIT-5 Distribution: Channel Management and Physical distribution Management in International Marketing. Promotion: International Advertising Programs, Sales Management and Sales Promotion for Foreign Markets.

**Suggested Readings**

1. Philip Kotler, (2010), Marketing Management- The South Asian Perspective, Pearson
2. Warren J. keegan (2010): Global Marketing Management’ Pearson Education
3. SvendHollensen (2010): Global Marketing: A Decision-Oriented Approach- 3rd Edition, Pearson Education.
- 2) Ramasamy, Namakumari (2010) Marketing Management, McMillan Publishers
- 3) Saxena: Marketing Management (Tata McGraw-Hill)

**Course Title:Financing of International Trade**

**Course Code: MBA-3IB3**

L	T	P	C.U.
35	5	0	3

**Programme& Semester: MBA III**

**Pre-requisite:** International Business

Course Objectives: To familiarize the students with the basic documents required and financing techniques of foreign trade.

**Course Outcome:**At the end of the course, students will be able to:

CO1.Explain the concepts of international trade and finance and apply for the management decisions

CO2.To analyze impact of WTO on current global trade in detail.

CO3. To apply the different methods to mitigate the foreign trade and exchange rate risks in their respective organizations.

**UNIT-1**

Methods of payment- Cash, Open account, Cash against Documents, Documents on acceptance, Advance payment, Bills of exchange and Letter of Credit (LoC), International commercial terms- Contract terms for carriage by sea transport – FAS–FOB–CFR–CIF–DES–DEQ–contract terms for carriage by any mode of transport – EXW-FCA-CPT-CIP-DAF-DDP-DDU. Procedure for drawing various LoC and their operations - Types of Letter of Credit – **Discrepancies, Letter of credit - UCP- 600**

**UNIT – II**

Pre-shipment Credit: Meaning, Procedure, rates and documents needed, Post Shipment Credit: Definition and features– Various applications of post shipment finance and their procedure, Negotiation of export bills, Bills purchased discounted under limits granted to customers. Advances against claims for export incentives, deferred payment export credits.

**UNIT – III**

Export credit insurance: Role of ECGC – Standard policies – Risks covered: Commercial Banks, Political Risks – Risks not covered, how to obtain a policy and file claim - Maximum liability and credit, Guarantees for covering export finance. Insurance policies and bank Guarantees and Special Schemes. FEMA: Exchange control, regulations and procedure in India

**Unit – IV**

Export, import trade control procedure, Processing of an export order: Customs and Port clearance. Procedure and documents relating to quality control, Export contracts, Basic Principles of Insurance: Marine insurance – types of policies, perils covered, EXIM Banks – Objectives, Organizations Functions of EXIM Bank – Export financing programmes.

**UNIT-5:** Relevant Case studies

**Suggested Readings** 1) Nabhis, ‘Export’s manual and documentation’ Nabhi Publications

2) G.S. Lal, ‘Finance of foreign trade and foreign exchange’ H.P.J Kapoor Publications

3) S.C. Jain, ‘Export Procedure and documents’ Nabhi Publications

4) Current Export and import policies

5) Paras Ram, ‘Export What, Where, and How’ Anupama Publishers

**Course Title:Export Management And Documentation**

**Course Code: MBA-4IB4**

L	T	P	C.U.
35	5	0	3

**Programme& Semester: MBA IV**

**Objectives:** It gives an understanding on the India’s trade Position in the World and the various trade procedures involved in an international business. It gives an insight to the various documents required for trading.

**Course Outcomes:** At the end of the course, students will be able to:

- CO1. Understand various import process and procedures
- CO2. Analyze the principle of international business and strategies adopted by firms for the expansion.
- CO3.Explain the concepts in trade documentation in international business with respect to foreign trade

**Course Contents**

**UNIT-1**

International Trade: Need and importance of International Trade – Recent Trends in World Trade – Leading players – India’s Foreign Trade – Commodity composition and Destination – India’s position in World merchandise trade and services – India’s Foreign Trade Policy.

**UNIT-2**

Export Procedure: Starting an export firm – Selection of an export product – Market selection –Buyer selection - Registration procedure with Sales Tax, Central Exercise and various Boards and councils – Exim code number – Elements of export contract- Incoterms – Terms of payment and Letter of Credit.

**UNIT-3**

Export Documentation: Types of documents – Transport, Negotiation and Insurance documents.

**UNIT-4**

Export Finance: Sources of Finance - Role of commercial bank, EXIM Bank, ECGC and others – Export promotion Schemes – Insurance for Export – Types – export credit insurance – Risk Management – Types of risks – mitigation methods.

**UNIT-5**

Import Procedure and Documentation: Global sourcing – Types of global procurement – Tender – Negotiation – Contract and others – Customs regulations and import clearance formalities – Types of import licensesExport Promotion Capital Goods Scheme (EPCG) license- Duty exemption scheme – Duty Entitlement Pass Book Scheme (DEPBS)- Import formalities for 100% EOUs and SEZs - Import Risk Management.

**Suggested Readings:**

1. Aseem Kumar “Export and Import Management”, Excel Books, 2007
2. David Stewart ,”International Supply chain Management”, Cengage publications,2008
3. Jeevanandam C “Foreign Exchange : Practices Concepts and control” Sultan chand Publications, 2002.
4. Foreign Trade Policy: Hand book of Export Procedure and Annual of the Ministry of Commerce, Government of India.
5. Export and Import Manual, Nabhi Publications, New Delhi.
6. World Development Indicator, World Bank Publication

**Course Title:**International Logistics Management

**Course Code:** MBA-4IB5

**Programme& Semester:** MBA IV

L	T	P	C.U.
35	5	0	3

**Objective:** The course provides the analytical framework for understanding the logistic models and supply chain techniques in an international perspective.

**Course Outcomes:**At the end of the course, students will be able to:

CO1: Analyze Business Models, Business Strategies and Competitive Advantage.

CO2: Formulate and implement Warehouse Strategies

CO3: Recognize the requirements for Transportation and International Logistics

### **Course Contents**

#### **UNIT-1**

Logistics Management: Concepts – Importance – Elements of the logistic System – Marketing and logistic mix – Logistics and marketing interface – Value-chain and production efficiency.

#### **UNIT-2**

Shipping Industry: Types of ships – Shipping systems: linear, Tramp, conference, chartering, Baltic freight exchange – Shipping intermediaries: agent , forwarder, brokers and others – containerization – types of containers – ICDs – CFS – CONCOR.

#### **UNIT-3**

Air Transport: Air transport – Air freight – IATA – Cargo handling – Designing the International Information system – system modules – Distribution and Transportation.

#### **UNIT-4**

**Supply chain:** Definition – scope and importance of supply chain – supply chain drivers and metrics - efficient and responsive supply chain - Designing supply chain network: Distribution network – Factor influencing distribution - Transportation decision in supply chain management.

#### **UNIT-5**

Forecasting and planning in supply chain management – Pricing in supply chain management- Role of IT in supply chain management - co-ordination in supply chain management.

#### **Suggested Readings:**

1. David P, “International Logistics” Biztantra, New Delhi , 2006.
2. Donald J Bowersox Davi J Class” Logistics Management, Tata Mc.GrawHill,New Delhi.
3. David Stewart,”International Supply chain Management”, Cengage publications,2008.
4. Rejilsmail,“Logistics Management” Excel Books, 2008.

**OPERATIONS MANAGEMENT  
(Electives)**

**Course Title:** Facilities Management

**Course Code:** MBA-3OM1

**Programme & Semester:** MBA III

L	T	P	C.U.
33	5	2	3

**Objective of the Course**

The main objective of this course is to enable the students to be trained with planning/production and plant layouts, studying about strategies of material handling and equipments, and selection of site locations and layouts. The course will enable the students to understand the processes and methodology of operational management of facilities.

**Course Outcomes (CO)**

After completion of this course, the student will be able:

CO1: To understand the product selection, design and production layouts through basic strategies with computer applications.

CO2: To Understand different types of production processes and facility layout suitable for manufacturing different categories of products.

CO3: To identify and analyse the problems in the existing layout or material handling system and to optimize the layout or material handling system.

CO4: To develop layout design procedure and layouts for typical applications in the industries and suggesting appropriate material handling strategies in the industries.

**Contents Course**

**Unit 1: Product Selection and Design**

(a) Product selection process, (b) development of products (Goods and Services), (c) sources of product innovations, (d) design for customer (quality function on deployment), (e) value analysis / value engineering, (f) measuring product development performance.

**Unit 2: Production Process Management**

(a) Introduction, factors affecting process selection, (b) classification of processes: based on materials management and customer order type, (c) process flow design, (d) process analysis, (e) product-process strategy.

**Unit 3: Operations Technology**

(a) Definition of technology, (b) types of technology, (c) factors affecting technology selection decision, (d) misalignments in technology implementation, (e) level of automation, (f) technology development process, (g) Technologies for processes: Computer Integrated Manufacturing (CIM), CNC/ DNC machines, Computer Aided Manufacturing (CAM), Computer Aided Engineering (CAE), Office Automation, Electronic Data Interchange (EDI), and Internet, evaluation of technology investments.

**Unit 4 : Facilities Location**

Importance, factors affecting facilities location, (b) methods for evaluating, (c) facilities location: factor rating system, multiplant location method, locating facility within a network, dimensional analysis, methods for locating service outlet, (d) cost-volume analysis of facilities location.

**Unit 5 : Facilities Layout**

Importance of facility layout, (b) criteria for good layout, (c) symptoms of poor layout, (d) types of facility layout: product layout, process layout, cellular layout, mixed layout, fixed position layout, retail service layout, office layout, (e) flow and activity analysis, (f) layout design procedure: assembly line balancing, designing based on closeness rating, (g) computerized layout planning, (h) evaluating, and implementation of layout design.

**Suggested Readings**

1. Chase, Aquilano, Jacob, Production and Operations Management, 8th Ed. (TMH, N Delhi).
2. Lee J Krajwski, Operations Management: Strategy & Analysis, 6th Ed. (Pearson Education) Delhi).
3. S.N Chary, Production and Operations Management, (TMH, N Delhi).
4. Adam Ebert, Production and Operations Management, 6th Ed. (Pearson Education, N. Delhi).

**Course Title: Production Planning and Control****Course Code:**MBA-3OM2

L	T	P	C.U.
33	5	2	3

**Programme& Semester:** MBA III**Objective of the Course**

Production Planning and Control are the two important components of the management process. The subject will enable the consideration of all input variables to achieve defined output goals and control will help in corrective action taken to meet the planned output. The objective of the course is to enable the students to study basic strategies of production planning and its controlling methods

**Course Outcomes (CO)**

After completion of this course, the student will be able:

CO1: To understand the concept of capacity planning, aggregate planning and process of aggregate planning.

CO2: To understand the concept of Master Production Schedule and Material Requirement Planning and identify their elements.

CO3: To design an appropriate strategy for resource planning through appropriate MRP tool.

CO4: To explain demand forecasting, production planning tools & production control tools.

CO5: To demonstrate the Production Planning and Control and its functions for effective and efficient operations management.

**Course Contents****Unit 1 :Strategic Capacity Planning**

Concept, importance and objectives of capacity planning, (b)Type of capacity, Issues related to capacity planning, (e)Process of capacity planning: demand identification (qualitative and quantitative methods), assessment of capacity, alternative ways of altering capacity (make or buy decision), evaluation of alternatives.

**Unit 2: Aggregate Planning**

(a) Concept of Aggregation, Aggregate Planning Environment, (b) Aggregation Techniques, Planning Product Mix (Simple Application of Linear Programming), Process Of Aggregate Planning, (c)Mixed Strategy, (d)Mathematical Planning Models, (e)Performance Measures.

**Unit 3: Master Production Schedule and Material Requirement Planning (MRP)**

(a) Concept Of Master Production Schedule (MPS), (b)Importance Of MPS, (c)Process Of Preparing MPS, (d)Rough-Cut Planning, (e)Importance Of Material Requirement Planning (MRP), (f)Process Of Material Requirement Planning (MI(P), Elements Of Material Requirement Planning (MRP), Bill of Materials.

**Unit 4: Job Scheduling and Sequencing**

Introduction To Types Of Jobs In Organization, (b)Methods Of Job Scheduling: One Machine- N Jobs, Two Machines- N Jobs, N Machines- N Jobs, M Machines- N Jobs, Project Scheduling , Network Diagrams (PERT And CPM), (c) Job Sequencing, Job Sequencing In Service Organization (Application Of Simulation).

**Unit 5: Production Control System**

Concept, Function, and importance of production control, (b)centralization and decentralization, (c)documents and procedures us,AI in production control: work order, material requisition, control sheet, internal delivery note, progress note, machine load chart.

**Suggested Reading:**

1. J L Riggs, Production System Planning, Analysis, and Control, John Willy & Sons, New York 2. Lee J Krajwski, Operations Management: Stratekry& Analysis, 6th Ed. (Pearson Education, N. Delhi).
3. Buffa , Sarin, Production and Operations Management, Willey- Publication, New Delhi.
4. Adam Ebert, Production and Operations Management, 6th Ed. (Pearson Education, New Delhi).

**Course Title: Project Management**

**Course Code: MBA-3OM3**

**Programme & Semester: MBA III**

L	T	P	C.U.
33	5	2	3

**Objective of the Course**

This subject will help the students to understand importance of job design and productivity and its role in organizations. The subject will also enable students to learn about various processes of the organization to improve organisation's productivity.

**Course Outcomes (CO)**

After completion of this course, the student will be able:

CO1: To understand the basic project management skills with a strong emphasis on issues and problems associated with delivering successful projects.

CO1: To explain the importance, scope and functions of project management in successful project with productivity.

CO2: To evaluate, prioritize and select projects from a list of potential projects.

CO3: To illustrate the estimation of guidelines for time, costs and resources required for project management by applying different methods.

CO4: To evaluate and monitor the performance of the project with different approaches.

**Course Contents**

**Unit 1 : Productivity**

(a) Concept of productivity, (b) Measures of productivity, (c) Methods for productivity enhancement, (d) Productivity in manufacturing and service organization, (e) Principles of motion economy.

**Unit 2 : Job Design**

(a) Concept of job simplification and job standardization, (b) Specialization and automation, (c) Approaches to job design, (d) Behavioral considerations of job design, (e) Work analysis and work measurement, (f) Time-study methods: work sampling, stop-watch method, man-machine charts, calculation of allowances, normal time, and standard time; (g) Compensation, legal and ethical consideration.

**Unit 3 : Project Management**

(a) Project planning, objective of project management, (b) Classification of projects, (c) Project planning tools, GANTT charts, Milestone Charts, Network Analysis: PERT and CPM, finding critical path, earliest and latest activity time, (d) Time-Cost trade offs, (e) multilevel scheduling system.

**Unit 4 : Maintenance and Safety Management**

(a) Concept, objectives and importance of maintenance, (b) maintenance strategies, (c) maintenance economy, (d) Total productivity maintenance (TPM), (e) Measurements of maintenance performance; (f) Plant Safety: plant and equipments conditions, accidents' costs, approaches for accidents prevention, risk management.

**Suggested Readings:**

1. Lee J Krajwski, Operations Management: Strategy & Analysis, 6th Ed. (Pearson Education, N. Delhi).
2. S.N Chary, Production and Operations Management, 11th Ed., (TMI-I, N Delhi)
3. Adam Ebert, Production and Operations Management, 6th Ed. (Pearson Education, N. Delhi)

**Course Title: Materials Management****Course Code:**MBA-4OM4**Programme& Semester:** MBA IV

L	T	P	C.U.
33	5	2	3

**Objective of the Course**

In this course Students having experience in the field of production can learn the techniques of materials and logistics management and implement them in daily operations.

**Course Outcomes (CO)**

After completion of this course, the student will be able:

**CO1:** To develop an ability to perform the role of materials manager in an organization.

**CO2:** To analyze the inventory situation of a company and suggest improvements.

**CO3:** To understand the ethical issues in purchasing and negotiations.

**CO4:** To manage the activities of material manager like purchasing, inventory analysis, storage etc; in a scientific manner.

**Contents of Course****Unit 1 : Purchase Management:**

(a) Concept, objectives, and role of purchase function, (b)Inputs to procurement process, (c)Restrains and functions affecting purchase decision, (d)Procurement decisions: supplier selection, timing of purchase, price, quality and quantity of material, (e)Evaluation of procurement process, (f)Purchasing in government departments.

**Unit 2 : Inventory Management:**

(a) Introduction To Inventory System: Concept, Costs Associated With Inventory, Functions Of Inventory, Types Of Inventory, (b)Splective Control Of Inventory: ABC, VED, FNSD, GOLF, HML, (c)Models Of Inventory Control, Determination Of Economic Order Quantity (EOQ): Graphical , Tabular, And Mathematical Models (For Deterministic And Probabilistic Demand), Safety Stock, Reorder Level, (d)Concept Of Just In Time (JIT) System.

**Unit 3 : Stores Management:**

(a) Introduction, (b)Functions Of Stores, (c)Organization. Of Store, (d)Types Of Stores, (e)Stores System And Procedures, (f)Decentralization V/S Centralization, (g)Control Of Spare Parts, (h)Codification And Classification Of Materials, (i)Stores Audit System, (j)Store's Location And Layouts.

**Unit 4 : Waste Management:**

(a) Concept Of Waste Management, Importance Of Waste Management, (b)Concept Of Productivity And Wastivity, Gross And Net Wastivity, Wastivity As. Performance Measurement, (c)Wastivity V/S Productivity, (d)Classification of Waste Management, (e) Waste Reduction Methods, (f)Treatment of Waste In Cost Accounting.

**Suggested Readings:**

1. JR Tony Arnold, et al, Introduction to Material Management, 5th Ed., Pearson,
2. N K Nayar, Resource Management, Vikas Publication, New Delhi
3. AK Citall et al, Materials Management : Text and Cases, .TMH, N Delhi
4. AK Datta, Materials Management: Procedure, Text and Cases, PHI, 2nd , N Delhi.

**Course Title: Total Quality Management and Quality Standards**

**Course Code:**MBA-4OM5

L	T	P	C.U.
33	5	2	3

**Programme& Semester:** MBA IV

**Course Objective:**

The objective of this course isto enrich students the fundamentals of Total Quality Management to foster the emerging trends in production whereby students practically would know how the six sigma technique could be used to minimize defects.

**Course Outcomes (CO)**

After completion of this course, the student will be able:

CO1: To learn the basic concepts of quality and quality from organizational point of view.

CO2: To learn the concept of total quality management from western and Japanese approach.

CO3:To learn the internal politics, quality culture, education and training of the organization.

CO4:To be aware of international/national Quality awards

**Contents of the Course**

**Unit 1 : Total Quality Management (TQM) Concept and Fundamentals**

(a) Definition, Basic Approach, (b) TQM Framework, (c) Principles of TQM, (d) Philosophies Of Quality Gurus: Deming's 14 Points, Crosby's Four Absolutes, Juran's Trilogy, Feigenbaum's Total Quality Control, The Total Quality Triad, (e) Evolution of TQM.

**Unit 2 : Human Aspect of Total Quality Management (TQM)**

(a) The human factor: The fundamental prerequisite for success, (b) TQM's human elements, (c) Motivating people for total quality, (9.) Resistance to change, (e)Characteristics of quality leaders, (f) Role of quality readers, (g)Teams for TQM, (h)On-the-job satisfaction and quality, (i) Participative management, (j) Compensation system, (k) Ergonomics.

**Unit 3 Strategic Quality Planning**

(a.) Strategic quality management, (b) Quality statement, culture, product quality cycle, (c) TQM planning environment, (d) Role of quality control department, (e) Planning for productivity, (f) Quality and re-engineering, (g)The cost of quality (Direct & Indirect cost), (h)Evaluating the cost of TQM, (i) Quality index, (j) The total quality cost curve, (k)Standardization.

**Unit 4: Total Quality Management (TQM) Practices**

(a) TQM technologies, (b) TQM practices: policy deployment, benchmarking, backtracking, cross-functional teams, QFD, Taguchi Method, failure-mode and effect analysis, the Poka-Yoke concept, concurrent engineering, (c) Malcolm Baldrige award, European Quality award, (d)TQM Implementation Process.

**Unit 5 : Quality Management Standards**

(a) Concept and need of quality standards, (b) National quality standard organizations: Bureau of Indian Standards (BIS), Agmark Grading of agriculture and allied commodities, Quality council of India; (c) International Organisation for standardization (ISO), ISO standards: ISO 9000 and 14000 series, integration of ISO 14000 with ISO 9000, (d) Process of ISO certification, (e) Implementing the system, (f) Post certification.

**Suggested Readings:**

1. Dale, Carol, Glen, Mary, Total Quality Management, 3rd ed., Pearson Education, New Delhi
2. Ross, Total Quality Management: Text, Cases, and Readings, 2nd ed. St. Lucie Press.
3. H Lal, Total Quality Management: A practical approach, New Age International, New Delhi.
4. Hand Book for-ISO certification.

**AGRI - BUSINESS MANAGEMENT**  
**Electives**

**Course Title: Agribusiness and Rural Marketing**

**Course Code: MBA-3AG1**

L	T	P	C.U.
30	5	5	3

**Programme & Semester: MBA III**

**Course Objective:** The course is designed for the student who plans to seek employment on, manage, or own a farm; or seek employment in an agribusiness field. Students will be involved in learning activities that generally prepare him/her to apply the economic and business principles involved in the organization, operation, and management of the farm, ranch, or agribusiness.

**Course Outcomes (CO)**

After completion of this course, the student will be able:

CO1: To enable students to gain knowledge on agricultural marketing, challenges and prospects for improving agricultural marketing system.

CO2: To gain skills to analyze marketing functions, marketing information and intelligence.

CO3: To impart knowledge of the marketing efficiency and agricultural prices.

CO5: Provide the platform to the students of Marketing of Agricultural Inputs

**Course Contents**

**Unit-1:** Concept of Agricultural Marketing, Study of organization and function of agricultural marketing in India.

**Unit-2:** Methods of Grading farm products, Magnitude and dimensions of marketing & marketable surplus in agricultural communities.

**Unit-3:** Efficiency of marketing storage, Transportation and Financial Management in Agriculture.

**Unit-4:** Marketing: Perishability, seasonality and processing of agricultural products.

**Unit-5:** Various models and theories of agricultural marketing with their critical evaluation.

**Suggested Readings:**

1. John, N. David and Ray, Concept of Agribusiness Management
2. Kenneth D. Dull, Principles of Management in Agri-Business, Western Publication
3. Agriculture Marketing Management
4. Acharya, S.S, Dr. N.L. Agarwal, Agricultural Marketing In India, 6/E Oxford & Ibh, 2017
5. Kohls, Marketing of Agriculture Products 9e Pearson Education India; Ninth edition (2015)

**Course Title: Agri Input Management**

L	T	P	C.U.
30	5	5	3

**Course Code:**MBA-3AG2**Programme& Semester:** MBA III

**Course Description:** The syllabus of agri input management includes five units; unit one includes concept of agri input management and type of agri inputs. Unit 2 includes Business Environment in relation to agricultural input management. Unit 3 includes marketing of agricultural inputs; unit-4 overview of financial management and financial instruments are included and Unit-5 includes promotional measures and supply chain management. The Andragogy in this subject includes PPTs, case studies, assignments, class test, quiz, mini project.

**Course Objectives:** The objective of the course is to develop the skills & knowledge to the students regarding marketing of agricultural inputs. The course builds an overview and in-depth awareness of the input market environment.

**Course Outcomes (COs):** At the end of this course students will be able to:

CO 1: Explain the basic concept of agri input management.

CO 2: Interpret the importance of business environment related to agricultural input management.

CO 3: Analyze the marketing strategies of agricultural input management.

CO 4: Analyze the financial strategies of agricultural input management.

**Course Contents:**

**Unit1:** Agricultural Inputs and their types – farm and non-farm, Seed- Importance of seed input; Types of seeds- hybrid, high yielding and quality seeds, Chemical fertilizers- production, export-import, supply of chemical fertilizers, demand/consumption.

**Unit 2:** Business Environment in relation to agricultural input management; legal aspects of agricultural input business, sustainable management in terms of environmental, social and economic aspects, managing technological innovation in terms of agricultural inputs management.

**Unit 3:** Marketing of agricultural inputs, product strategies and development, pricing methods and strategies, marketing channels and promotion.

**Unit 4:** Overview of Financial management in agricultural inputs management, Challenges in agricultural financing, Financial instruments in agricultural sector, cost-volume-profit analysis.

**Unit 5:** Relevant promotional agencies and cooperatives, Supply chain management for agricultural inputs, problems and prospects of the agricultural inputs management.

**Text Book:**

1. Acharya, S. S & Agarwal, N. L. (2019). *Agricultural Marketing in India*, 6<sup>th</sup> Ed, Oxford & IBH, New Delhi

**References:** 1. Broadway, A. C. & Broadway, A. A. (2016). *A Text Book of Agri-Business Management*, Kalyani Publishers

2. Singh, A. K. and Pandey, S. (2005). *Rural Marketing*, New Age.

3. Krishnamacharyulu, CSG & Ramakrishnan, L. (2010). *Rural Marketing: Text & Cases*, Pearson

**Course Title: Farm Business Management**

L	T	P	C.U.
32	5	3	3

**Course Code:**MBA-3AG3

**Programme& Semester:** MBA III

**Course Objective:** The objective of this course is to provide students opportunity to develop skills which will make you more employable in the field of farm business management. This course introduces basic farm business management concepts. Students will study the farm management planning cycle and develop an understanding of its relationship to: family and farm business goal setting.

### **Course Outcomes (CO)**

After completion of this course, the student will be able:

CO1: To acquaint students with the ever-changing role of a farm manager in today's economy.

CO2: To gain a working knowledge of the economic and business principals necessary to survive and thrive in today's agricultural environment.

CO3: To understand the financial management of a farming operation. This includes construction and use of financial statements, a general understanding of the financial industry, organizational business structures and taxation.

CO4: To understand the importance of personal financial management and its direct impact on a business.

### **Course Contents**

**Unit 1:** Introduction, Definitions, Objectives of farm Management, Scope of Farm Management, Economic theory and farm management science, what makes a successful farm manager? Relationship of farm management with other sciences, Farm management problems under Indian conditions

**Unit2:** Economic Principles applied to Farm management: Principle of Variable proportion, Cost principle, principle of factor substitution, law of equi-marginal returns, Opportunity cost principle, principle of combining enterprises, Principle of comparative advantage, Time Comparison principle, Limitations of principles of farm management.

**Unit 3:** Farm Planning, Budgeting and Programming: Farm planning, Farm budgeting, Steps of Complete budgeting, Programming Techniques.

**Unit 4:** Systems of Farm Organization: Different systems of farming, Peasant farming, Corporate farming, State farming, Co-operative farming, Collective farming, Criteria for choice in India, Suitability of alternative systems.

**Unit 5:** Farm Size and Practices: Measurement of size of farm, Pattern of farm holdings in India, Factors determining economic holdings, Farm size practices – Large scale and small scale farming, Specialized and diversified farming, Mixed farming, Extensive and intensive farming.

### **Suggested Readings:**

1. Dhondyal, S.P. (2007) Farm Management: An Economic Analysis
2. Broadway and Broadway (2009), Agri-Business Management.
3. Johl and Kapur (2005) Farm Business Management

**Course Title: Management of Cooperatives**

L	T	P	C.U.
32	5	3	3

**Course Code:**MBA-4AG4

**Programme& Semester:** MBA IV

Objectives: The objective of this course is to provide the conceptual framework related to management of cooperatives.

**Course Outcomes (COs):** At the end of this course students will be able to:

CO 1: Explain the basic concept of management of cooperatives.

CO 2: Interpret the role of government in the development of cooperatives.

CO 3: Analyze the strategies of Financing of cooperatives, staffing in cooperatives and training methods in cooperatives.

CO 4: Analyze theManagement practices of successful cooperatives in India.

### **Course Contents**

#### **Unit-1:**

Nature of cooperative principles, Management principles and their applications to cooperative organizations, structure and functions of various types of cooperatives.

#### **Unit-2:**

Managerial problems of cooperatives, consumer stores, role of consumer stores, role of Government in the development of cooperatives.

#### **Unit- 3:**

Financing of cooperatives, staffing in cooperatives and training methods in cooperatives and efficiency criteria.

#### **Unit 4:**

marketing Public accountability, price, output and profit and policies of cooperatives; Special problem of cooperatives in agricultural and industrial sectors.

#### **Unit-5:**

Management practices of successful cooperatives in India: selected case studies.

### **Suggested Readings:**

1. Ramkishen Y, Management of Co-operatives, JAICO Publishing House.
2. K. M. Rai. Cooperative Societies And Rural Development', Mittal Publication, New Del

**Course Title: Plantation Management**

**Course Code: MBA-4AG5**

L	T	P	C.U.
30	5	5	3

**Programme& Semester:** MBA IV

**Course Objectives:** The enable students to understand current scenario of plantation industries in India and to analyze the manufacturing, marketing and financial aspects of plantation crops.

**Course Outcomes:** After the completion of the course students will be able:

CO1: To explain the current scenario of plantation industries in India.

CO2: To demonstrate product, pricing, distribution and promotional strategies related to plantation crops.

CO3: To interpret the financial management in plantations management.

CO4: To evaluate the social, economic and technological aspects related to plantation management.

**Course Contents:**

**Unit1:** Current scenario of major plantation industries in India, plantation field operations in estates of Tea, Coffee, Rubber, Spices, etc (cultivation, harvest management, post harvest management).

**Unit 2:** Manufacturing/processing operations in estates, quality control aspects, estate management and labour relations, legal aspects of plantation business, sustainable management in terms of environmental, social and economic aspects, managing technological innovation in terms of cultivation and processing in Tea, Coffee, Rubber, Spices and other relevant plantation crops.

**Unit 3:** Marketing of plantation crops marketing channels, product development, branding, pricing and promotion.

**Unit 4:** Export environment for plantation crops, logistics management-purchase, stores and transport, Financial management in plantations, cost-volume-profit analysis.

**Unit 5:** Relevant promotional agencies and cooperatives, problems and prospects of the major plantation sector

**Text Book:**

1. David, A. Avant, *Plantation Management*. Lavant Publications.

**Reference Readings:**

1. Kumar Pankaj (2007). *Practical Manual of Plantation*, Scientific Publishers Journals Dept.
2. P. Sudarshan, *Plantation Management*.

## Electives

### Pharma Business Management

**Course Title: Pharmaceutical Marketing**

**Course Code: MBA-3PH1**

**Programme & Semester: MBA III**

L	T	P	C.U.
30	5	5	3

**Course Objectives:** The course will give an overview of the pharmaceutical industry and how marketing has become essential even for one of the most R&D-heavy industries. Many people – also within the pharmaceutical companies themselves - find marketing circumspect and believe pharmaceuticals should be sold on scientific merits only. However, R&D productivity has fallen and companies need to maximize return on each and every innovation just to survive. Therefore, the pharmaceutical industry is a good place to learn about recurrent as well as future challenges for marketers.

**Course Outcomes (COs):** At the end of this course students will be able to:

CO1- Understand the marketing concepts and techniques; and applications of the same in the pharmaceutical industry.

CO2- Describe the concept of product management and product life cycle.

CO3- Discuss the various components of promotion of pharmaceutical products.

CO4- Explain the different pharmaceutical marketing channels

CO5- Evaluate the role of mass media in product advertising.

#### Course Contents

**Units 1:** Fundamentals of Pharmaceutical Marketing: the 4 'Ps' in a regulated Pharma market, the Strategic Triangle; Market Segmentation in the pharmaceutical context, conceptual difference with consumer products market segmentation

**Unit 2:** PLC Management, reinforcing and revitalizing pharmaceutical brands, line-extensions. Product-mix Optimization

**Unit 3:** Promotional-mix Optimization: Portfolio Analysis by factoring key determinants, BCG Matrix, brand building decisions; leveraging the Promotional-mix for Brand Building. Designing Marketing Programs for New Product launch

**Unit 4:** The Pharmaceutical Industry: India and Global Scenario: Essential differences between domestic Marketing in India and International Marketing; generic products dominated market vis-à-vis patented products dominated markets

**Unit 5:** Role of pharmacies in dispensing products, role of mass media in product advertisements and social campaigns for market expansion; Structure and role of field management and product management, India Vs. Global

#### Suggested Readings:

1. Kotler, Philip, Marketing Management: Analysis, Planning, Implementation, and Control Latest Edition, Prentice Hall
2. Best, Roger J., Market-Based Management – Strategies for Growing Customer Value and Profitability (3rd Edition), Prentice Hall
3. Lehmann, Donald R. and Russell S. Winer, Product Management (2005 4th Edition). McGraw-Hill/Irwin.
4. Philip Kotler(2003). Marketing Management: Eleventh Edition, New Delhi: Pearson Education.

**Course Title:Regulatory Framework of Pharmaceutical Business**

**Course Code: MBA-3PH2**

L	T	P	C.U.
30	5	5	3

**Programme& Semester: MBA III**

Course Objectives: The course will give an overview of legal environment to the student. This paper is designed to expose the students to the Indian legal system and its affect on business activities.

Course Outcomes (COs): At the end of this course students will be able to:

CO1- Understand the law of contract, Capacity of contract and legal requirements of entering into a contract.

CO2- Demonstrate an understanding of the legal environment of business.

CO3- Apply basic legal knowledge to business transactions.

CO4- Integrate the concept of business law with foreign trade.

**Course Contents**

**Unit 1:** Law of Contract - Agreement - Offer - Acceptance - Consideration - Capacity of Contract Contingent Contract - Quasi Contract - Performance - Discharge - Remedies to breach of Contract

**Unit 2:** Partnership - Sale of Goods - Law of Insurance - Negotiable Instruments - Notes, Bills, Cheques - Crossing - Endorsement - Holder in due course - Holder in value - Contract of Agency.

**Unit-3:** Company - Formation - Memorandum - Articles - Prospectus - Shares - Debentures -Directors - Appointment - Powers and Duties - Meetings - Proceedings – Management - Accounts - Audit - Oppression and Mismanagement - Winding up.

**Unit-4:** Intellectual Property Rights & Regulations: Overview of Intellectual Properties, their types and importance of intellectual property protection. Patents: Requirement of patenting, patent specifications and claims, Indian Patent act 1970 and amendments. Patent search, analysis, drafting and stages of filing patent at national level.

**Unit-5:** International Treaties & IPR Organizations: Paris Conventions, Patent Cooperation Treaty (PCT) – introduction, application and general rules. Introduction to concept behind WIPO / WTO / TRIPS / GATT / GATS system & Uruguay Round.

**Suggested Readings:**

1. Pathak, LEGAL ASPECTS OF BUSINESS, Tata McGraw- Hill Publishing Company Limited, New Delhi
2. M.M. Sulphey&Az-har Basheer, LAWS FOR BUSINESS, PHI Learning Pvt. Ltd. New Delhi
- 3.Generic Drug Product Development, Solid Oral Dosage forms, Leon Shargel and IsaderKaufer, Marcel Dekker series, Vol.143, Pharmaceutical Regulatory Process, Edited by Ira R. Berry Marcel Dekker Series,Vol.144
4. New Drug Approval Process: Accelerating Global Registrations By Richard AGuarino, MD, 5th edition, Drugs and the Pharmaceutical Sciences, Vol.19

**Course Title: Sales Promotion and Brand Management in Pharmaceutical Business**

**Course Code: MBA-3PH3**

L	T	P	C.U.
30	5	5	3

**Programme & Semester: MBA III**

**Course Objectives:** The objective of this course is to develop a basic understanding about the sales promotion and brand management. The course will also facilitate the understanding of the conceptual framework sales promotion, brand management and their determinants.

**Course Outcomes (COs): At the end of this course students will be able to:**

CO1- Explaining the meaning of sales promotion, nature and growing importance of sales promotion.

CO2- Describe the post testing, implementing and evaluating the sales promotion programs.

CO3- Explain the making necessary modifications for effective sales promotion programs.

CO4- Elaborate the relevance of brand and value awareness in an effective marketing system.

**Course Contents**

**Unit 1:** Strategic decision making using IMS-Health and C-MARC data for sales and market trend analysis; Using Medical Databases, PubMed and Standard Treatment Algorithms to build brand communication strategies; IFPMA Code of Ethics – Guidelines for Pharmaceutical Promotion

**Unit 2:** Developing content and designing of Scientific Promotional Literatures, Visual Aids and Journal Advertisements; Preparing the Promotional Budget as a part of the Marketing Budget; Monitoring & Controlling long-term projects, field-force activities and promotional-expense budget; Training Skills

**Unit 3:** Brand Name, Brand Image, Brand Value and Brand Awareness, Concept of Brand Equity, difference with brand valuation, Five dimensions of Brand Equity, key influencers of each dimension, prescription loyalty, prescriber coverage frequency, brand exposure through field-force promotion

**Unit 4:** Quality indicators, Promotional-mix, Benefits of building Brand Equity. Brand Management as a strategic marketing function: role of a Pharmaceutical Brand Manager, the 'Little CEO' concept, 'Science meets Commerce' concept

**Unit 5:** Essential differences between managing Pharmaceutical Brands and Consumer Brands, types of Pharmaceutical Brand Management organization structures, challenges of a Brand Manager; relation of Product Management Teams vis-à-vis Sales Force in Pharmaceutical companies

**Suggested Readings:**

1. Harsh Verma . Brand Mmanagement, Second Edition, Excel Publication.
2. Aaker,D.; Managing Brand Equity. RamanujMajumdar (1999) Product Management in India. New Delhi: Prentice Hall.
3. PranK.Chaudhary (2001), Successful Branding, Hyderabad: University Press Hil

**Course Title:Pharmaceutical Retail Management**

**Course Code: MBA-3PH4**

L	T	P	C.U.
30	5	5	3

**Programme& Semester: MBA IV**

**Course Objectives:** The course will give an overview of retail management. The course will also familiarize the students with organized retail and, the value it creates. The course will also make students to develop decisions making skills related to retailing

**Course Outcomes (COs): At the end of this course students will be able to:**

CO1- Evaluate current retailing trends based on consumer, legal and competitive environments.

CO2- Identify various retail opportunities and evaluate the strategies associated with each type of opportunity.

CO3- Distinguish and characterize the factors and management tools that retailers consider and use when developing their merchandising skills.

CO4- Assess current Indian retail practices in their ability to respond to environmental trends.

**Course Contents**

**Unit 1: Retailing**

An Overview, Understanding, Scope and Benefits of pharmaceutical retailing, Overview of Pharmaceutical retailing

**Unit2: Retail Strategies**

Classification of Retailers, Understanding the Retail Customer Population, demographic and geographic analysis, Retail Market Strategy, Strategic Planning Process, Pharmacies as retail outlets for switched drugs, Building Sustainable Competitive Advantage, Marketing Strategies, Product mix and assortment planning process Merchandising and store management Branding strategies.

**Unit3: Retail of OTC drugs**

Historical development of the OTC market, Major players within the OTC market, Rx-to-OTC switching: The changing role of the consumer, Consumer buying behavior for OTC drugs, Growth potential within the OTC market, Merchandise assortment planning, Organizing the buying process by categories, Merchandise purchasing process.

**Unit4: Store Management**

Store layout, design and visual merchandise, Store interior, exterior and security, Visual Merchandising for OTC drug retailing, Future Drivers of OTC Pharmaceuticals, The impact of technology on the drugs market, OTC pharmaceuticals: growth or maturity : in India and global Market Development in Pharmaceutical Marketing

**Suggested Readings:**

1. Barry Berman and Joel R. Evans, Retail Management: A Strategic Approach, Pearson,
2. Michael Levy and Barton AWeitz, Retailing Management, Tata McGraw-Hill,
3. Pradhan, Swapna, Retailing Management-Text & Cases, Tata McGraw-Hill)
4. Bajaj, Chetan, Srivastava Nidhi V, Tuli Rajesh, Retail Management, Oxford,

**Course Title:Supply Chain Management in Pharmaceutical Industry**

**Course Code: MBA-3PH5**

L	T	P	C.U.
30	5	5	3

**Programme& Semester: MBA IV**

**Objectives of the Course** - The objectives of supply chain management in the pharmaceutical industry are to ensure the timely delivery of quality medications, minimize costs, and optimize inventory management. It aims to maintain compliance with regulatory standards, enhance traceability, reduce risks, and improve collaboration among stakeholders to ensure the safety and availability of pharmaceutical products.

**Course Outcomes:**At the end of the course, students will be able to:

CO1: To explain the concept of supply chain management and logistics management.

CO2: To describe performance measurement and control tools.

CO3: To interpret the E business framework related to supply chain management.

### **Unit 1 Introduction to supply chain management**

(a) Basic Concepts, Scope And Philosophy Of Supply Chain Management, (b)Importance Of Supply Chain Management, (c)Supply Chain Decision, (d)Evolution Of Supply Chain Management.

### **Unit 2 Designing the Supply Chain**

(a)Role Of Distribution In Supply Chain, (b)Factors Influencing Distribution Network, (c)Process Of Supply Network Design, (d)Distribution Strategy, (e)Models For Facilities Location And Capacity Allocation, (f)Impact Of Uncertainty On Supply Chain Design, (g)Evaluation Of Supply Chain Design, (h)Demand Chain Management, (i)Strategic Alliances.

### **Unit 3 Performance Measurement and Control**

(a)Concept, Dimensions Of Performance Measurement, (b)Tools For Performance Improvement: Benchmarking: Introduction, Forms Of Benchmarking, GAP Analysis, Benchmarking Study Report; (c)Achieving Strategic Integration, (d)Supply Chain Operations Reference (SCOR) Modeling, SCOR Analysis, (e)Value Chain, (f)Concept Of Configurability, (g)Evaluation Of Supply Chain Performance (Supply Chain Cost Analysis), (h)Impediments To Improved Performance.

### **Unit 4 Logistics Management**

(a)Concept of Logistics, Inbound And Outbound Logistics, (b)Key Activities of Logistics, (c)Managing The Costs Of Logistics, (d)Application Of Logistics Management, (e)Trade-Offs In Logistics Management, (f)Bull-Whip Effect In Logistics, (g)Third And Fourth Party Logistics, (h)Emergence Of IT In Logistics, (i)International Issues In Logistics, (j)Warehousing, Types Of Warehouses, Site Selection, Layout And Design Of Warehouses.

### **Unit 5 Emerging Trends in Supply Chain Management**

(a)Role Of Information Technology (IT) In Supply Chain Management: Electronic Data Interchange (EDI), Use Of Data Mining Tools, E-Business Framework, (b)Customer Profitability Analysis (CPA), (c)International Issues In Supply Chain Management.

### **Suggested Readings:**

1. Chopra, Meindl; *Supply Chain Management: Strategic Planning and Operation*, 2nd ed., Pearson Education, New Delhi.
2. Altekar, *Supply Chain Management: Concepts and Cases*, Prentice-Hall of India, New Delhi
3. BS Sahay, *Supply Chain Management*, Macmillan, New Delhi.
4. G. Raghuram, *Logistics and Supply Chain Management*, Macmillan, New Delhi
5. Balou, *Supply Chain Management*, Pearson Education.

**Course Title: Innovation Management and Startup Ecosystem**

**Course Code:** MBA-4OP4

L	T	P	C.U.
30	5	5	3

**Programme& Semester:** MBA IV

**COURSE DESCRIPTION**

The course aims to provide students with basic concepts and awareness in technological innovation and an understanding of the challenges and opportunities that small and large firms face in relation to this. The course has an integrated approach to tackling the complex concepts in and knowledge about technological innovation in relation to technological development. The course covers areas such as the importance of innovation, leadership in research and development, management of innovation and technology, partnerships, networks and alliances, product and process development, commercialization of research as well as entrepreneurship and business creation.

**COURSE OBJECTIVES:** The students will be able to:

1. Understand the role of innovation and technical change in enterprise and national level economic performance
2. Understand the technological, human, economic, organisational, social and other dimensions of innovation
3. Explore and better manage the effects of new technology on people and worksystems
4. Demonstrate that the effective management of technological innovation requires the integration of people, processes and technology
5. Recognize startup ecosystem and government initiatives to promote startups, opportunities for the commercialization.

**COURSE OUTCOMES:** On completion of the course, the student should be able to:

CO1: Account for the importance of technological development and innovation for economic growth and increased competitiveness on a firm level,

CO2: Critically discuss a firms need to have a strategic and integrated approach to be able to successfully manage innovation and technical development,

CO3: Analyses complex innovation processes in firms both internally and externally. This incorporates for instance basic knowledge about partnerships, alliances, research and development, commercialisation and industrial marketing.

CO4: Understand the concept of startup ecosystem and government initiatives to promote startups.

**COURSE CONTENTS**

**UNIT – 1**

Innovation, need and importance of innovation; technological, human, economic, organisational, social and other dimensions of innovation.

**UNIT - 2**

Innovation as a core business process; Building the innovative organization, Developing an innovation strategy, Sources of innovation; Innovation Networks; Creating new products and services.

**UNIT – 3**

Partnerships, alliances, research and development, commercialization of innovative products and services, entrepreneurship and new ventures.

**UNIT – 4**

Startup ecosystem, stakeholders in Startup ecosystem, Evolution of the Indian Startup Ecosystem, Startup – financing,

**UNIT – 5**

Government initiatives and institutional framework to promote startups in India.

**Suggested Readings**

1. Mark Dodgson , David M. Gann , et al., The Oxford Handbook of Innovation Management (Oxford Handbooks), Oxford University Press; Reprint edition (2015)
2. Clayton M. Christensen, The Innovator&#39;s Dilemma: When New Technologies Cause Great Firms to Fail (Management of Innovation and Change) Harvard Business Review Press; Illustrated edition (2016)

## **Shobhit University, Gangoh**

**(Established by UP Shobhit University Act No. 3, 2012)**

### **School of Business Studies & Entrepreneurship**

#### **Ordinances, Regulations & Syllabus**

**For**

#### **Bachelor of Business Administration (BBA) Three Year Programme Semester Pattern (w.e.f. session 2013-14)**

**Revised and Approved in the year 2021 (17<sup>th</sup> meeting, Board of  
Studies)**

## **Programme Educational Objectives (PEOs)**

**PEO 1** Graduates will demonstrate a comprehensive understanding of core business concepts, including finance, marketing, management, and operations, enabling them to analyze and solve business problems effectively.

**PEO 2** Graduates will apply critical thinking and analytical skills to make informed decisions in complex business environments, considering ethical and social implications.

**PEO 3** Graduates will effectively communicate ideas and information in both written and verbal formats, demonstrating strong interpersonal skills necessary for teamwork and leadership roles.

**PEO 4** Graduates will understand the impact of globalization on business practices and appreciate diverse perspectives, fostering inclusivity in the workplace.

**PEO 5** Graduates will utilize current technologies and data analytics tools to enhance business operations and decision-making processes.

**PEO 6** Graduates will cultivate an entrepreneurial mindset, demonstrating creativity and innovation in developing new business ideas and strategies.

**PEO 7** Graduates will recognize the importance of ethical behavior and social responsibility in business, making decisions that contribute positively to society.

**PEO 8** Graduates will embrace continuous learning and adaptability, equipping them to navigate the evolving business landscape throughout their careers.

## **Programme Specific Objectives (PSO's)**

**PSO 1** Equip students with a foundational understanding of various business functions, including marketing, finance, operations, and human resources.

**PSO 2** Foster the ability to analyze complex business problems and make data-driven decisions using quantitative and qualitative methods.

**PSO 3** Instill a sense of ethical responsibility and integrity in business practices, preparing students to be ethical leaders in their future careers.

**PSO** Improve both written and verbal communication skills, enabling students to effectively present ideas and collaborate in diverse teams.

**PSO5** Inspire innovative thinking and the ability to recognize and capitalize on business opportunities in various environments.

**PSO6** Provide an understanding of global business practices and cultural diversity, preparing students for careers in an interconnected world.

## **Programme Outcome Objectives (POO's)**

**POO 1** Demonstrate a comprehensive understanding of core business concepts, theories, and practices across various disciplines, including finance, marketing, management, and operations.

**POO 2** Apply critical thinking and analytical skills to solve complex business problems and make informed decisions based on quantitative and qualitative data.

**POO 3** Exhibit effective verbal and written communication skills, enabling clear presentation of ideas and persuasive arguments in diverse business contexts.

**POO 4** Work effectively in teams, demonstrating leadership, interpersonal skills, and the ability to manage group dynamics to achieve common goals.

**POO 5** Understand and apply ethical principles and social responsibility in business decision-making, recognizing the impact of business actions on society and the environment.

**POO 6** Analyze and appreciate the impact of globalization on business practices and strategies, and demonstrate cultural awareness in diverse business environments.

**POO 7** Utilize modern technology and information systems to enhance business operations, including data analysis tools and management software.

**POO 8** Foster an entrepreneurial mindset by identifying opportunities, assessing risks, and developing innovative solutions to create value in the marketplace.

**POO 9** Commit to ongoing personal and professional development, recognizing the importance of staying current with industry trends and advancements.

**POO 10** Develop and implement effective business strategies that align with organizational goals and respond to market dynamics.

## **BBA I SEM Syllabus PYTHON (BBN-106A)**

### **CO: COURSE OBJECTIVES**

**CO-1** Develop a foundational understanding of Python programming concepts, including syntax, data types, and control structures.

**CO-2** Apply logical and computational thinking to solve real-world business problems through Python programming.

**CO-3** Understand and apply basic principles of object-oriented programming (OOP) in Python to develop modular and reusable code.

**CO-4** Explore how Python can be integrated with business tools and platforms, such as databases and APIs, to enhance data-driven decision-making.

### **Course Contents**

**Unit I: Introduction to Python:** Overview of Python: History, features, and applications in business.

Setting Up the Environment: Installation of Python and IDEs (e.g., Anaconda, Jupyter Notebook).

Basic Syntax and Data Types: Variables, data types (integers, floats, strings), and type conversion.

Control Structures: Conditional statements (if, else, elif) and loops (for, while).

**Unit II: Data Structures and Functions Lists and Tuples:** Creation, manipulation, and common methods.

Dictionaries and Sets: Key-value pairs, set operations, and their applications. Functions: Defining functions, parameters, return values, and scope. Modules and Packages: Importing modules and using built-in libraries.

**Unit III: Data Manipulation and Analysis:** Introduction to Libraries: Overview of NumPy and Pandas.

DataFrames and Series: Creating, manipulating, and analyzing data using Pandas. Data Cleaning and Preparation: Handling missing values, data types, and filtering data. Basic Statistical Analysis: Descriptive statistics and data summarization techniques.

**Unit IV Data Visualization:** Introduction to Data Visualization: Importance and principles of effective visualization.

Matplotlib and Seaborn: Creating plots (line, bar, histogram, scatter) using Matplotlib; advanced visualizations with Seaborn.

Visualizing Business Data: Practical examples of visualizing sales, performance metrics, and other business-related data.

**Unit V: Practical Applications and Projects:** Automation with Python: Writing scripts for data entry, report generation, and other business tasks.

Introduction to APIs: Fetching and using data from web APIs relevant to business. Capstone Project: Working on a project that incorporates data analysis and visualization to solve a real-world business problem.

Collaboration and Version Control: Introduction to Git for project management and collaboration.

**Suggested Readings:**

1. *"Python Programming: A Modular Approach"* by Reema Thareja
2. *"Introduction to Computing and Problem Solving with Python"* by D. S. Malik
3. *"Data Science Using Python and R"* by Chaurasia, S.
4. *"Python for Data Analysis"* by Wes McKinney (Indian Edition)

### **COURSE OUTCOMES-**

**COs-1** Demonstrate proficiency in Python programming fundamentals, including syntax, data types, and control structures.

**COs-2** Utilize Python libraries such as Pandas and NumPy to manipulate, analyze, and visualize data relevant to business scenarios.

**COs-3** Develop scripts to automate repetitive business tasks, enhancing operational efficiency and productivity..

**COs-4** Understand and apply the principles of object-oriented programming (OOP) to design and implement modular and reusable code.

# BBA I sem Syllabus

## FUNDAMENTALS OF COMPUTER (BBN-106 B)

### CO: COURSE OBJECTIVES

**CO-1** Acquire a foundational knowledge of computer hardware, software, and the principles of operation.

**CO-2** Gain familiarity with various operating systems (e.g., Windows, macOS, Linux) and their functionalities, including file management and system navigation.

**CO-3** Develop proficiency in using common business application software, such as word processors, spreadsheets, and presentation tools

**CO-4** Recognize the importance of cybersecurity, data protection, and safe online practices to mitigate risks in a digital environment.

### *Course Contents*

**Unit I: Introduction to Computers:** Overview of Computers: Definition, types (desktop, laptop, tablet), and components (hardware and software). Computer Architecture: Basic components (CPU, memory, storage) and their functions. Operating Systems: Introduction to operating systems (Windows, macOS, Linux), their functions, and user interfaces. Basic Terminology: Understanding key terms (software, hardware, networks, data).

#### **Unit II: Application Software:**

Word Processing: Introduction to MS Word or Google Docs; formatting, editing, and document management.

Spreadsheets: Overview of MS Excel or Google Sheets; basic formulas, functions, data analysis, and visualization

Presentation Software: Creating presentations using MS PowerPoint or Google Slides; design principles and effective communication

Database Basics: Introduction to database concepts; using basic features of MS Access or Google Sheets for data management.

**Unit III: Internet and Networking:** Understanding the Internet: What is the internet? Components and functioning (ISP, web browsers). Web Technologies: Basics of web applications, websites, and cloud computing.

Networking Concepts: Introduction to local area networks (LAN), wide area networks (WAN), and network protocols. Online

Communication Tools: Overview of email, instant messaging, and collaboration tools (e.g., Slack, Zoom).

**Unit IV: Cybersecurity and Ethics:** Cybersecurity Fundamentals: Importance of cybersecurity; common threats (viruses, phishing, malware). Data Protection: Best practices for securing data, including passwords and encryption. Ethics in

Computing: Understanding digital ethics, privacy issues, and the implications of technology in society. Legal Aspects:

Overview of laws related to data protection and intellectual property

**Unit V: Introduction to Programming Concepts:** Basic Programming Logic: Understanding algorithms, flowcharts, and

pseudocode. Introduction to Programming Languages: Overview of programming languages (Python, Java) and their

applications in business. Hands-On Programming: Simple coding exercises to reinforce concepts (if applicable). Problem-

Solving with Computers: Applying programming concepts to solve basic business problems.

#### **Suggested Readings:**

1. *"Fundamentals of Computers"* by V. Rajaraman

2. *"Computer Science with Python"* by S. D. Sharma

3. *"Fundamentals of Information Technology"* by R. S. Salaria Rani

4. *"Information Technology: Principles and Practices"* by K. K. Jain

#### **COURSE OUTCOMES-**

**COs-1** Demonstrate a foundational understanding of computer hardware, software, and basic architecture.

**COs-2** Utilize common business application software (e.g., word processors, spreadsheets, and presentation tools) effectively for various tasks.

**COs-3** Discuss ethical issues related to technology use, including privacy, intellectual property, and responsible digital citizenship.

**COs-4** Apply computational thinking to analyze business scenarios and develop technology-driven solutions.

## BBA I sem Syllabus

### COMPUTER SYSTEM SECURITY (BBN-106 C)

#### CO: COURSE OBJECTIVES

**CO-1** Acquire a foundational knowledge of computer security concepts, including types of threats, vulnerabilities, and attack vectors..

**CO-2** Develop the ability to design and implement basic security controls and policies to protect information assets.

**CO-3** Understand network security protocols and tools, including firewalls, intrusion detection systems, and secure communication methods.

**CO-4** Gain skills in developing and executing incident response plans to effectively handle security breaches and incidents.

#### Course Contents

**Unit I: Introduction to Computer Security:** Overview of Computer Security: Definition, importance, and key concepts.

Types of Threats: Malware, phishing, social engineering, insider threats, and physical threats.

Security Vulnerabilities: Common vulnerabilities in hardware, software, and networks. Basic Security Principles:

Confidentiality, integrity, availability, and authentication.

**Unit II: Risk Management and Security Policies:** Word Processing: Introduction to MS Word or Google Docs; formatting,

editing, and document management. Spreadsheets: Overview of MS Excel or Google Sheets; basic formulas, functions, data

analysis, and visualization Presentation Software: Creating presentations using MS PowerPoint or Google Slides; design

principles and effective communication .Database Basics: Introduction to database concepts; using basic features of MS

Access or Google Sheets for data management.

**Unit III: Network Security:** Network Security Fundamentals: Understanding network architecture and common security

threats .Firewalls and Intrusion Detection Systems: Types, configurations, and best practices.

Secure Communication Protocols: HTTPS, SSL/TLS, VPNs, and secure email practices. Wireless Security: Security

measures for Wi-Fi networks and mobile devices.

**Unit IV: Data Protection and Cryptography:** Data Protection Strategies: Encryption methods, secure data storage, and

backup solutions. Cryptographic Techniques: Symmetric and asymmetric encryption, hashing, and digital signatures .Data

Loss Prevention: Strategies for preventing data breaches and loss.

Incident Response Planning: Developing incident response plans and handling breaches.

**Unit V Emerging Threats and Security Trends:** Current Cyber Threat Landscape: Overview of recent attacks and trends in

cybersecurity. Social Media and Cybersecurity: Risks associated with social media use in business.

Cloud Security: Security considerations for cloud computing and storage. Future Trends: Emerging technologies (AI, IoT)

and their impact on security.

#### Suggested Readings:

1. "*Cyber Security: Understanding Cyber Crimes, Computer Forensics and Legal Perspectives*" by Nina Godbole and Sunit Belapure

2. "*Computer Security: Principles and Practice*" by William Stallings and Lawrie Brown

3. "*Ethical Hacking and Penetration Testing Guide*" by G. R. S. Rao

4. "*Information Security: A Practical Guide to Data Security*" by S. K. Singh

#### COURSE OUTCOMES-

**COs-1** Demonstrate a clear understanding of key concepts in computer security, including threats, vulnerabilities, and security policies.

**COs-2** Effectively identify, analyze, and prioritize risks to information systems and propose appropriate mitigation strategies.

**COs-3** Develop and implement basic security measures and policies to safeguard organizational information assets.

Recognize the legal and ethical considerations surrounding cybersecurity, including compliance with relevant regulations and standards.

**COs-4** Apply computational thinking to analyze business scenarios and develop technology-driven solutions.

## BBA II sem Syllabus

### Fundamentals of Communication (BBN-206 A)

#### CO: COURSE OBJECTIVES

**CO-1**Analyze key communication theories and their relevance to business practices.

**CO-2** Enhance verbal communication skills through effective speaking and active listening practices.

**CO-3**Create and deliver engaging presentations using appropriate tools and techniques.

**CO-4**Gain proficiency in digital communication tools and platforms.

#### Course Contents

**Unit I: Introduction to Communication:** Definition and importance of communication in business

Communication models and processes Barriers to effective communication

**Unit II: Verbal and Non-Verbal Communication:** Elements of verbal communication: tone, clarity, and style

Importance of active listening Non-verbal communication: body language, facial expressions, and gestures.

**Unit III: Written Communication**Principles of professional writing: clarity, conciseness, and coherence

Formats for business communication: emails, reports, memos, and proposals Tailoring messages for different audiences

**Unit IV: Presentation and Public Speaking Skills:** Preparing and organizing presentations

Using visual aids and technology effectively overcoming public speaking anxiety and engaging the audience

**Unit V: Interpersonal and Team Communication:**Effective communication in teams: roles and responsibilities Conflict

resolution and negotiation strategies Cultural awareness and communication in diverse teams.

#### Suggested Readings:

1 "*Business Communication*" by P.D. Chaturvedi and Mukesh Chaturvedi

2 "*Business Communication: A Guide to Writing and Speaking*" by V. R. S. Seshadri

3 "*Corporate Communication*" by T. S. Raghunath

4 "*Business Communication: A Hands-on Approach*" by Neeraja M. Raghavan

#### COURSE OUTCOMES-

**COs-1**Students will demonstrate effective verbal and non-verbal communication skills in various business contexts, enhancing their ability to convey information clearly and persuasively.

**COs-2**Students will produce well-structured and professionally written documents, including emails, reports, and proposals, tailored to specific audiences and purposes.

**COs-3**Students will recognize and adapt communication styles to accommodate cultural differences, enhancing their effectiveness in diverse business environments..

**COs-4**Students will effectively utilize various digital communication tools and platforms, understanding their impact on business communication practices..

## BBA II sem Syllabus

### SPREADSHEET ESSENTIALS (BBN-206 B)

#### CO: COURSE OBJECTIVES

**CO-1** Familiarize students with the basic structure, features, and functionalities of spreadsheet software (e.g., Microsoft Excel, Google Sheets).

**CO-2** Equip students with skills to analyze data using sorting, filtering, and pivot tables, allowing them to draw meaningful insights from datasets.

**CO-3** Familiarize students with scenario analysis tools such as data tables and goal seek to make informed business decisions based on variable changes.

**CO-4** Encourage students to apply critical thinking skills to solve business problems using spreadsheets, enhancing their analytical capabilities.

#### Course Contents

**Unit I: Introduction to Spreadsheets:** Overview of Spreadsheet Software:

Introduction to Microsoft Excel and Google Sheets Differences and similarities between platforms Understanding ribbons, toolbars, and menus Navigation basics: rows, columns, and cells.

**Unit II: Formulas and Functions:** Understanding formula structure and operator precedence

Using relative vs. absolute references Debugging formulas and handling errors Utilizing SUM, AVERAGE, COUNT, COUNTA, MAX, and MIN Exploring date and time functions (TODAY, NOW, DATE, DATEDIF).

**Unit III: Data Analysis and Management:** Data Organization Techniques Sorting data in ascending and descending order Filtering data using basic and advanced filters Introduction to Pivot Tables Creating and modifying pivot tables

Understanding row/column labels, values, and filters Pivot charts for data visualization Data Validation and Error Checking Setting up data validation rules for input control .Using drop-down lists and error messages .Techniques for error checking and correcting data Conditional Formatting Applying conditional formatting rules. Using color scales, data bars, and icon sets for visual insights.

**Unit IV: Data Visualization** Chart Types and Their Applications Overview of different chart types: bar, line, pie, scatter, and more .Understanding when to use specific chart types for data representation Creating and Customizing Charts Step-by-step guide to creating charts from data Customizing chart elements: titles, legends, labels, and colors Dashboard . Creation Principles of effective dashboard design .Integrating multiple charts and data visualizations in one view .Best Practices for Presenting Data Guidelines for visual clarity and impact. Techniques for storytelling with data in presentations.

**Unit V: Advanced Features and Applications:** Utilizing Goal Seek for target value analysis, Creating data tables for scenario comparison, Basics of macros: recording and editing .Practical applications of macros for repetitive tasks.

**Suggested Readings:**

1 "Excel 2019 for Dummies" by Greg Harvey

2 "Advanced Excel for Productivity" by Dinesh Kumar

3 "Practical Excel for Financial Analysts" by Rajesh K. K.

4 "Data Analysis Using Excel" by R. K. Gupta

#### COURSE OUTCOMES-

**COs-1** Students will demonstrate competence in using spreadsheet applications (e.g., Microsoft Excel, Google Sheets), navigating the user interface, and performing basic functions.

**COs-2** Students will accurately enter and format data, applying appropriate styles and techniques to enhance clarity and presentation.

**COs-3** Students will analyze datasets using sorting, filtering, and pivot tables, enabling them to derive meaningful insights for decision-making.

**COs-4** Students will demonstrate knowledge of advanced spreadsheet features, including What-If analysis, data validation, and basic macros, enhancing their analytical capabilities.

**BBAII SEM Syllabus**  
**CRITICAL THINKING AND STORY TELLING(BBN-206 C)**

**CO: COURSE OBJECTIVES**

**CO-1**Develop students' ability to analyze, evaluate, and synthesize information to make informed decisions in business contexts.

**CO-2**Teach students how to articulate ideas clearly and persuasively, both in writing and verbally, to influence stakeholders..

**CO-3**Enable students to use storytelling to enhance presentations, marketing strategies, and brand narratives to connect with customers and stakeholders.

**CO-4**Analyze case studies to identify critical thinking strategies and storytelling methods used by successful businesses.

**CourseContents**

**UnitI:Introduction to Critical Thinking:**Definition and significance of critical thinking.

Components of critical thinking: analysis, evaluation, and inference. Barriers to critical thinking..

**UnitII:Analytical Reasoning and Decision-Making:**Logical reasoning and argumentation. Decision-making models: rational, intuitive, and creative approaches. Evaluating evidence and sources. Activities: Case studies analysis. Decision-making simulation exercises.

**UnitIII:The Art of Storytelling:** Narrative structure: beginning, middle, and end. Emotional resonance and audience engagement. Types of stories: personal, corporate, and customer stories. Activities: Storytelling workshops: crafting and sharing personal narratives. Analyzing effective business stories (e.g., brand narratives).

**UnitIV:Integrating Critical Thinking and Storytelling:** Frameworks for integrating analysis into storytelling.Persuasive techniques: ethos, pathos, and logos in storytelling. Visual storytelling and its impact.

*UnitV:Ethical Considerations and Real-World Applications:Ethical dilemmas in business communication.Case studies of ethical storytelling.Final project preparation: integrating course concepts.*

**Suggested Readings:**

1. *"The Road to Success: The Story of India's Most Successful Businessmen" by Shashi Tharoor*
2. *"The Art of Thinking Clearly" by Rolf Dobelli "*
3. *"Business Sutra: A Very Indian Approach to Management" by Devdutt Pattanaik*
4. *"My Life is My Message" by Mohandas Karamchand Gandhi*

**COURSE OUTCOMES-**

**COs-1**Students will demonstrate the ability to analyze and evaluate complex business scenarios, identifying key issues and proposing logical solutions.

**COs-2**Students will apply decision-making frameworks to real-world business problems, making informed choices based on evidence and sound reasoning.

**COs-3**Students will successfully integrate critical thinking into their storytelling, crafting narratives that not only inform but also persuade and motivate.

**COs-4** Students will engage in self-reflection to assess their growth as critical thinkers and storytellers, identifying strategies for continuous improvement.

## BBA II sem Syllabus

### CRITICAL THINKING FOR DECISIONS AT WORKPLACE (BBN-206 D)

#### CO: COURSE OBJECTIVES

**CO-1** Define critical thinking and its importance in the workplace, focusing on how it enhances decision-making processes.

**CO-2** Develop skills to evaluate information sources, identify biases, and assess the validity of arguments and claims.

**CO-3** Develop skills to create actionable plans for implementing decisions, including setting objectives and measuring outcomes.

**CO-4** Encourage self-reflection on personal biases and assumptions that may influence decision-making and critical thinking.

#### Course Contents

**Unit I: Introduction to Critical Thinking:** Definition and importance in business decision-making.

Key concepts: clarity, accuracy, precision, relevance, depth, breadth, and logic. The Role of Critical Thinking in Professional Settings: Enhancing decision quality and problem-solving capabilities. Critical thinking as a skill for effective leadership and teamwork. Barriers to Critical Thinking: Identifying cognitive biases, emotional influences, and logical fallacies.

**Unit II: Problem Solving and Decision-Making Models:** Types of workplace problems: routine, complex, and crisis situations. Techniques for defining and analyzing problems. Decision-Making Models: Rational decision-making model: stages and applications. Intuitive decision-making: when to trust gut feelings. Collaborative decision-making: techniques for team-based approaches.

**Unit III: Analyzing Information and Arguments:** Distinguishing between credible and non-credible sources.

Techniques for effective research and fact-checking. Analyzing Arguments: Identifying premises and conclusions in arguments. Evaluating the validity and soundness of arguments. Logical Reasoning: Understanding deductive and inductive reasoning. Common logical fallacies and how to avoid them.

**Unit IV: Ethical Considerations in Decision-Making:** The importance of ethics in decision-making processes.

Frameworks for ethical decision-making: utilitarianism, deontological ethics, and virtue ethics.

Assessing Ethical Implications: Analyzing case studies to evaluate ethical dilemmas. Strategies for integrating ethics into critical thinking and decision-making. Developing a Personal Ethical Framework: Reflecting on personal values and their impact on decision-making.

**Unit V: Applying Critical Thinking in Real-World Scenarios:** Analyzing real-world business scenarios and decision-making challenges. Group discussions on critical thinking applications in various industries.

Role-Playing and Simulations: Engaging in role-playing exercises to practice decision-making in simulated environments.

Reflective Practices: Developing self-assessment techniques to enhance critical thinking skills over time. Creating personal action plans for continuous improvement in decision-making.

#### Suggested Readings:

1 *"Business Decision Making: A Critical Thinking Approach"* by K. R. Ramesh

2 *"Critical Thinking for Managers: A Practical Guide"* by A. K. Gupta

3 *"Rethinking Management: Critical Perspectives on the Changing Nature of Work"* by Neelam Singh

4 *"Ethics and Critical Thinking in Business"* by Varsha K.

#### COURSE OUTCOMES-

**COs-1** Students will demonstrate improved critical thinking abilities, enabling them to analyze information and arguments effectively in various business contexts.

**COs-2** Students will apply systematic problem-solving techniques to identify, analyze, and develop solutions for workplace challenges.

**COs-3** Students will recognize and apply principles of logical reasoning, avoiding common logical fallacies in their arguments and analyses.

**COs-4** Students will articulate their thoughts, rationale, and recommendations clearly and persuasively in both written and verbal formats.

## **BBAIII SEM Syllabus**

### **TAX LAW (BBN-302 B )**

#### **CO: COURSE OBJECTIVES**

The objective of this course is to introduce students to the foundational principles of tax law, with a focus on the different types of taxes, their legal basis, and their impact on individuals, businesses, and the economy.

#### **CourseContents**

**UnitI: Income Tax Law and Tax Planning-** Basic Concepts, Residential Status and Tax Incidence, Exempted Incomes, Computation of Taxable Income under Various heads Computation of Taxable Income of Individuals and firms Deduction of Tax, filling of returns, different types of assessments, default and penalties

**UnitII: Financial & Management Accounting-** Basic Accounting concepts, Capital and Revenue, Financial statements Partnership Accounts: admission, Retirement, Death, Dissolution and Cash Distribution Advanced Company Accounts: Issue, forfeiture, Purchase of Business, Liquidation, Valuation of shares, Amalgamation, Absorption and Reconstruction, Holding Company Accounts

**UnitIII: Business Statistics & Data Processing-** Data types, Data collection and analysis, sampling, need, errors and methods of Sampling, Normal distribution, Hypothesis testing, Analysis and Interpretation of Data Correlation and Regression, Sample tests- i-test, F-test and chi-square test Data processing – Elements, Data entry, Data processing and Computer Applications Computer Application to Functional Areas – Accounting, Inventory control Marketing

**UnitIV: Financial Management-** Capital Structure, Financial and Operating leverage Cost of capital; Capital budgeting Working capital management Dividend Policy

**UnitV: Accounting and Finance-** Accounting standards in India, Inflation Accounting, Human Resource Accounting, Responsibility, Social Accounting Money and Capital market, working of stock exchanges in India, NSE, OTCEI, NASDAQ, Derivatives and Options Regulatory Authorities: SEBI, Rating Agencies; New Instruments: GDRs, ADRs Venture Capital Funds, Mergers and Acquisitions, Mutual Funds, Lease Financing, Factoring, Measurements of risk and returns securities and portfolios Computer Application in accounting and Finance

#### **SUGGESTED READINGS-**

**"Principles of Taxation for Business and Investment Planning"** by Sally M. Jones and Shelley C. Rhoades-Catanach

**"Taxation of Individuals and Business Entities"** by Jeffrey A. Maine, Brian C. Spilker, William H. Hoffman, and David M. Maloney

**"Income Tax Law and Practice"** by H.C. Mehta

#### **COURSE OUTCOMES-**

**COs-1**Students will demonstrate the ability to analyze and evaluate complex business scenarios, identifying key issues and proposing logical solutions.

**COs-2**Students will apply decision-making frameworks to real-world business problems, making informed choices based on evidence and sound reasoning.

**COs-3**Students will successfully integrate critical thinking into their storytelling, crafting narratives that not only inform but also persuade and motivate.

**COs-4**Students will engage in self-reflection to assess their growth as critical thinkers and storytellers, identifying strategies for continuous improvement.

**BBIII SEM Syllabus**  
**INTELLECTUAL PROPERTY LAW (BBN-302 C )**

**CO: COURSE OBJECTIVES**

The objective of this course is to introduce students to the fundamental principles of intellectual property (IP) law, focusing on the various types of intellectual property rights, including patents, copyrights, trademarks, and trade secrets. .

**CourseContents**

**UnitI: Introduction Origin and Development of IPR** – Historical and theoretical basis for protection of IPR – Analysing and understanding the Interpretation of IP laws – Need for Protecting IP

**UnitII: Concept of Property-** Theories on concept of property – Nature – Public Vs. Private – Tangible Vs. Intangible – Industrial Vs. Intellectual

**UnitIII:International IP Regime** -World Intellectual Property Organisation (WIPO) – Functions of WIPO – Membership – GATT Agreement – Major Conventions on IP – Berne Convention – Paris Convention – TRIPS agreement.

**UnitIV: Indian IP Regime-** Overview of IP laws in India – Major IP Laws in India – International treaties signed by India. IPR and Constitution of India.

**UnitV: Forms of IPR Forms of IPR** – Copyright – Trademark – Patents – Industrial Designs – Trade Secrets – Geographical Indications - Application of different forms of IPR.

**Reference Books**

## **BBAIII SEM Syllabus**

### **Etiquate & conversation skills (BBN-305 A )**

#### **CO: COURSE OBJECTIVES**

The objective of this course is to introduce students to the fundamental principles of etiquette and conversational skills, emphasizing their importance in both personal and professional settings. The course aims to equip students with the knowledge and practical skills needed to navigate various social and business interactions with confidence, courtesy, and respect.

#### **UnitI: Communication:**

- Importance and Purpose of Communication
- Process of Communication
- Types of Communication
- Definition, Nature and Scope of Communication

#### **UnitII: Non-Verbal Communication**

- Personal Appearance Gesture
  - Postures
  - Facial Expression
  - Eye Contacts
  - Body Language(Kinesics)
  - Time language
  - Silence
  - Tips for Improving Non-Verbal Communication.

**UnitIII: Meeting Etiquette-** Managing a Meeting, Meeting agenda, Minute taking,; Duties of the chairperson and secretary; Effective Meeting Strategies - Preparing for the meeting, Conducting the meeting, Evaluating the meeting Presentation Etiquettes: Importance of Preparation and Practice; Effective Delivery Techniques, Audience Analysis, Handling Stage Frigh

**UnitIV: Communication Skills-** Understanding Human Communication, Constitutive Processes of Communication, Language as a tool of communication, Barriers to Effective communication, Strategies to Overcome the Barriers.

**UnitV: Teamwork and Leadership Skills-** Concept of Teams; Building effective teams; Concept of Leadership and honing Leadership skills. Personality: Meaning & Definition, Determinants of Personality, Personality Traits, Personality and Organisational Behaviour Motivation: Nature & Importance, Herzberg's Two Factor theory, Maslow's Need Hierarchy theory.

#### **SUGGESTED READINGS-**

1. **"The Etiquette Advantage in Business: Personal Skills for Professional Success"** by Peggy Post and Peter Post
2. **"The Art of Conversation: A Guided Tour of a Neglected Pleasure"** by Catherine Blyth
3. **"Business Etiquette: 101 Ways to Conduct Business with Charm and Savvy"** by Peter Post

**BBAIII SEM Syllabus**  
**Personality Development (BBN-305 B )**

**CO: COURSE OBJECTIVES**

The objective of this course is to introduce students to the fundamental principles of etiquette and personality development, focusing on how personal behavior, communication skills, and social interactions shape an individual's success in both personal and professional environments. The course aims to equip students with the tools to enhance their social grace, emotional intelligence, and self-confidence.

**CourseContents**

**UnitI: Introduction to Personality Development** -The concept of personality - Dimensions of personality – Theories of Freud & Erickson-Significance of personality development. The concept of success and failure: What is success? - Hurdles in achieving success - Overcoming hurdles - Factors responsible for success – What is failure - Causes of failure. SWOT analysis.

**UnitII: Attitude & Motivation** - Concept - Significance - Factors affecting attitudes - Positive attitude – Advantages – Negative attitude- Disadvantages - Ways to develop positive attitude - Differences between personalities having positive and negative attitude. Concept of motivation - Significance – Internal and external motives - Importance of self- motivation- Factors leading to de-motivation

**UnitIII: Self-esteem** -Term self-esteem - Symptoms - Advantages - Do's and Don'ts to develop positive self-esteem – Low selfesteem - Symptoms - Personality having low self esteem - Positive and negative self esteem. Interpersonal Relationships – Defining the difference between aggressive, submissive and assertive behaviours - Lateral thinking.

**UnitIV:Other Aspects of Personality Development-** Body language - Problem-solving - Conflict and Stress Management - Decision-making skills - Leadership and qualities of a successful leader – Character building -Team-work – Time management - Work ethics –Good manners and etiquette.

**UnitV: Employability Quotient-** Resume building- The art of participating in Group Discussion – Facing the Personal (HR & Technical) Interview -Frequently Asked Questions - Psychometric Analysis - Mock Interview Sessions.

*SUGGESTED READINGS-*

1. **"How to Win Friends and Influence People"** by Dale Carnegie
2. **"The Power of Now: A Guide to Spiritual Enlightenment"** by Eckhart Tolle
3. **"Emotional Intelligence: Why It Can Matter More Than IQ"** by Daniel Goleman

**BBA III SEM Syllabus**  
**CORPORATE COMMUNICATION (BBN-305 C )**

**CO: COURSE OBJECTIVES**

The objective of this course is to introduce students to the fundamental principles of etiquette and corporate communication, focusing on how professional behavior and effective communication contribute to success in the workplace. The course aims to provide students with the knowledge and skills to navigate corporate environments with confidence and professionalism.

**CourseContents**

Unit 1: Introduction to Corporate Communication

**1.1 Concept of Corporate Communication**

Definition and Scope

Importance in modern business

Objectives of corporate communication

**1.2 Corporate Communication in Organizations**

Roles and functions of corporate communication

Internal vs External communication

Stakeholder communication

**1.3 Corporate Communication Process**

The communication process model

Types of corporate communication (Written, Oral, Visual, and Digital)

Barriers to communication and overcoming them

Unit 2: Corporate Communication Tools and Channels

**2.1 Communication Channels**

Traditional (Letters, Memos, Reports)

Digital Communication (Emails, Social Media, Blogs, Websites)

Face-to-face communication (Meetings, Presentations, Conferences)

**2.2 Written Communication in Corporate World**

Business writing style

Drafting corporate documents (Reports, Proposals, Press Releases)

Email etiquette and professional communication

**2.3 Public Relations (PR)**

Definition and function of PR in corporate communication

PR tools and techniques

Media relations, press conferences, and handling media inquiries

Unit 3: Organizational Communication

**3.1 Internal Communication**

Importance of internal communication

Types of internal communication (Downward, Upward, Lateral)

Tools for internal communication (Intranet, Internal Newsletters, Meetings)

**3.2 Communication Flow and Structure**

Formal vs Informal communication flow

Organizational hierarchy and communication patterns

Cross-functional and cross-cultural communication

**3.3 Leadership Communication**

Role of leadership in organizational communication

Communication strategies for managers and leaders

Decision-making and effective communication

Unit 4: Crisis Communication

#### **4.1 Understanding Crisis Communication**

Definition and types of business crises

The importance of crisis communication in protecting corporate reputation

Crisis communication plan

#### **4.2 Communication During Crisis**

Steps in handling crises: Preparation, Response, and Recovery

Case studies of successful and failed crisis communications

Key strategies: Transparency, Empathy, and Accountability

#### **4.3 Media and Crisis Management**

Role of media in crisis communication

Engaging with the media during a crisis

Crisis communication through press releases and public statements

Unit 5: Corporate Communication Strategies and Case Studies

#### **5.1 Corporate Communication Strategies**

Developing effective communication strategies for businesses

Aligning communication strategies with corporate goals

Measuring the effectiveness of corporate communication

#### **5.2 Branding and Communication**

The role of corporate communication in brand management

Consistency in brand messaging

Corporate identity, brand image, and positioning

#### **5.3 Corporate Communication and International Business**

Cross-cultural communication and global strategies

Adapting corporate communication for international markets

The impact of globalization on communication

#### **Recommended Reading:**

**Corporate Communication: A Guide to Theory and Practice** by Joep Cornelissen

**Effective Business Communication** by Herta A. Murphy and Herbert W. Hildebrandt

**The New Rules of Marketing and PR** by David Meerman Scott

**Corporate Communication: A Strategic Approach** by James E. Grunig

## **BBAIII SEM Syllabus PROFESSIONAL COMMUNICATION (BBN-305 D )**

### **CO: COURSE OBJECTIVES**

The objective of this course is to introduce students to the fundamental principles of etiquette and professional communication, focusing on how proper conduct and effective communication enhance success in the workplace.

### Unit 1: Introduction to Professional Communication

#### *1.1 Definition and Importance of Professional Communication*

- Understanding the role of communication in professional settings
- Differences between personal and professional communication
- The significance of effective communication in business success

#### *1.2 Types of Communication*

- **Verbal Communication:** Oral and written communication
  - Face-to-face interactions
  - Telephonic and video conferencing
- **Non-verbal Communication:** Body language, gestures, posture, facial expressions
- **Written Communication:** Emails, reports, memos, business letters
- **Visual Communication:** Charts, graphs, presentations

#### *1.3 Principles of Effective Communication*

- Clarity, conciseness, coherence
- Active listening, feedback, and paraphrasing
- Empathy and politeness in communication

### Unit 2: Communication Models and Theories

#### *2.1 Communication Process*

- Components: Sender, message, medium, receiver, feedback
- The communication flow: Top-down, bottom-up, and horizontal

#### *2.2 Models of Communication*

- **Linear Model** (e.g., Shannon-Weaver Model)
- **Transactional Model:** Two-way communication
- **Interactive Model:** Involves feedback loop

#### *2.3 Barriers to Effective Communication*

- **Physical barriers:** Noise, distance, technological issues
- **Psychological barriers:** Stress, emotional state, preconceptions
- **Cultural barriers:** Language differences, misinterpretation of non-verbal cues
- **Semantic barriers:** Misunderstanding due to unclear wording or jargon

## Unit 3: Business Writing and Report Writing

### 3.1 Fundamentals of Business Writing

- Writing for clarity, purpose, and audience
- Choosing the right tone and style for different business documents
- Avoiding jargon and overly complex sentences

### 3.2 Types of Business Documents

- **Emails:** Professional email etiquette and formats
- **Business Letters:** Formal letter structure, cover letters, thank-you letters
- **Memos:** Internal communication, structure, and usage
- **Reports:** Structure of a business report, research reports, analytical reports

### 3.3 Report Writing

- **Research reports:** Gathering, analyzing, and presenting data
- **Formal vs. Informal Reports**
- **Executive Summary:** Key elements and writing tips

## Unit 4: Presentation Skills

### 4.1 The Art of Presentation

- Importance of visual aids (PowerPoint slides, charts, diagrams)
- Structuring a presentation (Introduction, Body, Conclusion)
- Engaging the audience with storytelling, examples, and humor

### 4.2 Delivery Skills

- Speaking clearly, confidently, and audibly
- Body language: Eye contact, gestures, posture
- Managing nervousness and anxiety

### 4.3 Handling Questions and Feedback

- Techniques for handling difficult questions
- Giving and receiving constructive feedback
- Engaging with the audience through interactive discussions

## Unit 5: Interpersonal and Group Communication

### 5.1 Interpersonal Communication in Business

- Building rapport and trust
- Conflict resolution and negotiation skills
- Understanding personality types in communication (e.g., assertive, passive, aggressive)

### 5.2 Group Communication

- **Group dynamics:** Roles, norms, and leadership
- Effective group meetings: Setting agendas, keeping discussions on track, managing time
- Decision-making in groups: Brainstorming, consensus building

### *5.3 Cross-Cultural Communication*

- Understanding cultural differences in communication styles
- Adapting communication to diverse audiences
- Importance of cultural awareness in global business environments

## **BBAIII SEM Syllabus DISASTER MANAGEMENT (BBN-306 A )**

### **CO: COURSE OBJECTIVES**

The objective of this course is to introduce students to the fundamental principles of etiquette and disaster management, focusing on how proper conduct and effective response strategies are essential in both everyday and crisis situations.

### **CourseContents**

#### Unit 1: Introduction to Disaster Management

- **Definition of Disaster:** What constitutes a disaster, types of disasters (natural and man-made).
- **Types of Disasters:** Natural (earthquakes, floods, hurricanes, etc.) and man-made (chemical spills, nuclear accidents, terrorism).
- **Disaster Management:** Understanding the importance and goals (mitigation, preparedness, response, recovery).
- **Phases of Disaster Management:**
  - **Mitigation:** Measures to reduce disaster impact (e.g., infrastructure planning, environmental protection).
  - **Preparedness:** Preparing individuals, communities, and organizations (e.g., training, creating disaster management plans).
  - **Response:** Immediate actions taken post-disaster (e.g., rescue operations, medical aid).
  - **Recovery:** Long-term actions to rebuild and restore affected areas (e.g., rebuilding homes, supporting mental health).

#### **Key Learning Outcomes:**

- Define disasters and disaster management.
- Identify types and causes of disasters.
- Understand the core phases of disaster management.

#### Unit 2: Disaster Risk Management

- **Risk Reduction:** Principles of reducing the risk of disasters (e.g., building regulations, land-use planning).
- **Risk Assessment:** Identifying hazards, vulnerabilities, and capacities.
- **Vulnerability Analysis:** Assessing the physical, social, and economic vulnerabilities of communities.
- **Disaster Risk Financing:** Understanding how resources are allocated for risk mitigation (insurance, government funding, community funds).
- **Early Warning Systems:** Use of technology in predicting and mitigating disaster impacts.

#### **Key Learning Outcomes:**

- Understand risk management concepts and principles.
- Conduct risk assessments and vulnerability analysis.
- Identify and use early warning systems.

#### Unit 3: Role of Government and Organizations in Disaster Management

- **National and International Bodies:** Understanding the role of agencies like NDRF (National Disaster Response Force), UNDP, WHO, and other NGOs in disaster management.
- **Disaster Management Policies:** Overview of India's National Policy on Disaster Management.
- **Government Structure:** Local, state, and central disaster management coordination.
- **Public-Private Partnerships (PPPs):** Collaboration between the government, businesses, and non-governmental organizations in disaster risk reduction and response.

#### **Key Learning Outcomes:**

- Understand the role of government and international bodies.
- Learn about the disaster management policies in India and globally.
- Study the coordination mechanism among different disaster management stakeholders.

#### Unit 4: Crisis Communication and Media in Disaster Management

- **Communication in Disasters:** Importance of clear and effective communication during crises (e.g., alerts, instructions, updates).
- **Role of Media:** How media (both traditional and social) influences disaster management (e.g., spreading awareness, providing real-time information).
- **Public Relations in Crisis:** Managing relationships with the public during and after a disaster.
- **Challenges in Crisis Communication:** Overcoming misinformation, panic, and communication breakdowns during disasters.

#### Key Learning Outcomes:

- Understand the importance of communication in managing disasters.
- Analyze the role of media in disaster management.
- Develop strategies for effective crisis communication.

#### Unit 5: Disaster Management and Business Continuity

- **Business Continuity Planning (BCP):** Creating strategies for businesses to remain operational during and after a disaster.
- **Risk Assessment for Businesses:** Identifying potential risks that could disrupt business operations (e.g., natural disasters, cybersecurity threats).
- **Disaster Recovery Plans:** Developing plans for data recovery, employee safety, and resource allocation during crises.
- **Impact of Disasters on Businesses:** How disasters affect the economy, business operations, and employee well-being.
- **Case Studies:** Successful business continuity strategies post-disaster.

#### 1. *SUGGESTED READINGS-*

2. *"Introduction to International Disaster Management"* by Damon P. Coppola
3. *"Disaster Management: A Disaster Manager's Handbook"* by K. S. Verma

#### Key Learning Outcomes:

- Learn how to develop business continuity and disaster recovery plans.
- Assess business risks related to disasters.

Study real-life case studies of businesses coping with disasters

## **BBIII SEM Syllabus FOOD & NUTRITION (BBN-306 B )**

### **CO: COURSE OBJECTIVES**

The objective of this course is to introduce students to the fundamental principles of etiquette and food and nutrition, focusing on how proper behavior and nutrition contribute to personal well-being and social harmony.

### **CourseContents**

#### Unit 1: Introduction to Food and Nutrition

- **Overview of Nutrition:** Definition, importance of nutrition in health and disease prevention.
- **Macronutrients:** Carbohydrates, proteins, and fats—functions, sources, and digestion.
- **Micronutrients:** Vitamins and minerals—types, roles in the body, deficiencies, and toxicity.
- **Balanced Diet:** Definition and components of a balanced diet, food pyramid, and daily nutrient requirements.
- **Food Security:** Global and national perspectives on food security, issues related to malnutrition and hunger.

#### Unit 2: Digestion and Metabolism

- **Digestive System:** Structure and function of the digestive system, stages of digestion, enzymes involved.
- **Absorption and Transport:** Absorption of nutrients in the small intestine, transport via blood and lymph.
- **Metabolism:** Definition, catabolism, anabolism, and metabolic pathways (glycolysis, Krebs cycle, and oxidative phosphorylation).
- **Energy Balance:** Concepts of energy intake, expenditure, and weight management, basal metabolic rate (BMR).
- **Disorders of Metabolism:** Common metabolic disorders such as diabetes, obesity, and metabolic syndrome.

#### Unit 3: Food Groups and Their Nutrients

- **Cereals and Grains:** Types (wheat, rice, oats), nutritional content, and uses.
- **Fruits and Vegetables:** Importance of vitamins, minerals, and fiber, role in disease prevention.
- **Dairy Products:** Nutritional importance of milk, cheese, yogurt; lactose intolerance.
- **Meat, Poultry, and Fish:** Protein content, fat profile, and micronutrient contribution.
- **Legumes, Nuts, and Seeds:** Plant-based proteins, healthy fats, and other nutrients.

#### Unit 4: Food Processing, Preservation, and Safety

- **Food Processing Techniques:** Methods like drying, freezing, canning, pasteurization, and their effects on nutrients.
- **Food Preservation:** Methods including refrigeration, salting, pickling, and their role in extending shelf life and maintaining nutritional value.
- **Food Safety:** Importance of food hygiene and sanitation, preventing foodborne illnesses, food handling standards.
- **Food Additives:** Types of additives (preservatives, colorants, flavor enhancers), their functions, safety, and regulation.
- **Contaminants in Food:** Pesticides, heavy metals, microbial contamination, and their impact on health.

#### Unit 5: Public Health Nutrition and Trends in Diet

- **Nutrition in Different Life Stages:** Nutritional requirements during infancy, childhood, adolescence, adulthood, pregnancy, and old age.
- **Nutritional Deficiencies:** Common deficiency diseases (e.g., scurvy, rickets, anemia) and their prevention.
- **Diet and Chronic Diseases:** Relationship between diet and conditions such as heart disease, cancer, diabetes, and obesity.
- **Global Nutrition Issues:** Malnutrition, overnutrition, and the role of organizations like WHO in addressing nutritional concerns.

- **Emerging Trends:** Functional foods, plant-based diets, superfoods, and food innovations (e.g., personalized nutrition).

### Suggested Resources for Each Unit:

#### 1. **Textbooks:**

- “Nutrition and Dietetics” by Roberta Larson Duyff
- “Advanced Nutrition and Human Metabolism” by Sareen S. Gropper and Jack L. Smith
- “Food Science” by Norman N. Potter & Joseph H. Hotchkiss

#### 2. **Research Journals:**

- The Journal of Nutrition
- Food Research International

International Journal of Food Science & Technology

## **BBIII SEM Syllabus ENVIRONMENT OF STUDIES (BBN-306 C)**

### **CO: COURSE OBJECTIVES**

The objective of this course is to introduce students to the fundamental principles of the environment of studies, focusing on the various factors that influence learning, academic performance, and the overall educational experience.

### **CourseContents**

#### **Unit 1: Introduction to Environment Studies**

##### *Objective*

To provide an understanding of the environment and its components, the importance of studying environmental issues, and the interconnectedness of human activities and the environment.

##### *Key Topics:*

- 1. Concept of Environment**
  - Definition and scope
  - Components of the environment (Physical, Biological, and Cultural components)
  - The role of the environment in human life
- 2. Environmental Studies and its Importance**
  - Evolution of environmental studies
  - Interdisciplinary nature of environmental studies
  - Environmental ethics and values
- 3. Ecology and Ecosystems**
  - Basics of ecology: Organisms, populations, and communities
  - Ecosystem dynamics and processes (Energy flow, food chains, and webs)
  - Types of ecosystems (terrestrial and aquatic)

#### **Unit 2: Natural Resources and Their Management**

##### *Objective:*

To study the types of natural resources, their significance, issues related to their overuse, and the role of sustainable development in resource management.

##### *Key Topics:*

- 1. Types of Natural Resources**
  - Renewable and non-renewable resources
  - Forest resources, water resources, land resources, and mineral resources
  - Energy resources (Fossil fuels, solar energy, wind energy)
- 2. Resource Depletion and Conservation**
  - Causes of depletion of resources
  - Strategies for conservation and management
  - Sustainable resource management techniques
- 3. Biodiversity and its Conservation**
  - Definition of biodiversity (species, genetic, and ecosystem diversity)
  - Threats to biodiversity (habitat loss, climate change, pollution)
  - Conservation strategies (in-situ and ex-situ conservation)

## Unit 3: Environmental Pollution

### *Objective:*

To understand the different types of environmental pollution, their causes, impacts, and measures for prevention and control.

### *Key Topics:*

#### 1. **Types of Pollution**

- Air Pollution (Causes, effects, and control measures)
- Water Pollution (Causes, effects, and control measures)
- Soil Pollution (Causes, effects, and control measures)
- Noise Pollution (Causes, effects, and control measures)

#### 2. **Impact of Pollution on Ecosystems and Human Health**

- Effects on plant and animal life
- Impact on human health (Respiratory problems, skin diseases, etc.)
- Global warming and climate change

#### 3. **Pollution Control and Legal Framework**

- Pollution control measures (technological and policy interventions)
- Role of government agencies (Central Pollution Control Board, Ministry of Environment and Forests)
- Environmental Laws (Environment Protection Act, Water Act, Air Act)

## Unit 4: Environmental Policy and Legislation

### *Objective:*

To understand the role of government policies, regulations, and international agreements in addressing environmental issues.

### *Key Topics:*

#### 1. **National Environmental Policy**

- Objectives and strategies of the National Environmental Policy of India
- Governmental institutions responsible for environmental governance (MoEFCC, CPCB)
- Role of local bodies and NGOs in environmental management

#### 2. **Environmental Legislation in India**

- The Environment Protection Act, 1986
- The Water (Prevention and Control of Pollution) Act, 1974
- The Air (Prevention and Control of Pollution) Act, 1981

#### 3. **International Environmental Initiatives**

- United Nations Environment Programme (UNEP)
- Earth Summit (1992), Kyoto Protocol, and Paris Agreement
- Sustainable Development Goals (SDGs) and their relation to the environment

## Unit 5: Sustainable Development and Environmental Management

### *Objective:*

To explore the concept of sustainable development, its importance, and practices for achieving environmental sustainability in business and society.

### *Key Topics:*

#### 1. **Concept of Sustainable Development**

- Definition of sustainability and sustainable development

- The three pillars of sustainability (Environmental, Social, and Economic)
- The role of sustainable development in global environmental protection
- 2. **Corporate Social Responsibility (CSR)**
  - Role of businesses in environmental sustainability
  - CSR initiatives for environmental protection
  - Green marketing and eco-friendly business practices
- 3. **Global Environmental Challenges**
  - Climate change and global warming
  - Water scarcity and pollution
  - Overpopulation and overconsumption
  - Strategies for a sustainable future (Renewable energy, Circular economy, Green technologies)

#### **SUGGESTED READINGS-**

1. *"Principles of Environmental Science: Inquiry and Applications"* by William P. Cunningham and Barbara Woodworth Saigo
2. *"Environmental Studies: A Textbook for Undergraduates"* by S. C. Soni
3. *"The Environment and You"* by Norman Myers

## **BBA IVSEM Syllabus Publication Ethics (BBN-402A)**

### **CO: COURSE OBJECTIVES**

The objective of this course is to introduce students to the fundamental principles of publication ethics, focusing on the ethical standards and best practices in academic and professional publishing. The course aims to provide students with an understanding of the key issues related to authorship, plagiarism, peer review, conflicts of interest, and the responsible conduct of research and publication.

### **Course Contents**

#### Unit 1: Introduction to Publication Ethics

**Objective:** To introduce students to the fundamental concepts of publication ethics and its importance in academic and professional contexts.

#### *Topics Covered:*

- Definition and Scope of Publication Ethics
- Importance of Ethical Practices in Research and Publication
- Key Ethical Issues in Publishing (Authorship, Conflicts of Interest, Peer Review)
- Ethical Guidelines by Major Publishing Bodies (COPE, Elsevier, Springer)
- Role of Publication Ethics in Maintaining Research Integrity

#### *Learning Outcomes:*

- Understand the significance of ethical practices in academic publishing.
- Familiarity with major ethical guidelines and codes of conduct for researchers and authors.

#### Unit 2: Authorship and Contribution

**Objective:** To explore the principles of authorship, criteria for assigning authorship, and the responsibilities of each contributor to the work.

#### *Topics Covered:*

- Defining Authorship: Criteria and Contributions
- Order of Authors: First, Corresponding, and Last Authors
- Responsibilities of Authors: Drafting, Revising, and Accountability
- Authorship Disputes and Resolutions
- Ghostwriting and Guest Authorship
- Contributions of Non-authors and Acknowledgments

#### *Learning Outcomes:*

- Gain a clear understanding of who qualifies as an author.
- Understand the ethical implications of authorship and contributions.

#### Unit 3: Plagiarism and Research Integrity

**Objective:** To discuss the issues of plagiarism, research misconduct, and how to ensure integrity in academic and professional writing.

### Topics Covered:

- Definition and Types of Plagiarism (Direct, Mosaic, Self-plagiarism)
- Methods of Detecting Plagiarism
- Consequences of Plagiarism in Research and Publishing
- Research Misconduct: Fabrication and Falsification of Data
- Best Practices for Avoiding Plagiarism
- Ethical Use of Sources: Citations, Quotations, and Paraphrasing

### Learning Outcomes:

- Understand what constitutes plagiarism and research misconduct.
- Learn best practices for preventing plagiarism and maintaining research integrity.

## Unit 4: Peer Review Process

**Objective:** To provide students with an understanding of the peer review process in academic publishing and its role in ensuring quality and ethics in research.

### Topics Covered:

- The Role and Importance of Peer Review in Publishing
- Types of Peer Review (Single-blind, Double-blind, Open Review)
- Responsibilities of Reviewers, Authors, and Editors
- Ethical Issues in Peer Review (Bias, Conflicts of Interest, Reviewer Misconduct)
- Handling Confidentiality and Conflicts of Interest in Peer Review
- Impact of Peer Review on Publication Ethics

### Learning Outcomes:

- Understand the peer review process and its role in scholarly communication.
- Identify the ethical challenges faced by reviewers, authors, and editors.

## Unit 5: Publication Ethics in the Digital Age

**Objective:** To examine the emerging ethical issues in digital publishing and the impact of digital platforms on the ethics of research and publication.

### SUGGESTED READINGS-

1. **Wager, E., & Williams, P. (2013).** *How to Handle Authorship Disputes: A Guide for New Researchers.* *The International Journal of Clinical Practice*, 67(6), 551-556.
2. **International Committee of Medical Journal Editors (ICMJE). (2019).** *ICMJE*
3. **Angell, M. (2009).** *The Truth About the Drug Companies: How They Deceive Us and What to Do About It.* Random House.

### Learning Outcomes:

- Understand the ethical issues surrounding digital and open-access publishing.
- Learn how to identify and avoid unethical publishing practices in the digital era.

## **BBA IV SEM Syllabus**

### **Emerging Trends in Research (BBN-402B)**

#### **COURSE OBJECTIVE-**

The objective of this course is to introduce students to the fundamental principles of emerging trends in research, focusing on the latest advancements, methodologies, and technologies shaping the landscape of academic and applied research.

#### **Unit 1: Introduction to Emerging Research Trends**

- **Topics Covered:**
  - Overview of emerging research trends in science, technology, and humanities.
  - Technological advancements driving research: AI, machine learning, big data, blockchain, etc.
  - Global challenges and opportunities: Climate change, pandemics, digital transformation, and equity.
  - The rise of interdisciplinary research and global collaboration.
  - Research funding trends and the rise of open science.

#### **Unit 2: Big Data and Data Science in Research**

- **Topics Covered:**
  - Big data: Concepts, sources, and characteristics (volume, variety, velocity).
  - Tools and technologies in data science: Python, R, Hadoop, Spark, and cloud computing.
  - Data analytics and machine learning in research: Predictive models, data mining, and pattern recognition.
  - Applications in various research fields: Healthcare, social sciences, environmental science, and business.
  - Ethical considerations: Data privacy, informed consent, and algorithmic bias.

#### **Unit 3: Artificial Intelligence (AI) and Machine Learning (ML) in Research.**

- **Topics Covered:**
  - Introduction to AI and machine learning: Types (supervised, unsupervised, reinforcement learning).
  - Applications of AI/ML in research: Automating literature reviews, hypothesis testing, and data analysis.
  - AI and ML in fields such as healthcare (e.g., predictive diagnostics, drug discovery), environmental science, and social research.
  - The ethical dimensions of AI and ML in research: Bias, transparency, and accountability in AI models.
  - AI-driven innovation: Robotics, natural language processing (NLP), and autonomous systems.

#### **Unit 4: Sustainability and Climate Change Research**

- **Topics Covered:**
  - Climate change science: Impacts, modeling, and solutions.
  - Role of technology in sustainability research: Renewable energy, smart cities, circular economy.
  - Research on sustainable agriculture, conservation, and resource management.
  - The role of AI, big data, and IoT in environmental monitoring and decision-making.
  - Global initiatives in sustainability research: UN Sustainable Development Goals, international collaborations.

#### **Unit 5: Ethical Issues in Emerging Research**

- **Topics Covered:**
  - Ethical principles in research: Integrity, accountability, transparency, and reproducibility.
  - Ethics in AI and data science: Consent, data ownership, and algorithmic accountability.
  - Ethical challenges in biotechnology and genomics: Gene editing, cloning, and bioengineering.
  - The ethics of surveillance, big data, and privacy concerns in research.
  - The role of institutional review boards (IRBs) and global ethical standards.

## Suggested Readings:

1. **"The Structure of Scientific Revolutions"** by Thomas S. Kuhn – A foundational text that explores how scientific paradigms shift over time, providing a framework for understanding emerging trends in research.
2. **"Big Data: A Revolution That Will Transform How We Live, Work, and Think"** by Viktor Mayer-Schönberger and Kenneth Cukier – Explains the transformative role of big data in contemporary research and its impact on various fields.
3. **"Data Science for Business"** by Foster Provost and Tom Fawcett – A comprehensive guide to understanding data science, with applications relevant to academic research.
4. **"Artificial Intelligence: A Guide for Thinking Humans"** by Melanie Mitchell – A broad and accessible overview of artificial intelligence, exploring its potential and ethical concerns.
5. **"Weapons of Math Destruction"** by Cathy O'Neil – Discusses how big data and algorithms, when used irresponsibly, can exacerbate inequality and social harm.

## **BBA IV SEM Syllabus**

### **Rural Sociology & Educational Psychology (BBN-406A)**

#### **Course Objective:**

The objective of this course is to provide students with a comprehensive understanding of the socio-cultural dynamics of rural communities and their impact on education, as well as the psychological principles that affect learning and teaching processes. This course integrates the study of rural sociology, with a focus on rural life, rural-urban differences, and the challenges faced by rural education systems, alongside educational psychology, which examines the cognitive, emotional, and developmental aspects of learners in educational settings. By the end of the course, students will be equipped to apply sociological and psychological principles to improve education in rural contexts.

---

#### **CONTENT:**

---

#### **Unit 1: Introduction to Rural Sociology**

##### **Content:**

Definition, scope, and significance of rural sociology  
Rural vs. urban society: Characteristics and differences  
Rural communities: Structure and social organization  
Social change in rural societies: Factors and impact  
Importance of rural sociology in the context of education

##### **Key Concepts:**

Rural Society, Community, Social Organization, Social Change, Rural-Urban Continuum

---

#### **Unit 2: Rural Institutions and Education**

##### **Content:**

The role of family, caste, religion, and local governance in rural areas  
Education in rural society: Challenges and opportunities  
The impact of social institutions on educational outcomes  
Role of rural schools in socialization and community development  
Barriers to education in rural areas: Economic, social, and infrastructural

##### **Key Concepts:**

Rural Education, Social Institutions, Education Inequality, Community Development

---

#### **Unit 3: Theories of Educational Psychology**

##### **Content:**

Introduction to educational psychology  
Key theories of learning: Behaviorism, Cognitivism, Constructivism  
Developmental stages in children (Piaget, Vygotsky, Erikson)  
Motivation and learning theories: Intrinsic vs. extrinsic motivation  
Theories of intelligence and the impact on teaching methods

##### **Key Concepts:**

Learning Theories, Cognitive Development, Motivation, Intelligence, Instructional Strategies

---

#### **Unit 4: Cognitive and Emotional Development in Education**

##### **Content:**

Cognitive development in children: Piagetian stages and their relevance to education  
Emotional and social development in the classroom  
Emotional intelligence and its role in learning  
The impact of socio-economic status on cognitive development  
Educational implications of cognitive and emotional development

##### **Key Concepts:**

Cognitive Development, Emotional Intelligence, Social Development, Classroom Dynamics

## **Unit 5: Applied Educational Psychology in Rural Contexts**

### **Content:**

Psychological issues affecting rural students (stress, motivation, learning disabilities)

Teacher-student interactions in rural schools

Applying educational psychology for improving rural education outcomes

Strategies for inclusive education in rural schools

Role of counseling and guidance in rural educational settings

### **Key Concepts:**

Learning Disabilities, Teacher-Student Interaction, Inclusive Education, Counseling, Rural Education Strategies

---

### **Suggested Readings:**

#### **Rural Sociology:**

Bottomore, T. B. (1974). *Sociology: A Guide to Problems and Literature*. George Allen & Unwin.

Davis, K., & Moore, W. E. (1945). *Some Principles of Stratification*. *American Sociological Review*, 10(2), 242–249.

Singh, K. (2004). *Rural Sociology in India*. Dattsons Publishing.

#### **Educational Psychology:**

Woolfolk, A. (2019). *Educational Psychology* (14th ed.). Pearson Education.

Santrock, J. W. (2019). *Educational Psychology* (7th ed.). McGraw-Hill Education.

Ormrod, J. E. (2016). *Educational Psychology: Developing Learners* (9th ed.). Pearson Education.

#### **Developmental Psychology in Education:**

Berk, L. E. (2013). *Child Development* (9th ed.). Pearson Education.

Vygotsky, L. S. (1978). *Mind in Society: The Development of Higher Psychological Processes*. Harvard University Press.

**BBA IV SEM Syllabus**  
**Science, Technology and Society (BBN-406B)**

**CO: COURSE OBJECTIVES**

The objective of this course is to introduce students to the fundamental principles of the relationship between science, technology, and society, focusing on how scientific advancements and technological innovations shape social structures, cultural norms, and economic development.

**Course Contents**

Unit 1: Introduction to Science, Technology, and Society (STS)

**Learning Objectives:**

- Understand the relationship between science, technology, and society.
- Analyze the role of science and technology in modern society.
- Learn about the historical development of scientific knowledge and technological advancements.

**Topics:**

1. **Definition and Scope of STS:** Key concepts and definitions of science, technology, and society.
2. **History of Science and Technology:** Evolution of scientific thinking and technological progress (Ancient to Modern).
3. **The Role of Science and Technology in Shaping Society:** Influence of scientific discoveries and technological inventions on culture, economy, and politics.
4. **Interdisciplinary Nature of STS:** Understanding the intersection of scientific knowledge, technological development, and societal needs.
5. **Science, Technology, and Innovation in Economic Development:** How advancements drive business and economic growth.

**Learning Outcome:** Students will gain a foundational understanding of the critical relationship between science, technology, and society, and how these elements influence global and local communities.

Unit 2: The Impact of Technology on Society

**Learning Objectives:**

- Examine the social, cultural, and ethical implications of technological advancements.
- Discuss how technology shapes lifestyle, communication, work, and relationships.
- Understand the role of technology in social change and progress.

**Topics:**

1. **Technological Innovation and Social Change:** How technological revolutions (Industrial Revolution, Information Age, Digital Transformation) influence societal structures.
2. **Communication Technologies:** Impact of the internet, social media, and mobile technologies on human interaction and culture.
3. **Work and Labor in a Technological World:** Automation, artificial intelligence, and robotics in reshaping labor markets and business practices.

4. **Technological Dependency and Digital Divide:** Issues of access to technology, digital inequality, and global technology gaps.
5. **Technology and Globalization:** The role of technology in bridging international borders and promoting a global economy.

**Learning Outcome:** Students will understand how technology shapes society and its individuals, influencing everything from the workplace to relationships and cultural identity.

### Unit 3: Ethical Issues in Science and Technology

#### Learning Objectives:

- Analyze the ethical challenges brought about by technological advancements.
- Understand the moral responsibilities of scientists, engineers, and businesses in the development of new technologies.

#### Topics:

1. **Ethics of Technological Development:** The need for ethical considerations in developing new technologies (e.g., AI, genetic engineering, nanotechnology).
2. **Privacy and Data Security:** Ethical implications of surveillance, data collection, and digital privacy in the age of big data.
3. **Environmental Ethics:** The role of technology in environmental conservation, sustainability, and climate change (green technologies, eco-friendly innovations).
4. **Biotechnology and Genetic Engineering:** Ethical debates surrounding gene editing (CRISPR), cloning, and biotechnology in health care.
5. **Artificial Intelligence and Ethics:** Implications of AI on decision-making, autonomy, and societal impact.

**Learning Outcome:** Students will develop a critical understanding of the ethical considerations in the development and deployment of technology, particularly in terms of privacy, autonomy, and sustainability.

### Unit 4: Technology and Economic Development

#### Learning Objectives:

- Explore the role of technology in driving economic growth and innovation.
- Understand how technological advancements affect business strategies and global markets.

#### Topics:

1. **The Role of Technology in Economic Growth:** How innovations in manufacturing, transportation, and communication shape economies.
2. **Technological Entrepreneurship:** The rise of startups and the role of technology in creating new industries (e.g., Silicon Valley).
3. **Digital Economy:** The shift towards e-commerce, fintech, and digital business models.
4. **Disruptive Technologies:** Understanding emerging technologies such as blockchain, cryptocurrencies, 3D printing, and their potential to disrupt traditional industries.
5. **Technology, Employment, and Wealth Distribution:** Impact of automation and artificial intelligence on jobs, wages, and wealth inequality.

**Learning Outcome:** Students will learn how businesses leverage technology for competitive advantage, as well as the broader economic implications of technological innovation.

## Unit 5: Science, Technology, and Global Challenges

### Learning Objectives:

- Examine how science and technology contribute to solving global issues.
- Discuss the ethical and societal challenges posed by global problems and technological solutions.

### Topics:

1. **Global Health and Biotechnology:** The role of science and technology in solving global health challenges (e.g., pandemics, vaccines, public health infrastructure).
2. **Climate Change and Sustainable Development:** The technological and scientific solutions to mitigate the effects of climate change (e.g., renewable energy, carbon capture).
3. **Technology and Global Security:** The impact of technology on national security, cyber security, and international relations.
4. **Technology and Global Governance:** The role of international institutions in regulating and guiding technological development (e.g., United Nations, World Health Organization).
5. **Humanitarian Technology:** The role of technology in addressing poverty, famine, and crisis management.

### SUGGESTED READINGS-

1. **Bijker, W. E., Hughes, T. P., & Pinch, T. (2012).** *The Social Construction of Technological Systems: New Directions in the Sociology and History of Technology*. MIT Press.
2. **Mitcham, C. (2014).** *Thinking Through Technology: The Path Between Engineering and Philosophy*. University of Chicago Press.
3. **Jasanoff, S. (2004).** *The Fifth Branch: Science Advisers as Policymakers*. Harvard University Press.

**Learning Outcome:** Students will develop an awareness of how science and technology are being used to address critical global challenges, along with an understanding of the ethical and practical constraints of these efforts.

**BBA V SEM Syllabus**  
**SOCIAL MEDIA MARKETING(BBN-502A)**

**CO: COURSE OBJECTIVES**

The objective of this course is to introduce students to the fundamental principles of social media marketing, focusing on the strategies, tools, and techniques used to effectively promote products, services, and brands on various social media platforms.

**CourseContents**

Unit 1: Introduction to Social Media Marketing

**Objective:** To provide an overview of social media marketing, its importance, and how it has evolved in the digital age.

- **1.1: Overview of Social Media Marketing**
  - Definition and scope of social media marketing.
  - Role of social media in modern marketing strategies.
  - Benefits of social media marketing for businesses.
  - Types of social media platforms: Facebook, Instagram, Twitter, LinkedIn, YouTube, TikTok, etc.
- **1.2: History and Evolution of Social Media**
  - Growth of the internet and rise of social media platforms.
  - Impact of social media on consumer behavior and businesses.
- **1.3: Understanding the Social Media Ecosystem**
  - The role of influencers, bloggers, and social media personalities.
  - Social media trends and their impact on marketing strategies.
- **1.4: Ethics and Legal Issues in Social Media Marketing**
  - Privacy concerns, terms of service, and ethical practices.
  - Handling customer feedback and criticism.

Unit 2: Social Media Strategy Development

**Objective:** To teach how to develop and implement a social media strategy that aligns with business goals.

- **2.1: Setting Social Media Goals and Objectives**
  - Defining SMART goals for social media marketing.
  - Aligning social media objectives with business goals.
  - Key Performance Indicators (KPIs) for social media success.
- **2.2: Target Audience Identification**
  - Understanding customer demographics and behavior.
  - Segmenting the audience: Psychographics, interests, and online behavior.
- **2.3: Creating a Social Media Marketing Plan**
  - Crafting a content calendar.
  - Choosing the right platforms for the target audience.
  - Budgeting for social media marketing campaigns.
- **2.4: Competitor Analysis**
  - Analyzing competitors' social media presence.
  - Tools for social media monitoring and analysis.

## Unit 3: Content Creation and Engagement

**Objective:** To equip students with skills for creating compelling content and engaging with audiences effectively.

- **3.1: Content Creation for Social Media**
  - Types of content: Text, images, videos, infographics, stories, live streams.
  - Content formats for different platforms: Facebook posts, Instagram stories, TikTok videos, etc.
  - Best practices for content creation and visual storytelling.
- **3.2: Writing for Social Media**
  - Crafting effective headlines and captions.
  - The importance of tone, voice, and brand personality.
  - Strategies for increasing engagement with content.
- **3.3: Social Media Engagement Techniques**
  - Building an online community.
  - Responding to comments, messages, and customer inquiries.
  - Encouraging user-generated content and collaborations.
- **3.4: Hashtags and Trends**
  - Importance of hashtags in social media visibility.
  - Leveraging trending topics for engagement.

## Unit 4: Social Media Advertising and Paid Campaigns

**Objective:** To understand the principles of paid advertising on social media platforms and how to execute successful campaigns.

- **4.1: Social Media Advertising Overview**
  - Introduction to paid social media marketing.
  - Benefits of social media advertising over traditional advertising.
  - Understanding paid ad formats on different platforms (Facebook Ads, Instagram Ads, LinkedIn Ads, etc.).
- **4.2: Creating and Managing Ads**
  - Setting up paid campaigns on Facebook, Instagram, and other platforms.
  - Targeting options: Demographics, interests, behavior, custom audiences.
  - Budgeting and bidding strategies for paid campaigns.
- **4.3: Analyzing Ad Performance**
  - Measuring ROI and success metrics for paid ads.
  - A/B testing for ad creatives and formats.
  - Adjusting campaigns based on performance data.
- **4.4: Advanced Social Media Advertising Techniques**
  - Retargeting and remarketing strategies.
  - Influencer marketing and partnerships.
  - Native ads, sponsored content, and affiliate marketing.

## Unit 5: Analytics, Monitoring, and Crisis Management

**Objective:** To teach the importance of monitoring and analyzing social media performance, as well as handling crises in the digital space.

- **5.1: Social Media Analytics**
  - Tools for tracking social media metrics (Google Analytics, Facebook Insights, Hootsuite, etc.).

- Key metrics: Engagement, reach, impressions, conversion rates, etc.
- Understanding and interpreting social media data to refine strategies.
- **5.2: Social Media Listening and Monitoring**
  - Importance of monitoring brand mentions and sentiment.
  - Social listening tools and techniques for gathering audience insights.
- **5.3: Crisis Management in Social Media**
  - Identifying and responding to social media crises.
  - Case studies of brands that handled social media crises well and poorly.
  - Developing a crisis communication plan for social media.
- **5.4: Measuring and Reporting Social Media ROI**
  - Tracking business outcomes from social media efforts.
  - Generating reports for clients or management.
  - Adjusting strategies based on performance data.

**Suggested Readings:**

1. *"The Road to Success: The Story of India's Most Successful Businessmen"* by Shashi Tharoor
2. *"The Art of Thinking Clearly"* by Rolf Dobelli "
3. *"Business Sutra: A Very Indian Approach to Management"* by Devdutt Pattanaik
4. *"My Life is My Message"* by Mohandas Karamchand Gandhi

**BBAV SEM Syllabus**  
**PERSPECTIVES ON CONTEMPORARY ISSUES(BBN-502B)**

**CO: COURSE OBJECTIVES**

The objective of this course is to introduce students to the fundamental principles of contemporary global and societal issues, focusing on a broad range of challenges and opportunities faced by individuals, communities, and nations today.

**CourseContents**

Unit 1: Introduction to Contemporary Issues

**Objective:**

To provide an understanding of the significance and scope of contemporary issues in business and society.

*Topics:*

- Definition and scope of contemporary issues
- Globalization and its impact on business
- Economic, social, and political factors influencing contemporary issues
- Interdisciplinary perspectives on contemporary issues (business, environment, technology, etc.)
- Identifying and categorizing contemporary issues: Local, National, and Global
- Emerging trends in the world economy and business practices

*Learning Outcomes:*

- Understanding of key concepts related to contemporary issues
- Ability to categorize contemporary issues based on their scope and impact
- Familiarity with global trends and their effects on businesses

Unit 2: Economic and Environmental Issues

**Objective:**

To explore the economic and environmental challenges facing businesses and societies today.

*Topics:*

- Economic disparities: poverty, wealth inequality, and unemployment
- Economic crises: causes, effects, and case studies (e.g., the 2008 global financial crisis)
- Sustainability and corporate social responsibility (CSR)
- Climate change and its impact on business operations
- Environmental sustainability practices in business
- Green economy and the role of businesses in environmental conservation

*Learning Outcomes:*

- Critical analysis of the economic challenges affecting businesses
- Understanding the role of business in sustainable development
- Awareness of the environmental challenges and regulations impacting industries

### Unit 3: Technological Advances and Their Impact

**Objective:**

To examine how technological advancements shape contemporary business practices, industries, and societies.

*Topics:*

- The rise of artificial intelligence and automation in business
- Digital transformation in business operations
- Ethical issues in technology: data privacy, AI ethics, and cybersecurity
- The impact of the Internet of Things (IoT) and Big Data on industries
- Technological innovation in communication, transportation, and manufacturing
- The role of social media and digital marketing in contemporary business strategies

*Learning Outcomes:*

- Understanding the influence of technology on business models
- Ability to assess the ethical implications of technological advancements
- Exploring the opportunities and challenges presented by technological disruption

### Unit 4: Social and Cultural Issues

**Objective:**

To explore social, cultural, and demographic shifts that are influencing business practices and societal norms.

*Topics:*

- Global migration trends and their impact on the workforce
- Gender equality and diversity in the workplace
- Social justice movements and corporate responsibility
- The role of businesses in addressing racial, cultural, and ethnic diversity
- Corporate governance and ethical leadership in a diverse society
- The rise of millennial and Gen Z consumers: behavior and preferences

*Learning Outcomes:*

- Analyzing how social issues impact business decisions
- Understanding the importance of diversity, equity, and inclusion in business
- Assessing how businesses can adapt to changing cultural expectations

### Unit 5: Political and Legal Challenges

**Objective:**

To explore the political and legal issues affecting businesses in a contemporary global landscape.

*Topics:*

- Government regulations and their impact on business
- The role of international trade agreements and geopolitics in business strategy
- Political instability and its influence on global markets
- Ethical issues in corporate law: corruption, fraud, and governance

- Privacy laws and their effects on global business practices
- The role of lobbying and corporate influence in politics

*Learning Outcomes:*

- Understanding the impact of political and legal environments on businesses
- Analyzing global business risks related to political instability
- Exploring legal frameworks and their implications for corporate operations

**Suggested Readings:**

2. **McKibben, B. (2010).** *Eaarth: Making a Life on a Tough New Planet*. Times Books.
3. **Sen, A. (2009).** *The Idea of Justice*. Belknap Press.

## **BBA VSEM Syllabus Intelligent Automation (BBN-502C)**

### **CO: COURSE OBJECTIVES**

The objective of this course is to introduce students to the fundamental principles of intelligent automation, focusing on the integration of artificial intelligence (AI), machine learning (ML), robotics, and advanced technologies into business and industrial processes.

### **Course Contents**

#### **Unit 1: Introduction to Intelligent Automation and Digital Transformation**

**Duration:** 3 Weeks

#### *Learning Objectives:*

- Understand the concept of Intelligent Automation (IA) and its role in business.
- Explore the intersection of artificial intelligence, robotic process automation (RPA), and machine learning in transforming business operations.
- Study the business cases and industry applications of IA.

#### *Topics Covered:*

1. **Introduction to Intelligent Automation (IA)**
  - Definition and components (AI, RPA, ML, and NLP)
  - Evolution of Automation: From Traditional to Intelligent Automation
  - Key Drivers of Digital Transformation
2. **Technologies Behind Intelligent Automation**
  - Robotic Process Automation (RPA)
  - Artificial Intelligence and Machine Learning
  - Natural Language Processing (NLP)
  - Internet of Things (IoT) in Automation
3. **Impact of Intelligent Automation on Business Processes**
  - Business Process Optimization and Streamlining
  - Cost Reduction and Efficiency Gains
  - Enhancing Customer Experience through Automation
4. **Industry Case Studies:**
  - Intelligent Automation in Finance, Healthcare, and Retail

#### **Unit 2: Robotic Process Automation (RPA)**

**Duration:** 3 Weeks

#### *Learning Objectives:*

- Develop a foundational understanding of RPA tools and their business applications.
- Gain practical knowledge of RPA design, deployment, and maintenance.

#### *Topics Covered:*

1. **Introduction to RPA**

- RPA vs Traditional Automation
- Key Benefits and Challenges
- Popular RPA Tools: UiPath, Automation Anywhere, Blue Prism
- 2. **RPA in Business**
  - Automating Back-office Operations
  - Customer Service Automation
  - Data Management and Reporting Automation
- 3. **RPA Implementation Life Cycle**
  - Planning, Designing, and Developing RPA Solutions
  - Deploying RPA in Business Functions
  - Monitoring, Managing, and Scaling RPA Solutions
- 4. **Hands-On Activities**
  - RPA Tool Demonstration and Basic Automation Design

### Unit 3: Artificial Intelligence and Machine Learning for Automation

#### *Learning Objectives:*

- Understand the role of AI and ML in automation.
- Explore AI-driven solutions and machine learning algorithms that enable smarter automation.

#### *Topics Covered:*

1. **Overview of Artificial Intelligence**
  - Definitions, History, and Evolution of AI
  - Types of AI: Narrow AI vs General AI
  - AI Algorithms and Their Applications in Automation
2. **Machine Learning (ML) Basics**
  - Supervised vs Unsupervised Learning
  - Key ML Algorithms: Decision Trees, Neural Networks, Clustering, Regression
  - Integrating ML into Business Automation
3. **AI and ML in Business Automation**
  - Predictive Analytics and Decision-Making Automation
  - Chatbots and Virtual Assistants for Customer Engagement
  - Fraud Detection and Risk Management Automation
4. **Case Studies:**
  - AI in Healthcare, Retail, and Marketing Automation

### Unit 4: Automation in Business Operations and Strategy

#### *Learning Objectives:*

- Examine the strategic implications of adopting Intelligent Automation in various business functions.
- Learn how to implement and scale automation across business operations.

#### *Topics Covered:*

1. **Intelligent Automation in Operations**
  - Automating HR, Finance, Sales, and Marketing
  - End-to-End Automation Solutions for Business Functions
2. **Strategic Integration of Automation**
  - Aligning Automation with Business Goals and Objectives
  - Change Management and Employee Training

- Overcoming Resistance to Automation in Business
- 3. **Measuring the Impact of Automation**
  - KPIs for Automation Success
  - ROI Analysis and Cost-Benefit Assessment
- 4. **Automation Governance and Risk Management**
  - Ethical Considerations in AI and Automation
  - Managing Automation Risks and Compliance Challenges

## Unit 5: The Future of Intelligent Automation and Emerging Trends

### *Learning Objectives:*

- Investigate the future potential of Intelligent Automation in business.
- Analyze emerging trends such as hyperautomation, AI-driven decision-making, and automation ethics.

### *Topics Covered:*

1. **Emerging Trends in Intelligent Automation**
  - Hyperautomation and its Implications
  - AI-driven Business Decision-Making and Autonomous Systems
  - Integration of Blockchain with Automation
2. **The Role of Automation in Industry 4.0**
  - Smart Manufacturing and AI in Supply Chains
  - Autonomous Vehicles and Robotics in Logistics
3. **The Human-AI Collaboration**
  - Re-skilling the Workforce in the Age of Automation
  - The Evolving Role of Employees in Automated Environments
4. **Future Challenges and Opportunities in Automation**
  - Ethical Challenges in Automation and AI
  - The Future Workforce: Collaborating with Machines

### SUGGESTED READINGS-

2. **Avasarala, V. (2018).** *Robotic Process Automation and Cognitive Automation: The Next Phase*. Wiley.
3. **Binns, R. (2018).** *The Ethics of Artificial Intelligence and Robotics*. Stanford Encyclopedia of Philosophy.

## **BBA V SEM Syllabus Creativity and Innovation (BBN-502D)**

### **CO: COURSE OBJECTIVES**

The objective of this course is to introduce students to the fundamental principles of creativity and innovation, focusing on the processes, strategies, and tools that foster creative thinking and the development of innovative solutions.

### **CourseContents**

#### Unit 1: Introduction to Creativity and Innovation

**Objective:** To provide foundational knowledge about creativity and innovation, their definitions, and significance in business.

#### **Topics Covered:**

1. **Introduction to Creativity:** Definition, characteristics, and importance in business.
2. **Theories of Creativity:** Divergent thinking, convergent thinking, and cognitive processes.
3. **Introduction to Innovation:** Types of innovation—product, process, business model, and organizational innovation.
4. **The Innovation Process:** Stages of innovation—from idea generation to implementation.
5. **Creativity vs. Innovation:** Understanding the relationship and differences between creativity and innovation in the business context.

**Learning Outcome:** Students will understand the importance of creativity and innovation, and how they contribute to business growth.

#### Unit 2: Fostering Creativity

**Objective:** To explore techniques and methods to cultivate creativity within individuals and teams.

#### **Topics Covered:**

1. **Personal Creativity:** How to develop creative thinking at an individual level.
2. **Creative Problem Solving:** Techniques such as brainstorming, mind mapping, lateral thinking, and the SCAMPER method.
3. **Barriers to Creativity:** Identifying and overcoming internal and external factors that hinder creativity.
4. **Environmental Influences on Creativity:** Role of workplace culture, physical space, and organizational structure in fostering creativity.
5. **Creative Leadership:** Leading teams and organizations to think creatively and innovate.

**Learning Outcome:** Students will be able to apply creativity techniques and identify factors that influence creative thinking in business.

#### Unit 3: Innovation in Business Models and Strategy

**Objective:** To understand how businesses can leverage innovation to reshape their strategies and models.

## Topics Covered:

1. **Business Model Innovation:** Understanding how companies innovate their business models to gain competitive advantages.
2. **Disruptive Innovation:** What disruptive innovation is and how it changes industries.
3. **Strategic Innovation:** How companies can strategically innovate to maintain relevance in changing markets.
4. **Case Studies:** Analysis of companies that have successfully implemented innovative business models (e.g., Apple, Amazon, Netflix).
5. **The Role of Technology in Business Innovation:** Impact of emerging technologies (AI, blockchain, IoT) on innovation.

**Learning Outcome:** Students will develop an understanding of how businesses innovate their strategies and models to stay competitive.

## Unit 4: Innovation Management and Implementation

**Objective:** To explore how organizations can manage and implement innovative ideas effectively.

## Topics Covered:

1. **The Innovation Lifecycle:** Stages from idea generation to commercialization.
2. **Innovation Management Process:** Managing ideas, selection, development, and market introduction.
3. **Building an Innovation Culture:** Strategies for creating a culture that encourages risk-taking and experimentation.
4. **Innovation Teams and Collaboration:** Role of teams, cross-functional collaboration, and external partnerships in innovation.
5. **Challenges in Implementing Innovation:** Addressing resistance to change, resource allocation, and scalability.

**Learning Outcome:** Students will learn how to manage and implement innovation within organizations, and understand the challenges involved.

## Unit 5: Measuring and Commercializing Innovation

**Objective:** To equip students with the skills to measure and commercialize innovations effectively.

## Topics Covered:

1. **Measuring Innovation:** Key performance indicators (KPIs) for assessing innovation success.
2. **The Innovation Funnel:** How to prioritize and filter innovative ideas.
3. **IPR and Innovation:** Role of intellectual property rights (patents, trademarks) in protecting innovations.
4. **Commercializing Innovations:** From prototype to market – strategies for bringing new products or services to market.
5. **Innovation in Startups vs. Corporates:** Approaches to innovation in small businesses versus large organizations.

**Learning Outcome:** Students will gain insights into how to measure innovation and navigate the commercialization process to bring innovations to the market.

## Course Evaluation:

- **Assignments:** 20% (Case studies, essays on innovation practices)
- **Class Participation:** 10% (Active involvement in discussions, creativity workshops)
- **Mid-Term Exam:** 30% (Covering Units 1-3)

- **Final Exam:** 40% (Covering all 5 units, with case-based questions and application of concepts)

## **Shobhit University, Gangoh**

**(Established by UP Shobhit University Act No. 3, 2012)**

### **School of Business Studies & Entrepreneurship**

#### **Ordinances, Regulations & Syllabus**

**For**

**Bachelor of Business Administration (BBA) Three Year**

**Programme Semester Pattern**

**(w.e.f. session 2013-14)**

**Approved and adopted in the year 2013 ( 1<sup>st</sup> meeting, Board of  
Studies)**

**(SYLLABUS FROM 2013 to 2020)**

**OLD SYLLABUS**

## **Programme Educational Objectives (PEOs)**

**PEO 1** Graduates will demonstrate a comprehensive understanding of core business concepts, including finance, marketing, management, and operations, enabling them to analyze and solve business problems effectively.

**PEO 2** Graduates will apply critical thinking and analytical skills to make informed decisions in complex business environments, considering ethical and social implications.

**PEO 3** Graduates will effectively communicate ideas and information in both written and verbal formats, demonstrating strong interpersonal skills necessary for teamwork and leadership roles.

**PEO 4** Graduates will understand the impact of globalization on business practices and appreciate diverse perspectives, fostering inclusivity in the workplace.

**PEO 5** Graduates will utilize current technologies and data analytics tools to enhance business operations and decision-making processes.

**PEO 6** Graduates will cultivate an entrepreneurial mindset, demonstrating creativity and innovation in developing new business ideas and strategies.

**PEO 7** Graduates will recognize the importance of ethical behavior and social responsibility in business, making decisions that contribute positively to society.

**PEO 8** Graduates will embrace continuous learning and adaptability, equipping them to navigate the evolving business landscape throughout their careers.

## **Programme Specific Objectives (PSO's)**

**PSO 1** Equip students with a foundational understanding of various business functions, including marketing, finance, operations, and human resources.

**PSO 2** Foster the ability to analyze complex business problems and make data-driven decisions using quantitative and qualitative methods.

**PSO 3** Instill a sense of ethical responsibility and integrity in business practices, preparing students to be ethical leaders in their future careers.

**PSO** Improve both written and verbal communication skills, enabling students to effectively present ideas and collaborate in diverse teams.

**PSO5** Inspire innovative thinking and the ability to recognize and capitalize on business opportunities in various environments.

**PSO6** Provide an understanding of global business practices and cultural diversity, preparing students for careers in an interconnected world.

### **Programme Outcome Objectives (POO's)**

**POO 1** Demonstrate a comprehensive understanding of core business concepts, theories, and practices across various disciplines, including finance, marketing, management, and operations.

**POO 2** Apply critical thinking and analytical skills to solve complex business problems and make informed decisions based on quantitative and qualitative data.

**POO 3** Exhibit effective verbal and written communication skills, enabling clear presentation of ideas and persuasive arguments in diverse business contexts.

**POO 4** Work effectively in teams, demonstrating leadership, interpersonal skills, and the ability to manage group dynamics to achieve common goals.

**POO 5** Understand and apply ethical principles and social responsibility in business decision-making, recognizing the impact of business actions on society and the environment.

**POO 6** Analyze and appreciate the impact of globalization on business practices and strategies, and demonstrate cultural awareness in diverse business environments.

**POO 7** Utilize modern technology and information systems to enhance business operations, including data analysis tools and management software.

**POO 8** Foster an entrepreneurial mindset by identifying opportunities, assessing risks, and developing innovative solutions to create value in the marketplace.

**POO 9** Commit to ongoing personal and professional development, recognizing the importance of staying current with industry trends and advancements.

**POO 10** Develop and implement effective business strategies that align with organizational goals and respond to market dynamics.

**LIST OF SPECIALISATION ELECTIVE COURSE (DSE):**

**Human Resource Management**

1. H1 - Industrial Relations & Labour Laws
2. H2:- Human Resource Planning
3. H3:- Training and Development of Human Resources
4. H4:- Compensation Management

**Marketing**

1. M1:- Advertising & Consumer Behaviour
2. M2:-Sales & Distribution
3. M3:- Retail Management
4. M4:- Marketing of Services

**Finance**

1. **F1**:- Financial Markets, Institutions & Services
2. **F2**:- Security Analysis and Portfolio Management
3. **F3**:- Insurance & Risk Management
4. **F4**:- Banking Principles & Operations

**ENVIRONMENTAL STUDIES**

**Sub. Code: BS311**

**L – 4, C – 4.**

**Course Objective**

The objective of this course is to provide students with a comprehensive understanding of the relationship between human activities and the environment. It explores the key principles of environmental science, sustainability, and ecological balance, focusing on how environmental issues such as climate change, resource depletion, and pollution affect both global ecosystems and human well-being.

**Unit 1**

Multidisciplinary nature of environmental studies Definition, scope and importance.

**Unit 2**

Natural Resources: Renewable and non-renewable resources: Natural resources and associated problems.

- a) Forest resources: Use and over-exploitation, deforestation, case studies. Timber extraction, Mining, dams and their effects on forest and tribal people.
- b) Water resources: Use and over-utilization of surface and ground water, floods, drought, conflicts over water, dams-benefits and problems.
- c) Mineral resources: Use and exploitation, environmental effects of extracting and using mineral resources, case studies.
- d) Food resources: World food problems, changes caused by agriculture and overgrazing, effects of modern agriculture, fertilizer-pesticide problems, water logging, salinity, case studies.
- e) Energy resources: Growing energy needs, renewable and non-renewable energy sources, use of alternate energy sources. Case studies.
- f) Land resources: Land as a resource, land degradation, man induced landslides, soil erosion and desertification. • Role of an individual in conservation of natural resources. • Equitable use of resources for sustainable lifestyles.

**Unit 3**

Ecosystems • Concept of an ecosystem. • Structure and function of an ecosystem. • Producers, consumers and decomposers. • Energy flow in the ecosystem. • Ecological succession. • Food chains, food webs and ecological pyramids. • Introduction, types, characteristic features, structure and function of the following ecosystem:-

- a. Forest ecosystem
- b. Grassland ecosystem
- c. Desert ecosystem
- d. Aquatic ecosystems (ponds, streams, lakes, rivers, oceans, estuaries)

**Unit 4**

Biodiversity and its conservation • Introduction – Definition: genetic, species and ecosystem diversity. • Biogeographically classification of India • Value of biodiversity: consumptive use, productive use, social, ethical, aesthetic and option values • Biodiversity at global, National and local levels. • India as a mega- diversity nation V • Hot-spots of biodiversity. • Threats to biodiversity: habitat loss, poaching of

wildlife, man-wildlife conflicts. • Endangered and endemic species of India • Conservation of biodiversity: In-situ and Ex-situ conservation of biodiversity.

### **Unit 5**

Environmental Pollution Definition • Cause, effects and control measures of: - a. Air pollution b. Water pollution c. Soil pollution d. Marine pollution e. Noise pollution f. Thermal pollution g. Nuclear hazards • Solid waste Management : Causes, effects and control measures of curban and industrial wastes. • Role of an individual in prevention of pollution. • Pollution case studies. • Disaster management: floods, earthquake, cyclone and landslides.

### **SUGGESTED READINGS-**

1. **"Environmental Science: A Global Concern"** by William P. Cunningham and Mary Ann Cunningham
2. **"Principles of Environmental Science: Inquiry and Applications"** by William P. Cunningham and Mary Ann Cunningham
3. **"Environmental Ethics: An Introduction to Environmental Philosophy"** by Joseph R. DesJardins

## **NUTRITION AND WELL-BEING**

**Sub. Code:** BS311 A

**L – 4, C – 4**

### **Objective:**

The objective of the course is to provide students with a comprehensive understanding of nutrition and its impact on well-being. The course focuses on how nutrition affects personal health, productivity, and decision-making in professional environments, while also covering topics like stress management, exercise, and corporate wellness initiatives.

### **CONTENTS:**

#### **Unit 1: Introduction to Nutrition and Health**

- **Concepts of Nutrition:**
  - Understanding the basic principles of nutrition, nutrients, and their functions.
  - Overview of macronutrients (carbohydrates, proteins, fats) and micronutrients (vitamins and minerals).
- **Role of Nutrients in the Body:**
  - Functions of proteins, carbohydrates, fats, vitamins, and minerals.
  - Understanding energy balance, metabolism, and nutrient requirements.
- **Water and Hydration:**
  - Importance of water for bodily functions and hydration guidelines.
  - Dehydration and its effects on health.
- **Balanced Diet:**
  - Importance of a balanced diet in maintaining health, with an emphasis on meal planning and portion control.
  - The food pyramid and dietary guidelines.

#### **Unit 2: Consumer Behavior in Nutrition and Well-being**

- **Consumer Behavior and Dietary Choices:**
  - How consumer preferences and behaviors influence nutrition choices.
  - Psychological, cultural, and social factors that affect food choices.
  - The impact of marketing and food advertisements on eating habits.
- **Nutrition and Mental Well-being:**
  - The relationship between diet and mental health (e.g., depression, anxiety, cognitive function).
  - Foods that support mental clarity and emotional regulation.

- **Mindful Eating:**
  - Principles of mindful eating and its benefits on personal well-being.
  - How mindful eating can improve focus and productivity.

### **Unit 3: Nutrition and Physical Health**

- **Nutrition and Physical Activity:**
  - The role of nutrition in exercise and sports performance.
  - Pre- and post-workout nutrition: optimizing energy, recovery, and performance.
- **Nutrition for Different Life Stages:**
  - Nutritional needs across the lifespan: from childhood to adulthood, pregnancy, and aging.
  - Special nutritional needs for various populations (e.g., athletes, the elderly, pregnant women).
- **Weight Management:**
  - Understanding weight gain and weight loss.
  - The role of diet, exercise, and behavior modification in managing weight.
  - Strategies for achieving and maintaining a healthy body weight.

### **Unit 4: Nutrition in the Workplace and Corporate Wellness**

- **Corporate Wellness:**
  - Importance of nutrition and well-being in the workplace.
  - The business case for workplace wellness programs (e.g., reduced absenteeism, increased productivity).
  - Designing a corporate wellness program: nutrition, exercise, and mental health initiatives.
- **Stress and Nutrition in the Workplace:**
  - Understanding stress and its impact on health.
  - How nutrition can help manage work-related stress and improve mental resilience.
- **Time Management and Healthy Eating:**
  - Strategies for busy professionals to maintain healthy eating habits.
  - Tips for meal planning and preparation in a corporate setting.

### **Unit 5: Nutrition Trends and Public Health**

- **Emerging Nutrition Trends:**
  - Plant-based diets, functional foods, superfoods, and nutritional supplements.
  - The growing demand for healthier food options in the market.
  - The impact of food technology and innovations (e.g., lab-grown meats, food delivery apps).
- **Public Health Nutrition:**
  - The role of public health initiatives in promoting nutrition and wellness.
  - Government policies on food labeling, dietary guidelines, and health education.
- **Sustainability and Nutrition:**
  - The connection between sustainable eating and environmental impact.
  - The business case for sustainability in food production and consumption

**Suggested Readings:**

1. **S. Rajagopalan:** *Nutrition and Wellness*, Oxford University Press.
2. **Melvin H. Williams:** *Nutrition for Health, Fitness, and Sport*, McGraw-Hill Education.
3. **Gretchen Rubin:** *Better Than Before: What I Learned About Making and Breaking Habits*, Crown Publishing Group.
4. **Jeffrey B. Blumberg, Robert R. Williams:** *The Science and Fine Art of Food and Nutrition*, McGraw-Hill Education

**Course Outcome:**

By the end of the course, students will:

- Understand the core principles of nutrition and how they affect physical and mental well-being.
- Be able to apply nutrition knowledge to improve personal productivity, workplace well-being, and quality of life.
- Design and implement basic wellness programs in corporate settings to enhance employee health and organizational efficiency.
- Stay informed about emerging trends in nutrition and public health, and understand the business implications of wellness-related industries.

## **DISASTER MANAGEMENT**

**Sub. Code:** BS 311 BL – 4, C – 4

### **Objective:**

The objective of this course is to provide students with a comprehensive understanding of disaster management, focusing on the prevention, preparedness, response, and recovery processes in disaster situations. The course aims to equip students with the skills to handle disasters effectively, both in terms of human and organizational responses, in a business context.

### **CONTENTS:**

#### **Unit 1: Introduction to Disaster Management**

- **Definition and Concept of Disaster:**
  - What constitutes a disaster?
  - Natural vs. man-made disasters.
  - Historical overview of major disasters and their impacts.
- **Types of Disasters:**
  - Natural Disasters: Earthquakes, floods, hurricanes, droughts, etc.
  - Technological/Man-made Disasters: Industrial accidents, nuclear disasters, oil spills, etc.
  - Biological Disasters: Pandemics, epidemics, etc.
  - Human-Caused Disasters: Terrorism, armed conflicts, and civil unrest.
- **Disaster Risk and Vulnerability:**
  - Risk assessment methodologies.
  - Vulnerability and exposure to disasters.
  - Understanding social, economic, and environmental vulnerabilities.

#### **Unit 2: Disaster Preparedness and Mitigation**

- **Disaster Preparedness:**
  - Planning and preparedness frameworks.
  - Early warning systems and communication strategies.
  - Role of government and international agencies in disaster preparedness.
  - Business continuity planning and disaster recovery planning.
- **Disaster Mitigation:**
  - Mitigation strategies for reducing the impact of disasters.
  - Structural and non-structural mitigation measures.
  - Land use planning and disaster-resilient infrastructure.
  - Case studies on successful mitigation efforts.
- **Role of Technology in Disaster Management:**

- Use of Geographic Information Systems (GIS), Remote Sensing, and satellite technology in disaster management.
- Information technology for real-time disaster monitoring.

### **Unit 3: Disaster Response**

- **Disaster Response Phases:**
  - Immediate, short-term, and long-term responses.
  - Coordinating response efforts among local, national, and international agencies.
  - Role of the military, NGOs, and other humanitarian organizations in disaster response.
- **Disaster Management Teams and Emergency Operations:**
  - Setting up Emergency Operations Centers (EOCs).
  - The Incident Command System (ICS) and National Incident Management System (NIMS).
  - Logistics and resource management during disasters.
  - Psychological first aid and managing mental health post-disaster.
- **Emergency Relief and Aid Distribution:**
  - Planning and coordinating emergency relief efforts.
  - Distribution of food, water, medical supplies, and temporary shelter.
  - Managing the needs of vulnerable groups (children, elderly, disabled).

### **Unit 4: Disaster Recovery and Rehabilitation**

- **Recovery Process:**
  - Phases of disaster recovery: Immediate recovery, intermediate recovery, and long-term recovery.
  - Rebuilding infrastructure, homes, and communities.
  - Managing funds and resources for recovery operations.
  - Economic, social, and environmental aspects of recovery.
- **Rehabilitation and Reconstruction:**
  - Principles of rehabilitation after a disaster.
  - Role of government, NGOs, and businesses in post-disaster reconstruction.
  - Sustainable reconstruction strategies and practices.
  - Case studies on successful recovery efforts.
- **Disaster Recovery in Business:**
  - Business continuity planning and recovery.
  - Financial recovery after a disaster: insurance, funding, and government aid.
  - Impact on supply chains and strategies for quick recovery.

### **Unit 5: International Disaster Management and Policy**

- **International Frameworks for Disaster Management:**
  - The role of the United Nations and its agencies (e.g., UNDRR, UNHCR, WHO) in disaster management.
  - International conventions and protocols: Sendai Framework, Hyogo Framework for Action, etc.
  - Global Disaster Alert and Coordination System (GDACS).

- **Disaster Management Policy and Governance:**
  - National disaster management policies and frameworks.
  - Roles of local, state, and national governments in disaster response and recovery.
  - Disaster risk reduction (DRR) policies and sustainable development goals (SDGs).
- **Role of Businesses in Disaster Management:**
  - Corporate Social Responsibility (CSR) in disaster relief.
  - Private sector preparedness and resilience planning.
  - The role of businesses in community-based disaster risk management.

**Suggested Readings:**

1. **Smith, K.:** *Environmental Hazards: Assessing Risk and Reducing Disaster*, Routledge.
2. **Alexander, D.:** *Principles of Emergency Planning and Management*, Oxford University Press.
3. **UNDRR (United Nations Office for Disaster Risk Reduction):** *Disaster Risk Reduction: A Global Review*, United Nations.
4. **Coppola, D. P.:** *Introduction to International Disaster Management*, Butterworth-Heinemann.

**Course Outcome:**

By the end of this course, students will:

- Have a clear understanding of disaster management concepts and processes.
- Be able to assess risks, prepare for and respond to various disaster scenarios.
- Understand the roles of different stakeholders in disaster management, including governments, businesses, and NGOs.
- Develop strategies for disaster recovery, business continuity, and post-disaster rehabilitation.

## GEOPHYSICS

Sub. Code: BS 311 C

L – 4, C – 4

### CO: COURSE OBJECTIVES

**CO-1** To familiarize students with fundamental geophysical principles and methods, particularly as they apply to resource exploration and environmental assessments.

**CO-2** To explore how geophysical techniques are utilized in industries such as mining, oil and gas, and renewable energy, and their impact on business decisions.

**CO-3** To teach students how to analyze market trends in the geophysical and environmental sectors, including demand for resources and regulatory impacts.

**CO-4** To understand the financial implications of geophysical projects, including investment analysis, cost estimation, and return on investment (ROI) assessments.

### Course Contents

**Unit I: Introduction to Geophysics** : Overview of Geophysics: Definition, history, and importance in industry.

Fundamental Concepts: Earth's structure, composition, and physical properties.

Geophysical Methods: Introduction to seismic, magnetic, electrical, and gravitational methods.

**Unit II: Policy Framework of Education in Pre-Independent Period Geophysical Data and Analysis:**

Data Collection Techniques: Methods of gathering geophysical data in the field.

Data Processing: Techniques for processing and interpreting geophysical data.

Case Studies: Analysis of real-world applications of geophysical data in business contexts.

**Unit III: Business Applications of Geophysics:** Resource Exploration: Role of geophysics in mining, oil and gas, and renewable energy sectors. Market Trends: Understanding demand for natural resources and how geophysical data influences market decisions. Project Management: Planning and executing geophysical projects with a business perspective

**Unit IV Sustainability: Best practices for environmentally responsible geophysical exploration:**

Regulatory Framework: Overview of laws and regulations affecting geophysical practices.

Ethical Considerations: Discussing the ethical responsibilities of businesses in geophysical exploration.)

Unit V: Communication and Professional Skills : **Technical Communication:** Skills for presenting geophysical findings to non-specialist audiences. **Interdisciplinary Collaboration:** Importance of teamwork in geophysical projects and business settings. **Career Development:** Exploring career opportunities in geophysics and related fields.

### Suggested Readings:

1. *"Geophysical Methods in Business Applications" by A. K. Jain*
2. *"Principles of Geology and Their Business Applications" by R. S. Sharma*
3. *"Business and Environmental Geophysics" by S. P. Singh*
4. *"Energy Resources and Management" by M. S. Venkatesh*

**COURSE OUTCOMES-**

**COs-1** Demonstrate a foundational understanding of key geophysical concepts and methods, including seismic, magnetic, and gravity techniques.

**COs-2** Analyze and articulate how geophysical techniques can be applied in various industries, such as oil and gas, mining, and environmental management.

**COs-3** Interpret geophysical data and translate complex scientific information into actionable business strategies.

**COs-4** Discuss ethical considerations and responsibilities in geophysical exploration and resource management.

## **MICRO ECONOMICS**

**Sub. Code: BS312**

**L – 4, C – 4.**

**Objective:** The objective of the course is to acquaint the students with the concepts of microeconomics dealing with consumer behavior. The course also makes the student understand the supply side of the market through the production and cost behavior of firms.

### **CONTENTS**

#### **Unit 1: Demand and Consumer Behaviour**

Concepts of revenue: marginal and Average: Revenue under conditions of Perfect and imperfect competition. Elasticity of demand: price, income and cross.

Consumer Behavior: Indifference curve analysis of consumer behavior; Consumer's equilibrium (necessary and sufficient conditions). Price elasticity and price consumption curve, income consumption curve and Engel curve, price change and income and substitution effects. Indifference curves as an analytical tool (cash subsidy v/s. kind subsidy). Revealed Preference Theory.

#### **Unit 2: Production and Cost**

Production isoquants, marginal rate of technical substitution, economic region of production, optimal combination of resources, the expansion path, isoclines, return to scale using isoquants. Cost of Production: Social and private costs of production, long run and short run costs of production. Economies and diseconomies of scale and the shape to the long run average cost. Learning curve and economies of scope.

#### **Unit 3: Perfect Competition**

Perfect competition: Assumptions. Equilibrium of the firm and the industry in the short and the long runs, including industry's long run supply curve. Measuring producer surplus under perfect competition. Stability Analysis – Walrasian and Marshallian. Demand – supply analysis including impact of taxes and subsidy.

#### **Unit 4: Monopoly**

Monopoly: Monopoly short run and long run equilibrium. Shifts in demand curve and the absence of the supply curve. Measurement of monopoly power and the rule of thumb for pricing. Horizontal and vertical integration of firms. The social costs of monopoly power including deadweight loss. Degrees of price discrimination.

#### **Unit 5: Imperfect Competition**

Monopolistic Competition and Oligopoly: Monopolistic competition price and output decision-equilibrium. Monopolistic Competition and economic efficiency Oligopoly and Interdependence – Cournot's duopoly model, Stackelberg model, kinked demand model. Prisoner's dilemma, collusive oligopoly – price-leadership model – dominant firm, cartels, sales maximization, Contestable market theory. Pricing Public Utilities.

**Suggested Readings:**

1. Pindyck, R.S., D.L. Rubinfeld and P.L. Mehta; *Microeconomics*, Pearson Education.
2. N. Gregory Mankiw, *Principles of Micro Economics*, Cengage Learning
3. Maddala G.S. and E. Miller; *Microeconomics: Theory and Applications*, McGraw-Hill Education.
4. Salvatore, D. Schaum's Outline: *Microeconomic Theory*, McGraw-Hill, Education.
5. Case and Fair, *Principles of Micro Economics*, Pearson Education
6. Kotsoyiannis, *Modern Micro Economic Theory*, Mac Millan
7. C. Snyder, *Microeconomic Theory: Basic Principles and Extensions*, Cengage Learning
8. Bilas, Richard A., *Microeconomics Theory: A Graphical Analysis*, McGraw-Hill Education.
9. Paul A. Samuelson, William D. Nordhaus, *Microeconomics*, McGraw-Hill Education.
10. Amit Sachdeva, *Micro Economics*, Kusum Lata Publishers

## **FINANCIAL ACCOUNTING**

**Sub. Code: BS313**

**L – 3, T-1, C – 4.**

Objective: To familiarize students with the mechanics of preparation of financial statements, understanding corporate financial statements, their analysis and interpretation.

### **Course Contents**

**Unit I:** Introduction to Financial Accounting: Accounting as an Information System, Importance and Scope, Limitations; Users of accounting information, Concepts, Principles and Conventions – Generally Accepted Accounting Principles; The Accounting Equation; Nature of Accounts, Types of books (Primary and Secondary) and

**Unit II:** Rules of Debit and Credit; Recording Transactions in Journal; Preparation of Ledger Accounts; Opening and Closing Entries; Preparation of Trial Balance.

**Unit III:** Preparation of Financial Statements: Trading Account, Profit & Loss Account and Balance Sheet, Adjustment Entries.

**Unit IV:** Indian Accounting Standards (Ind-AS): Concept, benefits, procedure for issuing Ind-AS in India, salient features of Ind-AS issued by ICAI; International Financial Reporting Standards(IFRS): Main features, uses and objectives of IFRS, IFRS issued by IASB and concept of harmonization and convergence, obstacle in harmonization and convergence, suggestions for increased convergence and harmonization. Depreciation: Concept, Methods of charging depreciation, accounting treatment of depreciation.

**Unit V:** Financial Statement Analysis: Objective of financial statement analysis, sources of information; Techniques of financial statement analysis: Horizontal analysis, Vertical analysis and Ratio Analysis; Financial Ratios: Meaning and Usefulness of Financial Ratios. Analysis of ratios from the perspective of Stakeholders like Investors, Lenders, and ShorttermCreditors.Liquidity Ratios, Solvency Ratios, Profitability Ratios, and Turnover Ratios; Limitation of ratio analysis

### **Reading:**

1. Monga, J.R., *Financial Accounting: Concepts and Applications*, Mayur Paperbacks
2. Tulsian, P.C., *Financial Accounting*, Pearson
3. Maheshwari, S.N. &Maheshwari, S.K. , *Financial Accounting for B. Com., CA, CS, & ICWA (Foundation) Courses*, Vikas Publishing House Pvt. Ltd.
4. Ghosh, T.P., *Financial Accounting for Managers*, Taxman Allied Services (P) Ltd.
5. Balwani, Nitin, *Accounting and Finance for Managers*
6. Gupta, Ambrish: *Financial Accounting for Management*
7. Bhattacharyya, Asish K., *FinancialAccounting for Business Managers*
8. Jain, S.P. &Narang, K.L., *Advanced Accountancy*.

**MANAGEMENT PRINCIPLES AND APPLICATIONS**

**Sub. Code: BS314**

**L – 4, C – 4.**

**Objective:** The objective of the course is to provide the student with an understanding of basic management concepts, principles and practices.

**Unit1:Introduction**

- a. Concept: Need for Study, Managerial Functions – An overview; Co-ordination: Essence of Manager Ship
- b. EvolutionoftheManagementThought,ClassicalApproach–Taylor,Fayol, Neo-Classical and Human Relations Approaches – Mayo, Hawthorne Experiments,BehaviouralApproach,SystemsApproach,ContingencyApproach–Lawrence&Lorsch, MBO- Peter F. Drucker, Re-engineering - Hammer and Champy,MichaelPorter–Five-forceanalysis,Threegenericstrategiesandvalue- chain, analysis, Senge’s Learning Organization, ‘Fortune at the Bottom of the Pyramid’–C.K.Prahalad.

**Unit2:Planning**

- a. TypesofPlan–Anoverviewtohighlightthedifferences
- b. Strategicplanning–Concept,process,Importanceandlimitations
- c. Environmental Analysis and diagnosis (Internal and external environment) – Definition, Importance and Techniques (SWOT/TOWS/WOTS-UP, BCGMatrix, Competitor Analysis), Business environment; Concept and Components
- d. Decision-making–concept,importance;CommitteeandGroupDecision-making, Process, Perfect rationality and bounded rationality, Techniques (qualitative and quantitative,MIS,DSS)

**Unit3:Organizing**

Conceptandprocessoforganizing–Anoverview,Spanofmanagement,Different types of authority (line, staff and functional), Decentralization, Delegation of authority  
Formal and Informal Structure; Principles of Organizing; Network Organization Structure

**Unit 4: StaffingandLeading**

- a. Staffing:Conceptofstaffing,staffingprocess
- b. Motivation: Concept, Importance, extrinsic and intrinsic motivation; Major Motivation theories - Maslow’s Need-Hierarchy Theory; Herzberg’s Two-factor Theory,Vroom’sExpectationTheory.
- c. Leadership: Concept, Importance, Major theories of Leadership (Likert’s scale theory, Blake and Mouten’s Managerial Grid theory, House’s Path Goal theory, FredFielder’ssituationalLeadership),Transactionalleadership,Transformational Leadership, TransformingLeadership.
- d. Communication: Concept, purpose, process; Oral and written communication; Formal and informal communication networks, Barriers to communication, Overcomingbarrierstocommunication.

**Unit5:Control**

- a. Control: Concept, Process, Limitations, Principles of Effective Control, Major Techniques of control - Ratio Analysis, ROI, Budgetary Control, EVA, PERT/CPM.
- b. Emerging issues in Management

**Suggested Readings:**

1. Harold Koontz and Heinz Weihrich, *Essentials of Management: An International and Leadership Perspective*, McGrawHill Education
2. Stephen P. Robbins and Madhushree Nanda Agrawal, *Fundamentals of Management: Essential Concepts and Applications*, Pearson Education.
3. Newman, Summer, and Gilbert, *Management*, PHI
4. James H. Donnelly, *Fundamentals of Management*, Pearson Education.
5. Griffin, *Management Principles and Application*, Cengage Learning
6. Robert Kreitner, *Management Theory and Application*, Cengage Learning
7. T. N. Chhabra, *Management Concepts and Practice*, Dhanpat Rai & Co. (Pvt. Ltd.), New Delhi
8. Peter F. Drucker, *Practice of Management*, Mercury Books, London

**Note: Latest edition of text books may be used.**

**BUSINESS ORGANISATION**

**Sub. Code: BS315**

**L – 4, C – 4.**

**Course Objective-**

The objective of this course is to provide students with a comprehensive understanding of how businesses are structured, operate, and make strategic decisions. The course explores the core functions of a business organization, including management, marketing, finance, and human resources, while also emphasizing the dynamics of organizational behavior, leadership, and communication.

**Unit – I:**

Meaning and definition of business essentials & scope of business Classification of Business Activities, Meaning, Definition, Characteristics and objectives of Business Organisation, Evolution of Business Organisation . Modern Business, Business & Profession.

**Unit – II:**

Business Unit, Establishing a new business unit. Meaning of Promotion. Features for business, Plant location, Plant Layout & size of business unit.

**Unit – III:**

Forms of Business Organisation. Sole Proprietorship, Partnership, Joint Stock Companies & Co-operatives.

**Unit – IV:**

Business Combination Meaning Causes, Objectives, Types and Forms Mergers, Takeovers and Acquisitions.

**Unit – V:**

Business Finance: Financial need of Business methods & sources offinance. Security Market, Money Market, Study of Stock Exchange & SEBI.

**Suggested Readings:**

1. *Modern Business Organization* by S. A. Sherlekar
2. *Industrial Organization Management: Sherlekar, Patil, Paranjpe, Chitale*
3. *Business Organization and Management* By Jallo, Tata McGraw Hill
4. *Business Environment Text and Cases* By F. Cherunilam (Himalaya Publication House)
5. *Organizing and Financing of Small Scale Industry* By Dr. V. Desai
6. *Industrial Organization and Management* By Dr. C. B. Gupta, Publisher Sultan Chand & Co. Delh

**BUSINESS LAW**

**Sub. Code: BS321**

**L – 4, C – 4.**

**Course Objective-**

The objective of this course is to provide students with a comprehensive understanding of the legal principles and frameworks that govern business operations. The course focuses on key areas of business law, including contract law, intellectual property, employment law, torts, and regulatory compliance, while also addressing the legal implications of business decisions and transactions.

**Unit1: The Indian Contract Act, 1872: General Principle of Law of Contract**

- a) Contract – meaning, characteristics and kinds  
Essentials of a valid contract - Offer and acceptance, consideration, contractual capacity, free consent, legality of objects.
- b) Void agreements
- c) Discharge of a contract – modes of discharge, breach and remedies against breach of contract.
- d) Contingent contracts
- e) Quasi-contracts

**Unit2: The Indian Contract Act, 1872: Specific Contract**

- a) Contract of Indemnity and Guarantee
- b) Contract of Bailment
- c) Contract of Agency

**Unit3: The Sale of Goods Act, 1930**

- a) Contract of sale, meaning and difference between sale and agreement to sell.
- b) Conditions and warranties
- c) Transfer of ownership of goods including sale by a non-owner
- d) Performance of contract of sale
- e) Unpaid seller – meaning, rights of an unpaid seller against the goods and the buyer.

**Unit 4: Partnership Laws**

**A) The Partnership Act, 1932**

- a. Nature and Characteristics of Partnership
- b. Registration of a Partnership Firm
- c. Types of Partners
- d. Rights and Duties of Partners
- e. Implied Authority of a Partner
- f. Incoming and outgoing Partners
- g. Mode of Dissolution of Partnership

**B) The Limited Liability Partnership Act, 2008**

- a) Salient Features of LLP
- b) Differences between LLP and Partnership, LLP and Company
- c) LLP Agreement,
- d) Partners and Designated Partners

- e) Incorporation Document
- f) Incorporation by Registration
- g) Partners and their Relationship

**Unit 5: The Negotiable Instruments Act 1881**

- a) Meaning, Characteristics, and Types of Negotiable Instruments: Promissory Note, Bill of Exchange, Cheque
- b) Holder and Holder in Due Course, Privileges of Holder in Due Course.
- c) Negotiation: Types of Endorsements
- d) Crossing of Cheque
- e) Bouncing of Cheque

**Suggested Readings:**

1. M.C. Kuchhal, and Vivek Kuchhal, *Business Law*, Vikas Publishing House, New Delhi.
2. Avtar Singh, *Business Law*, Eastern Book Company, Lucknow.
3. Ravinder Kumar, *Legal Aspects of Business*, Cengage Learning.
4. SN Maheshwari and SK Maheshwari, *Business Law*, National Publishing House, New Delhi.
5. Sushma Arora, *Business Laws*, Taxman Publications.
6. Akhileshwar Pathak, *Legal Aspects of Business*, McGraw Hill Education, 6th Ed.
7. PCTulsian and BharatTulsian, *Business Law*, McGraw Hill Education

**Note: Latest edition of text books may be used.**

## **INTELLECTUAL PROPERTY LAW-1**

**Sub. Code:** BS321A

**L – 4, C – 4**

### **Objective:**

The objective of this course is to introduce students to the key concepts of Intellectual Property (IP) law, covering various types of intellectual property rights such as copyrights, trademarks, patents, and trade secrets. The course aims to provide a deep understanding of how IP is protected legally and its role in fostering innovation, creativity, and economic development.

### **CONTENTS:**

#### **Unit 1: Introduction to Intellectual Property**

- **Concept and Evolution of Intellectual Property:**
  - Definition of Intellectual Property.
  - Historical development of IP laws.
  - Importance of IP for economic and cultural growth.
  - Types of IP: Copyright, Trademark, Patent, Trade Secret, Geographical Indications.
  - Role of international treaties and organizations (WIPO, TRIPS, Berne Convention, etc.).
- **Fundamentals of IP Protection:**
  - The concept of ownership and protection of intellectual creations.
  - The relationship between IP and competition law.
  - The concept of infringement and remedies available.

#### **Unit 2: Copyright Law**

- **Concept and Scope of Copyright:**
  - Definition of copyright.
  - What is protectable under copyright?
  - Duration and territorial aspects of copyright protection.
  - The owner of copyright and related rights.
  - Moral rights and economic rights of authors.
  - International conventions for the protection of copyright.

- **Infringement of Copyright:**
  - Copyright infringement and remedies available.
  - Fair use and exceptions to copyright.
  - Case studies on copyright infringement (e.g., digital media and software piracy).

### **Unit 3: Patent Law**

- **Introduction to Patents:**
  - Definition of a patent and its purpose.
  - Patentable inventions: Novelty, inventive step, and industrial applicability.
  - Patent filing process: Application, examination, and grant.
  - Rights of the patentee: Exclusive rights and duration.
  - International patent protection: PCT (Patent Cooperation Treaty) and the role of WIPO.
- **Patent Infringement and Remedies:**
  - Types of patent infringement: Direct, indirect, and contributory infringement.
  - Defenses to patent infringement.
  - Remedies available: Injunctions, damages, and account of profits.
- **Case Law:**
  - Landmark cases related to patents (e.g., the Novartis case, Roche v. Cipla).

### **Unit 4: Trademark Law**

- **Introduction to Trademarks:**
  - Definition and types of trademarks: Word marks, logo marks, shape marks, etc.
  - Trademark registration process and requirements.
  - Rights of trademark owners and the duration of protection.
  - International protection of trademarks: Madrid Protocol and TRIPS.
- **Trademark Infringement and Remedies:**
  - Infringement of trademarks: Likelihood of confusion test.
  - Defenses to trademark infringement: Fair use and descriptive use.
  - Remedies: Injunctions, damages, and account of profits.
  - Passing off and trade dress protection.
- **Case Law:**
  - Landmark cases on trademark law (e.g., Coca-Cola v. Pepsico, Christian Louboutin v. YSL).

### **Unit 5: Trade Secrets and Other IP Rights**

- **Trade Secret Protection:**
  - Definition and scope of trade secrets.
  - Legal protection for trade secrets: Common law, contractual protection.
  - The concept of misappropriation and remedies available.
  - Famous trade secret cases: e.g., Coca-Cola's secret formula.
- **Other IP Rights:**
  - Geographical Indications (GIs) and their role in the global market.
  - Industrial Designs and layout-designs of integrated circuits.
  - Plant Variety Protection (PVP).

- Protection of traditional knowledge and folklore.
- **IP Licensing and Technology Transfer:**
  - Licensing of IP rights and contractual arrangements.
  - Technology transfer agreements: Principles, importance, and legal framework.

**Suggested Readings:**

1. **Cornish, W. R.:** *Intellectual Property: Patents, Copyright, Trade Marks and Allied Rights*, Sweet & Maxwell.
2. **Bently, L., & Sherman, B.:** *Intellectual Property Law*, Oxford University Press.
3. **Merges, R. P., & Duffy, J. F.:** *Intellectual Property in the New Technological Age*, Aspen Publishers.
4. **Davison, M., & Kirk, D.:** *Australian Intellectual Property Law*, Cambridge University Press.

**Course Outcome:**

By the end of this course, students will:

- Understand the basic principles of IP law and its various types, including copyright, patents, trademarks, and trade secrets.
- Be able to navigate the IP registration process, infringement issues, and related legal procedures.
- Analyze and solve complex IP-related legal problems, focusing on real-world applications.
- Gain a global perspective on intellectual property law through the study of international treaties and practices.
- Develop a critical understanding of the role of IP in fostering innovation and creativity in the business and legal contexts.

**INFORMATION TECHNOLOGY LAW-1**

**Sub. Code:** BS321 B

**L – 4, C – 4**

**Objective:**

The objective of this course is to provide students with a thorough understanding of the legal aspects of information technology and digital commerce. The course will explore key concepts in IT law, including cybercrimes, data protection, e-commerce, intellectual property rights related to technology, and the regulatory frameworks governing the digital space.

**CONTENTS:**

**Unit 1: Introduction to Information Technology Law**

- **Overview of IT Law:**
  - Definition and scope of Information Technology Law.
  - Importance of law in the digital world.
  - Key areas of IT law: Cybersecurity, E-commerce, Data Privacy, Intellectual Property.
  - Role of government agencies, international bodies (e.g., UN, EU, WIPO), and national legal systems in regulating IT.
- **Legal Foundations of IT:**
  - Constitutional and statutory principles.
  - Jurisdiction in the digital world: Territorial boundaries, cross-border disputes, and international conventions.
  - Key legislative frameworks: Information Technology Act (India), GDPR (Europe), and others.

**Unit 2: Cybercrimes and Cybersecurity**

- **Cybercrimes:**
  - Definition and types of cybercrimes: Hacking, identity theft, cyberbullying, phishing, etc.
  - Legal provisions governing cybercrimes.
  - Case studies on significant cybercrime incidents and their legal outcomes.
  - Investigation and prosecution of cybercrimes.
- **Cybersecurity Laws:**
  - Cybersecurity policies and frameworks: NIST, ISO 27001, etc.
  - The role of cybersecurity in preventing crimes and securing data.
  - The role of government and private sector in ensuring cybersecurity.
  - Legal obligations of companies under cybersecurity laws.

### **Unit 3: E-Commerce and Digital Transactions**

- **E-Commerce Regulations:**
  - Legal principles of electronic contracts and digital signatures.
  - Framework for E-commerce transactions under the Information Technology Act, 2000 (India).
  - Consumer protection laws in digital transactions.
  - Dispute resolution mechanisms in online contracts.
  - Taxation and payment systems in e-commerce.
- **Legal Issues in Digital Transactions:**
  - Electronic funds transfer, payment gateways, and the role of banks.
  - Legal aspects of online payments: Security and fraud prevention.
  - Cross-border e-commerce and jurisdictional challenges.

### **Unit 4: Data Protection and Privacy Laws**

- **Data Privacy and Protection:**
  - Introduction to data privacy laws: GDPR (Europe), CCPA (California), and the IT Act (India).
  - Principles of data protection: Consent, transparency, purpose limitation, etc.
  - Rights of data subjects: Right to access, right to rectification, and right to erasure.
  - Data breaches and notification requirements.
  - Cross-border data transfers and legal challenges.
- **Corporate Responsibility and Data Handling:**
  - Legal obligations for data controllers and processors.
  - Privacy policies and compliance with data protection laws.
  - Case studies of major data breaches and their legal implications.

### **Unit 5: Intellectual Property in IT**

- **Intellectual Property (IP) in IT:**
  - Overview of IP law: Copyright, patents, trademarks, and trade secrets in the context of IT.
  - Protection of software, databases, and digital content.
  - Licensing and open-source software agreements.
  - IP protection in digital media, social networks, and e-commerce.
  - Enforcement of IP rights in the online environment.
- **Challenges and Future Trends:**
  - The evolving role of AI, blockchain, and cloud computing in IT law.
  - Legal challenges with digital innovations and new technologies.
  - The future of IP law in the digital age: AI-generated works, data ownership, etc.

**Suggested Readings:**

1. **Gopalan, N.:** *Cyber Law in India*, McGraw Hill Education.
2. **Dhar, A.:** *Information Technology and Law*, Oxford University Press.
3. **Biedenkapp, E. L.:** *Cyberlaw: A Legal Arsenal for Online Business*, Pearson Education.
4. **Sharma, S.:** *Cyber Law in India*, Asia Law House.
5. **Kerr, I.:** *Information Technology Law: The Law and Society*, Oxford University Press.
6. **Agarwal, V.:** *Cyber Law and E-Commerce*, Oxford University Press.
7. **Desai, D.:** *Data Protection and Privacy Laws*, LexisNexis.
8. **Bailey, M.:** *The Law of Digital Commerce*, Cambridge University Press.
9. **Sands, P.:** *International Economic Law and Policy*, Oxford University Press.
10. **Bennet, R.:** *E-Commerce Law: National and International Perspectives*, Routledge.

**Course Outcome:**

Upon completing this course, students will:

- Understand the key legal principles of IT law, including cybercrimes, data protection, and e-commerce regulations.
- Be familiar with the regulatory framework governing digital transactions and privacy laws.
- Be able to apply legal concepts to emerging issues such as cybersecurity, digital contracts, and the protection of digital assets.
- Be well-equipped to analyze complex legal issues in the context of rapidly evolving technology and digital business models.

## **COMPETITIVE LAW-1**

**Sub. Code:** BS321C

**L – 4, C – 4**

### **Objective:**

The objective of the course is to familiarize students with the fundamental principles of competition law and policy, focusing on the regulation of anti-competitive behavior, monopolistic practices, and the enforcement of fair competition in markets. The course will cover national and international competition laws, including case studies and the economic principles behind competitive markets.

### **CONTENTS:**

#### **Unit 1: Introduction to Competitive Law**

- **Overview of Competition Law:**
  - Definition and scope of competition law.
  - The role of competition law in promoting economic welfare and consumer protection.
  - History and evolution of competition law: Origins and development in different jurisdictions (EU, USA, India, etc.).
  - Key objectives of competition law: Promoting market efficiency, preventing market abuses, and protecting consumers.
- **Legal Framework of Competition Law:**
  - Major competition laws: The Sherman Act (USA), the Competition Act (India), EU competition rules (Article 101 and 102 TFEU), and others.
  - The role of regulatory bodies: Federal Trade Commission (FTC), European Commission (EC), Competition Commission of India (CCI), and others.
  - Jurisdictional challenges and enforcement mechanisms in cross-border competition cases.

#### **Unit 2: Anti-Competitive Agreements and Practices**

- **Cartels and Collusive Behavior:**
  - Definition and types of cartels: Price-fixing, market-sharing, bid-rigging, and supply restrictions.
  - The economic impact of cartels on market efficiency and consumer welfare.
  - Legal prohibitions and penalties for cartel behavior under competition laws.
  - Case studies: Key cartel investigations and decisions in various jurisdictions.
- **Restraints of Trade and Vertical Agreements:**

- Horizontal agreements: Agreements between competitors and their impact on competition.
- Vertical agreements: Agreements between firms at different levels of the supply chain (e.g., resale price maintenance, exclusive distribution).
- Analyzing market effects of vertical restraints under competition law.
- The "Rule of Reason" vs. "Per Se" approach to antitrust enforcement.

### **Unit 3: Abuse of Dominance and Monopolistic Practices**

- **Abuse of Market Dominance:**
  - Definition and elements of dominance in competition law.
  - Types of abuse: Predatory pricing, exclusive dealing, tying and bundling, refusal to deal, and price discrimination.
  - The legal standards for determining abuse: The "dominance test" and the "effect on competition" test.
  - Case studies: Abuse of dominance in major global markets (e.g., Microsoft, Google).
- **Monopolies and Market Power:**
  - The difference between monopolies and dominant market positions.
  - The role of monopolies in market regulation and concerns regarding their abuse.
  - Antitrust responses to monopolistic practices and the regulation of monopolies.
  - Remedies and enforcement actions in monopoly cases.

### **Unit 4: Merger Control and Market Concentration**

- **Mergers and Acquisitions:**
  - Definition and types of mergers: Horizontal, vertical, and conglomerate mergers.
  - Legal and economic analysis of mergers: Impact on market competition and consumer welfare.
  - Merger control frameworks: Notification, investigation, and approval procedures.
  - Case studies of landmark merger decisions: Google/DoubleClick, Facebook/WhatsApp, etc.
- **Market Concentration and Anti-Trust Concerns:**
  - The concept of market concentration: Market share, Herfindahl-Hirschman Index (HHI), and the significance of concentration ratios.
  - The effects of high market concentration on competition and consumer prices.
  - Legal tests for merger approval: Substantial Lessening of Competition (SLC), significant impediment to effective competition (SIEC) test.
  - Remedies for anti-competitive mergers: Divestitures, behavioral remedies, and merger conditions.

### **Unit 5: International and Regional Competition Law**

- **Globalization and Competition Law:**
  - The impact of globalization on market structures and the enforcement of competition law.
  - International cooperation in competition law enforcement: OECD, UNCTAD, and the role of multilateral treaties.

- Comparative analysis of competition laws in key jurisdictions: USA, EU, India, and China.
- International cartels and enforcement: The role of global regulatory bodies in dealing with cross-border anti-competitive practices.
- **Regional Competition Regimes:**
  - The European Union's competition law regime: Articles 101 and 102 TFEU.
  - Competition law in emerging economies: The BRICS nations and their approach to competition regulation.
  - Competition law and policy in India: Key provisions of the Competition Act, 2002, and the role of the Competition Commission of India (CCI).
  - Case studies of cross-border competition law enforcement in regional trade agreements (e.g., NAFTA, ASEAN).

**Suggested Readings:**

1. **Whish, R.:** *Competition Law*, 9th Edition, Oxford University Press.
2. **Baker, J. B., and Salop, S. C.:** *Antitrust: Analysis and Advocacy*, Foundation Press.
3. **Lowe, P. and K. L. B.:** *Competition Law in the EU and UK*, Hart Publishing.
4. **Kohler, M., and Drexler, J.:** *EU Competition Law and the Regulation of Mergers*, Edward Elgar Publishing.
5. **Puri, V.:** *Competition Law in India*, LexisNexis.
6. **Motta, M.:** *Competition Policy: Theory and Practice*, Cambridge University Press.
7. **Elhauge, E.:** *Global Antitrust Law and Economics*, Foundation Press.
8. **Bishop, S., and Walker, M.:** *The Economics of EC Competition Law: Concepts, Application and Measurement*, Sweet & Maxwell.
9. **Suffield, D.:** *Competition Law: A Practitioner's Guide*, Sweet & Maxwell.
10. **Whelan, R., and Fenton, M.:** *Global Antitrust Enforcement*, Cambridge University Press.

**Course Outcome:**

Upon completion of this course, students will:

- Understand the key concepts and principles of competition law and policy.
- Be able to analyze anti-competitive practices, mergers, and monopolistic behavior from both legal and economic perspectives.
- Gain familiarity with competition law enforcement agencies and regulatory frameworks at both national and international levels.
- Be equipped to critically evaluate competition policy and its impact on market efficiency and consumer welfare

**TAX LAW-1**

**Sub. Code:** BS321D

**L – 4, C – 4**

**Objective:**

The objective of this course is to introduce students to the fundamental principles of tax law, focusing on the various types of taxes, their impact on individuals and businesses, and the legal framework governing taxation. The course also aims to provide students with an understanding of tax administration, tax compliance, and the rights and obligations of taxpayers.

**CONTENTS:**

**Unit 1: Introduction to Taxation**

- **Overview of Taxation:**
  - Definition and importance of taxation in the economy.
  - Principles of taxation: Equity, efficiency, simplicity, and transparency.
  - Types of taxes: Direct taxes vs. indirect taxes.
  - Taxation system in India and other jurisdictions.
  - History and evolution of tax law.
- **Classification of Taxes:**
  - Direct taxes: Income tax, wealth tax, capital gains tax.
  - Indirect taxes: Goods and services tax (GST), excise duty, customs duty, and sales tax.
  - Overview of global tax systems and international tax law.

**Unit 2: Income Tax Law**

- **Income Tax Act, 1961:**
  - Definition of "income" under the Income Tax Act.
  - Residential status and its implications on tax liability.
  - Income from various sources: Salaries, business/profession, capital gains, house property, other sources.
  - Computation of total income and the concept of exemptions.
  - Tax deductions and rebates available under the Act.
- **Assessment and Taxation of Individuals:**

- Calculation of taxable income and tax payable for individuals.
- Provisions relating to deductions under Section 80C, 80D, 80G, etc.
- Taxation of non-resident individuals and foreign income.
- Tax evasion and avoidance: Concepts and differences.

### **Unit 3: Goods and Services Tax (GST)**

- **Overview of GST:**
  - Introduction to GST: Need for GST in India, GST vs. earlier tax regime.
  - Structure of GST: Central GST (CGST), State GST (SGST), Integrated GST (IGST).
  - Types of supply: Goods vs. services, taxable and non-taxable supplies.
  - Registration, GST returns, and compliance requirements.
- **GST Liability and Input Tax Credit (ITC):**
  - Calculation and determination of GST liability for goods and services.
  - Input Tax Credit mechanism and conditions for availing ITC.
  - GST exemptions and special provisions for small businesses and specific sectors.
  - GST audits, assessments, and refunds.

### **Unit 4: Corporate Taxation and Tax Planning**

- **Corporate Taxation:**
  - Taxation of companies: Resident vs. non-resident companies.
  - Corporate tax rates, minimum alternate tax (MAT), and other provisions.
  - Dividend distribution tax (DDT) and capital gains tax on corporate assets.
  - Transfer pricing rules for international transactions.
- **Tax Planning and Avoidance:**
  - Tax planning strategies for businesses.
  - Legal vs. illegal tax avoidance practices.
  - Tax sheltering and the role of tax havens.
  - Corporate restructuring and tax implications.

### **Unit 5: Tax Administration and Compliance**

- **Tax Authorities and Procedure:**
  - Roles and powers of the Income Tax Department, GST authorities, and other tax bodies.
  - Tax assessment procedures: Self-assessment, scrutiny assessment, re-assessment.
  - Filing of tax returns: Income tax return forms, GST returns.
  - Penalties, prosecutions, and tax litigation procedures.
- **Tax Disputes and Resolution:**
  - Dispute resolution mechanisms in tax law: Settlement Commission, Appellate Tribunal.
  - Role of Tax Tribunals, High Courts, and the Supreme Court in tax matters.
  - Judicial review and important case law in tax disputes.
  - Anti-avoidance and anti-evasion measures: GAAR (General Anti-Avoidance Rules).

**Suggested Readings:**

1. **Singh, A.:** *Income Tax Law and Practice*, Taxmann Publications.
2. **Bahl, S.:** *Goods and Services Tax Law and Practice*, CCH India.
3. **Chaturvedi, V. and Mehrotra, H.C.:** *Income Tax Law and Accounts*, Bharat Law House.
4. **Vasudevan, G.R.:** *Corporate Tax Planning and Management*, Taxmann.
5. **Mithani, D. and Desai, V.K.:** *Indirect Taxes*, Himalaya Publishing House.

**Course Outcome:**

Upon completion of this course, students will:

- Gain a comprehensive understanding of tax law and taxation policies in India and internationally.
- Learn how to compute taxes for individuals and corporations and comply with relevant tax laws.
- Understand the concepts of tax avoidance, tax planning, and the compliance process.
- Develop the ability to analyze and resolve tax disputes, and appreciate the role of tax authorities and courts in tax administration.

**BUSINESS COMMUNICATION**

**Sub. Code: BS322**

**L – 4, C – 4.**

**Course Objective:**

The objective of this course is to introduce students to the essential principles and practices of business communication. The course aims to develop students' skills in both written and verbal communication within a business context, emphasizing clarity, professionalism, and effectiveness. Students will gain an understanding of the various forms of business communication, including emails, reports, presentations, and interpersonal communication.

**Unit 1: Introduction:**

Nature of Communication, Process of Communication, Types of Communication (verbal & Non Verbal), Importance of Communication, Different forms of Communication  
Barriers to Communication Causes, Linguistic Barriers, Psychological Barriers, Interpersonal Barriers, Cultural Barriers, Physical Barriers, Organizational Barriers

**Unit 2: Business Correspondence:**

Letter Writing, presentation, Inviting quotations, Sending quotations, Placing orders, Inviting tenders, Sales letters, claim & adjustment letters and social correspondence, Memorandum, Inter-office Memo, Notices, Agenda, Minutes, Job application letter, preparing the Resume.

**Unit 3: Report Writing:**

Business reports, Types, Characteristics, Importance, Elements of structure, Process of writing, Order of writing, the final draft, and check lists for reports.

**Unit 4: Vocabulary**

Words often confused, Words often misspelt, common errors in English.

**Unit 5: Oral Presentation:**

Importance, Characteristics, Presentation Plan, Power point presentation, Visual aids.

**Suggested Readings:**

1. Bovee, and Thill, *Business Communication Essentials*, Pearson Education
2. Shirley Taylor, *Communication for Business*, Pearson Education
3. Locker and Kaczmarek, *Business Communication: Building Critical Skills*, McGraw Hill Education
4. Herta A Murphy, Herbert W Hildebrandt, Jane P. Thomas, *Effective Business Communication (SIE)*, McGraw Hill Education
5. Dona Young, *Foundations of Business Communication: An Integrative Approach*, McGraw Hill Education
6. Raymond V. Lesikar, Marie E. Flatley, Kathryn Rentz, Paula Lentz, and Neerja Pande, *Business Communication: Connecting in a Digital World (SIE)*, McGraw Hill Education

## **ETIQUETTE & CONVERSATIONAL SKILLS**

**Sub. Code:** BS322A

**L – 4, C – 4**

### **Objective:**

The objective of this course is to equip students with essential interpersonal communication skills, focusing on verbal and non-verbal communication, etiquette, and effective conversational techniques. The course aims to enhance students' ability to interact professionally in various social and business settings, develop self-confidence, and foster positive relationships.

### **CONTENTS:**

#### **Unit 1: Introduction to Etiquette and Communication**

- **Importance of Etiquette:**
  - Definition of etiquette and its role in social and professional settings.
  - The impact of good manners and etiquette on personal and professional life.
  - Differences in cultural and regional etiquettes.
  - Basic principles of politeness, respect, and consideration for others.
- **Types of Communication:**
  - Verbal communication: Tone, pitch, clarity, and pace.
  - Non-verbal communication: Body language, facial expressions, gestures, and posture.
  - Written communication: Email etiquette, formal letters, and business correspondence.
  - Listening skills: Active listening, paraphrasing, and feedback.

#### **Unit 2: Conversational Skills**

- **Effective Conversations:**
  - Understanding the flow of conversation: Opening, engaging, and closing a conversation.
  - Making small talk and starting conversations in various situations (e.g., social, business, formal).
  - Engaging in two-way communication: Asking open-ended questions, listening actively, and building rapport.
  - Overcoming conversational barriers: Nervousness, silence, and awkward moments.
- **Building Confidence in Conversations:**
  - Overcoming communication anxiety and self-doubt.

- Speaking with confidence, clarity, and purpose.
- Strategies to improve self-expression and articulate thoughts clearly.
- The art of storytelling and humor in conversation.

### **Unit 3: Professional Etiquette**

- **Business Etiquette:**
  - Professional greeting and introductions: Handshakes, eye contact, and formal titles.
  - Dining etiquette: Proper table manners, business meals, and social dining settings.
  - Workplace etiquette: Email writing, telephone etiquette, and maintaining professionalism in the office.
  - Attire and grooming: Dress codes for different occasions and professional settings.
- **Virtual Etiquette:**
  - Best practices for virtual communication (e.g., Zoom, Teams, email).
  - Managing virtual meetings: Punctuality, clear communication, and respectful participation.
  - Etiquette for online networking and social media presence.

### **Unit 4: Cross-Cultural Communication**

- **Cultural Sensitivity:**
  - Understanding cultural differences in communication styles and etiquette.
  - The impact of cultural awareness on effective communication.
  - Adapting communication styles to diverse cultural norms and practices.
  - Case studies of international business etiquette.
- **Global Networking and Diplomacy:**
  - Building a global network through effective communication.
  - Navigating diplomatic conversations and maintaining politeness in cross-cultural settings.
  - Business etiquette in international contexts.

### **Unit 5: Conflict Resolution and Handling Difficult Conversations**

- **Resolving Conflicts through Communication:**
  - Techniques for managing disagreements and resolving conflicts peacefully.
  - Managing emotions during difficult conversations.
  - Negotiation skills and finding win-win solutions.
  - Handling criticism and giving constructive feedback.
- **Dealing with Difficult People:**
  - Strategies for handling rude, aggressive, or difficult individuals.
  - Keeping conversations calm and respectful in tense situations.
  - Maintaining professionalism in challenging conversations.

**Suggested Readings:**

1. **Thompson, L.:** *The Etiquette Advantage in Business: Personal Skills for Professional Success*, McGraw-Hill.
2. **Gilbert, M.:** *The Essentials of Business Etiquette*, The Career Press.
3. **Cox, A. and Durst, A.:** *Mastering the Art of Conversation: A Guide to Building Strong Social Skills*, Wiley.
4. **Katzenbach, J.R. and Smith, D.K.:** *The Wisdom of Teams: Creating the High-Performance Organization*, Harper Business.

**Course Outcome:**

Upon successful completion of this course, students will:

- Develop the ability to engage confidently in professional and social conversations.
- Master essential business etiquette for various settings, including virtual communication.
- Improve interpersonal communication skills, including active listening and conflict resolution.
- Be able to navigate cross-cultural communication with sensitivity and professionalism.
- Demonstrate polished social skills that will enhance their personal and professional relationships.

## CORPORATE COMMUNICATION

**Sub. Code:** BS322B

**L – 4, C – 4**

Objective:

The aim of this course is to provide students with a comprehensive understanding of corporate communication principles and practices. It focuses on enhancing communication strategies in organizations, fostering effective internal and external communication, and building corporate reputation through public relations, branding, crisis communication, and digital media.

CONTENTS:

### *Unit 1: Introduction to Corporate Communication*

- **Concept of Corporate Communication:**
  - Definition and scope of corporate communication.
  - The role of communication in corporate success and organizational growth.
  - Key elements of corporate communication: message, audience, channel, and feedback.
  - The importance of corporate identity, image, and reputation.
- **Communication Models in Corporations:**
  - One-way and two-way communication models.
  - Models of corporate communication flow (top-down, bottom-up, and horizontal communication).
  - Integration of communication channels: oral, written, and non-verbal.

### *Unit 2: Corporate Branding and Public Relations*

- **Corporate Branding:**
  - The concept of corporate brand and its elements.
  - Brand building and management strategies.
  - The role of communication in shaping a company's brand image.
  - Corporate visual identity: logo, colors, typography, and design elements.
- **Public Relations (PR):**
  - Definition, objectives, and functions of PR.
  - Tools of PR: press releases, conferences, media relations, newsletters, and reports.
  - Building relationships with stakeholders: investors, customers, employees, and the community.
  - Crisis communication and the role of PR in reputation management.

*Unit 3: Internal Communication*

- **Internal Communication and Its Importance:**
  - The role of internal communication in enhancing organizational efficiency and employee engagement.
  - Channels of internal communication: emails, meetings, memos, intranet, and team collaboration tools.
  - Communication styles within teams and departments.
  - Leadership communication and its impact on employee motivation and organizational culture.
- **Employee Communication:**
  - The relationship between employee satisfaction and internal communication.
  - Best practices for effective employee communication: transparency, feedback, and recognition.
  - Managing change communication: communication during organizational change, mergers, and restructuring.

*Unit 4: External Communication and Media Relations*

- **Media Relations:**
  - The role of media in corporate communication.
  - Building and maintaining relationships with journalists and media houses.
  - Press releases, media kits, and interviews.
  - Strategies for positive media coverage and reputation management.
- **Advertising and Marketing Communications:**
  - The role of corporate communication in advertising.
  - Integration of advertising and PR strategies.
  - Digital marketing communication: social media, content marketing, and online advertising.
  - Corporate sponsorships, events, and promotions as part of external communication strategy.

*Unit 5: Crisis Communication and Reputation Management*

- **Crisis Communication:**
  - Definition and types of crises in a corporate context.
  - The importance of proactive crisis communication plans.
  - Crisis communication strategies: addressing the crisis, controlling the narrative, and managing public perception.
  - Case studies of successful and failed crisis communication strategies.
- **Reputation Management:**
  - Building and maintaining a positive corporate reputation.
  - The role of corporate communication in dealing with public perception.
  - Monitoring reputation: tools and strategies for measuring corporate image.
  - Online reputation management and managing digital media's impact on corporate image.

*Unit 6: Digital Corporate Communication and Social Media*

- **The Role of Digital Media in Corporate Communication:**
  - The rise of digital media in corporate communication strategies.
  - Social media platforms for corporate communication: Twitter, LinkedIn, Facebook, YouTube, etc.
  - The role of corporate blogs, podcasts, and webinars in engaging audiences.
  - Building an online presence and managing online communities.
- **Social Media Crisis and Brand Management:**
  - Managing social media crises and online reputation.
  - Responding to online customer feedback and criticism.
  - The role of influencers and social media advocates in corporate communication.
  - Ethical considerations in digital communication.

Suggested Readings:

1. **Cornelissen, J.:** *Corporate Communication: A Guide to Theory and Practice*, Sage Publications.
2. **Morris, T. and Powley, E.:** *Corporate Communication: Theory and Practice*, Oxford University Press.
3. **Van Riel, C. B. M., and Fombrun, C. J.:** *Essentials of Corporate Communication*, Routledge.
4. **Argenti, P. A.:** *Corporate Communication*, McGraw-Hill Education.
5. **Cutlip, S. M., Center, A. H., & Broom, G. M.:** *Effective Public Relations*, Pearson Education.

Course Outcome:

Upon completion of this course, students will:

- Understand the fundamentals of corporate communication and its applications in different contexts.
- Be equipped with skills in internal communication, media relations, and crisis management.
- Gain the ability to plan and implement effective corporate branding and PR strategies.
- Be capable of managing corporate reputation in both traditional and digital media landscapes.

**Note:** Latest editions of textbooks shall be used.

**PROFESSIONAL COMMUNICATION**

**Sub. Code:** BS322C

**L – 4, C – 4**

Objective:

The objective of this course is to develop students' skills in professional communication. It focuses on enhancing their ability to effectively convey information in written and oral forms, improve interpersonal communication, and understand the dynamics of communication in professional settings.

CONTENTS:

*Unit 1: Introduction to Professional Communication*

- **Concept of Professional Communication:**
  - Definition and importance of professional communication in the workplace.
  - Differences between formal and informal communication.
  - The role of communication in career development.
  - Components of communication: sender, message, channel, receiver, feedback, and noise.
- **Communication Process:**
  - The communication cycle and feedback loop.
  - Barriers to effective communication (physical, psychological, and semantic barriers).
  - Overcoming communication barriers.
  - Non-verbal communication: body language, facial expressions, and gestures.

*Unit 2: Written Communication Skills*

- **Business Writing:**
  - Structure and format of professional documents (letters, memos, reports, emails).
  - The importance of clarity, conciseness, and tone in written communication.
  - Writing persuasive and effective business emails.
  - Common writing styles: formal, informal, and semi-formal.
- **Reports and Proposals:**
  - Structure and components of a business report.
  - Writing proposals for projects and business solutions.
  - The importance of research and data in professional writing.
  - Executive summaries and their role in professional documents.

*Unit 3: Oral Communication and Presentation Skills*

- **Public Speaking and Presentations:**
  - The fundamentals of delivering effective presentations.
  - Structure of a presentation: introduction, body, and conclusion.

- Using visual aids and technology in presentations (e.g., PowerPoint, Prezi).
- Managing audience questions and feedback.
- **Speech Delivery:**
  - Vocal techniques: pitch, tone, and pace.
  - Managing stage fright and building confidence.
  - Effective use of gestures and eye contact.
  - Rehearsing and preparing for public speaking engagements.

*Unit 4: Interpersonal and Team Communication*

- **Interpersonal Communication:**
  - Understanding interpersonal dynamics in a professional setting.
  - Active listening and empathy in communication.
  - Conflict resolution techniques and negotiation skills.
  - The role of feedback in personal and professional growth.
- **Team Communication:**
  - Effective communication within teams: roles, responsibilities, and group dynamics.
  - Collaborative communication tools and techniques.
  - Managing virtual teams and remote communication.
  - Handling communication challenges in multicultural and diverse teams.

*Unit 5: Communication in Professional Settings*

- **Communication in Meetings:**
  - Types of meetings: formal, informal, brainstorming, and decision-making.
  - The role of the chairperson, facilitator, and note-taker in meetings.
  - Preparing an agenda and minutes.
  - Conducting and participating effectively in meetings.
- **Client and Customer Communication:**
  - Building relationships with clients and customers through effective communication.
  - Understanding client needs and expectations.
  - Professional telephone etiquette and virtual meetings.
  - Communication during negotiations and conflict resolution.

*Unit 6: Digital Communication and Social Media*

- **Digital Communication Tools:**
  - Using professional digital communication tools (email, messaging apps, video conferencing).
  - Writing professional emails, memos, and instant messages.
  - Understanding the digital etiquette for professional communication.
  - Maintaining professionalism on social media platforms (LinkedIn, Twitter, etc.).
- **Social Media and Online Branding:**
  - Managing your professional online presence and reputation.
  - Building a professional network through social media.
  - Ethical considerations in digital communication.

- Crisis communication in the digital age.

Suggested Readings:

1. **Mohan, K.:** *Business Communication: Principles, Methods and Techniques*, Tata McGraw-Hill Education.
2. **Lesikar, R. V., & Flatley, M. E.:** *Basic Business Communication: Skills for Empowering the Internet Generation*, McGraw-Hill.
3. **Bovee, C. L., & Thill, J. V.:** *Business Communication Today*, Pearson Education.
4. **Penrose, J. M., Rasberry, R., & Myers, D.:** *Business Communication: A Handbook for Professionals*, Pearson Education.
5. **Reinsch, N. L., & Shelby, K. H.:** *Business and Professional Communication: A Global Perspective*, Sage Publications.

Course Outcome:

Upon completion of this course, students will:

- Develop proficiency in both written and oral business communication.
- Gain the skills needed to manage effective communication in professional environments.
- Be able to create clear and concise reports, proposals, and presentations.
- Understand the dynamics of team communication and interpersonal relationships in the workplace.
- Be equipped to handle communication challenges in the digital world.

---

**Note:** Latest editions of textbooks shall be used.

**PERSONALITY DEVELOPMENT**

**Sub. Code:** BS322D

**L – 4, C – 4**

Objective:

The objective of the course is to help students understand the key aspects of personality development. The course focuses on improving interpersonal skills, enhancing self-awareness, building confidence, and developing emotional intelligence to succeed in both personal and professional environments.

**CONTENTS:**

*Unit 1: Understanding Personality*

- **Introduction to Personality:**
  - Definition and components of personality.
  - Types of personalities (Introversion vs. Extraversion, Thinking vs. Feeling, etc.).
  - Personality development theories (Freud, Jung, Rogers, etc.).
  - The role of genetics and environment in shaping personality.
- **Self-Assessment:**
  - Methods of assessing one's own personality.
  - Self-reflection and self-awareness exercises.
  - Identifying strengths and areas for improvement.
  - The role of self-esteem and self-image in personality development.

*Unit 2: Building Self-Confidence and Self-Esteem*

- **The Importance of Self-Confidence:**
  - Understanding the relationship between self-esteem and self-confidence.
  - Techniques for improving self-confidence (positive thinking, visualization, setting achievable goals).
  - Overcoming self-doubt and fear of failure.
  - Role of body language in conveying confidence.
- **Building a Positive Self-Image:**
  - Strategies for developing a healthy self-image.
  - The impact of positive and negative self-talk.
  - Understanding the impact of social media on self-esteem and self-image.
  - Cultivating a mindset of success and growth.

*Unit 3: Effective Communication Skills*

- **Verbal Communication:**
  - Principles of effective speaking: clarity, tone, and pace.
  - Public speaking and presentations skills.

- Overcoming stage fright and speaking confidently in public.
- The role of storytelling in communication.
- **Non-Verbal Communication:**
  - Understanding body language, facial expressions, and gestures.
  - Reading and interpreting non-verbal cues in others.
  - The importance of eye contact, posture, and handshakes.
  - Using non-verbal communication to build rapport.
- **Listening Skills:**
  - Active listening and its importance in communication.
  - Techniques for improving listening skills (attentive listening, empathetic listening).
  - Barriers to effective listening and how to overcome them.
  - The role of feedback in communication.

*Unit 4: Emotional Intelligence (EQ)*

- **Understanding Emotional Intelligence:**
  - Definition and components of emotional intelligence: self-awareness, self-regulation, motivation, empathy, social skills.
  - The role of emotional intelligence in personal and professional success.
  - Techniques for enhancing emotional intelligence.
  - Managing emotions in challenging situations.
- **Building Empathy and Social Skills:**
  - The importance of empathy in personal and professional relationships.
  - Developing interpersonal skills for building positive relationships.
  - Conflict resolution and negotiation skills.
  - Effective team communication and collaboration.

*Unit 5: Time Management and Goal Setting*

- **Time Management Skills:**
  - Understanding the importance of time management in personal and professional life.
  - Techniques for effective time management (prioritization, the Eisenhower Matrix, Pomodoro Technique).
  - Avoiding procrastination and managing distractions.
  - Setting achievable deadlines and sticking to schedules.
- **Goal Setting and Motivation:**
  - The SMART goal-setting framework.
  - Strategies for staying motivated and focused on long-term goals.
  - Overcoming obstacles and setbacks in goal achievement.
  - The role of discipline and persistence in achieving success.

*Unit 6: Leadership and Teamwork*

- **Leadership Skills:**
  - Understanding different leadership styles (transformational, transactional, situational, etc.).

- Developing leadership qualities: vision, integrity, decisiveness, and responsibility.
- Leading by example and inspiring others.
- Decision-making and problem-solving in leadership roles.
- **Teamwork and Collaboration:**
  - The importance of teamwork in achieving organizational goals.
  - The role of communication and cooperation in successful teamwork.
  - Managing conflict and differing opinions in a team environment.
  - Building trust and respect within teams.

*Unit 7: Personal Grooming and Etiquette*

- **Personal Grooming:**
  - The importance of grooming in creating a positive first impression.
  - Tips for professional attire and appearance in different settings.
  - Hygiene and personal care as aspects of personality development.
  - The impact of grooming on self-confidence and public perception.
- **Etiquette and Manners:**
  - Social and professional etiquette: greetings, introductions, and table manners.
  - Networking etiquette in professional settings.
  - Handling professional and social situations with grace and respect.
  - Digital etiquette in the workplace and on social media.

---

Suggested Readings:

1. **Baron, R. A.:** *Social Psychology: The Science of Everyday Life*, Pearson Education.
2. **Goleman, D.:** *Emotional Intelligence: Why It Can Matter More Than IQ*, Bantam Books.
3. **Covey, S. R.:** *The 7 Habits of Highly Effective People*, Free Press.
4. **Carnegie, D.:** *How to Win Friends and Influence People*, Pocket Books.
5. **Pease, A., & Pease, B.:** *The Definitive Book of Body Language*, Bantam.

Course Outcome:

Upon completion of this course, students will:

- Gain deeper self-awareness and insight into their own personality traits.
- Develop enhanced communication, emotional intelligence, and leadership skills.
- Learn how to set and achieve personal and professional goals effectively.
- Acquire the tools and strategies to enhance their self-confidence, self-esteem, and overall personality.
- Be able to navigate social and professional settings with poise and etiquette.

---

**Note:** Latest editions of textbooks shall be used

## **COST ACCOUNTING**

**Sub. Code: BS323**

**L – 3, T-1, C – 4.**

**Course Objective:**

The objective of this course is to introduce students to the fundamental principles of cost accounting, focusing on the identification, measurement, and analysis of costs within a business. The course aims to provide students with an understanding of various costing methods, such as job order costing, process costing, and activity-based costing, and their application in decision-making.

**Unit1:Introduction**

Meaning, objectives and advantages of cost accounting; Difference between cost accounting and financial accounting; Cost concepts and classifications; Elements of cost; Installation of a costing system; Role of a cost accountant in an organisation

**Unit2:ElementsofCost:MaterialandLabour**

- a. Materials: Material/inventory control techniques. Accounting and control of purchases, storage and issue of materials. Methods of pricing of materials issues — FIFO, LIFO, Simple Average, Weighted Average, Replacement, Standard Cost. Treatment of Material Losses
- b. Labour: Accounting and Control of labour cost. Time keeping and time booking. Concept and treatment of idle time, over time, labour turnover and fringe benefits. Methods of wage payment and the Incentive schemes- Halsey, Rowan, Taylor's Differential piece wage.

**Unit3:ElementsofCost:Overheads**

Classification, allocation, apportionment and absorption of overheads; Under- and over-absorption; Capacity Levels and Costs; Treatments of certain items in costing like interest on capital, packing expenses, bad debts, research and development expenses; Activity based cost allocation.

**Unit 4: MethodsofCosting**

Unit costing, Job costing, Contract costing, Process costing (process losses, valuation of work in progress, joint and by-products), Service costing (only transport).

**Unit5:BookKeepinginCostAccounting**

Integral and non-integral systems; Reconciliation of cost and financial accounts

**Suggested Reading:**

1. Charles T. Horngren, Srikant M. Datar, Madhav V. Rajan, *Cost Accounting: A Managerial Emphasis*, Pearson Education.
2. Drury, Colin. *Management and Cost Accounting*. Cengage Learning.
3. Nigam, B.M. Lall and I.C. Jain. *Cost Accounting: Principles and Practice*. PHI Learning
4. Rajiv Goel, *Cost Accounting*. International Book House
5. Singh, Surender. *Cost Accounting*, Scholar Tech Press, New Delhi.

6. Jain, S.P. and K.L. Narang. *Cost Accounting: Principles and Methods*. Kalyani Publishers
7. Arora, M.N. *Cost Accounting – Principles and Practice*. Vikas Publishing House, New Delhi.
8. Maheshwari, S.N. and S.N. Mittal. *Cost Accounting: Theory and Problems*. Shri Mahavir Book Depot, New Delhi.
9. Iyengar, S.P. *Cost Accounting*. Sultan Chand & Sons

**Note: Latest edition of text books may be used.**

**BUSINESS MATHEMATICS**

**Sub. Code: BS324**

**L – 3, T-1, C – 4.**

**Course Objective :**

The objective of this course is to provide students with a solid foundation in the mathematical concepts and techniques essential for solving business-related problems. The course focuses on applying mathematical tools to areas such as financial analysis, accounting, budgeting, and economic decision-making.

**Unit 1: Matrices and Determinants**

- a. Algebra of matrices. Inverse of a matrix, Matrix Operation – Business Application
- b. Solution of system of linear equations (having unique solution and involving not more than three variables) using matrix inversion Method and Cramer's Rule, The Leontief Input Output Model (Open Model Only).

**Unit 2: Calculus I**

- a. Mathematical functions and their types - linear, quadratic, polynomial, exponential,
- b. Logarithmic function Concepts of limit, and continuity of a function
- c. Concept and rules of differentiation, Maxima and Minima involving second or higher order derivatives.
- d. Concept of Marginal Analysis, Concept of Elasticity, Applied Maximum and Minimum Problems including effect of Tax on Monopolist's optimum price and quantity, Economic Order Quantity.

**Unit 3: Calculus II**

- a. Partial Differentiation: Partial derivatives up to second order; Homogeneity of functions and Euler's theorem; Total differentials; Differentiation of implicit functions with the help of total differentials
- b. Maxima and Minima: Cases of two variables involving not more than one constraint including the use of the Lagrangian multiplier.
- c. Integration: Standard forms. Methods of integration – by substitution, by parts, and by use of partial fractions; Definite integration; Finding areas in simple cases
- d. Application of Integration to marginal analysis. Consumer's and Producer's Surplus, Rate of Sales and the Learning Curve

**Unit 4: Mathematics of Finance**

- a. Rates of interest - nominal, effective – and their inter-relationships in different compounding situations.
- b. Compounding and discounting of assuming different types of rates.
- c. Types of annuities, like ordinary, due, deferred, continuous, perpetual, and their future and present values using different types of rates of interest. Depreciation of Assets. (General annuities to be excluded)

**Unit 5: Linear Programming**

- a. Formulation of linear programming problem (LPP). Graphical solution to LPP. Cases of unique and multiple optimal solutions. Unbounded solutions, infeasibility, and redundant constraints.
- b. Solution to LPP using Simplex method – maximization and minimization cases. Shadow prices of the resources. Identification of unique and multiple optimal solutions, unbounded solution, infeasibility and degeneracy.

**Suggested Readings:**

1. Mizrahi and Sullivan. *Mathematics for Business and Social Sciences*. Wiley and Sons.
2. Budnick, P. *Applied Mathematics*. McGraw Hill Education.

**ELEMENTARY MATHEMATICS**

**Sub. Code:** BS324A

**L – 4, C – 4**

---

**Objective:**

The objective of this course is to provide students with fundamental mathematical tools that are essential for solving problems in economics, business, and other fields. The course covers basic concepts of algebra, calculus, and matrices, which are foundational to the understanding of advanced economic and financial models.

**CONTENTS:**

*Unit 1: Algebra and Equations*

- **Basic Algebraic Concepts:**
  - Variables, constants, and coefficients.
  - Operations on real numbers.
  - Laws of exponents and logarithms.
  - Simplification and factorization of algebraic expressions.
  - Polynomial expressions.
- **Linear and Quadratic Equations:**
  - Solving linear equations (one variable, two variables).
  - Applications of linear equations in economics.
  - Solving quadratic equations by factorization, completing the square, and the quadratic formula.
  - Graphing quadratic functions.
- **Simultaneous Equations:**
  - Solving simultaneous linear equations using substitution and elimination methods.
  - Applications of simultaneous equations in economic models.

*Unit 2: Functions and Graphs*

- **Functions and Their Properties:**
  - Definition and types of functions (linear, polynomial, rational, exponential, logarithmic).
  - Domain and range of a function.
  - Graphs of functions (plotting linear, quadratic, and exponential functions).
  - Inverse functions and their properties.
- **Equations of Lines and Curves:**

- Slope-intercept form of a straight line.
- Equation of a line through two points.
- Parabolas, hyperbolas, and other basic curves.
- Applications in economic analysis (e.g., demand and supply curves).

*Unit 3: Matrix Algebra*

- **Introduction to Matrices:**
  - Definition and types of matrices (row, column, square, diagonal, identity, inverse).
  - Matrix operations (addition, subtraction, multiplication).
  - Determinants and their properties.
  - Inverse of a matrix and solving simultaneous equations using matrices.
- **Applications of Matrices:**
  - Economic applications of matrices (input-output models, Leontief matrix).
  - Matrix applications in solving linear equations and optimization problems.

*Unit 4: Differentiation and its Applications*

- **Introduction to Differentiation:**
  - Definition of derivative and basic rules of differentiation (sum, product, quotient, chain rules).
  - Derivatives of common functions (power functions, exponential functions, logarithmic functions).
  - Higher order derivatives.
- **Applications of Differentiation:**
  - Marginal analysis in economics (marginal cost, marginal revenue).
  - Optimization problems: finding maxima and minima (first and second derivative tests).
  - Elasticity of demand and its relationship with derivatives.
  - Rate of change and slope of curves in economic contexts.

*Unit 5: Integration and its Applications*

- **Introduction to Integration:**
  - Basic rules of integration (power rule, substitution rule).
  - Definite and indefinite integrals.
  - Integration of common functions (polynomials, exponential, and logarithmic functions).
- **Applications of Integration:**
  - Consumer surplus and producer surplus.
  - Total revenue and total cost calculations.
  - Area under curves and its economic interpretation.
  - Calculating the area between curves in economic contexts.

*Unit 6: Probability and Statistics*

- **Basic Probability Theory:**

- Introduction to probability and its rules (addition and multiplication rules).
- Conditional probability and Bayes' Theorem.
- Random variables and probability distributions (discrete and continuous).
- Expected value and variance of random variables.
- **Basic Statistics:**
  - Measures of central tendency (mean, median, mode).
  - Measures of dispersion (variance, standard deviation, range).
  - Correlation and regression analysis.
  - Applications of statistics in economic analysis (e.g., forecasting, trend analysis).

*Unit 7: Mathematical Optimization*

- **Optimization Techniques:**
  - Definition of optimization and its importance in economics.
  - Constrained optimization problems and the method of Lagrange multipliers.
  - Applications in economics: profit maximization, cost minimization, and utility maximization.
- **Constrained Optimization:**
  - Solving optimization problems under constraints.
  - First and second order conditions for optimization.
  - Economic applications of optimization (e.g., production functions, cost functions).

---

Suggested Readings:

1. **Simon, C. P., & Blume, L.:** *Mathematics for Economists*, W.W. Norton & Company.
2. **Dowling, E. T.:** *Mathematics for Economics*, Schaum's Outline Series.
3. **Alpha C. Chiang & Kevin Wainwright:** *Fundamental Methods of Mathematical Economics*, McGraw-Hill Education.
4. **Kreyszig, E.:** *Advanced Engineering Mathematics*, Wiley.
5. **Berck, P., & W. A. Schrag:** *Mathematics for Economists*, Routledge.

Course Outcome:

Upon completion of this course, students will:

- Have a solid understanding of key mathematical concepts required for economic analysis.
- Be able to apply algebraic and calculus-based methods to solve economic problems.
- Understand the use of matrices in economic models and optimization.
- Be proficient in applying probability and statistics to economic data and decision-making.
- Have the skills to solve optimization problems in economics, such as profit maximization and cost minimization.

STATISTICAL MATHEMATICS

**Sub. Code:** BS324C

**L – 4, C – 4**

**Objective:**

The objective of this course is to introduce students to the mathematical techniques used in statistics, emphasizing their application in solving real-world problems. The course will cover probability theory, descriptive statistics, inferential statistics, and statistical methods, with a focus on their practical use in economics, business, and social sciences.

**CONTENTS:**

*Unit 1: Basic Concepts in Statistics*

- **Introduction to Statistics:**
  - Definition of statistics, types of data: qualitative and quantitative.
  - Levels of measurement: nominal, ordinal, interval, and ratio.
  - Collection, presentation, and organization of data.
  - Frequency distribution and graphical representations: histograms, bar charts, pie charts, and cumulative frequency curves.
- **Measures of Central Tendency:**
  - Mean, median, and mode: definition, calculation, and interpretation.
  - Properties and application of measures of central tendency.
  - Weighted mean and its applications.

*Unit 2: Measures of Dispersion and Skewness*

- **Measures of Dispersion:**
  - Range, variance, standard deviation, and coefficient of variation.
  - Interpretation of dispersion and its economic significance.
  - Relationship between mean and standard deviation in normal distribution.
- **Skewness and Kurtosis:**
  - Definition and measurement of skewness and kurtosis.
  - Interpretation of skewness: positive, negative, and zero skew.
  - Role of kurtosis in understanding the shape of the data distribution.

*Unit 3: Probability Theory*

- **Introduction to Probability:**
  - Basic concepts: sample space, events, and probability.
  - Laws of probability: addition, multiplication, and conditional probability.
  - Theorems of probability: Bayes' Theorem, total probability.
- **Random Variables and Probability Distributions:**

- Definition of random variables: discrete and continuous.
- Probability mass function (PMF) and probability density function (PDF).
- Expected value, variance, and standard deviation of random variables.
- **Important Probability Distributions:**
  - Binomial distribution: properties, applications, and examples.
  - Normal distribution: properties, standard normal distribution, and Z-scores.
  - Poisson distribution: application in modeling rare events.

#### *Unit 4: Sampling and Estimation*

- **Sampling Techniques:**
  - Types of sampling: random, stratified, systematic, and cluster sampling.
  - Sampling distribution and the central limit theorem (CLT).
  - Standard error of the mean and its significance.
- **Point Estimation and Interval Estimation:**
  - Definition of estimators and properties (unbiasedness, consistency, efficiency).
  - Confidence intervals for population parameters (mean, proportion).
  - Sample size determination for estimation.

#### *Unit 5: Hypothesis Testing*

- **Introduction to Hypothesis Testing:**
  - Formulation of null and alternative hypotheses.
  - Type I and Type II errors, significance level (alpha), and p-value.
  - One-tailed and two-tailed tests.
- **Tests for Population Mean and Proportion:**
  - Z-test and t-test for population mean.
  - Test for population proportion.
  - Chi-square tests for goodness of fit and independence.
- **Analysis of Variance (ANOVA):**
  - One-way ANOVA and its application in comparing multiple means.
  - F-distribution and its properties.
  - Assumptions of ANOVA and interpretation of results.

#### *Unit 6: Regression and Correlation*

- **Simple Linear Regression:**
  - Model of simple linear regression: assumptions, estimation, and interpretation.
  - Least squares method and its application in fitting a line.
  - Coefficient of determination (R-squared) and its significance.
- **Multiple Linear Regression:**
  - Model of multiple linear regression: assumptions, estimation, and interpretation.
  - Multicollinearity, heteroscedasticity, and model diagnostics.
- **Correlation Analysis:**
  - Definition and types of correlation: Pearson, Spearman, and Kendall's rank correlation.
  - Calculation and interpretation of correlation coefficient.

*Unit 7: Time Series Analysis and Forecasting*

- **Introduction to Time Series Data:**
  - Components of time series: trend, seasonal variation, cyclical variation, and irregular variation.
  - Methods for trend analysis: moving averages and exponential smoothing.
- **Time Series Forecasting:**
  - Forecasting methods: Naïve approach, ARIMA model, and seasonal adjustments.
  - Applications of time series forecasting in economics and business.

---

Suggested Readings:

1. **Anderson, D. R., Sweeney, D. J., & Williams, T. A.:** *Statistics for Business and Economics*, Cengage Learning.
2. **Gujarati, D. N. & Porter, D. C.:** *Basic Econometrics*, McGraw-Hill Education.
3. **Keller, G.:** *Statistics for Management and Economics*, Cengage Learning.
4. **Mendenhall, W., Beaver, R. J., & Beaver, B. M.:** *Introduction to Probability and Statistics*, Cengage Learning.
5. **Walpole, R. E., Myers, R. H., & Myers, S. L.:** *Probability and Statistics for Engineers and Scientists*, Pearson.

Course Outcome:

Upon completion of this course, students will:

- Understand the fundamental concepts of statistical mathematics, including probability, sampling, estimation, and hypothesis testing.
- Be able to apply statistical methods to analyze economic and business data.
- Have a solid foundation in regression, correlation analysis, and time series forecasting.
- Be equipped to interpret statistical results and make informed decisions based on data analysis.

---

**Note:** Latest editions of textbooks shall be used.

## **ORGANISATIONAL BEHAVIOUR**

**Sub. Code: BS325**

**L – 4, C – 4.**

### **Course Objective:**

The objective of this course is to provide students with a comprehensive understanding of the behaviors, dynamics, and interactions within organizations. The course focuses on how individual, group, and organizational factors influence workplace performance, communication, motivation, leadership, and decision-making.

### **Course Contents:**

#### **Unit 1**

Conceptual Foundations and Importance of organisation Behaviour, Management Challenges, A Paradigm Shift, Individual Behaviour at Work, Perception and Attribution: Concept, Nature, Process, Attitude: Components, functions and changing attitudes; Personality: Concept, Types and Theories of Personality: Learning: Concept and Theories of Learning, reinforcement, Right and Left brain concept, Emotional Intelligence.

#### **Unit II**

Motivation: Concepts and their application, Need (Maslow and Herzberg), Content & Process theories, Expectancy theory, Equity theory, goal Setting theory, Empowerment and economic incentives as motivational tools.

#### **Unit III**

Leadership: Leaders and Leadership Process: Traits, Behaviours, and situations theories, Blake & Mouton's: Managerial grid, Hersey & Blanchard's' situational Leadership Model, Likert's 4 system model, Fiedler's Leadership contingency theory, House's Path-goal theory, Contemporary Leadership issues: Charismatic, Transformational Leadership, Substitutes and Neutralizers for Leadership.

#### **Unit IV**

Group Dynamics: Definition, Stages of Group Development, Group Cohesiveness, Formal and Informal Groups, Group Processes and Decision Making, Dysfunctional Groups, Importance of team work in organisations, developing team leadership skills, Analysis of Interpersonal Relationship: Transactional Analysis, Johari Window.

#### **Unit V**

Organisational Change: Concept, Nature, Resistance to change, Managing resistance to change, Implementing Change, Kurt Lewin Theory of Change. Conflict: Concept, Sources, Types, Stages of conflict, Management of conflict.

**Readings:**

1. Robbins Stephen P.: *Organisational Behaviour*, Pearson Education, 12th Edition
2. Luthans Fred : *Organisational Behaviour*, Tata McGraw Hill
3. Davis, Keith: *Human Behaviour at Works*, Tata McGraw Hill, New Delhi.
4. Hersey Paul, Blanchard, Kenneth H and Johnson Dewey E.: *Management of Organisational Behaviour: Leading Human Resources*, Pearson Education, 8th Edition

**Supplementary Readings:**

1. Newstrom John W.: *Organisational Behaviour*, Tata McGraw Hill, 12th Edition
2. Mc Shane L. Steven, Glinow Mary Ann Von & Sharma Radha R. - *Organisational Behaviour*; Tata McGraw Hill, 3rd Edition

**MACRO ECONOMICS**

**Sub. Code: BS331**

**L – 5, C – 5.**

**Course Objective :**

The objective of this course is to provide students with a comprehensive understanding of the key principles and concepts of macroeconomics and their impact on national and global economies. The course focuses on how aggregate economic factors, such as GDP, unemployment, inflation, fiscal policy, and monetary policy, influence economic growth, stability, and public welfare.

**Unit1:Introduction**

Concepts and variables of macroeconomics, income, expenditure and the circular flow, components of expenditure. Static macroeconomic analysis short and the long run – determination of supply, determination of demand, and conditions of equilibrium

**Unit2:Economyintheshortrun**

IS–LM framework, fiscal and monetary policy, determination of aggregate demand, shifts in aggregate demand, aggregate supply in the short and long run, and aggregate demand- aggregate supply analysis.

**Unit3:Inflation,UnemploymentandLabormarket**

Inflation: Causes of rising and falling inflation, inflation and interest rates, social costs of inflation;Unemployment–naturalrateofunemployment,frictionalandwaitunemployment.

Labourmarketanditsinteractionwithproductionsystem;Phillipscurve,thetrade-offbetweeninflationandunemployment,sacrificeratio,roleofexpectationsadaptiveandrational

**Unit4:Openeconomy**

Openeconomy–flowsofgoodsandcapital,savingandinvestmentinasmallandalargeopen economy, exchange rates, Mundell – Fleming model with fixed and flexible prices in a small openeconomywithfixedandwithflexibleexchangerates,interest-ratedifferentialscaseofalargeeconomy.

**Unit5:**

BehavioralFoundations-Investment–determinantsofbusinessfixedinvestment, effect to tax, determinants of residential investment and inventory investment. Demand for Money – Portfolioandtransactionstheoriesofdemandforrealbalances,interestandincomeelasticities ofdemandforrealbalances.Supplyofmoney

**CORPORATE LAW**

**Sub. Code: BS332**

**L – 5, C – 5**

**Course Objective :**

The objective of this course is to provide students with a comprehensive understanding of the legal framework governing corporate entities and business operations. The course focuses on the formation, structure, and management of corporations, as well as the rights and responsibilities of directors, shareholders, and other stakeholders.

**UNIT1:Introduction**

Administration of Company Law [including National Company Law Tribunal (NCLT), National Company Law Appellate Tribunal (NCLAT), Special Courts]; Characteristics of a company; lifting of corporate veil; types of companies including one person company, small company, and dormant company; association not for profit; illegal association; formation of company, on-line filing of documents, promoters, their legal position, pre-incorporation contract; on-line registration of a company.

**UNIT2:Documents**

Memorandum of association, Articles of association, Doctrine of constructive notice and indoor management, prospectus-shelf and red herring prospectus, misstatement in prospectus, GDR; book-building; issue, allotment and forfeiture of share, transmission of shares, buyback and provisions regarding buyback; issue of bonus shares.

**UNIT3:Management**

Classification of directors, women directors, independent director, small shareholder's director; disqualifications, director identity number (DIN); appointment; Legal positions, powers and duties; removal of directors; Key managerial personnel, managing director, manager; Meetings: Meetings of shareholders and board of directors; Types of meetings, Convening and conduct of meetings, Requisites of a valid meeting, postal ballot, meeting through video conferencing, e-voting. Committees of Board of Directors - Audit Committee, Nomination and Remuneration Committee, Stakeholders Relationship Committee, Corporate Social Responsibility Committee

**UNIT4:**

**Dividends, Accounts, Audit:** Provisions relating to payment of Dividend, Provisions relating to Books of Account, Provisions relating to Audit, Auditors' Appointment, Rotation of Auditors, Auditors' Report, Secretarial Audit.

**Winding Up:** Concept and modes of Winding Up.

**Insider Trading, Whistle Blowing:** Insider Trading; meaning & legal provisions; Whistle-blowing: Concept and Mechanism.

**UNIT 5:DepositoriesLaw**

The Depositories Act 1996 – Definitions; rights and obligations of depositories; participants issuers and beneficial owners; inquiry and inspections, penalty.

**Suggested Readings:**

1. MCKuchhal, \_\_\_\_\_ and  
VivekKuchhal, *Modern Indian Company Law*, ShriMahavirBookDepot(Publishers), Delhi.
2. GKKapoorandSanjayDhamija, *Company Law*, BharatLawHouse, Delhi.

**COMPETITION LAW**

**Sub. Code:** BS322A

**L – 4, C – 4**

---

**Objective:**

The objective of this course is to familiarize students with the key concepts of competition law, covering legal frameworks, market dynamics, antitrust laws, and their application in promoting fair competition and protecting consumers. The course will also explore the role of competition law in regulating monopolistic practices, cartels, and mergers and acquisitions.

**CONTENTS:**

*Unit 1: Introduction to Competition Law*

- **Concepts of Competition:**
  - Definition of competition and competitive markets.
  - The importance of competition in a market economy.
  - Economic efficiency, consumer welfare, and the role of competition.
  - Overview of competition law and its objectives: promoting competition and regulating anti-competitive practices.
- **Historical Development of Competition Law:**
  - Evolution of competition law in different jurisdictions (United States, European Union, India, etc.).
  - Key milestones and international conventions in competition law.
  - The role of international organizations: WTO, UNCTAD, OECD.
- **Objectives of Competition Law:**
  - Preventing anti-competitive agreements, abuse of dominant positions, and anti-competitive mergers.
  - Enhancing consumer welfare and fostering economic growth.
  - Regulatory frameworks and enforcement mechanisms.

*Unit 2: Anti-Competitive Agreements*

- **Types of Anti-Competitive Agreements:**
    - Horizontal agreements (e.g., cartels, price-fixing).
    - Vertical agreements (e.g., resale price maintenance, territorial restrictions).
    - Tacit collusion vs. explicit collusion.
    - Agreements that restrict competition (cartels, market-sharing agreements, price-fixing, etc.).
  - **Competition Law and Cartels:**
    - Definition of cartels and their harmful effects on markets and consumers.
-

- Legal frameworks for cartel prohibition.
- Leniency programs and whistleblower policies.
- Case studies of notable cartel investigations.
- **Exemptions to Anti-Competitive Agreements:**
  - Legal exemptions under competition law (e.g., joint ventures, standardization agreements, etc.).
  - Rule of reason and per se violations in antitrust law.

#### *Unit 3: Abuse of Dominant Position*

- **Concept of Dominance:**
  - Definition of market dominance and the factors determining dominance.
  - Market share thresholds and their implications.
  - Abuse of market power and its impact on competition.
- **Forms of Abuse of Dominant Position:**
  - Predatory pricing, price discrimination, refusal to supply, tying and bundling.
  - Abuse through exclusionary practices, excessive pricing, and other exploitative practices.
- **Regulation of Abuse of Dominance:**
  - Legal standards for identifying abusive behavior.
  - Case studies of abuse of dominant position.
  - Enforcement and penalties for abuse.

#### *Unit 4: Mergers and Acquisitions*

- **Merger Control under Competition Law:**
  - Definition and significance of mergers and acquisitions.
  - Types of mergers: horizontal, vertical, and conglomerate mergers.
  - Economic analysis of mergers and their impact on competition.
- **Merger Review Process:**
  - Merger notification and review process in different jurisdictions.
  - Antitrust issues in mergers: market concentration, anti-competitive effects, and efficiencies.
  - Regulatory bodies and their role in merger control (e.g., the European Commission, US Federal Trade Commission, Competition Commission of India).
- **Case Studies of Mergers and Acquisitions:**
  - High-profile cases in antitrust law (e.g., Google/DoubleClick, Facebook/WhatsApp).
  - Economic and legal analysis of merger cases.

#### *Unit 5: Competition Law in India*

- **The Competition Act, 2002:**
  - Key provisions and objectives of the Indian Competition Act.
  - Regulatory bodies: Competition Commission of India (CCI) and its role.
  - Framework for preventing anti-competitive practices, abuse of dominance, and regulating mergers and acquisitions.

- **Anti-Competitive Agreements under Indian Law:**
  - Legal provisions regarding cartels and anti-competitive agreements in India.
  - Significant cases handled by the Competition Commission of India (CCI).
  - Policy and enforcement challenges in the Indian context.
- **Regulation of Mergers and Acquisitions in India:**
  - Guidelines and thresholds for merger control in India.
  - Case studies of mergers reviewed by the CCI.
  - Examination of market impact and anti-competitive concerns in Indian merger cases.

*Unit 6: International Competition Law and Policy*

- **Global Overview of Competition Laws:**
  - Key competition law frameworks around the world: US (Sherman Act, Clayton Act), EU (EU competition law), and others.
  - International coordination and cooperation in enforcing competition laws.
- **International Cartels and Cross-Border Enforcement:**
  - Legal challenges in cross-border cartel enforcement.
  - International cartel cases and cooperation between competition authorities.
  - OECD, UNCTAD, and other international bodies in the regulation of competition.
- **Global Trends in Competition Policy:**
  - Emerging issues in global competition law: digital markets, big data, and platform monopolies.
  - New challenges in regulating technology giants (e.g., Google, Amazon, Facebook).

---

Suggested Readings:

1. **Whish, R., & Bailey, D.:** *Competition Law*, Oxford University Press.
2. **Lowe, P., & Rainer, B.:** *Competition Law: A Guide to the Merger Control Regulation*, Bloomsbury Professional.
3. **Katz, M. L., & Shapiro, C.:** *Antitrust and Competition Policy*, MIT Press.
4. **Bellamy, C.:** *Bellamy & Child: European Union Law of Competition*, Oxford University Press.
5. **Trebilcock, M. J., & Howse, R.:** *The Regulation of International Trade*, Routledge.

Course Outcome:

Upon completion of this course, students will:

- Understand the principles and frameworks of competition law.
  - Be able to analyze and assess anti-competitive behavior, abuse of dominance, and merger control.
-

IT LAW

**Sub. Code:** BS332

**L – 4, C – 4**

---

**Objective:**

The objective of this course is to provide students with an understanding of the legal aspects related to Information Technology. This includes intellectual property, data protection, cybercrimes, e-commerce, and legal regulations governing online transactions. The course also aims to acquaint students with emerging issues in the digital economy, such as blockchain and artificial intelligence, and how these technologies interact with legal frameworks.

---

**CONTENTS:**

*Unit 1: Introduction to IT Law*

- **Overview of IT Law:**
    - Definition and scope of Information Technology law.
    - Role of IT law in the digital age and its importance in regulating online and offline business transactions.
    - Relationship between technology and law: Challenges in regulating fast-evolving technologies.
  - **Constitutional and Legal Framework for IT:**
    - Basic principles of IT law and its legal foundations.
    - National and international regulatory bodies overseeing IT law.
    - Overview of key international treaties and conventions on IT governance (e.g., Convention on Cybercrime, WTO and TRIPS Agreement).
  - **E-Governance and Legal Frameworks:**
    - Role of e-governance in modern democracies.
    - Legal frameworks supporting e-governance: E-Signatures, digital contracts, and public records in the digital domain.
    - Key acts and policies shaping e-governance, such as the National E-Governance Plan (NEGP) and Digital India initiative.
- 

*Unit 2: Intellectual Property (IP) in the Digital Age*

- **Overview of Intellectual Property:**
    - Introduction to IP law: Copyright, Trademark, Patent, and Trade Secrets.
    - The impact of the digital environment on IP rights and protection.
-

- Importance of protecting digital content and online creations.
- **Copyright and Digital Content:**
  - Copyright law and digital content: Software, databases, and online works.
  - Fair use, licenses, and Digital Rights Management (DRM).
  - Enforcement of copyright in the digital age and the role of Internet Service Providers (ISPs).
- **Patents and Software:**
  - Patentability of software, algorithms, and digital inventions.
  - The patenting process and issues related to software patents.
  - Patent infringement in the digital space and litigation.
- **Trademark and Domain Names:**
  - Trademark law and its relevance in cyberspace.
  - Domain names as trademarks and disputes (e.g., cybersquatting).
  - ICANN and the regulation of domain names.

---

*Unit 3: Cybercrimes and Legal Issues*

- **Overview of Cybercrimes:**
  - Definition and types of cybercrimes: Hacking, identity theft, phishing, cyberstalking, and online fraud.
  - Cybercrime legislation in different jurisdictions (e.g., Cybercrime laws in India, the US, and the EU).
  - Key issues in enforcement: Challenges in jurisdiction and international cooperation in tackling cybercrime.
- **Cybercrime Investigation and Law Enforcement:**
  - Role of law enforcement agencies in investigating cybercrimes.
  - Tools and technologies used for cybercrime investigation.
  - Challenges of digital forensics and evidence gathering.
- **Laws Relating to Data Protection:**
  - Introduction to data protection laws: The right to privacy, data security, and encryption.
  - Key legislations: The Personal Data Protection Bill (India), GDPR (Europe), and CCPA (California).
  - Role of organizations in data protection, including obligations and penalties.

*Unit 4: E-Commerce and Digital Transactions*

- **Legal Framework for E-Commerce:**
  - Regulatory frameworks governing e-commerce transactions.
  - Electronic contracts, digital signatures, and their legal validity.
  - Consumer protection in e-commerce transactions.
  - E-commerce dispute resolution: Mediation, arbitration, and online dispute resolution (ODR).
- **Cybersecurity and Legal Issues in E-Commerce:**
  - Cybersecurity challenges in e-commerce: Protecting transactions and customer data.
  - Legal obligations of businesses to protect consumer information.

- Cybersecurity laws and regulations (e.g., NIST Cybersecurity Framework, IT Act 2000 in India).
- **Consumer Protection in the Digital Age:**
  - Consumer rights in online transactions.
  - E-commerce platforms and their role in protecting consumers.
  - Role of consumer protection laws in regulating digital transactions (e.g., the Consumer Protection (E-commerce) Rules 2020 in India).

*Unit 5: The Digital Economy and Emerging Technologies*

- **Blockchain and Legal Implications:**
  - Overview of blockchain technology and its applications in business and law.
  - Legal challenges in the use of blockchain: Smart contracts, cryptocurrencies, and decentralized applications (dApps).
  - Regulatory issues around cryptocurrencies and Initial Coin Offerings (ICOs).
- **Artificial Intelligence (AI) and Law:**
  - Impact of AI on legal frameworks: Ethical issues, liability, and accountability.
  - AI in law enforcement: Surveillance, profiling, and predictive policing.
  - Legal regulations concerning AI technologies and autonomous systems.
- **Privacy and Ethical Issues in the Digital Economy:**
  - Privacy concerns in the digital economy: Data collection, profiling, and surveillance.
  - The concept of "digital rights" and ethical implications of technology use.
  - Ethical considerations in AI, data usage, and cybersecurity.

Suggested Readings:

1. **Brettel, M., & Spengler, T.:** *Cyber Law: The Law of the Internet and Information Technology*, Springer.
2. **Sigh, P., & Chauhan, V.:** *Cyber Laws and IT Protection in India*, University Press.
3. **Taylor, L., & Gannon, M.:** *Information Technology and the Law*, Routledge.
4. **Bada, A., & Dlamini, S.:** *The Law of Cyberspace*, Oxford University Press.
5. **Rouse, M., & Cooper, A.:** *E-Commerce and the Law*, Cengage Learning

Course Outcome:

Upon completion of this course, students will:

- Understand the fundamental principles of IT law and its application in digital transactions, intellectual property, and cybersecurity.
- Be equipped to analyze and assess legal challenges posed by emerging technologies such as blockchain and artificial intelligence.
- Gain practical knowledge of the regulation of e-commerce, digital contracts, and data protection.
- Develop the ability to apply IT law to real-world situations and contribute to policy discussions on digital governance.

## HUMAN RESOURCE MANAGEMENT

**Sub. Code: BS333**

**L – 5, C – 5.**

### **Course Objective :**

The objective of this course is to provide students with a comprehensive understanding of the principles, strategies, and practices involved in managing human resources within an organization. The course focuses on key HR functions such as recruitment, selection, training and development, performance management, compensation and benefits, and employee relations.

### **Unit1:Introduction**

Human Resource Management: Concept and Functions, Role, Status and competencies of HR Manager, HR Policies, Evolution of HRM, HRM vs HRD. Emerging Challenges of Human Resource Management; Workforce diversity; Empowerment; Downsizing; VRS; Human Resource Information System

### **Unit2:AcquisitionofHumanResource**

Human Resource Planning- Quantitative and Qualitative dimensions; job analysis – job description and job specification; Recruitment – Concept and sources; Selection – Concept and process; test and interview; placement and induction

### **Unit3:TrainingandDevelopment**

Concept and Importance; Identifying Training and Development Needs; Designing Training Programme; Role-Specific and Competency-Based Training; Evaluating Training Effectiveness; Training Process Outsourcing; Management Development; Career Development.

### **Unit 4:PerformanceAppraisal**

Nature, objectives and importance; Modern techniques of performance appraisal; potential appraisal and employee counseling; job changes - transfers and promotions; Compensation: concept and policies; job evaluation; methods of wage payments and incentive plans; fringe benefits; performance linked compensation.

### **Unit5:Maintenance**

Employee health and safety; employee welfare; social security; Employer-Employee relations-an overview; grievance-handling and redressal; Industrial Disputes: causes and settlement machinery

### **Suggested Readings:**

1. Gary Dessler. *A Framework for Human Resource Management*. Pearson Education.
2. DeCenzo, D.A. and S.P. Robbins, *Personnel/Human Resource Management*, Pearson Education.
3. Bohlendar and Snell, *Principles of Human Resource Management*, Cengage Learning
4. Ivancevich, John M. *Human Resource Management*. McGraw Hill.
5. Wreather and Davis. *Human Resource Management*. Pearson Education.
6. Robert L. Mathis and John H. Jackson. *Human Resource Management*. Cengage Learning.
7. TN Chhabra, *Human Resource Management*, Dhanpat Rai & Co., Delhi

## **COMPUTER APPLICATIONS IN BUSINESS**

**Sub. Code: BS334**

**L – 4, P-2, C – 5,**

**Objectives:** To provide computer skills and knowledge for commerce students and to enhance the student understanding of usefulness of information technology tools for business operations.

### **Unit 1: Computer System:**

Hardware: input devices, output devices, and peripheral devices. Software: system software, operating system - Windows, application software, antivirus, computer networks. Internet applications.

### **Unit 2: Word Processing**

Introduction to word Processing, Word processing concepts, Use of Templates, Working with word document: Editing text, Find and replace text, Formatting, spell check, Autocorrect, Autotext; Bullets and numbering, Tabs, Paragraph Formatting, Indent, Page Formatting, Header and footer, Tables: Inserting, filling and formatting a table; Inserting Pictures and Video; Mail Merge: including linking with Database; Printing documents

#### **Creating Business Documents using the above facilities**

### **Unit 3: Preparing Presentations**

Basics of presentations: Slides, Fonts, Drawing, Editing; Inserting: Tables, Images, texts, Symbols, Media; Design; Transition; Animation; and Slideshow.

#### **Creating Business Presentations using above facilities**

### **Unit 4: Spreadsheet and its Business Applications**

**Spreadsheet concepts,** Managing worksheets; Formatting, Entering data, Editing, and Printing a worksheet; Handling operators in formula, Project involving multiple spreadsheets, Organizing Charts and graphs

**Generally used Spreadsheet functions:** Mathematical, Statistical, Financial, Logical, Date and Time, Lookup and reference, Database, and Text functions

### **Unit 5: Creating Business Spreadsheet**

**Creating spreadsheet in the area of:** Loan and Lease statement; Ratio Analysis; Payroll statements; Capital Budgeting; Depreciation Accounting; Graphical representation of data; Frequency distribution and its statistical parameters; Correlation and Regression

### **Suggested Readings:**

1. "The Digital Transformation Playbook: Rethink Your Business for the Digital Age" by David L. Rogers
2. "Information Systems for Managers: Text and Cases" by G. C. C. K. P. K. and D. S. H.

## INCOME TAX LAW AND PRACTICE

Sub. Code: BS335

L – 4, T-1, C – 5.

### Course Objective :

The objective of this course is to provide students with a comprehensive understanding of the principles, provisions, and practical applications of income tax law. The course focuses on how income tax laws affect individuals, businesses, and organizations, with an emphasis on the computation of taxable income, tax deductions, exemptions, and the filing of tax returns. Students will explore key topics such as the scope of income, tax rates, tax planning strategies, and the role of tax authorities.

### Unit1:Introduction

**Basic concepts:** Income, agricultural income, person, assessee, assessment year, previous year, gross total income, total income, maximum marginal rate of tax; Permanent Account Number (PAN) **Residential status;** Scope of total income on the basis of residential status  
Exempted income under section 10

### Unit2:ComputationofIncomeunderdifferentheads-1

Income from Salaries; Income from house property

### Unit3:ComputationofIncomeunderdifferentheads-2

Profits and gains of business or profession; Capital gains; Income from other sources

### Unit4:ComputationofTotalIncomeandTaxLiability

Income of other persons included in assessee's total income; Aggregation of income and set-off and carry forward of losses; Deductions from gross total income; Rebates and reliefs. Computation of total income of individuals and firms; Tax liability of an individual and a firm; five leading cases decided by the Supreme Court

### Unit5:PreparationofReturnofIncome

Filing of returns: Manually, On-line filing of Returns of Income & TDS; Provision & Procedures of Compulsory On-Line filing of returns for specified assesses.

### Note:

1. There shall be a practical examination of 20 Marks on E-filing of Income Tax Returns using a software utility tool. The student is required to fill appropriate Form and generate the XML file.
2. There shall be 4 Credit Hrs. for Lectures + one Credit hr. (Two Practical Periods per week per batch) for Practical Lab + one credit Hr for Tutorials (per group)
3. Latest edition of textbooks and Software may be used.

### Suggested readings:

1. Singhania, Vinod K. and Monica Singhania. *Students' Guide to Income Tax*, University Edition. Taxman Publications Pvt.Ltd., New Delhi.
2. Ahuja, Girish and Ravi Gupta. *Systematic Approach to Income Tax*. Bharat Law House, Delhi.

### Journals

1. IncomeTaxReports.CompanyLawInstituteofIndiaPvt.Ltd.,Chennai.
2. Taxman.TaxmanAlliedServicesPvt.Ltd.,New Delhi.
3. CurrentTaxReporter.CurrentTaxReporter,Jodhpur.

**Software**

1. VinodKumarSinghania,e-filingofIncomeTaxReturnsandComputationofTax,  
TaxmanPublicationPvt.Ltd,NewDelhi.Latestversion
2. 'ExcelUtility'availableat`incometaxindiaefiling.gov.in`

## BUSINESS STATISTICS

**Sub. Code: BS341**

**L – 4, T-1, C – 5.**

### **Course Objective:**

The objective of this course is to provide students with a comprehensive understanding of statistical methods and techniques used in business decision-making. The course focuses on how to collect, analyze, interpret, and present data to make informed decisions in various business contexts.

### **Unit1:StatisticalDataandDescriptiveStatistics**

- a. Nature and Classification of data: univariate, bivariate and multivariate data; time-series and cross-sectional data
- b. Measures of Central Tendency
  - i. Mathematical averages including arithmetic mean, geometric mean and harmonic mean. Properties and applications.
  - ii. Positional Averages  
Mode and Median (and other partition values including quartiles, deciles, and percentiles) (including graphic determination)
- c. Measures of Variation: absolute and relative.  
Range, quartile deviation, mean deviation, standard deviation, and their coefficients, Properties of standard deviation/variance
- d. Skewness: Meaning, Measurement using Karl Pearson and Bowley's measures; Concept of Kurtosis

### **Unit2:ProbabilityandProbabilityDistributions**

- a. Theory of Probability. Approaches to the calculation of probability; Calculation of event probabilities. Addition and multiplication laws of probability (Proof not required); Conditional probability and Bayes' Theorem (Proof not required)
- b. Expectation and variance of a random variable
- c. Probability distributions:
  - i. Binomial distribution: Probability distribution function, Constants, Shape, Fitting of binomial distribution
  - ii. Poisson distribution: Probability function, (including Poisson approximation to binomial distribution), Constants, Fitting of Poisson distribution
  - iii. Normal distribution: Probability distribution function, Properties of normal curve, Calculation of probabilities

### **Unit3:SimpleCorrelationandRegressionAnalysis**

- a. **Correlation Analysis:** Meaning of Correlation: simple, multiple and partial; linear and non-linear, Correlation and Causation, Scatter diagram, Pearson's co-efficient of correlation; calculation and properties (Proof not required). Correlation and Probable error; Rank Correlation
- b. **Regression Analysis:** Principle of least squares and regression lines, Regression equations and estimation; Properties of regression coefficients; Relationship between Correlation and Regression coefficients; Standard Error of Estimate and its use in interpreting the results.

### **Unit 4:IndexNumbers**

Meaning and uses of index numbers; Construction of index numbers: fixed and chain base: univariate and composite. Aggregate and average of relatives – simple and weighted

Tests of adequacy of index numbers, Base shifting, splicing and deflating. Problems in the construction of index numbers; Construction of consumer price indices: Important share price indices, including BSE SENSEX and NSE NIFTY

### **Unit 5: TimeSeriesAnalysis**

Components of time series; Additive and multiplicative models; Trend analysis: Fitting of trend line using principle of least squares—linear, second degree parabola and exponential. Conversion of annual linear trend equation to quarterly/monthly basis and vice-versa; Moving averages; Seasonal variations: Calculation of Seasonal Indices using Simple averages, Ratio-to-trend, and Ratio-to-moving averages methods. Uses of Seasonal Indices

#### **Note:**

- 1. Latest edition of textbooks may be used.**

#### **Suggested Readings:**

1. Levin, Richard, David S. Rubin, Sanjay Rastogi, and H M Siddiqui. *Statistics for Management*. 7th ed, Pearson Education.
2. David M. Levine, Mark L. Berenson, Timothy C. Krehbiel, P. K. Viswanathan, *Business Statistics: A First Course*, Pearson Education.
3. Siegel Andrew F. *Practical Business Statistics*. McGraw Hill Education.
4. Vohra N.D., *Business Statistics*, McGraw Hill Education.
5. Murray R Spiegel, Larry J. Stephens, Narinder Kumar. *Statistics (Schaum's Outline Series)*, McGraw Hill Education.
6. Gupta, S.C. *Fundamentals of Statistics*. Himalaya Publishing House.
7. Anderson, Sweeney, and Williams, *Statistics for Students of Economics and Business*, Cengage Learning.

## PRINCIPLES OF MARKETING

Sub. Code: BS342

L – 5, C – 5.

**Objective:** The objective of this course is to provide basic knowledge of concepts, principles, tools and techniques of marketing.

**Contents:**

**Unit1:Introduction:**

Nature, scope and importance of marketing; Evolution of marketing; selling vs marketing; Marketing mix, Marketing environment: concept, importance, and components (Economic, Demographic, Technological, Natural, Socio-Cultural and Legal).

**Unit2:**

**a. Consumer Behaviour:** Nature and Importance, Consumer buying decision process; Factors influencing consumer buying behaviour.

**b. Market segmentation:** concept, importance and bases; Target market selection; Positioning concept, importance and bases; Product differentiation vs. market segmentation.

**Unit3:Product:**

Concept and importance, Product classifications; Concept of product mix; Branding, packaging and labeling; Product-Support Services; Product life-cycle; New Product Development Process; Consumer adoption process.

**Unit4:**

**a. Pricing:** Significance. Factors affecting price of a product. Pricing policies and strategies.

**b. Distribution Channels and Physical Distribution:** Channels of distribution - meaning and importance; Types of distribution channels; Functions of middleman; Factors affecting choice of distribution channel; Wholesaling and retailing; Types of Retailers; e-tailing, Physical Distribution.

**Unit5:**

**a. Promotion:** Nature and importance of promotion; Communication process; Types of promotion: advertising, personal selling, public relations & sales promotion, and their distinctive characteristics; Promotion mix and factors affecting promotion mix decisions;

**b. Recent developments in marketing:** Social Marketing, online marketing, direct marketing, services marketing, green marketing, Rural marketing; Consumerism

**Suggested Readings:**

1. Kotler, Philip, Gary Armstrong, Prafulla Agnihotri. *Principles of Marketing*. 17th edition. Pearson Education.
2. Michael, J. Etzel, Bruce J. Walker, William J Stanton and Ajay Pandit. *Marketing: Concepts and Cases*. (Special Indian Edition), McGraw Hill Education
3. William D. Perreault, and McCarthy, E. Jerome. *Basic Marketing*. Pearson Education.
4. Majaro, Simon. *The Essence of Marketing*. Pearson Education, New Delhi.
5. The Consumer Protection Act 1986.
6. Iacobucci and Kapoor, *Marketing Management: A South Asian Perspective*. Cengage Learning.
7. Dhruv Grewal and Michael Levy, *Marketing*. McGraw Hill Education.
8. Chhabra, T.N., and S.K. Grover. *Marketing Management*. Fourth Edition. Dhanpat Rai & Company.
9. Neeru Kapoor, *Principles of Marketing*, PHI Learning
10. Rajendra Maheshwari, *Principles of Marketing*, International Book House

## INDIAN ECONOMY

Sub. Code: BS343

L – 5, C – 5.

### Course Objective:

The objective of this course is to provide students with a comprehensive understanding of the structure, growth, and challenges of the Indian economy. The course focuses on key economic concepts such as economic planning, industrial development, agriculture, services, and trade, while also examining the role of government policies, fiscal management, and monetary systems in shaping economic outcomes.

### Unit 1: Basic Issues in Economic Development

Concept and Measures of Development and Underdevelopment; Human Development

### Unit 2: Basic Features of the Indian Economy at Independence

Composition of national income and occupational structure, the agrarian scene and industrial structure

### Unit 3: Policy Regimes

- a) The evolution of planning and imports substituting industrialization.
- b) Economic Reforms since 1991.
- c) Monetary and Fiscal policies with their implications on economy

### Unit 4: Growth, Development and Structural Change

- a) The experience of Growth, Development and Structural Change in different phases of growth and policy regimes across sectors and regions.
- b) The Institutional Framework: Patterns of assets ownership in agriculture and industry; Policies for restructuring agrarian relations and for regulating concentration of economic power;
- c) Changes in policy perspectives on the role of institutional framework after 1991.
- d) Growth and Distribution; Unemployment and Poverty; Human Development; Environmental concerns.
- e) Demographic Constraints: Interaction between population change and economic development.

### Unit 5: Sectoral Trends and Issues

- a) Agriculture Sector: Agrarian growth and performance in different phases of policy regimes i.e. pre green revolution and the two phases of green revolution; Factors influencing productivity and growth; the role of technology and institutions; price policy, the public distribution system and food security.
- b) Industry and Services Sector: Phases of Industrialisation – the rate and pattern of industrial growth across alternative policy regimes; Public sector – its role, performance and reforms; the small scale sector; Role of Foreign capital.
- c) Financial Sector: Structure, Performance and Reforms. Foreign Trade and balance of Payments: Structural Changes and Performance of India's Foreign Trade and Balance of Payments; Trade Policy Debate; Export policies and performance; Macro Economic Stabilisation and Structural Adjustment; India and the WTO, Role of FDI, Capital account convertibility,

### Suggested Readings:

1. Puri and Mishra, *Indian Economy*, Himalaya Publishing House
2. ICDhingra, *Indian Economics*, Sultan Chand & Sons
3. Gaurav Dutt and Ashwini Mahajan, *Indian Economy*, S. Chand & Company.
4. Ahluwalia, Montek S. State-level Performance under Economic Reforms in India in A.O. Krueger. (Ed.). *Economic Policy Reforms and the Indian Economy*, The University of Chicago Press.

5. Khanna, Sushil. Financial Reforms and Industrial Sector in India. *Economic and Political Weekly*. Vol. 34. No. 45.
6. Uma Kapila (Ed), *Indian Economy since Independence*, Relevant articles.
7. Rangarajan, C. and N. Jadhav. Issues in Financial Sector Reform. Bimal Jalan. (Ed). *The Indian Economy*. Oxford University Press, New Delhi.

**Note: Latest edition of text books may be used.**

## E-COMMERCE

**Sub. Code: BS344**

**L – 5, C – 5.**

### **Course Objective:**

The objective of this course is to provide students with a comprehensive understanding of the principles, technologies, and business models that drive e-commerce. The course focuses on how online platforms and digital tools are transforming traditional business practices, enabling companies to reach global markets, and enhancing customer experiences.

### **Unit1:Introduction:**

Meaning, nature, concepts, advantages, disadvantages and reasons for transacting online, types of E-Commerce, e-commerce business models (introduction , key elements of a business model and categorizing major E-commerce business models), forces behind e-commerce.

**Technology used in E-commerce:** The dynamics of world wide web and internet (meaning, evolution and features); Designing, building and launching e-commerce website (A systematic approach involving decisions regarding selection of hardware, software, outsourcing vs. in-house development of a website)

### **Unit 2: Security and Encryption:**

Need and concepts, the e-commerce security environment: (dimension, definition and scope of e-security), security threats in the E-commerce environment (security intrusions and breaches, attacking methods like hacking, sniffing, cyber-vandalism etc.), technology solutions (Encryption, security channels of communication, protecting networks and protecting servers and clients),

### **Unit 3: IT Act 2000 and Cyber Crimes**

IT Act 2000: Definitions, Digital signature, Electronic governance, Attribution, acknowledgement and dispatch of electronic records, Regulation of certifying authorities, Digital signature certificates, Duties of subscribers, Penalties and adjudication, Appellate Tribunal, Offences and Cyber-crimes

### **Unit 4: E-payment System:**

Models and methods of e-payments (Debit Card, Credit Card, Smart Cards, e-money), digital signatures (procedure, working and legal position), payment gateways, online banking (meaning, concepts, importance, electronic fund transfer, automated clearing house, automated ledger posting), risks involved in e-payments.

### **Unit 5: On-line Business Transactions:**

Meaning, purpose, advantages and disadvantages of transacting online, E-commerce applications in various industries like (banking, insurance, payment of utility bills, online marketing, e-tailing (popularity, benefits, problems and features), online services (financial, travel and career), auctions, online portal, online learning, publishing and entertainment) Online shopping (amazon, snap deal, Alibaba, flipkart, etc.)

**Note: Latest edition of text books may be used.**

### **Suggested Readings**

1. Kenneth C. Laudon and Carlo Guercio Traver, *E-Commerce*, Pearson Education.
2. David Whiteley, *E-commerce: Strategy, Technology and Applications*, McGraw Hill Education

## WEB DEVELOPMENT

**Sub. Code:** BS344A

**L – 4, C – 4**

Objective:

The objective of this course is to introduce students to the core concepts of web development, covering both front-end and back-end technologies. Students will gain hands-on experience with designing, developing, and maintaining interactive, responsive, and dynamic websites. By the end of the course, students will be proficient in using modern web development tools, frameworks, and technologies to create fully functional web applications.

### CONTENTS:

#### *Unit 1: Introduction to Web Development*

- **Overview of Web Development:**
  - What is Web Development? Understanding the difference between front-end and back-end.
  - Basic structure of the web: Client-server model.
  - Web browsers and servers, HTTP/HTTPS protocol.
  - The concept of web hosting and domain names.
- **Web Technologies:**
  - Introduction to the core web technologies: HTML, CSS, JavaScript.
  - The role of databases in web development.
  - Tools and platforms for web development: IDEs, Version control with Git/GitHub.
  - Introduction to responsive web design and mobile-first approach.

#### *Unit 2: Front-End Web Development*

- **HTML (HyperText Markup Language):**
  - Structure of a web page: Tags, attributes, and elements.
  - Basic HTML tags: <html>, <head>, <body>, <h1> - <h6>, <p>, <div>, <a>, <img>, <form>.
  - Tables, lists, and forms.
  - Introduction to semantic HTML for better SEO and accessibility.
- **CSS (Cascading Style Sheets):**
  - Introduction to CSS: Inline, internal, and external styles.
  - Selectors, properties, and values.
  - The box model: Margin, padding, border, content.
  - Positioning elements using CSS (absolute, relative, fixed, and sticky).
  - Layout techniques: Flexbox, Grid system.
  - Media queries for responsive design.
- **JavaScript (JS):**
  - Introduction to JavaScript: Syntax, variables, data types, operators.
  - Functions, loops, conditionals, and events.
  - DOM manipulation: Selecting elements, modifying content, and handling user events.
  - Introduction to JSON (JavaScript Object Notation) and AJAX.
  - Client-side validation of forms using JavaScript.

*Unit 3: Advanced Front-End Development*

- **JavaScript Libraries and Frameworks:**
  - Introduction to jQuery for DOM manipulation and handling AJAX requests.
  - Using Bootstrap framework for responsive design.
  - Introduction to CSS preprocessors (SASS, LESS).
- **Single Page Applications (SPAs):**
  - Understanding the concept of SPAs: Advantages and challenges.
  - Introduction to modern JavaScript frameworks: React.js, Angular, and Vue.js.
  - Understanding Components, Props, and State in React.js.
  - Building a simple SPA with React.js.
- **Web APIs and AJAX:**
  - Introduction to Web APIs: Fetching data from external sources.
  - Working with external APIs using JavaScript (e.g., JSONPlaceholder API).
  - Making asynchronous HTTP requests using Fetch API and XMLHttpRequest.
  - Using AJAX for dynamic content updates without reloading the page.

*Unit 4: Back-End Web Development*

- **Introduction to Server-Side Development:**
  - Overview of the back-end and its interaction with the front-end.
  - Understanding HTTP requests and responses, and the role of web servers (Apache, Nginx).
  - Introduction to server-side scripting languages: PHP, Node.js, Python.
- **Node.js and Express.js:**
  - Overview of Node.js: Asynchronous programming and event-driven architecture.
  - Introduction to npm (Node Package Manager) and installing dependencies.
  - Building a basic server with Express.js: Routing and middleware.
  - Handling HTTP requests: GET, POST, PUT, DELETE.
  - Working with RESTful APIs in Node.js.
- **Databases and Back-End Integration:**
  - Introduction to databases: Relational (MySQL, PostgreSQL) vs NoSQL (MongoDB).
  - Introduction to Object-Relational Mapping (ORM) tools: Sequelize for SQL databases.
  - CRUD operations (Create, Read, Update, Delete) in databases.
  - Connecting a Node.js app with MongoDB using Mongoose.

*Unit 5: Full-Stack Development*

- **Full-Stack Web Development:**
  - Understanding Full-Stack development: Combining front-end and back-end technologies.
  - Building a simple Full-Stack application with React.js (front-end) and Node.js/Express (back-end).
  - Communicating between front-end and back-end using AJAX, Fetch API, or Axios.
  - Authentication and Authorization: Introduction to session-based authentication and JWT.
- **Web Application Deployment:**
  - Introduction to cloud platforms: Heroku, AWS, Netlify, etc.
  - Deploying front-end applications (React, Angular, Vue) on Netlify.
  - Deploying full-stack applications on Heroku with Node.js and MongoDB.

- Introduction to Continuous Deployment and Version Control with Git/GitHub.
- **Security Best Practices:**
  - Introduction to common security threats: SQL Injection, XSS (Cross-Site Scripting), CSRF (Cross-Site Request Forgery).
  - Basic security measures: Data validation, password hashing, HTTPS, secure cookie handling.

**Suggested Readings:**

1. **Jon Duckett:** *HTML & CSS: Design and Build Websites*, Wiley.
2. **David Flanagan:** *JavaScript: The Definitive Guide*, O'Reilly Media.
3. **Kyle Simpson:** *You Don't Know JS (book series)*, O'Reilly Media.
4. **Brad Traversy:** *Modern Web Development*, Traversy Media (available on Udemy).
5. **Ben Frain:** *Responsive Web Design with HTML5 and CSS3*, Packt Publishing.

**Course Outcome:**

Upon successful completion of this course, students will be able to:

- Develop and deploy responsive and interactive websites using HTML, CSS, and JavaScript.
- Build dynamic web applications using front-end libraries and frameworks like React.js, Angular, or Vue.js.
- Set up and manage a server-side environment using Node.js, Express.js, and databases (MongoDB, MySQL).
- Understand the principles of Full-Stack web development and integrate front-end and back-end systems.
- Deploy web applications to cloud platforms such as Heroku, Netlify, and AWS.
- Ensure security and best practices in web application development.

**Note:** Latest editions of textbooks shall be used.

## DATA ANALYTICS

**Sub. Code:** BS344B

**L – 4, C – 4**

---

### Objective:

The objective of the course is to provide students with a comprehensive understanding of data analytics concepts and methodologies. The course focuses on equipping students with the tools and techniques required to analyze, interpret, and present data effectively, enabling them to make data-driven decisions. Topics include statistical analysis, data visualization, data cleaning, predictive modeling, and machine learning.

---

### CONTENTS:

#### *Unit 1: Introduction to Data Analytics*

- **Introduction to Data Analytics:**
    - What is data analytics? Importance and applications in business, economics, and various sectors.
    - Types of data: Qualitative vs Quantitative, Structured vs Unstructured.
    - The data analytics workflow: Data collection, cleaning, analysis, interpretation, and presentation.
    - Tools and software used in data analytics: Excel, Python, R, and Tableau.
    - Overview of descriptive, diagnostic, predictive, and prescriptive analytics.
  - **Data Collection & Data Types:**
    - Types of data sources: Primary and Secondary data.
    - Methods of data collection: Surveys, Experiments, Observations, Data mining.
    - Understanding data types: Nominal, Ordinal, Interval, and Ratio scales.
    - Data storage and retrieval: Relational databases, data lakes, and cloud-based storage.
- 

#### *Unit 2: Data Cleaning and Preprocessing*

- **Data Cleaning:**
  - Importance of data quality: Missing data, duplicates, outliers.
  - Techniques for data cleaning: Handling missing values (imputation, deletion), removing duplicates, handling outliers.
  - Data transformation: Normalization, standardization, encoding categorical variables.
  - Dealing with errors and inconsistencies in data.
- **Exploratory Data Analysis (EDA):**
  - Descriptive statistics: Mean, median, mode, variance, standard deviation.
  - Data visualization techniques: Histograms, Box plots, Pie charts, and Bar graphs.
  - Identifying patterns and trends in data using graphical methods.
  - Introduction to Python libraries for EDA: Pandas, NumPy, Matplotlib, Seaborn.

*Unit 3: Statistical Analysis for Data Analytics*

- **Probability and Distributions:**
  - Basic concepts in probability: Events, outcomes, conditional probability.
  - Probability distributions: Normal distribution, Binomial distribution, Poisson distribution.
  - Central Limit Theorem and its importance in data analysis.
  - Descriptive statistics vs inferential statistics.
- **Hypothesis Testing and Statistical Inference:**
  - Formulation of hypotheses: Null and alternative hypotheses.
  - Types of tests: t-test, z-test, Chi-square test.
  - P-value, significance level, and confidence intervals.
  - Introduction to regression analysis: Linear regression and multiple regression.
  - Correlation vs causation.

*Unit 4: Predictive Analytics and Machine Learning*

- **Introduction to Predictive Analytics:**
  - What is predictive analytics? Applications in forecasting and trend analysis.
  - Types of predictive models: Regression, classification, time series forecasting.
  - Overview of machine learning: Supervised vs unsupervised learning.
  - Basic machine learning algorithms: Linear regression, decision trees, k-Nearest Neighbors (k-NN).
- **Supervised Learning:**
  - Classification models: Logistic regression, Support Vector Machines (SVM), k-NN, Decision Trees, Random Forest.
  - Model evaluation metrics: Accuracy, precision, recall, F1-score, ROC curve, and AUC.
  - Overfitting and underfitting: Bias-variance tradeoff.
- **Unsupervised Learning:**
  - Clustering algorithms: K-means, hierarchical clustering, DBSCAN.
  - Dimensionality reduction techniques: Principal Component Analysis (PCA), t-SNE.
  - Applications of unsupervised learning: Customer segmentation, anomaly detection.

*Unit 5: Data Visualization and Interpretation*

- **Data Visualization:**
  - Importance of effective data visualization in decision-making.
  - Visualization principles: Choosing the right chart type, color schemes, and layout.
  - Advanced data visualization techniques: Heatmaps, scatter plots, 3D plots.
  - Using Tableau and Power BI for creating interactive dashboards and reports.
- **Interpretation and Communication of Results:**
  - Translating data analysis into actionable insights.
  - Communicating findings to non-technical audiences.
  - Writing data reports and giving presentations.
  - Storytelling with data: Creating compelling narratives using data insights.

Suggested Readings:

1. **R. N. Choudhury & R. B. Agarwal:** *Data Analytics: Concepts, Tools, and Applications*, PHI Learning.
2. **Jeffrey D. Camm, James J. Cochran, et al.:** *Data Science for Business*, O'Reilly Media.
3. **Nina Zumel, John Mount:** *Practical Data Science with R*, Manning Publications.
4. **Harvard Business Review:** *Competing on Analytics: The New Science of Winning*, Harvard Business Press.
5. **Cathy O'Neil & Rachel Schutt:** *Doing Data Science: Straight Talk from the Frontline*, O'Reilly Media.

Course Outcome:

Upon successful completion of this course, students will be able to:

- Understand and apply key concepts in data analytics, including statistical analysis, data cleaning, and visualization.
- Use tools such as Python, R, Excel, and Tableau to analyze and interpret data.
- Implement predictive models using machine learning algorithms and evaluate their performance.
- Present data-driven insights in an accessible and compelling manner to support decision-making in business or other domains.
- Solve real-world problems using data analysis techniques and effectively communicate findings.

---

**Note:** Latest editions of textbooks shall be used.

## ENTREPRENEURSHIP

**Sub. Code: BS345**

**L – 5, C – 5.**

**Objective:** The purpose of the paper is to orient the learner toward entrepreneurship as a career option and creative thinking and behavior.

**Contents:**

### **Unit 1: Introduction**

Meaning, elements, determinants and importance of entrepreneurship and creative behavior; Entrepreneurship and creative response to the society's problems and at work; Dimensions of entrepreneurship: intrapreneurship, technopreneurship, cultural entrepreneurship, international entrepreneurship, netpreneurship, ecopreneurship, and social entrepreneurship

### **Unit 2: Entrepreneurship and Micro, Small and Medium Enterprises**

Concept of business groups and role of business houses and family business in India; The contemporary role models in Indian business: their values, business philosophy and behavioral orientations; Conflict in family business and its resolution

**Unit 3:** Public and private system of stimulation, support and sustainability of entrepreneurship. Requirement, availability and access to finance, marketing assistance, technology, and industrial accommodation, Role of industries/entrepreneur's associations and self-help groups, The concept, role and functions of business incubators, angel investors, venture capital and private equity fund.

### **Unit 4: Sources of business ideas and tests of feasibility.**

Significance of writing the business plan/ project proposal; Contents of business plan/ project proposal; Designing business processes, location, layout, operation, planning & control; preparation of project report (various aspects of the project report such as size of investment, nature of product, market potential may be covered); Project submission/ presentation and appraisal thereof by external agencies, such as financial/non-financial institutions

### **Unit 5: Mobilizing Resources**

Mobilizing resources for start-up. Accommodation and utilities; Preliminary contracts with the vendors, suppliers, bankers, principal customers; Contract management: Basic start-up problems

### **Suggested Readings:**

1. Kuratko and Rao, *Entrepreneurship: A South Asian Perspective*, Cengage Learning.
2. Robert Hisrich, Michael Peters, Dean Shepherd, *Entrepreneurship*, McGraw-Hill Education
3. Desai, Vasant. *Dynamics of Entrepreneurial Development and Management*. Mumbai, Himalaya Publishing House.
4. Dollinger, Mare J. *Entrepreneurship: Strategies and Resources*. Illinois, Irwin.
5. Holt, David H. *Entrepreneurship: New Venture Creation*. Prentice-Hall of India, New Delhi.
6. Plsek, Paul E. *Creativity, Innovation and Quality*. (Eastern Economic Edition), New Delhi: Prentice-Hall of India. ISBN-81-203-1690-8.
7. Singh, Nagendra P. *Emerging Trends in Entrepreneurship Development*. New Delhi: ASEED.
8. SSKhanka, *Entrepreneurial Development*, Chand & Co, Delhi.
9. K Ramachandran, *Entrepreneurship Development*, McGraw-Hill Education
10. SIDBI Report on Small Scale Industries Sector.

**Note: Latest edition of text books may be used.**

**BBA Semester – V**

**FUNDAMENTALS OF FINANCIAL MANAGEMENT**

**Sub. Code: BS351**

**L – 4, T-1, C – 5.**

**Course Objective :**

The objective of this course is to provide students with a comprehensive understanding of the key principles and concepts of financial management and their application in business decision-making. The course focuses on how financial planning, budgeting, and financial analysis support the growth and sustainability of an organization

**Unit1: Introduction**

Nature, scope and objective of Financial Management, Time value of money, Risk and return (including Capital Asset Pricing Model), Valuation of securities – Bonds and Equities

**Unit 2: Investment Decisions**

The Capital Budgeting Process, Cash flow Estimation, Payback Period Method, Accounting Rate of Return, Net Present Value (NPV), Net Terminal Value, Internal Rate of Return (IRR), Profitability Index, Capital budgeting under Risk – Certainty Equivalent Approach and Risk-Adjusted Discount Rate.

**Unit 3: Financing Decisions**

Cost of Capital and Financing Decision: Sources of long-term financing Estimation of components of cost of capital. Methods for Calculating cost of equity capital, Cost of Retained Earnings, Cost of Debt and Cost of Preference Capital, Weighted Average cost of capital (WACC) and Marginal cost of capital. Capital structure – Theories of Capital Structure (Net Income, Net Operating Income, MM Hypothesis, Traditional Approach). Operating and financial leverage; Determinants of capital structure

**Unit 4: Dividend Decisions**

Theories for Relevance and irrelevance of dividend decision for corporate valuation; Cash and stock dividends; Dividend policies in practice

**Unit 5: Working Capital Decisions**

Concepts of working capital, the risk-return trade off, sources of short-term finance, working capital estimation, cash management, receivables management, inventory management and payables management.

**Note:**

- 1. There shall be 4 Credit Hrs. for Lectures + one Credit hr for Tutorials (per group)**
- 2. Latest edition of textbooks may be used.**

**Suggested Readings**

1. James C. Van Horne and Wockowitz, *Fundamentals of Financial Management*, Pearson Education
2. Levy H. and M. Sarnat. *Principles of Financial Management*. Pearson Education
3. Brigham and Houston, *Fundamentals of Financial Management*, Cengage Learning
4. Prasanna Chandra, *Fundamentals of Financial Management*. McGraw Hill Education
5. Rustagi, R.P. *Fundamentals of Financial Management*. Taxman Publications Pvt.Ltd.
6. Singh, Surrender and Kaur, Rajeev. *Fundamentals of Financial Management*. Mayur Paperback, New Delhi.
7. Pandey, I.M. *Financial Management*. Vikas Publications.
8. Bhabatosh Banerjee, *Fundamentals of Financial Management*, PHI Learning

**PRODUCTION & OPERATIONS MANAGEMENT**

**Paper Code:BS352**

**L – 5, C – 5.**

**Objectives:**

To develop basic understanding of concepts, theories and techniques of production process and operation management

**Unit I**

Introduction to Operation Management and Forecasting of Demand: Why study OM, Five P's of Production, Types of Transformation: Forecasting, Quantitative & Qualitative Techniques in Forecasting

**Unit II**

Waiting Line & Inventory Management: Economics of Waiting Line, Queuing System, and four Waiting Line Models alongwith application: Inventory management and analysis, Inventory Models.

**Unit III**

Quality Management & Statistical Quality Control: TQM, Quality Specification, Design Quality, Quality at Source, Zero Defects, Cost of Quality, Continuous Improvement, Benchmarking, Poka – Yokes, Quality Awards; Statistical Quality Control: Acceptance Sampling, AQL & LTPD, P—Chart, X & R Chart.

**Unit IV**

Facility Location and Layout: Issue in Facility Location, Plant Location Methods, Factor Rating, Centre of Gravity Methods, Analytic Delphi Method, Four Basic Lay out Formats, Assembly Line Balancing, splitting Tasks, Problems in Facility Layout.

**Suggested Readings**

1. N.J. Aquilano, R.B. Chase & F.R. Jacob: *Operation Management for Competitive Advantage*, Tata Mac Graw –Hill, 9th Edition.
2. R.C. Manocha: *Production & Operation Management* (Latest Edition).
3. S.P. Gupta; *Statistical Method*, Sultan Chand,
4. E.S. Buffa; *Modern Production Management*, John Wiley Ed. 2002.
5. S.N. Charry; *Production and Operation Management*, Tata McGraw-Hill, 2000.
6. Paneerselvam: *Production and Operation Management*, Prentice Hall, 2003.
7. D.D. Sharma; *Total Quality Management*, Sultan Chand & Sons, Ed. 2002.

**CORPORATE ACCOUNTING**

**Paper Code: BS353**

**L – 4, T-1, C – 5**

**Objectives:** To help the students to acquire the conceptual knowledge of the corporate accounting and to learn the techniques of preparing the financial statements.

**Contents**

**Unit 1. Accounting for Share Capital & Debentures**

Issue, forfeiture and reissue of forfeited shares: concept & process of book building; Issue of rights and bonus shares; Buy back of shares; Redemption of preference shares; Issue and Redemption of Debentures

**Unit 2. Final Accounts**

Preparation of profit and loss account and balance sheet of corporate entities, excluding calculation of managerial remuneration, Disposal of company profits

**Unit 3. Valuation of Goodwill and Valuation of Shares**

Concepts and calculation: simple problem only

**Unit 4. Amalgamation of Companies**

Concepts and accounting treatment as per Accounting Standard: 14 (ICAI) (excluding inter-company holdings). Internal reconstruction: concepts and accounting treatment excluding scheme of reconstruction.

**Unit 5. Accounts of Holding Companies/Parent Companies**

Preparation of consolidated balance sheet with one subsidiary company. Relevant provisions of Accounting Standard: 21 (ICAI).

**Unit 6. Banking Companies**

Difference between balance sheet of banking and non-banking company; prudential norms. Asset structure of a commercial bank. Non-performing assets (NPA).

**Unit 7. Cash Flow Statement**

Concepts of funds. Preparation of cash flow statement as per Indian Accounting Standard (Ind-AS): 7.

**Note:**

- 1. The relevant Indian Accounting Standards in line with the IFRS for all the above topics should be covered.**
- 2. Any revision of relevant Indian Accounting Standard would become applicable immediately.**

**Suggested Readings:**

2. J.R. Monga, *Fundamentals of Corporate Accounting*. Mayur Paper Backs, New Delhi.
3. M.C. Shukla, T.S. Grewal, and S.C. Gupta. *Advanced Accounts*. Vol.-II. S. Chand & Co., New Delhi.
4. S.N. Maheshwari, and S. K. Maheshwari. *Corporate Accounting*. Vikas Publishing House, New Delhi.
5. Ashok Sehgal, *Fundamentals of Corporate Accounting*. Taxman Publication, New Delhi.
6. V.K. Goyal and Ruchi Goyal, *Corporate Accounting*. PHI Learning.
7. Jain, S.P. and K.L. Narang. *Corporate Accounting*. Kalyani Publishers, New Delhi.
8. P.C. Tulsian and Bharat Tulsian, *Corporate Accounting*, S. Chand
9. Amitabha Mukherjee, Mohammed Hanif, *Corporate Accounting*, McGraw Hill Education
10. Compendium of Statements and Standards of Accounting. The Institute of Chartered Accountants of India, New Delhi.

**Note: Latest edition of text books may be used.**

**BBA Semester – VI  
BUSINESS POLICY & STRATEGY**

**Paper Code :BS361**

**L – 5, C – 5**

**Objectives:**

The course aims to acquaint the students with the nature, scope and dimensions of Business Policy and Strategy Management Process.

4. C.S Venkata Ratnam, *Industrial Relations*, Oxford University Press
5. P.L. Malik's *Handbook of Labour and Industrial Law*, Vol 1 and 2, Eastern Book Company
6. R.C. Sharma, *Labour Law*

## SPECIALISATION ELECTIVE COURSE

### Specialization 1:- Human Resource Management

#### BS3H2: Human Resource Planning

L – 5, C – 5.

#### Objective:

The objective of this paper is to develop a conceptual as well as a practical understanding of Human Resource Planning, Development and Development in Organizations.

#### Unit - I: Human Resource Planning

Human Resource Planning Process, Tools and Methods of Analysis; Employee integration with the Organization (Induction, Socialization Process, Placement)

#### Unit - II: Human Resource Development

Concepts, Objectives, Role and Significance; Structure of HRD System; Role of Training in HRD; Career Planning, Succession Planning; Skills and Multi-Skill Development.

#### Unit - III: Measurement Tools in Human Resource Planning

Human Resource Information System; Human Resource Audit; Human Resource Accounting – Concepts and Methods

#### Unit - IV: HRD- Strategies, Experiences and Emerging Issues

HR Strategy; Human Resource Retention Strategies; Task Analysis; Counselling and Monitoring; HRD Practices in Indian Corporate Sector. Quality of Work Life and Role Efficiency; Developing Self-Renewal – OD and Research.

#### Unit – V

**Case Studies:** The List of the Case studies shall be provided in the class.

Note: A single case relating to the issues detailed under one or more of the first four units shall be given as Unit V. As far as possible the theoretical questions and the case should not relate to the same issues / topics.

#### Suggested Readings:

1. Pareek & Rao: *Designing & Managing Human Resource System*, IBH, New Delhi
2. Bhattacharya: *Human Resource Planning*, Excel Books, New Delhi.
3. Beardwell & Holden: *Human Resource Management*, McMillan India Ltd.
4. Arthur, M. *Career Theory Handbook*, Englewood Cliff, Prentice Hall Inc.
5. Belkaoui, A. R. and Belkaoui, J. M.: *Human Resource Valuation: A Guide to Strategic and Techniques*, Greenwood, Quorum Books

**SPECIALISATION ELECTIVE COURSE**

**Specialization 1:- Human Resource Management**

**BS3H4: Training & Development of Human Resources**

**L – 5, C – 5.**

**Objective:**

The purpose of this paper is to provide an in-depth understanding of the role of Training in the HRD, and to enable the course participants to manage the Training systems and processes.

**Unit -I:**

Nature and Importance of Training in Organization Development and Individual Development. Learning through Training; Knowledge and Skill Development Organizational Set-up and Responsibility for Training.

**Unit -II:**

Making Training Effective, Designing, Budgeting and Organizing for Training Programme. Instructional Objectives and Lesson Planning, Learning Process.

**Unit -III:**

Developing Training Climate, and Pedagogy; Developing Training Modules; Trainer and Training Styles; Evaluation and Follow-up of Training Programme; Facilities Planning and Training Aids; Training Communication; Training and Development in India

**Unit - IV:**

Comprehensive Case Study equivalent to Two Units.

**Note:** A compulsory comprehensive case (running into not more than 3 to 4 printed pages) relating to the issues detailed under one or more of the first three units shall be given as Unit IV. As far as possible the theoretical questions and the case should not relate to the same issues / topics. The case study will be equivalent to two unit's value

**Suggested Readings:**

1. Beunet, Roger ed.: *Improving Training Effectiveness*, Aldershot, Gower.
2. Buckley R & Cople, Jim: *The Theory & Practice of Training*, London, Kogan & Page
3. Lynton, R Pareek, U.: *Training for Development*, 2<sup>nd</sup>ed. New Delhi, Vistaar
4. Pepper, Allan D.: *Managing the Training and Development Function*, Aldershot, Gower

# **School of Naturopathy (KSVMCN&YS)**

# Shobhit University, Gangoh

(Established by UP Shobhit University Act No. 3, 2012)

## School Of Naturopathy

### Ordinances, Regulations & Syllabus

For

**Bachelor of Naturopathy & Yogic Sciences (BNYS) 5 ½  
Year Programme Annual Pattern  
(w.e.f. session 2016-17)**

**Revised and adopted (Approved by CCRYN) in the year 2022  
(07<sup>th</sup> Board of Studies)**

## **Programme Educational Objectives (PEOs)**

**PEO1 Knowledge of Naturopathy:** Graduates should have a solid foundation in naturopathic principles, philosophy, and practices. They should possess in-depth knowledge of various natural therapies, such as nutrition, herbal medicine, hydrotherapy, acupuncture, and lifestyle counselling.

**PEO2 Understanding of Human Anatomy and Physiology:** Students should acquire a thorough understanding of human anatomy and physiology, including the structure and functions of different body systems. This knowledge is essential for diagnosing and treating health conditions using naturopathic methods.

**PEO3 Diagnostic Skills:** Graduates should be proficient in assessing patients' health conditions through various diagnostic techniques, including physical examination, laboratory tests, and assessment of health history. They should be able to identify the root causes of illnesses and design personalized treatment plans accordingly.

**PEO4 Therapeutic Skills:** Students should develop practical skills in implementing naturopathic therapies and modalities. These may include prescribing herbal remedies, designing nutritional plans, administering physical therapies, providing lifestyle counselling, and conducting yoga and meditation sessions.

**PEO5 Holistic Approach:** Graduates should understand the importance of treating patients holistically, considering their physical, mental, emotional, and spiritual well-being. They should be able to address health concerns by integrating naturopathy, yoga, and other complementary healing approaches.

**PEO6 Patient Management:** Students should learn effective patient management skills, including effective communication, patient education, and building a strong therapeutic relationship. They should be able to educate patients about their health conditions and motivate them to adopt healthy lifestyle practices.

**PEO7 Ethical and Professional Standards:** Graduates should adhere to high ethical and professional standards in their practice. They should understand the legal and regulatory frameworks governing naturopathic medicine and maintain confidentiality, integrity, and professionalism in their interactions with patients and colleagues.

## **Programme Specific Objectives (PSO's)**

**PSO1** Understanding of naturopathic principles and therapeutic modalities.

**PSO2** Knowledge of yogic sciences and their benefits.

**PSO3.** Proficiency in diagnostic skills, including conventional and naturopathic methods.

**PSO4** Familiarity with various naturopathic treatment modalities.

**PSO5** Ability to design individualized treatment plans and provide natural and modern therapies.

**PSO6** Enrich communication, ethical values team work, professional and leadership skill sets of students.

**PSO7** Focus on health promotion and disease prevention.

## **Programme Outcome (PO's)**

**PO1** Providing knowledge of basic principles of naturopathy through interactive classes.

**PO2** Making the students understand the disease through the perspective of naturopathy and yoga through clinical exposure.

**PO3** Demonstrating the students how to take case study for proper diagnosis of diseases.

**PO4** Working on the personal development and communication skills.

**PO5** Providing proper knowledge of anatomy, physiology, biochemistry of human body.

**PO6** Providing the basic knowledge of modern medicine

Annexure II : A comprehensive list of skills for a BNYS Graduate

## **INTRODUCTION**

National Institute of Naturopathy (NIN), Pune, revised the BNYS syllabus, with a view of standardizing BNYS syllabi with uniform durations and course contents across the country in 2012. It was implemented by Rajiv Gandhi University of Health Sciences (RGUHS) in the academic year 2013-14. In the view of new regulations, University restructured the BNYS course and issued ordinance year wise of the course in 1996. The present volume is published incorporating the amendments made by the National Institute of Naturopathy, Pune, to the regulations of BNYS course and addition of certain topics to the syllabi, as well as change in duration from 5 years to 5½ years. The ordinance should be read with Revised Ordinance Governing BNYS Degree Course and Curriculum of first year to fourth year – 2013.

First year BNYS is of 1½ year duration, and consists of pre-clinical subjects and subjects describing Yoga and Naturopathy principles, Anatomy, Physiology, Biochemistry, Philosophy of Naturopathy, Principles of Yoga and Sanskrit. Second year BNYS is of 1 year duration, and consists of Para-clinical subjects and subjects describing philosophies of Yoga and Naturopathy clinical subjects, Pathology, Microbiology, Community Medicine, *Yoga* Philosophy, Basic Pharmacology, and Colour therapy and magneto biology. Third year BNYS is of 1 year duration, and consists of Para-clinical subjects and Yoga and Naturopathy clinical subjects, Forensic Medicine and Toxicology, Manipulative Therapies, Acupuncture and Acupressure, *Yoga* and its applications, Nutrition and Medicinal Herbs, Diagnostic Methods (I and II) Naturopathy and Conventional Medicine, Psychology and Basic Psychiatry, and Fasting therapy and Dietetics. Final year BNYS is of 1 year duration, and consists of clinical subjects and Yoga and Naturopathy clinical subjects Obstetrics and Gynecology, *Yoga* therapy, Hydrotherapy and Mud therapy, Physical

Medicine and Rehabilitation, First Aid and Emergency Medicine, Clinical Naturopathy and Research Methodology and Recent Advances.

In Section I, goals of BNYS course are given. Section II gives general objectives. Section III gives duration of the course, recommendations regarding attendance, internal assessment, distribution of marks for various subjects in professional examinations and criteria for pass. Revised course contents, subjects like Pharmacology, Forensic Medicine and Toxicology, Sanskrit, Principles of Yoga, Herbology, Clinical Naturopathy, Psychology and Basic Psychiatry, Clinical Naturopathy, Research Methodology and Recent Advances are added in this publication – are elaborated in Section IV. Section V deals with topics recommended for teaching of medical ethics.

## **SECTION I**

### **1 Goals of BNYS Course**

- 1.1 Recognize the health needs of the community, and carry out professional obligations ethically and in keeping with the objectives of the national health policy;
- 1.2 Develop the skills in most of the competencies, and training that are required to deliver the Naturopathy and Yoga health care system;
- 1.3 Become aware of the contemporary advances and developments in the discipline concerned;
- 1.4 Acquire a spirit of scientific inquiry and is oriented to the principles of research methodology and epidemiology;
- 1.5 Become proficient in their profession by developing scientific temper and improve educational experience;
- 1.6 Identify social, economic, environmental, biological and emotional determinants of health in a given case and take them into account while planning therapeutic, rehabilitative, preventive and promotive measures/strategies;
- 1.7 Plan and devise measures in Naturopathy and yoga for the prevention and rehabilitation of patients suffering from disease and disability ;
- 1.8 Demonstrate skills in documentation of individual case details as well as morbidity data relevant to the assigned situation;
- 1.9 Demonstrate empathy and humane approach towards patients and their families and exhibit interpersonal behavior in accordance with the societal norms and expectations;

- 1.10 Play the assigned role in the implementation of national health programs, effectively and responsibly;
- 1.11 Organize and supervise the chosen/assigned health care services  
Demonstrating adequate managerial skills in the clinic/hospital or the field Situation;
- 1.12 Develop skills as a self-directed learner; recognize continuing educational needs, select and use appropriate learning resources;
- 1.13 Demonstrate competence in basic concepts of research methodology and epidemiology, and be able to critically analyze relevant published research literature;
- 1.14 To implement all National health policies ;
- 1.15 Work towards realization of ‘\_Health for all’, as a national goal through naturopathy and yoga;
- 1.16 To follow the medical ethics and to fulfill the social and professional responsibilities as a Naturopathy and Yoga Physician through drugless therapies;
- 1.17 Be competent in the practice of holistic medicine with expert knowledge and experience in promotive, preventive, curative and rehabilitative aspects of diseases;
- 1.18 Become proficient in their profession by developing scientific temper and improve educational experience;

## 2 Institutional Goals

After the medical undergraduate program, the students must:

- 2.1 Be able to expertly diagnose and manage common diseases and health problems of individuals as well as community, work with the health team as a fully qualified doctor at primary, secondary or tertiary levels, with his/her clinical experience and skills in history, physical examination and relevant investigations;
- 2.2 Be proficient in promotive, preventive, curative and rehabilitative medicine and therapy for common health issues;
- 2.3 Be adept in different therapeutic modalities and their administration;
- 2.4 Develop a humane attitude towards one's clients and understand economic, environmental, social, psychological and cultural factors that influence health;
- 2.5 Enjoy an urge for self-improvement, directed towards advanced expertise or research in any chosen area of health care;
- 2.6 Have enough knowledge about implementation of National Health Programs and the basic factors required for the same, which are as follows;
  - 2.6.3 Family Welfare and Maternal and Child Health (MCH);
  - 2.6.4 Sanitation and Water Supply;
  - 2.6.5 Prevention and Control of communicable and non-communicable diseases;
  - 2.6.6 Immunization;
  - 2.6.7 Health education;
- 2.7 Possess management skills in human resources, materials and resource management in health care delivery;

- 2.8 Be competent in recognizing community health issues and design, institute curative and preventive measures and evaluate the outcome of these measures, thus working towards resolving these issues;
- 2.9 Be able to work successfully in a variety of health care settings;
- 2.10 Develop integrity, responsibility, reliability, dependability and compassion, which are characteristics required for successful professional life;
- 2.11 Develop leadership and communication skills to work as leading investigator or clinician in health care teams;

## **SECTION II**

### **1. Objectives of Medical Graduate Training Programme**

- 1.1. To effectively integrate the conventional basic sciences (e.g. human physiology) with the traditional medical systems and to enhance the understanding of their effects and therapeutic potential;
- 1.2 To provide state of the art learning facilities (e.g. audio visual aids, interactive learning systems) to conceptualize the ancient medical system;
- 1.3 To run advanced laboratories under each department (basic and clinical sciences) for effective experimental training and research;
- 1.4 To explore the possibilities of promoting effective integrated medical practice at conventional medical facilities attached to the institute;
- 1.5 To provide the best possible clinical setting for clinical training and research;
- 1.6 To prepare every Yoga and Naturopathic physician with an in depth understanding of Basic sciences, superior clinical training and with an outlook for research and development;

## **SECTION III**

### **1 Course of Study:**

The duration of the course shall be 5 ½ years (Five and half years). The course shall include a period of regular study of four and a half (4 ½) years, followed by a compulsory rotatory internship of one year.

The period of regular study shall be divided into four phases – first year of one and half (1½) years, and the Second, Third and Final years of one year each of the B.N.Y.S. Medical Degree Course respectively.

### **2 Attendance:**

A candidate shall be considered to have satisfied the requirement of attendance for each Part/Phase if he /she attends not less than 80 per cent of the theory and practical classes actually conducted up to the end of the Phase in that subject.

Such a candidate having shortage of attendance shall be required to attend 80 per cent of the theory and practical classes actually held up to the end of the term by repeating that subject of that Part/Phase during a subsequent term.

### **3 Teaching Hours:**

The allotment of time (in number of hours) to teach Theory and to conduct

Practical/Clinical and Tutorial /Demonstration, Seminar in each subject shall be:

#### **I YEAR B.N.Y.S. (18 months)**

<b>No. of Subjects</b>	<b>No. of Papers</b>	<b>SUBJECTS</b>	<b>TOTAL HOURS</b>
I	01.	Anatomy – I	550hrs
	02.	Anatomy – II	
II	03.	Physiology – I	500hrs
	04	Physiology – II	
III	05.	Biochemistry	300hrs
IV	06.	Philosophy of Naturopathy	325hrs
V	07.	Principles of <i>Yoga</i>	400hrs
		<b>Total Hours</b>	<b>2175hrs</b>

**II YEAR - B.N.Y.S. (12 Months)**

<b>No. of Subject s</b>	<b>No. of papers</b>	<b>SUBJECTS</b>	<b>TOTAL HOURS</b>
I	01.	Pathology	300
II	02.	Microbiology	200
III	03.	Community Medicine	250
IV	04.	<i>Yoga</i> Philosophy	350
V	05.	Basic Pharmacology	100
VI	06.	Colour Therapy and Magneto biology	150
VII	07.	Forensic Medicine & Toxicology	100
		<b>Total Hours</b>	<b>1450</b>

**III YEAR B.N.Y.S. (12 months)**

<b>No. of Subjects</b>	<b>No. of Papers</b>	<b>SUBJECTS</b>	<b>TOTAL HOURS</b>
I	01.	Manipulative Therapies	200
II	02.	Acupuncture & Acupressure	200
III	03.	<i>Yoga</i> & Its Applications	250
IV	04.	Nutrition & Medicinal herbs	250
V	05.	Diagnostic Methods - I (Naturopathy)	200
	06.	Diagnostic Methods -II (Conventional Medicine)	200
VI	07.	Psychology & Basic Psychiatry/An Introduction to Speech Therapy/ Music Therapy	150
		<b>Total Hours</b>	<b>1450</b>

**IV YEAR B.N.Y.S. (12 months)**

<b>No. of Subjects</b>	<b>No. of Papers</b>	<b>SUBJECTS</b>	<b>TOTAL HOURS</b>
I	01.	Fasting Therapy & Dietetics	200
II	02.	Obstetrics & Gynecology	150
III	03.	<i>Yoga</i> Therapy	250
IV	04.	Hydrotherapy & Mud Therapy	250
V	05.	Physical Medicine & Rehabilitation	200
VI	06.	First Aid & Emergency Medicine	100
VII	07.	Clinical Naturopathy	200
VIII	08.	Research Methodology & Recent Advances/ Hospital Management/ Publication Ethics and Database	100
		<b>Total Hours</b>	<b>1450</b>

GRAND TOTAL FOR 4 ½ YEARS IS 6525 hours.

**Internship program:**

A candidate after passing final B.N.Y.S. Medical Degree Examination shall undergo the compulsory rotatory internship of one year duration, which shall consist of work/duty postings in the following sections/departments for the period specified against them.

<b>S.No.</b>	<b>Department</b>	<b>Duration</b>
1.	Philosophy of <i>Yoga</i> and Naturopathy	1 Month
2.	<i>Yoga</i> and Mind-Body Medicine	1 Month
3.	Pathology and Microbiology	1 Month
4.	Community Medicine	1 Month
5.	Energy Medicine	1 Month
6.	Manipulative Therapies, Physical Medicine & Rehabilitation	1 Month
7.	Fasting, Dietetics, Nutrition, & Medicinal Herbs	1 Month
8.	Diagnostic Methods	1 Month
9.	Obstetrics & Gynecology	1 Month
10.	Hydrotherapy & Mud Therapy	1 Month
11.	Naturopathic Medicine	1 Month
12.	Allied Health Sciences	1 Month
	<b>TOTAL</b>	<b>12 Months</b>

#### **4 Scheme of Examination:**

The examination/s shall be held as per the date of Examination notified by the University.

There should be one Internal & One External Examiner for all practical & Viva exams for each subject. A candidate shall register for all the subjects of a term/year, when he/she appears for the first time to the examination of that Part.

##### **4.1 Internal Assessment: Scheme of Examination:**

There shall be an internal assessment which follows broadly the principles enunciated by the University in each subject for which 20 per cent of the marks are set apart and these will be added in the final grade in the University examinations. There shall be a minimum of two assignments and two periodical tests in every subjects of each year to assess the progress of the candidate.

If a candidate fails in an Examination, his/her internal assessment shall be assessed again as if he/she is a regular student for the second attempt only.

#### **Theory**

Minimum of 3 examinations is recommended. The examination preceding the university examination may be similar to the University Examination. Average marks of the better of the two notified internal examinations should be reduced to the marks allotted for internal assessment for each subject and should be sent to the university.

**Practical**

A minimum of one clinical test may be conducted at the end of each ward postings in all the clinical subjects.

Assistant professor and above or lecturer with five years of teaching experience can conduct internal assessment examination. Average of best two examination marks should be taken into consideration while calculating the marks of internal assessment.

The internal assessment marks of both theory and practical obtained by the candidates should be sent to the University at least 15 days prior to the commencement of the theory examination.

## 4.2 Subjects And Credit

### I YEAR BNYS

S.No.	Subject Name	Subject Code	Credit
1	Anatomy I	BNY – 101	3
2	Anatomy II	BNY – 102	3
3	Physiology I	BNY – 103	3
4	Physiology II	BNY – 104	3
5	Biochemistry	BNY – 105	3
6	Philosophy of Naturopathy	BNY – 106	4
7	Principles of Yoga	BNY – 107	3
8	Anatomy	BNY – 151	1
9	Physiology	BNY – 153	1
10	Biochemistry	BNY – 155	1
11	Philosophy of Naturopathy	BNY – 156	1
12	Principles of Yoga	BNY – 157	1

## II YEAR BNYS

S.No.	Subject Name	Subject Code	Credit
1	Pathology	BNY – 201	3
2	Microbiology	BNY – 202	2
3	Community Medicine	BNY – 203	3
4	Yoga Philosophy	BNY – 204	3
5	Color therapy and Magneto biology	BNY – 205	1
6	Basic Pharmacology	BNY – 206	3
7	Forensic Medicine and Toxicology	BNY – 207	2
8	Pathology	BNY – 251	1
9	Microbiology	BNY – 252	1
10	Community Medicine	BNY – 253	1
11	Yoga Philosophy	BNY – 254	1
12	Color therapy and Magneto biology	BNY – 255	1

### III YEAR BNYS

S.No.	Subject Name	Subject Code	Credit
1	Manipulative Therapies	BNY – 301	3
2	Acupuncture & Acupressure	BNY – 302	3
3	<i>Yoga</i> & Its Applications	BNY – 303	3
4	Nutrition & Medicinal herbs	BNY – 304	3
5	Diagnostic Methods - I(Naturopathy)	BNY – 305	3
6	Diagnostic Methods -II (Conventional Medicine)	BNY – 306	3
7	Psychology & Basic Psychiatry/ An Introduction to Speech Therapy/ Music Therapy	BNY – 307/BNY-307 A/BNY-307 B	2
8	Manipulative Therapies	BNY – 351	1
9	Acupuncture & Acupressure	BNY – 352	1
10	<i>Yoga</i> & Its Applications	BNY – 353	1

11	Nutrition & Medicinal herbs	BNY – 354	1
12	Diagnostic Methods - I(Naturopathy)	BNY – 355	1
13	Diagnostic Methods -II (Conventional Medicine)	BNY – 356	1
14	Psychology & Basic Psychiatry	BNY – 357	1

#### IV YEAR BNYS

S.No.	Subject Name	Subject Code	Credit
1	Fasting Therapy & Dietetics	BNY – 401	3
2	Obstetrics & Gynecology	BNY – 402	3
3	<i>Yoga</i> Therapy	BNY – 403	3
4	Hydrotherapy & Mud Therapy	BNY – 404	3
5	First Aid & Emergency Medicine	BNY – 405	2
6	Clinical Naturopathy	BNY – 406	1
7	Physical Medicine & Rehabilitation	BNY – 407	3
8	Research Methodology &Recent Advances /Hospital Management/ Publication Ethics and Database	BNY – 408/BNY-408 A/ 408 B	1
9	Fasting Therapy & Dietetics	BNY – 451	1

10	Obstetrics & Gynecology	BNY – 452	1
11	<i>Yoga</i> Therapy	BNY – 453	1
12	Hydrotherapy & Mud Therapy	BNY – 454	1
13	First Aid & Emergency Medicine	BNY – 455	1
14	Clinical Naturopathy	BNY – 456	1
15	Physical Medicine & Rehabilitation	BNY – 457	1
16	Research Methodology &Recent Advances	BNY – 458	1

#### **4.3 Eligibility for examination:**

A candidate who has passed in all the subjects of First B.N.Y.S. Medical Degree examination shall be eligible to be promoted to Second B.N.Y.S. Medical Degree course.

A candidate is eligible for carry over facility only if he/she has appeared for all the subjects of that particular examination.

First year to Second Year – 3 subjects carry over

Second year to Third year - 3 subjects carry over

Third Year to Final year – 3 subject carry over

Completion of the degree should not go beyond 11 years from the date of admission.

#### **4.4 Criteria for Pass**

To be eligible for promotion to the II, III & IV years, the candidate has to complete and pass in all the subjects of I, II & III years with an exemption of one subject in each year.

The candidate is declared to have been successful provided he/she secures minimum 40% and above in theory, 50% and above in oral/practical/clinical separately each subjects, but should get 50% in aggregate in all.

#### **4.5 Declaration of Class:**

A candidate who passes all the subjects of one examination in the first attempt only be eligible for a class.

No class or rank shall be declared for candidate who does not pass any examination in the first attempt, and such a candidate shall be eligible only for a pass class.

The percentage of marks for declaring pass/Second/First Class and First class with

Distinction shall be as follows:

Distinction	Not less than 75 percent of the Aggregate Marks
First class	Not less than 65 percent of the Aggregate Marks
Second class	Not less than 50 percent of the Aggregate Marks
Pass class	Candidate who passes the examination in more than one attempt

Note: - A candidate who passes in all the subjects of any Examination only in first attempt shall be eligible for First class with Distinction /First/Second Class

## **SECTION IV**

### **SUBJECTS & COURSE CONTENT**

#### **1. ANATOMY**

##### **1.1 Goals and Objectives**

###### **1.1.1 Goal**

It aims at giving inclusive knowledge of the gross and microscopic structure and development of human body to provide a basis for assessing the correlation of organs and structures and anatomical basis for disease presentations.

###### **1.1.2 Objectives**

###### **1.1.2.1 Knowledge:**

After completion of the program, the student must be able to:

- 1.1.2.1.1 Understand normal human anatomy clinically important inter-relationship and functional anatomy of bodily structures;
- 1.1.2.1.2 Comprehend histological structures of various tissues and organs and co- relate structure and function in order to understand diseased states;
- 1.1.2.1.3 Recognize basic structure and connections of the central nervous system, understand the regulation and integration of various organs and systems and be skilled in locating lesion sites according to deficits in diseased states;
- 1.1.2.1.4 Explain developmental basis of variations and abnormalities with respect to sequential development of organs and systems, teratogens, genetic mutations and environmental hazards.

### 1.1.2.2 Skills

After completion of the program, the student must be able to:

- 1.1.2.2.1 Locate and identify body structures including topography of living body;
- 1.1.2.2.2 Histologically, identify tissues and organs;
- 1.1.2.2.3 Identify gross congenital anomalies and be familiar with the principles of karyotyping;
- 1.1.2.2.4 Interpret new imaging techniques such as CT, Sonogram, MRI etc after understanding their basic principles;
- 1.1.2.2.5 Understand clinical basis of some common clinical procedures i.e., intramuscular and intravenous injection, lumbar puncture and kidney biopsy etc..

### 1.1.2.3 Integration

Student shall be capable of understanding the regulation and integration of the functions of the organs and systems in the body and interpret the anatomical basis of disease process using the combined teaching of other basic sciences.

## 1.2 **Human Anatomy – I (Duration: 18 months)**

**Total hours: 500 (Theory: 300 Practical: 200)**

### 1.2.1 Introduction to Anatomy

- 1.2.1.1 Nomenclature
- 1.2.1.2 Anatomical positions
- 1.2.1.3 Axes and planes
- 1.2.1.4 Tissues

- 1.2.1.5 Movements
- 1.2.2 General Histology
  - 1.2.2.1 Detailed structure of cell and its components and their functional mechanisms
- 1.2.3 Osteology (Including ossification)
  - 1.2.3.1 Types of bones
  - 1.2.3.2 Classification of bones
  - 1.2.3.3 Description of various bones
    - 1.2.3.3.1 Upper limb
    - 1.2.3.3.2 Thorax
    - 1.2.3.3.3 Abdomen and pelvis
    - 1.2.3.3.4 Vertebral column
- 1.2.4 Arthrology
  - 1.2.4.1 Classification of joints
  - 1.2.4.2 Construction of joints
  - 1.2.4.3 Description of various joints of:
    - 1.2.4.3.1 Upper limb
    - 1.2.4.3.2 Thorax
    - 1.2.4.3.3 Vertebral column
- 1.2.5 Myology
  - 1.2.5.1 Types of muscles
  - 1.2.5.2 Muscles of upper limb, thorax, abdomen and pelvis
  - 1.2.5.3 Origin, insertion, blood supply, nerve supply, applied anatomy and actions of these muscles
- 1.2.6 Respiratory System

- 1.2.6.1 Upper respiratory tract – Nose, Pharynx, Larynx
- 1.2.6.2 Trachea & Bronchial tree
- 1.2.6.3 Lungs
- 1.2.6.4 Pleura
- 1.2.6.5 Mediastinum
- 1.2.7 Cardiovascular System
  - 1.2.7.1 Heart – Position, Surface anatomy and its description
  - 1.2.7.2 Great vessels – Aorta, Pulmonary trunk, superior vena cava, inferior vena cava and their branches
  - 1.2.7.3 Arteries and Veins – Structure of arteries and veins, important arteries and veins of the body
- 1.2.8 Digestive System
  - 1.2.8.1 Oral cavity
  - 1.2.8.2 Teeth
  - 1.2.8.3 Hard palate
  - 1.2.8.4 Soft palate
  - 1.2.8.5 Esophagus
  - 1.2.8.6 Stomach
  - 1.2.8.7 Small intestine
  - 1.2.8.8 Large intestine
  - 1.2.8.9 Anal canal
  - 1.2.8.10 Liver
  - 1.2.8.11 Gall bladder
  - 1.2.8.12 Bile duct
  - 1.2.8.13 Pancreas

1.2.8.14 Spleen

1.2.8.15 Peritoneum

1.2.9 Mesentery and position of the above organs in the abdominal quadrants.

1.2.9.1 Urinary System

1.2.9.2 Kidney

1.2.9.3 Ureter

1.2.9.4 Urinary bladder

1.2.9.5 Male urethra

1.2.9.6 Female urethra

1.2.10 Lymphatic System

1.2.10.1 Lymph, lymph glands, lymph duct, thoracic duct, cisterna chyli

1.2.10.2 Location of major groups of lymph nodes in the body and their drainage areas

NOTE: The concerned colleges have to make necessary arrangements for providing human cadavers in the anatomy department for teaching.

### **1.3 Human Anatomy – II (Duration: 18 Months)**

#### **1.3.1 Osteology (Including ossification)**

Description of various bones of

1.3.1.1 Lower limb

1.3.1.2 Skull as a whole

1.3.1.3 Individual cranial bones of skull

#### **1.3.2 Arthrology**

Description of various joints of

1.3.2.1 Lower limb

1.3.2.2 Skull as a whole

1.3.2.3 Skull and vertebral column

#### **1.3.3 Myology**

Description of various muscles of

1.3.4 Lower limb

1.3.5 Head

1.3.6 Neck

(Origin, insertion, blood supply, nerve supply, applied anatomy and actions of these muscles)

#### **1.3.7 Reproductive System**

1.3.7.1 Male reproductive organs

Penis, Testes, Vas Deferens, Spermatic Cord, Epididymis, Seminal Vesicles, Ejaculatory Duct Prostate Gland Etc.

1.3.7.2 Female reproductive organs

1.3.7.2.1 External genital organs

Vulva, Clitoris, Vagina

1.3.7.2.2 Inguinal Region perineum

1.3.7.2.3 Internal genital organs

Uterus, Cervix, Fallopian tubes, Ovaries, Ligaments of uterus and ovaries

1.3.7.2.4 Mammary glands

### **1.3.8 Endocrine System**

Description of Pituitary, Pineal, Thyroid, Parathyroid, Thymus, Spleen, Pancreas, Suprarenal, Ovaries and Testes

### **1.3.9 Nervous System**

Division of nervous system, central nervous system, peripheral nervous system, cerebral hemispheres, midbrain, pons, medulla oblongata, cerebellum, spinal cord, autonomic nervous system.

1.3.9.1 Meninges: Dura mater and arachnoid mater

1.3.9.2 CSF

1.3.9.3 Ventricular system

1.3.9.4 Cranial nerves

1.3.10 Spinal nerves

1.3.11 Important plexuses: Cervical, Brachial, Lumbar, Sacral and their nerve descriptions.

1.3.12 Organs and Special Senses

1.3.12.1 Tongue

1.3.12.2 Nose

1.3.12.3 Eye and associated structures

1.3.12.4 Ear

1.3.12.5 Integumentary system

1.3.13 Surface Anatomy

- 1.3.13.1 Projection of the outline of heart, its borders, surface and valves.
- 1.3.13.2 Lungs – borders, fissures, hila, pleura and diaphragm
- 1.3.13.3 Liver
- 1.3.13.4 Kidney
- 1.3.13.5 Abdominal viscera
- 1.3.13.6 Pelvic viscera

## **1.4 Histology**

### **1.4.1 General Histology**

1.4.1.1 Microscope

1.4.1.2 Cell

1.4.1.3 Epithelial Tissue I

1.4.1.4 Epithelial Tissue II

1.4.1.5 Connective Tissue – Bones and Cartilages

1.4.1.6 Muscular Tissues

1.4.1.7 Nerve Tissues (TS & LS of peripheral nerve, sensory and sympathetic ganglion, optic nerve)

1.4.1.8 Epithelial glands (serous, mucous and mixed salivary gland)

1.4.1.9 Circulatory system (large artery, medium sized artery, larger vein)

1.4.1.10 Lymphatic system (lymph nodes, thymus, tonsils, spleen)

1.4.1.11 Skin and appendages

1.4.1.12 Placenta and umbilical cord

### **1.4.2 Systemic Histology**

1.4.2.1 Respiratory system(lungs ,trachea)

1.4.2.2 Esophagus and stomach

1.4.2.3 Liver, gall bladder, pancreas

1.4.2.4 Urinary system I (Kidney)

1.4.2.5 Urinary system II (Ureter, bladder)

1.4.2.6 Small and large intestine

1.4.2.7 Reproductive system – Female

1.4.2.8 Reproductive system – Male

1.4.2.9 Upper GIT (tongue)

1.4.2.10 Hypophysis cerebra, thyroid and suprarenal glands

1.4.2.11 Eye – cornea and retina

## 1.5 Practical

### 1.5.1 Gross Anatomy (Dissection / Demonstration of following):

#### 1.5.1.1 Upper Limb

1.5.1.1.1 Dissection: Pectoral, scapular, shoulder, arm, forearm (5weeks)

1.5.1.1.2 Prosected Parts: Joints, Palm and dorsum of hand

#### 1.5.1.2 Thorax

1.5.1.2.1 Dissection: Chest wall, mediastinum, lungs and heart

#### 1.5.1.3 Abdomen

1.5.1.3.1 Dissection: anterior abdominal wall and inguinal region, viscera and posterior abdominal wall

#### 1.5.1.4 Pelvis

1.5.1.4.1 Dissection: Pelvic viscera and blood vessels and nerve sagittal section (M & F) (2 weeks)

1.5.1.4.2 Prosected Parts: Sole of the foot and joints

#### 1.5.1.5 Head and Neck

1.5.1.5.1 Dissection: Scalp, superficial and deep dissection of face and neck (8 – 10 weeks)

1.5.1.5.2 Prosected Parts: Orbit, eyeball, submandibular region, temporal and infra-temporal fossa, cranial cavity, naso and oropharyngeal regions, larynx and pharynx. Cross sections at C-4, C-6 levels, sagittal section of head and neck

#### 1.5.1.6 Nervous System

Section of brain and prosected specimens and major functional areas; Gross structure of brain and spinal cord and study of gross sections as mentioned earlier (in brief).

## **1.5.2 Demonstrations**

1.5.2.1 Bones as described in the osteology section

1.5.2.2 Brain and Spinal Cord

## **1.5.3 Specific Skills**

1.5.3.1 To localize important pulsations and the structure against which pressure can be applied in case of bleeding and trauma of particular artery.

1.5.3.2 To elicit superficial and deep reflexes.

1.5.3.3 To demonstrate muscle testing and movements at joints.

1.5.3.4 To locate for: lumbar puncture, sterna puncture, pericardial tapping and liver biopsy.

1.5.3.5 To locate veins for venipuncture.

1.5.3.6 To locate the site for emergency such as tracheostomy.

## **1.6 Textbooks:**

1.6.1 Textbook of Anatomy (III volumes) – BD Chaurasia

1.6.2 Textbook of Anatomy – Hamilton

1.6.3 Practical Anatomy – Cunningham

1.6.4 Human Embryology – Inderbir Singh

1.6.5 Bailey's textbook of histology

1.6.6 Medical Embryology – Langman

1.6.7 Textbook of Clinical Anatomy by Neeta V Kulakarni

1.6.8 Histology text book by Latha V

## **1.7 Reference Books**

1.7.1 Textbook of Anatomy – Gray

1.7.2 Atlas of histology – Diforie

- 1.7.3 Atlas of histology – Poddar
- 1.7.4 Textbook of human histology – Veena Bharihoke
- 1.7.5 A color atlas of human anatomy – Mcminn
- 1.7.6 Grant's method of Anatomy – Grant
- 1.7.7 Regional and applied Anatomy – RJ Last

1.8 **Scheme Of Examination**

S.N	Subject	Theo-ry	Intern-al Assm-t	Viva-Voce	Total	Practi-cals	Inter-nal Assm-t	Total Marks	Grand Total Marks
01.	Anatomy – I	80	20	30	130	60	10	70	200
02.	Anatomy – II	80	20	30	130	60	10	70	200

## 2. **PHYSIOLOGY**

### 2.1 **Goals and Objectives**

#### 2.1.1 **Goal**

The goal of teaching Physiology to undergraduate students is aimed at giving the student comprehensive knowledge of the normal functions of the organ systems of the body to facilitate comprehension of the physiological basis of health and disease.

#### 2.1.2 **Objectives**

##### 2.1.2.1 **Knowledge**

After completion of the program, the student will be able to:

- 2.1.2.1.1 Explicate the normal functioning of all the organ systems and their interactions for well co-ordinated body function;
- 2.1.2.1.2 Appreciate the relative contribution of each organ system to the homeostasis;
- 2.1.2.1.3 Explain the physiological aspects of normal growth and development;
- 2.1.2.1.4 Illustrate the physiological response and adaptations to environmental stresses;
- 2.1.2.1.5 List physiological principles underlying pathogenesis and disease management.

##### 2.1.2.2 **Skills**

After completion of the program, the student will be able to:

- 2.1.2.2.1 Conduct experiments designed to study physiological phenomena;
- 2.1.2.2.2 Interpret experimental/investigative data;

- 2.1.2.2.3 Differentiate between normal and abnormal data from results of tests, which he/she has done and observed in the laboratory.

**2.1.2.3 Integration**

At the end of the integrated course the student shall acquire an integrated knowledge of organ structure and function and regulatory mechanisms.

**2.2 Physiology – I (Duration: 18 Months)**

**Total hours: 500 (Theory: 300 Practical: 200)**

**2.2.1 General Physiology**

2.2.1.1 Cell structure and function

2.2.1.2 Transport mechanisms across biological membrane

2.2.1.3 Body fluids and homeostasis

2.2.1.4 Thermoregulation

**2.2.2 Blood**

**2.2.2.1 Plasma proteins**

2.2.2.1.1 Normal values

2.2.2.1.2 Origin, Functions and variations in health and disease

**2.2.2.2 Bone marrow**

2.2.2.2.1 Composition and functions

**2.2.2.3 Erythrocytes**

2.2.2.3.1 Morphology and variations in health and disease

2.2.2.3.2 Site and stages of development

2.2.2.3.3 Necessary factors

2.2.2.3.4 Regulation of development of erythrocytes

2.2.2.3.5 Life span and fate of erythrocytes

- 2.2.2.3.6 Erythrocyte sedimentation rate (ESR)
- 2.2.2.3.7 Packed cell volume (PCV)
- 2.2.2.4 Hemoglobin**
  - 2.2.2.4.1 Structure, synthesis, function and metabolism
  - 2.2.2.4.2 Types of hemoglobin
- 2.2.2.5 Anemia** – definition and classification
- 2.2.2.6 Jaundice** – definition and classification
- 2.2.2.7 Spleen-** structure and function
- 2.2.2.8 Leucocytes**
  - 2.2.2.8.1 Classification, morphology, development and functions
  - 2.2.2.8.2 Variation in health and disease
- 2.2.2.9 Thrombocytes**
  - 2.2.2.9.1 Development, morphology and functions
  - 2.2.2.9.2 Variation in health and disease
- 2.2.2.10 Hemostasis**
  - 2.2.2.10.1 Mechanism of hemostasis, coagulation of blood
  - 2.2.2.10.2 Fibrinolysis and bleeding disorders
- 2.2.2.11 Anticoagulants**
  - 2.2.2.11.1 Mechanism of action and clinical applications
- 2.2.2.12 Blood groups**
  - 2.2.2.12.1 Classification
  - 2.2.2.12.2 ABO and RH system
  - 2.2.2.12.3 Blood transfusion, indication and hazards
- 2.2.2.13 Lymph and tissue fluids**
  - 2.2.2.13.1 Formation and functions of lymph

2.2.2.13.2 Physiology of reticular system

**2.2.2.14 Immune system**

Cellular and humoral immunity

**2.2.3 Cardiovascular System**

**2.2.3.1 Heart**

2.2.3.1.1 Structure and properties of cardiac muscle

2.2.3.1.2 Innervations of heart, junctional tissue of heart

2.2.3.1.3 Generation and spread of cardiac impulse

**2.2.3.2 Electrocardiography**

2.2.3.2.1 Einthovan's Law

2.2.3.2.2 ECG leads, normal ECG and its interpretation

**2.2.3.3 Cardiac cycle**

2.2.3.3.1 Pressure and volume changes (mechanical events)

2.2.3.3.2 Principles of echo-cardiograph

2.2.3.3.3 Jugular venous pulse tracing, radial pulse tracing

2.2.3.3.4 Measurement and regulation of cardiac output

**2.2.3.4 Heart sounds**

2.2.3.4.1 Description, Causation and relation to other events in cardiac cycle

2.2.3.4.2 Clinical significance of heart sounds

2.2.3.4.3 Stethoscopy

**2.2.3.5 Blood pressure**

2.2.3.5.1 Definition, regulation and factors influencing BP

2.2.3.5.2 Measurement of blood pressure

2.2.3.5.3 Physiology of hemorrhage and shock

### **2.2.3.6 Circulations**

- 2.2.3.6.1 Blood vessels
- 2.2.3.6.2 Physical principles of blood flow, regulation of blood flow.
- 2.2.3.6.3 Coronary, Splanchnic, cutaneous and capillary, cerebral circulation
- 2.2.3.6.4 Cardiovascular changes in altitude and exercise

## **2.2.4 Respiratory System**

Introduction, internal and external respiration, physiological anatomy of respiratory system

### **2.2.4.1 Mechanism of Respiration**

- 2.2.4.1.1 Inspiration and expiration
- 2.2.4.1.2 Role of respiratory muscles and thoracic cage
- 2.2.4.1.3 Pressure and volume changes during respiration
- 2.2.4.1.4 Work of breathing
- 2.2.4.1.5 lung compliance and its significance in health and disease

### **2.2.4.2 Lung volumes and capacities**

- 2.2.4.2.1 Lung volumes and capacities and their measurements

### **2.2.4.3 Ventilation**

- 2.2.4.3.1 Composition of atmospheric, inspired, alveolar and expired air

### **2.2.4.4 Pulmonary circulation**

- 2.2.4.4.1 Pulmonary circulation, ventilation – perfusion relationship
- 2.2.4.4.2 Diffusion of gases across pulmonary membrane
- 2.2.4.4.3 Oxygen uptake, transport and delivery
- 2.2.4.4.4 Carbon dioxide uptake, transport and delivery

#### **2.2.4.5 Organization of the respiratory centers**

- 2.2.4.5.1 Nervous and chemical regulation of respiration
- 2.2.4.5.2 Classification and characteristics of hypoxia, cyanosis, asphyxia, hypercapnea, hypocapnea dyspnea, apnea and orthopnea and periodic breathing
- 2.2.4.5.3 Respiratory changes in high altitude
- 2.2.4.5.4 Physiology of acclimatization and hyperbarism
- 2.2.4.5.5 Respiratory / pulmonary function tests
- 2.2.4.5.6 Non-respiratory functions of lungs
- 2.2.4.5.7 Artificial respiration
- 2.2.4.5.8 Importance of therapeutic administration of oxygen and carbon dioxide
- 2.2.4.5.9 Respiratory changes during exercise

#### **2.2.5 Digestive System**

##### **2.2.5.1 Introduction, functional anatomy of digestive system**

##### **2.2.5.2 Salivary glands**

- 2.2.5.2.1 Composition, functions of saliva
- 2.2.5.2.2 Regulation of secretion of saliva

##### **2.2.5.3 Stomach**

- 2.2.5.3.1 Functional anatomy of stomach
- 2.2.5.3.2 Functions of stomach
- 2.2.5.3.3 Composition and functions of gastric juice
- 2.2.5.3.4 Regulation of secretion and mechanism of HCL secretion
- 2.2.5.3.5 Methods of study of gastric function and its supplied aspect

#### **2.2.5.4 Pancreas**

2.2.5.4.1 Functional anatomy of pancreas

2.2.5.4.2 Composition and functions of pancreatic juice

2.2.5.4.3 Regulation of pancreatic secretion

2.2.5.4.4 Methods of study of pancreatic secretion

#### **2.2.5.5 Liver and Gall Bladder**

2.2.5.5.1 Functional anatomy of liver and biliary system

2.2.5.5.2 Functions of liver and gall bladder

2.2.5.5.3 Formation, storage and secretion of bile

2.2.5.5.4 Composition, function and regulation of release of bile

2.2.5.5.5 Entero-hepatic circulation

2.2.5.5.6 Tests for liver function

#### **2.2.5.6 Small intestine**

2.2.5.6.1 Functional anatomy and functions of small intestine

2.2.5.6.2 Composition, function and mechanism of secretions of Succus entericus

#### **2.2.5.7 Large intestine**

2.2.5.7.1 Functional anatomy and functions of large intestine

#### **2.2.5.8 Gastro-intestinal hormones**

2.2.5.8.1 Release and functions

#### **2.2.5.9 Gastro-intestinal movements**

2.2.5.9.1 Mastication, deglutition and vomiting

2.2.5.9.2 Movements of stomach, filling and emptying of stomach

2.2.5.9.3 Movements of small intestines

2.2.5.9.4 Movements of large intestine and defecation

2.2.5.9.5 Regulation of movement

**2.2.5.10 Digestion and absorption of carbohydrates, fats, proteins and vitamins, minerals and water**

**2.2.6 Excretory System**

2.2.6.1 General introduction, organs of excretion with special emphasis on evolution of excretory mechanisms

2.2.6.2 Functional anatomy of renal glands and renal circulation

2.2.6.3 Nephron -

2.2.6.3.1 Mechanism of urine formation

2.2.6.3.2 Concentration and acidification of urine

2.2.6.3.3 Renal function tests

2.2.6.4 Non-excretory functions of kidney

2.2.6.4.1 Physiology of micturition and its abnormalities

2.2.6.5 Skin – structure and functions

## 2.3 **Physiology-II (Duration: 18 Months)**

### 2.3.1 **Endocrine System**

2.3.1.1 **Introduction** - evolutionary background and organization of endocrine control systems

### 2.3.1.2 **Hormones**

2.3.1.2.1 Classification of hormones and mechanism of hormone action

2.3.1.2.2 Regulation of hormone secretion and feedback system

2.3.1.3 Hypothalamo-hypophyseal system – hormones released

### 2.3.1.4 **Endocrine glands**

2.3.1.4.1 Pituitary glands –functional anatomy of anterior and posterior pituitary glands. source, chemical nature, actions, regulation and applied aspect of anterior and posterior pituitary hormones

2.3.1.4.2 Thyroid gland – functional anatomy , hormones ,applied aspect

2.3.1.4.3 Parathyroid gland – functional anatomy, hormones, applied aspect

2.3.1.4.4 Adrenal gland – Functional anatomy of adrenal cortex and medulla, hormones and applied physiology of adrenal cortex and medulla

2.3.1.4.5 Islets of langerhans – Functional anatomy, hormones ,applied aspect

2.3.1.4.6 Other hormones – prostaglandins, thromboxanes, acetylcholine ,serotonin, histamine, bradykinin, leptin, prostacyclin, leukotrienes, atrial natriuretic peptide, brain natri uretic peptide,melatonin

## 2.3.2 **Reproductive System**

### 2.3.2.1 **Physiology of reproduction**

- 2.3.2.1.1 Introduction to physiology of reproduction
- 2.3.2.1.2 Sex determination, sex differentiation and chromosomal study

### 2.3.2.2 **Male Reproductive System**

- 2.3.2.2.1 Development and structure of testes
- 2.3.2.2.2 Functions of testes
- 2.3.2.2.3 Gonadotropins and gonadal hormones
- 2.3.2.2.4 Composition of semen and structure of human sperm

### 2.3.2.3 **Female Reproductive System**

- 2.3.2.3.1 Functional anatomy of female reproductive system
- 2.3.2.3.2 Functional anatomy and functions of ovary
- 2.3.2.3.3 Gonadotropins and ovarian hormones
- 2.3.2.3.4 Physiology of menstrual cycle
- 2.3.2.3.5 physiology of ovulation and pregnancy
- 2.3.2.3.6 Physiology of placenta, gestation and parturition
- 2.3.2.3.7 Physiological basis of tests for ovulation and pregnancy
- 2.3.2.3.8 Physiology of lactation

### 2.3.3 **Nerve and Muscle Physiology**

#### 2.3.3.1 **Neuron**

- 2.3.3.1.1 Morphology of neuron and Classification of neuron and nerve fibres
- 2.3.3.1.2 Properties of nerve fibres and measure of excitability
- 2.3.3.1.3 Degeneration and regeneration of nerve fibres

#### 2.3.3.2 **Muscle**

- 2.3.3.2.1 Classification of muscle
- 2.3.3.2.2 Skeletal muscle – structure , properties and functions
- 2.3.3.2.3 Excitation -contraction coupling
- 2.3.3.2.4 Neuromuscular junction
- 2.3.3.2.5 Smooth muscle – structure, types, properties, functions
- 2.3.3.2.6 Cardiac muscle – structure, properties, functions
- 2.3.3.2.7 Myasthenia gravis
- 2.3.3.2.8 Starling's law and its applications

### 2.3.4 **Central Nervous System**

2.3.4.1 Structural and functional organization of central nervous system

2.3.4.2 Neuroglia

#### 2.3.4.3 **Sensory physiology**

2.3.4.3.1 Classification and general properties of receptors

#### 2.3.4.4 **Synapse**

2.3.4.4.1 Types of synapse and their structure

2.3.4.4.2 Functions and properties of synapse

2.3.4.4.3 Classification and actions of neuro -transmitters

#### 2.3.4.5 **Reflexes**

- 2.3.4.5.1 Classification of Reflexes
- 2.3.4.5.2 General properties of reflexes (with examples)
- 2.3.4.5.3 Reciprocal inhibition and reciprocal innervation

#### **2.3.4.6 Spinal cord**

- 2.3.4.6.1 Functional anatomy of spinal cord
- 2.3.4.6.2 Ascending tracts – situation, origin, course, termination and functions
- 2.3.4.6.3 Physiology of pain, different pathways of pain sensation
- 2.3.4.6.4 Physiology of referred pain,
- 2.3.4.6.5 Gate control theory, analgesia system
- 2.3.4.6.6 Descending tracts – situation, origin, course, termination and functions
- 2.3.4.6.7 Extrapyramidal tracts – situation, origin, course, termination and functions
- 2.3.4.6.8 Upper and lower motor neurons and their lesions
- 2.3.4.6.9 Brown Sequard syndrome, Syringomyelias

#### **2.3.4.7 Functional anatomy and functions of brain stem**

#### **2.3.4.8 Thalamus**

- 2.3.4.8.1 Functional anatomy, connections and functions
- 2.3.4.8.2 Effects of lesions

#### **2.3.4.9 Internal capsule – situation, divisions, effect of lesions**

#### **2.3.4.10 Hypothalamus**

- 2.3.4.10.1 Functional anatomy, connections and functions
- 2.3.4.10.2 Effect of lesions

#### **2.3.4.11 Cerebellum**

2.3.4.11.1 Functional anatomy, connections and functions

2.3.4.11.2 Effects of lesions and tests for cerebellar function

#### **2.3.4.12 Basal ganglia**

2.3.4.12.1 Functional anatomy, connections and functions

2.3.4.12.2 Diseases of basal ganglia and its clinical evaluation

#### **2.3.4.13 Cerebral cortex**

2.3.4.13.1 Functional anatomy of cerebral cortex

2.3.4.13.2 Functional areas and its functions of frontal lobe, parietal lobe, temporal lobe, occipital lobe

2.3.4.13.3 Methods of study of cortical connections and functions

#### **2.3.4.14 Limbic System**

2.3.4.14.1 Functional anatomy, connections and functions

#### **2.3.4.15 Reticular formation**

2.3.4.15.1 Functional anatomy, connections and functions of reticular formation

2.3.4.15.2 EEG, physiology of sleep and wakefulness

#### **2.3.4.16 Vestibular apparatus**

2.3.4.16.1 Functional anatomy, connections and functions

2.3.4.16.2 Effects of lesions and their assessment

2.3.4.16.3 Physiology of maintenance and regulation of muscle tone, posture and equilibrium

2.3.4.16.4 Decerebrated rigidity and righting reflexes

#### **2.3.4.17 Higher functions**

2.3.4.17.1 Learning, speech, memory, behavior and emotions

### **2.3.4.18 Cerebro-spinal fluids**

- 2.3.4.18.1 Formation, circulation, functions of CSF
- 2.3.4.18.2 Properties and composition of CSF
- 2.3.4.18.3 Method of collection of CSF and its clinical significance
- 2.3.4.18.4 Blood – brain barrier

### **2.3.4.19 Autonomic Nervous System**

- 2.3.4.19.1 Sympathetic nervous system and its functions
- 2.3.4.19.2 Parasympathetic nervous system and its functions

## **2.3.5 Special Senses**

### **2.3.5.1 Smell**

- 2.3.5.1.1 Structure of olfactory receptors,
- 2.3.5.1.2 Physiology of olfaction and olfactory discrimination
- 2.3.5.1.3 Olfactory pathway and defects of olfaction

### **2.3.5.2 Taste** structure of taste receptor, primary taste sensation and taste pathway and applied aspects

### **2.3.5.3 Vision**

- 2.3.5.3.1 Functional anatomy of eye
- 2.3.5.3.2 Structure of visual receptors
- 2.3.5.3.3 Neural, chemical, electrical basis of visual process
- 2.3.5.3.4 Visual acuity ,field of vision, tests for visual acuity and field of vision
- 2.3.5.3.5 Visual pathways and effects of lesions in visual pathways
- 2.3.5.3.6 Pupillary reflexes
- 2.3.5.3.7 Color vision, color blindness and tests for color blindness
- 2.3.5.3.8 Errors of refraction and its correction,

- 2.3.5.3.9 Physiology of aqueous humor
- 2.3.5.3.10 Dark and light adaptation
- 2.3.5.3.11 Lacrimal glands ,Formation and circulation of tears

#### **2.3.5.4 Hearing**

- 2.3.5.4.1 Functional anatomy and functions of external,middle and internal ear
- 2.3.5.4.2 Impedance matching and tympanic reflex
- 2.3.5.4.3 Auditory pathways and auditory cortex
- 2.3.5.4.4 Mechanism of hearing
- 2.3.5.4.5 Frequency analysis, sound localization,
- 2.3.5.4.6 Defects of hearing
- 2.3.5.4.7 Audiometry, other tests for hearing defects

## 2.4 **Physiology Practical**

### 2.4.1 **Blood**

- 2.4.1.1 Preparation and examination of peripheral blood smear and determination of differential leucocyte count
- 2.4.1.2 Determination of total red blood cell count
- 2.4.1.3 Determination of total leucocyte count
- 2.4.1.4 Determination of platelet count
- 2.4.1.5 Determination of osmotic fragility of erythrocytes
- 2.4.1.6 Determination of erythrocyte sedimentation rate, packed cell volume
- 2.4.1.7 Determination of hemoglobin concentration of blood
- 2.4.1.8 Determination of ABO and Rh blood groups
- 2.4.1.9 Determination of bleeding time, clotting time

### 2.4.2 **Cardiovascular system**

- 2.4.2.1 Determination of the effect of posture on blood pressure
- 2.4.2.2 Clinical examination of the human cardiovascular system (CVS)

### 2.4.3 **Respiration**

- 2.4.3.1 Spirometry (demonstration)
- 2.4.3.2 Examination of human respiratory system

### 2.4.4 **Neurophysiology**

- 2.4.4.1 Examination of motor and sensory system
- 2.4.4.2 Examination of cranial nerves

### 2.4.5 **Special senses**

- 2.4.5.1 Determination of visual acuity
- 2.4.5.2 Clinical assessment of color vision (Demonstration)
- 2.4.5.3 Perimetry: Mapping of visual field

## 2.5 Textbooks

- 2.5.1 Textbook of Medical Physiology – AC Guyton and Hall
- 2.5.2 Review of Medical Physiology – WF Ganong’s
- 2.5.3 Concise Textbook of Medical Physiology – SK Chaudhury
- 2.5.4 Understanding Medical Physiology – RL Bijlani
- 2.5.5 Essentials of Medical Physiology – K Sembulingam

## 2.6 Reference Books

- 2.6.1 Best and Taylor’s Physiological basis of medical practice
- 2.6.2 Berne and Levy Physiology
- 2.6.3 Practical Physiology – C L Ghai
- 2.6.4 Practical Physiology – Dr. V. G.Ranade

## 2.7 Scheme Of Examination

S.No	Subject	Theo-ry	Intern-al Assmt	Viva-Voce	Total	Practi-cals	Inter-nal Assmt	Total Marks	Grand Total Marks
03.	Physiology - I	80	20	30	130	60	10	70	200
04.	Physiology – II	80	20	30	130	60	10	70	200

### **3. BIOCHEMISTRY**

#### **3.1 Goals and Objectives**

##### **3.1.1 Goals:**

The goals of introducing biochemistry to the undergraduate students is to make them understand the scientific basis of the life processes at the molecular level and to orient them towards the application of the knowledge in solving clinical problems.

##### **3.1.2 Objectives**

###### **3.1.2.1 Knowledge**

After completion of the course, the student shall be able to:

- 3.1.2.1.1 Elucidate the molecular and functional organization of a cell and list its sub cellular components;
- 3.1.2.1.2 Outline structure, function and inter-relationships of bio molecules and consequences of deviation from normal;
- 3.1.2.1.3 Review the fundamental aspects of enzymology and clinical application wherein regulation of enzymatic activity is altered;
- 3.1.2.1.4 Illustrate digestion and assimilation of nutrients and consequences of malnutrition;
- 3.1.2.1.5 Integrate the various aspects of metabolism and their regulatory pathways;
- 3.1.2.1.6 Explain biochemical basis of inherited disorders with their associated sequelae;
- 3.1.2.1.7 Describe mechanisms involved in maintenance of body fluid and pH homeostasis;

- 3.1.2.1.8 Delineate the molecular mechanisms of gene expression and regulation, the principles of genetic engineering and their application in medicine;
- 3.1.2.1.9 Summarize the molecular concept of body defenses and their application in medicine;
- 3.1.2.1.10 Outline the biochemical basis of environmental health hazards, biochemical basis of cancer and carcinogenesis;
- 3.1.2.1.11 Familiarize with principles of various conventional and specialized laboratory investigations and instrumentation analysis and interpretation of a given data;
- 3.1.2.1.12 Suggest experiments to support theoretical concepts and clinical diagnosis;

### **3.1.2.2 Skills**

At the end of the course, the student will be able to:

- 3.1.2.2.1 Perform conventional techniques/instruments to perform biochemical analysis relevant to clinical screening and diagnosis;
- 3.1.2.2.2 Analyse and interpret investigative data;
- 3.1.2.2.3 Demonstrate the skills of solving scientific and clinical problems and decision making

### **3.1.2.3 Integration**

The integrated knowledge of biochemistry will help the students to integrate molecular events with the structure and function of the human body in health and disease.

### **3.2 Theory (Duration: 18 months: Hours: 200+100)**

3.2.1 Biomolecules & biochemical perspective of a cell

3.2.2 Cell structure

3.2.3 Subcellular organelles

3.2.4 Cell membrane

3.2.5 Transport mechanisms

3.2.6 Chemistry of Carbohydrates

3.2.6.1 Definition, classification and biological importance of carbohydrates

3.2.6.2 Monosaccharides; Classification, Isomerism and properties of monosaccharides, modified monosaccharides

3.2.6.3 Disaccharides

3.2.6.4 Polysaccharides

3.2.7 Chemistry of Lipids

3.2.7.1 Definition, classification and biological importance of Lipids

3.2.7.2 Simple lipids: Composition of Triacyl glycerol & Waxes.

3.2.7.3 Compound lipids: Composition & functions of Phospholipids, glycolipids & lipoproteins

3.2.7.4 Derived lipids: Fatty acids - Classification & Properties fatty acids, Steroids & sterols

3.2.7.5 Micelle, Liposomes

### 3.2.8 Chemistry of Proteins

3.2.8.1 Definition, classification & properties of amino acids

3.2.8.2 Definition, classification & properties of proteins

3.2.8.3 Structural organization of proteins

3.2.8.4 Biological significance of amino acids & proteins

3.2.8.5 Plasma proteins, their functions and clinical significance

### 3.2.9 Enzymes

3.2.9.1 Definition, classification,

3.2.9.2 Kinetics, mechanism of enzymatic catalysis.

3.2.9.3 Factors influencing enzymatic catalyses, enzyme activators and inhibitors.

3.2.9.4 Regulation of enzyme activity,

3.2.9.5 Iso-enzymes & clinical enzymology

### 3.2.10 Vitamins

3.2.10.1 Definition and classification of vitamins

3.2.10.2 Brief account of chemistry, source, RDA, biochemical functions, deficiency diseases, Vitamin antagonists and hypervitaminosis of each vitamin

### 3.2.11 Mineral metabolism

3.2.11.1 Classification of minerals

3.2.11.2 Brief account of chemistry, source, RDA, biochemical functions, deficiency diseases of each mineral

### 3.2.12 Digestion and absorption

3.2.12.1 Digestion and absorption of carbohydrates

3.2.12.2 Digestion and absorption of lipids

3.2.12.3 Digestion and absorption of proteins.

### 3.2.13 Carbohydrate Metabolism

3.2.13.1 Major metabolic pathways: Glycolysis, pyruvate oxidation, Citric acid cycle, Gluconeogenesis, HMP Shunt pathway & glycogen metabolism

3.2.13.2 Minor metabolic pathways: Metabolism of Fructose and Galactose,

3.2.13.3 Regulation of blood sugar, glucose tolerance test, Diabetes mellitus & other disorders of carbohydrate metabolism.

### 3.2.14 Biologic Oxidation

3.2.14.1 Redox potential

3.2.14.2 High energy compounds

3.2.14.3 Oxidative Phosphorylation

3.2.14.4 Electron transport chain

### 3.2.15 Lipid metabolism

3.2.15.1 Biosynthesis and degradation of fatty acids

3.2.15.2 Metabolism of cholesterol

3.2.15.3 Ketone bodies: their synthesis, utilization and conditions leading to ketoacidosis

3.2.15.4 Chemistry and metabolism of lipoproteins, hyper lipoproteinemias

3.2.15.5 Prostaglandins

3.2.15.6 Fatty liver, Obesity & other lipid storage disease.

### 3.2.16 Protein metabolism

3.2.16.1 Overview of protein metabolism

3.2.16.2 Nitrogen balance

3.2.16.3 Formation and disposal of ammonia

3.2.16.4 General metabolism of amino acids

3.2.16.5 Inborn errors of amino acid metabolism

3.2.17 Molecular biology

3.2.17.1 Chemistry of Nucleic acids: Definition, classification, composition of nucleic acids; Structure and function of DNA ; Types, structure & functions of RNA

3.2.17.2 Metabolism of Nucleic acids : Synthesis and breakdown of purines; Synthesis and breakdown of pyrimidine

3.2.17.3 DNA Replication, Inhibitors of DNA replication

3.2.17.4 DNA Transcription & Post-transcriptional processing.

3.2.17.5 Genetic code

3.2.17.6 Protein synthesis, inhibitors of protein synthesis & Post-translational processing

3.2.18 Integration of metabolism

3.2.18.1 Metabolic effects of insulin & glucagon

3.2.18.2 The feed/fast cycle

3.2.18.3 Biochemistry of starvation

3.2.19 Biochemistry of blood

3.2.19.1 Porphyrins, Synthesis and degradation of heme; Porphyria; Jaundice

3.2.19.2 Structure & functions of hemoglobin

3.2.19.3 Abnormal hemoglobins & hemoglobinopathies

3.2.19.4 Plasma Proteins

3.2.19.5 Immunoglobulins

3.2.19.6 Blood pH & its regulation

3.2.19.7 Role of kidney and lungs in maintaining pH of blood

3.2.19.8 Acidosis and Alkalosis

3.2.20 Energy metabolism and Nutrition

3.2.20.1 Calorific value of foods

3.2.20.2 Basal metabolic rate and its importance

3.2.20.3 Specific dynamic action

3.2.20.4 Energy requirements for physical activity

3.2.20.5 Balanced diet; Role of carbohydrates, proteins & lipids

3.2.20.6 Nutritive value of proteins, protein-energy malnutrition (PEM)

3.2.21 Clinical biochemistry

3.2.21.1 Tools of biochemistry

3.2.21.2 Liver function tests

3.2.21.3 Renal function tests

3.2.22 Environmental biochemistry

3.2.22.1 Environmental pollutants

3.2.22.2 Xenobiotics, interaction with biomolecules, effects & metabolism

3.2.22.3 Biochemical characteristics of cancer and carcinogenesis

### 3.3 **Practicals**

3.3.1 **Qualitative Experiments**

3.3.1.1 General reactions Carbohydrates

3.3.1.1.1 Reactions of monosaccharides - glucose and fructose

3.3.1.1.2 Reactions of disaccharides - lactose, maltose and sucrose

3.3.1.1.3 Reactions of polysaccharides - starch and dextrin

**3.3.1.2** General reactions of proteins (albumin, casein and gelatin)

3.3.1.2.1 Colour reactions of proteins

3.3.1.2.2 Precipitation & coagulation reactions of proteins

**3.3.1.3** General reactions of non-protein-nitrogen compounds (N P N) - Urea, Uric acid and creatinine

**3.3.1.4** Analysis of Urine.

3.3.1.4.1 Analysis of normal urine.

3.3.1.4.2 Analysis of abnormal urine.

**3.3.2 Quantitative Experiments**

3.3.2.1 Blood Sugar estimation by Glucose Oxidase method

**3.3.3 Demonstrative Experiments**

**3.3.3.1** Colorimetry and colorimeter

3.3.3.1.1 Estimation of concentration of serum Cholesterol

3.3.3.1.2 Estimation of concentration of serum Urea

3.3.3.1.3 Estimation of concentration of serum Uric acid

3.3.3.1.4 Estimation of concentration of serum triglycerides

3.3.3.1.5 Estimation of concentration of serum calcium

**3.3.3.2** Paper chromatography

**3.3.3.3** Electrophoresis

**3.3.3.4** Glucose tolerance test (GTT)

### 3.4 **Text Books**

#### 3.4.1 **Recommended text books for Biochemistry**

- 3.4.1.1 Text book of Biochemistry - by U. Sathyanarayana, U Chakrapani
- 3.4.1.2 Text book of Biochemistry – by DM Vasudevan, Sreekumari S
- 3.4.1.3 Lippincott’s Illustrated Reviews- Biochemistry by Pamela C Champe,  
Richard A Harvey
- 3.4.1.4 Textbook of Medical Laboratory Technology by Praful B Godkar, Darshan  
P Godkar
- 3.4.1.5 Essentials of Biochemistry by PankajNaik

#### 3.4.2 **Reference Books for Biochemistry**

- 3.4.2.1 Harper’s Illustrated Biochemistry, Robert K. Murray, Daryl K. Granner,  
and Victor W. Rodwell.
- 3.4.2.2 Biochemistry. Lubert Stryer. W.H. Freeman and Company, New York.
- 3.4.2.3 Principles of Biochemistry. Ed. Lehinger, Nelson and Cox. CBS  
Publishers and distributors.
- 3.4.2.4 Textbook of Biochemistry with Clinical Correlations. Ed. Thomas M.  
Devlin, Wiley-Liss Publishers.
- 3.4.2.5 Tietz Textbook of Clinical Chemistry. Ed. Burtis and Ashwood. W.B.  
Saunders Company.
- 3.4.2.6 Biochemistry. Ed. Donald Voet and Judith G. Voet. John Wiley & Sons,  
Inc
- 3.4.2.7 Text book of Biochemistry - by West and Todd.
- 3.4.2.8 Laboratory Manual of Biochemistry by Pattabhirama and Acharya.

### 3.5 Scheme Of Examination

S.N	Subject	Theo-ry	Intern-al Assm-t	Viva-Voce	Total	Practi-cals	Inter-nal Assm-t	Total Marks	Grand Total Marks
01.	Biochemistry	80	20	30	130	60	10	70	200

## 4. PHILOSOPHY OF NATUROPATHY

### 4.1 Goals and Objectives

#### 4.1.1 **Goals:**

The goals of introducing philosophy of Naturopathy to the undergraduate students is to make them understand philosophical basis of the system of Naturopathy, including concepts of health, causes and pathogenesis of disease and brief introduction to the various therapeutic modalities used in Naturopathy.

#### 4.1.2 **Objectives**

##### 4.1.2.1 **Knowledge**

After completion of the course, the student shall be able to:

- 4.1.2.1.1 Elucidate the history of Naturopathy including major contributors to the field and their work;
- 4.1.2.1.2 Understand the evolution and composition of the human body according to different schools of medicine such as Naturopathy, *Yoga, Ayurveda*, Homeopathy, Modern Medicine, etc.
- 4.1.2.1.3 Firmly establish his/her diagnostic and therapeutic thought processes in the fundamental principles of Naturopathy:
- 4.1.2.1.4 Laws of nature according to Henry Lindlahr
- 4.1.2.1.5 Concepts of health and disease according to Naturopathy
- 4.1.2.1.6 Ten basic principles of Naturopathy
- 4.1.2.1.7 Concept of *Panchamahabhuthas* and Naturopathy
- 4.1.2.1.8 Foreign matter, toxin accumulation, theory of Toxemia, Unity of disease and Unity of Cure
- 4.1.2.1.9 Concept of vitality

- 4.1.2.1.10 *Panchatantras, Shareera Dharmas*
- 4.1.2.1.11 Holistic approach of Naturopathy
- 4.1.2.1.12 Modern perspectives of Naturopathy
- 4.1.2.1.13 Natural rejuvenation
- 4.1.2.1.14 Understand naturopathic viewpoints of concepts like hygiene, vaccination, family planning, personal life and prevention of diseases, geriatrics, etc, and implement them in his/her practice
- 4.1.2.1.15 Understand Principles behind using the diagnostic procedures of Naturopathy, like spinal diagnosis, facial diagnosis, iris diagnosis, and chromo diagnosis.
- 4.1.2.1.16 Demonstrate knowledge of recent advances and research in Naturopathy principles/theories.

#### **4.1.2.2 Skills**

At the end of the course, the student will be able to:

- 4.1.2.2.1 Demonstrate basic knowledge of the various therapeutic modalities utilised in Naturopathy;
- 4.1.2.2.2 Describe the various principles of Naturopathy with respect to the body, health, disease and therapy.

#### **4.1.2.3 Integration**

The integrated knowledge of philosophy of Naturopathy will help the students to integrate concepts of human body in health and disease with respect to Naturopathy in terms of diagnosis and management.

## 4.2 **Theory (Duration: 18 months)**

**Total hours: 500 (Theory: 300 Practical: 200)**

- 4.2.1 The Medical Profession & Medical Evolution- an Introduction
- 4.2.2 Concept of Health & Disease through the ages
- 4.2.3 The Human Body
  - 4.2.3.1 The evolution of human body
  - 4.2.3.2 Philosophy of the body, mind, soul, life, spirit and spiritual body with reference to various cultures, philosophies, Vedas and Modern view
  - 4.2.3.3 Composition of the human body, according to *Ayurveda*, Naturopathy, *Yoga*, Modern Medicine, Homeopathy
- 4.2.4 An Introduction to Nature Cure or Naturopathy- Definitions, concepts & theories of various pioneers in the field
- 4.2.5 History of Naturopathy & Philosophy of Naturopaths
  - 4.2.5.1 Chronological highlights of Naturopathy
  - 4.2.5.2 Philosophy of Indian Naturopaths.
    - 4.2.5.2.1 Vegiraju Krishnamaraju
    - 4.2.5.2.2 Vinoba Bhave
    - 4.2.5.2.3 Mahatma Gandhi.
    - 4.2.5.2.4 Dr. S. J. Singh
    - 4.2.5.2.5 Dr. J. M. Jussawala
  - 4.2.5.3 Philosophy of Foreign Naturopaths.
    - 4.2.5.3.1 Aesculapius
    - 4.2.5.3.2 Hippocrates
    - 4.2.5.3.3 The School of Salerno
    - 4.2.5.3.4 Paracelsus.

- 4.2.5.3.5 Vincent Priessnitz
- 4.2.5.3.6 Sebastian Kneipp
- 4.2.5.3.7 Arnold Rickli
- 4.2.5.3.8 Louis Kuhne
- 4.2.5.3.9 Adolf Just
- 4.2.5.3.10 John H Tilden
- 4.2.5.3.11 Sigmund Freud
- 4.2.5.3.12 Henry Lindlahr

#### **4.2.6 Fundamental principles, concepts & theories of Naturopathy.**

- 4.2.6.1** Laws of Nature according to Henry Lindlahr
- 4.2.6.2** Catechism of Nature Cure according to Henry Lindlahr
- 4.2.6.3** Concepts of Health according to Naturopathy
- 4.2.6.4** Concepts of Disease according to Naturopathy
- 4.2.6.5** The 10 basic principles of Naturopathy
- 4.2.6.6** Principles of Natural Medicine in the West
  - 4.2.6.6.1 The Healing Power of Nature (*Vis Medicatrix Naturae*)
  - 4.2.6.6.2 Identify and Treat the Causes (*Tolle Causam*)
  - 4.2.6.6.3 First Do No Harm (*Primum Non Nocere*)
  - 4.2.6.6.4 Doctor as Teacher (*Docere*)
  - 4.2.6.6.5 Treat the Whole Person
  - 4.2.6.6.6 Prevention
  - 4.2.6.6.7 Herring's law of cure
- 4.2.6.7** Concept of *Panchamahabhootas* & Naturopathy
- 4.2.6.8** Foreign matter and toxins accumulation in the body and its importance in elimination through different ways or channels.

- 4.2.6.9 Unity of disease, Unity of cure and way of treatment.
  - 4.2.6.10 Theory of Toxemia- Toxins and anti-toxins, their generation, mitigation in nature cure way
  - 4.2.6.11 Concept of Vitality & Vital economy
  - 4.2.6.12 How Nature Cures- The Natural healing mechanisms
  - 4.2.6.13 *Arogya Rakshak Panchatantras* and their importance in maintenance of good health prevention of diseases and treatment of diseases through lifestyle modification.
  - 4.2.6.14 *Shareera Dharmas – Ahara, Nidra Bhaya, Maithuna*
  - 4.2.6.15 Natural Immunity & how to acquire natural immunity in diseases.
  - 4.2.6.16 Inflammation- Naturopathic perspective.
  - 4.2.6.17 Naturopathy: a blend of Drugless Therapies
  - 4.2.6.18 Holistic approach of Naturopathy
  - 4.2.6.19 Modern perspectives of Naturopathic Medicine
    - 4.2.6.19.1 Understanding Homeostasis
    - 4.2.6.19.2 Metabolism of Xenobiotics
    - 4.2.6.19.3 Aging, Free Radicals and Antioxidants
  - 4.2.6.20 Hygiene & importance of physical and mental hygiene in health and disease
  - 4.2.6.21 Vaccinations and inoculation – The Naturopathic view.
  - 4.2.6.22 Family planning by Natural therapeutics.
- 4.2.7 Introduction to The Diagnostic procedures in Naturopathy
    - 4.2.7.1 Spinal Analysis
    - 4.2.7.2 Facial Diagnosis
    - 4.2.7.3 Iris Diagnosis

- 4.2.7.4 Chromo Diagnosis
- 4.2.8 Natural rejuvenation
- 4.2.9 Personal life and prevention of diseases
- 4.2.10 Geriatrics and Naturopathy
- 4.2.11 Introduction to various systems of Medicine
  - 4.2.11.1 Modern Medicine
  - 4.2.11.2 *Ayurveda*
    - 4.2.11.2.1 Introduction
    - 4.2.11.2.2 Definition of *Prakriti* and its categories.
    - 4.2.11.2.3 *Swastha Vrittam*
      - 4.2.11.2.3.1 *Dinacharya*
      - 4.2.11.2.3.2 *Ratricharya*
      - 4.2.11.2.3.3 *Ritucharya*
      - 4.2.11.2.3.4 *Vegadharanam*
  - 4.2.11.3 Homeopathy
  - 4.2.11.4 *Unani*
  - 4.2.11.5 *Siddha*
- 4.2.12 Comparative study of Naturopathy with other systems of Medicine
- 4.2.13 Basic essentials of a Naturopathy practitioner - an introduction to qualities of a Naturopathy & *Yoga* Practitioner, Approach to the Patient with a Naturopathy view, Ethical considerations, Understanding the Scope & Limitations
- 4.2.14 Recent Advances in Naturopathy & *Yoga*
  - 4.2.14.1 Introduction to Psychosomatic Diseases & Psychoneuroimmunology
  - 4.2.14.2 Introduction to Mind-Body Medicine
  - 4.2.14.3 Lifestyle & psychosocial behavior

#### 4.2.14.4 Introduction to Integrative Medicine

#### 4.2.15 An introduction to Research & its importance in Naturopathy

### 4.3 **Practical**

Students should be introduced to various treatment procedures used in Naturopathy. Brief outlines of the following therapies in naturopathy including understanding the basic classification & procedure through observation and demonstration:

#### 4.3.1 Fasting

#### 4.3.2 Exercises

#### 4.3.3 Rest and relaxation

#### 4.3.4 Regular habits like sun bath, barefoot walking on grass

#### 4.3.5 Hydrotherapy

##### 4.3.5.1 Baths

##### 4.3.5.1.1 Hip-bath

##### 4.3.5.1.2 Spinal bath

##### 4.3.5.1.3 Steam bath

##### 4.3.5.1.4 Foot bath

##### 4.3.5.1.5 Full Immersion bath

##### 4.3.5.2 Packs

##### 4.3.5.2.1 Chest pack

##### 4.3.5.2.2 Abdominal pack

##### 4.3.5.2.3 Gastro-Hepatic pack

##### 4.3.5.2.4 Kidney Pack

##### 4.3.5.2.5 Full wet-sheet pack

#### 4.3.6 Internal Application of Water

##### 4.3.6.1 Enema

- 4.3.6.2 Colon Hydrotherapy
- 4.3.6.3 Water Drinking
- 4.3.7 Mud Therapy
- 4.3.8 Balneotherapy
- 4.3.9 Heliotherapy & Chromo therapy
- 4.3.10 Massage Therapy
- 4.3.11 Magneto therapy
- 4.3.12 Chiropractic
- 4.3.13 Osteopathy
- 4.3.14 Physiotherapy
- 4.3.15 Nutrition & Dietetics with special emphasis on Natural Diet
- 4.3.16 Acupuncture, Acupressure & Reflexology
- 4.3.17 Aromatherapy
- 4.3.18 Bio feed back

#### **Detoxification Techniques**

- Demonstration of enemas and colon cleansing methods.
- Nasal cleansing (Jal Neti, Sutra Neti).
- Body scrubs and dry brushing for lymphatic drainage

#### **Nature Cure Treatments**

- Sunbathing and heliotherapy techniques.
- Training in earthing or grounding practices.
- Air therapy (Pranayama outdoors, oxygen therapy).

#### **Counselling and Lifestyle Management**

- Case studies on holistic health counseling.
- Teaching stress management techniques.
- Promoting positive mental health practices.

#### **Case Studies and Clinical Practice**

- Conducting patient consultations and assessments.
- Designing personalized treatment plans.
- Documenting progress and follow-ups.

A Practical Record book should be maintained to document the above observations.

#### 4.4 Text Books

4.4.1	Philosophy of Nature Cure	Henry Lindlahr
4.4.2	Practice of Nature Cure	Henry Lindlahr
4.4.3	Human Culture and Cure	Dr. E.D. Babbitt
4.4.4	Practical Nature Cure	K. Laxman Sharma
4.4.5	History and Philosophy of Nature Cure	S.J. Singh
4.4.6	My Nature Cure	M.K. Gandhi
4.4.7	Natural Health Care – A to Z	Belinda Gran
4.4.8	Introduction to Natural Hygiene	Herbert.M.Shelton
4.4.9	Text book of Natural Medicine	Joseph E. Pizzorno & Michael T. Murray
4.4.10	Nature Cure treatments	Jindal
4.4.11	Complete handbook of Nature cure	H. K. Bakhru
4.4.12	Toxemia	J. H. Tilden
4.4.13	Return to Nature	Adolf Just

#### 4.5 Reference Books

4.5.1	My Nature Cure or Practical Naturopathy	S.J. Singh
4.5.2	The Science of Facial Expression	Louis Kuhne
4.5.3	The Story of My Experiments With Truth	M.K Gandhi
4.5.4	<i>Ayurveda</i> for health and long life	Dr.R.K.Garde
4.5.5	Fundamentals of <i>Ayurveda</i>	K. N. Udupa
4.5.6	Siddha Medicine	Ram Murthy
4.5.7	Homeopathic Philosophy	Kent

4.5.8	Everybody's Guide to Nature Cure	Harry Benjamin
4.5.9	Prayer	M.K.Gandhi
4.5.10	Diet and Diet Reforms	M.K.Gandhi
4.5.11	Panchatantra	Venkat Rao
4.5.12	Nature Cure	J.N. Jussawalla
4.5.13	The Encyclopedia of Natural Medicine	Joseph E. Pizzorno & Michael T. Murray

#### 4.6 **Scheme Of Examination**

S.N O	Subject	Theo -ry	Intern -al Assm t	Viva- Voce	Total	Practi -cals	Inter- nal Assm t	Total Mark s	Gran d Total Mark s
01.	Philosophy of Naturopathy	80	20	30	130	60	10	70	200

## 5. **PRINCIPLES OF YOGA**

### 5.1 Goals and Objectives

#### 5.1.1 **Goal:**

The goal of teaching *Yoga* to undergraduate students is to familiarize them with basic principles of *Yoga* with respect to history, definitions, philosophy and practices of *Yoga*, with emphasis of *AshtangaYoga*.

#### 5.1.2 **Objectives:**

##### 5.1.2.1 **Knowledge:**

After the completion of the course, the student shall be able to:

- 5.1.2.1.1 Explain the various definitions of *Yoga*, history of *Yoga* and branches of *Yoga* ;
- 5.1.2.1.2 Describe kinds of *Yogasanas*, its importance, methods, rules, regulations and limitations;
- 5.1.2.1.3 Illustrate the various limbs of *Ashtanga Yoga*;
- 5.1.2.1.4 Demonstrate knowledge of *pranayamas*, *prana* and lifestyle, breathing and lifespan.

##### 5.1.2.2 **Skills:**

After the completion of the course, the student shall be able to:

- 5.1.2.2.1 Demonstrate various types of *Yogasanas* in their correct method of performance;
- 5.1.2.2.2 Demonstrate different *pranayamas*.
- 5.1.2.2.3 Explain about the definitions, origin, branches of *Yoga*.

##### 5.1.2.3 **Integration**

At the completion of training, the student should be able to comprehend the basic principles of *Yoga*.

## 5.2 **Theory (Duration: 12 months)**

**Total hours: 450 (Theory: 250 Practical: 200)**

- 5.2.1 What is *Yoga* and various definitions of *Yoga*.
- 5.2.2 History of *Yoga* (Relative chronology, *Yoga* before the time of *Patanjali*, Indus Valley Civilization).
- 5.2.3 Outlines on branches of *Yoga* – *Raja*, *Hatha*, *Jnana*, *Karma*, *Bhakti*, *Mantra*, *Kundalini* and *Laya*.
- 5.2.4 Introduction to *Yogasanas*
  - 5.2.4.1 Definition of *Yogasanas*
  - 5.2.4.2 *Yogasanas* and *Prana*
  - 5.2.4.3 *Yogasanas* and *Kundalini*
  - 5.2.4.4 *Yogasanas* and the mind-body connection
  - 5.2.4.5 *Yogasanas* and Exercises
- 5.2.5 Classifications of *Yogasanas* – Beginners group, Intermediate group, Advanced group, dynamic and static *Yogasanas*.
- 5.2.6 Introduction to *Pranayama*
  - 5.2.6.1 Definition
  - 5.2.6.2 *Prana* and lifestyle
  - 5.2.6.3 Breath, health and *Pranayama*
  - 5.2.6.4 Breathing and Lifespan
  - 5.2.6.5 *Pranayama* and spiritual aspiration
- 5.2.7 Introduction to *AshtangaYoga*
  - 5.2.7.1 *Yama*
  - 5.2.7.2 *Niyama*
  - 5.2.7.3 *Asana*

5.2.7.4 *Pranayama*

5.2.7.5 *Pratyahara*

5.2.7.6 *Dharana*

5.2.7.7 *Dhyana*

5.2.7.8 *Samadhi*

(Concept only – as orientation/introduction)

5.2.8 *Asanas* – their importance, methods, rules, regulations and limitations.

5.2.9 Meditative postures

5.2.9.1 *Padmasana*

5.2.9.2 *Siddhasana*

5.2.9.3 *Vajrasana*

5.2.9.4 *Sukhasana*

5.2.10 Cultural postures

5.2.10.1 *Halasana*

5.2.10.2 *Dhanurasana*

5.2.10.3 *Sarvangasana*

5.2.10.4 *Paschimottanasana*

5.2.10.5 *Trikonasana*

5.2.11 Relaxation postures

5.2.11.1 *Shavasana*

5.2.11.2 *Makarasana*

5.2.11.3 *Sitali Dandasana*

5.2.11.4 *Sitali Tadasana*

5.2.12 *Suryanamaskara*

### 5.3 **Practical**

5.3.1 Joint movements

5.3.2 Loosening exercises

5.3.3 *Sukshma Vyayama*

5.3.4 Stretchings

5.3.5 Breathing exercises

5.3.6 *Suryanamaskara*

5.3.7 *Asanas*

#### 5.3.7.1 Standing

5.3.7.1.1 *Tadasana*

5.3.7.1.2 *Ardha Kati Chakrasana*

5.3.7.1.3 *Kati Chakrasana*

5.3.7.1.4 *Trikonasana*

5.3.7.1.5 *Vrikshasana*

5.3.7.1.6 *Utthita Trikonasana*

5.3.7.1.7 *Veerabhadrasana*

5.3.7.1.8 *Parsvottanasana*

5.3.7.1.9 *Parighasana*

#### 5.3.7.2 Supine

5.3.7.2.1 *Shavasana*

5.3.7.2.2 *Matsyasana*

5.3.7.2.3 *Sarvangasana*

5.3.7.2.4 *Halasana*

5.3.7.2.5 *Chakrasana*

5.3.7.2.6 *Pawanamuktasana*

- 5.3.7.2.7 *Setubandhasana*
- 5.3.7.2.8 *Parvottanasana*
- 5.3.7.2.9 *Vipareetakarani*
- 5.3.7.2.10 *Karnapedasana*
- 5.3.7.2.11 *Suptakonasana*

### **5.3.7.3 Prone**

- 5.3.7.3.1 *Makarasana*
- 5.3.7.3.2 *Bhujangasana – 1 and 2*
- 5.3.7.3.3 *Ardha Shalabhasana*
- 5.3.7.3.4 *Shalabhasana – 1*
- 5.3.7.3.5 *Dhanurasana*
- 5.3.7.3.6 *Adho mukha svanasana*

### **5.3.7.4 Sitting**

- 5.3.7.4.1 *Vakrasana*
- 5.3.7.4.2 *Ardhamatsyendrasana*
- 5.3.7.4.3 *Paschimottanasana*
- 5.3.7.4.4 *Ushtrasana*
- 5.3.7.4.5 *Vajrasana*
- 5.3.7.4.6 *Padmasana*
- 5.3.7.4.7 *Baddha Padmasana*
- 5.3.7.4.8 *Supta Vajrasana*
- 5.3.7.4.9 *Ardha Navasana*
- 5.3.7.4.10 *Gomukhasana*
- 5.3.7.4.11 *Veerasana*
- 5.3.7.4.12 *Baddha Konasana*

5.3.7.4.13 *Janusirshasana*

5.3.7.4.14 *Upavista Konasana*

5.3.7.4.15 *Shashankasana*

### 5.3.8 *Pranayama*

5.3.8.1 *Bhastrika*

5.3.8.2 *Sheetkari*

5.3.8.3 *Sheetali*

5.3.8.4 *Anuloma Viloma*

5.3.8.5 *Ujjayi*

5.3.8.6 *Bhramari*

### 5.3.9 *Kriya*

5.3.9.1 *Jala neti*

5.3.9.2 *Sutra neti*

5.3.9.3 *Vamana dhauti*

#### 5.4 **Textbooks**

5.4.1 Basis and definitions of *Yoga* – Vivekananda Kendra

5.4.2 *Asanas* – Swami Kuvalyananda

5.4.3 The gospel of Buddha – Parul Caruso

5.4.4 The Gospel of Shri Ramakrishna – Mahendranatha Gupta

5.4.5 Complete works of Shri Aurobindo

5.4.6 *Asanas, Pranayama, Bandhas, Mudras* – Swami Satyananda Saraswati

5.4.7 *Hatha YogaPradipika* – Swami Svatmarama

5.4.8 *Raja, Hatha, Jnana, BhaktiYoga* – Swami Vivekananda

#### 5.5 **Scheme Of Examination**

S.N	Subject	Theo-ry	Intern-al Assm-t	Viva-Voce	Total	Practi-cals	Inter-nal Assm-t	Total Marks	Grand Total Marks
01.	Principles of <i>Yoga</i>	80	20	30	130	60	10	70	200

## **2. PATHOLOGY**

### **2.1 Goals and Objectives**

#### **2.1.1 Goal:**

The goal of teaching pathology to undergraduate students is to provide a comprehensive knowledge of the mechanisms and causes of disease, so that he/she is able to comprehend fully the natural history and clinical manifestations of disease.

#### **2.1.2 Objectives:**

##### **2.1.2.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 2.1.2.1.1 Explain the structure and ultra-structure of a sick cell, mechanism of cell degeneration, cell death and repair and be able to correlate structural and functional alterations.
- 2.1.2.1.2 Describe the pathophysiological processes which govern the maintenance of homeostasis, mechanisms of their disturbance and the morphological and clinical manifestations associated with it;
- 2.1.2.1.3 Delineate the mechanisms and patterns of tissue response to injury such that he/she can appreciate the pathophysiology of disease processes and their clinical manifestations;
- 2.1.2.1.4 Correlate normal and altered morphology (gross and microscopic) of different organ systems in common diseases to the extent needed for understanding of disease processes and their clinical significance.

### **2.1.2.2 Skills:**

After the completion of the course, the student shall be able to:

- 2.1.2.2.1 Elaborate on principles, procedures and interpretation of results of diagnostic laboratory tests;
- 2.1.2.2.2 Perform with proper procedure simple bed side tests on biological fluid samples like blood, urine etc.
- 2.1.2.2.3 Prepare investigation flow-charts for diagnosing and managing common diseases;
- 2.1.2.2.4 Identify biochemical and physiological disturbances in diseases;

### **2.1.2.3 Integration**

At the completion of training, the student must be capable of integrating relationships between etiological factors such as social, economic and environmental in the natural history of common diseases in India.

## **2.2 Pathology – I (Duration: 12 months)**

**Total hours: 350 (Theory: 250 Practical: 100)**

2.2.1 History and Scope

2.2.2 Definition and various branches

2.2.3 Scientific study of disease and methodology

2.2.4 The cell and the reaction of cell, tissue and organ to injury

2.2.4.1 Structure and functions of cell

2.2.4.2 Causes and nature of cell injury

- 2.2.4.3 Toxic substances, physical agents and lack of nutrients
- 2.2.4.4 Infectious agents and parasites
- 2.2.4.5 Immune mechanisms and genetic defects
- 2.2.5 Reaction of cell to injurious agents**
  - 2.2.5.1 Lethal injury – necrosis and gangrene
  - 2.2.5.2 Sub lethal injury
    - 2.2.5.2.1 Cloudy swelling
    - 2.2.5.2.2 Fatty changes in liver, heart and kidney
    - 2.2.5.2.3 Glycogen infiltration and hyaline degeneration
    - 2.2.5.2.4 Lipid degeneration Gaucher's disease
    - 2.2.5.2.5 Muroid degeneration
  - 2.2.5.3 Excessive or abnormal accumulations – i) amyloid
  - 2.2.5.4 Pathological calcification
- 2.2.6 Inflammation and Repair**
  - 2.2.6.1 Definition, classification and nomenclature
  - 2.2.6.2 Acute inflammation
  - 2.2.6.3 Vascular and cellular phenomenon, cells of exudates chemical mediators and tissue changes in acute inflammation, cardinal signs of acute inflammation
  - 2.2.6.4 Fate, types and systemic effects of acute inflammation
- 2.2.7 Chronic Inflammation**
  - 2.2.7.1 Difference between acute and chronic inflammation
  - 2.2.7.2 Definition of Granuloma
- 2.2.8 Wound healing**

- 2.2.8.1 Restitution, regeneration and repair
- 2.2.8.2 Repair of epithelial and mesenchymal tissue
- 2.2.8.3 Primary union and secondary union
- 2.2.8.4 Mechanism involved and factors modifying repair process
- 2.2.9 Granulomas**
  - 2.2.9.1 Classification
  - 2.2.9.2 Tuberculosis, genesis and fate of tubercle, primary and secondary tuberculosis
  - 2.2.9.3 Definition, classification and pathology of leprosy
  - 2.2.9.4 Acquired primary, secondary and tertiary stages syphilis
  - 2.2.9.5 CNS syphilis, CVS syphilis and tertiary stages syphilis
  - 2.2.9.6 Actinomycosis, maduramycosis, rhinosporidiosis
- 2.2.10 Fluid and Hemodynamic Changes (circulatory disturbances)**
  - 2.2.10.1 Hyperemia, congestion and hemorrhage
  - 2.2.10.2 Thrombosis, embolism, DIC
  - 2.2.10.3 Ischemia, infarction and shock
- 2.2.11 Immunopathology**
  - 2.2.11.1 Basic pathological mechanism in autoimmune disorders
  - 2.2.11.2 Concept of immunodeficiency disorders
  - 2.2.11.3 Pathology of AIDS
  - 2.2.11.4 Growth disorders and definitions
- 2.2.12 Growth disorders**
  - 2.2.12.1 Definition of agenesis, aplasia, atrophy, hyperplasia, hypertrophy, hypoplasia, metaplasia

2.2.12.2 Concept of dysplasia, anaplasia and carcinoma in-situ

**2.2.13 Neoplasia**

2.2.13.1 Definition, classification and nomenclature

2.2.13.2 Characteristic features of benign and malignant tumors

2.2.13.3 Route of spread of malignant tumors

2.2.13.4 Grading and staging of cancers and pre-cancerous conditions

2.2.13.5 Carcinogenesis and carcinogens

2.2.13.6 Effect of tumor on host, and effect of host on tumors

2.2.13.7 Laboratory diagnosis of cancer – Biopsy, exfoliative cytology, prognostic prediction in cancer

2.2.13.8 Description of common tumors like – Fibroma, Lymphoma, Lipoma, Angioma, Leiomyoma, Fibrosarcoma, Lymphosarcoma, Liposarcoma, Angiosarcoma, and Leiomyosarcoma

2.2.13.9 Embryonal tumors like teratoma and retinoblastoma

**2.2.14 Mineral and Pigment Metabolism**

2.2.14.1 Pathology of melanin pigment

2.2.14.2 Pathology of hemoglobin and its derivatives

2.2.14.3 Hemosiderosis and hemochromatosis

**2.2.15 Genetic disorders**

2.2.15.1 Klinefelter's Syndrome, Turner's Syndrome, Down's Syndrome

## **2.3 Pathology – II (Duration: 12 months)**

### **2.3.1 Disorders of RBC**

- 2.3.1.1 Definition, morphologic and etio-pathologic classification of anemia
- 2.3.1.2 Iron deficiency anemia, B12 and folate deficiency anemia, sideroblastic anemia, post-hemorrhagic anemia
- 2.3.1.3 Concept and classification of hemolytic anemia
- 2.3.1.4 Acquired hemolytic anemia and aplastic anemia
- 2.3.1.5 Polycythemia
- 2.3.1.6 Laboratory investigations in anemia

### **2.3.2 Disorders of WBC**

- 2.3.2.1 Leukopenia, Leukocytosis
- 2.3.2.2 Leukemia, Agranulocytosis and Tropical eosinophilia

### **2.3.3 Coagulation and bleeding disorders**

- 2.3.3.1 Structure, function and pathology of platelets
- 2.3.3.2 Definition and classification of blood dyscrasias
- 2.3.3.3 Laboratory investigations in bleeding disorders

### **2.3.4 Diseases of cardiovascular system**

- 2.3.4.1 Arteriosclerosis and atherosclerosis
- 2.3.4.2 Aneurysm
- 2.3.4.3 Vasculitis and thromboangitis obliterans
- 2.3.4.4 Rheumatic heart disease, endocarditis, myocardial infarction
- 2.3.4.5 Congenital heart diseases, pericarditis
- 2.3.4.6 Congestive cardiac failure

### **2.3.5 Diseases of Respiratory system**

2.3.5.1 Lobar pneumonia, bronchopneumonia, pulmonary tuberculosis

2.3.5.2 Atelectasis, bronchiectasis and pneumoconiosis

2.3.5.3 Chronic Obstructive Pulmonary Diseases (COPD)

2.3.5.4 Bronchial asthma, chronic bronchitis

2.3.5.5 Acute respiratory distress syndrome (ARDS)

2.3.5.6 Tumors of lung and pleura

### **2.3.6 Diseases of gastrointestinal system**

2.3.6.1 Pleomorphic adenoma of salivary gland

2.3.6.2 Barrett's esophagus

2.3.6.3 Gastritis and peptic ulcer and tumors of stomach

2.3.6.4 Inflammatory bowel diseases – Crohn's disease, ulcerative colitis, typhoid  
ulcer, tumors of small intestine

2.3.6.5 Megacolon and tumors of colon

2.3.6.6 Malabsorption syndrome, tropical sprue and celiac tuberculosis

### **2.3.7 Diseases of liver, biliary tract and pancreas**

2.3.7.1 Liver function test and hepatic failure, viral hepatitis

2.3.7.2 Cirrhosis of liver, tumors of liver

2.3.7.3 Cholecystitis, gall stones

2.3.7.4 Acute pancreatitis, diabetes mellitus

2.3.7.5 Cystic fibrosis (mucoviscidosis)

2.3.7.6 Liver abscess and alcoholic liver disease

2.3.7.7 Indian childhood cirrhosis

### **2.3.8 Diseases of Kidney**

2.3.8.1 Renal function tests, renal failure, polycystic kidney

2.3.8.2 Acute glomerulonephritis, crescentic glomerulonephritis, membranous glomerulonephritis, nephritic syndrome

2.3.8.3 Chronic glomerulonephritis, acute tubular necrosis

2.3.8.4 Pyelonephritis, kidney in hypertension

2.3.8.5 Urolithiasis, tumors of kidney and pelvis

### **2.3.9 Diseases of Male Genital System**

2.3.9.1 Orchitis and testicular tumors

2.3.9.2 Nodular hyperplasia of prostate, carcinoma of prostate

2.3.9.3 Carcinoma of penis and lesions of penis

### **2.3.10 Diseases of Female Genital System**

2.3.10.1 Endometrial hyperplasia, adenomyosis and endometriosis

2.3.10.2 Carcinoma of cervix, tumors of ovary

2.3.10.3 Pelvic inflammatory diseases

2.3.10.4 Carcinoma and other diseases of vulva

### **2.3.11 Diseases of Breast**

2.3.11.1 Fibrocystic disease and tumors of breast

2.3.11.2 Gynecomastia

### **2.3.12 Endocrine pathology**

2.3.12.1 Pituitary, acromegaly, hypothyroidism and Grave's disease

2.3.12.2 Thyroiditis, tumors of thyroid and thyroid function tests

2.3.12.3 Hypoparathyroidism and hyperparathyroidism

- 2.3.12.4 Hyperplasia and adenoma of parathyroid
- 2.3.12.5 Adrenal gland, Addison's disease, Cushing's syndrome
- 2.3.12.6 Pheochromocytoma, neuroblastoma
- 2.3.13 Musculoskeletal pathology**
  - 2.3.13.1 Osteomyelitis and osteoporosis
  - 2.3.13.2 Rickets and osteomalacia
  - 2.3.13.3 Osteitis fibrosa cystic and Paget's disease, fibrous dysplasia
  - 2.3.13.4 Tumors of bone
  - 2.3.13.5 Rheumatoid arthritis, Gout
  - 2.3.13.6 Myasthenia gravis and progressive muscular dystrophy
- 2.3.14 Diseases of Nervous System**
  - 2.3.14.1 Meningitis, tumors of CNS
  - 2.3.14.2 Tumors of peripheral nerves
  - 2.3.14.3 Encephalitis
- 2.3.15 Diseases of Lymph nodes and Spleen**
  - 2.3.15.1 Lymphadenopathy
  - 2.3.15.2 Malignant lymphomas and splenomegaly
- 2.3.16 Pathology of skin**
  - 2.3.16.1 Squamous cell carcinoma, basal cell carcinoma
  - 2.3.16.2 Malignant melanoma
  - 2.3.16.3 Warts, molluscum contagiosum
  - 2.3.16.4 Superficial and deep fungal diseases

## 2.4 **Practical**

### 2.4.1 Hematology

- 2.4.1.1 Blood groups (A B O system)
- 2.4.1.2 Estimation of hemoglobin
- 2.4.1.3 Enumeration of RBCs (RBC count)
- 2.4.1.4 Total leucocyte count (Total count)
- 2.4.1.5 Differential leucocyte count (DC)
- 2.4.1.6 Peripheral smear staining and reporting
- 2.4.1.7 Absolute eosinophil count
- 2.4.1.8 Demonstration of
  - 2.4.1.8.1 Hemograms in anemia
    - 2.4.1.8.1.1 Iron deficiency anemia
    - 2.4.1.8.1.2 Macrocytic anemia
    - 2.4.1.8.1.3 Microcytic anemia
    - 2.4.1.8.1.4 Hemolytic anemia
  - 2.4.1.8.2 Hemograms in leukemias
    - 2.4.1.8.2.1 Acute types
    - 2.4.1.8.2.2 Chronic types
- 2.4.1.9 Slide study of
  - 2.4.1.9.1 Acute myeloid leukemia
  - 2.4.1.9.2 Chronic myeloid leukemia
  - 2.4.1.9.3 Chronic lymphatic leukemia

## 2.4.2 Clinical pathology

2.4.2.1 Urine analysis

2.4.2.2 Semen analysis

2.4.2.3 Pregnancy tests

2.4.2.4 Liver function tests

2.4.2.5 Fractional test meal

2.4.2.6 Glucose tolerance test

2.4.2.7 CSF analysis

## 2.5 **Textbooks**

2.5.1 Pathological basis of disease – Robbins, Cotran and Kumar

2.5.2 Textbook of Pathology – NC. Dey

## 2.6 **Reference Books**

2.6.1 Textbook of Pathology – Anderson

2.6.2 Systemic Pathology – Symmers

2.6.3 Medical Laboratory Technology – Ramnik Sood

## 2.7 **Scheme Of Examination**

S.No	Subject	Theo-ry	Intern-al Assmt	Viva-Voce	Total	Practi-cals	Inter-nal Assmt	Total Marks	Grand Total Marks
01.	Pathology	80	20	30	130	60	10	70	200

### **3. MICROBIOLOGY**

#### **2.1 Goals and Objectives**

##### **2.1.1 Goal:**

The goal of teaching microbiology to undergraduate students is to provide a comprehensive knowledge of the natural history, mechanisms and causes of infectious disease, including etiology, pathogenesis, laboratory diagnosis, treatment and control of diseases in the community.

##### **2.1.2 Objectives:**

###### **2.1.2.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 2.1.2.1.1 Remember and recall all the infectious micro-organisms of the human body and host-parasite relationship
- 2.1.2.1.2 Describe parasitic micro-organisms (viruses, fungi, bacteria, parasites) with the pathogenesis of the diseases they cause;
- 2.1.2.1.3 Enumerate and illustrate sources and modes of transmission, including insect vectors, of pathogenic and opportunistic organisms;
- 2.1.2.1.4 Describe the pathways and mechanisms of immunity to infection
- 2.1.2.1.5 Acquire knowledge about different vaccines that are available for the prevention of communicable diseases;

2.1.2.1.6 Effectively use sterilization and disinfection to control and prevent nosocomial and community acquired infections;

2.1.2.1.7 Order laboratory investigations for bacteriological examination of food, water and air.

#### **2.1.2.2 Skills:**

After the completion of the course, the student shall be able to:

2.1.2.2.1 Prescribe and interpret laboratory investigations for diagnosis of communicable diseases and identify infectious agents by clinical manifestations;

2.1.2.2.2 Perform common bed-side tests to detect and identify pathogenic agents, such as blood film for malaria, filaria, gram stain and Acid Fast Bacilli (AFB) staining and stool sample for ova cyst, etc.

#### **2.1.2.3 Integration**

3.1 At the completion of training, the student must be knowledgeable about clinical, therapeutic and preventive aspects of diseases most prevalent in India.

#### **3.2 Theory (Duration: 12 months)**

**Total hours: 250 (Theory: 150 Practical: 100)**

3.2.1 Infection and a brief description of Nosocomial infection

3.2.2 Immunology

- 3.2.2.1 Reticuloendothelial system, components and functions of the innate and adaptive immunity
- 3.2.2.2 Role of T and B lymphocytes
- 3.2.2.3 Induction of immune response
- 3.2.2.4 Cell-mediated immune response
- 3.2.2.5 Immunoglobulin structure and functions
- 3.2.2.6 Humoral immune response
- 3.2.2.7 Fate of antigen antibody complex
- 3.2.2.8 Complement system
- 3.2.2.9 Generation of antibody diversity
- 3.2.2.10 Hypersensitivities
- 3.2.2.11 Immunoregulation, autoimmunity, tolerance
- 3.2.2.12 HLA, disease association and transplantation
- 3.2.2.13 Serological and Immunological techniques, application in medicine (vaccines, immunotherapy, immunoassays and immune diagnosis)
- 3.2.2.14 Antibacterial Susceptibility testing
- 3.2.3 Cell as structural unit of life
- 3.2.4 Classification of living organisms
- 3.2.5 Classification of microorganisms
- 3.2.6 Distinctive characteristics of major groups of microorganisms
  - 3.2.6.1 Protozoa
  - 3.2.6.2 Algae
  - 3.2.6.3 Fungi

- 3.2.6.4 Bacteria
- 3.2.6.5 Viruses
- 3.2.7 General bacteriology
  - 3.2.7.1 Bergey's manual of systemic bacteriology
    - 3.2.7.1.1 Gram positive eubacteria: Cocci, endospore forming bacteria, regular shaped rods, irregular shaped rods, mycobacteria, actinomycetes, mycoplasmas
    - 3.2.7.1.2 Gram negative eubacteria: Spirochetes, microaerophilia curved bacteria, aerobic rods and Cocci, facultative rods, anaerobes, rickettsias and Chlamydias
  - 3.2.7.2 Morphology, structure and staining
  - 3.2.7.3 Growth and nutrition of bacteria
  - 3.2.7.4 Sterilization and disinfections
  - 3.2.7.5 Culture media and methods
  - 3.2.7.6 Identification of bacteria
    - 3.2.7.6.1 Phenotypic characteristics – morphology, resistance, metabolism, biochemical test, antigenic structure, typing of bacterial strain, pathogenicity of tests, serological tests, molecular diagnostics
    - 3.2.7.6.2 Bacterial genetics – plasmids, genetic variation
    - 3.2.7.6.3 Mechanism of bacterial pathogenesis
    - 3.2.7.6.4 Bacteriophage
    - 3.2.7.6.5 Systemic bacteriology - Streptococcus, Staphylococcus, Pneumococcus, Gonococci, Meningococcus, Coryne

bacterium, Clostridium, Hemophilus, Mycobacterium, Spirochetes,  
Bordetella, Chlamydia

3.2.7.6.6 Virology- General properties of viruses and their diagnosis.

Study of Herpes, Adenovirus, Picornavirus, Hepatitis virus, Pox virus,  
Rabies, HIV, Poliovirus

3.2.7.6.7 Parasites- Protozoa- Entamoeba and Plasmodium

Helminthology---Ancylostoma, Ascaris, Taenia, Wuchereria

3.2.7.6.8 Mycology—General characteristics and methods used for study  
and diagnosis of fungal infections

Superficial mycoses, Opportunistic mycoses

Systemic mycoses

3.2.7.7 Bacteriology of water

### 3.3 **Practical**

3.3.1 Demonstration of culture media, demonstration of sterilization techniques

3.3.2 Systemic – identification of the pathogen from the given clinical material based  
on staining, property, cultural characters, biochemical and serological tests

3.3.3 Immunology – interpretation of given immunological test

3.3.4 Agglutination – slide, tube and passive agglutination precipitation – VDRL, Elisa

3.3.5 Parasitology – stool examination

3.3.6 Blood smear for malarial parasite and others for identification and interpretation

### 3.4 **Textbooks**

3.4.1 Textbook of microbiology – R Ananthanarayana and CK Jayakumar

3.4.2 Parasitology – Jayaram Panicker

3.4.3 Bacteriology – Dey

3.4.4 Textbook of microbiology – Chakravarthy

3.4.5 Immunology and microbiology – Gupta

### 3.5 **Reference Books**

3.5.1 Parasitology – Chaterjee

3.5.2 Practical microbiology – R Cruick Shank

3.5.3 Clinical microbiology – Bailey & Scott

3.5.4 Medical Laboratory – Manual for tropical countries – Monica Cheesbrough

### 3.6 **Scheme Of Examination**

S.No	Subject	Theo-ry	Intern-al Assm-t	Viva-Voce	Total	Practi-cals	Inter-nal Assm-t	Total Marks	Grand Total Marks
01.	Microbiology	80	20	30	130	60	10	70	200

## **4. COMMUNITY MEDICINE**

### **4.1 Goals and Objectives**

#### **4.1.1 Goal:**

The goal of teaching Community Medicine to undergraduate students is to prepare them to function as community and first level physicians in accordance with the institutional goals.

#### **4.1.2 Objectives:**

##### **4.1.2.1 Knowledge:**

After completion of the course, the student shall be able to:

- 4.1.2.1.1 Describe the health care delivery system including rehabilitation of the disabled in the country;
- 4.1.2.1.2 Describe the National Health Programmes with particular emphasis on maternal and child health programmes, family welfare planning and population control;
- 4.1.2.1.3 List epidemiological methods and describe their applications to communicable and non-communicable diseases in the community or hospital situation;
- 4.1.2.1.4 Apply bio-statistical methods and techniques;
- 4.1.2.1.5 Delineate the demographic pattern of the country and appreciate the roles of the individual family, community and socio-cultural environment in health and disease;
- 4.1.2.1.6 Explain the health information systems;

4.1.2.1.7 Enunciate the principles and components of primary health care and national policies to achieve the goal of 'Health administration, Health education in relation to community'.

4.1.2.1.8 Able to plan a Health Program and able to evaluate a Programme.

4.1.2.1.9 Able to describe principles of organization.

4.1.2.2 **Skills:**

After the end of the course, the student should be able to:

4.1.2.2.1 Use epidemiology as a scientific tool for making national decisions relevant to community and individual patient intervention;

4.1.2.2.2 Collect, Analyse, interpret and present simple community and hospital based data;

4.1.2.2.3 Diagnose and manage common health issues and emergencies at the individual family and community levels with existing healthcare resources, respecting socio-cultural beliefs.

4.1.2.2.4 Diagnose and manage maternal and child health problems and conduct family planning counseling and community programs keeping in mind national priorities;

4.1.2.2.5 Diagnose and manage common nutritional problem at individual and community level;

4.1.2.2.6 Design, implement and evaluate health education program using simple audio-visual aids

4.1.2.2.7 Participate with team members in organising and implementing health care programs;

4.1.2.2.8 Conduct group meetings, give talks on medical issues.

**4.1.2.3 Integration:**

Develop capabilities to form a synthesis between cause of illness in the environment or community and individual health and respond with leadership qualities to institute remedy for the same.

**4.2 Theory (Duration: 12 months)**

**Total hours: 250 (Theory: 150 Practical: 100)**

4.2.1 Man and Medicine: Towards Health for All

4.2.2 Concepts of Health

4.2.2.1 Concept

4.2.2.2 Definitions

4.2.2.3 Dimensions

4.2.2.4 Determinants

4.2.2.5 Positive health

4.2.2.6 Concept of wellbeing

4.2.2.7 Responsibility towards health

4.2.2.8 Health development and its indicators

4.2.2.9 Health science philosophies

4.2.3 Concept of Disease

4.2.3.1 Concepts of causation

4.2.3.2 Natural history of disease

- 4.2.4 Concepts of control and prevention
- 4.2.5 Modes of intervention
- 4.2.6 Population medicine
- 4.2.7 International classification of diseases
- 4.2.8 Principles of epidemiology and epidemiologic methods
  - 4.2.8.1 Definition, basic measurements in epidemiology
  - 4.2.8.2 Epidemiological methods – descriptive, analytical and experimental epidemiology
  - 4.2.8.3 Uses of epidemiology
  - 4.2.8.4 Dynamics of disease transmission
  - 4.2.8.5 Disease prevention and control
  - 4.2.8.6 Investigation of an Epidemic
- 4.2.9 Screening of diseases: Concepts, Uses, Criteria for screening, sensitivity & specificity
- 4.2.10 Epidemiology of communicable diseases
  - 4.2.10.1 Respiratory infections – small pox, varicella, measles, rubella, mumps, influenza, diphtheria, pertussis, tuberculosis, acute respiratory tract infection(ARTI)
  - 4.2.10.2 Intestinal infections – polio, viral hepatitis, cholera, acute diarrheal diseases, typhoid, food poisoning, amoebiasis, ascariasis, ancylostomiasis, taeniasis
  - 4.2.10.3 Arthropod – borne infections – yellow fever, Japanese encephalitis, malaria, filarial
  - 4.2.10.4 Surface infections – rabies, trachoma, tetanus, leprosy, STD, AIDS

- 4.2.11** Epidemiology of non-communicable diseases – cancer, cardiovascular diseases, obesity, blindness, accidents, hypertension, stroke, rheumatic heart disease
- 4.2.12** Demography and Family Planning – Demographic cycle, population trends, fertility related statistics, health aspects of family planning, contraceptive methods and delivery system, National family welfare program.
- 4.2.13** Preventive medicine in Obstetrics, Pediatrics and Geriatrics – Antenatal, Intra natal, Postnatal care, Low birth weight, infant feeding, growth and development, growth chart, under-fives clinic, national health policy, indicators of MCH care, school health services, behavioral problems, geriatrics, Anganwadi ICDS programs.
- 4.2.14** Environmental health and occupational health: Purification of water and water quality standards, air, ventilation, lighting, noise, radiation, air temperature and humidity, housing, solid wastes disposal and control, excretory disposal, water carriage system, modern sewage treatment, entomology-mosquito, housefly, lice, itch mite, Cyclopes, rat flea, rodents, insecticides-hazards, diseases, pre- placement examination, measures for general health, protection of workers, prevention of occupational hazards
- 4.2.15** Basic Medical Statistics: Census, Vital events, legislation, SRS, notification of diseases, measures of dispersion and centering, sampling, tests of significance, correlation and regression
- 4.2.16** Health education and communication: Objectives, principles, aids, practice of Health education, planning and evaluation

- 4.2.17 Health planning – Management – International health organizations: Planning cycle, management methods and techniques, national health policy, health planning in India, five year plans, health systems in India, five year plans, health systems in India – at centre, state and district levels, panchayat raj, rural development schemes
- 4.2.18 Healthcare of community – Health System and National Programs: Levels of healthcare, Health for All, primary healthcare, healthcare delivery, health problems, healthcare services and systems, voluntary health agencies, national health programs
- 4.2.19 Nutrition and Health: Classification of food, vitamin, mineral, carbohydrate, protein, fat, energy balance, balanced diet, nutritional problems in public health, low birth N+PEM, xerophthalmia, nutritional anemia, IDPs, endemic fluorosis, lathyrism, assessment of nutritional status, nutritional surveillance, social aspects of nutritional food hygiene, food-borne disease.
- 4.2.20 International health agencies: WHO, UNICEF, RED CROSS
- 4.2.21 Voluntary health agencies.

### 4.3 **Practical**

- 4.3.1 Posting at any PHC, CHC, RHC or district hospital for National Immunization Program
- 4.3.2 Nutritional Assessment Surveys
- 4.3.3 1 day workshop or awareness program on AIDS with NACO
- 4.3.4 Posting at Blood donation camp
- 4.3.5 Field visits

- 4.3.5.1 Anganwadis
- 4.3.5.2 PHC / CHC / RHC / District hospital and understanding description of existing healthcare services
- 4.3.6 A study on health related problem in the community
- 4.3.7 Family Health Advisory Service
  - 4.3.7.1 To study the family structure & health status of individual members with reference to
    - 4.3.7.1.1 General health status
    - 4.3.7.1.2 Socio-economic status
    - 4.3.7.1.3 Nutritional status
    - 4.3.7.1.4 Environmental
    - 4.3.7.1.5 Immunization status
    - 4.3.7.1.6 Family welfare planning status
- 4.3.8 Health Practices in 4 conditions
  - 4.3.8.1 Pulmonary Tuberculosis
    - 4.3.8.1.1 Index case: occupation, literacy, social status etc
    - 4.3.8.1.2 Preventive measures for other family members
    - 4.3.8.1.3 Health education
  - 4.3.8.2 Antenatal Care
    - 4.3.8.2.1 Literacy of the family and woman
    - 4.3.8.2.2 Customs – social / religious during pregnancy, delivery, lactation
    - 4.3.8.2.3 Dietary habits: knowledge, aptitude and practices

- 4.3.8.3 Antenatal high risk care
  - 4.3.8.3.1 Health education, family planning advice
- 4.3.8.4 Protein energy malnutrition
  - 4.3.8.4.1 Socio-economic status of family
  - 4.3.8.4.2 Infant feeding and weaning practices
  - 4.3.8.4.3 Social customs regarding diet for children
- 4.3.9 Insecticides - 10+ models
- 4.3.10 Universal Immunization Program - 10+ models
- 4.3.11 Communicable diseases - 10+ models
- 4.3.12 Insect-borne diseases - 10+ models
- 4.3.13 Microscope slides - 10+ models
- 4.3.14 Environment and Sanitation - 10+ models

  - 4.3.16.5 *Yoga* Institutes
  - 4.3.16.6 Nutritional Assessment surveys
  - 4.3.16.7 Sanatoriums
  - 4.3.16.8 NACO programs etc

Community medicine, when integrated with naturopathy, focuses on promoting health and preventing diseases by using natural and holistic methods tailored to community needs. Practical applications in community medicine relate to naturopathy:

## Health Education and Promotion

- **Naturopathy Focus:** Emphasize the importance of lifestyle changes such as balanced diets, exercise, yoga, and stress management for disease prevention.
- **Practical Approach:**
  - Organize community workshops on the benefits of natural therapies like hydrotherapy, mud therapy, and fasting.
  - Distribute educational materials on how natural methods can address common health issues like diabetes, hypertension, or obesity.

## Disease Prevention

- **Naturopathy Focus:** Strengthening the body's natural defenses through non-invasive techniques.
- **Practical Approach:**
  - Conduct screenings for lifestyle diseases and offer naturopathic interventions, such as detoxification programs.
  - Teach yoga and meditation in community centers to reduce the risk of chronic diseases.

## Management of Lifestyle Diseases

- **Naturopathy Focus:** Treating conditions like diabetes, hypertension, and obesity using natural diets, yoga, and other therapies.
- **Practical Approach:**
  - Establish naturopathy clinics in communities to offer personalized diet plans, herbal remedies, and therapies.
  - Use community gardens to promote organic food cultivation and healthy eating habits.

## Sanitation and Hygiene

- **Naturopathy Focus:** Highlighting the role of clean environments in health.
- **Practical Approach:**
  - Educate communities about natural cleaning agents and eco-friendly waste management practices.
  - Implement natural mosquito repellents and solutions for vector-borne diseases.

## School Health Programs

- **Naturopathy Focus:** Introducing healthy habits early.
- **Practical Approach:**
  - Train students in yoga and pranayama to improve mental and physical health.
  - Provide nutrition awareness sessions highlighting natural foods.

## Rehabilitation

- **Naturopathy Focus:** Helping individuals regain health through nature-based methods.
- **Practical Approach:**
  - Use naturopathy for addiction recovery programs (e.g., counseling combined with detox therapies and meditation).
  - Establish post-disease recovery camps utilizing hydrotherapy, massage, and other natural methods.

## Community-Based Research

- **Naturopathy Focus:** Studying the efficacy of natural therapies in public health.
- **Practical Approach:**
  - Conduct research projects on the impact of yoga or naturopathic diets on community health indicators.
  - Collaborate with local health authorities to integrate naturopathy in public health schemes.

#### 4.4 **Textbooks**

4.4.1 Textbook of Preventive and Social Medicine – JE Park & K Park

4.4.2 Textbook of Preventive and Social Medicine – BK Mahajan& MC Gupta

#### 4.5 **Reference Books**

## 5. YOGA PHILOSOPHY

### 5.1 Goals and Objectives

#### 5.1.1 **Goal:**

The goal of teaching *Yoga* philosophy to undergraduate students is to understand the intricacies of *Yoga* as a philosophy, its relation to ancient texts, other religious thoughts like Buddhism, with reference to *nyaya*, *vasistha*, *samkhya*, *mimamsa*, *Vedanta* and *PatanjaliYogasutras*.

#### 5.1.2 **Objectives:**

##### 5.1.2.1 **Knowledge:**

After the completion of the course, the student shall be able to:

- 5.1.2.1.1 Explain the basic understanding of *Yoga* as a philosophy
- 5.1.2.1.2 Describe the various schools of philosophy which had an influence on *Yogic text* like buddhism, *samkhya*, *mimamsa* etc.
- 5.1.2.1.3 Comprehend the concept of *brahman* according to *vedanta*

##### 5.1.2.2 **Skills:**

After the completion of the course, the student shall be able to:

- 5.1.2.2.1 Perform and demonstrate various *asanas*, *pranayamas*, *kriyas* and meditations;
- 5.1.2.2.2 Describe various philosophies of *Yoga* and apply them therapeutically, relating to a patient's life situation or personality.

##### 5.1.2.3 **Integration**

5.1 At the completion of training, the student should be able to comprehend the basic principles of *Yoga* and therapeutically apply them in his/her professional practice.

**5.2 Theory (Duration: 12 months)**

**Total hours: 350 (Theory: 150 Practical: 200)**

- 5.2.1 *Yoga*, its definition, its basis, its relation to philosophy and its application.
- 5.2.2 Ancient roots of *Yoga* – literature review on reference to *Yoga* in *Upanishads*, *Vedas*, *Smritis* and *Puranas*.
- 5.2.3 Buddhism – 4 main schools of Buddhist philosophy.
- 5.2.4 *Nyaya* – Nature of physical world, individual soul, liberation and concept of supreme soul in Indian philosophy, theory of Body, Mind, Life and Soul and its philosophical background.
- 5.2.5 *Vaisheshika* – Category of substance – *Nava dravyas*, category of quality – 24 gunas.
- 5.2.6 *Sankhya* – theory of cause and effect; *Prakriti*, *Purusa*; Process of evolution of universe; concept of liberation; Practical teachings of *Sankhya*.
- 5.2.7 *Mimamsa* – Major teachings of *Mimamsa* system; selfless action, nonattachment, self-control, self-discipline, daily schedule for psychophysical wellbeing, social awareness, sense of equality, unity with diversity, selectiveness.
- 5.2.8 *Vedanta* – Concept of *Atman*, *Brahma*, *Maya*, Universe, God; the self and human life; liberation and the means of attaining it.
- 5.2.9 *PatanjaliYogaSutras* – Samadhi Pada, SadhanaPada.
- 5.2.10 *AshtangaYoga* (8 limbs of *Yoga* - *Patanjali*).

5.2.11 Spiritual values of *pranayama* and *kriyas*, their methods, importance, rules and regulations, difference between breathing exercises and *Pranayama*.

5.2.12 **Practical**

5.2.13 Entire first year syllabus.

5.2.14 *Asanas*

5.2.14.1 Sitting

5.2.14.1.1 *Siddhasana*

5.2.14.1.2 *Bhadrasana*

5.2.14.1.3 *Samasana*

5.2.14.1.4 *Swastikasana*

5.2.14.1.5 *Simhasana*

5.2.14.1.6 *Ardha Matsyendrasana*

5.2.14.1.7 *Kurmasana*

5.2.14.1.8 *Mayurasana*

5.2.14.1.9 *Sirshasana*

5.2.14.1.10 *Akarna Dhanurasana*

5.2.14.1.11 *Parivarta Janusirshasana*

5.2.14.1.12 *Garbhasana*

5.2.14.1.13 *Tolangulasana*

5.2.14.1.14 *Badhakonasana*

5.2.14.1.15 *Upavistakonasana*

*5.2.14.2 Prone*

*5.2.14.2.1 Shalabhasana – 2 and 3*

*5.2.14.3 Supine*

*5.2.14.3.1 Yoganidrasana*

*5.2.14.3.2 Karnapeedasana*

*5.2.14.3.3 Naukasana*

*5.2.14.4 Standing*

*5.2.14.4.1 Ardha Katichakrasana*

*5.2.14.4.2 Parshvakonasana*

*5.2.14.4.3 Suptakonasana*

*5.2.14.4.4 Padangushtasana*

*5.2.14.4.5 Garudasana*

*5.2.14.4.6 Padahastasana (Advanced)*

*5.2.15 Pranayama*

*5.2.15.1 Surya anulomaviloma*

*5.2.15.2 Ujjayi*

*5.2.15.3 Bhramari*

*5.2.16 Kriya*

*5.2.16.1 VastraDhauti*

*5.2.16.2 Trataka – Jyoti&Bindu*

*5.2.16.3 Kapalabhati*

### 5.3 **Textbooks**

- 5.3.1 Basis and definitions of *Yoga* – Vivekananda Kendra
- 5.3.2 *Asanas* – Swami Kuvalyananda
- 5.3.3 The gospel of Buddha – Parul Caruso
- 5.3.4 The Gospel of Shri Ramakrishna – Mahendranath Gupta
- 5.3.5 Complete works of Shri Aurobindo
- 5.3.6 *Asanas, Pranayama, Bandhas, Mudras* – Swami Satyananda Saraswati
- 5.3.7 *Hatha YogaPradipika* – Swami Svamarama
- 5.3.8 Raja, Hatha, Jnana, Bhakti *Yoga* – Swami Vivekananda

### 5.4 **Scheme Of Examination**

S.N	Subject	Theo-ry	Intern-al Assm-t	Viva-Voce	Total	Practi-cals	Inter-nal Assm-t	Total Marks	Grand Total Marks
01.	Yoga Philosophy	80	20	30	130	60	10	70	200

## **6. BASIC PHARMACOLOGY**

### **6.1 Goals and Objectives**

#### **6.1.1 Goal:**

6.1.1.1 The goal of teaching Pharmacology to undergraduate students is to provide a comprehensive knowledge of scientific, evidence based treatment of diseases through drug administration.

#### **6.1.2 Objectives:**

##### **6.1.2.1 Knowledge:**

After the completion of the course, the student shall be able to:

6.1.2.1.1 Illustrate pharmacokinetics and pharmacodynamics of essential and common drugs

##### **6.1.2.2 Skills:**

After the completion of the course, the student shall be able to:

6.1.2.2.1 Be proficient in describing pharmacokinetics and pharmacodynamics of essential and common drugs

6.1.2.2.2 Observe medical ethics in his professional practice

##### **6.1.2.3 Integration**

At the completion of training, the student must be trained in medico legal responsibilities of physicians at all levels of health care as well as scientifically based clinical toxicology, being skilled in allied disciplines like Pathology, Radiology, Forensic Sciences, Hospital Administration, Medicine, Pharmacology, etc.

## 6.2 **Theory (Duration: 12 months)**

**Total hours: 100**

### 6.2.1 General Pharmacology

6.2.1.1 Nature and sources of drugs

6.2.1.2 Routes of administration

6.2.1.3 Absorption and bioavailability of a drug – factors affecting drug absorption and its bioavailability

6.2.1.4 Distribution of a drug in the body

6.2.1.4.1 Plasma concentration

6.2.1.4.2 Drug storage

6.2.1.4.3 Placental transfer

6.2.1.5 Fate of the drug

6.2.1.6 Drug excretion

6.2.1.7 Drug receptors

6.2.1.8 Mechanism of action of a drug – types of drug action

6.2.1.9 Adverse reaction to drug

6.2.1.10 Drug toxicity in man –

6.2.1.10.1 drug intolerance

6.2.1.10.2 hemopoietic toxicity

6.2.1.10.3 hepatotoxicity

6.2.1.10.4 nephrotoxicity

6.2.1.10.5 abnormalities of taste and smell

6.2.1.10.6 behavioral toxicity

- 6.2.1.10.7 production of a disease
- 6.2.1.10.8 electrolyte disturbances
- 6.2.1.10.9 endocrine disturbances
- 6.2.1.10.10 skin toxicity
- 6.2.1.10.11 carcinogenesis
- 6.2.1.10.12 teratogenicity
- 6.2.1.10.13 drug dependence

6.2.1.11 Factors modifying the effects of a drug

6.2.1.12 Role of a placebo

## **6.2.2** Brief description of the following drugs

(Their mode of action, dosage, adverse reaction, the method of tapering their dosage, including the adverse effects with the abrupt stoppage of their use)

## **6.2.3** Drugs acting on the CNS

6.2.3.1 General sedatives

6.2.3.2 Anticonvulsant drugs

6.2.3.3 Opioid and Non-Opioid analgesics

6.2.3.4 Analgesics, antipyretics and non-steroidal anti-inflammatory drugs (NSAID)

6.2.3.5 CNS stimulants – Xanthine alkaloids

6.2.3.6 Psychopharmacology

6.2.3.6.1 Anti-anxiety drugs – Meprobamate, Benzodiazepines,  
Chlormethiazole

- 6.2.3.6.2 Anti-depressant drugs – Classification, actions, adverse reaction  
(monoamine oxidase inhibitors, *tricyclic* compounds,  
carbamazepine, lithium)
- 6.2.3.6.3 Psychotogenic drugs – LSD, Mescaline, Cannabis
- 6.2.3.7 Local Anesthetics – adverse reactions
- 6.2.3.8 Drug action on ANS
  - 6.2.3.8.1 Skeletal muscle relaxants – Diazepam, Baclofen, Dantrolene
  - 6.2.3.8.2 Anti-Parkinsonian drugs – Levodopa, Amantadine
- 6.2.3.9 Biogenic Amines and Polypeptides
  - 6.2.3.9.1 Histamine and Antihistamine drugs
  - 6.2.3.9.2 Angiotensin, Kinins, Leukotrienes, Cytokines & PGs
- 6.2.3.10 Drugs used in Respiratory Disorders
  - 6.2.3.10.1 Expectorants, Central cough suppressants, antitussives, mucolytic  
agents
  - 6.2.3.10.2 Pharmacotherapy of bronchial asthma and rhinitis
    - 6.2.3.10.2.1 Drug therapy during an acute attack
      - 6.2.3.10.2.2 Prevention of acute attacks
      - 6.2.3.10.2.3 Treatment of acute severe asthma
      - 6.2.3.10.2.4 Treatment of acute respiratory failure
      - 6.2.3.10.2.5 Treatment of chronic persistent asthma
      - 6.2.3.10.2.6 Drug therapy of rhinitis

### 6.2.3.11 Cardiovascular drugs

6.2.3.11.1 Digitalis

6.2.3.11.2 Pharmacotherapy of cardiac arrhythmias – Sodium channel blockers, beta blockers, potassium channel blockers, calcium channel blockers

6.2.3.11.3 Pharmacotherapy of Hypertension – Clonidine, alpha methyldopa, Guanethidine, Reserpine, Phentolamine etc.

### 6.2.3.12 Drugs acting on Blood and blood forming organs

6.2.3.12.1 Drugs effective in iron deficiency anemia

6.2.3.12.2 Treatment of acute iron poisoning

### 6.2.3.13 Water, Electrolytes and drugs affecting Renal functions

6.2.3.13.1 Nutritional supplementation therapy

6.2.3.13.2 Diuretic and Anti-diuretic drugs

### 6.2.3.14 Drugs used in GIT disorders

6.2.3.14.1 Appetizers, Digestants, Carminatives, Appetite suppressants and agents lowering serum lipid

6.2.3.14.2 Emetics, drug therapy of vomiting and diarrhea

6.2.3.14.3 Pharmacotherapy of constipation

6.2.3.14.4 Pharmacotherapy of peptic ulcer

### 6.2.3.15 Chemotherapy

6.2.3.15.1 Sulfonamides, Cotrimaxazole, Nitrofurans

6.2.3.15.2 Penicillin, antibiotics effective against gram positive and negative organisms

6.2.3.15.3 Tetracyclines, chloramphenicol and antifungal agents

6.2.3.15.4 Chemotherapy of UTI, STD, Tuberculosis, Leprosy, Malaria,  
Amoebiasis, Viral infections, Helminthiasis, Malignancy

6.2.3.15.5 Antiseptics and Disinfectants

6.2.3.16 Drugs used in Endocrine disorders

6.2.3.16.1 Thyroid and antithyroidal drugs

6.2.3.16.2 Insulin and oral antidiabetic drugs

6.2.3.16.3 Adrenal cortical steroids

6.2.3.16.4 Gonadotropins, estrogens, progestins

6.2.3.16.5 Antifertility agents and ovulation including drugs

6.2.3.16.6 Drug therapy in lipidemia

6.2.3.16.7 Drug therapy in obesity

6.2.3.17 Therapeutic gases – oxygen carbon dioxide

6.2.3.18 Vitamins

6.2.3.19 Immunotherapy, immuno-suppressants and immune-stimulants

**NOTE: All the drugs mentioned in the syllabus are strictly for understanding drug reactions and NOT to be prescriptive in nature. Students, after graduation are not expected to prescribe any of the above-mentioned medication.**

### **6.3 Textbooks**

6.3.1 Pharmacology and Pharmacotherapeutics – RS Satoskar, SD Bhandarkar, SS

Ainapure

6.3.2 Essentials of Medical Pharmacology – KD Tripathi

6.3.3 Pharmacology – Rang and Dale

**6.4 Scheme Of Examination**

S.No	Subject	Theory	Internal Assmt	Viva-Voce	Total	Practicals	Internal Assmt	Total Marks	Grand Total Marks
01.	Basic Pharmacology	80	20	50	150	----- ---	----- ---	----- ---	----- ---

## **7. Colour Therapy and Magneto biology**

### **7.1 Goals and Objectives**

#### **7.1.1 Goal:**

The goal of teaching Colour therapy and Magneto biology to undergraduate students is to provide them with comprehensive understanding of philosophy, science and modes of applications of colours and magnets in preventive, curative and rehabilitative therapy.

#### **7.1.2 Objectives:**

##### **7.1.2.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 7.1.2.1.1 Demonstrate basic understanding of principles along which colours and magnets can be used as therapeutic agents, along with history of therapeutic uses of colours and magnets;
- 7.1.2.1.2 Understand bio-magnetism, electro-magnetism, properties of magnets, mechanisms of action of magnets on the human body, magnetic overload, charging, modes of application, etc. and apply this knowledge to therapeutically use magnets;
- 7.1.2.1.3 Be aware of the contraindications and harmful effects of colours and magnets;
- 7.1.2.1.4 Illustrate classification of colours, physics of light, electromagnetic spectrum, pathway of vision, human aura, chakras, heliotherapy, colour breathing, chromo charging, and latest research, applying the same to disease management;

### **7.1.2.2 Skills:**

After the completion of the course, the student shall be able to:

- 7.1.2.2.1 Diagnose various diseases and disorders of the body and mind using the principles of colour diagnosis;
- 7.1.2.2.2 Outline and implement a plan of treatment using colours and magnets as therapeutic tools
- 7.1.2.2.3 Evaluate the therapeutic values of colours and magnets in treatment of various diseases
- 7.1.2.2.4 Utilise latest research finding in improving his/her professional practice

### **7.1.2.3 Integration**

At the completion of training, the student should be able to comprehend the basic principles of Colour therapy and Megneto biology and therapeutically apply them in his/her professional practice.

## **7.2 Theory (Duration: 12 months)**

**Total hours: 150 (Theory: 100 Practical: 50)**

### **7.2.1 Magnetobiology**

- 7.2.1.1 Definitions of magneto therapy
- 7.2.1.2 Historical highlights
- 7.2.1.3 Vedic references related to magneto therapy

#### 7.2.1.4 Biomagnetism

7.2.1.4.1 Effects on plants , birds and animals.

7.2.1.4.2 Effects on mankind

#### 7.2.1.5 Principles electromagnetism

#### 7.2.1.6 Types of magnets

7.2.1.6.1 Natural

7.2.1.6.2 Artificial

7.2.1.6.2.1 Permanent

7.2.1.6.2.2 Electromagnets

#### 7.2.1.7 Classification of magnets according to

7.2.1.7.1 Power

7.2.1.7.2 Shapes

7.2.1.7.3 Clinical use

#### 7.2.1.8 Physical properties of magnets

7.2.1.8.1 Magnetic permeability

7.2.1.8.2 Ferromagnetic materials

7.2.1.8.3 Antiferromagnetic materials

7.2.1.8.4 Paramagnetic materials

7.2.1.8.5 Diamagnetic materials

#### 7.2.1.9 Measurement of magnetic field

#### 7.2.1.10 Mechanism of action of magnets in the body

#### 7.2.1.11 Properties effects and corresponding features of north & south poles

#### 7.2.1.12 Maintenance of permanent magnets

7.2.1.13 Magnetic field deficiency syndrome

7.2.1.14 Magnetic overload

7.2.1.15 Earth as a huge magnet

7.2.1.16 Effect of biomagnetism in various organ systems

7.2.1.17 Modes of application of magnets

7.2.1.17.1 General

7.2.1.17.2 Local

7.2.1.17.3 Different kinds of magnetic devices used in application of therapy

7.2.1.18 Magnetic charging , mechanism, dosage and its effect and limitations

7.2.1.18.1 Water, oil, milk, honey

7.2.1.19 Magnetic therapy through shad chakras

7.2.1.20 Contraindications, complications, and limitations of magneto therapy.

7.2.1.21 Harmful effects of EMF and measures for minimizing it.

**7.2.1.22 Reference Books:**

7.2.1.22.1 The book of magnetic Healing by Roger Coghill

7.2.1.22.2 Magnet therapy – by Ghanashyamsingh Birla and Colette Hemlin

**7.2.2 Colour Therapy**

7.2.2.1 Definition

7.2.2.2 Historical highlights

7.2.2.2.1 Ghadiyali's principle

7.2.2.2.2 Babbitt postulates

7.2.2.2.3 Modern history of color therapy

- 7.2.2.3 Classification of colors
- 7.2.2.4 How do rainbows form
- 7.2.2.5 Physics of light
- 7.2.2.6 Electromagnetic spectrum
- 7.2.2.7 Pathway of vision and color sensing
- 7.2.2.8 The human aura and colors
- 7.2.2.9 Relation of colors with shad chakras
- 7.2.2.10 Impact of color sense on emotions and psychology
- 7.2.2.11 Therapeutic effect of colors
- 7.2.2.12 Heliotherapy –
  - 7.2.2.12.1 Health benefits
  - 7.2.2.12.2 Physiological and chemical properties of sunlight
  - 7.2.2.12.3 modes of application, plantain leaf sun bath, chromothermoleum
  - 7.2.2.12.4 Procedure, precaution, indication and limitations.
  - 7.2.2.12.5 Dr. Rikli’s method of Sun bath , Dr .Kuhne’s method of sun bath
- 7.2.2.13 Advanced colour therapy
  - 7.2.2.13.1 Photochemotherapy
  - 7.2.2.13.2 Photobiological coloured lighting to produce immunoregulation
- 7.2.2.14 Color breathing
- 7.2.2.15 Chromo charging of water, oil honey and food stuffs. And their effect on health and disease.
- 7.2.2.16 Limitation and contraindications of chromo therapy
- 7.2.2.17 Research updating related to chromo therapy

### **7.2.2.18 Reference Books:**

- 7.2.2.18.1 Color therapy - Jonathan Dee and Lesley Taylor
- 7.2.2.18.2 Healing with color –Theo Gimbel
- 7.2.2.18.3 The power of color – Dr.Marton Walker

### **7.3 Practical**

- 7.3.1 Procedural standards / guidelines for application of magnets
- 7.3.2 General application – lead system of application
- 7.3.3 Local application
  - 7.3.3.1 high power magnets
  - 7.3.3.2 Medium power magnets
  - 7.3.3.3 Low power magnets
  - 7.3.3.4 Specialized magnetic devices

#### **Tools and Equipment**

- 1. Using Therapeutic Magnets:**
  - o Placement techniques for various conditions.
  - o Types of magnetic belts, pads, and bracelets.
- 2. Introduction to Magnetic Field Generators:**
  - o Low-frequency magnetic field devices.
  - o Application in clinical settings.

#### **Safety and Precautions**

1. Contraindications of magneto therapy.
2. Guidelines for sensitive individuals (e.g., pregnant women, pacemaker users).

#### **Case Studies and Practice**

1. Simulated therapy sessions for various health conditions.
2. Assessment and refinement of techniques.
3. Simulated therapy sessions.
4. Designing treatment plans for common ailments.
5. Evaluating results and feedback.

**7.3.4** Case documentation and application of magneto biology and color therapy - at least 20 cases

#### 7.4 Scheme Of Examination

S.No	Subject	Theo-ry	Intern-al Assm-t	Viva-Voce	Total	Practi-cals	Inter-nal Assm-t	Total Marks	Grand Total Marks
01	ColourTherap yand Magneto Biology	80	20	30	130	60	10	70	200

## **8. FORENSIC MEDICINE AND TOXICOLOGY (Duration: 12 Months)**

**Total hours: 100 (Theory: 100)**

### **8.1 Goals and Objectives**

#### **8.1.1 Goal:**

The goal of teaching Forensic Medicine and Toxicology to undergraduate students is to provide a comprehensive knowledge of medico-legal responsibilities in the practice of medicine. He/she learns about law with respect to medical practice, medical negligence and respect for codes of medical ethics.

#### **8.1.2 Objectives:**

##### **8.1.2.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 8.1.2.1.1 Outline basic medico-legal aspects of hospitals and general practice;
- 8.1.2.1.2 Define medico-legal responsibilities of a general physician working in a rural primary health center or an urban health center.

##### **8.1.2.2 Skills:**

After the completion of the course, the student shall be able to:

- 8.1.2.2.1 Observe and infer well, to enquire in criminal and medico-legal matters;
- 8.1.2.2.2 Diagnose and manage acute poisoning and chronic toxicity;

8.1.2.2.3 Be proficient in post mortem examinations including interpretation of findings

8.1.2.2.4 Observe medical ethics in his professional practice

### **8.1.2.3 Integration**

At the completion of training, the student must be trained in medico legal responsibilities of physicians at all levels of health care as well as scientifically based clinical toxicology, being skilled in allied disciplines like Pathology, Radiology, Forensic Sciences, Hospital Administration, Medicine, Pharmacology, etc.

## **8.2 Theory**

### **8.2.1 Forensic Medicine**

8.2.1.1 Definition and scope of forensic medicine

8.2.1.2 Procedure of giving medical evidence with reference to Indian evidence act

8.2.1.3 Methods of identification of living and dead body, race, age, sex etc

8.2.1.4 Death – medico-legal aspects, certification of death, sudden death, causes, medico-legal importance of signs of death, changes due to death and calculating time of death

8.2.1.5 Medico-legal autopsy

8.2.1.6 Medico-legal wounds, their classification and study and Medico-legal aspects

8.2.1.7 Examination of blood stains, hair and seminal stains

8.2.1.8 Miscellaneous causes of death from heat, cold, electricity, starvation etc.

8.2.1.9 Violent asphyxia deaths – hanging, strangulation, suffocation, and drowning

- 8.2.1.10 Sexual offences – impotency and sterility, virginity, legitimacy, unnatural offences, medico-legal aspects
  - 8.2.1.11 Infanticide
  - 8.2.1.12 Medico-legal aspects of insanity
  - 8.2.1.13 Forensic psychiatry
  - 8.2.1.14 Definition, police inquest, difficulties in detection of crime, legal procedure in criminal courts and their powers oath, medical evidence, medical certificate, dying declaration
  - 8.2.1.15 Rules of giving evidence, professional secrecy
  - 8.2.1.16 Postmortem examinations
  - 8.2.1.17 Death – signs of death, cadaveric rigidity and spasm, putrefaction, estimation of time since death
  - 8.2.1.18 Death from asphyxia, differences between hanging and strangulation, suffocation and drowning
  - 8.2.1.19 Death from burns, scalds and lightning
  - 8.2.1.20 Rape and unnatural offences
  - 8.2.1.21 Abortion, pregnancy and delivery, miscarriage
  - 8.2.1.22 Laws in relation to a medical man, medical ethics, duties, professional privilege and responsibilities
- 8.2.2 Toxicology**
- 8.2.2.1 General considerations of poisoning and classification
    - 8.2.2.1.1 Actions of poison, factors, modifying their action
    - 8.2.2.1.2 Diagnosis of poisoning

- 8.2.2.1.3 Treatment of poisoning in general
- 8.2.2.2 Poisons
  - 8.2.2.2.1 Corrosives
  - 8.2.2.2.2 Non-metallic poisons
  - 8.2.2.2.3 Insecticides and weed killers
  - 8.2.2.2.4 Metallic poisons
  - 8.2.2.2.5 Organic irritant poisons
  - 8.2.2.2.6 Somniferous poisons
  - 8.2.2.2.7 Inebriant poisons
  - 8.2.2.2.8 Deliriant poisons
  - 8.2.2.2.9 Drug dependence
  - 8.2.2.2.10 Food poisoning
  - 8.2.2.2.11 Spinal poisons
  - 8.2.2.2.12 Cardiac poisons
  - 8.2.2.2.13 Asphyxiants
  - 8.2.2.2.14 Miscellaneous
- 8.2.2.3 Legal responsibilities – Medical Ethics
- 8.2.2.4 Responsibilities and duties of medical practitioners to the State, professional secrecy and privileged communication
- 8.2.2.5 Unprofessional conduct, malpractice
- 8.2.2.6 The rights and privileges and duties of medical practitioners
- 8.2.2.7 The functions of state medical council and its relationship to IMC
- 8.2.2.8 Medical ethics approved by IMC

### **8.3 Practical**

- 8.3.1 Age estimation
- 8.3.2 Autopsies – 10
- 8.3.3 Skeleton remains
- 8.3.4 Spotters
- 8.3.5 Examination of injured
- 8.3.6 Alcoholic
- 8.3.7 Psychiatric
- 8.3.8 Toxicology

### **8.4 Textbooks**

- 8.4.1 Medical Jurisprudence – Modi
- 8.4.2 A textbook of Forensic Medicine – Narayana Reddy
- 8.4.3 A textbook of Forensic Medicine – MRK Krishna

### **8.5 Reference Books**

- 8.5.1 The essentials of Forensic Medicine – Dr. CJ Polson, DJ Gee and B. Knight
- 8.5.2 Forensic Medicine – Corden and Shapiro
- 8.5.3 Principles and practice of Medical Jurisprudence – Taylor's

**8.6 Scheme Of Examination**

## **9. MANIPULATIVE THERAPIES**

### **9.2 Goals and Objectives**

#### **9.2.1 Goal:**

The goal of teaching Manipulative Therapies to undergraduate students is to provide them with comprehensive understanding of science and modes of applications of different manipulative modalities like Massage, Chiropractic, Osteopathy, Aromatherapy in preventive, curative and rehabilitative therapy.

#### **9.2.2 Objectives:**

##### **9.2.2.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 9.2.2.1.1 Understand the principles and historical highlights of massage and manipulative techniques;
- 9.2.2.1.2 Demonstrate basic understanding of principles and procedures of different types of massage, their physiological effects, indications, and contraindications;
- 9.2.2.1.3 Delineate the principles and procedures of various manipulative therapies like chiropractic, osteopathy, reflexology and aromatherapy;
- 9.2.2.1.4 Describe essential oils with respect to the extraction, uses and combinations that are therapeutically used;

### **9.2.2.2 Skills:**

After the completion of the course, the student shall be able to:

9.2.2.2.1 Perform different types of massage and manipulative therapies, such as Osteopathy, Chiropractic, Aromatherapy, Swedish massage, Kellogg's massage, Shiatsu, Geriatric Massage, Pediatric massage, Antenatal massage, Ayurvedic massage, etc;

9.2.2.2.2 Use therapies such as Reflexology and Zone therapy in their professional practice for musculoskeletal disorders, etc.

### **9.2.2.3 Integration**

At the completion of training, the student should be able to comprehend the basic principles of Manipulative Therapies and apply it in clinical practice.

## **9.3 Theory (Duration: 12 Months)**

Total hours: 250 (Theory: 150 Practical: 100)

**9.3.1** Introduction and historical highlights of Massage and Manipulative Techniques

**9.3.2** Classification of (lubricants) massage

**9.3.2.1** Basic Therapeutic massage (Swedish) techniques – procedure, indications, contraindications, physiological action

**9.3.2.2** Joint movements in massage therapy

**9.3.2.3** Massage to local areas

**9.3.3** Professional standards of massage professionals

**9.3.4** Physiological effects, indications, contraindications of massage in various organ systems

- 9.3.5 Kellogg's massage
- 9.3.6 Shiatsu
- 9.3.7 Pediatric massage
- 9.3.8 Geriatric massage
- 9.3.9 Massage for antenatal care
- 9.3.10 Ayurvedic massage – terminology, procedure and manipulations
- 9.3.11 *Panchakarma* in brief
- 9.3.12 Chiropractic
  - 9.3.12.1 History
  - 9.3.12.2 Importance of spine in chiropractic
  - 9.3.12.3 Physiological effect
  - 9.3.12.4 Chiropractic examination
  - 9.3.12.5 Spinal manipulative therapy
  - 9.3.12.6 Treatment for various diseases
- 9.3.13 Osteopathy
  - 9.3.13.1 Definition
  - 9.3.13.2 History
  - 9.3.13.3 Basic principles
  - 9.3.13.4 Relation of osteopathy to musculoskeletal system
- 9.3.14 Basic principles and procedure of different types of massage – Thai, Balanese, Hot-stone massage, dry brush massage, deep tissue massage, powder massage, vibrator massage etc.

### **9.3.15 Aromatherapy**

#### **9.3.15.1 Definition, Origin and History**

#### **9.3.15.2 Essential Oils**

##### 9.3.15.2.1 Types

9.3.15.2.2 Extraction – Distillation, cold pressing or expression, solvent extraction

9.3.15.2.3 Storage of essential oils

9.3.15.2.4 How to recognize an essential oil

9.3.15.2.5 How to select aroma oils

9.3.15.2.6 How essential oils work

9.3.15.2.7 Carrier oils – Almond oil, Apricot kernel oil, Avocado oil, Carrot oil, Corn oil, Primrose oil, Grape seed Oil, Hazelnut oil, Jojoba oil, Olive oil, Peanut oil, Safflower oil, Sesame oil, Soya bean oil, Sunflower oil

**9.3.15.3** Different methods of using essential oils – Inhalation, Diffusers, Vaporizers, Massage, Baths, Foot bath, Potpourri, Compresses, Oral intake, Beauty treatment, Room sprays, Insect repellants etc.

#### **9.3.15.4 Description of different essential oils and their benefits**

9.3.15.4.1 Amrette seed, Aniseed, Angelica, Basil, Bergamot, Black Pepper, Camphor, Cardamom, Chamomile, Clove bud, Cedar wood, Cypress, Clay sage, Eucalyptus, Fennel, Frankincense, Geranium, Ginger, Juniper berry, Lavender, Lemon, Lemongrass, Marjoram, Neroli, Orange, Palma Rosa, Peppermint, Patchouli, Pine, Rose,

Rosemary, Sandalwood, Tarragon, Tea tree, Thyme (white),  
Vetiver, Ylang Ylang

**9.3.15.5** The best essential oils

9.3.15.5.1 5 fragrance categories – green, floral, citrus, woody and spicy

9.3.15.5.2 Mixing of aroma oils, equipment required for mixing oils

**9.3.15.6** Precautions for use of aroma oils – Skin patch test, testing essential oils in its pure state

**9.3.15.7** Ill effects of aroma oils – in eyes, toxic effects, allergic effects etc.

**9.3.15.8** Careful handling of essential oils

**9.3.15.9** Contraindications

9.3.15.9.1 Oils to be avoided – Phototoxic or photosensitive oils, oils to be avoided in pregnancy, oils that cause skin irritation etc.

**9.3.16** Reflexology and Zone therapy

**9.3.16.1** What is Reflexology, history and development

**9.3.16.2** How does it work

**9.3.16.3** Body and its reflex zones

**9.3.16.4** Applications, indications and contra-indications

**9.3.16.5** Preventive effects of reflexology

**9.3.17** Milestones of females and its management through massage

**9.4 Practical**

**9.4.1** 10 full body massages

**9.4.2** 35 partial massages

**9.4.3** 10 Panchakarma demonstration Identification of different oils

#### 9.4.4 Demonstration of different methods of application

9.4.4.1 Inhalation

9.4.4.2 Compress

9.4.4.3 Diffuses

#### 9.4.5 Local baths

#### 9.4.6 Hands-On Techniques

9.4.7 **Joint Mobilization and Manipulation:** Techniques to improve mobility and reduce pain.

9.4.8 **Soft Tissue Techniques:** Includes massage, myofascial release, and trigger point therapy.

9.4.9 **Stretching and Range of Motion Exercises:** Used to restore flexibility and prevent stiffness.

#### 9.4.10 Equipment and Tools

9.4.11 **Adjustable Treatment Tables:** Designed to facilitate proper body mechanics.

9.4.12 **Therapy Tools:** Such as foam rollers, massage balls, and handheld instruments like Graston tools.

9.4.13 **Thermal Packs:** Heat or cold therapy to prepare tissue for manipulation.

#### 9.4.14 Training Resources

9.4.15 **Books and Manuals:** Texts like *Orthopedic Physical Assessment* or *Principles of Manual Therapy*.

9.4.16 **Workshops and Certification Courses:** Hands-on programs focusing on specific techniques like spinal adjustments or craniosacral therapy.

9.4.17 **Online Tutorials and Case Studies:** Videos or simulations to practice assessments and interventions.

#### 9.4.18 Skills Development

9.4.19 **Anatomy Knowledge:** Deep understanding of musculoskeletal and nervous systems.

9.4.20 **Palpation Skills:** Accurate identification of tissues and structures.

9.4.21 **Patient Communication:** To explain procedures and ensure comfort.

#### 9.4.22 Safety and Ethics

9.4.23 **Contraindications Awareness:** Conditions where manipulative therapy should not be used, e.g., severe osteoporosis, fractures, or infections.

9.4.24 **Informed Consent:** Clear communication about treatment risks and benefits.

9.4.25 **Continuing Education:** Staying updated on evidence-based practices.

9.4.26 Are you looking for guidance on a specific technique or type of therapy?

### 9.5 **Textbooks**

9.5.1 Massage – George Downing

9.5.2 Massage Therapy – Dr. JH Kellogg

- 9.5.3 Massage – Constant Young
- 9.5.4 The Complete Book of Massage – Claire Maxwell Hudson
- 9.5.5 Step-by-Step Massage – Carole McGilvery
- 9.5.6 All You Wanted to Know About Aromatherapy – Lalita Sharma
- 9.5.7 Aromatherapy – Julie Sadler
- 9.5.8 *Ayurveda* & Aromatherapy – Dr. Light Miller & Dr. Bryan Miller.

## 9.6 **Reference Books**

- 9.6.1 Massage Therapy – Susan G. Salvo
- 9.6.2 Magic of Massage – Tanushree Podder
- 9.6.3 Art of massage – Dr John Harvey Kellogg

### 9.7 Scheme Of Examination

S.No	Subject	Theory	Internal Assmt	Viva-Voce	Total	Practicals	Internal Assmt	Total Marks	Grand Total Marks
01.	Manipulative Therapies	80	20	30	130	60	10	70	200

## **10. ACUPUNCTURE AND ACUPRESSURE (Duration:12 Months)**

**Total hours: 200(Theory:100 Practical:100)**

### **10.1 Goals and Objectives**

#### **10.1.1 Goal:**

The goal of teaching acupuncture to undergraduate students is to provide them with a comprehensive understanding of the science and art of Acupuncture, Acupressure and related therapies.

#### **10.1.2 Objectives:**

##### **10.1.2.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 10.1.2.1.1 Illustrate the definitions of Acupuncture;
- 10.1.2.1.2 Understand the principles and historical highlights of Acupuncture;
- 10.1.2.1.3 Explain the concepts and theories behind the mechanism in which Acupuncture works, both traditional and modern
- 10.1.2.1.4 Demonstrate basic understanding of procedures of different styles of Acupuncture and related therapeutic modalities, such as Traditional Acupuncture, Scalp Acupuncture, Auriculotherapy, Acupuncture Anaesthesia, Reflexology, Zone Therapy, Acupressure, etc;
- 10.1.2.1.5 Describe basic and advanced tools used in Acupuncture;

10.1.2.1.6 Be aware of the contraindications and dangers of Acupuncture, so as to avoid these in his/her professional practice;

#### **10.1.2.2 Skills:**

After the completion of the course, the student shall be able to:

10.1.2.2.1 Diagnose common diseases and disorders using diagnostic techniques employed in Acupuncture, such as Tongue Diagnosis, Pulse Diagnosis, etc;

10.1.2.2.2 Demonstrate skill in topographically locating meridians and Acupuncture points on the human body;

10.1.2.2.3 Perform Needling and other essential skills in delivering Acupuncture therapy to a patient;

10.1.2.2.4 Plan, implement and evaluate Acupuncture sessions with expertise in his/her professional practice;

#### **10.1.2.3 Integration**

At the completion of training, the student should be able to comprehensively understand traditional and modern approaches to Acupuncture and effectively utilise the same in preventive, promotive, curative and rehabilitative clinical practice as well as research projects.

### **10.2 Theory**

**10.2.1** Definition, concepts of Acupuncture

**10.2.2** Traditional and modern theories of Acupuncture

**10.2.3** Materials and methods of Acupuncture

- 10.2.4** Principles of Acupuncture
- 10.2.5** Rules for the selection of Acupuncture points
- 10.2.6** Contraindications and complications of Acupuncture
- 10.2.7** The concept of Meridians:
  - 10.2.7.1 Lung Meridian (Lu)
  - 10.2.7.2 Large intestine Meridian (LI)
  - 10.2.7.3 Spleen Meridian (Sp)
  - 10.2.7.4 Stomach Meridian (St)
  - 10.2.7.5 Heart Meridian (H)
  - 10.2.7.6 Small intestine meridian (SI)
  - 10.2.7.7 Urinary bladder meridian (UB)
  - 10.2.7.8 Kidney Meridian (K)
  - 10.2.7.9 Triple warmer meridian (TW)
  - 10.2.7.10 Gall bladder meridian (GB)
  - 10.2.7.11 Liver Meridian (Liv)
  - 10.2.7.12 Governing vessel Meridian (GV)
  - 10.2.7.13 Conceptional vessels Meridian (CV)
  - 10.2.7.14 Extra Meridians
- 10.2.8** The extra-ordinary points
- 10.2.9** Examination methods of Traditional Chinese Medicine
- 10.2.10** Auriculotherapy

10.2.11 Scalp acupuncture

10.2.12 Moxibustion

10.2.13 Types of Stimulation in Acupuncture

10.2.13.1 Manual stimulation

10.2.13.2 Electro acupuncture

10.2.14 Acupuncture Therapeutics

10.2.15 Acupuncture Anesthesia

10.2.16 Reflexology & Zone Therapy

10.2.16.1 What is reflexology, history and development

10.2.16.2 How does reflexology work

10.2.16.3 Body & its reflex zones

10.2.16.4 Applications, indications and contra-indications Preventive effects of reflexology

10.2.17 Acupressure

10.2.17.1 What is Acupressure

10.2.17.2 Origin & development

10.2.17.3 Physiological effects

10.2.17.4 Therapeutic uses of Acupressure

### 10.3 **Practicals**

10.3.1 Demonstration of needling techniques and electro-stimulation, Moxibustion.

10.3.2 Each student should give treatment for at least 20 patients during the practical.

#### **10.4 Reference Books :-**

- 10.4.1 Clinical Practice of Acupuncture - A.L. Aggarwal
- 10.4.2 Clinical Acupuncture - Dr. Anton Jayasurya
- 10.4.3 Principles and Practice of Acupuncture - Dr. J.K. Patel
- 10.4.4 Health in Your Hands - DevendraVora
- 10.4.5 Clinical Acupuncture and Moxibustion - Liu Gong Wang
- 10.4.6 Fundamentals of Acupuncture and Moxibustion - Liu Gong Wang/Akira Hyodo.
- 10.4.7 Advanced Acupuncture Therapy - Arjun L Agarwal, Govind N Sharma
- 10.4.8 Classical Acupuncture - The Standard Textbook - Poret. Hemen, the China Academy
- 10.4.9 Reiki
  - 10.4.9.1 Empowerment through Reiki - Paula Horan
  - 10.4.9.2 Reiki - Energy Medicine - Libby Barnett & Maggie Chambers with Susan Davidson
- 10.4.10 Pranic Healing
  - 10.4.10.1 Pranic healing using Breathing with Healing Mantras - Dr. L.R. Chowdhry
  - 10.4.10.2 Advanced Pranic Healing- Choa Kok Sui
  - 10.4.10.3 The Ancient Science and Art of Pranic Crystal Cleaning- Choa Kok Sui.

### 10.5 Scheme Of Examination

S.No	Subject	Theo-ry	Inter-Nal Assmt	Viva-Voce	Total	Practi-cals	Inter-Nal Assmt	Total Marks	Grand Total Marks
01.	Acupuncture & Acupressure	80	20	30	130	60	10	70	200

## **11. YOGA AND ITS APPLICATIONS (Duration: 12 Months)**

**Total hours: 200 (Theory: 100 Practical: 100)**

### **11.1 Goals and Objectives**

#### **11.1.1 Goal:**

The goal of teaching *Yoga* and its applications to undergraduate students is to provide them with comprehensive understanding of *Yoga* with reference to traditional texts like *PatanjaliYogasutras*, *Hatha YogaPradipika*, *Shiva samhita*, *Gheranda samhita* and *Swara Yoga*; various streams of *Yoga*, advanced meditative techniques like *Yoganidra*, *Omkar*, *Cyclic*, *Vipassana* and learn about benefits of *Yoga* as compared to exercise.

#### **11.1.2 Objectives:**

##### **11.1.2.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 11.1.2.1.1 Illustrate the knowledge of traditional texts like *Patanjali Yoga Sutras*, *Hatha Yoga*, *Shiva Samhita* and *Gheranda Samhita*;
- 11.1.2.1.2 Understand the principles behind various meditative practices like *Yoganidra*, *Om* meditation, *cyclic* meditation, *Vipassana* and so on;
- 11.1.2.1.3 Explain about *Yoga* in relation to its application in education, sports;
- 11.1.2.1.4 Demonstrate basic understanding of procedures of stretching and exercises;

11.1.2.1.5 Describe basic physiological changes of *asanas*

11.1.2.1.6 Be aware of the effects of shat *kriyas* and their adverse effects.

#### **11.1.2.2 Skills:**

After the completion of the course, the student shall be able to:

11.1.2.2.1 Describe the concept of *Yoga* as explained in the traditional texts;

11.1.2.2.2 Deliver a meditative session using any of the meditative styles;

11.1.2.2.3 Implement various exercises loosening or eye exercises or stretching to complement *Yoga* practice.

#### **11.1.2.3 Integration**

At the completion of training, the student should be able to comprehensively understand traditional approaches to *Yoga* and employ the same for therapeutic purposes.

### **11.2 Theory**

11.2.1 *PatanjaliYogaSutras* – First two chapters (i.e. *Samadhi Pada* and *SadhanaPada*, brief summary of *VibhutiPada* and *Kaivalyapada*)

11.2.2 *Hatha YogaPradipika* – full text with necessary reference to *GherandaSamhita* and *Siva Samhita*

11.2.2.1 Description of practice of *asanas*: Verses – 15, 16, 17, 32, 34, 35, 38, 44, 47, 48, 50, 51, 53, 54, 57, 58, 59, 62, 63, 64, 65, 67

11.2.2.2 Description of practice of *pranayama*: Verses – 2, 3, 5-12, 14, 16-20, 22, 24, 26-32, 34-37, 39, 40, 44-51, 54, 57, 59

11.2.3 Introduction to other streams of *Yoga* - *Kundalini*, *Tantra*, *Swaraand Kriya*

11.2.4 *Yoganidra*- methods, applications, effects and benefits

11.2.5 Meditation – types –*omkar*,*cyclic*,*vipassana*etc. methods of application, benefits, precaution, its influence on health and disease

11.2.6 *Yoga* – in relation to personality and education

11.2.7 *Yoga* – in relation to sports and games, social and political life

11.2.8 Eye exercises – benefits, methods, precautions

11.2.9 Physiological aspects of *asana*

11.2.10 Physiological, neurophysiological aspects of *pranayama*

11.2.11 *Shatkriyas* – comparative study of *shat kriyas*with other systems of medicine

11.2.12 Physiological aspects of exercises

11.2.13 Physical exercises for health and fitness

11.2.13.1 Introduction

11.2.13.2 Who should stretch

11.2.13.3 When to stretch

11.2.13.4 Why to stretch

11.2.13.5 How to stretch

11.2.13.6 Relaxing stretches for back, legs, feet and ankles; hips, hamstrings,

low back

11.2.13.7 Stretching exercises for elderly

11.2.13.8 Stretching exercises for abdominal muscles, arms, chest, ankles,  
legs, knee, thigh, forearm etc

11.2.13.9 Techniques of walking, running, cycling etc

11.2.13.10 Caring for the back

### 11.3 **Practical**

11.3.1 All previous years' asana plus – *veerasana, koormasana, kukkutasana, utthankoormasana, matsyendrasana, padmamayurasana, simhasana, sarvangasana* (all variants), *sirsasana*(all variants)

11.3.2 All loosening (*Sithilikarana Vyayama*) and breathing exercises

11.3.3 All previous years' *Pranayama* plus – *suryabhedana, Chandra bhedana*, cat and tiger breathing, new variants of *pranayama*

11.3.4 All previous years' *Kriyas* plus – *Dandadhouti, agnisara, nauli, bandhas, mudras*

### 11.4 **Textbooks**

11.4.1 Autobiography of a Yogi – ParamahansaYogananda

11.4.2 *Yoga* as Philosophy and Religion – SN Dasgupta

11.4.3 *Yoga* – the Science of Holistic Siving – VK *Yoga*

11.4.4 A Complete Illustrated Book of *Yoga* – Swami Vishnu

11.4.5 Encyclopedia of Indian Physical Culture – DC Mujumdar

11.4.6 Preksha Meditation – Acharya Tulsi

### 11.5 Scheme Of Examination

S.No	Subject	Theo -ry	Inter- Nal Assmt	Viva- Voce	Total	Practi- cals	Inter- Nal Assmt	Total Marks	Grand Total Marks
01.	Yoga & its Applications	80	20	30	130	60	10	70	200

## **12. NUTRITION AND MEDICINAL HERBS**

### **12.1 Goals and Objectives**

#### **12.1.1 Goal:**

The goal of teaching Nutrition and Medicinal Herbs to undergraduate students is to enable them to analyse nutritional profiles of their patients and prescribe diets to them based on nutritional requirements, as well as use herbs in the management of various diseases.

#### **12.1.2 Objectives:**

##### **12.1.2.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 12.1.2.1.1 Describe fundamentals of nutrition, with respect to different nutrients and food groups;
- 12.1.2.1.2 Illustrate details of nutritional requirements for different age groups, as well as pregnant and lactating women;
- 12.1.2.1.3 Demonstrate therapeutic application of nutrition for common diseases;
- 12.1.2.1.4 Compare modern nutrition to traditional Naturopathic diets;
- 12.1.2.1.5 Have detailed knowledge of recent advances and studies, such as carcinogens in food, food additives, contaminants, etc;
- 12.1.2.1.6 Illustrate the use of specific herbs in common diseases, with therapeutic values;

### **12.1.2.2 Skills:**

After the completion of the course, the student shall be able to:

12.1.2.2.1 Assess the nutritional status of a patient;

12.1.2.2.2 Plan, implement and evaluate nutritional advice for people of different ages and patients of different diseases, including the use of herbs.

### **12.1.2.3 Integration**

At the completion of training, the student should be able to comprehensively integrate traditional Naturopathic nutrition and modern nutritional along with herbs, and employ the same for therapeutic purposes.

## **12.2 Theory (Duration: 12 Months)**

**Total hours: 250 (Theory: 150 Practical: 100)**

### **12.2.1 Nutrition**

12.2.1.1 Definition of food, nutrition, nutrient and diet

12.2.1.2 What is nutrition healing

12.2.1.3 Defining essential nutrients

12.2.1.4 Proteins and amino acids

12.2.1.5 Carbohydrates

12.2.1.6 Lipids, sterols and their metabolism

12.2.1.7 Energy needs: assessment and requirements in humans

12.2.1.8 Electrolytes, water and acid-base balance

- 12.2.1.9 Minerals – calcium, phosphorous, magnesium, iron zinc, copper, iodine,  
selenium, chromium, ultra trace minerals
- 12.2.1.10 Vitamins – A, retinoid, D, E, K, Thiamine, Riboflavin,  
Niacin, Pantothenic acid, Folic acid, B12, Biotin, C.
- 12.2.1.11 Clinical manifestations of human vitamin and mineral disorders
- 12.2.1.12 Role/significance of nutrition
  - 12.2.1.12.1 Regulation of gene expression
  - 12.2.1.12.2 Membrane and transport
- 12.2.1.13 Control of food intake
- 12.2.1.14 Antioxidants
- 12.2.1.15 Food groups
- 12.2.1.16 Metabolic consequences of starvation
- 12.2.1.17 Fiber and other dietary factors affecting nutrient absorption  
and metabolism
- 12.2.1.18 Hormone, cytokine and nutrient reactions
- 12.2.1.19 Nutrition and immune system
- 12.2.1.20 Oxidative stress and oxidant defense
- 12.2.1.21 Diet in work and exercise performance
- 12.2.1.22 Body composition: influence of nutrition, physical activity, growth  
and aging
- 12.2.1.23 Maternal nutrition
- 12.2.1.24 Nutritional requirements during infancy
- 12.2.1.25 Diet, nutrition and adolescence

- 12.2.1.26 Nutrition in the elderly
- 12.2.1.27 Clinical nutrition assessment of infants and children
- 12.2.1.28 Clinical and functional assessment of adults
- 12.2.1.29 Nutritional assessment of malnutrition by anthropometric methods
- 12.2.1.30 Laboratory tests for assessing nutritional status
- 12.2.1.31 Dietary assessment
- 12.2.1.32 Childhood obesity
- 12.2.1.33 Nutritional management of infants and children with specific  
diseases and/or conditions
- 12.2.1.34 Assessment of mal absorption
- 12.2.1.35 Nutrition in pancreatic disorders
- 12.2.1.36 Nutrition in liver disorders
- 12.2.1.37 Nutrition and diet in the management of hyperlipidemia  
and atherosclerosis
- 12.2.1.38 Nutrition, diet and hypertension
- 12.2.1.39 Diet, nutrition and prevention of cancer
- 12.2.1.40 Carcinogens in foods
- 12.2.1.41 Nutritional support of the cancer patient
- 12.2.1.42 Nutrition and diet in rheumatic diseases
- 12.2.1.43 Nutritional management of diabetes
- 12.2.1.44 Obesity
- 12.2.1.45 Nutritional aspects of hematologic disorders
- 12.2.1.46 Renal disorders and nutrition

- 12.2.1.47 Nutrition, respiratory function and disease
- 12.2.1.48 Diagnosis and management of food allergies
- 12.2.1.49 Nutrition and diet in alcoholism
- 12.2.1.50 The hypercatabolic state
- 12.2.1.51 Nutrition and infection
- 12.2.1.52 Nutritive value of food ingredients commonly used in India
- 12.2.1.53 Enteral feeding (only theory)
- 12.2.1.54 Parenteral nutrition (only theory)
- 12.2.1.55 Nutrition and medical ethics – the interplay of medical decisions, patients' rights, and the judicial system
- 12.2.1.56 RDA – individuals and populations
- 12.2.1.57 Nutritional implications of vegetarian diets
- 12.2.1.58 Social and cultural influences on food consumption and nutritional status
- 12.2.1.59 Food additives, contaminants and natural toxins
- 12.2.1.60 Comparative study of modern nutrition and traditional naturopathy diet

## **12.2.2 MEDICINAL HERBS**

### **12.2.2.1 Introduction to Herbology**

**12.2.2.2 Following herbs are to be studied with respect to their source and therapeutic uses. Botanical details can be avoided**

**12.2.2.2.1 Embelicaofficinalis**

**12.2.2.2.2 Cassia fistula**

**12.2.2.2.3 Ficus glomerata**

**12.2.2.2.4 Vetiveriazizanodies**

12.2.2.2.5 Cinnamomumcamphora  
12.2.2.2.6 Mosardicacharantia  
12.2.2.2.7 Tribulusterrestris  
12.2.2.2.8 Myristicafragrans  
12.2.2.2.9 Cuminumcuminum  
12.2.2.2.10 Sesamumindicum  
12.2.2.2.11 Ocimum sanctum  
12.2.2.2.12 Punicagranatum  
12.2.2.2.13 Coriandrum sativum  
12.2.2.2.14 Azadirachta indica  
12.2.2.2.15 Allium cepa  
12.2.2.2.16 Piper longum  
12.2.2.2.17 Psoralea corylifolia  
12.2.2.2.18 Taxus baccata  
12.2.2.2.19 Aegle marmelos  
12.2.2.2.20 Semecarpus anacardium  
12.2.2.2.21 Phyllanthus niruri  
12.2.2.2.22 Piper nigrum  
12.2.2.2.23 Trigonella foenum – graecum  
12.2.2.2.24 Santalum album  
12.2.2.2.25 Allium sativum  
12.2.2.2.26 Mimosa pudica  
12.2.2.2.27 Acorus calamus

12.2.2.2.28 Asparagus racemosus

12.2.2.2.29 Rauwolfia serpentine

12.2.2.2.30 Curcuma longa

12.2.2.2.31 Terminaliachebula

12.2.2.2.32 Ferula narthex

12.2.2.2.33 Syzygiumaramaticum

12.2.2.2.34 Terminaliabelerica

12.2.2.2.35 Gingiberofficinalis

#### • **Practical**

- Calculation of Body Mass Index (BMI) and Basal Metabolic Rate (BMR).
- Assessment of nutritional status through dietary recall (24-hour recall method) and food frequency questionnaires.
- Identification and classification of macronutrients and micronutrients in common foods.
- Preparation of balanced diet plans for different age groups and lifestyles.

#### **Naturopathic Principles in Nutrition**

- Understanding and demonstration of the importance of natural foods (raw, organic, seasonal).
- Role-playing or case studies on detox diets (e.g., juice fasting, elimination diets).
- Preparation of plant-based meals, highlighting whole foods and minimal processing.

#### **Therapeutic Diets and Meal Planning**

- Designing therapeutic diets for conditions such as obesity, diabetes, hypertension, and gastrointestinal disorders.
- Conducting food preparation workshops focusing on naturopathic cooking (e.g., sprouting, fermenting, steaming).
- Demonstrating the preparation of low-sodium, low-glycemic index, or high-fiber recipes.

#### ***Diet in Relation to Lifestyle Disorders***

- Identifying risk factors and dietary interventions for common lifestyle disorders.
- Monitoring and documenting dietary interventions in case studies.
- Preparing meal plans for stress management, improved immunity, and anti-inflammatory effects.

#### **Food and Herb Synergy in Naturopathy**

- Exploring and preparing herbal teas, decoctions, and tonics.
- Blending foods with functional herbs for specific health benefits (e.g., turmeric for inflammation, ginger for digestion).
- Creating herbal remedies for digestive health (e.g., bitters, teas).

#### **Community Nutrition**

- Conducting nutritional education sessions for different communities.

- Developing low-cost nutritious recipes for underprivileged populations.
- Planning and executing awareness programs on food hygiene and healthy eating.

### ***Research and Innovation in Nutrition***

- Analyzing current nutrition trends and evaluating their relevance to naturopathy.
- Preparing case reports on dietary interventions.
- Designing and testing innovative recipes based on naturopathic principles.

### 12.3 **Textbooks**

- 12.3.1 Davidson and Passamore Human Nutrition – Passamore
- 12.3.2 Clinical Dietetics and Nutrition – FP Antia
- 12.3.3 Normal Therapeutic Nutrition – Corinne Robinson
- 12.3.4 Essentials of Food and Nutrition – Swaminathan
- 12.3.5 Sprouts – JD VaishYogaSamsthan
- 12.3.6 Science and Art of Food and Nutrition – Herbert Shelton
- 12.3.7 Nutritive Values of Indian Foods – NIN (Hyd)
- 12.3.8 Publications of NIN, Hyderabad
- 12.3.9 Herbs that Hheal – HK Bakhru
- 12.3.10 *Charaka and Sushruta Samhita*
- 12.3.11 Fundamentals of *Ayurveda* – Mahadev Shastri

#### 12.4 Scheme Of Examination

S.No	Subject	Theo -ry	Inter- Nal Assmt	Viva- Voce	Total	Practi- cals	Inter- Nal Assmt	Total Marks	Grand Total Marks
01.	Nutrition & Medicinal Herbs	80	20	30	150	60	10	70	200

## **13. DIAGNOSTIC METHODS IN NATUROPATHY – I**

(Duration: 12 months)

Total hours: 200 (Theory: 100 Practical: 100)

### **13.1 Goals and Objectives**

#### **13.1.1 Goal:**

The goal of teaching Diagnostic Methods in Naturopathy to undergraduate students is to provide them with comprehensive knowledge of diagnostic methods employed by traditional Naturopaths that can be used efficiently to diagnose various diseases without the use of sophisticated technology.

#### **13.1.2 Objectives:**

##### **13.1.2.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 13.1.2.1.1 Define and be aware of historically significant developments in diagnostic procedures used in Naturopathy
- 13.1.2.1.2 Illustrate the characteristics of a Healthy Body with respect to Naturopathic Principles
- 13.1.2.1.3 Describe philosophical theories of causation of disease according to Naturopathy
- 13.1.2.1.4 Utilise knowledge of theory of encumbrances, their types and interpretation, along with naturopathic ways to therapeutically correct them;

13.1.2.1.5 Describe in detail Iris Diagnosis, with respect to history, techniques, iris signs, interpretations and tools used, and use the same to diagnose diseases;

13.1.2.1.6 Comprehend the techniques and interpretations of stool and urine diagnosis, correlating modern medical knowledge and Ayurvedic *sthoola* and *muthrapariksha*;

13.1.2.1.7 Describe the characteristics of normal and unhealthy skin, in different diseases.

### **13.1.2.2 Skills:**

After the completion of the course, the student shall be able to:

13.1.2.2.1 Use knowledge of different diagnostic procedures in Naturopathy to effectively and accurately diagnose various diseases, such as Iris Diagnosis, Facial Diagnosis, Stool and Urine Diagnosis, etc.

### **13.1.2.3 Integration**

At the completion of training, the student should be able to comprehensively understand the principles and procedures of Diagnostic Methods in Naturopathy and employ the same for diagnostic and prognostic purposes.

## **13.2 Theory**

### **13.2.1 Facial Diagnosis**

#### **13.2.1.1 Introduction**

13.2.1.1.1 Definition

13.2.1.1.2 Historical Highlights

13.2.1.2 Characteristics of Healthy Body

13.2.1.3 Foreign matter theory , toxemia theory, vitality theory

13.2.1.4 Physiological and pathological perspective of foreign matter, toxemia and vitality theory

13.2.1.5 Unity of disease and unity of cure – interpretation with contemporary medicine

13.2.1.6 Encumbrance, its types and its interpretation in health and disease

13.2.1.7 Habits – significance /consequences and its correspondence in encumbrance

13.2.1.8 Significance of naturopathy treatment modalities in correction of encumbrances.

## 13.2.2 Iridiagnosis

13.2.2.1 Definition and Historical Highlights

13.2.2.2 Anatomy of iris in detail

13.2.2.3 Conceptual theories of Iridiagnosis

13.2.2.4 Comparison of the science of iridiagnosis with concepts of *Drishtipraraksha* in *Ayurveda* and ophthalmology in modern medicine.

13.2.2.5 Technique in iris reading

13.2.2.5.1 Normal and abnormal iris

13.2.2.5.2 The vibratory theory and its significance

13.2.2.5.3 Diagnostic chart

13.2.2.6 Iridoscope

13.2.2.7 Zones

13.2.2.8 Sectorial division

13.2.2.9 Interpretation of iris manifestation

13.2.2.9.1 Inherent lesions and weakness

13.2.2.9.2 Cataract

13.2.2.9.3 Toxic settlements

13.2.2.9.4 Nerve rings

13.2.2.9.5 Lymphatic rosary

13.2.2.9.6 Injuries and surgeries

13.2.2.9.7 Psora spot, scurf rim

13.2.2.9.8 Radii Solaris

13.2.2.9.9 Sympathetic nerve wreath

13.2.2.9.10 Closed and open lesions

13.2.2.9.11 Sodium ring

13.2.2.9.12 Circulatory indicators

13.2.2.9.13 Drugs and chemicals' appearance in the iris and their effect on the body

13.2.2.9.13.1 Arsenic, bismuth, bromides, coal tar products, ergot, glycerin, iodine, iron, lead, mercury, opium, phosphorus, quinine, salicylic acid, sodium, strychnine, sculpture, turpentine, vaccines etc.

### **13.2.3 Stool & Urine Diagnosis**

**13.2.3.1 Characteristics of Normal stool & urine**

**13.2.3.2 Abnormal characteristics and its significance**

13.2.3.3 Comparison of Stool and urine diagnosis with mala & moothra pareeksha in

*Ayurveda*

13.2.4 Skin Diagnosis

13.2.4.1 Anatomy of skin

13.2.4.2 Skin types

13.2.4.3 Abnormality and its significance in Health

13.2.4.4 Comparison of skin diagnosis with twakpareeksha in *Ayurveda*

13.2.5 Tongue diagnosis

13.2.6 Pulse diagnosis

13.2.7 Chromo diagnosis

13.2.8 Advanced research updates

### 13.3 **Practical**

13.3.1 Case sheet writing - minimum 25 cases with naturopathic diagnostic methods

13.3.2 Regular hospital visit

13.3.3 Dissertation of at least 20 cases studies with significant and relevant Naturopathic diagnostic modalities

### 13.4 **Reference Books:**

13.4.1 Macfaddans Encyclopedia of Physical Culture - Bernard Macfadden

13.4.2 *Asthangahrityam*

13.4.3 *Charaka samhitha*

13.4.4 *Susrutha samhitha*

13.4.5 The Science of Facial Expression – Louis Kuhne

13.4.6 Iridology - Dr. Bernard Jenson

### 13.5 Scheme Of Examination

S.No	Subject	Theory	Internal Assmt	Viva-Voce	Total	Practicals	Internal Assmt	Total Marks	Grand Total Marks
01.	Diagnostic Methods - I (Naturopathy)	80	20	30	130	60	10	70	200

## **14. DIAGNOSTIC METHODS IN CONVENTIONAL MEDICINE – II**

**(Duration: 12 Months)**

**Total hours: 250 (Theory: 150 Practical: 100)**

### **14.1 Goals and Objectives**

#### **14.1.1 Goal:**

The goal of teaching Diagnostic Methods in Conventional Medicine to undergraduate students is to provide them with comprehensive knowledge of diagnostic methods employed by conventional doctors that can be used efficiently to diagnose various diseases, for diagnosis as well as prognosis.

#### **14.1.2 Objectives:**

##### **14.1.2.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 14.1.2.1.1 Understand the procedures and nuances in approaching a patient and taking a detailed history and writing a case report;
- 14.1.2.1.2 Illustrate examination procedures and techniques generally as well as for specific systems and make provisional diagnoses of common diseases;
- 14.1.2.1.3 Describe laboratory investigations used for supporting the provisional diagnosis made after history taking and examinations;
- 14.1.2.1.4 Prescribe and interpret radiological investigations, biochemical investigations, sonography, EEG, ECG,

EMG, echocardiography, CT, PET, MRI, etc for  
diagnostic and prognostic purposes;

- 14.1.2.1.5 Explain and demonstrate knowledge of invasive tests  
such as paracentesis, thoracocentesis, lumbar puncture,  
laparoscopy, endoscopy, biopsy, etc.

#### **14.1.2.2 Skills:**

After the completion of the course, the student shall be able to:

- 14.1.2.2.1 Effectively take a case history with examinations and  
prepare a detailed case report;
- 14.1.2.2.2 Prescribe and interpret any further investigations  
required for the provisional diagnosis made.

#### **14.1.2.3 Integration**

At the completion of training, the student should be able to comprehensively understand the principles, procedures and nuances of Diagnostic Methods in Conventional Medicine and employ the same for diagnostic and prognostic purposes.

### **14.2 Theory**

#### **14.2.1 Examination of the Patient**

- 14.2.1.1 Approach to a patient
- 14.2.1.2 History taking and case sheet writing
- 14.2.1.3 Symptomatology
- 14.2.1.4 Examination of vital data

- 14.2.1.5 Importance of height, weight, abdominal girth
- 14.2.1.6 General physical examination
- 14.2.1.7 Examination of skin, nail and hair
- 14.2.1.8 Systemic examination of the patient
  - 14.2.1.8.1 Examination of Abdomen (digestive system)
  - 14.2.1.8.2 Examination of Cardiovascular system
  - 14.2.1.8.3 Examination of Respiratory system
  - 14.2.1.8.4 Examination of Renal and urogenital system
  - 14.2.1.8.5 Examination of Central nervous system
  - 14.2.1.8.6 Examination of Locomotor system
  - 14.2.1.8.7 Examination of ear, nose and throat
  - 14.2.1.8.8 Gynecological examination
  - 14.2.1.8.9 Endocrine system and metabolic disorder
  - 14.2.1.8.10 Examination of eye
- 14.2.1.9 Provisional diagnosis
- 14.2.1.10 Routine and special investigations
  - 14.2.1.10.1 Laboratory investigations: Urine analysis, stool examination, blood examination-peripheral smear, total WBC count, differential WBC count; ESR, Hb estimation ;BT ,CT ,platelet count, red cell indices, bone marrow examination.
  - 14.2.1.10.2 Radiological investigations: Plain X ray chest, K.U.B., lumbar and cervical spine, skull and para nasal sinuses, joints

- 14.2.1.10.3 Contrast Radiology: Barium swallow, barium meal, barium enema; cholecystography, pyelography, angiography, bronchogram, myelogram
- 14.2.1.10.4 Electrocardiography
- 14.2.1.10.5 Echo-cardiograph
- 14.2.1.10.6 Coronary angiography
- 14.2.1.10.7 Electro-encephalography
- 14.2.1.10.8 Biochemical investigations: LFT, creatinine clearance test, Vanillic acid (VMA) excretion test in urine, SGOT and SGPT, LDH, CPK, blood urea, serum creatinine, cholesterol, renal function test, serum uric acid and serum amylase
- 14.2.1.10.9 Diagnostic Paracentesis
- 14.2.1.10.10 Diagnostic Thoracocentesis
- 14.2.1.10.11 Lumbar puncture and CSF analysis
- 14.2.1.10.12 Radioactive iodine uptake studies
- 14.2.1.10.13 Thyroid T3, T4, TSH estimation
- 14.2.1.10.14 Diagnostic skin tests
- 14.2.1.10.15 Endoscopic procedures
- 14.2.1.10.16 Ultra-sonography
- 14.2.1.10.17 CT, PET, MRI, Doppler
- 14.2.1.10.18 Tissue biopsy and FNAC

## 14.2.2 Final Diagnosis

## 14.3 **Practical**

14.3.1 History taking and physical examination of cases

14.3.2 Case sheet writing of different types of cases (25)

14.3.3 Demonstration of equipment and instruments used for investigation in modern diagnostics

14.3.4 Demonstration tour of an ultra-modern super-specialty hospital to view the latest technique of modern diagnosis

### **Functional Diagnostics**

- **Functional Testing:**

- Food sensitivity testing (IgG, IgA).
- Functional nutrient analysis (e.g., vitamin and mineral deficiencies).
- Metabolic health assessments (e.g., blood sugar, insulin response).

- **Biofeedback Devices:**

- Introduction to heart rate variability (HRV).
- Electrodermal screening for energetic imbalances.

### **Traditional Diagnostic Techniques**

- **Naturopathic Diagnostics:**

- Iridology: Eye analysis for systemic health.
- Pulse diagnosis and its variations in naturopathic practices.
- Tongue diagnosis: Shapes, colors, and coatings.

- **Physical Examination Skills:**

- Basic palpation techniques for lymphatic and abdominal assessment.
- Blood pressure and pulse oximetry interpretation.

### **Psychosomatic and Emotional Diagnosis**

- **Techniques to assess mental and emotional health.**
  - Use of questionnaires and behavioral observation.
  - Evaluating stress levels and emotional trauma.

### **Emerging Trends in Naturopathic Diagnostics**

- Genetic testing: Role of genomics in naturopathic care.
- Advances in AI and wearable technologies for health monitoring.
- Personalized medicine in naturopathy.

#### 14.4 **Textbooks**

- 14.4.1 Hutchison's Clinical Methods
- 14.4.2 Manual of clinical Methods – PS Shankar
- 14.4.3 Clinical Diagnosis – JalVakil
- 14.4.4 Clinical Methods – Chamberlin
- 14.4.5 Physical Diagnosis – Golwala
- 14.4.6 Harrison's Principles of Internal Medicine
- 14.4.7 Manipal Manual of Clinical Medicine
- 14.4.8 Macleod's Clinical Examination
- 14.4.9 Davidson's Principles and Practice of Medicine
- 14.4.10 Essentials in Hematology and Clinical Pathology

#### 14.5 Scheme Of Examination

S.No	Subject	Theory	Internal Assmt	Viva-Voce	Total	Practicals	Internal Assmt	Total Marks	Grand Total Marks
01.	Diagnostic Methods – II (Conventional)	80	20	30	130	60	10	70	200

## **15. PSYCHOLOGY AND BASIC PSYCHIATRY**

**(Duration: 12 months)**

**Total hours: 150 (Theory: 100 Practical: 50)**

### **15.1 Goals and Objectives**

#### **15.1.1 Goal:**

The goal of teaching Psychology and Basic Psychiatry to undergraduate students is to provide them with comprehensive knowledge of normal and abnormal psychology and assessment of the same for therapeutic purposes.

#### **15.1.2 Objectives:**

##### **15.1.2.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 15.1.2.1.1 Describe the evolution of Psychology from speculation to science;
- 15.1.2.1.2 Illustrate mechanisms of sense and perception, states of consciousness and their functions;
- 15.1.2.1.3 Understand basic and complex functions such as learning, memory, thinking, language, motivation, emotion, intelligence, development of psychology across lifespan, personality, stress coping, social psychology, attitudes, etc.
- 15.1.2.1.4 Explain abnormal psychology and describe aetiology and psychopathology along with classification of disorders;

- 15.1.2.1.5 Demonstrate knowledge of therapies aimed at psychological health, such as psychotherapy, *Yoga*, etc;

**15.1.2.2 Skills:**

After the completion of the course, the student shall be able to:

- 15.1.2.2.1 Utilise knowledge of psychology and psychiatry in diagnosing and managing various psychological disorders, assessing psychological profile;
- 15.1.2.2.2 Demonstrate usage of various therapeutic tools in psychiatry to improve mental health in professional practice.

**15.1.2.3 Integration**

At the completion of training, the student should be able to integrate knowledge of normal and abnormal psychology and psychiatric therapies and efficiently utilise the same for therapeutic purposes.

**15.2 Theory**

**15.2.1 Psychology**

15.2.1.1 Unit 1: The Evolution of Psychology- How psychology developed from speculation to science

15.2.1.1.1 Studying the mind and behaviour

15.2.1.1.2 Early scientific approaches to psychology

15.2.1.1.2.1 Structuralism

15.2.1.1.2.2 Functionalism

15.2.1.1.3 Contemporary approaches to psychology

- 15.2.1.1.3.1 Behavioural approach
- 15.2.1.1.3.2 Psychodynamic approach
- 15.2.1.1.3.3 Cognitive approach
- 15.2.1.1.3.4 Behavioural neuroscience approach
- 15.2.1.1.3.5 Evolutionary psychology approach
- 15.2.1.1.3.6 Sociocultural approach
- 15.2.1.1.4 Positive approach to psychology: Humanistic movement and the positive psychology movement

#### 15.2.1.2 Unit 2: Sensation and Perception

- 15.2.1.2.1 How we sense and perceive the world
  - 15.2.1.2.1.1 The visual system
    - 15.2.1.2.1.2 The auditory system
    - 15.2.1.2.1.3 Other senses
  - 15.2.1.2.2 States of consciousness
    - 15.2.1.2.2.1 Levels of awareness
    - 15.2.1.2.2.2 Sleep and dreams
  - 15.2.1.2.3 Altered states of consciousness
    - 15.2.1.2.3.1 Hypnosis
    - 15.2.1.2.3.2 Meditation
    - 15.2.1.2.3.3 Drug induced states

#### 15.2.1.3 Unit 3: Learning and Memory

- 15.2.1.3.1 Types of learning
  - 15.2.1.3.1.1 Classical conditioning
  - 15.2.1.3.1.2 Operant conditioning
  - 15.2.1.3.1.3 Observational learning

- 15.2.1.3.1.4 Cognitive factors in learning
- 15.2.1.3.2 Memory
  - 15.2.1.3.2.1 Nature of memory
  - 15.2.1.3.2.2 Memory encoding: getting information into memory – the role of attention
  - 15.2.1.3.2.3 Levels of processing
  - 15.2.1.3.2.4 Enriching encoding
  - 15.2.1.3.2.5 Memory storage
    - 15.2.1.3.2.5.1 Sensory memory
    - 15.2.1.3.2.5.2 Short-term memory
    - 15.2.1.3.2.5.3 Long-term memory
  - 15.2.1.3.2.6 Memory retrieval
    - 15.2.1.3.2.6.1 Serial position effect
    - 15.2.1.3.2.6.2 Retrieval cues and the retrieval task
    - 15.2.1.3.2.6.3 Retrieval of autobiographical memories
    - 15.2.1.3.2.6.4 Retrieval of emotional memories
    - 15.2.1.3.2.6.5 Forgetting
  - 15.2.1.3.2.7 Biochemistry of memory
  - 15.2.1.3.2.8 Neural circuitry of memory
  - 15.2.1.3.2.9 Anatomy of memory
  - 15.2.1.3.2.10 Are there multiple memory systems? Implicit versus explicit memory
  - 15.2.1.3.2.11 Declarative versus procedural memory
  - 15.2.1.3.2.12 Semantic versus episodic memory
- 15.2.1.4 Unit 4: Thinking and Language

- 15.2.1.4.1 The cognitive revolution in psychology
- 15.2.1.4.2 Concept formation
- 15.2.1.4.3 Problem solving
- 15.2.1.4.4 Critical thinking
- 15.2.1.4.5 Reasoning and decision making
- 15.2.1.4.6 Language and thought language acquisition and development

15.2.1.5 Unit 5: Motivation and Emotion

- 15.2.1.5.1 Approaches to motivation
  - 15.2.1.5.1.1 Evolutionary approach
  - 15.2.1.5.1.2 Drive reduction theory
  - 15.2.1.5.1.3 Optimum arousal theory
  - 15.2.1.5.1.4 The cognitive approach
- 15.2.1.5.2 Hunger
  - 15.2.1.5.2.1 The biology of hunger and thirst
  - 15.2.1.5.2.2 Environmental factors in the regulation of hunger
  - 15.2.1.5.2.3 Eating and weight
  - 15.2.1.5.2.4 Sexuality - the biology of sex and the human sexual response:  
cognitive and sensory/perceptual factors
  - 15.2.1.5.2.5 Cultural factors
  - 15.2.1.5.2.6 Psychosexual dysfunctions
  - 15.2.1.5.2.7 Sexual behavior and orientation

15.2.1.6 Unit 6: Intelligence

- 15.2.1.6.1 Nature of intelligence
- 15.2.1.6.2 Intelligence testing
- 15.2.1.6.3 Neuroscience and intelligence

- 15.2.1.6.4 Theories of multiple intelligences
- 15.2.1.6.5 The extremes of intelligence and creativity
- 15.2.1.6.6 The influence of heredity and environment

15.2.1.7 Unit 7: Human development across the life span

- 15.2.1.7.1 Exploring human development
- 15.2.1.7.2 Prenatal development
- 15.2.1.7.3 Child development: physical, cognitive and socio emotional development in childhood
- 15.2.1.7.4 Adolescence positive psychology and adolescents
- 15.2.1.7.4.1 Physical, cognitive and socio emotional development in adolescence
- 15.2.1.7.5 Adult development and aging
- 15.2.1.7.6 Physical, cognitive and socio emotional development in adulthood

15.2.1.8 Unit 8: Personality

- 15.2.1.8.1 The nature of personality
- 15.2.1.8.2 Psychodynamic perspectives
- 15.2.1.8.3 Behavioral perspectives
- 15.2.1.8.4 Humanistic perspectives
- 15.2.1.8.5 Biological perspectives and contemporary empirical approaches to personality

15.2.1.9 Unit 9: Stress coping and health

- 15.2.1.9.1 The nature of stress
- 15.2.1.9.2 Major types of stress
- 15.2.1.9.3 Responding to stress

- 15.2.1.9.4 The effects of stress on psychological functioning
- 15.2.1.9.5 The effects of stress on physical health
- 15.2.1.9.6 Factors moderating the impact of stress
- 15.2.1.9.7 Health-impairing lifestyles
- 15.2.1.9.8 Reactions to illness
- 15.2.1.9.9 Improving coping and stress management
- 15.2.1.10 Unit 10: Social Psychology
  - 15.2.1.10.1 Social thinking
    - 15.2.1.10.1.1 Attribution
    - 15.2.1.10.1.2 Social perception
    - 15.2.1.10.1.3 Attitudes
  - 15.2.1.10.2 Social influences
    - 15.2.1.10.2.1 Conformity and obedience
    - 15.2.1.10.2.2 Group influence
    - 15.2.1.10.2.3 Leadership
  - 15.2.1.10.3 Inter group relations
    - 15.2.1.10.3.1 Group identity
    - 15.2.1.10.3.2 Prejudice
    - 15.2.1.10.3.3 Ways to improve interethnic relations
  - 15.2.1.10.4 Social interaction
    - 15.2.1.10.4.1 Aggression
  - 15.2.1.10.5 Relationships
    - 15.2.1.10.5.1 Attraction
    - 15.2.1.10.5.2 Love
    - 15.2.1.10.5.3 Relationships and gender

## 15.2.2 Abnormal psychology: Psychiatry

### 15.2.2.1 Unit 1: Abnormal behavior in historical context- the science of psychopathology

#### 15.2.2.1.1 The historical conceptions of abnormal behavior

##### 15.2.2.1.1.1 The supernatural tradition

##### 15.2.2.1.1.2 The biological tradition

##### 15.2.2.1.1.3 The psychological tradition

#### 15.2.2.1.2 An integrative approach to psychopathology

#### 15.2.2.1.3 One-dimensional and multidimensional models

#### 15.2.2.1.4 Genetic contributions to psychopathology neuroscience and its contributions to psychopathology

#### 15.2.2.1.5 Behavioral and cognitive science

#### 15.2.2.1.6 Cultural, social and interpersonal factors

#### 15.2.2.1.7 Classification of psychological disorders: DSM IV and ICD 10 Classifications

### 15.2.2.2 Unit 2: Anxiety disorders

#### 15.2.2.2.1 Generalized anxiety disorders

#### 15.2.2.2.2 Panic disorders; phobias

#### 15.2.2.2.3 Obsessive-compulsive disorders

### 15.2.2.3 Unit 3: Somatoform and Dissociative disorders

#### 15.2.2.3.1 Hypochondriasis

#### 15.2.2.3.2 Somatization disorder

#### 15.2.2.3.3 Conversion disorder

#### 15.2.2.3.4 Pain disorder

#### 15.2.2.3.5 Dissociative disorders

15.2.2.4 Unit 4: Mood disorders

15.2.2.4.1 Depressive disorders

15.2.2.4.2 Bipolar disorders

15.2.2.4.3 Suicide

15.2.2.5 Unit 5: Substance-related disorders

15.2.2.5.1 Depressants

15.2.2.5.1.1 Alcohol use disorders

15.2.2.5.1.2 Sedative substance use disorders

15.2.2.5.1.3 Hypnotic substance use disorders

15.2.2.5.1.4 Anxiolytic substance use disorders

15.2.2.5.2 Stimulants

15.2.2.5.2.1 Amphetamine use disorders

15.2.2.5.2.2 Cocaine use disorders

15.2.2.5.2.3 Nicotine use disorders

15.2.2.5.2.4 Caffeine use disorders

15.2.2.5.3 Opioids use disorders

15.2.2.5.4 Hallucinogens

15.2.2.5.4.1 Marijuana

15.2.2.5.4.2 LSD

15.2.2.5.4.3 Other Hallucinogens

15.2.2.5.5 Other drugs of abuse

15.2.2.6 Unit 6: Schizophrenia and other psychotic disorders

15.2.2.6.1 Schizophrenia

15.2.2.6.1.1 Clinical description

15.2.2.6.1.2 Causes

- 15.2.2.6.1.3 Types and treatment
- 15.2.2.6.2 Personality disorders – cluster A, B and C
- 15.2.2.6.3 Psychotherapies
  - 15.2.2.6.3.1 Psychodynamic therapies
  - 15.2.2.6.3.2 Behavioural therapies
  - 15.2.2.6.3.3 Humanistic therapies

15.2.2.7 Unit 7: Mental health and Yoga

**15.2.2.8 Psychology Practical Syllabus**

**15.2.2.9 Psychological Assessment:**

15.2.2.10 Administration, scoring, and interpretation of standardized psychological tests:

**15.2.2.11 Intelligence Tests:**

15.2.2.12 Raven's Progressive Matrices

15.2.2.13 Wechsler Adult Intelligence Scale (WAIS)

15.2.2.14 Stanford-Binet Test

**15.2.2.15 Personality Assessments:**

15.2.2.16 Rorschach Inkblot Test

15.2.2.17 Thematic Apperception Test (TAT)

15.2.2.18 Eysenck Personality Questionnaire (EPQ)

15.2.2.19 Big Five Inventory

**15.2.2.20 Cognitive Function Tests:**

15.2.2.21 Stroop Test

15.2.2.22 Digit Span Test

15.2.2.23 Trail Making Test

**15.2.2.24 Aptitude and Interest Tests:**

15.2.2.25 Differential Aptitude Test (DAT)

15.2.2.26 Strong Interest Inventory

**15.2.2.27 Attitude and Values:**

15.2.2.28 Likert Scale

15.2.2.29 Thurstone Scale

**15.2.2.30 Behavioral Experiments:**

15.2.2.31 Classical Conditioning and Operant Conditioning

15.2.2.32 Reaction Time Studies

**15.2.2.33 Memory Experiments:**

15.2.2.34 Serial Position Effect

15.2.2.35 Forgetting Curve

15.2.2.36 Problem-Solving and Decision-Making Tasks

**15.2.2.37 Counseling and Interviewing Skills:**

15.2.2.38 Role-plays and case studies

15.2.2.39 Structured and unstructured interviews

15.2.2.40 Building therapeutic rapport

**15.2.2.41 Observation Techniques:**

15.2.2.42 Use of checklists and rating scales

15.2.2.43 Behavioral observation and recording

**15.2.2.44 Case Studies:**

15.2.2.45 Detailed analysis of psychological disorders (e.g., depression, anxiety)

15.2.2.46 Child and adolescent psychological issues

**15.2.2.47 Field Work:**

15.2.2.48 Visits to schools, NGOs, or rehabilitation centers for practical exposure

- 15.2.2.49 Basic Psychiatry Practical Syllabus**
- 15.2.2.50 Clinical Psychiatry Skills:**
- 15.2.2.51 History-taking:
- 15.2.2.52 Psychiatric history
- 15.2.2.53 Family history
- 15.2.2.54 Substance use history
- 15.2.2.55 Mental Status Examination (MSE):
- 15.2.2.56 Appearance and behavior
- 15.2.2.57 Mood and affect
- 15.2.2.58 Thought content and process
- 15.2.2.59 Perception, insight, and judgment
- 15.2.2.60 Risk assessment for suicide or violence
- 15.2.2.61 Diagnostic Tools and Scales:**
- 15.2.2.62 Hamilton Depression Rating Scale (HAM-D)
- 15.2.2.63 Hamilton Anxiety Rating Scale (HAM-A)
- 15.2.2.64 Mini-Mental State Examination (MMSE)
- 15.2.2.65 Beck Depression Inventory (BDI)
- 15.2.2.66 Yale-Brown Obsessive-Compulsive Scale (Y-BOCS)
- 15.2.2.67 Psychiatric Case Discussions:**
- 15.2.2.68 Mood disorders (e.g., depression, bipolar disorder)
- 15.2.2.69 Psychotic disorders (e.g., schizophrenia)
- 15.2.2.70 Anxiety disorders
- 15.2.2.71 Personality disorders
- 15.2.2.72 Substance-related and addictive disorders
- 15.2.2.73 Therapeutic Approaches:**
- 15.2.2.74 Basics of pharmacological management:
- 15.2.2.75 Antidepressants
- 15.2.2.76 Anxiolytics
- 15.2.2.77 Antipsychotics
- 15.2.2.78 Introduction to psychotherapy:
- 15.2.2.79 Cognitive Behavioral Therapy (CBT)
- 15.2.2.80 Psychodynamic Therapy
- 15.2.2.81 Supportive Therapy
- 15.2.2.82 Electroconvulsive Therapy (ECT) overview
- 15.2.2.83 Observation in Clinical Settings:**
- 15.2.2.84 Attending ward rounds
- 15.2.2.85 Observation of psychiatric interviews and counseling sessions
- 15.2.2.86 Ethics and Legal Aspects in Psychiatry:**
- 15.2.2.87 Consent in psychiatric practice
- 15.2.2.88 Legal aspects of involuntary admission and treatment
- 15.2.2.89 Research and Report Writing:**
- 15.2.2.90 Writing clinical case reports
- 15.2.2.91 Conducting small-scale research projects (if applicable)

## BNYS 3<sup>rd</sup> Year Syllabus

### An Introduction to Speech Therapy (BNY-307A)

#### CO: COURSE OBJECTIVES

**CO-1** To understand the social, emotional, and psychological impacts of communication disorders and how speech therapy improves the quality of life for individuals with these challenges.

**CO-2** To introduce the normal processes of speech, language, and communication development, to explore how these processes can be disrupted by various disorders or conditions.

**CO-3** To familiarize students with common speech and language disorders, including articulation, fluency (e.g., stuttering), voice, receptive and expressive language, and cognitive-communication disorders.

**CO-4** To examine the roles and responsibilities of speech-language pathologists, including their work settings, collaboration with other healthcare professionals, and adherence to professional and ethical guidelines.

#### Course Contents

##### Unit I: Introduction to Speech Therapy

- Overview of speech-language pathology as a profession.
- Roles and settings where speech-language pathologists work.
- History and evolution of the field.

##### Unit II: Basics of Communication

- Overview of the communication process.
- Components of speech (articulation, fluency, voice) and language (syntax, semantics, pragmatics).
- Typical developmental milestones in speech and language.

##### Unit III: Articulation and Phonological Disorders

- Introduction to articulation disorders.
- Phonological processes and speech sound disorders.
- Case studies and assessment techniques.

##### Unit IV: Language Disorders in Children

- Receptive and expressive language disorders.
- Developmental language disorder (DLD) and its characteristics.
- Impact of language disorders on academic achievement.

##### Unit V: Fluency Disorders (Stuttering)

- Understanding fluency disorders.
- Etiology and characteristics of stuttering.
- Introduction to stuttering therapy techniques.

#### Suggested Readings:

- *Introduction to Communication Disorders: A Lifespan Evidence-Based Perspective* by Robert Owens, Dale Metz, Kimberly Farinella.
- *Assessment in Speech-Language Pathology: A Resource Manual* by Kenneth G. Shipley and Julie G. McAfee.
- *Journals and articles from the American Speech-Language-Hearing Association (ASHA).*

## **COURSE OUTCOMES-**

**COs-1** Students will demonstrate an understanding of normal speech, language, and communication development across different age groups.

**COs-2** Students will be able to identify and differentiate between various speech and language disorders, such as articulation disorders, fluency disorders, language delays, and voice disorders.

**COs-3** Students will gain foundational knowledge of how speech-language pathologists assess communication disorders using screening tools and comprehensive evaluations.

**COs-4** Students will explore the principles of speech therapy and gain a general understanding of intervention techniques for speech and language disorders.

## **BNYS 3<sup>rd</sup> Year Syllabus Music Therapy (BNY-307 B)**

### **CO: COURSE OBJECTIVES**

**CO-1** Learn about different music therapy approaches, including psychodynamic, humanistic, cognitive-behavioral, and neurological models.

**CO-2** Gain proficiency in various music therapy techniques, such as improvisation, songwriting, receptive music listening, and musical play.

**CO-3** Understand how music impacts the brain and body, including the psychological and physiological effects of rhythm, melody, and harmony, learn about the use of music therapy in managing pain, anxiety, stress, and other mental health conditions.

**CO-4** Provide hands-on clinical training through supervised practicum experiences, apply music therapy skills in real-world settings such as hospitals, schools, rehabilitation centres, and mental health facilities. Receive feedback and reflect on personal and professional growth.

### *Course Contents*

#### **Unit I: Introduction to Music Therapy**

- Course overview and objectives.
- History and evolution of music therapy.
- Overview of different populations served by music therapy.

#### **Unit II: Theoretical Foundations of Music Therapy**

- Psychodynamic, cognitive-behavioral, humanistic, and neurological models.
- Case studies of different therapeutic approaches.

### Unit III: Music Therapy and the Brain

- How music affects the brain and body.
- Neurological foundations of music therapy.

### Unit IV: Assessment in Music Therapy

- Client assessment techniques.
- Developing individualized treatment plans.
- Role of assessment tools.

### Unit V: Music Therapy Methods – Receptive Techniques

- Guided music listening and visualization.
- Music-assisted relaxation and imagery techniques.

### Suggested Readings:

- **Textbook:** *Music Therapy: An Introduction* by W. B. Davis.
  - **Supplementary Readings:** Research articles, case studies, and media provided via course platform.
- Instruments:** Students will need access to basic percussion instruments, guitar, or piano.

## COURSE OUTCOMES

**COs-1** Demonstrate a thorough understanding of the history, philosophy, and theoretical foundations of music therapy. Identify and explain the major approaches and models used in music therapy (e.g., psychodynamic, humanistic, cognitive-behavioural, neurological).

**COs-2** Use various music therapy methods, such as improvisation, songwriting, and guided music listening, to address emotional, cognitive, physical, and social needs. Demonstrate proficiency in using both active (e.g., playing instruments, vocal techniques) and receptive (e.g., listening, imagery) music therapy interventions.

**COs-3** Explain how music affects the brain, body, and emotions. Apply knowledge of the therapeutic benefits of music in addressing physical, emotional, and mental health issues, such as pain management, stress reduction, and mood regulation.

**COs-4** Apply music therapy skills in real-world settings (e.g., hospitals, schools, rehabilitation centers) through supervised clinical practicum. Develop reflective practices by receiving and incorporating feedback from clinical supervisors and peers. Demonstrate the ability to work effectively within multidisciplinary teams of healthcare and educational professionals.

### 15.4 Scheme Of Examination

S.No	Subject	Theory	Internal Assmt	Viva-Voce	Total	Practicals	Internal Assmt	Total Marks	Grand Total Marks

01.	Psychology & Basic Psychiatry/An Introduction to Speech Therapy/ Music Therapy	80	20	30	130	60	10	70	200
-----	---	----	----	----	-----	----	----	----	-----

## **16. FASTING THERAPY AND DIETETICS (Duration: 12 months)**

**Total hours: 250 (Theory: 150 Practical: 100)**

### **16.1 Goals and Objectives**

#### **16.1.1 Goal:**

The goal of teaching Fasting Therapy and Dietetics to undergraduate students is to provide them with comprehensive knowledge of diet management and Fasting therapy and utilisation of the same for therapeutic purposes.

#### **16.1.2 Objectives:**

##### **16.1.2.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 16.1.2.1.1 Describe definitions and historical highlights of fasting therapy through the centuries, including fasting employed in different religions;
- 16.1.2.1.2 Classify fasting according to duration, purpose, type, etc;
- 16.1.2.1.3 Define rules and regulations of fasting to be followed;
- 16.1.2.1.4 Understand the metabolism of fasting;
- 16.1.2.1.5 Understand contraindications and indications of fasting in order to efficiently use fasting as a therapy;
- 16.1.2.1.6 Understanding Calorie Restriction: Concept, Method, Prevailing basic- Clinical-applied evidence;

- 16.1.2.1.7 Understand the concept of dietetic principles in Naturopathy;
- 16.1.2.1.8 Understand food combinations and health, including dietary requirements for different age groups, including pregnant and lactating women;
- 16.1.2.1.9 Describe importance of various components of diet, such as dietary fiber, vitamins, minerals, etc;
- 16.1.2.1.10 Explain auxiliary concepts of dietetics such as food hygiene, etc.

#### **16.1.2.2 Skills:**

After the completion of the course, the student shall be able to:

- 16.1.2.2.1 Utilise knowledge of fasting therapy and dietetics in managing various diseases;
- 16.1.2.2.2 Demonstrate usage of therapeutic diets and fasting therapy in promotive, preventive, curative and rehabilitative therapy.

#### **16.1.2.3 Integration**

At the completion of training, the student should be able to integrate knowledge of fasting therapy and dietetics and efficiently utilise the same for therapeutic purposes.

## **16.2 Fasting**

16.2.1 Definition

16.2.2 Historical highlights

- 16.2.2.1 Indian: According to Vedas, *Ayurveda*, Epics and other pioneer Naturopaths
- 16.2.2.2 Western
- 16.2.3 Evidence of fasting in animals and its benefits
- 16.2.4 Fasting in different religions
- 16.2.5 Classification of fasting and its effects, limitations, according to
  - 16.2.5.1 Duration (Short, long, intermittent, weekly)
  - 16.2.5.2 Purpose (Preventive, therapeutic, religious, political)
  - 16.2.5.3 Type (Dry, water, juice, monodiet)
- 16.2.6 Starvation – pathological features in different organ systems
- 16.2.7 Physiological changes of fasting in short, long, intermittent, dry, water, juice (lemon honey, tender coconut, sugarcane juice, alkaline juices, honey water etc.) and monodiet fasting.
- 16.2.8 Difference between hunger and starvation
- 16.2.9 Rules and regulations for administering fasting
- 16.2.10 Rules and regulations for selection of patient for fasting
- 16.2.11 Hygiene and auxiliaries of fasting
- 16.2.12 Sane fasting
- 16.2.13 Do's and don'ts of fasting
- 16.2.14 Metabolism of fasting
- 16.2.15 Preparation of individuals for fasting
  - 16.2.15.1 Psychological effects and barriers for fasting
  - 16.2.15.2 Crises during fasting therapy and its management
  - 16.2.15.3 Significance of enema during fasting and its physiology
  - 16.2.15.4 Significance of fasting in fever

16.2.15.5 Fasting for preservation of health

16.2.15.6 Contraindications and limitations of fasting

**16.2.16** Research updates on fasting

## **16.3 Dietetics**

- 16.3.1** Concept of health in naturopathy
- 16.3.2** Dietetic principles in naturopathy
- 16.3.3** Concept of wholesome diet
- 16.3.4** Medical values of food
- 16.3.5** Natural qualities / properties / characters of foods in naturopathy / *Ayurveda* / modern nutrition
- 16.3.6** Natural food and health
  - 16.3.6.1 Importance of green vegetables, other vegetables, fruits and ingredients
  - 16.3.6.2 Chemical composition of different raw juices and their effects and uses
  - 16.3.6.3 Wheat grass, beetroot, cabbage, cucumber, garlic, papaya, mango, pineapple, pumpkins etc
  - 16.3.6.4 Comparison with raw and cooked food
  - 16.3.6.5 Sprouts, nutrition and method
- 16.3.7** Food combination and health
- 16.3.8** Naturopathic hospital dietetics and classification
- 16.3.9** Disease management for different diseases
- 16.3.10** Food allergies and diet
- 16.3.11** Seasonal changes
- 16.3.12** Dietary requirements for pregnancy, lactation and infancy
- 16.3.13** Food hygiene and health
- 16.3.14** Methods of cooking – nutrient losses and preservation
- 16.3.15** Dietary fiber and its therapeutic effects

16.3.16 Customs and traditions of eating

16.3.17 Emotional states and diet

#### 16.4 **Practical**

16.4.1 Visits to different diet departments of naturopathy and modern medicine hospitals

16.4.2 Menu planning using natural foods and raw diet in general

16.4.3 Demonstration of different sprouts

16.4.4 Preparation of low cost balanced diet for different population groups using natural foods

16.4.5 Canteen duties at different naturopathy hospitals

16.4.6 Visit to different nutrition centers like CFTRI, Mysore, NIN, Hyderabad etc.

16.4.7 Study of 20 fasting cases

16.4.8 Case studies of 10 with records

#### 16.5 **Textbooks**

16.5.1 Fasting for Healthy and Long Life – Carrington

16.5.2 Fasting Cure – Lakshman Sharma

16.5.3 Fasting - The Ultimate Diet - Allan Cott

16.5.4 Mucusless Diet Healing System - Arnold Ehret

16.5.5 The Fasting Cure (Classic Reprint) - Upton Sinclair

16.5.6 Fasting Can Save Your Life - Herbert M. Shelton

16.5.7 Davidson and Passamore Human Nutrition – Passamore

16.5.8 Clinical Dietetics and Nutrition – FP Antia

16.5.9 Normal Therapeutic Nutrition – Corinne Robinson

16.5.10 Essentials of Food and Nutrition – Swaminathan

16.5.11 Sprouts – JD Vaish *Yoga Samsthan*

16.5.12 Science and Art of Food and Nutrition – Herbert Shelton

16.5.13 Nutritive Values of Indian Foods – NIN (Hyd)

16.5.14 Publications of NIN, Hyderabad

### 16.6 **Scheme Of Examination**

S.No	Subject	Theory	Internal Assmt	Viva-Voce	Total	Practicals	Internal Assmt	Total Marks	Grand Total Marks
01.	Fasting Therapy and Dietetics	80	20	30	130	60	10	70	200

## **17. OBSTETRICS AND GYNECOLOGY (Duration: 12 Months)**

**Total hours: 150 (Theory: 100 Practical: 50)**

### **17.1 Goals and Objectives**

#### **17.1.1 Goal:**

The goal of teaching Obstetrics and Gynecology to undergraduate students is to provide them with the comprehensive knowledge of anatomy, physiology and pathophysiology of the reproductive system and gain the ability to optimally manage common problems.

#### **17.1.2 Objectives:**

##### **17.1.2.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 17.1.2.1.1 Delineate the anatomy, physiology and pathophysiology of the reproductive system and the common conditions affecting it;
- 17.1.2.1.2 Detect normal pregnancy, labor, and puerperium;
- 17.1.2.1.3 Elucidate the leading causes of maternal and perinatal morbidity and mortality;
- 17.1.2.1.4 Understand the principles of contraception and various methods employed, methods of medical termination of pregnancy, sterilization and their complications;
- 17.1.2.1.5 Recognize the use, abuse and side effects of drugs in pregnancy, pre-menopausal and post-menopausal periods;

- 17.1.2.1.6 Explain the national programmes of maternal and child health and family welfare and their implementation;
- 17.1.2.1.7 Assess different gynecological diseases and describe principles of their management;
- 17.1.2.1.8 Explain the indications, techniques and complications of procedures like Caesarean section, laparotomy, abdominal and vaginal hysterectomy, and vacuum aspiration for Medical Termination of Pregnancy (MTP).

**17.1.2.2 Skills:**

After the completion of the course, the student shall be able to:

- 17.1.2.2.1 Examine a pregnant women, recognize high risk pregnancies and make appropriate referrals;
- 17.1.2.2.2 Recognise complications of delivery and provide postnatal care;
- 17.1.2.2.3 Recognize congenital anomalies of newborn;
- 17.1.2.2.4 Advise a couple on the use of various available contraceptive devices;
- 17.1.2.2.5 Perform pelvic examination, diagnose and manage common gynaecological problems including early detection of genital malignancies;
- 17.1.2.2.6 Interpret data of investigations like biochemical, histopathological, radiological, ultrasound etc

### **17.1.2.3 Integration**

At the completion of training, the student should be able to integrate knowledge of Obstetrics and Gynaecology to manage related ailments and educate masses on family planning norms.

## **17.2 Theory**

### **17.2.1 Obstetrics**

#### 17.2.1.1 Basic Anatomy and Physiology

17.2.1.1.1 Anatomy and Physiology of female reproductive organs and pelvis

17.2.1.1.2 Maturation and fertilization of ovum

17.2.1.1.3 Development of placenta

17.2.1.1.4 Embryology of uterus

#### 17.2.1.2 Physiology of pregnancy

17.2.1.2.1 Maternal changes due to pregnancy

17.2.1.2.2 Diagnosis of pregnancy

17.2.1.2.3 Differential diagnosis of pregnancy

17.2.1.2.4 Foetus in normal pregnancy

17.2.1.2.5 Antenatal care

#### 17.2.1.3 Physiology of labor

17.2.1.3.1 Causation and stages of labor

17.2.1.3.2 Mechanism of labor

17.2.1.3.3 Conduct of normal labor

#### 17.2.1.4 Physiology puerperium

17.2.1.4.1 Phenomena of normal puerperium

- 17.2.1.4.2 Care of puerperium
- 17.2.1.4.3 Care of new born child
- 17.2.1.5 Pathology of pregnancy
  - 17.2.1.5.1 Hyperemesis gravidarum
  - 17.2.1.5.2 Venereal diseases
  - 17.2.1.5.3 Anemia in pregnancy
  - 17.2.1.5.4 Diseases of the urinary system
  - 17.2.1.5.5 Diabetes in pregnancy
  - 17.2.1.5.6 Diseases and abnormalities of fetal membranes and placenta
  - 17.2.1.5.7 Abortion
  - 17.2.1.5.8 Ectopic pregnancy
  - 17.2.1.5.9 Ante-partum hemorrhage
  - 17.2.1.5.10 Placenta previa
- 17.2.1.6 Pathology of labor
  - 17.2.1.6.1 Occipito-posterior position
  - 17.2.1.6.2 Breech presentation
  - 17.2.1.6.3 Prolapse of the cord, compound presentation
  - 17.2.1.6.4 Multiple pregnancy
  - 17.2.1.6.5 Contracted pelvis
  - 17.2.1.6.6 Management of labor in contracted pelvis
  - 17.2.1.6.7 Complications of 3<sup>rd</sup> stage of labor
- 17.2.1.7 Affection of new-born
  - 17.2.1.7.1 Asphyxia neonatorum
  - 17.2.1.7.2 Pre-term baby
  - 17.2.1.7.3 Congenital malformations

17.2.1.8 Obstetrical operations

17.2.1.8.1 Forceps

17.2.1.8.2 Caesarean section

17.2.1.8.3 Induction of abortion and labor

17.2.1.9 Pathology of Puerperium – Puerperal infections

17.2.1.10 Miscellaneous:

17.2.1.10.1 Perinatal mortality and maternal mortality

17.2.1.10.2 Post-dated pregnancy

17.2.1.10.3 Placenta insufficiency

17.2.1.10.4 Control of contraception

17.2.1.10.5 Medical termination of pregnancy

17.2.1.10.6 Pre-term labor

17.2.1.10.7 Ultrasonogram in Obstetrics

17.2.1.11 Applied aspects in Obstetrics:

17.2.1.11.1 *Yoga* and Naturopathy for Healthy parenthood

17.2.1.11.2 Antenatal and postnatal care through *Yogic* methods

17.2.1.11.3 Antenatal and postnatal care through Naturopathic modalities

17.2.1.11.4 Antenatal and postnatal care through general exercises

17.2.1.11.5 Antenatal and postnatal care through Hydrotherapy

17.2.1.11.6 Natural diet during pregnancy and lactation

## **17.2.2 Gynecology**

### 17.2.2.1 Anatomy of the female pelvic organs

17.2.2.1.1 External genitalia

17.2.2.1.2 Internal genitalia

17.2.2.1.3 Female urethra

17.2.2.1.4 Urinary bladder

17.2.2.1.5 Pelvic ureter

17.2.2.1.6 Rectum and Anal canal

17.2.2.1.7 Pelvic muscles

17.2.2.1.8 Pelvic fascia and cellular tissue

### 17.2.2.2 Blood vessels, lymphatic drainage and innervations of pelvic organs

17.2.2.2.1 Pelvic blood vessels

17.2.2.2.2 Pelvic lymphatics

17.2.2.2.3 Pelvic nerves

### 17.2.2.3 Puberty and Menopause

### 17.2.2.4 Neuroendocrinology in relation to reproduction

### 17.2.2.5 Menstruation

### 17.2.2.6 Examination of a gynecological patient and the diagnostic aids

17.2.2.6.1 History

17.2.2.6.2 Examination

17.2.2.6.3 Ancillary aids

17.2.2.6.4 Cytology

17.2.2.6.5 Colonoscopy

17.2.2.7 Pelvic infection

17.2.2.7.1 Defense of the genital tract

17.2.2.7.2 Acute pelvic infection

17.2.2.7.3 Chronic pelvic infection

17.2.2.7.4 Genital tuberculosis

17.2.2.8 Sexually transmitted diseases

17.2.2.9 Infections of the individual pelvic organs

17.2.2.9.1 Vulva

17.2.2.9.2 Bartholin's gland

17.2.2.9.3 Vagina

17.2.2.9.4 Cervix

17.2.2.9.5 Endometrium

17.2.2.9.6 Fallopian tube

17.2.2.9.7 Ovary

17.2.2.9.8 Parametrium

17.2.2.10 Dysmenorrhea and other disorders of menstrual cycles

17.2.2.10.1 Dysmenorrhea

17.2.2.10.2 Dysfunctional uterine bleeding

17.2.2.11 Displacement of the uterus

17.2.2.11.1 Retroversion

17.2.2.11.2 Prolapse

17.2.2.11.3 Chronic inversion

17.2.2.12 Infertility

17.2.2.12.1 Causes

17.2.2.12.2 Investigations

- 17.2.2.12.3 Treatment
- 17.2.2.12.4 Assisted reproductive techniques
- 17.2.2.12.5 Counseling techniques
- 17.2.2.13 Benign lesions of the vulva and vagina
  - 17.2.2.13.1 Vulval epithelial disorders
  - 17.2.2.13.2 Vulval ulcers
  - 17.2.2.13.3 Vulval and vaginal cysts
- 17.2.2.14 Benign lesions of the cervix
- 17.2.2.15 Benign lesions of the uterus
  - 17.2.2.15.1 Fibroid
  - 17.2.2.15.2 Polyps
- 17.2.2.16 Benign lesions of the ovary
- 17.2.2.17 Ovarian neoplasm
- 17.2.2.18 Endometriosis and adenomyosis
- 17.2.2.19 Premalignant lesions
  - 17.2.2.19.1 Vulva
  - 17.2.2.19.2 Vagina
  - 17.2.2.19.3 Cervix
  - 17.2.2.19.4 Endometrium

- 17.2.2.20 Genital malignancy
  - 17.2.2.20.1 Cervical
  - 17.2.2.20.2 Endometrial
  - 17.2.2.20.3 Gestational trophoblastic neoplasia
  - 17.2.2.20.4 Ovarian
- 17.2.2.21 Urinary problems in gynecology
  - 17.2.2.21.1 Anatomy of the urethra-vesical unit
  - 17.2.2.21.2 Genuine stress incontinence
  - 17.2.2.21.3 Overflow incontinence
  - 17.2.2.21.4 Retention of urine
  - 17.2.2.21.5 Urinary tract infections
- 17.2.2.22 Genital fistulae
  - 17.2.2.22.1 Genito-urinary
  - 17.2.2.22.2 Recto-vaginal
- 17.2.2.23 Amenorrhea
  - 17.2.2.23.1 Physiological
  - 17.2.2.23.2 Primary
  - 17.2.2.23.3 Secondary
- 17.2.2.24 Contraception
  - 17.2.2.24.1 Barrier methods
  - 17.2.2.24.2 Natural
  - 17.2.2.24.3 IUCD
  - 17.2.2.24.4 Steroidal
  - 17.2.2.24.5 Emergency
  - 17.2.2.24.6 Sterilization

- 17.2.2.25 Special problems
  - 17.2.2.25.1 Abnormal vaginal discharge
  - 17.2.2.25.2 Pruritis vulvae
  - 17.2.2.25.3 Pelvic pain
  - 17.2.2.25.4 Postmenopausal bleeding
  - 17.2.2.25.5 Low backache
  - 17.2.2.25.6 Breast in gynecology
  - 17.2.2.25.7 Vaginismus
  - 17.2.2.25.8 Dyspareunia
  - 17.2.2.25.9 Hirsutism
  - 17.2.2.25.10 Galactorrhoea
- 17.2.2.26 Operative gynecology
  - 17.2.2.26.1 Postoperative care
  - 17.2.2.26.2 Dilation of cervix
  - 17.2.2.26.3 Dilation and curettage
  - 17.2.2.26.4 Dilation of and insufflation
  - 17.2.2.26.5 Hysterosalpingography
  - 17.2.2.26.6 Cervical biopsy
  - 17.2.2.26.7 Cryosurgery
  - 17.2.2.26.8 Perineoplasty
  - 17.2.2.26.9 Amputation of cervix
  - 17.2.2.26.10 Abdominal hysterectomy
  - 17.2.2.26.11 Vaginal hysterectomy
- 17.2.2.27 Endoscopic surgery in gynecology
  - 17.2.2.27.1 Laparoscopy

17.2.2.27.2 Hysteroscopy

17.2.2.28 Applied aspects in Gynecology:

17.2.2.28.1 Role of Naturopathy and *Yoga* in Gynecology

17.2.2.28.2 Water treatments for gynecological disorders.

17.3 **Practical**

17.3.1 History taking of antenatal and gynecological cases

17.3.2 Demonstration of physical examination of antenatal and postnatal gynecological cases

17.3.3 Demonstration of conductive labor, normal delivery and use of minor instruments during delivery.

17.3.4 Demonstrations of instruments like Sim's speculum, Cusco's bivalve self training vaginal speculum, Cervical dilators, Anterior vaginal wall retractor, Uterine curette

17.3.5 Specimens

17.3.6 X ray, US, and CT plates

17.3.7 Case-history writing of antenatal and gynecological cases

17.3.8 Demonstration of underwater delivery and painless delivery using acupuncture desired.

17.4 **Textbooks**

17.4.1 Clinical Obstetrics – Mudaliar and Menon

17.4.2 Textbook of Obstetrics and Gynecology – CS Dawn

17.4.3 Shaw's Gynecology

17.4.4 Textbook of Obstetrics and Gynecology - Dutta

### 17.5 **Scheme Of Examination**

S.No	Subject	Theory	Internal Assmt	Viva-Voce	Total	Practicals	Internal Assmt	Total Marks	Grand Total Marks
01.	Obstetrics and Gynaecology	80	20	30	130	60	10	70	200

## **18. YOGA THERAPY (Duration: 12 Months)**

**Total hours: 225 (Theory: 125 Practical: 100)**

### **18.1 Goals and Objectives**

#### **18.1.1 Goal**

The goal of teaching *Yoga* Therapy to undergraduate students is to provide them with comprehensive knowledge of *Yoga* and the physiological effects of various *yogic* practices and utilisation of the same for therapeutic purposes.

#### **18.1.2 Objectives:**

##### **18.1.2.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 18.1.2.1.1 Describe the physiological effects of various *yogic* practices like *kriyas*, *asanas*, *pranayamas*, *mudras*, *bandhas*, *drishtis*, Guided relaxation and Meditation;
- 18.1.2.1.2 Define rules and regulations of *Yoga* to be followed;
- 18.1.2.1.3 Understand the therapeutic aspects of *Yoga* as applied to different disease conditions;
- 18.1.2.1.4 Understand contraindications and indications of *yogic* practices in order to efficiently use *Yoga* as a therapy;
- 18.1.2.1.5 Understand the concept of health and disease in *yogic* lore and role of stress in disease causation and management of the same with *Yoga* ;
- 18.1.2.1.6 Understand importance of food according to *Yoga*;
- 18.1.2.1.7 Delineate the importance of *Yoga* and mental health;

### **18.1.2.2 Skills:**

After the completion of the course, the student shall be able to:

- 18.1.2.2.1 Utilise knowledge of *Yoga* therapy in managing various diseases;
- 18.1.2.2.2 Demonstrate usage of therapeutic aspect of *Yoga* in promotive, preventive, curative and rehabilitative therapy.
- 18.1.2.2.3 Institute remedial measures in *Yoga* for various disease conditions.

### **18.1.2.3 Integration**

At the completion of training, the student should be able to integrate knowledge of *Yoga* and efficiently utilize the same for therapeutic purposes.

## **18.2 Theory**

- 18.2.1 Introduction to *Yogic* Therapy / Basis of *yogic* Therapy
- 18.2.2 Role of *Asanas* in curing various diseases
- 18.2.3 Specific importance of *Pranayama* in curing various diseases
- 18.2.4 Vital role of *Bandhas*, *Mudras*, *Drishtis*, in curing various diseases
- 18.2.5 Role of *Shat kriyas* in curing various diseases
- 18.2.6 Role of general exercises in health and diseases
- 18.2.7 *Sudarshan Kriya* and other modern variants
- 18.2.8 The effects of various *Yogic* practices on different systems (skeletal system, endocrine system, nervous system, digestive system, respiratory system, excretory system, cardiovascular system, muscular system, reproductive system)

**18.2.9** Research methods in *yogic* therapy, statistical analysis etc.

**18.2.10** *Yoga* therapy for

- 18.2.10.1 Cardiovascular diseases
- 18.2.10.2 Psychiatric disorders
- 18.2.10.3 Musculoskeletal disorders
- 18.2.10.4 Nervous system disorders
- 18.2.10.5 Gastrointestinal disorders
- 18.2.10.6 Hormonal diseases
- 18.2.10.7 Respiratory diseases
- 18.2.10.8 Metabolic diseases
- 18.2.10.9 Ophthalmologic disorders
- 18.2.10.10 Pediatric disorders
- 18.2.10.11 ENT Disorders
- 18.2.10.12 OBG disorders

**18.2.11** Meditation and its applications on psychosomatic disorders

**18.2.12** *Yoga* and relaxation techniques

- 18.2.12.1 QRT – Quick Relaxation Technique
- 18.2.12.2 IRT – Instant Relaxation Technique
- 18.2.12.3 DRT – Deep Relaxation Technique

**18.2.13** Teaching methods of *Yoga* to public, students and patients. Model lesson planning and adoption of *Yoga* in education system, limitations, *vidhi* and *nishedha* (right and wrong)

**18.2.14** Advanced techniques of *Yoga* therapy (CM, PET, MSRT, MIRT, MEMT, VISAK, ANAMS, and SMET etc.)

**18.2.15** Subtle Energy Medicine

**18.2.16** *Yoga* and Mental Health: Total integration of personality, correct mental behavior and attitude, hormonal relationship of body and mind, self-content tranquilizing effect, psychology of spiritual growth and spiritual values, reasoning and judgment, pure consciousness, mode of living and disciplined life.

**18.2.17** *Drishtis*

**18.2.18** Stress management through *Yoga*

**18.2.19** Applied Psychology

18.2.19.1 Historical perspective, identifying disorders

18.2.19.1.1 Anxiety disorders

18.2.19.1.2 Dissociative disorders

18.2.19.1.3 Somatoform disorders

18.2.19.1.4 Sexual disorders

18.2.19.1.5 Mood disorders

18.2.19.1.6 Personality disorders

18.2.19.1.7 Schizophrenia

18.2.19.2 Therapy for psychological disorders: psychotherapy, therapy of interpersonal relations, behavior therapy

**18.2.20** Lesson planning and teaching methods in *Yoga*

### **18.3 Practical**

First three years' portions and:

**18.3.1** LSP

**18.3.2** QRT

**18.3.3** IRT

**18.3.4** DRT

- 18.3.5 TM
- 18.3.6 CM
- 18.3.7 SKY
- 18.3.8 SMET
- 18.3.9 PET
- 18.3.10 MSRT
- 18.3.11 MIRT
- 18.3.12 MEMT
- 18.3.13 VISAK
- 18.3.14 ANAMS.

#### 18.4 **Reference Books**

- 18.4.1 *Yogic Therapy* – Vinekar
- 18.4.2 *Yogic Therapy* – Garde
- 18.4.3 *Treatment of Common Diseases through Yoga* – Swami Satyananda Saraswati
- 18.4.4 *Seminar on Yoga, Science and Man* – CCRYN, Delhi
- 18.4.5 *Yoga for Healing* – PS Venkateswaran
- 18.4.6 *Handbook of Behavior Modification and Therapy* – Plenum Press
- 18.4.7 *Stress Management Research Papers* – VK *Yoga*, Bangalore
- 18.4.8 All Bihar School of *Yoga* publications

### 18.5 **Scheme Of Examination**

S.No	Subject	Theory	Internal Assmt	Viva-Voce	Total	Practicals	Internal Assmt	Total Marks	Grand Total Marks
01.	Yoga Therapy	80	20	30	130	60	10	70	200

## **19. HYDROTHERAPY AND MUD THERAPY**

**Total hours: 275 (Theory: 175 Practical: 100)**

### **19.1 Goals and Objectives**

#### **19.1.1 Goal:**

The goal of teaching Hydrotherapy and Mud Therapy to undergraduate students is to provide them with comprehensive knowledge of treating diseases using water and mud, and the physiological effects of various kinds of such applications, and utilisation of the same for therapeutic purposes.

#### **19.1.2 Objectives:**

##### **19.1.2.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 19.1.2.1.1 Describe the properties and chemical composition of water and mud used for therapeutic purposes, physiology of the skin, production of heat and body temperature regulation, which are essential as a foundation for hydrotherapy.
- 19.1.2.1.2 Illustrate physiological effects of hot and cold water upon the different systems of the body and applications to reflex areas ;
- 19.1.2.1.3 Explain action and reaction mechanisms and physiology, with their effects and uses
- 19.1.2.1.4 Demonstrate use of water in preservation, acute diseases, chronic diseases;
- 19.1.2.1.5 Show in-depth knowledge of general principles of hydrotherapy, therapeutic applications of water, along with therapeutic actions, indications and contra-indications; and classification of mud,

storing of mud, modes of mud treatment, cosmetic uses of mud and research updates in hydrotherapy and mud therapy;

19.1.2.1.6 Demonstrate techniques and procedures of various types of hydriatic applications;

**19.1.2.2 Skills:**

After the completion of the course, the student shall be able to:

19.1.2.2.1 Utilise knowledge of hydrotherapy and mud therapy in managing various diseases;

19.1.2.2.2 Demonstrate usage of therapeutic aspect of hydrotherapy and mud therapy treatments in promotive, preventive, curative and rehabilitative therapy.

19.1.2.2.3 Institute and evaluate remedial measures in hydrotherapy for various disease conditions in clinical as well as research settings.

**19.1.2.3 Integration**

At the completion of training, the student should be able to integrate knowledge of hydrotherapy in various diseases and efficiently utilise the same for therapeutic purposes.

**19.2 Hydrotherapy And Mud Therapy (Duration: 12 Months)**

**19.2.1** Introduction and History

**19.2.2** Physical properties and chemical composition of water

**19.2.3** Physiological basis of Hydrotherapy: The skin and its anatomical construction, functions of skin, temperature sense

- 19.2.4 Production of heat and its distribution in the body, regulation of the body temperature, conditions that increase and decrease heat production in the body, body heat and body temperature
- 19.2.5 Importance of water to human body
- 19.2.6 Physiological effects of water on different systems of the body
  - 19.2.6.1 General and physiological aspects of heat upon: Skin, Respiration, Circulation, Nervous system, Heat and its production-dissipation etc, Tactile and temperature sense
  - 19.2.6.2 General and physiological effects of cold upon: Skin, Respiration, Circulation, Nervous system, GIT, body temperature and its maintenance, circulatory system
- 19.2.7 Reflex areas of the body, results of application of hot and cold over reflex areas
- 19.2.8 Actions and reaction, incomplete reaction, conditions that encourage reaction, internal reaction, thermic reaction, modified thermic reaction
- 19.2.9 Place of water in preservation
- 19.2.10 Place of water in acute diseases
- 19.2.11 Place of water in chronic diseases
- 19.2.12 Magnesium sulphate – use in Hydrotherapy
- 19.2.13 General principles of Hydrotherapy
  - 19.2.13.1 General rules of hydrotherapy
  - 19.2.13.2 Therapeutic significance of reaction
  - 19.2.13.3 Adaptation of individual cases
  - 19.2.13.4 Exaggeration of symptoms under treatment, the untoward effects and how to avoid them

19.2.13.5 General indications and contra-indications

**19.2.14 Therapeutic actions and use of Hydrotherapy**

19.2.14.1 Classification of Hydratic effects, general principles – excitation and depression

19.2.14.2 Primary excitant effects – when to apply and when not to

apply 19.2.14.2.1 Local hemostatic effects – hydratic heart tonics

19.2.14.2.2 Cardiac effects – Hydratic heart tonics

19.2.14.2.3 Uterine excitations, emanagogic effects

19.2.14.2.4 Vesical excitations

19.2.14.2.5 Intestinal excitation, peristaltic effects

19.2.14.3 Secondary excitant effects

19.2.14.3.1 Restorative effects

19.2.14.3.2 Tonic effects of cold water, physiological effects of cold water, cold water vs. medical tonics, application in the following: anemia, neurasthenia, rheumatism, diabetes mellitus, valvular heart diseases

19.2.14.3.3 Calorific effects

19.2.14.3.4 Diaphoretic effects

19.2.14.3.5 Importance of attention to the skin in chronic diseases – alternative and qualitative effect – hot baths in Bright's diseases, sweating baths in Dropsy and Obesity. Depurative or Eliminative effects, Toxemia in Rheumatism

19.2.14.3.6 Expectorant effects

19.2.14.3.7 Diuretic effects – Bright's Disease, Uremia - eclampsia

19.2.14.3.8 Atomic dyspepsia, hyperacidity

19.2.14.3.9 Revulsive and derivative effects, fluxion, revulsive methods for combating superficial anemia and for relief of deep congestion method adopted to anemia of deep rooted organs revulsion on analgesic method

19.2.14.4 Resolvent effects

19.2.14.4.1 Sedative effects – general sedatives – local sedatives:

19.2.14.4.1.1 Sedatives of circulatory system – antiphlogistic effects, inflammation, pneumonia, pleurisy, other acute disorders

19.2.14.4.1.2 Nerve sedatives, hypnotic, calmative, analgesic, anesthetic, antispasmodic, insomnia, chorea, spastic paralysis, exophthalmia, goiter, mania, epilepsy and various painful conditions

19.2.14.4.1.3 Antithermic and antipyretic effects, relation to heat production and heat elimination to antipyretic methods, principles that govern the application of hydriatic measures for the reduction of temperature in fevers, methods that may be efficiently employed in various morbid conditions accompanied by rise in temperature – suggestions, effects, indications and contraindications

19.2.14.4.1.4 Secretory and sedative effects prophylactic uses - Cold bathing in infancy and early childhood, cold bathing for adults, cold baths for women, cold baths in old age - precautions

**19.2.15** The techniques of Hydrotherapy

19.2.15.1 Water Baths

19.2.15.1.1 Plain water bath

- 19.2.15.1.2 Cold hip bath
- 19.2.15.1.3 Kellogg's and Kuhne's sitz bath
- 19.2.15.1.4 Shallow bath – for males and females
- 19.2.15.1.5 Arm and foot bath
- 19.2.15.1.6 Graduated bath
- 19.2.15.1.7 Natural bath
- 19.2.15.1.8 Non-revulsive bath
- 19.2.15.1.9 Immersion bath
- 19.2.15.1.10 Cold plunge
- 19.2.15.1.11 Whirlpool bath
- 19.2.15.1.12 Aeration bath
- 19.2.15.1.13 Vichy spray massage
- 19.2.15.1.14 Rapid bath
- 19.2.15.1.15 Brand bath
- 19.2.15.1.16 Fever bath
- 19.2.15.1.17 River bathing
- 19.2.15.1.18 Sea bathing
- 19.2.15.2 Various baths and air baths
  - 19.2.15.2.1 Russian bath
  - 19.2.15.2.2 Turkish bath
  - 19.2.15.2.3 Steam bath
  - 19.2.15.2.4 Local steam bath
  - 19.2.15.2.5 Steam inhalation
  - 19.2.15.2.6 Hot air bath
  - 19.2.15.2.7 Local hot air bath

- 19.2.15.2.8 Super-hot air bath
- 19.2.15.2.9 Cold air bath
- 19.2.15.2.10 Indoor and outdoor bath

### 19.2.15.3 Pool therapy

#### 19.2.15.3.1 Introduction

#### 19.2.15.3.2 Principles of treatment part I and part II

#### 19.2.15.3.3 Physiological and therapeutic effects of exercise in warm water

#### 19.2.15.3.4 Indications and contraindications

#### 19.2.15.3.5 Dangers and precautions

### 19.2.15.4 Douches

- 19.2.15.4.1 Cold Douche
- 19.2.15.4.2 Hot Douche
- 19.2.15.4.3 Neutral Douche
- 19.2.15.4.4 Alternative Douche
- 19.2.15.4.5 Underwater Douche
- 19.2.15.4.6 Contrast Douche
- 19.2.15.4.7 Horizontal Jet
- 19.2.15.4.8 Cephalic Douche
- 19.2.15.4.9 Lumbar Douche
- 19.2.15.4.10 Fan Douche
- 19.2.15.4.11 Rain Douche or Shower Douche
- 19.2.15.4.12 Hepatic Douche
- 19.2.15.4.13 Circular Douche and semi-circular Douche
- 19.2.15.4.14 Cerebrospinal Douche
- 19.2.15.4.15 Plantar Douche

19.2.15.4.16 Percussion Douche

19.2.15.4.17 Scotch Douche

19.2.15.5 Packs and compresses

19.2.15.6 Procedures that increase oxidation

19.2.15.7 Measures that encourage general and local metabolic activity

19.2.15.8 Procedures that increase general blood movement and local  
blood supply

19.2.15.9 Measures that increase heat production

19.2.15.10 Measures that increase the elimination of heat

19.2.15.11 Measures that combat bacterial development of blood

19.2.15.12 Measures that increase/lessen heat elimination

19.2.15.13 Hydratic incompatibility

19.2.15.14 Adoption of hydratic prescription of individual disease

19.2.15.15 Hydrotherapy as a means of rehabilitation and health promotion

19.2.15.16 Emergency treatments in Hydrotherapy

## **19.2.16 Mud Therapy**

19.2.16.1 Introduction to Mud therapy

19.2.16.2 Classification of Mud for therapeutic use

19.2.16.3 Precautions for storing mud

19.2.16.4 Methods of treatment of mud

19.2.16.4.1 Applications

19.2.16.4.2 Packing

19.2.16.4.3 Hot poultices

19.2.16.5 Effect of Mud on different systems of body

19.2.16.6 Types of mud therapy applications

19.2.16.6.1 Natural mud bath

- 19.2.16.6.2 Full and partial mud packs
- 19.2.16.6.3 Mud plaster
- 19.2.16.6.4 Thermal bath
- 19.2.16.6.5 Dry pack
- 19.2.16.6.6 Sand pack and sand baths
- 19.2.16.7 Cosmetic uses of mud
- 19.2.16.8 Research updates

### 19.3 **Practical**

- 19.3.1 Demonstration of various therapeutic effects, procedure and treatments in Hydrotherapy during clinical classes at the Hospital
- 19.3.2 At the end of the Final BNYS course, candidate should be in a position to give treatments independently
- 19.3.3 5 case documentation of all hydriatic applications
- 19.3.4 Clinical dissertation on case studies with minimum sample size of 20 patients on one general and two local applications

### 19.4 **Textbooks**

- 19.4.1 Baths – SJ Singh
- 19.4.2 My Water Cure – Sebastian Kneipp
- 19.4.3 Rational Hydrotherapy – JH Kellogg
- 19.4.4 Healing Clay –Michael Abserra
- 19.4.5 Our Earth Our Cure – Raymond Dextroit

### 19.5 **References**

- 19.5.1 Handbook of Hydrotherapy – Shew Joel

19.5.2 Hydrotherapy in Practice – Davis BC & Harrison RA

19.5.3 Medical Hydrology – Sidney Licht

19.6 **Scheme Of Examination**

S.No	Subject	Theory	Internal Assmt	Viva-Voce	Total	Practicals	Internal Assmt	Total Marks	Grand Total Marks
01.	Hydrotherapy and Mud Therapy	80	20	30	130	60	10	70	200

## **20. PHYSICAL MEDICINE & REHABILITATION (Duration: 12 Months)**

**Total hours: 250 (Theory: 150 Practical: 100)**

### **20.1 Goals and Objectives**

#### **20.1.1 Goal:**

The goal of teaching Physical Medicine and Rehabilitation to undergraduate students is to provide them with the knowledge and skills needed for utilisation of Physical medicine for therapeutic, rehabilitative purposes.

#### **20.1.2 Objectives:**

##### **20.1.2.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 1.1.1.1.1 Define principles of basic physics that act as a foundation for physical medicine
- 1.1.1.1.2 Describe exercise therapy in detail, including starting positions, movements and their types, muscle strength, joint movement, relaxation, posture, co-ordination, gait, walking aids, neuromuscular facilitation, suspension therapy and their therapeutic applications, including allied modalities like heat treatments and cryotherapy;
- 1.1.1.1.3 Understand electrotherapy in terms of fundamentals, principles, laws of electricity and magnetism, practical and theoretical aspects of electrotherapeutic applications, such as faradic and galvanic currents, high frequency currents, laser, ultrasound, radiation therapy (IR &UV), TENS and IFT.

### **1.1.1.2 Skills:**

After the completion of the course, the student shall be able to:

- 1.1.1.1.1 Demonstrate usage of therapeutic applications of physical medicine in promotive, preventive, curative and rehabilitative therapy, focusing on rehabilitation.
- 1.1.1.1.2 Institute remedial measures in *Yoga* for various disease conditions.

### **1.1.1.2 Integration**

At the completion of training, the student should be able to integrate knowledge of various treatments used in Physical Medicine and efficiently utilise the same for rehabilitative and therapeutic purposes.

## **20.2 Theory**

### **20.2.1 Exercise therapy**

#### 20.2.1.1 Basic Physics in Exercise Therapy

- 20.2.1.1.1 Mechanics: Force, gravity, line of gravity, center of gravity in human body, base, equilibrium, axes and planes
- 20.2.1.1.2 Mechanical Principles: lever, order of lever, examples in human body, pendulum, spring

#### 20.2.1.2 Introduction to exercise therapy

20.2.1.3 Starting positions: Fundamental starting positions, derived positions, muscle work for all the fundamental starting positions

#### 20.2.1.4 Classification of movements in detail

- 20.2.1.4.1 Voluntary movements

- 20.2.1.4.2 Involuntary movements
- 20.2.1.5 Active movements
- 20.2.1.6 Passive movements
- 20.2.1.7 Muscle strength: Anatomy and physiology of muscle tissue, causes of muscle weakness/paralysis, types of muscle work and contractions, range of muscle work, muscle assessment, Principles of muscle strengthening/reeducation, early reeducation of paralyzed muscles
- 20.2.1.8 Joint movement: Classification of joint movements causes for restriction of joint movement, prevention of restriction of joints range of movement, principles of mobilization of joint in increasing the range of motion. Technique of mobilization of stiff joint.
- 20.2.1.9 Relaxation: Techniques of relaxation, Principles of obtaining relaxation in various positions
- 20.2.1.10 Posture: types, factors responsible for good posture, factors for poor development of posture
- 20.2.1.11 Coordination exercises: Definition of coordinated movements, in coordinated movements, Principles of coordinated movements, technique of coordination exercise
- 20.2.1.12 Gait: Analysis of normal gait with muscles work, various pathological gaits
- 20.2.1.13 Crutch gait: introduction, crutch measurement, various types of crutch gait in detail
- 20.2.1.14 Neuromuscular facilitation techniques, functional reeducation

- 20.2.1.15 Suspension therapy: Principles of suspension, types of suspension therapy, effects and uses of suspension therapy with their application either to mobilize a joint to increase joint range of motion or increase muscle power, explaining the full details of the components used for suspension therapy
- 20.2.1.16 Myofascial Release Therapy and related therapies used in Sports Medicine
- 20.2.1.17 Therapeutic applications

## 20.2.2 Electrotherapy

- 20.2.2.1 Electrical fundamentals
  - 20.2.2.1.1 Physical principles
  - 20.2.2.1.2 Structure and properties of matter
  - 20.2.2.1.3 Molecular atom, proton, neutron, electron, ion etc.
- 20.2.2.2 Electrical energy
  - 20.2.2.2.1 Nature of electricity current
  - 20.2.2.2.2 Static electricity
  - 20.2.2.2.3 Electric potentials generated by cell
- 20.2.2.3 Ohm's Law
- 20.2.2.4 Joule's Law
- 20.2.2.5 Magnetic energy
  - 20.2.2.5.1 Nature and property of a magnet
  - 20.2.2.5.2 magnetic induction
  - 20.2.2.5.3 Shaw rule
  - 20.2.2.5.4 Maxwell's corkscrew rule

## 20.2.2.6 Electromagnetic induction

20.2.2.6.1 principle and working of choke

20.2.2.6.2 Coil

20.2.2.6.3 Transformer

20.2.2.6.4 Rectification of AC to DC

20.2.2.6.5 Metal oxide rectifier

## 20.2.2.7 Semiconductor

20.2.2.7.1 Diode and Triode

## 20.2.2.8 Valves

## 20.2.2.9 Principles of working in a capacitor

20.2.2.9.1 Details of charging and discharging etc.

## 20.2.2.10 Transistors

## 20.2.2.11 measurement of current intensity

## 20.2.2.12 EMS and power

## 20.2.2.13 Moving coil milliammeter and voltmeter

## 20.2.2.14 Low frequency currents

20.2.2.14.1 Nature and principles of production of muscles stimulating currents

20.2.2.14.2 Types of low frequency currents used for treatment

20.2.2.14.3 Therapeutic electric stimulation

20.2.2.14.4 Ionotophoresis

20.2.2.14.5 Phonophoresis

- 20.2.2.15 Preparation for electrotherapy
  - 20.2.2.15.1 Preparation of apparatus
- 20.2.2.16 Patient treatment technique
  - 20.2.2.16.1 Stimulating muscles of extremity, back and face through the motor points
- 20.2.2.17 Faradic and Galvanic currents
- 20.2.2.18 High frequency current treatments
  - 20.2.2.18.1 Physics of high frequency currents
  - 20.2.2.18.2 Principles
  - 20.2.2.18.3 Biophysics of heat physiology and cold.
  - 20.2.2.18.4 Production, physiological and therapeutic effects and uses.
  - 20.2.2.18.5 Technique of treatment, dangers and precautions, contraindications of:
    - 20.2.2.18.5.1 Ultrasonic therapy
- 20.2.2.19 Principles of radiation therapy
  - 20.2.2.19.1 Physics of radiation therapy
  - 20.2.2.19.2 Laws governing radiation: Production, physiological and therapeutic effects, uses, techniques of treatment, dangers and precautions, contraindications etc. of:
    - 20.2.2.19.2.1 IRR therapy
    - 20.2.2.19.2.2 UV therapy
  - 20.2.2.19.3 Basic principles of TENS and IFT
  - 20.2.2.19.4 Laser Therapy

20.2.2.20 Wax therapy

20.2.2.20.1 Physics of wax therapy

20.2.2.20.2 Physiological and therapeutic effects and uses

20.2.2.20.3 Techniques of application

### 20.3 **Practical Electrotherapy**

#### 20.3.1 Interrupted/modified DC

20.3.1.1 Stimulation of muscles directly

20.3.1.2 Diagnostic tests:

20.3.1.2.1 FG test

20.3.1.2.2 SD curve

20.3.1.2.3 Fatigue test

20.3.1.3 Uses of surged Faradism and interrupted Galvanism in various peripheral nerve lesions

20.3.1.3.1 Neuropraxia

20.3.1.3.2 Axonotmesis

20.3.1.3.3 Neurotmesis

#### 20.3.2 High Frequency current treatment

20.3.2.1 UV radiation: Setting up of apparatus selection of lamps technique of application of UVR for various conditions like test dose, general body bath, acne vulgaris, alopecia areata and totalis, ulcers, psoriasis, rickets and general debility patients.

20.3.2.2 Ultrasonics: Setting up of apparatus, selection of dose, and technique of application of various conditions and to various parts of the body.

20.3.2.3 Laser – setting up apparatus including selection of method, technique, preparation of patient, checking contraindications, application for various conditions and parts of the body.

## 20.4 **Practical Exercise Therapy**

- 20.4.1 Demonstration and practice of active and passive movements
- 20.4.2 Demonstration and practice of putting suspension to shoulder joint and elbow joint in upper limbs, hip and knee joints in lower limbs for all movements. Demonstration of total suspension.
- 20.4.3 Muscle strength: Demonstration and practice of strengthening, reeducation of weak/paralyzed muscles of both upper and lower extremity, individual group muscles, abdominal muscle exercises
- 20.4.4 Joint movement: Demonstration and practice of techniques to improve joint range of motion of hip joint, knee joint, ankle and foot, shoulder, elbow joint, radio- ulnar joint, wrist, etc
- 20.4.5 Demonstration and practice of free exercise to improve joint range of motion (Small joint, Eg: Hand, fingers, toes, etc). Demonstration and practice of all crawling exercises, faulty posture, correcting techniques etc.
- 20.4.6 Demonstration of various pathological gaits.
- 20.4.7 Measurement of crutches, walking aids, strengthening muscles, crutch balance, demonstration and practice of all crutch gaits.
- 20.4.8 Breathing exercises: Demonstration and practice of diaphragmatic breathing, localized expansion exercises.
- 20.4.9 Passive stretching: Techniques of passive stretching to sternomastoid muscle, shoulder abductors, elbow flexors, supinator, wrist and finger flexors in upper limbs, passive stretching to hip flexors, adductors, iliotibial band, tensor fascia lata, quadriceps, knee flexors, tendoachilles, etc

## 20.5 **Reference Books**

20.5.1 Principles of Exercise therapy – Dina Gardiner

20.5.2 Tidy's Physiotherapy

20.5.3 Cash's Textbook of Physiotherapy

20.5.4 Clayton's Electrotherapy

## 20.6 **Scheme of Examination**

S.No	Subject	Theory	Internal Assmt	Viva-Voce	Total	Practicals	Internal Assmt	Total Marks	Grand Total Marks
01.	Physical Medicine and Rehabilitation	80	20	30	130	60	10	70	200

## **21. FIRST AID AND EMERGENCY MEDICINE (Duration: 12 Months)**

**Total hours: 150 (Theory: 100 Practical: 50)**

### **21.1 Goals and Objectives**

#### **21.1.1 Goal:**

The goal of teaching First Aid and Emergency Medicine to undergraduate students is to provide them with the skills and knowledge required to manage medical emergencies efficiently.

#### **20.1.3 Objectives:**

##### **20.1.3.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 20.1.3.1.1 Illustrate working knowledge about Golden hour
- 20.1.3.1.2 Describe quick assessment and recognition of emergency conditions;
- 20.1.3.1.3 Demonstrate specific first aid measures and emergency treatments used for handling emergency cases before and after diagnosis of the condition;

##### **20.1.3.2 Skills:**

After the completion of the course, the student shall be able to:

- 20.1.3.2.1 Demonstrate usage of first aid procedures in various emergency situations
- 20.1.3.2.2 Describe assessment of emergencies and treatment of the same with suitable procedures.
- 20.1.3.2.3 Possess the knowledge and skills to perform Basic Life Support procedures in the Golden Hour.

20.1.3.2.4 Able to assess the severity of an emergency condition so as to act in accordance and take necessary steps to prevent further complications.

### **20.1.3.3 Integration**

At the completion of training, the student should be able to effectively use his/her knowledge of assessment and management of medical emergencies in his/her professional practice.

## **21.2 First Aid**

- 21.2.1 General principles of first aid-definition, principles, responsibilities and golden rules
- 21.2.2 Resuscitation techniques-basic life support, mouth to mouth ventilation, artificial ventilation, Sylvester method.
- 21.2.3 Unconsciousness and general principles of treatment, recovery position
- 21.2.4 Transportation and handling of patient
- 21.2.5 Hemorrhage and bleeding
- 21.2.6 Shock
- 21.2.7 Wounds
- 21.2.8 Bandages ,dressing and slings
- 21.2.9 Fractures, sprains and strains
- 21.2.10 Poisoning
- 21.2.11 Asphyxia, Aspiration, drowning, suffocation and strangulation
- 21.2.12 Road accidents
- 21.2.13 Effect of temperature, sunburn, hypothermia, frost bite, heat exhaustion, heat stroke

- 21.2.14 Burns and scalds, electrical injuries
- 21.2.15 Head injury, chest injury, blast injury, crush injury
- 21.2.16 Sports injuries
- 21.2.17 Epilepsy-febrile convulsions
- 21.2.18 Syncope
- 21.2.19 Dog bite, snake bite, scorpion bite and bee sting
- 21.2.20 Emergencies in diasthetic patients and cardiac patient

### **21.3 Recognition, Evaluation Of Clinical Emergencies**

#### **21.3.1 CVS**

- 21.3.1.1 Acute myocardial infarction
- 21.3.1.2 Cardiogenic shock
- 21.3.1.3 Cardiac arrhythmias
- 21.3.1.4 Cardiac arrest
- 21.3.1.5 Hypertensive emergencies
- 21.3.1.6 Pulmonary embolism
- 21.3.1.7 Dissection of aortic aneurysm
- 21.3.1.8 Cardiac tamponade
- 21.3.1.9 DVT

#### **21.3.2 Respiratory System**

- 21.3.2.1 Hemoptysis
- 21.3.2.2 Status asthmaticus
- 21.3.2.3 Spontaneous pneumothorax
- 21.3.2.4 Acute respiratory failure
- 21.3.2.5 Massive pulmonary collapse

21.3.2.6 Acute laryngeal obstruction

21.3.2.7 ARDS

21.3.2.8 Pneumonia

21.3.2.9 Massive pleural effusion

### 21.3.3 Gastrointestinal System

21.3.3.1 Acute vomiting

21.3.3.2 Perforation of Peptic Ulcer

21.3.3.3 Hematemesis

21.3.3.4 Hepatic Pre coma and coma

21.3.3.5 Acute pancreatitis

21.3.3.6 Acute pain in abdomen

21.3.3.7 Obstruction of intestine

### 21.3.4 Nervous System

21.3.4.1 Unconscious patient

21.3.4.2 Cerebrovascular catastrophes

21.3.4.3 Convulsions

21.3.4.4 Status epilepticus

21.3.4.5 TIA

21.3.4.6 Spinal cord injuries

21.3.4.7 Brain death

21.3.4.8 Head injury

21.3.4.9 Acute ascending polyneuritis

### 21.3.5 Renal System

21.3.5.1 Acute renal failure

21.3.5.2 Renal colic

21.3.5.3 Hematuria

21.3.5.4 Hyperkalaemia

21.3.5.5 Hypokalaemia

21.3.5.6 Hyponatremia

### 21.3.6 Endocrine and Metabolism

21.3.6.1 Thyroid crisis

21.3.6.2 Adrenal crisis

21.3.6.3 Diabetic ketoacidosis and coma

21.3.6.4 Hypoglycemia

21.3.6.5 Tetany

21.3.6.6 Hypercalcemia

### 21.3.7 Miscellaneous Emergencies

21.3.7.1 Syncope

21.3.7.2 Acute peripheral circulatory failure

21.3.7.3 Anaphylaxis

21.3.7.4 Hypothermia

21.3.7.5 Hyperpyrexia

21.3.7.6 Poisoning

21.3.7.7 Drug overdose

#### 21.4 **Practical**

- 21.4.1 History taking and physical examination of cases
- 21.4.2 Case sheet writing in different general cases (25)
- 21.4.3 Demonstration of equipment and instruments used for investigation in modern diagnostics
- 21.4.4 Demonstration tour of an ultra-modern super specialty hospital to see the latest techniques management of emergency conditions

#### 21.5 **Textbooks**

- 21.5.1 Hutchison's Clinical Methods
- 21.5.2 Manual of Clinical Methods – PS Shankar
- 21.5.3 First Aid – Red Cross Society
- 21.5.4 First Aid – St. John Ambulance Association
- 21.5.5 First Aid – LC Gupta
- 21.5.6 Bailey and Love's Short Practice of Surgery
- 21.5.7 Harrison's Principle of Internal Medicine
- 21.5.8 Davidson's Principle and Practice of Medicine
- 21.5.9 Medical Emergency, Diagnosis and Management

21.6 **Scheme of Examination**

S.No	Subject	Theory	Internal Assmt	Viva-Voce	Total	Practicals	Internal Assmt	Total Marks	Grand Total Marks
01.	First Aid and Emergency Medicine	80	20	30	130	60	10	70	200

## **22. CLINICAL NATUROPATHY (Duration: 12 months)**

**Total hours: 300 (Theory: 200 Practical: 100)**

### **20.2 Goals and Objectives**

#### **20.2.1 Goal:**

The goal of teaching Clinical Naturopathy to undergraduate students is to train them to provide well integrated clinical service in Naturopathy.

#### **19.1.3 Objectives:**

##### **19.1.3.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 19.1.3.1.1 Illustrate decision making in Naturopathy ;
- 2.24.3.1.2 Understand the basic principles of screening and prevention of disease;
- 2.24.3.1.3 Comprehend the scope of practice- patterns of use, fields of practice, regulations, limitations;
- 2.24.3.1.4 Understand the concept of healing and disease crises and management of the same.
- 2.24.3.1.5 Understand the pathogenesis of the disease in Naturopathy basis and preventive measures of the same;
- 2.24.3.1.6 Create a specific module of therapy for the particular patient with varied presentations.

##### **2.24.3.2 Skills:**

After the completion of the course, the student shall be able to:

- 2.24.3.2.1 Apply his /her knowledge of clinical Naturopathy in managing various diseases;

2.24.3.2.2 Demonstrate usage of therapeutic aspect of clinical Naturopathy in curative and rehabilitative therapy;

2.24.3.2.3 Utilize his/ her knowledge of clinical Naturopathy for prevention of disease and promotion of health;

### **2.24.3.3 Integration**

At the completion of training, the student should be able to integrate knowledge of clinical Naturopathy and efficiently utilise the same for therapeutic purposes.

## **2.2 Theory**

### **2.2.1 Good Clinical Practice**

#### **2.2.1.1 Guidelines and Standards**

### **2.2.2 Decision-making in Naturopathy**

### **2.2.3 Screening and Prevention of Disease**

#### **2.2.3.1 Basic principles of screening**

### **2.2.4 Scope of practice**

#### **2.2.4.1 Patterns of use**

#### **2.2.4.2 Fields of practice**

#### **2.2.4.3 Regulations**

#### **2.2.4.4 Limitations**

### **2.2.5 Cardinal manifestations and presentation of disease**

**2.2.6 Naturopathic prescription-making and algorithmic line of management for the following diseases:**

Abscess, Acid-Peptic Disease, Acne, AIDS, Aging, Allergies, Alopecia, Alzheimer's disease, Anal fissures, Anemia, Anorexia nervosa, Anxiety disorders, Appendicitis, Arthritis – OA & RA, Asthma, ADD/ADHD, Back pain, Bad breath, Bedsore, Bladder infection, Bronchitis, Bruise, Bursitis, Cancer - Breast cancer, Cervical cancer, Colorectal cancer, Leukemia, Lung cancer, Prostate cancer, Skin cancer, Stomach cancer, Uterine cancer; Dental caries, Cardiovascular disease, Cerebrovascular disease, Chlamydia, Chloasma (Age spots), Chronic fatigue syndrome, Cirrhosis, Common cold, Colic, Colitis, Nasal congestion, Conjunctivitis, Constipation, Menstrual cramps, Crohn's disease, Cuts (cuts, wounds and scratches), Cyst, Cystitis, Dandruff, Deep venous thrombosis, Clinical depression, Dermatitis, Diabetes, Diarrhea, Diverticulitis, Dizziness, Duodenal ulcer, Dysmenorrhea, Dyspepsia, Diabetes mellitus, Earache, Earwax blockage, Eczema, Edema, Emphysema, Endometriosis, Epilepsy, Erectile dysfunction, External otitis, Fainting, Farsightedness, Fatigue, Fever, Fibromyalgia, Flatulence, Flu, Folliculitis, Food poisoning, Foot odor, Gallstones, Gas, Gastritis, Gastroenteritis, GERD, Gingivitis, Goiter, Gout, Headache, Heatstroke, Hemorrhoids, Hepatitis, Hernia, Herpes (genital), Obesity, Oligomenorrhea, Oral cancer, Ovarian cyst, Parkinson's disease, PID, Phlebitis, PMS, Postnasal drip, PTSD, Rashes (hives), Raynaud's disease, Sciatica, SAD, Seizure disorder, Sinusitis, Snoring, Sore throat, Scoliosis, Sprains, Acute Abdomen.

#### **22.2.7 Pathophysiology**

#### **22.2.8 Management of pains**

##### **22.2.8.1 Pain sensory systems**

##### **22.2.8.2 Chronic pain**

- 22.2.8.3 Types of pain
  - 22.2.8.3.1 Chronic discomfort and palpitation
  - 22.2.8.3.2 Abdominal pain
  - 22.2.8.3.3 Headache
  - 22.2.8.3.4 Back, neck pain
- 22.2.9 Fever, hyperthermia
- 22.2.10 Fever, rashes
- 22.2.11 Fever of unknown origin
- 22.2.12 Hypothermia & frostbite
- 22.2.13 Syncope, faintness, dizziness, vertigo
- 22.2.14 Weakness, disorders of movements and imbalance
- 22.2.15 Numbness, tingling and sensory loss
- 22.2.16 Aphasia, memory loss and other focal cerebral disorders
- 22.2.17 Sleep disorders
- 22.2.18 Dyspnea, cough
- 22.2.19 Edema
- 22.2.20 Dysphasia, nausea, vomiting and indigestion
- 22.2.21 Diarrhea, constipation
- 22.2.22 Weight loss
- 22.2.23 Jaundice, abdominal swelling
- 22.2.24 Sexual dysfunction
- 22.2.25 Healing crisis and Disease crisis
- 22.2.26 Approach to the patient in Naturopathic medicine with:

- 22.2.26.1 Skin disease
  - 22.2.26.2 Cardiovascular disease
  - 22.2.26.3 Disease of respiratory system
  - 22.2.26.4 Gastrointestinal disorders
  - 22.2.26.5 Liver and pancreatic disease
  - 22.2.26.6 Articular and musculoskeletal disorder
  - 22.2.26.7 Neurological disease
  - 22.2.26.8 Renal disorders
  - 22.2.26.9 Endocrinal disorders
  - 22.2.26.10 Menstrual disorders
  - 22.2.26.11 Peripheral neuropathy
- 22.2.27 Dictum of cure in Naturopathic medicine
- 22.2.27.1 Identify and remove the root cause
  - 22.2.27.2 Eliminate the toxins
  - 22.2.27.3 Supplement of the vital energy or nerve energy
- 22.2.28 Important modes and methods for natural rejuvenation

Note: Apart from the above-listed conditions, other clinical conditions may be discussed but the above-listed conditions are mandatory.

### 22.3 **Practical**

- 22.3.1 Case-history taking, documentation and complete management protocol of at least 30 cases.
- 22.3.2 Clinical dissertation on any one disease involving multiple patients.

22.4 **Textbooks:**

22.4.1 Clinical Naturopathy: An Evidence-Based Guide to Practice-Jerome Sarris, Jon Wardle

22.4.2 Clinical Naturopathic Medicine - Leah Hechtman

22.4.3 The Clinician's Handbook of Natural Medicine - Joseph E. Pizzorno Jr.

22.4.4 Fasting-The Ultimate Diet - Allan Cott

22.4.5 Mucusless Diet Healing System - Arnold Ehret

22.4.6 The Fasting Cure (Classic Reprint) - Upton Sinclair

22.4.7 Fasting Can Save Your Life - Herbert M. Shelton

22.5 **Scheme of Examination**

S.No	Subject	Theory	Internal Assmt	Viva-Voce	Total	Practicals	Internal Assmt	Total Marks	Grand Total Marks
01.	Clinical Naturopathy	80	20	30	130	60	10	70	200

## **23. RESEARCH METHODOLOGY & RECENT ADVANCES**

**(Duration 12 months)**

**Total hours: 150 (Theory: 100 Practical: 50)**

### **23.1 Goals and Objectives**

#### **23.1.1 Goal:**

The goal of teaching Research Methodology and Recent advances to undergraduate students is to provide them with the latest updated scientific, knowledge in the field of Naturopathy and *Yoga* and introduce them to research methodology.

#### **23.1.2 Objectives:**

##### **23.1.2.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 2.24.4.1.1 Describe research methodology under process, materials and methods, design of a study, literature review, ethics, sampling, measurement tools, data organisation, statistics, data analysis, reliability and validity, etc, and implement this knowledge in practically designing, conducting, evaluating and publishing a study.
- 2.24.4.1.2 Illustrate statistics and probability theory;
- 2.24.4.1.3 Use technological aids for preparing research reports;
- 2.24.4.1.4 Demonstrate knowledge about inter-disciplinary research.

##### **2.24.4.2 Skills:**

After the completion of the course, the student shall be able to:

- 2.24.4.2.1 Prepare a research study, conduct, evaluate and publish it;

- 2.24.4.2.2 Interpret research findings and analyse whether data is significant or not;

### **2.24.4.3 Integration**

At the completion of training, the student should be able to integrate knowledge of clinical Naturopathy and *Yoga* with skills in research methodology to conduct and publish research studies in the field, to help shift the basis of Naturopathy and *Yoga* to an evidence-based science.

## **23.2 Research Methodology (50 hours)**

- 23.2.1 The research process. Methodology and methods.
- 23.2.2 The design of a study.
- 23.2.3 Literature review.
- 23.2.4 Ethics of research.
- 23.2.5 Types of common designs. Their advantages and disadvantages.
- 23.2.6 Sampling.
- 23.2.7 The experimental and quasi-experimental methods. Correlation studies.
- 23.2.8 Measurement tools: Observations, questionnaires and others.
- 23.2.9 Data organization in Excel and SPSS.
- 23.2.10 Descriptive statistics. Measures of central tendency, measures of dispersion.  
Correlation coefficients.
- 23.2.11 Graphical representations of data. Simple graphs, the box and whiskers plot.
- 23.2.12 Reliability. The different ways of measuring reliability.
- 23.2.13 Validity. Types of validity.

23.3 **Inferential Statistics and Probability Theory (20 hours)**

- 23.3.1 Inferential statistics – populations and samples.
- 23.3.2 Elementary concepts in probability theory
- 23.3.3 The normal distribution. Z-values and probability
- 23.3.4 Calculating probabilities when population parameters are known

23.4 **Research Reports (10 hours)**

- 23.4.1 Microsoft word, excel and power point
- 23.4.2 Reading research reports
- 23.4.3 Writing research reports
- 23.4.4 Presentations

23.5 **Other streams (20 hours)**

- 23.5.1 Inter-Disciplinary Research
- 23.5.2 Introduction to research in Management studies
- 23.5.3 Introduction to research in Education, History, and Anthropology.
- 23.5.4 Introduction to research in Social studies and Humanity.
- 23.5.5 Introduction to research in Linguistics
- 23.5.6 Introduction to research in Jurisprudence.
- 23.5.7 Introduction to research in Science and technology

23.6 **Practical**

- 23.6.1 Dissertation on any one research study (basic or clinical with sample size of minimum 10). Presentation of dissertation.
- 23.6.2 Research paper interpretation and presentation
- 23.6.3 Single case study from hospital

23.7 **Text Books:**

- 23.7.1 Kothari, C.R.: Research Methodology, Methods and Techniques(VishwaPrakashan, New Delhi, 1985)
- 23.7.2 Telles, S.: Research Methods (Swami Vivekananda YogaPrakashan, Bangalore)

23.8 **Reference:**

- 23.8.1 Robin Monro: *Yoga research bibliography scientific studies on Yoga and meditation*(Yoga Biomedical Trust, England 1989)
- 23.8.2 Michael H. Cohen: *Complementary and Alternative Medicine: Legal Boundaries and regulatory Perspectives* (Paperback - Aug 19, 1997)
- 23.8.3 Jerrold H. Zar: *Biostatistical Analysis person education.*
- 23.8.4 Russell A. Jones: *Research Methods in the Social and behavioral science* (Sinauer Associates, Saunderland's Massachusetts)
- 23.8.5 A.K. Singh: *Tests, Measurements and Research Methods in Behavioral Sciences* (BharatiBhavan Publishers)
- 23.8.6 J.N.S. Matthews: *An Introduction to randomized controlled clinical trials* (Arnold, London)
- 23.8.7 J.S.P. Lumley: *Research:- Some Ground Rules* W. Benjamin (Oxford University Press)
- 23.8.8 Herman J. Ader: *Research Methodology in the life, behavioral and social Sciences* Gideon J. Mellebeegh (SAGE Publications).

**BNYS 4<sup>th</sup> Year Syllabus  
Hospital Management (BNY-408 A)**

**CO: COURSE OBJECTIVES**

**CO-1** Provide a comprehensive understanding of the structure and functioning of healthcare systems,

including hospitals, clinics, and other healthcare facilities. Discuss the various types of hospitals (public, private, specialty) and how they are managed.

**CO-2** Introduce students to healthcare regulations, policies, and ethical issues, ensuring they understand the legal environment in which hospitals operate.

**CO-3** Develop students' ability to manage hospital finances, including budgeting, accounting, cost control, and revenue management.

**CO-4** Focus on ensuring the delivery of high-quality care, through quality management systems, patient safety protocols, and continuous improvement processes. Train students on accreditation standards, such as those from the Joint Commission or National Accreditation Board for Hospitals & Healthcare Providers (NABH).

## **Course Contents**

### **Unit I: Principles of Management in Healthcare**

- Introduction to management theories
- Role of a hospital manager
- Functions of management: Planning, Organizing, Leading, Controlling
- Decision-making in hospital settings

### **Unit II: Healthcare Systems and Organization**

- Overview of healthcare systems: global and regional perspectives
- Types of hospitals: public, private, teaching hospitals, etc.
- Structure and functions of healthcare organizations
- Healthcare delivery models and trends

### **Unit III: Hospital Operations Management**

- Patient care management
- Emergency services management
- Outpatient, inpatient, and ancillary services
- Capacity planning and resource allocation
- Medical records management

### **Unit IV: Human Resource Management in Healthcare**

- Recruitment, retention, and training of healthcare personnel
- Performance appraisal and staff development
- Labor laws and regulations in healthcare
- Managing multidisciplinary teams in hospitals

### **Unit V Financial Management in Hospitals**

- **Budgeting, cost control, and financial planning in healthcare**
- **Revenue cycle management and billing systems**
- **Healthcare insurance and reimbursement models**
- **Financial analysis and reporting**

### **Suggested Readings:**

1. Hospital and Healthcare Management" by Shailendra Nigam
2. Healthcare Operations Management" by Daniel B. McLaughlin and Julie M. Hays
3. Health Care Finance: Basic Tools for Nonfinancial Managers" by Judith J. Baker and R.W. Baker
4. Essentials of Health Care Finance" by William O. Cleverley and James O. Cleverley

## **COURSE OUTCOMES**

**COs-1** Gain in-depth knowledge of the structure and function of various healthcare systems and how hospitals fit within the broader healthcare ecosystem.

**COs-2** Apply management principles to optimize hospital operations, including patient flow, emergency services, and hospital logistics.

**COs-3** Develop expertise in financial management for hospitals, including budgeting, cost control, revenue generation, and financial reporting.

**COs-4** Apply marketing strategies to promote hospital services, improve patient satisfaction, and engage with the community.

## **BNYS 4<sup>th</sup> Year Syllabus Publication Ethics and Database (BNY-408 B)**

### **CO: COURSE OBJECTIVES**

**CO-1** Provide a clear understanding of the principles of research ethics, including honesty, accountability, transparency, and respect in research.

**CO-2** Identify and address common ethical issues in publishing, such as plagiarism, duplicate publication, data fabrication/falsification, and conflicts of interest.

**CO-3** Teach the principles and processes involved in peer review, including the roles of reviewers and editors.

**CO-4** Equip students with knowledge about ethical considerations in research data management, including data sharing, archiving, and preservation.

### **Course Contents**

#### **Unit I: Introduction to Research Ethics and Integrity**

- Definition of research integrity and its importance.
- Core ethical principles: honesty, accountability, transparency, and respect.
- Introduction to ethical guidelines (COPE, ICMJE).

#### **Unit II: Authorship and Contributor ship in Scholarly Publishing**

- Defining authorship: What qualifies someone to be an author?
- Ethical issues related to guest, ghost, and gift authorship.
- Guidelines on authorship

#### **Unit III: Peer Review Process and Ethical Considerations**

- The purpose and types of peer review (single-blind, double-blind, open review).
- Ethical responsibilities of reviewers and authors.

#### **Unit IV: Introduction to Research Databases**

- Overview of research databases: PubMed, Scopus, Web of Science, Google Scholar.
- Searching strategies: Boolean operators, filters, and advanced search techniques.
- Organizing and managing search results.

### **Unit V: Citation Management Tools**

- Introduction to citation management software (EndNote, Mendeley, Zotero).
- How to manage and organize references.
- Generating bibliographies and in-text citations.

### **Suggested Readings:**

- "Responsible Conduct of Research" by Adil E. Shamoo and David B. Resnik
- "Publication Ethics" by Wager, E., and Kleinert, S.
- COPE (Committee on Publication Ethics) Guidelines
- EndNote, Zotero, and Mendeley Documentation

### **COURSE OUTCOMES**

**COs-1** Students will gain a solid understanding of the ethical considerations in academic research and publishing, including plagiarism, data fabrication, and falsification. They will learn to identify and avoid ethical pitfalls in their work.

**COs-2** Participants will learn the basics of intellectual property rights, copyright laws, and how to properly attribute sources in their publications. They will also understand the implications of open access versus subscription-based publications.

**COs-3** Students will understand what qualifies as authorship and the importance of properly crediting all contributors to research. They will be able to navigate issues such as order of authorship and contribution transparency.

**COs-4** Students will learn how to identify and avoid predatory journals and conferences, ensuring that their work is published in credible and legitimate platforms.

23.9 **Scheme of Examination**

S.No	Subject	Theory	Internal Assmt	Viva-Voce	Total	Practicals	Internal Assmt	Total Marks	Grand Total Marks
01.	Research Methodology/Hospital Management/ Publication Ethics and Database	80	20	30	130	60	10	70	200

## **SECTION V**

### **TEACHING OF MEDICAL ETHICS IN BNYS COURSE**

#### **1. Introduction**

Medical ethics is a systematic effort to work within the ethos of medicine, which has traditionally been service to sick.

There is now a shift from the traditional individual patient doctor relationship of medical care. With the advances in science and technology and the needs of patients, their families and the community, there is an increased concern with the health of the society. There is a shift to greater accountability to the society. Doctors and other health professionals are confronted with many ethical problems. It is, therefore, necessary to be prepared to deal with these problems.

In keeping with its goal to improve quality of education, Rajiv Gandhi University of Health Sciences recommends introduction of medical ethics in the regular teaching of BNYS course beginning from first year and continuing till the end of internship.

#### **2. Objectives**

The objectives of teaching medical ethics should be to enable the students develop the students to develop the ability to:

1. Identify underlying ethical issues and problems in medical practice
2. Consider the alternatives under the given circumstances, and
3. Make decisions based on acceptable moral concepts and also traditions and practices

#### **3. Course contents (Syllabus)**

##### a. Introduction to medical ethics

- What are Ethics
- What are values and norms
- Relationship between being ethical and human fulfillment
- How to form a value system in one's personal and professional life
- **Heteronomous Ethics and Autonomous Ethics**
- Freedom and Personal Responsibility

##### b. Definition of Medical Ethics

- Difference between medical ethics and bioethics

- Major principles of Medical Ethics:
- Beneficence = Fraternity
- Justice = Equality
- Self-determination (autonomy) = Liberty

c. Perspectives of Medical Ethics

- The Hippocratic Oath
  - The Declaration of Helsinki
  - The WHO Declaration of Geneva
  - International Code of Medical Ethics (1983)
  - Medical Council of India Code of Ethics

d. Ethics of the Individual

- Patient as a person
- Right to be respected
- Truth and confidentiality
- Autonomy of decision
- Concept of disease, health and healing
- Right to health
- Ethics of behavior modification
- Physician-patient relationship
- Organ donation

e. Ethics of Human Life

- What is human life?
- Criteria for distinguishing human and non-human
- Reasons for respecting human life
- Beginning of human life
- Conception, contraception

- Abortion
  - Prenatal sex-determination
  - In vitro Fertilization (IVF)
  - Artificial Insemination by Husband (AIH)
  - Artificial Insemination by Donor (AID)
  - Surrogate motherhood
  - Semen Intra fallopian Transfer (SIFT)
  - Gamete Intra fallopian Transfer (GIFT)
  - Zygote Intra fallopian Transfer (ZIFT)
  - Genetic Engineering
- f. Family and Society in Medical Ethics
- Ethics of human sexuality
  - Family planning perspectives
  - Prolongation of life
  - Advanced life directives – The Living Will
  - Euthanasia
  - Cancer and Terminal Care
- g. Death and Dying
- Use of life-support systems
  - Death awareness
  - The moment of death
  - Prolongation of life
  - Ordinary and extraordinary life support
  - Advanced life directives
  - Euthanasia – passive and active
  - Suicide – the ethical outlook

- The right to die with dignity
- h. Professional Ethics
  - Code of conduct
  - Contract and confidentiality
  - Charging of fees, Fee-splitting
  - Prescription of drugs
  - Over-investigating the patient
  - Low-cost drugs, vitamins and tonics
  - Allocation of resources in health care
- i. Research Ethics
  - Animal and experimental research/humanness
  - Human experimentation
  - Human volunteer research – Informed
  - Consent Drug Trials
- j. Ethical Work-up of Cases
  - Gathering all scientific factors
  - Gathering all human factors
  - Gathering all value factors
  - Identifying areas of value – conflict
  - Setting of priorities
  - Working out criteria towards decisions

#### **4. Teaching/Learning Experience**

Classroom teaching would focus on professional relationship, patient-doctor relationship, issues at the beginning and end of life, reproductive technologies, resource allocation and health policy. It will also deal with values, ethical concepts and principles. Clinical ethics must be taught as part of bedside teaching. Group discussions, case studies, problem analyzing and problem solving exercises may also be employed.

The teacher involved in teaching ethics should show how the ethical principles are applied on a day-to-day and patient to patient basis by demonstrating by example, how to identify and resolve a particular problem, increasing the awareness and knowledge of students of students the value dimensions of interactions with patients, colleagues, relations and public.

Fostering the development of skills of analysis, decision making and judgment. Making the students aware of the need to respect the rights of the patient as also duties and responsibilities of the doctor

## 5. Evaluation

All major subjects should have at least one short answer question on Medical Ethics appropriate for the subject introduced in the University question paper, and a few questions may be asked in the viva voce examination, eg., basic principles of informed consent, confidentiality, etc.

## 6. Recommended Reading

- a. Francis CM, Medical Ethics, II Ed, 2004, Jaypee Brothers, New Delhi, Rs. 150/-
- b. Ethical Guidelines for Biomedical Research on Human Subjects, Indian Council of Medical Research, New Delhi. 2000.

**DIFFERENT METHODS RECOMMENDED FOR INTERNAL ASSESSMENT**

National Institute of Naturopathy (NIN), Pune, has given some examples of methods of Internal assessment of students, which may be followed by the colleges. They are:

1. Credit for preparation and presentation of seminars by students
2. Preparation of clinical case for presentation
3. Clinical case study/problem solving exercises
4. Participation in project for health care in the community
5. Proficiency in conduction a small research project or assignment
6. Multiple choice questions (MCQ) test after completion of a chapter/system

Each time shall be objectively assessed and recorded. Some of the items can be assigned as home work/vacation work.

**A COMPREHENSIVE LIST OF SKILLS RECOMMENDED AS DESIRABLE FOR BACHELOR OF NATUROPATHY AND YOGIC SCIENCES (BNYS) GRADUATE**

1. Clinical evaluation
  - a. To be able to take a proper and detailed history
  - b. To perform a complete and thorough physical examination and elicit clinical signs
  - c. To be able to properly use the stethoscope, blood pressure apparatus, otoscope, thermometer, nasal speculum, etc
  - d. To be able to perform internal examination-per rectum (PR), per-vaginum (PV), etc.
  - e. To arrive at a proper clinical diagnosis
2. Bedside diagnostic tests
  - a. To do and interpret hemoglobin (Hb), total count (TC), erythrocyte sedimentation rate (ESR), blood smear for parasites, urine examination/albumin/sugar/ketones/microscopy;
  - b. Stool exam for ova and cysts;
  - c. To do gram's stain and Ziehl-Neelsen stain for AFB;
  - d. To do skin smear for leprae bacilli;
  - e. To do and examine a wet film vaginal smear for Trichomonas;
  - f. To do a skin scraping and potassium hydroxide (KOH) stain for fungal infections;
  - g. To perform and read Mantoux test.
3. Ability to carry out procedures
  - a. To conduct CPR (Cardiopulmonary resuscitation) and First Aid in newborns, children and adults
  - b. To administer enema
4. Paediatrics
  - a. To assess newborns and recognize abnormalities and IU retardation
  - b. To teach infant feeding to mothers

- c. To monitor growth by the use of 'road to health chart' and to recognize development retardation
- d. To assess dehydration and prepare and administer Oral Rehydration Therapy (ORT)
- e. To recognize ARI clinically

#### 5. Community Health

- a. To be able to supervise and motivate community and para-professionals for corporate efforts for health care
- b. To be able to carry on managerial responsibilities, e.g., Management of stores, indenting, stock keeping and accounting
- c. Planning and management of health camps
- d. Implementation of national health programmes
- e. To effect proper sanitation measures in the community, e.g., disposal of infected garbage, chlorination of drinking water
- f. To identify and institute control measures for epidemics including its proper data collecting and reporting

#### 6. Management of emergencies

- a. To manage acute anaphylactic shock
- b. To manage peripheral vascular failure and shock
- c. To manage acute pulmonary edema and LVF
- d. Emergency management of drowning, poisoning and seizures
- e. Emergency management of bronchial asthma and status asthmaticus
- f. Emergency management of hyperpyrexia
- g. Emergency management of comatose patients regarding airways, positioning prevention of aspiration and injuries
- h. Assess and administer emergency management of burns

# Shobhit University, Gangoh

(Established by UP Shobhit University Act No. 3, 2012)

## School Of Naturopathy

### Ordinances, Regulations & Syllabus

For

**Bachelor of Naturopathy & Yogic Sciences (BNYS) 5 ½  
Year Programme Annual Pattern  
(w.e.f. session 2016-17)**

Approved and adopted in the year 2016 (Board of Studies 1<sup>st</sup>)

## **Programme Educational Objectives (PEOs)**

**PEO1 Knowledge of Naturopathy:** Graduates should have a solid foundation in naturopathic principles, philosophy, and practices. They should possess in-depth knowledge of various natural therapies, such as nutrition, herbal medicine, hydrotherapy, acupuncture, and lifestyle counselling.

**PEO2 Understanding of Human Anatomy and Physiology:**□Students should acquire a thorough understanding of human anatomy and physiology, including the structure and functions of different body systems. This knowledge is essential for diagnosing and treating health conditions using naturopathic methods.

**PEO3 Diagnostic Skills:** Graduates should be proficient in assessing patients' health conditions through various diagnostic techniques, including physical examination, laboratory tests, and assessment of health history. They should be able to identify the root causes of illnesses and design personalized treatment plans accordingly.

**PEO4 Therapeutic Skills:** Students should develop practical skills in implementing naturopathic therapies and modalities. These may include prescribing herbal remedies, designing nutritional plans, administering physical therapies, providing lifestyle counselling, and conducting yoga and meditation sessions.

**PEO5 Holistic Approach:** Graduates should understand the importance of treating patients holistically, considering their physical, mental, emotional, and spiritual well-being. They should be able to address health concerns by integrating naturopathy, yoga, and other complementary healing approaches.

**PEO6 Patient Management:** Students should learn effective patient management skills, including effective communication, patient education, and building a strong therapeutic relationship. They should be able to educate patients about their health conditions and motivate them to adopt healthy lifestyle practices.

**PEO7 Ethical and Professional Standards:** Graduates should adhere to high ethical and professional standards in their practice. They should understand the legal and regulatory frameworks governing naturopathic medicine and maintain confidentiality, integrity, and professionalism in their interactions with patients and colleagues.

## **Programme Specific Objectives (PSO's)**

**PSO1** Understanding of naturopathic principles and therapeutic modalities.

**PSO2** Knowledge of yogic sciences and their benefits.

**PSO3.** Proficiency in diagnostic skills, including conventional and naturopathic methods.

**PSO4** Familiarity with various naturopathic treatment modalities.

**PSO5** Ability to design individualized treatment plans and provide natural and modern therapies.

**PSO6** Enrich communication, ethical values team work, professional and leadership skill sets of students.

**PSO7** Focus on health promotion and disease prevention.

## **Programme Outcome (PO's)**

**PO1** Providing knowledge of basic principles of naturopathy through interactive classes.

**PO2** Making the students understand the disease through the perspective of naturopathy and yoga through clinical exposure.

**PO3** Demonstrating the students how to take case study for proper diagnosis of diseases.

**PO4** Working on the personal development and communication skills.

**PO5** Providing proper knowledge of anatomy, physiology, biochemistry of human body.

**PO6** Providing the basic knowledge of modern medicine

Ordinance Governing

# Bachelor of Naturopathy & Yogic Sciences (B.N.Y.S.)

Five and half years' Undergraduate Medical  
Degree in Yoga and Naturopathy  
With effective from 2016

## **CONTENTS**

### Introduction

Section I : Goals of BNYS Course

Section II : Objectives of Medical Graduate Training Programme

Section III : Course of study, Attendance and Scheme of examination including  
Distribution of Marks of Clinical Course

Section IV : Subjects and Course Contents

- i) Anatomy
- ii) Physiology
- iii) Biochemistry
- iv) Philosophy of Naturopathy
- v) Principles of Yoga
- vi) Pathology
- vii) Microbiology
- viii) Community Medicine
- ix) Yoga Philosophy
- x) Basic Pharmacology

- xi) Colour therapy and Magneto biology
- xii) Forensic Medicine and Toxicology
- xiii) Manipulative Therapies
- xiv) Acupuncture and Acupressure
- xv) *Yoga* and its applications
- xvi) Nutrition and Medicinal Herbs
- xvii) Diagnostic Methods (I and II) Naturopathy and Conventional Medicine
- xviii) Psychology and Basic Psychiatry
- xix) Fasting therapy and Dietetics
- xx) Obstetrics and Gynecology
- xxi) *Yoga* therapy
- xxii) Hydrotherapy and Mud therapy
- xxiii) Physical Medicine and Rehabilitation
- xxiv) First Aid and Emergency Medicine
- xxv) Clinical Naturopathy
- xxvi) Research Methodology and Recent Advances

Section V : Teaching of Medical Ethics in BNYS Course

Annexure I : Different Methods Recommended for Internal Assessment

Annexure II : A comprehensive list of skills for a BNYS Graduate

## **INTRODUCTION**

National Institute of Naturopathy (NIN), Pune, revised the BNYS syllabus, with a view of standardizing BNYS syllabi with uniform durations and course contents across the country in 2012. It was implemented by Rajiv Gandhi University of Health Sciences (RGUHS) in the academic year 2013-14. In the view of new regulations, University restructured the BNYS course and issued ordinance year wise of the course in 1996. The present volume is published incorporating the amendments made by the National Institute of Naturopathy, Pune, to the regulations of BNYS course and addition of certain topics to the syllabi, as well as change in duration from 5 years to 5½ years. The ordinance should be read with Revised Ordinance Governing BNYS Degree Course and Curriculum of first year to fourth year – 2013.

First year BNYS is of 1½ year duration, and consists of pre-clinical subjects and subjects describing Yoga and Naturopathy principles, Anatomy, Physiology, Biochemistry, Philosophy of Naturopathy, Principles of Yoga and Sanskrit. Second year BNYS is of 1 year duration, and consists of Para-clinical subjects and subjects describing philosophies of Yoga and Naturopathy clinical subjects, Pathology, Microbiology, Community Medicine, *Yoga* Philosophy, Basic Pharmacology, and Colour therapy and magneto biology. Third year BNYS is of 1 year duration, and consists of Para-clinical subjects and Yoga and Naturopathy clinical subjects, Forensic Medicine and Toxicology, Manipulative Therapies, Acupuncture and Acupressure, *Yoga* and its applications, Nutrition and Medicinal Herbs, Diagnostic Methods (I and II) Naturopathy and Conventional Medicine, Psychology and Basic Psychiatry, and Fasting therapy and Dietetics. Final year BNYS is of 1 year duration, and consists of clinical subjects and Yoga and Naturopathy clinical subjects Obstetrics and Gynecology, *Yoga* therapy, Hydrotherapy and Mud therapy, Physical

Medicine and Rehabilitation, First Aid and Emergency Medicine, Clinical Naturopathy and Research Methodology and Recent Advances.

In Section I, goals of BNYS course are given. Section II gives general objectives. Section III gives duration of the course, recommendations regarding attendance, internal assessment, distribution of marks for various subjects in professional examinations and criteria for pass. Revised course contents, subjects like Pharmacology, Forensic Medicine and Toxicology, Sanskrit, Principles of Yoga, Herbology, Clinical Naturopathy, Psychology and Basic Psychiatry, Clinical Naturopathy, Research Methodology and Recent Advances are added in this publication – are elaborated in Section IV. Section V deals with topics recommended for teaching of medical ethics.

## **SECTION I**

### **1 Goals of BNYS Course**

- 1.1 Recognize the health needs of the community, and carry out professional obligations ethically and in keeping with the objectives of the national health policy;
- 1.2 Develop the skills in most of the competencies, and training that are required to deliver the Naturopathy and Yoga health care system;
- 1.3 Become aware of the contemporary advances and developments in the discipline concerned;
- 1.4 Acquire a spirit of scientific inquiry and is oriented to the principles of research methodology and epidemiology;
- 1.5 Become proficient in their profession by developing scientific temper and improve educational experience;
- 1.6 Identify social, economic, environmental, biological and emotional determinants of health in a given case and take them into account while planning therapeutic, rehabilitative, preventive and promotive measures/strategies;
- 1.7 Plan and devise measures in Naturopathy and yoga for the prevention and rehabilitation of patients suffering from disease and disability ;
- 1.8 Demonstrate skills in documentation of individual case details as well as morbidity data relevant to the assigned situation;
- 1.9 Demonstrate empathy and humane approach towards patients and their families and exhibit interpersonal behavior in accordance with the societal norms and expectations;

- 1.10 Play the assigned role in the implementation of national health programs, effectively and responsibly;
- 1.11 Organize and supervise the chosen/assigned health care services  
Demonstrating adequate managerial skills in the clinic/hospital or the field Situation;
- 1.12 Develop skills as a self-directed learner; recognize continuing educational needs, select and use appropriate learning resources;
- 1.13 Demonstrate competence in basic concepts of research methodology and epidemiology, and be able to critically analyze relevant published research literature;
- 1.14 To implement all National health policies ;
- 1.15 Work towards realization of ‘\_Health for all’, as a national goal through naturopathy and yoga;
- 1.16 To follow the medical ethics and to fulfill the social and professional responsibilities as a Naturopathy and Yoga Physician through drugless therapies;
- 1.17 Be competent in the practice of holistic medicine with expert knowledge and experience in promotive, preventive, curative and rehabilitative aspects of diseases;
- 1.18 Become proficient in their profession by developing scientific temper and improve educational experience;

## 2 Institutional Goals

After the medical undergraduate program, the students must:

- 2.1 Be able to expertly diagnose and manage common diseases and health problems of individuals as well as community, work with the health team as a fully qualified doctor at primary, secondary or tertiary levels, with his/her clinical experience and skills in history, physical examination and relevant investigations;
- 2.2 Be proficient in promotive, preventive, curative and rehabilitative medicine and therapy for common health issues;
- 2.3 Be adept in different therapeutic modalities and their administration;
- 2.4 Develop a humane attitude towards one's clients and understand economic, environmental, social, psychological and cultural factors that influence health;
- 2.5 Enjoy an urge for self-improvement, directed towards advanced expertise or research in any chosen area of health care;
- 2.6 Have enough knowledge about implementation of National Health Programs and the basic factors required for the same, which are as follows;
  - 2.6.3 Family Welfare and Maternal and Child Health (MCH);
  - 2.6.4 Sanitation and Water Supply;
  - 2.6.5 Prevention and Control of communicable and non-communicable diseases;
  - 2.6.6 Immunization;
  - 2.6.7 Health education;
- 2.7 Possess management skills in human resources, materials and resource management in health care delivery;

- 2.8 Be competent in recognizing community health issues and design, institute curative and preventive measures and evaluate the outcome of these measures, thus working towards resolving these issues;
- 2.9 Be able to work successfully in a variety of health care settings;
- 2.10 Develop integrity, responsibility, reliability, dependability and compassion, which are characteristics required for successful professional life;
- 2.11 Develop leadership and communication skills to work as leading investigator or clinician in health care teams;

## **SECTION II**

### **1. Objectives of Medical Graduate Training Programme**

- 1.1. To effectively integrate the conventional basic sciences (e.g. human physiology) with the traditional medical systems and to enhance the understanding of their effects and therapeutic potential;
- 1.2 To provide state of the art learning facilities (e.g. audio visual aids, interactive learning systems) to conceptualize the ancient medical system;
- 1.3 To run advanced laboratories under each department (basic and clinical sciences) for effective experimental training and research;
- 1.4 To explore the possibilities of promoting effective integrated medical practice at conventional medical facilities attached to the institute;
- 1.5 To provide the best possible clinical setting for clinical training and research;
- 1.6 To prepare every Yoga and Naturopathic physician with an in depth understanding of Basic sciences, superior clinical training and with an outlook for research and development;

## **SECTION III**

### **1 Course of Study:**

The duration of the course shall be 5 ½ years (Five and half years). The course shall include a period of regular study of four and a half (4 ½) years, followed by a compulsory rotatory internship of one year.

The period of regular study shall be divided into four phases – first year of one and half (1½) years, and the Second, Third and Final years of one year each of the B.N.Y.S. Medical Degree Course respectively.

### **2 Attendance:**

A candidate shall be considered to have satisfied the requirement of attendance for each Part/Phase if he /she attends not less than 80 per cent of the theory and practical classes actually conducted up to the end of the Phase in that subject.

Such a candidate having shortage of attendance shall be required to attend 80 per cent of the theory and practical classes actually held up to the end of the term by repeating that subject of that Part/Phase during a subsequent term.

### **3 Teaching Hours:**

The allotment of time (in number of hours) to teach Theory and to conduct

Practical/Clinical and Tutorial /Demonstration, Seminar in each subject shall be:

#### **I YEAR B.N.Y.S. (18 months)**

<b>No. of Subjects</b>	<b>No. of Papers</b>	<b>SUBJECTS</b>	<b>TOTAL HOURS</b>
I	01.	Anatomy – I	550hrs
	02.	Anatomy – II	
II	03.	Physiology – I	500hrs
	04	Physiology – II	
III	05.	Biochemistry	300hrs
IV	06.	Philosophy of Naturopathy	325hrs
V	07.	Principles of <i>Yoga</i>	400hrs
		<b>Total Hours</b>	<b>2175hrs</b>

**II YEAR - B.N.Y.S. (12 Months)**

<b>No. of Subject s</b>	<b>No. of papers</b>	<b>SUBJECTS</b>	<b>TOTAL HOURS</b>
I	01.	Pathology	300
II	02.	Microbiology	200
III	03.	Community Medicine	250
IV	04.	<i>Yoga</i> Philosophy	350
V	05.	Basic Pharmacology	100
VI	06.	Colour Therapy and Magneto biology	150
VII	07.	Forensic Medicine & Toxicology	100
		<b>Total Hours</b>	<b>1450</b>

**III YEAR B.N.Y.S. (12 months)**

<b>No. of Subjects</b>	<b>No. of Papers</b>	<b>SUBJECTS</b>	<b>TOTAL HOURS</b>
I	01.	Manipulative Therapies	200
II	02.	Acupuncture & Acupressure	200
III	03.	<i>Yoga</i> & Its Applications	250
IV	04.	Nutrition & Medicinal herbs	250
V	05.	Diagnostic Methods - I (Naturopathy)	200
	06.	Diagnostic Methods -II (Conventional Medicine)	200
VI	07.	Psychology & Basic Psychiatry	150
		<b>Total Hours</b>	<b>1450</b>

**IV YEAR B.N.Y.S. (12 months)**

<b>No. of Subjects</b>	<b>No. of Papers</b>	<b>SUBJECTS</b>	<b>TOTAL HOURS</b>
I	01.	Fasting Therapy & Dietetics	200
II	02.	Obstetrics & Gynecology	150
III	03.	<i>Yoga</i> Therapy	250
IV	04.	Hydrotherapy & Mud Therapy	250
V	05.	Physical Medicine & Rehabilitation	200
VI	06.	First Aid & Emergency Medicine	100
VII	07.	Clinical Naturopathy	200
VIII	08.	Research Methodology & Recent Advances	100
		<b>Total Hours</b>	<b>1450</b>

GRAND TOTAL FOR 4 ½ YEARS IS 6525 hours.

**Internship program:**

A candidate after passing final B.N.Y.S. Medical Degree Examination shall undergo the compulsory rotatory internship of one year duration, which shall consist of work/duty postings in the following sections/departments for the period specified against them.

<b>S.No.</b>	<b>Department</b>	<b>Duration</b>
1.	Philosophy of <i>Yoga</i> and Naturopathy	1 Month
2.	<i>Yoga</i> and Mind-Body Medicine	1 Month
3.	Pathology and Microbiology	1 Month
4.	Community Medicine	1 Month
5.	Energy Medicine	1 Month
6.	Manipulative Therapies, Physical Medicine & Rehabilitation	1 Month
7.	Fasting, Dietetics, Nutrition, & Medicinal Herbs	1 Month
8.	Diagnostic Methods	1 Month
9.	Obstetrics & Gynecology	1 Month
10.	Hydrotherapy & Mud Therapy	1 Month
11.	Naturopathic Medicine	1 Month
12.	Allied Health Sciences	1 Month
	<b>TOTAL</b>	<b>12 Months</b>

#### **4 Scheme of Examination:**

The examination/s shall be held as per the date of Examination notified by the University.

There should be one Internal & One External Examiner for all practical & Viva exams for each subject. A candidate shall register for all the subjects of a term/year, when he/she appears for the first time to the examination of that Part.

##### **4.1 Internal Assessment: Scheme of Examination:**

There shall be an internal assessment which follows broadly the principles enunciated by the University in each subject for which 20 per cent of the marks are set apart and these will be added in the final grade in the University examinations. There shall be a minimum of two assignments and two periodical tests in every subjects of each year to assess the progress of the candidate.

If a candidate fails in an Examination, his/her internal assessment shall be assessed again as if he/she is a regular student for the second attempt only.

#### **Theory**

Minimum of 3 examinations is recommended. The examination preceding the university examination may be similar to the University Examination. Average marks of the better of the two notified internal examinations should be reduced to the marks allotted for internal assessment for each subject and should be sent to the university.

**Practical**

A minimum of one clinical test may be conducted at the end of each ward postings in all the clinical subjects.

Assistant professor and above or lecturer with five years of teaching experience can conduct internal assessment examination. Average of best two examination marks should be taken into consideration while calculating the marks of internal assessment.

The internal assessment marks of both theory and practical obtained by the candidates should be sent to the University at least 15 days prior to the commencement of the theory examination.

## 4.2 Subjects And Credit

### I YEAR BNYS

S.No.	Subject Name	Subject Code	Credit
1	Anatomy I	BNY - 101	3
2	Anatomy II	BNY - 102	3
3	Physiology I	BNY - 103	3
4	Physiology II	BNY - 104	3
5	Biochemistry	BNY - 105	3
6	Philosophy of Naturopathy	BNY - 106	4
7	Principles of Yoga	BNY - 107	3
8	Anatomy	BNY - 151	1
9	Physiology	BNY - 153	1
10	Biochemistry	BNY - 155	1
11	Philosophy of Naturopathy	BNY - 156	1
12	Principles of Yoga	BNY - 157	1

## II YEAR BNYS

S.No.	Subject Name	Subject Code	Credit
1	Pathology	BNY - 201	3
2	Microbiology	BNY - 202	2
3	Community Medicine	BNY - 203	3
4	Yoga Philosophy	BNY - 204	3
5	Color therapy and Magneto biology	BNY - 205	1
6	Basic Pharmacology	BNY - 206	3
7	Forensic Medicine and Toxicology	BNY - 207	2
8	Pathology	BNY - 251	1
9	Microbiology	BNY - 252	1
10	Community Medicine	BNY - 253	1
11	Yoga Philosophy	BNY - 254	1
12	Color therapy and Magneto biology	BNY - 255	1

### III YEAR BNYS

S.No.	Subject Name	Subject Code	Credit
1	Manipulative Therapies	BNY - 301	3
2	Acupuncture & Acupressure	BNY - 302	3
3	<i>Yoga</i> & Its Applications	BNY - 303	3
4	Nutrition & Medicinal herbs	BNY - 304	3
5	Diagnostic Methods - I(Naturopathy)	BNY - 305	3
6	Diagnostic Methods -II (Conventional Medicine)	BNY - 306	3
7	Psychology & BasicPsychiatry	BNY – 307	2
8	Manipulative Therapies	BNY – 351	1
9	Acupuncture & Acupressure	BNY – 352	1
10	<i>Yoga</i> & Its Applications	BNY – 353	1

11	Nutrition & Medicinal herbs	BNY – 354	1
12	Diagnostic Methods - I(Naturopathy)	BNY – 355	1
13	Diagnostic Methods -II (Conventional Medicine)	BNY – 356	1
14	Psychology & Basic Psychiatry	BNY – 357	1

#### IV YEAR BNYS

S.No.	Subject Name	Subject Code	Credit
1	Fasting Therapy & Dietetics	BNY - 401	3
2	Obstetrics & Gynecology	BNY - 402	3
3	<i>Yoga</i> Therapy	BNY - 403	3
4	Hydrotherapy & Mud Therapy	BNY - 404	3
5	First Aid & Emergency Medicine	BNY - 405	2
6	Clinical Naturopathy	BNY - 406	1
7	Physical Medicine & Rehabilitation	BNY - 407	3
8	Research Methodology &Recent Advances	BNY - 408	1
9	Fasting Therapy & Dietetics	BNY - 451	1

10	Obstetrics & Gynecology	BNY - 452	1
11	<i>Yoga</i> Therapy	BNY - 453	1
12	Hydrotherapy & Mud Therapy	BNY - 454	1
13	First Aid & Emergency Medicine	BNY - 455	1
14	Clinical Naturopathy	BNY – 456	1
15	Physical Medicine & Rehabilitation	BNY - 457	1
16	Research Methodology &Recent Advances	BNY – 458	1

A candidate who has passed in all the subjects of First B.N.Y.S. Medical Degree examination shall be eligible to be promoted to Second B.N.Y.S. Medical Degree course.

A candidate is eligible for carry over facility only if he/she has appeared for all the subjects of that particular examination.

First year to Second Year – 3 subjects carry over

Second year to Third year - 3 subjects carry over

Third Year to Final year – 3 subject carry over

Completion of the degree should not go beyond 11 years from the date of admission.

#### **4.3 Criteria for Pass**

To be eligible for promotion to the II, III & IV years, the candidate has to complete and pass in all the subjects of I, II & III years with an exemption of one subject in each year.

The candidate is declared to have been successful provided he/she secures minimum 40% and above in theory, 50% and above in oral/practical/clinical separately each subjects, but should get 50% in aggregate in all.

#### **4.4 Declaration of Class:**

A candidate who passes all the subjects of one examination in the first attempt only be eligible for a class.

No class or rank shall be declared for candidate who does not pass any examination in the first attempt, and such a candidate shall be eligible only for a pass class.

The percentage of marks for declaring pass/Second/First Class and First class with

Distinction shall be as follows:

Distinction	Not less than 75 percent of the Aggregate Marks
First class	Not less than 65 percent of the Aggregate Marks
Second class	Not less than 50 percent of the Aggregate Marks
Pass class	Candidate who passes the examination in more than one attempt

Note: - A candidate who passes in all the subjects of any Examination only in first attempt shall be eligible for First class with Distinction /First/Second Class

## **SECTION IV**

### **SUBJECTS & COURSE CONTENT**

#### **1. ANATOMY**

##### **1.1 Goals and Objectives**

###### **1.1.1 Goal**

It aims at giving inclusive knowledge of the gross and microscopic structure and development of human body to provide a basis for assessing the correlation of organs and structures and anatomical basis for disease presentations.

###### **1.1.2 Objectives**

###### **1.1.2.1 Knowledge:**

After completion of the program, the student must be able to:

- 1.1.2.1.1 Understand normal human anatomy clinically important inter-relationship and functional anatomy of bodily structures;
- 1.1.2.1.2 Comprehend histological structures of various tissues and organs and co- relate structure and function in order to understand diseased states;
- 1.1.2.1.3 Recognize basic structure and connections of the central nervous system, understand the regulation and integration of various organs and systems and be skilled in locating lesion sites according to deficits in diseased states;
- 1.1.2.1.4 Explain developmental basis of variations and abnormalities with respect to sequential development of organs and systems, teratogens, genetic mutations and environmental hazards.

### 1.1.2.2 Skills

After completion of the program, the student must be able to:

- 1.1.2.2.1 Locate and identify body structures including topography of living body;
- 1.1.2.2.2 Histologically, identify tissues and organs;
- 1.1.2.2.3 Identify gross congenital anomalies and be familiar with the principles of karyotyping;
- 1.1.2.2.4 Interpret new imaging techniques such as CT, Sonogram, MRI etc after understanding their basic principles;
- 1.1.2.2.5 Understand clinical basis of some common clinical procedures i.e., intramuscular and intravenous injection, lumbar puncture and kidney biopsy etc..

### 1.1.2.3 Integration

Student shall be capable of understanding the regulation and integration of the functions of the organs and systems in the body and interpret the anatomical basis of disease process using the combined teaching of other basic sciences.

## 1.2 **Human Anatomy – I (Duration: 18 months)**

**Total hours: 500 (Theory: 300 Practical: 200)**

### 1.2.1 Introduction to Anatomy

- 1.2.1.1 Nomenclature
- 1.2.1.2 Anatomical positions
- 1.2.1.3 Axes and planes
- 1.2.1.4 Tissues

- 1.2.1.5 Movements
- 1.2.2 General Histology
  - 1.2.2.1 Detailed structure of cell and its components and their functional mechanisms
- 1.2.3 Osteology (Including ossification)
  - 1.2.3.1 Types of bones
  - 1.2.3.2 Classification of bones
  - 1.2.3.3 Description of various bones
    - 1.2.3.3.1 Upper limb
    - 1.2.3.3.2 Thorax
    - 1.2.3.3.3 Abdomen and pelvis
    - 1.2.3.3.4 Vertebral column
- 1.2.4 Arthrology
  - 1.2.4.1 Classification of joints
  - 1.2.4.2 Construction of joints
  - 1.2.4.3 Description of various joints of:
    - 1.2.4.3.1 Upper limb
    - 1.2.4.3.2 Thorax
    - 1.2.4.3.3 Vertebral column
- 1.2.5 Myology
  - 1.2.5.1 Types of muscles
  - 1.2.5.2 Muscles of upper limb, thorax, abdomen and pelvis
  - 1.2.5.3 Origin, insertion, blood supply, nerve supply, applied anatomy and actions of these muscles
- 1.2.6 Respiratory System

- 1.2.6.1 Upper respiratory tract – Nose, Pharynx, Larynx
- 1.2.6.2 Trachea & Bronchial tree
- 1.2.6.3 Lungs
- 1.2.6.4 Pleura
- 1.2.6.5 Mediastinum
- 1.2.7 Cardiovascular System
  - 1.2.7.1 Heart – Position, Surface anatomy and its description
  - 1.2.7.2 Great vessels – Aorta, Pulmonary trunk, superior vena cava, inferior vena cava and their branches
  - 1.2.7.3 Arteries and Veins – Structure of arteries and veins, important arteries and veins of the body
- 1.2.8 Digestive System
  - 1.2.8.1 Oral cavity
  - 1.2.8.2 Teeth
  - 1.2.8.3 Hard palate
  - 1.2.8.4 Soft palate
  - 1.2.8.5 Esophagus
  - 1.2.8.6 Stomach
  - 1.2.8.7 Small intestine
  - 1.2.8.8 Large intestine
  - 1.2.8.9 Anal canal
  - 1.2.8.10 Liver
  - 1.2.8.11 Gall bladder
  - 1.2.8.12 Bile duct
  - 1.2.8.13 Pancreas

1.2.8.14 Spleen

1.2.8.15 Peritoneum

1.2.9 Mesentery and position of the above organs in the abdominal quadrants.

1.2.9.1 Urinary System

1.2.9.2 Kidney

1.2.9.3 Ureter

1.2.9.4 Urinary bladder

1.2.9.5 Male urethra

1.2.9.6 Female urethra

1.2.10 Lymphatic System

1.2.10.1 Lymph, lymph glands, lymph duct, thoracic duct, cisterna chyli

1.2.10.2 Location of major groups of lymph nodes in the body and their drainage areas

NOTE: The concerned colleges have to make necessary arrangements for providing human cadavers in the anatomy department for teaching.

### **1.3 Human Anatomy – II (Duration: 18 Months)**

#### **1.3.1 Osteology (Including ossification)**

Description of various bones of

1.3.1.1 Lower limb

1.3.1.2 Skull as a whole

1.3.1.3 Individual cranial bones of skull

#### **1.3.2 Arthrology**

Description of various joints of

1.3.2.1 Lower limb

1.3.2.2 Skull as a whole

1.3.2.3 Skull and vertebral column

#### **1.3.3 Myology**

Description of various muscles of

1.3.4 Lower limb

1.3.5 Head

1.3.6 Neck

(Origin, insertion, blood supply, nerve supply, applied anatomy and actions of these muscles)

#### **1.3.7 Reproductive System**

1.3.7.1 Male reproductive organs

Penis, Testes, Vas Deferens, Spermatic Cord, Epididymis, Seminal Vesicles, Ejaculatory Duct Prostate Gland Etc.

1.3.7.2 Female reproductive organs

1.3.7.2.1 External genital organs

Vulva, Clitoris, Vagina

1.3.7.2.2 Inguinal Region perineum

1.3.7.2.3 Internal genital organs

Uterus, Cervix, Fallopian tubes, Ovaries, Ligaments of uterus and ovaries

1.3.7.2.4 Mammary glands

### **1.3.8 Endocrine System**

Description of Pituitary, Pineal, Thyroid, Parathyroid, Thymus, Spleen, Pancreas, Suprarenal, Ovaries and Testes

### **1.3.9 Nervous System**

Division of nervous system, central nervous system, peripheral nervous system, cerebral hemispheres, midbrain, pons, medulla oblongata, cerebellum, spinal cord, autonomic nervous system.

1.3.9.1 Meninges: Dura mater and arachnoid mater

1.3.9.2 CSF

1.3.9.3 Ventricular system

1.3.9.4 Cranial nerves

1.3.10 Spinal nerves

1.3.11 Important plexuses: Cervical, Brachial, Lumbar, Sacral and their nerve descriptions.

1.3.12 Organs and Special Senses

1.3.12.1 Tongue

1.3.12.2 Nose

1.3.12.3 Eye and associated structures

1.3.12.4 Ear

1.3.12.5 Integumentary system

1.3.13 Surface Anatomy

- 1.3.13.1 Projection of the outline of heart, its borders, surface and valves.
- 1.3.13.2 Lungs – borders, fissures, hila, pleura and diaphragm
- 1.3.13.3 Liver
- 1.3.13.4 Kidney
- 1.3.13.5 Abdominal viscera
- 1.3.13.6 Pelvic viscera

## **1.4 Histology**

### **1.4.1 General Histology**

1.4.1.1 Microscope

1.4.1.2 Cell

1.4.1.3 Epithelial Tissue I

1.4.1.4 Epithelial Tissue II

1.4.1.5 Connective Tissue – Bones and Cartilages

1.4.1.6 Muscular Tissues

1.4.1.7 Nerve Tissues (TS & LS of peripheral nerve, sensory and sympathetic ganglion, optic nerve)

1.4.1.8 Epithelial glands (serous, mucous and mixed salivary gland)

1.4.1.9 Circulatory system (large artery, medium sized artery, larger vein)

1.4.1.10 Lymphatic system (lymph nodes, thymus, tonsils, spleen)

1.4.1.11 Skin and appendages

1.4.1.12 Placenta and umbilical cord

### **1.4.2 Systemic Histology**

1.4.2.1 Respiratory system(lungs ,trachea)

1.4.2.2 Esophagus and stomach

1.4.2.3 Liver, gall bladder, pancreas

1.4.2.4 Urinary system I (Kidney)

1.4.2.5 Urinary system II (Ureter, bladder)

1.4.2.6 Small and large intestine

1.4.2.7 Reproductive system – Female

1.4.2.8 Reproductive system – Male

1.4.2.9 Upper GIT (tongue)

1.4.2.10 Hypophysis cerebra, thyroid and suprarenal glands

1.4.2.11 Eye – cornea and retina

## **1.5 Practical**

### **1.5.1 Gross Anatomy (Dissection / Demonstration of following):**

#### **1.5.1.1 Upper Limb**

1.5.1.1.1 Dissection: Pectoral, scapular, shoulder, arm, forearm (5weeks)

1.5.1.1.2 Prosected Parts: Joints, Palm and dorsum of hand

#### **1.5.1.2 Thorax**

1.5.1.2.1 Dissection: Chest wall, mediastinum, lungs and heart

#### **1.5.1.3 Abdomen**

1.5.1.3.1 Dissection: anterior abdominal wall and inguinal region, viscera and posterior abdominal wall

#### **1.5.1.4 Pelvis**

1.5.1.4.1 Dissection: Pelvic viscera and blood vessels and nerve sagittal section (M & F) (2 weeks)

1.5.1.4.2 Prosected Parts: Sole of the foot and joints

#### **1.5.1.5 Head and Neck**

1.5.1.5.1 Dissection: Scalp, superficial and deep dissection of face and neck (8 – 10 weeks)

1.5.1.5.2 Prosected Parts: Orbit, eyeball, submandibular region, temporal and infra-temporal fossa, cranial cavity, naso and oropharyngeal regions, larynx and pharynx. Cross sections at C-4, C-6 levels, sagittal section of head and neck

#### **1.5.1.6 Nervous System**

Section of brain and prosected specimens and major functional areas; Gross structure of brain and spinal cord and study of gross sections as mentioned earlier (in brief).

## **1.5.2 Demonstrations**

1.5.2.1 Bones as described in the osteology section

1.5.2.2 Brain and Spinal Cord

## **1.5.3 Specific Skills**

1.5.3.1 To localize important pulsations and the structure against which pressure can be applied in case of bleeding and trauma of particular artery.

1.5.3.2 To elicit superficial and deep reflexes.

1.5.3.3 To demonstrate muscle testing and movements at joints.

1.5.3.4 To locate for: lumbar puncture, sterna puncture, pericardial tapping and liver biopsy.

1.5.3.5 To locate veins for venipuncture.

1.5.3.6 To locate the site for emergency such as tracheostomy.

## **1.6 Textbooks:**

1.6.1 Textbook of Anatomy (III volumes) – BD Chaurasia

1.6.2 Textbook of Anatomy – Hamilton

1.6.3 Practical Anatomy – Cunningham

1.6.4 Human Embryology – Inderbir Singh

1.6.5 Bailey's textbook of histology

1.6.6 Medical Embryology – Langman

1.6.7 Textbook of Clinical Anatomy by Neeta V Kulakarni

1.6.8 Histology text book by Latha V

## **1.7 Reference Books**

1.7.1 Textbook of Anatomy – Gray

1.7.2 Atlas of histology – Diforie

- 1.7.3 Atlas of histology – Poddar
- 1.7.4 Textbook of human histology – Veena Bharihoke
- 1.7.5 A color atlas of human anatomy – McMinn
- 1.7.6 Grant's method of Anatomy – Grant
- 1.7.7 Regional and applied Anatomy – RJ Last

1.8 **Scheme Of Examination**

S.N	Subject	Theo-ry	Intern-al Assm-t	Viva-Voce	Total	Practi-cals	Inter-nal Assm-t	Total Marks	Grand Total Marks
01.	Anatomy - I	80	20	30	130	60	10	70	200
02.	Anatomy – II	80	20	30	130	60	10	70	200

## 2. **PHYSIOLOGY**

### 2.1 **Goals and Objectives**

#### 2.1.1 **Goal**

The goal of teaching Physiology to undergraduate students is aimed at giving the student comprehensive knowledge of the normal functions of the organ systems of the body to facilitate comprehension of the physiological basis of health and disease.

#### 2.1.2 **Objectives**

##### 2.1.2.1 **Knowledge**

After completion of the program, the student will be able to:

- 2.1.2.1.1 Explicate the normal functioning of all the organ systems and their interactions for well co-ordinated body function;
- 2.1.2.1.2 Appreciate the relative contribution of each organ system to the homeostasis;
- 2.1.2.1.3 Explain the physiological aspects of normal growth and development;
- 2.1.2.1.4 Illustrate the physiological response and adaptations to environmental stresses;
- 2.1.2.1.5 List physiological principles underlying pathogenesis and disease management.

##### 2.1.2.2 **Skills**

After completion of the program, the student will be able to:

- 2.1.2.2.1 Conduct experiments designed to study physiological phenomena;
- 2.1.2.2.2 Interpret experimental/investigative data;

- 2.1.2.2.3 Differentiate between normal and abnormal data from results of tests, which he/she has done and observed in the laboratory.

### **2.1.2.3 Integration**

At the end of the integrated course the student shall acquire an integrated knowledge of organ structure and function and regulatory mechanisms.

## **2.2 Physiology – I (Duration: 18 Months)**

**Total hours: 500 (Theory: 300 Practical: 200)**

### **2.2.1 General Physiology**

2.2.1.1 Cell structure and function

2.2.1.2 Transport mechanisms across biological membrane

2.2.1.3 Body fluids and homeostasis

2.2.1.4 Thermoregulation

### **2.2.2 Blood**

#### **2.2.2.1 Plasma proteins**

2.2.2.1.1 Normal values

2.2.2.1.2 Origin, Functions and variations in health and disease

#### **2.2.2.2 Bone marrow**

2.2.2.2.1 Composition and functions

#### **2.2.2.3 Erythrocytes**

2.2.2.3.1 Morphology and variations in health and disease

2.2.2.3.2 Site and stages of development

2.2.2.3.3 Necessary factors

2.2.2.3.4 Regulation of development of erythrocytes

2.2.2.3.5 Life span and fate of erythrocytes

- 2.2.2.3.6 Erythrocyte sedimentation rate (ESR)
- 2.2.2.3.7 Packed cell volume (PCV)
- 2.2.2.4 Hemoglobin**
  - 2.2.2.4.1 Structure, synthesis, function and metabolism
  - 2.2.2.4.2 Types of hemoglobin
- 2.2.2.5 Anemia** – definition and classification
- 2.2.2.6 Jaundice** – definition and classification
- 2.2.2.7 Spleen-** structure and function
- 2.2.2.8 Leucocytes**
  - 2.2.2.8.1 Classification, morphology, development and functions
  - 2.2.2.8.2 Variation in health and disease
- 2.2.2.9 Thrombocytes**
  - 2.2.2.9.1 Development, morphology and functions
  - 2.2.2.9.2 Variation in health and disease
- 2.2.2.10 Hemostasis**
  - 2.2.2.10.1 Mechanism of hemostasis, coagulation of blood
  - 2.2.2.10.2 Fibrinolysis and bleeding disorders
- 2.2.2.11 Anticoagulants**
  - 2.2.2.11.1 Mechanism of action and clinical applications
- 2.2.2.12 Blood groups**
  - 2.2.2.12.1 Classification
  - 2.2.2.12.2 ABO and RH system
  - 2.2.2.12.3 Blood transfusion, indication and hazards
- 2.2.2.13 Lymph and tissue fluids**
  - 2.2.2.13.1 Formation and functions of lymph

2.2.2.13.2 Physiology of reticular system

**2.2.2.14 Immune system**

Cellular and humoral immunity

**2.2.3 Cardiovascular System**

**2.2.3.1 Heart**

2.2.3.1.1 Structure and properties of cardiac muscle

2.2.3.1.2 Innervations of heart, junctional tissue of heart

2.2.3.1.3 Generation and spread of cardiac impulse

**2.2.3.2 Electrocardiography**

2.2.3.2.1 Einthovan's Law

2.2.3.2.2 ECG leads, normal ECG and its interpretation

**2.2.3.3 Cardiac cycle**

2.2.3.3.1 Pressure and volume changes (mechanical events)

2.2.3.3.2 Principles of echo-cardiograph

2.2.3.3.3 Jugular venous pulse tracing, radial pulse tracing

2.2.3.3.4 Measurement and regulation of cardiac output

**2.2.3.4 Heart sounds**

2.2.3.4.1 Description, Causation and relation to other events in cardiac cycle

2.2.3.4.2 Clinical significance of heart sounds

2.2.3.4.3 Stethoscopy

**2.2.3.5 Blood pressure**

2.2.3.5.1 Definition, regulation and factors influencing BP

2.2.3.5.2 Measurement of blood pressure

2.2.3.5.3 Physiology of hemorrhage and shock

### **2.2.3.6 Circulations**

- 2.2.3.6.1 Blood vessels
- 2.2.3.6.2 Physical principles of blood flow, regulation of blood flow.
- 2.2.3.6.3 Coronary, Splanchnic, cutaneous and capillary, cerebral circulation
- 2.2.3.6.4 Cardiovascular changes in altitude and exercise

## **2.2.4 Respiratory System**

Introduction, internal and external respiration, physiological anatomy of respiratory system

### **2.2.4.1 Mechanism of Respiration**

- 2.2.4.1.1 Inspiration and expiration
- 2.2.4.1.2 Role of respiratory muscles and thoracic cage
- 2.2.4.1.3 Pressure and volume changes during respiration
- 2.2.4.1.4 Work of breathing
- 2.2.4.1.5 lung compliance and its significance in health and disease

### **2.2.4.2 Lung volumes and capacities**

- 2.2.4.2.1 Lung volumes and capacities and their measurements

### **2.2.4.3 Ventilation**

- 2.2.4.3.1 Composition of atmospheric, inspired, alveolar and expired air

### **2.2.4.4 Pulmonary circulation**

- 2.2.4.4.1 Pulmonary circulation, ventilation – perfusion relationship
- 2.2.4.4.2 Diffusion of gases across pulmonary membrane
- 2.2.4.4.3 Oxygen uptake, transport and delivery
- 2.2.4.4.4 Carbon dioxide uptake, transport and delivery

## **2.2.4.5 Organization of the respiratory centers**

- 2.2.4.5.1 Nervous and chemical regulation of respiration
- 2.2.4.5.2 Classification and characteristics of hypoxia, cyanosis, asphyxia, hypercapnea, hypocapnea dyspnea, apnea and orthopnea and periodic breathing
- 2.2.4.5.3 Respiratory changes in high altitude
- 2.2.4.5.4 Physiology of acclimatization and hyperbarism
- 2.2.4.5.5 Respiratory / pulmonary function tests
- 2.2.4.5.6 Non-respiratory functions of lungs
- 2.2.4.5.7 Artificial respiration
- 2.2.4.5.8 Importance of therapeutic administration of oxygen and carbon dioxide
- 2.2.4.5.9 Respiratory changes during exercise

## **2.2.5 Digestive System**

### **2.2.5.1 Introduction, functional anatomy of digestive system**

### **2.2.5.2 Salivary glands**

- 2.2.5.2.1 Composition, functions of saliva
- 2.2.5.2.2 Regulation of secretion of saliva

### **2.2.5.3 Stomach**

- 2.2.5.3.1 Functional anatomy of stomach
- 2.2.5.3.2 Functions of stomach
- 2.2.5.3.3 Composition and functions of gastric juice
- 2.2.5.3.4 Regulation of secretion and mechanism of HCL secretion
- 2.2.5.3.5 Methods of study of gastric function and its supplied aspect

#### **2.2.5.4 Pancreas**

2.2.5.4.1 Functional anatomy of pancreas

2.2.5.4.2 Composition and functions of pancreatic juice

2.2.5.4.3 Regulation of pancreatic secretion

2.2.5.4.4 Methods of study of pancreatic secretion

#### **2.2.5.5 Liver and Gall Bladder**

2.2.5.5.1 Functional anatomy of liver and biliary system

2.2.5.5.2 Functions of liver and gall bladder

2.2.5.5.3 Formation, storage and secretion of bile

2.2.5.5.4 Composition, function and regulation of release of bile

2.2.5.5.5 Entero-hepatic circulation

2.2.5.5.6 Tests for liver function

#### **2.2.5.6 Small intestine**

2.2.5.6.1 Functional anatomy and functions of small intestine

2.2.5.6.2 Composition, function and mechanism of secretions of Succus entericus

#### **2.2.5.7 Large intestine**

2.2.5.7.1 Functional anatomy and functions of large intestine

#### **2.2.5.8 Gastro-intestinal hormones**

2.2.5.8.1 Release and functions

#### **2.2.5.9 Gastro-intestinal movements**

2.2.5.9.1 Mastication, deglutition and vomiting

2.2.5.9.2 Movements of stomach, filling and emptying of stomach

2.2.5.9.3 Movements of small intestines

2.2.5.9.4 Movements of large intestine and defecation

2.2.5.9.5 Regulation of movement

**2.2.5.10 Digestion and absorption of carbohydrates, fats, proteins and vitamins, minerals and water**

**2.2.6 Excretory System**

2.2.6.1 General introduction, organs of excretion with special emphasis on evolution of excretory mechanisms

2.2.6.2 Functional anatomy of renal glands and renal circulation

2.2.6.3 Nephron -

2.2.6.3.1 Mechanism of urine formation

2.2.6.3.2 Concentration and acidification of urine

2.2.6.3.3 Renal function tests

2.2.6.4 Non-excretory functions of kidney

2.2.6.4.1 Physiology of micturition and its abnormalities

2.2.6.5 Skin – structure and functions

## 2.3 **Physiology-II (Duration: 18 Months)**

### 2.3.1 **Endocrine System**

2.3.1.1 **Introduction** - evolutionary background and organization of endocrine control systems

#### 2.3.1.2 **Hormones**

2.3.1.2.1 Classification of hormones and mechanism of hormone action

2.3.1.2.2 Regulation of hormone secretion and feedback system

2.3.1.3 Hypothalamo-hypophyseal system – hormones released

#### 2.3.1.4 **Endocrine glands**

2.3.1.4.1 Pituitary glands –functional anatomy of anterior and posterior pituitary glands. source, chemical nature, actions, regulation and applied aspect of anterior and posterior pituitary hormones

2.3.1.4.2 Thyroid gland – functional anatomy , hormones ,applied aspect

2.3.1.4.3 Parathyroid gland – functional anatomy, hormones, applied aspect

2.3.1.4.4 Adrenal gland – Functional anatomy of adrenal cortex and medulla, hormones and applied physiology of adrenal cortex and medulla

2.3.1.4.5 Islets of langerhans – Functional anatomy, hormones ,applied aspect

2.3.1.4.6 Other hormones – prostaglandins, thromboxanes, acetylcholine ,serotonin, histamine, bradykinin, leptin, prostacyclin, leukotrienes, atrial natriuretic peptide, brain natri uretic peptide,melatonin

## **2.3.2 Reproductive System**

### **2.3.2.1 Physiology of reproduction**

- 2.3.2.1.1 Introduction to physiology of reproduction
- 2.3.2.1.2 Sex determination, sex differentiation and chromosomal study

### **2.3.2.2 Male Reproductive System**

- 2.3.2.2.1 Development and structure of testes
- 2.3.2.2.2 Functions of testes
- 2.3.2.2.3 Gonadotropins and gonadal hormones
- 2.3.2.2.4 Composition of semen and structure of human sperm

### **2.3.2.3 Female Reproductive System**

- 2.3.2.3.1 Functional anatomy of female reproductive system
- 2.3.2.3.2 Functional anatomy and functions of ovary
- 2.3.2.3.3 Gonadotropins and ovarian hormones
- 2.3.2.3.4 Physiology of menstrual cycle
- 2.3.2.3.5 physiology of ovulation and pregnancy
- 2.3.2.3.6 Physiology of placenta, gestation and parturition
- 2.3.2.3.7 Physiological basis of tests for ovulation and pregnancy
- 2.3.2.3.8 Physiology of lactation

### 2.3.3 **Nerve and Muscle Physiology**

#### 2.3.3.1 **Neuron**

- 2.3.3.1.1 Morphology of neuron and Classification of neuron and nerve Fibres
- 2.3.3.1.2 Properties of nerve fibres and measure of excitability
- 2.3.3.1.3 Degeneration and regeneration of nerve fibres

#### 2.3.3.2 **Muscle**

- 2.3.3.2.1 Classification of muscle
- 2.3.3.2.2 Skeletal muscle – structure , properties and functions
- 2.3.3.2.3 Excitation -contraction coupling
- 2.3.3.2.4 Neuromuscular junction
- 2.3.3.2.5 Smooth muscle – structure, types, properties, functions
- 2.3.3.2.6 Cardiac muscle – structure, properties, functions
- 2.3.3.2.7 Myasthenia gravis
- 2.3.3.2.8 Starling's law and its applications

### 2.3.4 **Central Nervous System**

2.3.4.1 Structural and functional organization of central nervous system

2.3.4.2 Neuroglia

#### 2.3.4.3 **Sensory physiology**

2.3.4.3.1 Classification and general properties of receptors

#### 2.3.4.4 **Synapse**

2.3.4.4.1 Types of synapse and their structure

2.3.4.4.2 Functions and properties of synapse

2.3.4.4.3 Classification and actions of neuro -transmitters

#### 2.3.4.5 **Reflexes**

- 2.3.4.5.1 Classification of Reflexes
- 2.3.4.5.2 General properties of reflexes (with examples)
- 2.3.4.5.3 Reciprocal inhibition and reciprocal innervation

#### **2.3.4.6 Spinal cord**

- 2.3.4.6.1 Functional anatomy of spinal cord
- 2.3.4.6.2 Ascending tracts – situation, origin, course, termination and functions
- 2.3.4.6.3 Physiology of pain, different pathways of pain sensation
- 2.3.4.6.4 Physiology of referred pain,
- 2.3.4.6.5 Gate control theory, analgesia system
- 2.3.4.6.6 Descending tracts – situation, origin, course, termination and functions
- 2.3.4.6.7 Extrapyramidal tracts – situation, origin, course, termination and functions
- 2.3.4.6.8 Upper and lower motor neurons and their lesions
- 2.3.4.6.9 Brown Sequard syndrome, Syringomyelias

#### **2.3.4.7 Functional anatomy and functions of brain stem**

#### **2.3.4.8 Thalamus**

- 2.3.4.8.1 Functional anatomy, connections and functions
- 2.3.4.8.2 Effects of lesions

#### **2.3.4.9 Internal capsule – situation, divisions, effect of lesions**

#### **2.3.4.10 Hypothalamus**

- 2.3.4.10.1 Functional anatomy, connections and functions
- 2.3.4.10.2 Effect of lesions

#### **2.3.4.11 Cerebellum**

2.3.4.11.1 Functional anatomy, connections and functions

2.3.4.11.2 Effects of lesions and tests for cerebellar function

#### **2.3.4.12 Basal ganglia**

2.3.4.12.1 Functional anatomy, connections and functions

2.3.4.12.2 Diseases of basal ganglia and its clinical evaluation

#### **2.3.4.13 Cerebral cortex**

2.3.4.13.1 Functional anatomy of cerebral cortex

2.3.4.13.2 Functional areas and its functions of frontal lobe, parietal lobe, temporal lobe, occipital lobe

2.3.4.13.3 Methods of study of cortical connections and functions

#### **2.3.4.14 Limbic System**

2.3.4.14.1 Functional anatomy, connections and functions

#### **2.3.4.15 Reticular formation**

2.3.4.15.1 Functional anatomy, connections and functions of reticular formation

2.3.4.15.2 EEG, physiology of sleep and wakefulness

#### **2.3.4.16 Vestibular apparatus**

2.3.4.16.1 Functional anatomy, connections and functions

2.3.4.16.2 Effects of lesions and their assessment

2.3.4.16.3 Physiology of maintenance and regulation of muscle tone, posture and equilibrium

2.3.4.16.4 Decerebrated rigidity and righting reflexes

#### **2.3.4.17 Higher functions**

2.3.4.17.1 Learning, speech, memory, behavior and emotions

### **2.3.4.18 Cerebro-spinal fluids**

- 2.3.4.18.1 Formation, circulation, functions of CSF
- 2.3.4.18.2 Properties and composition of CSF
- 2.3.4.18.3 Method of collection of CSF and its clinical significance
- 2.3.4.18.4 Blood – brain barrier

### **2.3.4.19 Autonomic Nervous System**

- 2.3.4.19.1 Sympathetic nervous system and its functions
- 2.3.4.19.2 Parasympathetic nervous system and its functions

## **2.3.5 Special Senses**

### **2.3.5.1 Smell**

- 2.3.5.1.1 Structure of olfactory receptors,
- 2.3.5.1.2 Physiology of olfaction and olfactory discrimination
- 2.3.5.1.3 Olfactory pathway and defects of olfaction

### **2.3.5.2 Taste** structure of taste receptor, primary taste sensation and taste pathway and applied aspects

### **2.3.5.3 Vision**

- 2.3.5.3.1 Functional anatomy of eye
- 2.3.5.3.2 Structure of visual receptors
- 2.3.5.3.3 Neural, chemical, electrical basis of visual process
- 2.3.5.3.4 Visual acuity ,field of vision, tests for visual acuity and field of vision
- 2.3.5.3.5 Visual pathways and effects of lesions in visual pathways
- 2.3.5.3.6 Pupillary reflexes
- 2.3.5.3.7 Color vision, color blindness and tests for color blindness
- 2.3.5.3.8 Errors of refraction and its correction,

- 2.3.5.3.9 Physiology of aqueous humor
- 2.3.5.3.10 Dark and light adaptation
- 2.3.5.3.11 Lacrimal glands ,Formation and circulation of tears

#### **2.3.5.4 Hearing**

- 2.3.5.4.1 Functional anatomy and functions of external,middle and internal ear
- 2.3.5.4.2 Impedance matching and tympanic reflex
- 2.3.5.4.3 Auditory pathways and auditory cortex
- 2.3.5.4.4 Mechanism of hearing
- 2.3.5.4.5 Frequency analysis, sound localization,
- 2.3.5.4.6 Defects of hearing
- 2.3.5.4.7 Audiometry, other tests for hearing defects

## 2.4 **Physiology Practical**

### 2.4.1 **Blood**

- 2.4.1.1 Preparation and examination of peripheral blood smear and determination of differential leucocyte count
- 2.4.1.2 Determination of total red blood cell count
- 2.4.1.3 Determination of total leucocyte count
- 2.4.1.4 Determination of platelet count
- 2.4.1.5 Determination of osmotic fragility of erythrocytes
- 2.4.1.6 Determination of erythrocyte sedimentation rate, packed cell volume
- 2.4.1.7 Determination of hemoglobin concentration of blood
- 2.4.1.8 Determination of ABO and Rh blood groups
- 2.4.1.9 Determination of bleeding time, clotting time

### 2.4.2 **Cardiovascular system**

- 2.4.2.1 Determination of the effect of posture on blood pressure
- 2.4.2.2 Clinical examination of the human cardiovascular system (CVS)

### 2.4.3 **Respiration**

- 2.4.3.1 Spirometry (demonstration)
- 2.4.3.2 Examination of human respiratory system

### 2.4.4 **Neurophysiology**

- 2.4.4.1 Examination of motor and sensory system
- 2.4.4.2 Examination of cranial nerves

### 2.4.5 **Special senses**

- 2.4.5.1 Determination of visual acuity
- 2.4.5.2 Clinical assessment of color vision (Demonstration)
- 2.4.5.3 Perimetry: Mapping of visual field

## 2.5 Textbooks

- 2.5.1 Textbook of Medical Physiology – AC Guyton and Hall
- 2.5.2 Review of Medical Physiology – WF Ganong’s
- 2.5.3 Concise Textbook of Medical Physiology – SK Chaudhury
- 2.5.4 Understanding Medical Physiology – RL Bijlani
- 2.5.5 Essentials of Medical Physiology – K Sembulingam

## 2.6 Reference Books

- 2.6.1 Best and Taylor’s Physiological basis of medical practice
- 2.6.2 Berne and Levy Physiology
- 2.6.3 Practical Physiology – C L Ghai
- 2.6.4 Practical Physiology – Dr. V. G.Ranade

## 2.7 Scheme Of Examination

S.No	Subject	Theo-ry	Intern-al Assmt	Viva-Voce	Total	Practi-cals	Inter-nal Assmt	Total Marks	Grand Total Marks
03.	Physiology - I	80	20	30	130	60	10	70	200
04.	Physiology – II	80	20	30	130	60	10	70	200

### **3. BIOCHEMISTRY**

#### **3.1 Goals and Objectives**

##### **3.1.1 Goals:**

The goals of introducing biochemistry to the undergraduate students is to make them understand the scientific basis of the life processes at the molecular level and to orient them towards the application of the knowledge in solving clinical problems.

##### **3.1.2 Objectives**

###### **3.1.2.1 Knowledge**

After completion of the course, the student shall be able to:

- 3.1.2.1.1 Elucidate the molecular and functional organization of a cell and list its sub cellular components;
- 3.1.2.1.2 Outline structure, function and inter-relationships of bio molecules and consequences of deviation from normal;
- 3.1.2.1.3 Review the fundamental aspects of enzymology and clinical application wherein regulation of enzymatic activity is altered;
- 3.1.2.1.4 Illustrate digestion and assimilation of nutrients and consequences of malnutrition;
- 3.1.2.1.5 Integrate the various aspects of metabolism and their regulatory pathways;
- 3.1.2.1.6 Explain biochemical basis of inherited disorders with their associated sequelae;
- 3.1.2.1.7 Describe mechanisms involved in maintenance of body fluid and pH homeostasis;

- 3.1.2.1.8 Delineate the molecular mechanisms of gene expression and regulation, the principles of genetic engineering and their application in medicine;
- 3.1.2.1.9 Summarize the molecular concept of body defenses and their application in medicine;
- 3.1.2.1.10 Outline the biochemical basis of environmental health hazards, biochemical basis of cancer and carcinogenesis;
- 3.1.2.1.11 Familiarize with principles of various conventional and specialized laboratory investigations and instrumentation analysis and interpretation of a given data;
- 3.1.2.1.12 Suggest experiments to support theoretical concepts and clinical diagnosis;

### **3.1.2.2 Skills**

At the end of the course, the student will be able to:

- 3.1.2.2.1 Perform conventional techniques/instruments to perform biochemical analysis relevant to clinical screening and diagnosis;
- 3.1.2.2.2 Analyse and interpret investigative data;
- 3.1.2.2.3 Demonstrate the skills of solving scientific and clinical problems and decision making

### **3.1.2.3 Integration**

The integrated knowledge of biochemistry will help the students to integrate molecular events with the structure and function of the human body in health and disease.

### **3.2 Theory (Duration: 18 months: Hours: 200+100)**

3.2.1 Biomolecules & biochemical perspective of a cell

3.2.2 Cell structure

3.2.3 Subcellular organelles

3.2.4 Cell membrane

3.2.5 Transport mechanisms

3.2.6 Chemistry of Carbohydrates

3.2.6.1 Definition, classification and biological importance of carbohydrates

3.2.6.2 Monosaccharides; Classification, Isomerism and properties of monosaccharides, modified monosaccharides

3.2.6.3 Disaccharides

3.2.6.4 Polysaccharides

3.2.7 Chemistry of Lipids

3.2.7.1 Definition, classification and biological importance of Lipids

3.2.7.2 Simple lipids: Composition of Triacyl glycerol & Waxes.

3.2.7.3 Compound lipids: Composition & functions of Phospholipids, glycolipids & lipoproteins

3.2.7.4 Derived lipids: Fatty acids - Classification & Properties fatty acids, Steroids & sterols

3.2.7.5 Micelle, Liposomes

### 3.2.8 Chemistry of Proteins

- 3.2.8.1 Definition, classification & properties of amino acids
- 3.2.8.2 Definition, classification & properties of proteins
- 3.2.8.3 Structural organization of proteins
- 3.2.8.4 Biological significance of amino acids & proteins
- 3.2.8.5 Plasma proteins, their functions and clinical significance

### 3.2.9 Enzymes

- 3.2.9.1 Definition, classification,
- 3.2.9.2 Kinetics, mechanism of enzymatic catalysis.
- 3.2.9.3 Factors influencing enzymatic catalyses, enzyme activators and inhibitors.
- 3.2.9.4 Regulation of enzyme activity,
- 3.2.9.5 Iso-enzymes & clinical enzymology

### 3.2.10 Vitamins

- 3.2.10.1 Definition and classification of vitamins
- 3.2.10.2 Brief account of chemistry, source, RDA, biochemical functions, deficiency diseases, Vitamin antagonists and hypervitaminosis of each vitamin

### 3.2.11 Mineral metabolism

- 3.2.11.1 Classification of minerals
- 3.2.11.2 Brief account of chemistry, source, RDA, biochemical functions, deficiency diseases of each mineral

### 3.2.12 Digestion and absorption

- 3.2.12.1 Digestion and absorption of carbohydrates
- 3.2.12.2 Digestion and absorption of lipids

3.2.12.3 Digestion and absorption of proteins.

### 3.2.13 Carbohydrate Metabolism

3.2.13.1 Major metabolic pathways: Glycolysis, pyruvate oxidation, Citric acid cycle, Gluconeogenesis, HMP Shunt pathway & glycogen metabolism

3.2.13.2 Minor metabolic pathways: Metabolism of Fructose and Galactose,

3.2.13.3 Regulation of blood sugar, glucose tolerance test, Diabetes mellitus & other disorders of carbohydrate metabolism.

### 3.2.14 Biologic Oxidation

3.2.14.1 Redox potential

3.2.14.2 High energy compounds

3.2.14.3 Oxidative Phosphorylation

3.2.14.4 Electron transport chain

### 3.2.15 Lipid metabolism

3.2.15.1 Biosynthesis and degradation of fatty acids

3.2.15.2 Metabolism of cholesterol

3.2.15.3 Ketone bodies: their synthesis, utilization and conditions leading to ketoacidosis

3.2.15.4 Chemistry and metabolism of lipoproteins, hyper lipoproteinemias

3.2.15.5 Prostaglandins

3.2.15.6 Fatty liver, Obesity & other lipid storage disease.

### 3.2.16 Protein metabolism

3.2.16.1 Overview of protein metabolism

3.2.16.2 Nitrogen balance

3.2.16.3 Formation and disposal of ammonia

3.2.16.4 General metabolism of amino acids

3.2.16.5 Inborn errors of amino acid metabolism

3.2.17 Molecular biology

3.2.17.1 Chemistry of Nucleic acids: Definition, classification, composition of nucleic acids; Structure and function of DNA ; Types, structure & functions of RNA

3.2.17.2 Metabolism of Nucleic acids : Synthesis and breakdown of purines; Synthesis and breakdown of pyrimidine

3.2.17.3 DNA Replication, Inhibitors of DNA replication

3.2.17.4 DNA Transcription & Post-transcriptional processing.

3.2.17.5 Genetic code

3.2.17.6 Protein synthesis, inhibitors of protein synthesis & Post-translational processing

3.2.18 Integration of metabolism

3.2.18.1 Metabolic effects of insulin & glucagon

3.2.18.2 The feed/fast cycle

3.2.18.3 Biochemistry of starvation

3.2.19 Biochemistry of blood

3.2.19.1 Porphyrins, Synthesis and degradation of heme; Porphyria; Jaundice

3.2.19.2 Structure & functions of hemoglobin

3.2.19.3 Abnormal hemoglobins & hemoglobinopathies

3.2.19.4 Plasma Proteins

3.2.19.5 Immunoglobulins

3.2.19.6 Blood pH & its regulation

3.2.19.7 Role of kidney and lungs in maintaining pH of blood

3.2.19.8 Acidosis and Alkalosis

3.2.20 Energy metabolism and Nutrition

3.2.20.1 Calorific value of foods

3.2.20.2 Basal metabolic rate and its importance

3.2.20.3 Specific dynamic action

3.2.20.4 Energy requirements for physical activity

3.2.20.5 Balanced diet; Role of carbohydrates, proteins & lipids

3.2.20.6 Nutritive value of proteins, protein-energy malnutrition (PEM)

3.2.21 Clinical biochemistry

3.2.21.1 Tools of biochemistry

3.2.21.2 Liver function tests

3.2.21.3 Renal function tests

3.2.22 Environmental biochemistry

3.2.22.1 Environmental pollutants

3.2.22.2 Xenobiotics, interaction with biomolecules, effects & metabolism

3.2.22.3 Biochemical characteristics of cancer and carcinogenesis

### 3.3 **Practicals**

3.3.1 **Qualitative Experiments**

3.3.1.1 General reactions Carbohydrates

3.3.1.1.1 Reactions of monosaccharides - glucose and fructose

3.3.1.1.2 Reactions of disaccharides - lactose, maltose and sucrose

3.3.1.1.3 Reactions of polysaccharides - starch and dextrin

**3.3.1.2** General reactions of proteins (albumin, casein and gelatin)

3.3.1.2.1 Colour reactions of proteins

3.3.1.2.2 Precipitation & coagulation reactions of proteins

**3.3.1.3** General reactions of non-protein-nitrogen compounds (N P N) - Urea, Uric acid and creatinine

**3.3.1.4** Analysis of Urine.

3.3.1.4.1 Analysis of normal urine.

3.3.1.4.2 Analysis of abnormal urine.

### **3.3.2 Quantitative Experiments**

**3.3.2.1** Blood Sugar estimation by Glucose Oxidase method

### **3.3.3 Demonstrative Experiments**

**3.3.3.1** Colorimetry and colorimeter

3.3.3.1.1 Estimation of concentration of serum Cholesterol

3.3.3.1.2 Estimation of concentration of serum Urea

3.3.3.1.3 Estimation of concentration of serum Uric acid

3.3.3.1.4 Estimation of concentration of serum triglycerides

3.3.3.1.5 Estimation of concentration of serum calcium

**3.3.3.2** Paper chromatography

**3.3.3.3** Electrophoresis

**3.3.3.4** Glucose tolerance test (GTT)

### 3.4 **Text Books**

#### 3.4.1 **Recommended text books for Biochemistry**

- 3.4.1.1 Text book of Biochemistry - by U. Sathyanarayana, U Chakrapani
- 3.4.1.2 Text book of Biochemistry – by DM Vasudevan, Sreekumari S
- 3.4.1.3 Lippincott’s Illustrated Reviews- Biochemistry by Pamela C Champe,  
Richard A Harvey
- 3.4.1.4 Textbook of Medical Laboratory Technology by Praful B Godkar, Darshan  
P Godkar
- 3.4.1.5 Essentials of Biochemistry by PankajNaik

#### 3.4.2 **Reference Books for Biochemistry**

- 3.4.2.1 Harper’s Illustrated Biochemistry, Robert K. Murray, Daryl K. Granner,  
and Victor W. Rodwell.
- 3.4.2.2 Biochemistry. Lubert Stryer. W.H. Freeman and Company, New York.
- 3.4.2.3 Principles of Biochemistry. Ed. Lehinger, Nelson and Cox. CBS  
Publishers and distributors.
- 3.4.2.4 Textbook of Biochemistry with Clinical Correlations. Ed. Thomas M.  
Devlin, Wiley-Liss Publishers.
- 3.4.2.5 Tietz Textbook of Clinical Chemistry. Ed. Burtis and Ashwood. W.B.  
Saunders Company.
- 3.4.2.6 Biochemistry. Ed. Donald Voet and Judith G. Voet. John Wiley & Sons,  
Inc

### 3.5 Scheme Of Examination

S.No	Subject	Theory	Internal Assmt	Viva-Voce	Total	Practicals	Internal Assmt	Total Marks	Grand Total Marks
01.	Biochemistry	80	20	30	130	60	10	70	200

## **4. PHILOSOPHY OF NATUROPATHY**

### **4.1 Goals and Objectives**

#### **4.1.1 Goals:**

The goals of introducing philosophy of Naturopathy to the undergraduate students is to make them understand philosophical basis of the system of Naturopathy, including concepts of health, causes and pathogenesis of disease and brief introduction to the various therapeutic modalities used in Naturopathy.

#### **4.1.2 Objectives**

##### **4.1.2.1 Knowledge**

After completion of the course, the student shall be able to:

- 4.1.2.1.1 Elucidate the history of Naturopathy including major contributors to the field and their work;
- 4.1.2.1.2 Understand the evolution and composition of the human body according to different schools of medicine such as Naturopathy, *Yoga, Ayurveda*, Homeopathy, Modern Medicine, etc.
- 4.1.2.1.3 Firmly establish his/her diagnostic and therapeutic thought processes in the fundamental principles of Naturopathy:
- 4.1.2.1.4 Laws of nature according to Henry Lindlahr
- 4.1.2.1.5 Concepts of health and disease according to Naturopathy
- 4.1.2.1.6 Ten basic principles of Naturopathy
- 4.1.2.1.7 Concept of *Panchamahabhuthas* and Naturopathy
- 4.1.2.1.8 Foreign matter, toxin accumulation, theory of Toxemia, Unity of disease and Unity of Cure
- 4.1.2.1.9 Concept of vitality

- 4.1.2.1.10 *Panchatantras, Shareera Dharmas*
- 4.1.2.1.11 Holistic approach of Naturopathy
- 4.1.2.1.12 Modern perspectives of Naturopathy
- 4.1.2.1.13 Natural rejuvenation
- 4.1.2.1.14 Understand naturopathic viewpoints of concepts like hygiene, vaccination, family planning, personal life and prevention of diseases, geriatrics, etc, and implement them in his/her practice
- 4.1.2.1.15 Understand Principles behind using the diagnostic procedures of Naturopathy, like spinal diagnosis, facial diagnosis, iris diagnosis, and chromo diagnosis.
- 4.1.2.1.16 Demonstrate knowledge of recent advances and research in Naturopathy principles/theories.

#### **4.1.2.2 Skills**

At the end of the course, the student will be able to:

- 4.1.2.2.1 Demonstrate basic knowledge of the various therapeutic modalities utilised in Naturopathy;
- 4.1.2.2.2 Describe the various principles of Naturopathy with respect to the body, health, disease and therapy.

#### **4.1.2.3 Integration**

The integrated knowledge of philosophy of Naturopathy will help the students to integrate concepts of human body in health and disease with respect to Naturopathy in terms of diagnosis and management.

## 4.2 **Theory (Duration: 18 months)**

**Total hours: 500 (Theory: 300 Practical: 200)**

- 4.2.1 The Medical Profession & Medical Evolution- an Introduction
- 4.2.2 Concept of Health & Disease through the ages
- 4.2.3 The Human Body
  - 4.2.3.1 The evolution of human body
  - 4.2.3.2 Philosophy of the body, mind, soul, life, spirit and spiritual body with reference to various cultures, philosophies, Vedas and Modern view
  - 4.2.3.3 Composition of the human body, according to *Ayurveda*, Naturopathy, *Yoga*, Modern Medicine, Homeopathy
- 4.2.4 An Introduction to Nature Cure or Naturopathy- Definitions, concepts & theories of various pioneers in the field
- 4.2.5 History of Naturopathy & Philosophy of Naturopaths
  - 4.2.5.1 Chronological highlights of Naturopathy
  - 4.2.5.2 Philosophy of Indian Naturopaths.
    - 4.2.5.2.1 Vegiraju Krishnamaraju
    - 4.2.5.2.2 Vinoba Bhave
    - 4.2.5.2.3 Mahatma Gandhi.
    - 4.2.5.2.4 Dr. S. J. Singh
    - 4.2.5.2.5 Dr. J. M. Jussawala
  - 4.2.5.3 Philosophy of Foreign Naturopaths.
    - 4.2.5.3.1 Aesculapius
    - 4.2.5.3.2 Hippocrates
    - 4.2.5.3.3 The School of Salerno
    - 4.2.5.3.4 Paracelsus.

- 4.2.5.3.5 Vincent Priessnitz
- 4.2.5.3.6 Sebastian Kneipp
- 4.2.5.3.7 Arnold Rickli
- 4.2.5.3.8 Louis Kuhne
- 4.2.5.3.9 Adolf Just
- 4.2.5.3.10 John H Tilden
- 4.2.5.3.11 Sigmund Freud
- 4.2.5.3.12 Henry Lindlahr

#### **4.2.6 Fundamental principles, concepts & theories of Naturopathy.**

- 4.2.6.1** Laws of Nature according to Henry Lindlahr
- 4.2.6.2** Catechism of Nature Cure according to Henry Lindlahr
- 4.2.6.3** Concepts of Health according to Naturopathy
- 4.2.6.4** Concepts of Disease according to Naturopathy
- 4.2.6.5** The 10 basic principles of Naturopathy
- 4.2.6.6** Principles of Natural Medicine in the West
  - 4.2.6.6.1 The Healing Power of Nature (*Vis Medicatrix Naturae*)
  - 4.2.6.6.2 Identify and Treat the Causes (*Tolle Causam*)
  - 4.2.6.6.3 First Do No Harm (*Primum Non Nocere*)
  - 4.2.6.6.4 Doctor as Teacher (*Docere*)
  - 4.2.6.6.5 Treat the Whole Person
  - 4.2.6.6.6 Prevention
  - 4.2.6.6.7 Herring's law of cure
- 4.2.6.7** Concept of *Panchamahabhootas* & Naturopathy
- 4.2.6.8** Foreign matter and toxins accumulation in the body and its importance in elimination through different ways or channels.

- 4.2.6.9 Unity of disease, Unity of cure and way of treatment.
- 4.2.6.10 Theory of Toxemia- Toxins and anti-toxins, their generation, mitigation in nature cure way
- 4.2.6.11 Concept of Vitality & Vital economy
- 4.2.6.12 How Nature Cures- The Natural healing mechanisms
- 4.2.6.13 *Arogya Rakshak Panchatantras* and their importance in maintenance of good health prevention of diseases and treatment of diseases through lifestyle modification.
- 4.2.6.14 *Shareera Dharmas – Ahara, Nidra Bhaya, Maithuna*
- 4.2.6.15 Natural Immunity & how to acquire natural immunity in diseases.
- 4.2.6.16 Inflammation- Naturopathic perspective.
- 4.2.6.17 Naturopathy: a blend of Drugless Therapies
- 4.2.6.18 Holistic approach of Naturopathy
- 4.2.6.19 *Ayurveda*
  - 4.2.6.19.1 Introduction
  - 4.2.6.19.2 Definition of *Prakriti* and its categories.
  - 4.2.6.19.3 *Swastha Vrittam*
    - 4.2.6.19.3.1 *Dinacharya*
    - 4.2.6.19.3.2 *Ratricharya*
    - 4.2.6.19.3.3 *Ritucharya*
    - 4.2.6.19.3.4 *Vegadharanam*
- 4.2.6.20 Homeopathy
- 4.2.11.4 *Unani*
- 4.2.11.5 *Siddha*
- 4.2.7 Comparative study of Naturopathy with other systems of Medicine

- 4.2.8 Basic essentials of a Naturopathy practitioner - an introduction to qualities of a Naturopathy & *Yoga* Practitioner, Approach to the Patient with a Naturopathy view, Ethical considerations, Understanding the Scope & Limitations
- 4.2.9 Recent Advances in Naturopathy & *Yoga*
  - 4.2.9.1 Introduction to Psychosomatic Diseases & Psychoneuroimmunology
  - 4.2.9.2 Introduction to Mind-Body Medicine
  - 4.2.9.3 Lifestyle & psychosocial behavior

#### 4.2.9.4 Introduction to Integrative Medicine

#### 4.2.10 An introduction to Research & its importance in Naturopathy

### 4.3 **Practical**

Students should be introduced to various treatment procedures used in Naturopathy. Brief outlines of the following therapies in naturopathy including understanding the basic classification & procedure through observation and demonstration:

#### 4.3.1 Fasting

#### 4.3.2 Exercises

#### 4.3.3 Rest and relaxation

#### 4.3.4 Regular habits like sun bath, barefoot walking on grass

#### 4.3.5 Hydrotherapy

##### 4.3.5.1 Baths

##### 4.3.5.1.1 Hip-bath

##### 4.3.5.1.2 Spinal bath

##### 4.3.5.1.3 Steam bath

##### 4.3.5.1.4 Foot bath

##### 4.3.5.1.5 Full Immersion bath

##### 4.3.5.2 Packs

##### 4.3.5.2.1 Chest pack

##### 4.3.5.2.2 Abdominal pack

##### 4.3.5.2.3 Gastro-Hepatic pack

##### 4.3.5.2.4 Kidney Pack

##### 4.3.5.2.5 Full wet-sheet pack

#### 4.3.6 Internal Application of Water

##### 4.3.6.1 Enema

- 4.3.6.2 Colon Hydrotherapy
- 4.3.6.3 Water Drinking
- 4.3.7 Mud Therapy
- 4.3.8 Balneotherapy
- 4.3.9 Heliotherapy & Chromo therapy
- 4.3.10 Massage Therapy
- 4.3.11 Magneto therapy
- 4.3.12 Chiropractic
- 4.3.13 Osteopathy
- 4.3.14 Physiotherapy
- 4.3.15 Nutrition & Dietetics with special emphasis on Natural Diet
- 4.3.16 Acupuncture, Acupressure & Reflexology
- 4.3.17 Aromatherapy
- 4.3.18 Bio feed back

A Practical Record book should be maintained to document the above observations.

#### 4.4 Text Books

4.4.1	Philosophy of Nature Cure	Henry Lindlahr
4.4.2	Practice of Nature Cure	Henry Lindlahr
4.4.3	Human Culture and Cure	Dr. E.D. Babbitt
4.4.4	Practical Nature Cure	K. Laxman Sharma
4.4.5	History and Philosophy of Nature Cure	S.J. Singh
4.4.6	My Nature Cure	M.K. Gandhi
4.4.7	Natural Health Care – A to Z	Belinda Gran
4.4.8	Introduction to Natural Hygiene	Herbert.M.Shelton
4.4.9	Text book of Natural Medicine	Joseph E. Pizzorno & Michael T. Murray
4.4.10	Nature Cure treatments	Jindal
4.4.11	Complete handbook of Nature cure	H. K. Bakhru
4.4.12	Toxemia	J. H. Tilden
4.4.13	Return to Nature	Adolf Just

#### 4.5 Reference Books

4.5.1	My Nature Cure or Practical Naturopathy	S.J. Singh
4.5.2	The Science of Facial Expression	Louis Kuhne
4.5.3	The Story of My Experiments With Truth	M.K Gandhi
4.5.4	<i>Ayurveda</i> for health and long life	Dr.R.K.Garde
4.5.5	Fundamentals of <i>Ayurveda</i>	K. N. Udupa
4.5.6	Siddha Medicine	Ram Murthy
4.5.7	Homeopathic Philosophy	Kent

4.5.8	Everybody's Guide to Nature Cure	Harry Benjamin
4.5.9	Prayer	M.K.Gandhi
4.5.10	Diet and Diet Reforms	M.K.Gandhi
4.5.11	Panchatantra	Venkat Rao
4.5.12	Nature Cure	J.N. Jussawalla
4.5.13	The Encyclopedia of Natural Medicine	Joseph E. Pizzorno & Michael T. Murray

#### 4.6 **Scheme Of Examination**

S.N o	Subject	Theo -ry	Intern -al Assm t	Viva- Voce	Total	Practi -cals	Inter- nal Assm t	Total Mark s	Gran d Total Mark s
01.	Philosophy of Naturopathy	80	20	30	130	60	10	70	200

## 5. **PRINCIPLES OF YOGA**

### 5.1 Goals and Objectives

#### 5.1.1 **Goal:**

The goal of teaching *Yoga* to undergraduate students is to familiarize them with basic principles of *Yoga* with respect to history, definitions, philosophy and practices of *Yoga*, with emphasis of *AshtangaYoga*.

#### 5.1.2 **Objectives:**

##### 5.1.2.1 **Knowledge:**

After the completion of the course, the student shall be able to:

- 5.1.2.1.1 Explain the various definitions of *Yoga*, history of *Yoga* and branches of *Yoga* ;
- 5.1.2.1.2 Describe kinds of *Yogasanas*, its importance, methods, rules, regulations and limitations;
- 5.1.2.1.3 Illustrate the various limbs of *Ashtanga Yoga*;
- 5.1.2.1.4 Demonstrate knowledge of *pranayamas*, *prana* and lifestyle, breathing and lifespan.

##### 5.1.2.2 **Skills:**

After the completion of the course, the student shall be able to:

- 5.1.2.2.1 Demonstrate various types of *Yogasanas* in their correct method of performance;
- 5.1.2.2.2 Demonstrate different *pranayamas*.
- 5.1.2.2.3 Explain about the definitions, origin, branches of *Yoga*.

##### 5.1.2.3 **Integration**

At the completion of training, the student should be able to comprehend the basic principles of *Yoga*.

## 5.2 **Theory (Duration: 12 months)**

**Total hours: 450 (Theory: 250 Practical: 200)**

- 5.2.1 What is *Yoga* and various definitions of *Yoga*.
- 5.2.2 History of *Yoga* (Relative chronology, *Yoga* before the time of *Patanjali*, Indus Valley Civilization).
- 5.2.3 Outlines on branches of *Yoga* – *Raja*, *Hatha*, *Jnana*, *Karma*, *Bhakti*, *Mantra*, *Kundalini* and *Laya*.
- 5.2.4 Introduction to *Yogasanas*
  - 5.2.4.1 Definition of *Yogasanas*
  - 5.2.4.2 *Yogasanas* and *Prana*
  - 5.2.4.3 *Yogasanas* and *Kundalini*
  - 5.2.4.4 *Yogasanas* and the mind-body connection
  - 5.2.4.5 *Yogasanas* and Exercises
- 5.2.5 Classifications of *Yogasanas* – Beginners group, Intermediate group, Advanced group, dynamic and static *Yogasanas*.
- 5.2.6 Introduction to *Pranayama*
  - 5.2.6.1 Definition
  - 5.2.6.2 *Prana* and lifestyle
  - 5.2.6.3 Breath, health and *Pranayama*
  - 5.2.6.4 Breathing and Lifespan
  - 5.2.6.5 *Pranayama* and spiritual aspiration
- 5.2.7 Introduction to *AshtangaYoga*
  - 5.2.7.1 *Yama*
  - 5.2.7.2 *Niyama*
  - 5.2.7.3 *Asana*

5.2.7.4 *Pranayama*

5.2.7.5 *Pratyahara*

5.2.7.6 *Dharana*

5.2.7.7 *Dhyana*

5.2.7.8 *Samadhi*

5.2.8 Relaxation postures

5.2.8.1 *Shavasana*

5.2.8.2 *Makarasana*

5.2.8.3 *Sitali Dandasana*

5.2.8.4 *Sitali Tadasana*

5.2.9 *Suryanamaskara*

### 5.3 **Practical**

5.3.1 Joint movements

5.3.2 Loosening exercises

5.3.3 *Sukshma Vyayama*

5.3.4 Stretchings

5.3.5 Breathing exercises

5.3.6 *Suryanamaskara*

5.3.7 *Asanas*

#### 5.3.7.1 Standing

5.3.7.1.1 *Tadasana*

5.3.7.1.2 *Ardha Kati Chakrasana*

5.3.7.1.3 *Kati Chakrasana*

5.3.7.1.4 *Trikonasana*

5.3.7.1.5 *Vrikshasana*

5.3.7.1.6 *Utthita Trikonasana*

5.3.7.1.7 *Veerabhadrasana*

5.3.7.1.8 *Parsvottanasana*

5.3.7.1.9 *Parighasana*

#### 5.3.7.2 Supine

5.3.7.2.1 *Shavasana*

5.3.7.2.2 *Matsyasana*

5.3.7.2.3 *Sarvangasana*

5.3.7.2.4 *Halasana*

5.3.7.2.5 *Chakrasana*

5.3.7.2.6 *Pawanamuktasana*

- 5.3.7.2.7 *Setubandhasana*
- 5.3.7.2.8 *Parvottanasana*
- 5.3.7.2.9 *Vipareetakarani*
- 5.3.7.2.10 *Karnapedasana*
- 5.3.7.2.11 *Suptakonasana*

### **5.3.7.3 Prone**

- 5.3.7.3.1 *Makarasana*
- 5.3.7.3.2 *Bhujangasana – 1 and 2*
- 5.3.7.3.3 *Ardha Shalabhasana*
- 5.3.7.3.4 *Shalabhasana – 1*
- 5.3.7.3.5 *Dhanurasana*
- 5.3.7.3.6 *Adho mukha svanasana*

### **5.3.7.4 Sitting**

- 5.3.7.4.1 *Vakrasana*
- 5.3.7.4.2 *Ardhamatsyendrasana*
- 5.3.7.4.3 *Paschimottanasana*
- 5.3.7.4.4 *Ushtrasana*
- 5.3.7.4.5 *Vajrasana*
- 5.3.7.4.6 *Padmasana*
- 5.3.7.4.7 *Baddha Padmasana*
- 5.3.7.4.8 *Supta Vajrasana*
- 5.3.7.4.9 *Ardha Navasana*
- 5.3.7.4.10 *Gomukhasana*
- 5.3.7.4.11 *Veerasana*
- 5.3.7.4.12 *Baddha Konasana*

5.3.7.4.13 *Janusirshasana*

5.3.7.4.14 *Upavista Konasana*

5.3.7.4.15 *Shashankasana*

### 5.3.8 *Pranayama*

5.3.8.1 *Bhastrika*

5.3.8.2 *Sheetkari*

5.3.8.3 *Sheetali*

5.3.8.4 *Anuloma Viloma*

5.3.8.5 *Ujjayi*

5.3.8.6 *Bhramari*

### 5.3.9 *Kriya*

5.3.9.1 *Jala neti*

5.3.9.2 *Sutra neti*

5.3.9.3 *Vamana dhauti*

#### 5.4 **Textbooks**

5.4.1 Basis and definitions of *Yoga* – Vivekananda Kendra

5.4.2 *Asanas* – Swami Kuvalyananda

5.4.3 The gospel of Buddha – Parul Caruso

5.4.4 The Gospel of Shri Ramakrishna – Mahendranatha Gupta

5.4.5 Complete works of Shri Aurobindo

5.4.6 *Asanas, Pranayama, Bandhas, Mudras* – Swami Satyananda Saraswati

5.4.7 *Hatha YogaPradipika* – Swami Svatmarama

5.4.8 *Raja, Hatha, Jnana, BhaktiYoga* – Swami Vivekananda

#### 5.5 **Scheme Of Examination**

S.N	Subject	Theo-ry	Intern-al Assm-t	Viva-Voce	Total	Practi-cals	Inter-nal Assm-t	Total Marks	Grand Total Marks
01.	Principles of <i>Yoga</i>	80	20	30	130	60	10	70	200

## **2. PATHOLOGY**

### **2.1 Goals and Objectives**

#### **2.1.1 Goal:**

The goal of teaching pathology to undergraduate students is to provide a comprehensive knowledge of the mechanisms and causes of disease, so that he/she is able to comprehend fully the natural history and clinical manifestations of disease.

#### **2.1.2 Objectives:**

##### **2.1.2.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 2.1.2.1.1 Explain the structure and ultra-structure of a sick cell, mechanism of cell degeneration, cell death and repair and be able to correlate structural and functional alterations.
- 2.1.2.1.2 Describe the pathophysiological processes which govern the maintenance of homeostasis, mechanisms of their disturbance and the morphological and clinical manifestations associated with it;
- 2.1.2.1.3 Delineate the mechanisms and patterns of tissue response to injury such that he/she can appreciate the pathophysiology of disease processes and their clinical manifestations;
- 2.1.2.1.4 Correlate normal and altered morphology (gross and microscopic) of different organ systems in common diseases to the extent needed for understanding of disease processes and their clinical significance.

### **2.1.2.2 Skills:**

After the completion of the course, the student shall be able to:

- 2.1.2.2.1 Elaborate on principles, procedures and interpretation of results of diagnostic laboratory tests;
- 2.1.2.2.2 Perform with proper procedure simple bed side tests on biological fluid samples like blood, urine etc.
- 2.1.2.2.3 Prepare investigation flow-charts for diagnosing and managing common diseases;
- 2.1.2.2.4 Identify biochemical and physiological disturbances in diseases;

### **2.1.2.3 Integration**

At the completion of training, the student must be capable of integrating relationships between etiological factors such as social, economic and environmental in the natural history of common diseases in India.

## **2.2 Pathology – I (Duration: 12 months)**

**Total hours: 350 (Theory: 250 Practical: 100)**

2.2.1 History and Scope

2.2.2 Definition and various branches

2.2.3 Scientific study of disease and methodology

2.2.4 The cell and the reaction of cell, tissue and organ to injury

2.2.4.1 Structure and functions of cell

2.2.4.2 Causes and nature of cell injury

- 2.2.4.3 Toxic substances, physical agents and lack of nutrients
- 2.2.4.4 Infectious agents and parasites
- 2.2.4.5 Immune mechanisms and genetic defects
- 2.2.5 Reaction of cell to injurious agents**
  - 2.2.5.1 Lethal injury – necrosis and gangrene
  - 2.2.5.2 Sub lethal injury
    - 2.2.5.2.1 Cloudy swelling
    - 2.2.5.2.2 Fatty changes in liver, heart and kidney
    - 2.2.5.2.3 Glycogen infiltration and hyaline degeneration
    - 2.2.5.2.4 Lipid degeneration Gaucher's disease
    - 2.2.5.2.5 Muroid degeneration
  - 2.2.5.3 Excessive or abnormal accumulations – i) amyloid
  - 2.2.5.4 Pathological calcification
- 2.2.6 Inflammation and Repair**
  - 2.2.6.1 Definition, classification and nomenclature
  - 2.2.6.2 Acute inflammation
  - 2.2.6.3 Vascular and cellular phenomenon, cells of exudates chemical mediators and tissue changes in acute inflammation, cardinal signs of acute inflammation
  - 2.2.6.4 Fate, types and systemic effects of acute inflammation
- 2.2.7 Chronic Inflammation**
  - 2.2.7.1 Difference between acute and chronic inflammation
  - 2.2.7.2 Definition of Granuloma
- 2.2.8 Wound healing**

- 2.2.8.1 Restitution, regeneration and repair
- 2.2.8.2 Repair of epithelial and mesenchymal tissue
- 2.2.8.3 Primary union and secondary union
- 2.2.8.4 Mechanism involved and factors modifying repair process
- 2.2.9 Granulomas**
  - 2.2.9.1 Classification
  - 2.2.9.2 Tuberculosis, genesis and fate of tubercle, primary and secondary tuberculosis
  - 2.2.9.3 Definition, classification and pathology of leprosy
  - 2.2.9.4 Acquired primary, secondary and tertiary stages syphilis
  - 2.2.9.5 CNS syphilis, CVS syphilis and tertiary stages syphilis
  - 2.2.9.6 Actinomycosis, maduramycosis, rhinosporidiosis
- 2.2.10 Fluid and Hemodynamic Changes (circulatory disturbances)**
  - 2.2.10.1 Hyperemia, congestion and hemorrhage
  - 2.2.10.2 Thrombosis, embolism, DIC
  - 2.2.10.3 Ischemia, infarction and shock
- 2.2.11 Immunopathology**
  - 2.2.11.1 Basic pathological mechanism in autoimmune disorders
  - 2.2.11.2 Concept of immunodeficiency disorders
  - 2.2.11.3 Pathology of AIDS
  - 2.2.11.4 Growth disorders and definitions
- 2.2.12 Growth disorders**
  - 2.2.12.1 Definition of agenesis, aplasia, atrophy, hyperplasia, hypertrophy, hypoplasia, metaplasia

2.2.12.2 Concept of dysplasia, anaplasia and carcinoma in-situ

**2.2.13 Neoplasia**

2.2.13.1 Definition, classification and nomenclature

2.2.13.2 Characteristic features of benign and malignant tumors

2.2.13.3 Route of spread of malignant tumors

2.2.13.4 Grading and staging of cancers and pre-cancerous conditions

2.2.13.5 Carcinogenesis and carcinogens

2.2.13.6 Effect of tumor on host, and effect of host on tumors

2.2.13.7 Laboratory diagnosis of cancer – Biopsy, exfoliative cytology, prognostic prediction in cancer

2.2.13.8 Description of common tumors like – Fibroma, Lymphoma, Lipoma, Angioma, Leiomyoma, Fibrosarcoma, Lymphosarcoma, Liposarcoma, Angiosarcoma, and Leiomyosarcoma

2.2.13.9 Embryonal tumors like teratoma and retinoblastoma

**2.2.14 Mineral and Pigment Metabolism**

2.2.14.1 Pathology of melanin pigment

2.2.14.2 Pathology of hemoglobin and its derivatives

2.2.14.3 Hemosiderosis and hemochromatosis

**2.2.15 Genetic disorders**

2.2.15.1 Klinefelter's Syndrome, Turner's Syndrome, Down's Syndrome

## **2.3 Pathology – II (Duration: 12 months)**

### **2.3.1 Disorders of RBC**

- 2.3.1.1 Definition, morphologic and etio-pathologic classification of anemia
- 2.3.1.2 Iron deficiency anemia, B12 and folate deficiency anemia, sideroblastic anemia, post-hemorrhagic anemia
- 2.3.1.3 Concept and classification of hemolytic anemia
- 2.3.1.4 Acquired hemolytic anemia and aplastic anemia
- 2.3.1.5 Polycythemia
- 2.3.1.6 Laboratory investigations in anemia

### **2.3.2 Disorders of WBC**

- 2.3.2.1 Leukopenia, Leukocytosis
- 2.3.2.2 Leukemia, Agranulocytosis and Tropical eosinophilia

### **2.3.3 Coagulation and bleeding disorders**

- 2.3.3.1 Structure, function and pathology of platelets
- 2.3.3.2 Definition and classification of blood dyscrasias
- 2.3.3.3 Laboratory investigations in bleeding disorders

### **2.3.4 Diseases of cardiovascular system**

- 2.3.4.1 Arteriosclerosis and atherosclerosis
- 2.3.4.2 Aneurysm
- 2.3.4.3 Vasculitis and thromboangitis obliterans
- 2.3.4.4 Rheumatic heart disease, endocarditis, myocardial infarction
- 2.3.4.5 Congenital heart diseases, pericarditis
- 2.3.4.6 Congestive cardiac failure

### **2.3.5 Diseases of Respiratory system**

2.3.5.1 Lobar pneumonia, bronchopneumonia, pulmonary tuberculosis

2.3.5.2 Atelectasis, bronchiectasis and pneumoconiosis

2.3.5.3 Chronic Obstructive Pulmonary Diseases (COPD)

2.3.5.4 Bronchial asthma, chronic bronchitis

2.3.5.5 Acute respiratory distress syndrome (ARDS)

2.3.5.6 Tumors of lung and pleura

### **2.3.6 Diseases of gastrointestinal system**

2.3.6.1 Pleomorphic adenoma of salivary gland

2.3.6.2 Barrett's esophagus

2.3.6.3 Gastritis and peptic ulcer and tumors of stomach

2.3.6.4 Inflammatory bowel diseases – Crohn's disease, ulcerative colitis, typhoid  
ulcer, tumors of small intestine

2.3.6.5 Megacolon and tumors of colon

2.3.6.6 Malabsorption syndrome, tropical sprue and celiac tuberculosis

### **2.3.7 Diseases of liver, biliary tract and pancreas**

2.3.7.1 Liver function test and hepatic failure, viral hepatitis

2.3.7.2 Cirrhosis of liver, tumors of liver

2.3.7.3 Cholecystitis, gall stones

2.3.7.4 Acute pancreatitis, diabetes mellitus

2.3.7.5 Cystic fibrosis (mucoviscidosis)

2.3.7.6 Liver abscess and alcoholic liver disease

2.3.7.7 Indian childhood cirrhosis

### **2.3.8 Diseases of Kidney**

2.3.8.1 Renal function tests, renal failure, polycystic kidney

2.3.8.2 Acute glomerulonephritis, crescentic glomerulonephritis, membranous glomerulonephritis, nephritic syndrome

2.3.8.3 Chronic glomerulonephritis, acute tubular necrosis

2.3.8.4 Pyelonephritis, kidney in hypertension

2.3.8.5 Urolithiasis, tumors of kidney and pelvis

### **2.3.9 Diseases of Male Genital System**

2.3.9.1 Orchitis and testicular tumors

2.3.9.2 Nodular hyperplasia of prostate, carcinoma of prostate

2.3.9.3 Carcinoma of penis and lesions of penis

### **2.3.10 Diseases of Female Genital System**

2.3.10.1 Endometrial hyperplasia, adenomyosis and endometriosis

2.3.10.2 Carcinoma of cervix, tumors of ovary

2.3.10.3 Pelvic inflammatory diseases

2.3.10.4 Carcinoma and other diseases of vulva

### **2.3.11 Diseases of Breast**

2.3.11.1 Fibrocystic disease and tumors of breast

2.3.11.2 Gynecomastia

### **2.3.12 Endocrine pathology**

2.3.12.1 Pituitary, acromegaly, hypothyroidism and Grave's disease

2.3.12.2 Thyroiditis, tumors of thyroid and thyroid function tests

2.3.12.3 Hypoparathyroidism and hyperparathyroidism

- 2.3.12.4 Hyperplasia and adenoma of parathyroid
- 2.3.12.5 Adrenal gland, Addison's disease, Cushing's syndrome
- 2.3.12.6 Pheochromocytoma, neuroblastoma
- 2.3.13 Musculoskeletal pathology**
  - 2.3.13.1 Osteomyelitis and osteoporosis
  - 2.3.13.2 Rickets and osteomalacia
  - 2.3.13.3 Osteitis fibrosa cystic and Paget's disease, fibrous dysplasia
  - 2.3.13.4 Tumors of bone
  - 2.3.13.5 Rheumatoid arthritis, Gout
  - 2.3.13.6 Myasthenia gravis and progressive muscular dystrophy
- 2.3.14 Diseases of Nervous System**
  - 2.3.14.1 Meningitis, tumors of CNS
  - 2.3.14.2 Tumors of peripheral nerves
  - 2.3.14.3 Encephalitis
- 2.3.15 Diseases of Lymph nodes and Spleen**
  - 2.3.15.1 Lymphadenopathy
  - 2.3.15.2 Malignant lymphomas and splenomegaly
- 2.3.16 Pathology of skin**
  - 2.3.16.1 Squamous cell carcinoma, basal cell carcinoma
  - 2.3.16.2 Malignant melanoma
  - 2.3.16.3 Warts, molluscum contagiosum
  - 2.3.16.4 Superficial and deep fungal diseases

## 2.4 **Practical**

### 2.4.1 Hematology

- 2.4.1.1 Blood groups (A B O system)
- 2.4.1.2 Estimation of hemoglobin
- 2.4.1.3 Enumeration of RBCs (RBC count)
- 2.4.1.4 Total leucocyte count (Total count)
- 2.4.1.5 Differential leucocyte count (DC)
- 2.4.1.6 Peripheral smear staining and reporting
- 2.4.1.7 Absolute eosinophil count
- 2.4.1.8 Demonstration of
  - 2.4.1.8.1 Hemograms in anemia
    - 2.4.1.8.1.1 Iron deficiency anemia
    - 2.4.1.8.1.2 Macrocytic anemia
    - 2.4.1.8.1.3 Microcytic anemia
    - 2.4.1.8.1.4 Hemolytic anemia
  - 2.4.1.8.2 Hemograms in leukemias
    - 2.4.1.8.2.1 Acute types
    - 2.4.1.8.2.2 Chronic types
- 2.4.1.9 Slide study of
  - 2.4.1.9.1 Acute myeloid leukemia
  - 2.4.1.9.2 Chronic myeloid leukemia
  - 2.4.1.9.3 Chronic lymphatic leukemia

## 2.4.2 Clinical pathology

2.4.2.1 Urine analysis

2.4.2.2 Semen analysis

2.4.2.3 Pregnancy tests

2.4.2.4 Liver function tests

2.4.2.5 Fractional test meal

2.4.2.6 Glucose tolerance test

2.4.2.7 CSF analysis

## 2.5 **Textbooks**

2.5.1 Pathological basis of disease – Robbins, Cotran and Kumar

2.5.2 Textbook of Pathology – NC. Dey

## 2.6 **Reference Books**

2.6.1 Textbook of Pathology – Anderson

2.6.2 Systemic Pathology – Symmers

2.6.3 Medical Laboratory Technology – Ramnik Sood

## 2.7 **Scheme Of Examination**

S.No	Subject	Theo-ry	Intern-al Assmt	Viva-Voce	Total	Practi-cals	Inter-nal Assmt	Total Marks	Grand Total Marks
01.	Pathology	80	20	30	130	60	10	70	200

### **3. MICROBIOLOGY**

#### **2.1 Goals and Objectives**

##### **2.1.1 Goal:**

The goal of teaching microbiology to undergraduate students is to provide a comprehensive knowledge of the natural history, mechanisms and causes of infectious disease, including etiology, pathogenesis, laboratory diagnosis, treatment and control of diseases in the community.

##### **2.1.2 Objectives:**

###### **2.1.2.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 2.1.2.1.1 Remember and recall all the infectious micro-organisms of the human body and host-parasite relationship
- 2.1.2.1.2 Describe parasitic micro-organisms (viruses, fungi, bacteria, parasites) with the pathogenesis of the diseases they cause;
- 2.1.2.1.3 Enumerate and illustrate sources and modes of transmission, including insect vectors, of pathogenic and opportunistic organisms;
- 2.1.2.1.4 Describe the pathways and mechanisms of immunity to infection
- 2.1.2.1.5 Acquire knowledge about different vaccines that are available for the prevention of communicable diseases;

2.1.2.1.6 Effectively use sterilization and disinfection to control and prevent nosocomial and community acquired infections;

2.1.2.1.7 Order laboratory investigations for bacteriological examination of food, water and air.

#### **2.1.2.2 Skills:**

After the completion of the course, the student shall be able to:

2.1.2.2.1 Prescribe and interpret laboratory investigations for diagnosis of communicable diseases and identify infectious agents by clinical manifestations;

2.1.2.2.2 Perform common bed-side tests to detect and identify pathogenic agents, such as blood film for malaria, filaria, gram stain and Acid Fast Bacilli (AFB) staining and stool sample for ova cyst, etc.

#### **2.1.2.3 Integration**

3.1 At the completion of training, the student must be knowledgeable about clinical, therapeutic and preventive aspects of diseases most prevalent in India.

#### **3.2 Theory (Duration: 12 months)**

**Total hours: 250 (Theory: 150 Practical: 100)**

3.2.1 Infection and a brief description of Nosocomial infection

3.2.2 Immunology

- 3.2.2.1 Reticuloendothelial system, components and functions of the innate and adaptive immunity
- 3.2.2.2 Role of T and B lymphocytes
- 3.2.2.3 Induction of immune response
- 3.2.2.4 Cell-mediated immune response
- 3.2.2.5 Immunoglobulin structure and functions
- 3.2.2.6 Humoral immune response
- 3.2.2.7 Fate of antigen antibody complex
- 3.2.2.8 Complement system
- 3.2.2.9 Generation of antibody diversity
- 3.2.2.10 Hypersensitivities
- 3.2.2.11 Immunoregulation, autoimmunity, tolerance
- 3.2.2.12 HLA, disease association and transplantation
- 3.2.2.13 Serological and Immunological techniques, application in medicine (vaccines, immunotherapy, immunoassays and immune diagnosis)
- 3.2.2.14 Antibacterial Susceptibility testing
- 3.2.3 Cell as structural unit of life
- 3.2.4 Classification of living organisms
- 3.2.5 Classification of microorganisms
- 3.2.6 Distinctive characteristics of major groups of microorganisms
  - 3.2.6.1 Protozoa
  - 3.2.6.2 Algae
  - 3.2.6.3 Fungi

- 3.2.6.4 Bacteria
- 3.2.6.5 Viruses
- 3.2.7 General bacteriology
  - 3.2.7.1 Bergey's manual of systemic bacteriology
    - 3.2.7.1.1 Gram positive eubacteria: Cocci, endospore forming bacteria, regular shaped rods, irregular shaped rods, mycobacteria, actinomycetes, mycoplasmas
    - 3.2.7.1.2 Gram negative eubacteria: Spirochetes, microaerophilia curved bacteria, aerobic rods and Cocci, facultative rods, anaerobes, rickettsias and Chlamydiae
  - 3.2.7.2 Morphology, structure and staining
  - 3.2.7.3 Growth and nutrition of bacteria
  - 3.2.7.4 Sterilization and disinfections
  - 3.2.7.5 Culture media and methods
  - 3.2.7.6 Identification of bacteria
    - 3.2.7.6.1 Phenotypic characteristics – morphology, resistance, metabolism, biochemical test, antigenic structure, typing of bacterial strain, pathogenicity of tests, serological tests, molecular diagnostics
    - 3.2.7.6.2 Bacterial genetics – plasmids, genetic variation
    - 3.2.7.6.3 Mechanism of bacterial pathogenesis
    - 3.2.7.6.4 Bacteriophage
    - 3.2.7.6.5 Systemic bacteriology - Streptococcus, Staphylococcus, Pneumococcus, Gonococci, Meningococcus, Coryne

bacterium, Clostridium, Hemophilus, Mycobacterium, Spirochetes,  
Bordetella, Chlamydia

3.2.7.6.6 Virology- General properties of viruses and their diagnosis.

Study of Herpes, Adenovirus, Picornavirus, Hepatitis virus, Pox virus,  
Rabies, HIV, Poliovirus

3.2.7.6.7 Parasites- Protozoa- Entamoeba and Plasmodium

Helminthology---Ancylostoma, Ascaris, Taenia, Wuchereria

3.2.7.6.8 Mycology—General characteristics and methods used for study  
and diagnosis of fungal infections

Superficial mycoses, Opportunistic mycoses

Systemic mycoses

3.2.7.7 Bacteriology of water

### 3.3 **Practical**

3.3.1 Demonstration of culture media, demonstration of sterilization techniques

3.3.2 Systemic – identification of the pathogen from the given clinical material based  
on staining, property, cultural characters, biochemical and serological tests

3.3.3 Immunology – interpretation of given immunological test

3.3.4 Agglutination – slide, tube and passing agglutination precipitation – VDLR, Elisa

3.3.5 Parasitology – stool examination

3.3.6 Blood smear for malarial parasite and others for identification and interpretation

### 3.4 **Textbooks**

3.4.1 Textbook of microbiology – R Ananthanarayana and CK Jayakumar

3.4.2 Parasitology – Jayaram Panicker

3.4.3 Bacteriology – Dey

3.4.4 Textbook of microbiology – Chakravarthy

3.4.5 Immunology and microbiology – Gupta

### 3.5 **Reference Books**

3.5.1 Parasitology – Chaterjee

3.5.2 Practical microbiology – R Cruick Shank

3.5.3 Clinical microbiology – Bailey & Scott

3.5.4 Medical Laboratory – Manual for tropical countries – Monica Cheesbrough

### 3.6 **Scheme Of Examination**

S.No	Subject	Theo-ry	Intern-al Assm-t	Viva-Voce	Total	Practi-cals	Inter-nal Assm-t	Total Marks	Grand Total Marks
01.	Microbiology	80	20	30	130	60	10	70	200

## **4. COMMUNITY MEDICINE**

### **4.1 Goals and Objectives**

#### **4.1.1 Goal:**

The goal of teaching Community Medicine to undergraduate students is to prepare them to function as community and first level physicians in accordance with the institutional goals.

#### **4.1.2 Objectives:**

##### **4.1.2.1 Knowledge:**

After completion of the course, the student shall be able to:

- 4.1.2.1.1 Describe the health care delivery system including rehabilitation of the disabled in the country;
- 4.1.2.1.2 Describe the National Health Programmes with particular emphasis on maternal and child health programmes, family welfare planning and population control;
- 4.1.2.1.3 List epidemiological methods and describe their applications to communicable and non-communicable diseases in the community or hospital situation;
- 4.1.2.1.4 Apply bio-statistical methods and techniques;
- 4.1.2.1.5 Delineate the demographic pattern of the country and appreciate the roles of the individual family, community and socio-cultural environment in health and disease;
- 4.1.2.1.6 Explain the health information systems;

- 4.1.2.1.7 Enunciate the principles and components of primary health care and national policies to achieve the goal of 'Health administration, Health education in relation to community'.
- 4.1.2.1.8 Able to plan a Health Program and able to evaluate a Programme.
- 4.1.2.1.9 Able to describe principles of organization.

4.1.2.2 **Skills:**

After the end of the course, the student should be able to:

- 4.1.2.2.1 Use epidemiology as a scientific tool for making national decisions relevant to community and individual patient intervention;
- 4.1.2.2.2 Collect, Analyse, interpret and present simple community and hospital based data;
- 4.1.2.2.3 Diagnose and manage common health issues and emergencies at the individual family and community levels with existing healthcare resources, respecting socio-cultural beliefs.
- 4.1.2.2.4 Diagnose and manage maternal and child health problems and conduct family planning counseling and community programs keeping in mind national priorities;
- 4.1.2.2.5 Diagnose and manage common nutritional problem at individual and community level;
- 4.1.2.2.6 Design, implement and evaluate health education program using simple audio-visual aids
- 4.1.2.2.7 Participate with team members in organising and implementing health care programs;

4.1.2.2.8 Conduct group meetings, give talks on medical issues.

**4.1.2.3 Integration:**

Develop capabilities to form a synthesis between cause of illness in the environment or community and individual health and respond with leadership qualities to institute remedy for the same.

**4.2 Theory (Duration: 12 months)**

**Total hours: 250 (Theory: 150 Practical: 100)**

**4.2.1** Man and Medicine: Towards Health for All

**4.2.2** Concepts of Health

4.2.2.1 Concept

4.2.2.2 Definitions

4.2.2.3 Dimensions

4.2.2.4 Determinants

4.2.2.5 Positive health

4.2.2.6 Concept of wellbeing

4.2.2.7 Responsibility towards health

4.2.2.8 Health development and its indicators

4.2.2.9 Health science philosophies

**4.2.3** Concept of Disease

4.2.3.1 Concepts of causation

4.2.3.2 Natural history of disease

- 4.2.4 Concepts of control and prevention
- 4.2.5 Modes of intervention
- 4.2.6 Population medicine
- 4.2.7 International classification of diseases
- 4.2.8 Principles of epidemiology and epidemiologic methods
  - 4.2.8.1 Definition, basic measurements in epidemiology
  - 4.2.8.2 Epidemiological methods – descriptive, analytical and experimental epidemiology
  - 4.2.8.3 Uses of epidemiology
  - 4.2.8.4 Dynamics of disease transmission
  - 4.2.8.5 Disease prevention and control
  - 4.2.8.6 Investigation of an Epidemic
- 4.2.9 Screening of diseases: Concepts, Uses, Criteria for screening, sensitivity & specificity
- 4.2.10 Epidemiology of communicable diseases
  - 4.2.10.1 Respiratory infections – small pox, varicella, measles, rubella, mumps, influenza, diphtheria, pertussis, tuberculosis, acute respiratory tract infection(ARTI)
  - 4.2.10.2 Intestinal infections – polio, viral hepatitis, cholera, acute diarrheal diseases, typhoid, food poisoning, amoebiasis, ascariasis, ancylostomiasis, taeniasis
  - 4.2.10.3 Arthropod – borne infections – yellow fever, Japanese encephalitis, malaria, filarial
  - 4.2.10.4 Surface infections – rabies, trachoma, tetanus, leprosy, STD, AIDS

- 4.2.11** Epidemiology of non-communicable diseases – cancer, cardiovascular diseases, obesity, blindness, accidents, hypertension, stroke, rheumatic heart disease
- 4.2.12** Demography and Family Planning – Demographic cycle, population trends, fertility related statistics, health aspects of family planning, contraceptive methods and delivery system, National family welfare program.
- 4.2.13** Preventive medicine in Obstetrics, Pediatrics and Geriatrics – Antenatal, Intra natal, Postnatal care, Low birth weight, infant feeding, growth and development, growth chart, under-fives clinic, national health policy, indicators of MCH care, school health services, behavioral problems, geriatrics, Anganwadi ICDS programs.
- 4.2.14** Environmental health and occupational health: Purification of water and water quality standards, air, ventilation, lighting, noise, radiation, air temperature and humidity, housing, solid wastes disposal and control, excretory disposal, water carriage system, modern sewage treatment, entomology-mosquito, housefly, lice, itch mite, Cyclopes, rat flea, rodents, insecticides-hazards, diseases, pre- placement examination, measures for general health, protection of workers, prevention of occupational hazards
- 4.2.15** Basic Medical Statistics: Census, Vital events, legislation, SRS, notification of diseases, measures of dispersion and centering, sampling, tests of significance, correlation and regression
- 4.2.16** Health education and communication: Objectives, principles, aids, practice of Health education, planning and evaluation

- 4.2.17 Health planning – Management – International health organizations: Planning cycle, management methods and techniques, national health policy, health planning in India, five year plans, health systems in India, five year plans, health systems in India – at centre, state and district levels, panchayat raj, rural development schemes
- 4.2.18 Healthcare of community – Health System and National Programs: Levels of healthcare, Health for All, primary healthcare, healthcare delivery, health problems, healthcare services and systems, voluntary health agencies, national health programs
- 4.2.19 Nutrition and Health: Classification of food, vitamin, mineral, carbohydrate, protein, fat, energy balance, balanced diet, nutritional problems in public health, low birth N+PEM, xerophthalmia, nutritional anemia, IDPs, endemic fluorosis, lathyrism, assessment of nutritional status, nutritional surveillance, social aspects of nutritional food hygiene, food-borne disease.
- 4.2.20 International health agencies: WHO, UNICEF, RED CROSS
- 4.2.21 Voluntary health agencies.

### 4.3 **Practical**

- 4.3.1 Posting at any PHC, CHC, RHC or district hospital for National Immunization Program
- 4.3.2 Nutritional Assessment Surveys
- 4.3.3 1 day workshop or awareness program on AIDS with NACO
- 4.3.4 Posting at Blood donation camp
- 4.3.5 Field visits

- 4.3.5.1 Anganwadis
- 4.3.5.2 PHC / CHC / RHC / District hospital and understanding description of existing healthcare services
- 4.3.6 A study on health related problem in the community
- 4.3.7 Family Health Advisory Service
  - 4.3.7.1 To study the family structure & health status of individual members with reference to
    - 4.3.7.1.1 General health status
    - 4.3.7.1.2 Socio-economic status
    - 4.3.7.1.3 Nutritional status
    - 4.3.7.1.4 Environmental
    - 4.3.7.1.5 Immunization status
    - 4.3.7.1.6 Family welfare planning status
- 4.3.8 Health Practices in 4 conditions
  - 4.3.8.1 Pulmonary Tuberculosis
    - 4.3.8.1.1 Index case: occupation, literacy, social status etc
    - 4.3.8.1.2 Preventive measures for other family members
    - 4.3.8.1.3 Health education
  - 4.3.8.2 Antenatal Care
    - 4.3.8.2.1 Literacy of the family and woman
    - 4.3.8.2.2 Customs – social / religious during pregnancy, delivery, lactation
    - 4.3.8.2.3 Dietary habits: knowledge, aptitude and practices

4.3.8.3	Antenatal high risk care		
4.3.8.3.1	Health education, family planning advice		
4.3.8.4	Protein energy malnutrition		
4.3.8.4.1	Socio-economic status of family		
4.3.8.4.2	Infant feeding and weaning practices		
4.3.8.4.3	Social customs regarding diet for children		
<b>4.3.9</b>	<b>Insecticides</b>	-	10+ models
<b>4.3.10</b>	<b>Universal Immunization Program</b>	-	10+ models
<b>4.3.11</b>	<b>Communicable diseases</b>	-	10+ models
<b>4.3.12</b>	<b>Insect-borne diseases</b>	-	10+ models
<b>4.3.13</b>	<b>Microscope slides</b>	-	10+ models
<b>4.3.14</b>	<b>Environment and Sanitation</b>	-	10+ models
<b>4.3.15</b>	<b>Statistical charts</b>		
<b>4.3.16</b>	<b>Field visits</b>		
4.3.16.1	Rural health Centers		
4.3.16.2	Sewage Disposal Plant		
4.3.16.3	Water Filtration Plant		
4.3.16.4	Nature Cure Hospitals		
4.3.16.5	<i>Yoga</i> Institutes		
4.3.16.6	Nutritional Assessment surveys		
4.3.16.7	Sanatoriums		
4.3.16.8	NACO programs etc		

#### 4.4 **Textbooks**

4.4.1 Textbook of Preventive and Social Medicine – JE Park & K Park

4.4.2 Textbook of Preventive and Social Medicine – BK Mahajan& MC Gupta

#### 4.5 **Reference Books**

4.5.1 Preventive medicine – Ghosh

4.5.2 Preventive medicine – Yeshpal

#### 4.6 **Reference Papers**

4.6.1 WHO Program papers

4.6.2 National Health Program Papers

4.6.3 Voluntary health Program Papers

4.6.4 Red Cross Program papers

4.6.5 UNICEF Program Papers

#### 4.7 **Scheme Of Examination**

01.	Community Medicine	80	20	30	130	60	10	70	200

## 5. YOGA PHILOSOPHY

### 5.1 Goals and Objectives

#### 5.1.1 **Goal:**

The goal of teaching *Yoga* philosophy to undergraduate students is to understand the intricacies of *Yoga* as a philosophy, its relation to ancient texts, other religious thoughts like Buddhism, with reference to *nyaya*, *vasistha*, *samkhya*, *mimamsa*, *Vedanta* and *PatanjaliYogasutras*.

#### 5.1.2 **Objectives:**

##### 5.1.2.1 **Knowledge:**

After the completion of the course, the student shall be able to:

- 5.1.2.1.1 Explain the basic understanding of *Yoga* as a philosophy
- 5.1.2.1.2 Describe the various schools of philosophy which had an influence on *Yogic text* like buddhism, *samkhya*, *mimamsa* etc.
- 5.1.2.1.3 Comprehend the concept of *brahman* according to *vedanta*

##### 5.1.2.2 **Skills:**

After the completion of the course, the student shall be able to:

- 5.1.2.2.1 Perform and demonstrate various *asanas*, *pranayamas*, *kriyas* and meditations;
- 5.1.2.2.2 Describe various philosophies of *Yoga* and apply them therapeutically, relating to a patient's life situation or personality.

##### 5.1.2.3 **Integration**

5.1 At the completion of training, the student should be able to comprehend the basic principles of *Yoga* and therapeutically apply them in his/her professional practice.

**5.2 Theory (Duration: 12 months)**

**Total hours: 350 (Theory: 150 Practical: 200)**

- 5.2.1 *Yoga*, its definition, its basis, its relation to philosophy and its application.
- 5.2.2 Ancient roots of *Yoga* – literature review on reference to *Yoga* in *Upanishads*, *Vedas*, *Smritis* and *Puranas*.
- 5.2.3 Buddhism – 4 main schools of Buddhist philosophy.
- 5.2.4 *Nyaya* – Nature of physical world, individual soul, liberation and concept of supreme soul in Indian philosophy, theory of Body, Mind, Life and Soul and its philosophical background.
- 5.2.5 *Vaisheshika* – Category of substance – *Nava dravyas*, category of quality – 24 gunas.
- 5.2.6 *Sankhya* – theory of cause and effect; *Prakriti*, *Purusa*; Process of evolution of universe; concept of liberation; Practical teachings of *Sankhya*.
- 5.2.7 *Mimamsa* – Major teachings of *Mimamsa* system; selfless action, nonattachment, self-control, self-discipline, daily schedule for psychophysical wellbeing, social awareness, sense of equality, unity with diversity, selectiveness.
- 5.2.8 *Vedanta* – Concept of *Atman*, *Brahma*, *Maya*, Universe, God; the self and human life; liberation and the means of attaining it.
- 5.2.9 *PatanjaliYogaSutras* – Samadhi Pada, SadhanaPada.
- 5.2.10 *AshtangaYoga* (8 limbs of *Yoga* - *Patanjali*).

5.2.11 Spiritual values of *pranayama* and *kriyas*, their methods, importance, rules and regulations, difference between breathing exercises and *Pranayama*.

5.2.12 **Practical**

5.2.13 Entire first year syllabus.

5.2.14 *Asanas*

5.2.14.1 Sitting

5.2.14.1.1 *Siddhasana*

5.2.14.1.2 *Bhadrasana*

5.2.14.1.3 *Samasana*

5.2.14.1.4 *Swastikasana*

5.2.14.1.5 *Simhasana*

5.2.14.1.6 *Ardha Matsyendrasana*

5.2.14.1.7 *Kurmasana*

5.2.14.1.8 *Mayurasana*

5.2.14.1.9 *Sirshasana*

5.2.14.1.10 *Akarna Dhanurasana*

5.2.14.1.11 *Parivarta Janusirshasana*

5.2.14.1.12 *Garbhasana*

5.2.14.1.13 *Tolangulasana*

5.2.14.1.14 *Badhakonasana*

5.2.14.1.15 *Upavistakonasana*

*5.2.14.2 Prone*

*5.2.14.2.1 Shalabhasana – 2 and 3*

*5.2.14.3 Supine*

*5.2.14.3.1 Yoganidrasana*

*5.2.14.3.2 Karnapeedasana*

*5.2.14.3.3 Naukasana*

*5.2.14.4 Standing*

*5.2.14.4.1 Ardha Katichakrasana*

*5.2.14.4.2 Parshvakonasana*

*5.2.14.4.3 Suptakonasana*

*5.2.14.4.4 Padangushtasana*

*5.2.14.4.5 Garudasana*

*5.2.14.4.6 Padahastasana (Advanced)*

*5.2.15 Pranayama*

*5.2.15.1 Surya anulomaviloma*

*5.2.15.2 Ujjayi*

### 5.3 **Textbooks**

- 5.3.1 Basis and definitions of *Yoga* – Vivekananda Kendra
- 5.3.2 *Asanas* – Swami Kuvalyananda
- 5.3.3 The gospel of Buddha – Parul Caruso
- 5.3.4 The Gospel of Shri Ramakrishna – Mahendranath Gupta
- 5.3.5 Complete works of Shri Aurobindo
- 5.3.6 *Asanas, Pranayama, Bandhas, Mudras* – Swami Satyananda Saraswati
- 5.3.7 *Hatha YogaPradipika* – Swami Svamarama
- 5.3.8 Raja, Hatha, Jnana, Bhakti *Yoga* – Swami Vivekananda

### 5.4 **Scheme Of Examination**

S.N	Subject	Theo-ry	Intern-al Assm-t	Viva-Voce	Total	Practi-cals	Inter-nal Assm-t	Total Marks	Grand Total Marks
01.	Yoga Philosophy	80	20	30	130	60	10	70	200

## **6. BASIC PHARMACOLOGY**

### **6.1 Goals and Objectives**

#### **6.1.1 Goal:**

6.1.1.1 The goal of teaching Pharmacology to undergraduate students is to provide a comprehensive knowledge of scientific, evidence based treatment of diseases through drug administration.

#### **6.1.2 Objectives:**

##### **6.1.2.1 Knowledge:**

After the completion of the course, the student shall be able to:

6.1.2.1.1 Illustrate pharmacokinetics and pharmacodynamics of essential and common drugs

##### **6.1.2.2 Skills:**

After the completion of the course, the student shall be able to:

6.1.2.2.1 Be proficient in describing pharmacokinetics and pharmacodynamics of essential and common drugs

6.1.2.2.2 Observe medical ethics in his professional practice

##### **6.1.2.3 Integration**

At the completion of training, the student must be trained in medico legal responsibilities of physicians at all levels of health care as well as scientifically based clinical toxicology, being skilled in allied disciplines like Pathology, Radiology, Forensic Sciences, Hospital Administration, Medicine, Pharmacology, etc.

## 6.2 **Theory (Duration: 12 months)**

**Total hours: 100**

### 6.2.1 General Pharmacology

6.2.1.1 Nature and sources of drugs

6.2.1.2 Routes of administration

6.2.1.3 Absorption and bioavailability of a drug – factors affecting drug absorption and its bioavailability

6.2.1.4 Distribution of a drug in the body

6.2.1.4.1 Plasma concentration

6.2.1.4.2 Drug storage

6.2.1.4.3 Placental transfer

6.2.1.5 Fate of the drug

6.2.1.6 Drug excretion

6.2.1.7 Drug receptors

6.2.1.8 Mechanism of action of a drug – types of drug action

6.2.1.9 Adverse reaction to drug

6.2.1.10 Drug toxicity in man –

6.2.1.10.1 drug intolerance

6.2.1.10.2 hemopoietic toxicity

6.2.1.10.3 hepatotoxicity

6.2.1.10.4 nephrotoxicity

6.2.1.10.5 abnormalities of taste and smell

6.2.1.10.6 behavioral toxicity

- 6.2.1.10.7 production of a disease
- 6.2.1.10.8 electrolyte disturbances
- 6.2.1.10.9 endocrine disturbances
- 6.2.1.10.10 skin toxicity
- 6.2.1.10.11 carcinogenesis
- 6.2.1.10.12 teratogenicity
- 6.2.1.10.13 drug dependence

6.2.1.11 Factors modifying the effects of a drug

6.2.1.12 Role of a placebo

## **6.2.2** Brief description of the following drugs

(Their mode of action, dosage, adverse reaction, the method of tapering their dosage, including the adverse effects with the abrupt stoppage of their use)

## **6.2.3** Drugs acting on the CNS

6.2.3.1 General sedatives

6.2.3.2 Anticonvulsant drugs

6.2.3.3 Opioid and Non-Opioid analgesics

6.2.3.4 Analgesics, antipyretics and non-steroidal anti-inflammatory drugs (NSAID)

6.2.3.5 CNS stimulants – Xanthine alkaloids

6.2.3.6 Psychopharmacology

6.2.3.6.1 Anti-anxiety drugs – Meprobamate, Benzodiazepines,  
Chlormethiazole

- 6.2.3.6.2 Anti-depressant drugs – Classification, actions, adverse reaction  
(monoamine oxidase inhibitors, *tricyclic* compounds,  
carbamazepine, lithium)
- 6.2.3.6.3 Psychotogenic drugs – LSD, Mescaline, Cannabis
- 6.2.3.7 Local Anesthetics – adverse reactions
- 6.2.3.8 Drug action on ANS
  - 6.2.3.8.1 Skeletal muscle relaxants – Diazepam, Baclofen, Dantrolene
  - 6.2.3.8.2 Anti-Parkinsonian drugs – Levodopa, Amantadine
- 6.2.3.9 Biogenic Amines and Polypeptides
  - 6.2.3.9.1 Histamine and Antihistamine drugs
  - 6.2.3.9.2 Angiotensin, Kinins, Leukotrienes, Cytokines & PGs
- 6.2.3.10 Drugs used in Respiratory Disorders
  - 6.2.3.10.1 Expectorants, Central cough suppressants, antitussives, mucolytic  
agents
  - 6.2.3.10.2 Pharmacotherapy of bronchial asthma and rhinitis
    - 6.2.3.10.2.1 Drug therapy during an acute attack
      - 6.2.3.10.2.2 Prevention of acute attacks
      - 6.2.3.10.2.3 Treatment of acute severe asthma
      - 6.2.3.10.2.4 Treatment of acute respiratory failure
      - 6.2.3.10.2.5 Treatment of chronic persistent asthma
      - 6.2.3.10.2.6 Drug therapy of rhinitis

6.2.3.11 Cardiovascular drugs

6.2.3.11.1 Digitalis

6.2.3.11.2 Pharmacotherapy of cardiac arrhythmias – Sodium channel blockers, beta blockers, potassium channel blockers, calcium channel blockers

6.2.3.11.3 Pharmacotherapy of Hypertension – Clonidine, alpha methyldopa, Guanethidine, Reserpine, Phentolamine etc.

6.2.3.12 Drugs acting on Blood and blood forming organs

6.2.3.12.1 Drugs effective in iron deficiency anemia

6.2.3.12.2 Treatment of acute iron poisoning

6.2.3.13 Water, Electrolytes and drugs affecting Renal functions

6.2.3.13.1 Nutritional supplementation therapy

6.2.3.13.2 Diuretic and Anti-diuretic drugs

6.2.3.14 Drugs used in GIT disorders

6.2.3.14.1 Appetizers, Digestants, Carminatives, Appetite suppressants and agents lowering serum lipid

6.2.3.14.2 Emetics, drug therapy of vomiting and diarrhea

6.2.3.14.3 Pharmacotherapy of constipation

6.2.3.14.4 Pharmacotherapy of peptic ulcer

6.2.3.15 Drugs used in Endocrine disorders

6.2.3.15.1 Thyroid and antithyroidal drugs

6.2.3.15.2 Insulin and oral antidiabetic drugs

6.2.3.15.3 Adrenal cortical steroids

6.2.3.15.4 Gonadotropins, estrogens, progestins

6.2.3.15.5 Antifertility agents and ovulation including drugs

6.2.3.15.6 Drug therapy in lipidemia

6.2.3.15.7 Drug therapy in obesity

**NOTE: All the drugs mentioned in the syllabus are strictly for understanding drug reactions and NOT to be prescriptive in nature. Students, after graduation are not expected to prescribe any of the above-mentioned medication.**

### **6.3 Textbooks**

6.3.1 Pharmacology and Pharmacotherapeutics – RS Satoskar, SD Bhandarkar, SS

Ainapure

6.3.2 Essentials of Medical Pharmacology – KD Tripathi

6.3.3 Pharmacology – Rang and Dale

**6.4 Scheme Of Examination**

S.N o	Subject	Theo -ry	Intern -al Assm t	Viva- Voce	Total	Practi -cals	Inter- nal Assm t	Total Mark s	Grand Total Mark s
01.	Basic Pharmacology	80	20	50	150	----- ---	----- ---	----- ---	----- ---

## **7. Colour Therapy and Magneto biology**

### **7.1 Goals and Objectives**

#### **7.1.1 Goal:**

The goal of teaching Colour therapy and Magneto biology to undergraduate students is to provide them with comprehensive understanding of philosophy, science and modes of applications of colours and magnets in preventive, curative and rehabilitative therapy.

#### **7.1.2 Objectives:**

##### **7.1.2.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 7.1.2.1.1 Demonstrate basic understanding of principles along which colours and magnets can be used as therapeutic agents, along with history of therapeutic uses of colours and magnets;
- 7.1.2.1.2 Understand bio-magnetism, electro-magnetism, properties of magnets, mechanisms of action of magnets on the human body, magnetic overload, charging, modes of application, etc. and apply this knowledge to therapeutically use magnets;
- 7.1.2.1.3 Be aware of the contraindications and harmful effects of colours and magnets;
- 7.1.2.1.4 Illustrate classification of colours, physics of light, electromagnetic spectrum, pathway of vision, human aura, chakras, heliotherapy, colour breathing, chromo charging, and latest research, applying the same to disease management;

### **7.1.2.2 Skills:**

After the completion of the course, the student shall be able to:

- 7.1.2.2.1 Diagnose various diseases and disorders of the body and mind using the principles of colour diagnosis;
- 7.1.2.2.2 Outline and implement a plan of treatment using colours and magnets as therapeutic tools
- 7.1.2.2.3 Evaluate the therapeutic values of colours and magnets in treatment of various diseases
- 7.1.2.2.4 Utilise latest research finding in improving his/her professional practice

### **7.1.2.3 Integration**

At the completion of training, the student should be able to comprehend the basic principles of Colour therapy and Megneto biology and therapeutically apply them in his/her professional practice.

## **7.2 Theory (Duration: 12 months)**

**Total hours: 150 (Theory: 100 Practical: 50)**

### **7.2.1 Magnetobiology**

- 7.2.1.1 Definitions of magneto therapy
- 7.2.1.2 Historical highlights
- 7.2.1.3 Vedic references related to magneto therapy

#### 7.2.1.4 Biomagnetism

7.2.1.4.1 Effects on plants , birds and animals.

7.2.1.4.2 Effects on mankind

#### 7.2.1.5 Principles electromagnetism

#### 7.2.1.6 Types of magnets

7.2.1.6.1 Natural

7.2.1.6.2 Artificial

7.2.1.6.2.1 Permanent

7.2.1.6.2.2 Electromagnets

#### 7.2.1.7 Classification of magnets according to

7.2.1.7.1 Power

7.2.1.7.2 Shapes

7.2.1.7.3 Clinical use

#### 7.2.1.8 Measurement of magnetic field

#### 7.2.1.9 Mechanism of action of magnets in the body

#### 7.2.1.10 Properties effects and corresponding features of north & south poles

#### 7.2.1.11 Maintenance of permanent magnets

7.2.1.12 Magnetic field deficiency syndrome

7.2.1.13 Magnetic overload

7.2.1.14 Earth as a huge magnet

7.2.1.15 Effect of biomagnetism in various organ systems

7.2.1.16 Modes of application of magnets

7.2.1.16.1 General

7.2.1.16.2 Local

7.2.1.16.3 Different kinds of magnetic devices used in application of therapy

7.2.1.17 Magnetic charging , mechanism, dosage and its effect and limitations

7.2.1.17.1 Water, oil, milk, honey

7.2.1.18 Magnetic therapy through shad chakras

7.2.1.19 Contraindications, complications, and limitations of magneto therapy.

7.2.1.20 Harmful effects of EMF and measures for minimizing it.

**7.2.1.21 Reference Books:**

7.2.1.21.1 The book of magnetic Healing by Roger Coghill

7.2.1.21.2 Magnet therapy – by Ghanashyamsingh Birla and Colette Hemlin

**7.2.2 Colour Therapy**

7.2.2.1 Definition

7.2.2.2 Historical highlights

7.2.2.2.1 Ghadiyali's principle

7.2.2.2.2 Babbitt postulates

7.2.2.2.3 Modern history of color therapy

- 7.2.2.3 Classification of colors
- 7.2.2.4 How do rainbows form
- 7.2.2.5 Physics of light
- 7.2.2.6 Electromagnetic spectrum
- 7.2.2.7 Pathway of vision and color sensing
- 7.2.2.8 The human aura and colors
- 7.2.2.9 Relation of colors with shad chakras
- 7.2.2.10 Impact of color sense on emotions and psychology
- 7.2.2.11 Therapeutic effect of colors
- 7.2.2.12 Heliotherapy –
  - 7.2.2.12.1 Health benefits
  - 7.2.2.12.2 Physiological and chemical properties of sunlight
  - 7.2.2.12.3 modes of application, plantain leaf sun bath, chromothermoleum
  - 7.2.2.12.4 Procedure, precaution, indication and limitations.
  - 7.2.2.12.5 Dr. Rikli's method of Sun bath , Dr .Kuhne's method of sun bath
- 7.2.2.13 Advanced colour therapy
  - 7.2.2.13.1 Photochemotherapy
  - 7.2.2.13.2 Photobiological coloured lighting to produce immunoregulation
- 7.2.2.14 Color breathing
- 7.2.2.15 Chromo charging of water, oil honey and food stuffs. And their effect on health and disease.

**7.2.2.16 Reference Books:**

7.2.2.16.1 Color therapy - Jonathan Dee and Lesley Taylor

7.2.2.16.2 Healing with color –Theo Gimbel

7.2.2.16.3 The power of color – Dr.Marton Walker

**7.3 Practical**

**7.3.1** Procedural standards / guidelines for application of magnets

**7.3.2** General application – lead system of application

**7.3.3** Local application

7.3.3.1 high power magnets

7.3.3.2 Medium power magnets

7.3.3.3 Low power magnets

7.3.3.4 Specialized magnetic devices

**7.3.4** Case documentation and application of magneto biology and color therapy - at least 20 cases

#### 7.4 Scheme Of Examination

S.No	Subject	Theo-ry	Intern-al Assm-t	Viva-Voce	Total	Practi-cals	Inter-nal Assm-t	Total Marks	Grand Total Marks
01	ColourTherap yand Magneto Biology	80	20	30	130	60	10	70	200

## **8. FORENSIC MEDICINE AND TOXICOLOGY (Duration: 12 Months)**

**Total hours: 100 (Theory: 100)**

### **8.1 Goals and Objectives**

#### **8.1.1 Goal:**

The goal of teaching Forensic Medicine and Toxicology to undergraduate students is to provide a comprehensive knowledge of medico-legal responsibilities in the practice of medicine. He/she learns about law with respect to medical practice, medical negligence and respect for codes of medical ethics.

#### **8.1.2 Objectives:**

##### **8.1.2.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 8.1.2.1.1 Outline basic medico-legal aspects of hospitals and general practice;
- 8.1.2.1.2 Define medico-legal responsibilities of a general physician working in a rural primary health center or an urban health center.

##### **8.1.2.2 Skills:**

After the completion of the course, the student shall be able to:

- 8.1.2.2.1 Observe and infer well, to enquire in criminal and medico-legal matters;
- 8.1.2.2.2 Diagnose and manage acute poisoning and chronic toxicity;

8.1.2.2.3 Be proficient in post mortem examinations including interpretation of findings

8.1.2.2.4 Observe medical ethics in his professional practice

### **8.1.2.3 Integration**

At the completion of training, the student must be trained in medico legal responsibilities of physicians at all levels of health care as well as scientifically based clinical toxicology, being skilled in allied disciplines like Pathology, Radiology, Forensic Sciences, Hospital Administration, Medicine, Pharmacology, etc.

## **8.2 Theory**

### **8.2.1 Forensic Medicine**

8.2.1.1 Definition and scope of forensic medicine

8.2.1.2 Procedure of giving medical evidence with reference to Indian evidence act

8.2.1.3 Methods of identification of living and dead body, race, age, sex etc

8.2.1.4 Death – medico-legal aspects, certification of death, sudden death, causes, medico-legal importance of signs of death, changes due to death and calculating time of death

8.2.1.5 Medico-legal autopsy

8.2.1.6 Medico-legal wounds, their classification and study and Medico-legal aspects

8.2.1.7 Examination of blood stains, hair and seminal stains

8.2.1.8 Miscellaneous causes of death from heat, cold, electricity, starvation etc.

8.2.1.9 Violent asphyxia deaths – hanging, strangulation, suffocation, and drowning

8.2.1.10 Sexual offences – impotency and sterility, virginity, legitimacy, unnatural offences, medico-legal aspects

8.2.1.11 Infanticide

8.2.1.12 Medico-legal aspects of insanity

8.2.1.13 Forensic psychiatry

8.2.1.14 Definition, police inquest, difficulties in detection of crime, legal procedure in criminal courts and their powers oath, medical evidence, medical certificate, dying declaration

8.2.1.15 Rules of giving evidence, professional secrecy

8.2.1.16 Postmortem examinations

8.2.1.17 Death – signs of death, cadaveric rigidity and spasm, putrefaction, estimation of time since death

8.2.1.18 Death from asphyxia, differences between hanging and strangulation, suffocation and drowning

8.2.1.19 Death from burns, scalds and lightning

8.2.1.20 Rape and unnatural offences

8.2.1.21 Abortion, pregnancy and delivery, miscarriage

8.2.1.22 Laws in relation to a medical man, medical ethics, duties, professional privilege and responsibilities

## **8.2.2 Toxicology**

8.2.2.1 General considerations of poisoning and classification

8.2.2.1.1 Actions of poison, factors, modifying their action

8.2.2.1.2 Diagnosis of poisoning

- 8.2.2.1.3 Treatment of poisoning in general
- 8.2.2.2 Poisons
  - 8.2.2.2.1 Corrosives
  - 8.2.2.2.2 Non-metallic poisons
  - 8.2.2.2.3 Insecticides and weed killers
  - 8.2.2.2.4 Metallic poisons
  - 8.2.2.2.5 Organic irritant poisons
  - 8.2.2.2.6 Somniferous poisons
  - 8.2.2.2.7 Inebriant poisons
  - 8.2.2.2.8 Deliriant poisons
  - 8.2.2.2.9 Drug dependence
  - 8.2.2.2.10 Food poisoning
  - 8.2.2.2.11 Spinal poisons
  - 8.2.2.2.12 Cardiac poisons
  - 8.2.2.2.13 Asphyxiants
  - 8.2.2.2.14 Miscellaneous
- 8.2.2.3 Legal responsibilities – Medical Ethics
- 8.2.2.4 Responsibilities and duties of medical practitioners to the State, professional secrecy and privileged communication
- 8.2.2.5 Unprofessional conduct, malpractice
- 8.2.2.6 The rights and privileges and duties of medical practitioners
- 8.2.2.7 The functions of state medical council and its relationship to IMC
- 8.2.2.8 Medical ethics approved by IMC

### **8.3 Practical**

- 8.3.1 Age estimation
- 8.3.2 Autopsies – 10
- 8.3.3 Skeleton remains
- 8.3.4 Spotters
- 8.3.5 Examination of injured
- 8.3.6 Alcoholic
- 8.3.7 Psychiatric
- 8.3.8 Toxicology

### **8.4 Textbooks**

- 8.4.1 Medical Jurisprudence – Modi
- 8.4.2 A textbook of Forensic Medicine – Narayana Reddy
- 8.4.3 A textbook of Forensic Medicine – MRK Krishna

### **8.5 Reference Books**

- 8.5.1 The essentials of Forensic Medicine – Dr. CJ Polson, DJ Gee and B. Knight
- 8.5.2 Forensic Medicine – Corden and Shapiro
- 8.5.3 Principles and practice of Medical Jurisprudence – Taylor's

**8.6 Scheme Of Examination**

S.No	Subject	Theory	Internal Assmt	Viva-Voce	Total	Practicals	Internal Assmt	Total Marks	Grand Total Marks
01.	Forensic Medicine & Toxicology	80	20	50	150	----- ---	----- ---	----- ---	----- ---

## **9. MANIPULATIVE THERAPIES**

### **9.2 Goals and Objectives**

#### **9.2.1 Goal:**

The goal of teaching Manipulative Therapies to undergraduate students is to provide them with comprehensive understanding of science and modes of applications of different manipulative modalities like Massage, Chiropractic, Osteopathy, Aromatherapy in preventive, curative and rehabilitative therapy.

#### **9.2.2 Objectives:**

##### **9.2.2.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 9.2.2.1.1 Understand the principles and historical highlights of massage and manipulative techniques;
- 9.2.2.1.2 Demonstrate basic understanding of principles and procedures of different types of massage, their physiological effects, indications, and contraindications;
- 9.2.2.1.3 Delineate the principles and procedures of various manipulative therapies like chiropractic, osteopathy, reflexology and aromatherapy;
- 9.2.2.1.4 Describe essential oils with respect to the extraction, uses and combinations that are therapeutically used;

### **9.2.2.2 Skills:**

After the completion of the course, the student shall be able to:

9.2.2.2.1 Perform different types of massage and manipulative therapies, such as Osteopathy, Chiropractic, Aromatherapy, Swedish massage, Kellogg's massage, Shiatsu, Geriatric Massage, Pediatric massage, Antenatal massage, Ayurvedic massage, etc;

9.2.2.2.2 Use therapies such as Reflexology and Zone therapy in their professional practice for musculoskeletal disorders, etc.

### **9.2.2.3 Integration**

At the completion of training, the student should be able to comprehend the basic principles of Manipulative Therapies and apply it in clinical practice.

## **9.3 Theory (Duration: 12 Months)**

Total hours: 250 (Theory: 150 Practical: 100)

**9.3.1** Introduction and historical highlights of Massage and Manipulative Techniques

**9.3.2** Classification of (lubricants) massage

**9.3.2.1** Basic Therapeutic massage (Swedish) techniques – procedure, indications, contraindications, physiological action

**9.3.2.2** Joint movements in massage therapy

**9.3.2.3** Massage to local areas

**9.3.3** Professional standards of massage professionals

**9.3.4** Physiological effects, indications, contraindications of massage in various organ systems

- 9.3.5 Kellogg's massage
- 9.3.6 Shiatsu
- 9.3.7 Pediatric massage
- 9.3.8 Geriatric massage
- 9.3.9 Massage for antenatal care
- 9.3.10 Ayurvedic massage – terminology, procedure and manipulations
- 9.3.11 *Panchakarma* in brief
- 9.3.12 Chiropractic
  - 9.3.12.1 History
  - 9.3.12.2 Importance of spine in chiropractic
  - 9.3.12.3 Physiological effect
  - 9.3.12.4 Chiropractic examination
  - 9.3.12.5 Spinal manipulative therapy
  - 9.3.12.6 Treatment for various diseases
- 9.3.13 Osteopathy
  - 9.3.13.1 Definition
  - 9.3.13.2 History
  - 9.3.13.3 Basic principles
  - 9.3.13.4 Relation of osteopathy to musculoskeletal system
- 9.3.14 Basic principles and procedure of different types of massage – Thai, Balanese, Hot-stone massage, dry brush massage, deep tissue massage, powder massage, vibrator massage etc.

### **9.3.15 Aromatherapy**

#### **9.3.15.1 Definition, Origin and History**

#### **9.3.15.2 Essential Oils**

##### 9.3.15.2.1 Types

9.3.15.2.2 Extraction – Distillation, cold pressing or expression, solvent extraction

9.3.15.2.3 Storage of essential oils

9.3.15.2.4 How to recognize an essential oil

9.3.15.2.5 How to select aroma oils

9.3.15.2.6 How essential oils work

9.3.15.2.7 Carrier oils – Almond oil, Apricot kernel oil, Avocado oil, Carrot oil, Corn oil, Primrose oil, Grape seed Oil, Hazelnut oil, Jojoba oil, Olive oil, Peanut oil, Safflower oil, Sesame oil, Soya bean oil, Sunflower oil

**9.3.15.3** Different methods of using essential oils – Inhalation, Diffusers, Vaporizers, Massage, Baths, Foot bath, Potpourri, Compresses, Oral intake, Beauty treatment, Room sprays, Insect repellants etc.

#### **9.3.15.4 Description of different essential oils and their benefits**

9.3.15.4.1 Amrette seed, Aniseed, Angelica, Basil, Bergamot, Black Pepper, Camphor, Cardamom, Chamomile, Clove bud, Cedar wood, Cypress, Clay sage, Eucalyptus, Fennel, Frankincense, Geranium, Ginger, Juniper berry, Lavender, Lemon, Lemongrass, Marjoram, Neroli, Orange, Palma Rosa, Peppermint, Patchouli, Pine, Rose,

Rosemary, Sandalwood, Tarragon, Tea tree, Thyme (white),  
Vetiver, Ylang Ylang

**9.3.15.5** The best essential oils

9.3.15.5.1 5 fragrance categories – green, floral, citrus, woody and spicy

9.3.15.5.2 Mixing of aroma oils, equipment required for mixing oils

**9.3.15.6** Precautions for use of aroma oils – Skin patch test, testing essential oils in its pure state

**9.3.15.7** Ill effects of aroma oils – in eyes, toxic effects, allergic effects etc.

**9.3.15.8** Careful handling of essential oils

**9.3.15.9** Contraindications

9.3.15.9.1 Oils to be avoided – Phototoxic or photosensitive oils, oils to be avoided in pregnancy, oils that cause skin irritation etc.

**9.3.16** Reflexology and Zone therapy

**9.3.16.1** What is Reflexology, history and development

**9.3.16.2** How does it work

**9.3.16.3** Body and its reflex zones

**9.3.16.4** Applications, indications and contra-indications

**9.3.16.5** Preventive effects of reflexology

**9.3.17** Milestones of females and its management through massage

**9.4 Practical**

**9.4.1** 10 full body massages

**9.4.2** 35 partial massages

**9.4.3** 10 Panchakarma demonstration Identification of different oils

9.4.4 Demonstration of different methods of application

9.4.4.1 Inhalation

9.4.4.2 Compress

9.4.4.3 Diffuses

9.4.5 Local baths

9.5 **Textbooks**

9.5.1 Massage – George Downing

9.5.2 Massage Therapy – Dr. JH Kellogg

9.5.3 Massage – Constant Young

9.5.4 The Complete Book of Massage – Claire Maxwell Hudson

9.5.5 Step-by-Step Massage – Carole McGilvery

9.5.6 All You Wanted to Know About Aromatherapy – Lalita Sharma

9.5.7 Aromatherapy – Julie Sadler

9.5.8 *Ayurveda*& Aromatherapy – Dr. Light Miller & Dr. Bryan Miller.

9.6 **Reference Books**

9.6.1 Massage Therapy – Susan G. Salvo

9.6.2 Magic of Massage – Tanushree Podder

9.6.3 Art of massage – Dr John Harvey Kellogg

### 9.7 Scheme Of Examination

S.No	Subject	Theory	Internal Assmt	Viva-Voce	Total	Practicals	Internal Assmt	Total Marks	Grand Total Marks
01.	Manipulative Therapies	80	20	30	130	60	10	70	200

## **10. ACUPUNCTURE AND ACUPRESSURE (Duration:12 Months)**

**Total hours: 200(Theory:100 Practical:100)**

### **10.1 Goals and Objectives**

#### **10.1.1 Goal:**

The goal of teaching acupuncture to undergraduate students is to provide them with a comprehensive understanding of the science and art of Acupuncture, Acupressure and related therapies.

#### **10.1.2 Objectives:**

##### **10.1.2.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 10.1.2.1.1 Illustrate the definitions of Acupuncture;
- 10.1.2.1.2 Understand the principles and historical highlights of Acupuncture;
- 10.1.2.1.3 Explain the concepts and theories behind the mechanism in which Acupuncture works, both traditional and modern
- 10.1.2.1.4 Demonstrate basic understanding of procedures of different styles of Acupuncture and related therapeutic modalities, such as Traditional Acupuncture, Scalp Acupuncture, Auriculotherapy, Acupuncture Anaesthesia, Reflexology, Zone Therapy, Acupressure, etc;
- 10.1.2.1.5 Describe basic and advanced tools used in Acupuncture;

10.1.2.1.6 Be aware of the contraindications and dangers of Acupuncture, so as to avoid these in his/her professional practice;

**10.1.2.2 Skills:**

After the completion of the course, the student shall be able to:

10.1.2.2.1 Diagnose common diseases and disorders using diagnostic techniques employed in Acupuncture, such as Tongue Diagnosis, Pulse Diagnosis, etc;

10.1.2.2.2 Demonstrate skill in topographically locating meridians and Acupuncture points on the human body;

10.1.2.2.3 Perform Needling and other essential skills in delivering Acupuncture therapy to a patient;

10.1.2.2.4 Plan, implement and evaluate Acupuncture sessions with expertise in his/her professional practice;

**10.1.2.3 Integration**

At the completion of training, the student should be able to comprehensively understand traditional and modern approaches to Acupuncture and effectively utilise the same in preventive, promotive, curative and rehabilitative clinical practice as well as research projects.

**10.2 Theory**

**10.2.1** Definition, concepts of Acupuncture

**10.2.2** Traditional and modern theories of Acupuncture

**10.2.3** Materials and methods of Acupuncture

- 10.2.4** Principles of Acupuncture
- 10.2.5** Rules for the selection of Acupuncture points
- 10.2.6** Contraindications and complications of Acupuncture
- 10.2.7** The concept of Meridians:
  - 10.2.7.1 Lung Meridian (Lu)
  - 10.2.7.2 Large intestine Meridian (LI)
  - 10.2.7.3 Spleen Meridian (Sp)
  - 10.2.7.4 Stomach Meridian (St)
  - 10.2.7.5 Heart Meridian (H)
  - 10.2.7.6 Small intestine meridian (SI)
  - 10.2.7.7 Urinary bladder meridian (UB)
  - 10.2.7.8 Kidney Meridian (K)
  - 10.2.7.9 Triple warmer meridian (TW)
  - 10.2.7.10 Gall bladder meridian (GB)
  - 10.2.7.11 Liver Meridian (Liv)
  - 10.2.7.12 Governing vessel Meridian (GV)
  - 10.2.7.13 Conceptional vessels Meridian (CV)
  - 10.2.7.14 Extra Meridians
- 10.2.8** The extra-ordinary points
- 10.2.9** Examination methods of Traditional Chinese Medicine
- 10.2.10** Auriculotherapy

10.2.11 Scalp acupuncture

10.2.12 Moxibustion

10.2.13 Types of Stimulation in Acupuncture

10.2.13.1 Manual stimulation

10.2.13.2 Electro acupuncture

10.2.14 Acupuncture Therapeutics

10.2.15 Acupuncture Anesthesia

10.3 **Practicals**

10.3.1 Demonstration of needling techniques and electro-stimulation, Moxibustion.

10.3.2 Each student should give treatment for at least 20 patients during the practical.

#### **10.4 Reference Books :-**

- 10.4.1 Clinical Practice of Acupuncture - A.L. Aggarwal
- 10.4.2 Clinical Acupuncture - Dr. Anton Jayasurya
- 10.4.3 Principles and Practice of Acupuncture - Dr. J.K. Patel
- 10.4.4 Health in Your Hands - DevendraVora
- 10.4.5 Clinical Acupuncture and Moxibustion - Liu Gong Wang
- 10.4.6 Fundamentals of Acupuncture and Moxibustion - Liu Gong Wang/Akira Hyodo.
- 10.4.7 Advanced Acupuncture Therapy - Arjun L Agarwal, Govind N Sharma
- 10.4.8 Classical Acupuncture - The Standard Textbook - Poret. Hemen, the China Academy
- 10.4.9 Reiki
  - 10.4.9.1 Empowerment through Reiki - Paula Horan
  - 10.4.9.2 Reiki - Energy Medicine - Libby Barnett & Maggie Chambers with Susan Davidson
- 10.4.10 Pranic Healing
  - 10.4.10.1 Pranic healing using Breathing with Healing Mantras - Dr. L.R. Chowdhry
  - 10.4.10.2 Advanced Pranic Healing- Choa Kok Sui
  - 10.4.10.3 The Ancient Science and Art of Pranic Crystal Cleaning- Choa Kok Sui.

### 10.5 **Scheme Of Examination**

S.No	Subject	Theo-ry	Inter-Nal Assmt	Viva-Voce	Total	Practi-cals	Inter-Nal Assmt	Total Marks	Grand Total Marks
01.	Acupuncture & Acupressure	80	20	30	130	60	10	70	200

## **11. YOGA AND ITS APPLICATIONS (Duration: 12 Months)**

**Total hours: 200 (Theory: 100 Practical: 100)**

### **11.1 Goals and Objectives**

#### **11.1.1 Goal:**

The goal of teaching *Yoga* and its applications to undergraduate students is to provide them with comprehensive understanding of *Yoga* with reference to traditional texts like *PatanjaliYogasutras*, *Hatha YogaPradipika*, *Shiva samhita*, *Gheranda samhita* and *Swara Yoga*; various streams of *Yoga*, advanced meditative techniques like *Yoganidra*, *Omkar*, *Cyclic*, *Vipassana* and learn about benefits of *Yoga* as compared to exercise.

#### **11.1.2 Objectives:**

##### **11.1.2.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 11.1.2.1.1 Illustrate the knowledge of traditional texts like *Patanjali Yoga Sutras*, *Hatha Yoga*, *Shiva Samhita* and *Gheranda Samhita*;
- 11.1.2.1.2 Understand the principles behind various meditative practices like *Yoganidra*, *Om* meditation, *cyclic* meditation, *Vipassana* and so on;
- 11.1.2.1.3 Explain about *Yoga* in relation to its application in education, sports;
- 11.1.2.1.4 Demonstrate basic understanding of procedures of stretching and exercises;

11.1.2.1.5 Describe basic physiological changes of *asanas*

11.1.2.1.6 Be aware of the effects of shat *kriyas* and their adverse effects.

#### **11.1.2.2 Skills:**

After the completion of the course, the student shall be able to:

11.1.2.2.1 Describe the concept of *Yoga* as explained in the traditional texts;

11.1.2.2.2 Deliver a meditative session using any of the meditative styles;

11.1.2.2.3 Implement various exercises loosening or eye exercises or stretching to complement *Yoga* practice.

#### **11.1.2.3 Integration**

At the completion of training, the student should be able to comprehensively understand traditional approaches to *Yoga* and employ the same for therapeutic purposes.

### **11.2 Theory**

11.2.1 *PatanjaliYogaSutras* – First two chapters (i.e. *Samadhi Pada* and *SadhanaPada*, brief summary of *VibhutiPada* and *Kaivalyapada*)

11.2.2 *Hatha YogaPradipika* – full text with necessary reference to *GherandaSamhita* and *Siva Samhita*

11.2.2.1 Description of practice of *asanas*: Verses – 15, 16, 17, 32, 34, 35, 38, 44, 47, 48, 50, 51, 53, 54, 57, 58, 59, 62, 63, 64, 65, 67

11.2.2.2 Description of practice of *pranayama*: Verses – 2, 3, 5-12, 14, 16-20, 22, 24, 26-32, 34-37, 39, 40, 44-51, 54, 57, 59

11.2.3 Introduction to other streams of *Yoga - Kundalini, Tantra, Swaraand Kriya*

11.2.4 *Yoganidra*- methods, applications, effects and benefits

11.2.5 Meditation – types –*omkar, cyclic, vipassana*etc. methods of application, benefits, precaution, its influence on health and disease

11.2.6 *Yoga* – in relation to personality and education

11.2.7 *Yoga* – in relation to sports and games, social and political life

11.2.8 Eye exercises – benefits, methods, precautions

11.2.9 Physiological aspects of *asana*

11.2.10 Physiological, neurophysiological aspects of *pranayama*

11.2.11 *Shatkriyas* – comparative study of *shat kriyas*with other systems of medicine

11.2.12 Physiological aspects of exercises

### 11.3 **Practical**

11.3.1 All previous years' asana plus – *veerasana, koormasana, kukkutasana, utthankoormasana, matsyendrasana, padmamayurasana, simhasana, sarvangasana* (all variants), *sirsasana*(all variants)

11.3.2 All loosening (*Sithilikarana Vyayama*) and breathing exercises

11.3.3 All previous years' *Pranayama* plus – *suryabhedana, Chandra bhedana*, cat and tiger breathing, new variants of *pranayama*

11.3.4 All previous years' *Kriyas*plus – *Dandadhouti, agnisara, nauli, bandhas, mudras*

### 11.4 **Textbooks**

11.4.1 Autobiography of a Yogi – ParamahansaYogananda

- 11.4.2 *Yoga as Philosophy and Religion* – SN Dasgupta
- 11.4.3 *Yoga – the Science of Holistic Living* – VK *Yoga*
- 11.4.4 *A Complete Illustrated Book of Yoga* – Swami Vishnu
- 11.4.5 *Encyclopedia of Indian Physical Culture* – DC Mujumdar
- 11.4.6 *Preksha Meditation* – Acharya Tulsi

### 11.5 Scheme Of Examination

S.No	Subject	Theo -ry	Inter- Nal Assmt	Viva- Voce	Total	Practi- cals	Inter- Nal Assmt	Total Marks	Grand Total Marks
01.	Yoga & its Applications	80	20	30	130	60	10	70	200

## **12. NUTRITION AND MEDICINAL HERBS**

### **12.1 Goals and Objectives**

#### **12.1.1 Goal:**

The goal of teaching Nutrition and Medicinal Herbs to undergraduate students is to enable them to analyse nutritional profiles of their patients and prescribe diets to them based on nutritional requirements, as well as use herbs in the management of various diseases.

#### **12.1.2 Objectives:**

##### **12.1.2.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 12.1.2.1.1 Describe fundamentals of nutrition, with respect to different nutrients and food groups;
- 12.1.2.1.2 Illustrate details of nutritional requirements for different age groups, as well as pregnant and lactating women;
- 12.1.2.1.3 Demonstrate therapeutic application of nutrition for common diseases;
- 12.1.2.1.4 Compare modern nutrition to traditional Naturopathic diets;
- 12.1.2.1.5 Have detailed knowledge of recent advances and studies, such as carcinogens in food, food additives, contaminants, etc;
- 12.1.2.1.6 Illustrate the use of specific herbs in common diseases, with therapeutic values;

### **12.1.2.2 Skills:**

After the completion of the course, the student shall be able to:

12.1.2.2.1 Assess the nutritional status of a patient;

12.1.2.2.2 Plan, implement and evaluate nutritional advice for people of different ages and patients of different diseases, including the use of herbs.

### **12.1.2.3 Integration**

At the completion of training, the student should be able to comprehensively integrate traditional Naturopathic nutrition and modern nutritional along with herbs, and employ the same for therapeutic purposes.

## **12.2 Theory (Duration: 12 Months)**

**Total hours: 250 (Theory: 150 Practical: 100)**

### **12.2.1 Nutrition**

12.2.1.1 Definition of food, nutrition, nutrient and diet

12.2.1.2 What is nutrition healing

12.2.1.3 Defining essential nutrients

12.2.1.4 Proteins and amino acids

12.2.1.5 Carbohydrates

12.2.1.6 Lipids, sterols and their metabolism

12.2.1.7 Energy needs: assessment and requirements in humans

12.2.1.8 Electrolytes, water and acid-base balance

- 12.2.1.9 Minerals – calcium, phosphorous, magnesium, iron zinc, copper, iodine,  
selenium, chromium, ultra trace minerals
- 12.2.1.10 Vitamins – A, retinoid, D, E, K, Thiamine, Riboflavin,  
Niacin, Pantothenic acid, Folic acid, B12, Biotin, C.
- 12.2.1.11 Clinical manifestations of human vitamin and mineral disorders
- 12.2.1.12 Role/significance of nutrition
  - 12.2.1.12.1 Regulation of gene expression
  - 12.2.1.12.2 Membrane and transport
- 12.2.1.13 Control of food intake
- 12.2.1.14 Antioxidants
- 12.2.1.15 Food groups
- 12.2.1.16 Metabolic consequences of starvation
- 12.2.1.17 Fiber and other dietary factors affecting nutrient absorption  
and metabolism
- 12.2.1.18 Hormone, cytokine and nutrient reactions
- 12.2.1.19 Nutrition and immune system
- 12.2.1.20 Oxidative stress and oxidant defense
- 12.2.1.21 Diet in work and exercise performance
- 12.2.1.22 Body composition: influence of nutrition, physical activity, growth  
and aging
- 12.2.1.23 Maternal nutrition
- 12.2.1.24 Nutritional requirements during infancy
- 12.2.1.25 Diet, nutrition and adolescence

- 12.2.1.26 Nutrition in the elderly
- 12.2.1.27 Clinical nutrition assessment of infants and children
- 12.2.1.28 Clinical and functional assessment of adults
- 12.2.1.29 Nutritional assessment of malnutrition by anthropometric methods
- 12.2.1.30 Laboratory tests for assessing nutritional status
- 12.2.1.31 Dietary assessment
- 12.2.1.32 Childhood obesity
- 12.2.1.33 Nutritional management of infants and children with specific  
diseases and/or conditions
- 12.2.1.34 Assessment of mal absorption
- 12.2.1.35 Nutrition in pancreatic disorders
- 12.2.1.36 Nutrition in liver disorders
- 12.2.1.37 Nutrition and diet in the management of hyperlipidemia  
and atherosclerosis
- 12.2.1.38 Nutrition, diet and hypertension
- 12.2.1.39 Diet, nutrition and prevention of cancer
- 12.2.1.40 Carcinogens in foods
- 12.2.1.41 Nutritional support of the cancer patient
- 12.2.1.42 Nutrition and diet in rheumatic diseases
- 12.2.1.43 Nutritional management of diabetes
- 12.2.1.44 Obesity
- 12.2.1.45 Nutritional aspects of hematologic disorders
- 12.2.1.46 Renal disorders and nutrition

- 12.2.1.47 Nutrition, respiratory function and disease
- 12.2.1.48 Diagnosis and management of food allergies
- 12.2.1.49 Nutrition and diet in alcoholism
- 12.2.1.50 The hypercatabolic state
- 12.2.1.51 Nutrition and infection
- 12.2.1.52 Nutritive value of food ingredients commonly used in India
- 12.2.1.53 Enteral feeding (only theory)
- 12.2.1.54 Parenteral nutrition (only theory)
- 12.2.1.55 Nutrition and medical ethics – the interplay of medical decisions, patients' rights, and the judicial system
- 12.2.1.56 RDA – individuals and populations
- 12.2.1.57 Nutritional implications of vegetarian diets
- 12.2.1.58 Social and cultural influences on food consumption and nutritional status
- 12.2.1.59 Food additives, contaminants and natural toxins
- 12.2.1.60 Comparative study of modern nutrition and traditional naturopathy diet

### **12.3 Textbooks**

- 12.3.1** Davidson and Passamore Human Nutrition – Passamore
- 12.3.2** Clinical Dietetics and Nutrition – FP Antia
- 12.3.3** Normal Therapeutic Nutrition – Corinne Robinson
- 12.3.4** Essentials of Food and Nutrition – Swaminathan
- 12.3.5** Sprouts – JD VaishYogaSamsthan
- 12.3.6** Science and Art of Food and Nutrition – Herbert Shelton
- 12.3.7** Nutritive Values of Indian Foods – NIN (Hyd)

- 12.3.8 Publications of NIN, Hyderabad
- 12.3.9 Herbs that Heal – HK Bakhru
- 12.3.10 *Charaka and Sushruta Samhita*
- 12.3.11 Fundamentals of *Ayurveda* – Mahadev Shastri

#### 12.4 Scheme Of Examination

S.No	Subject	Theo -ry	Inter- Nal Assmt	Viva- Voce	Total	Practi- cals	Inter- Nal Assmt	Total Marks	Grand Total Marks
01.	Nutrition & Medicinal Herbs	80	20	30	150	60	10	70	200

## **13. DIAGNOSTIC METHODS IN NATUROPATHY – I**

(Duration: 12 months)

Total hours: 200 (Theory: 100 Practical: 100)

### **13.1 Goals and Objectives**

#### **13.1.1 Goal:**

The goal of teaching Diagnostic Methods in Naturopathy to undergraduate students is to provide them with comprehensive knowledge of diagnostic methods employed by traditional Naturopaths that can be used efficiently to diagnose various diseases without the use of sophisticated technology.

#### **13.1.2 Objectives:**

##### **13.1.2.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 13.1.2.1.1 Define and be aware of historically significant developments in diagnostic procedures used in Naturopathy
- 13.1.2.1.2 Illustrate the characteristics of a Healthy Body with respect to Naturopathic Principles
- 13.1.2.1.3 Describe philosophical theories of causation of disease according to Naturopathy
- 13.1.2.1.4 Utilise knowledge of theory of encumbrances, their types and interpretation, along with naturopathic ways to therapeutically correct them;

13.1.2.1.5 Describe in detail Iris Diagnosis, with respect to history, techniques, iris signs, interpretations and tools used, and use the same to diagnose diseases;

13.1.2.1.6 Comprehend the techniques and interpretations of stool and urine diagnosis, correlating modern medical knowledge and Ayurvedic *sthoola* and *muthrapariksha*;

13.1.2.1.7 Describe the characteristics of normal and unhealthy skin, in different diseases.

### **13.1.2.2 Skills:**

After the completion of the course, the student shall be able to:

13.1.2.2.1 Use knowledge of different diagnostic procedures in Naturopathy to effectively and accurately diagnose various diseases, such as Iris Diagnosis, Facial Diagnosis, Stool and Urine Diagnosis, etc.

### **13.1.2.3 Integration**

At the completion of training, the student should be able to comprehensively understand the principles and procedures of Diagnostic Methods in Naturopathy and employ the same for diagnostic and prognostic purposes.

## **13.2 Theory**

### **13.2.1 Facial Diagnosis**

#### **13.2.1.1 Introduction**

13.2.1.1.1 Definition

13.2.1.1.2 Historical Highlights

13.2.1.2 Characteristics of Healthy Body

13.2.1.3 Foreign matter theory , toxemia theory, vitality theory

13.2.1.4 Physiological and pathological perspective of foreign matter, toxemia and vitality theory

13.2.1.5 Unity of disease and unity of cure – interpretation with contemporary medicine

13.2.1.6 Encumbrance, its types and its interpretation in health and disease

13.2.1.7 Habits – significance /consequences and its correspondence in encumbrance

13.2.1.8 Significance of naturopathy treatment modalities in correction of encumbrances.

## 13.2.2 Iridiagnosis

13.2.2.1 Definition and Historical Highlights

13.2.2.2 Anatomy of iris in detail

13.2.2.3 Conceptual theories of Iridiagnosis

13.2.2.4 Comparison of the science of iridiagnosis with concepts of *Drishtipraraksha* in *Ayurveda* and ophthalmology in modern medicine.

13.2.2.5 Technique in iris reading

13.2.2.5.1 Normal and abnormal iris

13.2.2.5.2 The vibratory theory and its significance

13.2.2.5.3 Diagnostic chart

13.2.2.6 Iridoscope

13.2.2.7 Zones

13.2.2.8 Sectorial division

13.2.2.9 Interpretation of iris manifestation

13.2.2.9.1 Inherent lesions and weakness

13.2.2.9.2 Cataract

13.2.2.9.3 Toxic settlements

13.2.2.9.4 Nerve rings

13.2.2.9.5 Lymphatic rosary

13.2.2.9.6 Injuries and surgeries

13.2.2.9.7 Psora spot, scurf rim

13.2.2.9.8 Radii Solaris

13.2.2.9.9 Sympathetic nerve wreath

13.2.2.9.10 Closed and open lesions

13.2.2.9.11 Sodium ring

13.2.2.9.12 Circulatory indicators

13.2.2.9.13 Drugs and chemicals' appearance in the iris and their effect on the body

13.2.2.9.13.1 Arsenic, bismuth, bromides, coal tar products, ergot, glycerin, iodine, iron, lead, mercury, opium, phosphorus, quinine, salicylic acid,, sodium, strychnine, sculpture, turpentine, vaccines etc.

### 13.3 **Practical**

13.3.1 Case sheet writing - minimum 25 cases with naturopathic diagnostic methods

13.3.2 Regular hospital visit

13.3.3 Dissertation of at least 20 cases studies with significant and relevant Naturopathic diagnostic modalities

13.4 **Reference Books:**

13.4.1 Macfaddans Encyclopedia of Physical Culture - Bernard Macfadden

13.4.2 *Asthangahridayam*

13.4.3 *Charaka samhitha*

13.4.4 *Susrutha samhitha*

13.4.5 The Science of Facial Expression – Louis Kuhne

13.4.6 Iridology - Dr. Bernard Jenson

### 13.5 Scheme Of Examination

S.No	Subject	Theory	Internal Assmt	Viva-Voce	Total	Practicals	Internal Assmt	Total Marks	Grand Total Marks
01.	Diagnostic Methods - I (Naturopathy)	80	20	30	130	60	10	70	200

## **14. DIAGNOSTIC METHODS IN CONVENTIONAL MEDICINE – II**

**(Duration: 12 Months)**

**Total hours: 250 (Theory: 150 Practical: 100)**

### **14.1 Goals and Objectives**

#### **14.1.1 Goal:**

The goal of teaching Diagnostic Methods in Conventional Medicine to undergraduate students is to provide them with comprehensive knowledge of diagnostic methods employed by conventional doctors that can be used efficiently to diagnose various diseases, for diagnosis as well as prognosis.

#### **14.1.2 Objectives:**

##### **14.1.2.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 14.1.2.1.1 Understand the procedures and nuances in approaching a patient and taking a detailed history and writing a case report;
- 14.1.2.1.2 Illustrate examination procedures and techniques generally as well as for specific systems and make provisional diagnoses of common diseases;
- 14.1.2.1.3 Describe laboratory investigations used for supporting the provisional diagnosis made after history taking and examinations;
- 14.1.2.1.4 Prescribe and interpret radiological investigations, biochemical investigations, sonography, EEG, ECG,

EMG, echocardiography, CT, PET, MRI, etc for  
diagnostic and prognostic purposes;

- 14.1.2.1.5 Explain and demonstrate knowledge of invasive tests  
such as paracentesis, thoracocentesis, lumbar puncture,  
laparoscopy, endoscopy, biopsy, etc.

#### **14.1.2.2 Skills:**

After the completion of the course, the student shall be able to:

- 14.1.2.2.1 Effectively take a case history with examinations and  
prepare a detailed case report;
- 14.1.2.2.2 Prescribe and interpret any further investigations  
required for the provisional diagnosis made.

#### **14.1.2.3 Integration**

At the completion of training, the student should be able to comprehensively understand the principles, procedures and nuances of Diagnostic Methods in Conventional Medicine and employ the same for diagnostic and prognostic purposes.

### **14.2 Theory**

#### **14.2.1 Examination of the Patient**

- 14.2.1.1 Approach to a patient
- 14.2.1.2 History taking and case sheet writing
- 14.2.1.3 Symptomatology
- 14.2.1.4 Examination of vital data

- 14.2.1.5 Importance of height, weight, abdominal girth
- 14.2.1.6 General physical examination
- 14.2.1.7 Examination of skin, nail and hair
- 14.2.1.8 Systemic examination of the patient
  - 14.2.1.8.1 Examination of Abdomen (digestive system)
  - 14.2.1.8.2 Examination of Cardiovascular system
  - 14.2.1.8.3 Examination of Respiratory system
  - 14.2.1.8.4 Examination of Renal and urogenital system
  - 14.2.1.8.5 Examination of Central nervous system
  - 14.2.1.8.6 Examination of Locomotor system
  - 14.2.1.8.7 Examination of ear, nose and throat
  - 14.2.1.8.8 Gynecological examination
  - 14.2.1.8.9 Endocrine system and metabolic disorder
  - 14.2.1.8.10 Examination of eye
- 14.2.1.9 Provisional diagnosis
- 14.2.1.10 Routine and special investigations
  - 14.2.1.10.1 Laboratory investigations: Urine analysis, stool examination, blood examination-peripheral smear, total WBC count, differential WBC count; ESR, Hb estimation ;BT ,CT ,platelet count, red cell indices, bone marrow examination.
  - 14.2.1.10.2 Radiological investigations: Plain X ray chest, K.U.B., lumbar and cervical spine, skull and para nasal sinuses, joints

- 14.2.1.10.3 Contrast Radiology: Barium swallow, barium meal, barium enema; cholecystography, pyelography, angiography, bronchogram, myelogram
- 14.2.1.10.4 Electrocardiography
- 14.2.1.10.5 Echo-cardiograph
- 14.2.1.10.6 Coronary angiography
- 14.2.1.10.7 Electro-encephalography
- 14.2.1.10.8 Biochemical investigations: LFT, creatinine clearance test, Vanillic acid (VMA) excretion test in urine, SGOT and SGPT, LDH, CPK, blood urea, serum creatinine, cholesterol, renal function test, serum uric acid and serum amylase
- 14.2.1.10.9 Diagnostic Paracentesis
- 14.2.1.10.10 Diagnostic Thoracocentesis
- 14.2.1.10.11 Lumbar puncture and CSF analysis
- 14.2.1.10.12 Radioactive iodine uptake studies
- 14.2.1.10.13 Thyroid T3, T4, TSH estimation
- 14.2.1.10.14 Diagnostic skin tests
- 14.2.1.10.15 Endoscopic procedures
- 14.2.1.10.16 Ultra-sonography
- 14.2.1.10.17 CT, PET, MRI, Doppler
- 14.2.1.10.18 Tissue biopsy and FNAC

## 14.2.2 Final Diagnosis

### 14.3 **Practical**

- 14.3.1 History taking and physical examination of cases
- 14.3.2 Case sheet writing of different types of cases (25)
- 14.3.3 Demonstration of equipment and instruments used for investigation in modern diagnostics
- 14.3.4 Demonstration tour of an ultra-modern super-specialty hospital to view the latest technique of modern diagnosis

### 14.4 **Textbooks**

- 14.4.1 Hutchison's Clinical Methods
- 14.4.2 Manual of clinical Methods – PS Shankar
- 14.4.3 Clinical Diagnosis – JalVakil
- 14.4.4 Clinical Methods – Chamberlin
- 14.4.5 Physical Diagnosis – Golwala
- 14.4.6 Harrison's Principles of Internal Medicine
- 14.4.7 Manipal Manual of Clinical Medicine
- 14.4.8 Macleod's Clinical Examination
- 14.4.9 Davidson's Principles and Practice of Medicine
- 14.4.10 Essentials in Hematology and Clinical Pathology

#### 14.5 Scheme Of Examination

S.No	Subject	Theory	Internal Assmt	Viva-Voce	Total	Practicals	Internal Assmt	Total Marks	Grand Total Marks
01.	Diagnostic Methods – II (Conventional)	80	20	30	130	60	10	70	200

## **15. PSYCHOLOGY AND BASIC PSYCHIATRY**

**(Duration: 12 months)**

**Total hours: 150 (Theory: 100 Practical: 50)**

### **15.1 Goals and Objectives**

#### **15.1.1 Goal:**

The goal of teaching Psychology and Basic Psychiatry to undergraduate students is to provide them with comprehensive knowledge of normal and abnormal psychology and assessment of the same for therapeutic purposes.

#### **15.1.2 Objectives:**

##### **15.1.2.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 15.1.2.1.1 Describe the evolution of Psychology from speculation to science;
- 15.1.2.1.2 Illustrate mechanisms of sense and perception, states of consciousness and their functions;
- 15.1.2.1.3 Understand basic and complex functions such as learning, memory, thinking, language, motivation, emotion, intelligence, development of psychology across lifespan, personality, stress coping, social psychology, attitudes, etc.
- 15.1.2.1.4 Explain abnormal psychology and describe aetiology and psychopathology along with classification of disorders;

15.1.2.1.5 Demonstrate knowledge of therapies aimed at psychological health, such as psychotherapy, *Yoga*, etc;

### **15.1.2.2 Skills:**

After the completion of the course, the student shall be able to:

15.1.2.2.1 Utilise knowledge of psychology and psychiatry in diagnosing and managing various psychological disorders, assessing psychological profile;

15.1.2.2.2 Demonstrate usage of various therapeutic tools in psychiatry to improve mental health in professional practice.

### **15.1.2.3 Integration**

At the completion of training, the student should be able to integrate knowledge of normal and abnormal psychology and psychiatric therapies and efficiently utilise the same for therapeutic purposes.

## **15.2 Theory**

### **15.2.1 Psychology**

15.2.1.1 Unit 1: The Evolution of Psychology- How psychology developed from speculation to science

15.2.1.1.1 Studying the mind and behaviour

15.2.1.1.2 Early scientific approaches to psychology

15.2.1.1.2.1 Structuralism

15.2.1.1.2.2 Functionalism

15.2.1.1.3 Contemporary approaches to psychology

- 15.2.1.1.3.1 Behavioural approach
- 15.2.1.1.3.2 Psychodynamic approach
- 15.2.1.1.3.3 Cognitive approach
- 15.2.1.1.3.4 Behavioural neuroscience approach
- 15.2.1.1.3.5 Evolutionary psychology approach
- 15.2.1.1.3.6 Sociocultural approach
- 15.2.1.1.4 Positive approach to psychology: Humanistic movement and the positive psychology movement

#### 15.2.1.2 Unit 2: Sensation and Perception

- 15.2.1.2.1 How we sense and perceive the world
  - 15.2.1.2.1.1 The visual system
    - 15.2.1.2.1.2 The auditory system
    - 15.2.1.2.1.3 Other senses
  - 15.2.1.2.2 States of consciousness
    - 15.2.1.2.2.1 Levels of awareness
    - 15.2.1.2.2.2 Sleep and dreams
  - 15.2.1.2.3 Altered states of consciousness
    - 15.2.1.2.3.1 Hypnosis
    - 15.2.1.2.3.2 Meditation
    - 15.2.1.2.3.3 Drug induced states

#### 15.2.1.3 Unit 3: Learning and Memory

- 15.2.1.3.1 Types of learning
  - 15.2.1.3.1.1 Classical conditioning
  - 15.2.1.3.1.2 Operant conditioning
  - 15.2.1.3.1.3 Observational learning

- 15.2.1.3.1.4 Cognitive factors in learning
- 15.2.1.3.2 Memory
  - 15.2.1.3.2.1 Nature of memory
  - 15.2.1.3.2.2 Memory encoding: getting information into memory – the role of attention
  - 15.2.1.3.2.3 Levels of processing
  - 15.2.1.3.2.4 Enriching encoding
  - 15.2.1.3.2.5 Memory storage
    - 15.2.1.3.2.5.1 Sensory memory
    - 15.2.1.3.2.5.2 Short-term memory
    - 15.2.1.3.2.5.3 Long-term memory
  - 15.2.1.3.2.6 Memory retrieval
    - 15.2.1.3.2.6.1 Serial position effect
    - 15.2.1.3.2.6.2 Retrieval cues and the retrieval task
    - 15.2.1.3.2.6.3 Retrieval of autobiographical memories
    - 15.2.1.3.2.6.4 Retrieval of emotional memories
    - 15.2.1.3.2.6.5 Forgetting
  - 15.2.1.3.2.7 Biochemistry of memory
  - 15.2.1.3.2.8 Neural circuitry of memory
  - 15.2.1.3.2.9 Anatomy of memory
  - 15.2.1.3.2.10 Are there multiple memory systems? Implicit versus explicit memory
  - 15.2.1.3.2.11 Declarative versus procedural memory
  - 15.2.1.3.2.12 Semantic versus episodic memory
- 15.2.1.4 Unit 4: Thinking and Language

- 15.2.1.4.1 The cognitive revolution in psychology
- 15.2.1.4.2 Concept formation
- 15.2.1.4.3 Problem solving
- 15.2.1.4.4 Critical thinking
- 15.2.1.4.5 Reasoning and decision making
- 15.2.1.4.6 Language and thought language acquisition and development

#### 15.2.1.5 Unit 5: Motivation and Emotion

- 15.2.1.5.1 Approaches to motivation
  - 15.2.1.5.1.1 Evolutionary approach
  - 15.2.1.5.1.2 Drive reduction theory
  - 15.2.1.5.1.3 Optimum arousal theory
  - 15.2.1.5.1.4 The cognitive approach
- 15.2.1.5.2 Hunger
  - 15.2.1.5.2.1 The biology of hunger and thirst
  - 15.2.1.5.2.2 Environmental factors in the regulation of hunger
  - 15.2.1.5.2.3 Eating and weight
  - 15.2.1.5.2.4 Sexuality - the biology of sex and the human sexual response:  
cognitive and sensory/perceptual factors
  - 15.2.1.5.2.5 Cultural factors
  - 15.2.1.5.2.6 Psychosexual dysfunctions
  - 15.2.1.5.2.7 Sexual behavior and orientation

#### 15.2.1.6 Unit 6: Intelligence

- 15.2.1.6.1 Nature of intelligence
- 15.2.1.6.2 Intelligence testing
- 15.2.1.6.3 Neuroscience and intelligence

- 15.2.1.6.4 Theories of multiple intelligences
- 15.2.1.6.5 The extremes of intelligence and creativity
- 15.2.1.6.6 The influence of heredity and environment

15.2.1.7 Unit 7: Human development across the life span

- 15.2.1.7.1 Exploring human development
- 15.2.1.7.2 Prenatal development
- 15.2.1.7.3 Child development: physical, cognitive and socio emotional development in childhood
- 15.2.1.7.4 Adolescence positive psychology and adolescents
- 15.2.1.7.4.1 Physical, cognitive and socio emotional development in adolescence
- 15.2.1.7.5 Adult development and aging
- 15.2.1.7.6 Physical, cognitive and socio emotional development in adulthood

15.2.1.8 Unit 8: Personality

- 15.2.1.8.1 The nature of personality
- 15.2.1.8.2 Psychodynamic perspectives
- 15.2.1.8.3 Behavioral perspectives
- 15.2.1.8.4 Humanistic perspectives
- 15.2.1.8.5 Biological perspectives and contemporary empirical approaches to personality

15.2.1.9 Unit 9: Stress coping and health

- 15.2.1.9.1 The nature of stress
- 15.2.1.9.2 Major types of stress
- 15.2.1.9.3 Responding to stress

- 15.2.1.9.4 The effects of stress on psychological functioning
- 15.2.1.9.5 The effects of stress on physical health
- 15.2.1.9.6 Factors moderating the impact of stress
- 15.2.1.9.7 Health-impairing lifestyles
- 15.2.1.9.8 Reactions to illness
- 15.2.1.9.9 Improving coping and stress management
- 15.2.1.10 Unit 10: Social Psychology
  - 15.2.1.10.1 Social thinking
    - 15.2.1.10.1.1 Attribution
    - 15.2.1.10.1.2 Social perception
    - 15.2.1.10.1.3 Attitudes
  - 15.2.1.10.2 Social influences
    - 15.2.1.10.2.1 Conformity and obedience
    - 15.2.1.10.2.2 Group influence
    - 15.2.1.10.2.3 Leadership
  - 15.2.1.10.3 Inter group relations
    - 15.2.1.10.3.1 Group identity
    - 15.2.1.10.3.2 Prejudice
    - 15.2.1.10.3.3 Ways to improve interethnic relations
  - 15.2.1.10.4 Social interaction
    - 15.2.1.10.4.1 Aggression
  - 15.2.1.10.5 Relationships
    - 15.2.1.10.5.1 Attraction
    - 15.2.1.10.5.2 Love
    - 15.2.1.10.5.3 Relationships and gender

## 15.2.2 Abnormal psychology: Psychiatry

### 15.2.2.1 Unit 1: Abnormal behavior in historical context- the science of psychopathology

#### 15.2.2.1.1 The historical conceptions of abnormal behavior

##### 15.2.2.1.1.1 The supernatural tradition

##### 15.2.2.1.1.2 The biological tradition

##### 15.2.2.1.1.3 The psychological tradition

#### 15.2.2.1.2 An integrative approach to psychopathology

#### 15.2.2.1.3 One-dimensional and multidimensional models

#### 15.2.2.1.4 Genetic contributions to psychopathology neuroscience and its contributions to psychopathology

#### 15.2.2.1.5 Behavioral and cognitive science

#### 15.2.2.1.6 Cultural, social and interpersonal factors

#### 15.2.2.1.7 Classification of psychological disorders: DSM IV and ICD 10 Classifications

### 15.2.2.2 Unit 2: Anxiety disorders

#### 15.2.2.2.1 Generalized anxiety disorders

#### 15.2.2.2.2 Panic disorders; phobias

#### 15.2.2.2.3 Obsessive-compulsive disorders

### 15.2.2.3 Unit 3: Somatoform and Dissociative disorders

#### 15.2.2.3.1 Hypochondriasis

#### 15.2.2.3.2 Somatization disorder

#### 15.2.2.3.3 Conversion disorder

#### 15.2.2.3.4 Pain disorder

#### 15.2.2.3.5 Dissociative disorders

15.2.2.4 Unit 4: Mood disorders

15.2.2.4.1 Depressive disorders

15.2.2.4.2 Bipolar disorders

15.2.2.4.3 Suicide

15.2.2.5 Unit 5: Substance-related disorders

15.2.2.5.1 Depressants

15.2.2.5.1.1 Alcohol use disorders

15.2.2.5.1.2 Sedative substance use disorders

15.2.2.5.1.3 Hypnotic substance use disorders

15.2.2.5.1.4 Anxiolytic substance use disorders

15.2.2.5.2 Stimulants

15.2.2.5.2.1 Amphetamine use disorders

15.2.2.5.2.2 Cocaine use disorders

15.2.2.5.2.3 Nicotine use disorders

15.2.2.5.2.4 Caffeine use disorders

15.2.2.5.3 Opioids use disorders

15.2.2.5.4 Hallucinogens

15.2.2.5.4.1 Marijuana

15.2.2.5.4.2 LSD

15.2.2.5.4.3 Other Hallucinogens

15.2.2.5.5 Other drugs of abuse

15.2.2.6 Unit 6: Schizophrenia and other psychotic disorders

15.2.2.6.1 Schizophrenia

15.2.2.6.1.1 Clinical description

15.2.2.6.1.2 Causes

15.2.2.6.1.3 Types and treatment

15.2.2.6.2 Personality disorders – cluster A, B and C

15.2.2.6.3 Psychotherapies

15.2.2.6.3.1 Psychodynamic therapies

15.2.2.6.3.2 Behavioural therapies

15.2.2.6.3.3 Humanistic therapies

15.2.2.7 Unit 7: Mental health and *Yoga*

## **16. FASTING THERAPY AND DIETETICS (Duration: 12 months)**

**Total hours: 250 (Theory: 150 Practical: 100)**

### **16.1 Goals and Objectives**

#### **16.1.1 Goal:**

The goal of teaching Fasting Therapy and Dietetics to undergraduate students is to provide them with comprehensive knowledge of diet management and Fasting therapy and utilisation of the same for therapeutic purposes.

#### **16.1.2 Objectives:**

##### **16.1.2.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 16.1.2.1.1 Describe definitions and historical highlights of fasting therapy through the centuries, including fasting employed in different religions;
- 16.1.2.1.2 Classify fasting according to duration, purpose, type, etc;
- 16.1.2.1.3 Define rules and regulations of fasting to be followed;
- 16.1.2.1.4 Understand the metabolism of fasting;
- 16.1.2.1.5 Understand contraindications and indications of fasting in order to efficiently use fasting as a therapy;
- 16.1.2.1.6 Understanding Calorie Restriction: Concept, Method, Prevailing basic- Clinical-applied evidence;

- 16.1.2.1.7 Understand the concept of dietetic principles in Naturopathy;
- 16.1.2.1.8 Understand food combinations and health, including dietary requirements for different age groups, including pregnant and lactating women;
- 16.1.2.1.9 Describe importance of various components of diet, such as dietary fiber, vitamins, minerals, etc;
- 16.1.2.1.10 Explain auxiliary concepts of dietetics such as food hygiene, etc.

#### **16.1.2.2 Skills:**

After the completion of the course, the student shall be able to:

- 16.1.2.2.1 Utilise knowledge of fasting therapy and dietetics in managing various diseases;
- 16.1.2.2.2 Demonstrate usage of therapeutic diets and fasting therapy in promotive, preventive, curative and rehabilitative therapy.

#### **16.1.2.3 Integration**

At the completion of training, the student should be able to integrate knowledge of fasting therapy and dietetics and efficiently utilise the same for therapeutic purposes.

### **16.2 Fasting**

16.2.1 Definition

16.2.2 Historical highlights

- 16.2.2.1 Indian: According to Vedas, *Ayurveda*, Epics and other pioneer Naturopaths
- 16.2.2.2 Western
- 16.2.3 Evidence of fasting in animals and its benefits
- 16.2.4 Fasting in different religions
- 16.2.5 Classification of fasting and its effects, limitations, according to
  - 16.2.5.1 Duration (Short, long, intermittent, weekly)
  - 16.2.5.2 Purpose (Preventive, therapeutic, religious, political)
  - 16.2.5.3 Type (Dry, water, juice, monodiet)
- 16.2.6 Starvation – pathological features in different organ systems
- 16.2.7 Physiological changes of fasting in short, long, intermittent, dry, water, juice (lemon honey, tender coconut, sugarcane juice, alkaline juices, honey water etc.) and monodiet fasting.
- 16.2.8 Difference between hunger and starvation
- 16.2.9 Rules and regulations for administering fasting
- 16.2.10 Rules and regulations for selection of patient for fasting
- 16.2.11 Hygiene and auxiliaries of fasting
- 16.2.12 Sane fasting
- 16.2.13 Do's and don'ts of fasting
- 16.2.14 Metabolism of fasting
- 16.2.15 Preparation of individuals for fasting
  - 16.2.15.1 Psychological effects and barriers for fasting
  - 16.2.15.2 Crises during fasting therapy and its management
  - 16.2.15.3 Significance of enema during fasting and its physiology
  - 16.2.15.4 Significance of fasting in fever

16.2.15.5 Fasting for preservation of health

16.2.15.6 Contraindications and limitations of fasting

**16.2.16** Research updates on fasting

## 16.3 **Dietetics**

- 16.3.1 Concept of health in naturopathy
- 16.3.2 Dietetic principles in naturopathy
- 16.3.3 Concept of wholesome diet
- 16.3.4 Medical values of food
- 16.3.5 Natural qualities / properties / characters of foods in naturopathy / *Ayurveda* / modern nutrition
- 16.3.6 Natural food and health
  - 16.3.6.1 Importance of green vegetables, other vegetables, fruits and ingredients
  - 16.3.6.2 Chemical composition of different raw juices and their effects and uses
  - 16.3.6.3 Wheat grass, beetroot, cabbage, cucumber, garlic, papaya, mango, pineapple, pumpkins etc
  - 16.3.6.4 Comparison with raw and cooked food
  - 16.3.6.5 Sprouts, nutrition and method
- 16.3.7 Food combination and health
- 16.3.8 Naturopathic hospital dietetics and classification
- 16.3.9 Disease management for different diseases
- 16.3.10 Food allergies and diet
- 16.3.11 Seasonal changes
- 16.3.12 Dietary requirements for pregnancy, lactation and infancy
- 16.3.13 Food hygiene and health
- 16.3.14 Methods of cooking – nutrient losses and preservation
- 16.3.15 Dietary fiber and its therapeutic effects

16.3.16 Customs and traditions of eating

16.3.17 Emotional states and diet

#### 16.4 **Practical**

16.4.1 Visits to different diet departments of naturopathy and modern medicine hospitals

16.4.2 Menu planning using natural foods and raw diet in general

16.4.3 Demonstration of different sprouts

16.4.4 Preparation of low cost balanced diet for different population groups using natural foods

16.4.5 Canteen duties at different naturopathy hospitals

16.4.6 Visit to different nutrition centers like CFTRI, Mysore, NIN, Hyderabad etc.

16.4.7 Study of 20 fasting cases

16.4.8 Case studies of 10 with records

#### 16.5 **Textbooks**

16.5.1 Fasting for Healthy and Long Life – Carrington

16.5.2 Fasting Cure – Lakshman Sharma

16.5.3 Fasting - The Ultimate Diet - Allan Cott

16.5.4 Mucusless Diet Healing System - Arnold Ehret

16.5.5 The Fasting Cure (Classic Reprint) - Upton Sinclair

16.5.6 Fasting Can Save Your Life - Herbert M. Shelton

16.5.7 Davidson and Passamore Human Nutrition – Passamore

16.5.8 Clinical Dietetics and Nutrition – FP Antia

16.5.9 Normal Therapeutic Nutrition – Corinne Robinson

16.5.10 Essentials of Food and Nutrition – Swaminathan

16.5.11 Sprouts – JD Vaish *Yoga Samsthan*

16.5.12 Science and Art of Food and Nutrition – Herbert Shelton

16.5.13 Nutritive Values of Indian Foods – NIN (Hyd)

16.5.14 Publications of NIN, Hyderabad

### 16.6 **Scheme Of Examination**

S.No	Subject	Theory	Internal Assmt	Viva-Voce	Total	Practicals	Internal Assmt	Total Marks	Grand Total Marks
01.	Fasting Therapy and Dietetics	80	20	30	130	60	10	70	200

## **17. OBSTETRICS AND GYNECOLOGY (Duration: 12 Months)**

**Total hours: 150 (Theory: 100 Practical: 50)**

### **17.1 Goals and Objectives**

#### **17.1.1 Goal:**

The goal of teaching Obstetrics and Gynecology to undergraduate students is to provide them with the comprehensive knowledge of anatomy, physiology and pathophysiology of the reproductive system and gain the ability to optimally manage common problems.

#### **17.1.2 Objectives:**

##### **17.1.2.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 17.1.2.1.1 Delineate the anatomy, physiology and pathophysiology of the reproductive system and the common conditions affecting it;
- 17.1.2.1.2 Detect normal pregnancy, labor, and puerperium;
- 17.1.2.1.3 Elucidate the leading causes of maternal and perinatal morbidity and mortality;
- 17.1.2.1.4 Understand the principles of contraception and various methods employed, methods of medical termination of pregnancy, sterilization and their complications;
- 17.1.2.1.5 Recognize the use, abuse and side effects of drugs in pregnancy, pre-menopausal and post-menopausal periods;

- 17.1.2.1.6 Explain the national programmes of maternal and child health and family welfare and their implementation;
- 17.1.2.1.7 Assess different gynecological diseases and describe principles of their management;
- 17.1.2.1.8 Explain the indications, techniques and complications of procedures like Caesarean section, laparotomy, abdominal and vaginal hysterectomy, and vacuum aspiration for Medical Termination of Pregnancy (MTP).

**17.1.2.2 Skills:**

After the completion of the course, the student shall be able to:

- 17.1.2.2.1 Examine a pregnant women, recognize high risk pregnancies and make appropriate referrals;
- 17.1.2.2.2 Recognise complications of delivery and provide postnatal care;
- 17.1.2.2.3 Recognize congenital anomalies of newborn;
- 17.1.2.2.4 Advise a couple on the use of various available contraceptive devices;
- 17.1.2.2.5 Perform pelvic examination, diagnose and manage common gynaecological problems including early detection of genital malignancies;
- 17.1.2.2.6 Interpret data of investigations like biochemical, histopathological, radiological, ultrasound etc

### **17.1.2.3 Integration**

At the completion of training, the student should be able to integrate knowledge of Obstetrics and Gynaecology to manage related ailments and educate masses on family planning norms.

## **17.2 Theory**

### **17.2.1 Obstetrics**

#### 17.2.1.1 Basic Anatomy and Physiology

17.2.1.1.1 Anatomy and Physiology of female reproductive organs and pelvis

17.2.1.1.2 Maturation and fertilization of ovum

17.2.1.1.3 Development of placenta

17.2.1.1.4 Embryology of uterus

#### 17.2.1.2 Physiology of pregnancy

17.2.1.2.1 Maternal changes due to pregnancy

17.2.1.2.2 Diagnosis of pregnancy

17.2.1.2.3 Differential diagnosis of pregnancy

17.2.1.2.4 Foetus in normal pregnancy

17.2.1.2.5 Antenatal care

#### 17.2.1.3 Physiology of labor

17.2.1.3.1 Causation and stages of labor

17.2.1.3.2 Mechanism of labor

17.2.1.3.3 Conduct of normal labor

#### 17.2.1.4 Physiology puerperium

17.2.1.4.1 Phenomena of normal puerperium

- 17.2.1.4.2 Care of puerperium
- 17.2.1.4.3 Care of new born child
- 17.2.1.5 Pathology of pregnancy
  - 17.2.1.5.1 Hyperemesis gravidarum
  - 17.2.1.5.2 Venereal diseases
  - 17.2.1.5.3 Anemia in pregnancy
  - 17.2.1.5.4 Diseases of the urinary system
  - 17.2.1.5.5 Diabetes in pregnancy
  - 17.2.1.5.6 Diseases and abnormalities of fetal membranes and placenta
  - 17.2.1.5.7 Abortion
  - 17.2.1.5.8 Ectopic pregnancy
  - 17.2.1.5.9 Ante-partum hemorrhage
  - 17.2.1.5.10 Placenta previa
- 17.2.1.6 Pathology of labor
  - 17.2.1.6.1 Occipito-posterior position
  - 17.2.1.6.2 Breech presentation
  - 17.2.1.6.3 Prolapse of the cord, compound presentation
  - 17.2.1.6.4 Multiple pregnancy
  - 17.2.1.6.5 Contracted pelvis
  - 17.2.1.6.6 Management of labor in contracted pelvis
  - 17.2.1.6.7 Complications of 3<sup>rd</sup> stage of labor
- 17.2.1.7 Affection of new-born
  - 17.2.1.7.1 Asphyxia neonatorum
  - 17.2.1.7.2 Pre-term baby
  - 17.2.1.7.3 Congenital malformations

17.2.1.8 Obstetrical operations

17.2.1.8.1 Forceps

17.2.1.8.2 Caesarean section

17.2.1.8.3 Induction of abortion and labor

17.2.1.9 Pathology of Puerperium – Puerperal infections

17.2.1.10 Miscellaneous:

17.2.1.10.1 Perinatal mortality and maternal mortality

17.2.1.10.2 Post-dated pregnancy

17.2.1.10.3 Placenta insufficiency

17.2.1.10.4 Control of contraception

17.2.1.10.5 Medical termination of pregnancy

17.2.1.10.6 Pre-term labor

17.2.1.10.7 Ultrasonogram in Obstetrics

17.2.1.11 Applied aspects in Obstetrics:

17.2.1.11.1 *Yoga* and Naturopathy for Healthy parenthood

17.2.1.11.2 Antenatal and postnatal care through *Yogic* methods

17.2.1.11.3 Antenatal and postnatal care through Naturopathic modalities

17.2.1.11.4 Antenatal and postnatal care through general exercises

17.2.1.11.5 Antenatal and postnatal care through Hydrotherapy

17.2.1.11.6 Natural diet during pregnancy and lactation

## **17.2.2 Gynecology**

### 17.2.2.1 Anatomy of the female pelvic organs

17.2.2.1.1 External genitalia

17.2.2.1.2 Internal genitalia

17.2.2.1.3 Female urethra

17.2.2.1.4 Urinary bladder

17.2.2.1.5 Pelvic ureter

17.2.2.1.6 Rectum and Anal canal

17.2.2.1.7 Pelvic muscles

17.2.2.1.8 Pelvic fascia and cellular tissue

### 17.2.2.2 Blood vessels, lymphatic drainage and innervations of pelvic organs

17.2.2.2.1 Pelvic blood vessels

17.2.2.2.2 Pelvic lymphatics

17.2.2.2.3 Pelvic nerves

### 17.2.2.3 Puberty and Menopause

### 17.2.2.4 Neuroendocrinology in relation to reproduction

### 17.2.2.5 Menstruation

### 17.2.2.6 Examination of a gynecological patient and the diagnostic aids

17.2.2.6.1 History

17.2.2.6.2 Examination

17.2.2.6.3 Ancillary aids

17.2.2.6.4 Cytology

17.2.2.6.5 Colonoscopy

17.2.2.7 Pelvic infection

17.2.2.7.1 Defense of the genital tract

17.2.2.7.2 Acute pelvic infection

17.2.2.7.3 Chronic pelvic infection

17.2.2.7.4 Genital tuberculosis

17.2.2.8 Sexually transmitted diseases

17.2.2.9 Infections of the individual pelvic organs

17.2.2.9.1 Vulva

17.2.2.9.2 Bartholin's gland

17.2.2.9.3 Vagina

17.2.2.9.4 Cervix

17.2.2.9.5 Endometrium

17.2.2.9.6 Fallopian tube

17.2.2.9.7 Ovary

17.2.2.9.8 Parametrium

17.2.2.10 Dysmenorrhea and other disorders of menstrual cycles

17.2.2.10.1 Dysmenorrhea

17.2.2.10.2 Dysfunctional uterine bleeding

17.2.2.11 Displacement of the uterus

17.2.2.11.1 Retroversion

17.2.2.11.2 Prolapse

17.2.2.11.3 Chronic inversion

17.2.2.12 Infertility

17.2.2.12.1 Causes

17.2.2.12.2 Investigations

- 17.2.2.12.3 Treatment
- 17.2.2.12.4 Assisted reproductive techniques
- 17.2.2.12.5 Counseling techniques
- 17.2.2.13 Benign lesions of the vulva and vagina
  - 17.2.2.13.1 Vulval epithelial disorders
  - 17.2.2.13.2 Vulval ulcers
  - 17.2.2.13.3 Vulval and vaginal cysts
- 17.2.2.14 Benign lesions of the cervix
- 17.2.2.15 Benign lesions of the uterus
  - 17.2.2.15.1 Fibroid
  - 17.2.2.15.2 Polyps
- 17.2.2.16 Benign lesions of the ovary
- 17.2.2.17 Ovarian neoplasm
- 17.2.2.18 Endometriosis and adenomyosis
- 17.2.2.19 Premalignant lesions
  - 17.2.2.19.1 Vulva
  - 17.2.2.19.2 Vagina
  - 17.2.2.19.3 Cervix
  - 17.2.2.19.4 Endometrium

- 17.2.2.20 Genital malignancy
  - 17.2.2.20.1 Cervical
  - 17.2.2.20.2 Endometrial
  - 17.2.2.20.3 Gestational trophoblastic neoplasia
  - 17.2.2.20.4 Ovarian
- 17.2.2.21 Urinary problems in gynecology
  - 17.2.2.21.1 Anatomy of the urethra-vesical unit
  - 17.2.2.21.2 Genuine stress incontinence
  - 17.2.2.21.3 Overflow incontinence
  - 17.2.2.21.4 Retention of urine
  - 17.2.2.21.5 Urinary tract infections
- 17.2.2.22 Genital fistulae
  - 17.2.2.22.1 Genito-urinary
  - 17.2.2.22.2 Recto-vaginal
- 17.2.2.23 Amenorrhea
  - 17.2.2.23.1 Physiological
  - 17.2.2.23.2 Primary
  - 17.2.2.23.3 Secondary
- 17.2.2.24 Contraception
  - 17.2.2.24.1 Barrier methods
  - 17.2.2.24.2 Natural
  - 17.2.2.24.3 IUCD
  - 17.2.2.24.4 Steroidal
  - 17.2.2.24.5 Emergency
  - 17.2.2.24.6 Sterilization

- 17.2.2.25 Special problems
  - 17.2.2.25.1 Abnormal vaginal discharge
  - 17.2.2.25.2 Pruritis vulvae
  - 17.2.2.25.3 Pelvic pain
  - 17.2.2.25.4 Postmenopausal bleeding
  - 17.2.2.25.5 Low backache
  - 17.2.2.25.6 Breast in gynecology
  - 17.2.2.25.7 Vaginismus
  - 17.2.2.25.8 Dyspareunia
  - 17.2.2.25.9 Hirsutism
  - 17.2.2.25.10 Galactorrhoea
- 17.2.2.26 Operative gynecology
  - 17.2.2.26.1 Postoperative care
  - 17.2.2.26.2 Dilation of cervix
  - 17.2.2.26.3 Dilation and curettage
  - 17.2.2.26.4 Dilation of and insufflation
  - 17.2.2.26.5 Hysterosalpingography
  - 17.2.2.26.6 Cervical biopsy
  - 17.2.2.26.7 Cryosurgery
  - 17.2.2.26.8 Perineoplasty
  - 17.2.2.26.9 Amputation of cervix
  - 17.2.2.26.10 Abdominal hysterectomy
  - 17.2.2.26.11 Vaginal hysterectomy
- 17.2.2.27 Endoscopic surgery in gynecology
  - 17.2.2.27.1 Laparoscopy

17.2.2.27.2 Hysteroscopy

17.2.2.28 Applied aspects in Gynecology:

17.2.2.28.1 Role of Naturopathy and *Yoga* in Gynecology

17.2.2.28.2 Water treatments for gynecological disorders.

17.3 **Practical**

17.3.1 History taking of antenatal and gynecological cases

17.3.2 Demonstration of physical examination of antenatal and postnatal gynecological cases

17.3.3 Demonstration of conductive labor, normal delivery and use of minor instruments during delivery.

17.3.4 Demonstrations of instruments like Sim's speculum, Cusco's bivalve self training vaginal speculum, Cervical dilators, Anterior vaginal wall retractor, Uterine curette

17.3.5 Specimens

17.3.6 X ray, US, and CT plates

17.3.7 Case-history writing of antenatal and gynecological cases

17.3.8 Demonstration of underwater delivery and painless delivery using acupuncture desired.

17.4 **Textbooks**

17.4.1 Clinical Obstetrics – Mudaliar and Menon

17.4.2 Textbook of Obstetrics and Gynecology – CS Dawn

17.4.3 Shaw's Gynecology

17.4.4 Textbook of Obstetrics and Gynecology - Dutta

### 17.5 **Scheme Of Examination**

S.No	Subject	Theory	Internal Assmt	Viva-Voce	Total	Practicals	Internal Assmt	Total Marks	Grand Total Marks
01.	Obstetrics and Gynaecology	80	20	30	130	60	10	70	200

## **18. YOGA THERAPY (Duration: 12 Months)**

**Total hours: 225 (Theory: 125 Practical: 100)**

### **18.1 Goals and Objectives**

#### **18.1.1 Goal**

The goal of teaching *Yoga* Therapy to undergraduate students is to provide them with comprehensive knowledge of *Yoga* and the physiological effects of various *yogic* practices and utilisation of the same for therapeutic purposes.

#### **18.1.2 Objectives:**

##### **18.1.2.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 18.1.2.1.1 Describe the physiological effects of various *yogic* practices like *kriyas*, *asanas*, *pranayamas*, *mudras*, *bandhas*, *drishtis*, Guided relaxation and Meditation;
- 18.1.2.1.2 Define rules and regulations of *Yoga* to be followed;
- 18.1.2.1.3 Understand the therapeutic aspects of *Yoga* as applied to different disease conditions;
- 18.1.2.1.4 Understand contraindications and indications of *yogic* practices in order to efficiently use *Yoga* as a therapy;
- 18.1.2.1.5 Understand the concept of health and disease in *yogic* lore and role of stress in disease causation and management of the same with *Yoga* ;
- 18.1.2.1.6 Understand importance of food according to *Yoga*;
- 18.1.2.1.7 Delineate the importance of *Yoga* and mental health;

### **18.1.2.2 Skills:**

After the completion of the course, the student shall be able to:

- 18.1.2.2.1 Utilise knowledge of *Yoga* therapy in managing various diseases;
- 18.1.2.2.2 Demonstrate usage of therapeutic aspect of *Yoga* in promotive, preventive, curative and rehabilitative therapy.
- 18.1.2.2.3 Institute remedial measures in *Yoga* for various disease conditions.

### **18.1.2.3 Integration**

At the completion of training, the student should be able to integrate knowledge of *Yoga* and efficiently utilize the same for therapeutic purposes.

## **18.2 Theory**

- 18.2.1 Introduction to *Yogic* Therapy / Basis of *yogic* Therapy
- 18.2.2 Role of *Asanas* in curing various diseases
- 18.2.3 Specific importance of *Pranayama* in curing various diseases
- 18.2.4 Vital role of *Bandhas*, *Mudras*, *Drishtis*, in curing various diseases
- 18.2.5 Role of *Shat kriyas* in curing various diseases
- 18.2.6 Role of general exercises in health and diseases
- 18.2.7 *Sudarshan Kriya* and other modern variants
- 18.2.8 The effects of various *Yogic* practices on different systems (skeletal system, endocrine system, nervous system, digestive system, respiratory system, excretory system, cardiovascular system, muscular system, reproductive system)

**18.2.9** Research methods in *yogic* therapy, statistical analysis etc.

**18.2.10** *Yoga* therapy for

- 18.2.10.1 Cardiovascular diseases
- 18.2.10.2 Psychiatric disorders
- 18.2.10.3 Musculoskeletal disorders
- 18.2.10.4 Nervous system disorders
- 18.2.10.5 Gastrointestinal disorders
- 18.2.10.6 Hormonal diseases
- 18.2.10.7 Respiratory diseases
- 18.2.10.8 Metabolic diseases
- 18.2.10.9 Ophthalmologic disorders
- 18.2.10.10 Pediatric disorders
- 18.2.10.11 ENT Disorders
- 18.2.10.12 OBG disorders

**18.2.11** Meditation and its applications on psychosomatic disorders

**18.2.12** *Yoga* and relaxation techniques

- 18.2.12.1 QRT – Quick Relaxation Technique
- 18.2.12.2 IRT – Instant Relaxation Technique
- 18.2.12.3 DRT – Deep Relaxation Technique

**18.2.13** Teaching methods of *Yoga* to public, students and patients. Model lesson planning and adoption of *Yoga* in education system, limitations, *vidhi* and *nishedha* (right and wrong)

**18.2.14** Advanced techniques of *Yoga* therapy (CM, PET, MSRT, MIRT, MEMT, VISAK, ANAMS, and SMET etc.)

**18.2.15** Subtle Energy Medicine

**18.2.16** *Yoga* and Mental Health: Total integration of personality, correct mental behavior and attitude, hormonal relationship of body and mind, self-content tranquilizing effect, psychology of spiritual growth and spiritual values, reasoning and judgment, pure consciousness, mode of living and disciplined life.

**18.2.17** *Drishtis*

**18.2.18** Stress management through *Yoga*

**18.2.19** Applied Psychology

18.2.19.1 Historical perspective, identifying disorders

18.2.19.1.1 Anxiety disorders

18.2.19.1.2 Dissociative disorders

18.2.19.1.3 Somatoform disorders

18.2.19.1.4 Sexual disorders

18.2.19.1.5 Mood disorders

18.2.19.1.6 Personality disorders

18.2.19.1.7 Schizophrenia

18.2.19.2 Therapy for psychological disorders: psychotherapy, therapy of interpersonal relations, behavior therapy

**18.2.20** Lesson planning and teaching methods in *Yoga*

### **18.3 Practical**

First three years' portions and:

**18.3.1** LSP

**18.3.2** QRT

**18.3.3** IRT

**18.3.4** DRT

- 18.3.5 TM
- 18.3.6 CM
- 18.3.7 SKY
- 18.3.8 SMET
- 18.3.9 PET
- 18.3.10 MSRT
- 18.3.11 MIRT
- 18.3.12 MEMT
- 18.3.13 VISAK
- 18.3.14 ANAMS.

#### 18.4 **Reference Books**

- 18.4.1 *Yogic Therapy* – Vinekar
- 18.4.2 *Yogic Therapy* – Garde
- 18.4.3 *Treatment of Common Diseases through Yoga* – Swami Satyananda Saraswati
- 18.4.4 *Seminar on Yoga, Science and Man* – CCRYN, Delhi
- 18.4.5 *Yoga for Healing* – PS Venkateswaran
- 18.4.6 *Handbook of Behavior Modification and Therapy* – Plenum Press
- 18.4.7 *Stress Management Research Papers* – VK *Yoga*, Bangalore
- 18.4.8 All Bihar School of *Yoga* publications

### 18.5 Scheme Of Examination

S.No	Subject	Theory	Internal Assmt	Viva-Voce	Total	Practicals	Internal Assmt	Total Marks	Grand Total Marks
01.	Yoga Therapy	80	20	30	130	60	10	70	200

## **19. HYDROTHERAPY AND MUD THERAPY**

**Total hours: 275 (Theory: 175 Practical: 100)**

### **19.1 Goals and Objectives**

#### **19.1.1 Goal:**

The goal of teaching Hydrotherapy and Mud Therapy to undergraduate students is to provide them with comprehensive knowledge of treating diseases using water and mud, and the physiological effects of various kinds of such applications, and utilisation of the same for therapeutic purposes.

#### **19.1.2 Objectives:**

##### **19.1.2.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 19.1.2.1.1 Describe the properties and chemical composition of water and mud used for therapeutic purposes, physiology of the skin, production of heat and body temperature regulation, which are essential as a foundation for hydrotherapy.
- 19.1.2.1.2 Illustrate physiological effects of hot and cold water upon the different systems of the body and applications to reflex areas ;
- 19.1.2.1.3 Explain action and reaction mechanisms and physiology, with their effects and uses
- 19.1.2.1.4 Demonstrate use of water in preservation, acute diseases, chronic diseases;
- 19.1.2.1.5 Show in-depth knowledge of general principles of hydrotherapy, therapeutic applications of water, along with therapeutic actions, indications and contra-indications; and classification of mud,

storing of mud, modes of mud treatment, cosmetic uses of mud and research updates in hydrotherapy and mud therapy;

19.1.2.1.6 Demonstrate techniques and procedures of various types of hydriatic applications;

**19.1.2.2 Skills:**

After the completion of the course, the student shall be able to:

19.1.2.2.1 Utilise knowledge of hydrotherapy and mud therapy in managing various diseases;

19.1.2.2.2 Demonstrate usage of therapeutic aspect of hydrotherapy and mud therapy treatments in promotive, preventive, curative and rehabilitative therapy.

19.1.2.2.3 Institute and evaluate remedial measures in hydrotherapy for various disease conditions in clinical as well as research settings.

**19.1.2.3 Integration**

At the completion of training, the student should be able to integrate knowledge of hydrotherapy in various diseases and efficiently utilise the same for therapeutic purposes.

**19.2 Hydrotherapy And Mud Therapy (Duration: 12 Months)**

**19.2.1** Introduction and History

**19.2.2** Physical properties and chemical composition of water

**19.2.3** Physiological basis of Hydrotherapy: The skin and its anatomical construction, functions of skin, temperature sense

- 19.2.4 Production of heat and its distribution in the body, regulation of the body temperature, conditions that increase and decrease heat production in the body, body heat and body temperature
- 19.2.5 Importance of water to human body
- 19.2.6 Physiological effects of water on different systems of the body
  - 19.2.6.1 General and physiological aspects of heat upon: Skin, Respiration, Circulation, Nervous system, Heat and its production-dissipation etc, Tactile and temperature sense
  - 19.2.6.2 General and physiological effects of cold upon: Skin, Respiration, Circulation, Nervous system, GIT, body temperature and its maintenance, circulatory system
- 19.2.7 Reflex areas of the body, results of application of hot and cold over reflex areas
- 19.2.8 Actions and reaction, incomplete reaction, conditions that encourage reaction, internal reaction, thermic reaction, modified thermic reaction
- 19.2.9 Place of water in preservation
- 19.2.10 Place of water in acute diseases
- 19.2.11 Place of water in chronic diseases
- 19.2.12 Magnesium sulphate – use in Hydrotherapy
- 19.2.13 General principles of Hydrotherapy
  - 19.2.13.1 General rules of hydrotherapy
  - 19.2.13.2 Therapeutic significance of reaction
  - 19.2.13.3 Adaptation of individual cases
  - 19.2.13.4 Exaggeration of symptoms under treatment, the untoward effects and how to avoid them

19.2.13.5 General indications and contra-indications

**19.2.14 Therapeutic actions and use of Hydrotherapy**

19.2.14.1 Classification of Hydriatic effects, general principles – excitation and depression

19.2.14.2 Primary excitant effects – when to apply and when not to

apply 19.2.14.2.1 Local hemostatic effects – hydriatic heart tonics

19.2.14.2.2 Cardiac effects – Hydriatic heart tonics

19.2.14.2.3 Uterine excitations, emanegogic effects

19.2.14.2.4 Vesical excitations

19.2.14.2.5 Intestinal excitation, peristaltic effects

19.2.14.3 Secondary excitant effects

19.2.14.3.1 Restorative effects

19.2.14.3.2 Tonic effects of cold water, physiological effects of cold water, cold water vs. medical tonics, application in the following: anemia, neurasthenia, rheumatism, diabetes mellitus, valvular heart diseases

19.2.14.3.3 Calorific effects

19.2.14.3.4 Diaphoretic effects

19.2.14.3.5 Importance of attention to the skin in chronic diseases – alternative and qualitative effect – hot baths in Bright's diseases, sweating baths in Dropsy and Obesity. Depurative or Eliminative effects, Toxemia in Rheumatism

19.2.14.3.6 Expectorant effects

19.2.14.3.7 Diuretic effects – Bright's Disease, Uremia - eclampsia

19.2.14.3.8 Atomic dyspepsia, hyperacidity

19.2.14.3.9 Revulsive and derivative effects, fluxion, revulsive methods for combating superficial anemia and for relief of deep congestion method adopted to anemia of deep rooted organs revulsion on analgesic method

19.2.14.4 Resolvent effects

19.2.14.4.1 Sedative effects – general sedatives – local sedatives:

19.2.14.4.1.1 Sedatives of circulatory system – antiphlogistic effects, inflammation, pneumonia, pleurisy, other acute disorders

19.2.14.4.1.2 Nerve sedatives, hypnotic, calmative, analgesic, anesthetic, antispasmodic, insomnia, chorea, spastic paralysis, exophthalmia, goiter, mania, epilepsy and various painful conditions

19.2.14.4.1.3 Antithermic and antipyretic effects, relation to heat production and heat elimination to antipyretic methods, principles that govern the application of hydriatic measures for the reduction of temperature in fevers, methods that may be efficiently employed in various morbid conditions accompanied by rise in temperature – suggestions, effects, indications and contraindications

19.2.14.4.1.4 Secretory and sedative effects prophylactic uses - Cold bathing in infancy and early childhood, cold bathing for adults, cold baths for women, cold baths in old age - precautions

**19.2.15** The techniques of Hydrotherapy

19.2.15.1 Water Baths

19.2.15.1.1 Plain water bath

- 19.2.15.1.2 Cold hip bath
- 19.2.15.1.3 Kellogg's and Kuhne's sitz bath
- 19.2.15.1.4 Shallow bath – for males and females
- 19.2.15.1.5 Arm and foot bath
- 19.2.15.1.6 Graduated bath
- 19.2.15.1.7 Natural bath
- 19.2.15.1.8 Non-revulsive bath
- 19.2.15.1.9 Immersion bath
- 19.2.15.1.10 Cold plunge
- 19.2.15.1.11 Whirlpool bath
- 19.2.15.1.12 Aeration bath
- 19.2.15.1.13 Vichy spray massage
- 19.2.15.1.14 Rapid bath
- 19.2.15.1.15 Brand bath
- 19.2.15.1.16 Fever bath
- 19.2.15.1.17 River bathing
- 19.2.15.1.18 Sea bathing
- 19.2.15.2 Various baths and air baths
  - 19.2.15.2.1 Russian bath
  - 19.2.15.2.2 Turkish bath
  - 19.2.15.2.3 Steam bath
  - 19.2.15.2.4 Local steam bath
  - 19.2.15.2.5 Steam inhalation
  - 19.2.15.2.6 Hot air bath
  - 19.2.15.2.7 Local hot air bath

- 19.2.15.2.8 Super-hot air bath
- 19.2.15.2.9 Cold air bath
- 19.2.15.2.10 Indoor and outdoor bath
- 19.2.15.3 Douches
  - 19.2.15.3.1 Cold Douche
  - 19.2.15.3.2 Hot Douche
  - 19.2.15.3.3 Neutral Douche
  - 19.2.15.3.4 Alternative Douche
  - 19.2.15.3.5 Underwater Douche
  - 19.2.15.3.6 Contrast Douche
  - 19.2.15.3.7 Horizontal Jet
  - 19.2.15.3.8 Cephalic Douche
  - 19.2.15.3.9 Lumbar Douche
  - 19.2.15.3.10 Fan Douche
  - 19.2.15.3.11 Rain Douche or Shower Douche
  - 19.2.15.3.12 Hepatic Douche
  - 19.2.15.3.13 Circular Douche and semi-circular Douche
  - 19.2.15.3.14 Cerebrospinal Douche
  - 19.2.15.3.15 Plantar Douche

19.2.15.3.16 Percussion Douche

19.2.15.3.17 Scotch Douche

19.2.15.4 Packs and compresses

19.2.15.5 Procedures that increase oxidation

19.2.15.6 Measures that encourage general and local metabolic activity

19.2.15.7 Procedures that increase general blood movement and local  
blood supply

19.2.15.8 Measures that increase heat production

19.2.15.9 Measures that increase the elimination of heat

19.2.15.10 Measures that combat bacterial development of blood

19.2.15.11 Measures that increase/lessen heat elimination

19.2.15.12 Hydratic incompatibility

19.2.15.13 Adoption of hydratic prescription of individual disease

19.2.15.14 Hydrotherapy as a means of rehabilitation and health promotion

19.2.15.15 Emergency treatments in Hydrotherapy

## **19.2.16 Mud Therapy**

19.2.16.1 Introduction to Mud therapy

19.2.16.2 Classification of Mud for therapeutic use

19.2.16.3 Precautions for storing mud

19.2.16.4 Methods of treatment of mud

19.2.16.4.1 Applications

19.2.16.4.2 Packing

19.2.16.4.3 Hot poultices

19.2.16.5 Effect of Mud on different systems of body

19.2.16.6 Types of mud therapy applications

19.2.16.6.1 Natural mud bath

- 19.2.16.6.2 Full and partial mud packs
- 19.2.16.6.3 Mud plaster
- 19.2.16.6.4 Thermal bath
- 19.2.16.6.5 Dry pack
- 19.2.16.6.6 Sand pack and sand baths
- 19.2.16.7 Cosmetic uses of mud
- 19.2.16.8 Research updates

### 19.3 **Practical**

- 19.3.1 Demonstration of various therapeutic effects, procedure and treatments in Hydrotherapy during clinical classes at the Hospital
- 19.3.2 At the end of the Final BNYS course, candidate should be in a position to give treatments independently
- 19.3.3 5 case documentation of all hydriatic applications
- 19.3.4 Clinical dissertation on case studies with minimum sample size of 20 patients on one general and two local applications

### 19.4 **Textbooks**

- 19.4.1 Baths – SJ Singh
- 19.4.2 My Water Cure – Sebastian Kneipp
- 19.4.3 Rational Hydrotherapy – JH Kellogg
- 19.4.4 Healing Clay –Michael Abserra
- 19.4.5 Our Earth Our Cure – Raymond Dextroit

### 19.5 **References**

- 19.5.1 Handbook of Hydrotherapy – Shew Joel

19.5.2 Hydrotherapy in Practice – Davis BC & Harrison RA

19.5.3 Medical Hydrology – Sidney Licht

19.6 **Scheme Of Examination**

S.No	Subject	Theory	Internal Assmt	Viva-Voce	Total	Practicals	Internal Assmt	Total Marks	Grand Total Marks
01.	Hydrotherapy and Mud Therapy	80	20	30	130	60	10	70	200

## **20. PHYSICAL MEDICINE & REHABILITATION (Duration: 12 Months)**

**Total hours: 250 (Theory: 150 Practical: 100)**

### **20.1 Goals and Objectives**

#### **20.1.1 Goal:**

The goal of teaching Physical Medicine and Rehabilitation to undergraduate students is to provide them with the knowledge and skills needed for utilisation of Physical medicine for therapeutic, rehabilitative purposes.

#### **20.1.2 Objectives:**

##### **20.1.2.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 1.1.1.1.1 Define principles of basic physics that act as a foundation for physical medicine
- 1.1.1.1.2 Describe exercise therapy in detail, including starting positions, movements and their types, muscle strength, joint movement, relaxation, posture, co-ordination, gait, walking aids, neuromuscular facilitation, suspension therapy and their therapeutic applications, including allied modalities like heat treatments and cryotherapy;
- 1.1.1.1.3 Understand electrotherapy in terms of fundamentals, principles, laws of electricity and magnetism, practical and theoretical aspects of electrotherapeutic applications, such as faradic and galvanic currents, high frequency currents, laser, ultrasound, radiation therapy (IR &UV), TENS and IFT.

### **1.1.1.2 Skills:**

After the completion of the course, the student shall be able to:

- 1.1.1.1.1 Demonstrate usage of therapeutic applications of physical medicine in promotive, preventive, curative and rehabilitative therapy, focusing on rehabilitation.
- 1.1.1.1.2 Institute remedial measures in *Yoga* for various disease conditions.

### **1.1.1.2 Integration**

At the completion of training, the student should be able to integrate knowledge of various treatments used in Physical Medicine and efficiently utilise the same for rehabilitative and therapeutic purposes.

## **20.2 Theory**

### **20.2.1 Exercise therapy**

#### 20.2.1.1 Basic Physics in Exercise Therapy

- 20.2.1.1.1 Mechanics: Force, gravity, line of gravity, center of gravity in human body, base, equilibrium, axes and planes
- 20.2.1.1.2 Mechanical Principles: lever, order of lever, examples in human body, pendulum, spring

#### 20.2.1.2 Introduction to exercise therapy

20.2.1.3 Starting positions: Fundamental starting positions, derived positions, muscle work for all the fundamental starting positions

#### 20.2.1.4 Classification of movements in detail

- 20.2.1.4.1 Voluntary movements

- 20.2.1.4.2 Involuntary movements
- 20.2.1.5 Active movements
- 20.2.1.6 Passive movements
- 20.2.1.7 Muscle strength: Anatomy and physiology of muscle tissue, causes of muscle weakness/paralysis, types of muscle work and contractions, range of muscle work, muscle assessment, Principles of muscle strengthening/reeducation, early reeducation of paralyzed muscles
- 20.2.1.8 Joint movement: Classification of joint movements causes for restriction of joint movement, prevention of restriction of joints range of movement, principles of mobilization of joint in increasing the range of motion. Technique of mobilization of stiff joint.
- 20.2.1.9 Relaxation: Techniques of relaxation, Principles of obtaining relaxation in various positions
- 20.2.1.10 Posture: types, factors responsible for good posture, factors for poor development of posture
- 20.2.1.11 Coordination exercises: Definition of coordinated movements, in coordinated movements, Principles of coordinated movements, technique of coordination exercise
- 20.2.1.12 Gait: Analysis of normal gait with muscles work, various pathological gaits
- 20.2.1.13 Crutch gait: introduction, crutch measurement, various types of crutch gait in detail
- 20.2.1.14 Neuromuscular facilitation techniques, functional reeducation

- 20.2.1.15 Suspension therapy: Principles of suspension, types of suspension therapy, effects and uses of suspension therapy with their application either to mobilize a joint to increase joint range of motion or increase muscle power, explaining the full details of the components used for suspension therapy
- 20.2.1.16 Myofascial Release Therapy and related therapies used in Sports Medicine
- 20.2.1.17 Therapeutic applications

## 20.2.2 Electrotherapy

- 20.2.2.1 Electrical fundamentals
  - 20.2.2.1.1 Physical principles
  - 20.2.2.1.2 Structure and properties of matter
  - 20.2.2.1.3 Molecular atom, proton, neutron, electron, ion etc.
- 20.2.2.2 Electrical energy
  - 20.2.2.2.1 Nature of electricity current
  - 20.2.2.2.2 Static electricity
  - 20.2.2.2.3 Electric potentials generated by cell
- 20.2.2.3 Ohm's Law
- 20.2.2.4 Joule's Law
- 20.2.2.5 Magnetic energy
  - 20.2.2.5.1 Nature and property of a magnet
  - 20.2.2.5.2 magnetic induction
  - 20.2.2.5.3 Shaw rule
  - 20.2.2.5.4 Maxwell's corkscrew rule

20.2.2.6 Low frequency currents

20.2.2.6.1 Nature and principles of production of muscles stimulating currents

20.2.2.6.2 Types of low frequency currents used for treatment

20.2.2.6.3 Therapeutic electric stimulation

20.2.2.6.4 Ionotophoresis

20.2.2.6.5 Phonophoresis

- 20.2.2.7 Preparation for electrotherapy
  - 20.2.2.7.1 Preparation of apparatus
- 20.2.2.8 Patient treatment technique
  - 20.2.2.8.1 Stimulating muscles of extremity, back and face through the motor points
- 20.2.2.9 Faradic and Galvanic currents
- 20.2.2.10 High frequency current treatments
  - 20.2.2.18.1 Physics of high frequency currents
  - 20.2.2.18.2 Principles
  - 20.2.2.18.3 Biophysics of heat physiology and cold.
  - 20.2.2.18.4 Production, physiological and therapeutic effects and uses.
  - 20.2.2.18.5 Technique of treatment, dangers and precautions, contraindications of:
    - 20.2.2.18.5.1 Ultrasonic therapy
- 20.2.2.11 Principles of radiation therapy
  - 20.2.2.11.1 Physics of radiation therapy
  - 20.2.2.11.2 Laws governing radiation: Production, physiological and therapeutic effects, uses, techniques of treatment, dangers and precautions, contraindications etc. of:
    - 20.2.2.11.2.1 IRR therapy
    - 20.2.2.11.2.2 UV therapy
  - 20.2.2.11.3 Basic principles of TENS and IFT
  - 20.2.2.11.4 Laser Therapy

20.2.2.12 Wax therapy

20.2.2.12.1 Physics of wax therapy

20.2.2.12.2 Physiological and therapeutic effects and uses

20.2.2.12.3 Techniques of application

**20.3 Practical Electrotherapy**

**20.3.1 Interrupted/modified DC**

20.3.1.1 Stimulation of muscles directly

20.3.1.2 Diagnostic tests:

20.3.1.2.1 FG test

20.3.1.2.2 SD curve

20.3.1.2.3 Fatigue test

20.3.1.3 Uses of surged Faradism and interrupted Galvanism in various peripheral nerve lesions

20.3.1.3.1 Neuropraxia

20.3.1.3.2 Axonotmesis

20.3.1.3.3 Neurotmesis

**20.3.2 High Frequency current treatment**

20.3.2.1 UV radiation: Setting up of apparatus selection of lamps technique of application of UVR for various conditions like test dose, general body bath, acne vulgaris, alopecia areata and totalis, ulcers, psoriasis, rickets and general debility patients.

20.3.2.2 Ultrasonics: Setting up of apparatus, selection of dose, and technique of application of various conditions and to various parts of the body.

20.3.2.3 Laser – setting up apparatus including selection of method, technique, preparation of patient, checking contraindications, application for various conditions and parts of the body.

## 20.4 **Practical Exercise Therapy**

- 20.4.1 Demonstration and practice of active and passive movements
- 20.4.2 Demonstration and practice of putting suspension to shoulder joint and elbow joint in upper limbs, hip and knee joints in lower limbs for all movements. Demonstration of total suspension.
- 20.4.3 Muscle strength: Demonstration and practice of strengthening, reeducation of weak/paralyzed muscles of both upper and lower extremity, individual group muscles, abdominal muscle exercises
- 20.4.4 Joint movement: Demonstration and practice of techniques to improve joint range of motion of hip joint, knee joint, ankle and foot, shoulder, elbow joint, radio- ulnar joint, wrist, etc
- 20.4.5 Demonstration and practice of free exercise to improve joint range of motion (Small joint, Eg: Hand, fingers, toes, etc). Demonstration and practice of all crawling exercises, faulty posture, correcting techniques etc.
- 20.4.6 Demonstration of various pathological gaits.
- 20.4.7 Measurement of crutches, walking aids, strengthening muscles, crutch balance, demonstration and practice of all crutch gaits.
- 20.4.8 Breathing exercises: Demonstration and practice of diaphragmatic breathing, localized expansion exercises.
- 20.4.9 Passive stretching: Techniques of passive stretching to sternomastoid muscle, shoulder abductors, elbow flexors, supinator, wrist and finger flexors in upper limbs, passive stretching to hip flexors, adductors, iliotibial band, tensor fascia lata, quadriceps, knee flexors, tendoachilles, etc

## 20.5 **Reference Books**

20.5.1 Principles of Exercise therapy – Dina Gardiner

20.5.2 Tidy's Physiotherapy

20.5.3 Cash's Textbook of Physiotherapy

20.5.4 Clayton's Electrotherapy

## 20.6 **Scheme of Examination**

S.No	Subject	Theory	Internal Assmt	Viva-Voce	Total	Practicals	Internal Assmt	Total Marks	Grand Total Marks
01.	Physical Medicine and Rehabilitation	80	20	30	130	60	10	70	200

## **21. FIRST AID AND EMERGENCY MEDICINE (Duration: 12 Months)**

**Total hours: 150 (Theory: 100 Practical: 50)**

### **21.1 Goals and Objectives**

#### **21.1.1 Goal:**

The goal of teaching First Aid and Emergency Medicine to undergraduate students is to provide them with the skills and knowledge required to manage medical emergencies efficiently.

#### **20.1.3 Objectives:**

##### **20.1.3.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 20.1.3.1.1 Illustrate working knowledge about Golden hour
- 20.1.3.1.2 Describe quick assessment and recognition of emergency conditions;
- 20.1.3.1.3 Demonstrate specific first aid measures and emergency treatments used for handling emergency cases before and after diagnosis of the condition;

##### **20.1.3.2 Skills:**

After the completion of the course, the student shall be able to:

- 20.1.3.2.1 Demonstrate usage of first aid procedures in various emergency situations
- 20.1.3.2.2 Describe assessment of emergencies and treatment of the same with suitable procedures.
- 20.1.3.2.3 Possess the knowledge and skills to perform Basic Life Support procedures in the Golden Hour.

20.1.3.2.4 Able to assess the severity of an emergency condition so as to act in accordance and take necessary steps to prevent further complications.

### **20.1.3.3 Integration**

At the completion of training, the student should be able to effectively use his/her knowledge of assessment and management of medical emergencies in his/her professional practice.

## **21.2 First Aid**

- 21.2.1 General principles of first aid-definition, principles, responsibilities and golden rules
- 21.2.2 Resuscitation techniques-basic life support, mouth to mouth ventilation, artificial ventilation, Sylvester method.
- 21.2.3 Unconsciousness and general principles of treatment, recovery position
- 21.2.4 Transportation and handling of patient
- 21.2.5 Hemorrhage and bleeding
- 21.2.6 Shock
- 21.2.7 Wounds
- 21.2.8 Bandages ,dressing and slings
- 21.2.9 Fractures, sprains and strains
- 21.2.10 Poisoning
- 21.2.11 Asphyxia, Aspiration, drowning, suffocation and strangulation
- 21.2.12 Road accidents
- 21.2.13 Effect of temperature, sunburn, hypothermia, frost bite, heat exhaustion, heat stroke

- 21.2.14 Burns and scalds, electrical injuries
- 21.2.15 Head injury, chest injury, blast injury, crush injury
- 21.2.16 Sports injuries
- 21.2.17 Epilepsy-febrile convulsions
- 21.2.18 Syncope
- 21.2.19 Dog bite, snake bite, scorpion bite and bee sting
- 21.2.20 Emergencies in diasthetic patients and cardiac patient

### **21.3 Recognition, Evaluation Of Clinical Emergencies**

#### **21.3.1 CVS**

- 21.3.1.1 Acute myocardial infarction
- 21.3.1.2 Cardiogenic shock
- 21.3.1.3 Cardiac arrhythmias
- 21.3.1.4 Cardiac arrest
- 21.3.1.5 Hypertensive emergencies
- 21.3.1.6 Pulmonary embolism
- 21.3.1.7 Dissection of aortic aneurysm
- 21.3.1.8 Cardiac tamponade
- 21.3.1.9 DVT

#### **21.3.2 Respiratory System**

- 21.3.2.1 Hemoptysis
- 21.3.2.2 Status asthmaticus
- 21.3.2.3 Spontaneous pneumothorax
- 21.3.2.4 Acute respiratory failure
- 21.3.2.5 Massive pulmonary collapse

21.3.2.6 Acute laryngeal obstruction

21.3.2.7 ARDS

21.3.2.8 Pneumonia

21.3.2.9 Massive pleural effusion

### 21.3.3 Gastrointestinal System

21.3.3.1 Acute vomiting

21.3.3.2 Perforation of Peptic Ulcer

21.3.3.3 Hematemesis

21.3.3.4 Hepatic Pre coma and coma

21.3.3.5 Acute pancreatitis

21.3.3.6 Acute pain in abdomen

21.3.3.7 Obstruction of intestine

### 21.3.4 Nervous System

21.3.4.1 Unconscious patient

21.3.4.2 Cerebrovascular catastrophes

21.3.4.3 Convulsions

21.3.4.4 Status epilepticus

21.3.4.5 TIA

21.3.4.6 Spinal cord injuries

21.3.4.7 Brain death

21.3.4.8 Head injury

21.3.4.9 Acute ascending polyneuritis

### 21.3.5 Renal System

21.3.5.1 Acute renal failure

21.3.5.2 Renal colic

21.3.5.3 Hematuria

21.3.5.4 Hyperkalaemia

21.3.5.5 Hypokalaemia

21.3.5.6 Hyponatremia

### 21.3.6 Endocrine and Metabolism

21.3.6.1 Thyroid crisis

21.3.6.2 Adrenal crisis

21.3.6.3 Diabetic ketoacidosis and coma

21.3.6.4 Hypoglycemia

21.3.6.5 Tetany

21.3.6.6 Hypercalcemia

### 21.3.7 Miscellaneous Emergencies

21.3.7.1 Syncope

21.3.7.2 Acute peripheral circulatory failure

21.3.7.3 Anaphylaxis

21.3.7.4 Hypothermia

21.3.7.5 Hyperpyrexia

21.3.7.6 Poisoning

21.3.7.7 Drug overdose

#### 21.4 **Practical**

- 21.4.1 History taking and physical examination of cases
- 21.4.2 Case sheet writing in different general cases (25)
- 21.4.3 Demonstration of equipment and instruments used for investigation in modern diagnostics
- 21.4.4 Demonstration tour of an ultra-modern super specialty hospital to see the latest techniques management of emergency conditions

#### 21.5 **Textbooks**

- 21.5.1 Hutchison's Clinical Methods
- 21.5.2 Manual of Clinical Methods – PS Shankar
- 21.5.3 First Aid – Red Cross Society
- 21.5.4 First Aid – St. John Ambulance Association
- 21.5.5 First Aid – LC Gupta
- 21.5.6 Bailey and Love's Short Practice of Surgery
- 21.5.7 Harrison's Principle of Internal Medicine
- 21.5.8 Davidson's Principle and Practice of Medicine
- 21.5.9 Medical Emergency, Diagnosis and Management

21.6 **Scheme of Examination**

S.No	Subject	Theory	Internal Assmt	Viva-Voce	Total	Practicals	Internal Assmt	Total Marks	Grand Total Marks
01.	First Aid and Emergency Medicine	80	20	30	130	60	10	70	200

## **22. CLINICAL NATUROPATHY (Duration: 12 months)**

**Total hours: 300 (Theory: 200 Practical: 100)**

### **20.2 Goals and Objectives**

#### **20.2.1 Goal:**

The goal of teaching Clinical Naturopathy to undergraduate students is to train them to provide well integrated clinical service in Naturopathy.

#### **19.1.3 Objectives:**

##### **19.1.3.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 19.1.3.1.1 Illustrate decision making in Naturopathy ;
- 2.24.3.1.2 Understand the basic principles of screening and prevention of disease;
- 2.24.3.1.3 Comprehend the scope of practice- patterns of use, fields of practice, regulations, limitations;
- 2.24.3.1.4 Understand the concept of healing and disease crises and management of the same.
- 2.24.3.1.5 Understand the pathogenesis of the disease in Naturopathy basis and preventive measures of the same;
- 2.24.3.1.6 Create a specific module of therapy for the particular patient with varied presentations.

##### **2.24.3.2 Skills:**

After the completion of the course, the student shall be able to:

- 2.24.3.2.1 Apply his /her knowledge of clinical Naturopathy in managing various diseases;

2.24.3.2.2 Demonstrate usage of therapeutic aspect of clinical Naturopathy in curative and rehabilitative therapy;

2.24.3.2.3 Utilize his/ her knowledge of clinical Naturopathy for prevention of disease and promotion of health;

### **2.24.3.3 Integration**

At the completion of training, the student should be able to integrate knowledge of clinical Naturopathy and efficiently utilise the same for therapeutic purposes.

## **2.2 Theory**

### **2.2.1 Good Clinical Practice**

#### **2.2.1.1 Guidelines and Standards**

### **2.2.2 Decision-making in Naturopathy**

### **2.2.3 Screening and Prevention of Disease**

#### **2.2.3.1 Basic principles of screening**

### **2.2.4 Scope of practice**

#### **2.2.4.1 Patterns of use**

#### **2.2.4.2 Fields of practice**

#### **2.2.4.3 Regulations**

#### **2.2.4.4 Limitations**

### **2.2.5 Cardinal manifestations and presentation of disease**

**2.2.6 Naturopathic prescription-making and algorithmic line of management for the following diseases:**

Abscess, Acid-Peptic Disease, Acne, AIDS, Aging, Allergies, Alopecia, Alzheimer's disease, Anal fissures, Anemia, Anorexia nervosa, Anxiety disorders, Appendicitis, Arthritis – OA & RA, Asthma, ADD/ADHD, Back pain, Bad breath, Bedsore, Bladder infection, Bronchitis, Bruise, Bursitis, Cancer - Breast cancer, Cervical cancer, Colorectal cancer, Leukemia, Lung cancer, Prostate cancer, Skin cancer, Stomach cancer, Uterine cancer; Dental caries, Cardiovascular disease, Cerebrovascular disease, Chlamydia, Chloasma (Age spots), Chronic fatigue syndrome, Cirrhosis, Common cold, Colic, Colitis, Nasal congestion, Conjunctivitis, Constipation, Menstrual cramps, Crohn's disease, Cuts (cuts, wounds and scratches), Cyst, Cystitis, Dandruff, Deep venous thrombosis, Clinical depression, Dermatitis, Diabetes, Diarrhea, Diverticulitis, Dizziness, Duodenal ulcer, Dysmenorrhea, Dyspepsia, Diabetes mellitus, Earache, Earwax blockage, Eczema, Edema, Emphysema, Endometriosis, Epilepsy, Erectile dysfunction, External otitis, Fainting, Farsightedness, Fatigue, Fever, Fibromyalgia, Flatulence, Flu, Folliculitis, Food poisoning, Foot odor, Gallstones, Gas, Gastritis, Gastroenteritis, GERD, Gingivitis, Goiter, Gout, Headache, Heatstroke, Hemorrhoids, Hepatitis, Hernia, Herpes (genital), Obesity, Oligomenorrhea, Oral cancer, Ovarian cyst, Parkinson's disease, PID, Phlebitis, PMS, Postnasal drip, PTSD, Rashes (hives), Raynaud's disease, Sciatica, SAD, Seizure disorder, Sinusitis, Snoring, Sore throat, Scoliosis, Sprains, Acute Abdomen.

#### **22.2.7** Pathophysiology

#### **22.2.8** Management of pains

##### **22.2.8.1** Pain sensory systems

##### **22.2.8.2** Chronic pain

- 22.2.8.3 Types of pain
  - 22.2.8.3.1 Chronic discomfort and palpitation
  - 22.2.8.3.2 Abdominal pain
  - 22.2.8.3.3 Headache
  - 22.2.8.3.4 Back, neck pain
- 22.2.9 Fever, hyperthermia
- 22.2.10 Fever, rashes
- 22.2.11 Fever of unknown origin
- 22.2.12 Hypothermia & frostbite
- 22.2.13 Syncope, faintness, dizziness, vertigo
- 22.2.14 Weakness, disorders of movements and imbalance
- 22.2.15 Numbness, tingling and sensory loss
- 22.2.16 Aphasia, memory loss and other focal cerebral disorders
- 22.2.17 Sleep disorders
- 22.2.18 Dyspnea, cough
- 22.2.19 Edema
- 22.2.20 Dysphasia, nausea, vomiting and indigestion
- 22.2.21 Diarrhea, constipation
- 22.2.22 Weight loss
- 22.2.23 Jaundice, abdominal swelling
- 22.2.24 Sexual dysfunction
- 22.2.25 Healing crisis and Disease crisis
- 22.2.26 Approach to the patient in Naturopathic medicine with:

- 22.2.26.1 Skin disease
  - 22.2.26.2 Cardiovascular disease
  - 22.2.26.3 Disease of respiratory system
  - 22.2.26.4 Gastrointestinal disorders
  - 22.2.26.5 Liver and pancreatic disease
  - 22.2.26.6 Articular and musculoskeletal disorder
  - 22.2.26.7 Neurological disease
  - 22.2.26.8 Renal disorders
  - 22.2.26.9 Endocrinal disorders
  - 22.2.26.10 Menstrual disorders
  - 22.2.26.11 Peripheral neuropathy
- 22.2.27 Dictum of cure in Naturopathic medicine
- 22.2.27.1 Identify and remove the root cause
  - 22.2.27.2 Eliminate the toxins
  - 22.2.27.3 Supplement of the vital energy or nerve energy
- 22.2.28 Important modes and methods for natural rejuvenation

Note: Apart from the above-listed conditions, other clinical conditions may be discussed but the above-listed conditions are mandatory.

### 22.3 **Practical**

- 22.3.1 Case-history taking, documentation and complete management protocol of at least 30 cases.
- 22.3.2 Clinical dissertation on any one disease involving multiple patients.

22.4 **Textbooks:**

22.4.1 Clinical Naturopathy: An Evidence-Based Guide to Practice-Jerome Sarris, Jon Wardle

22.4.2 Clinical Naturopathic Medicine - Leah Hechtman

22.4.3 The Clinician's Handbook of Natural Medicine - Joseph E. Pizzorno Jr.

22.4.4 Fasting-The Ultimate Diet - Allan Cott

22.4.5 Mucusless Diet Healing System - Arnold Ehret

22.4.6 The Fasting Cure (Classic Reprint) - Upton Sinclair

22.4.7 Fasting Can Save Your Life - Herbert M. Shelton

22.5 **Scheme of Examination**

S.No	Subject	Theory	Internal Assmt	Viva-Voce	Total	Practicals	Internal Assmt	Total Marks	Grand Total Marks
01.	Clinical Naturopathy	80	20	30	130	60	10	70	200

## **23. RESEARCH METHODOLOGY & RECENT ADVANCES**

**(Duration 12 months)**

**Total hours: 150 (Theory: 100 Practical: 50)**

### **23.1 Goals and Objectives**

#### **23.1.1 Goal:**

The goal of teaching Research Methodology and Recent advances to undergraduate students is to provide them with the latest updated scientific, knowledge in the field of Naturopathy and *Yoga* and introduce them to research methodology.

#### **23.1.2 Objectives:**

##### **23.1.2.1 Knowledge:**

After the completion of the course, the student shall be able to:

- 2.24.4.1.1 Describe research methodology under process, materials and methods, design of a study, literature review, ethics, sampling, measurement tools, data organisation, statistics, data analysis, reliability and validity, etc, and implement this knowledge in practically designing, conducting, evaluating and publishing a study.
- 2.24.4.1.2 Illustrate statistics and probability theory;
- 2.24.4.1.3 Use technological aids for preparing research reports;
- 2.24.4.1.4 Demonstrate knowledge about inter-disciplinary research.

##### **2.24.4.2 Skills:**

After the completion of the course, the student shall be able to:

- 2.24.4.2.1 Prepare a research study, conduct, evaluate and publish it;

- 2.24.4.2.2 Interpret research findings and analyse whether data is significant or not;

### **2.24.4.3 Integration**

At the completion of training, the student should be able to integrate knowledge of clinical Naturopathy and *Yoga* with skills in research methodology to conduct and publish research studies in the field, to help shift the basis of Naturopathy and *Yoga* to an evidence-based science.

## **23.2 Research Methodology (50 hours)**

- 23.2.1 The research process. Methodology and methods.
- 23.2.2 The design of a study.
- 23.2.3 Literature review.
- 23.2.4 Ethics of research.
- 23.2.5 Types of common designs. Their advantages and disadvantages.
- 23.2.6 Sampling.
- 23.2.7 The experimental and quasi-experimental methods. Correlation studies.
- 23.2.8 Measurement tools: Observations, questionnaires and others.
- 23.2.9 Data organization in Excel and SPSS.
- 23.2.10 Descriptive statistics. Measures of central tendency, measures of dispersion.  
Correlation coefficients.
- 23.2.11 Graphical representations of data. Simple graphs, the box and whiskers plot.
- 23.2.12 Reliability. The different ways of measuring reliability.
- 23.2.13 Validity. Types of validity.

23.3 **Inferential Statistics and Probability Theory (20 hours)**

- 23.3.1 Inferential statistics – populations and samples.
- 23.3.2 Elementary concepts in probability theory
- 23.3.3 The normal distribution. Z-values and probability
- 23.3.4 Calculating probabilities when population parameters are known

23.4 **Research Reports (10 hours)**

- 23.4.1 Microsoft word, excel and power point
- 23.4.2 Reading research reports
- 23.4.3 Writing research reports
- 23.4.4 Presentations

23.5 **Other streams (20 hours)**

- 23.5.1 Inter-Disciplinary Research
- 23.5.2 Introduction to research in Management studies
- 23.5.3 Introduction to research in Education, History, and Anthropology.

## **SECTION V**

### **TEACHING OF MEDICAL ETHICS IN BNYS COURSE**

#### **1. Introduction**

Medical ethics is a systematic effort to work within the ethos of medicine, which has traditionally been service to sick.

There is now a shift from the traditional individual patient doctor relationship of medical care. With the advances in science and technology and the needs of patients, their families and the community, there is an increased concern with the health of the society. There is a shift to greater accountability to the society. Doctors and other health professionals are confronted with many ethical problems. It is, therefore, necessary to be prepared to deal with these problems.

In keeping with its goal to improve quality of education, Rajiv Gandhi University of Health Sciences recommends introduction of medical ethics in the regular teaching of BNYS course beginning from first year and continuing till the end of internship.

#### **2. Objectives**

The objectives of teaching medical ethics should be to enable the students develop the students to develop the ability to:

1. Identify underlying ethical issues and problems in medical practice
2. Consider the alternatives under the given circumstances, and
3. Make decisions based on acceptable moral concepts and also traditions and practices

#### **3. Course contents (Syllabus)**

- a. Introduction to medical ethics
  - What are Ethics
  - What are values and norms
  - Relationship between being ethical and human fulfillment
  - How to form a value system in one's personal and professional life
  - **Heteronomous Ethics and Autonomous Ethics**
  - Freedom and Personal Responsibility
- b. Definition of Medical Ethics
  - Difference between medical ethics and bioethics

- Major principles of Medical Ethics:
- Beneficence = Fraternity
- Justice = Equality
- Self-determination (autonomy) = Liberty

c. Perspectives of Medical Ethics

- The Hippocratic Oath
- The Declaration of Helsinki
- The WHO Declaration of Geneva
- International Code of Medical Ethics (1983)
- Medical Council of India Code of Ethics

d. Ethics of the Individual

- Patient as a person
- Right to be respected
- Truth and confidentiality
- Autonomy of decision
- Concept of disease, health and healing
- Right to health
- Ethics of behavior modification
- Physician-patient relationship
- Organ donation

e. Ethics of Human Life

- What is human life?
- Criteria for distinguishing human and non-human
- Reasons for respecting human life
- Beginning of human life
- Conception, contraception

- Abortion
  - Prenatal sex-determination
  - In vitro Fertilization (IVF)
  - Artificial Insemination by Husband (AIH)
  - Artificial Insemination by Donor (AID)
  - Surrogate motherhood
  - Semen Intra fallopian Transfer (SIFT)
  - Gamete Intra fallopian Transfer (GIFT)
  - Zygote Intra fallopian Transfer (ZIFT)
  - Genetic Engineering
- f. Family and Society in Medical Ethics
- Ethics of human sexuality
  - Family planning perspectives
  - Prolongation of life
  - Advanced life directives – The Living Will
  - Euthanasia
  - Cancer and Terminal Care
- g. Death and Dying
- Use of life-support systems
  - Death awareness
  - The moment of death
  - Prolongation of life
  - Ordinary and extraordinary life support
  - Advanced life directives
  - Euthanasia – passive and active
  - Suicide – the ethical outlook

- The right to die with dignity

h.

#### Professional Ethics

- Code of conduct
- Contract and confidentiality
- Charging of fees, Fee-splitting
- Prescription of drugs
- Over-investigating the patient
- Low-cost drugs, vitamins and tonics
- Allocation of resources in health care

i. Research Ethics

- Animal and experimental research/humanness
- Human experimentation
- Human volunteer research – Informed
- Consent Drug Trials

j. Ethical Work-up of Cases

- Gathering all scientific factors
- Gathering all human factors
- Gathering all value factors
- Identifying areas of value – conflict
- Setting of priorities
- Working out criteria towards decisions

#### **4. Teaching/Learning Experience**

Classroom teaching would focus on professional relationship, patient-doctor relationship, issues at the beginning and end of life, reproductive technologies, resource allocation and health policy. It will also deal with values, ethical concepts and principles. Clinical ethics must be taught as part of bedside teaching. Group discussions, case studies, problem analyzing and problem solving exercises may also be employed.

The teacher involved in teaching ethics should show how the ethical principles are applied on a day-to-day and patient to patient basis by demonstrating by example, how to identify and resolve a particular problem, increasing the awareness and knowledge of students of students the value dimensions of interactions with patients, colleagues, relations and public.

Fostering the development of skills of analysis, decision making and judgment. Making the students aware of the need to respect the rights of the patient as also duties and responsibilities of the doctor

## 5. Evaluation

All major subjects should have at least one short answer question on Medical Ethics appropriate for the subject introduced in the University question paper, and a few questions may be asked in the viva voce examination, eg., basic principles of informed consent, confidentiality, etc.

## 6. Recommended Reading

- a. Francis CM, Medical Ethics, II Ed, 2004, Jaypee Brothers, New Delhi, Rs. 150/-
- b. Ethical Guidelines for Biomedical Research on Human Subjects, Indian Council of Medical Research, New Delhi. 2000.

**DIFFERENT METHODS RECOMMENDED FOR INTERNAL ASSESSMENT**

National Institute of Naturopathy (NIN), Pune, has given some examples of methods of Internal assessment of students, which may be followed by the colleges. They are:

1. Credit for preparation and presentation of seminars by students
2. Preparation of clinical case for presentation
3. Clinical case study/problem solving exercises
4. Participation in project for health care in the community
5. Proficiency in conduction a small research project or assignment
6. Multiple choice questions (MCQ) test after completion of a chapter/system

Each time shall be objectively assessed and recorded. Some of the items can be assigned as home work/vacation work.

**A COMPREHENSIVE LIST OF SKILLS RECOMMENDED AS DESIRABLE FOR BACHELOR OF NATUROPATHY AND YOGIC SCIENCES (BNYS) GRADUATE**

1. Clinical evaluation
  - a. To be able to take a proper and detailed history
  - b. To perform a complete and thorough physical examination and elicit clinical signs
  - c. To be able to properly use the stethoscope, blood pressure apparatus, otoscope, thermometer, nasal speculum, etc
  - d. To be able to perform internal examination-per rectum (PR), per-vaginum (PV), etc.
  - e. To arrive at a proper clinical diagnosis
2. Bedside diagnostic tests
  - a. To do and interpret hemoglobin (Hb), total count (TC), erythrocyte sedimentation rate (ESR), blood smear for parasites, urine examination/albumin/sugar/ketones/microscopy;
  - b. Stool exam for ova and cysts;
  - c. To do gram's stain and Ziehl-Neelsen stain for AFB;
  - d. To do skin smear for leprae bacilli;
  - e. To do and examine a wet film vaginal smear for Trichomonas;
  - f. To do a skin scraping and potassium hydroxide (KOH) stain for fungal infections;
  - g. To perform and read Mantoux test.
3. Ability to carry out procedures
  - a. To conduct CPR (Cardiopulmonary resuscitation) and First Aid in newborns, children and adults
  - b. To administer enema
4. Paediatrics
  - a. To assess newborns and recognize abnormalities and IU retardation
  - b. To teach infant feeding to mothers

- c. To monitor growth by the use of 'road to health chart' and to recognize development retardation
- d. To assess dehydration and prepare and administer Oral Rehydration Therapy (ORT)
- e. To recognize ARI clinically

#### 5. Community Health

- a. To be able to supervise and motivate community and para-professionals for corporate efforts for health care
- b. To be able to carry on managerial responsibilities, e.g., Management of stores, indenting, stock keeping and accounting
- c. Planning and management of health camps
- d. Implementation of national health programmes
- e. To effect proper sanitation measures in the community, e.g., disposal of infected garbage, chlorination of drinking water
- f. To identify and institute control measures for epidemics including its proper data collecting and reporting

#### 6. Management of emergencies

- a. To manage acute anaphylactic shock
- b. To manage peripheral vascular failure and shock
- c. To manage acute pulmonary edema and LVF
- d. Emergency management of drowning, poisoning and seizures
- e. Emergency management of bronchial asthma and status asthmaticus
- f. Emergency management of hyperpyrexia
- g. Emergency management of comatose patients regarding airways, positioning prevention of aspiration and injuries
- h. Assess and administer emergency management of burns

# **School of Education**

## **Shobhit University, Gangoh**

**(Established by UP Shobhit University Act No. 3, 2012)**

### **School of Education**

### **Ordinances, Regulations & Syllabus**

**For**

### **Bachelor of Education (B.Ed.) Two Year Programme Annual Pattern**

**(w.e.f. session 2021-22)**

**Revised and Approved in the year 2021**

**(Board of Studies; 28.06.2021)**

## ***Programme Educational Objectives (PEOs)***

- PEO 1** To enable the prospective teachers to understand the nature purpose and Philosophy of School Education.
- PEO 2** To acquire knowledge and develop an understanding of various aspects of school management.
- PEO 3** To change the behavior, attitude and values through which learners can make responsible and accountable agents of society
- PEO 4** To provide a rich programme of curricular and extra- curricular activities for overall development of learner's personalities.
- PEO 5** To prepare prospective teachers to understand psychological and sociological aspects of child's development.
- PEO 6** To enable the learners to gain in-depth conceptual knowledge in the area of education at primary and secondary levels
- PEO 7** To prepare up-coming teachers to understand child's behavior under different condition.
- PEO 8** To make familiar student- teachers to various teaching methodologies prevailing across the world.
- PEO 9** To sensitize student- teachers about various social and educational issues.
- PEO 10** To enable them to be more creative in their outlook as teachers and to be positive in their attitude and approach.
- PEO 11** To develop competencies and skills required for becoming a reflective and humane teacher.
- PEO 12** To sensitize them towards the promotion of social cohesion National integration and International understanding
- PEO 13** To develop communication skills, train them to use modern information and communication technology for school purposes
- PEO 14** To train them in conducting action research in educational situation and to improve the pedagogical practices in their subjects.

### ***Programme Specific Objectives (PSO's)***

**PSO 1** Problem Solving Skills – Learners will be able to develop reflective and analytical skills and understanding of critical issues of education.

**PSO 2** Professional Skills – Learners will be able to build skills and abilities of communication, reflection, art, aesthetics, and self-expression.

**PSO 3** Successful Career – Learners will exhibit contemporary knowledge in education and will be competent to work in private and government institutions.

**PSO 4** The Teacher and Society – Learners will be able to develop understanding about child's pedagogy, school management and community involvement.

### ***Programme Outcome Objectives (POO's)***

**POO 1** Teaching knowledge: To be able to use learner centered teaching methods and to assess children's learning ability using different pathways.

**POO 2** Problem analysis: To enable the prospective teachers to deal with both the personal and academic problems of students.

**POO 3** Design/ development of solutions: To be able to find and develop the solution of problems of learners related to teaching field.

**POO 4** Conduct investigations of complex problems: Being able to understand and investigate complex problems and find out their solutions.

**POO 5** Modern tool usage: To be able to adopt modern techniques for teaching skill development.

**POO 6** The teacher and society: To be able to engage with self, child, community and school to establish close connections between different curricular areas.

**POO 7** Environment and sustainability: To develop the knowledge, skills, values, attitudes and behavior among students to understand and care for their environment.

**POO 8** Ethics: To be able to develop possible ethical boundaries and values perceived by learners in teaching institutions.

**POO 9** Individual and team work: Student-teacher will be able to share insights, work together productively and efficiently to reach their goal and attain a positive outcome.

**POO 10** Communication: To be able to develop a strong sense of wellbeing and effective communicators and to communicate effectively, verbally as well as in writing.

**POO 11** Project management and finance: Being able to develop projects related to curriculum and study the financial needs and find the ways to meet them.

**POO 12** Life-long learning: Being able to demonstrate reading, writing, listening and speaking skills and also develop an ability to reflect on their own understanding.

## *Course Structure*

The present B.Ed. syllabus for two-year programme has been designed on the current guidelines of NCTE & UGC with the view to make the student-teachers reflective practitioners. The programme is comprised of three broad inter-related curricular areas: -

- (A) : Perspectives in Education: Core Courses (CC)
- (B) : Curriculum and Pedagogic Studies: Pedagogy Courses (PC)
- (C) : Engagement with the Field/Practicum (EF)

Transaction of the courses is to be done using a variety of approaches, such as tasks and assignments, projects, group discussion, seminar, interactions with community in multiple socio-cultural environments.

### **Group (A): Perspectives in Education- Core Courses (CC)**

These courses are intended to provide a conceptual understanding of relevant concepts and processes in teacher education and also situate them in the broader perspective of education and development.

#### **CC 1: Contemporary India and Education**

This course deals with conceptual understanding about issues of diversity, inequality and marginalization in Indian society, the implications for education with analysis of significant policy debates in Indian education.

#### **CC 2: Philosophical & Sociological Perspectives of Education**

This course deals with philosophical and sociological issues and provides an opportunity to understand and reflect on the vision of education as well as cultural context within which education operates.

#### **CC 3: Growing up as a Learner**

This course deals with individual development, nature and process of learning and an understanding of how learning and cognition are closely inter-related throughout individual development process.

#### **CC 4: Teacher, Teaching and Technology**

This course deals with rules and expectations of teachers in the form of accountability and code of ethics and the nature and various aspects of the teaching process in view of the professional development of the teacher.

#### **CC 5: Creating an Inclusive School**

This course deals with understanding of the cultures, policies and practices that need to be addressed in order to create an inclusive school and identify & utilize existing resources for promoting inclusive practices.

#### **CC 6: Gender, School and Society**

This course deals with meaning and experience of being a boy or a girl across different social groups, regions and time-periods. It also deals with gender inequalities through a variety of institutions such as the family, caste, religion, culture, the media and popular culture, law and the state.

#### **CC 7: Knowledge, Language and Curriculum**

This course deals with meaning, nature and sources of knowledge, to develop the ability of reading, comprehension and writing skills & to understand concepts and principles of curriculum development.

## **Group (B): Curriculum and Pedagogic Studies- Pedagogy Courses (PC)**

These courses pertain mainly to help student-teachers become effective teachers. For this, it offers the student-teachers not only reorganize one's previous understanding of one's subject of specialization but also the pedagogy as the integration of knowledge about the learner, the discipline and the societal context of learning, so that they may try out evolving a few learning situations and carry them out both in simulated as well as real situations.

### **PC 1 & PC 2: Pedagogy of School Subjects - I & II – Optional Courses**

These courses intend to enable student-teachers to recognize the nature of knowledge in various subject areas i.e. Sciences (Physical/Biological/Mathematics), Social Sciences, Languages (Hindi/English/Sanskrit), Commerce, Home Science, Computer Science and will help in developing & understanding of the pedagogical requirements in various teaching-learning situations. Each student-teacher will choose two School Subjects on the bases of his/her Graduation Stream.

### **PC 3: Assessment for Learning**

This course intends to lead to an understanding and appreciation of the relevance of assessment the how and why of it, as well as develop necessary competence in involving appropriate assessment modes in line with learning objectives. It also clarifies the significant shift in emphasis of the terms 'assessment for learning' as against 'assessment of learning.

### **PC 4: Optional Courses – any one of the following**

- I. Educational Administration and Management
- II. Guidance and Counseling
- III. Environmental Education
- IV. Computer Education
- V. Health, Physical Education and Yoga
- VI. Life Style Management
- VII. Peace Education
- VIII. Value Education
- IX. Adult and Population Education
- X. School Leadership

## **Group (C): Engagement with the Field/Practicum (EF)**

### **EF 1: Task and Assignment**

Task and Assignments that run through all the courses CC 1-7 and PC 3-4.

### **EF 2: Practicum**

#### **(A): Preparation to Function as a Teacher (Teaching Skills)**

This is visualized as a shorter-duration initial experience (5 weeks) of student-teachers to train in lesson-planning based on constructivist approach, micro-teaching skills and playing the role of teacher in simulated condition as well as in real classroom situation. It will help him/her to prepare himself/herself as a teacher possessing teaching skills.

#### **(B): School Internship**

This is visualized as a longer-duration field experience (16 weeks) of student-teachers supported by relevant interactive exposures within the school. During this period he/she will teach in the school, observe and participate in the day-to-day functioning of school, prepare a Journal containing day-to-day report about all activities including evaluation tools, and conduct an Action Research Project based on any school problem. It will help him/her to become a professional teacher, possessing teaching-competence.

### **EF 3: Enhancing Professional Capacities: Optional Courses**

A part from conceptual and practical learning gained through Core Courses (CC) and Pedagogy Courses (PC), student-teachers need to develop professional competencies and to experience the fact that the teacher is much more than someone who teaches a subject. The teacher is potentially a participant in the wider education system and he/she may play not only a proactive role in the community life of the school but also as an agent of social development and social transformation. It includes a number of experiences that will enhance the capacity of student-teachers in various essential dimensions. Each student-teacher will choose any three EPC activities in each year i.e. three in first year & three in second year.

EPC 1: Strengthening Language Proficiency

EPC 2: Art and Aesthetics

EPC 3: Reading and Reflecting on Texts

EPC 4: Understanding of ICT

EPC 5: Scouting and Guiding

EPC 6: Working with Community

EPC 7: Basics of Research

EPC 8: Drama and Art in Education

EPC 9: Entrepreneurship Development

## **Papers in the First Year**

### **From Group (A):**

Four compulsory papers as-

1. Contemporary India and Education
2. Philosophical & Sociological Perspectives of Education
3. Growing up as a Learner
4. Teacher Teaching Technology

### **From Group (B):**

Two Papers as PC 1 & 2 (Pedagogy of School Subjects - I & II)

(PC 1 & PC 2) These courses intend to enable student-teachers to recognize the nature of knowledge in various subject areas i.e. Sciences (Physical/Biological/Mathematics), Social Sciences, Languages (Hindi/English/Sanskrit), Commerce, Home Science, Computer Science and will help in developing & understanding of the pedagogical requirements in various teaching-learning situations. Each student-teacher will choose two School Subjects on the bases of his/her Graduation Stream.

### **From Group (C):**

#### **EF 1: Task and Assignment**

Task and Assignments that run through all the courses CC 1-4 and PC 1 & 2.

#### **EF 2: Practicum (A): Preparation to Function as a Teacher (Teaching Skills)**

#### **EF 3: Enhancing Professional Capacities: Optional Courses**

Each student-teacher will choose any three EPC activities in first year.

## **Papers in the Second Year**

### **From Group (A):**

Three compulsory papers as-

1. Creating an Inclusive School.
2. Gender, School and Society.
3. Knowledge, Language and Curriculum.

### **From Group (B):**

Two Papers as PC-3 (Assessment for Learning) & PC-4 (Optional Courses)

### **From Group (C):**

#### **EF 1: Task and Assignment**

Task and Assignments that run through all the courses CC 5-7 and PC 3 & 4.

#### **EF 2: Practicum (B): School Internship**

#### **EF 3: Enhancing Professional Capacities: Optional Courses**

Each student-teacher will choose any three EPC activities in second year.

### *Ordinance and Regulations*

#### **A. Duration Of Course**

1. Bachelor of Education (B.Ed.) course shall be a two-year full time professional pre-service teacher education programme with two year divided in yearly course and the examination shall be held at the end of each year.
2. First year shall be from 25<sup>th</sup> August to 30<sup>th</sup> April and the stretch of the second year shall be from 25<sup>th</sup> July to 20<sup>th</sup> April. At the end of each year the candidates shall be required to present themselves for examination.
3. It shall be a full-time course including Theory, Practice in teaching, internship, field work, professional development and other prescribed activities.

#### **B. Total Intake**

Total intake of B.Ed. course in the School of Education, Shobhit University, Gangoh shall be 100 as per NCTE norms.

#### **C. Eligibility Criteria**

The eligibility requirement for the admission of the candidates to B.Ed. course shall be in accordance with the eligibility criteria determine by NCTE/ U.P. Govt. Order issued from time to time.

#### **D. Procedure of Admission**

1. Admission to B.Ed. course shall be made in accordance with N.C.T.E rules and notifications issued from time to time.
2. Reservation of seats shall be as per N.C.T.E notifications.

#### **E. Academic Session**

First year of Bachelor of Education (B.Ed.) programme shall be Eight months long 25<sup>th</sup> August to 30<sup>th</sup> April excluding year-end examination and ten days winter break. Second year of Bachelor of Education (B.Ed.) programme shall be eight and half month long (25<sup>th</sup> July to 30<sup>th</sup> April).

## **F. Classification of Successful Candidates**

1. No candidate shall be declared to be passed B.Ed. examination unless he/she secures 40% marks in aggregate of all the theory courses and 50% marks in practically separately for each academic session.
2. The division shall be determined on the aggregate of marks of all the courses prescribed for the degree separately in theory and practical in both the years as under:

<b>Division in theory &amp; Practical separately</b>	<b>Percentage of marks</b>
First division	60% or above
Second division	50% or above but below 60%
Third division in theory only	40% or above but below 50%

Note: The student will be awarded divisions separately in Theory & Practical Examination.

## **G. Examination: Rules And Regulations**

1. Students who have completed their course for the Bachelor of Education (B.Ed.) First yearly but have failed to appear/ pass the yearly examination will be allowed to re-appear in the subsequent First yearly examination. Those who fail to appear/ pass in any paper in the second yearly may be permitted to appear at the next year' examination without further attendance at lectures if their applications for permission meet with the approval of the Head of the School of Education and the Dean, Faculty of Education.
2. Candidates allowed to appear at the Bachelor of Education (B.Ed.) yearly examination under this ordinance as exempted candidates shall be required to pay the examination fee as prescribed by the University.
3. There shall be a Yearly-End examination and each student has to appear in all papers/ including Theory, Practical's, and Practice in teaching, internship, field work, and professional development.
4. Those candidates who pass a yearly examination can appear for improvement in only one theory paper of a yearly at the next Back Paper/ Regular examination of that yearly and not thereafter. However, the improvement facility will not be given in all the papers prescribed in the course.
5. Students of following categories shall be 'Eligible for Back Paper (EBP)'. An EBP candidate shall be promoted to next yearly. The back paper facility in a yearly provides promotion to the next yearly and another opportunity to obtain a minimum of the pass marks assigned for an individual paper or in the aggregate.
6. The candidates who fail to secure an aggregate of 50% of the maximum marks for a yearly but have obtained 40% of the maximum marks assigned to each of their papers may appear in all the papers as exempted candidate or may appear in only one theory paper of his choice as EBP candidate to secure a minimum in the aggregate.
7. The candidates who secure an aggregate of 50% of the maximum marks for a yearly but fail to secure a minimum of 40% of the maximum marks in one out of four papers prescribed for the yearly papers or in case where there are more than four papers prescribed for the yearly, the candidates who have failed in two theory papers or have failed in one theory paper shall be declared 'EBP'. Such candidates will appear only in their unclear papers.
8. A candidate with two out of three or three out of four unclear papers in his/ her first yearly examination shall be declared 'Failed' but will be promoted to the second yearly but not beyond till he/ she becomes a candidate under 3 or 4 by appearing as an exempted candidate in the next Back paper/ Regular examination of that yearly and not thereafter. Such a promotion from third to fourth yearly shall also be
9. The back paper facility will not be given to a candidate if the number of his unclear papers in all of his previous yearly examinations exceeds three.

10. The examination for the degree of the bachelor of education shall include: Theory of Examination, practice in teaching examination and practical examination, internship and professional development activities.
11. The students shall be required to complete their practice- in- teaching work, the prescribed Practical work, internship, field work, and other activities as per regular schedule of the department and the institution.

If candidate after completing the required percentage of attendance fails to appear in theory or in practical or both, he /she will be considered as ex-student in both theory as well as practical without attending further regular classes in the first or second year respectively.

12. A candidate shall be required to offer the course as prescribed in the syllabus. The theory courses shall carry 100 or 50 maximum marks in both the years. The practical course (E 701) EF 2(A): Preparation to function as a Teacher & E 702 Viva- Voce Examination based on 1. Task and Assignments that run through all the courses CC 1-4 and PC 1 & 2 will be of 200 marks in the first year, out of these 40 marks will be evaluated internally by the subject supervisors respectively and the remaining 160 marks by the board of examiners. In the same way, the practical course (E 703) EF 2(B): School Internship & E 704 Viva- Voce Examination based on 1. Task and Assignments that run through all the courses CC 5-7 and PC 3 & 4 will be of 300 marks in the second year, out of those 60 marks will be evaluated internally by the subject supervisors respectively and the remaining 240 marks by the board of examiners.
13. For a pass, a candidate is required to be obtain at least 40% marks in each paper with a minimum of 40% marks in external and internal assessment separately and 40% in the total aggregate in theory, 50% marks in external and internal assessment in practical separately and 50% in the total aggregate in practical in each year.
14. A candidate who has passed the B.Ed. first year examination may reappear in maximum two theory paper(s) of first year along with the second year examination in the immediately following year and in that case better performance in each such paper will be counted for working out the result.
15. A candidate who has passed the B.Ed. second year examination may reappear in maximum two theory paper of second year in the immediately following year and in that case better performance in each such paper will be counted for working out the result.
16. Candidates are given only one chance to reappear at the same examination for the purpose of improvement of performance in the immediately following year.

<b>Year</b>	<b>Marks</b>
First Year	800 (600 Theory + 200 Practical)
Second Year	600 (300 Theory + 300 Practical)
<b>Total</b>	<b>1400</b>

17. If a candidate fails in one or two paper of the first year examination, he/she may appear at the second year B.Ed. examination along with the one or two the failing paper(s) of the first year examination simultaneously. In case, he/she does not pass the failing paper(s) of the first year examination even at this chance, he/she will be required to reappear at the first year examination in full.

18. In the same way, if a candidate fails in one or two paper(s) of second year examination, he/she will have to appear in one/two paper(s) of the second year in the immediately following year .in case, he/she will be required to appear at the second year examination in full.
19. Each theory paper shall carry 100/50 marks which are allocated in the proportion of 80: 20 for year-end theory examination.
20. The division of marks in two year of Bachelor of Education (B.Ed.) programme shall be as follows:
  - Theory Papers 900 marks
  - Practice in Teaching Examination with 500 marks.
21. The medium of the written exam shall be Hindi or English only.

## H. Awards of Degree

The degree, Bachelor of Education (B.Ed.) shall be awarded by Shobhit University, Gangoh to candidates who have pursued a regular course of study in the university and have fulfilled all the conditions and have passed the prescribed examinations.

## I. Evaluation Scheme

The performance of the candidates appearing in B.Ed. examination will be evaluated as follows:

1. The evaluation of B.Ed. pupil teacher will be done in 1400 marks the division will be awarded separately in theory out of 900 marks and in practical out of 500 marks.
2. The theory part in all the papers **Perspectives in Education: Core Courses (CC) & Curriculum and Pedagogic Studies: Pedagogy Courses (PC)** will be evaluated through a system of external examination (80%) and internal Assessment (20%). The internal assessment will be based on Sessional Examinations (10%), Assignments (5%) & Attendance (5%) for each paper. The External Examination will be through the routine annual university examination, based on 03 essay type questions (48 marks), 04 short questions (16 marks) and 08 very short answer type questions (16 marks).
3. During the first-year evaluation procedure for the practical as follows:
  - (a) Evaluation procedure for paper **(E 701)-EF 2: Practicum (A): Preparation to Function as a Teacher**, a board of two examiners comprising one as Internal Examiner of concerned department & second one as External Examiner from any other University. Examiners will assess student separately and average of total sum of marks will be his\her final score in teaching skill out of 80 external marks and internal marks 20 marks will be given by two subject supervisors.
  - (b) For evaluation procedure paper **(E 702)-Viva- Voce Examination** of 80 marks will be conducted by the board of examiners & internal 20 marks given by respective supervisors.
4. During the second year, evaluation procedure for the practical will be as follows:
  - (a) Evaluation procedure for paper **(E 703)- EF 2(B): School Internship**, a board of two examiners comprising one as Internal Examiner of concerned department & second one as External Examiner from any other University, will assess the journal ,the portfolio and the final presentation of teaching of students through PPT or OHP separately and average of total sum of marks will be her final score in teaching competence out of 160 external marks and internal 40 marks will be given by the subject supervisors .it will be divide as follows:
    - i. The Journal of 50 marks (10+40).
    - ii. The Portfolio of 50 marks (10+40).
    - iii. Final presentation through PPT/OHP of each school subject 100 marks (20+80).
  - (b) Evaluation procedure for paper **(E 704)-Viva- Voce Examination** of 80 marks will be conduct by the board of examiners and internal 20 marks will be given by the respective supervisors.

## **5. Continuous and Comprehensive Evaluation (C.C.E)**

(a) In each paper the continuous internal assessment system would have a weightage of 20% marks, while the yearly end examination shall have a weightage of 80% marks.

(b) The weightage of components in continuous internal assessment system will be as under:

- Sessional Examination	10 %
- Assignment and Presentation	05 %
- Attendance	05 %

(c) It shall be the duty of the teacher/teachers to conduct Continuous and comprehensive Evaluation. In case more than one teacher is sharing the teaching work in a paper, each teacher shall evaluate independently but total weightage should be 20 %.

## **J. Attendance**

The B.Ed. program shall be of duration of two academic years, which can be completed in a maximum of three year. The minimum attendance of student teacher shall have to be 75% for all course work and 90% for Practicum/School Internship.

## **B.Ed. I Year Syllabus**

### **Core Course (CC-1)**

#### **CONTEMPORARY INDIA & EDUCATION (E-101)**

#### **CO: COURSE OUTCOMES**

**CO-1** Understand that development of education is influenced by socio-political forces of the time.

**CO-2** Acquire the knowledge of features of education in ancient, medieval and pre-independent period in India with their strengths and weaknesses.

**CO-3** Understand the contribution of various Committees and Commissions on education set up from time to time in the economic development of India.

**CO-4** Appreciate the developments of Indian Education in the Post Independent Period

#### **Course Contents**

##### **Unit - I: Education in India**

- ❖ Vedic Period, Buddhist Period and Medieval Period

##### **Unit - II: Policy Framework of Education in Pre-Independent Period**

- ❖ Macaulay's, Minutes (1835), Wood Dispatch (1854), Hunter Commission (1882) and Indianisation of Education, National Education Movement, Lord Curzon Policy (1902), Gokhle Bill (1910), Sadler Commission (1917), Hartog Committee (1929), **Basic Education (1937)**, **Sargent Report (1944)**

##### **Unit - III: Policy Framework of Education in Post-Independent Period**

- ❖ University Education Commission (1948-49)
- ❖ Secondary Education Commission (1952-53)
- ❖ Indian Education Commission (1964-66) in the context of Industrialization
- ❖ National Policy of Education (1986) and its review (1992) in the context of Liberalization and Globalization of Indian Economy
- ❖ National Curriculum Framework (2005)
- ❖ **National Knowledge Commission (2007)**

##### **Unit - IV: Elementary Education**

- ❖ Universalization (Provision, Enrolment, Retention, Success), Wastage and Stagnation, Education for all (Sarva Shiksha Abhiyan), Minimum Level of Learning (MLL), **Review of Mid-Day Meal Programme**, Kasturba Balika Yojna, RTE (2009)

##### **Unit - V: Secondary Education**

- ❖ Expansion, differentiation of curricula between boys and girls, discrimination of curricula, Vocationalization of education

##### **Unit - VI: Current Issues**

- ❖ University autonomy, privatization of education, commercialization of education
- ❖ Education of marginalized groups-women, scheduled caste, **tribes, minorities**
- ❖ Medium of schooling- Three Language Formula
- ❖ Population Education.

### **Core Course (CC-2)**

#### **PHILOSOPHICAL & SOCIOLOGICAL PERSPECTIVES OF EDUCATION (E-102)**

#### **CO: COURSE OUTCOMES**

**CO1-** Answer three basic questions-what ? why & How of the Education.

**CO2-** Develop an understanding of contribution of Indian & Western philosopher.

**CO3-** Build their own view about different Indian Religion and respect them.

**CO4-** Describe the role of Education in desirable social change and socio-economic development.

**CO5-** Transform one-self and society to empower people to assure responsibilities for creating sustainable future.

#### **Course Contents**

##### **Unit - I: Education and Knowledge**

- ❖ Education – meaning, nature and modes-Formal, Informal and Non-formal
- ❖ Purposes of education-individual development or **social transformation**
- ❖ Knowledge-meaning and ways of knowing
- ❖ Forms of knowledge-local & universal, concrete & abstract, theoretical & practical, contextual & textual, school & out-of-school

##### **Unit - II: Education and Philosophy**

- ❖ Philosophy of Education-meaning and significance in the context of aims of education, curriculum, **methods of teaching and discipline**
- ❖ Major schools of thoughts and their impact on education.
  - (i) Idealism, Naturalism, Realism, Pragmatism and Humanism.
  - (ii) Sankhya, Yog and Advaita philosophy

##### **Unit - III: Education and Society**

- ❖ Educational sociology – meaning, nature and socialization of the child
- ❖ Education as a means of social change and social welfare
- ❖ Education as a means of human resource development and **economical development.**
- ❖ Meaning of a new social order and modernization of education

##### **Unit - IV: Educational Thoughts: Indian & Western Thinkers**

- ❖ MK Gandhi, Tagore, Aurobindo, Vivekanand, J.Krishnamurthy & Giju Bhai
- ❖ Aristotle, Socrates, Plato, Rousseau, Dewey, Froebel & Montessori

## **Unit - V: Education and Values**

- ❖ Values – meaning, nature & types.
- ❖ Source of values – The Constitution of India, democracy, secularism, fundamental rights & duties, directive principles, constitutional provisions for education.
- ❖ Education for peace – issues of national and international conflicts, social injustice, communal conflicts harmony, individual alienation, **role of individuals in making peace away of life**

## **Unit - VI: Education for National Integration**

- ❖ National integration – meaning and need, role of teacher, institutions and cultural heritage, regional expectation and aspiration
- ❖ Role of celebration of Indian festivals

### **Suggested Readings:**

## **Core Course (CC-3)**

### **GROWING UP AS A LEARNER (E-103)**

#### **CO: COURSE OUTCOMES**

- CO1-** Acquire the basic principles of psychology of learners.
- CO2-** Understands learner characteristics and implications for teaching-learning.
- CO3-** Understand learner's mental health problems & choose appropriate strategies to cope with such problems.
- CO4-** Apply various psychological principles and approaches to learning.
- CO5-** Appreciate the role of psychology in the teaching-learning process.

#### **Course Contents**

### **Unit - I: Psychology and learner**

- ❖ Psychology – its meaning, nature and scope
- ❖ Educational psychology – meaning, scope and its relevance for teachers, teaching and learning.
- ❖ Individual differences – concept & types-mentally retarded, backward, delinquent, gifted, slow learner, **under-achievers, strategies to meet the differences**

### **Unit - II: Human Development**

- ❖ Concept & stages of development – infancy, childhood, adolescence
- ❖ Types of development- physical, cognitive social, emotional, moral with reference to Piaget.

### **Unit - III: Learning**

- ❖ Concept & theories of learning and its implications – Thorndike, Pavlov, Kohler, Skinner, Lewin

### **Unit - IV: Mental Health**

- ❖ Concepts and factors affecting mental health, ways of improving mental health
- ❖ Adjustment and ways for reducing maladjustment, defence mechanism

### **Unit - V: Personality**

- ❖ Concept, dimensions and theories of personality- psycho-analytic, trait, type
- ❖ Measurement of personality- projective techniques

### **Unit - VI: Intelligence and Creativity**

- ❖ Intelligence-meaning, nature and measurement
- ❖ Types of intelligence with reference to multiple intelligence and emotional intelligence, social intelligence
- ❖ Creativity – meaning, nature and measurement, techniques for fostering creativity

### **Core Course (CC-4)**

#### **TEACHER, TEACHING AND TECHNOLOGY (E-104)**

#### **CO: COURSE OUTCOMES**

**CO1-** Acquire theoretical basis of educational technology and to develop awareness about recent developments in the areas of educational technology

**CO2-** Equip them with various technologies to apply for improving instructional practices

**CO3-** Develop teaching skill required for effective instructional and institutional management.

**CO4-** Manage teaching and learning effectively and efficiently.

**CO5-** Identify and implement instructional strategies in different situations.

#### **Course Contents**

#### **Unit - I: Technology and Teaching**

- ❖ Educational technology-meaning, concept and types-hardware, software, systems approach,

- ❖ Types of educational technology -teaching technology, instructional technology and behavioral technology, information communication technology
- ❖ Programmed instruction- concept, principles, assumptions and types – linear and branching
- ❖ **Development and validation of programmed instruction**

### **Unit - II: Task of Teaching**

- ❖ Phases of teaching and its operations-pre-active, inter-active & post-active
- ❖ Levels of teaching-memory, understanding and reflective

### **Unit III: Teaching Aids and Teaching**

- ❖ Teaching aids-meaning, need, types-projected, non-projected, electronic
- ❖ Multi-sensory teaching-meaning and importance
- ❖ Edgar Dale's Cone of experience
- ❖ Audio-visual equipment's-OHP Projector, audio-video recording instruments, radio, television, **computer, LCD projector**
- ❖ Use of teaching-learning technologies – Tele-conferencing (Face to Face Distance mode of Education), language laboratory, e-mail, internet, smart classes, **CAI, open educational resources (OER)**

### **Unit - IV: Management of Learning and Teaching**

- ❖ Planning
- ❖ Organizing
- ❖ Leading
- ❖ Controlling

### **Unit - V: Strategies of Teaching**

- ❖ Concept and classification, different teaching strategies - lecture, demonstration, heuristic, discovery, project, assignment, tutorial, group work, brain-storming, role playing, **team teaching**

### **Unit - VI: Modification of Teacher Behavior**

- ❖ Modification of teacher behavior-simulation teaching, t-group training, interaction- analysis, action research, micro teaching with special reference to components of various teaching skills like -Introduction, Reinforcement, Probing Question, Stimulus Variation, **Explaining, Black-Board Writing**

### **Unit - VII: Professional Development of Teachers**

- ❖ Teacher evaluation, teacher autonomy, teacher accountability, code of ethics for teachers
- ❖ Strategies for professional development of teachers

#### **Suggested Readings:**

## Pedagogy Courses

### हिन्दी शिक्षण (E-201)

#### CO: COURSE OUTCOMES

**CO1-** Understand about the nature and characteristics of a language and mother tongue and the use of language.

**CO2-** Practice the required skill and their- interlinks for mastering a language.

**CO3-** Understand the various approaches for planning for successful language teaching.

**CO4-** Understand the Approaches for teaching different aspects of language.

**CO5-** Understand the Aids and other similar available material that could be used for teaching language.

**CO6-** Practice the technique of obtaining feedback for self-evaluation and evaluation of student's success in learning and using the language.

#### Course Contents

##### यूनिट . 1 : भाषा का स्वरूप, प्रकृति एवं हिन्दी भाषा ।

- ❖ भाषा का अर्थ, प्रकृति एवं भाषा अधिगम के सिद्धान्त ।
- ❖ मातृभाषा और राष्ट्र भाषा के रूप में हिन्दी का महत्व ।
- ❖ मातृभाषा, राष्ट्रभाषा एवं विदेशी भाषा के रूप में हिन्दी शिक्षण
- ❖ हिन्दी शिक्षण के सामान्य उद्देश्य ।

##### यूनिट . 2 : हिन्दी का भाषा विज्ञान एवं उपयोगिता ।

- ❖ हिन्दी ध्वनि विज्ञान, उसके विभिन्न अंग ।
- ❖ हिन्दी रूप विज्ञान, वर्गीकरण एवं निर्माण प्रक्रिया ।
- ❖ हिन्दी वाक्य विज्ञान, प्रकार एवं प्रभावी निर्माण प्रक्रिया ।
- ❖ विराम चिह्न एवं उनका उचित प्रयोग ।

##### यूनिट . 3 : भाषायी कौशल—शिक्षण, उद्देश्य एवं प्रक्रिया ।

- ❖ श्रवण कौशल— अर्थ उद्देश्य एवं शिक्षण क्रियाएँ ।
- ❖ वचन कौशल—अर्थ, उद्देश्य एवं शिक्षण क्रियाएँ ।
- ❖ पठन कौशल— अर्थ, उद्देश्य एवं विकास हेतु उपाय ।
- ❖ लेखन कौशल— अर्थ, उद्देश्य एवं शिक्षण क्रियाएँ ।
- ❖ सूक्ष्म शिक्षण का स्वरूप एवं निम्न कौशलों के विकास हेतु सूक्ष्म पाठयोजना कानिर्माण—  
अ. प्रस्तावना कौशल ब. प्रश्न कौशल स. व्याख्या कौशल द. उद्दीपन परिवर्तन कौशल

##### यूनिट . 4 : हिन्दी साहित्य की विधाएँ एवं उनका शिक्षण

- ❖ पाठयोजना का अर्थ एवं उपयोगिता, इकाई योजना का निर्माण एवं उद्देश्य ।
- ❖ हिन्दी की निम्न विधाओं के शिक्षण का उद्देश्य, विधियाँ एवं पाठ नियोजन —अ. गद्य — गहन पाठ एवं द्रुत पाठ ब. पद्य स. व्याकरण द. रचना शिक्षण
- ❖ हिन्दी शिक्षण हेतु संरचनात्मक विधि की उपयोगिता ।

##### यूनिट . 5 : हिन्दी में दक्षता विकसित करने वाले घटक

- ❖ हिन्दी शिक्षण में सहायक शैक्षिक तकनीकी, आई0सी0टी0 एवं अन्य उपकरणों का प्रयोग । पत्रिकाएँ, अखबार, पुस्तकालय, भाषा प्रयोगशाला, कम्प्यूटर सहायक अनुदेशन, पावर पॉइन्ट, प्रस्तुतिकरण, मृदु पागम आदि ।
- ❖ निम्न पाठ्यक्रम सहगामी क्रियाएँ एवं उनका महत्व —परिचर्चा, वाद—विवाद, खेल, कार्यशाला, गोष्ठी, निबन्ध लेखन, स्वरचित कविता व कहानी प्रतियोगिता आदि ।

##### यूनिट . 6 : परीक्षण एवं मूल्यांकन

- ❖ हिन्दी में मूल्यांकन सतत एवं समग्र
- ❖ हिन्दी में अच्छे परीक्षण की विशेषताएँ एवं परीक्षण पदों का विकास (वस्तुनिष्ठ, लघुत्तरीय, निबन्धात्मक)
- ❖ हिन्दी में निष्पत्ति परीक्षण हेतु प्रश्न—पत्र का निर्माण
- ❖ उपचारात्मक एवं निदानात्मक शिक्षण

## PEDAGOGY OF ENGLISH (E 202)

### CO: COURSE OUTCOMES

- CO1-** Understand about the nature and characteristics of a language and mother tongue and the use of language.
- CO2-** Practice the required skill and their-interlinks for mastering a language.
- CO3-** Understand the various approaches for planning for successful language teaching.
- CO4-** Understand the Approaches for teaching different aspects of language.
- CO5-** Understand the Aids and other similar available material that could be used for teaching language.
- CO6-** Practice the technique of obtaining feedback for self-evaluation and evaluation of student's success in learning and using the language.

### Course Contents

#### Unit - I: Background to the Study of English

- ❖ Role of English in the present day; position of English in the Indian school curriculum in the context of the three-language formula
- ❖ English as a second Language
- ❖ Functions of language
- ❖ Linguistic principles
- ❖ Aims and objectives of teaching of English at Junior and **Secondary level**

#### Unit - II: Content and pedagogical analysis

- ❖ Teaching of prose, poetry, composition and grammar.
- ❖ Pedagogical analysis based on unit analysis, objectives, learning experience, chosen methods and material and composition and grammar.
- ❖ Preparation of micro lessons based on the following skills :  
Introduction. **Questioning. Explaining**, Illustration, Stimulus variation

#### Unit - III: Methods of Teaching and Skills of Teaching

- ❖ Various approaches of teaching English; structural approach, communicative approach, holistic approach
- ❖ Difference between and 'approach' and 'method', major methods of teaching English- Grammar-cum-translation method, direct method and bilingual method
- ❖ Structural approach: meaning of structure and pattern, principles of selection and gradation of structure, presentation and practice of structure
- ❖ Latest developments in the approach and methods of teaching English including the linguistic communicative approach, lesson planning
- ❖ Use of ICT in teaching-learning process of English with computer-aided methods like-Power Point, Multimedia, **Software, Webinars** etc.

#### Unit - IV: Teaching Aids

- ❖ Importance of instructional material and their effective use
- ❖ Use of following aids :

(i) Chalk board	(vii) Record-Player(lingua phones)
(ii) Flannel board	(viii) Radio
(iii) Pictures.	(ix) Television
(iv) Picture cut-out	(x) <b>Film and filmstrips</b>
(v) Charts	(xi) <b>Overhead Projector</b>
(vi) Tape-recorder.	(xii) <b>Language laboratory</b>

## Unit V : Evaluation

- ❖ Basic principles testing English, tools and techniques of evaluation
- ❖ The meaning and significance of comprehensive and continuous evaluation in English
- ❖ Development of good test items in English (objectives type, short answer type, essay type)
- ❖ Construction of an achievement test, diagnostic testing and remedial teaching in English

### संस्कृत- शिक्षण (E 203)

#### CO: COURSE OUTCOMES

- CO1-** Understand about the nature and characteristics of a language and mother tongue and the use of language
- CO2-** Practice the required skill and their-interlinks for mastering a language.
- CO3-** Understand the various approaches for planning for successful language teaching.
- CO4-** Understand the Approaches for teaching different aspects of language.
- CO5-** Understand the Aids and other similar available material that could be used for teaching language.
- CO6-** Practice the technique of obtaining feedback for self-evaluation and evaluation of student's success in learning and using the language.

#### CONTENT

यूनिट . 1 : भाषा – स्वरूप, प्रकृति एवं महत्व भाषा की उत्पत्ति, विकास एवं परिनिष्ठित परिभाषा।

- ❖ भाषा के विविध रूप।
- ❖ भारतीय भाषाओं में संस्कृत का स्थान एवं त्रिभाषा सूत्र की व्याख्यज्ञं
- ❖ भाषा की प्रकृति।
- ❖ सीखने के सिद्धान्त तथा वर्तमान परिप्रेक्ष्य में संस्कृत का सांस्कृतिक एवं साहित्यिक महत्व।

यूनिट 2 : संस्कृत में भाषागत कौशल एवं शिक्षण उद्देश्य।

- ❖ संस्कृत का प्रारम्भिक व्याकरण—पुरुष, वचन, शब्द रूप, धातुरूप सन्धि, समास, उपसर्ग प्रत्यय।
- ❖ संस्कृत भाषा की ध्वनियाँ उनके उच्चारण स्थान (च्वपदज वित्तजपबनसंजपवद) एवं सूत्र, आभ्यन्तर एवं बाह्य प्रयत्न, समय एवं काल से उत्पन्न ध्वनि—भेद।
- ❖ भाषायी कौशल – उच्चारण, वाचन श्रवण, बोध एवं अभिव्यञ्जन, सभी कौशलों के शिक्षण
- ❖ उद्देश्य, विधियाँ, कौशलों से सम्बन्धित दोष, कारण और उपचार।
- ❖ कौशलों में दक्षता प्राप्ति हेतु पाठ्येत्तर क्रियाएँ।

यूनिट 3 : संस्कृत साहित्य की विधाएँ एवं उनका शिक्षण।

- ❖ साहित्य की विभिन्न विधाएँ, अवर माध्यमिक एवं उच्च माध्यमिक स्तर पर उनके शिक्षण—उद्देश्य, ब्लूम द्वारा गया वर्गीकरण।

- ❖ संस्कृत शिक्षण की सामान्य विधियाँ।
- ❖ संस्कृत-गद्य, पद्य, व्याकरण, रचना, नाटक, द्रुतपाठ एवं निबन्ध-शिक्षण की विधियाँ एवं उद्देश्य।
- ❖ पाठ योजना के विभिन्न प्रकार एवं उनकी निर्माण-प्रक्रिया।
- ❖ संस्कृत, वर्तनी से सम्बन्धित छात्रों की सामान्य त्रुटियाँ, उनके कारण एवं निराकरण।

#### यूनिट 4 :संस्कृत पाठ्यक्रम एवं पाठ्य पुस्तकें।

- ❖ पाठ्यक्रम से तात्पर्य उसकी आवश्यकता, आधार, पाठ्यक्रम निर्माण के सिद्धान्त, पाठ्यक्रम निर्माण के समय ध्यान रखने योग्य सावधानियाँ।
- ❖ उत्तर प्रदेश में अवर एवं उच्च माध्यमिक स्तर के संस्कृत शिक्षण पाठ्यक्रम की समीक्षा एवं मूल्यांकन।
- ❖ पाठ्य पुस्तक का मूल प्रत्यय, पाठ्य पुस्तक निर्माण के सिद्धान्त, पाठ्य पुस्तक के मूल्यांकन एवं चयन की प्रक्रिया।
- ❖ संस्कृत पाठ्यक्रम व शिक्षण हेतु चयनित पाठ्य पुस्तकों का मूल्यांकन।
- ❖ उत्तर प्रदेश के विद्यालय
- ❖ अच्छी संस्कृत पाठ्य पुस्तक की विशेषताएँ।

#### यूनिट 5 :संस्कृत भाषा में मूल्यांकन।

- ❖ मूल्यांकन का प्रत्यय, आवश्यकता एवं परम्परागत एवं आधुनिक मूल्यांकन।
- ❖ परीक्षणों/मूल्यांकन की प्राचीन एवं नवीन विधियाँ।
- ❖ उद्देश्य केन्द्रित (द्वरमबजपअम ब्मदजतमक) परीक्षणों की निर्माण प्रक्रिया तथा परीक्षण रचना के समय ध्यान रखने योग्य सावधानियाँ।
- ❖ अच्छे परीक्षणों की विशेषताएँ।
- ❖ विभिन्न संस्कृत विद्याओं के मूल्यांकन हेतु परीक्षण एवं उनके प्रकार।

#### यूनिट 6 : संस्कृत शिक्षण में दक्षता के प्रभावी घटक।

- ❖ संस्कृत अध्यापक की विशेषताएँ।
- ❖ संस्कृत-कक्ष, शिक्षण सामग्री के प्रकार, तकनीकी उपकरण।
- ❖ संस्कृत शिक्षण में पाठ्य सहगामी क्रियाएँ।
- ❖ संस्कृत में निदानात्मक एवं उपचारात्मक शिक्षण।
- ❖ संस्कृत शिक्षण – गृह कार्य के प्रकार एवं महत्व।
- ❖ क्रियात्मक अनुसन्धान एवं संस्कृत शिक्षण में उसकी उपयोगिता।

### PEDAGOGY OF SOCIAL SCIENCES (E 204)

#### CO: COURSE OUTCOMES

- CO1-** Understand concept, meaning and scope of social sciences.
- CO2-** Get acquainted with appropriate methodology as applicable to social sciences
- CO3-** Prepare unit plan and lesson plan.
- CO4-** Acquire skill in teaching social sciences.
- CO5-** Acquire knowledge of various evaluation procedures and to device effective evaluation tools.
- CO6-** Acquire the ability to develop instructional support materials.

#### Course Contents

### **Unit - I: Nature and Scope of Social Sciences**

- ❖ Social sciences and social studies: Course subjects of social sciences - History, Civics, Geography and Economics, inter-relationship between them
- ❖ Rational for including these areas in school curriculum
- ❖ Instructional objectives of teaching social sciences at secondary level

### **Unit - II: Methodology for Social Science Pedagogy**

- ❖ Instructional strategies, methods of teaching social science
- ❖ Strategies for teaching social science in terms of specific methods like Lecture, Question-Answer, Group Discussion, Project and Source Methods, Socialized Recitation and **Supervised Study, Tutorials.**
- ❖ Micro teaching skills- Introduction, Reinforcement, Probing Questioning, Stimulus Variation, Explaining, Blackboard Writing etc.
- ❖ Selecting and using teaching aids: chalk boards, objects and specimen, histrionics, models, graphs, charts, maps, pictures, slides, films, filmstrips, audio-visual aids, projected aids: **slide projectors**, overhead projectors, **LCD projectors**
- ❖ Use of ICT in teaching-learning process of social science with computer-aided methods like- Power Point, Simulation, Softwares, Webinars etc.
- ❖ Content analysis, unit planning and lesson planning

### **Unit - III: Curriculum and Text-Books**

- ❖ Place of social studies in Secondary School curriculum
- ❖ Teacher and Curriculum planning, hidden curriculum, Evaluation of curriculum, Characteristics of good text-book, Evaluation of textbooks, analysis of textbooks from peace education and environmental education perspective, **gender bias in social science curriculum**

### **Unit - IV: Social Science Teacher and co-curricular activities**

- ❖ Qualities of social science teacher
- ❖ Professional development of social science teacher
- ❖ Principles of organizing co-curricular activities
- ❖ Formation and management of social science clubs
- ❖ Organizing seminars, debates, quiz, exhibition, competition, wall magazine, manuscript
- ❖ Using community resources
- ❖ Organizing field trips
- ❖ Social science room

### **Unit - V: Transaction mode and Evaluation**

- ❖ Objectives of evaluation in social science, developing a blueprint – objective, content, items
- ❖ Essay type, short answer type and objective type question in social sciences, their advantages and limitations, **framing different types of questions.**
- ❖ Construction of achievement test in social science
- ❖ Continuous evaluation using feedback for improvement of teaching and learning in social science
- ❖ Diagnostic testing and remedial teaching

## **PEDAGOGY OF MATHEMATICS (E 205)**

### **CO: COURSE OUTCOMES**

- CO1-** Understand and appreciate the uses and significance of mathematics in daily life.
- CO2-** Learn successfully various approaches of teaching mathematics and to use them judiciously.
- CO3-** Know the methods of planning instruction for the classroom.
- CO4-** Prepare curricular activities as per the needs
- CO5-** Appreciate and organize activities to develop aesthetics of mathematics.

### **Course Contents**

## **Unit I: Entering into the Discipline**

- ❖ Meaning and nature of mathematics, use and significance of mathematics
- ❖ Contribution of some great mathematicians - Aryabhata, Bhaskaracharya, Ramanujam, Euclid, Pythagoras, Rene Decarte.
- ❖ Aims and objectives of teaching mathematics at secondary and senior secondary levels
- ❖ Objectives of teaching mathematics in terms of behavior outcomes.

## **Unit II: Methodology for Mathematics Teaching**

- ❖ Methods of teaching: Inductive- Deductive, Analytic- Synthetic, Problem solving, Heuristics, Project & Laboratory Method.
- ❖ Techniques of teaching: Oral, Written, Drill, Home-Assignment, Supervised study, and programmed learning technique.
- ❖ Micro teaching skills-Introduction, Reinforcement, Probing Question, Stimulus variation, Explaining, Blackboard Writing etc.
- ❖ Use of ICT in teaching-learning process of mathematics with computer-aided methods like- Power Point, Multimedia, Simulation, Software's, Webinars etc.

## **Unit III: Developing Lesson Plan, Unit Plan and Material Aids**

- ❖ Lesson plan - meaning, purpose and Performance of lesson plan and its rationality
- ❖ Unit plan – meaning and purpose of unit plan
- ❖ Teaching –aids importance and classification
- ❖ Developing/preparing low cost improvised teaching aids, relevant to local ethos
- ❖ Application of computer in teaching of mathematics.

## **Unit IV: Development of Curriculum, Text Book and Activities of Mathematics**

- ❖ Principles and rationale of curriculum development, organizing the syllabi both logically and psychologically according to the age groups of children
- ❖ Planning activities and methods of developing the substitute/ alternative material to the prescribed syllabus for completing it in due course of time
- ❖ Organization of mathematics laboratory
- ❖ Text book of mathematics- qualities of a good text book of mathematics  
Using mathematics as a game for recreation; organizing quiz programmes, skill-development in answering puzzles riddles, magic squares, word search etc.
- ❖ Learning about the short cuts mentioned in Vedic mathematics
- ❖ Development of maths laboratory

## **Unit V: Evaluation in Mathematics**

- ❖ Meaning and needs of evaluation.
- ❖ Process of obtaining feedback and evaluation in mathematics in terms of cognitive affective and psychomotor behavioral development
- ❖ Comprehensive and continuous evaluation (C.C.E.) in mathematics
- ❖ Development of test item (short answer and objective type)
- ❖ Diagnostic testing and remedial teaching
- ❖ Preparation of an achievement test

## PEDAGOGY OF PHYSICAL SCIENCES (E 206)

### CO: COURSE OUTCOMES

- CO1-** Develop a broad understanding of the principles and procedures used in modern physical science education.
- CO2-** Enhance their essential skill for practicing modern physical science education
- CO3-** Develop their skills necessary for preparing international accessories.
- CO4-** Prepare acceptance lesson models which lay down this procedure to the acceptance for preparing designs for lesson.
- CO5-** Manage introduction activity in such a way that the vast majority of the learners attain most of the objectives.

### Course Contents

#### Unit - I: Concept, Nature and Importance

- ❖ Meaning and nature of physical science, path tracking discoveries and land mark development in science, impact of science on modern communities, globalization and science
- ❖ Justification for including science as a subject in school curriculum, eminent Indian and world Scientists - an introduction, **professions in the area of science**

#### Unit - II: Aims and Objectives of Teaching Physical Science

- ❖ General aims and objectives of teaching physical science at secondary and senior secondary school stage, instructional objectives with special emphasis on Bloom's taxonomy
- ❖ Concept of entering and terminal behavior, defining desired outcomes (statements of objectives) for different levels of education like primary, **upper primary**, secondary and senior secondary.

#### Unit - III: Methodology of Teaching Physical Science

- ❖ Methods - Lecture, Demonstration, Lecture-cum Demonstration, Heuristic, project, Laboratory, Problem Solving
- ❖ Techniques – Team-Teaching, **Computer Assistance Teaching**
- ❖ Excursion, science – museums, science – club, science – fair, science projects
- ❖ Micro teaching skills-Introduction, Reinforcement, Probing Question, Stimulus variation, Explaining, Black Board-Writing etc.
- ❖ Use of ICT in teaching-learning process of physical sciences with computer-aided methods like-Power Point, **Multimedia**, Simulation, Software, Webinars etc.

#### Unit - IV: Curriculum and Instructional Material Development

- ❖ Meaning, definition and principles of curriculum construction and its types
- ❖ Curriculum organization using procedure like concentric, topical, process and integrated approaches, adaptation of the curriculum according to the local needs and the availability of local resources.
- ❖ Development of physical science curriculum at different stages of school education e.g. primary, upper primary, secondary and senior secondary
- ❖ **Current trends in science curriculum.**
- ❖ Preparation, selection and use of teaching aids
- ❖ Curriculum accessories and support material - text books, journals, hand books, student's workbook, display slide, **laboratory materials.**

#### Unit - V: Content Analysis and Lesson Planning

- ❖ Content analysis, pedagogical analysis of content (Taking an example of any one topic of physical science). Following points should be followed for pedagogical analysis – Identification of minor and major concepts, Listing behavioral outcomes, Listing activity and experiments Listing evaluation procedure, **Developing unit plans and lesson plans**

### **Unit - VI: Evaluation in Physical Science Teaching**

- ❖ Evaluation: meaning and needs, formative and summative evaluation
- ❖ Process of development of tests for measuring specific outcomes - cognitive outcomes, affective outcomes and psychomotor outcomes.
- ❖ Diagnostic testing and remedial teaching
- ❖ Preparation of achievement test, **development of improvised apparatus**

## **PEDAGOGY OF BIOLOGICAL SCIENCES (E 207)**

### **CO: COURSE OUTCOMES**

**CO1-** Develop broad understanding of principles and knowledge used in biology science.

**CO2-** Develop their essential skills for practicing biological science.

**CO3-** Know various approaches and methods of teaching life science.

**CO4-** Lesson planning of biological science properly.

**CO5-** Prepare tools for evaluation in biological sciences.

### **Course Contents**

#### **Unit I: Nature, Concepts and Importance**

- ❖ History and nature of biological sciences
- ❖ Importance of biological science for environment, health and peace
- ❖ Interdisciplinary linkage of biological science and other school subjects
- ❖ Value of biological sciences in our lives
- ❖ **Four Indian eminent biologists and their discoveries**

#### **Unit II: Objectives of Teaching Biological Sciences**

- ❖ General aims and objectives of teaching biology difference between aims and objectives, Bloom's taxonomy of educational objectives
- ❖ Writing objectives in terms of learning outcomes (behavioral term) for different levels of school teaching VIII, IX and X classes-RCM approach of writing objectives

#### **Unit III: Exploring learning**

- ❖ Inductive and deductive approach, different methods and techniques of teaching biological sciences
- ❖ Teacher centered approaches-lecture, demonstration, lecture cum demonstration
- ❖ Child centered approach-project method, **heuristic problem solving, assignment**
- ❖ Use of ICT in teaching-learning process of biological sciences with computer-aided methods like-Power Point, Simulation, Softwares, Webinars etc.
- ❖ Micro-teaching skills- Introduction, Explaining, **Probing questioning**, Illustration, Stimulus variation, Blackboard writing etc.
- ❖ Analysis of content, preparing unit plan, lesson plan

#### **Unit IV: Learner Centered School Curriculum**

- ❖ Principles of development of biological science curriculum, trends in biological sciences curriculum.
- ❖ Analysis of text books and biology syllabi of NCERT and U.P. State VIII, IX and X classes.
- ❖ Importance and type of teaching aids, use of audiovisual aids and improvised apparatus in teaching biology, biology laboratory
- ❖ Biology museum, biology club, field trips, aquarium herbarium and **vivarium exhibition**

#### **Unit V: Concept of Evaluation and Measurement**

- ❖ Meaning and nature of evaluation and measurement
- ❖ Tools and techniques of evaluation in biological science
- ❖ Characteristics of a good test-reliability, validity, **usability and norms of a test**
- ❖ Essay type, short answer and objective type tests, their merits and demerits
- ❖ Concept of formative, summative and diagnostic test
- ❖ Construction of achievement test
- ❖ Diagnostic testing and **remedial teaching**

### **PEDAGOGY OF COMPUTER SCIENCE (E 208)**

#### **CO: COURSE OUTCOMES**

- CO1-** Develop a broad understanding of the principles and procedures used in computer science education.
- CO2-** Develop their skills necessary for preparing international accessories
- CO3-** Know the methods of planning instruction for the classroom
- CO4-** Learn successfully various methods of teaching computer science and use them judiciously.
- CO5-** Manage introduction activity in such a way that the vast majority of the learner attains most of the objectives

#### **Course Contents**

##### **Unit - I: Historical Perspectives, Aims and Objectives of Computer Science**

- ❖ Historical development of computer (hardware and software)
- ❖ Present status of computer science as a school subject.
- ❖ Significance of teaching computer science at secondary/senior secondary schools
- ❖ Aims and objectives of teaching computer science-
- ❖ Classification of educational objectives (Bloom's taxonomy)
- ❖ **Statement of specific objectives in behavioral terms**

##### **Unit - II: Development of Curriculum in Computer Science**

- ❖ Principles and rationale of curriculum development, organizing the syllabi both logically and psychologically according to the age groups of children.
- ❖ Organization of Computer Science Laboratory.
- ❖ Text book of Computer Science - qualities of a good text book of Computer Science.

##### **Unit - III: Methods of Teaching Computer Science**

- ❖ Lecture method, demonstration-cum-discussion method, personalized instruction method
- ❖ CAI technique, Hands on experience, Video Technology, Power Point Presentation, Software, **Webinars** etc.

- ❖ Co-operative learning approach, **systems approach**, multimedia approach
- ❖ Micro teaching Skills-Introduction, **Reinforcement**, Probing Question, Stimulusvariation, Explaining, Blackboard-Writing etc.

#### **Unit - IV: Unit Planning, Lesson Planning and Teaching Aids**

- ❖ Meaning and definition of unit plan and lesson plan
- ❖ Importance and steps of planning a lesson.
- ❖ Need, Importance, preparation and using of teaching aids in computer science
- ❖ Organization of computer laboratory

#### **Unit - V: Basic Processes in Computer Science**

- ❖ Basic programming
- ❖ Data representation
- ❖ Computer organization
- ❖ Operating environment
- ❖ **Computer network**

#### **Unit - VI: Evaluation in Computer Science**

- ❖ Meaning and importance of evaluation.
- ❖ Comprehensive and continuous evaluation (CCE) in computer science
- ❖ Development of test items objective type, short answer type, essay type
- ❖ Preparation of an achievement test
- ❖ Analysis and interpretation of test results
- ❖ **Diagnostic testing and remedial teaching**

### **PEDAGOGY OF HOME SCIENCE (E 209)**

#### **CO: COURSE OUTCOMES**

**CO1-** Understand the nature and scope of Home Science

**CO2-** Acquaint with the objectives of teaching Home Science in secondary and higher secondary schools.

**CO3-** Acquire skills in planning a lesson with reference to methods and instructional materials and processing it effectively.

**CO4-** Understand the various methods and techniques that can be employed in the teaching of Home Science.

**CO5-** Develop a practical understanding of the technology of teaching Home Science and giving them practice in the use of various aids relating to the technology of teaching.

#### **Course Contents**

##### **Unit - I: Concepts**

- ❖ The concept of home science: meaning and components; place of home science in secondary education
- ❖ Job opportunities in home science

- ❖ Aims and objectives of teaching of home Science
- ❖ Correlation of home science with other school subjects

## Unit II : Pedagogical Analysis

- ❖ Foods, nutrition and health
- ❖ Child care
- ❖ Fiber and fabric
- ❖ Home management-importance of planning, principles of budget making
- ❖ Hygiene and sanitation

## Unit III: Methods of Teaching

- ❖ Method of teaching as applied to home science
  - Teacher centered methods-lecture, demonstration
  - Child centered method-laboratory, project, assignment, discussion
- ❖ Micro-teaching skills-Introduction, Explaining, Probing Questioning, Illustration, Stimulus variation, Blackboard writing, etc.
- ❖ Use of ICT in teaching-learning process of home science with computer-aided methods like- Power Point, Multimedia, Simulation, Software, Webinars etc.

## Unit IV: Equipments of Teaching

- ❖ Development and designing of curriculum
- ❖ Teaching aids-classification and importance
- ❖ Concept of Unit and lesson plan, preparation of unit and lesson plan
- ❖ Development of text books
- ❖ Planning of space and equipment for home science laboratory

## Unit V: Evaluation

- ❖ Evaluation in home science-meaning and importance of evaluation
- ❖ Characteristics of a good evaluation device
- ❖ Comprehensive and continuous evaluation
- ❖ Evaluation devices-written, oral, observation, practical work, assignment
- ❖ Diagnostic testing and remedial teaching

## PEDAGOGY OF COMMERCE (E-210)

### CO: COURSE OUTCOMES

**CO1-** Acquire knowledge of the terms and concepts used in the pedagogical analysis of Commerce and Accountancy

**CO2-** Understand lesson planning and evaluation aspects in teaching Commerce and Accountancy

**CO3-** Apply the knowledge in analyzing higher secondary Commerce and Accountancy contents in terms of the techniques and aids for the purpose of teaching Commerce and Accountancy

**CO4-** Develop skills in the preparation of lesson plan and construction of evaluation tools using the suitable techniques

**CO5-** Develop interests in learning recent developments in Commerce and Accountancy

**CO6-** Develop a desirable positive attitude towards the teaching of Commerce and Accountancy.

## Course Contents

### Unit I: Concept, Aims and Objectives of Commerce Teaching

- ❖ Meaning and scope of commerce as a subject, **place of commerce in Indian school**
- ❖ Meaning of Commerce education and historical development of commerce education in India
- ❖ Aims of commerce education
- ❖ Objectives of commerce education at High school and Intermediate levels (vocational & academic)
- ❖ Instructional objectives - meaning, importance and specification of instructional objectives in behavioural terms (with respect to Bloom's Taxonomy)

### Unit II: Methods of Commerce Teaching

- ❖ Lecture and discussion methods, Project method, Problem solving method, Approaches of book-keeping teaching (journal approach, ledger approach, cash-book & equation approach) Plans of commercial practice teaching (**rotation**, office model, **battery and co-operative plan**).
- ❖ Micro teaching Skills-Introduction, Reinforcement, Probing Question, Stimulus variation, Explaining, Blackboard-Writing, etc.
- ❖ Use of ICT in teaching-learning process of commerce with computer-aided methods like-Power Point, Simulation, Software, Webinars etc.

### Unit III: Techniques and Teaching Aids

- ❖ Techniques of commerce teaching-questioning and demonstration
- ❖ Text book of commerce teaching
- ❖ Commerce room
- ❖ Teaching aids in commerce
- ❖ **Co-curricular activities in commerce**

### Unit IV: Curriculum, Correlation with other Subjects, Commerce Teacher and Lesson Planning

- ❖ Curriculum in commerce (i) principles of curriculum construction (ii) critical evaluation of High School syllabus
- ❖ Correlation of commerce with other subjects (i) need and importance (ii) correlation with math, geography and economics
- ❖ Commerce teaching (i) profile of a good commerce teacher (ii) professional growth of a commerce teacher
- ❖ Lesson Planning-meaning, need, **importance and types**
- ❖ Unit and resource planning

### Unit V: Evaluation in Commerce

- ❖ Concept, scope and importance of evaluation
- ❖ Tools and techniques of evaluation and **characteristics of a good test**
- ❖ Construction and administration of an achievement test
- ❖ Diagnostic testing and remedial teaching

## (Teaching Skills) Practical Work

### EF 2(A): Preparation to Function as a Teacher (E-701)

During the first year, the teacher-preparation programme will offer the training amounting to a maximum of 8 weeks. This will include:

- ❖ **Two week workshop on Lesson-Planning** based on constructivist approach (Covering different aspects like theory of lesson-planning, questioning, Defective Questions, Developing Question, How to put Question, How to receive Answers, Discipline, Role of Eye-control, etc.).
- ❖ **Two week workshop on 'Micro-Teaching'** (at least 5 teaching skills will be mastered in each Pedagogy course like-Introduction, Reinforcement, Probing Question, Stimulus Variation, Explaining etc. ).
- ❖ **Two week Practice-Teaching in Simulated condition** in each Pedagogy course. During this phase every student-teacher will **teach at least 6 lessons**. These lessons will be observed by subject-supervisors
- ❖ **Two week Practice-Teaching in Real-Class room situation in a school**. For it, the student-teachers will be attached to a particular school as 'School Attachment', where they will deliver their lessons. During this phase every student-teacher will **teach at least 20 lessons**. These lessons will be observed by peers as well as by subject-supervisors daily, which will provide them feedback for the modification of their behavior.

This shorter period is to provide the student-teachers adequate exposure to have a 'feel' of dealing with teaching-learning. It will help him/her to develop the basic teaching skill required to deal with students effectively in classroom.

**(E-702 & 704)**

**Viva- Voce Examination based**

**On**

**Task and Assignments that run through all the courses CC 1-7 and PC 1 to 42 EPC Activities**

### **EPC 1: Strengthening Language Proficiency**

Language is the medium for comprehending ideas, for reflection and thinking, as well as for expression and communication. Enhancing one's capacity in language proficiency is thus a vital need of student-teachers irrespective of the subject area that they are going to teach.

**Objectives: To enable student-teachers to-**

- Strengthen the ability to read correctly
- Strengthen the ability to pronunciation
- Strengthen the ability to write correctly
- Strengthen the ability to communicate correctly

### **Activities**

One or two workshops on Language proficiency course on Hindi and English of 7-10 day each may be organized. It may course the following content –

- हिन्दी भाषा (1) वर्ण-स्वर व व्यंजन ध्वनि, मात्राएं (2) शब्द – पर्यायवाची व विलोम शब्द (3) शब्द रचना-सन्धि, समास, उपसर्ग, प्रत्यय (4) रूप विचार- संज्ञा, सर्वनाम, विशेषण, क्रिया क्रियाविशेषण, आदि (5) वाक्य विचार-विराम चिन्ह, आदि (6) रचना-पत्र, प्रार्थना पत्र, निबन्ध कहानी आदि ।

English Language – (i) Alphabet-Vowel & Consonant sounds (ii) word-synonym & Antonym (iii) Word Formation (iv) Parts of Speech – Noun, Pronoun, Adjective, Verb, Adverb, etc. (v) Sentence-Punctuation & Analysis (vi) Composition-Letter, Application, Essays, Story, etc.

## **EPC 2: Art and Aesthetics**

The need to integrate arts education in the formal schooling of our students is to retain our unique cultural identity in all its diversity and richness. The National curriculum Framework (2005) reminds us that the school curriculum must integrate various domains of knowledge with a deep relationship between head, heart & hand so that the curriculum encompasses all and is not separated from the co-curricular or extra-curricular.

### **Objectives: To help student-teachers to-**

- Gain direct experiences
- Develop motor skill
- Make students believe in the dignity of labor
- To nurture children's creativity and aesthetic sensibilities.

### **Activities**

An artist may be invited to organize a workshop on Art & Aesthetics. The student-teachers may be asked to prepare at least 5-items of different categories-

- Paper meshing
- Pot Decoration
- Wall hanging
- Paper cutting
- Flower making
- Candle Making
- Stitching
- Knitting
- Embroidery
- Soft toys making
- Paper framing
- Weaving or printing of textiles
- Making of poster
- Making of Rangoli
- Making of Puppets etc.

## **EPC 3: Reading and Reflecting on Texts**

This course will serve as a foundation to enable student-teachers to read and respond to a variety of texts in different ways depending on the purposes of reading, like-personal or creative or critical or all of these.

### **Objectives: To enable student-teachers to-**

- Develop study – habits
- Develop skill of reading & writing
- Develop skill of summarization
- Develop skill of note-taking.

### **Activities**

Student-teachers are expected to sit in the library regularly and to review at least 10-books of different categories in about 500 words each. These may be as follows –

- Review of text books related to core courses
- Review of reference Book related to core courses
- Review of Text Books related to Pedagogy courses
- Review of Reference to Book related to Pedagogy courses.
- Review of Policy Documents, Autobiography, Commission Reports, etc.
- Review of studies about school, historical books and other educational miscellaneous books.

## **EPC 4: Understanding of ICT**

Preparing teachers to use technology in a classroom is an important step of ICT enabled education in the country. This course will focus on moving beyond computer literacy and ICT aided learning, to help student-teachers interpret and adapt ICTs in the teaching-learning process.

**Objectives: To enable student-teachers to-**

- ❖ Have a basic familiarity with computers
- ❖ Understand & appreciate ICT as an effective learning tool for learners
- ❖ Understand ICT as an enormous functional support to teachers.

**Activities A workshop on ICT for 10-15 days may be organized or a provision of one period/week may be made daily in the time-table to learn and to practice in computer labs. Student-teacher sare expected to learn the following:**

- ❖ Use of radio and audio media in script writing, story-telling, etc.
- ❖ Use of TV & video in education
- ❖ Use of newspaper in education
- ❖ Functional knowledge of operating computers- word processing, power point, excel, etc.
- ❖ Effective browsing of the internet for selecting relevant information.
- ❖ Downloading relevant material
- ❖ Competencies in developing software
- ❖ Developing PPT slide show for classroom use
- ❖ Use of available software or CDs with LCD projection for subject learning interactions
- ❖ Generating demonstrations using computer software.

## **EPC 5: Working with Community**

This programme gives opportunity to attach with and to solve the problems of the community to make the student-teachers sensitive and aware about the society.

**Objectives: To enable student-teachers to-**

- ❖ Develop social-sensitivity among student-teachers
- ❖ Develop sympathy with the poor and the people below-poverty-line.
- ❖ Develop awareness about the environment.
- ❖ To have the positive attitude toward the neglected class.

**Activities:**

This can be achieved by organizing a number of programme for the welfare of the community, like –

- ❖ To educate the dropouts and adults (Literate India)
- ❖ To educate the people of slum areas to take the nutritious diet. (Quit Mal-nutritious).
- ❖ To make the people learn the importance of small family norm (chota pariwar sukhi pariwar)
- ❖ To make the people learn the importance of the girls-child & its education for the Familyand the society (Beti Bachao Beti Padhao)
- ❖ To motivate the people to grow more plants (Green India)
- ❖ To motivate the people to keep the city and the public places clean (Clean India)
- ❖ To motivate the people to save river and ponds (Clean Water)

## **EPC 6: Basics of Research**

This programme will enable the student teacher to know the basic research methodology, to identify the school based research problem and to solve them scientifically. In the course

student teacher will do the research and write the report using the following points:-

- ❖ Identification of an educational problem.
- ❖ Formulation of various solutions.
- ❖ Selection of the most probable solution
- ❖ Developing a tool for data collection
- ❖ Data collection
- ❖ Data analysis
- ❖ Reporting findings

### **EPC 7: Drama and Art in Education**

Real education implies reflection, introspection and action, with a deep relationship between the Head, Heart and Hand. Drama and art helps the student teacher to understand the self and to realize it as a form of self-expression and for enhancing creativity.

Following activities can be organized under the course: (any two)

- ❖ Script writing
- ❖ Street play
- ❖ Visit to an art gallery
- ❖ Visiting/Organizing exhibitions
- ❖ Visiting/Organizing cultural fests
- ❖ Report on the folk life
- ❖ Interview with experts from the field like artists, actors, singers, writers, poets, painters, musicians, dancer, etc
- ❖ Appreciation of a film/drama/novel/folk drama, etc.
- ❖ Use of Music/ Arts in Education

### **EPC 8: Entrepreneurship Development**

Education system plays a critical role in the economic advancement of nation, since it is the primary developer of human resource. Entrepreneurship education and training is about the development of professional skills and qualities of the student teachers so that they can gain knowledge and understand the ways in which the economy works. This evolves approaches to the development of creativity, problem solving, decision making, team working, leadership and other individual skills. It also identifies the role of the entrepreneur in the society and various requirements of self-employment.

**Following activities shall be organized under the course: (any one)**

**Field work:-**

- ❖ Educational Market Survey for needs analysis
- ❖ Interview of Educational Book Publisher/Entrepreneurs
- ❖ Visit to Vocational Institute
- ❖ Survey of the usability of an existing /self-developed educational product
- ❖ Write an essay on „Entrepreneurship“

**B.Ed. II Year Syllabus**  
**Core Course (CC-5)**

**CREATING AN INCLUSIVE SCHOOL (E-301)**

**CO: COURSE OUTCOMES**

**CO1-** Understand inclusive education- concept and nature.

**CO2-** Understand the global and national commitments towards the education of children with diverse needs

**CO3-** Prepare conducive teaching learning environment in inclusive schools.

**CO4-** Identify and utilize existing resources for promoting inclusive practice

**Course Contents**

**Unit - I: Introduction to Inclusive Education**

- ❖ Definition, concept needs and importance of inclusive education
- ❖ Historical perspectives on education of children with diverse needs
- ❖ Difference between special education, integrated education and inclusive education
- ❖ Policies and legislations for inclusive education and rehabilitation, **government scheme and provisions**

**Unit - II: Children with Diverse Needs**

- ❖ Definition and characteristics of children with diverse needs
- ❖ Sensory (hearing, visual and physically challenged)
- ❖ Intellectual (gifted, talented and mentally challenged)
- ❖ Developmental disabilities (autism, cerebral palsy, learning disabilities)
- ❖ Social and emotional problems
- ❖ Scholastic backwardness, under achievement, slow learners
- ❖ Children with special health problems
- ❖ Environmental / ecological difficulties
- ❖ Children belonging to other marginal groups
- ❖ **Role of teachers for meeting the diverse needs of learners**

**Unit - III: Inclusive Education and its Practices**

- ❖ Inclusive instructional design and collaborative instruction for inclusion.
- ❖ Differentiating instruction – peer tutoring and peer mediated instruction and interventions, co-operative learning and co-operative teaching assignments, self- regulated learning
- ❖ Inclusive instruction strategies at school level- remedial help, team teaching, co-teaching, student assistance teams, buddy system, circle of friends, **Parent involvement**
- ❖ E-learning, **web based learning** and inclusive education

**Unit - IV: Inclusive Schools**

- ❖ Infrastructural facilities for an inclusive school
- ❖ An ideal inclusive school
- ❖ Role of inclusive school in modern times.
- ❖ Inclusive classroom managements

**Unit - V: Teachers Role in Inclusive Education**

- ❖ Qualities of an inclusive teacher
- ❖ Teachers role in shaping inclusive class room
- ❖ Inclusive teacher educator in facilitating inclusive education
- ❖ Guidance and counseling for inclusive teachers, students and principals
- ❖ **Training programme for inclusive teachers**

### **Suggested Readings:**

- Baquer, A. & Sharma, A. (1997) .Disability: Challenges Vs. responses, Can Pub.
- Bartlett, L. D., Weisentein, G.R. (2003) Successful inclusion for educational leaders, Prentice Hall, New Jersey.
- Bhargava, M. (1994), Introduction to exceptional Children, Sterling Publishers.
- Dessent, T. (1987). Making ordinary school special. Jessica Kingsley Pub.
- Gargiulo, R. M. (1997). Special education in contemporary society: an introduction to exceptionality, Wadsworth, Belmont

## **Core Course (CC-6)**

### **GENDER, SCHOOL AND SOCIETY (E-302)**

#### **CO: COURSE OUTCOMES**

**CO1-** Sensitize the future teachers towards basic understanding of various key concepts of gender studies.

**CO2-** Learn about gender issues in school, curriculum and textual materials across disciplines, pedagogical process and its interaction with class, caste, religion and region.

**CO3-** Help them understand the contribution of women in social, economic & political development of the society.

**CO4-** Apply the conceptual tools learn regarding gender & sexuality to understand issues related to sexual harassment at the workplace and child sexual abuse.

#### **Course Contents**

#### **UNIT - I: Gender Issues: Key Concepts**

- ❖ Gender, sex, sexuality, patriarchy, masculinity and feminism – in cross cultural perspectives
- ❖ Gender bias, gender stereotyping and empowerment
- ❖ Equity and equality in relation with caste, class, religion, ethnicity, **disability and region**

#### **UNIT - II: Gender Inequality in the Schools**

- ❖ In the structure of knowledge.
- ❖ In the development of curriculum, gender and hidden curriculum.
- ❖ Gender in text and context (text books inter-sectionality with other disciplines, classroom processes including pedagogy)
- ❖ In the class room
- ❖ In the management of school
- ❖ **Teachers as agent of change**

#### **UNIT - III: Women in Indian Society**

- ❖ Situational analysis of women in India society (focus on sex ratio pattern, education, health, work participation violence against women)
- ❖ Women's access to and participation in formal and non-formal education (gender bias in enrolment, curriculum content, dropouts)

- ❖ Participation of women in planning and decision making
- ❖ Human right and **empowerment of women**

#### **UNIT - IV: Theories on Gender and Education: In Indian Context**

- ❖ Socialization theory
- ❖ Gender difference theory
- ❖ Structural theory
- ❖ Deconstructive theory

#### **UNIT - V: Gender, Sexuality, Sexual Harassment and Abuse**

- ❖ Linkage and differences between reproductive rights and sexual rights.
- ❖ Development of sexuality, including primary influences in the lives of children (such as gender, body image, role models)
- ❖ Sites of conflict : social and **emotional**
- ❖ Understanding the importance of addressing sexual harassment in family, neighborhood **and other formal and informal institutions.**
- ❖ Agencies perpetuating violence : family, school, **work place and media (print and electronic)**
- ❖ Institutions redressing sexual harassment and abuse.

#### **Suggested Readings:**

- Ambasht, et al (1971). Developmental Needs of Tribal People, NCERT
- Bhattacharjee, Nandini (1999). Through the looking-glass: Gender Socialisation in a Primary School in T. S. Saraswathi (ed.) Culture, Socialization and Human
- Development: Theory, Research and Applications in India. Sage: New Delhi.
- Frostig, M, and Maslow, P. (1973). Learning Problems in the Classroom: Prevention and Remediation. Grune & Stratton: New York.
- Geetha, V . (2007). Gender. Stree: Calcutta.
- Ghai, A. (2005). Inclusive education: A myth or reality In Rajni Kumar, Anil Sethi

### **Core Course (CC-7)**

## **KNOWLEDGE, LANGUAGE & CURRICULUM (E-303)**

#### **CO: COURSE OUTCOMES**

**CO1-** To examine the Epistemological basic of education

**CO2-** To understand the concept and principles of curriculum development

**CO3-** To understand the formulation of new curriculum

**CO4-** To develop the ability to read & comprehend

**CO5-** To develop writing skill

#### **Course Contents**

#### **Unit – I: Knowledge**

- ❖ Epistemology – meaning, philosophical basic of knowledge according to Indian and Western philosophy
- ❖ Knowledge – nature and sources, validity of knowledge

- ❖ Differences between knowledge and skill, teaching and training, knowledge and information, reason and belief
- ❖ Chronological review on knowledge generation, myth based faith and logical based knowledge, various structures of society and **knowledge patterns and their relationship**

### **Unit - II: Language and Reading Comprehension**

- ❖ Need and importance
- ❖ Types of reading : skimming and scanning
- ❖ Strategies for effective reading, mechanism for reading, loud reading, **silent reading**
- ❖ Schema theory of reading

### **Unit - III: Developing Writing skills**

- ❖ Need and importance
- ❖ Making reading writing connection
- ❖ Process and strategies of writing for children, mechanism of writing, **note making**, summarizing
- ❖ **Analyzing children's writing**

### **Unit - IV: Curriculum and Development**

- ❖ Meaning and concept of curriculum syllabus and units
- ❖ Curriculum development – meaning, concept stages in the process of curriculum development
- ❖ Fusion Intervention & Inter-subject co-relation

### **Unit - V: Determinants of Curriculum**

- ❖ Philosophical Foundation of curriculum development in view of different schools of philosophy
- ❖ Social and political forces, cultures and cultural roots of curriculum, sociology of curriculum
- ❖ Model of curriculum development : Hilda Taba's Model
- ❖ Core curriculum, activity curriculum, **interdisciplinary curriculum**

#### **Suggested Readings:**

- Apple, Michael W. (1979). Ideology and Curriculum; Routledge and K. Paul.
- Connelly, F. Michael (Editor) (2008); The Sage Handbook of Curriculum and Instruction; Sage Publications India Pvt. Ltd.; New Delhi.
- Muijs, Daniel and Reynolds, David (2005) Effective Teaching: Evidence and practice Second Edition; Sage Publication; London.
- Mukunda, Kamala V. (2009) What Did You Ask At School Today: A Handbook of Child Learning; Harper Collins Publishers; NOIDA
- National Curriculum Framework for School Education (2005); NCERT; New Delhi;

### **PC 3: ASSESSMENT FOR LEARNING (E-401)**

#### **CO: COURSE OUTCOMES**

**CO1-** Become cognizant of key concepts such as measurement & evaluation, assessment, test examination, formative & summative evaluation etc

**CO2-** Be exposed to different kinds of assessment that aid student learning.

**CO3-** Have an idea of new trends in evaluation.

**CO4-** Learn the different characteristics of standardized test-Reliability, validity, Norms, etc.

**CO5-** Relate & use statistics in educational setting

### Course Structure

#### Unit - I: Assessment and Evaluation

- ❖ Concept of measurement and evaluation, test assessment, examination, formative & summative evaluation, open book examination, grading, cumulative grade point average (CGPA), **choice-based credit system (CBCS)**
- ❖ Purposes of assessment in a 'constructivist' paradigm, distinction between Assessment for Learning & 'Assessment of Learning'
- ❖ **Feedback for furthering learning, progress and profile of learner**

#### Unit - II: Assessment tools

- ❖ Quantitative and qualitative Tools.
- ❖ Constructing an achievement test- blue-print, **item-analysis, try out**
- ❖ Standardization of test – objectivity, reliability validity, **norms**

#### Unit - III: Techniques of Test Conduct

- ❖ Importance of establishment of rapport with the students
- ❖ Security of tests and testing material
- ❖ Arranging the seat and distribution of question for minimum pillage and copying
- ❖ Technique of avoiding guessing in answering objective questions
- ❖ Introducing flexibility in examination
- ❖ **Improving quality and range of questions including school-based credits**
- ❖ **Role of ICT in Examination**

#### Unit - IV: Data and Measures of Central tendency

- ❖ Data: meaning and types, frequency distribution, graphic representation, percentage
- ❖ Central Tendency – Mean, Median, Mode.

#### Unit - V: Measures of Variability and Correlation

- ❖ Range, quartile deviation, mean deviation, standard deviation, percentile
- ❖ Rank- order method, **Pearson's correlation**

#### Unit - VI: Normal Probability Curve

- ❖ Meaning, characteristics and use of NPC

#### Suggested Readings:

- Cohen, Louis; Manion, Lawrence and Morrison, Keith(2004); A Guide to Teaching Practice- Fifth Edition; Routledge Falmer-Taylor and Francis Group; London.
- Ebel Robert L., (1991). Essentials of Educational Measurement, Prentice Hall of India.
- Gunter, Mary Alice et.al(2007)., Instruction: A Model's Approach- Fifth Edition; Pearson Education Inc.; Boston.
- Kubiszyn Tom. (2003). Educational Testing and Measurement, John Wiley.
- Linn, Robert L. and Gronlund, Norman E. (2000). Measurement and Assessment in Teaching; Pearson Education Inc.

**PC 4: (OPTIONAL COURSE-ANY ONE)**

**EDUCATIONAL ADMINISTRATION AND MANAGEMENT**

**(E-501)**

**CO: COURSE OUTCOMES**

**CO1-** Acquaint the student teaches with the concept and concerns of educational administration.

**CO2-** Develop an understanding of the role of the headmaster and the teacher in school management.

**CO3-** Enable the students to understand to concept at importance of communication and its possible barriers in educational administration.

**CO4-** Enable the student teacher to critically analyse the administrative scenario in relation to the functioning of the other secondary schools of the area.

**CO5-** Acquaint the student teacher with the scientific practices of educational management and keep him to apply it in work situation

**Course Contents**

**Unit - I: Concept of Educational Administration**

- ❖ Concept of educational management human beings as inputs, process and product inputs
- ❖ Nature, objectives and scope of educational administration

**Unit - II: Basic Functions of Administration**

- ❖ Planning, organizing, directing and controlling
- ❖ Maintenance of discipline, control management
- ❖ Co-ordination and growth development
- ❖ Supervision and inspection, defects in the present supervision and inspection.
- ❖ Scope of educational supervision, types of supervision, providing guidance, leadership function, crisis in management, decision making

**Unit - III: Communication in Educational Administration**

- ❖ Role of communication in effective management and administration
- ❖ Methods of communication
- ❖ Barriers of communication in educational administration
- ❖ Overcoming barriers to communication and effective communication in educational administration

**Unit - IV: Management of Schools**

- ❖ Role of headmaster in planning of school activities approaches to management- manpower approach, cost benefit approach, social demand approach, and social justice approach
- ❖ Involvement of other functionaries and agencies in the preparation of a plan
- ❖ Delegation of authority and accountability
- ❖ Role of the headmaster in monitoring, supervision and evaluation
- ❖ Role of headmaster in motivating the staff, in resolution of interpersonal conflicts
- ❖ Role of the headmaster in creating resources and managing financial matters
- ❖ Optimum use of available resources for growth and development of the school
- ❖ Staff development programmes.
- ❖ Role of teachers in school management and administration

**Unit - V: Educational Administration in the State**

- ❖ The administrative structure in the field of education in the state
- ❖ Control of school education in the stage a critical analysis

- ❖ Functions of the state government in relation to secondary and higher secondary schools
- ❖ Functions of the board of secondary education in controlling secondary schools
- ❖ Problems of secondary school administration in government schools

## **GUIDANCE AND COUNSELLING (E-502)**

### **CO: COURSE OUTCOMES**

**CO1-** Develop an understanding of the need and importance of career information for the pupils.

**CO2-** Identify their role and function in locating, collecting, evaluating and disseminating career information for the use of pupils.

**CO3-** Develop an understanding of how one's ability, interests and aptitudes are related to world of work.

**CO4-** Know about the importance of developing the right attitude and values at every stage of education.

### **Course Contents**

#### **Unit - I: Meaning and concept of Guidance**

- ❖ Concepts, need and importance of guidance
- ❖ Principles of guidance, procedure of guidance (steps)
- ❖ Types-educational, vocational and personal
- ❖ Counselling-need functions and types
- ❖ Observation, interview and sociometry as techniques of guidance

#### **Unit - II: Meaning and concept Counseling**

- ❖ Concepts, need and importance of counseling
- ❖ Principles of counseling, counseling process and role
- ❖ Directive, non-directive and elective counseling
- ❖ Lectures, discussions and dramatic as techniques of counseling

#### **Unit - III: Meaning and concept Career Information**

- ❖ Meaning of career and career information components of career information.
- ❖ Occupational information, information about education and opportunity and personal-social information.
- ❖ Aims to study career information at different levels
- ❖ Career information: sources, method of collection, classification and filling-up of information and evaluation of the information

#### **Unit - IV: Career Information and Training**

- ❖ Information about education and training opportunities of primary, elementary and secondary levels of school

#### **Unit - V: Career Information and School**

- ❖ Personal-social information at every school level

## ENVIRONMENTAL EDUCATION (E-503)

### CO: COURSE OUTCOMES

**CO1-** Enable the student teacher understands about the concept of environmental education.

**CO2-** Develop in the student teacher a sense of awareness about the environmental pollution, and possible hazards and its causes and remedies.

**CO3-** Develop a sense of responsibility towards conservation of environment, bio-diversity and sustainable development.

**CO4-** Develop reasonable understanding about the role of school and education in fostering the idea and learning to live in harmony with nature

**CO5-** Enable the students to understand about the various measures available to conserve the environment for sustaining the development.

### Course Contents

#### Unit - I: Basic Concept and Nature of Environment

- ❖ Meaning, scope and nature of environment, natural and man-made environment
- ❖ Ecosystem-structure, function and components.
- ❖ Energy flow in ecosystem-food chains, food webs and ecological pyramids.
- ❖ Introduction and characteristic feature of-forest, grass land, desert and aquatic ecosystem.

#### Unit - II: Natural Resources and Associated Problems

- ❖ Forest resources – use and overexploitation. Deforestation-cause, effects and remedy
- ❖ Water resources- use and overexploitation of surface and ground water, rain water harvesting and watershed management.
- ❖ Mineral resources-use, exploitation and conservation, effect of mining on man and environment
- ❖ Food resources- world food problems-changes caused by agriculture and overgrazing, effect of modern agriculture, fertilizers, pesticides, water logging and salinity.
- ❖ Energy resources- growing energy need renewable and non-renewable energy sources, conservation and alternate energy sources

#### Unit - III: Biodiversity and its conservation

- ❖ Meaning and values of biodiversity, India as a mega diversity nation
- ❖ Threats to biodiversity-habitat loss, poaching of wild life, man wildlife conflicts
- ❖ Conservation of genetic diversity, an important environment priority: learning to live in harmony with nature

#### Unit - IV: Environment Issues and Its Preventive Measures

- ❖ Causes and effects of environmental hazard, global and local environmental pollution and its remedies, Air, Water, Soil, Marine, Noise, Thermal and Nuclear Pollution
- ❖ Climate change- Global Warming, Acid Rain, Ozone layer depletion, Polar Melting.
- ❖ Natural disasters-Flood, Earthquake, Cyclone and Landslides.

#### Unit - V: Environment Management

- ❖ Salient features of environmental awareness through education, programmes of environmental education for secondary school children
- ❖ Programmes of environmental education for attitude changes among the children
- ❖ Environmental ethics and values
- ❖ Environmental acts, rule and regulations
- ❖ National efforts-Ministry of Forest and Environment, government plans, action and policies
- ❖ Role of school in environmental conservation and sustainable development

## COMPUTER EDUCATION (E-504)

### CO: COURSE OUTCOMES

**CO1-** Acquire knowledge of computers, its accessories and software

**CO2-** Understand features of MS Office and their operations

**CO3-** Apply the knowledge gained in respect of to process various data of students as well as simple library financial transaction of the school.

**CO4-** Appreciate the value of CAI/CML packages on optional subjects and use them in class room instruction.

**CO5-** Acquire skill in accessing World Wide Web and Internet and global accessing of information. integrate technology in to classroom teaching learning strategies

### Course Contents

#### Unit I: Meaning, Definition and Historical Perspectives of Computer

- ❖ Meaning and definition of computer
- ❖ Historical perspective
- ❖ Computer generations and its classification
- ❖ Block diagram of a computer Peripherals, and working of a computer

#### Unit II: Computer Hardware

- ❖ Input devices: keyboard, mouse, joystick, touch screen, touch pad, magnetic ink character reader, optical mark reader, bar code reader, scanner, web camera etc.
- ❖ Output devices: monitor printers (line, serial, dot matrix, inkjet, and laser).
- ❖ Primary storage devices: RAM ROM and its types.
- ❖ Secondary storage devices: FDD, HDD, CD, DVD, Pen Drive (USB)

#### Unit III: Binary Arithmetic and Data Representations:

- ❖ Decimal and binary number system
- ❖ Representation of characters
- ❖ Integers and fractions in computers
- ❖ Films point representation and floating point representation

#### Unit IV: Computer Programmes

- ❖ MS-WINDOWS
- ❖ MS-WORD
- ❖ SPREADSHEET
- ❖ POWER POINT
- ❖ INTERNET

#### Unit V: Computers in Education

- Computer application in educational institutions-
  - o Co-curricular activities
    - ⌋ Academic activities
    - ⌋ Administrative activities
  - o Examination work
  - o Research activities
  - o Library
  - o Class room teaching

## HEALTH, PHYSICAL EDUCATION & YOG (E-505)

### CO: COURSE OUTCOMES

**CO1-** Understand the concept of wholistic health and its various dimension and determinants of health.

**CO2-** Acquaint them to school health programme & its importance.

**CO3-** Sensitize the student teacher towards physical fitness & its importance.

**CO4-** Acquire the skills for assessment of physical fitness.

**CO5-** Introduce them to the philosophical bases of Yoga.

**CO6-** Understand the process of stress management through Yoga education.

### Course Contents

#### Unit - I: Health

- ❖ Introduction, definition and meaning of health
- ❖ Dimension of health
- ❖ Determinants of health
- ❖ Importance of balance diet
- ❖ School health programme and role of teacher in development of health

#### Unit - II: Physical Education

- ❖ Introduction, definition and meaning of physical education
- ❖ Objectives of physical education.
- ❖ Scope of physical education and allied areas in physical education
- ❖ Need and importance of physical education in different level of school

#### Unit - III: Physical Fitness

- ❖ Definition, meaning type and factors of physical fitness
- ❖ Factors affecting physical fitness
- ❖ Benefits of physical fitness
- ❖ Importance of physical activities at school level
- ❖ Assessment of physical fitness

#### Unit - IV: Concept of Yoga and Ashtang Yoga

- ❖ Yoga meaning concept and importance
- ❖ Mis-concept of yoga
- ❖ Eight disciplines of Yog-Ashtang Yoga
- ❖ Precautions to keep in mind while performing Yogasan
- ❖ Different types of Yogassans & their techniques of practicing

#### Unit - V: Meditation, Pranayam and Stress Management

- ❖ Pranayam: meaning, nature and relationship with mind
- ❖ Different types of Pranayam; kapalbhati; Bhastrika Pranayam, Surya Bhedan Pranayam, Chandrabhedan Pranayam, Anulomvilom Pranayam
- ❖ Meditation: nature, procedure and importance
- ❖ Stress: meaning, reasons, role of Yog in stress management

## LIFE STYLE MANAGEMENT (E-506)

### CO: COURSE OUTCOMES

**CO1-** Understand the theoretical foundations of Life Skills Education

**CO2-** Apply Life Skills in various spheres.

**CO3-** Ability to contribute as youth workers specialized in the area of Life Skills Education.

**CO4-** Develop the spirit of social responsibility in students.

**CO5-** Develop social and emotional well-being in students.

### Course Contents

#### Unit - I: Introduction

- ❖ Life Skills: Concept, need and importance of Life Skills for human beings.
- ❖ Life Skills Education: Concept, need and importance of Life Skills Education for teachers.
- ❖ Difference between Livelihood Skills and Life Skills.
- ❖ Core Life Skills prescribed by World Health Organization.
- ❖ Key Issues and Concerns of Adolescent students in emerging Indian context.

#### Unit - II: Process and Methods Enhancing the Life Skills

- ❖ Classroom Discussions
- ❖ Brainstorming and Role plays
- ❖ Demonstration and Guided Practice
- ❖ Audio and Visual activities, e.g. Arts, Music, Theatre, Dance
- ❖ Small Groups discussions followed by a presentation of group reports.
- ❖ Educational Games and Simulation
- ❖ Case Studies, Storytelling, Debates
- ❖ Decision making and mapping of using problem trees.

#### Unit - III: Core Life Skills (I)

- ❖ Skills of Self-awareness and Empathy: Concept, Importance for Teachers in particular, Integration with the teaching learning process, learning to live together with other living beings. acceptance of diversity in perspectives of different societies and cultures. Acceptance and importance of all living being as along ecological and psychological social structures.
- ❖ Skills of Coping with Stress and Emotion: Concept, importance for Teachers in particular and Integration with the teaching learning process.

#### Unit - IV: Core Life Skills (II)

- ❖ Skills of Critical thinking and Creative thinking: Concept, importance for Educationists, Integration with the teaching learning process.
- ❖ Skills of Problem Solving and Decision making: Concept, importance for Educationists, Integration within the teaching -learning process.

#### Unit – V: Core Life Skills (III)

- ❖ Skill of Effective Communication: Concept, importance for Human beings and Educationists, Integration within the teaching learning process.
- ❖ Skills of Building Interpersonal relationships: Concept, Importance for Teachers in particular and Integration with the teaching- learning process.

## PEACE EDUCATION (E-507)

### CO: COURSE OUTCOMES

**CO1-** To understand the concept of Peace Education

**CO2-** To understand the importance of peace education in personality development

**CO3-** Apply the culture of peace needed to achieve and sustain a global culture of peace and values.

**CO4-** Develop develop personal initiative and resources for the pursuit and promotion of peace by inculcating change to culture of peace

**CO5-** To analyze the need for Peace Education to foster National and International understanding.

**CO5-** To aware of the scale and variety of conflicts affecting contemporary life and learn

### Course Contents

#### Unit – I: Peace Education: Concept and Scope

- ❖ Meaning of Peace: Umbrella term of all positive values to build a positive personality
- ❖ Meaning, Nature and Concepts of Peace Education
- ❖ Aims and Objectives of Peace Education
- ❖ Status of peace education in the curriculum and its relevance in present global scenario
- ❖ Different sources of peace: Philosophical, Religious, Social, Secular and Psychological.
- ❖ Classification of Peace: Individual and social; positive and negative peace
- ❖ Method of Peace in Mind: Learning Positive Lessons from Negative Experiences
- ❖ Peace as a concomitant result of Human values.

#### Unit – II: Integrating Peace Education in the Present Curriculum

- ❖ Integrating Peace Education in Curriculum: Subject context, subject perspectives, Teaching Methods, Co- curricular activities, Staff development, class- room management, School Management
- ❖ Practical steps to build Culture of Peace in schools: Simulations Classroom Discussions, Book Clubs, Experience-Sharing Sessions
- ❖ Developing Attitude of Culture of Peace and Peace-Making: Mutual Respect, Tolerance, Patience, Seeking Spirit and Realistic, Objective Thinking through Accountability
- ❖ Educating for a Culture of Peace: Learning mutual respect, dutyconsciousness, leadership skills through unilateral ethics, introspection and mutual learning through duty-consciousness.

#### Unit – III: Violence for Peace and conflict Resolution

- ❖ Peace, Violence and conflict: conflict and violence—in life, media—a normal part of life; importance of not considering it a crisis but managing them to maintain peace
- ❖ Conflict Management: Maintaining Normalcy in Conflict; Managing Conflicts through dialogue and discussion, cooperation; peace education in managing conflicts in family and student life
- ❖ Non-Violent Activism: Speech, Behaviour and Action with others based on non-violence

takes the justification of acting violently away from others; role of peace education in learning nonviolence

- ❖ Peace Education: Agencies Role of community, school and family in the development of values for Peaceful Co-existence

#### **Unit – IV: Global Issues and Peace Movements**

- ❖ Human Rights as a Duty: Learning to give human rights to others.
- ❖ Preservation of Ecology, population control, Economic Exploration: Limited Use as Duty-Conscious citizen; not indiscriminate use as rights-conscious citizens.
- ❖ Challenge Not Deprivation: Problems of life are challenges not situations of deprivation
- ❖ Role of World Organizations in Promoting Peace Education: Case Study of UNESCO's Culture of Peace Program in global scenarios and suggestions

### **VALUE EDUCATION (E-508)**

#### **CO: COURSE OUTCOMES**

**CO1-** To understand the need and importance of value-education for Human Rights as a duty

**CO2-** Analyze the nature of values, moral values, moral education as a duty based as they are on the golden rule of religious education

**CO3-** Ability to make the student teachers with the basis of duty-conscious ethics and morality based on a rational understanding

**CO4-** Develop the golden rule of religious education and its related moral training

**CO5-** Draw lessons from principles of life and converting them into moral learning towards moral education.

#### **Course Contents**

##### **Unit - I: Value Education in a Pluralistic World (Multi-Cultural, Multi-Religious and MultiEthnic)**

- ❖ Value Education Concept, Nature, Source & Perspectives (Rational, Philosophical, Socio-Cultural, Religious and Psychological).
- ❖ Fundamental Human values-Truth, Peace, Non-violence, Righteous Conduct.
- ❖ Connected Terminology: Realism, Accountability, Duty, Virtue, Dharma, Ethics, Religion, Morality, Values,
- ❖ Typologies: Intrinsic and Extrinsic Values.
- ❖ Duty Approach to Ethics: Deontology, Justice as a Duty
- ❖ Learning through Examples:
- ❖ Indian Pluralism: Mutual Respect, Tolerance and Dialogue in Islam, Buddhism, Christianity, Jainism, Sikhism and Hinduism.
- ❖ Greco-Roman and Chinese Cultural values: Open-Mindedness, Free thinking, Cooperation, etc.
- ❖ Secular Values: Facing Challenges Positively through examples of Super-Achievers (life history and quotes)
- ❖ Commonalities of all religious at Philosophical levels.

- ❖ Diversities of religion at politics of religion

### **Unit - II: Development of the Individual**

- ❖ Personality Development and Character building education: through unilateral ethics
- ❖ Development of right attitude, aptitudes and interest: through higher thinking, contemplation and patience
- ❖ Yoga, meditation and self-control; introspection on one's strengths and weakness, wrong speech, habits and actions.
- ❖ Positive approach to life – in words and deeds: through positive thinking and positive living
- ❖ Self-discipline Leading to Duty-Consciousness: Politeness, Punctuality & Righteous Conduct
- ❖ The importance of Affective domain in Education in Compassion, Love and Kindness

### **Unit - III: Response to Value Crisis and Impact of Modern Education & Media on Values**

- ❖ Value Crisis: Values Crisis Concept, Conflicts as Challenge Vs. Hindrance
- ❖ Strategies of Response: Lawrence Kohlberg and Carol Gilligan
- ❖ Arnold Toynbee's Challenge-Response Mechanism: Case Study of the Life of Dr. Abdul Kalam
- ❖ Gandhian Formula: "Be the Change you wish to see in the world"
- ❖ Positive Response: "Seek to Change Yourself; Do Not Complain about Others"

### **Unit - IV: Values: The ideal of Human Unity and Peace**

- ❖ Human Rights, Rationale and Evolution, UDHR and its Articles( particularly 1, 3, 7, 10, 18, 19)
- ❖ UDHR and Duties: Article 26, Receiving Rights subject to performing duties
- ❖ Human Rights Education: Meaning, Objectives, Strategies and Role of Education towards duty-consciousness
- ❖ National Human Rights Commission and its role
- ❖ Role of the Indian Constitution: The Right of Children to Free and Compulsory Education Act, 2009 in context of human Rights and Human Duties Article 51A
- ❖ Peace Education: Meaning, objectives, Role of Education in promoting Peace based on unilateral ethics of 'in giving we receive'
- ❖ Education, Strategies for imparting Peace Education through imparting of dutyconsciousness

## **ADULT AND POPULATION EDUCATION (E-509)**

### **CO: COURSE OUTCOMES**

**CO1-** To develop an understanding of the meaning and concept of Adult Education

**CO2-** Apply the different methods and evaluation techniques of adult learning.

**CO3-** Analyze the problems and difficulties coming in the way of achieving full literacy in the country

**CO4-** To understand population becomes stable when difference between birth and death rates.

**CO5-** Develop among themselves a healthy, rational and scientific attitude towards the natural phenomena of birth and death.

### **Course Contents**

### **Unit - I: Adult and Continuing Education**

- ❖ Meaning, Concept and Scope of Adult and Continuing Education.
- ❖ Need and Importance of Adult Education for the development of an Individual for Social Change.
- ❖ Adult Education in Independent India: Objectives Target, efforts, achievements and causes for slow progress.
- ❖ National Literacy Mission - Aims, objectives and strategies.

### **Unit - II: Teaching - Learning process in Adults**

- ❖ Androgogy- Nature and Scope. Basic difference between Pedagogy and Androgogy.
- ❖ Agencies and Organizations: Local, State and Central level, their problems.
- ❖ Adult Learner — Characteristics, problems and motivation.
- ❖ Adult teaching — Different methods, Role of Mass media.
- ❖ Evaluation Techniques for Adult Learning.
- ❖ Adult Education, lifelong learning and continuing Education
- ❖ Adult Education and Continuing education
- ❖ Lifelong learning- A component of adult education
- ❖ Lifelong learning in IT age- Exploring ICT as a Tool

### **Unit - III: Population and AIDS Education**

- ❖ Importance of Population Education – concept / meaning and objectives of population education – factors affecting population explosion – importance of Family Life Education, with reference to effect of Population Growth on: Economic Development, Social Development, Educational Development, Environmental and Natural Resources, Health and Nutrition
- ❖ Symptoms of AIDS – causes, Prevention of AIDS – AIDS Education – meaning and objectives. Role of different agencies in promoting AIDS Awareness Education – [Local, National and International Agencies – 2 each]

### **Unit - IV: Integrated Population Education**

- ❖ Role of Government and Non-Govt. Agencies concerning Population Education.
- ❖ Integration of Population Concept in different School Subjects.
- ❖ Population Education through co-curricular activities.
- ❖ Role of the Teacher in Population Education Programs.

## **SCHOOL LEADERSHIP (E-510)**

### **CO: COURSE OUTCOMES**

- CO1-** Develop a critical understanding of the notion of school organization.
- CO2-** Develop a comprehensive understanding of context-specific notions of school effectiveness.
- CO3-** Understanding of school leadership and challenges to management.
- CO4-** Apply connections between field-based project work, educational leadership and change facilitation.
- CO5-** Know the system of education, its relationship with school curriculum and management.

## Course Contents

### **Unit I: Structures and Processes of the Indian Education System**

- ❖ Types of schools within different administration bodies
- ❖ Roles and responsibilities of education functionaries
- ❖ Governance rules and financial management of different types of school.
- ❖ Relationships between support organizations(Affiliating, Regulating and Financing bodies) and the school.
- ❖ Understanding and interpreting educational policies that impact schools
- ❖ Concepts of school culture, organization, leadership and management.

### **Unit II: School Effectiveness and School Standards**

- ❖ School effectiveness -meaning and its assessment.
- ❖ Understanding and developing standards in education

### **Unit III: School Leadership**

- ❖ Administrative and academic leadership
- ❖ Styles of leadership
- ❖ Team leadership
- ❖ Pedagogical leadership
- ❖ Leadership for motivation and change

### **Unit IV: School Management**

- ❖ Desirable Change in management
- ❖ Conflict Management
- ❖ Classroom management effective communication and motivational skills.
- ❖ Learner- centred educational and inclusive Education.
- ❖ Role of school activities such as assemblies, annual days etc., in the creation of school culture.
- ❖ Accountability and Continuous Professional Development

### **Unit V: Changes in Education System**

- ❖ Sarva Shiksha Abhiyan (SSA) experiences and RMSA
- ❖ Equity in Education · Incentives and schemes for girl child
- ❖ Issues in educational and school reform
- ❖ Preparing for and facilitating change in education through Teacher Education system as prime mover.
- ❖ Role and functions of IASEs, DIETs, CTE · Role, functions and networking of institutions like UGC,
- ❖ NCERT, NCTE, NUEPA, SCERT etc.

**(Teaching Skills) Practical  
Work EF 2(B): School  
Internship (E-703)**

In the second year, there shall be a minimum of 16 weeks of intensive engagement with the school in the form of School Internship. For this, the student-teachers will go for 'School Placement', during which their role in the school is something like an apprentice and they shall work as a regular teacher & participate in all the school activities including planning, teaching and assessment, interacting with school-teachers, & children to understand the school in totality its philosophy & aims, organization and management, the life of a teacher, the needs of the physical, mental and emotional development of children. They will be engaged in school functioning in all its aspects in consultation with the School-mentor, like-

- ❖ Participating in various 'out-of-class room' activities in school.
- ❖ Organizing events e.g., cultural activities, debates, games, quiz, essay-competition, drama, etc.
- ❖ Preparation of School calendar, time-table, assessment schedule, evaluation tools etc.
- ❖ Preparing a suggested comprehensive plan of action for some aspect of school improvement.

School-Internship shall be designed to lead to the development of 'Teaching Competence of a professional, teacher dispositions and sensitivity.

During internship, student-teachers will be provided opportunities to teach in government and private schools with systematic support and feedback from the faculty. During this period, student-teachers will be actively engaged in teaching at school and will participate in day-to-day activities of school.

It is important that the student-teachers will consolidate and reflect on their teaching experience during the school-internship.

- ❖ Student-teachers will maintain a **Journal (A Diary)** in which he/she records one's experiences and observations, etc. daily.
- ❖ Student-teachers will maintain a **Portfolio** of all the activities like-details of daily-teaching eg., topic, date, class, objectives of teaching, resources used, assessment tools, homework given, etc.
- ❖ Student-teachers will **teach at least 30 lessons** during internship period. These lessons will be observed by their mentors in the school.
- ❖ Student-teachers will work on an **Action Research based Project** on any Educational problem of School, which will be selected in consultation with the concerned faculty supervisor.

**Final Presentation**

At the end of School-Internship each student-teacher will be expected to present

- ❖ **The Journal**—Containing day-to-day report about different activities, like-teaching, events, etc. mentioned above.
- ❖ **The Portfolio**- Containing evidences (proof) of different activities and events in the form of different photographs, etc.
- ❖ **The Project Report**-Containing the data, analysis and interpretation based on Action Research conducted by him/her.
- ❖ **Presentation of Teaching through ICT**- on any topic of school subject.

These four activities will be included in the evaluation of School-Internship.

- ❖ The Journal of 50 marks
- ❖ The Portfolio of 50 marks
- ❖ The Project Report of 50 marks
- ❖ Presentation of teaching through ICT on any topic of school subject of 50 marks

## **Shobhit University, Gangoh**

**(Established by UP Shobhit University Act No. 3, 2012)**

### **School of Education**

### **Ordinances, Regulations & Syllabus**

**For**

**Bachelor of Education (B.Ed.) Two Year Programme**

**Annual Pattern**

**(w.e.f. session 2015-16)**

**Approved and Adopted in the year 2015**

**(First Board of Studies; 22.06.2015)**

## ***Programme Educational Objectives (PEOs)***

- PEO 1** To enable the prospective teachers to understand the nature purpose and Philosophy of School Education.
- PEO 2** To acquire knowledge and develop an understanding of various aspects of school management.
- PEO 3** To change the behavior, attitude and values through which learners can make responsible and accountable agents of society
- PEO 4** To provide a rich programme of curricular and extra- curricular activities for overall development of learner's personalities.
- PEO 5** To prepare prospective teachers to understand psychological and sociological aspects of child's development.
- PEO 6** To enable the learners to gain in-depth conceptual knowledge in the area of education at primary and secondary levels
- PEO 7** To prepare up-coming teachers to understand child's behavior under different condition.
- PEO 8** To make familiar student- teachers to various teaching methodologies prevailing across the world.
- PEO 9** To sensitize student- teachers about various social and educational issues.
- PEO 10** To enable them to be more creative in their outlook as teachers and to be positive in their attitude and approach.
- PEO 11** To develop competencies and skills required for becoming a reflective and humane teacher.
- PEO 12** To sensitize them towards the promotion of social cohesion National integration and International understanding
- PEO 13** To develop communication skills, train them to use modern information and communication technology for school purposes
- PEO 14** To train them in conducting action research in educational situation and to improve the pedagogical practices in their subjects.

### ***Programme Specific Objectives (PSO's)***

**PSO 1** Problem Solving Skills – Learners will be able to develop reflective and analytical skills and understanding of critical issues of education.

**PSO 2** Professional Skills – Learners will be able to build skills and abilities of communication, reflection, art, aesthetics, and self-expression.

**PSO 3** Successful Career – Learners will exhibit contemporary knowledge in education and will be competent to work in private and government institutions.

**PSO 4** The Teacher and Society – Learners will be able to develop understanding about child's pedagogy, school management and community involvement.

### ***Programme Outcome Objectives (POO's)***

**POO 1** Teaching knowledge: To be able to use learner centered teaching methods and to assess children's learning ability using different pathways.

**POO 2** Problem analysis: To enable the prospective teachers to deal with both the personal and academic problems of students.

**POO 3** Design/ development of solutions: To be able to find and develop the solution of problems of learners related to teaching field.

**POO 4** Conduct investigations of complex problems: Being able to understand and investigate complex problems and find out their solutions.

**POO 5** Modern tool usage: To be able to adopt modern techniques for teaching skill development.

**POO 6** The teacher and society: To be able to engage with self, child, community and school to establish close connections between different curricular areas.

**POO 7** Environment and sustainability: To develop the knowledge, skills, values, attitudes and behavior among students to understand and care for their environment.

**POO 8** Ethics: To be able to develop possible ethical boundaries and values perceived by learners in teaching institutions.

**POO 9** Individual and team work: Student-teacher will be able to share insights, work together productively and efficiently to reach their goal and attain a positive outcome.

**POO 10** Communication: To be able to develop a strong sense of wellbeing and effective communicators and to communicate effectively, verbally as well as in writing.

**POO 11** Project management and finance: Being able to develop projects related to curriculum and study the financial needs and find the ways to meet them.

**POO 12** Life-long learning: Being able to demonstrate reading, writing, listening and speaking skills and also develop an ability to reflect on their own understanding.

## *Course Structure*

The present B.Ed. syllabus for two-year programme has been designed on the current guidelines of NCTE & UGC with the view to make the student-teachers reflective practitioners. The programme is comprised of three broad inter-related curricular areas: -

- (A) : Perspectives in Education: Core Courses (CC)
- (B) : Curriculum and Pedagogic Studies: Pedagogy Courses (PC)
- (C) : Engagement with the Field/Practicum (EF)

Transaction of the courses is to be done using a variety of approaches, such as tasks and assignments, projects, group discussion, seminar, interactions with community in multiple socio-cultural environments.

### **Group (A): Perspectives in Education- Core Courses (CC)**

These courses are intended to provide a conceptual understanding of relevant concepts and processes in teacher education and also situate them in the broader perspective of education and development.

#### **CC 1: Contemporary India and Education**

This course deals with conceptual understanding about issues of diversity, inequality and marginalization in Indian society, the implications for education with analysis of significant policy debates in Indian education.

#### **CC 2: Philosophical & Sociological Perspectives of Education**

This course deals with philosophical and sociological issues and provides an opportunity to understand and reflect on the vision of education as well as cultural context within which education operates.

#### **CC 3: Growing up as a Learner**

This course deals with individual development, nature and process of learning and an understanding of how learning and cognition are closely inter-related throughout individual development process.

#### **CC 4: Teacher, Teaching and Technology**

This course deals with rules and expectations of teachers in the form of accountability and code of ethics and the nature and various aspects of the teaching process in view of the professional development of the teacher.

#### **CC 5: Creating an Inclusive School**

This course deals with understanding of the cultures, policies and practices that need to be addressed in order to create an inclusive school and identify & utilize existing resources for promoting inclusive practices.

#### **CC 6: Gender, School and Society**

This course deals with meaning and experience of being a boy or a girl across different social groups, regions and time-periods. It also deals with gender inequalities through a variety of institutions such as the family, caste, religion, culture, the media and popular culture, law and the state.

#### **CC 7: Knowledge, Language and Curriculum**

This course deals with meaning, nature and sources of knowledge, to develop the ability of reading, comprehension and writing skills & to understand concepts and principles of curriculum development.

## **Group (B): Curriculum and Pedagogic Studies- Pedagogy Courses (PC)**

These courses pertain mainly to help student-teachers become effective teachers. For this, it offers the student-teachers not only reorganize one's previous understanding of one's subject of specialization but also the pedagogy as the integration of knowledge about the learner, the discipline and the societal context of learning, so that they may try out evolving a few learning situations and carry them out both in simulated as well as real situations.

### **PC 1 & PC 2: Pedagogy of School Subjects - I & II – Optional Courses**

These courses intend to enable student-teachers to recognize the nature of knowledge in various subject areas i.e. Sciences (Physical/Biological/Mathematics), Social Sciences, Languages (Hindi/English/Sanskrit), Commerce, Home Science, Computer Science and will help in developing & understanding of the pedagogical requirements in various teaching-learning situations. Each student-teacher will choose two School Subjects on the bases of his/her Graduation Stream.

### **PC 3: Assessment for Learning**

This course intends to lead to an understanding and appreciation of the relevance of assessment the how and why of it, as well as develop necessary competence in involving appropriate assessment modes in line with learning objectives. It also clarifies the significant shift in emphasis of the terms 'assessment for learning' as against 'assessment of learning.

### **PC 4: Optional Courses – any one of the following**

- I. Educational Administration and Management
- II. Guidance and Counseling
- III. Environmental Education
- IV. Computer Education
- V. Health, Physical Education and Yoga
- VI. Life Style Management

## **Group (C): Engagement with the Field/Practicum (EF)**

### **EF 1: Task and Assignment**

Task and Assignments that run through all the courses CC 1-7 and PC 3-4.

### **EF 2: Practicum**

#### **(A): Preparation to Function as a Teacher (Teaching Skills)**

This is visualized as a shorter-duration initial experience (5 weeks) of student-teachers to train in lesson-planning based on constructivist approach, micro-teaching skills and playing the role of teacher in simulated condition as well as in real classroom situation. It will help him/her to prepare himself/herself as a teacher possessing teaching skills.

#### **(B): School Internship**

This is visualized as a longer-duration field experience (16 weeks) of student-teachers supported by relevant interactive exposures within the school. During this period he/she will teach in the school, observe and participate in the day-to-day functioning of school, prepare a Journal containing day-to-day report about all activities including evaluation tools, and conduct an Action Research Project based on any school problem. It will help him/her to become a professional teacher, possessing teaching-competence.

### **EF 3: Enhancing Professional Capacities: Optional Courses**

A part from conceptual and practical learning gained through Core Courses (CC) and Pedagogy Courses (PC), student-teachers need to develop professional competencies and to experience the fact that the teacher is much more than someone who teaches a subject. The teacher is potentially a participant in the wider education system and he/she may play not only a proactive role in the community life of the school but also as an agent of social development and social transformation. It includes a number of experiences that will enhance the capacity of student-teachers in various essential dimensions. Each student-teacher will choose any three EPC activities in each year i.e. three in first year & three in second year.

EPC 1: Strengthening Language Proficiency

EPC 2: Art and Aesthetics

EPC 3: Reading and Reflecting on Texts

EPC 4: Understanding of ICT

EPC 5: Scouting and Guiding

EPC 6: Working with Community

EPC 7: Basics of Research

EPC 8: Drama and Art in Education

EPC 9: Entrepreneurship Development

## **Papers in the First Year**

### **From Group (A):**

Four compulsory papers as-

1. Contemporary India and Education
2. Philosophical & Sociological Perspectives of Education
3. Growing up as a Learner
4. Teacher Teaching Technology

### **From Group (B):**

Two Papers as PC 1 & 2 (Pedagogy of School Subjects - I & II)

(PC 1 & PC 2) These courses intend to enable student-teachers to recognize the nature of knowledge in various subject areas i.e. Sciences (Physical/Biological/Mathematics), Social Sciences, Languages (Hindi/English/Sanskrit), Commerce, Home Science, Computer Science and will help in developing & understanding of the pedagogical requirements in various teaching-learning situations. Each student-teacher will choose two School Subjects on the bases of his/her Graduation Stream.

### **From Group (C):**

#### **EF 1: Task and Assignment**

Task and Assignments that run through all the courses CC 1-4 and PC 1 & 2.

#### **EF 2: Practicum (A): Preparation to Function as a Teacher (Teaching Skills)**

#### **EF 3: Enhancing Professional Capacities: Optional Courses**

Each student-teacher will choose any three EPC activities in first year.

## Papers in the Second Year

### **From Group (A):**

Three compulsory papers as-

1. Creating an Inclusive School.
2. Gender, School and Society.
3. Knowledge, Language and Curriculum.

### **From Group (B):**

Two Papers as PC-3 (Assessment for Learning) & PC-4 (Optional Courses)

### **From Group (C):**

#### **EF 1: Task and Assignment**

Task and Assignments that run through all the courses CC 5-7 and PC 3 & 4.

#### **EF 2: Practicum (B): School Internship**

#### **EF 3: Enhancing Professional Capacities: Optional Courses**

Each student-teacher will choose any three EPC activities in second year.

**B.Ed. SYLLABUS FRAMEWORK  
(Based on NCTE Regulations 2014)**

**B.Ed. FIRST YEAR**

<b>Course Code</b>	<b>Title of the Course</b>	<b>Credits</b>	<b>Hours</b>	<b>Marks (External +Internal)</b>
<b>Perspectives of Education – Core Courses</b>

6.	E 506	Life Style Management

***Ordinance and Regulations***

**A. Duration Of Course**

1. Bachelor of Education (B.Ed.) course shall be a two-year full time professional pre-service teacher education programme with two year divided in yearly course and the examination shall be held at the end of each year.
2. First year shall be from 25<sup>th</sup> August to 30<sup>th</sup> April and the stretch of the second year shall be from 25<sup>th</sup> July to 20<sup>th</sup> April. At the end of each year the candidates shall be required to present themselves for examination.
3. It shall be a full-time course including Theory, Practice in teaching, internship, field work, professional development and other prescribed activities.

**B. Total Intake**

Total intake of B.Ed. course in the School of Education, Shobhit University, Gangoh shall be 100 as per NCTE norms.

**C. Eligibility Criteria**

The eligibility requirement for the admission of the candidates to B.Ed. course shall be in accordance with the eligibility criteria determine by NCTE/ U.P. Govt. Order issued from time to time.

**D. Procedure of Admission**

1. Admission to B.Ed. course shall be made in accordance with N.C.T.E rules and notifications issued from time to time.
2. Reservation of seats shall be as per N.C.T.E notifications.

**E. Academic Session**

First year of Bachelor of Education (B.Ed.) programme shall be Eight months long 25<sup>th</sup> August to 30<sup>th</sup> April excluding year-end examination and ten days winter break. Second year of Bachelor of Education (B.Ed.) programme shall be eight and half month long (25<sup>th</sup> July to 30<sup>th</sup> April).

**F. Classification of Successful Candidates**

1. No candidate shall be declared to be passed B.Ed. examination unless he/she secures 40% marks in aggregate of all the theory courses and 50% marks in practically separately for each academic session.
2. The division shall be determined on the aggregate of marks of all the courses prescribed for the degree separately in theory and practical in both the years as under:

<b>Division in theory &amp; Practical separately</b>	<b>Percentage of marks</b>
First division	60% or above
Second division	50% or above but below 60%
Third division in theory only	40% or above but below 50%

Note: The student will be awarded divisions separately in Theory & Practical Examination.

### **G. Examination: Rules And Regulations**

1. Students who have completed their course for the Bachelor of Education (B.Ed.) First yearly but have failed to appear/ pass the yearly examination will be allowed to re-appear in the subsequent First yearly examination. Those who fail to appear/ pass in any paper in the second yearly may be permitted to appear at the next year' examination without further attendance at lectures if their applications for permission meet with the approval of the Head of the School of Education and the Dean, Faculty of Education.
2. Candidates allowed to appear at the Bachelor of Education (B.Ed.) yearly examination under this ordinance as exempted candidates shall be required to pay the examination fee as prescribed by the University.
3. There shall be a Yearly-End examination and each student has to appear in all papers/ including Theory, Practical's, and Practice in teaching, internship, field work, and professional development.
4. Those candidates who pass a yearly examination can appear for improvement in only one theory paper of a yearly at the next Back Paper/ Regular examination of that yearly and not thereafter. However, the improvement facility will not be given in all the papers prescribed in the course.
5. Students of following categories shall be 'Eligible for Back Paper (EBP)'. An EBP candidate shall be promoted to next yearly. The back paper facility in a yearly provides promotion to the next yearly and another opportunity to obtain a minimum of the pass marks assigned for an individual paper or in the aggregate.
6. The candidates who fail to secure an aggregate of 50% of the maximum marks for a yearly but have obtained 40% of the maximum marks assigned to each of their papers may appear in all the papers as exempted candidate or may appear in only one theory paper of his choice as EBP candidate to secure a minimum in the aggregate.
7. The candidates who secure an aggregate of 50% of the maximum marks for a yearly but fail to secure a minimum of 40% of the maximum marks in one out of four papers prescribed for the yearly papers or in case where there are more than four papers prescribed for the yearly, the candidates who have failed in two theory papers or have failed in one theory paper shall be declared 'EBP'. Such candidates will appear only in their unclear papers.
8. A candidate with two out of three or three out of four unclear papers in his/ her first yearly examination shall be declared 'Failed' but will be promoted to the second yearly but not beyond till he/ she becomes a candidate under 3 or 4 by appearing as an exempted candidate in the next Back paper/ Regular examination of that yearly and not thereafter. Such a promotion from third to fourth yearly shall also be
9. The back paper facility will not be given to a candidate if the number of his unclear papers in all of his previous yearly examinations exceeds three.

10. The examination for the degree of the bachelor of education shall include: Theory of Examination, practice in teaching examination and practical examination, internship and professional development activities.
11. The students shall be required to complete their practice- in- teaching work, the prescribed Practical work, internship, field work, and other activities as per regular schedule of the department and the institution.

If candidate after completing the required percentage of attendance fails to appear in theory or in practical or both, he /she will be considered as ex-student in both theory as well as practical without attending further regular classes in the first or second year respectively.

12. A candidate shall be required to offer the course as prescribed in the syllabus. The theory courses shall carry 100 or 50 maximum marks in both the years. The practical course (E 701) EF 2(A): Preparation to function as a Teacher & E 702 Viva- Voce Examination based on 1. Task and Assignments that run through all the courses CC 1-4 and PC 1 & 2 will be of 200 marks in the first year, out of these 40 marks will be evaluated internally by the subject supervisors respectively and the remaining 160 marks by the board of examiners. In the same way, the practical course (E 703) EF 2(B): School Internship & E 704 Viva- Voce Examination based on 1. Task and Assignments that run through all the courses CC 5-7 and PC 3 & 4 will be of 300 marks in the second year, out of those 60 marks will be evaluated internally by the subject supervisors respectively and the remaining 240 marks by the board of examiners.
13. For a pass, a candidate is required to be obtain at least 40% marks in each paper with a minimum of 40% marks in external and internal assessment separately and 40% in the total aggregate in theory, 50% marks in external and internal assessment in practical separately and 50% in the total aggregate in practical in each year.
14. A candidate who has passed the B.Ed. first year examination may reappear in maximum two theory paper(s) of first year along with the second year examination in the immediately following year and in that case better performance in each such paper will be counted for working out the result.
15. A candidate who has passed the B.Ed. second year examination may reappear in maximum two theory paper of second year in the immediately following year and in that case better performance in each such paper will be counted for working out the result.
16. Candidates are given only one chance to reappear at the same examination for the purpose of improvement of performance in the immediately following year.

<b>Year</b>	<b>Marks</b>
First Year	800 (600 Theory + 200 Practical)
Second Year	600 (300 Theory + 300 Practical)
<b>Total</b>	<b>1400</b>

17. If a candidate fails in one or two paper of the first year examination, he/she may appear at the second year B.Ed. examination along with the one or two the failing paper(s) of the first year examination simultaneously. In case, he/she does not pass the failing paper(s) of the first year examination even at this chance, he/she will be required to reappear at the first year examination in full.

18. In the same way, if a candidate fails in one or two paper(s) of second year examination, he/she will have to appear in one/two paper(s) of the second year in the immediately following year .in case, he/she will be required to appear at the second year examination in full.
19. Each theory paper shall carry 100/50 marks which are allocated in the proportion of 80: 20 for year-end theory examination.
20. The division of marks in two year of Bachelor of Education (B.Ed.) programme shall be as follows:
  - Theory Papers 900 marks
  - Practice in Teaching Examination with 500 marks.
21. The medium of the written exam shall be Hindi or English only.

## **H. Awards of Degree**

The degree, Bachelor of Education (B.Ed.) shall be awarded by Shobhit University, Gangoh to candidates who have pursued a regular course of study in the university and have fulfilled all the conditions and have passed the prescribed examinations.

## **I. Evaluation Scheme**

The performance of the candidates appearing in B.Ed. examination will be evaluated as follows:

1. The evaluation of B.Ed. pupil teacher will be done in 1400 marks the division will be awarded separately in theory out of 900 marks and in practical out of 500 marks.
2. The theory part in all the papers **Perspectives in Education: Core Courses (CC) & Curriculum and Pedagogic Studies: Pedagogy Courses (PC)** will be evaluated through a system of external examination (80%) and internal Assessment (20%). The internal assessment will be based on Sessional Examinations (10%), Assignments (5%) & Attendance (5%) for each paper. The External Examination will be through the routine annual university examination, based on 03 essay type questions (48 marks), 04 short questions (16 marks) and 08 very short answer type questions (16 marks).
3. During the first-year evaluation procedure for the practical as follows:
  - (a) Evaluation procedure for paper **(E 701)-EF 2: Practicum (A): Preparation to Function as a Teacher**, a board of two examiners comprising one as Internal Examiner of concerned department & second one as External Examiner from any other University. Examiners will assess student separately and average of total sum of marks will be his\her final score in teaching skill out of 80 external marks and internal marks 20 marks will be given by two subject supervisors.
  - (b) For evaluation procedure paper **(E 702)-Viva- Voce Examination** of 80 marks will be conducted by the board of examiners & internal 20 marks given by respective supervisors.
4. During the second year, evaluation procedure for the practical will be as follows:
  - (a) Evaluation procedure for paper **(E 703)- EF 2(B): School Internship**, a board of two examiners comprising one as Internal Examiner of concerned department & second one as External Examiner from any other University, will assess the journal ,the portfolio and the final presentation of teaching of students through PPT or OHP separately and average of total sum of marks will be her final score in teaching competence out of 160 external marks and internal 40 marks will be given by the subject supervisors .it will be divide as follows:
    - i. The Journal of 50 marks (10+40).
    - ii. The Portfolio of 50 marks (10+40).
    - iii. Final presentation through PPT/OHP of each school subject 100 marks (20+80).
  - (b) Evaluation procedure for paper **(E 704)-Viva- Voce Examination** of 80 marks will be conduct by the board of examiners and internal 20 marks will be given by the respective supervisors.

## **5. Continuous and Comprehensive Evaluation (C.C.E)**

(a) In each paper the continuous internal assessment system would have a weightage of 20% marks, while the yearly end examination shall have a weightage of 80% marks.

(b) The weightage of components in continuous internal assessment system will be as under:

- Sessional Examination	10 %
- Assignment and Presentation	05 %
- Attendance	05 %

(c) It shall be the duty of the teacher/teachers to conduct Continuous and comprehensive Evaluation. In case more than one teacher is sharing the teaching work in a paper, each teacher shall evaluate independently but total weightage should be 20 %.

## **J. Attendance**

The B.Ed. program shall be of duration of two academic years, which can be completed in a maximum of three year. The minimum attendance of student teacher shall have to be 75% for all course work and 90% for Practicum/School Internship.

## **B.Ed. I Year Syllabus**

### **Core Course (CC-1)**

#### **CONTEMPORARY INDIA & EDUCATION (E-101)**

#### **CO: COURSE OUTCOMES**

**CO-1** Understand that development of education is influenced by socio-political forces of the time.

**CO-2** Acquire the knowledge of features of education in ancient, medieval and pre-independent period in India with their strengths and weaknesses.

**CO-3** Understand the contribution of various Committees and Commissions on education set up from time to time in the economic development of India.

**CO-4** Appreciate the developments of Indian Education in the Post Independent Period

#### **Course Contents**

##### **Unit - I: Education in India**

- ❖ Vedic Period, Buddhist Period and Medieval Period

##### **Unit - II: Policy Framework of Education in Pre-Independent Period**

- ❖ Macaulay's, Minutes (1835), Wood Dispatch (1854), Hunter Commission (1882) and Indianisation of Education, National Education Movement, Lord Curzon Policy (1902), Gokhle Bill (1910), Sadler Commission (1917), Hartog Committee (1929),

##### **Unit - III: Policy Framework of Education in Post-Independent Period**

- ❖ University Education Commission (1948-49)
- ❖ Secondary Education Commission (1952-53)
- ❖ Indian Education Commission (1964-66) in the context of Industrialization
- ❖ National Policy of Education (1986) and its review (1992) in the context of Liberalization and Globalization of Indian Economy
- ❖ National Curriculum Framework (2005)

##### **Unit - IV: Elementary Education**

- ❖ Universalization (Provision, Enrolment, Retention, Success), Wastage and Stagnation, Education for all (Sarva Shiksha Abhiyan), Minimum Level of Learning (MLL), Kasturba Balika Yojna, RTE (2009)

##### **Unit - V: Secondary Education**

- ❖ Expansion, differentiation of curricula between boys and girls, discrimination of curricula, Vocationalization of education

##### **Unit - VI: Current Issues**

- ❖ University autonomy, privatization of education, commercialization of education
- ❖ Education of marginalized groups-women, scheduled caste,
- ❖ Medium of schooling- Three Language Formula
- ❖ Population Education.

### **Core Course (CC-2)**

#### **PHILOSOPHICAL & SOCIOLOGICAL PERSPECTIVES OF EDUCATION (E-102)**

#### **CO: COURSE OUTCOMES**

**CO1-** Answer three basic questions-what ? why & How of the Education.

**CO2-** Develop an understanding of contribution of Indian & Western philosopher.

**CO3-** Build their own view about different Indian Religion and respect them.

**CO4-** Describe the role of Education in desirable social change and socio-economic development.

**CO5-** Transform one-self and society to empower people to assure responsibilities for creating sustainable future.

#### **Course Contents**

##### **Unit - I: Education and Knowledge**

- ❖ Education – meaning, nature and modes-Formal, Informal and Non-formal
- ❖ Purposes of education-individual development
- ❖ Knowledge-meaning and ways of knowing
- ❖ Forms of knowledge-local & universal, concrete & abstract, theoretical & practical, contextual & textual, school & out-of-school

##### **Unit - II: Education and Philosophy**

- ❖ Philosophy of Education-meaning and significance in the context of aims of education, curriculum
- ❖ Major schools of thoughts and their impact on education.
  - (i) Idealism, Naturalism, Realism, Pragmatism and Humanism.
  - (ii) Sankhya, Yog and Advaita philosophy

##### **Unit - III: Education and Society**

- ❖ Educational sociology – meaning, nature and socialization of the child
- ❖ Education as a means of social change and social welfare
- ❖ Education as a means of human resource development
- ❖ Meaning of a new social order and modernization of education

##### **Unit - IV: Educational Thoughts: Indian & Western Thinkers**

- ❖ MK Gandhi, Tagore, Aurobindo, Vivekanand, J.Krishnamurthy & Giju Bhai
- ❖ Aristotle, Socrates, Plato, Rousseau, Dewey, Froebel & Montessori

### **Unit - V: Education and Values**

- ❖ Values – meaning, nature & types.
- ❖ Source of values – The Constitution of India, democracy, secularism, fundamental rights & duties, directive principles, constitutional provisions for education.
- ❖ Education for peace – issues of national and international conflicts, social injustice, communal conflicts harmony, individual alienation

### **Unit - VI: Education for National Integration**

- ❖ National integration – meaning and need, role of teacher, institutions and cultural heritage, regional expectation and aspiration
- ❖ Role of celebration of Indian festivals

### **Core Course (CC-3)**

#### **GROWING UP AS A LEARNER (E-103)**

#### **CO: COURSE OUTCOMES**

**CO1-** Acquire the basic principles of psychology of learners.

**CO2-** Understands learner characteristics and implications for teaching-learning.

**CO3-** Understand learner's mental health problems & choose appropriate strategies to cope with such problems.

**CO4-** Apply various psychological principles and approaches to learning.

**CO5-** Appreciate the role of psychology in the teaching-learning process.

#### **Course Contents**

#### **Unit - I: Psychology and learner**

- ❖ Psychology – its meaning, nature and scope
- ❖ Educational psychology – meaning, scope and its relevance for teachers, teaching and learning.
- ❖ Individual differences – concept & types-mentally retarded, backward, delinquent, gifted, slow learner

#### **Unit - II: Human Development**

- ❖ Concept & stages of development – infancy, childhood, adolescence
- ❖ Types of development- physical, cognitive social, emotional, moral with reference to Piaget.

### **Unit - III: Learning**

- ❖ Concept & theories of learning and its implications – Thorndike, Pavlov, Kohler, Skinner,

### **Unit - IV: Mental Health**

- ❖ Concepts and factors affecting mental health, ways of improving mental health
- ❖ Adjustment and ways for reducing maladjustment

### **Unit - V: Personality**

- ❖ Concept, dimensions and theories of personality- psycho-analytic, trait, type
- ❖ Measurement of personality

### **Unit - VI: Intelligence and Creativity**

- ❖ Intelligence-meaning, nature and measurement
- ❖ Types of intelligence with reference to multiple intelligence and emotional intelligence,
- ❖ Creativity – meaning, nature and measurement, techniques for fostering creativity

#### **Suggested Readings :**

- Newman, B. M. and Newman, P.H. (2007). Theories of Human Development. London: Lawrence Erlbaum Associates, publishers. Chapter 1: Introduction.
- Saraswathi, T.S. (Ed.) (1999). Culture, Socialization and Human Development: Theory, Research and Applications in India. Sage publications.

### **Core Course (CC-4)**

#### **TEACHER, TEACHING AND TECHNOLOGY (E-104)**

#### **CO: COURSE OUTCOMES**

- CO1-** Acquire theoretical basis of educational technology and to develop awareness about recent developments in the areas of educational technology
- CO2-** Equip them with various technologies to apply for improving instructional practices
- CO3-** Develop teaching skill required for effective instructional and institutional management.
- CO4-** Manage teaching and learning effectively and efficiently.
- CO5-** Identify and implement instructional strategies in different situations.

#### **Course Contents**

#### **Unit - I: Technology and Teaching**

- ❖ Educational technology-meaning, concept and types-hardware, software, systems approach,

- ❖ Types of educational technology -teaching technology, instructional technology and behavioral technology, information communication technology
- ❖ Programmed instruction- concept, principles, assumptions and types – linear and branching

### **Unit - II: Task of Teaching**

- ❖ Phases of teaching and its operations-pre-active, inter-active & post-active
- ❖ Levels of teaching-memory, understanding and reflective

### **Unit III: Teaching Aids and Teaching**

- ❖ Teaching aids-meaning, need, types-projected, non-projected, electronic
- ❖ Multi-sensory teaching-meaning and importance
- ❖ Edgar Dale's Cone of experience
- ❖ Audio-visual equipment's-OHP Projector, audio-video recording instruments, radio, television
- ❖ Use of teaching-learning technologies – Tele-conferencing (Face to Face Distance mode of Education), language laboratory, e-mail, internet, smart classes,

### **Unit - IV: Management of Learning and Teaching**

- ❖ Planning
- ❖ Organizing
- ❖ Leading
- ❖ Controlling

### **Unit - V: Strategies of Teaching**

- ❖ Concept and classification, different teaching strategies - lecture, demonstration, heuristic, discovery, project, assignment, tutorial, group work, brain-storming, role playing,

### **Unit - VI: Modification of Teacher Behavior**

- ❖ Modification of teacher behavior-simulation teaching, t-group training, interaction- analysis, action research, micro teaching with special reference to components of various teaching skills like -Introduction, Reinforcement, Probing Question, Stimulus Variation,

### **Unit - VII: Professional Development of Teachers**

- ❖ Teacher evaluation, teacher autonomy, teacher accountability, code of ethics for teachers
- ❖ Strategies for professional development of teachers

### **Suggested Readings:**

## Pedagogy Courses

### हिन्दी शिक्षण (E-201)

#### CO: COURSE OUTCOMES

**CO1-** Understand about the nature and characteristics of a language and mother tongue and the use of language.

**CO2-** Practice the required skill and their- interlinks for mastering a language.

**CO3-** Understand the various approaches for planning for successful language teaching.

**CO4-** Understand the Approaches for teaching different aspects of language.

**CO5-** Understand the Aids and other similar available material that could be used for teaching language.

**CO6-** Practice the technique of obtaining feedback for self-evaluation and evaluation of student's success in learning and using the language.

#### Course Contents

##### यूनिट . 1 : भाषा का स्वरूप, प्रकृति एवं हिन्दी भाषा ।

- ❖ भाषा का अर्थ, प्रकृति एवं भाषा अधिगम के सिद्धान्त ।
- ❖ मातृभाषा और राष्ट्र भाषा के रूप में हिन्दी का महत्त्व ।
- ❖ मातृभाषा, राष्ट्रभाषा एवं विदेशी भाषा के रूप में हिन्दी शिक्षण

##### यूनिट . 2 : हिन्दी का भाषा विज्ञान एवं उपयोगिता ।

- ❖ हिन्दी ध्वनि विज्ञान, उसके विभिन्न अंग ।
- ❖ हिन्दी रूप विज्ञान, वर्गीकरण एवं निर्माण प्रक्रिया ।
- ❖ हिन्दी वाक्य विज्ञान, प्रकार एवं प्रभावी निर्माण प्रक्रिया ।
- ❖ विराम चिह्न एवं उनका उचित प्रयोग ।

##### यूनिट . 3 : भाषायी कौशल—शिक्षण, उद्देश्य एवं प्रक्रिया ।

- ❖ श्रवण कौशल— अर्थ उद्देश्य एवं शिक्षण क्रियाएँ ।
- ❖ वचन कौशल—अर्थ, उद्देश्य एवं शिक्षण क्रियाएँ ।
- ❖ पठन कौशल— अर्थ, उद्देश्य एवं विकास हेतु उपाय ।
- ❖ लेखन कौशल— अर्थ, उद्देश्य एवं शिक्षण क्रियाएँ ।
- ❖ सूक्ष्म शिक्षण का स्वरूप एवं निम्न कौशलों के विकास हेतु सूक्ष्म पाठयोजना कानिर्माण—  
अ. प्रस्तावना कौशल ब. प्रश्न कौशल स.

##### यूनिट . 4 : हिन्दी साहित्य की विधाएँ एवं उनका शिक्षण

- ❖ पाठयोजना का अर्थ एवं उपयोगिता, इकाई योजना का निर्माण एवं उद्देश्य ।
- ❖ हिन्दी की निम्न विधाओं के शिक्षण का उद्देश्य, विधियाँ एवं पाठ नियोजन—अ. गद्य— गहन पाठ एवं द्रुत पाठ ब. पद्य स. व्याकरण द. रचना शिक्षण

##### यूनिट . 5 : हिन्दी में दक्षता विकसित करने वाले घटक

- ❖ हिन्दी शिक्षण में सहायक शैक्षिक तकनीकी, आई0सी0टी0 एवं अन्य उपकरणों का प्रयोग । पत्रिकाएँ, अखबार, पुस्तकालय, भाषा प्रयोगशाला, कम्प्यूटर सहायक अनुदेशन, पावर पॉइन्ट, प्रस्तुतिकरण, मृदु पागम आदि ।
- ❖ निम्न पाठ्यक्रम सहगामी क्रियाएँ एवं उनका महत्त्व—परिचर्चा, वाद—विवाद, खेल, कार्यशाला, गोष्ठी, निबन्ध लेखन, आदि ।

##### यूनिट . 6 : परीक्षण एवं मूल्यांकन

- ❖ हिन्दी में मूल्यांकन सतत एवं समग्र
- ❖ हिन्दी में अच्छे परीक्षण की विशेषताएँ एवं परीक्षण पदों का विकास (वस्तुनिष्ठ, लघुत्तरीय, निबन्धात्मक)
- ❖ हिन्दी में निष्पत्ति परीक्षण हेतु प्रश्न—पत्र का निर्माण
- ❖ उपचारात्मक एवं निदानात्मक शिक्षण

## PEDAGOGY OF ENGLISH (E 202)

### CO: COURSE OUTCOMES

**CO1-** Understand about the nature and characteristics of a language and mother tongue and the use of language.

**CO2-** Practice the required skill and their-interlinks for mastering a language.

**CO3-** Understand the various approaches for planning for successful language teaching.

**CO4-** Understand the Approaches for teaching different aspects of language.

**CO5-** Understand the Aids and other similar available material that could be used for teaching language.

**CO6-** Practice the technique of obtaining feedback for self-evaluation and evaluation of student's success in learning and using the language.

### Course Contents

#### Unit - I: Background to the Study of English

- ❖ Role of English in the present day; position of English in the Indian school curriculum in the context of the three-language formula
- ❖ English as a second Language
- ❖ Functions of language
- ❖ Linguistic principles
- ❖ Aims and objectives of teaching of English at Junior and

#### Unit - II: Content and pedagogical analysis

- ❖ Teaching of prose, poetry, composition and grammar.
- ❖ Pedagogical analysis based on unit analysis, objectives, learning experience, chosen methods and material and composition and grammar.
- ❖ Preparation of micro lessons based on the following skills :  
Introduction, Illustration, Stimulus variation

#### Unit - III: Methods of Teaching and Skills of Teaching

- ❖ Various approaches of teaching English; structural approach, communicative approach, holistic approach
- ❖ Difference between and 'approach' and 'method', major methods of teaching English-Grammar-cum-translation method, direct method and bilingual method
- ❖ Structural approach: meaning of structure and pattern, principles of selection and gradation of structure, presentation and practice of structure
- ❖ Latest developments in the approach and methods of teaching English including the linguistic communicative approach, lesson planning
- ❖ Use of ICT in teaching-learning process of English with computer-aided methods like-Power Point, Multimedia etc.

#### Unit - IV: Teaching Aids

- ❖ Importance of instructional material and their effective use
- ❖ Use of following aids :

(i) Chalk board	(vii) Record-Player(lingua phones)
(ii) Flannel board	(viii) Radio
(iii) Pictures.	(ix) Television
(iv) Picture cut-out	
(v) Charts	
(vi) Tape-recorder.	

## Unit V : Evaluation

- ❖ Basic principles testing English, tools and techniques of evaluation
- ❖ The meaning and significance of comprehensive and continuous evaluation in English
- ❖ Development of good test items in English (objectives type, short answer type, essay type)
- ❖ Construction of an achievement test, diagnostic testing and

### संस्कृत- शिक्षण (E 203)

#### CO: COURSE OUTCOMES

- CO1-** Understand about the nature and characteristics of a language and mother tongue and the use of language
- CO2-** Practice the required skill and their-interlinks for mastering a language.
- CO3-** Understand the various approaches for planning for successful language teaching.
- CO4-** Understand the Approaches for teaching different aspects of language.
- CO5-** Understand the Aids and other similar available material that could be used for teaching language.
- CO6-** Practice the technique of obtaining feedback for self-evaluation and evaluation of student's success in learning and using the language.

#### CONTENT

यूनिट . 1 : भाषा – स्वरूप, प्रकृति एवं महत्व भाषा की उत्पत्ति, विकास एवं परिनिष्ठित परिभाषा।

- ❖ भाषा के विविध रूप।
- ❖ भारतीय भाषाओं में संस्कृत का स्थान एवं त्रिभाषा सूत्र की व्याख्यज्ञं
- ❖ भाषा की प्रकृति।
- ❖ सीखने के सिद्धान्त तथा वर्तमान परिप्रेक्ष्य में संस्कृत का सांस्कृतिक एवं

यूनिट 2 : संस्कृत में भाषागत कौशल एवं शिक्षण उद्देश्य।

- ❖ संस्कृत का प्रारम्भिक व्याकरण—पुरुष, वचन, शब्द रूप, धातुरूप सन्धि, समास, उपसर्ग प्रत्यय।
- ❖ संस्कृत भाषा की ध्वनियाँ उनके उच्चारण स्थान (चपदज वित्तजपबनसंजपवद) एवं सूत्र, आभ्यन्तर एवं बाह्य प्रयत्न, समय एवं काल से उत्पन्न ध्वनि—भेद।
- ❖ भाषायी कौशल – उच्चारण, वाचन श्रवण, बोध एवं अभिव्यञ्जन, सभी कौशलों के शिक्षण
- ❖ उद्देश्य, विधियाँ, कौशलों से सम्बन्धित दोष, कारण और उपचार।

यूनिट 3 : संस्कृत साहित्य की विधाएँ एवं उनका शिक्षण।

- ❖ साहित्य की विभिन्न विधाएँ, अवर माध्यमिक एवं उच्च माध्यमिक स्तर पर उनके शिक्षण—उद्देश्य, ब्लूम द्वारा गया वर्गीकरण।
- ❖ संस्कृत शिक्षण की सामान्य विधियाँ।

- ❖ संस्कृत-गद्य, पद्य, व्याकरण, रचना, नाटक, द्रुतपाठ एवं निबन्ध-शिक्षण की विधियाँ एवं उद्देश्य।
- ❖ पाठ योजना के विभिन्न प्रकार एवं उनकी निर्माण-प्रक्रिया।
- ❖ संस्कृत, वर्तनी से सम्बन्धित छात्रों की सामान्य त्रुटियाँ,

#### यूनिट 4 :संस्कृत पाठ्यक्रम एवं पाठ्य पुस्तकें।

- ❖ पाठ्यक्रम से तात्पर्य उसकी आवश्यकता, आधार, पाठ्यक्रम निर्माण के सिद्धान्त, पाठ्यक्रम निर्माण के समय ध्यान रखने योग्य सावधानियाँ।
- ❖ उत्तर प्रदेश में अवर एवं उच्च माध्यमिक स्तर के संस्कृत शिक्षण पाठ्यक्रम की समीक्षा एवं मूल्यांकन।
- ❖ पाठ्य पुस्तक का मूल प्रत्यय, पाठ्य पुस्तक निर्माण के सिद्धान्त, पाठ्य पुस्तक के मूल्यांकन एवं चयन की प्रक्रिया।
- ❖ संस्कृत पाठ्यक्रम व शिक्षण हेतु चयनित पाठ्य पुस्तकों का मूल्यांकन।
- ❖ उत्तर प्रदेश के विद्यालय

#### यूनिट 5 :संस्कृत भाषा में मूल्यांकन।

- ❖ मूल्यांकन का प्रत्यय, आवश्यकता एवं परम्परागत एवं आधुनिक मूल्यांकन।
- ❖ परीक्षणों/मूल्यांकन की प्राचीन एवं नवीन विधियाँ।
- ❖ उद्देश्य केन्द्रित (ड्रमबजपम बमदजतमक) परीक्षणों की निर्माण प्रक्रिया तथा परीक्षण रचना के समय ध्यान रखने योग्य सावधानियाँ।
- ❖ अच्छे परीक्षणों की विशेषताएँ।
- ❖ विभिन्न संस्कृत विद्याओं के मूल्यांकन हेतु परीक्षण एवं उनके प्रकार।

#### यूनिट 6 : संस्कृत शिक्षण में दक्षता के प्रभावी घटक।

- ❖ संस्कृत अध्यापक की विशेषताएँ।
- ❖ संस्कृत-कक्ष, शिक्षण सामग्री के प्रकार, तकनीकी उपकरण।
- ❖ संस्कृत शिक्षण में पाठ्य सहगामी क्रियाएँ।
- ❖ संस्कृत में निदानात्मक एवं उपचारात्मक शिक्षण।
- ❖ संस्कृत शिक्षण – गृह कार्य के प्रकार एवं महत्व।

### PEDAGOGY OF SOCIAL SCIENCES (E 204)

#### CO: COURSE OUTCOMES

- CO1- Understand concept, meaning and scope of social sciences.
- CO2- Get acquainted with appropriate methodology as applicable to social sciences
- CO3- Prepare unit plan and lesson plan.
- CO4- Acquire skill in teaching social sciences.
- CO5- Acquire knowledge of various evaluation procedures and to device effective evaluation tools.
- CO6- Acquire the ability to develop instructional support materials.

#### Course Contents

### **Unit - I: Nature and Scope of Social Sciences**

- ❖ Social sciences and social studies: Course subjects of social sciences - History, Civics, Geography and Economics, inter-relationship between them
- ❖ Rational for including these areas in school curriculum
- ❖ Instructional objectives of teaching social sciences at secondary level

### **Unit - II: Methodology for Social Science Pedagogy**

- ❖ Instructional strategies, methods of teaching social science
- ❖ Strategies for teaching social science in terms of specific methods like Lecture, Question-Answer, Group Discussion, Project and Source Methods, Socialized Recitation and
- ❖ Micro teaching skills- Introduction, Reinforcement, Probing Questioning, Stimulus Variation, Explaining, Blackboard Writing etc.
- ❖ Selecting and using teaching aids: chalk boards, objects and specimen, histrionics, models, graphs, charts, maps, pictures, slides, films, filmstrips, audio-visual aids, projected aids: overhead projectors
- ❖ Use of ICT in teaching-learning process of social science with computer-aided methods like-Power Point, Simulation, Softwares, Webinars etc.
- ❖ Content analysis, unit planning and lesson planning

### **Unit - III: Curriculum and Text-Books**

- ❖ Place of social studies in Secondary School curriculum
- ❖ Teacher and Curriculum planning, hidden curriculum, Evaluation of curriculum, Characteristics of good text-book, Evaluation of textbooks, analysis of textbooks from peace education and environmental education perspective

### **Unit - IV: Social Science Teacher and co-curricular activities**

- ❖ Qualities of social science teacher
- ❖ Professional development of social science teacher
- ❖ Principles of organizing co-curricular activities
- ❖ Formation and management of social science clubs
- ❖ Organizing seminars, debates, quiz, exhibition, competition, wall magazine, manuscript
- ❖ Using community resources
- ❖ Organizing field trips
- ❖ Social science room

### **Unit - V: Transaction mode and Evaluation**

- ❖ Objectives of evaluation in social science, developing a blueprint – objective, content, items
- ❖ Essay type, short answer type and objective type question in social sciences, their advantages and limitations.
- ❖ Construction of achievement test in social science
- ❖ Continuous evaluation using feedback for improvement of teaching and learning in social science
- ❖ Diagnostic testing and remedial teaching

## **PEDAGOGY OF MATHEMATICS (E 205)**

### **CO: COURSE OUTCOMES**

- CO1-** Understand and appreciate the uses and significance of mathematics in daily life.
- CO2-** Learn successfully various approaches of teaching mathematics and to use them judiciously.
- CO3-** Know the methods of planning instruction for the classroom.
- CO4-** Prepare curricular activities as per the needs
- CO5-** Appreciate and organize activities to develop aesthetics of mathematics.

### **Course Contents**

### **Unit I: Entering into the Discipline**

- ❖ Meaning and nature of mathematics, use and significance of mathematics
- ❖ Contribution of some great mathematicians - Aryabhata, Bhaskaracharya, Ramanujam, Euclid, Pythagoras, Rene Decarte.
- ❖ Aims and objectives of teaching mathematics at secondary
- ❖ Objectives of teaching mathematics in terms of behavior outcomes.

### **Unit II: Methodology for Mathematics Teaching**

- ❖ Methods of teaching: Inductive- Deductive, Analytic- Synthetic, Problem solving, Heuristics, Project & Laboratory Method.
- ❖ Techniques of teaching: Oral, Written, Drill, Home-Assignment, Supervised study, and programmed learning technique.
- ❖ Micro teaching skills-Introduction, Reinforcement, Probing Question, Stimulus variation, Explaining, Blackboard Writing etc.
- ❖ Use of ICT in teaching-learning process of mathematics with computer-aided methods like- Power Point, Multimedia.

### **Unit III: Developing Lesson Plan, Unit Plan and Material Aids**

- ❖ Lesson plan - meaning, purpose and Performance of lesson plan and its rationality
- ❖ Unit plan – meaning and purpose of unit plan
- ❖ Teaching –aids importance and classification
- ❖ Developing/preparing low cost improvised teaching aids
- ❖ Application of computer in teaching of mathematics.

### **Unit IV: Development of Curriculum, Text Book and Activities of Mathematics**

- ❖ Principles and rationale of curriculum development, organizing the syllabi both logically and psychologically according to the age groups of children
- ❖ Planning activities and methods of developing the substitute/ alternative material to the prescribed syllabus for completing it in due course of time
- ❖ Organization of mathematics laboratory
- ❖ Text book of mathematics- qualities of a good text book of mathematics  
Using mathematics as a game for recreation; organizing quiz programmes, skill-development in answering puzzles riddles etc.
- ❖ Learning about the short cuts mentioned in Vedic mathematics
- ❖ Development of maths laboratory

### **Unit V: Evaluation in Mathematics**

- ❖ Meaning and needs of evaluation.
- ❖ Process of obtaining feedback and evaluation in mathematics in terms of cognitive affective and psychomotor behavioral development
- ❖ Comprehensive and continuous evaluation (C.C.E.) in mathematics
- ❖ Development of test item (short answer and objective type)
- ❖ Diagnostic testing and remedial teaching

## **PEDAGOGY OF PHYSICAL SCIENCES (E 206)**

### **CO: COURSE OUTCOMES**

- CO1-** Develop a broad understanding of the principles and procedures used in modern physical science education.
- CO2-** Enhance their essential skill for practicing modern physical science education
- CO3-** Develop their skills necessary for preparing international accessories.
- CO4-** Prepare acceptance lesson models which lay down this procedure to the acceptance for preparing designs for lesson.
- CO5-** Manage introduction activity in such a way that the vast majority of the learners attain most of the objectives.

### **Course Contents**

#### **Unit - I: Concept, Nature and Importance**

- ❖ Meaning and nature of physical science, path tracking discoveries and land mark development in science, impact of science on modern communities, globalization and science
- ❖ Justification for including science as a subject in school curriculum, eminent Indian and world Scientists - an introduction

#### **Unit - II: Aims and Objectives of Teaching Physical Science**

- ❖ General aims and objectives of teaching physical science at secondary and senior secondary school stage, instructional objectives with special emphasis on Bloom's taxonomy
- ❖ Concept of entering and terminal behavior, defining desired outcomes (statements of objectives) for different levels of education like primary, secondary and senior secondary.

#### **Unit - III: Methodology of Teaching Physical Science**

- ❖ Methods - Lecture, Demonstration, Lecture-cum Demonstration, Heuristic, project, Laboratory, Problem Solving
- ❖ Techniques – Team-Teaching
- ❖ Excursion, science – museums, science – club, science – fair, science projects
- ❖ Micro teaching skills-Introduction, Reinforcement, Probing Question, Stimulus variation, Explaining, Black Board-Writing etc.
- ❖ Use of ICT in teaching-learning process of physical sciences with computer-aided methods like-Power Point, Simulation, Software, Webinars etc.

#### **Unit - IV: Curriculum and Instructional Material Development**

- ❖ Meaning, definition and principles of curriculum construction and its types
- ❖ Curriculum organization using procedure like concentric, topical, process and integrated approaches, adaptation of the curriculum according to the local needs and the availability of local resources.
- ❖ Development of physical science curriculum at different stages of school education e.g. primary, upper primary, secondary and senior secondary
- ❖ Preparation, selection and use of teaching aids
- ❖ Curriculum accessories and support material - text books, journals, hand books, student's workbook, display slide

#### **Unit - V: Content Analysis and Lesson Planning**

- ❖ Content analysis, pedagogical analysis of content (Taking an example of any one topic of physical science). Following points should be followed for pedagogical analysis –

Identification of minor and major concepts, Listing behavioral outcomes, Listing activity and experiments Listing evaluation procedure

### **Unit - VI: Evaluation in Physical Science Teaching**

- ❖ Evaluation: meaning and needs, formative and summative evaluation
- ❖ Process of development of tests for measuring specific outcomes - cognitive outcomes, affective outcomes and psychomotor outcomes.
- ❖ Diagnostic testing and remedial teaching
- ❖ Preparation of achievement test

## **PEDAGOGY OF BIOLOGICAL SCIENCES (E 207)**

### **CO: COURSE OUTCOMES**

**CO1-** Develop broad understanding of principles and knowledge used in biology science.

**CO2-** Develop their essential skills for practicing biological science.

**CO3-** Know various approaches and methods of teaching life science.

**CO4-** Lesson planning of biological science properly.

**CO5-** Prepare tools for evaluation in biological sciences.

### **Course Contents**

#### **Unit I: Nature, Concepts and Importance**

- ❖ History and nature of biological sciences
- ❖ Importance of biological science for environment, health and peace
- ❖ Interdisciplinary linkage of biological science and other school subjects
- ❖ Value of biological sciences in our lives

#### **Unit II: Objectives of Teaching Biological Sciences**

- ❖ General aims and objectives of teaching biology difference between aims and objectives, Bloom's taxonomy of educational objectives
- ❖ Writing objectives in terms of learning outcomes (behavioral term) for different levels of school teaching VIII, IX and X classes-RCEM approach of writing objectives

#### **Unit III: Exploring learning**

- ❖ Inductive and deductive approach, different methods and techniques of teaching biological sciences
- ❖ Teacher centered approaches-lecture, demonstration, lecture cum demonstration
- ❖ Child centered approach-project method,
- ❖ Use of ICT in teaching-learning process of biological sciences with computer-aided methods like-Power Point, Simulation, Softwares, Webinars etc.
- ❖ Micro-teaching skills- Introduction, Explaining, Illustration, Stimulus variation, Blackboard writing etc.
- ❖ Analysis of content, preparing unit plan, lesson plan

#### **Unit IV: Learner Centered School Curriculum**

- ❖ Principles of development of biological science curriculum, trends in biological sciences curriculum.
- ❖ Analysis of text books and biology syllabi of NCERT and U.P. State VIII, IX and X classes.
- ❖ Importance and type of teaching aids, use of audiovisual aids and improvised apparatus in teaching biology, biology laboratory
- ❖ Biology museum, biology club, field trips, aquarium herbarium

### **Unit V: Concept of Evaluation and Measurement**

- ❖ Meaning and nature of evaluation and measurement
- ❖ Tools and techniques of evaluation in biological science
- ❖ Characteristics of a good test-reliability, validity
- ❖ Essay type, short answer and objective type tests, their merits and demerits
- ❖ Concept of formative, summative and diagnostic test
- ❖ Construction of achievement test
- ❖ Diagnostic testing

## **PEDAGOGY OF COMPUTER SCIENCE (E 208)**

### **CO: COURSE OUTCOMES**

- CO1-** Develop a broad understanding of the principles and procedures used in computer science education.
- CO2-** Develop their skills necessary for preparing instructional accessories
- CO3-** Know the methods of planning instruction for the classroom
- CO4-** Learn successfully various methods of teaching computer science and use them judiciously.
- CO5-** Manage instructional activity in such a way that the vast majority of the learner attains most of the objectives

### **Course Contents**

#### **Unit - I: Historical Perspectives, Aims and Objectives of Computer Science**

- ❖ Historical development of computer (hardware and software)
- ❖ Present status of computer science as a school subject.
- ❖ Significance of teaching computer science at secondary/senior secondary schools
- ❖ Aims and objectives of teaching computer science-
- ❖ Classification of educational objectives (Bloom's taxonomy)

#### **Unit - II: Development of Curriculum in Computer Science**

- ❖ Principles and rationale of curriculum development, organizing the syllabi both logically and psychologically according to the age groups of children.
- ❖ Organization of Computer Science Laboratory.
- ❖ Text book of Computer Science - qualities of a good text book of Computer Science.

#### **Unit - III: Methods of Teaching Computer Science**

- ❖ Lecture method, demonstration-cum-discussion method, personalized instruction method
- ❖ CAI technique, Hands on experience, Video Technology, Power Point Presentation, Software etc.
- ❖ Co-operative learning approach, multimedia approach
- ❖ Micro teaching Skills-Introduction, Probing Question, Stimulusvariation, Explaining, Blackboard-Writing etc.

#### **Unit - IV: Unit Planning, Lesson Planning and Teaching Aids**

- ❖ Meaning and definition of unit plan and lesson plan
- ❖ Importance and steps of planning a lesson.
- ❖ Need, Importance, preparation and using of teaching aids in computer science
- ❖ Organization of computer laboratory

#### **Unit - V: Basic Processes in Computer Science**

- ❖ Basic programming
- ❖ Data representation
- ❖ Computer organization
- ❖ Operating environment

#### **Unit - VI: Evaluation in Computer Science**

- ❖ Meaning and importance of evaluation.
- ❖ Comprehensive and continuous evaluation (CCE) in computer science
- ❖ Development of test items objective type, short answer type, essay type
- ❖ Preparation of an achievement test
- ❖ Analysis and interpretation of test results

### **PEDAGOGY OF HOME SCIENCE (E 209)**

#### **CO: COURSE OUTCOMES**

**CO1-** Understand the nature and scope of Home Science

**CO2-** Acquaint with the objectives of teaching Home Science in secondary and higher secondary schools.

**CO3-** Acquire skills in planning a lesson with reference to methods and instructional materials and processing it effectively.

**CO4-** Understand the various methods and techniques that can be employed in the teaching of Home Science.

**CO5-** Develop a practical understanding of the technology of teaching Home Science and giving them practice in the use of various aids relating to the technology of teaching.

#### **Course Contents**

##### **Unit - I: Concepts**

- ❖ The concept of home science: meaning and components; place of home science in secondary education
- ❖ Job opportunities in home science
- ❖ Aims and objectives of teaching of home Science

##### **Unit II : Pedagogical Analysis**

- ❖ Foods, nutrition and health
- ❖ Child care
- ❖ Fiber and fabric

- ❖ Home management-importance of planning
- ❖ Hygiene and sanitation

### **Unit III: Methods of Teaching**

- ❖ Method of teaching as applied to home science  
Teacher centered methods-lecture, demonstration  
Child centered method-laboratory, project, assignment, discussion
- ❖ Micro-teaching skills-Introduction, Explaining, Probing Questioning, Illustration, Stimulus variation, Blackboard writing, etc.
- ❖ Use of ICT in teaching-learning process of home science with computer-aided methods like-Multimedia, Simulation, Webinars etc.

### **Unit IV: Equipments of Teaching**

- ❖ Development and designing of curriculum
- ❖ Teaching aids-classification and importance
- ❖ Concept of Unit and lesson plan, preparation of unit and lesson plan
- ❖ Planning of space and equipment for home science laboratory

### **Unit V: Evaluation**

- ❖ Evaluation in home science-meaning and importance of evaluation
- ❖ Characteristics of a good evaluation device
- ❖ Evaluation devices-written, oral, observation, practical work, assignment
- ❖ Diagnostic testing and remedial teaching

## **PEDAGOGY OF COMMERCE (E-210)**

### **CO: COURSE OUTCOMES**

**CO1-** Acquire knowledge of the terms and concepts used in the pedagogical analysis of Commerce and Accountancy

**CO2-** Understand lesson planning and evaluation aspects in teaching Commerce and Accountancy

**CO3-** Apply the knowledge in analyzing higher secondary Commerce and Accountancy contents in terms of the techniques and aids for the purpose of teaching Commerce and Accountancy

**CO4-** Develop skills in the preparation of lesson plan and construction of evaluation tools using the suitable techniques

**CO5-** Develop interests in learning recent developments in Commerce and Accountancy

**CO6-** Develop a desirable positive attitude towards the teaching of Commerce and Accountancy.

### **Course Contents**

#### **Unit I: Concept, Aims and Objectives of Commerce Teaching**

- ❖ Meaning and scope of commerce as a subject,
- ❖ Meaning of Commerce education and historical development of commerce education in India
- ❖ Aims of commerce education

- ❖ Objectives of commerce education at High school and Intermediate levels (vocational & academic)
- ❖ Instructional objectives - meaning, importance and specification of instructional objectives in behavioural terms (with respect to Bloom's Taxonomy)

### **Unit II: Methods of Commerce Teaching**

- ❖ Lecture and discussion methods, Project method, Problem solving method, Approaches of book-keeping teaching (journal approach, ledger approach, cash-book & equation approach) Plans of commercial practice teaching (office model)
- ❖ Micro teaching Skills-Introduction, Reinforcement, Probing Question, Stimulus variation, Explaining, Blackboard-Writing, etc.
- ❖ Use of ICT in teaching-learning process of commerce with computer-aided methods like-Power Point, Simulation, Software, Webinars etc.

### **Unit III: Techniques and Teaching Aids**

- ❖ Techniques of commerce teaching-questioning and demonstration
- ❖ Text book of commerce teaching
- ❖ Commerce room
- ❖ Teaching aids in commerce

### **Unit IV: Curriculum, Correlation with other Subjects, Commerce Teacher and Lesson Planning**

- ❖ Curriculum in commerce (i) principles of curriculum construction (ii) critical evaluation of High School syllabus
- ❖ Correlation of commerce with other subjects (i) need and importance (ii) correlation with math, geography and economics
- ❖ Commerce teaching (i) profile of a good commerce teacher (ii) professional growth of a commerce teacher
- ❖ Lesson Planning-meaning, need
- ❖ Unit and resource planning

### **Unit V: Evaluation in Commerce**

- ❖ Concept, scope and importance of evaluation
- ❖ Tools and techniques of evaluation
- ❖ Construction and administration of an achievement test
- ❖ Diagnostic testing and remedial teaching

## **(Teaching Skills) Practical Work**

### **EF 2(A): Preparation to Function as a Teacher (E-701)**

During the first year, the teacher-preparation programme will offer the training amounting to a maximum of 8 weeks. This will include:

- ❖ **Two week workshop on Lesson-Planning** based on constructivist approach (Covering different aspects like theory of lesson-planning, questioning, Defective Questions, Developing Question, How to put Question, How to receive Answers, Discipline, Role of Eye-control, etc.).
- ❖ **Two week workshop on 'Micro-Teaching'** (at least 5 teaching skills will be mastered in each Pedagogy course like-Introduction, Reinforcement, Probing Question, Stimulus Variation, Explaining etc. ).
- ❖ **Two week Practice-Teaching in Simulated condition** in each Pedagogy course. During this phase every student-teacher will **teach at least 6 lessons**. These lessons will be observed by subject-supervisors

- ❖ **Two week Practice-Teaching in Real-Class room situation in a school.** For it, the student-teachers will be attached to a particular school as 'School Attachment', where they will deliver their lessons. During this phase every student-teacher will **teach at least 20 lessons**. These lessons will be observed by peers as well as by subject-supervisors daily, which will provide them feedback for the modification of their behavior.

This shorter period is to provide the student-teachers adequate exposure to have a 'feel' of dealing with teaching-learning. It will help him/her to develop the basic teaching skill required to deal with students effectively in classroom.

**(E-702 & 704)**

**Viva- Voce Examination based**

**On**

**Task and Assignments that run through all the courses CC 1-7 and PC 1 to 42 EPC**

**Activities**

### **EPC 1: Strengthening Language Proficiency**

Language is the medium for comprehending ideas, for reflection and thinking, as well as for expression and communication. Enhancing one's capacity in language proficiency is thus a vital need of student-teachers irrespective of the subject area that they are going to teach.

**Objectives: To enable student-teachers to-**

- Strengthen the ability to read correctly
- Strengthen the ability to pronunciation
- Strengthen the ability to write correctly
- Strengthen the ability to communicate correctly

**Activities**

One or two workshops on Language proficiency course on Hindi and English of 7-10 day each may be organized. It may course the following content –

- हिन्दी भाषा (1) वर्ण-स्वर व व्यंजन ध्वनि, मात्राएं (2) शब्द – पर्यायवाची व विलोम शब्द (3) शब्द रचना-सन्धि, समास, उपसर्ग, प्रत्यय (4) रूप विचार- संज्ञा, सर्वनाम, विशेषण, क्रिया क्रियाविशेषण, आदि (5) वाक्य विचार-विराम चिन्ह, आदि (6) रचना-पत्र, प्रार्थना पत्र, निबन्ध कहानी आदि।

English Language – (i) Alphabet-Vowel & Consonant sounds (ii) word-synonym & Antonym (iii) Word Formation (iv) Parts of Speech – Noun, Pronoun, Adjective, Verb, Adverb, etc. (v) Sentence-Punctuation & Analysis (vi) Composition-Letter, Application, Essays, Story, etc.

### **EPC 2: Art and Aesthetics**

The need to integrate arts education in the formal schooling of our students is to retain our unique cultural identity in all its diversity and richness. The National curriculum Framework (2005) reminds us that the school curriculum must integrate various domains of knowledge with a deep relationship between head, heart & hand so that the curriculum encompasses all and is not separated from the co-curricular or extra-curricular.

**Objectives: To help student-teachers to-**

- Gain direct experiences
- Develop motor skill
- Make students believe in the dignity of labor
- To nurture children's creativity and aesthetic sensibilities.

## Activities

An artist may be invited to organize a workshop on Art & Aesthetics. The student-teachers may be asked to prepare at least 5-items of different categories-

- Paper meshing
- Pot Decoration
- Wall hanging
- Paper cutting
- Flower making
- Candle Making
- Stitching
- Knitting
- Embroidery
- Soft toys making
- Paper framing
- Weaving or printing of textiles
- Making of poster
- Making of Rangoli
- Making of Puppets etc.

## EPC 3: Reading and Reflecting on Texts

This course will serve as a foundation to enable student-teachers to read and respond to a variety of texts in different ways depending on the purposes of reading, like-personal or creative or critical or all of these.

### Objectives: To enable student-teachers to-

- Develop study – habits
- Develop skill of reading & writing
- Develop skill of summarization
- Develop skill of note-taking.

## Activities

Student-teachers are expected to sit in the library regularly and to review at least 10-books of different categories in about 500 words each. These may be as follows –

- Review of text books related to core courses
- Review of reference Book related to core courses
- Review of Text Books related to Pedagogy courses
- Review of Reference to Book related to Pedagogy courses.
- Review of Policy Documents, Autobiography, Commission Reports, etc.
- Review of studies about school, historical books and other educational miscellaneous books.

## EPC 4: Understanding of ICT

Preparing teachers to use technology in a classroom is an important step of ICT enabled education in the country. This course will focus on moving beyond computer literacy and ICT aided learning, to help student-teachers interpret and adapt ICTs in the teaching-learning process.

### Objectives: To enable student-teachers to-

- ❖ Have a basic familiarity with computers
- ❖ Understand & appreciate ICT as an effective learning tool for learners
- ❖ Understand ICT as an enormous functional support to teachers.

**Activities A workshop on ICT for 10-15 days may be organized or a provision of one period/week may be made daily in the time-table to learn and to practice in computer labs. Student-teacher sare expected to learn the following:**

- ❖ Use of radio and audio media in script writing, story-telling, etc.
- ❖ Use of TV & video in education
- ❖ Use of newspaper in education
- ❖ Functional knowledge of operating computers- word processing, power point, excel, etc.
- ❖ Effective browsing of the internet for selecting relevant information.
- ❖ Downloading relevant material
- ❖ Competencies in developing software
- ❖ Developing PPT slide show for classroom use
- ❖ Use of available software or CDs with LCD projection for subject learning interactions
- ❖ Generating demonstrations using computer software.

### **EPC 5: Working with Community**

This programme gives opportunity to attach with and to solve the problems of the community to make the student-teachers sensitive and aware about the society.

**Objectives: To enable student-teachers to-**

- ❖ Develop social-sensitivity among student-teachers
- ❖ Develop sympathy with the poor and the people below-poverty-line.
- ❖ Develop awareness about the environment.
- ❖ To have the positive attitude toward the neglected class.

**Activities:**

This can be achieved by organizing a number of programme for the welfare of the community, like –

- ❖ To educate the dropouts and adults (Literate India)
- ❖ To educate the people of slum areas to take the nutritious diet. (Quit Mal-nutritious).
- ❖ To make the people learn the importance of small family norm (chota pariwar sukhi pariwar)
- ❖ To make the people learn the importance of the girls-child & its education for the Familyand the society (Beti Bachao Beti Padhao)
- ❖ To motivate the people to grow more plants (Green India)
- ❖ To motivate the people to keep the city and the public places clean (Clean India)
- ❖ To motivate the people to save river and ponds (Clean Water)

### **EPC 6: Basics of Research**

This programme will enable the student teacher to know the basic research methodology, to identify the school based research problem and to solve them scientifically. In the course student teacher will do the research and write the report using the following points:-

- ❖ Identification of an educational problem.
- ❖ Formulation of various solutions.
- ❖ Selection of the most probable solution
- ❖ Developing a tool for data collection
- ❖ Data collection
- ❖ Data analysis
- ❖ Reporting findings

## **EPC 7: Drama and Art in Education**

Real education implies reflection, introspection and action, with a deep relationship between the Head, Heart and Hand. Drama and art helps the student teacher to understand the self and to realize it as a form of self-expression and for enhancing creativity.

Following activities can be organized under the course: (any two)

- ❖ Script writing
- ❖ Street play
- ❖ Visit to an art gallery
- ❖ Visiting/Organizing exhibitions
- ❖ Visiting/Organizing cultural fests
- ❖ Report on the folk life
- ❖ Interview with experts from the field like artists, actors, singers, writers, poets, painters, musicians, dancer, etc
- ❖ Appreciation of a film/drama/novel/folk drama, etc.
- ❖ Use of Music/ Arts in Education

## **EPC 8: Entrepreneurship Development**

Education system plays a critical role in the economic advancement of nation, since it is the primary developer of human resource. Entrepreneurship education and training is about the development of professional skills and qualities of the student teachers so that they can gain knowledge and understand the ways in which the economy works. This evolves approaches to the development of creativity, problem solving, decision making, team working, leadership and other individual skills. It also identifies the role of the entrepreneur in the society and various requirements of self-employment.

**Following activities shall be organized under the course: (any one)**

**Field work:-**

- ❖ Educational Market Survey for needs analysis
- ❖ Interview of Educational Book Publisher/Entrepreneurs
- ❖ Visit to Vocational Institute
- ❖ Survey of the usability of an existing /self-developed educational product
- ❖ Write an essay on „Entrepreneurship“

**B.Ed. II Year Syllabus**  
**Core Course (CC-5)**

**CREATING AN INCLUSIVE SCHOOL (E-301)**

**CO: COURSE OUTCOMES**

**CO1-** Understand inclusive education- concept and nature.

**CO2-** Understand the global and national commitments towards the education of children with diverse needs

**CO3-** Prepare conducive teaching learning environment in inclusive schools.

**CO4-** Identify and utilize existing resources for promoting inclusive practice

**Course Contents**

**Unit - I: Introduction to Inclusive Education**

- ❖ Definition, concept needs and importance of inclusive education
- ❖ Historical perspectives on education of children with diverse needs
- ❖ Difference between special education, integrated education and inclusive education
- ❖ Policies and legislations for inclusive education and rehabilitation

**Unit - II: Children with Diverse Needs**

- ❖ Definition and characteristics of children with diverse needs
- ❖ Sensory (hearing, visual and physically challenged)
- ❖ Intellectual (gifted, talented and mentally challenged)
- ❖ Developmental disabilities (autism, cerebral palsy, learning disabilities)
- ❖ Social and emotional problems
- ❖ Scholastic backwardness, under achievement, slow learners
- ❖ Children with special health problems
- ❖ Environmental / ecological difficulties
- ❖ Children belonging to other marginal groups

**Unit - III: Inclusive Education and its Practices**

- ❖ Inclusive instructional design and collaborative instruction for inclusion.
- ❖ Differentiating instruction – peer tutoring and peer mediated instruction and interventions, co-operative learning and co-operative teaching assignments, self- regulated learning
- ❖ Inclusive instruction strategies at school level- remedial help, team teaching, co-teaching, student assistance teams, buddy system, circle of friends
- ❖ E-learning and inclusive education

**Unit - IV: Inclusive Schools**

- ❖ Infrastructural facilities for an inclusive school
- ❖ An ideal inclusive school
- ❖ Role of inclusive school in modern times.
- ❖ Inclusive classroom managements

**Unit - V: Teachers Role in Inclusive Education**

- ❖ Qualities of an inclusive teacher
- ❖ Teachers role in shaping inclusive class room

- ❖ Inclusive teacher educator in facilitating inclusive education
- ❖ Guidance and counseling for inclusive teachers, students and principals

### **Suggested Readings:**

## **Core Course (CC-6)**

### **GENDER, SCHOOL AND SOCIETY (E-302)**

#### **CO: COURSE OUTCOMES**

**CO1-** Sensitize the future teachers towards basic understanding of various key concepts of gender studies.

**CO2-** Learn about gender issues in school, curriculum and textual materials across disciplines, pedagogical process and its interaction with class, caste, religion and region.

**CO3-** Help them understand the contribution of women in social, economic & political development of the society.

**CO4-** Apply the conceptual tools learn regarding gender & sexuality to understand issues related to sexual harassment at the workplace and child sexual abuse.

#### **Course Contents**

#### **UNIT - I: Gender Issues: Key Concepts**

- ❖ Gender, sex, sexuality, patriarchy, masculinity and feminism – in cross cultural perspectives
- ❖ Gender bias, gender stereotyping and empowerment
- ❖ Equity and equality in relation with caste, class, religion, ethnicity

#### **UNIT - II: Gender Inequality in the Schools**

- ❖ In the structure of knowledge.
- ❖ In the development of curriculum, gender and hidden curriculum.
- ❖ Gender in text and context (text books inter-sectionality with other disciplines, classroom processes including pedagogy)
- ❖ In the class room
- ❖ In the management of school

#### **UNIT - III: Women in Indian Society**

- ❖ Situational analysis of women in India society (focus on sex ratio pattern, education, health, work participation violence against women)
- ❖ Women's access to and participation in formal and non-formal education (gender bias in enrolment, curriculum content, dropouts)
- ❖ Participation of women in planning and decision making
- ❖ Human right

#### **UNIT - IV: Theories on Gender and Education: In Indian Context**

- ❖ Socialization theory
- ❖ Gender difference theory
- ❖ Structural theory
- ❖ Deconstructive theory

#### **UNIT - V: Gender, Sexuality, Sexual Harassment and Abuse**

- ❖ Linkage and differences between reproductive rights and sexual rights.
- ❖ Development of sexuality, including primary influences in the lives of children (such as gender, body image, role models)
- ❖ Sites of conflict : social
- ❖ Understanding the importance of addressing sexual harassment in family, neighborhood
- ❖ Agencies perpetuating violence : family, school
- ❖ Institutions redressing sexual harassment and abuse.

#### **Suggested Readings:**

- Geetha, V . (2007). Gender. Stree: Calcutta.
- Ghai, A. (2005). Inclusive education: A myth or reality In Rajni Kumar, Anil Sethi

#### **Core Course (CC-7)**

### **KNOWLEDGE, LANGUAGE & CURRICULUM (E-303)**

#### **CO: COURSE OUTCOMES**

**CO1-** To examine the Epistemological basic of education

**CO2-** To understand the concept and principles of curriculum development

**CO3-** To understand the formulation of new curriculum

**CO4-** To develop the ability to read & comprehend

**CO5-** To develop writing skill

#### **Course Contents**

##### **Unit – I: Knowledge**

- ❖ Epistemology – meaning, philosophical basic of knowledge according to Indian and Western philosophy
- ❖ Knowledge – nature and sources, validity of knowledge
- ❖ Differences between knowledge and skill, teaching and training, knowledge and information, reason and belief

- ❖ Chronological review on knowledge generation, myth based faith and logical based knowledge, various structures of society

### **Unit - II: Language and Reading Comprehension**

- ❖ Need and importance
- ❖ Types of reading : skimming and scanning
- ❖ Strategies for effective reading, mechanism for reading, loud reading
- ❖ Schema theory of reading

### **Unit - III: Developing Writing skills**

- ❖ Need and importance
- ❖ Making reading writing connection
- ❖ Process and strategies of writing for children, mechanism of writing, summarizing

### **Unit - IV: Curriculum and Development**

- ❖ Meaning and concept of curriculum syllabus and units
- ❖ Curriculum development – meaning, concept stages in the process of curriculum development
- ❖ Fusion Intervention & Inter-subject co-relation

### **Unit - V: Determinants of Curriculum**

- ❖ Philosophical Foundation of curriculum development in view of different schools of philosophy
- ❖ Social and political forces, cultures and cultural roots of curriculum, sociology of curriculum
- ❖ Model of curriculum development : Hilda Taba's Model
- ❖ Core curriculum, activity curriculum

#### **Suggested Readings:**

### **PC 3: ASSESSMENT FOR LEARNING (E-401)**

#### **CO: COURSE OUTCOMES**

**CO1-** Become cognizant of key concepts such as measurement & evaluation, assessment, test examination, formative & summative evaluation etc

**CO2-** Be exposed to different kinds of assessment that aid student learning.

**CO3-** Have an idea of new trends in evaluation.

**CO4-** Learn the different characteristics of standardize test-Reliability, validity, Norms, etc.

**CO5-** Relate & use statistics in educational setting

### **Course Structure**

#### **Unit - I: Assessment and Evaluation**

- ❖ Concept of measurement and evaluation, test assessment, examination, formative & summative evaluation, open book examination, grading, cumulative grade point average (CGPA)
- ❖ Purposes of assessment in a 'constructivist' paradigm, distinction between Assessment for Learning & 'Assessment of Learning'

#### **Unit - II: Assessment tools**

- ❖ Quantitative and qualitative Tools.
- ❖ Constructing an achievement test- blue-print
- ❖ Standardization of test – objectivity, reliability validity

#### **Unit - III: Techniques of Test Conduct**

- ❖ Importance of establishment of rapport with the students
- ❖ Security of tests and testing material
- ❖ Arranging the seat and distribution of question for minimum pillage and copying
- ❖ Technique of avoiding guessing in answering objective questions
- ❖ Introducing flexibility in examination
- ❖ Improving quality and range of questions including school-based credits

#### **Unit - IV: Data and Measures of Central tendency**

- ❖ Data: meaning and types, frequency distribution, graphic representation, percentage
- ❖ Central Tendency – Mean, Median, Mode.

#### **Unit - V: Measures of Variability and Correlation**

- ❖ Range, quartile deviation, mean deviation, standard deviation, percentile
- ❖ Rank- order method

#### **Unit - VI: Normal Probability Curve**

- ❖ Meaning, characteristics and use of NPC

#### **Suggested Readings:**

- Linn, Robert L. and Gronlund, Norman E. (2000). Measurement and Assessment in Teaching; Pearson Education Inc.

**PC 4: (OPTIONAL COURSE-ANY ONE)**

**EDUCATIONAL ADMINISTRATION AND MANAGEMENT**

**(E-501)**

**CO: COURSE OUTCOMES**

**CO1-** Acquaint the student teachers with the concept and concerns of educational administration.

**CO2-** Develop an understanding of the role of the headmaster and the teacher in school management.

**CO3-** Enable the students to understand the concept and importance of communication and its possible barriers in educational administration.

**CO4-** Enable the student teacher to critically analyse the administrative scenario in relation to the functioning of the other secondary schools of the area.

**CO5-** Acquaint the student teacher with the scientific practices of educational management and keep him to apply it in work situation

**Course Contents**

**Unit - I: Concept of Educational Administration**

- ❖ Concept of educational management human beings as inputs, process and product inputs
- ❖ Nature, objectives and scope of educational administration

**Unit - II: Basic Functions of Administration**

- ❖ Planning, organizing, directing and controlling
- ❖ Maintenance of discipline, control management
- ❖ Co-ordination and growth development
- ❖ Supervision and inspection, defects in the present supervision and inspection.
- ❖ Scope of educational supervision, types of supervision, providing guidance, leadership function, crisis in management, decision making

**Unit - III: Communication in Educational Administration**

- ❖ Role of communication in effective management and administration
- ❖ Methods of communication
- ❖ Barriers of communication in educational administration
- ❖ Overcoming barriers to communication and effective communication in educational administration

**Unit - IV: Management of Schools**

- ❖ Role of headmaster in planning of school activities approaches to management- manpower approach, cost benefit approach, social demand approach, and social justice approach
- ❖ Involvement of other functionaries and agencies in the preparation of a plan
- ❖ Delegation of authority and accountability
- ❖ Role of the headmaster in monitoring, supervision and evaluation
- ❖ Role of headmaster in motivating the staff, in resolution of interpersonal conflicts
- ❖ Role of the headmaster in creating resources and managing financial matters
- ❖ Optimum use of available resources for growth and development of the school
- ❖ Staff development programmes.
- ❖ Role of teachers in school management and administration

**Unit - V: Educational Administration in the State**

- ❖ The administrative structure in the field of education in the state
- ❖ Control of school education in the state a critical analysis

- ❖ Functions of the state government in relation to secondary and higher secondary schools
- ❖ Functions of the board of secondary education in controlling secondary schools
- ❖ Problems of secondary school administration in government schools

## **GUIDANCE AND COUNSELLING (E-502)**

### **CO: COURSE OUTCOMES**

**CO1-** Develop an understanding of the need and importance of career information for the pupils.

**CO2-** Identify their role and function in locating, collecting, evaluating and disseminating career information for the use of pupils.

**CO3-** Develop an understanding of how one's ability, interests and aptitudes are related to world of work.

**CO4-** Know about the importance of developing the right attitude and values at every stage of education.

### **Course Contents**

#### **Unit - I: Meaning and concept of Guidance**

- ❖ Concepts, need and importance of guidance
- ❖ Principles of guidance, procedure of guidance (steps)
- ❖ Types-educational, vocational and personal
- ❖ Counselling-need functions and types
- ❖ Observation, interview and sociometry as techniques of guidance

#### **Unit - II: Meaning and concept Counseling**

- ❖ Concepts, need and importance of counseling
- ❖ Principles of counseling, counseling process and role
- ❖ Directive, non-directive and elective counseling
- ❖ Lectures, discussions and dramatic as techniques of counseling

#### **Unit - III: Meaning and concept Career Information**

- ❖ Meaning of career and career information components of career information.
- ❖ Occupational information, information about education and opportunity and personal-social information.
- ❖ Aims to study career information at different levels
- ❖ Career information: sources, method of collection, classification and filling-up of information and evaluation of the information

#### **Unit - IV: Career Information and Training**

- ❖ Information about education and training opportunities of primary, elementary and secondary levels of school

#### **Unit - V: Career Information and School**

- ❖ Personal-social information at every school level

## ENVIRONMENTAL EDUCATION (E-503)

### CO: COURSE OUTCOMES

**CO1-** Enable the student teacher understands about the concept of environmental education.

**CO2-** Develop in the student teacher a sense of awareness about the environmental pollution, and possible hazards and its causes and remedies.

**CO3-** Develop a sense of responsibility towards conservation of environment, bio-diversity and sustainable development.

**CO4-** Develop reasonable understanding about the role of school and education in fostering the idea and learning to live in harmony with nature

**CO5-** Enable the students to understand about the various measures available to conserve the environment for sustaining the development.

### Course Contents

#### Unit - I: Basic Concept and Nature of Environment

- ❖ Meaning, scope and nature of environment, natural and man-made environment
- ❖ Ecosystem-structure, function and components.
- ❖ Energy flow in ecosystem-food chains, food webs and ecological pyramids.
- ❖ Introduction and characteristic feature of-forest, grass land, desert and aquatic ecosystem.

#### Unit - II: Natural Resources and Associated Problems

- ❖ Forest resources – use and overexploitation. Deforestation-cause, effects and remedy
- ❖ Water resources- use and overexploitation of surface and ground water, rain water harvesting and watershed management.
- ❖ Mineral resources-use, exploitation and conservation, effect of mining on man and environment
- ❖ Food resources- world food problems-changes caused by agriculture and overgrazing, effect of modern agriculture, fertilizers, pesticides, water logging and salinity.
- ❖ Energy resources- growing energy need renewable and non-renewable energy sources, conservation and alternate energy sources

#### Unit - III: Biodiversity and its conservation

- ❖ Meaning and values of biodiversity, India as a mega diversity nation
- ❖ Threats to biodiversity-habitat loss, poaching of wild life, man wildlife conflicts
- ❖ Conservation of genetic diversity, an important environment priority: learning to live in harmony with nature

#### Unit - IV: Environment Issues and Its Preventive Measures

- ❖ Causes and effects of environmental hazard, global and local environmental pollution and its remedies, Air, Water, Soil, Marine, Noise, Thermal and Nuclear Pollution
- ❖ Climate change- Global Warming, Acid Rain, Ozone layer depletion, Polar Melting.
- ❖ Natural disasters-Flood, Earthquake, Cyclone and Landslides.

#### Unit - V: Environment Management

- ❖ Salient features of environmental awareness through education, programmes of environmental education for secondary school children
- ❖ Programmes of environmental education for attitude changes among the children
- ❖ Environmental ethics and values
- ❖ Environmental acts, rule and regulations
- ❖ National efforts-Ministry of Forest and Environment, government plans, action and policies
- ❖ Role of school in environmental conservation and sustainable development

## COMPUTER EDUCATION (E-504)

### CO: COURSE OUTCOMES

**CO1-** Acquire knowledge of computers, its accessories and software

**CO2-** Understand features of MS Office and their operations

**CO3-** Apply the knowledge gained in respect of to process various data of students as well as simple library financial transaction of the school.

**CO4-** Appreciate the value of CAI/CML packages on optional subjects and use them in class room instruction.

**CO5-** Acquire skill in accessing World Wide Web and Internet and global accessing of information. integrate technology in to classroom teaching learning strategies

### Course Contents

#### Unit I: Meaning, Definition and Historical Perspectives of Computer

- ❖ Meaning and definition of computer
- ❖ Historical perspective
- ❖ Computer generations and its classification
- ❖ Block diagram of a computer Peripherals, and working of a computer

#### Unit II: Computer Hardware

- ❖ Input devices: keyboard, mouse, joystick, touch screen, touch pad, magnetic ink character reader, optical mark reader, bar code reader, scanner, web camera etc.
- ❖ Output devices: monitor printers (line, serial, dot matrix, inkjet, and laser).
- ❖ Primary storage devices: RAM ROM and its types.
- ❖ Secondary storage devices: FDD, HDD, CD, DVD, Pen Drive (USB)

#### Unit III: Binary Arithmetic and Data Representations:

- ❖ Decimal and binary number system
- ❖ Representation of characters
- ❖ Integers and fractions in computers
- ❖ Films point representation and floating point representation

#### Unit IV: Computer Programmes

- ❖ MS-WINDOWS
- ❖ MS-WORD
- ❖ SPREADSHEET
- ❖ POWER POINT
- ❖ INTERNET

#### Unit V: Computers in Education

- Computer application in educational institutions-
  - o Co-curricular activities
    - ⌋ Academic activities
    - ⌋ Administrative activities
  - o Examination work
  - o Research activities
  - o Library
  - o Class room teaching

## HEALTH, PHYSICAL EDUCATION & YOG (E-505)

### CO: COURSE OUTCOMES

**CO1-** Understand the concept of wholistic health and its various dimension and determinants of health.

**CO2-** Acquaint them to school health programme & its importance.

**CO3-** Sensitize the student teacher towards physical fitness & its importance.

**CO4-** Acquire the skills for assessment of physical fitness.

**CO5-** Introduce them to the philosophical bases of Yoga.

**CO6-** Understand the process of stress management through Yoga education.

### Course Contents

#### Unit - I: Health

- ❖ Introduction, definition and meaning of health
- ❖ Dimension of health
- ❖ Determinants of health
- ❖ Importance of balance diet
- ❖ School health programme and role of teacher in development of health

#### Unit - II: Physical Education

- ❖ Introduction, definition and meaning of physical education
- ❖ Objectives of physical education.
- ❖ Scope of physical education and allied areas in physical education
- ❖ Need and importance of physical education in different level of school

#### Unit - III: Physical Fitness

- ❖ Definition, meaning type and factors of physical fitness
- ❖ Factors affecting physical fitness
- ❖ Benefits of physical fitness
- ❖ Importance of physical activities at school level
- ❖ Assessment of physical fitness

#### Unit - IV: Concept of Yoga and Ashtang Yoga

- ❖ Yoga meaning concept and importance
- ❖ Mis-concept of yoga
- ❖ Eight disciplines of Yog-Ashtang Yoga
- ❖ Precautions to keep in mind while performing Yogasan
- ❖ Different types of Yogassans & their techniques of practicing

#### Unit - V: Meditation, Pranayam and Stress Management

- ❖ Pranayam: meaning, nature and relationship with mind
- ❖ Different types of Pranayam; kapalbhati; Bhastrika Pranayam, Surya Bhedan Pranayam, Chandrabhedan Pranayam, Anulomvilom Pranayam
- ❖ Meditation: nature, procedure and importance
- ❖ Stress: meaning, reasons, role of Yog in stress management

## LIFE STYLE MANAGEMENT (E-506)

### CO: COURSE OUTCOMES

**CO1-** Understand the theoretical foundations of Life Skills Education

**CO2-** Apply Life Skills in various spheres.

**CO3-** Ability to contribute as youth workers specialized in the area of Life Skills Education.

**CO4-** Develop the spirit of social responsibility in students.

**CO5-** Develop social and emotional well-being in students.

### Course Contents

#### Unit - I: Introduction

- ❖ Life Skills: Concept, need and importance of Life Skills for human beings.
- ❖ Life Skills Education: Concept, need and importance of Life Skills Education for teachers.
- ❖ Difference between Livelihood Skills and Life Skills.
- ❖ Core Life Skills prescribed by World Health Organization.
- ❖ Key Issues and Concerns of Adolescent students in emerging Indian context.

#### Unit - II: Process and Methods Enhancing the Life Skills

- ❖ Classroom Discussions
- ❖ Brainstorming and Role plays
- ❖ Demonstration and Guided Practice
- ❖ Audio and Visual activities, e.g. Arts, Music, Theatre, Dance
- ❖ Small Groups discussions followed by a presentation of group reports.
- ❖ Educational Games and Simulation
- ❖ Case Studies, Storytelling, Debates
- ❖ Decision making and mapping of using problem trees.

#### Unit - III: Core Life Skills (I)

- ❖ Skills of Self-awareness and Empathy: Concept, Importance for Teachers in particular, Integration with the teaching learning process, learning to live together with other living beings. acceptance of diversity in perspectives of different societies and cultures. Acceptance and importance of all living being as along ecological and psychological social structures.
- ❖ Skills of Coping with Stress and Emotion: Concept, importance for Teachers in particular and Integration with the teaching learning process.

#### Unit - IV: Core Life Skills (II)

- ❖ Skills of Critical thinking and Creative thinking: Concept, importance for Educationists, Integration with the teaching learning process.
- ❖ Skills of Problem Solving and Decision making: Concept, importance for Educationists, Integration within the teaching -learning process.

#### Unit – V: Core Life Skills (III)

- ❖ Skill of Effective Communication: Concept, importance for Human beings and Educationists, Integration within the teaching learning process.
- ❖ Skills of Building Interpersonal relationships: Concept, Importance for Teachers in particular and Integration with the teaching- learning process.

**(Teaching Skills) Practical  
Work EF 2(B): School  
Internship (E-703)**

In the second year, there shall be a minimum of 16 weeks of intensive engagement with the school in the form of School Internship. For this, the student-teachers will go for 'School Placement', during which their role in the school is something like an apprentice and they shall work as a regular teacher & participate in all the school activities including planning, teaching and assessment, interacting with school-teachers, & children to understand the school in totality its philosophy & aims, organization and management, the life of a teacher, the needs of the physical, mental and emotional development of children. They will be engaged in school functioning in all its aspects in consultation with the School-mentor, like-

- ❖ Participating in various 'out-of-class room' activities in school.
- ❖ Organizing events e.g., cultural activities, debates, games, quiz, essay-competition, drama, etc.
- ❖ Preparation of School calendar, time-table, assessment schedule, evaluation tools etc.
- ❖ Preparing a suggested comprehensive plan of action for some aspect of school improvement.

School-Internship shall be designed to lead to the development of 'Teaching Competence of a professional, teacher dispositions and sensitivity.

During internship, student-teachers will be provided opportunities to teach in government and private schools with systematic support and feedback from the faculty. During this period, student-teachers will be actively engaged in teaching at school and will participate in day-to-day activities of school.

It is important that the student-teachers will consolidate and reflect on their teaching experience during the school-internship.

- ❖ Student-teachers will maintain a **Journal (A Diary)** in which he/she records one's experiences and observations, etc. daily.
- ❖ Student-teachers will maintain a **Portfolio** of all the activities like-details of daily-teaching eg., topic, date, class, objectives of teaching, resources used, assessment tools, homework given, etc.
- ❖ Student-teachers will **teach at least 30 lessons** during internship period. These lessons will be observed by their mentors in the school.
- ❖ Student-teachers will work on an **Action Research based Project** on any Educational problem of School, which will be selected in consultation with the concerned faculty supervisor.

**Final Presentation**

At the end of School-Internship each student-teacher will be expected to present

- ❖ **The Journal**-Containing day-to-day report about different activities, like-teaching, events, etc. mentioned above.
- ❖ **The Portfolio**- Containing evidences (proof) of different activities and events in the form of different photographs, etc.
- ❖ **The Project Report**-Containing the data, analysis and interpretation based on Action Research conducted by him/her.
- ❖ **Presentation of Teaching through ICT**- on any topic of school subject.

These four activities will be included in the evaluation of School-Internship.

- ❖ The Journal of 50 marks
- ❖ The Portfolio of 50 marks
- ❖ The Project Report of 50 marks
- ❖ Presentation of teaching through ICT on any topic of school subject of 50 marks

# **School of Law and Constitutional Studies**

## **Shobhit University, Gangoh**

**(Established by UP Shobhit University Act No. 3, 2012)**

### **School of Law and Constitutional Studies**

#### **Ordinances, Regulations & Syllabus**

**For**

**Bachelor of Law (LLB) Three Year Programme Semester  
Pattern  
(w.e.f. session 2022-23)**

**Revised and approved in the year 2022 (17<sup>th</sup> meeting Board of  
Studies**

## **Programme Educational Objectives (PEOs)**

**PEO 1** To provide students with a comprehensive understanding of legal principles, doctrines, and the framework of laws governing various fields.

**PEO 2** To develop the ability to critically analyze legal issues, interpret statutes, and apply legal reasoning to complex situations

**PEO 3** To instill ethical values and professional integrity, ensuring that graduates adhere to the highest standards of legal practice and contribute to social justice and equity

**PEO 4** To enhance oral and written communication skills, equipping students to present legal arguments persuasively and represent clients effectively in courts, tribunals, and other forums.

**PEO 5** To cultivate strong legal research skills and foster an attitude of lifelong learning, enabling students to stay updated with legal developments and contribute to academic and professional discourses.

**PEO 6** To prepare graduates to serve as legal professionals who address societal challenges, advocate for policy changes, and contribute to nation-building through leadership roles in the legal and judicial systems.

## **Programme Specific Objectives (PSO's)**

**PSO 1** To equip students with a thorough understanding of national and international legal systems, statutory laws, and judicial precedents

**PSO 2** To develop practical skills such as drafting legal documents, conducting negotiations, and preparing case strategies for litigation and alternative dispute resolution mechanisms

**PSO 3** To prepare students to use their legal knowledge for promoting social justice, providing legal aid to underprivileged sections of society, and contributing to the public interest.

**PSO 4** To enable students to critically evaluate laws and policies, suggest legal reforms, and participate in legislative drafting processes to address contemporary social, economic, and environmental issues.

**PSO 5** To provide opportunities for students to specialize in cutting-edge legal fields, such as intellectual property rights, cyber law, environmental law, or international trade law, catering to global demands.

**PSO 6** To prepare students for careers in the judiciary, government services, or corporate law by providing insights into procedural laws, administrative processes, and governance mechanisms.

## **Programme Outcome Objectives (POO's)**

**POO 1** Graduates will acquire in-depth knowledge of legal concepts, principles, and procedures, enabling them to interpret and apply laws effectively in practical scenarios

**POO 2** Graduates will demonstrate the ability to critically analyze legal issues, evaluate evidence, and develop reasoned arguments to solve complex legal problems.

**POO 3** Graduates will exhibit ethical conduct, professionalism, and a commitment to justice in their legal practice, adhering to the standards of the legal profession

**POO 4** Graduates will develop strong oral and written communication skills, enabling them to present legal arguments persuasively in courts, tribunals, and other professional settings.

**POO 5** Graduates will use their legal expertise to address societal challenges, uphold human rights, and advocate for marginalized communities, contributing to social equity and justice.

**POO 6** Graduates will demonstrate the ability to continuously update their legal knowledge and adapt to evolving legal landscapes, ensuring competence in the face of new challenges.

Quasi Contract - Necessaries supplied to a person who is incapable of entering into a contract - Payment by an interested person - Liability to pay for non-gratuitous acts - Rights of finder of lost goods - Things delivered by mistake or coercion - Quantum meruit - Remedies for breach of contract - Kinds of damages - liquidated and unliquidated damages and penalty - Duty to mitigate.

### Unit-V:

Specific Relief - Recovering possession of property - Specific performance of the contract - Rectification of instruments - Rescission of contracts - Cancellation of instruments - Declaratory Decrees - Preventive Relief - Injunctions - Generally - Temporary and Perpetual injunctions - Mandatory & Prohibitory injunctions - Injunctions to perform negative agreement.

## FAMILY LAW–I (Hindu Law)

**Sub. Code: LLB 103**

**L – 4, C – 4.**

### **Course Objectives**

- Understand the fundamental principles of Hindu Law.
- Learn the legal framework governing marriage and divorce.
- Study laws related to succession and inheritance.
- Analyse the rights and duties within Hindu joint families.
- Apply legal concepts to family disputes.

### **Unit-I:**

Sources of Hindu Law – Scope and application of Hindu Law – Schools of Hindu Law - Mitakshara and Dayabhaga Schools – Concept of Joint Family, Coparcenary, Joint Family Property and Coparcenary Property – Institution of Karta- Powers and Functions of Karta - Pious Obligation - Partition – Debts and alienation of property.

### **Unit-II:**

Marriage - Definition - Importance of institution of marriage under Hindu Law – Conditions of Hindu Marriage – Ceremonies and Registration – Monogamy – Polygamy.

### **Unit-III:**

**Matrimonial** Remedies under the Hindu Marriage Act, 1955 - Restitution of Conjugal Rights – Nullity of marriage – Judicial separation – Divorce – Maintenance *pendente lite* – importance of conciliation.

### **Unit-IV:**

Concept of Adoption - Law of Maintenance - Law of Guardianship - Hindu Adoption and Maintenance Act, 1956 – Hindu Minority and Guardianship Act 1956.

### **Unit-V:**

Succession – Intestate succession – Succession to the property of Hindu Male and Female; Dwelling House – Hindu Succession Act, 1956 as amended by the Hindu Succession (Andhra Pradesh Amendment) Act, 1986 & the Hindu Succession (Amendment) Act, 2005 – Notional Partition – Classes of heirs – Enlargement of limited estate of women into their absolute estate.

# Constitutional Law – I

**Sub. Code: LLB 105**

**L – 4, C – 4.**

## **Course Objectives**

- Gain knowledge of the fundamental principles of the Constitution.
- Examine the fundamental rights and duties of individuals.
- Understand the roles and powers of the Legislature, Executive, and Judiciary.
- Explore the concept of separation of powers in governance.
- Study the importance and process of constitutional amendments.

## **Unit-I**

Constitution-Meaning and Significance - Evolution of Modern Constitutions -Classification of Constitutions-Indian Constitution - Historical Perspectives - Government of India Act, 1919 - Government of India Act, 1935 - **Drafting of Indian Constitution - Role of Drafting Committee of the Constituent Assembly**

## **Unit-II**

Nature and Salient Features of Indian Constitution - Preamble to Indian Constitution - Union and its Territories-Citizenship - **General Principles relating to Fundamental Rights(Art.13) - Definition of State**

## **Unit-III**

Right to Equality(Art.14-18) – Freedoms and Restrictions under Art.19 - Protection against Ex-post facto law - **Guarantee against Double Jeopardy - Privilege against Self-incrimination - Right to Life and Personal Liberty - Right to Education – Protection against Arrest and Preventive Detention**

## **Unit-IV**

Rights against Exploitation - Right to Freedom of Religion - Cultural and Educational Rights - **Right to Constitutional Remedies - Limitations on Fundamental Rights(Art.31-A,B and C)**

## **Unit-V**

Directive Principles of State Policy – Significance – Nature – Classification - Application and Judicial Interpretation - Relationship between Fundamental Rights and Directive Principles - **Fundamental Duties – Significance - Judicial Interpretation**

# Law of Torts Including M.V. Act and Consumer Protection laws

Sub. Code: LLB 107

L – 4, C – 4.

## Course Objectives

- Learn the fundamental concepts and scope of tort law.
- Examine the legal rules governing liability for wrongful acts.
- Understand the compensation mechanisms under the Motor Vehicles Act.
- Explore consumer rights and protections under relevant laws.
- Apply tort law to practical situations and legal disputes.

## Unit-I:

Nature of Law of Torts - Definition of Tort - Elements of Tort - Development of Law of Torts in England and India - Wrongful Act and Legal Damage - *Damnum Sine Injuria* and *Injuria Sine Damnum* - Tort distinguished from Crime and Breach of Contract - General Principles of Liability in Torts - Fault - Wrongful intent - Malice - Negligence - Liability without fault - Statutory liability - Parties to proceedings.

### **Unit III: Legal maxims**

1. Absoluta sententia expositore non indiget
2. A bundanscautela non nocet.
3. Actio-personalis moritur-cum persona
4. Actori incumbit onus probandi
5. Actus curiae neminem gravabit
6. Actus dei nemini facit injuriam
7. Actus reus
8. Actus legis nemini est damnosus
9. Actus non facit reum nisi mens sit rea
10. Actio Personalis Moritur Cum Persona.
11. Delegatus Non Potest Delegare
12. Ejusdem Generis
13. Exturpi causa non oritur action
14. Noscitur o socii
15. Non-Execusat
16. Novus actus interveniens
17. Respondent superior
18. Falsus in uno falsus in omnibus
19. Acquitus sequitur legem
20. Allegans contraria non est audiendus
21. Audi alteram partem
22. Caveat emptor
23. Damnum sine injuria
24. De minimis non curat lex
25. Dolus malus pactum se non servabit
26. Delegates non potest delegare
27. Fiat Justitia ruat caelum
28. Ignorantia legis neminem excusat
29. Ignorantia facti excusat ignorantia Juris

30. Injuria sine damno
31. Interest republicae ut sit finis litium
32. Lex non cogit ad impossibilia
33. Nemo dat quod non habet
34. Nemo debet esse iudex in propria causa
35. Quantum meruit
36. Qui approbat non-reprobat
37. Qui facit per alium per-se
38. Res ipsa loquitur
39. Salus populi est Suprema Lex
40. Ubi-jus ibi-remedium
41. Vigilantibus non-dormientibus jus subveniunt

**Unit IV: (A) Paragraph & Precise Writing of Legal Texts  
(B) Translate Hindi to English & English to Hindi of case laws**

**Unit V: Writing of Moot Memorials**

**Suggested Reading:**

1. Myneni S.R., Legal language and Legal Writing, Central Law Agency, Allahabad.
2. Jain R.L., Legal Language, Central Law Agency, Allahabad.
3. Prasad Anirudh, Legal Language, Central Law Publications, Allahabad.

## Spanish-I

**Sub. Code: LLB-109A**

**L – 4, C – 4.**

### **Course Objectives**

- Build a foundation in basic Spanish vocabulary and grammar.
- Develop listening and speaking skills for everyday conversations.
- Learn to read and comprehend simple Spanish texts.
- Practice writing basic sentences and paragraphs in Spanish.
- Gain cultural insights into Spanish-speaking regions.

### **Unit 1: Introduction to Spanish**

Overview of the Spanish language and its global significance, Alphabet and pronunciation, Basic greetings and introductions

### **Unit 2: Basic Grammar and Vocabulary**

Nouns, articles, and gender, Common adjectives and their agreement with nouns, Essential vocabulary: family, colours, numbers

### **Unit 3: Present Tense Verbs**

Introduction to regular verbs (AR, ER, IR), Conjugation patterns and usage  
Practical exercises and dialogues

### **Unit 4: Common Expressions and Questions**

Essential phrases for everyday conversation, Forming questions and negation  
Role-playing dialogues

### **Suggested Readings:**

1. "Madrigal's Magic Key to Spanish" by Margarita Madrigal
2. A classic introductory book that simplifies grammar and vocabulary, making it accessible for beginners.
3. "Practice Makes Perfect: Spanish Verb Tenses" by Dorothy Richmond
4. Focuses on mastering verb tenses with clear explanations and exercises.
5. "Easy Spanish Step-By-Step" by Barbara Bregstein
6. A structured approach to learning Spanish, emphasizing grammar and vocabulary in a logical progression.
7. "Living Language Spanish" (Complete Course)
8. A comprehensive language course that includes audio components and a variety of exercises.

# German-I

**Sub. Code: LLB-109B**

**L – 4, C – 4.**

## **Course Objectives**

- Acquire basic German vocabulary and grammar skills.
- Develop the ability to engage in simple conversations in German.
- Learn to read and understand basic German texts.
- Practice writing short sentences and paragraphs in German.
- Explore cultural aspects of German-speaking countries.

## **Unit 1: Introduction to German**

German alphabet and pronunciation, Basic greetings and introductions, Pronunciation drills, Icebreaker introductions

## **Unit 2: Numbers and Colours**

Numbers 1-100, Basic colours and their usage, Number games, Colour identification exercises

## **Unit 3: Everyday Vocabulary**

Family members, Common nouns (e.g., household items, animals) Create a family tree, Vocabulary flashcard games

## **Unit 4: Basic Grammar and Sentence Structure**

Introduction to articles (definite and indefinite), Subject-verb-object structure, Sentence formation exercises, Group writing tasks

## **Suggested Readings:**

1. "German Made Simple: Learn to Speak and Understand German Quickly and Easily"  
Author: Arnold Leitner
2. A straightforward introduction to the language, covering essential vocabulary and grammar.
3. "German for Dummies"
4. Author: Wendy Foster
5. "The Everything Learning German Book"  
Author: Julie Gutin
6. "Practice Makes Perfect: Complete German Grammar"
7. Author: Ed Swick
8. A comprehensive workbook that reinforces grammar concepts with exercises and explanations.

## Chinese-I

**Sub. Code: LLB-109C**

**L – 4, C – 4.**

### **Course Objectives**

- Build a foundation in essential Chinese vocabulary and grammar.
- Improve listening and speaking abilities for basic Chinese conversations.
- Learn to read and write simple Chinese characters.
- Practice constructing basic sentences and dialogues in Chinese.
- Explore the culture and traditions of Chinese-speaking regions.

### **Unit 1: Introduction to Chinese**

Pinyin and pronunciation, Basic greetings and self-introduction, Pronunciation practice  
Icebreaker introductions

### **Unit 2: Numbers and Dates**

Numbers 1-100, Days of the week and months, Number games, Calendar exercises

### **Unit 3: Everyday Vocabulary**

Family members, Common nouns (e.g., animals, objects), Family tree project  
Vocabulary flashcards

### **Unit 4: Basic Grammar and Sentence Structure**

Subject-verb-object structure, Introduction to measure words, Sentence formation exercises  
Simple writing tasks

### **Suggested Readings:**

1. "Integrated Chinese" (Textbook + Workbook)
  - a. Authors: Tao-chung Yao, Yuehua Liu, et al.
  - b. A comprehensive series that covers speaking, reading, and writing. It includes cultural notes and exercises.
2. "Chinese Made Easier"
  - a. Authors: Maureen S. W. D. H. Wong, et al.
  - b. Focuses on conversational skills with a gradual introduction to reading and writing.
3. "New Practical Chinese Reader"
  - a. Authors: Liu Xun
  - b. A popular series that integrates language and cultural elements, with a focus on conversational skills.
4. "Reading & Writing Chinese"
  - a. Author: William McNaughton
  - b. A guide to learning characters, with clear explanations and practice exercises.

## **French-I**

**Sub. Code: LLB-109D**

**L – 4, C – 4.**

### **Course Objectives**

- Acquire basic French vocabulary and grammar essentials.
- Enhance speaking and listening skills for everyday French conversations.
- Develop reading comprehension of simple French texts.
- Practice writing basic French sentences and paragraphs.
- Explore the culture and customs of French-speaking regions.

### **Unit 1: Daily Routines**

Common verbs (aller, être, avoir), Talking about daily activities

### **Unit 2: Food and Drink**

Vocabulary related to food, Expressing likes and dislikes

### **Unit 3: Clothing and Shopping**

Vocabulary for clothing, Shopping dialogue and role-play

### **Unit 4: Directions and Transportation**

Asking for and giving directions, Vocabulary for transportation

### **Suggested Readings:**

1. "Easy French Step-By-Step" by Myrna Bell Rochester
2. A clear, gradual approach to learning French grammar and vocabulary.
3. "French for Dummies" by Dodi-Katrin Schmidt and Michelle M. Williams
4. "Practice Makes Perfect: Complete French Grammar" by Annie Heminway
5. Comprehensive grammar explanations with exercises for practice.
6. "Fluent in French: The Most Complete Study Guide to Learn French" by Frederic Bibard
7. Covers vocabulary, grammar, and cultural insights

## **Semester-II**

## Law of Contract - II

Sub. Code: LLB 102

L – 4, C – 4.

### Course Objectives

- Understand the concepts of contract performance and breach.
- Study the different types of contracts and their legal implications.
- Examine the rules surrounding contract termination and discharge.
- Explore the remedies available for contract breach and enforcement.
- Apply advanced contract law principles to real-world scenarios.

### Unit-I:

Indemnity and Guarantee - Contract of Indemnity, definition - Rights of Indemnity holder - Liability of the indemnified - Contract of Guarantee - Definition of Guarantee - Essential characteristics of Contract of Guarantee - Distinction between Indemnity and Guarantee - Kinds of Guarantee - Rights and liabilities of Surety - Discharge of surety. Contract of Bailment - Definition of bailment - Essential requisites of bailment - Kinds of bailment - Rights and duties of bailor and bailee - Termination of bailment - Pledge - Definition of pledge - Rights and duties of Pawnor and Pawnee - Pledge by non-owner.

### Unit-II:

Contract of Agency - Definition of Agent - Creation of Agency - Rights and duties of Agent - Delegation of authority - Personal liability of agent - Relations of principal and agent with third parties - Termination of Agency.

### Unit-III:

Contract of Sale of Goods - Formation of contract - Subject matter of sale - Conditions and Warranties - Express and implied conditions and warranties - Pricing - *Caveat Emptor*.

### Unit-IV:

Property - Possession and Rules relating to passing of property - Sale by non-owner - *Nemo dat quod non habet* - Delivery of goods - Rights and duties of seller and buyer before and after sale - Rights of unpaid seller - Remedies for breach.

### Unit-V:

Contract of Partnership - Definition and nature of partnership - Formation of partnership- Test of partnership - Partnership and other associations - Registration of firm - Effect of non-registration - Relations of partners - Rights and duties of partners - Property of firm - Relation of partners to third parties - Implied authority of partners - Kinds of partners - Minor as partner - Reconstitution of firm - Dissolution of firm.

**Suggested Readings:**

1. Anson's *Law of Contract*, 25th Ed. 1998, Oxford University Press, London.
2. Venkatesh Iyyer: *The Law of Contracts and Tenders*, Gogia & Company Hyderabad.
3. Cheshire & Fifoot: *Law of Contract*, Butterworth, London, 1976.
4. Mulla: *The Indian Contract Act*, N.M. Tripathi (P) Ltd. Bombay, 1984.
5. G.C.V. Subba Rao: *Law of Contracts*, S. Gogia & Co., Hyderabad, 1995.
6. Krishnan Nair: *Law of Contracts*, S. Gogia & Co. Hyderabad, 1995.
7. Avtar Singh: *Law of Contracts*, Eastern Book Company, Lucknow, 1998.
8. A Ramaiah's *Sale of Goods Act*, 4th Ed. 1998, The Law Book Co., Allahabad.
9. Benjamin's *Sale of Goods*, 1st Ed. 1978, Sweet & Maxwell, London.
10. P.S. Atiyah: *Sale of Goods Act*, 9th Ed. 1997, Universal Book Traders, Delhi.

## Family Law – II (Muslim Law)

Sub. Code: LLB 104

L – 4, C – 4.

### Course Objectives

- Understand the basic principles and sources of Muslim personal law.
- Study the laws governing marriage, divorce, and maintenance under Muslim law.
- Examine the rules of inheritance and succession in Muslim communities.
- Analyse the rights and duties of Muslim family members.
- Apply Muslim law principles to practical family law issues.

### Unit-I:

Origin and development of Muslim Law - Sources of Muslim Law - Schools of Muslim Law - Difference between the Sunni and Shia Schools – Sub-schools of Sunni Law - Operation and application of Muslim Law - Conversion to Islam - Effects of conversion - Law of Marriage, nature of Muslim Marriage - Essential requirements of valid Marriage - Kinds of Marriages - distinction between void, irregular and valid marriage - Dower (Mahr) - Origin, nature and importance of dower, object of dower and classification of dower.

### Unit-II:

Divorce - Classification of divorce - different modes of Talaq - Legal consequences of divorce - Dissolution of Muslim Marriage Act, 1939 - Maintenance, Principles of maintenance, Persons entitled to maintenance - The Muslim Women (Protection of Rights on Divorce) Act, 1986 - Effect of conversion on maintenance and difference between Shia and Sunni Law.

### Unit-III:

Parentage - Maternity and Paternity - Legitimacy and acknowledgment - Guardianship - Meaning - Kinds of guardianship - Removal of guardian - Difference between Shia and Sunni Law. Gift - Definition of Gift - Requisites of valid gift - Gift formalities - Revocation of gift - Kinds of gift. Wills - Meaning of Will - Requisites of valid Will - Revocation of Will - Distinction between Will and Gift - Difference between Shia and Sunni Law.

### Unit-IV :

Waqf \_ Definition - Essentials of Waqf - Kinds of Waqf – Creation of Waqf - - Revocation of Waqf - Salient features of the Waqf Act, 1995 – Mutawalli - Who can be Mutawalli - Powers and duties of Mutawalli - Removal of Mutawalli and Management of Waqf property. Succession - Application of the property of a deceased Muslim - Legal position of heirs as representatives - Administration - Waqf Tribunals and Jurisdiction.

### Unit-V:

Special Marriage Act, 1954 - Salient features of Indian Divorce Act, 1869 - Domicile - Maintenance to dependents/ Spouses - Intestate succession of Christians under the Indian Succession Act, 1925.

**Suggested Readings:**

1. Tahir Mahmood: *The Muslim Law of India*, 1980, Law Book Company, Allahabad.
2. Aquil Ahmed: *Text Book of Mohammadan Law*, 5th Edition 1992, Central Law Agency, Allahabad.
3. Prof. G.C.V. Subba Rao: *Family Law in India*, 6th Edition, 1993, S.Gogia & Company, Hyderabad.
4. Asaf A.A.Fyzee: *Outlines of Mohammadan Law*, 4th Edition, 1999, Oxford University Press, Delhi.

## Constitutional Law – II

Sub. Code: LLB 106

L – 4, C – 4.

### Course Objectives

- Understand the concept of federalism and distribution of powers in the Constitution.
- Study the structure and functions of various constitutional bodies.
- Analyze the role of the judiciary in interpreting the Constitution.
- Examine the relationship between fundamental rights and public policy.
- Explore the process and significance of constitutional amendments.

### Unit-I

Legislature under Indian Constitution - Union and State Legislatures - Composition, Powers, Functions and Privileges - Anti-Defection Law - Executive under Indian Constitution - President and Union Council of Ministers - Governor and State Council of Ministers - Powers and position of President and Governor

### Unit-II

Judiciary under Constitution - Supreme Court - Appointment of Judges, Powers and Jurisdiction - High Courts - Appointment and Transfer of Judges - Powers and Jurisdiction - Subordinate Judiciary - Independence of judiciary - Judicial Accountability

### Unit-III

Centre-State Relations - Legislative, Administrative and Financial Relations - Cooperation and Coordination between the Centre and States - Judicial Interpretation of Centre-State Relations - Doctrines evolved by Judiciary

### Unit-IV

Liability of State in Torts and Contracts - Freedom of Interstate Trade, Commerce and Inter course - Services under the State - All India Services - Public Service Commissions

### Unit-V

Emergency – Need of Emergency Powers - Different kinds of Emergency - National, State and Financial emergency - Impact of Emergency on Federalism and Fundamental Rights - Amendment of Indian Constitution and Basic Structure Theory

### Suggested Readings:

1. M.P.Jain, *Indian Constitutional Law*, Wadhwa & Co, Nagpur
2. V.N.Shukla, *Constitution of India*, Eastern Book Company, Lucknow
3. Granville Austin, *Indian Constitution-Cornerstone of a Nation*, OUP, New Delhi
4. H.M.Seervai, *Constitutional Law of India* (in 3 Volumes), N.M.Tripathi, Bombay
5. G.C.V.Subba Rao, *Indian Constitutional Law*, S.Gogia & Co., Hyderabad
6. B.Shiva Rao, *Framing of India's Constitution* (in 5 Volumes), Indian Institute of Public Administration, New Delhi
7. J.N.Pandey, *Constitutional Law of India*, Central Law Agency, Allahabad

## LAW OF CRIMES

Sub. Code: LLB 108

L – 4, C – 4.

### Course Objectives

- Understand the key principles and categories of criminal law.
- Study the elements of criminal offenses and defenses.
- Examine the criminal justice system, including police, prosecution, and courts.
- Analyze the procedures for trial and punishment in criminal cases.
- Apply criminal law principles to real-life case scenarios.

### Unit-I:

Concept of crime - Definition and meaning of crime - Distinction between crime and tort - Stages of crime - Intention, Preparation, Attempt and Commission of Crime - Elements of Crime - *Actus Reus and Mensrea* - Codification of Law of Crimes in India - Application of the Indian Penal Code - Territorial and Extra Territorial application - General Explanations - Punishments.

### Unit-II:

General exceptions - Abetment - Criminal Conspiracy - Offences against the State - Offences against public peace and Tranquility.

### Unit-III:

Offences affecting human body (offences affecting human life) Culpable Homicide and Murder – Hurt and Grievous Hurt - Wrongful restraint and Wrongful confinement - Criminal force and Assault - Kidnapping and abduction - Sexual offences - Unnatural offences.

### Unit-IV:

Offences affecting the public health, safety, convenience, decency and morals - Offences against Property - Theft - Extortion - Robbery & Dacoity - Cheating - Mischief - Criminal Trespass – Criminal misappropriation and Criminal breach of trust.

### Unit-V :

Offences by or relating to public servants - False Evidence and Offences against Public Justice - Offences relating to documents - Offences relating to Marriage - Cruelty by husband and relatives of husband - Defamation.

### Suggested Readings:

1. Ratan Lal and Dhiraj Lal: *Indian Penal Code*, Wadhwa & Co., 2000.
2. Achutan Pillai: *Criminal Law*, Butterworth Co., 2000.
3. Gour K.D.: *Criminal Law - Cases and Materials*, Butterworth Co., 1999.
4. Kenny's: *Outlines of Criminal Law*, (1998 Edition)

## Environmental Law

Sub. Code: LLB 110

L – 4, C – 4.

### Course Objectives

- Understand the key principles and framework of environmental law.
- Study national and international regulations on environmental protection.
- Examine the legal aspects of environmental pollution and conservation.
- Explore the roles of governmental and non-governmental organizations in environmental law.
- Apply environmental law concepts to contemporary issues and case studies.

### Unit-I

The meaning and definition of environment – Ecology - Ecosystems-Biosphere - Biomes - Ozone depletion - Global Warming - Climatic changes - Need for the preservation, conservation and protection of environment - Ancient Indian approach to environment- Environmental degradation and pollution - Kinds, causes and effects of pollution.

### Unit-II

Common Law remedies against pollution - trespass, negligence, and theories of Strict Liability & Absolute Liability - Relevant provisions of I.P.C. and Cr.P.C. and C.P.C., for the abatement of public nuisance in pollution cases - Remedies under Specific Relief Act - Reliefs against smoke and noise - Noise Pollution.

### Unit-III

The law relating to the preservation, conservation and protection of forests, wild life and endangered species, marine life, coastal ecosystems and lakes etc. - Prevention of cruelty towards animals - The law relating to prevention and control of water pollution - Air Pollution - Environment pollution control mechanism - Law relating to environment protection – National Environmental Tribunal and National Environmental Appellate Authority.

### Unit-IV:

Art. 48A and Art. 51A(g) of the Constitution of India - Right to wholesome environment - Right to development - Restriction on freedom of trade, profession, occupation for the protection of environment - Immunity of Environment legislation from judicial scrutiny(Art.31C) - Legislative powers of the Centre and State Government - Writ jurisdiction - Role of Indian Judiciary in the evolution of environmental jurisprudence.

### Unit-V

International Environmental Regime - Transactional Pollution - State Liability - Customary International Law - Liability of Multinational Corporations/Companies - Stockholm Declaration on Human Environment, 1972 - The role of UNEP for the protection of environment - Ramsar Convention 1971 – Bonn Convention (Migratory Birds) 1992 - Nairobi Convention, 1982 (CFCC) - Biodiversity Convention (Earth Summit), 1992 - Kyoto Protocol 1997, Johannesburg Convention 2002.

### Suggested Readings:

1. Paras Diwan: *Studies on Environmental Cases*.
2. S.N. Jain (ed.): *Pollution Control and the Law*.
3. Armin Rosencranz and Shyam Diwan: *Environmental Law and Policy in India*.
4. A. Agarwal (ed.): *Legal Control of Environmental Pollution*
5. Chetan Singh Mehta: *Environmental Protection and Law*
6. V.K. Krishna Iyer: *Environment Pollution and Law*
7. Shah: *Environmental Law*
8. Paras Diwan: *Environmental Law and Policy in India*,1991
9. Dr. N. Maheshwara Swamy, *Environmental Law*, Asia Law House, Hyderabad.

## **Semester-III**

# JURISPRUDENCE

**Sub. Code: LLB 201**  
**Course Objectives**

**L – 4, C – 4.**

- Explore the fundamental concepts and theories of law.
- Analyse the nature and sources of legal authority and norms.
- Study the relationship between law, morality, and justice.
- Examine different schools of jurisprudential thought and their impact.
- Apply jurisprudential principles to contemporary legal issues.

## **Unit-I:**

Meaning and Definition of Jurisprudence — General and Particular Jurisprudence - Elements of Ancient Indian Jurisprudence — Schools of Jurisprudence — Analytical, Historical, Philosophical and Sociological Schools of Jurisprudence. Theories of Law — Meaning and Definition of Law — The Nature and Function of Law — The Purpose of Law — The Classification of Law — Equity, Law and Justice — Theory of Sovereignty.

## **Unit-II :**

Sources of Law — Legal and Historical Sources — Legislation - Definition of legislation - Classification of legislation- Supreme and Subordinate Legislation - Direct and Indirect Legislation - Principles of Statutory Interpretation. Precedent — Definition of Precedent — Kinds of Precedent — *Stare Decisis* — Original and Declaratory Precedents — Authoritative and Persuasive Precedents. Custom – Definition of Custom – Kinds of Custom – General and Local Custom – Custom and Prescription - Requisites of a valid custom - Relative merits and demerits of Legislation , Precedent and Custom as a source of Law . Codification — Advantages and disadvantages of codification.

## **Unit-III:**

Persons — Nature of personality — Legal Status of Lower Animals, Dead Persons and Unborn persons — Legal Persons — Corporations — Purpose of Incorporation — Nature of Corporate Personality - Rights and Duties — Definition of Right — Classification of Rights and Duties — Absolute and Relative Rights and Duties — Rights and Cognate concepts like Liberty, Power, Immunity, Privilege etc.

## **Unit-IV:**

Obligation — Nature of Obligation — Obligation arising out of Contract, Quasi Contract, trust and breach of obligation etc. — Liability — Nature and kinds of liability — Acts — *Mens Rea* — Intention and Motive — Relevance of Motive — Negligence — Strict Liability — Accident — Vicarious Liability — Measure of Civil and Criminal Liability.

## **Unit-V:**

Ownership — Definition and kinds of Ownership - Possession — Elements of Possession - Relation between Ownership and Possession — Possessory Remedies — Property — Meaning — Kinds of Property — Modes of Acquisition of Property — Legal Sanctions - Meaning of Sanction — Classification of Sanctions — Civil and Criminal Justice — Concept of Justice — Theories regarding purpose of Criminal Justice — Deterrent, Preventive, Reformatory and Retributive theories.

## **Suggested Readings:**

1. Salmond: *Jurisprudence*, Universal Publishers 12th Edn. 1966.
2. Rama Jois, *Legal and Constitutional History of India*, Universal Law Publications, Delhi.
3. N.V. Pranjape – Jurisprudence
4. S.R. Dhyani - Jurisprudence

## LAW OF EVIDENCE

Sub. Code: LLB 203

L – 4, C – 4.

### Course Objectives

- Grasp the basic principles and rules governing evidence in law.
- Learn about different types of evidence and their acceptability in court.
- Explore the roles and procedures involving witnesses, including examination and cross-examination.
- Understand the concepts of burden of proof and legal presumptions.
- Apply evidentiary rules to real-life legal cases and scenarios.

#### Unit-I:

The Indian Evidence Act, 1872 — Salient features of the Act – Meaning and kinds of Evidence — Interpretation clause — May Presume, shall presume and Conclusive proof - Fact, Fact in issue and Relevant facts — Distinction between Relevancy and Admissibility - Doctrine of *Res Gestae* — Motive, preparation and conduct — Conspiracy — When Facts not otherwise relevant become relevant — Right and custom — Facts showing the state of mind etc.

#### Unit-II:

Admissions & Confessions: General Principles concerning Admissions — Differences between "Admission" and "Confession" — Confessions obtained by inducement, threat or promise – Confessions made to police officer - Statement made in the custody of a police officer leading to the discovery of incriminating material — Admissibility of Confessions made by one accused person against co-accused.

Dying Declarations and their evidentiary value — Other Statements by persons who cannot be called as Witnesses — Admissibility of evidence of witnesses in previous judicial proceedings in subsequent judicial proceedings.

#### Unit-III:

Relevancy of Judgments — Opinion of witnesses — Expert's opinion — Opinion on Relationship especially proof of marriage — Facts which need not be proved — Oral and Documentary Evidence - General Principles concerning oral evidence and documentary evidence — Primary and Secondary evidence — Modes of proof of execution of documents — Presumptions as to documents — General Principles regarding Exclusion of Oral by Documentary Evidence.

#### Unit-IV:

Rules relating to Burden of Proof - Presumption as to Dowry Death — Estoppel — Kinds of estoppel — Res Judicata, Waiver and Presumption.

#### Unit-V:

Competency to testify — Privileged communications - Testimony of Accomplice — Examination in Chief, Cross examination and Re-examination — Leading questions — Lawful questions in cross examination — Compulsion to answer questions put to witness — Hostile witness — Impeaching the credit of witness — Refreshing memory — Questions of corroboration — Improper admission and rejection of evidence.

**Suggested Readings:**

1. Batuk Lal: *The Law of Evidence*, 13th Edition, Central Law Agency, Allahabad, 1998.
2. M. Munir: *Principles and Digest of the Law of Evidence*, 10th Edition (in 2 vols), Universal Book Agency, Allahabad, 1994.
3. Vepa P. Saradhi: *Law of Evidence* 4th Edn. Eastern Book Co., Lucknow, 1989.
4. Avtar Singh: *Principles of the Law of Evidence*, 11th Edn. Central Law Publications.
5. V. Krishnama Chary: *The Law of Evidence*, 4th Edn. S.Gogia & Company, Hyderabad.

## LAW OF PROPERTY

**Sub. Code: LLB 205**

**L – 4, C – 4.**

### **Course Objectives**

- Understand the fundamental principles of property law.
- Study the different types of property, including movable and immovable.
- Learn about the legal aspects of ownership, transfer, and possession of property.
- Examine rights related to property, such as easements, licenses, and mortgages.
- Apply property law concepts to practical legal scenarios and disputes.

### **Unit-I:**

**Meaning** and concept of property — Kinds of property — Transfer of property — Transferable and non-transferable property — Who can transfer — Operation of transfer — Mode of transfer — Conditional transfer — Void and unlawful conditions — Condition precedent and condition subsequent — Vested and contingent interest — Transfer to unborn person

### **Unit-II:**

Doctrine of Election — Covenants — Transfer by ostensible owner — Doctrine of Feeding the Grant by Estoppel — Doctrine of Lis Pendens — Fraudulent Transfer — Doctrine of Part-performance.

### **Unit-III:**

Sale - Essential features — Mode of Sale — Rights and liabilities of parties. Mortgage - Kinds of Mortgages - Rights and liabilities of mortgagor and mortgagee — Marshalling and Contribution — Charges.

### **Unit-IV:**

Lease — Essential features — Kinds of leases — Rights and liabilities of lessor and lessee — Termination of lease — forfeiture — Exchange — Gifts — Different types of gifts — Registration of Gifts — Transfer of Actionable Claims.

### **Unit-V:**

Easements — Definition of easement — Distinction between Lease and License — Dominant and Servient Tenements. Acquisition of property through testamentary succession — Will — Codicil — Capacity to execute Will — Nature of bequests — Executors of Will — Rights and Obligations of Legatees.

### **Suggested Readings:**

1. Mulla: *Transfer of Property*, Butterworths Publications.
2. Subba Rao GCV: *Commentaries on the Transfer of Property Act*.
3. Krishna Menon: *Law of Property*.
4. Upadhya's *Common Matrix of Transfer of Property*

## PUBLIC INTERNATIONAL LAW

Sub. Code: LLB 207

L – 4, C – 4.

### Course Objectives

- Understand the foundational principles and sources of international law.
- Study the rights and responsibilities of states under international law.
- Explore the role of international organizations in global governance.
- Analyse the legal aspects of international treaties and agreements.
- Apply public international law to current global issues and conflicts.

### Unit-I:

Definition, Nature, Scope and Importance of International Law — Relation of International Law to Municipal Law — Sources of International Law — Codification.

### Unit-II:

State Recognition — State Succession — Responsibility of States for International delinquencies — State Territory — Modes of acquiring State Territory

### Unit-III:

Position of Individual in International Law — Nationality — Extradition — Asylum — Privileges and Immunities of Diplomatic Envoys — Treaties – Formation of Treaties - Modes of Consent, Reservation and termination.

### Unit-IV:

The Legal Regime of the Seas – Evolution of the Law of the Sea – Freedoms of the High Seas – Common Heritage of Mankind – United Nations Convention on the Law of the Sea – Legal Regime of Airspace – Important Conventions relating to Airspace – Paris, Havana, Warsaw and Chicago Conventions – Five Freedoms of Air – Legal Regime of Outer space – Important Conventions such as Outer space Treaty, Agreement on Rescue and Return of Astronauts, Liability Convention, Agreement on Registration of Space objects, Moon Treaty - Unispace.

### Unit-V:

International Organizations — League of Nations and United Nations — International Court of Justice — International Criminal Court - Specialized agencies of the UN — WHO, UNESCO, ILO, IMF and WTO.

### Suggested Readings:

1. S.K. Kapoor, *Public International Law*, Central Law Agencies, Allahabad.
  2. H.O. Agarwal, *International Law and Human Rights*, Central Law Publications, Allahabad.
- S.K. Verma, *An Introduction to Public International Law*, Prentice Hall of India

## INTELLECTUAL PROPERTY RIGHTS

Sub. Code: LLB 209

L – 4, C – 4.

### Course Objectives

- Grasp the key concepts and types of intellectual property rights.
- Understand the legal protections for patents, copyrights, trademarks, and designs.
- Learn the procedures for registering and enforcing intellectual property rights.
- Explore issues of infringement and the available legal remedies.
- Apply intellectual property law to practical business and legal situations.

### Unit-I:

Meaning, Nature, Classification and protection of Intellectual Property — The main forms of Intellectual Property — Copyright, Trademarks, Patents, Designs (Industrial and Layout) -- Geographical Indications - Plant Varieties Protection and Biotechnology.

### Unit-II:

Introduction to the leading International instruments concerning Intellectual Property Rights — The Berne Convention — Universal Copyright Convention — The Paris Union — Patent Co-operation Treaty -- The World Intellectual Property Organization (WIPO) and the UNEESCO, International Trade Agreements concerning IPR — WTO — TRIPS.

### Unit-III:

Select aspects of the Law of Copyright in India — The Copy Right Act, 1957 - Historical evolution — Meaning of copyright — Copyright in literary, dramatic and musical works, computer programmes and cinematograph films — Neighbouring rights — Rights of performers and broadcasters, etc. — Ownership and Assignment of copyright — Author's special rights — Notion of infringement — Criteria of infringement — Infringement of copyright in films, literary and dramatic works — Authorities under the Act — Remedies for infringement of copyright.

### Unit-IV:

Intellectual Property in Trademarks and the rationale of their protection - The Trade Marks Act, 1999 — Definition of Trademarks — Distinction between Trademark and Property Mark - Registration — Passing off — Infringement of Trademark — Criteria of Infringement — Remedies. The Designs Act, 2000 — Definition and characteristics of Design — Law in India — Protection and rights of design holders — Copyright in design — Registration — Remedies for infringement.

### Unit-V:

Patents — Concept of Patent — Historical overview of the Patents Law in India — Patentable Inventions — Kinds of Patents — Procedure for obtaining patent — The Patents Act, 1970 — Rights and obligations of a patentee — Term of patent protection — Use and exercise of rights — Exclusive Marketing Rights — Right to Secrecy — The notion of 'abuse' of patent rights — Infringement of patent rights and remedies available.

**Suggested Readings:**

1. P. Narayanan: *Patent Law*, Eastern Law House, 1995.
2. Roy Chowdhary, S.K. & Other: *Law of Trademark, Copyrights, Patents and Designs*, Kamal Law House, 1999.
3. Dr. G.B. Reddy, *Intellectual Property Rights and the Law* 5th Ed. 2005 Gogia Law Agency.
4. John Holyoak and Paul Torremans: *Intellectual Property Law*.
5. B.L. Wadhwa: *Intellectual Property Law*, Universal Publishers, 2nd Ed. 2000.
6. W.R. Cornish: *Intellectual Property Law*, Universal Publishers, 3rd Ed. 2001.

# **Semester-IV**

## ADMINISTRATIVE LAW

Sub. Code: LLB 202

L – 4, C – 4.

### Course Objectives

- Understand the principles and scope of administrative law.
- Study the powers and functions of administrative agencies.
- Examine the legal framework governing administrative decisions and actions.
- Explore the mechanisms for judicial review of administrative actions.
- Apply administrative law concepts to real-world governmental issues.

### Unit-I:

Nature and scope of Administrative Law — Meaning, Definition and Evolution of Administrative Law— Reasons for the growth of Administrative Law — Relationship between Administrative Law and Constitutional Law.

### Unit-II:

Basic concepts of Administrative Law — Rule of Law — **Interpretation** of Dicey's Principle of Rule of Law — **Modern trends - Theory of Separation of Powers — Position in India, UK and USA**

### Unit-III:

Classification of Administrative functions — Legislative, Quasi-judicial, Administrative and Ministerial functions — Delegated Legislation — Meaning, Reasons for the growth and Classification of delegated legislation— **Judicial and Legislative Control of Delegated litigation.**

### Unit-IV:

Judicial Control of Administrative Action - Grounds of Judicial Control — Principles of Natural Justice — **Administrative discretion and its control.**

### Unit-V:

Remedies available against the State — Writs — Lokpal and Lok Ayukta — Liability of the State in Torts and Contracts — Rule of Promissory Estoppel — Administrative Tribunals - **Commissions of Inquiry — Public Corporations.**

### Suggested Readings:

1. Griffith and Street: *Principles of Administrative Law*.
2. H.W.R. Wade: *Administrative Law*, Oxford Publications, 8th Edn. 2000, London.
3. De Smith: *Judicial Review of Administrative Action*, Sweet and Maxwell, 1998.
4. S.P. Sathe: *Administrative Law*, Butterworths, 6th Edn. 1998.
5. I.P. Massey: *Administrative Law*, Eastern Book Company, 5th Edn. 2001

## COMPANY LAW

Sub. Code: LLB 204

L – 4, C – 4.

### Course Objectives

- Grasp the basics of company formation and the various types of business structures.
- Understand the roles and responsibilities of company directors, shareholders, and other parties involved.
- Learn about the laws that regulate the management and functioning of companies.
- Explore the legal processes related to corporate governance, mergers, and acquisitions.
- Apply the principles of company law to real-life business and legal situations.

### Unit-I:

Definition and attributes of Company — Distinction between Partnership Firm and Company — Kinds of Companies including Multinational Companies — Advantages and Disadvantages of Incorporation — Consequences of non-compliance of the provisions of the Companies Act in matters of incorporation.

### Unit-II:

Promoters and Registration — Pre-incorporation contracts — Memorandum of Association — Articles of Association.

### Unit-III:

Prospectus — Members — Shareholders — Share Capital — Shares and Dividends — Debentures — Directors — Powers and Liabilities of Directors.

### Unit-IV:

Director, Manager and Secretary — Meetings — Majority powers and minority rights — Prevention of Oppression and Mismanagement

### Unit-V:

Modes of winding up of companies — Consequences of winding up — Functions of Official Liquidator.

## LABOUR LAWS– I

Sub. Code: LLB 206

L – 4, C – 4.

### Course Objectives

- Understand the key principles of labour law and employment regulations.
- Learn about the rights and duties of employees and employers.
- Study the legal framework governing labour contracts, wages, and working conditions.
- Explore dispute resolution mechanisms in labour law, including trade unions and collective bargaining.
- Apply labour law principles to real-world workplace scenarios and legal issues.

### Unit-I

Trade Unions: History of Trade Union Movement - The Trade Union Act 1926 – Definitions - Registration – Rights and Liabilities of Registered Trade Unions – Immunities – Amalgamation and dissolution of Unions – Reorganization of Trade Unions.

### Unit-II

Prevention and Settlement of Industrial Disputes in India - The role of State in Industrial Relations – The Industrial Disputes Act 1947 - Definition of industry - Industrial Dispute – Individual Dispute - workman- Lay off – Retrenchment - Closure -Award - Strike – Lockout

### Unit-III

Authorities under the ID Act – Works committee – Conciliation - Court of inquiry - Labour Courts-Tribunal – Powers and functions of authorities - Voluntary Arbitration - Provisions under Chapter V-A & V- B of the Act- Alteration of conditions of service – Management rights of action during pendency of proceedings – Recovery of money due from employer – Unfair labour practices - miscellaneous provisions of the Act.

### Unit-IV

Standing Orders -Concept and Nature of Standing Orders – scope and coverage- Certification process – its operation and binding effect – Modification and Temporary application of Model Standing Orders – Interpretation and enforcement of Standing Orders and provisions contained in the Industrial Employment (Standing Orders ) Act 1946.

### Unit-V

Disciplinary Proceedings in Industries - Charge sheet – Explanation – Domestic enquiry - Enquiry officer – Enquiry report – Punishment – Principles of Natural Justice.

### Suggested Readings:

1. Srivastava: *Law of Trade Unions*, Eastern Book Company, Lucknow
2. Goswami: *Labour and Industrial Law*, Central Law Agency.
3. R.F. Rustomji : *Law of Industrial Disputes* : Asia Publishing House, Mumbai
4. S.N. Misra : *Labour and Industrial Law*
5. J.N. Malik: *Trade Union Law*
6. Khan& Khan: *Labour Law*, Asia Law House, Hyderabad
7. S.C. Srivastava: *Industrial Relations and Labour Law*, Vikas Publishing House

## CIVIL PROCEDURE CODE AND LAW OF LIMITATION

Sub. Code: LLB 208

L – 4, C – 4.

### Course Objectives

- Understand the key provisions of the Civil Procedure Code and its application in legal proceedings.
- Study the stages of civil litigation, including filing suits and conducting trials.
- Learn about the rules governing the service of summons, pleadings, and evidence in civil cases.
- Explore the principles of limitation, including time limits for filing suits and appeals.
- Apply civil procedure and limitation laws to practical legal scenarios and case management.

### Unit-I :

Codification of Civil Procedure and Introduction to CPC — Principal features of the Civil Procedure Code — Suits — Parties to Suit — Framing of Suit — Institution of Suits — Bars of Suit - Doctrines of *Sub Judice* and *Res Judicata* — Place of Suing — Transfer of suits — Territorial Jurisdiction — ‘Cause of Action’ and Jurisdictional Bars — Summons — Service of Foreign summons.

### Unit-II :

Pleadings — Contents of pleadings — Forms of Pleading — Striking out / Amendment of Pleadings - Plaint— Essentials of Plaint - Return of Plaint—Rejection of Plaint—Production and marking of Documents— Written Statement — Counter claim — Set off — Framing of issues.

### Unit-III :

Appearance and Examination of parties & Adjournments — *Ex-parte* Procedure — Summoning and Attendance of Witnesses — Examination — Admissions — Production, Impounding, Return of Documents — Hearing — Affidavit — Judgment and Decree — Concepts of Judgment, Decree, and Interim Orders and Stay — Injunctions — Appointment of Receivers and Commissions — Costs -- Execution — Concept of Execution — General Principles of Execution — Power of Execution — Power of Executing Courts — Procedure for Execution — Modes of Execution -- Arrest and detention — Attachment and Sale.

### Unit-IV:

Suits in Particular Cases — Suits by or against Government — Suits relating to public matters;— Suits by or against minors, persons with unsound mind, - Suits by indigent persons -- Interpleader suits — Incidental and supplementary proceedings - Appeals, Reference, Review and Revision — Appeals from Original Decrees — Appeals from Appellate Decrees — Appeals from Orders — General Provisions Relating to Appeals.

### Unit-V:

Law of Limitation — Concept of Limitation — Object of limitation - General Principles of Limitation — Extension — Condonation of delay — Sufficient Cause — Computation of limitation -- Acknowledgment and Part-payment — Legal Disability — Provisions of the Limitation Act, 1963 (Excluding Schedule)

**Suggested Readings:**

3. Padala Rama Reddi: *The Code of Criminal Procedure*, 1973, Asia Law House, Hyderabad.
4. Prof. S.N. Misra: *The Code of Criminal Procedure*, Central Law Agency.
5. M.P. Tandon: *Criminal Procedure Code*, Allahabad Law Agency.  
Shoorvir Tyage: *The Code of Criminal Procedure*, Allahabad Law Agency

# **Semester-V**

## Interpretation of Statutes

Sub. Code: LLB 301  
Course Objectives

L – 4, C – 4.

- Understand the fundamental principles and methods of interpreting statutes.
- Learn about the various rules and techniques used in statutory interpretation.
- Study the role of judicial decisions in interpreting laws and resolving ambiguities.
- Examine the relationship between statutory provisions and legislative intent.
- Apply statutory interpretation techniques to real-life legal cases and issues.

### Unit-I:

— Classification of Statues — Meaning and Definition of Interpretation — General Principles of Interpretation — Rules of Construction under the General Clauses Act, 1897.

### Unit-II

Grammatical Rule of Interpretation — Golden Rule of Interpretation – Rule of Interpretation to avoid mischief.

### Unit-III:

Interpretation of Penal Statutes and Statutes of Taxation — Beneficial Construction — Construction to avoid conflict with other provisions — Doctrine of Harmonious Construction.

### Unit-IV:

External Aids to Interpretation — Statement of objects of legislation, Legislative debates, identification of purpose sought to be achieved through legislation — Internal Aids to Interpretation — Preamble, title, interpretation clause, marginal notes, explanations etc. — Presumptions.

### Unit-V:

Effect of Repeal — Effect of amendments to statutes — Conflict between parent legislation and subordinate legislation — Methods of interpreting substantive and procedural laws.

### Suggested Readings:

1. Vepa P. Sarathi: *Interpretation of Statutes*, Eastern Book Co, 4th Edition, 1976.
2. Chatterjee: *Interpretation of Statutes*.
3. G.P. Singh: *Principles of Statutory Interpretation*, Wadhwa and Company, 8th Ed., 2001.

## UTTAR PRADESH LAND LAWS

Sub. Code: LLB 303

L-4, C-4

### Course Objectives

- Understand the key principles and provisions of land laws in Uttar Pradesh.
- Study the legal framework governing land ownership, transfer, and registration.
- Learn about land revenue systems, including assessments and collection procedures.
- Explore the rights and responsibilities of landowners, tenants, and other stakeholders.
- Apply Uttar Pradesh land laws to practical land disputes and legal issues.

### Unit I: Introduction

Interpretation Clause, Objects and Clause of UP Zamindari Abolition and Land Reforms Act 1950, Characteristics of Act.

### Unit II: Classes and Rights of Tenure Holder

Bhumidhar with Transferable Rights, Bhumidhar with Non-Transferable Rights, Asami, Government Lease.

Authorities under the Act, Procedure of Collecting Land Revenue, Bar on Jurisdiction of Civil Courts, Records of Rights, Mutation and Boundary Disputes.

### Leading Cases For Detail Study

- \*Abdul Saeed And Another Vs State Of Uttar Pradesh & Others
- \*Smt. Mainia Vs Dy. Director Consolidation
- \*Satyendra Singh Vs State Of Up
- \*Lalsa Vs State Of Up
- \*InduBhushan Vs State Of Up

### Suggested Reading:

1. Maurya R.R., Uttar Pradesh Land Laws, Central Law Publications, Allahabad.
2. Singh C.P., Uttar Pradesh Land Laws, Central Law Agency, Allahabad.

## LAW OF BANKING AND NEGOTIABLE INSTRUMENTS

**Sub. Code: LLB 305**

**L -4, C -4**

### **Course Objectives**

- Grasp the basic principles and regulations governing banking law.
- Study the roles, duties, and obligations of banks and financial institutions.
- Understand the legal aspects of negotiable instruments like cheques, promissory notes, and bills of exchange.
- Explore the processes of transferring, negotiating, and enforcing negotiable instruments.
- Apply banking law and negotiable instrument principles to practical financial situations and disputes.

### **Unit-I:**

History of the Banking Regulation Act — Salient features — Banking Business and its importance in modern times.

### **Unit-II:**

Relationship between Banker and Customer — Debtor and Creditor Relationship — Fiduciary Relationship — Trustee and Beneficiary — Principal and Agent — Bail and Bailee — Guarantor, etc.

### **Unit-III:**

Cheques — Crossed Cheques — Account Payee — Banker's Drafts — Dividend Warrants — Postal order and money orders — Travelers cheques and circular notes — Negotiable instruments and deemed negotiable instruments — Salient features of Negotiable Instruments Act.

### **Unit-IV:**

The Paying Banker — Statutory protection to Bankers — Forgeries—Collecting Banker - Statutory protection.

### **Unit-V:**

Banker's lien and set off. -- Advances - Pledge - Land - Stocks - Shares - Life Policies - Document of title to Goods - Bank Guarantees - Letters of Credit.

### **Suggested Readings:**

1. Tannan: *Banking Law & Practice in India*, 18th Edn., Orient Law House, New Delhi.
2. Avtar Singh: *Negotiable Instruments*, 3rd Edn., Eastern Book Company, Lucknow, 1997.
3. P.N.Varshney: *Banking Law & Practice*, 17th Edn. Sultan Chand & Sons, New Delhi.
4. Taxman: *Law of Banking*, India Law House

## ALTERNATE DISPUTE RESOLUTION

Sub. Code: LLB 307

L -4, C -4

### Course Objectives

- Grasp the fundamental concepts and techniques of alternative dispute resolution (ADR).
- Explore different ADR methods such as mediation, arbitration, and negotiation.
- Understand the legal framework surrounding ADR and its enforceability.
- Examine the benefits and limitations of resolving disputes outside traditional court proceedings.
- Apply ADR practices to practical situations and conflict resolution cases.

The written examination of this paper will be for 50 marks and the remaining 50 marks for record and *viva voce*. There shall be classroom instruction on the following topics:

### Unit-I:

Alternate Dispute Resolution — Characteristics — Advantages and Disadvantages—Unilateral — Bilateral — Triadic (Third Party) Intervention — Techniques and processes -- Negotiation — Conciliation — Arbitration — Distinction between Arbitration, Conciliation and Negotiation.

### Unit-II:

The Arbitration and Conciliation Act, 1996 — Historical Background and Objectives of the Act — Definitions of Arbitration, Arbitrator, Arbitration Agreement -- Appointment of Arbitrator — Termination of Arbitrator -- Proceedings in Arbitral Tribunal -- Termination of Proceedings — Arbitral Award -- Setting aside of Arbitral Award — Finality and Enforcement of Award — Appeals – Enforcement of Foreign Awards. Conciliation – Appointment of Conciliators – Powers and Functions of Conciliator -- Procedure – Settlement of disputes through conciliation.

### Unit-III:

Other Alternative Dispute Resolution Systems —Tribunals -- Lokpal and Lokayukta — Lok Adalats — Family Courts. Section 89 and Order X, Rules 1A, 1B and 1C of Civil Procedure Code.

### Practical Exercises (30 marks)

(a) The students are required to participate in 5 (five) simulation proceedings relating to Arbitration, Conciliation, Mediation and Negotiation. Participation in each such simulation proceeding shall be evaluated for a maximum of 4 (four) marks (Total 5x4=20marks).

(b) Students are required to attend and observe the proceedings of Lok Adalats, Family Courts, Tribunals and other ADR Systems. Each student shall record the above observations in the diary which will be assessed. Record submitted by the student shall be evaluated for 10 marks by the teacher concerned. The Records of the students duly certified by the University Representative appointed by the Controller of Examinations in consultation with the Chairman, BOS in Law shall be submitted to the University before the commencement of the theory examinations

**Viva- voce (20marks):** There shall be viva-voce examination on the above components. The Viva-voce Board consisting of (i) Principal of the College/the teacher concerned (ii) University Representative appointed by the Controller of Examinations in consultation with the Chairman, BOS in Law, and (iii) an advocate with 10 years' experience at the Bar shall evaluate the student in the Viva. The proceedings of the viva-voce shall be recorded.

**Note: Attendance of the students in all the four components of the paper (written examination, participation in simulation proceedings, submission of record and attendance in viva) shall be compulsory.**

**Suggested Readings:**

1. O.P. Tiwari: *The Arbitration and Conciliation Act* (2nd Edition): Allahabad Law Agency.
2. Johar's: *Commentary on Arbitration and Conciliation Act, 1996*: Kamal Law House.
3. Acharya N.K.: *Law relating to Arbitration and ADR*, Asia Law House, Hyderabad
4. Tripathi S.C.: *Arbitration, Conciliation and ADR*, Central Law Agency, Allahabad.
5. Avatar Singh: *Arbitration and Conciliation*, Eastern Law Book House, Lucknow.

## PROFESSIONAL ETHICS AND PROFESSIONAL ACCOUNTING SYSTEM

**Sub. Code: LLB 309**

**L -4, C -4**

### Course Objectives

- Understand the core principles of professional ethics in legal and business practices.
- Learn the rules and standards governing professional conduct in various industries.
- Study the importance of ethical decision-making in the workplace.
- Explore the structure and functioning of professional accounting systems.
- Apply ethical principles and accounting practices to real-world professional scenarios.

The written examination of this paper will be for 50 marks and the remaining 50 marks for record and *viva voce*. There shall be classroom instruction on the following topics:

**Unit-I:** Development of Legal Profession in India — The Advocates Act, 1961 — Right to Practice — a right or privilege? - Constitutional guarantee under Article 19(1) (g) and its scope — Enrolment and Practice — Regulation governing enrolment and practice — Practice of Law — Solicitors firm — Elements of Advocacy.

**Unit-II :** Seven lamps of advocacy — Advocates duties towards public, clients, court, and other advocates and legal aid ; Bar Council Code of Ethics.

**Unit-III:** Disciplinary proceedings — Professional misconduct — Disqualifications — Functions of Bar Council of India/State Bar Councils in dealing with the disciplinary proceedings — Disciplinary Committees -- Powers and functions - Disqualification and removal from rolls.

36. Ubi jus ibi remedium
37. Vigilantibus non dormientibus jura subveniunt

### **Unit III: Paragraph & Precise Writing of Legal Texts**

### **Unit IV: Writing of Moot Memorials**

### **Unit V: Translate Hindi to English & English to Hindi of case laws**

#### **Suggested Reading:**

1. Myneni S.R., Legal language and Legal Writing, Central Law Agency, Allahabad.
2. Jain R.L., Legal Language, Central Law Agency, Allahabad.
3. Prasad Anirudh, Legal Language, Central Law Publications, Allahabad.

## INFORMATION TECHNOLOGY LAW

Sub. Code: LLB 304

L -4, C -4

### Course Objectives

- Understand the fundamental principles of information technology law.
- Explore the legal aspects of cybersecurity, data protection, and privacy.
- Study intellectual property issues related to technology, software, and digital content.
- Learn about e-commerce regulations and online contracts.
- Apply IT law principles to contemporary legal challenges in the digital world.

### Unit-I

**Concept of Information Technology and Cyber Space-** Interface of Technology and Law -Jurisdiction in Cyber Space and Jurisdiction in traditional sense - Internet Jurisdiction - Indian Context of Jurisdiction - Enforcement agencies - International position of Internet Jurisdiction - Cases in Cyber Jurisdiction

### Unit-II

**Information Technology Act, 2000** - Aims and Objects — Overview of the Act – Jurisdiction - Electronic Governance – Legal Recognition of Electronic Records and Electronic Evidence - Digital Signature Certificates - Securing Electronic records and secure digital signatures - Duties of Subscribers - Role of Certifying Authorities - Regulators under the Act - The Cyber Regulations Appellate Tribunal - Internet Service Providers and their Liability – Powers of Police under the Act – Impact of the Act on other Laws .

### Unit-III

**E-Commerce** - UNCITRAL Model - Legal aspects of E-Commerce - Digital Signatures - Technical and Legal issues - E-Commerce, Trends and Prospects - E-taxation, E-banking, online publishing and online credit card payment - Employment Contracts - Contractor Agreements, Sales, Re-Seller and Distributor Agreements, Non-Disclosure Agreements- Shrink Wrap Contract, Source Code, Escrow Agreements etc.

### Unit-IV

**Cyber Law and IPRs**-Understanding Copy Right in Information Technology - Software - Copyrights vs Patents debate - Authorship and Assignment Issues - Copyright in Internet - Multimedia and Copyright issues - Software Piracy –Patents - Understanding Patents - European Position on Computer related Patents - Legal position of U.S. on Computer related Patents - Indian Position on Computer related Patents –Trademarks - Trademarks in Internet - Domain name registration - Domain Name Disputes & WIPO -Databases in Information Technology - Protection of databases - Position in USA,EU and India

### Unit-V

**Cyber Crimes** - Meaning of Cyber Crimes – Different Kinds of Cyber crimes – Cyber crimes under IPC, Cr.P.C and Indian Evidence Law - Cyber crimes under the Information Technology Act,2000 - Cyber crimes under International Law - HackingChild Pornography, Cyber Stalking, Denial of service Attack, Virus Dissemination, Software Piracy,Internet Relay Chat (IRC) Crime, Credit Card Fraud, Net Extortion, Phishing etc - Cyber Terrorism - Violation of Privacy on Internet - Data Protection and Privacy

**Suggested Readings:**

1. Kamlesh N. & MuraliD.Tiwari(Ed), *IT and Indian Legal System*, Macmillan India Ltd, New Delhi
2. K.L.James, *The Internet: A User's Guide* (2003), Prentice Hall of India, New Delhi
3. Chris Reed, *Internet Law-Text and Materials*, 2nd Edition, 2005, Universal Law Publishing Co., New Delhi

## LAW RELATING TO WOMEN

Sub. Code: LLB 306

L -4, C -4

### Course Objectives

- Understand the legal protections and rights available to women under various laws.
- Explore the laws addressing gender-based violence and discrimination.
- Study the legal framework for women's rights in areas such as marriage, divorce, and inheritance.
- Learn about the role of laws in promoting gender equality and social justice.
- Apply legal principles related to women's rights to real-life situations and legal issues.

### Unit-I:

Historical background and status of women in ancient India — Constitutional Provisions and gender justice — Relevant provisions relating to women in Directive Principles of State Policy and Fundamental Duties etc. under the Indian Constitution.

### Unit-II:

Laws relating to marriage, divorce and succession and maintenance under the relevant personal laws with special emphasis on women — Special Marriage Act — Maintenance under Cr. P.C.

International Conventions on Human Rights - Genocide Convention, Convention against Torture, CEDAW, Child Rights Convention, Convention on Statelessness, Convention against Slavery, Convention on Refugees - International Conference on Human Rights(1968) - World Conference on Human Rights(1993).

### Unit-V

Human Rights Protection in India - Human Rights Commissions - Protection of Human Rights Act - National Human Rights Commission (NHRC) - State Human Rights Commissions - Human Right Courts in Districts.

### Suggested Readings:

1. P.R. Gandhi (ed): *Blackstone's International Human Rights Documents*, Universal Law Publishing Co. Delhi.
2. Richard B. Lillich and Frank C. Newman: *International Human Rights - Problems of Law and Policy*, Little Brown and Company, Boston and Toronto.
3. Frederick Quinn: *Human Rights and You*, OSCE/ ODIHR, Warsaw, Poland
4. T.S. Batra: *Human Rights – A Critique*, Metropolitan Book Company Pvt. Ltd., New Delhi.
5. Dr.U. Chandra: *Human Rights*, Allahabad Law Agency Publications, Allahabad.

## LAW OF INVESTMENTS AND SECURITIES

Sub. Code: LLB 310

L -4, C -4

### Course Objectives

- Grasp the core principles and frameworks of human rights law.
- Examine international and national legal tools that safeguard human rights.
- Understand the function of human rights bodies and enforcement mechanisms.
- Study the legal recourse available for violations of human rights.
- Apply human rights law to modern global challenges and legal situations.

### Unit-I:

Administration of Company Law in relation to issue of prospectus and shares -- membership and share capital -- Kinds of shares -- public issue of shares -- procedure for issue of shares -- allotment of shares -- transfer and transmission of shares.

### Unit-II:

Debentures - Kinds of Debentures and Charges – Dividend -- Inter-Corporate Loans and Investments.

### Unit-III:

Basic features of the Security Contracts (Regulation) Act, 1956 — Recognition of Stock Exchanges – Regulation of Contracts and option in securities — Listing of securities -- Guidelines for listing of shares / debentures.

### Unit-IV:

Basic features of the Security and Exchange Board of India Act, 1992 — Basic features of the Act — Establishment of SEBI -- Functions and Powers of SEBI -- Powers of the Central Government under the Act -- Guidelines for disclosure -- Investors Protection - SEBI Appellate Tribunal -- Appeals.

### Unit-V:

Non-Banking Financial Institutions - Classification and Law Relating to NFBCs - AP Protection of Depositors Act, 1999.

### Suggested Readings:

1. Avatar Singh: *Company Law*, 10th Edn. (Eastern Book Company, 1991).
2. *A Guide to Companies Act* by Ramaiah - Wadhwa Publications.
3. NavneetJyothi and Rajesh Gupta, *Practical Manual to Non Baking Financial Companies*, Taxman's Publications.
4. Ananta Raman: *Lectures on Company Law*, Wadhwa and Company.
5. Tandon M.P.: *Company Law*, Allahabad Law Agency, Allahabad.

## DRAFTING, PLEADINGS AND CONVEYANCING

**Sub. Code: LLB 312**

**L -1,P-6, C -4**

### Course Objectives

- Learn the essential principles and techniques of legal drafting.
- Understand the process of drafting pleadings for various types of legal cases.
- Explore the key components and legal requirements of conveyancing documents.
- Study the rules governing the preparation and filing of legal petitions and motions.
- Apply drafting, pleading, and conveyancing skills to real-life legal scenarios

Class-room instruction and simulation exercises on the following items shall be extended.

### Unit-I

**Drafting:** General Principles of Drafting and relevant Substantive Rules shall be taught.

### Unit-II

**Pleadings: (i)** Civil—Plaint, Written Statement, Interlocutory Application, Original Petition, Affidavit, Execution Petition, Memorandum of Appeal and Revision.

(ii) Petition under Article 226 and 32 of the Constitution of India - Drafting of Writ Petition and PIL Petition.

(iii) Criminal— Complaint, Criminal Miscellaneous Petition, Bail Application, Memorandum of Appeal and Revision.

### Unit-III

**Conveyancing:** Sale Deed, Mortgage Deed, Lease Deed, Gift Deed, Promissory Note, Power of Attorney, Will, Trust Deed

### Practical Exercises

Apart from teaching the relevant law, the course includes not less than 15 (fifteen) practical exercises in drafting of pleadings carrying a total of 45 marks (3 marks for each) and 15 (fifteen) exercises in conveyancing carrying another 45 marks (3 marks for each exercise) and remaining 10 marks for viva-voce.

These 30 exercises shall be recorded. Each student shall be served with different problems for the purpose of exercise. These exercises shall be assessed and marks may be allotted.

These exercises shall be evaluated by a common committee consisting of (i) Principal of the College/the concerned teacher (ii) University Representative appointed by the Controller of Examinations in consultation with the Chairman, Board of Studies in Law, O.U.; and (iii) an Advocate with 10 years' experience at the Bar. The same committee will also conduct viva-voce on the above concepts. The proceedings of the viva-voce shall be recorded.

**Note:**

- 1. Attendance of the students for viva-voce shall be compulsory.**
- 2. The above records certified by the University Representative appointed by the Controller of Examinations in consultation with the Chairman, BOS in Law shall be submitted to the University for Further Verification**

**Suggested Readings:**

1. R.N. Chaturvedi: *Pleadings and Conveyancing*, Central Law Publications.
2. De Souza: *Conveyancing*, Eastern Law House.
3. Tiwari: *Drafting, Pleading and Conveyancing*, Central Law Agency.
4. Mogha: *Indian Conveyancer*, Eastern Law House.

## **MOOT COURTS, OBSERVATION OF TRIAL, PRE-TRIAL PREPARATIONS AND INTERNSHIP**

**Sub. Code: LLB 314**

**L -0, P-8, C -4**

### **Course Objectives**

- Understand the fundamentals of moot court practice and courtroom procedures.
- Learn the techniques for observing and analysing real court trials.
- Study the importance of pre-trial preparation, including case research and strategy development.
- Gain hands-on experience in legal practice through internships and exposure to real-world cases.
- Develop practical skills in legal argumentation, trial advocacy, and client representation.

This paper has three components of 30 marks each and viva-voce for 10 marks.

**(A) Moot Court (30 marks):** Every student is required to participate in at least three moot courts in the VI Semester with 10 marks for each. The moot court work will be on an assigned problem and it will be evaluated for 5 marks for written submissions and 5 marks for oral advocacy.

Marks will be given on the basis of written submission and oral advocacy. Written submissions shall include brief summary of facts, issues involved, provisions of laws and arguments, citation, prayer, etc. Marks for oral advocacy may be awarded for communication skills, presentations, language, provisions of law; authorities quoted, court manners, etc. Written Memorials submitted by the students shall be kept by the College for Further Verification.

The performance of student in the moot court shall be evaluated by a committee consisting of (i) Principal of the College (ii) an Advocate with 10 years' experience at the Bar; and (iii) the teacher concerned.

### **(B) Observance of Trial in two cases, one Civil and one Criminal (30 marks):**

Students are required to attend courts to observe at least one civil and one criminal case. They shall maintain a record and enter the various steps observed during their attendance on different days in the court assignment. The Court Observation Record submitted by the students should be evaluated by a committee consisting of (i) Principal of the College/the concerned teacher (ii) University Representative appointed by the Controller of Examinations in consultation with the Chairman, Board of Studies in Law, and (iii) an Advocate with 10 years' experience at the Bar and average be taken. Court attendance shall be compulsory and attendance has to be recorded in a register kept therefor. This may be carried under the supervision of a teacher of the college. This scheme will carry 30 marks.

### **(C) Interviewing Techniques and Pre-Trial Preparations and Internship Diary (30 marks):**

Each student should observe two 'interview sessions' of clients either in the Lawyer's Office or in the Legal Aid Office and record the proceedings in a diary, which will carry 15 marks.

Each student has to further observe the preparation of documents and court papers by the Advocate and the procedure for the filing of the suit / petition. This shall be recorded in the diary which will carry 15 marks.

The diary shall clearly indicate the dates on which the above observations are made and they shall be authenticated by the advocate concerned.

Evaluation of the above diary shall be made by the committee consisting of (i) Principal of the College/the concerned teacher (ii) University Representative appointed by the Controller of Examinations in consultation with the Chairman, Board of Studies in Law, O.U.; and (iii) an Advocate with 10 years' experience at the Bar and average be taken.

**(D)Viva-voce (10 marks):** There shall be viva-voce examination on all the above three components. The Viva-voce Board consisting of (i) Principal of the College/the concerned teacher (ii) University Representative appointed by the Controller of Examinations in consultation with the Chairman, BOS in Law; and (iii)an advocate with 10 years' experience at the Bar shall evaluate the student in the Viva. The proceedings of the viva-voce shall be recorded.

**Note:**

- 1. Attendance of the students in all the four components of the paper shall be compulsory.**
- 2. The above records, diary certified by the University Representative appointed by the Controller of Examinations in consultation with the Chairman, BOS in Law shall be submitted to the University for Further Verification.**

**Suggested Readings:**

1. Dr. Kailash Rai: *Moot Court Pre-Trial Preparation and Participation in Trial Proceedings*, Central Law Publication.
2. AmitaDanda: *Moot Court for Interactive Legal Education*, Gogia Law Agency, Hyderabad.
3. Blackstone's: *Books of Moots*, Oxford University Press.
4. Mishra: *Moot Court Pre-Trial Preparation and Participation in Trial Proceedings*, Central Law, Allahabad.

## **Shobhit University, Gangoh**

**(Established by UP Shobhit University Act No. 3, 2012)**

### **School of Law and Constitutional Studies**

#### **Ordinances, Regulations & Syllabus**

**For**

**Bachelor of Law (LLB) Three Year Programme Semester  
Pattern  
(w.e.f. session 2014-15)**

**Approved and adopted in the year 2014 (1<sup>st</sup> meeting of Board of  
Studies)**

## **Programme Educational Objectives (PEOs)**

**PEO 1** To provide students with a comprehensive understanding of legal principles, doctrines, and the framework of laws governing various fields.

**PEO 2** To develop the ability to critically analyze legal issues, interpret statutes, and apply legal reasoning to complex situations

**PEO 3** To instill ethical values and professional integrity, ensuring that graduates adhere to the highest standards of legal practice and contribute to social justice and equity

**PEO 4** To enhance oral and written communication skills, equipping students to present legal arguments persuasively and represent clients effectively in courts, tribunals, and other forums.

**PEO 5** To cultivate strong legal research skills and foster an attitude of lifelong learning, enabling students to stay updated with legal developments and contribute to academic and professional discourses.

**PEO 6** To prepare graduates to serve as legal professionals who address societal challenges, advocate for policy changes, and contribute to nation-building through leadership roles in the legal and judicial systems.

## **Programme Specific Objectives (PSO's)**

**PSO 1** To equip students with a thorough understanding of national and international legal systems, statutory laws, and judicial precedents

**PSO 2** To develop practical skills such as drafting legal documents, conducting negotiations, and preparing case strategies for litigation and alternative dispute resolution mechanisms

**PSO 3** To prepare students to use their legal knowledge for promoting social justice, providing legal aid to underprivileged sections of society, and contributing to the public interest.

**PSO 4** To enable students to critically evaluate laws and policies, suggest legal reforms, and participate in legislative drafting processes to address contemporary social, economic, and environmental issues.

**PSO 5** To provide opportunities for students to specialize in cutting-edge legal fields, such as intellectual property rights, cyber law, environmental law, or international trade law, catering to global demands.

**PSO 6** To prepare students for careers in the judiciary, government services, or corporate law by providing insights into procedural laws, administrative processes, and governance mechanisms.

## **Programme Outcome Objectives (POO's)**

**POO 1** Graduates will acquire in-depth knowledge of legal concepts, principles, and procedures, enabling them to interpret and apply laws effectively in practical scenarios

**POO 2** Graduates will demonstrate the ability to critically analyze legal issues, evaluate evidence, and develop reasoned arguments to solve complex legal problems.

**POO 3** Graduates will exhibit ethical conduct, professionalism, and a commitment to justice in their legal practice, adhering to the standards of the legal profession

**POO 4** Graduates will develop strong oral and written communication skills, enabling them to present legal arguments persuasively in courts, tribunals, and other professional settings.

**POO 5** Graduates will use their legal expertise to address societal challenges, uphold human rights, and advocate for marginalized communities, contributing to social equity and justice.

**POO 6** Graduates will demonstrate the ability to continuously update their legal knowledge and adapt to evolving legal landscapes, ensuring competence in the face of new challenges.

## LAW OF CONTRACT-I

Sub. Code: LLB 101

L – 4, C – 4.

### Course Objectives

- Understand the basic principles of contract law.
- Learn the rules for forming valid contracts.
- Analyse remedies for breach of contract.
- Apply contract law to real-life scenarios
- Develop legal reasoning and research skills

### Unit I:

Definition and essentials of a valid Contract - Definition and essentials of a valid Offer - Definition and essentials of valid Acceptance - Communication of Offer and Acceptance - Revocation of Offer and Acceptance through various modes including electronic medium - Consideration - salient features - Exception to consideration -

### Unit-II :

Capacity of the parties - Effect of Minor's Agreement - Contracts with insane persons and persons disqualified by law - Concepts of Free Consent - Coercion - Undue influence - Misrepresentation - Fraud - Mistake - Lawful Object -

### Unit-III:

Discharge of Contracts - By performance - Appropriation of payments - Performance by joint promisors - Discharge by Novation - Remission - Accord and Satisfaction -

### Unit-IV:

Quasi Contract - Necessaries supplied to a person who is incapable of entering into a contract - Payment by an interested person - Liability to pay for non-gratuitous acts - Rights of finder of lost goods - Things delivered by mistake or coercion - Quantum meruit - Remedies for breach of contract -

### Unit-V:

Specific Relief - Recovering possession of property - Specific performance of the contract - Rectification of instruments - Rescission of contracts - Cancellation of instruments - Declaratory Decrees - Preventive Relief - Injunctions.

### Suggested Readings:

1. The Law of Contract by M. P. Tandon
2. Contract Law by Avtar Singh
3. The Law of Contract by R.K. Sinha
4. Contract Law by S.K. Kapoor
5. The Law of Contract by Pollock and Mulla
6. Contract Law: A Comparative Introduction by John Cartwright
7. Contract Law by Cheshire, Fifoot & Furmston
8. Law of Contract by Anson

## **FAMILY LAW–I (Hindu Law)**

**Sub. Code: LLB 103**

**L – 4, C – 4.**

### **Course Objectives**

- Understand the fundamental principles of Hindu Law.
- Learn the legal framework governing marriage and divorce.
- Study laws related to succession and inheritance.
- Analyse the rights and duties within Hindu joint families.
- Apply legal concepts to family disputes.

### **Unit-I:**

Sources of Hindu Law – Scope and application of Hindu Law – Schools of Hindu Law - Mitakshara and Dayabhaga Schools – Concept of Joint Family, Coparcenary, Joint Family Property and Coparcenary Property

### **Unit-II:**

Marriage - Definition - Importance of institution of marriage under Hindu Law – Conditions of Hindu Marriage.

### **Unit-III:**

**Matrimonial** Remedies under the Hindu Marriage Act, 1955 - Restitution of Conjugal Rights – Nullity of marriage –

### **Unit-IV:**

Concept of Adoption - Law of Maintenance - Law of Guardianship - Hindu Adoption and Maintenance Act, 1956 .

### **Unit-V:**

Succession – Intestate succession – Succession to the property of Hindu Male and Female; Dwelling House – Hindu Succession Act, 1956 as amended by the Hindu Succession (Andhra Pradesh Amendment) Act, 1986

### **Suggested Readings:**

1. Mulla's Hindu Law (Edited by M.P. Furmston)
2. Hindu Law by N.V. Paranjape
3. Modern Hindu Law by R.K. Sinha
4. Hindu Law: An Analytical Approach by N.V. Paranjape
5. Hindu Law: Principles and Precedents by A.B.K. Sharma
6. The Hindu Law of Marriage and Divorce by G.W. Sherring

## **Constitutional Law – I**

**Sub. Code: LLB 105**

**L – 4, C – 4.**

### **Course Objectives**

- Gain knowledge of the fundamental principles of the Constitution.
- Examine the fundamental rights and duties of individuals.
- Understand the roles and powers of the Legislature, Executive, and Judiciary.
- Explore the concept of separation of powers in governance.
- Study the importance and process of constitutional amendments.

### **Unit-I**

Constitution-Meaning and Significance - Evolution of Modern Constitutions -Classification of Constitutions-Indian Constitution - Historical Perspectives - Government of India Act, 1919 - Government of India Act, 1935 -

### **Unit-II**

Nature and Salient Features of Indian Constitution - Preamble to Indian Constitution - Union and its Territories-Citizenship -

### **Unit-III**

Right to Equality(Art.14-18) – Freedoms and Restrictions under Art.19 - Protection against Ex-post facto law - Guarantee against Double Jeopardy - Privilege against Self-incrimination

### **Unit-IV**

Rights against Exploitation - Right to Freedom of Religion - Cultural and Educational Rights

### **Unit-V**

Directive Principles of State Policy – Significance – Nature – Classification - Application and Judicial Interpretation - Relationship between Fundamental Rights and Directive Principles

### **Suggested readings:**

1. Constitutional Law of India by Dr. J.N. Pandey
2. Constitutional Law by M.P. Jain
3. Constitutional Law of India by D.D. Basu
4. Indian Constitutional Law by V.N. Shukla
5. The Constitution of India by P.M. Bakshi
6. Introduction to the Constitution of India by D.D. Basu

# Law of Torts Including M.V. Act and Consumer Protection laws

Sub. Code: LLB 107

L – 4, C – 4.

## Course Objectives

- Learn the fundamental concepts and scope of tort law.
- Examine the legal rules governing liability for wrongful acts.
- Understand the compensation mechanisms under the Motor Vehicles Act.
- Explore consumer rights and protections under relevant laws.
- Apply tort law to practical situations and legal disputes.

## Unit-I:

Nature of Law of Torts - Definition of Tort - Elements of Tort - Development of Law of Torts in England and India - Wrongful Act and Legal Damage - *Damnum Sine Injuria* and *Injuria Sine Damnum* - Tort distinguished from Crime and Breach of Contract.

judice, Corpus Possessionis, Custodia Legis, Composmentis, Cypress, Defacto, DeJure, Denovo, Donation mortis cause, Enventresamere, Enroute, Exofficio, Exgratia, Exparte, Ex post facto, Factum valet, Femesole, Filius nullius, In forma pauperis, Ibid, Inlimine, Inmemoriam, Inparimaterial, Intelligible differentia, Inter alia, Interse, Ipso jure, Intoto, Ipsofacto, In invitum, Inlocoparentis, Inpais, In pari delicto, potiores condition possidentis (or defendentis), In rem, Intervivos, Intra-vires, Justertii, Jus civile, Jus divinum, Lex Fori, Lex Loci delicti, Lis pendens, Locus standi, Malafide, Mens Rea, Modus operandi, Modus Vivendi, Non compos mentis, Nonfeasance, Nudum Pactum, Onus probandi, Pacta Sunt Servanda, Pari Passu, Pendente lite, Per annum, Per capita, Per diem, Per mensem, Per stripes, Persona non grata.

### Unit III: Legal maxims

1. Absoluta sententia expositore non indiget
2. A bundanscautela non nocet.
3. Actio-personalior moritur-cum persona
4. Actori incumbit onus probandi
5. Actus curiae neminem gravabit
6. Actus dei nemini facit injuriam
7. Actus reus
8. Actus legis nemini est damnosus
9. Actus non-facit reum nisi mens sit rea
10. Actio Personalis Moritur Cum Persona.
11. Delegatus Non potest Delegare
12. Ejusdem Generis
13. Exturpi causa non oritur actione
14. Noscitur a sociis
15. Non-Execusat
16. Novus actus interveniens
17. Respondent superior
18. Falsus in uno falsus in omnibus
19. Acquitia sequitur legem
20. Allegans contraria non est audiendus
21. Audi alteram partem
22. Caveat emptor
23. Damnum sine injuria
24. De minimis non curat lex
25. Dolus malus pactum se non servabit
26. Delegates non-potest delegare
27. Fiat Justitia ruat caelum
28. Ignorantia legis neminem excusat
29. Ignorantia facti excusat ignorantia Juris
30. Injuria sine damno
31. Interest republicae ut sit finis litium
32. Lex non cogit ad impossibilia
33. Nemo dat quod non habet

35. Quantum meruit
36. Qui approbat non-reprobat
37. Qui facit per alium per-se
38. Res ipsa loquitur
39. Salus populi est Suprema Lex
40. Ubi-jus ibi-remedium
41. Vigilantibus non-dormientibus jura subveniunt

**Unit IV: (A) Paragraph & Precise Writing of Legal Texts  
(B) Translate Hindi to English & English to Hindi of case laws**

**Suggested Reading:**

1. Myneni S.R., Legal language and Legal Writing, Central Law Agency, Allahabad.
2. Jain R.L., Legal Language, Central Law Agency, Allahabad.
3. Prasad Anirudh, Legal Language, Central Law Publications, Allahabad.

## Spanish-I

**Sub. Code: LLB-109A**

**L – 4, C – 4.**

### **Course Objectives**

- Build a foundation in basic Spanish vocabulary and grammar.
- Develop listening and speaking skills for everyday conversations.
- Learn to read and comprehend simple Spanish texts.
- Practice writing basic sentences and paragraphs in Spanish.
- Gain cultural insights into Spanish-speaking regions.

### **Unit 1: Introduction to Spanish**

Overview of the Spanish language and its global significance, Alphabet and pronunciation, Basic greetings and introductions

### **Unit 2: Basic Grammar and Vocabulary**

Nouns, articles, and gender, Common adjectives and their agreement with nouns, Essential vocabulary: family, colours, numbers

### **Unit 3: Present Tense Verbs**

Introduction to regular verbs (AR, ER, IR), Conjugation patterns and usage  
Practical exercises and dialogues

### **Unit 4: Common Expressions and Questions**

Essential phrases for everyday conversation, Forming questions and negation  
Role-playing dialogues

### **Suggested Readings:**

1. Madrigal's Magic Key to Spanish" by Margarita Madrigal
2. A classic introductory book that simplifies grammar and vocabulary, making it accessible for beginners.
3. "Practice Makes Perfect: Spanish Verb Tenses" by Dorothy Richmond
4. Focuses on mastering verb tenses with clear explanations and exercises.
5. "Easy Spanish Step-By-Step" by Barbara Bregstein
6. A structured approach to learning Spanish, emphasizing grammar and vocabulary in a logical progression.
7. "Living Language Spanish" (Complete Course)
8. A comprehensive language course that includes audio components and a variety of exercises.

# German-I

**Sub. Code: LLB-109B**

**L – 4, C – 4.**

## **Course Objectives**

- Acquire basic German vocabulary and grammar skills.
- Develop the ability to engage in simple conversations in German.
- Learn to read and understand basic German texts.
- Practice writing short sentences and paragraphs in German.
- Explore cultural aspects of German-speaking countries.

## **Unit 1: Introduction to German**

German alphabet and pronunciation, Basic greetings and introductions, Pronunciation drills, Icebreaker introductions

## **Unit 2: Numbers and Colours**

Numbers 1-100, Basic colours and their usage, Number games, Colour identification exercises

## **Unit 3: Everyday Vocabulary**

Family members, Common nouns (e.g., household items, animals) Create a family tree, Vocabulary flashcard games

## **Unit 4: Basic Grammar and Sentence Structure**

Introduction to articles (definite and indefinite), Subject-verb-object structure, Sentence formation exercises, Group writing tasks

## **Suggested Readings:**

1. "German Made Simple: Learn to Speak and Understand German Quickly and Easily"  
Author: Arnold Leitner
2. A straightforward introduction to the language, covering essential vocabulary and grammar.
3. "German for Dummies"
4. Author: Wendy Foster
5. "The Everything Learning German Book"  
Author: Julie Gutin
6. "Practice Makes Perfect: Complete German Grammar"
7. Author: Ed Swick
8. A comprehensive workbook that reinforces grammar concepts with exercises and explanations.

## Chinese-I

**Sub. Code: LLB-109C**

**L – 4, C – 4.**

### **Course Objectives**

- Build a foundation in essential Chinese vocabulary and grammar.
- Improve listening and speaking abilities for basic Chinese conversations.
- Learn to read and write simple Chinese characters.
- Practice constructing basic sentences and dialogues in Chinese.
- Explore the culture and traditions of Chinese-speaking regions.

### **Unit 1: Introduction to Chinese**

Pinyin and pronunciation, Basic greetings and self-introduction, Pronunciation practice  
Icebreaker introductions

### **Unit 2: Numbers and Dates**

Numbers 1-100, Days of the week and months, Number games, Calendar exercises

### **Unit 3: Everyday Vocabulary**

Family members, Common nouns (e.g., animals, objects), Family tree project  
Vocabulary flashcards

### **Unit 4: Basic Grammar and Sentence Structure**

Subject-verb-object structure, Introduction to measure words, Sentence formation exercises  
Simple writing tasks

### **Suggested Readings:**

1. "Integrated Chinese" (Textbook + Workbook)
  - a. Authors: Tao-chung Yao, Yuehua Liu, et al.
  - b. A comprehensive series that covers speaking, reading, and writing. It includes cultural notes and exercises.
2. "Chinese Made Easier"
  - a. Authors: Maureen S. W. D. H. Wong, et al.
  - b. Focuses on conversational skills with a gradual introduction to reading and writing.
3. "New Practical Chinese Reader"
  - a. Authors: Liu Xun
  - b. A popular series that integrates language and cultural elements, with a focus on conversational skills.
4. "Reading & Writing Chinese"
  - a. Author: William McNaughton
  - b. A guide to learning characters, with clear explanations and practice exercises.

## **French-I**

**Sub. Code: LLB-109D**

**L – 4, C – 4.**

### **Course Objectives**

- Acquire basic French vocabulary and grammar essentials.
- Enhance speaking and listening skills for everyday French conversations.
- Develop reading comprehension of simple French texts.
- Practice writing basic French sentences and paragraphs.
- Explore the culture and customs of French-speaking regions.

### **Unit 1: Daily Routines**

Common verbs (aller, être, avoir), Talking about daily activities

### **Unit 2: Food and Drink**

Vocabulary related to food, Expressing likes and dislikes

### **Unit 3: Clothing and Shopping**

Vocabulary for clothing, Shopping dialogue and role-play

### **Unit 4: Directions and Transportation**

Asking for and giving directions, Vocabulary for transportation

### **Suggested Readings:**

1. Easy French Step-By-Step" by Myrna Bell Rochester
2. A clear, gradual approach to learning French grammar and vocabulary.
3. "French for Dummies" by Dodi-Katrin Schmidt and Michelle M. Williams
4. Practice Makes Perfect: Complete French Grammar" by Annie Heminway
5. Comprehensive grammar explanations with exercises for practice.
6. "Fluent in French: The Most Complete Study Guide to Learn French" by Frederic Bibard
7. Covers vocabulary, grammar, and cultural insights

## **Semester-II**

## Law of Contract - II

Sub. Code: LLB 102

L – 4, C – 4.

### Course Objectives

- Understand the concepts of contract performance and breach.
- Study the different types of contracts and their legal implications.
- Examine the rules surrounding contract termination and discharge.
- Explore the remedies available for contract breach and enforcement.
- Apply advanced contract law principles to real-world scenarios.

### Unit-I:

Indemnity and Guarantee - Contract of Indemnity, definition - Rights of Indemnity holder - Liability of the indemnified - Contract of Guarantee - Definition of Guarantee - Essential characteristics of Contract of Guarantee - Distinction between Indemnity and Guarantee - Kinds of Guarantee - Rights and liabilities of Surety - Discharge of surety. Contract of Bailment - Definition of bailment - Essential requisites of bailment.

### Unit-II:

Contract of Agency - Definition of Agent - Creation of Agency - Rights and duties of Agent - Delegation of authority - Personal liability of agent.

### Unit-III:

Contract of Sale of Goods - Formation of contract - Subject matter of sale - Conditions and Warranties - Express and implied conditions and warranties

### Unit-IV:

Property - Possession and Rules relating to passing of property - Sale by non-owner - *Nemo dat quad non habet* - Delivery of goods - Rights and duties of seller and buyer before and after sale.

### Unit-V:

Contract of Partnership - Definition and nature of partnership - Formation of partnership- Test of partnership - Partnership and other associations - Registration of firm - Effect of non-registration - Relations of partners - Rights and duties of partners - Property of firm - Relation of partners to third parties.

### Suggested Readings:

1. Anson's *Law of Contract*, 25th Ed. 1998, Oxford University Press, London.
2. Venkatesh Iyyer: *The Law of Contracts and Tenders*, Gogia & Company Hyderabad.
3. Cheshire & Fifoot: *Law of Contract*, Butterworth, London, 1976.
4. Mulla: *The Indian Contract Act*, N.M. Tripathi (P) Ltd. Bombay, 1984.
5. G.C.V. Subba Rao: *Law of Contracts*, S. Gogia & Co., Hyderabad, 1995
6. Krishnan Nair: *Law of Contracts*, S. Gogia & Co. Hyderabad, 1995.
7. Avtar Singh: *Law of Contracts*, Eastern Book Company, Lucknow, 1998.
8. A Ramaiah's *Sale of Goods Act*, 4th Ed. 1998, The Law Book Co., Allahabad.
9. Benjamin's *Sale of Goods*, 1st Ed. 1978, Sweet & Maxwell, London.
10. P.S. Atiyah: *Sale of Goods Act*, 9th Ed. 1997, Universal Book Traders,

## Family Law – II (Muslim Law)

Sub. Code: LLB 104

L – 4, C – 4.

### Course Objectives

- Understand the basic principles and sources of Muslim personal law.
- Study the laws governing marriage, divorce, and maintenance under Muslim law.
- Examine the rules of inheritance and succession in Muslim communities.
- Analyse the rights and duties of Muslim family members.
- Apply Muslim law principles to practical family law issues.

### Unit-I:

Origin and development of Muslim Law - Sources of Muslim Law - Schools of Muslim Law - Difference between the Sunni and Shia Schools – Sub-schools of Sunni Law - Operation and application of Muslim Law - Conversion to Islam - Effects of conversion - Law of Marriage, nature of Muslim Marriage.

### Unit-II:

Divorce - Classification of divorce - different modes of Talaq - Legal consequences of divorce - Dissolution of Muslim Marriage Act, 1939 - Maintenance, Principles of maintenance, Persons entitled to maintenance.

### Unit-III:

Parentage - Maternity and Paternity - Legitimacy and acknowledgment - Guardianship - Meaning - Kinds of guardianship - Removal of guardian - Difference between Shia and Sunni Law. Gift - Definition of Gift - Requisites of valid gift - Gift formalities - Revocation of gift - Kinds of gift.

### Unit-IV:

Waqf \_ Definition - Essentials of Waqf - Kinds of Waqf – Creation of Waqf - - Revocation of Waqf - Salient features of the Waqf Act, 1995 – Mutawalli - Who can be Mutawalli - Powers and duties of Mutawalli - Removal of Mutawalli and Management of Waqf property. Succession.

### Unit-V:

Special Marriage Act, 1954 - Salient features of Indian Divorce Act, 1869 - Domicile - Maintenance to dependents/ Spouses - Intestate succession of Christians under the Indian Succession Act, 1925.

### Suggested Readings:

1. Tahir Mahmood: *The Muslim Law of India*, 1980, Law Book Company, Allahabad.
2. Aquil Ahmed: *Text Book of Mohammadan Law*, 5th Edition 1992, Central Law Agency, Allahabad.
3. Prof. G.C.V. Subba Rao: *Family Law in India*, 6th Edition, 1993, S.Gogia & Company, Hyderabad.
4. Asaf A.A.Fyzee: *Outlines of Mohammadan Law*, 4th Edition, 1999, Oxford University Press, Delhi.

## Constitutional Law – II

Sub. Code: LLB 106

L – 4, C – 4.

### Course Objectives

- Understand the concept of federalism and distribution of powers in the Constitution.
- Study the structure and functions of various constitutional bodies.
- Analyse the role of the judiciary in interpreting the Constitution.
- Examine the relationship between fundamental rights and public policy.
- Explore the process and significance of constitutional amendments.

### Unit-I

Legislature under Indian Constitution - Union and State Legislatures - Composition, Powers, Functions and Privileges - Anti-Defection Law - Executive under Indian Constitution - President

### Unit-II

Judiciary under Constitution - Supreme Court - Appointment of Judges, Powers and Jurisdiction - High Courts

### Unit-III

CentreState Relations - Legislative, Administrative and Financial Relations - Cooperation and Coordination between the Centre and States

### Unit-IV

Liability of State in Torts and Contracts - Freedom of Interstate Trade, Commerce and Inter course - Services under the State

### Unit-V

Emergency – Need of Emergency Powers - Different kinds of Emergency - National, State and Financial emergency

### Suggested Readings:

1. M.P.Jain, *Indian Constitutional Law*, Wadhwa & Co, Nagpur
2. V.N.Shukla, *Constitution of India*, Eastern Book Company, Lucknow
3. Granville Austin, *Indian Constitution-Cornerstone of a Nation*, OUP, New Delhi
4. H.M.Seervai, *Constitutional Law of India* (in 3 Volumes), N.M.Tripathi, Bombay
5. G.C.V.Subba Rao, *Indian Constitutional Law*, S.Gogia & Co., Hyderabad
6. B.Shiva Rao, *Framing of India's Constitution* (in 5 Volumes), Indian Institute of Public Administration, New Delhi
7. J.N.Pandey, *Constitutional Law of India*, Central Law Agency, Allahabad

## LAW OF CRIMES

Sub. Code: LLB 108

L – 4, C – 4.

### Course Objectives

- Understand the key principles and categories of criminal law.
- Study the elements of criminal offenses and defences.
- Examine the criminal justice system, including police, prosecution, and courts.
- Analyse the procedures for trial and punishment in criminal cases.
- Apply criminal law principles to real-life case scenarios.

### Unit-I:

Concept of crime - Definition and meaning of crime - Distinction between crime and tort - Stages of crime - Intention, Preparation, Attempt and Commission of Crime - Elements of Crime - *Actus Reus and Mensrea* - Codification of Law of Crimes in India - Application of the Indian Penal

### Unit-II:

General exceptions - Abetment - Criminal Conspiracy - Offences against the State

### Unit-III:

Offences affecting human body (offences affecting human life) Culpable Homicide and Murder – Hurt and Grievous Hurt - Wrongful restraint and Wrongful confinement

### Unit-IV:

Offences affecting the public health, safety, convenience, decency and morals - Offences against Property - Theft - Extortion - Robbery & Dacoity - Cheating - Mischief - Criminal Trespass

### Unit-V:

Offences by or relating to public servants - False Evidence and Offences against Public Justice - Offences relating to documents

### Suggested Readings:

1. Ratan Lal and Dhiraj Lal: *Indian Penal Code*, Wadhwa & Co., 2000.
2. Achutan Pillai: *Criminal Law*, Butterworth Co., 2000.
3. Gour K.D.: *Criminal Law - Cases and Materials*, Butterworth Co., 1999.
4. Kenny's: *Outlines of Criminal Law*, (1998 Edition)

## Environmental Law

Sub. Code: LLB 110

L – 4, C – 4.

### Course Objectives

- Understand the key principles and framework of environmental law.
- Study national and international regulations on environmental protection.
- Examine the legal aspects of environmental pollution and conservation.
- Explore the roles of governmental and non-governmental organizations in environmental law.
- Apply environmental law concepts to contemporary issues and case studies.

### Unit-I

The meaning and definition of environment – Ecology - Ecosystems-Biosphere - Biomes - Ozone depletion - Global Warning - Climatic changes - Need for the preservation, conservation and protection of environment

### Unit-II

Common Law remedies against pollution - trespass, negligence, and theories of Strict Liability & Absolute Liability - Relevant provisions of I.P.C. and Cr.P.C. and C.P.C., for the abatement of public nuisance in pollution cases

### Unit-III

The law relating to the preservation, conservation and protection of forests, wild life and endangered species, marine life, coastal ecosystems and lakes etc. - Prevention of cruelty towards animals - The law relating to prevention and control of water pollution - Air Pollution - Environment pollution control mechanism.

### Unit-IV:

Art. 48A and Art. 51A(g) of the Constitution of India - Right to wholesome environment - Right to development - Restriction on freedom of trade, profession, occupation for the protection of environment - Immunity of Environment legislation from judicial scrutiny(Art.31C) .

### Unit-V

International Environmental Regime - Transactional Pollution - State Liability - Customary International Law - Liability of Multinational Corporations/Companies - Stockholm Declaration on Human Environment, 1972 - The role of UNEP for the protection of environment - Ramsar Convention 1971 – Bonn Convention (Migratory Birds) 1992

3. Armin Rosencranz and Shyam Divan: *Environmental Law and Policy in India*.
4. A. Agarwal (ed.): *Legal Control of Environmental Pollution*
5. Chetan Singh Mehta: *Environmental Protection and Law*
6. V.K. Krishna Iyer: *Environment Pollution and Law*
7. Shah: *Environmental Law*
8. Paras Diwan: *Environmental Law and Policy in India*,1991
9. Dr. N. Maheshwara Swamy, *Environmental Law*, Asia Law House, Hyderabad.

## **Semester-III**

## JURISPRUDENCE

**Sub. Code: LLB 201**  
**Course Objectives**

**L – 4, C – 4.**

- Explore the fundamental concepts and theories of law.
- Analyse the nature and sources of legal authority and norms.
- Study the relationship between law, morality, and justice.
- Examine different schools of jurisprudential thought and their impact.
- Apply jurisprudential principles to contemporary legal issues.

### **Unit-I:**

Meaning and Definition of Jurisprudence — General and Particular Jurisprudence - Elements of Ancient Indian Jurisprudence — Schools of Jurisprudence — Analytical, Historical, Philosophical and Sociological Schools of Jurisprudence. Theories of Law — Meaning and Definition of Law — The

### **Unit-II:**

Sources of Law — Legal and Historical Sources — Legislation - Definition of legislation - Classification of legislation- Supreme and Subordinate Legislation - Direct and Indirect Legislation - Principles of Statutory Interpretation. Precedent — Definition of Precedent — Kinds of Precedent — *Stare Decisis* — Original and Declaratory Precedents — Authoritative and Persuasive Precedents. Custom – Definition of Custom

### **Unit-III:**

Persons — Nature of personality — Legal Status of Lower Animals, Dead Persons and Unborn persons — Legal Persons — Corporations — Purpose of Incorporation — Nature of Corporate Personality - Rights and Duties.

### **Unit-IV:**

Obligation — Nature of Obligation — Obligation arising out of Contract, Quasi Contract, trust and breach of obligation etc. — Liability — Nature and kinds of liability — Acts — *Mens Rea* — Intention and Motive — Relevance of Motive.

### **Unit-V:**

Ownership — Definition and kinds of Ownership - Possession — Elements of Possession - Relation between Ownership and Possession — Possessory Remedies — Property — Meaning — Kinds of Property — Modes of Acquisition of Property — Legal Sanctions - Meaning of Sanction — Classification of Sanctions — Civil and Criminal Justice.

### **Suggested Readings:**

1. Salmond: *Jurisprudence*, Universal Publishers 12th Edn. 1966.
2. Rama Jois, *Legal and Constitutional History of India*, Universal Law Publications, Delhi.
3. N.V. Pranjape – Jurisprudence
4. S.R. Dhyeni - Jurisprudence

## LAW OF EVIDENCE

Sub. Code: LLB 203

L – 4, C – 4.

### Course Objectives

- Grasp the basic principles and rules governing evidence in law.
- Learn about different types of evidence and their acceptability in court.
- Explore the roles and procedures involving witnesses, including examination and cross-examination.
- Understand the concepts of burden of proof and legal presumptions.
- Apply evidentiary rules to real-life legal cases and scenarios.

### Unit-I:

The Indian Evidence Act, 1872 — Salient features of the Act – Meaning and kinds of Evidence — Interpretation clause — May Presume, shall presume and Conclusive proof - Fact, Fact in issue and Relevant facts — Distinction between Relevancy and Admissibility - Doctrine of *Res Gestae* — Motive, preparation and conduct.

### Unit-II:

Admissions & Confessions: General Principles concerning Admissions — Differences between "Admission" and "Confession" — Confessions obtained by inducement, threat or promise – Confessions made to police officer - Statement made in the custody of a police officer leading to the discovery of incriminating material — Admissibility of Confessions made by one accused person against co-accused.

Dying Declarations and their evidentiary value — Other Statements by persons who cannot be called as Witnesses.

### Unit-III:

Relevancy of Judgments — Opinion of witnesses — Expert's opinion — Opinion on Relationship especially proof of marriage — Facts which need not be proved — Oral and Documentary Evidence - General Principles concerning oral evidence and documentary evidence — Primary and Secondary evidence — Modes of proof of execution of documents.

### Unit-IV:

Rules relating to Burden of Proof - Presumption as to Dowry Death — Estoppel — Kinds of estoppel.

### Unit-V:

Competency to testify — Privileged communications - Testimony of Accomplice — Examination in Chief, Cross examination and Re-examination — Leading questions — Lawful questions in cross examination — Compulsion to answer questions put to witness — Hostile witness — Impeaching the credit of witness.

### Suggested Readings:

1. Batuk Lal: *The Law of Evidence*, 13th Edition, Central Law Agency, Allahabad, 1998.
2. M. Munir: *Principles and Digest of the Law of Evidence*, 10th Edition (in 2 vols), Universal Book Agency, Allahabad, 1994.
3. Vepa P. Saradhi: *Law of Evidence* 4th Edn. Eastern Book Co., Lucknow, 1989.
4. Avtar Singh: *Principles of the Law of Evidence*, 11th Edn. Central Law Publications.
5. V. Krishnama Chary: *The Law of Evidence*, 4th Edn. S.Gogia & Company, Hyderabad

## LAW OF PROPERTY

**Sub. Code: LLB 205**

**L – 4, C – 4.**

### **Course Objectives**

- Understand the fundamental principles of property law.
- Study the different types of property, including movable and immovable.
- Learn about the legal aspects of ownership, transfer, and possession of property.
- Examine rights related to property, such as easements, licenses, and mortgages.
- Apply property law concepts to practical legal scenarios and disputes.

### **Unit-I:**

**Meaning** and concept of property — Kinds of property — Transfer of property — Transferable and non-transferable property — Who can transfer — Operation of transfer — Mode of transfer — Conditional transfer — Void and unlawful conditions.

### **Unit-II:**

Doctrine of Election — Covenants — Transfer by ostensible owner — Doctrine of Feeding the Grant by Estoppel — Doctrine of Lis Pendens — Fraudulent Transfer — Doctrine of Part-performance.

### **Unit-III:**

Sale - Essential features — Mode of Sale — Rights and liabilities of parties. Mortgage - Kinds of Mortgages.

### **Unit-IV:**

Lease — Essential features — Kinds of leases — Rights and liabilities of lessor and lessee — Termination of lease — forfeiture — Exchange.

### **Unit-V:**

Easements — Definition of easement — Distinction between Lease and License — Dominant and Servient Tenements. Acquisition of property through testamentary succession.

### **Suggested Readings:**

1. Mulla: *Transfer of Property*, Butterworths Publications.
2. Subba Rao GCV: *Commentaries on the Transfer of Property Act*.
3. Krishna Menon: *Law of Property*.
4. Upadhyaya's *Common Matrix of Transfer of Property*

## PUBLIC INTERNATIONAL LAW

Sub. Code: LLB 207

L – 4, C – 4.

### Course Objectives

- Understand the foundational principles and sources of international law.
- Study the rights and responsibilities of states under international law.
- Explore the role of international organizations in global governance.
- Analyse the legal aspects of international treaties and agreements.
- Apply public international law to current global issues and conflicts.

### Unit-I:

Definition, Nature, Scope and Importance of International Law — Relation of International Law to Municipal Law.

### Unit-II:

State Recognition — State Succession — Responsibility of States for International delinquencies —

### Unit-III:

Position of Individual in International Law — Nationality — Extradition — Asylum — Privileges and Immunities of Diplomatic Envoys

### Unit-IV:

The Legal Regime of the Seas – Evolution of the Law of the Sea – Freedoms of the High Seas – Common Heritage of Mankind – United Nations Convention on the Law of the Sea – Legal Regime of Airspace – Important Conventions relating to Airspace – Paris, Havana, Warsaw and Chicago Conventions – Five Freedoms of Air – Legal Regime of Outer space – Important Conventions such as Outer space Treaty,

### Unit-V:

International Organizations — League of Nations and United Nations — International Court of Justice —International Criminal Court.

### Suggested Readings:

1. S.K. Kapoor, *Public International Law*, Central Law Agencies, Allahabad.
  2. H.O. Agarwal, *International Law and Human Rights*, Central Law Publications, Allahabad.
- S.K. Verma, *An Introduction to Public International Law*, Prentice Hall of India

## INTELLECTUAL PROPERTY RIGHTS

Sub. Code: LLB 209

L – 4, C – 4.

### Course Objectives

- Grasp the key concepts and types of intellectual property rights.
- Understand the legal protections for patents, copyrights, trademarks, and designs.
- Learn the procedures for registering and enforcing intellectual property rights.
- Explore issues of infringement and the available legal remedies.
- Apply intellectual property law to practical business and legal situations.

### Unit-I:

Meaning, Nature, Classification and protection of Intellectual Property — The main forms of Intellectual Property — Copyright, Trademarks, Patents, Designs (Industrial and Layout).

### Unit-II:

Introduction to the leading International instruments concerning Intellectual Property Rights — The Berne Convention — Universal Copyright Convention — The Paris Union — Patent Co-operation Treaty.

### Unit-III:

Select aspects of the Law of Copyright in India — The Copy Right Act, 1957 - Historical evolution — Meaning of copyright — Copyright in literary, dramatic and musical works, computer programmes and cinematograph films — Neighbouring rights — Rights of performers and broadcasters, etc. — Ownership and Assignment of copyright — Author's special rights — Notion of infringement — Criteria of infringement.

### Unit-IV:

Intellectual Property in Trademarks and the rationale of their protection - The Trade Marks Act, 1999 — Definition of Trademarks — Distinction between Trademark and Property Mark - Registration — Passing off — Infringement of Trademark — Criteria of Infringement — Remedies. The Designs Act, 2000 — Definition and characteristics of Design — Law in India.

### Unit-V:

Patents — Concept of Patent — Historical overview of the Patents Law in India — Patentable Inventions — Kinds of Patents — Procedure for obtaining patent — The Patents Act, 1970 — Rights and obligations of a patentee — Term of patent protection — Use and exercise of rights — Exclusive Marketing Rights.

### Suggested Readings:

1. P. Narayanan: *Patent Law*, Eastern Law House, 1995.
2. Roy Chowdhary, S.K. & Other: *Law of Trademark, Copyrights, Patents and Designs*, Kamal Law House, 1999.
3. Dr. G.B. Reddy, *Intellectual Property Rights and the Law* 5th Ed. 2005 Gogia Law Agency.
4. John Holyoak and Paul Torremans: *Intellectual Property Law*.
5. B.L. Wadhwa: *Intellectual Property Law*, Universal Publishers, 2nd Ed. 2000.
6. W.R. Cornish: *Intellectual Property Law*, Universal Publishers, 3rd Ed. 2001.

## **Semester-IV**

## ADMINISTRATIVE LAW

**Sub. Code: LLB 202**

**L – 4, C – 4.**

### **Course Objectives**

- Understand the principles and scope of administrative law.
- Study the powers and functions of administrative agencies.
- Examine the legal framework governing administrative decisions and actions.
- Explore the mechanisms for judicial review of administrative actions.
- Apply administrative law concepts to real-world governmental issues.

### **Unit-I:**

Nature and scope of Administrative Law — Meaning, Definition and Evolution of Administrative Law— Reasons for the growth of Administrative Law — Relationship between Administrative Law and Constitutional Law.

### **Unit-II:**

Basic concepts of Administrative Law — Rule of Law — **Interpretation** of Dicey's Principle of Rule of Law.

### **Unit-III:**

Classification of Administrative functions — Legislative, Quasi-judicial, Administrative and Ministerial functions — Delegated Legislation — Meaning, Reasons for the growth and Classification of delegated legislation.

### **Unit-IV:**

Judicial Control of Administrative Action - Grounds of Judicial Control — Principles of Natural Justice.

### **Unit-V:**

Remedies available against the State — Writs — Lokpal and Lok Ayukta — Liability of the State in Torts and Contracts — Rule of Promissory Estoppel — Administrative Tribunals .

### **Suggested Readings:**

1. Griffith and Street: *Principles of Administrative Law*.
2. H.W.R.Wade: *Administrative Law*, Oxford Publications, 8th Edn. 2000, London.
3. De Smith: *Judicial Review of Administrative Action*, Sweet and Maxwell, 1998.
4. S.P. Sathe: *Administrative Law*, Butterworths, 6th Edn. 1998.
5. I.P.Massey: *Administrative Law*, Eastern Book Company, 5th Edn. 2001

## COMPANY LAW

Sub. Code: LLB 204

L – 4, C – 4.

### Course Objectives

- Grasp the basics of company formation and the various types of business structures.
- Understand the roles and responsibilities of company directors, shareholders, and other parties involved.
- Learn about the laws that regulate the management and functioning of companies.
- Explore the legal processes related to corporate governance, mergers, and acquisitions.
- Apply the principles of company law to real-life business and legal situations.

### Unit-I:

Definition and attributes of Company — Distinction between Partnership Firm and Company — Kinds of Companies including Multinational Companies — Advantages and Disadvantages of Incorporation

### Unit-II:

Promoters and Registration — Pre-incorporation contracts — Memorandum of Association — Articles of Association.

### Unit-III:

Prospectus — Members — Shareholders — Share Capital — Shares and Dividends — Debentures —

### Unit-IV:

Director, Manager and Secretary — Meetings — Majority powers and minority rights.

### Unit-V:

Modes of winding up of companies — Consequences of winding up

### Suggested Reading:

1. Company Law by Avtar Singh
2. Company Law by M.C. Kuchhal
3. Company Law by S.M. Shah
4. Company Law by V. Balachandran
5. Principles of Company Law by Gower & Davies
6. Company Law by B. V. L. Reddy
7. Company Law: A Handbook by R. S. S. Suryanarayana

## LABOUR LAWS– I

Sub. Code: LLB 206

L – 4, C – 4.

### Course Objectives

- Understand the key principles of labour law and employment regulations.
- Learn about the rights and duties of employees and employers.
- Study the legal framework governing labour contracts, wages, and working conditions.
- Explore dispute resolution mechanisms in labour law, including trade unions and collective bargaining.
- Apply labour law principles to real-world workplace scenarios and legal issues.

### Unit-I

Trade Unions: History of Trade Union Movement - The Trade Union Act 1926 – Definitions - Registration – Rights and Liabilities of Registered Trade Unions – Immunities.

### Unit-II

Prevention and Settlement of Industrial Disputes in India - The role of State in Industrial Relations – The Industrial Disputes Act 1947 - Definition of industry - Industrial Dispute – Individual Dispute.

### Unit-III

Authorities under the ID Act – Works committee – Conciliation - Court of inquiry - Labour Courts-Tribunal – Powers and functions of authorities - Voluntary Arbitration - Provisions under Chapter V-A & V- B of the Act- Alteration of conditions of service – Management rights of action during pendency of proceedings – Recovery of money due from employer.

### Unit-IV

Standing Orders -Concept and Nature of Standing Orders – scope and coverage- Certification process – its operation and binding effect – Modification and Temporary application of Model Standing Orders.

### Unit-V

Disciplinary Proceedings in Industries - Charge sheet – Explanation – Domestic enquiry - Enquiry officer – Enquiry report – Punishment.

### Suggested Readings:

1. Srivastava: *Law of Trade Unions*, Eastern Book Company, Lucknow
- 2.. Goswami: *Labour and Industrial Law*, Central Law Agency.
3. R.F. Rustomji : *Law of Industrial Disputes* : Asia Publishing House, Mumbai
4. S.N. Misra : *Labour and Industrial Law*
5. J.N. Malik: *Trade Union Law*
6. Khan& Khan: *Labour Law*, Asia Law House, Hyderabad
7. S.C. Srivastava: *Industrial Relations and Labour Law*, Vikas Publishing House

## CIVIL PROCEDURE CODE AND LAW OF LIMITATION

**Sub. Code: LLB 208**

**L – 4, C – 4.**

### **Course Objectives**

- Understand the key provisions of the Civil Procedure Code and its application in legal proceedings.
- Study the stages of civil litigation, including filing suits and conducting trials.
- Learn about the rules governing the service of summons, pleadings, and evidence in civil cases.
- Explore the principles of limitation, including time limits for filing suits and appeals.
- Apply civil procedure and limitation laws to practical legal scenarios and case management.

### **Unit-I:**

Codification of Civil Procedure and Introduction to CPC — Principal features of the Civil Procedure Code — Suits — Parties to Suit — Framing of Suit — Institution of Suits — Bars of Suit - Doctrines of *Sub Judice* and *Res Judicata* — Place of Suing — Transfer of suits.

### **Unit-II:**

Pleadings — Contents of pleadings — Forms of Pleading — Striking out / Amendment of Pleadings - Plaint— Essentials of Plaint - Return of Plaint—Rejection of Plaint—Production and marking of Document.

### **Unit-III:**

Appearance and Examination of parties & Adjournments — *Ex-parte* Procedure — Summoning and Attendance of Witnesses — Examination — Admissions — Production, Impounding, Return of Documents — Hearing — Affidavit — Judgment and Decree — Concepts of Judgment, Decree, and Interim Orders and Stay — Injunctions — Appointment of Receivers and Commissions — Costs -- Execution — Concept of Execution — General Principles of Execution — Power of Execution — Power of Executing Courts — Procedure for Execution .

### **Unit-IV:**

Suits in Particular Cases — Suits by or against Government — Suits relating to public matters;— Suits by or against minors, persons with unsound mind, - Suits by indigent persons -- Interpleader suits — Incidental and supplementary proceedings - Appeals, Reference, Review and Revision.

### **Unit-V:**

Law of Limitation — Concept of Limitation — Object of limitation - General Principles of Limitation — Extension — Condonation of delay — Sufficient Cause — Computation of limitation -- Acknowledgment and Part-payment.

### **Suggested Readings:**

1. Mulla: *Code of Civil Procedure*: Tripathi (Abridged Edition), 11th Edn.(StudentEdition) Edited by P.M. Bakshi, Bombay, 1985.
2. A.N. Saha: *Code of Civil Procedure*.

3. Padala Rama Reddi: *The Code of Criminal Procedure*, 1973, Asia Law House, Hyderabad.
4. Prof. S.N. Misra: *The Code of Criminal Procedure*, Central Law Agency.
5. M.P. Tandon: *Criminal Procedure Code*, Allahabad Law Agency.  
Shoorvir Tyage: *The Code of Criminal Procedure*, Allahabad Law Agency

# **Semester-V**

## Interpretation of Statutes

**Sub. Code: LLB 301**

**L – 4, C – 4.**

### **Course Objectives**

- Understand the fundamental principles and methods of interpreting statutes.
- Learn about the various rules and techniques used in statutory interpretation.
- Study the role of judicial decisions in interpreting laws and resolving ambiguities.
- Examine the relationship between statutory provisions and legislative intent.
- Apply statutory interpretation techniques to real-life legal cases and issues.

### **Unit-I:**

— Classification of Statues — Meaning and Definition of Interpretation — General Principles of Interpretation.

### **Unit-II**

Grammatical Rule of Interpretation — Golden Rule of Interpretation.

### **Unit-III:**

Interpretation of Penal Statutes and Statutes of Taxation — Beneficial Construction — Construction to avoid conflict with other provisions.

### **Unit-IV:**

External Aids to Interpretation — Statement of objects of legislation, Legislative debates, identification of purpose sought to be achieved through legislation.

### **Unit-V:**

Effect of Repeal — Effect of amendments to statutes — Conflict between parent legislation and subordinate legislation.

### **Suggested Readings:**

1. Vepa P. Sarathi: *Interpretation of Statutes*, Eastern Book Co, 4th Edition, 1976.
2. Chatterjee: *Interpretation of Statutes*.
3. G.P. Singh: *Principles of Statutory Interpretation*, Wadhwa and Company, 8th Ed., 2001.

## UTTAR PRADESH LAND LAWS

**Sub. Code: LLB 303**

**L-4, C-4**

### **Course Objectives**

- Understand the key principles and provisions of land laws in Uttar Pradesh.
- Study the legal framework governing land ownership, transfer, and registration.
- Learn about land revenue systems, including assessments and collection procedures.
- Explore the rights and responsibilities of landowners, tenants, and other stakeholders.
- Apply Uttar Pradesh land laws to practical land disputes and legal issues.

### **Unit I: Introduction**

Interpretation Clause, Objects and Clause of UP Zamindari Abolition and Land Reforms Act 1950,

### **Unit II: Classes and Rights of Tenure Holder**

Bhumidhar with Transferable Rights, Bhumidhar with Non-Transferable Rights, Asami,.

General Order of Succession, Succession as per strips, Critical Approach to Law of Succession.

### **Unit IV: Ejectment**

Ejectment of Tenure Holder from the Land of Public Utility, Ejectment of Trespasser, Ejectment of Bhumidhar, Ejectment of Asami.

### **Unit V: UP Land Revenue Act, 1901**

Authorities under the Act, Procedure of Collecting Land Revenue, Bar on Jurisdiction of Civil Courts,

### **Leading Cases For Detail Study**

- \*Abdul Saeed And Another Vs State Of Uttar Pradesh & Others
- \*Smt. Mainia Vs Dy. Director Consolidation
- \*Satyendra Singh Vs State Of Up
- \*Lalsa Vs State Of Up
- \*InduBhushan Vs State Of Up

### **Suggested Reading:**

1. Maurya R.R., Uttar Pradesh Land Laws, Central Law Publications, Allahabad.
2. Singh C.P., Uttar Pradesh Land Laws, Central Law Agency, Allahabad.

## LAW OF BANKING AND NEGOTIABLE INSTRUMENTS

**Sub. Code: LLB 305**

**L -4, C -4**

### **Course Objectives**

- Grasp the basic principles and regulations governing banking law.
- Study the roles, duties, and obligations of banks and financial institutions.
- Understand the legal aspects of negotiable instruments like cheques, promissory notes, and bills of exchange.
- Explore the processes of transferring, negotiating, and enforcing negotiable instruments.
- Apply banking law and negotiable instrument principles to practical financial situations and disputes.

### **Unit-I:**

History of the Banking Regulation Act — Salient features — Banking Business and its importance in modern times.

### **Unit-II:**

Relationship between Banker and Customer — Debtor and Creditor Relationship — Fiduciary Relationship — Trustee and Beneficiary.

### **Unit-III:**

Cheques — Crossed Cheques — Account Payee — Banker's Drafts — Dividend Warrants — Postal order and money orders — Travelers cheques and circular notes.

### **Unit-IV:**

The Paying Banker — Statutory protection to Bankers — Forgeries—Collecting Banker.

### **Unit-V:**

Banker's lien and set off. -- Advances - Pledge - Land - Stocks - Shares - Life Policies.

### **Suggested Readings:**

1. Tannan: *Banking Law & Practice in India*, 18th Edn., Orient Law House, New Delhi.
2. Avtar Singh: *Negotiable Instruments*, 3rd Edn., Eastern Book Company, Lucknow, 1997.
3. P.N.Varshney: *Banking Law & Practice*, 17th Edn. Sultan Chand & Sons, New Delhi.
4. Taxman: *Law of Banking*, India Law House

## ALTERNATE DISPUTE RESOLUTION

Sub. Code: LLB 307

L -4, C -4

### Course Objectives

- Grasp the fundamental concepts and techniques of alternative dispute resolution (ADR).
- Explore different ADR methods such as mediation, arbitration, and negotiation.
- Understand the legal framework surrounding ADR and its enforceability.
- Examine the benefits and limitations of resolving disputes outside traditional court proceedings.
- Apply ADR practices to practical situations and conflict resolution cases.

The written examination of this paper will be for 50 marks and the remaining 50 marks for record and *viva voce*. There shall be classroom instruction on the following topics:

### Unit-I:

Alternate Dispute Resolution — Characteristics — Advantages and Disadvantages—Unilateral — Bilateral — Triadic (Third Party) Intervention — Techniques and processes – Negotiation.

### Unit-II:

The Arbitration and Conciliation Act, 1996 — Historical Background and Objectives of the Act — Definitions of Arbitration, Arbitrator, Arbitration Agreement -- Appointment of Arbitrator — Termination of Arbitrator -- Proceedings in Arbitral Tribunal -- Termination of Proceedings — Arbitral Award -- Setting aside of Arbitral Award — Finality and Enforcement of Award — Appeals — Enforcement of Foreign Awards.

### Unit-III:

Other Alternative Dispute Resolution Systems —Tribunals -- Lokpal and Lokayukta — Lok Adalats — Family Courts.

### Practical Exercises (30 marks)

(a) The students are required to participate in 5 (five) simulation proceedings relating to Arbitration, Conciliation, Mediation and Negotiation. Participation in each such simulation proceeding shall be evaluated for a maximum of 4 (four) marks (Total 5x4=20marks).

(b) Students are required to attend and observe the proceedings of Lok Adalats, Family Courts, Tribunals and other ADR Systems. Each student shall record the above observations in the diary which will be assessed. Record submitted by the student shall be evaluated for 10 marks by the teacher concerned. The Records of the students duly certified by the University Representative appointed by the Controller of Examinations in consultation with the Chairman, BOS in Law shall be submitted to the University before the commencement of the theory examinations

**Viva- voce (20marks):** There shall be viva-voce examination on the above components. The Viva-voce Board consisting of (i) Principal of the College/the teacher concerned (ii) University Representative appointed by the Controller of Examinations in consultation with the Chairman, BOS in Law, and (iii) an advocate with 10 years' experience at the Bar shall evaluate the student in the Viva. The proceedings of the viva-voce shall be recorded.

**Note: Attendance of the students in all the four components of the paper (written examination, participation in simulation proceedings, submission of record and attendance in viva) shall be compulsory.**

**Suggested Readings:**

1. O.P. Tiwari: *The Arbitration and Conciliation Act* (2nd Edition): Allahabad Law Agency.
2. Johar's: *Commentary on Arbitration and Conciliation Act, 1996*: Kamal Law House.
3. Acharya N.K.: *Law relating to Arbitration and ADR*, Asia Law House, Hyderabad
4. Tripathi S.C.: *Arbitration, Conciliation and ADR*, Central Law Agency, Allahabad.
5. Avatar Singh: *Arbitration and Conciliation*, Eastern Law Book House, Lucknow.

## PROFESSIONAL ETHICS AND PROFESSIONAL ACCOUNTING SYSTEM

**Sub. Code: LLB 309**

**L -4, C -4**

### **Course Objectives**

- Understand the core principles of professional ethics in legal and business practices.
- Learn the rules and standards governing professional conduct in various industries.
- Study the importance of ethical decision-making in the workplace.
- Explore the structure and functioning of professional accounting systems.
- Apply ethical principles and accounting practices to real-world professional scenarios.

The written examination of this paper will be for 50 marks and the remaining 50 marks for record and *viva voce*. There shall be classroom instruction on the following topics:

**Unit-I:** Development of Legal Profession in India — The Advocates Act, 1961 — Right to Practice — a right or privilege? - Constitutional guarantee under Article 19(1) (g) and its scope — Enrolment and Practice.

**Unit-II :** Seven lamps of advocacy — Advocates duties towards public, clients, court, and other advocates and legal aid.

**Unit-III:** Disciplinary proceedings — Professional misconduct — Disqualifications — Functions of Bar Council of India/State Bar Councils in dealing with the disciplinary proceedings.

**Unit-IV:** Accountancy for Lawyers — Nature and functions of accounting — Important branches of accounting .

**Record (30 marks):** Each student shall write 50 selected opinions of the Disciplinary Committees of Bar Councils and 10 major judgments of the Supreme Court of India in the Record. ### **Unit III: Paragraph & Precise Writing of Legal Texts**

### **Unit IV: Writing of Moot Memorials**

#### **Suggested Reading:**

1. Myneni S.R., Legal language and Legal Writing, Central Law Agency, Allahabad.
2. Jain R.L., Legal Language, Central Law Agency, Allahabad.
3. Prasad Anirudh, Legal Language, Central Law Publications, Allahabad.

## INFORMATION TECHNOLOGY LAW

Sub. Code: LLB 304

L -4, C -4

### Course Objectives

- Understand the fundamental principles of information technology law.
- Explore the legal aspects of cybersecurity, data protection, and privacy.
- Study intellectual property issues related to technology, software, and digital content.
- Learn about e-commerce regulations and online contracts.
- Apply IT law principles to contemporary legal challenges in the digital world.

### Unit-I

**Concept of Information Technology and Cyber Space-** Interface of Technology and Law -Jurisdiction in Cyber Space and Jurisdiction in traditional sense - Internet Jurisdiction - Indian Context of Jurisdiction.

### Unit-II

**Information Technology Act, 2000** - Aims and Objects — Overview of the Act – Jurisdiction - Electronic Governance – Legal Recognition of Electronic Records and Electronic Evidence - Digital Signature Certificates - Securing Electronic records and secure digital signatures - Duties of Subscribers - Role of Certifying Authorities - Regulators under the Act - The Cyber Regulations Appellate Tribunal.

### Unit-III

**E-Commerce** - UNCITRAL Model - Legal aspects of E-Commerce - Digital Signatures - Technical and Legal issues - E-Commerce, Trends and Prospects - E-taxation, E-banking, online publishing and online credit card payment - Employment Contracts - Contractor Agreements, Sales, Re-Seller and Distributor Agreements.

### Unit-IV

**Cyber Law and IPRs**-Understanding Copy Right in Information Technology - Software - Copyrights vs Patents debate - Authorship and Assignment Issues - Copyright in Internet - Multimedia and Copyright issues - Software Piracy –Patents - Understanding Patents - European Position on Computer related Patents - Legal position of U.S. on Computer related Patents - Indian Position on Computer related Patents –Trademarks - Trademarks in Internet.

### Unit-V

**Cyber Crimes** - Meaning of Cyber Crimes – Different Kinds of Cybercrimes – Cybercrimes under IPC, Cr.P.C and Indian Evidence Law - Cybercrimes under the Information Technology Act,2000 - Cybercrimes under International Law.

### Suggested Readings:

1. Kamlesh N. & MuraliD.Tiwari(Ed), *IT and Indian Legal System*, Macmillan India Ltd, New Delhi
2. K.L.James, *The Internet: A User's Guide* (2003), Prentice Hall of India, New Delhi
3. Chris Reed, *Internet Law-Text and Materials*, 2nd Edition, 2005, Universal Law Publishing Co., New Delhi

## LAW RELATING TO WOMEN

Sub. Code: LLB 306

L -4, C -4

### Course Objectives

- Understand the legal protections and rights available to women under various laws.
- Explore the laws addressing gender-based violence and discrimination.
- Study the legal framework for women's rights in areas such as marriage, divorce, and inheritance.
- Learn about the role of laws in promoting gender equality and social justice.
- Apply legal principles related to women's rights to real-life situations and legal issues.

### Unit-I:

Historical background and status of women in ancient India — Constitutional Provisions and gender justice.

### Unit-II:

Laws relating to marriage, divorce and succession and maintenance under the relevant personal laws with special emphasis on women.

### Unit-III:

Special provisions relating to women under the Indian Evidence Act, 1872 — Offences against women under Indian Penal Code - outraging the modesty of women -sexual harassment – rape – bigamy - mock and fraudulent marriages – adultery - causing miscarriage - insulting women etc.

### Unit-IV:

Socio-Legal position of women and the law — Dowry Prohibition Act, 1961, Medical Termination of Pregnancy Act — Law relating to the Pre Natal Diagnostic Techniques (Regulation and Prevention of Misuse) and Sex selection.

### Unit-V:

Relevant provisions relating to women under Maternity Benefit Act, 1961, Factories Act and other Labour & Industrial Laws — Position of Women under International instruments — Salient features of Convention for Elimination of all forms of Discrimination Against Women (CEDAW) — International Covenant on Civil and Political Rights.

1. S.P. Sathe: *Towards Gender Justice*.
2. Dr. Vijay Sharma: *Protection to woman in Matrimonial home*
3. Dr. Sarojini Saxena: *Femijuris*(Law relating to Women in India)
4. Dr. Archana Parsher: *Women and Social Reform*
5. Dr. Paras Diwan: *Dowry and protection to married women*
6. Mary Wollstonecraft: *A Vindication of the rights of women*.

## HUMAN RIGHTS LAW

Sub. Code: LLB 308

L -4, C -4

### Course Objectives

- Comprehend the key concepts and structures of human rights law.
- Analyse international and national legal protections for human rights.
- Investigate the roles of human rights institutions and enforcement processes.
- Learn about the legal remedies for addressing human rights violations.
- Apply human rights legal principles to current global issues and case studies.

### Unit-I

Meaning and definition of Human Rights - Evolution of Human Rights - Human Rights and Domestic Jurisdiction

### Unit-II

Adoption of Human Rights by the UN Charter - U.N. Commission on Human Rights - Universal Declaration of Human Rights.

### Unit-III

Regional Conventions on Human Rights - European Convention on Human Rights - American Convention on Human Rights.

### Unit-IV

International Conventions on Human Rights - Genocide Convention, Convention against Torture, CEDAW, Child Rights Convention, Convention on Statelessness, Convention against Slavery, Convention on Refugees.

### Unit-V

Human Rights Protection in India - Human Rights Commissions - Protection of Human Rights Act - National Human Rights Commission (NHRC).

### Suggested Readings:

1. P.R. Gandhi (ed): *Blackstone's International Human Rights Documents*, Universal Law Publishing Co. Delhi.
2. Richard B. Lillich and Frank C. Newman: *International Human Rights - Problems of Law and Policy*, Little Brown and Company, Boston and Toronto.
3. Frederick Quinn: *Human Rights and You*, OSCE/ ODIHR, Warsaw, Poland
4. T.S. Batra: *Human Rights – A Critique*, Metropolitan Book Company Pvt. Ltd., New Delhi.
5. Dr.U. Chandra: *Human Rights*, Allahabad Law Agency Publications, Allahabad.

## LAW OF INVESTMENTS AND SECURITIES

Sub. Code: LLB 310

L -4, C -4

### Course Objectives

- Grasp the core principles and frameworks of human rights law.
- Examine international and national legal tools that safeguard human rights.
- Understand the function of human rights bodies and enforcement mechanisms.
- Study the legal recourse available for violations of human rights.
- Apply human rights law to modern global challenges and legal situations.

### Unit-I:

Administration of Company Law in relation to issue of prospectus and shares -- membership and share capital.

### Unit-II:

Debentures - Kinds of Debentures and Charges – Dividend -- Inter-Corporate.

### Unit-III:

Basic features of the Security Contracts (Regulation) Act, 1956 — Recognition of Stock Exchanges – Regulation of Contracts and option in securities.

### Unit-IV:

Basic features of the Security and Exchange Board of India Act, 1992 — Basic features of the Act — Establishment of SEBI -- Functions and Powers of SEBI -- Powers of the Central Government under the Act -- Guidelines for disclosure -- Investors Protection.

### Unit-V:

Non-Banking Financial Institutions - Classification and Law Relating to NFBCs.

### Suggested Readings:

1. Avatar Singh: *Company Law*, 10th Edn. (Eastern Book Company, 1991).
2. *A Guide to Companies Act* by Ramaiah - Wadhwa Publications.
3. NavneetJyothi and Rajesh Gupta, *Practical Manual to Non Baking Financial Companies*, Taxman's Publications.
4. Ananta Raman: *Lectures on Company Law*, Wadhwa and Company.
5. Tandon M.P.: *Company Law*, Allahabad Law Agency, Allahabad.

## **DRAFTING, PLEADINGS AND CONVEYANCING**

**Sub. Code: LLB 312**

**L -1,P-6, C -4**

### **Course Objectives**

- Learn the essential principles and techniques of legal drafting.
- Understand the process of drafting pleadings for various types of legal cases.
- Explore the key components and legal requirements of conveyancing documents.
- Study the rules governing the preparation and filing of legal petitions and motions.
- Apply drafting, pleading, and conveyancing skills to real-life legal scenarios

Class-room instruction and simulation exercises on the following items shall be extended.

### **Unit-I**

**Drafting:** General Principles of Drafting and relevant Substantive Rules shall be taught.

### **Unit-II**

**Pleadings: (i)** Civil—Plaint, Written Statement, Interlocutory Application, Original Petition, Affidavit, Execution Petition, Memorandum of Appeal and Revision.

(ii) Petition under Article 226 and 32 of the Constitution of India - Drafting of Writ Petition and PIL Petition.

### **Unit-III**

**Conveyancing:** Sale Deed, Mortgage Deed, Lease Deed, Gift Deed, Promissory Note.

### **Practical Exercises**

Apart from teaching the relevant law, the course includes not less than 15 (fifteen) practical exercises in drafting of pleadings carrying a total of 45 marks (3 marks for each) and 15 (fifteen) exercises in conveyancing carrying another 45 marks (3 marks for each exercise) and remaining 10 marks for viva-voce.

These 30 exercises shall be recorded. Each student shall be served with different problems for the purpose of exercise. These exercises shall be assessed and marks may be allotted.

These exercises shall be evaluated by a common committee consisting of (i) Principal of the College/the concerned teacher (ii) University Representative appointed by the Controller of Examinations in consultation with the Chairman, Board of Studies in Law, O.U.; and (iii) an Advocate with 10 years' experience at the Bar. The same committee will also conduct viva-voce on the above concepts. The proceedings of the viva-voce shall be recorded.

### **Note:**

- 1. Attendance of the students for viva-voce shall be compulsory.**
- 2. The above records certified by the University Representative appointed by the Controller of Examinations in consultation with the Chairman, BOS in Law shall be submitted to the University for Further Verification**

**Suggested Readings:**

1. R.N. Chaturvedi: *Pleadings and Conveyancing*, Central Law Publications.
2. De Souza: *Conveyancing*, Eastern Law House.
3. Tiwari: *Drafting, Pleading and Conveyancing*, Central Law Agency.
4. Mogha: *Indian Conveyancer*, Eastern Law House.
5. Mogha: *Law of Pleadings in India*, Eastern Law House.
6. Shiv Gopal: *Conveyancing, Precedents and Forms*, Eastern Book Company

## **MOOT COURTS, OBSERVATION OF TRIAL, PRE-TRIAL PREPARATIONS AND INTERNSHIP**

**Sub. Code: LLB 314**

**L -0, P-8, C -4**

### **Course Objectives**

- Understand the fundamentals of moot court practice and courtroom procedures.
- Learn the techniques for observing and analysing real court trials.
- Study the importance of pre-trial preparation, including case research and strategy development.
- Gain hands-on experience in legal practice through internships and exposure to real-world cases.
- Develop practical skills in legal argumentation, trial advocacy, and client representation.

This paper has three components of 30 marks each and viva-voce for 10 marks.

**(A) Moot Court (30 marks):** Every student is required to participate in at least three moot courts in the VI Semester with 10 marks for each. The moot court work will be on an assigned problem and it will be evaluated for 5 marks for written submissions and 5 marks for oral advocacy.

Marks will be given on the basis of written submission and oral advocacy. Written submissions shall include brief summary of facts, issues involved, provisions of laws and arguments, citation, prayer, etc. Marks for oral advocacy may be awarded for communication skills, presentations, language, provisions of law; authorities quoted, court manners, etc. Written Memorials submitted by the students shall be kept by the College for Further Verification.

The performance of student in the moot court shall be evaluated by a committee consisting of (i) Principal of the College (ii) an Advocate with 10 years' experience at the Bar; and (iii) the teacher concerned.

**(B) Observance of Trial in two cases, one Civil and one Criminal (30 marks):**

Students are required to attend courts to observe at least one civil and one criminal case. They shall maintain a record and enter the various steps observed during their attendance on different days in the court assignment. The Court Observation Record submitted by the students should be evaluated by a committee consisting of (i) Principal of the College/the concerned teacher (ii) University Representative appointed by the Controller of Examinations in consultation with the Chairman, Board of Studies in Law, and (iii) an Advocate with 10 years' experience at the Bar and average be taken. Court attendance shall be compulsory and attendance has to be recorded in a register kept therefor. This may be carried under the supervision of a teacher of the college. This scheme will carry 30 marks.

**(C) Interviewing Techniques and Pre-Trial Preparations and Internship Diary (30 marks):**

Each student should observe two 'interview sessions' of clients either in the Lawyer's Office or in the Legal Aid Office and record the proceedings in a diary, which will carry 15 marks.

Each student has to further observe the preparation of documents and court papers by the Advocate and the procedure for the filing of the suit / petition. This shall be recorded in the diary which will carry 15 marks.

The diary shall clearly indicate the dates on which the above observations are made and they shall be authenticated by the advocate concerned.

Evaluation of the above diary shall be made by the committee consisting of (i) Principal of the College/the concerned teacher (ii) University Representative appointed by the Controller of Examinations in consultation with the Chairman, Board of Studies in Law, O.U.; and (iii) an Advocate with 10 years' experience at the Bar and average be taken.

**(D)Viva-voce (10 marks):** There shall be viva-voce examination on all the above three components. The Viva-voce Board consisting of (i) Principal of the College/the concerned teacher (ii) University Representative appointed by the Controller of Examinations in consultation with the Chairman, BOS in Law; and (iii)an advocate with 10 years' experience at the Bar shall evaluate the student in the Viva. The proceedings of the viva-voce shall be recorded.

**Note:**

- 1. Attendance of the students in all the four components of the paper shall be compulsory.**
- 2. The above records, diary certified by the University Representative appointed by the Controller of Examinations in consultation with the Chairman, BOS in Law shall be submitted to the University for Further Verification.**

**Suggested Readings:**

1. Dr. Kailash Rai: *Moot Court Pre-Trial Preparation and Participation in Trial Proceedings*, Central Law Publication.
2. AmitaDanda: *Moot Court for Interactive Legal Education*, Gogia Law Agency, Hyderabad.
3. Blackstone's: *Books of Moots*, Oxford University Press.
4. Mishra: *Moot Court Pre-Trial Preparation and Participation in Trial Proceedings*, Central Law, Allahabad.

## **PEO**

### **Programme Educational Objectives (PEO's)**

- **PEO 1** Legal Expertise: Provide foundational knowledge of law and social sciences.
- **PEO 2** Professional Skills: Develop competence for diverse legal careers.
- **PEO 3** Ethics and Leadership: Cultivate ethical values and leadership in advocacy.
- **PEO 4** Lifelong Learning: Promote research and continuous education in law.
- **PEO 5** Social Responsibility: Encourage contributions to justice and societal welfare.

## **PSO**

### **Programme Specific Objectives (PSO's)**

- **PSO 1** Develop a comprehensive understanding of substantive and procedural laws, constitutional principles, and their application to address complex legal issues in diverse contexts.
- **PSO 2** Integrate knowledge of humanities, social sciences, and law to analyze societal problems, foster critical thinking, and promote social justice.
- **PSO 3** Prepare for diverse legal careers by fostering skills in legal research, drafting, advocacy, and negotiation, while adhering to ethical and professional standards.
- **PSO 4** Cultivate an understanding of law as an instrument of social change, promoting equality, human rights, and sustainability in legal practices and policymaking.
- **PSO 5** Equip students to navigate the global legal environment, adapt to evolving legal challenges, and pursue continuous professional development to meet emerging societal needs.

## **POO**

### **Programme Outcome Objectives (POO's)**

- **POO 1** To acquire and apply legal knowledge to the complex socio-legal problems.
- **POO 2** To make students eligible to practice law in courts and industry.
- **POO 3** To engender professional skills required for legal practice such as argument, pleading, drafting, conveyancing etc.
- **POO 4** To conduct themselves with the highest professional ethics standards in legal profession
- **POO 5** To develop skills in legal research, legal reasoning and aptitude, and apply it during the Programme and profession.

# **SEMESTER I**

## ENGLISH- I

Subject code: BL -101

L-4, C-4

### Course Objective

- I. Develop Proficiency in English Language Skills
- II. Enhance students' abilities in reading, writing, speaking, and listening in English.
- III. Improve vocabulary and grammar to support effective communication and comprehension.
- IV. Foster an understanding of both formal and informal language usage.

### Unit I:

**Functional Grammar:** Grammar and Vocabulary (as contained in the first two sections of “Better your English – I) \*

**Oral:** Students should be made to speak grammatically correct short sentences using proper vocabulary.

### Unit II:

**Communication:** Meaning, Nature and Importance of Communication, Barriers to Effective Communication, Channels of Communication, Flow of Communication –Downward, Upward, Lateral or Horizontal, Diagonal or Cross-wise.

**Oral:** Students should be asked to speak on different aspects of communication for if the students cannot communicate properly; the purposes of teaching communication are not fulfilled.

### Unit III:

**Requisites of Sentence writing:** Essentials of good sentence construction, sentence structure, kinds of sentence.

**Oral:** Practice in the class regarding sentence construction, use of words in a sentence by filling in the gaps etc.

## **Unit IV:**

### **Reading cultural texts:**

#### **Short- Stories:**

1. Eyes are not here – Ruskin Bond (Non- detailed study)
2. Renunciation – Rabindra Nath Tagore (Non- detailed study)

**ORAL:** Discussion in detail, Critical appreciation, grammatical exercises and making student read the stories and essay so that they develop the reading habits with proper stress, intonation, pronunciation & rhythm.

#### **Suggested Readings**

- **Wren and Martin's High School English Grammar and Composition"** by P.C. Wren & H. Martin
- A comprehensive guide for understanding grammar rules and improving language skills.
- **"A Practical English Grammar"** by A.J. Thomson & A.V. Martinet
- Offers in-depth explanations of English grammar, with exercises for practice.
- **"The Elements of Style"** by William Strunk Jr. and E.B. White
- A concise book on the principles of clear, concise, and effective writing.
- **"English Vocabulary in Use"** by Michael McCarthy and Felicity O'Dell
- A practical guide for improving vocabulary, especially useful for non-native speakers.
- **"The Norton Anthology of English Literature"** by Stephen Greenblatt

# Communication Skills in English

**Subject Code: BL- 101 A**

**L-4, C-4**

## **Course Objectives:**

- To develop proficiency in English communication for academic and professional purposes.
- To enhance listening, speaking, reading, and writing skills.
- To foster confidence in public speaking and group communication.
- To enable effective use of English in diverse social and professional contexts.

## **Unit I: Fundamentals of Communication**

Definition, Process, and Types of Communication  
Barriers to Communication and Overcoming Them  
Essentials of Effective Communication  
Verbal vs. Non-Verbal Communication

## **Unit II: Listening and Speaking Skills**

Listening: Active vs. Passive Listening, Note-Taking Techniques  
Speaking: Pronunciation, Accent, Intonation, and Fluency  
Conversational Skills: Formal and Informal Interactions  
Public Speaking: Speech Preparation, Delivery, and Presentation Skills

## **Unit III: Reading Skills**

Types of Reading: Skimming, Scanning, and Intensive Reading  
Comprehension Strategies  
Critical Reading: Identifying Main Ideas, Arguments, and Logical Flow  
Reading for Professional Purposes: Reports, Articles, and Official Documents

## **Unit IV: Writing Skills**

Basic Grammar and Sentence Structure  
Paragraph Writing: Unity, Coherence, and Cohesion  
Formal Writing: Letters, Emails, and Memos  
Creative Writing: Essays, Stories, and Articles  
Academic Writing: Reports and Research Papers

## **Unit V: Professional Communication**

Resume Writing and Cover Letters  
Group Discussions and Interviews  
Business Communication: Reports, Proposals, and Minutes of Meetings  
Etiquette in Digital Communication: Emails and Social Media

**Suggested Books:**

1. "Communication Skills" by Sanjay Kumar and Pushp Lata
2. "Developing Communication Skills" by Krishna Mohan and Meera Banerji
3. "Business Communication" by Meenakshi Raman and Prakash Singh
4. "Effective Communication Skills" by Dale Carnegie
5. "English Grammar in Use" by Raymond Murphy (for grammar support)

# Personality Development I

**Subject Code: BL- 101B**

**L-4, C-4**

## **Course Objectives:**

- Understand the key components of personality and self-concept.
- Develop effective communication and interpersonal skills.
- Enhance emotional intelligence and self-regulation.
- Foster goal-setting and time management skills.
- Promote self-reflection and personal growth strategies.

## **UNIT 1: Introduction to Personality Development**

Definition and importance of personality development

Components of personality: traits, values, and beliefs

Self-assessment: Understanding your personality type

## **UNIT 2: Self-Awareness**

Identifying strengths and weaknesses

Understanding personal values and beliefs

Practice: Journaling for self-reflection

## **UNIT 3: Effective Communication**

Verbal and non-verbal communication skills

Active listening and feedback

Practice: Communication exercises and role-plays

## **UNIT4: Emotional Intelligence**

Components of emotional intelligence: self-awareness, self-regulation, empathy, social skills

Practice: Emotional awareness activities

## **Suggested Readings:**

- "How to Win Friends and Influence People" by Dale Carnegie  
A classic on interpersonal skills, focusing on building relationships and effective communication.
- "The 7 Habits of Highly Effective People" by Stephen R. Covey  
This book offers principles for personal effectiveness and holistic development.
- "Mindset: The New Psychology of Success" by Carol S. Dweck  
Explores the concept of fixed vs. growth mindsets and how they influence personal development.

## Soft Skills –I

**Subject Code: BL- 101 C**

**L-4, C-4**

### **Course Objectives:**

By the end of this course, participants will be able to:

- Demonstrate effective verbal and non-verbal communication skills.
- Collaborate effectively in diverse teams.
- Apply critical thinking and problem-solving techniques in various scenarios.
- Adapt to changing environments and manage stress.
- Recognize and manage emotions to enhance interpersonal relationships.

### **UNIT 1: Introduction to Soft Skills**

Definition and importance of soft skills

Overview of key soft skills in personal and professional contexts

### **UNIT 2: Communication Skills**

Verbal and non-verbal communication

Active listening techniques

Role-playing exercises to practice communication

### **UNIT 3: Teamwork and Collaboration**

Building effective teams

Roles and responsibilities within a team

Group activities to enhance collaboration

### **UNIT 4: Problem-Solving and Critical Thinking**

Problem identification and analysis

Creative thinking techniques

### **Suggested Readings**

1. "Emotional Intelligence 2.0" by Travis Bradberry and Jean Greaves - This book focuses on understanding and improving emotional intelligence, a key component of effective interpersonal skills.
2. "Crucial Conversations: Tools for Talking When Stakes Are High" by Kerry Patterson, Joseph Grenny, Ron McMillan, and Al Switzler - It offers strategies for communicating effectively in high-stakes situations.
3. "How to Win Friends and Influence People" by Dale Carnegie - A classic that covers principles of effective communication and relationship-

# History I

Subject Code: BL -103

L 4, C 4

## Course Objective

- Familiarize students with key historical events: Gain an understanding of important events, figures, and movements in history from various time periods and regions.
- Explore historical themes: Analyse themes such as political systems, economic structures, social movements, wars, ideologies, and cultural developments.
- Study different historical periods and contexts: Understand the causes, consequences, and significance of historical events in different cultural, geographical, and temporal contexts.

### Unit 1

1. Indus Valley Civilization:- Sources of Information Social life, Religious life, Town planning.
2. Vedic Period:- Social, Religious Condition,
- 3:- Varna Ashram System.
- 4:- Status of Women.

### Unit 2

1. Jainism:- Causes for the Religious Upheaval,
- 2:- Teaching of Mahavira & Principal of Jainism.
- 3:- Buddhism:- Rise and Growth,
- 4:- Doctrines of Buddhism, Causes of Downfall.

### Unit 3

- 1:- Mauryan Period:- Art and Architecture Gandhar Art,
- 2:- Mathura Art
- 3:- Gupta Period:- Art, Architecture and Culture.

### Unit 4

- 1:- Post Gupta Temple Architecture.
- 2:- Sculpture and Painting.
- 3:- Rise and Growth of Political Ideas in Ancient India with Special Reference to Kautilya and Manu.

### Unit 5

- 1:- Concept of State and Government in Ancient India.
- 2:- Concept of Justice and Law in Ancient India.

# Sociology-I

**Subject Code: BL- 103 A**

**L-4, C-4**

## **Course Objectives:**

- To introduce students to the foundational concepts and theories of sociology.
- To develop an understanding of the relationship between society, individuals, and institutions.
- To examine social phenomena through sociological perspectives.
- To foster critical thinking about social issues and their relevance to law and society.

## **Unit I: Introduction to Sociology**

Definition, Nature, and Scope of Sociology

Importance and Application of Sociology in Legal Studies

Sociology as a Science: Positivism and its Critique

Relationship with Other Social Sciences

## **Unit II: Basic Concepts**

Society: Characteristics and Types (Tribal, Rural, Urban)

Community, Association, and Institution

Social Structure and Social System

Social Groups: Primary, Secondary, and Reference Groups

## **Unit III: Socialization and Culture**

Socialization: Process, Agents, and Importance

Culture: Meaning, Elements, and Characteristics

Cultural Relativism and Ethnocentrism

Social Norms, Values, and Beliefs

## **Unit IV: Social Stratification**

Definition and Features of Social Stratification

Theories of Social Stratification: Functionalist, Conflict, and Interactionist Perspectives

Forms of Stratification: Caste, Class, Gender, and Race

Social Mobility: Types and Factors Affecting Mobility

## **Unit V: Social Change and Social Control**

Social Change: Meaning, Characteristics, and Factors

Theories of Social Change: Evolutionary, Functionalist, and Conflict

Social Control: Meaning, Types, and Agencies (Formal and Informal)

Law as an Instrument of Social Control and Social Change

## **Suggested Books:**

1. "Sociology" by Anthony Giddens
2. "Introduction to Sociology" by Haralambos and Holborn

3. "Sociology: Principles of Sociology with an Introduction to Social Thought" by C.N. Shankar Rao
4. "An Introduction to Sociology" by Vidya Bhushan and D.R. Sachdeva
5. "Society: An Introductory Analysis" by MacIver and Page

### **Understanding Contemporary Social Issues-I**

**Subject Code: BL- 103 B**

**L-4, C-4**

## **Course Objectives:**

- To provide insights into contemporary social issues and their impact on individuals and society.
- To analyse the causes, consequences, and possible solutions to current societal challenges.
- To develop a sociological understanding of global and local issues through critical perspectives.
- To explore the role of law, policy, and governance in addressing these issues.

### **Unit I: Understanding Social Issues**

Definition, Nature, and Characteristics of Social Issues  
Approaches to Study Social Issues: Sociological, Political, and Economic  
Interconnection of Social Issues with Culture, Politics, and Economy  
Role of Media in Shaping Perceptions of Social Issues

### **Unit II: Poverty and Inequality**

Concept of Poverty: Absolute and Relative Poverty  
Causes and Consequences of Poverty  
Dimensions of Inequality: Economic, Social, and Political  
Government Policies and Programs to Address Poverty and Inequality

### **Unit III: Gender Issues**

Gender Disparities: Patriarchy, Gender Roles, and Stereotypes  
Violence Against Women: Domestic Violence, Harassment, and Trafficking  
LGBTQ+ Rights and Inclusion  
Legal Frameworks and Movements for Gender Equality

### **Unit IV: Unemployment and Education**

Unemployment: Types, Causes, and Impact on Society  
Education and its Role in Social Development  
Issues in Education: Inequality, Dropouts, and Access to Quality Education

### **Unit V: Health and Environment**

Public Health Issues: Malnutrition, Epidemics, and Mental Health  
Environmental Degradation: Deforestation, Pollution, and Climate Change  
Sustainable Development Goals (SDGs) and Global Environmental Efforts  
Role of Law and Policy in Addressing Health and Environmental Challenges

## **Suggested Books:**

1. "Social Problems in India" by Ram Ahuja
2. "Contemporary Social Problems and Issues" by R.M. MacIver and Charles Page
3. "Modernization of Indian Tradition" by Yogendra Singh
4. "Poverty and Famines" by Amartya Sen

5. "Gender Trouble" by Judith Butler

# Social Institutions in India-I

Subject Code: BL- 103 C

L-4, C-4

## Course Objectives:

- To understand the concept, structure, and significance of social institutions in India.
- To analyse the traditional and contemporary roles of various social institutions.
- To examine the changing dynamics of these institutions in the context of modernization and globalization.
- To explore the interrelation of social institutions with law and governance.

## Unit I: Introduction to Social Institutions

Definition, Features, and Functions of Social Institutions

Types of Social Institutions: Family, Religion, Education, Economy, and Polity

Interdependence of Social Institutions

Role of Social Institutions in Indian Society

## Unit II: Family and Kinship

Types of Family: Joint, Nuclear, and Extended Families

Functions and Changing Patterns of Family in India

Kinship: Meaning, Types, and Kinship System in India

Challenges to Family and Kinship: Urbanization, Industrialization, and Migration

## Unit III: Marriage in India

Marriage as a Social Institution: Definitions and Functions

Forms of Marriage: Monogamy, Polygamy, Endogamy, and Exogamy

Customs and Practices Related to Marriage in India

Contemporary Issues: Dowry, Inter-caste and Interfaith Marriages, and Live-in Relationships

## Unit IV: Religion and Caste

Role of Religion in Indian Society: Unity and Diversity in Practices

Major Religious Traditions in India: Hinduism, Islam, Christianity, Sikhism, and Others

Caste System: Origin, Features, and Functions

Caste and Social Mobility: Sanskritization, Westernization, and Reservation Policies

## Unit V: Political and Economic Institutions

Traditional vs. Modern Political Systems in India

Role of Panchayat Raj and Local Governance

Economic Institutions: Land Tenure Systems, Joint Stock Companies, and Cooperatives

Impact of Liberalization, Privatization, and Globalization on Social Institutions

## Suggested Books:

1. "Indian Society: Institutions and Change" by N. Jayaram
2. "Social Change in Modern India" by M.N. Srinivas

3. "Caste in Modern India and Other Essays" by M.N. Srinivas
4. "Family and Kinship in India" by Patricia Uberoi
5. "Religion and Society Among the Coorgs of South India" by M.N. Srinivas

## POLITICAL SCIENCE-I

Sub. Code: BL -105

L-4, C-4

### Course Objective

- Compare political systems across different countries: Understand and compare the political institutions, processes, and cultures in different nations, analysing how context influences the functioning of political systems.
- Study political regimes and transitions: Examine different types of political regimes, such as democratic and authoritarian systems, and analyse how regimes change over time through processes like revolutions, coups, or democratic reforms.
- Investigate political development: Understand the challenges and opportunities faced by countries in the process of political development, democratization, and governance.
- Promote understanding of citizenship: Develop an understanding of the rights and responsibilities of citizens within political systems and how they engage with and influence the political process.

### Unit I: Basic Concepts

Concepts: Politics and Political Science, Nature and scope, Political Thought, Political Theory, Political Philosophy, Political Ideology

### Unit II: Approaches to the study of Political Science

Normative, Historical, Behavioural Relation of Political Science with other Social Sciences

### Unit III: Concept of State

State: Meaning, Elements, Theories of origin of State

### Unit IV: Concepts and types of

Sovereignty, Liberty, Equality

### Unit V: Concepts and types of:

Justice, Citizenship ,

### Suggested Readings:

1. Political Theory, Asirvatham, S.Chand.
2. O.P. Gauba, An Introduction to Political Theory, Macmillan
3. J.C. Johari, Principle of Modern Political Science, Sterling, Delhi.
4. Andrew Heywood, Politics, Palgrave Foundation, New York.
5. S. P. Varma, Modern Political Theory, New Delhi, Vikas .
6. C.E.M Joad, Political Theory, Oxford: Clarendon Press

## **Society and Gender-I**

**Subject Code: BL- 105 A**

**L-4, C-4**

### **Course Objectives:**

- To understand the concept of gender and its social construction.
- To explore the relationship between gender and various social institutions.
- To analyse the impact of patriarchy, gender roles, and stereotypes on individuals and society.
- To examine the intersectionality of gender with caste, class, and other social categories.
- To introduce students to feminist theories and movements.

### **Unit I: Understanding Gender**

Concept of Gender: Difference between Sex and Gender

Gender as a Social Construct

Masculinity and Femininity: Characteristics and Expectations

Intersectionality: Gender, Caste, Class, and Ethnicity

### **Unit II: Theories of Gender**

Feminist Theories: Liberal, Radical, Marxist, and Socialist Feminism

Postmodern Feminism and Queer Theory

Patriarchy: Meaning, Characteristics, and Impact on Society

Critique of Gender Binaries

### **Unit III: Gender and Social Institutions**

Family: Gender Roles and Division of Labor

Education: Gender Disparities and Access to Opportunities

Workplace: Gender Discrimination, Glass Ceiling, and Pay Gap

Media: Representation of Gender in Films, Advertisements, and Social Media

### **Unit IV: Gender and Violence**

Understanding Gender-Based Violence: Types and Forms (Domestic Violence, Sexual Harassment, and Honor Crimes)

Laws and Policies Addressing Gender-Based Violence in India

Role of Civil Society and NGOs in Combating Gender Violence

Cultural Practices and Their Impact on Gender (Dowry, Female Infanticide, and Child Marriage)

## **Unit V: Gender and Social Change**

Role of Feminist Movements in India and Abroad

Legal and Policy Frameworks for Gender Equality in India (Reservations, Maternity Benefits, and Workplace Policies) Role of Education, Technology, and Social Media in Challenging Gender Stereotypes ,Case Studies of Inspirational Women Leaders and Gender Activists

### **Suggested Books:**

1. "Gender and Society in India" by T.K. Oommen and C.N. Venugopal
2. "Gender: The Basics" by Hilary M. Lips
3. "Patriarchy and the Subordination of Women" by Kamla Bhasin
4. "The Second Sex" by Simone de Beauvoir
5. "Gender Trouble" by Judith Butler
6. "Feminism in India" by Maitrayee Chaudhuri

# Comparative Politics-I

**Subject Code: BL- 105 A**

**L-4, C-4**

## **COURSE OBJECTIVES**

- Analyse global political systems.
- Compare democratic and authoritarian regimes.
- Study political institutions globally.
- Understand political culture and behaviour.
- Develop comparative analytical skills

### **Unit 1: Introduction to Comparative Politics**

Definition and Scope of Comparative Politics

Understanding Comparative Politics as a Subfield of Political Science

Evolution of Comparative Politics as a Discipline

Importance of Comparative Analysis

Significance of Studying Different Political Systems

Approaches to Comparative Politics (Institutionalism, Behaviourism, Structuralism)

### **Unit 2: Approaches and Methods in Comparative Politics**

Traditional vs. Modern Approaches

Institutional and Legal Approaches

Behaviourism and Post-Behaviourism

Contemporary Approaches

Structural-Functional Approach

Political Economy Approach

Dependency and World Systems Theory

Methods of Comparative Analysis

Case Study Method

Comparative Historical Analysis

Quantitative and Qualitative Methods

### **Unit 3: Political Systems and Typologies**

Types of Political Systems

Democratic Systems

Authoritarian and Totalitarian Regimes

Classification of Political Systems

Presidential vs. Parliamentary Systems

Federal vs. Unitary Systems

Hybrid Regimes

Semi-Presidential Systems

#### **Unit 4: Political Culture and Political Socialization**

Political Culture

Definition and Components of Political Culture

Types of Political Culture (Parochial, Subject, Participant)

Political Culture in Different Regimes (Democratic, Authoritarian)

Political Socialization

Agents of Socialization (Family, Education, Media, Political Parties)

Impact of Political Socialization on Political Behavior

#### **Unit 5: Module 5: Political Parties and Party Systems**

Political Parties

Definition and Functions of Political Parties

Evolution of Party Systems

Party Systems

One-Party, Two-Party, and Multi-Party Systems

Cleavages and Party Formation

The Role of Ideology in Party Politics

#### **Suggested Readings:**

- **"Comparative Politics: An Introduction"** by Rod Hague and Martin Harrop
- **"Essentials of Comparative Politics"** by Patrick H. O'Neil
- **"Comparative Government and Politics"** by Rod Hague and Martin Harrop
- **"The Political System"** by David Easton
- **"Patterns of Democracy"** by Arend Lijphart
- **"Democracy and Its Critics"** by Robert Dahl

## **POLITICAL THEORIES -1**

**Subject Code: BL- 105 C**

**L-4, C-4**

### **COURSE OBJECTIVES**

- To introduce students to classical and modern political theory.
- To analyse the evolution of political thought from ancient to modern times.
- To engage with the ideas of key political theorists and their relevance today.
- To critically examine the concepts of power, justice, freedom, and governance.

### **Unit 1: Introduction to Political Theory**

**What is Political Theory?** Definition, Nature, and Scope

**Normative vs Empirical Political Theory**

**Key Concepts in Political Theory:** Power, Authority, Justice, Liberty, Equality, Democracy, State

### **Unit 2: Ancient & Classical Political Thought**

Plato: The Republic, Ideal State, Philosopher-King, Justice

Aristotle: Politics, Classification of Governments, Citizenship, Virtue, Best Political Systems

Cicero and Roman Political Thought: The mixed constitution, Law and Justice

Confucianism and Eastern Political Thought: Moral governance, hierarchy, and virtue

### **Unit 3: Medieval Political Thought**

St. Augustine: City of God, Concept of the State, Justice in a Christian context

St. Thomas Aquinas: The relationship between the church and state, Natural Law

Islamic Political Thought: Al-Farabi, Ibn Khaldun - Ideal ruler, Justice, Philosophy of history

#### **Unit 4: Renaissance and Early Modern Political Thought**

Niccolò Machiavelli: Realism, political power, and statecraft

Thomas Hobbes: Social contract, state of nature, absolute sovereignty

John Locke: Natural rights, property, limited government, and constitutionalism

#### **Unit 5: Liberalism and Utilitarianism**

Jeremy Bentham: Utilitarianism and the principle of utility

Critique of natural rights theory

#### **Suggested Readings:**

1. Sabine, George H. A History of Political Theory
2. Ebenstein, William. Great Political Thinkers
3. Nelson, Brian. Western Political Thought
4. Plato. The Republic
5. Hobbes, Thomas. Leviathan
6. Locke, John. Two Treatises of Government
7. Marx, Karl and Friedrich Engels. The Communist Manifest

## Law of Torts Including M.V. Act and Consumer Protection laws

Sub. Code: BL – 107

L – 4, C – 4.

### Course Objectives

- Introduce the fundamentals of tort law, provide students with an overview of what torts are and their role in civil law.
- This includes understanding the difference between torts and crimes, as well as the purpose of tort law in compensating victims and deterring harmful conduct.
- Examine different types of torts: Explore various categories of torts, including intentional torts (e.g., battery, assault, false imprisonment), negligence (e.g., duty of care, breach, causation), and strict liability torts (e.g., product liability).
- Study tort elements: Understand the elements that must be proven to establish a tort claim, such as the existence of a duty, breach of duty, causation, and damages.

### Unit-I:

Nature of Law of Torts - Definition of Tort - Elements of Tort - Development of Law of Torts in England and India - Wrongful Act and Legal Damage - Damnum Sine Injuria and Injuria Sine Damnum - Tort distinguished from Crime and Breach of Contract - General Principles of Liability in Torts - Fault - Wrongful intent - Malice - Negligence - Liability without fault - Statutory liability - Parties to proceedings.

### Unit-II

General Defenses to an action in Torts – Vicarious Liability - Liability of the State for Torts – Defense of Sovereign Immunity – Joint Liability – Liability of Joint Tortfeasors – Rule of Strict Liability (Rylands V Fletcher) – Rule of Absolute Liability (MC Mehta vs. Union of India) – Occupiers liability – Extinction of liability – Waiver and Acquiescence – Release – Accord and Satisfaction - Death.

### Unit-III

Specific Torts - Torts affecting the person - Assault - Battery - False Imprisonment - Malicious Prosecution - Nervous Shock - Torts affecting Immovable Property - Trespass to land - Nuisance - Public Nuisance and Private Nuisance - Torts relating to movable property – Liability arising out of accidents (Relevant provisions of the Motor Vehicles Act).

### Unit-IV

Defamation - Negligence - Torts against Business Relations - Injurious falsehood - Negligent Misstatement - Passing off - Conspiracy - Torts affecting family relations - Remedies - Judicial and Extra-Judicial Remedies – Damages – Kinds of Damages – Assessment of Damages – Remoteness of damage - Injunctions - Death in relation to tort - Actioperationalismoritur cum persona.

**Unit-V Consumer Laws:**

Common Law and the Consumer - Duty to take care and liability for negligence - Product Liability - Consumerism - Consumer Protection Act, 1986 - Salient features of the Act - Definition of Consumer.

**Suggested Readings:**

1. Winfield & Jolowicz: Law of Tort, XII edition, Sweet and Maxwell, London, 1984.
2. Salmond and Heuston: Law of Torts, XX edition, 2nd Indian reprint, Universal Book traders, New Delhi, 1994.
3. RamaswamyIyer: The Law of Torts, VII edition (Bombay, 1995).
4. Achutan Pillai: Law of Tort, VIII edition, Eastern Book Company, Lucknow, 1987.
5. Durga Das Basu: The Law of Torts, X edition, Prentice Hall of India, New Delhi, 1998.
6. RatanLal& Dhirajlal: The Law of Torts, 22nd edition, Wadhwa& Company Nagpur, 1992.

## LAW OF CONTRACT-I

Sub. Code: BL--109

L – 4, C – 4.

### Course Objectives

- To provide students with a foundational understanding of contract law, including the principles, rules, and regulations that govern the formation, performance, and enforcement of contracts.
- To equip students with the skills to analyze the essential elements of a contract, such as offer, acceptance, consideration, intention to create legal relations, and capacity to contract.
- To enable students to understand the rights and obligations of parties involved in a contract, including performance, breach, and the remedies available under contract law, such as damages, specific performance, and rescission. Exploring Special Types of Contracts:
- To introduce students to various types of contracts governed by the Contract Act, such as contracts of sale, contracts of agency, contracts of partnership, contracts for services, and contracts involving negotiable instruments.

### Unit I:

Definition and essentials of a valid Contract - Definition and essentials of a valid Offer - Definition and essentials of valid Acceptance - Communication of Offer and Acceptance - Revocation of Offer and Acceptance through various modes including electronic medium - Consideration - salient features - Exception to consideration - **Doctrine of Privity of Contract - Exceptions to the privity of contract - Standard form of Contract.**

### Unit-II:

Capacity of the parties - Effect of Minor's Agreement - Contracts with insane persons and persons disqualified by law - Concepts of Free Consent - Coercion - Undue influence - Misrepresentation - Fraud - Mistake - Lawful Object - Immoral agreements and various heads of public policy - illegal agreements - **Uncertain agreements - Wagering agreements - Contingent contracts - Void and Voidable contracts.**

### Unit-III:

Discharge of Contracts - By performance - Appropriation of payments - Performance by joint promisors - Discharge by Novation - Remission - Accord and Satisfaction - Discharge by impossibility of performance (Doctrine of Frustration) - **Discharge by Breach - Anticipatory Breach - Actual breach.**

**Unit-IV:**

Quasi Contract - Necessaries supplied to a person who is incapable of entering into a contract - Payment by an interested person - Liability to pay for non-gratuitous acts - Rights of finder of lost goods - Things delivered by mistake or coercion - Quantum meruit - Remedies for breach of contract - Kinds of damages - liquidated and unliquidated damages and penalty - Duty to mitigate.

**Unit-V:**

Specific Relief - Recovering possession of property - Specific performance of the contract - Rectification of instruments - Rescission of contracts.

**Suggested Readings:**

1. Anson: Law of Contract, Clarendon Press, Oxford, 1998.
2. Krishnan Nair: Law of Contract, S.Gogia & Co., Hyderabad 1995.
3. G.C.V. Subba Rao: Law of Contract, S.Gogia & Co., Hyderabad 1995.
4. T.S.VenkatesaIyer: Law of Contract, revised by Dr. Krishnama Chary,
5. S. Gogia & Co.
6. Avtar Singh: Law of Contract, Eastern Book Company, Lucknow, 1998.

## ECONOMICS – I

**Subject Code: BL – 111**

**L 4, C 4**

### Course Objective

- Introduce fundamental economic concepts: Understand the basic principles of economics, such as scarcity, opportunity cost, supply and demand, and the role of incentives in decision-making.
- Distinguish between microeconomics and macroeconomics:
- Learn the difference between microeconomic analysis (which focuses on individual markets, firms, and consumer behavior) and macroeconomic analysis (which focuses on broader economic phenomena like inflation, unemployment, and national economic growth).
- Examine economic systems: Explore the characteristics of different economic systems (market economies, command economies, mixed economies) and how they allocate resources.

**UNIT – I** Economics as a science and its relevance to law, Economics as a basis of Social Welfare and Social Justice, Free Enterprises, **Planned Economics and mixed Economics.**

**UNIT – II** General principles of Economics: Demand and Supply, Business Organizations, Labour and Wages, **Capital and Money, Savings, Consumption, Investment.**

**UNIT – III** Markets – Determination of Prices, International comparisons of development strategies and experiences, **Theories of economic growth and problems of development.**

**UNIT – IV** Control of Monopolies and prevention of economic concentration, Monopolies, **Monopolistic competition, Oligopoly.**

**UNIT – V** Banking and Fiscal Policy: Resource mobilization and fiscal resources – **Taxation – The role of Credit and Banking System.**

### Suggested Reading:

1. **Alfred W. Stonier and Douglas C. Hague:** The Essentials of Economics (London, 1955).
2. Economics – An Introductory Analysis (International Students Edition) 1961.
3. **Fredrlute Lewis:** Theory of Economic Growth, India Publishing House, 1970.
4. **C.T. Kurien:** Planning, Poverty and Social Transformation, 1926.
5. **M. Dipton:** Why Poor People stay poor Urban Bias in World Development, 1980.
6. **Myrdal, Gunnar:** The Challenges of World Poverty, 1971.
7. **Mahbub Ul Haq:** The Poverty: Certain Choices for the third World, 1976.
8. **Council, Campbell:** Economics (New York: Mc. Graw Hill Mark CB).

\*\*\*

# **Indian Economy-I**

**Subject Code: BL – 111A**

**L 4, C 4**

## **Course Objectives:**

- To understand the structure and characteristics of the Indian economy.
- To analyze the economic development of India since independence.
- To explore the key sectors of the Indian economy and their contributions.
- To critically examine government policies and their impact on economic growth.

## **Unit I: Introduction to the Indian Economy**

- Characteristics of the Indian Economy: A Developing Economy
- Demographic Features and Their Impact on Economic Development
- Natural Resources and Their Utilization in Economic Growth
- Economic Systems: Capitalism, Socialism, and Mixed Economy

## **Unit II: Economic Planning and Development**

- Evolution of Economic Planning in India: Five-Year Plans
- Objectives, Achievements, and Failures of Planning in India
- NITI Aayog: Structure and Role in Policy Formulation
- Sustainable Development Goals (SDGs) and India's Progress

## **Unit III: Agriculture in the Indian Economy**

- Role and Importance of Agriculture in India's Economic Development
- Land Reforms and Green Revolution: Achievements and Challenges
- Agricultural Marketing and Policies
- Current Issues: MSP, Farm Laws, and Food Security

## **Unit IV: Industry and Service Sector**

- Industrial Development in India: Public vs. Private Sector
- Role of MSMEs in Economic Growth
- Make in India and Industrial Policy Reforms
- Growth and Challenges of the Service Sector: IT, Tourism, and Healthcare

## **Unit V: Poverty, Unemployment, and Inequality**

- Poverty: Causes, Measurement, and Government Schemes
- Unemployment: Types, Causes, and Measures to Reduce Unemployment
- Economic Inequality in India: Regional and Income Disparities
- Role of Government and NGOs in Alleviating Poverty and Inequality

**Suggested Books:**

1. **"Indian Economy" by Ramesh Singh**
2. **"Indian Economy: Performance and Policies" by Uma Kapila**
3. **"The Indian Economy: Problems and Prospects" by Bimal Jalan**
4. **"India's Economy in the 21st Century" by Raj Kapila and Uma Kapila**
5. **"Indian Economy Since Independence" by A. Vaidyanathan**

## **Economics of Money and Banking (BL-111B)**

**Subject Code: BL – 111B**

**L 4, C 4**

### **Course Objectives:**

- To understand the fundamental concepts of money, banking, and monetary systems.
- To analyse the role of money in the economy and its impact on economic activities.
- To examine the structure, functions, and role of banks and financial institutions.
- To explore the interplay between monetary policy and the banking system in economic development.

### **Unit I: Introduction to Money**

- Evolution of Money: Barter System to Digital Money
- Definition, Functions, and Characteristics of Money
- Types of Money: Commodity Money, Fiat Money, and Cryptocurrency
- The Role of Money in the Economy: Classical and Keynesian Perspectives

### **Unit II: Money Supply and Demand**

- Measurement of Money Supply: M1, M2, M3, and M4
- Determinants of Money Demand: Transaction, Precautionary, and Speculative Motives
- Theories of Money: Quantity Theory of Money, Fisher and Cambridge Equations
- Factors Influencing Money Supply: Role of Central Bank and Commercial Banks

### **Unit III: Banking System in India**

- Structure of the Indian Banking System: Public, Private, and Cooperative Banks
- Functions and Roles of Commercial Banks
- Banking Regulations in India: Role of the Reserve Bank of India (RBI)
- Non-Banking Financial Institutions (NBFIs): Types and Functions

### **Unit IV: Central Banking and Monetary Policy**

- Role and Functions of a Central Bank
- Objectives and Instruments of Monetary Policy: Repo Rate, Reverse Repo Rate, CRR, and SLR
- Inflation Targeting and Monetary Policy Framework in India
- Relationship between Monetary Policy and Economic Stability

## **Unit V: Money Market and Financial System**

- Money Market: Features, Instruments, and Functions
- Capital Market vs. Money Market: Differences and Importance
- Financial Intermediaries: Role and Impact on Economic Growth
- Global Financial Systems and Emerging Trends: Cryptocurrencies and Digital Banking

### **Suggested Books:**

1. **"Economics of Money, Banking, and Financial Markets" by Frederic S. Mishkin**
2. **"Monetary Economics" by Suraj B. Gupta**
3. **"Money and Banking" by R.S. Sayers**
4. **"Indian Financial System" by M.Y. Khan**
5. **"Modern Banking Theory and Practice" by K.C. Shekhar and Lekshmy Shekhar**

# **Principle of Sustainable Finance-I (BL-111C)**

**Subject Code: BL – 111C**

**L 4, C 4**

## **Course Objectives:**

- To understand the fundamental principles of sustainable finance and its relevance in the modern economy.
- To explore the role of finance in promoting environmental, social, and governance (ESG) objectives.
- To analyse frameworks, strategies, and instruments used in sustainable finance.
- To assess the impact of sustainable finance on corporate performance and societal well-being.

## **Unit I: Introduction to Sustainable Finance**

- Definition, Scope, and Importance of Sustainable Finance
- Principles of Sustainability: Environmental, Social, and Governance (ESG) Factors
- Evolution of Sustainable Finance: Global Trends and Drivers
- The Role of Finance in Achieving the Sustainable Development Goals (SDGs)

## **Unit II: Environmental Finance**

- Green Finance: Concepts and Instruments (Green Bonds, Climate Funds, etc.)
- Financing Renewable Energy Projects and Low-Carbon Technologies
- Impact of Climate Change on Financial Markets
- Regulatory Frameworks and Standards for Environmental Finance

## **Unit III: Social and Governance Aspects of Finance**

- Socially Responsible Investing (SRI): Principles and Practices
- Corporate Social Responsibility (CSR) and its Financial Implications
- Governance in Financial Institutions: Transparency, Accountability, and Ethics
- Diversity, Equity, and Inclusion in Financial Decision-Making

## **Unit IV: Sustainable Investment Strategies**

- ESG Integration in Investment Decision-Making
- Risk Assessment in Sustainable Investments: Climate and Social Risks
- Measuring ESG Performance: Metrics and Reporting Standards (GRI, SASB, TCFD)
- The Role of Technology in Advancing Sustainable Finance (FinTech and GreenTech)

## **Unit V: Challenges and Opportunities in Sustainable Finance**

- **Barriers to Sustainable Financing: Market, Policy, and Institutional Challenges**
- **Financing Circular Economy and Sustainable Infrastructure**
- **Innovations in Sustainable Finance: Impact Investing and Social Bonds**
- **Case Studies of Successful Sustainable Finance Projects**

### **Suggested Books:**

1. **"Principles of Sustainable Finance" by Dirk Schoemaker and Willem Schramade**
2. **"Sustainable Investing: Revolutions in Theory and Practice" by Cary Krosinsky and Nick Robins**
3. **"Green Finance and Sustainability" by Magdalena Ziolo and Beata Ziółkowska**
4. **"Environmental Finance: A Guide to Environmental Risk Assessment and Financial Products" by Sonia Labatt and Rodney R. White**
5. **"Sustainable Finance: The Risks and Opportunities That (Some) Banks Ignore" by Molly Scott Cato**

# **SEMESTER II**

## ENGLISH II

Sub. Code: BL 102

L-4, C-4

### Course Objectives

- I. Borrowing from Other Languages: Over its history, English has borrowed words and influences from many languages, including Latin, Old Norse, French, Dutch, and others. This has contributed to its rich vocabulary.
- II. Simplification of Grammar: Over time, English grammar has become simpler. For example, Old English had more cases, gendered nouns, and verb conjugations, many of which have disappeared in Modern English.
- III. Influence of Literature: Writers like Shakespeare, Chaucer, and Milton not only helped shape the language with their creative use of vocabulary and grammar, but they also preserved it for future generations.
- IV. Colonialism and Globalization: British colonialism spread English across the world, and today, English is a global lingua franca, spoken by millions of people as a first or second language.

**Unit-I: Foundation Grammar:** Reading and Writing (as contained in the last two sections of “Better your English – I”) \*.

**ORAL:** Students should be made to read passages and answer the questions asked for.

**Unit II: Technical Communication:** Nature, Origin and Development, Scope and Significance, Forms of Technical Communication, Differences Between Technical Communication and General Communication.

**ORAL:** Make the students speak on the points relevant to Technical Communication.

**Unit III: The Structure of sentence:** Sentences: Simple, Compound and Complex, Transformation of Sentence: Simple to Complex and vice-versa, Simple to Compound and vice – versa, Interrogative to Assertive and to Negative and vice – versa.

**ORAL:** Make the students answer questions on different types of sentences and transformation.

**Unit IV:**

**Reading Cultural Texts:**

**Short – Story:** (Non detailed study).

1. The Lament – Anton Chekov.
2. Barbers’ Trade Union – R. K. Narayan.

**ORAL:** Discussion in detail, critical appreciation, grammatical exercises and making students read the stories and essays so that they may develop the reading habits with proper stress, intonation, pronunciation & rhythm.

**Text Books:**

1. Better your English – I, A Workbook for student, Macmillan India, New Delhi.
2. Singh R. P, An Anthology of English Short Stories –O.U.P., N. Delhi.
3. Singh R.P, An Anthology of English Essay –. O.U.P., N. Delhi.

**Reference Books:**

1. Raman Meenakshi & Sharma Sangeeta, Technical Communication Principle & Practice - O.U.P., N. Delhi.
2. Mohan Krishna & Banerji Meera – Developing Communication Skill – Macmillan India Ltd: N. Delhi.

## **Communication Skills in English II (BL-102 A)**

**Subject Code: BL – 102A**

**L 4, C 4**

### **Course Objectives:**

- To enhance advanced communication skills in English for academic, professional, and social contexts.
- To develop proficiency in written and spoken English with a focus on clarity and coherence.
- To foster critical thinking and analytical skills through effective reading and writing practices.
- To build confidence in delivering presentations, debates, and group discussions.

### **Unit I: Advanced Writing Skills**

- Essay Writing: Structure, Types, and Techniques
- Business Writing: Emails, Reports, and Proposals
- Writing Summaries and Abstracts
- Note-Making and Note-Taking Techniques

### **Unit II: Reading and Comprehension**

- Advanced Reading Strategies: Skimming, Scanning, and Critical Reading
- Analysing Literary and Non-Literary Texts
- Reading for Inference and Interpretation
- Vocabulary Building: Idioms, Phrasal Verbs, and Collocations

### **Unit III: Speaking Skills**

- Public Speaking: Structure and Delivery
- Debates and Group Discussions: Techniques and Practice
- Impromptu Speaking and Extempore
- Pronunciation and Accent Neutralization

### **Unit IV: Listening Skills**

- Listening for Specific Information and Gist
- Understanding Tone, Context, and Speaker's Intent
- Active Listening in Academic and Professional Settings
- Audio-Visual Aids for Listening Practice

### **Unit V: Professional Communication and Soft Skills**

- Preparing for Interviews: Techniques and Mock Practice

- **Presentation Skills: Using Visual Aids Effectively**
- **Workplace Communication: Meetings, Negotiations, and Feedback**
- **Non-Verbal Communication: Body Language and Etiquette**

**Suggested Books:**

1. **"Effective Communication Skills" by MTD Training**
2. **"English for Academic Purposes" by R.R. Jordan**
3. **"Business Communication: Process and Product" by Mary Ellen Guffey and Dana Loewy**
4. **"Cambridge English Skills: Real Listening and Speaking (Levels 3 and 4)" by Sally Logan and Craig Thaine**
5. **"Word Power Made Easy" by Norman Lewis**

## **Personality Development II (BL-102 B)**

**Subject Code: BL – 102B**

**L 4, C 4**

### **Course Objectives:**

- Understand the key components of personality and self-concept.
- Develop effective communication and interpersonal skills.
- Enhance emotional intelligence and self-regulation.
- Foster goal-setting and time management skills.

### **UNIT 1: Building Confidence and Self-Esteem**

- Understanding the impact of self-esteem on personality
- Techniques for boosting confidence
- Practice: Positive affirmations and visualization

### **UNIT 2: Goal Setting and Motivation**

- Smart goals: setting achievable objectives
- Motivation techniques and maintaining focus
- Practice: Goal-setting workshop

### **UNIT 3: Time Management and Organization**

- Importance of time management in personal development
- Techniques for prioritizing tasks
- Practice: Creating a personal time management plan

### **UNIT 4: Interpersonal Skills and Relationship Building**

- Understanding interpersonal dynamics
- Strategies for effective networking and relationship management

## **Suggested Readings**

1. "How to Win Friends and Influence People" by Dale Carnegie  
A classic on interpersonal skills, focusing on building relationships and effective communication.
2. "The 7 Habits of Highly Effective People" by Stephen R. Covey  
This book offers principles for personal effectiveness and holistic development.
3. "Mindset: The New Psychology of Success" by Carol S. Dweck  
Explores the concept of fixed vs. growth mindsets and how they influence personal development.
4. "Emotional Intelligence: Why It Can Matter More Than IQ" by Daniel Goleman  
Discusses the importance of emotional intelligence in personal and professional success.

## **Soft Skills –II (BL-102 C)**

**Subject Code: BL – 102C**

**L 4, C 4**

### **Course Objectives:**

By the end of this course, participants will be able to:

1. Demonstrate effective verbal and non-verbal communication skills.
2. Collaborate effectively in diverse teams.
3. Apply critical thinking and problem-solving techniques in various scenarios.
4. Adapt to changing environments and manage stress.
5. Recognize and manage emotions to enhance interpersonal relationships.

### **UNIT 1: Introduction to Soft Skills**

- Definition and importance of soft skills
- Overview of key soft skills in personal and professional contexts

### **UNIT 2: Communication Skills**

- Verbal and non-verbal communication
- Active listening techniques
- Role-playing exercises to practice communication

### **UNIT 3: Teamwork and Collaboration**

- Building effective teams
- Roles and responsibilities within a team
- Group activities to enhance collaboration

### **UNIT 4: Problem-Solving and Critical Thinking**

- Problem identification and analysis
- Creative thinking techniques

## **Suggested Readings**

1. "Emotional Intelligence 2.0" by Travis Bradberry and Jean Greaves - This book focuses on understanding and improving emotional intelligence, a key component of effective interpersonal skills.
2. "Crucial Conversations: Tools for Talking When Stakes Are High" by Kerry Patterson, Joseph Grenny, Ron McMillan, and Al Switzler - It offers strategies for communicating effectively in high-stakes situations.
3. "How to Win Friends and Influence People" by Dale Carnegie - A classic that covers principles of effective communication and relationship-building.
4. "The 7 Habits of Highly Effective People" by Stephen R. Covey - While broader in scope, it emphasizes personal development and interpersonal effectiveness.

## History-II

Sub. Code: BL 104

L 4, C 4

### Course Objectives

- I. Engage in historical analysis: Develop the ability to interpret primary and secondary sources, assess historical evidence, and identify bias or limitations in sources.
- II. Conduct historical research: Learn to find, evaluate, and interpret historical sources, including documents, artifacts, and secondary literature.
- III. Write coherent historical essays: Develop skills in writing clear, evidence-based arguments, using proper historical methodology and citation.
- IV. Present historical arguments: Organize research findings effectively and present them in both written and oral formats, including formal essays, presentations, and reports.

### UNIT -1:

- Babur: Invasion, Conquests, Personality.
- Humayun: Struggle, Exile, Restoration.
- Shershah suri: Civil, Military and Revenue Administration Achievements.
- Akbar: Conquests, Rajput Policy, Deccan Policy, Revenue Administration, Mansabdari system.

### UNIT -2

- Jahangir: Deccan Policy, Influence of Nurjahan, Character of Nurjahan
- Shahjahan & Aurangzeb: Early Career, Religious Policy, Rajput policy.
- William Bentink and his policies.
- Dalhousie and his policies.

### UNIT -3

- Economic charges: Land Revenue Settlements, Permanent Settlements, Ryotware, Mahalwari System.
- Revolt of 1857: Causes, Nature, Ideology, Programme, Leadership, Peoples Participation, Failure and Impact.

### UNIT-4

- Policies of Lord Canning, Lytton, Ripon and Curzan.
- The acts- 1858, 1892, 1919 and 1935.
- Emergence of organized Nationalism formation of Indian National Congress and its programme.
- Moderates: Extremists, Swadeshi, Revolutionary Movements.

## UNIT-5

- Gandhian: Movements, Non-Co-operation, Civil Disobedience, Quit India
- Pre- Partition Politics: Simon Commission, August Offer, Cripps Mission, Cabinet Plan.

### Suggested Readings

- **A History of Modern Europe"** by John Merriman
- Overview of European history from the Renaissance to modern times.
- **"The History of the World"** by J.M. Roberts
- A global perspective on world history and key events.
- **"Modern World History: 1750 to the Present"** by Duiker & Spielvogel
- Focuses on political, economic, and social developments since 1750.
- **"The Origins of the First World War"** by James Joll
- Analyzes the causes of World War I.
- **"History of the French Revolution"** by Georges Lefebvre
- In-depth study of the French Revolution and its effects.

# Sociology-II BL 104 A

**Subject Code: BL – 104A**

**L 4, C 4**

## **Course Objectives:**

- To understand advanced concepts in sociological theory and research.
- To analyse social institutions, structures, and systems.
- To explore contemporary issues related to social change, inequality, and globalization.
- To develop critical thinking skills through the study of social problems and the role of sociology in addressing them.

## **Unit 1: Sociological Theories and Perspectives**

- **1.1 Classical Sociological Theories:**
  - Auguste Comte, Karl Marx, Max Weber, Émile Durkheim, and Herbert Spencer.
  - Key concepts: Social order, social change, materialism, rationalization, the division of labor.
- **1.2 Modern Sociological Theories:**
  - Structural Functionalism (Talcott Parsons, Robert K. Merton).
  - Conflict Theory (Karl Marx, C. Wright Mills).
  - Symbolic Interactionism (George Herbert Mead, Erving Goffman).
  - Feminist Theory (Simone de Beauvoir, Judith Butler, bell hooks).
- **1.3 Post-Modern and Post-Structuralist Approaches:**
  - Michel Foucault, Pierre Bourdieu, Jacques Derrida.

## **Unit 2: Social Institutions**

- **2.1 Family and Kinship Systems:**
  - Types of families (nuclear, extended, single-parent).
  - Kinship: Functions, descent systems, marriage norms.
  - Changing roles of family in modern societies.
- **2.2 Education and Socialization:**
  - The role of education in socializing individuals.
  - Theories of education: Functionalist, conflict, and symbolic interactionist perspectives.

- Education inequalities: Class, caste, and gender disparities.
- **2.3 Religion and Society:**
  - Theories of religion: Functionalism (Durkheim), Conflict Theory (Marx), and Weber's interpretation.
  - Secularization and religious pluralism in contemporary societies.
  - Religion's role in social cohesion, conflict, and change.
- **2.4 Political Systems:**
  - Theories of power, authority, and the state (Weber, Marx).
  - Social movements: Causes, types, and impacts.
  - Democracy, citizenship, and political participation.

### **Unit 3: Social Stratification and Inequality**

- **3.1 Theories of Social Stratification:**
  - Karl Marx: Class and conflict.
  - Max Weber: Class, status, and party.
  - Functionalist theories of stratification (Davis and Moore).
- **3.2 Social Class and Caste Systems:**
  - Social mobility and class stratification.
  - Caste system in India: Traditional and contemporary perspectives.
  - Class in capitalist societies.
- **3.3 Gender, Race, and Ethnicity:**
  - Gender roles and inequality.
  - Feminist theories: Liberal, Marxist, and Radical feminism.
  - Race and ethnicity: Social construction of race and racial inequality.
- **3.4 Poverty and Marginalization:**
  - Theories of poverty: Structural and cultural explanations.
  - Poverty in the global south.
  - Social exclusion and its consequences.

## **Unit 4: Social Change and Development**

- **4.1 Theories of Social Change:**
  - Evolutionary theories of social change.
  - Conflict theories: Marxist perspectives on change.
  - Theories of modernization and dependency.
- **4.2 Development and Underdevelopment:**
  - Theories of development: Modernization vs. dependency theory.
  - The role of colonialism and globalization in shaping development.
  - Sustainable development and the Global South.
- **4.3 Urbanization and Industrialization:**
  - The process of urbanization: Causes and consequences.
  - Industrialization and its social impacts.
  - Urban social problems: Housing, unemployment, and inequality.

## **Unit 5: Contemporary Social Issues**

- **5.1 Crime, Deviance, and Social Control:**
  - Theories of crime: Functionalist, Conflict, and Symbolic Interactionist approaches.
  - Crime and deviance in contemporary societies.
  - The role of institutions in controlling deviance.
- **5.2 Health, Medicine, and Society:**
  - Sociology of health and illness.
  - Health disparities and their social causes.
  - The medicalization of society.
- **5.3 Globalization and Its Social Impacts:**
  - Theories of globalization: Cultural, economic, and political dimensions.
  - Impact of globalization on local cultures and economies.
  - Global social inequalities and transnational issues.

**Suggested Books:**

- Weber, M. (1978). *Economy and Society: An Outline of Interpretive Sociology*. University of California Press.
- Giddens, A. (2013). *Sociology* (8th ed.). Polity Press.
- Haralambos, M., Holborn, M., & Heald, R. (2013). *Sociology: Themes and Perspectives* (8th ed.). HarperCollins.
- Giddens, A., Duneier, M., Appelbaum, R.P., & Carr, D. (2017). *Introduction to Sociology* (10th ed.). W.W. Norton & Company.
- Haralambos, M., & Holborn, M. (2008). *Sociology: Themes and Perspectives* (7th ed.). HarperCollins Publishers.
- Giddens, A., Duneier, M., Appelbaum, R.P., & Carr, D. (2017). *Introduction to Sociology* (10th ed.). W.W. Norton & Company.
- Haralambos, M., Holborn, M., & Heald, R. (2013). *Sociology: Themes and Perspectives* (8th ed.). HarperCollins Publishers.
- Ritzer, G. (2017). *Sociological Theory* (9th ed.). McGraw-Hill Education.

## **Understanding Contemporary Social Issues-II (BL 104B)**

**Subject Code: BL – 104B**

**L 4, C 4**

### **Course Objectives:**

- To understand the social, political, and economic roots of contemporary issues.
- To analyze the impact of social problems on individuals and societies.
- To develop an ability to think critically about social issues and their global implications.
- To explore policy responses and social movements aimed at addressing social challenges.
- To foster an understanding of how global issues, intersect with local contexts.

### **Unit 1: Social Inequality and Discrimination**

#### **1. Theories of Social Inequality:**

- Structural-functionalism vs. conflict theory.
- Marxist analysis of class and power.
- Theories of stratification: Weber, Davis and Moore.

#### **2. Social Inequality:**

- Class, caste, and race-based inequality.
- Gender inequality: Feminist perspectives and the gender pay gap.
- The role of education and occupation in perpetuating inequality.

#### **3. Discrimination and Marginalization:**

- Racial and ethnic discrimination.
- Discrimination based on disability, sexuality, and age.
- Social exclusion and its effects on marginalized communities.

### **Unit 2: Globalization and Its Social Impacts**

#### **1. Understanding Globalization:**

- Definitions and key concepts: Economic, cultural, and political globalization.
- Theories of globalization: Modernization theory, world-systems theory, and dependency theory.

#### **2. Economic Globalization:**

- The global economy: Trade, multinational corporations, and economic policies.
- The impact of global economic practices on inequality and poverty.
- Financial crises and global economic interdependence.

#### **3. Cultural and Social Effects of Globalization:**

- Cultural homogenization and cultural imperialism.
- Global media, technology, and social change.
- Migration, transnational communities, and diasporas.

### **Unit 3: Environmental Issues and Social Change**

#### **1. Environmental Degradation:**

- Climate change: Causes, consequences, and global warming.
- Pollution, deforestation, and loss of biodiversity.
- The role of industrialization and consumer culture in environmental destruction.

#### **2. Sustainable Development:**

- The concept of sustainability: Economic, social, and environmental dimensions.
- Sustainable development goals (SDGs) and global efforts.
- Environmental justice and the unequal distribution of environmental harm.

#### **3. Social Movements and the Environment:**

- Environmental movements: Greenpeace, Fridays for Future, and local activism.
- Global environmental conferences and agreements (e.g., Paris Agreement).
- The role of media, advocacy, and policy in promoting sustainability.

### **Unit 4: Health and Social Issues**

#### **1. Health Inequalities:**

- The social determinants of health: Class, race, and access to care.
- Health disparities between countries (Global North vs. Global South).
- The impact of socio-economic status, education, and occupation on health outcomes.

#### **2. Mental Health:**

- The social construction of mental illness.
- Mental health stigma and the impact on treatment.
- Mental health policies and global mental health initiatives.

#### **3. Public Health and Social Movements:**

- The role of public health campaigns in addressing epidemics (e.g., HIV/AIDS, COVID-19).
- Global health issues: Access to healthcare and the impact of global health organizations (WHO).
- Social responses to pandemics and healthcare system challenges.

### **Unit 5: Crime, Deviance, and Social Control**

#### **1. Theories of Crime and Deviance:**

- Functionalist, conflict, and symbolic interactionist theories.
- Deviance and social norms: Labelling theory, strain theory, and conflict theory of crime.
- The relationship between inequality and criminal behaviour.

#### **2. Criminal Justice Systems:**

- Policing, incarceration, and the role of the state in managing crime.
- Mass incarceration and its socio-economic consequences.

- Juvenile delinquency and restorative justice.

**3. Social Control and Surveillance:**

- The role of surveillance in modern societies (e.g., CCTV, social media).
- Foucault's concept of panopticism and the state's control over individuals.
- Privacy, civil liberties, and the ethics of surveillance.

Unit 6: Social Movements and Activism

**1. Theories of Social Movements:**

- Resource mobilization theory.
- Political opportunity structures.
- New social movements: Environmental, feminist, and human rights movements.

**2. Activism in the Digital Age:**

- Social media's role in organizing protests and global movements (e.g., #MeToo, Black Lives Matter).
- Digital activism and online protests.
- The role of hashtags, crowdfunding, and viral campaigns.

**3. Global and Local Movements:**

- The influence of global movements on local politics (e.g., anti-globalization, anti-austerity protests).
- The role of international organizations and grassroots movements in promoting change.

**Suggested Books:**

- Tarrow, S. (2011). *Power in Movement: Social Movements and Contentious Politics* (3rd ed.). Cambridge University Press.
- Castells, M. (2012). *Networks of Outrage and Hope: Social Movements in the Internet Age*. Polity Press.
- Giddens, A., Duneier, M., Appelbaum, R.P., & Carr, D. (2017). *Introduction to Sociology* (10th ed.). W.W. Norton & Company.
- Merton, R. K. (1968). *Social Theory and Social Structure*. Free Press.

## **Social Institutions in India-II (BL 104C)**

**Subject Code: BL – 104C**

**L 4, C 4**

### **Course Objectives:**

- To understand the historical development and significance of social institutions in India.
- To critically analyse the functioning and transformation of key social institutions in contemporary India.
- To explore the relationship between various social institutions and their impact on societal norms and values.
- To evaluate the impact of modernization, globalization, and policy interventions on social institutions.
- To assess the role of social institutions in shaping issues like inequality, gender, and class in India.

### **Unit 1: The Family and Kinship System in India**

#### **1. Traditional Family Structures:**

- The joint family system in India: History, structure, and significance.
- Kinship networks: Types, roles, and importance in traditional societies.
- Changes in family structure due to urbanization and modernization.

#### **2. Family Roles and Gender:**

- Patriarchy in Indian families: Socialization and division of labour.
- Role of women in the family: Empowerment and challenges.
- Changing roles of men and women in contemporary Indian families.

#### **3. Marriage and Kinship in Modern India:**

- Arranged marriage system and its evolution.
- Inter-caste and inter-religious marriages.
- Impact of globalization and media on marriage norms.

### **Unit 2: The Caste System and Social Stratification**

#### **1. Historical Development of Caste:**

- The origin and evolution of the caste system in India.
- The role of caste in social stratification and its impact on Indian society.
- Caste-based inequalities and the role of religion in sustaining the caste system.

#### **2. Caste in Contemporary India:**

- Caste in the modern Indian economy and politics.
- Affirmative action policies: Reservation system and its impact on caste dynamics.
- Changing role of caste in urban and rural settings.

#### **3. Caste and Social Movements:**

- The role of social reform movements: Brahmi Samaj, Arya Samaj, and Dalit movements.

- Modern Dalit activism and the struggle for caste equality.

### **Unit 3: Religion and Society in India**

#### **1. Religious Diversity and Secularism:**

- India as a land of religious diversity: Major religions and their influence on social life.
- Secularism in India: Theoretical perspectives and practical challenges.
- The role of religion in Indian politics and identity.

#### **2. Religious Institutions and Practices:**

- The role of temples, mosques, churches, and gurdwaras in shaping social behavior.
- Religious rituals and festivals: Their role in community building and social cohesion.
- Modernization and its impact on traditional religious practices.

#### **3. Religious Conflict and Social Change:**

- Communalism, religious intolerance, and inter-religious conflicts in India.
- Role of religion in social movements: Hindu revivalism, Islamic movements, and Christian missionary activities.
- Secularization and its challenges in modern India.

### **Unit 4: The Education System in India**

#### **1. Historical Evolution of Education in India:**

- Traditional education systems: Gurukuls, Madrasas, and indigenous learning.
- Colonial education and its impact on Indian society.
- The rise of modern education: The role of the British and post-independence education reforms.

#### **2. Challenges in the Education System:**

- Access to education: Rural-urban divide, caste, and gender disparities.
- Quality of education: Infrastructure, curriculum, and teacher training.
- Policies for educational reforms: Right to Education Act and skill development programs.

#### **3. Higher Education and Globalization:**

- The growth of higher education institutions: Universities, technical institutes, and research centres.
- Globalization and the rise of private educational institutions.
- Brain drain and the global competition in education.

## **Unit 5: The Political System and Governance in India**

### **1. Constitution and Democracy:**

- The Indian Constitution: Its significance, provisions, and challenges.
- The structure of Indian democracy: Political parties, elections, and the functioning of Parliament.
- Federalism, state vs. central power, and political decentralization.

### **2. Politics of Caste, Class, and Identity:**

- Caste-based politics and the role of affirmative action.
- Role of class and identity politics in shaping electoral outcomes.
- The rise of regional political parties and their impact on national politics.

### **3. Challenges in Indian Governance:**

- Corruption, governance deficits, and policy paralysis.
- Political dynasties and their impact on democracy.
- Social movements and their influence on political change.

### **Suggested Books:**

- Brass, P. R. (1990). *The Politics of India Since Independence*. Cambridge University Press.
- Jain, A. K. (1999). *Indian Politics and Government*. India: Vikas Publishing.
- Giddens, A., Duneier, M., Appelbaum, R.P., & Carr, D. (2017). *Introduction to Sociology* (10th ed.). W.W. Norton & Company.
- Thorat, S., & P. Sudarshan (2005). *Dalits and the State: Contemporary Indian Issues*. Oxford University Press.
- Desai, A. R. (1996). *Social Background of Indian Nationalism*. Popular Prakashan.
- Giddens, A., Duneier, M., Appelbaum, R.P., & Carr, D. (2017). *Introduction to Sociology* (10th ed.). W.W. Norton & Company.
- Madan, T. N. (1991). *Religion in India*. Oxford University Press.
- Nandy, A. (2004). *The Intimate Enemy: Loss and Recovery of Self Under Colonialism*. Oxford University Press.
- Giddens, A., Duneier, M., Appelbaum, R.P., & Carr, D. (2017). *Introduction to Sociology* (10th ed.). W.W. Norton & Company.

## Political Science-II

Sub. Code: BL 106

L 4, C 4

### Course Objectives

- Build on foundational knowledge by exploring more complex political ideologies and theories, including liberalism, conservatism, socialism, feminism, nationalism, and post-colonialism.
- Examine political institutions in-depth: Analyse the structure, functions, and interactions of political institutions such as legislatures, executives, judiciaries, political parties, and interest groups.
- Explore comparative politics: Compare political systems and regimes across different countries, understanding the factors that shape political stability, democratic governance, and authoritarianism.
- Study political participation: Investigate how individuals and groups participate in political processes through voting, protests, advocacy, and other forms of political action

### Unit-I: Government

Government, Organization of Government: Legislature, Executive, Judiciary

### Unit- II: Forms of Government

Dictatorship, Democracy (Features, Merits, Demerits)

### Unit III: Forms of Government

Unitary, Federal (Features, Merits, Demerits)

### Unit IV: Forms of Government

Parliamentary, Presidential (Features, Merits, Demerits)

### **Suggested Readings:**

1. Asirvatham , Political Theory, S. Chand & Company.
2. A.C. Kapoor, Principles of Political Science, S. Chand & Company.
3. Pennock and Smith, Political Science- An Introduction. Macmillan (New York)
4. Caramani, Daniele, Comparative Politics, Oxford University Press.
5. Viotti and Kauppi, International Relations, Ch. 10, Pearson.
6. Held, D. and McGrew, A. eds., The Global Transformations Reader Polity Press,  
Cambridge.

## **Society and Gender (BL 106A)**

**Subject Code: BL – 106A**

**L 4, C 4**

### **Course Objectives:**

- To understand the social construction of gender and its impact on various aspects of society.
- To critically analyse gender inequalities in the family, workplace, education, and politics.
- To explore the concept of intersectionality and its application in understanding gender relations.
- To examine global and local feminist movements and their impact on societal change.
- To assess contemporary issues related to gender, such as sexual harassment, gender-based violence, and LGBTQ+ rights.

### **Unit 1: Gender and Socialization**

#### **1. Theories of Gender Socialization:**

- Theories of gender socialization: Freud, Mead, and Parsons.
- Gender roles: How they are learned and perpetuated in society.
- The impact of family, peers, media, and education in shaping gender identities.

#### **2. Gender and Identity Formation:**

- The development of gender identity from childhood to adulthood.
- The role of cultural norms, family structures, and religious teachings in shaping gender roles.
- Gender nonconformity and the fluidity of gender identity.

#### **3. Socialization and Gender Inequality:**

- How gender socialization contributes to inequality: Patriarchy, sexism, and traditional gender roles.
- The influence of gender norms on women's and men's life choices, career paths, and aspirations.

### **Unit 2: Gender and Family**

#### **1. The Family as a Gendered Institution:**

- The role of family in gender socialization: Division of labor and caregiving roles.
- The impact of gender on family structures: Marriage, parenting, and caregiving.
- The changing family dynamics in response to gender equality movements.

#### **2. Reproduction and Gender:**

- The politics of reproduction: Reproductive rights, fertility, and family planning.
- Gendered division of labour in household chores and childcare.
- The concept of motherhood and its social implications.

#### **3. Marriage, Divorce, and Gender Relations:**

- The changing institution of marriage: The impact of feminism and women's rights on marriage norms.

- Gender roles in marital relationships: Power dynamics, decision-making, and economic contributions.
- Divorce and its gendered impact: Economic independence, custody rights, and social stigma.

### **Unit 3: Gender, Work, and Economy**

#### **1. Gender and Labor:**

- Gendered division of labour: Occupational segregation, the wage gap, and vertical and horizontal segregation.
- The role of women in the workforce: History, contributions, and challenges.
- Men and unpaid labour: Changing gender roles in caregiving and household tasks.

#### **2. Feminism and Economic Systems:**

- Feminist perspectives on economic inequality: Marxist, liberal, and socialist feminist views.
- Women in the informal economy: Labour exploitation, domestic work, and global supply chains.
- Gender, globalization, and the impact of transnational corporations on women's labour.

#### **3. Gender and Work-Life Balance:**

- The challenges of work-life balance for women and men.
- The impact of gender on career choices, promotions, and leadership roles.
- Policies and programs for promoting gender equality in the workplace: Affirmative action, maternity leave, and equal pay.

### **Unit 4: Gender and Politics**

#### **1. Gender and Political Representation:**

- The underrepresentation of women in politics: Barriers to political participation and leadership.
- Gender quotas and affirmative action in political offices.
- Women's political activism: Local and global perspectives.

#### **2. Feminist Politics and Social Movements:**

- The history of feminist movements: First, second, and third waves.
- Contemporary feminist activism: Issues such as reproductive rights, violence against women, and LGBTQ+ rights.
- Global feminism: Intersectionality, solidarity, and transnational movements.

#### **3. Gender, Power, and the State:**

- The role of the state in shaping gender relations: Laws, policies, and gender justice.
- Gender and citizenship: Rights, access to services, and social welfare.
- The impact of neoliberalism and globalization on gendered policies.

## Unit 5: Gender, Violence, and Social Change

### 1. **Gender-Based Violence:**

- Forms of gender-based violence: Domestic violence, sexual harassment, trafficking, and femicide.
- Causes and consequences of gender-based violence: Patriarchy, power dynamics, and social structures.
- Legal frameworks and policies addressing gender-based violence.

### 2. **Sexual Harassment and Workplace Violence:**

- The #MeToo movement and its impact on social and legal reforms.
- Gender, power, and sexual harassment in different contexts: Workplace, education, and public spaces.
- The role of media in exposing and addressing gender-based violence.

### 3. **Gender and Social Change:**

- Feminist interventions in law, media, and policy.
- Gender mainstreaming and strategies for social change.
- The role of education and social movements in transforming gender norms.

## **Suggested Books:**

- Crenshaw, K. (1991). *Mapping the Margins: Intersectionality, Identity Politics, and Violence Against Women of Color*. Stanford Law Review.
- Mohanty, C. T. (2003). *Feminism Without Borders: Decolonizing Theory, Practicing Solidarity*. Duke University Press.

## **Comparative Politics-II (BL 106B)**

**Subject Code: BL – 106B**

**L 4, C 4**

### **Course Objectives:**

- To deepen the understanding of different political systems and institutions.
- To develop skills for comparative analysis of political structures, processes, and outcomes.
- To critically evaluate the role of political institutions, political parties, and electoral systems in governance.
- To understand the impact of globalization on state sovereignty, democracy, and governance.
- To analyse the evolving nature of political authority, state capacity, and legitimacy in diverse political systems.

### **Unit 1: Political Systems and Political Structures**

#### **1. Types of Political Systems:**

- The concept of political systems: Democracy, authoritarianism, totalitarianism, and hybrid regimes.
- Characteristics and functioning of parliamentary and presidential systems.
- Comparative analysis of democratic and non-democratic political systems.

#### **2. Political Institutions:**

- Role of executive, legislature, and judiciary in different political systems.
- Analysis of constitutional frameworks: Federal vs. unitary systems.
- Political parties and party systems: Party structure, ideologies, and electoral systems.

#### **3. Government Structures:**

- Presidential, parliamentary, and mixed systems: Their evolution, advantages, and challenges.
- Case studies: USA, UK, France, India, and Brazil.

### **Unit 2: Political Culture and Political Socialization**

#### **1. Political Culture:**

- Definition, types, and components of political culture.
- The role of political culture in shaping democratic values and political behavior.
- The influence of national identity, traditions, and religion on political culture.

#### **2. Political Socialization:**

- Socializing agents: Family, education, media, and peer groups.
- The role of political socialization in the formation of public opinion and political participation.
- Comparative study of political socialization in different political systems.

### **3. Case Studies in Political Culture:**

- Political culture in democratic societies: USA, India, and France.
- Political culture in authoritarian regimes: China, Russia, and North Korea.

## **Unit 3: Comparative Political Economy**

### **1. State and Market Relations:**

- Theories of political economy: Capitalism, socialism, and welfare states.
- Economic systems and political governance: Free market vs. planned economies.
- Globalization and its impact on national economies: Trade, investment, and financial flows.

### **2. Development Models and State Capacity:**

- Theories of state development: Modernization theory, dependency theory, and post-colonial critique.
- The role of the state in economic development: Economic planning and policy-making.
- Comparative analysis of development in different countries: Success stories and failures (e.g., South Korea vs. Sub-Saharan Africa).

### **3. Political Economy of Transition:**

- The transition from command economies to market economies: Case studies of China, Russia, and Eastern Europe.
- The role of political regimes in economic reforms and transitions.

## **Unit 4: Electoral Systems and Political Participation**

### **1. Electoral Systems and Voting Behavior:**

- Types of electoral systems: Majoritarian, proportional representation, and mixed systems.
- The impact of electoral systems on party systems, voter behavior, and political representation.
- Comparative analysis of electoral systems in the UK, USA, India, and Germany.

### **2. Political Participation and Public Opinion:**

- Voter turnout and the factors affecting political participation.
- Political participation beyond voting: Protests, strikes, and civil society movements.
- The role of media in shaping public opinion and electoral outcomes.

### **3. Party Systems and Political Representation:**

- Major political party systems: Single-party, two-party, multi-party systems.
- The role of political parties in democratic and authoritarian regimes.
- Case studies: Political parties in the USA, India, and France.

## **Unit 5: Political Institutions and Governance**

### **1. Legislatures and Lawmaking:**

- The role of legislatures in policy-making and governance.
- Bicameral vs. unicameral systems: Their advantages and challenges.
- Comparative analysis of legislative systems: UK, USA, India, and Brazil.

### **2. Judiciaries and Legal Systems:**

- The role of judicial independence and its relation to democracy.
- Comparative study of judicial systems: Common law vs. civil law traditions.
- The role of the judiciary in protecting human rights and the rule of law.

### **3. Bureaucracy and Governance:**

- The role of the bureaucracy in policy implementation.
- Civil service reform: The challenges of corruption and inefficiency.
- Case studies on governance: Comparative analysis of administrative systems.

## **Suggested Books:**

- Diamond, L. (2008). *The Spirit of Democracy: The Struggle to Build Free Societies Throughout the World*. Times Books.
- Linz, J. J. (2000). *Totalitarian and Authoritarian Regimes*. Lynne Rienner Publishers.

## Political Theories-II (BL 106C)

Subject Code: BL – 102A

L 4, C 4

### Course Objectives:

- To understand the development of key political ideologies and thinkers.
- To critically analyse political thought in relation to contemporary issues such as human rights, democracy, and governance.
- To examine the evolution of core political concepts such as liberty, equality, justice, and power.
- To explore the intersection of political theory with social, economic, and cultural factors in shaping modern political systems.

### Unit 1: Classical Political Thought

#### 1. Plato and Aristotle:

- Plato's *Republic* and his concept of justice, the philosopher-king, and the ideal state.
- Aristotle's *Politics* and his views on democracy, polity, and the role of the citizen in governance.
- Comparison between Plato's and Aristotle's views on the state and politics.

#### 2. Machiavelli:

- Machiavelli's *The Prince* and his views on power, the role of the ruler, and the use of deceit and force in politics.
- The concept of *virtù* and *fortuna*, and their application to modern political analysis.
- Machiavelli's republicanism in *Discourses on Livy*.

#### 3. Hobbes, Locke, and Rousseau:

- Hobbes's theory of the state of nature, the social contract, and the need for an absolute sovereign (*Leviathan*).
- Locke's theories of natural rights, private property, and the limited government (*Two Treatises of Government*).
- Rousseau's general will, social contract, and critique of inequality (*The Social Contract*).

### Unit 2: Modern Political Thought

#### 1. John Stuart Mill:

- Mill's liberalism: *On Liberty*, utilitarianism, and the principle of harm.
- The concept of individual liberty, freedom of speech, and women's rights (e.g., *The Subjection of Women*).

- The limits of state intervention and the idea of a free market.
- 2. **Karl Marx:**
  - Marx's critique of capitalism: Historical materialism, class struggle, and the theory of surplus value (*The Communist Manifesto*).
  - Marxist views on the state, revolution, and the dictatorship of the proletariat.
  - Influence of Marxist thought on modern political movements.
- 3. **Friedrich Hayek and Milton Friedman:**
  - Hayek's critique of central planning and socialism (*The Road to Serfdom*).
  - Friedman's advocacy for free markets and minimal state intervention (*Capitalism and Freedom*).

### Unit 3: Political Ideologies

1. **Liberalism:**
  - The core tenets of liberal thought: Individualism, freedom, equality, and democracy.
  - Classical vs. modern liberalism: From Locke and Mill to Rawls and Nozick.
  - The liberal critique of state intervention and the role of the market.
2. **Socialism and Communism:**
  - Marxist socialism and the critique of capitalism.
  - Democratic socialism and the welfare state.
  - Communism as an ideology of revolutionary change, from Marx to Lenin.
3. **Conservatism:**
  - Key ideas of conservatism: Tradition, authority, gradual change, and skepticism of revolution.
  - Edmund Burke's defense of tradition and society.
  - Modern conservatism: The role of the state, free market, and cultural values.
4. **Feminism and Gender Theories:**
  - Feminist political theory: Equality, justice, and critique of patriarchy.
  - Liberal feminism, Marxist feminism, and radical feminism.
  - Gender and political power: Theories of sexual politics and intersectionality.

### Unit 4: Contemporary Political Thought

1. **Postmodernism and Critical Theory:**
  - Michel Foucault's views on power, knowledge, and discipline.
  - Postmodern critiques of grand narratives and ideologies.
  - Critical Theory and the Frankfurt School: Adorno, Horkheimer, and Habermas.
2. **Globalization and Political Thought:**
  - Global justice and the ethics of globalization.
  - Cosmopolitanism vs. nationalism: Theories of global governance.
  - The role of international organizations, such as the UN and WTO.

### 3. **Environmental Political Thought:**

- Green political thought: Environmental justice, sustainability, and eco-feminism.
- The critique of industrialism and the quest for eco-socialism.
- The politics of climate change and global environmental movements.

## **Unit 5: Modern Political Issues and Ideas**

### 1. **Democracy and Its Challenges:**

- Theories of democracy: Deliberative democracy, participatory democracy, and liberal democracy.
- Challenges to democracy: Populism, authoritarianism, and illiberal democracy.
- Democratic backsliding: Case studies from Eastern Europe and Latin America.

### 2. **Nationalism and Multiculturalism:**

- Theories of nationalism: Ethnic vs. civic nationalism.
- Multiculturalism and its political implications.
- Nationalism, citizenship, and global migration.

### 3. **Human Rights and Justice:**

- The evolution of human rights theory: Natural rights, civil rights, and social rights.
- Justice theories: Distributive justice, global justice, and reparative justice.
- Human rights in practice: International law and humanitarian interventions.

## **Suggested Books:**

- Dahl, R.A. (1989). *Democracy and Its Critics*. Yale University Press.
- Smith, A.D. (1998). *Nationalism and Modernism*. Routledge.
- Kymlicka, W. (1995). *Multicultural Citizenship: A Liberal Theory of Minority Rights*. Oxford University Press.
- Rawls, J. (1993). *Political Liberalism*. Columbia University Press.

## **Unit 6: Contemporary Political Theory and Applications**

### 1. **Global Political Theory:**

- Cosmopolitanism and global ethics.
- Theories of international justice: Global poverty, migration, and conflict.
- Postcolonial political theory: Colonialism, decolonization, and the politics of identity.

### 2. **Political Theory and the Environment:**

- Ecological justice: Environmental ethics and political theory.
- The relationship between political economy and environmental sustainability.
- Green political movements and the global climate crisis.

### **Suggested Books:**

- Held, D. (2010). *Global Political Theory*. Polity Press.
- Nussbaum, M.C. (2006). *Frontiers of Justice: Disability, Nationality, Species Membership*. Belknap Press.
- Scruton, R. (2008). \*Green
- Plato. (2003). *The Republic*. Trans. G.M.A. Grube. Hackett Publishing.
- Aristotle. (2009). *Politics*. Trans. C.D.C. Reeve. Hackett Publishing.
- Machiavelli, N. (1998). *The Prince*. Trans. W. K. Marriott. Dover Publications.
- Hobbes, T. (1994). *Leviathan*. Cambridge University Press.

- Smith, A.D. (1998). *Nationalism and Modernism*. Routledge.
- Kymlicka, W. (1995). *Multicultural Citizenship: A Liberal Theory of Minority Rights*. Oxford University Press.
- Rawls, J. (1993). *Political Liberalism*. Columbia University Press.

# Constitutional Law - I

Sub. Code: BL 108

L – 4, C – 4.

## Course Objectives

- Examine federalism and state powers: Explore the relationship between federal and state governments, including the distribution of powers and how conflicts are resolved, with an emphasis on landmark cases in federalism.
- Study separation of powers: Analyse the separation of powers among the three branches of government (executive, legislative, and judiciary) and the checks and balances system designed to prevent any one branch from becoming too powerful.
- Understand the role of the judiciary: Study the judicial power in interpreting and applying the Constitution, including the principle of judicial review, and the role of courts in constitutional interpretation.
- Study fundamental rights and liberties: Delve into the rights protected by the Constitution, particularly those in the Bill of Rights and the Fourteenth Amendment, including freedom of speech, religion, and privacy.

## Unit-I

Constitution-Meaning and Significance - Evolution of Modern Constitutions -Classification of Constitutions-Indian Constitution - Historical Perspectives - Government of India Act, 1919 - Government of India Act, 1935 - Drafting of Indian Constitution - Role of Drafting Committee of the Constituent Assembly

## Unit-II

Nature and Salient Features of Indian Constitution - Preamble to Indian Constitution - Union and its Territories-Citizenship - General Principles relating to Fundamental Rights (Art.13) - Definition of State

## Unit-III

Right to Equality (Art.14-18) – Freedoms and Restrictions under Art.19 - Protection against Ex-post facto law - Guarantee against Double Jeopardy - Privilege against Self-incrimination - Right to Life and Personal Liberty - Right to Education – Protection against Arrest and Preventive Detention

## Unit-IV

Rights against Exploitation - Right to Freedom of Religion - Cultural and Educational Rights - Right to Constitutional Remedies - Limitations on Fundamental Rights (Art.31-A,B and C)

## **Unit-V**

Directive Principles of State Policy – Significance – Nature – Classification -

### **Suggested Readings:**

1. M.P.Jain, Indian Constitutional Law, Wadhwa& Co, Nagpur
2. V.N.Shukla, Constitution of India, Eastern Book Company, Lucknow
3. Granville Austin, Indian Constitution-Cornerstone of a Nation, OUP, New Delhi
4. H.M.Seervai, Constitutional Law of India (in 3 Volumes), N.M.Tripathi, Bombay
5. G.C.V.Subba Rao, Indian Constitutional Law, S.Gogia& Co., Hyderabad
6. B.Shiva Rao: Framing of India's Constitution (in 5 Volumes), Indian Institute of Public Administration, New Delhi
7. J.N.Pandey, Constitutional Law of India, Central Law Agency, Allahabad

## Law of Contract - II

Sub. Code: BL 110

L – 4, C – 4.

### Course Objectives

- Study advanced elements of contract formation: Explore the essential components for a valid contract (offer, acceptance, consideration, capacity, and legality) in more depth, including situations involving ambiguous terms, pre-contractual negotiations, and implied contracts.
- Analyze unilateral and bilateral contracts: Understand the differences between unilateral and bilateral contracts, and explore how each is formed, enforced, and discharged.
- Explore contract formation in specialized areas: Examine contracts involving commercial transactions, construction, and complex agreements, and analyze how standard industry practices influence contract formation. Study express and implied terms: Learn to differentiate between express terms (clearly stated in the contract) and implied terms (those inserted by law or custom) and their enforceability.
- Analyze standard form contracts: Investigate the use of standard terms or "boilerplate" clauses, focusing on their fairness, enforceability, and the potential for unconscionability or other defenses.

### Unit-I:

Indemnity and Guarantee - Contract of Indemnity, definition - Rights of Indemnity holder - Liability of the indemnified - Contract of Guarantee - Definition of Guarantee - Essential characteristics of Contract of Guarantee - Distinction between Indemnity and Guarantee - Kinds of Guarantee - Rights and liabilities of Surety - Discharge of surety. Contract of Bailment - Definition of bailment - Essential requisites of bailment - Kinds of bailment - Rights and duties of bailor and bailee - Termination of bailment - Pledge - Definition of pledge - Rights and duties of Pawnor and Pawnee - Pledge by non-owner.

### Unit-II:

Contract of Agency - Definition of Agent - Creation of Agency - Rights and duties of Agent - Delegation of authority - Personal liability of agent - Relations of principal and agent with third parties - Termination of Agency.

### Unit-III:

Contract of Sale of Goods - Formation of contract - Subject matter of sale - Conditions and Warranties - Express and implied conditions and warranties - Pricing - Caveat Emptor.

### Unit-IV:

Property - Possession and Rules relating to passing of property - Sale by non-owner - Nemo dat quod non habet - Delivery of goods - Rights and duties of seller and buyer before and after sale - Rights of unpaid seller - Remedies for breach.

**Unit-V:**

Contract of Partnership - Definition and nature of partnership - Formation of partnership- Test of partnership - Partnership and other associations - **Registration of firm - Effect of non-registration - Relations of partners.**

**Suggested Readings:**

1. Anson's Law of Contract, 25th Ed. 1998, OxfordUniversity Press, London.
2. VenkateshIyyer: The Law of Contracts and Tenders, Gogia& Company Hyderabad.
3. Cheshire& Fifoot: Law of Contract, Butterworth, London, 1976.
4. Mulla: The Indian Contract Act, N.M.Tripathi (P) Ltd. Bombay, 1984.
5. G.C.V. Subba Rao: Law of Contracts, S. Gogia& Co., Hyderabad, 1995.
6. Krishnan Nair: Law of Contracts, S. Gogia& Co. Hyderabad, 1995.
7. Avtar Singh: Law of Contracts, Eastern Book Company, Lucknow, 1998.
8. A Ramaiah'sSale of Goods Act, 4th Ed. 1998, The Law Book Co., Allahabad.
9. Benjamin's Sale of Goods, 1st Ed. 1978, Sweet & Maxwell, London.
10. P.S. Atiyah: Sale of Goods Act, 9th Ed. 1997, Universal Book Traders, Delhi.

## Economics-II

Sub. Code: BL 112

L 4, C 4

### Course Objectives

- Examine taxation and public finance: Study the theory of taxation, including different types of taxes (income, sales, property), their effects on individuals and businesses, and how they impact economic efficiency and equity.
- Understand government intervention and market failure: Analyze the role of government in correcting market failures, such as through regulation, public goods provision, externality correction, and income redistribution.
- Study social welfare and redistribution policies: Examine policies aimed at reducing inequality, such as progressive taxation, welfare programs, and social insurance. Investigate the efficiency and equity of various redistributive mechanisms.
- Explore fiscal policy and its impact on the economy: Understand how governments use fiscal policy (public spending and taxation) to influence economic activity, manage inflation, and address unemployment.

### Unit-I: Introduction

- (a). Structural Changes in Indian Economy in Post 1991 period.
- (b). New Economic policy, Liberalizations and Privatization.

### Unit-II: Agriculture Sector

- (a). Features and problems in Indian Agriculture.
- (b). Land Reforms in India, Consolidation of Holdings and its impact on poverty elevation in India.

### Unit-III: Industrial Sector

- (a). Industrial Policy in India since 1948 and recent Changes in with reference to economic Problems.
- (b). Industrial Sickness, Causes and its remedies.
- (c). Industrial relations and Trade unionism.

### Unit-IV: Economic Institutions in India

- (a). Single Proprietorship, Partnership.
- (b). Trust and Cooperative Societies.
- (c). Multinational Corporations.

**Unit-V: Foreign Trade & Investment**

(a). Foreign Trade Policy, major problems of Indian Export Sector.

(b). Foreign Investment; FDI.

**Suggested Readings**

1. Aggarwal A.N., Indian Economy, Vikas Publication, New Delhi.
2. Hanumanta Rao C.H. & Joshi F.C., Reflections of Economic Development and Social Changes.
3. Rudder Dutt & KPM Sundaram, Indian Economy, S. Chand & Co.

## **Indian Economy-II (BL-112 A)**

**Subject Code: BL – 112A**

**L 4, C 4**

### **Course Objectives:**

- To deepen understanding of key economic concepts and theories related to the Indian economy.
- To examine India's economic growth trajectory, sectoral transformations, and the policy measures implemented by the government.
- To critically analyse the challenges and opportunities facing the Indian economy.
- To explore the role of India in the global economy and its economic relations with other nations.
- To evaluate the effectiveness of various policy interventions in addressing socio-economic issues in India.

### **Unit 1: Economic Growth and Planning in India**

#### **1. Economic Growth in India:**

- Trends in India's economic growth post-independence.
- Factors influencing India's economic growth: Population, infrastructure, investment, and human capital.
- Growth theories and their application to the Indian context.

#### **2. Planning in India:**

- Evolution of planning in India: From Five-Year Plans to NITI Aayog.
- Role of public sector in planning and industrial development.
- Issues in the planning process: Targets, allocation of resources, and plan implementation.

#### **3. Economic Reforms and Liberalization:**

- The 1991 economic reforms: Structural adjustments, liberalization, privatization, and globalization.
- Impact of reforms on India's industrial, trade, and financial sectors.
- Critiques of economic reforms and the challenges faced in inclusive growth.

### **Unit 2: Sectoral Composition of Indian Economy**

#### **1. Agriculture:**

- Role of agriculture in India's economy: Employment, GDP contribution, and food security.
- Agricultural policies and reforms: Green Revolution, land reforms, and current challenges.

- Issues in rural development, agriculture sustainability, and the impact of climate change on agriculture.
- 2. **Industry and Manufacturing:**
  - Structure of the industrial sector in India: MSMEs, large industries, and the role of technology.
  - Industrial policy and reforms: Post-liberalization changes in the industrial landscape.
  - Make in India initiative and its impact on manufacturing.
- 3. **Services Sector:**
  - Growth and significance of the services sector in India: IT, financial services, tourism, and healthcare.
  - Contribution of the services sector to GDP and employment.
  - Challenges facing the services sector, including skill development, infrastructure, and regulation.

### **Unit 3: Fiscal and Monetary Policy in India**

1. **Fiscal Policy:**
  - Overview of India's fiscal system: Structure of government revenues and expenditure.
  - Fiscal policy tools: Taxation, public debt, and fiscal deficit.
  - Budgetary policy and the role of Finance Commission.
  - The role of fiscal policy in economic stabilization and growth.
2. **Monetary Policy:**
  - Role of Reserve Bank of India (RBI) in monetary policy formulation.
  - Objectives of monetary policy: Inflation targeting, interest rates, and exchange rates.
  - Recent developments in monetary policy: Liquidity management, credit control, and financial inclusion.
  - The impact of demonetization and GST on India's monetary policy.

### **Unit 4: External Sector and India's Foreign Trade**

1. **Trade and Balance of Payments:**
  - India's trade pattern and composition: Major exports and imports.
  - Issues related to India's balance of payments (BoP): Deficits, capital flows, and exchange rates.
  - India's exchange rate policies and its impact on international trade.
2. **Trade Policies and Agreements:**
  - Evolution of India's trade policy: From import substitution to export-led growth.
  - WTO and regional trade agreements: SAFTA, ASEAN, and RCEP.
  - Foreign trade policy and its role in promoting exports and economic growth.
3. **Foreign Direct Investment (FDI) and Capital Flows:**
  - Role of FDI in India's economic development.
  - Government policies to attract FDI: Make in India, Start-Up India.

## Unit 5: Poverty, Unemployment, and Inequality in India

### 1. Poverty in India:

- Measurement of poverty: Poverty lines, multidimensional poverty.
- Causes of poverty: Structural, social, and economic factors.
- Government initiatives for poverty alleviation: MGNREGA, PMAY, and direct benefit transfers (DBT).

### 2. Unemployment and Employment Policies:

- Types of unemployment: Frictional, structural, and disguised unemployment.
- Employment generation policies and programs: Skill development, employment guarantee schemes.
- Challenges in the labor market: Informal sector, wage disparity, and gender inequality.

### 3. Inequality:

- Economic inequality: Income and wealth disparities.
- Social inequality: Caste, class, and gender-based disparities.
- Government policies aimed at reducing inequality: Reservation policies, inclusive growth programs.

## **ECONOMY OF MONEY AND BANKING -II (BL-112 B)**

**Subject Code: BL – 112B**

**L 4, C 4**

### **COURSE OBJECTIVES**

- Develop a Strong Understanding of Monetary Theories  
To explore and critically analyse various theories related to the demand and supply of money, including classical, Keynesian, and modern approaches.
- Understand the Conduct of Monetary Policy  
To study the objectives, tools, and mechanisms through which central banks implement monetary policy, and assess how policy decisions impact inflation, growth, and employment.
- analyse the Role of Central Banks

#### **Unit 1: Money**

- Understanding concept and functions of money
- Measurement of money supply
- Analytics and Methodology of computation of money supply
- Theories of money supply determination.

#### **Unit 2: Financial markets:**

- Role of financial markets and institutions
- Problems of Asymmetric information
- Financial Crises; Financial derivatives: Futures, Options and Swaps
- Financial markets and Institutions in India: Organization, Structure and Reforms in India

#### **Unit 3: Determination of interest rates:**

- Sources of interest rates differentials and risk
- Theories of term structure of interest rates
- Interest rates in India.

#### **Unit 4: Banking**

- Theory of Separation of Powers and Checks and Balances
- N.G.O. Civil Society Campaigns and role of Mass Media

### **Unit 5: Historical context: Money and Banking**

- Introduction to banking system
- Types of banks

#### **Suggested Readings:**

1. F J Fabozzi et al: Foundations of Financial Markets and Institutions, Pearson
2. F S Mishkin , S G Eakins, T Jayakumar, R K Pattnaik : Financial Markets and Institutions Pearson

# **Principles of Sustainable Finance (BL-112C)**

**Subject Code: BL – 112C**

**L 4, C 4**

## **Course Objectives**

- This course explores the integration of environmental, social, and governance (ESG) factors into financial decision-making.
- It covers the foundational principles of sustainable finance
- The role of financial markets, and strategies for promoting sustainability in investment and corporate practices.

## **Unit 1: Introduction to Sustainable Finance**

- Overview of finance and sustainability
- Historical context and evolution of sustainable finance
- Importance of ESG factors

## **Unit 2: Key Concepts and Terminology**

- Definitions: sustainability, sustainable finance, ESG
- Sustainable Development Goals (SDGs)
- Impact investing vs. traditional investing

## **Unit 3: Long-term Value Creation**

- Understanding the concept of long-termism
- Case studies of successful sustainable investments
- The role of innovation in sustainable finance

## **Unit 4: Environmental Stewardship**

- Climate change and finance
- Renewable energy investments

## **Suggested Readings:**

1. "Finance and Sustainability: Towards a New Paradigm" by Marco Cattaneo
2. This book examines the intersection of finance and sustainability, offering new paradigms for integrating these fields.
3. "The Sustainable Investing Handbook" by Dr. Cary Krosinsky
4. A practical guide to sustainable investing strategies, frameworks, and tools, aimed at both investors and financial professionals.
5. "The Economics of Climate Change: The Stern Review" by Nicholas Stern
6. While not solely focused on finance, this influential report outlines the economic implications of climate change and the need for sustainable investment

# **SEMESTER III**

## Constitutional Law – II

Sub. Code: BL 201

L – 4, C – 4.

### Course Objective

- Examine the scope of individual rights: Study advanced topics related to individual rights guaranteed by the Constitution, focusing on the Due Process Clause, Equal Protection Clause, and First Amendment rights (including freedom of speech, freedom of religion, and freedom of association).
- Analyse the evolving jurisprudence of civil rights: Understand the historical development and contemporary application of civil rights protections, particularly regarding race, gender, and sexual orientation.
- Study substantive due process and privacy rights: Delve into the principles of substantive due process and the development of privacy rights, including landmark cases like *Griswold v. Connecticut*, *Roe v. Wade*, and *Lawrence v. Texas*.
- Explore procedural due process: Understand the constitutional requirements of fair procedures when individuals are deprived of life, liberty, or property, focusing on judicial review and the protections offered by the Fifth and Fourteenth Amendments.

### Unit-I

Legislature under Indian Constitution - Union and State Legislatures - Composition, Powers, Functions and Privileges - Anti-Defection Law - Executive under Indian Constitution - President and Union Council of Ministers - **Governor and State Council of Ministers - Powers and position of President and Governor**

### Unit-II

Judiciary under Constitution - Supreme Court - Appointment of Judges, Powers and Jurisdiction - High Courts - Appointment and Transfer of Judges - Powers and Jurisdiction - Subordinate Judiciary - **Independence of judiciary - Judicial Accountability**

### Unit-III

Centre State Relations - Legislative, Administrative and Financial Relations - Cooperation and Coordination between the Centre and States - **Judicial Interpretation of Centre-State Relations - Doctrines evolved by Judiciary**

### Unit-IV

Liability of State in Torts and Contracts - Freedom of Interstate Trade, Commerce and Inter course - **Services under the State - All India Services - Public Service Commissions**

## **Unit-V**

Emergency – Need of Emergency Powers - Different kinds of Emergency - National, State and **Financial emergency.**

### **Suggested Readings:**

1. M.P.Jain, Indian Constitutional Law, Wadhwa& Co, Nagpur
2. V.N.Shukla, Constitution of India, Eastern Book Company, Lucknow
3. Granville Austin, Indian Constitution-Cornerstone of a Nation, OUP, New Delhi
4. H.M.Seervai, Constitutional Law of India (in 3 Volumes), N.M.Tripathi, Bombay
5. G.C.V.Subba Rao, Indian Constitutional Law, S.Gogia& Co., Hyderabad
6. B.Shiva Rao, Framing of India's Constitution (in 5 Volumes), Indian Institute of Public Administration, New Delhi
7. J.N.Pandey, Constitutional Law of India, Central Law Agency, Allahabad

# Legal Methods

Sub. Code: BL – 203

L-4, C-4

## Course Objectives

- Understand the structure of legal systems: Introduce students to the basics of the legal system, including the different types of law (e.g., common law, statutory law, constitutional law), and the role of courts, legislatures, and executive bodies in shaping law.
- Familiarize with sources of law.
- Help students identify and understand the different sources of law, including primary sources (e.g., statutes, case law, constitutions) and secondary sources (e.g., legal commentary, law review articles, legal dictionaries).
- Develop legal research skills: Equip students with the skills to conduct effective legal research using legal databases (e.g., Westlaw, LexisNexis) and traditional research methods (e.g., library research, casebooks, and law reports).

## Unit-I: Introduction

Law as an independent discipline has its own materials and methods. Though related to and reflective of social processes, its development is unique in several respects. The character and content of legal knowledge are explained to the student in a systematic fashion. Familiarity with the sources of law and with legal materials and competence to find the law by the use of the law library are major concerns of this course. The ability to appreciate law as a process in the context of other processes in society (political, economic, cultural, social) is one of the goals of this course.

## Unit-II: Introduction to Law

### I. Meaning and Classification of Laws

- a. What is law?
- b. Meaning and definition
- c. How is law made?
- d. What are the uses and functions of law?
- e. Classification of laws:
  - i. Public and Private Law
  - ii. Substantive and Procedural Law
  - iii. Municipal and International Law

## Unit-III : Sources of Law

- a. Custom
- b. Precedent
- c. Legislation

#### **Unit-IV : Basic Concepts of Indian Legal System**

- a. Common Law
- b. Constitution as the Basic Law
- c. Rule of Law
- d. Separation of Powers
- e. Judicial system in India

#### **Unit-V : Legal Writing and Research**

Legal materials – Case law, b. Statutes, Reports, Journals, Manuals, Digests etc.,

#### **Suggested Readings**

- **"Introduction to Legal Research and Methodology"** by S.K. Verma and Kusum Verma
  - A detailed guide on legal research techniques and methodologies, focusing on Indian law.
- **"Legal Research and Writing"** by Nancy L. Schultz and Linda H. Edwards
  - Provides a comprehensive understanding of legal research and writing skills.
- **"Legal Method"** by S.P. Sathe
  - A foundational text on the principles of legal reasoning and methodology.
- **"The Legal System: A Social Science Perspective"** by Lawrence M. Friedman
  - Explores the structure and functioning of legal systems from a sociological viewpoint.
- **"An Introduction to Legal Theory"** by Peter G. Stein
  - Focuses on the philosophical underpinnings of law and its methods.

## POLITICAL SCIENCE-III

Sub. Code: BL – 205

L-4, C-4

### Course Objectives

- Understand the role of the state: Study the state's role in governance, lawmaking, security, and economic management. Analyze how states interact with citizens and non-state actors.
- Examine executive power and leadership: Understand the functions and powers of executive branches, focusing on the head of state/government and their relationship with the legislature and judiciary.
- Analyze the role of legislatures: Study how legislative bodies operate in different political systems, focusing on lawmaking, representation, and the relationship between the legislature and the executive.
- Study the judiciary and judicial review: Examine the role of courts in interpreting laws, ensuring the constitutionality of laws, and protecting individual rights and liberties.

**Unit I: Western Political Thought:** Plato (Ethics), Aristotle (State, Citizenship)

**Unit II: Western Political Thought:** Lock (Rights), Rousseau (Inequality), Marx (State)

**Unit III: Indian Political Thought:** Kautilya(State), Vivekanand (Vedanta, Education)

**Unit IV: Indian Political Thought:** Gandhi (Swaraj), Ambedkar (Social Justice),

### Suggested Readings:

1. Appadorai, Indian Political Thinking through the Ages, Khanna Publishers, Delhi,
2. Urmila Sharma, S K Sharma, Indian Political Thought, Atlantic
3. V. R. Mehta, Foundations of Indian Political Thought, New Delhi, Manohar
4. C.L. Wayper, Political Thought, New Delhi, (English & Hindi).
5. S. Mukherjee and S. Ramaswamy, A History of Political Thought: Plato to Marx, New Delhi, Prentice Hall.

Ian Adams & R.W. Dyson, Fifty Great Political Thinkers, Routledge

## **Society and Gender-III (BL – 205 A)**

**Subject Code: BL – 205A**

**L 4, C 4**

### **Course Objectives:**

- To understand and critically analyse the evolving concepts of gender and their impact on social structures.
- To explore the intersectionality of gender with other social categories like race, caste, class, and sexuality.
- To examine feminist theories, ideologies, and movements, both historical and contemporary.
- To evaluate the role of gender in key social institutions like family, education, politics, and media.
- To explore contemporary gender issues in a global context and discuss policies addressing gender inequality.

### **Unit 1: Foundations of Gender Studies**

#### **1. Introduction to Gender Studies:**

- Definition and conceptualization of gender, sex, and sexuality.
- Historical development of gender studies as an interdisciplinary field.
- The role of gender in social theory: Contributions of key theorists (Simone de Beauvoir, Judith Butler, Michel Foucault).

#### **2. Gender and Socialization:**

- Social construction of gender roles and identities.
- Gender socialization in family, school, and media.
- The impact of patriarchy, heteronormativity, and gender norms on individual lives.

#### **3. Intersectionality in Gender Studies:**

- Concept of intersectionality: Kimberlé Crenshaw's theory.
- The interconnectedness of gender, class, race, caste, and sexuality.
- Case studies exploring intersectional experiences of women and marginalized groups.

### **Unit 2: Feminist Theories and Movements**

#### **1. Classical Feminist Theories:**

- Liberal feminism: Emphasis on individual rights, equality, and legal reforms (e.g., Mary Wollstonecraft, John Stuart Mill).
- Socialist feminism: Connection between gender and class oppression (e.g., Engels, Simone de Beauvoir).

- Radical feminism: Focus on patriarchy and systemic oppression of women (e.g., Shulamith Firestone, Andrea Dworkin).
- 2. **Postmodern and Postcolonial Feminisms:**
  - Postmodern feminism: Critique of universalizing narratives and essentialism (e.g., Judith Butler, bell hooks).
  - Postcolonial feminism: The impact of colonialism on gender and identity, experiences of Third World women (e.g., Gayatri Spivak, Chandra Talpade Mohanty).
- 3. **Contemporary Feminist Movements:**
  - Global feminist movements and the fight for reproductive rights, gender-based violence, and equal pay.
  - #MeToo, Time's Up, and other social media-driven movements.
  - Feminism in India and the Global South: Challenges and perspectives.

### **Unit 3: Gender and Social Institutions**

1. **Gender in the Family:**
  - Family as a site of gender roles and power dynamics.
  - The evolution of family structures and the impact of globalization and migration.
  - Gendered division of labor in the household and caregiving responsibilities.
2. **Gender in Education:**
  - Gender stereotypes in textbooks, curriculum, and teacher-student interactions.
  - Gender disparities in access to education: Global and national perspectives.
  - Gender and academic achievement: Women's access to higher education and barriers faced.
3. **Gender and Work:**
  - Gendered labor markets: The feminization of certain jobs and gender pay gaps.
  - Occupational segregation: The glass ceiling, leadership roles, and the corporate ladder.
  - Feminist perspectives on unpaid work and the value of caregiving roles.
  -

### **Unit 4: Gender, Sexuality, and the Law**

1. **Legal Frameworks for Gender Equality:**
  - International laws and conventions on women's rights (e.g., CEDAW).
  - Indian Constitution and gender equality: Fundamental rights, Directive Principles of State Policy, and laws for women's protection.
  - Gender-based violence and the legal system: Domestic violence, sexual harassment, and trafficking.
2. **Gender and Reproductive Rights:**
  - Feminist perspectives on reproductive justice and autonomy.
  - Laws surrounding reproductive health: Abortion, contraception, and maternal health.
  - The role of the state in regulating and controlling women's bodies.

### 3. **LGBTQ+ Rights and Gender:**

- Gender identity, sexuality, and the law: Legal recognition of transgender rights.
- Decriminalization of homosexuality in India and the global fight for LGBTQ+ rights.
- Intersection of gender and sexuality in the context of marriage, adoption, and family law.

## **Unit 5: Gender, Media, and Culture**

### 1. **Gender Representation in Media:**

- Media as a tool for perpetuating gender stereotypes and roles.
- Representation of women in film, television, advertisements, and social media.
- Feminist media criticism and the portrayal of men and women in the media.

### 2. **Cultural Practices and Gender:**

- Gender and tradition: The role of cultural practices in shaping gender identities and roles.
- Rituals, religion, and gender: How gender roles are embedded in cultural practices and beliefs.
- The politics of gender and culture in the Global South: The debate on cultural relativism vs. universalism.

### 3. **Digital Feminism and Gender Activism:**

- Online gender activism and the impact of social media platforms.
- Cyber feminism and the role of technology in addressing gender inequalities.
- Virtual communities and their influence on gender discourse.

## **Suggested Books:**

- Walby, S. (2011). *The Future of Feminism*. Polity Press.
- Sen, A. (2001). *Development as Freedom*. Oxford University Press.

## **Comparative Politics-III (BL-205 B)**

**Subject Code: BL – 205 B**

**L 4, C 4**

### **COURSE OBJECTIVES**

- To deepen students' knowledge of advanced theories in comparative politics, including structuralism, institutionalism, and rational choice theory.
- To critically examine the methodological approaches used in comparative political analysis.
- To explore and compare different types of political systems, including democracies, authoritarian regimes, and hybrid systems.
- To understand the role of institutions such as legislatures, executives, and judiciaries in shaping political outcomes across different countries.

#### **Unit 1:**

- Introduction to Comparative Politics
- Human Nature and the Ends of Political Life.
- Approaches of the study of Comparative politics.
- Comparative Government and politics

#### **Unit 2:**

- Political Culture and political Socialization.
- Constitution and Constitutionalism.
- Development: Underdevelopment and dependency.
- Political Development, Democracy and Political Decay.

#### **Unit 3:**

- Organization of Government: Institution and Procedures.
- Rule Making Structure- The Legislature
- Rule Application Structure – The Executive
- Rule Adjudication Structure- The Judiciary.

#### **Unit 4:**

- Theory of Separation of Powers and Checks and Balances
- N.G.O. Civil Society Campaigns and role of Mass Media

#### **Unit 5:**

- Importance of the study Informal Institution in Comparative Politics.
- Electoral System and Voting Behavior.

### **Suggested Readings:**

- Bruce J. Dickson, *The Dictator's Dilemma: The Chinese Communist Party's Strategy for Survival* (New York: Oxford University Press, 2016).
- Robert Guest, *Borderless Economics: Chinese Sea Turtles, Indian Fridges and the New Fruits of Global Capitalism* (New York: St. Martin's Griffith, 2013).
- Steven Levitsky and Daniel Ziblatt, *How Democracies Die* (New York: Crown, 2019)
- Dambisa Moyo, *Dead Aid: Why Aid Is Not Working and How There Is a Better Way for Africa* (Farrar, Straus and Giroux, 1st reprint ed., 2010).

## **POLITICAL THEORIES -III (BL-205 C)**

**Subject Code: BL – 205 C**

**L 4, C 4**

### **COURSE OBJECTIVES**

- To explore the evolution of political thought in the modern and contemporary periods.
- To analyse key political ideologies, including liberalism, socialism, feminism, post-colonialism, and critical theory.
- To develop an understanding of how contemporary political theories, engage with questions of justice, rights, power, and equality in the context of the modern state and society.

#### **Unit 1: Classical Liberalism and Its Critics**

- **John Stuart Mill:** Liberty, individual rights, and utilitarianism
- Readings: On Liberty, Utilitarianism
- **T.H. Green:** Positive freedom and the welfare state
- **Critiques of Classical Liberalism:** From Marx, conservatism, and communitarianism

#### **Unit 2: Marxist and Neo-Marxist Theories**

- Karl Marx: Alienation, class struggle, historical materialism
- Readings: The Communist Manifesto, Das Kapital (selected sections)
- Antonio Gramsci: Hegemony, civil society, and the role of intellectuals
- The Frankfurt School: Critical theory, culture industry, and ideological domination (Adorno, Horkheimer, Marcuse)

#### **Unit 3: Socialism and Communism**

- Vladimir Lenin: Imperialism, the state, and revolution
- Leon Trotsky: Permanent revolution and critiques of Stalinism
- Rosa Luxemburg: Democracy and revolution, critique of reformism
- Contemporary Socialism: Democratic socialism, syndicalism, and revisionism

#### **Unit 4: Anarchism and Libertarianism**

- Pierre-Joseph Proudhon: Mutualism and property
- Mikhail Bakunin: Revolutionary anarchism, critique of Marxism
- Libertarianism: The minimal state, individual freedom, and free markets (Nozick's Anarchy, State, and Utopia)

## **Unit 5: Feminist Political Theory**

- Mary Wollstonecraft: The early feminist critique of inequality
  - Readings: A Vindication of the Rights of Woman
- Simone de Beauvoir: Existential feminism and the "othering" of women
  - Readings: The Second Sex
- Contemporary Feminism: Liberal, radical, and socialist feminism

### **Suggested Readings:**

1. John Rawls, A Theory of Justice
2. Karl Marx, The Communist Manifesto
3. Simone de Beauvoir, The Second Sex
4. Michel Foucault, Discipline and Punish
5. Edward Said, Orientalism
6. Frantz Fanon, The Wretched of the Earth
7. Robert Nozick, Anarchy, State, and Utopia
8. Gayatri Spivak, Can the Subaltern Speak?

## HISTORY-III

Sub. Code: BL 207

L 4, C4

### Course Objectives

- Understand the origins of British imperialism: Study the early stages of British expansion, including the Age of Discovery, the establishment of early colonies, and the economic, political, and military motivations behind imperial ventures.
- Analyze the development of the British Empire: Examine how Britain built its empire through the colonization of the Americas, Africa, India, and the Pacific, and the impact of trade routes, naval power, and colonial administration.
- Investigate the role of British explorers and merchants: Study the contributions of key figures like Francis Drake, Robert Clive, and Cecil Rhodes, and their roles in expanding British influence globally.

### Unit 1

- 1:- Advent of European in India.
- 2:- Governor General of Bengal.
- 3:- William Bentinck and his Policies.
- 4:- Dalhousie and his Policies.

### Unit 2

- 1:- Regulating Act 1773,
- 2:- Act of Settlement 1781,
- 3:- Pits India Act 1784,
- 4:- High Court Act 1861.

### Unit 3

- 1:- Revolt of 1857: Causes, Nature and Programme.
- 2:- Leadership, People Participation.
- 3:- British Repression and Response.
- 4:- Failure and Impact of the Revolt of 1857.

### Unit 4

- 1:- The Act of 1858,
- 2:- The Act of 1892,
- 3:- The Act of 1994,
- 4:- The Act of 1935.

### Unit 5

- 1:- Emergence of Organized Nationalism: Formation of Indian National Congress.
- 2:- Gandhian Movement: Nature, Programme, Social Composition.
- 3:- Pre-Partition Politics: Simon Commission.

### **Suggested Reading:**

- **"A History of India"** by Romila Thapar
- A comprehensive account of ancient and medieval Indian history, exploring cultural, political, and social aspects.
- **"The Wonder That Was India"** by A.L. Basham
- A classic work on the history, culture, and achievements of ancient India, covering a broad range of topics.
- **"India: A History"** by John Keay
- A concise yet detailed history of India from ancient times to the present, examining key events and figures.
- **"Medieval India: From Sultanat to the Mughals"** by Satish Chandra
- A scholarly work on the political, social, and economic changes in India from the Sultanate period to the Mughal era.
- **"Modern India: 1885-1947"** by Sumit Sarkar
- Focuses on India's modern history, especially the freedom struggle, the role of key figures, and social reforms.
- **"The British in India: A History of the British Empire in India"** by Nicholas B. Dirks
- Explores the British colonial impact on India, examining political, economic, and cultural changes.

## **Sociology-III (BL 207A)**

**Sub. Code: BL 207A**

**L 4, C4**

### **Course Objectives**

- Understand the relationship between law and society.
- Analyze the role of law in social change and justice.
- Examine legal responses to social stratification and inequality.
- Study the sociological aspects of social problems and legal remedies.
- Explore contemporary legal challenges in a globalized society.

### **Unit 1: Introduction to Law and Society**

- Concept and Functions of Law in Society
- Relationship Between Law, Society, and Social Control
- Customary Law and Legal Pluralism
- Sociology of Legal Institutions

### **Unit 2: Law and Social Change**

- Role of Law in Social Change
- Law as an Instrument of Social Transformation
- Resistance to Legal Change
- Case Studies: Social Reforms and Legal Impact

### **Unit 3: Social Stratification and Law**

- Caste, Class, and Gender in Legal Contexts
- Intersectionality and Legal Protection
- Affirmative Action and Reservation Policies
- Human Rights and Social Justice

### **Unit 4: Law and Social Problems**

- Law and Issues of Crime, Violence, and Deviance
- Poverty, Unemployment, and Legal Remedies
- Environmental Degradation and Legal Responses
- Cybercrimes and Modern Legal Challenges

### **Unit 5: Contemporary Issues in Law and Society**

- Globalization and Legal Systems
- Digital Society and Legal Challenges
- Role of NGOs and Civil Society in Legal Advocacy

## **Suggested Readings**

1. Emerging Trends: Artificial Intelligence and Law
2. **"Law and Society in India"** by Upendra Baxi
3. A critical analysis of the interaction between law and society in India.
4. **"On Law and Society"** by Roscoe Pound
5. Explores the relationship between law and societal needs from a jurisprudential perspective.
6. **"Sociology of Law"** by Steven Vago
7. A comprehensive introduction to the sociology of law, covering theory and applications.
8. **"The Spirit of Laws"** by Montesquieu
9. A foundational text discussing how societal factors influence laws and governance.
10. **"Law and Social Change in India"** by Agnes Flavia
11. Examines the impact of law on societal transformations, particularly in gender justice.
12. **"Social Stratification"** by Dipankar Gupta
13. Explores caste, class, and social hierarchies in India and their interaction with the legal system.

# Understanding Contemporary Social Issues-III

Sub. Code: BL 207B

L 4,C 4

## Course Objectives

- Analyse key contemporary social issues.
- Understand the impact of globalization and technology.
- Examine environmental and gender-related challenges.
- Explore legal frameworks for social justice.
- Develop critical thinking on emerging societal problems.

## Unit 1: Introduction to Contemporary Social Issues

- Concept of Social Issues: Definition and Characteristics
- Framework for Understanding Social Problems
- Role of Law in Addressing Social Issues

## Unit 2: Globalization and Its Impact

- Economic and Cultural Globalization
- Impact on Marginalized Communities
- Legal and Policy Responses to Globalization

## Unit 3: Environment and Sustainability

- Climate Change and Environmental Degradation
- Legal Framework for Environmental Protection
- Sustainable Development Goals (SDGs) and Social Justice

## Unit 4: Gender and Society

- Gender Inequality and Violence
- LGBTQIA+ Rights and Legal Recognition
- Role of Law in Promoting Gender Justice

## Unit 5: Technology and Society

- Digital Divide and Social Exclusion
- Cybercrime and Data Privacy Issues
- Legal Challenges in Regulating Technology

## Unit 6: Emerging Social Issues

- Urbanization and Housing Crisis
- Mental Health and Legal Frameworks
- Drug Abuse and
- Decriminalization Policies

## **Suggested Readings**

1. **"Globalization and Its Discontents"** by Joseph E. Stiglitz
2. Explores the impacts of globalization on societies and economies.
3. **"The Gendered Society"** by Michael Kimmel
4. Analyzes gender dynamics and their impact on contemporary social issues.
5. **"Development as Freedom"** by Amartya Sen
6. Examines the relationship between freedom, social issues, and development.
7. **"Silent Spring"** by Rachel Carson
8. A landmark work on environmental issues and their social impact.
9. **"The Net Delusion: The Dark Side of Internet Freedom"** by Evgeny Morozov
10. Discusses the societal challenges posed by technology and digitalization.

# **Social Institutions In India-III**

**Sub. Code: BL 207C**

**L 4, C 4**

## **Course Objectives**

- Understand key social institutions in India.
- Analyze family, caste, and class structures.
- Explore the role of religion and politics in society.
- Study the impact of education on social change.
- Examine legal frameworks shaping social institutions.

## **Unit 1: Introduction to Social Institutions**

- Definition, Nature, and Functions of Social Institutions
- Role of Social Institutions in Indian Society
- Interrelation between Law and Social Institutions

## **Unit 2: Family and Kinship**

- Types of Families in India: Joint and Nuclear
- Changing Dynamics of Family Structures
- Laws Related to Marriage, Divorce, and Succession

## **Unit 3: Caste and Class**

- Caste System in India: Historical and Contemporary Perspectives
- Class Structure and Social Mobility
- Legal Measures against Caste Discrimination

## **Unit 4: Religion and Society**

- Role of Religion in Indian Society
- Secularism and Religious Pluralism in India
- Legal Framework Governing Religious Practices

## **Unit 5: Political and Economic Institutions**

- Panchayati Raj and Local Governance
- Role of Political Parties and Electoral Processes
- Economic Institutions and Their Social Impact

## **Unit 6: Education as a Social Institution**

- Education and Social Change in India
- Right to Education and Related Policies
- Challenges in the Indian Education System

## **Suggested Readings**

1. **"Indian Society: Themes and Social Issues"** by Nadeem Hasnain
2. A comprehensive overview of social institutions and issues in India.
3. **"Caste in Modern India and Other Essays"** by M.N. Srinivas
4. Explores the caste system and its relevance in contemporary India.
5. **"Family and Kinship in India"** by Patricia Uberoi
6. Analyzes family and kinship structures in Indian society.
7. **"Religion and Society among the Coorgs of South India"** by M.N. Srinivas
8. Examines the interplay of religion and social institutions in India.
9. **"Social Background of Indian Nationalism"** by A.R. Desai
10. Discusses the role of social institutions in shaping Indian nationalism.
11. **"Education and Social Change in India"** by Satya Bhushan Verma
12. Studies the transformative role of education in Indian society.

# Microeconomics-I

Sub. Code: BL 209

L 4, C 4

## Course Objectives

- The Microeconomics course is designed to provide students with a deep understanding of the decision-making processes of individuals, firms, and markets, and how these decisions shape resource allocation, pricing, and the distribution of goods and services.
- By exploring the concepts of supply and demand, market structures, consumer and producer behaviour, market failures, and government intervention.
- students are equipped with the analytical tools necessary to understand and address a wide range of economic issues.
- This course lays a strong foundation for further studies in economics and prepares students for careers in areas such as business, finance, policy analysis, and economic research.

## Unit I: Introduction to Microeconomics

Definition & Scope, Production Possibility Curve, Demand, Quantity Demanded, Law of Demand, Supply, Quantity Supplied, Law of Supply, Shape & Characteristics of Demand & Supply Curve,

## Unit II: Consumer Theory I

Consumer Budget Constraint, Elasticity of Demand – its types, Types of Goods (Substitutes, Compliments etc.) & their elasticity.

## Unit III: Consumer Theory II

Concept of Utility (TU, MU), Law of Diminishing Marginal Utility (LDMU), Deriving law of demand using LDMU.

## Unit IV: Consumer Theory III

Indifference Curves (IC) (Properties, Types), Consumer Equilibrium using IC – Price & Substitution Effect.

## Unit V: Market Dynamics

### Suggested Readings:

1. Jhinga M.L., Microeconomics Theory, Vrinda Publishing House.
2. Samuelson & Nordhaus, Economics, Tata Mc Graw Hill.
3. Hal.R. Varian, Intermediate Microeconomics, W.W. Norton & Company.
4. Koutsoyiannis A., Modern Microeconomics, Mac Millan Press.

## **Economic Sociology-I (BL 209A)**

**Sub. Code: BL 209A**

**L 4, C 4**

### **Course Objectives:**

- To introduce students to the field of economic sociology and its key concepts.
- To understand how social structures, relationships, and institutions shape economic behaviour and decision-making.
- To explore the role of culture, power, and inequality in economic processes.
- To critically assess economic systems, institutions, and their social implications.
- To examine contemporary economic issues such as globalization, informal economies, and economic inequality from a sociological perspective.

### **Unit 1: Introduction to Economic Sociology**

#### **1. Definition and Scope of Economic Sociology:**

- What is economic sociology? Its historical development and evolution as a field of study.
- Economic sociology vs. economics: Key differences and interdisciplinary nature.
- The role of sociology in understanding economic processes and social structures.

#### **2. Basic Concepts in Economic Sociology:**

- Social structure, social relations, and economic behaviour.
- Markets, institutions, organizations, and networks in economic processes.
- The concept of embeddedness: Economic action as embedded in social networks and institutions.

#### **3. Key Theoretical Approaches:**

- Classical approaches: Max Weber's theory of economic action, Karl Marx's views on capitalism and class.
- Contemporary approaches: Rational choice theory, social network theory, and institutional theory.

### **Unit 2: Social Structure and Economic Behaviour**

#### **1. Social Class and Economic Behavior:**

- Theories of social class: Marxist, Weberian, and functionalist perspectives.
- The relationship between social class and economic behavior: Consumption patterns, labor markets, and mobility.
- The role of class in shaping access to resources, opportunities, and decision-making.

## **2. Social Networks and Economic Action:**

- Social networks as a form of capital: Networks and economic outcomes.
- Embeddedness of economic action in social relationships (Granovetter's theory of embeddedness).
- The role of trust and reciprocity in economic transactions.

## **3. Economic Organizations and Institutions:**

- The structure of economic organizations: Firms, markets, and bureaucracies.
- The role of institutions in shaping economic behavior: Legal systems, property rights, and labor laws.
- Institutional theories of the economy: Institutional isomorphism and path dependency.

### **Unit 3: Markets and Economic Systems**

#### **1. Markets and Social Order:**

- The sociology of markets: How markets emerge, function, and shape economic behavior.
- Market structures: Competitive, oligopolistic, and monopolistic markets.
- The role of social order in market behavior: Norms, regulations, and informal market practices.

#### **2. Market and State:**

- The role of the state in market regulation and intervention.
- Market failures and the state's role in correcting them: Public goods, externalities, and monopolies.
- The debate between market liberalization and state intervention: Neoliberalism vs. state-led development.

#### **3. Globalization and Market Dynamics:**

- Globalization and its impact on local and global markets.
- The social dimensions of global markets: Transnational corporations, global labor markets, and economic inequality.
- The role of culture and identity in shaping global markets.

### **Unit 4: Economic Inequality and Power**

#### **1. Economic Inequality:**

- Theories of economic inequality: Marxist, functionalist, and neo-liberal perspectives.
- The impact of economic inequality on social structures: Class, gender, and race.
- Measuring economic inequality: Income inequality, wealth inequality, and social mobility.

#### **2. Power and Economic Systems:**

- The concept of power in economic sociology: Economic elites, political power, and decision-making.
- Theories of power: Weberian and Marxist views on economic power.
- Corporate power, labor relations, and the state's role in mediating power relations.

### **3. Gender, Race, and Class in Economic Inequality:**

- Intersectionality and economic inequality: How gender, race, and class interact in shaping economic outcomes.
- Discrimination in the labor market: Gender pay gaps, racial discrimination, and the role of social networks.
- The impact of economic policies on marginalized groups.

## **Unit 5: Informal Economies and Globalization**

### **1. Informal Economies:**

- Defining informal economies: Unorganized labor, self-employment, and small enterprises.
- The role of the informal economy in developing countries: Informality as a survival strategy.
- Social networks and the informal economy: How informal work is organized and sustained.

### **2. Globalization and the Informal Economy:**

- Globalization's impact on informal labor markets: Global supply chains, migrant labor, and economic precarity.
- The rise of gig economies and platform-based labor.
- Informality in the context of global capitalism and neoliberal policies.

### **3. Global Capitalism and Its Sociological Impacts:**

- Theories of globalization in economic sociology: The rise of transnational capitalism and its social consequences.
- Cultural dimensions of globalization: The spread of consumerism, media, and global identities.
- The social impact of economic crises: Case studies on financial crises, austerity, and economic inequalities.

## **Unit 6: Sociology of Development and Economic Change**

### **1. Development and Economic Sociology:**

- Theories of economic development: Modernization theory, dependency theory, and world-systems theory.
- The role of social relations and institutions in shaping economic development.
- Social capital and its contribution to development: Trust, networks, and community.

### **2. Economic Change and Social Transformation:**

- The relationship between economic change and social transformation: Industrialization, urbanization, and globalization.
- The role of technology and innovation in economic change: Technological revolutions and their social implications.
- Development and sustainability: Social and environmental dimensions of economic change.

### **Suggested Books:**

- Sen, A. (1999). *Development as Freedom*. Oxford University Press.
- Sachs, J. D. (2005). *The End of Poverty: Economic Possibilities for Our Time*. Penguin Books.
- Giddens, A. (2009). *Sociology*. Polity Press.
- Granovetter, M. (1985). *Economic Action and Social Structure: The Problem of Embeddedness*. *American Journal of Sociology*.
- Smelser, N. J., & Swedberg, R. (2005). *The Handbook of Economic Sociology*. Princeton University Press.
- Bourdieu, P. (2005). *The Social Structures of the Economy*. Polity Press
- Castells, M. (1996). *The Rise of the Network Society*. Blackwell Publishers.
- Portes, A., Castells, M., & Benton, L. A. (1989). *The Informal Economy: Studies in Advanced and Less Developed Countries*. Johns Hopkins University Press.
- Harvey, D. (2005). *A Brief History of Neoliberalism*. Oxford University Press.

## **Economic Geography I (BL-209B)**

**Sub. Code: BL 209B**

**L 4, C 4**

### **Course Objectives**

- This course examines the spatial organization of economic activities and the relationships between geography, economics, and human behavior.
- It explores topics such as globalization, regional development, and the impact of location on economic practices.

### **Unit 1: Introduction to Economic Geography**

- Definition and scope of economic geography
- Key concepts and theories
- The importance of location in economic activities

### **Unit 2: Theoretical Foundations**

- Overview of economic theories (e.g., von Thünen, Weber, Christaller)
- Location theory and its applications
- Regional economic development theories

### **Unit 3: Globalization and Economic Networks**

- The role of globalization in economic geography
- Global supply chains and trade networks
- Impact of technology on economic connectivity

### **Unit 4: Economic Systems and Structures**

- Comparison of different economic systems (capitalism, socialism, mixed economies)

### **Suggested Readings:**

1. "Geography of Economic Activity" by Edward J. Malecki
2. An analysis of how economic activities are distributed across space and the factors influencing these patterns.
3. "Globalization and Its Discontents" by Joseph E. Stiglitz
4. Discusses the economic impacts of globalization, including its geographic implications and consequences.
5. "Regional Development and Planning for the 21st Century: Economic and Spatial Considerations" by Roger R. Stough
6. Focuses on regional economic development theories and planning practices in a global context.
7. "Industrial Clusters and Regional Business Networks in China" by J. Liu and Y. Wang
8. Examines the development of industrial clusters in China

## **Economic History I (BL-209C)**

**Sub. Code: BL-209 C**

**L 4, C 4**

### **Course Objectives**

- This course explores the evolution of economic systems, theories, and practices from ancient times to the present.
- Students will examine major economic events, trends, and transformations, analyzing their impact on societies and global economies.

### **Unit 1: Introduction to Economic History**

- Defining economic history
- Methodologies and sources in economic history
- The significance of economic history in understanding the present

### **Unit 2: Pre-Industrial Economies**

- Economic systems in ancient civilizations (Mesopotamia, Egypt, Greece, Rome)
- Trade and barter systems
- The role of agriculture in early economies

### **Unit 3: The Middle Ages and Feudalism**

- The feudal system and its economic implications
- The rise of trade and markets in medieval Europe
- The role of guilds and commerce

### **Unit 4: The Commercial Revolution**

- Factors leading to the Commercial Revolution (11th-18th centuries)

### **Suggested Readings:**

1. "The Wealth of Nations" by Adam Smith
2. A foundational text in economics, exploring the nature of wealth, trade, and the role of markets.
3. "Capital in the Twenty-First Century" by Thomas Piketty
4. Analyzes wealth inequality and the dynamics of capital accumulation from a historical perspective.
5. "The Great Transformation: The Political and Economic Origins of Our Time" by Karl Polanyi
6. Examines the social and economic changes during the Industrial Revolution and the emergence of market economies.
7. "An Economic History of the World Since 1400" by Donald J. Harreld
8. A comprehensive overview of global economic history, highlighting major developments and trends.

# HUMAN RIGHTS LAW

Sub Code: BL 202

L -4, C -4

## Course Objectives

- Define human rights: Understand the fundamental concept of human rights as universal, inalienable rights that every individual possesses by virtue of being human, irrespective of nationality, ethnicity, gender, or religion.
- Explore the historical development of human rights: Study the evolution of human rights from ancient civilizations, through key historical events such as the Magna Carta, the French Revolution, and the abolition of slavery, leading to the modern concept of human rights.
- Differentiate between civil, political, economic, social, and cultural rights: Understand the different categories of human rights and how they contribute to the protection of individual freedoms and dignity.

### Unit-I

Meaning and definition of Human Rights - Evolution of Human Rights - Human Rights and Domestic Jurisdiction

### Unit-II

Adoption of Human Rights by the UN Charter - U.N.Commission on Human Rights - Universal Declaration of Human Rights - International Covenants on Human Rights( Civil and Political; Economic, Social and Cultural).

### Unit-III

Regional Conventions on Human Rights - European Convention on Human Rights - American Convention on Human Rights - African Charter on Human Rights(Banjul).

### Unit-IV

International Conventions on Human Rights - Genocide Convention, Convention against Torture, CEDAW, Child Rights Convention, Convention on Statelessness, Convention against Slavery, Convention on Refugees - International Conference on Human Rights (1968) - World Conference on Human Rights (1993).

**Suggested Readings:**

- 1 P.R. Gandhi (ed): Blackstone's International Human Rights Documents, Universal Law Publishing Co. Delhi.
- 2 Richard B. Lillich and Frank C. Newman: International Human Rights - Problems of Law and Policy, Little Brown and Company, Boston and Toronto.
3. Frederick Quinn: Human Rights and You, OSCE/ ODIHR, Warsaw, Poland
4. T.S. Batra: Human Rights – A Critique, Metropolitan Book Company Pvt. Ltd., New Delhi.
5. Dr.U. Chandra: Human Rights, Allahabad Law Agency Publications, Allahabad.

## Legal History

**Sub Code: BL 204**

**L 4, C 4**

### Course Objectives

- Introduce the concept of legal history: Study the evolution of law as a social institution, with a focus on how different societies have developed legal systems to regulate behavior, resolve disputes, and maintain order.
- Examine the origins of law: Investigate the earliest forms of law, including customary law, religious law, and tribal codes in ancient societies.
- Understand the concept of justice: Analyze how different cultures have defined and approached justice, and how those definitions influenced the structure and function of legal systems.
- Explore how religious beliefs shaped the legal systems in various cultures, including Jewish law, Islamic law (Sharia), and Canon law (the law of the Catholic Church).

### Unit I: Early Developments (1600- 1836)

- a. Charters of the East India Company: 1600, 1661, 1726 and 1753
- b. Settlements: Surat, Madras, Bombay and Calcutta
- c. Courts: Mayor's Court of 1726 and Supreme Court of 1774
- d. Statutes: Regulating Act, 1773; Pitts India Act, 1784; The Act of Settlement 1781

### Unit II: Early Developments (1600- 1836)

- a. Conflict: Raja Nanad Kumar, Kamaluddin, Patna Case, and Cossijurah
- b. Warren Hastings: Judicial Plans of 1772, 1774 and 1780
- c. Lord Cornwallis: Judicial Plans of 1787, 1790 and 1793
- d. Lord William Bentinck (With special focus on Appraisal of Criminal law)

### Unit III: Evolution of Law and Legal Institutions

- a. Development of Personal Laws
- b. Development of Law in Presidency Towns
- c. Development of Civil law in Mufassil: Special Emphasis on Justice, Equity and Good Conscience
- d. Codification of Laws: Charter of 1833, The First Law Commission, the Charter of 1853,

### Unit IV:

- a. The Second Law Commission
- b. Establishment of High Courts, 1861
- c. Privy Council and Federal Court: Appeals and working of Privy Council
- d. Privy Council, Features of Federal Court
- e. Evaluation: Special Reference to Racial Discrimination, Merit and Demerits

### Suggested Readings:

1. M.P. Jain – Outlines of Indian Legal History
2. V.D. Kulshrethta – Landmarks of Indian Legal and Constitutional History

## LAW OF EVIDENCE

Sub. Code: BL 206

L – 4, C – 4.

### Course Objectives

- Understand the burden of proof: Study the concept of the burden of proof, which dictates which party is responsible for proving the facts of a case. Understand the difference between the prosecution's burden in criminal cases and the plaintiff's burden in civil cases.
- Examine the standard of proof: Learn about the standard of proof required in different types of cases, including the higher standard of beyond a reasonable doubt in criminal cases and the lower standard of preponderance of the evidence in civil cases.
- Study presumptions in evidence law: Explore legal presumptions (e.g., presumption of innocence in criminal law) and their role in shifting the burden of proof to the opposing party.
- Study the Admissibility and Use of Expert Evidence

### Unit-I:

The Indian Evidence Act, 1872 — Salient features of the Act – Meaning and kinds of Evidence — Interpretation clause — May Presume, shall presume and Conclusive proof - Fact, Fact in issue and Relevant facts — Distinction between Relevancy and Admissibility - Doctrine of Res Gestae — Motive, preparation and conduct — Conspiracy — When Facts not otherwise relevant become relevant — Right and custom — Facts showing the state of mind etc.

### Unit-II:

Admissions & Confessions: General Principles concerning Admissions — Differences between "Admission" and "Confession" — Confessions obtained by inducement, threat or promise – Confessions made to police officer - Statement made in the custody of a police officer leading to the discovery of incriminating material — Admissibility of Confessions made by one accused person against co-accused.

Dying Declarations and their evidentiary value — Other Statements by persons who cannot be called as Witnesses — Admissibility of evidence of witnesses in previous judicial proceedings in subsequent judicial proceedings.

### Unit-III:

Relevancy of Judgments — Opinion of witnesses — Expert's opinion — Opinion on Relationship especially proof of marriage — Facts which need not be proved — Oral and Documentary Evidence - General Principles concerning oral evidence and documentary evidence — Primary and Secondary evidence — Modes of proof of execution of documents — Presumptions as to documents — General Principles regarding Exclusion of Oral by Documentary Evidence.

### Unit-IV:

Rules relating to Burden of Proof - Presumption as to Dowry Death — Estoppel — Kinds of estoppel — Res Judicata, Waiver and Presumption.

**Suggested Readings:**

1. BatukLal: The Law of Evidence, 13th Edition, Central Law Agency, Allahabad, 1998.
2. M. Munir: Principles and Digest of the Law of Evidence, 10th Edition (in 2 vols), Universal Book Agency, Allahabad, 1994.
3. Vepa P. Saradhi: Law of Evidence 4th Edn. Eastern Book Co., Lucknow, 1989.
4. Avtar Singh: Principles of the Law of Evidence, 11th Edn. Central Law Publications.
5. V. Krishnama Chary: The Law of Evidence, 4th Edn. S.Gogia& Company, Hyderabad.

## LAW OF CRIMES

**Sub. Code: BL 208**

**L – 4, C – 4.**

- I. Understand the elements of a crime: Learn about the essential elements required to establish a crime under the IPC, including actus reus (guilty act) and mens rea (guilty mind).
- II. Examine criminal responsibility: Study the concept of criminal capacity and the factors that may affect liability, such as age, insanity, intoxication, duress, and consent.
- III. Explore the classifications of crimes: Understand the different classifications of crimes under the IPC, including cognizable offenses, non-cognizable offenses, bailable offenses, non-bailable offenses, and compoundable offenses.
- IV. Examine offenses against the state: Study crimes related to national security and sovereignty, such as treason, sedition, and terrorism (Sections 121 to 130 of IPC).

### **Unit-I:**

Concept of crime - Definition and meaning of crime - Distinction between crime and tort - Stages of crime - Intention, Preparation, Attempt and Commission of Crime - Elements of Crime - Actus Reus and Mensrea - Codification of Law of Crimes in India - Application of the Indian Penal Code - Territorial and Extra Territorial application - General Explanations - Punishments.

### **Unit-II:**

General exceptions - Abetment - Criminal Conspiracy - Offences against the State - Offences against public peace and Tranquility.

### **Unit-III:**

Offences affecting human body (offences affecting human life) Culpable Homicide and Murder – Hurt and Grievous Hurt - Wrongful restraint and Wrongful confinement - Criminal force and Assault - Kidnapping and abduction - Sexual offences - Unnatural offences.

### **Unit-IV:**

Offences affecting the public health, safety, convenience, decency and morals - Offences against Property - Theft - Extortion - Robbery & Dacoity - Cheating - Mischief - Criminal Trespass – Criminal misappropriation and Criminal breach of trust.

### **Suggested Readings:**

1. RatanLal and DhirajLal: Indian Penal Code, Wadhwa& Co., 2000.
2. Achutan Pillai: Criminal Law, Butterworth Co., 2000.
3. Gour K.D.: Criminal Law - Cases and Materials, Butterworth Co., 1999.
4. Kenny's: Outlines of Criminal Law, (1998 Edition)

\*\*\*\*

## MICRO ECONOMICS II

Sub. Code: BL – 210

L-4, C-4

### Course Objectives

- Examine advanced consumer behaviour: Build on the theory of consumer preferences and indifference curves. Study revealed preference theory and how it differs from traditional utility theory.
- Explore consumer choice under uncertainty: analyse how consumers make choices under conditions of risk and uncertainty using concepts like expected utility theory, risk aversion, and portfolio theory.
- Understand intertemporal choice: Study how consumers make decisions over time, particularly with regard to savings and consumption, and the concepts of present value and discount rates.
- Review advanced production theory: Study production functions in detail, including the law of variable proportions, returns to scale, and isoquants.

### Unit-I: Production Theory

Production Function, Production (TP) curve, Laws of variable proportions, Returns to Factor (Average and Marginal Product) and Scale (IRS, CRS, and DRS) & relationship between them.

### Unit-II: Revenue & Cost theory

General theories and types of Cost (FC, VC), Cost concepts & Curves (TC, AC, MC) & relationship between them, SR & LR Cost theory (SAC, SMC, LAC, LMC etc.), Revenue – Types, Curves & Characteristics (TR, MR, AR etc.) Profit Maximization & Cost Minimization.

### Unit-III: Markets

Types & Characteristics [PC, Monopoly (inclusive of price discrimination), Oligopoly, Monopolistic Competition], Market Equilibrium (SR & LR) of firm & Industry under PC, Monopoly, Characteristics of Collusive oligopoly – cartelization.

### Unit-IV: Market Dynamics

Effect of Shift in Market Demand & Supply & Shift in Firms Production & Cost Curves on market/firm equilibrium.

### Suggested Readings:

1. Jhingan M.L., Microeconomics Theory, Vrinda Pub.
2. Samuelson & Nordhaus, Economics, Tata Mc Graw Hill.
3. Hal.R. Varian, Intermediate Microeconomics, W.W. Norton & Company.
4. Koutsoyiannis A., Modern Microeconomics, Mac Millan Press.

## **Economic Sociology II (BL-210A)**

**Sub. Code: BL – 210A**

**L-4, C-4**

### **Course Objectives:**

- To explore the social aspects of economic life, including the relationship between economic behavior and social structures.
- To understand how social, political, and cultural factors influence economic processes and institutions.
- To analyze the evolution of economic systems in different societies, focusing on the role of economic sociology in contemporary global economies.
- To examine key theories, concepts, and empirical studies in economic sociology, including the study of capitalism, labor markets, and economic inequality.

### **Unit I: Theories of Economic Sociology**

- Classical Theories: Max Weber, Karl Marx, and Émile Durkheim's Contributions
- Neo-Classical and Institutional Economic Sociology
- Social Embeddedness of Economic Action: Granovetter's Theory
- Social Capital and Economic Development: Pierre Bourdieu and Robert Putnam
- The Role of Trust and Social Networks in Economic Transactions

### **Unit II: The Sociology of Markets and Consumption**

- Markets as Social Institutions: Social Structure of Markets and Market Behavior
- Cultural Dimensions of Consumption: Consumption Patterns and Identity
- Social Networks and Consumer Behavior
- The Role of Advertising, Media, and Branding in Shaping Consumption
- Globalization and its Impact on Local Markets and Consumption

### **Unit III: Labor Markets and Employment**

- Labor as a Social Institution: The Division of Labor and Labor Markets
- Labor Mobility, Migration, and Globalization of Labor
- The Informal Economy: Characteristics and Importance
- Social Stratification and Inequality in Labor Markets: Gender, Class, and Ethnicity
- Employment Relations: Work, Power, and Conflict in the Workplace

### **Unit IV: Capitalism, Socialism, and Development**

- Capitalism: Social, Political, and Economic Dimensions
- Theories of Capitalism: From Max Weber to Contemporary Capitalism
- Socialism and Planned Economies: The Role of State and Central Planning
- Development and Underdevelopment: Theories and Critiques
- Global Economic Inequality: North-South Divide and the Impact of Globalization

- The Role of the State in Economic Development: Welfare State and Neoliberalism
- Financial Crises and Economic Sociology: The 2008 Global Financial Crisis
- Environmental Sociology and Sustainable Development
- Economic Sociology and the Informal Economy: Migrant Labor and Informal Markets
- Digital Economy and the Impact of Technology on Economic Relations

### **Suggested Books:**

1. "Economic Sociology: An Introduction" by Frank Dobbin
2. "The Social Economy: Market Society and the State" by Roger A. Friedland and Robert R. Alford
3. "The Sociology of Economic Life" by Mark Granovetter and Richard Swedberg
4. "Theories of Economic Sociology" by Neil J. Smelser and Richard Swedberg
5. "Capitalism and Modern Social Theory" by Anthony Giddens

## **Economic Geography II (BL-210B)**

**Sub. Code: BL – 210B**

**L-4, C-4**

### **Course Objectives**

- This course examines the spatial organization of economic activities the relationships between geography, economics, and human behavior.
- It explores topics such as globalization, regional development,
- The impact of location on economic practices.

### **Unit 1: Services and the Knowledge Economy**

- The growth of the service sector in the economy
- Geographic concentrations of knowledge-based industries
- The impact of technology on service delivery and innovation

### **Unit 2: Economic Geography of Trade**

- Patterns and theories of international trade
- Trade agreements and their geographic implications
- The role of logistics and transportation in trade

### **UNIT 3: Environmental Impact of Economic Activities**

- The relationship between economic development and environmental change
- Case studies on pollution, climate change, and resource depletion
- Strategies for sustainable economic practices

### **UNIT 4: Future Trends in Economic Geography**

- The impact of digital economies and e-commerce

### **Suggested Readings:**

1. "Geography of Economic Activity" by Edward J. Malecki
2. An analysis of how economic activities are distributed across space and the factors influencing these patterns.
3. "Globalization and Its Discontents" by Joseph E. Stiglitz
4. Discusses the economic impacts of globalization, including its geographic implications and consequences.
5. "Regional Development and Planning for the 21st Century: Economic and Spatial Considerations" by Roger R. Stough
6. Focuses on regional economic development theories and planning practices in a global context.
7. "Industrial Clusters and Regional Business Networks in China" by J. Liu and Y. Wang
8. Examines the development of industrial clusters in China and their implications for regional economic geography.

## Economic History II (BL-210C)

**Sub. Code: BL – 210C**

**L-4, C-4**

### **Course Objectives**

- This course explores the evolution of economic systems, theories, and practices from ancient times to the present.
- Students will examine major economic events, trends, and transformations, analyzing their impact on societies and global economies.

### **Unit 1: The Great Depression and Economic Policy**

- Causes and consequences of the Great Depression
- Responses from governments (e.g., New Deal, welfare state)
- The evolution of economic thought post-Depression

### **Unit 2: Post-War Economic Developments**

- Economic recovery and the Bretton Woods system
- The rise of welfare states in Europe
- Economic growth in emerging markets

### **Unit 3: Economic Crises and Restructuring**

- Analysis of major economic crises (1970s oil crisis, 2008 financial crisis)
- Impact on global economies and policy responses
- Lessons learned and changes in economic governance

### **Unit 4: Contemporary Economic Issues**

- Inequality, poverty, and economic development
- The role of technology and innovation in shaping economies

### **Suggested Readings:**

1. "The Wealth of Nations" by Adam Smith
2. A foundational text in economics, exploring the nature of wealth, trade, and the role of markets.
3. "Capital in the Twenty-First Century" by Thomas Piketty
4. Analyzes wealth inequality and the dynamics of capital accumulation from a historical perspective.
5. "The Great Transformation: The Political and Economic Origins of Our Time" by Karl Polanyi
6. Examines the social and economic changes during the Industrial Revolution and the emergence of market economies.
7. "An Economic History of the World Since 1400" by Donald J. Harreld
8. A comprehensive overview of global economic history, highlighting major developments and trends.

## SPANISH I (BL- 301A)

**Sub. Code: BL – 301A**

**L-4, C-4**

### **Course Objectives**

By the end of this course, students will be able to:

- Understand and use basic Spanish vocabulary and grammar.
- Engage in simple conversations about everyday topics.
- Read and comprehend short texts in Spanish.
- Write basic sentences and paragraphs in Spanish.

### **Unit 1: Introduction to Spanish**

- Overview of the Spanish language and its global significance
- Alphabet and pronunciation
- Basic greetings and introductions

### **Unit 2: Basic Grammar and Vocabulary**

- Nouns, articles, and gender
- Common adjectives and their agreement with nouns
- Essential vocabulary: family, colors, numbers

### **Unit 3: Present Tense Verbs**

- Introduction to regular verbs (AR, ER, IR)
- Conjugation patterns and usage
- Practical exercises and dialogues

### **Unit 4: Common Expressions and Questions**

- Essential phrases for everyday conversation
- Forming questions and negation

### **Suggested Readings:**

1. Madrigal's Magic Key to Spanish" by Margarita Madrigal
2. A classic introductory book that simplifies grammar and vocabulary, making it accessible for beginners.
3. "Practice Makes Perfect: Spanish Verb Tenses" by Dorothy Richmond
4. Focuses on mastering verb tenses with clear explanations and exercises.
5. "Easy Spanish Step-By-Step" by Barbara Bregstein
6. A structured approach to learning Spanish, emphasizing grammar and vocabulary in a logical progression.
7. "Living Language Spanish" (Complete Course)
8. A comprehensive language course that includes audio components and a variety of exercises.

## German- I (BL-301B)

Sub. Code: BL – 301B

L-4, C-4

### Course Objectives:

- To develop proficiency in understanding, speaking, reading, and writing German at an introductory level.
- To build a solid foundation in German grammar and vocabulary.
- To practice listening and speaking skills through interactive exercises, role plays, and dialogues.
- To understand and engage with basic German texts, including short stories, articles, and everyday conversations.
- To appreciate German culture, traditions, and history through authentic materials like songs, films, and cultural readings.

### Unit 1: Introduction to German Language

#### 1. The German Alphabet and Pronunciation:

- The German alphabet: Letters, sounds, and pronunciation rules.
- Pronunciation of common German vowels and consonants (e.g., ä, ö, ü, ß).
- Stress and intonation patterns in German.

#### 2. Basic Greetings and Introductions:

- Introducing oneself: Name, nationality, profession, etc.
- Common greetings: "Hallo," "Guten Morgen," "Wie geht's?"
- Phrases for polite conversation: "Danke," "Bitte," "Entschuldigung."

#### 3. Numbers and Basic Vocabulary:

- Counting in German: Numbers 1-100.
- Days of the week, months, seasons.
- Family members, colors, and simple adjectives.

### Unit 2: Grammar Fundamentals

#### 1. Nouns, Articles, and Gender:

- Understanding German noun genders (masculine, feminine, neuter).
- Definite and indefinite articles: der, die, das, ein, eine.
- Plural forms of nouns.

#### 2. Present Tense of Regular Verbs:

- Conjugation of regular verbs in the present tense (e.g., spielen, arbeiten).
- Common regular verbs and their usage in sentences.
- Sentence structure: Subject-verb-object.

#### 3. Personal Pronouns and Possessive Adjectives:

- Forms of personal pronouns (ich, du, er/sie/es, wir, ihr, sie/Sie).
- Possessive pronouns (mein, dein, sein, ihr, unser).

### **Unit 3: Expanding Vocabulary and Communication**

- 1. Describing People, Places, and Things:**
  - Describing appearance, personality, and characteristics.
  - Vocabulary for everyday objects, places, and locations.
  - Describing where things are (prepositions of place).
- 2. Asking and Answering Questions:**
  - Formulating simple questions: “Wie?”, “Was?”, “Wo?”, “Wann?”
  - Yes/no questions and question words.
  - Asking for directions, time, and information.
- 3. Useful Phrases for Everyday Situations:**
  - At the supermarket, restaurant, or doctor's office.
  - Making requests and giving polite commands.
  - Expressing likes, dislikes, and preferences.

### **Unit 4: German Sentence Structure and Verb Conjugation**

- 1. Present Tense of Irregular Verbs:**
  - Conjugation of common irregular verbs (e.g., sein, haben, gehen, essen).
  - Using irregular verbs in questions and negative sentences.
  - Common sentence patterns: Affirmative, negative, and questions.
- 2. Word Order in Sentences:**
  - Basic word order in German (SVO structure).
  - Word order with time expressions and negation.
  - Position of adverbs and objects in a sentence.
- 3. Modal Verbs:**
  - Introduction to modal verbs: können, wollen, müssen, dürfen, sollen, mögen.
  - Using modal verbs in the present tense to express necessity, permission, and ability.

### **Unit 5: Reading Comprehension and Writing Skills**

- 1. Short Texts and Dialogues:**
  - Reading and understanding short dialogues and texts on familiar topics.
  - Answering comprehension questions based on short readings.
  - Expanding vocabulary through reading.
- 2. Writing Simple Sentences and Paragraphs:**
  - Writing descriptions, letters, and simple emails in German.
  - Correct sentence structure and grammar in written communication.
  - Writing about oneself, hobbies, daily activities, and family.
- 3. Introduction to German Culture Through Texts:**
  - Basic cultural readings: Traditional German foods, holidays, and festivals.
  - Understanding German customs and social etiquette.

## **Unit 6: German Culture and Traditions**

### **1. German Holidays and Traditions:**

- Celebrating Christmas, Easter, and other German traditions.
- Understanding cultural significance: Oktoberfest, Karneval, and more.
- The importance of family and social customs in German-speaking countries.

### **2. Introduction to German Music, Films, and Art:**

- German classical music and famous composers (e.g., Beethoven, Bach).
- German cinema: Key films, directors, and genres.
- The influence of German art and philosophy on world culture.

### **Suggested Books:**

1. *Culture Smart! Germany* by Barry Tomalin
2. *A Concise History of Germany* by Mary Fulbrook
3. *German Short Stories for Beginners* by Olly Richards
4. *Deutsch im Blick* (*University of Texas Online Textbook, Free Resource*)
5. *German Grammar in a Nutshell* by Christine Stiefel (*Langenscheidt*)
6. *Practice Makes Perfect: German Sentence Builder* by Ed Swick
7. *German Grammar for Beginners* by Jenny Russ
8. *Practice Makes Perfect: German Verb Tenses* by Ed Swick

•

## Chinese-I (BL-301C)

Sub. Code: BL – 301C

L-4, C-4

### Course Objectives:

- To develop basic proficiency in the Chinese language in speaking, listening, reading, and writing.
- To learn the fundamental grammar rules and sentence structures in Mandarin Chinese.
- To master basic vocabulary, focusing on daily life topics such as greetings, food, travel, and family.
- To acquire a solid understanding of Chinese characters and their formation.
- To introduce students to the cultural, social, and historical context of China.

### Unit 1: Introduction to Chinese Language

#### 1. Overview of the Chinese Language:

- Introduction to Mandarin Chinese as the official language of China.
- Importance of Chinese dialects: Mandarin vs. Cantonese.
- The role of Chinese in the global context.

#### 2. Chinese Pronunciation: Pinyin System:

- The Pinyin system: Tones, initials, and finals.
- Pronunciation practice with tone marks and common sounds (e.g., “x,” “q,” “zh,” “ch”).
- The importance of tones in Chinese communication.

#### 3. Basic Greetings and Introductions:

- Common greetings: 你好 (nǐ hǎo), 您好 (nín hǎo), 再见 (zài jiàn), 谢谢 (xièxiè).
- Introducing oneself: Name, nationality, and occupation.
- Phrases for everyday conversations: 你好吗? (nǐ hǎo ma?) How are you?

### Unit 2: Chinese Characters and Basic Grammar

#### 1. Introduction to Chinese Characters:

- Structure of Chinese characters: Radicals, strokes, and components.
- Simplified vs. traditional characters.
- Writing practice: Basic characters and their meanings (e.g., 我 (wǒ), 你 (nǐ), 中 (zhōng)).

#### 2. Basic Sentence Structure:

- Word order in Chinese: Subject-Verb-Object (SVO) sentence structure.
- Simple affirmative sentences: 我是学生 (wǒ shì xuéshēng) – I am a student.
- Basic negation: 不 (bù) and 没有 (méiyǒu) for negating verbs.

#### 3. Pronouns and Possessives:

- Personal pronouns: 我 (wǒ), 你 (nǐ), 他 (tā), 她 (tā), 它 (tā).
- Possessive pronouns: 我的 (wǒ de), 你的 (nǐ de), 他的 (tā de).

## Unit 3: Expanding Vocabulary and Communication

### 1. Daily Life Vocabulary:

- Family members: 父亲 (fùqīn), 母亲 (mǔqīn), 哥哥 (gēgē), 妹妹 (mèimei).
- Numbers: 1-100 (一, 二, 三, ..., 一百).
- Days of the week and time expressions: 今天 (jīntiān), 昨天 (zuótiān), 明天 (míngtiān), 星期 (xīngqī).

### 2. Food and Drink:

- Common foods and drinks: 饺子 (jiǎozi), 米饭 (mǐfàn), 茶 (chá), 水 (shuǐ).
- Ordering food: 我想要 (wǒ xiǎng yào) – I would like.
- Phrases for eating out: 请给我菜单 (qǐng gěi wǒ càidān) – Please give me the menu.

### 3. Expressing Preferences and Asking Questions:

- Expressing likes and dislikes: 我喜欢 (wǒ xǐhuān) – I like.
- Asking for clarification: 什么? (shénme?), 怎么样? (zěnmeyàng?).
- Using question words: 什么 (shénme), 哪 (nǎ), 多少 (duōshǎo), 为什么 (wèishéme).

## Unit 4: Chinese Grammar and Verb Conjugation

### 1. Verbs and Verb Usage:

- Conjugating verbs in the present tense.
- Common verbs: 做 (zuò), 看 (kàn), 听 (tīng), 学习 (xuéxí).
- Verbal phrases: 喜欢做 (xǐhuān zuò) – to like doing, 能做 (néng zuò) – can do.

### 2. Questions and Negations:

- Forming yes/no questions using 吗 (ma).
- Negative sentence structure using 不 (bù) for habitual actions and 没 (méi) for past actions.
- Using “了” (le) to indicate a change of state or action completion.

### 3. Time Expressions and Using the Verb "to be":

- Expressing time: 上午 (shàngwǔ), 下午 (xiàwǔ), 点 (diǎn), 分 (fēn).
- Talking about past, present, and future events: 昨天 (zuótiān), 今天 (jīntiān), 明天 (míngtiān).

## **Unit 5: Reading, Writing, and Listening Skills**

### **1. Reading Short Texts and Dialogues:**

- Reading simple dialogues and short stories based on everyday situations.
- Answering comprehension questions based on reading materials.
- Expanding vocabulary through context.

### **2. Writing Simple Sentences and Paragraphs:**

- Writing about daily routines, hobbies, and interests.
- Practicing basic sentence structures: 我每天都去学校 (wǒ měitiān dōu qù xuéxiào) – I go to school every day.
- Introducing personal information in writing.

### **3. Listening Practice:**

- Listening to audio clips and simple conversations.
- Identifying key words and phrases in spoken Mandarin.
- Developing skills for responding to basic listening exercises.

## **Unit 6: Chinese Culture and Social Context**

### **1. Understanding Chinese Culture and Society:**

- Overview of Chinese culture: Family, respect for elders, and social hierarchy.
- Chinese festivals: 春节 (Chūnjié) – Chinese New Year, 中秋节 (Zhōngqiū Jié) – Mid-Autumn Festival.
- Chinese art and calligraphy: Introduction to Chinese painting and traditional arts.

### **2. Social Etiquette and Communication:**

- Proper etiquette for greetings, gifts, and dining.
- The significance of "face" (面子) and politeness in Chinese culture.
- Understanding social hierarchies and addressing people with respect.

## **Suggested Books:**

- *Integrated Chinese: Level 1, Part 1* by Tao-chung Yao, Yuehua Liu (Cheng & Tsui)
- *Chinese Made Easy for Beginners* by Yamin Ma and Xinying Li
- *Chinese for Beginners* by Yi Ren
- *Culture Smart! China* by Kerry Brown
- *Culture Smart! China* by Kerry Brown
- *China: A History* by John Keay
- *Mandarin Chinese: A Functional Reference Grammar* by Charles N. Li and Sandra A. Thompson
- *The Complete Guide to Chinese Grammar* by Philip Yungkin Lee
- *New Practical Chinese Reader: Volume 1* by Liu Xun (Beijing Language and Culture University Press)

## FRENCH I (BL-301D)

Sub. Code: BL – 301D

L-4, C-4

### Course Objectives

- Understand and use basic French vocabulary and grammar.
- Engage in simple conversations about everyday topics.
- Read and comprehend short texts in French.
- Write basic sentences and paragraphs in French.

### Unit 1: Introduction to French

- Alphabet and pronunciation
- Basic greetings and introductions

### Unit 2: Numbers and Colors

- Counting (1-100)
- Basic colors and their use in sentences

### Unit 3: Days, Months, and Time

- Days of the week and months of the year
- Telling time

### Unit 4: Family and Descriptions

- Vocabulary related to family and relationships

### Suggested Readings:

1. Easy French Step-By-Step" by Myrna Bell Rochester
2. A clear, gradual approach to learning French grammar and vocabulary.
3. "French for Dummies" by Dodi-Katrin Schmidt and Michelle M. Williams
4. Practice Makes Perfect: Complete French Grammar" by Annie Heminway
5. Comprehensive grammar explanations with exercises for practice.
6. "Fluent in French: The Most Complete Study Guide to Learn French" by Frederic Bibard
7. Covers vocabulary, grammar, and cultural insights

## **FAMILY LAW–I (Hindu Law)**

**Sub. Code: BL 303**

**L – 4, C – 4.**

### **Course Objectives**

- Study modern reforms in Hindu law: Understand the role of various reforms, such as the Hindu Marriage Act, 1955, Hindu Adoption and Maintenance Act, 1956, Hindu Succession Act, 1956, and how they have contributed to the modernization of Hindu law.
- Evaluate the role of the Hindu Code Bill: Examine the significance of the Hindu Code Bill in bringing about reforms in marriage, inheritance, and succession, and its impact on the status of Hindu women.
- Assess the challenges and future reforms: Discuss current issues in Hindu law, such as the need for uniform civil code, the treatment of inter-caste marriages, and
- the integration of Hindu law with the principles of gender equality.

### **Unit-I:**

Sources of Hindu Law – Scope and application of Hindu Law – Schools of Hindu Law - Mitakshara and Dayabhaga Schools – Concept of Joint Family, Coparcenary, Joint Family Property and Coparcenary Property – Institution of Karta- Powers and Functions of Karta - Pious Obligation - Partition – Debts and alienation of property.

### **Unit-II:**

Marriage - Definition - Importance of institution of marriage under Hindu Law – Conditions of Hindu Marriage – Ceremonies and Registration – Monogamy – Polygamy.

### **Unit-III:**

**Matrimonial Remedies** under the Hindu Marriage Act, 1955 - Restitution of Conjugal Rights – Nullity of marriage – Judicial separation – Divorce – Maintenance pendente lite – importance of conciliation.

### **Unit-IV:**

Concept of Adoption - Law of Maintenance - Law of Guardianship - Hindu Adoption and Maintenance Act, 1956 – Hindu Minority and Guardianship Act 1956.

### **Suggested Readings:**

1. Paras Diwan : Modern Hindu Law, 13th Edition 2000, Allahabad Agency, Delhi.
2. Paras Diwan: Family Law, 1994 Edition, Allahabad Agency, Delhi.
3. Mayne: Hindu Law - Customs and Usages , Bharat Law House, New Delhi.
4. Sharaf: Law of Marriage and Divorce , 1999.

# CIVIL PROCEDURE CODE AND LAW OF LIMITATION

**Sub. Code: BL 305**

**L -4, C -4**

## **Course objective**

- Understand the nature of civil litigation: Introduce students to the basic concepts of civil law and civil procedure, explaining the difference between civil and criminal procedures.
- Study the objectives of the CPC: Examine the aims of the CPC, which include ensuring justice through fair trial procedures, speedy disposal of cases, and effective enforcement of judgments.

## MACRO ECONOMICS I

Sub. Code: BL – 309

L-4, C-4

### Course Objectives

- Understanding the scope and nature of macroeconomics: Introduce students to the basic concepts and framework of macroeconomics, including the distinction between microeconomics (study of individual markets and agents) and macroeconomics (study of aggregate economic variables).
- Focus on national economy aggregates: Explain the study of aggregate variables such as GDP (Gross Domestic Product), national income, and the factors that influence them at the national level.
- Understanding the importance of macroeconomic analysis: Discuss the significance of macroeconomic policies in shaping national economic performance, maintaining economic stability, and promoting economic growth.
- Understanding how national income is measured: Introduce students to the methods of calculating national income, such as the income method, expenditure method, and output method.

### Unit-I: Introduction

Difference between Micro & Macroeconomics, Introduction to basic Theories in Macroeconomics – **Classical, Keynesian & Post Keynesian.**

### Unit-II: National Income Accounting

Circular flow of Income Model – Two & Three sector models (Closed only) National & Domestic Product – different types & their significance, **National Income – meaning, significance.**

**Unit-III: Money & Interest** Types & Functions of money, Classification of Money, Demand for & Supply of Money (inclusive of Money Multiplier) Theories of Money – Cambridge & Fisher Theory Inflation & Deflation – Types, **Reasons & their Effects, Monetary Policy & its Tools.**

### Unit-IV: Short Run Analysis

Characteristics of Short Run, Simple Keynesian Model / Theory – Consumption Function, **Investment Function, multipliers.**

**Suggested Readings**

1. Dwivedi D.N. ,Macroeconomic Theory &Policy,Tata Mac Graw Hill
2. Samuelson & Nordhaus ,Economics,Tata Mac Graw Hill
3. Shapiro, Macroeconomic Analysis,

## Anthropology-I BL – 309 A

Sub. Code: BL – 309A

L-4, C-4

### Course Objectives:

- To understand the key concepts and theoretical frameworks in economic anthropology.
- To explore the diversity of economic systems, including traditional, modern, and mixed economies.
- To analyze the role of culture in shaping economic behaviors and systems.
- To examine global economic issues through the lens of anthropological theory.
- To develop critical thinking skills regarding the impact of economic processes on individuals, communities, and societies.

### Unit 1: Introduction to Economic Anthropology

#### 1. Definition and Scope of Economic Anthropology:

- Overview of Economic Anthropology as a subfield of anthropology.
- The relationship between economic anthropology and traditional economics.
- Key questions and approaches in economic anthropology.

#### 2. Historical Development of Economic Anthropology:

- Early theoretical perspectives: From classical political economy to anthropological insights.
- The influence of Marx, Weber, and other theorists on the study of economic systems.
- The emergence of key anthropologists: Malinowski, Mauss, Boas, and others.

#### 3. The Economic System:

- The concept of economic systems in anthropology.
- Overview of different economic systems: Foraging, horticulture, pastoralism, and industrial economies.
- Subsistence economy vs. market economy.

### Unit 2: Theoretical Foundations in Economic Anthropology

#### 1. Classical Economic Theories:

- Theories of Adam Smith, Karl Marx, and Max Weber.
- The labor theory of value and its influence on anthropology.
- The notion of exchange and market relations.

#### 2. Formal vs. Substantive Economics (Karl Polanyi's Approach):

- Formalism: Economics as a universal set of rules.
- Substantivism: Economic systems as part of broader cultural systems.
- Polanyi's critique of Western economic assumptions in non-Western societies.

### **3. Reciprocity, Redistribution, and Market Exchange:**

- Types of exchange: Generalized reciprocity, balanced reciprocity, and negative reciprocity.
- The concept of redistribution in traditional societies (e.g., potlatch).
- Market exchange in both traditional and modern societies.

## **Unit 3: Production and Labor**

### **1. Modes of Production:**

- The concept of modes of production: Kin-based, household, and capitalist systems.
- Foraging, horticulture, pastoralism, and agriculture as modes of production.
- Industrial and post-industrial production systems.

### **2. Labor and Work:**

- The division of labor in different societies: Gender, age, and status.
- The anthropology of labor and the concept of “alienation” in capitalist societies.
- Rituals, kinship, and labor in traditional societies.

### **3. The Impact of Capitalism:**

- The rise of capitalism and its impact on traditional economies.
- Labor migration, wage labor, and the global workforce.
- Globalization and labor in the 21st century.

## **Unit 4: Consumption and Exchange**

### **1. Consumption and Social Status:**

- The role of consumption in defining social identity and status.
- The relationship between consumption and social relations (e.g., conspicuous consumption).
- The anthropology of food, housing, and material culture.

### **2. The Role of Markets:**

- The development and functioning of markets in various cultures.
- Comparative perspectives on markets: Local, national, and global markets.
- The anthropology of money and its role in exchange.

### **3. Gift Exchange and Reciprocity:**

- Marcel Mauss and the theory of the gift economy.
- The social and cultural significance of gift exchange in different societies.
- Reciprocity and its link to social cohesion and solidarity.

## **Unit 5: Globalization and Economic Change**

### **1. Global Economic Systems and the Anthropology of Development:**

- The anthropology of development and modernization theories.
  - Impact of globalization on traditional economies.
  - Economic anthropology in the context of international development.
2. **Neoliberalism and Global Capitalism:**
- The spread of neoliberal economic policies and their impacts on local economies.
  - Global capitalism and the anthropology of multinational corporations.
  - Case studies of economic transformation in various countries (e.g., Latin America, Asia).
3. **Environmental and Political Economy:**
- The role of economic systems in environmental degradation.
  - Political economy of resource management and environmental conservation.
  - Anthropological perspectives on sustainable development and indigenous economies.

**Suggested Books:**

- *Economic Anthropology: A Systematic Approach* by David W. MacKenzie
- *The Anthropology of Economy: A Reader* edited by Karen S. Ho and Lisa R. Procter
- *The Gift* by Marcel Mauss
- *Globalization: A Very Short Introduction* by Manfred B. Steger
- *A World of Struggle: How Power, Law, and Expertise Shape Global Political Economy* by David Kennedy
- *The Yanomami: The Social Anthropology of an Amazonian People* by Reena L. Halperin
- *Globalization: A Very Short Introduction* by Manfred B. Steger
- *The Anthropology of Development and Globalization* by Richard H. Robbins
- *The Great Transformation: The Political and Economic Origins of Our Time* by Karl Polanyi
- *Economic Anthropology* by Eric R. Wolf.

## Political Economy-I BL – 309 B

Sub. Code: BL – 309B

L-4, C-4

### Course Objectives:

- To introduce students to the fundamental concepts and theories in political economy.
- To explore the relationship between politics and economics in both historical and contemporary contexts.
- To analyze the role of state, market, and society in the organization and regulation of economic systems.
- To examine how economic systems are influenced by political ideologies, institutions, and global trends.
- To understand the impact of political economy on issues like development, inequality, and globalization.

### Unit 1: Introduction to Political Economy

#### 1. Defining Political Economy:

- What is Political Economy? Scope, relevance, and interdisciplinary nature.
- The relationship between economics, politics, and sociology.
- Key questions in political economy: How do political decisions influence economic outcomes? How do economic systems shape political structures?

#### 2. Historical Overview:

- Classical political economy and its evolution: From Mercantilism to Adam Smith.
- Early political economists: Karl Marx, David Ricardo, John Stuart Mill, and others.
- The shift from classical to neoclassical economics and its political implications.

#### 3. The Role of the State in Political Economy:

- The state's role in regulating and shaping economic life.
- Political economy in a capitalist state: Liberalism, welfare state, and neoliberalism.
- Theories of the state: Marxist, Weberian, and pluralist approaches.

### Unit 2: Classical Political Economy

#### 1. Adam Smith and the Foundations of Classical Economics:

- The invisible hand: Free markets and the role of self-interest.
- The division of labor and specialization.
- The nature of wealth and the principle of comparative advantage.

#### 2. David Ricardo and Comparative Advantage:

- Comparative advantage theory and international trade.
- The law of diminishing returns and its impact on production and distribution.
- Critiques of Ricardian theory.

#### 3. Karl Marx and the Critique of Capitalism:

- Marx's historical materialism and the role of class struggle in shaping the economy.
- The theory of surplus value and exploitation.

### **Unit 3: Neoliberalism and Contemporary Theories**

#### **1. The Rise of Neoliberalism:**

- What is neoliberalism? The shift from Keynesian economics to neoliberal policy.
- Key principles of neoliberalism: Market liberalization, deregulation, and privatization.
- The political economy of neoliberalism: The role of international institutions like the IMF, World Bank, and WTO.

#### **2. Post-War Keynesianism and the Welfare State:**

- Keynesian economics and the role of government intervention in the economy.
- The development of welfare states in the 20th century.
- Crisis of Keynesianism and the rise of neoliberalism in the 1970s.

#### **3. Theories of Global Political Economy:**

- Globalization and its political and economic implications.
- Dependency theory, world-systems theory, and the role of imperialism.
- The politics of economic development in the Global South.

### **Unit 4: Political Economy of Development**

#### **1. Theories of Economic Development:**

- The stages of economic development: Modernization theory and its critiques.
- Dependency theory and the role of the global economic system in underdevelopment.
- World-systems theory and the development of peripheral nations.

#### **2. The State and Economic Development:**

- The role of the state in development: State-led vs. market-led development.
- Theories of state intervention and development: Import substitution industrialization (ISI) vs. export-oriented industrialization (EOI).
- The challenges of governance, corruption, and political stability in developing economies.

#### **3. Globalization and Development:**

- The impact of globalization on developing countries: Trade, investment, and inequality.
- The role of international financial institutions in shaping development policies.
- The debate between economic liberalization and protectionism.

## **Unit 5: Political Economy of Globalization**

### **1. Understanding Globalization:**

- What is globalization? Economic, political, and cultural dimensions.
- The historical roots and modern processes of globalization.
- The role of technology, finance, and communication in driving globalization.

### **2. The Politics of Global Capitalism:**

- The rise of multinational corporations and their global reach.
- Financialization and the global economy: The role of global finance in economic crises.
- The impact of global trade agreements (e.g., NAFTA, TPP, and WTO).

### **3. Global Inequality and Power Dynamics:**

- The distribution of wealth in a globalized economy.
- Global inequality: Rich vs. poor countries and the politics of inequality.
- The role of the global political economy in shaping patterns of migration, labor exploitation, and environmental degradation.

## **Unit 6: Contemporary Political Economy: Issues and Debates**

### **1. Environmental Political Economy:**

- The relationship between economic development and environmental sustainability.
- Theories of environmental degradation: Tragedy of the commons and ecological modernization.
- Global environmental governance: The role of international agreements and institutions (e.g., Paris Agreement).

### **2. Economic Crises and Political Economy:**

- Theories of economic crises: The role of finance, banking, and speculative bubbles.
- Case studies: The 2008 financial crisis and its aftermath.
- The politics of austerity and economic recovery in crisis-hit economies.

### **3. Economic Inequality and Social Justice:**

- The politics of income and wealth inequality: Causes and consequences.
- Theories of distributive justice: Rawlsian justice vs. libertarianism.
- Global efforts to address inequality: The role of international organizations, NGOs, and movements.

## **Suggested Books:**

- *An Introduction to Political Economy* by James A. Caporaso and David P. Levine
- *The Wealth of Nations* by Adam Smith
- *A Brief History of Neoliberalism* by David Harvey
- *Development as Freedom* by Amartya Sen
- *The Shock Doctrine: The Rise of Disaster Capitalism* by Naomi Klein
- *The Political Economy of the Environment* by James K. Boyce

- *Capital in the Twenty-First Century* by Thomas Piketty
- *The Shock Doctrine: The Rise of Disaster Capitalism* by Naomi Klein
- *The Political Economy of the Environment* by James K. Boyce
- *Capital in the Twenty-First Century* by Thomas Piketty.

## **SPANISH II (BL-302 A)**

**Sub. Code: BL – 302A**

**L-4, C-4**

### **Course Objectives**

By the end of this course, students will be able to:

- Understand and use basic Spanish vocabulary and grammar.
- Engage in simple conversations about everyday topics.
- Read and comprehend short texts in Spanish.
- Write basic sentences and paragraphs in Spanish.

### **Unit 1: Introduction to Spanish**

- Overview of the Spanish language and its global significance
- Alphabet and pronunciation
- Basic greetings and introductions

### **Unit 2: Basic Grammar and Vocabulary**

- Nouns, articles, and gender
- Common adjectives and their agreement with nouns
- Essential vocabulary: family, colors, numbers

### **Unit 3: Present Tense Verbs**

- Introduction to regular verbs (AR, ER, IR)
- Conjugation patterns and usage
- Practical exercises and dialogues

### **Unit 4: Common Expressions and Questions**

- Essential phrases for everyday conversation
- Forming questions and negation

**Suggested Readings:**

1. Madrigal's Magic Key to Spanish" by Margarita Madrigal
2. A classic introductory book that simplifies grammar and vocabulary, making it accessible for beginners.
3. "Practice Makes Perfect: Spanish Verb Tenses" by Dorothy Richmond
4. Focuses on mastering verb tenses with clear explanations and exercises.
5. "Easy Spanish Step-By-Step" by Barbara Bregstein
6. A structured approach to learning Spanish, emphasizing grammar and vocabulary in a logical progression.

## **GERMAN II (BL302 B)**

**Sub. Code: BL – 302B**

**L-4, C-4**

### **Course Objectives**

- Understand and use basic German vocabulary and grammar.
- Engage in simple conversations about everyday topics.
- Read and comprehend short texts in German
- Write basic sentences and paragraphs in German.

### **Unit 1: Introduction to German**

- German alphabet and pronunciation
- Basic greetings and introductions
- Pronunciation drills
- Icebreaker introductions

### **Unit 2: Numbers and Colors**

- Numbers 1-100
- Basic colors and their usage
- Number games
- Color identification exercises

### **Unit 3: Everyday Vocabulary**

- Family members
- Common nouns (e.g., household items, animals)
- Create a family tree
- Vocabulary flashcard games

### **Unit 4: Basic Grammar and Sentence Structure**

- Introduction to articles (definite and indefinite)
- Subject-verb-object structure

**Suggested Readings:**

1. "German Made Simple: Learn to Speak and Understand German Quickly and Easily"  
Author: Arnold Leitner
2. A straightforward introduction to the language, covering essential vocabulary and grammar.
3. "German for Dummies"
4. Author: Wendy Foster
5. "The Everything Learning German Book"
6. "Practice Makes Perfect: Complete German Grammar"
7. Author: Ed Swick
8. A comprehensive workbook that reinforces grammar concepts with exercises and explanations.

## **CHINESE II (BL-302C)**

**Sub. Code: BL – 302C**

**L-4, C-4**

### **Course Objectives**

By the end of this course, students will be able to:

- Understand and use basic Chinese vocabulary and grammar.
- Engage in simple conversations about everyday topics.
- Read and comprehend short texts in Chinese.
- Write basic sentences and paragraphs in Chinese.

### **Unit 1: Introduction to Chinese**

- Pinyin and pronunciation
- Basic greetings and self-introduction
- Pronunciation practice
- Icebreaker introductions

### **Unit 2: Numbers and Dates**

- Numbers 1-100
- Days of the week and months
- Number games
- Calendar exercises

### **Unit 3: Everyday Vocabulary**

- Family members
- Common nouns (e.g., animals, objects)
- Family tree project
- Vocabulary flashcards

### **Unit 4: Basic Grammar and Sentence Structure**

- Subject-verb-object structure

- Introduction to measure words

### **Suggested Readings**

- "Integrated Chinese" (Textbook + Workbook)
  - Authors: Tao-chung Yao, Yuehua Liu, et al.
  - A comprehensive series that covers speaking, reading, and writing. It includes cultural notes and exercises.
- "Chinese Made Easier"
  - Authors: Maureen S. W. D. H. Wong, et al.
  - Focuses on conversational skills with a gradual introduction to reading and writing.
- "New Practical Chinese Reader"
  - Authors: Liu Xun
  - A popular series that integrates language and cultural elements, with a focus on conversational skills.
- "Reading & Writing Chinese"
  - Author: William McNaughton
  - A guide to learning characters, with clear explanations and practice exercises.

## **FRENCH II (BL-302D)**

**Sub. Code: BL – 302D**

**L-4, C-4**

### **Course Objectives**

- Understand and use basic French vocabulary and grammar.
- Engage in simple conversations about everyday topics.
- Read and comprehend short texts in French.
- Write basic sentences and paragraphs in French.

### **Unit 1: Daily Routines**

- Common verbs (aller, être, avoir)
- Talking about daily activities

### **Unit 2: Food and Drink**

- Vocabulary related to food
- Expressing likes and dislikes

### **Unit 3: Clothing and Shopping**

- Vocabulary for clothing
- Shopping dialogue and role-play

### **Unit 4: Directions and Transportation**

- Asking for and giving directions

### **Suggested Readings:**

1. "Easy French Step-By-Step" by Myrna Bell Rochester
2. A clear, gradual approach to learning French grammar and vocabulary.
3. "French for Dummies" by Dodi-Katrin Schmidt and Michelle M. Williams
4. "Practice Makes Perfect: Complete French Grammar" by Annie Heminway
5. Comprehensive grammar explanations with exercises for practice

## Family Law – II ( Muslim Law)

Sub. Code: BL 304

L – 4, C – 4.

### Course objectives

- The Muslim Law course provides students with an in-depth understanding of Islamic jurisprudence and its application in modern legal contexts.
- Students will gain knowledge about the principles governing family law, inheritance, contractual relationships, and criminal law within the framework of Shari'ah.
- The course also emphasizes the interaction between personal law and secular law in India and the role of judicial intervention and legal reforms in shaping Muslim law practices.
- By the end of the course, students will have a comprehensive understanding of Muslim personal law and its application in the Indian legal system, and will be able to critically assess contemporary issues and challenges faced by Muslim communities in India and other parts of the world.

### Unit-I :

Origin and development of Muslim Law - Sources of Muslim Law - Schools of Muslim Law - Difference between the Sunni and Shia Schools – Sub-schools of Sunni Law - Operation and application of Muslim Law - Conversion to Islam - Effects of conversion - Law of Marriage, nature of Muslim Marriage - Essential requirements of valid Marriage - Kinds of Marriages - distinction between void, irregular and valid marriage - **Dower (Mahr) - Origin, nature and importance of dower, object of dower and classification of dower.**

### Unit-II:

Divorce - Classification of divorce - different modes of Talaq - Legal consequences of divorce - Dissolution of Muslim Marriage Act, 1939 - Maintenance, Principles of maintenance, Persons entitled to maintenance - **The Muslim Women (Protection of Rights on Divorce) Act, 1986 - Effect of conversion on maintenance and difference between Shia and Sunni Law.**

### Unit-III:

Parentage - Maternity and Paternity - Legitimacy and acknowledgment - Guardianship - Meaning - Kinds of guardianship - Removal of guardian - Difference between Shia and Sunni Law. Gift - Definition of Gift - Requisites of valid gift - Gift formalities - Revocation of gift - Kinds of gift. **Wills - Meaning of Will - Requisites of valid Will - Revocation of Will - Distinction between Will and Gift - Difference between Shia and Sunni Law.**

### Unit-IV :

Waqf \_ Definition - Essentials of Waqf - Kinds of Waqf – Creation of Waqf - - Revocation of Waqf - Salient features of the Waqf Act, 1995 – Mutawalli - Who can be Mutawalli - Powers and duties of Mutawalli - Removal of Mutawalli and Management of Waqf property. Succession - Application of the property of a deceased Muslim - **Legal position of heirs as representatives - Administration - Waqf Tribunals and Jurisdiction.**

**Suggested Readings:**

1. Tahir Mahmood: The Muslim Law of India, 1980, Law Book Company, Allahabad.
  2. Aquil Ahmed: Text Book of Mohammadan Law, 5th Edition 1992, Central 4. Law Agency, Allahabad.
  3. Prof. G.C.V. Subba Rao: Family Law in India, 6th Edition, 1993, S.Gogia & Company, Hyderabad.
  5. Asaf A.A. Fyzee: Outlines of Mohammadan Law, 4th Edition, 1999, Oxford University Press, Delhi.
